Comments: Some commenters supported prohibiting discrimination against applicants for admission based on pregnancy or related conditions because it would allow for a more inclusive educational environment, would contribute to increased college or university completion rates and greater upward mobility for students who are pregnant or experiencing pregnancy-related conditions, and would be vital to such applicants' wellness and success. A group of commenters stated that the proposed regulations clarify and expand upon existing Title IX protections and

help ensure that neither pregnancy nor parenting status hinder a student's full and equal access to educational opportunities.

Discussion: The Department acknowledges commenters' support for § 106.21. The Department shares the goals of ensuring that school environments are inclusive and that recipients prevent discrimination and ensure equal access to their education programs or activities for students who are pregnant or experiencing pregnancy-related conditions to give full effect to Title IX.

The Department made three changes to the text of final § 106.21(c)(2). Upon review, the Department determined that replacing the word ''apply'' with ''implement'' in § 106.21(c)(2)(i) improves clarity consistent with similar revisions in final §§ 106.40(a) and 106.57(a), and for consistency also decided to replace the words ''establish or follow'' in § 106.21(c)(2)(ii) with ''adopt or implement.'' In addition, in § 106.21(c)(2)(iii), the Department made a grammatical correction by adding the word ''a'' between the words ''[m]ake'' and ''pre-admission inquiry.''

The Department explains the application of the final regulations to parental status in the discussion of the definition of ''parental status'' in § 106.2.

Changes: Section 106.21(c)(2)(i) has been revised to substitute the word ''implement'' for the word ''apply.'' Section 106.21(c)(2)(ii) has been revised to substitute the words ''adopt or implement'' for the words ''establish or follow.'' Lastly, § 106.21(c)(2)(iii) has been revised to add the word ''a'' before ''pre-admission inquiry.''

Application Only to Recipients Subject to Subpart C

Comments: Some commenters suggested that the Department clarify that the revised provisions in proposed § 106.21 do not apply to nonvocational elementary schools and secondary schools, which the commenters deemed appropriate considering current § 106.15(d), proposed § 106.31(a)(3), and current Departmental guidance.

Discussion: The Department confirms that Subpart C of the regulations, which governs admissions, does not apply to nonvocational elementary schools and secondary schools. 34 CFR 106.15(c), (d). The Department adds that, under § 106.34(a), nonvocational elementary schools and secondary schools may not refuse participation based on sex, with some exceptions listed in the provision, and § 106.34(c) addresses admissions to single-sex public nonvocational elementary schools and secondary schools.

Changes: None.

''Perceived'' and ''Expected''

Comments: One commenter urged the Department to add ''perceived'' and ''expected'' to the list of protected statuses in § 106.21(c)(2)(ii) to better capture the ways that stigma and bias about pregnancy prevent equal access to educational opportunities. The commenter explained that adding ''perceived'' and ''expected'' to the list of protected statuses would help ensure that applicants rumored or otherwise perceived to be pregnant are not denied educational opportunities, that applicants who seek fertility care or otherwise plan to be pregnant are not discriminated against on that basis, and that applicants are not denied educational opportunities because they might become pregnant.

Discussion: The Department declines to add ''perceived'' and ''expected'' statuses to § 106.21(c)(2)(ii) for the same reasons discussed in connection with the comment recommending that the Department make the same change to the ''definition of pregnancy'' in § 106.2. The Department's rationale is explained more fully in the discussion of § 106.10.

Changes: None.

Pre-Admission Inquiries

Comments: One commenter requested that the Department change proposed § 106.21(c)(2)(iii), which prohibits a recipient from making a pre-admission inquiry into the marital status of an applicant, to include ''current, potential, or past pregnancy or related conditions,'' which the commenter stated is particularly important following *Dobbs.* That commenter also requested that the Department extend proposed § 106.21(c)(2)(iii) to include ''family status and parental status'' because women are often custodial parents and a recipient with stereotypical concerns about a parenting applicant's commitment to her education may use such information to discriminate against that applicant. Another commenter urged the Department to clarify that pre-admission inquiries regarding the parental status of an applicant are permitted under Title IX if they do not affect the applicant's chances of admission.

A group of commenters objected to the Department's proposal to replace the phrase ''such applicants of both sexes'' in current § 106.21(c)(4) with ''all applicants'' in proposed § 106.21(c)(2)(iii), because the ''both sexes'' phrasing best conveys what Title IX prohibits and is used in the Title IX statute, the removal of the phrase would make the sentence grammatically incorrect, and keeping the words ''both sexes'' would not preclude a recipient from choosing to ask more specifically how an applicant identifies.

Some commenters encouraged the Department to consider the impact of proposed changes to pre-admission inquiries regarding a student's sex in proposed § 106.21(c)(2)(iii), including the impact on student privacy.

Discussion: The Department agrees that an applicant's pregnancy or related conditions and sex-based distinctions regarding parental, family, or marital status should not affect their chances of admission to a recipient institution and emphasizes that pre-admission inquiries regarding the marital status of an applicant are not permitted under the Department's Title IX regulations. However, the Department declines to add ''current, potential, or past pregnancy or related conditions'' or ''family status and parental status'' to § 106.21(c)(2)(iii) of the final regulations. Section 106.21(c)(2)(i) and (ii) of the final regulations already states that a recipient covered by subpart C must not discriminate against any applicant based on current, potential, or past pregnancy or related conditions and must not implement any policy, practice, or procedure—including pre-admission inquiries—concerning the parental, family, or marital status of a student or applicant that treats that person differently based on sex. In addition, the Department acknowledges the concerns raised by commenters who explained that the widely used Common Application includes a question regarding whether the applicant has children and if so, how many, and that the anonymized responses are a rare source of data on the parenting student population that is helpful to researchers and advocates.

The Department disagrees with the assertion that it is critical to retain the words ''such applicants of both sexes'' in § 106.21(c)(2)(iii). Contrary to the commenters' characterization, stating that this pre-admission inquiry is permissible ''only if this question is asked of all applicants'' is consistent with Title IX's prohibition on sex discrimination and conveys the same point as the current language, which prohibits a recipient from asking such questions just of students of one sex. In addition, the words ''all applicants'' are more inclusive and are grammatically correct. The Department also does not find persuasive the fact that the ''both sexes'' language was used in the 1972 statutory text, because it was used in only one specific provision for

recipients that were transitioning from admitting only students of one sex to admitting students of both sexes. *See* 20 U.S.C. 1681(a)(2).

