

Pub. L. 115–218, 132 Stat. 1547 (48 U.S.C. 1806).

- 2. Amend § 214.2 as follows:
 - a. In Table 2 to Paragraph (f)—Paragraph Contents, item (2), remove “I–20 ID” and add in its place “Form I–20 or successor form”.
 - b. Paragraph (f)(6)(iii)(B) is revised.
 - c. Paragraph (f)(8)(iii) is removed and reserved.
 - d. Paragraph (f)(9)(ii)(F)(2) is removed and reserved.
 - e. In paragraph (m)(l)(i)(B), remove “SEVIS Form I–20” and add in its place “Form 1–20”.
 - f. The introductory text of paragraph (m)(9)(vi) is revised.

The revisions read as follows:

§ 214.2 Special requirements for admission, extension, and maintenance of status.

* * * * *

- (f) * * *
- (6) * * *
- (iii) * * *

(B) Medical conditions. The DSO may authorize a reduced course load (or, if necessary, no course load) due to a student’s temporary illness or medical condition for a period of time not to exceed an aggregate of 12 months while the student is pursuing a course of study at a particular program level. In order to authorize a reduced course load based upon a medical condition, the student must provide medical documentation from a licensed medical doctor, a licensed doctor of osteopathy, a licensed psychologist, or a licensed clinical psychologist to the DSO to substantiate the illness or medical condition. The student must provide current medical documentation and the DSO must reauthorize the drop below full course of study each new term, session, or semester. A student previously authorized to drop below a full course of study due to illness or medical condition for an aggregate of 12 months may not be authorized by a DSO to reduce their course load on subsequent occasions while pursuing a course of study at the same program level. A student may be authorized to reduce course load for a reason of illness or medical condition on more than one occasion while pursuing a course of study, so long as the aggregate period of that authorization does not exceed 12 months.

* * * * *

- (m) * * *
- (9) * * *

(vi) *Reduced course load.* The designated school official may authorize an M–1 student to engage in less than a full course of study only where the

student has been compelled by illness or a medical condition that has been documented by a licensed medical doctor, a licensed doctor of osteopathy, a licensed psychologist, or a licensed clinical psychologist to interrupt or reduce their course of study. A DSO may not authorize a reduced course load for more than an aggregate of 5 months per course of study. An M–1 student previously authorized to drop below a full course of study due to illness or medical condition for an aggregate of 5 months, may not be authorized by the DSO to reduce their course load on subsequent occasions during their particular course of study.

Alejandro N. Mayorkas,
Secretary, U.S. Department of Homeland Security.

BILLING CODE 9111–CB–P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 50 and 52

[NRC–2022–0073]

Regulatory Guide: Guidance for a Technology-Inclusive Content of Application Methodology To Inform the Licensing Basis and Content of Applications for Licenses, Certifications, and Approvals for Non-Light-Water Reactors

AGENCY: Nuclear Regulatory Commission.

ACTION: Final guide; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a new Regulatory Guide (RG) 1.253, Revision 0, “Guidance for a Technology-Inclusive Content of Application Methodology to Inform the Licensing Basis and Content of Applications for Licenses, Certifications, and Approvals for Non-Light-Water Reactors.” This new RG provides guidance to assist interested parties and prospective applicants in the development of content for major portions of their safety analysis reports required in applications for permits, licenses, certifications, and approvals by the NRC to ensure that applications for non-light water reactor (non-LWR) facility designs using the Licensing Modernization Project (LMP) process meet the minimum requirements for construction permit, operating license, combined license, or design certification applications.

DATES: RG 1.253, Revision 0, is available on April 3, 2024.

