transmission pipeline segment have undergone changes from a Class 1 to Class 3 location.

The Cypress Line Pipeline segment is a 24-inch diameter natural gas transmission pipeline, 0.176 miles in length, located in Chatham County, Georgia. Please submit comments on any potential safety, environmental, and other relevant considerations implicated by the special permit request. Comments may include relevant data.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comments closing date. Comments received after the closing date will be evaluated if it is possible to do so without incurring additional expense or delay.