As explained more fully in the discussion of § 106.44(j), the Department has carefully considered the impact of the regulatory changes on maintaining confidentiality of personally identifiable information, and in response to commenter concerns the Department revised final § 106.44(j) to prohibit the disclosure of personally identifiable information obtained in the course of complying with this part, with some exceptions. The disclosure restrictions are explained more fully in the discussion of § 106.44(j).

Changes: None.

Intersection With Disability Law

Comments: One commenter opposed the requirement in proposed § 106.21(c)(1) that, in determining admissions, a recipient must treat pregnancy or related conditions or any temporary disability resulting therefrom in the same manner and under the same policies as any other temporary disability or physical condition, because the commenter interpreted the standard as requiring pregnancy to be considered a disability. Another commenter asserted that the proposed regulations were inconsistent with disability law to the extent they would require a recipient to treat pregnant applicants differently than those with other types of temporary disabilities.

Discussion: As the Department indicated in the July 2022 NPRM, some conditions or complications related to pregnancy might qualify as disabilities under Section 504 and the ADA, but pregnancy itself is not a disability. 87 FR 41523. The Department continues to stress that if someone who is pregnant or experiencing pregnancy-related conditions has a disability, Section 504 or the ADA may also apply, whether or not the disability is related to pregnancy.

At the same time, the Department agrees that it is important that a recipient understand how to treat applicants for admission who are pregnant or experiencing pregnancy-related conditions under Title IX. The Department has considered the fact that some recipients may not maintain standalone policies related to ''temporary disabilities,'' since that term is not used in Section 504 or the ADA, and that such an omission could result in the application of the Title IX provision regarding pregnancy and admissions being unclear. To simplify § 106.21(c)(1) and avoid any suggestion that the provision applies only when a recipient maintains policies related strictly to ''temporary disabilities'' that may be used in comparison, the Department has deleted the term ''or any temporary disability resulting therefrom'' and changed the words ''any other temporary disability or physical condition'' to ''any other temporary medical conditions.'' The Department views these changes as clarifying the scope of coverage and ensuring that § 106.21(c)(1) will apply to the extent a recipient has any policies or practices regarding temporary medical conditions, as that term is ordinarily understood.

A recipient's policy with respect to temporary medical conditions may be subsumed within its policy related to disabilities, or it may be separate. The Department also clarifies that, if the recipient does not have a policy regarding the treatment of temporary medical conditions, it must treat pregnancy or related conditions in the same manner that it treats temporary medical conditions in practice. When the applicant has a pregnancy-related condition that qualifies as a disability under the ADA or Section 504, the individual is also protected from discrimination under those laws as well.

Because a recipient's policies and practices regarding other temporary medical conditions are the proper comparators for pregnancy or related conditions, final § 106.21(c)(1) requires that pregnancy or related conditions and temporary medical conditions be treated in the same manner and under the same policies and practices, including with respect to the provision of reasonable modifications to applicants with temporary medical conditions. If a recipient does not have a policy or practice of providing reasonable modifications for applicants with temporary medical conditions, it is not required to provide reasonable modifications for pregnancy or related conditions under Title IX. However, as noted above, when the applicant has a pregnancy-related condition that qualifies as a disability, the recipient must comply with its nondiscrimination obligations under the ADA and Section 504.

Changes: In final § 106.21(c)(1), the words ''or any temporary disability resulting therefrom'' have been removed and the words ''disability or physical condition'' have been changed to ''medical conditions.''

Request To Extend Reasonable Modifications to Applicants

Comments: A group of commenters asserted that under proposed § 106.21(c)(1), pregnant and parenting applicants for admission should have rights to reasonable modifications under Title IX, independent of what modifications are provided to those with temporary disabilities, so that pregnant and parenting applicants are afforded the same protections under Title IX as pregnant and parenting students who are enrolled and to address the concern that a recipient may be unaware of its obligation to accommodate an applicant with a temporary disability.

Discussion: The Department carefully considered the suggestion to extend the reasonable modifications requirement to applicants for admission but declines to do so for a few reasons. First, the Department would need to consider additional information before making such a change, particularly given factors of possible cost, administrative burden, and possible interplay with other overlapping legal requirements. Second, the Department notes that final § 106.21(c)(1) requires a recipient, in the admissions process, to treat pregnancy or related conditions in the same manner and under the same policies as it would treat any other temporary medical condition. As a result, for example, if a recipient provides an applicant who is recovering from back surgery an extension of time for a medically necessary period to submit a required application essay, it must do the same for a student who is recovering from childbirth. Finally, applicants whose pregnancy-related medical conditions qualify as disabilities under Section 504 or the ADA may also be entitled to reasonable accommodations during the application process under those laws.

Changes: None.

Parental Status

Comments: One commenter stated that it is unnecessarily narrow for proposed § 106.21(c)(2)(i) to prohibit only discrimination that treats parenting applicants differently based on sex and urged the Department to explicitly prohibit discrimination against applicants for admission based on that person's ''current, potential, perceived, expected, or past parental, family, marital, or caregiver status,'' so that recipients will not think they may discriminate against parenting students or applicants as long as they do so equally across sexes. The commenter explained that discrimination based on parental, family, and caregiver status often constitutes discrimination on the basis of sex because women are more often custodial parents, and such discrimination is often tied to stereotypes that women who are

mothers are likely to neglect their education or should be focused only on providing care to their children.

Discussion: The Department would need to consider additional information before making such a change, particularly given possible considerations of cost and administrative burden. The Department notes that a recipient covered by Subpart C is prohibited from treating parenting applicants differently based on sex under final § 106.21(c)(2)(i) and from discriminating against them based on sex stereotypes under § 106.10, including about the proper roles of mothers and fathers or the proper gender of caretakers.

Changes: None.