ADDRESSES: Please refer to Docket ID NRC–2022–0073 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2022–0073. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to PDR.Resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- *NRC’s PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

RG 1.253 and the regulatory analysis may be found in ADAMS under Accession Nos. ML23269A222 and ML22076A002, respectively.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

FOR FURTHER INFORMATION CONTACT: Anders Gilbertson, Office of Nuclear Reactor Regulation, telephone: 301–415–1541, email: Anders.Gilbertson@nrc.gov and Ramon Gascot Lozada, Office of Nuclear Regulatory Research, telephone: 301–415–2004, email: Ramon.GascotLozada@nrc.gov. Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC staff is issuing a new guide in the NRC’s “Regulatory Guide” series. This series was developed to describe

methods that are acceptable to the NRC staff for implementing specific parts of the agency’s regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits, certifications, approvals, and licenses.

RG 1.253, Revision 0, “Guidance for a Technology-Inclusive Content of Application Methodology to Inform the Licensing Basis and Content of Applications for Licenses, Certifications, and Approvals for Non-Light-Water Reactors,” provides guidance to assist interested parties and prospective applicants in the development of content for major portions of their safety analysis reports required in applications for permits, licenses, certifications, and approvals by the NRC to ensure that applications for non-LWR facility designs using the LMP process meet the minimum requirements for construction permit, operating license, combined license, or design certification applications.

II. Additional Information

RG 1.253 was issued as a draft regulatory guide (DG) with a temporary identification of DG–1404 (ADAMS Accession No. ML22076A003).

The NRC published DG–1404, Revision 0 in the **Federal Register** on May 25, 2023 (88 FR 33846), for a 45-day public comment period. Subsequently, the comment period was extended by 30-days as noted in the **Federal Register** June 28, 2023 (88 FR 41862). The public comment period closed on August 10, 2023. On September 8, 2023, the NRC published a request for public comment on Revision 1 to DG–1404 in the **Federal Register** (88 FR 61989). Revision 1 to DG–1404 provided additional guidance for the scope, level of detail, elements and plant representation for a probabilistic risk assessment supporting an LMP-based construction permit application. The public comment period for Revision 1 to DG–1404 closed on October 10, 2023. Public comments on DG–1404 Revision 0 and Revision 1, and the staff responses to the public comments are available in ADAMS under Accession No. ML23269A223.

The NRC staff anticipates the submission of advanced power-reactor applications within the next few years based on preapplication engagement initiated by several prospective applicants. Because many of these designs are non-LWRs, the NRC staff developed technology-inclusive, risk-informed, performance-based guidance to support the development of major portions of safety analysis report content for these non-LWR applications. The guidance describes the development of major portions of the safety analysis report using the industry-developed guidance contained in Nuclear Energy Institute (NEI) 21–07, Revision 1, “Technology Inclusive Guidance for Non-Light-Water Reactors, Safety Analysis Report Content for Applicants Using the NEI 18–04 Methodology,” (ADAMS Accession No. ML22060A190). The guidance will facilitate the development of non-LWR applications for construction permits or operating licenses under part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), “Domestic Licensing of Production and Utilization Facilities,” or combined licenses or design certifications under 10 CFR part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants.”

The NRC staff notes it is developing a rule to amend parts 50 and 52 to align reactor licensing processes and incorporate lessons learned from new reactor licensing into the regulations (RIN 3150-A166). This RG may need to be updated to conform to changes to 10 CFR parts 50 and 52, if any, adopted through that rulemaking. Further, as of the date of this RG, the NRC staff is developing an optional performance-based, technology-inclusive regulatory framework for licensing nuclear power plants designated as 10 CFR part 53 (RIN 3150-AK31). The NRC intends to revise this guidance as a part of the ongoing rulemaking for 10 CFR part 53.

To standardize the development of content of a non-LWR application, the staff focused on two activities: the Advanced Reactor Content of Application Project (ARCAP) and the Technology-Inclusive Content of Application Project (TICAP). The ARCAP is an NRC-led activity that is intended to result in guidance for a

complete non-LWR application for review under 10 CFR part 50 or 10 CFR part 52, and which the staff would update, as appropriate, pending the issuance of the 10 CFR part 50 and 10 CFR part 52 rulemaking previously mentioned in this document, or if the Commission issues a final 10 CFR part 53 rule.

