

II. Final Decision and Order

OSHA staff examined TUVRNA’s expansion application, their capability to meet the requirements of the test standard, and other pertinent information. Based on its review of this

evidence, OSHA finds that TUVRNA meets the requirements of 29 CFR 1910.7 for expansion of its recognition, subject to the limitations and conditions listed below. OSHA, therefore, is proceeding with this final notice to

grant TUVRNA’s scope of recognition. OSHA limits the expansion of TUVRNA’s recognition to testing and certification of products for demonstration of conformance to the test standards shown below in Table 1.

TABLE 1—APPROPRIATE TEST STANDARDS FOR INCLUSION IN TUVRNA’S NRTL SCOPE OF RECOGNITION

Table with 2 columns: Test standard, Test standard title. Row 1: UL 61010–2–051, Electrical Equipment for Measurement, Control and Laboratory Use—Part 2—051: Particular Requirements for Laboratory Equipment for Mixing and Stirring. Row 2: UL 61010–2–061, Electrical Equipment for Measurement, Control and Laboratory Use—Part 2—061: Particular Requirements for Laboratory Atomic Spectrometers with Thermal Atomization and Ionization.

OSHA’s recognition of any NRTL for a particular test standard is limited to equipment or materials for which OSHA standards require third-party testing and certification before using them in the workplace. Consequently, if a test standard also covers any products for which OSHA does not require such testing and certification, a NRTL’s scope of recognition does not include these products.

A. Conditions

Recognition is contingent on continued compliance with 29 CFR 1910.7, including but not limited to, abiding by the following conditions of recognition:

- 1. TUVRNA must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its operations as a NRTL, and provide details of the change(s);
2. TUVRNA must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and
3. TUVRNA must continue to meet the requirements for recognition, including all previously published conditions on TUVRNA’s scope of recognition, in all areas for which it has recognition.

OSHA hereby expands the scope of recognition of TUVRNA, subject to the limitations and conditions specified above.

III. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW, Washington, DC 20210, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor’s Order No. 8–2020 (85 FR 58393, September 18, 2020) and 29 CFR 1910.7.

Signed at Washington, DC, on April 17, 2024.

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health. [FR Doc. 2024–08685 Filed 4–23–24; 8:45 am] BILLING CODE 4510–26–P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation. ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following request for revision of the approved collection of research and development data in accordance with the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the Federal Register and no comments were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR ADDITIONAL INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–

8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

SUPPLEMENTARY INFORMATION:

Title of Collection: National Science Foundation Research Traineeship (NRT) Monitoring System.

OMB Number: 3145–0263.

Type of Request: Intent to seek approval to renew an information collection.

Proposed Project: The National Science Foundation’s (NSF’s) Division of Graduate Education (DGE) in the Directorate for STEM Education (EDU) administers the NSF Research Traineeship (NRT) program. The NRT program is designed to encourage the development and implementation of bold, new, and potentially transformative models for STEM graduate education training. The NRT program seeks to ensure that graduate students in research-based master’s and doctoral degree programs develop the skills, knowledge, and competencies needed to pursue a range of STEM careers. NRT is dedicated to effective training of STEM graduate students in high-priority interdisciplinary or convergent research areas through the use of a comprehensive traineeship model that is innovative, evidence-based, and aligned with changing workforce and research needs.

Previously, NRT awardees provided NSF with information on their activities through periodic research performance progress reports. The NRT monitoring system (also referred to as the NRT reporting system) has replaced these reports with a tailored program monitoring system that uses internet-based information and communication technologies to collect, review, and validate specific data on NRT awards. EDU is committed to ensuring the efficiency and effectiveness with which respondents provide and NSF staff can access and analyze data on funded projects within the NRT programs.

The NRT monitoring system includes subsets of questions aimed at the different project participants (*i.e.*, Principal Investigators (PIs), and trainees), and allows for data analysis and data report generation by authorized NSF staff. The collection generally includes three categories of descriptive data: (1) Staff and project participants (data that are necessary to determine individual-level treatment and control groups for future third-party study or for internal evaluation); (2) project implementation characteristics (also necessary for future use to identify well-matched comparison groups); and (3) project outputs (necessary to measure baseline for pre- and post-NSF-funding-level impacts). NRT awardees will be required to report data on an annual basis for the life of their award.

Use of the Information: NSF will primarily use the data from this collection for program planning, management, and audit purposes to respond to queries from the Congress, the public, NSF's external merit reviewers, who serve as advisors, including Committees of Visitors (COVs), the NSF's Office of the Inspector General, and as a basis for either internal or third-party evaluations of individual programs. This information is required for effective administration, communication, program and project monitoring and evaluation, and for measuring attainment of NSF's program, project, and strategic goals, and as identified by the President's Accountability in Government Initiative; GPRA, and the NSF's Strategic Plan. The Foundation's FY 2022–2026 Strategic Plan may be found at: https://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf22068.

Since this collection will primarily be used for accountability and evaluation purposes, including responding to queries from COVs and other scientific experts, a census, rather than sampling design, typically is necessary. At the individual project level, funding can be adjusted based on individual project's responses to some of the surveys. Some data collected under this collection will serve as baseline data for separate research and evaluation studies.

NSF-funded contract or grantee researchers and internal or external evaluators in part may identify control, comparison, or treatment groups for NSF's education and training portfolio using some of the descriptive data gathered through this collection to conduct well-designed, rigorous research and portfolio evaluation studies.

Burden on the Public: Estimated at 2–16 hours per respondent for 4080 respondents for a total of 5,150 hours (per year).

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: April 19, 2024.

Suzanne H. Plimpton,
Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–263; NRC–2023–0031]

Northern States Power Company; Monticello Nuclear Generating Plant Unit 1; Draft Environmental Impact Statement

AGENCY: Nuclear Regulatory Commission

ACTION: Request for comment; public comment meetings.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft Site-Specific Environmental Impact Statement for License Renewal of Nuclear Plants, Supplement 26, Second Renewal, Regarding Subsequent License Renewal for Monticello Nuclear Generating Plant, Unit 1, NUREG–1437, regarding the proposed subsequent renewal of Renewed Facility Operating License No. DPR–22, for an additional 20 years of operation for Monticello Nuclear Generating Plant, Unit 1 (Monticello). Monticello is located in central Minnesota on the banks of the Mississippi River in Sherburne and Wright Counties, approximately 38 miles northwest of Minneapolis, MN. Possible alternatives to the proposed action of subsequent license renewal

(SLR) include no action and reasonable replacement power alternatives.

DATES: The staff will hold two public meetings, one in-person near Monticello and one through an online webinar and teleconference call, on the draft site-specific environmental impact statement (EIS), including a presentation on the preliminary findings and a transcribed public comment session. The virtual meeting will be held May 8, 2024, at 1 p.m. central time (CT). The in-person meeting will be held on May 15, 2024, at 6 p.m. CT, at the Monticello Community Center, South Mississippi Room, 505 Walnut St., Monticello, MN 55362. The in-person public meeting will be preceded by an open house from 5–6 p.m. CT, at the Monticello Community Center. The public meeting details can be found on the NRC's Public Meeting Schedule at <https://www.nrc.gov/pmns/mtg>. Members of the public are invited to submit comments by June 10, 2024. Comments received after that date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before that date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2023–0031. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Email:* Comments may be submitted to the NRC electronically using the email address MonticelloEnvironmental@nrc.gov.

- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Jessica Umaña, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–5207; email: Jessica.Umana@nrc.gov.