C. Discrimination Based on a Student's Parental, Family, or Marital Status, or Pregnancy or Related Conditions

1. Section 106.40 Parental, Family, or Marital Status; Pregnancy or Related Conditions; and Section 106.40(a) Status Generally

Comments: Many commenters expressed support for proposed § 106.40(a) because it provides protection and addresses barriers that parenting students face in pursuing educational opportunities. Some commenters shared personal stories regarding their experiences as parenting students, including being asked to withdraw from a postsecondary institution, being discouraged from having more children, risking loss of scholarships, and being subjected to sex stereotypes regarding the expected roles of mothers and fathers.

In addition, several commenters urged the Department to broaden the protections in proposed § 106.40(a) by explicitly prohibiting discrimination, including sex-based harassment, based on perceived, expected, or past parental, family, marital, or caregiver status rather than prohibiting only discrimination that treats parenting students differently based on sex. One commenter asked the Department to specify that discrimination based on parental status is prohibited throughout the student's participation in the education program or activity, not just immediately following the birth or adoption of a child. Some commenters asserted that expectant parents who are not giving birth, caregivers who are not parents, and students who are perceived to be parents are improperly excluded from the protection of proposed § 106.40(a).

Discussion: The Department acknowledges commenters' support of proposed § 106.40(a). The Department understands commenters' suggestions to broaden the protections in proposed § 106.40(a) to explicitly prohibit discrimination and harassment based on perceived, expected, or past parental, family, marital, or caregiver status rather than prohibiting discrimination that treats parenting students differently based on sex. However, the Department would need to consider additional information before making such a change.

With respect to the suggestion to add the word ''perceived,'' the Department declines this suggestion because a recipient is already prohibited from treating parenting students differently based on sex and from discriminating against them based on sex stereotypes, including stereotypical views about the roles of mothers, fathers, or caretakers, under § 106.10. The Department agrees that it is sex discrimination to use sex stereotypes to deny equal educational opportunities related to a student's perceived marital or parental status.

The Department also declines suggestions to add the word ''expected'' to the regulatory text, as the text already includes the word ''potential,'' which the Department interprets to cover discrimination based on the expectation that a student is or is not married or a parent or has some other family status. The Department further notes that the definition of ''parental status'' is not limited to a timeframe immediately following the birth or adoption of a child and agrees that the protection of § 106.40(a) applies throughout a student's participation in a recipient's education program or activity. Regarding concerns about non-birthing parents and caregivers, the Department refers commenters to the discussion of the definition of ''parental status'' in § 106.2.

Changes: Consistent with similar changes for consistency in §§ 106.40(a) and 106.57(a), the Department has substituted the word ''implement'' for ''apply.''

2. Section 106.40(b)(1) Pregnancy or Related Conditions—Nondiscrimination

Comments: Many commenters expressed general support for the proposed regulations' prohibition on discrimination on the basis of ''pregnancy or related conditions,'' explaining that this prohibition would be consistent with Title IX's mandate to prohibit sex discrimination. These commenters believed proposed § 106.40(b)(1) would advance pregnant and parenting students' equal access to educational opportunities and improve outcomes for those students and their children. Some commenters appreciated that the proposed regulations would remove the outdated ''false pregnancy'' term. Some commenters stated that students who are, or might be, pregnant should not be denied education, and that modifications to an education program should be made when necessary for the safety and comfort of pregnant students, allowing them to both parent and succeed academically. Several commenters cited the experiences of individual students who either were harassed or feared harassment related to pregnancy or related conditions.

Many commenters explained that pregnant and parenting students face barriers to completing their education, including discrimination, harassment, and a lack of institutional supports. Some commenters provided information about the impact of pregnancy and parenting on teen parents, including the negative impact on high school graduation rates, career opportunities, and mental health, noting the disproportionate impact of teen pregnancy and parenting on certain groups. Some commenters observed that pregnancy discrimination is prevalent in postsecondary education, and that parenting students are less likely to graduate because of punitive attendance policies and, when they do graduate, have higher levels of debt than their non-parenting peers.

Some commenters asked the Department to confirm that it is a violation of Title IX for a recipient to cause someone to lose a college scholarship or their place on a team because of pregnancy. Finally, some commenters urged the Department to issue updated guidance for K–12 recipients on the Title IX rights of pregnant and parenting students.

Discussion: The Department acknowledges the information shared by commenters about the barriers to education faced by students who are pregnant, experiencing pregnancy-related conditions, or parenting. The Department agrees that the final regulations will clarify recipient obligations to ensure that pregnant and parenting students are not subject to discrimination on the basis of sex. The Department acknowledges the support for § 106.40(b)(1) prohibiting discrimination against students and employees based on ''current, potential, or past'' pregnancy or pregnancy-related conditions, and agrees that this updated and comprehensive term will help reduce barriers to educational access and professional achievement and improve access to education and career opportunities.

Commenters' support reinforces the Department's view, as indicated in the

July 2022 NPRM, that protecting students from discrimination on these bases will help to achieve Title IX's objective of eradicating sex discrimination in federally funded education programs and activities. *See* 87 FR 41518. As discussed in the July 2022 NPRM, Title IX was enacted in part because women were being denied educational access due to views that they were less capable and less committed to academic demands given their perceived pregnancy and childbearing obligations. 87 FR 41393. The Department is convinced that clarifying Title IX's protections to cover current, potential, or past pregnancy or related conditions will ensure that a student is not treated unfairly due to, for example, a likelihood of having children in the future, having had children in the past, or having experienced pregnancy or related medical conditions. The Department further confirms its view that, fundamental to the purpose of Title IX, the final regulations will significantly help address the barriers to educational access arising from perceptions about pregnancy and childbearing.

The Department notes that current § 106.40(b)(1) already prohibits discrimination against any student, including in any extracurricular activity such as athletics, based on pregnancy, childbirth, false pregnancy, termination of pregnancy, or recovery therefrom. Final § 106.40(b)(1) similarly prohibits any discrimination based on a student's current, potential, or past pregnancy or related conditions. ''Pregnancy or related conditions'' is defined in § 106.2 to include pregnancy, childbirth, termination of pregnancy, and lactation; medical conditions related to pregnancy, childbirth, termination of pregnancy, and lactation; and recovery from pregnancy, childbirth, termination of pregnancy, lactation, or related medical conditions, providing broadly inclusive coverage.