The TICAP is an industry led guidance activity focused on the scope and depth of information to include in the portions of a safety analysis report that address the implementation of the LMP methodology described in NEI 18–04, Revision 1, and endorsed by the NRC in Regulatory Guide 1.233, “Guidance for a Technology-Inclusive, Risk-Informed, and Performance-Based Methodology to Inform the Licensing Basis and Content of Applications for Licenses, Certifications, and Approvals for Non-Light-Water Reactors,” (ADAMS Accession No. ML20091L698).

During the 711th meeting of the Advisory Committee on Reactor Safeguards (ACRS), December 6–7, 2023, the ACRS, the NRC staff, and representatives of other stakeholders discussed guidance documents related to the ARCAP and the TICAP. On December 20, 2023, the ACRS issued a report documenting its review of these guidance documents (ADAMS Accession No. ML23348A182). The conclusions and recommendations in the ACRS report apply to all the ARCAP and TICAP guidance documents. In its December 2023 report, the ACRS also recommended specific changes to DG–1404. As set forth in its letter dated March 18, 2024, (ADAMS No. ML24024A025) in which the NRC staff responded to the ACRS report, the NRC staff revised RG 1.253 to address specific ACRS recommendations.

As noted in the **Federal Register** on December 9, 2022 (87 FR 75671), this document is being published in the “Rules” section of the **Federal Register** to comply with publication requirements under 1 CFR chapter I.

The table in this rulemaking provides the document description, ADAMS accession number, and, if appropriate, the docket identification number on supporting documents associated with the document that is the subject of this **Federal Register** document.

III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Backfitting, Forward Fitting, and Issue Finality

RG 1.253, Revision 0, does not constitute backfitting as defined in 10 CFR 50.109, "Backfitting," and as described in Management Directive (MD) 8.4, "Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests"; does not constitute forward fitting as that term is defined and described in MD 8.4; and does not affect the issue finality of any approval issued under 10 CFR part 52. The guidance would not apply to any current licensees or applicants or existing or requested approvals under 10 CFR part 52, and therefore its issuance cannot be a backfit or forward fit or affect issue finality. Further, as explained in RG 1.253, applicants and licensees would not be required to comply with the positions set forth in RG 1.253.

V. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the "Regulatory Guide" series.

Dated: March 28, 2024.

For the Nuclear Regulatory Commission.

Meraj Rahimi,

Chief, Regulatory Guide and Programs Management Branch, Division of Engineering, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-P

DEPARTMENT OF ENERGY

10 CFR Part 430

[EERE-2020-BT-STD-0015]

RIN 1904-AE87

Energy Conservation Program: Clarifying Amendments to the Error Correction Rule

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Final rule.

SUMMARY: The Department of Energy ("DOE" or "the Department") is amending its procedures for providing public input on possible corrections of errors contained in the regulatory text of energy conservation standard final rules. In this final rule, DOE modifies certain aspects of these procedures to clarify and reflect the Department's intent regarding the error correction process that it previously created. The procedures as amended in this final rule do not in any way restrict, limit, diminish, or eliminate the Secretary's discretion to determine whether to establish or amend an energy conservation standard, or to determine the appropriate level at which to amend or establish any energy conservation standard.

DATES: The effective date of this rule is April 3, 2024.

ADDRESSES: The docket for this rulemaking, which includes **Federal Register** notices, comments, and other supporting documents/materials, is available for review at www.regulations.gov. All documents in the docket are listed in the www.regulations.gov index. However, some documents listed in the index, such as those containing information that is exempt from public disclosure, may not be publicly available. The docket web page can be found at www.regulations.gov/docket?D=EERE-2020-BT-STD-0015. The docket web page explains how to access all documents, including public comments, in the docket.