In these final regulations, the Department maintains its longstanding interpretation that a recipient violates Title IX by stopping or reducing financial assistance on the basis of pregnancy or related conditions; subjecting students of one sex to additional or different requirements, such as requiring women athletes to sign contracts listing pregnancy as an infraction; or excluding students from participating in a recipient's education program or activity, including extracurricular activities and athletics, on the basis of the student's pregnancy or a related condition. *See, e.g.,* U.S. Dep't of Educ., Office for Civil Rights, Dear Colleague Letter: Student Athletes and Pregnancy (June 25, 2007), *https://www2.ed.gov/about/offices/list/ocr/letters/colleague-20070625.html.*

Regarding the request for updated guidance for K–12 students, the Department understands the importance of supporting recipients in the implementation of these regulations and ensuring that students know their rights. The Department anticipates that these regulations, which apply with equal force in the elementary school and secondary school setting, will clarify a recipient's obligations to students experiencing pregnancy or related conditions or who are parenting. To the extent that questions remain, or situations arise that require further clarification, the Department will offer technical assistance and consider guidance, as appropriate, to promote compliance with these final regulations.

Changes: The Department has not made changes to the first sentence of final § 106.40(b)(1). Changes to the second sentence of final § 106.40(b)(1) are explained in the discussion of § 106.40(b)(1) and (b)(3)(iii) below regarding Voluntary Access to Separate Portion of Program or Activity.

3. Section 106.40(b)(2) Pregnancy or Related Conditions—Responsibility To Provide Title IX Coordinator Contact and Other Information

Comments: Many commenters expressed support for the proposed requirement that a recipient who has been informed of a student's pregnancy or related conditions provide that student, or a person who has the legal right to act on behalf of the student, with information relating to the Title IX Coordinator, including contact information. Commenters noted that even though Title IX has long prohibited sex discrimination against pregnant and parenting students, many students and employees are unaware of their rights, and that proposed § 106.40(b)(2) will benefit students by informing them of those rights and making staff more responsive to such students. Several commenters shared personal accounts of how their lack of awareness of their rights as pregnant or parenting students led them to lose instructional time and other educational opportunities.

One commenter asserted that the requirement that the employee tell the student how to notify the Title IX Coordinator ''for assistance'' was vague and could run afoul of certain State laws that restrict or discourage access to abortion. Some commenters also asserted that the phrase ''informed of'' in the proposed provision was vague, overbroad, or could capture information that is revealed unintentionally, and asked the Department to provide relevant examples demonstrating its application. One commenter asked the Department to explain when, if ever, an employee should act based on information regarding a student's pregnancy obtained indirectly.

Some commenters raised concerns about students' privacy and, for example, urged that the regulations protect students from incurring civil or criminal penalties related to pregnancy or related conditions, and clarify that disciplining or referring students to law enforcement on these bases violates Title IX. Some commenters worried the proposed provision would require a recipient to ask students sensitive or unwelcome questions or make inappropriate assumptions about their medical status and needs. Some commenters asked what the provision would require a recipient to document, including whether they needed to document if the Title IX Coordinator was previously notified, and how to protect student privacy and records.

One commenter suggested that the Department remove the part of the proposed provision that states that an employee need not act if the employee reasonably believes the Title IX Coordinator has already been notified, to avoid an employee's mistaken assumption regarding such notification.

One commenter expressed that the provision was burdensome, for example, due to the cost of training staff on action that may be unneeded and because the proposed provision would be too difficult to implement and monitor.

Other commenters objected that the provision was paternalistic or would encourage sex stereotyping. Some commenters feared that the provision would require employees to speak with students in cases of abuse or unintended pregnancy or to incorrectly imply that a student required a modification to the educational program. One commenter stated that an employee providing the relevant information under the provision could harm student-faculty relations.

Several commenters suggested the Department use other approaches to inform students of their rights related to pregnancy or related conditions, either instead of or in addition to the proposed provision. These suggestions included written policies and procedures pertaining to pregnancy and parental rights, student training, or providing information through a website or syllabus statement.

Other changes to the provision suggested by commenters included that employees refer students to the disability services office to reduce the

burden on recipients and students and better align the processes under Section 504 and the ADA; or that the Department adopt a single process for both pregnancy-related and disability accommodations.

Some commenters suggested that the Department narrow the type of employees subject to the provision to those with student-facing roles. In addition, some commenters requested that references to ''the Title IX Coordinator'' in proposed § 106.40 be changed to ''the recipient'' to clarify that the recipient has the ultimate responsibility under this section.

Finally, some commenters opposed proposed § 106.40(b)(2), arguing that the provision would expand the scope of Title IX beyond the Department's authority or without required congressional authorization.

Discussion: Requiring employees to share the Title IX Coordinator's contact information and information about the Title IX Coordinator's ability to take specific actions will give students the information they need to choose whether to seek reasonable modifications, voluntary leave, or access to a lactation space as necessary, and will help prevent potential disruptions to their access to education.

Importantly, the provision will not require students or their families to have any advance knowledge of a recipient's obligations (such as providing reasonable modifications, lactation space, or leave), or to invoke specific words to trigger the requirement to provide them with information about the Title IX Coordinator. But the provision also does not require the recipient's employees to directly inform the Title IX Coordinator of any information they obtain related to a student's pregnancy. The provision thus balances several important interests. First, the provision respects the student's interest in being free from sex discrimination and accessing necessary support from the recipient. Second, the provision promotes the right of the student and the student's legal representatives to determine if, when, and what information to share with a recipient regarding a student's pregnancy or related conditions. Third, the provision accounts for the administrative burden on recipients in carrying out this critical informational function. Overall, the Department is convinced that the regulations will empower students and their families to decide whether they wish to obtain school-based supports, thereby avoiding sex discrimination to the greatest extent possible, with minimal burden for recipients.

The Department agrees with the commenter's suggestion that replacing the term ''for assistance'' in § 106.40(b)(2) would provide clearer instruction to employees about what information they must share and would prevent mischaracterization of the Title IX Coordinator's role. In response to this comment, the Department has revised the final regulations to require that an employee inform the student or a person who has a legal right to act on behalf of the student, when applicable, of the Title IX Coordinator's contact information and that the Title IX Coordinator can coordinate specific actions to prevent sex discrimination and ensure the student's equal access to the recipient's education program or activity.

Further, the Department seeks to clarify other aspects of the employee's role under § 106.40(b)(2). Contrary to the misunderstanding of some commenters, the Department clarifies that § 106.40(b)(2) does not require a school employee to approach a student unprompted, ask a student about their pregnancy or any other subject, or make assumptions about the student's needs or medical status. The provision also does not require an employee to directly notify the Title IX Coordinator regarding a student's pregnancy or related conditions. Rather, the final provision requires an employee to promptly provide the Title IX Coordinator's contact information only when a student, or a person who has a legal right to act on behalf of the student, first informs that same employee of that student's pregnancy or related conditions. Even then, the employee would only provide this information if the employee reasonably believes that the Title IX Coordinator has not already been notified. The employee must also inform the student or person who has a legal right to act on behalf of the student that the Title IX Coordinator can coordinate specific actions to prevent sex discrimination and ensure the student's equal access to the education program or activity. The Department is modifying the final regulations to omit the phrase ''employee is informed,'' which drew concern from some commenters, and to clarify that a student or their legal representative must directly inform an employee to trigger the requirements under this provision. It is not enough for an employee to be informed indirectly, or by someone other than the student or their legal representative, or to merely suspect that a student may be pregnant or experiencing pregnancy-related conditions.

A student or a person who has a legal right to act on behalf of the student ''informs'' an employee of a student's pregnancy or related conditions when the student or such person tells the employee that the student is pregnant or experiencing pregnancy-related conditions, either verbally or in writing. For example, if a student tells a teacher, ''I am pregnant and will be late to class on Wednesday due to a doctor's appointment,'' the student has informed the teacher of the pregnancy and the teacher's obligations under § 106.40(b)(2) are triggered. However, if the teacher merely overhears one student making the same statement to another, the student has not directly informed the teacher, so the employee is not required to act under the provision. The requirement that the employee act only when directly informed in this manner balances a student's interest in privacy and autonomy with the necessity of preventing or eliminating sex discrimination in a recipient's education program or activity. For similar reasons, once information about the Title IX Coordinator's contact information and coordination duties is provided, a student or the student's legal representative should have the choice to disclose pregnancy or related conditions to a recipient through the Title IX Coordinator as they feel appropriate. Absent information about conduct that reasonably may constitute sex discrimination (*e.g.,* the student telling the employee that not only is the student pregnant, but that the student has been prohibited from trying out for the school play due to the pregnancy)—in which case notification obligations are governed by § 106.44(c)—employees are not required to directly inform the Title IX Coordinator of a student's pregnancy or related conditions.

In addition, while an employee has no duty to act under § 106.40(b)(2) based only on their observation of or receipt of a secondhand report about a student's pregnancy, employees should recognize that such information may trigger duties outside of Title IX. *See* 87 FR 41519 n.10; 34 CFR 104.35; U.S. Dep't of Educ., Office for Civil Rights, Parent and Educator Resource Guide to Section 504 in Public Elementary and Secondary Schools, at 12, 19 (Dec. 2016), *http://www.ed.gov/ocr/docs/504-resource-guide-201612.pdf.*

For several reasons, the Department declines the suggestion to modify the provision so that an employee would be obliged to provide the student relevant information only when the student first requests a reasonable modification. First, a student may be unaware of their right to a reasonable modification and

thus not know to ask a staff member about it. Second, this type of requirement would complicate the employee's duty by requiring the employee to determine whether a student's statement regarding pregnancy also expressed interest in reasonable modifications, instead of simply requiring an employee to act whenever a student or the student's legal representative informs the employee of the student's pregnancy or related conditions. Third, the Title IX Coordinator is best and most efficiently positioned to provide information to a student on the complete range of the recipient's obligations under these final regulations, including leave, lactation space, and how the student can make a complaint of discrimination.

Further, the Department is sensitive to and has accounted for student concerns about confidentiality. While a recipient must comply with final § 106.40(b)(2), the provision does not require documentation of compliance—contrary to what some commenters asserted. Any records maintained voluntarily by a recipient would be subject to the disclosure restrictions of § 106.44(j) of the final regulations, which prohibits the disclosure of personally identifiable information obtained in the course of complying with this part, with some exceptions. The disclosure restrictions are explained more fully in the discussion of § 106.44(j). Also, as explained above in the discussion of final § 106.2 regarding the definition of ''pregnancy or related conditions'' and its application to termination of pregnancy, a recipient may not punish or retaliate against a student solely for seeking or obtaining an abortion.

The Department acknowledges commenters' questions and range of views regarding whether the provision should apply when an employee reasonably believes that the Title IX Coordinator has been notified. The Department clarifies that there is no requirement that an employee ask a student whether the Title IX Coordinator has been notified. If the employee is unaware whether the Title IX Coordinator has been notified at the moment the student or their legal representative informs the employee of the student's pregnancy or related conditions, the employee's only responsibility under the provision is to provide the student with the required information regarding the Title IX Coordinator. For example, if a student tells a teacher, ''I'm letting you know I'm pregnant'' and nothing more, the employee must provide the necessary information under the provision—specifically, the Title IX Coordinator's contact information and that the Title IX Coordinator can coordinate specific actions to prevent sex discrimination and ensure the student's equal access to the education program or activity. However, if the student instead says, ''I'm pregnant and working with the Title IX Coordinator to make sure I have access to a bigger desk in your math class,'' the employee has no further obligation to inform under § 106.40(b)(2), because it is reasonable for the employee to believe from that conversation that the Title IX Coordinator has already been notified of the student's pregnancy. The Department notes that an employee's ''reasonable belief'' that the student has informed the Title IX Coordinator does not need to come from the student but could also come from the Title IX Coordinator telling relevant teachers, for example, that the student has been approved for reasonable modifications related to the student's pregnancy. The Department's approach minimizes the burden on employees and students when it is reasonably clear from context that the Title IX Coordinator already knows about the student's pregnancy or related conditions.

With respect to the concern that § 106.40(b)(2) may result in the student learning about the Title IX Coordinator from multiple staff members—which would only occur because the student, or a person who has a legal right to act on behalf of the student, informed multiple employees of the student's pregnancy or related conditions—the Department acknowledges this possibility but believes it is important to err on the side of the student receiving more, rather than less, information about the rights and modifications that may be available to them during their pregnancy. The Department concludes that this provision is calibrated to enhance student access to this important information, while avoiding redundancy, when possible, and respecting student autonomy and privacy.

The Department disagrees with commenter concerns that the provision is discriminatory, paternalistic, or encourages sex stereotyping. As discussed above, an employee's action under the provision is driven completely by the student or the student's legal representative and contains no requirement that an employee act based on supposition regarding the student's status. The provision focuses on students who are pregnant or experiencing pregnancy-related conditions to avoid having those students face obstacles to education related to those conditions and associated with their sex characteristics, and thus falls within the scope of Title IX under final § 106.10. While equal access to education for students who are not pregnant or experiencing pregnancy-related conditions—such as a pregnant student's partner, a student adopting a child, or a student whose close family member is pregnant—is important, there is no need to immediately inform such students, who are not pregnant or experiencing pregnancy-related conditions, of how to obtain pregnancy-related rights under § 106.40(b)(3) that do not apply to them. The Department further disagrees with the commenter's assertion that the provision will harm student-faculty relationships; to the contrary, providing a simple framework under § 106.40(b)(2) for employees to respond to students who disclose pregnancy or related conditions will strengthen such relationships by increasing students' perceptions that staff care about their needs.

The Department acknowledges commenters who shared a variety of alternative or supplemental approaches for students to receive information about the Title IX Coordinator, which some commenters also felt would minimize the burden on recipients. The Department declines to narrow the provision's application to employees who are ''student facing'' because students may be more comfortable disclosing pregnancy or related conditions to some employees over others for a variety of reasons. This approach fosters recipients providing students with more information rather than less, considering that commenters indicated—as a general matter and in their own personal accounts—that students are not currently aware of the Title IX prohibition on pregnancy discrimination and the rights that follow from it. For instance, a registrar may not be a ''student facing'' role like a teacher or a coach, but a student might disclose to a registrar that they are dropping a class because they are pregnant and will be delivering a child during exam time. In that setting, it is important for the registrar to inform the pregnant student about how to contact the Title IX Coordinator if they want to ask for reasonable modifications or about other recipient obligations that might allow them to stay enrolled in the class.

The Department declines the suggestion to require recipients to conduct training for students. This provision is focused on conveying information, in a timely manner, to the subset of students who are pregnant or experiencing pregnancy-related conditions while in school.

As to the suggestion that the Department require recipients to post information about the availability of pregnancy-related modifications on syllabi or websites, the Department does not think that website or syllabi-type notifications, which are not directed at the individual student, will alone effectively ensure that students know about these important and time-sensitive Title IX rights. However, nothing in Title IX or this part prohibits recipients from posting information about the availability of pregnancy-related modifications on syllabi or websites.

Responding to concerns about the employee training burden, the Department continues to view this burden as minimal. Under the final regulations, employees are asked to share only two pieces of information with students: (1) the Title IX Coordinator's contact information; and (2) that the Title IX Coordinator can coordinate specific actions to prevent sex discrimination and ensure the student's equal access to the recipient's education program or activity. Training on this matter, as required by § 106.8(d)(1)(iii), will likely require a limited amount of time and can be incorporated into existing broader trainings on Title IX issues or other topics. For further explanation of the training requirements of § 106.8(d)(1)(iii), see the discussion of that provision.

The Department understands commenters' interest in aligning pregnancy and disability accommodation procedures. A recipient is welcome to do so when consistent with the requirements of the final Title IX regulations and other applicable laws. However, given the role the Title IX Coordinator plays in ensuring the recipient's consistent compliance with Title IX and their awareness of applicable regulations, the Title IX Coordinator—or their designee as permitted under final § 106.8(a)(2)—remains the appropriate point of contact for students under § 106.40(b)(2). Likewise, it is inappropriate to replace ''Title IX Coordinator'' with ''the recipient'' in the provision, because telling a student to contact the recipient generally does not provide clear direction as to an appropriate point of contact. The final regulations will provide such clarity.

The Department disagrees that the provision is beyond the scope of the Department's authority under Title IX. Pregnancy discrimination has long been prohibited by Title IX and its implementing regulations, but comments the Department received confirm that students do not know about their rights in this context and do not know that Title IX obligates recipients to help them ensure that they can fully access the recipient's education program or activity even while pregnant or experiencing pregnancy-related conditions. This provision is therefore necessary to ensure that pregnant students—whose needs are by nature time sensitive—can promptly avail themselves of available Title IX resources. Thus, this provision is necessary to ''effectuate the provisions of Title IX'' and is at the core of the Department's Title IX regulatory authority. As explained in the July 2022 NPRM, Title IX requires a variety of implementation strategies if it is to serve as a ''strong and comprehensive measure,'' 118 Cong. Rec. at 5804 (statement of Sen. Bayh), to ''achieve[ ] . . . the objective[ ]'' of eliminating sex discrimination in federally subsidized education programs and activities under 20 U.S.C. 1682, *id.* at 5803. 87 FR 41513.

The Department has revised the title of this provision from ''Requirement for recipient to provide information'' to ''Responsibility to provide Title IX Coordinator contact and other information'' because it is more explanatory and better informs readers of the topic of the provision. The Department has also revised the phrase ''unless the employee reasonably believes that the Title IX Coordinator has been notified'' for clarity by removing the word ''already,'' and moved the phrase from the end of the sentence to the middle for readability.

Changes: The Department has revised final § 106.40(b)(2) to clarify that unless the employee reasonably believes that the Title IX Coordinator has been notified of the student's pregnancy or related conditions, the employee's obligation to act begins when a student or a person who has a legal right to act on behalf of the student ''informs'' the employee of such pregnancy or related conditions. The Department has further revised final § 106.40(b)(2) to clarify that the employee's obligation is to promptly provide the student, or person who has a legal right to act on behalf of the student, with the Title IX Coordinator's contact information and inform that person that the Title IX Coordinator can coordinate specific actions to prevent sex discrimination and ensure the student's equal access to the recipient's education program or activity. The Department revised the phrase ''unless the employee reasonably believes that the Title IX Coordinator has been notified'' in § 106.40(b)(2) by removing the word ''already,'' and moved the phrase from the end of the sentence to the middle. The Department also revised the title of this provision from ''Requirement for recipient to provide information'' to ''Responsibility to provide Title IX Coordinator contact and other information.''

4. Section 106.40(b)(3) Pregnancy or Related Conditions—Specific Actions To Prevent Discrimination and Ensure Equal Access

Timelines

Comments: Some commenters asked the Department to clarify how much notice a student must provide to obtain reasonable modifications and other steps in proposed § 106.40(b)(3) and how promptly the recipient must respond to such requests. Some commenters urged that a student be required to provide notice in a timeframe that is reasonable, allows the recipient sufficient time to prepare and act on the student's request, and considers the complexity and logistics of the task; and that absent such timely notice, a recipient has no obligation to act.

Discussion: As set out in final § 106.40(b)(3) and consistent with the proposed regulations in the July 2022 NPRM, 87 FR 41520, a recipient must promptly take the steps specified in § 106.40(b)(3), including implementing reasonable modifications. Determining promptness in each case is a fact-specific inquiry that depends on a variety of factors, including the needs of the student, the substance and timing of the requested modification, and the characteristics of the education program or activity. A recipient should consider the importance to a student of accessing reasonable modifications to ensure full participation in the recipient's education program or activity, and whether the absence of a modification to a policy, practice, or procedure could impede a student's academic or educational progress. As explained in greater detail in the discussion of § 106.40(b)(3)(ii)(A), a recipient is not required to make a modification that the recipient can demonstrate would fundamentally alter the nature of its education program or activity.

The Department agrees that it would be helpful for students who seek reasonable modifications to notify the Title IX Coordinator or their designee as early as possible to ensure that the recipient has enough time to review their request and provide a reasonable modification. However, no matter when a student notifies the Title IX Coordinator of pregnancy or related conditions or seeks any measures under § 106.40(b)(3)(ii)–(v), a recipient must

respond promptly and effectively to ensure equal access to the recipient's education program or activity consistent with the requirements of Title IX. Students may not be able to provide notice to a recipient related to pregnancy far in advance of when specific actions consistent with § 106.40(b)(3) are needed for various reasons, including because the need for specific actions may occur without advance warning, the student may need time to decide whether to disclose their pregnancy or related condition to their school, or the student may lack awareness of a recipient's process.

The Department notes that many modifications can be offered and implemented with relatively little administrative effort on the part of the recipient, such as the examples provided in § 106.40(b)(3)(ii)(C) of allowing the student to drink, eat, sit, or stand during class as needed. There is also no prohibition on a student returning to the Title IX Coordinator after the recipient has taken initial steps under final § 106.40(b)(3)(ii)–(v) if a further need emerges related to pregnancy or related conditions. In such a case, the recipient must take further action consistent with § 106.40(b)(3)(ii)–(vi).

Changes: The Department has revised § 106.40(b)(3) to state that a recipient must take specific actions under paragraphs (b)(3)(i) through (vi) to promptly and effectively prevent sex discrimination and ensure equal access to the recipient's education program or activity once the student, or a person who has a legal right to act on behalf of the student, notifies the Title IX Coordinator of the student's pregnancy or related conditions.

Staffing Flexibility and Effectiveness

Comments: Some commenters supported the proposed regulations—which would have required that reasonable modifications because of pregnancy or related conditions ''be effectively implemented, coordinated, and documented by the Title IX Coordinator''—because they would have made clear that the Title IX Coordinator has the authority and responsibility to ensure that reasonable modifications are provided to students.

Several commenters suggested that the Department allow recipients greater flexibility regarding which employees oversee compliance with a recipient's obligations to students who are pregnant or experiencing pregnancy-related conditions. These commenters' reasons included that the Title IX Coordinator's job has become too large for one person; other staff at the recipient may be more knowledgeable about the students or available resources; a Title IX Coordinator may have a conflict of interest in both receiving and investigating reports of discrimination related to pregnancy or related conditions; and pregnancy protection under some local laws allows greater staffing flexibility.

Some commenters asked the Department to clarify that the Title IX Coordinator's responsibility is to coordinate, rather than implement, the steps required in the proposed provision. Some commenters requested that the Department clarify that the responsibilities in proposed § 106.40(b)(3) are the recipient's, not the Title IX Coordinator's individually.

Discussion: Recognizing the need for clarity regarding the role of the Title IX Coordinator in their official capacity, and the need for staffing flexibility in carrying out these provisions, the Department has revised final § 106.40(b)(3) to state that the recipient is responsible for taking the actions specified in that paragraph once a student (or a person with the legal right to act on the student's behalf) has notified the Title IX Coordinator of a student's pregnancy or related conditions. The final regulations at § 106.40(b)(3) provides that the recipient must do so promptly and effectively.

The Department has further amended the provision to state that the Title IX Coordinator must be responsible for coordinating the actions. Consistent with final § 106.8(a)(2), the Department clarifies that a recipient may delegate, or permit a Title IX Coordinator to delegate, specific duties to one or more designees. Accordingly, recipients have flexibility to choose the staff they think are most appropriate to carry out duties under § 106.40(b)(3), provided that the Title IX Coordinator retains ultimate oversight for ensuring that the recipient complies with § 106.40(b)(3)'s requirements. The Department agrees that providing recipients this flexibility will enable them to use resources most effectively to serve students in a way that will be responsive to the needs of their school communities. To the extent that a recipient wishes to utilize other administrators or departments to carry out some tasks required under § 106.40(b)(3), they may do so provided the work is coordinated with oversight of the Title IX Coordinator and performed consistent with the requirements of the final regulations.

Recognizing that each of the steps under § 106.40(b)(3) (as adopted in these final regulations) is equally important, the Department further revised the requirement that a recipient's actions be effective—which the Department had previously proposed to include as an express term in § 106.40(b) only in connection with reasonable modifications—to apply to all the recipient's actions under final § 106.40(b)(3). This requirement ensures that recipients and members of their communities understand that the recipient's actions, including providing reasonable modifications and voluntary leave because of pregnancy or related conditions, and access to lactation spaces, must be fully and effectively implemented and serve their intended purposes under the final regulations to prevent sex discrimination and ensure equal access to the recipient's education program or activity. Effectiveness requires, for example, ensuring that all relevant school staff are complying with their role in carrying out § 106.40(b)(3)(ii)–(vi) and that there are no other structural or resource barriers to compliance. For example, if a recipient provides the student a reasonable modification to use the restroom when needed during the student's high school classes, but the student's science teacher refuses to allow the student to do so, the reasonable modification has not been effectively implemented by the recipient, and the recipient must remedy the situation to ensure effective implementation. Likewise, if the recipient provides a student with an access code to a locked lactation space, but the student cannot enter because the keypad is broken, this is ineffective implementation that the recipient must remedy.

Responding to a commenter's concern that the regulations as revised conflict with a city regulation [82] that requires a school principal or their designee to take particular steps once they become aware that a student is pregnant or has a child, the Department notes that the revisions here make clear that recipients can delegate certain duties of the Title IX Coordinator, such as to a school principal, consistent with § 106.8(a)(1) and (2). With respect to bias, the Department disagrees that there is inherent bias in a Title IX Coordinator both receiving and investigating a complaint of pregnancy discrimination. However, if for some other reason a Title IX Coordinator who receives a complaint of pregnancy discrimination had a conflict of interest or bias for or against complainants or respondents

[82] The commenter cited Chancellor's Regulation A–740, *Pregnant and Parenting Students and Reproductive Health Privacy* (Nov. 13, 2008), *https://www.nyc.gov/html/acs/education/pdf/A740%20Pregnant%20and%20Parenting%20students.pdf.*

generally or an individual complainant or respondent, the Title IX Coordinator would be prohibited from serving as an investigator or decisionmaker in connection with that particular complaint consistent with the requirements of final § 106.45(b)(2), and the recipient would be responsible for ensuring the substitution of an alternate appropriate individual. In addition, final § 106.8(d)(2)(iii) and (4) require that a Title IX Coordinator receive training on bias, which is designed to ensure that any Title IX Coordinator in this situation is able to identify bias and take the necessary steps to address it.

Changes: As noted above, the Department has revised § 106.40(b)(3) to clarify that it is the recipient's obligation to take the specific actions under paragraphs (b)(3)(i) through (vi) to promptly and effectively prevent sex discrimination and ensure equal access to the recipient's education program or activity once the student, or a person who has a legal right to act on behalf of the student, notifies the Title IX Coordinator of the student's pregnancy or related conditions. The Department has further revised § 106.40(b)(3) to clarify that the Title IX Coordinator must coordinate these actions.

5. Section 106.40(b)(3)(i) Pregnancy or Related Conditions—Responsibility To Provide Information About Recipient Obligations

Comments: Commenters expressed several reasons for supporting the proposed requirement at § 106.40(b)(3) and (3)(i) that once a student, or a person who has a legal right to act on that student's behalf, notifies the Title IX Coordinator of the student's pregnancy or related conditions, the Title IX Coordinator must inform the student of the recipient's obligations related to pregnancy or related conditions. Commenters' reasons included that the provision would clarify recipients' responsibilities to these students and assist recipients in providing them equal access to education; remove barriers to education; and be consistent with similar notice and antidiscrimination laws in many States. Commenters noted that the requirement is particularly important considering restrictive State abortion laws that may drive up the numbers of students who are pregnant or experiencing pregnancy-related conditions. Commenters noted that even though Title IX has long prohibited discrimination against pregnant and parenting students as sex discrimination, many students and employees are unaware of their rights. Several commenters shared personal accounts of how their lack of awareness of their rights as pregnant or parenting students led them to lose instructional time and other educational opportunities.

Some commenters asked whether instead of, or in addition to, the requirements of proposed § 106.40(b)(3) and (b)(3)(i), the Department could require recipients to communicate procedures related to pregnancy or related conditions through written procedures, or website or syllabus statements.

Some commenters raised concerns about students' privacy and, for example, urged that the regulations protect students from incurring civil or criminal penalties related to pregnancy or related conditions, and for clarification that disciplining or referring students to law enforcement on these bases violates Title IX.

Some commenters suggested revising proposed § 106.40(b)(3) for what commenters viewed as consistency with Section 504 and the ADA, for example, by only requiring the Title IX Coordinator to inform a student of their rights or take other action after a student follows internal processes and asks for assistance related to pregnancy or related conditions; or using a single process for students with disabilities and students who are pregnant and experiencing pregnancy-related conditions.

Other commenters asked the Department to revise the proposed regulations to require that recipients tailor the information they are required to provide to a student's specific request, for example, by excluding lactation information when a student reports miscarriage.

Because the proposed regulations listed the application of grievance procedures under § 106.45, and if applicable § 106.46, as one of several required topics for the Title IX Coordinator to inform the student about upon notification of pregnancy, one commenter asked the Department to clarify with whom students should make a complaint and whether such procedures were prompt enough to address pregnancy issues.

Some commenters stated that the requirement to provide information would be burdensome and non-beneficial. Some commenters believed the provision exceeds the scope of Title IX and requires congressional authorization.

Other commenters asked the Department to undertake a separate rulemaking to address students who are pregnant or experiencing pregnancy-related conditions, referring to the complexity of issues relating to pregnancy, student privacy, and risk to recipients.

Discussion: The Department agrees with commenters who emphasized the importance of the proposed requirements regarding steps a recipient must take upon notice of a student's pregnancy or related conditions, including informing the student of the recipient's obligations to prevent discrimination and ensure equal access. The Department agrees with commenters' statements that informing a student of the recipient's obligations directly will remove barriers to education and increase the likelihood of a student successfully remaining in school.

The Department acknowledges the variety of alternative or supplemental approaches commenters shared, by which students could receive information about the recipient's obligations under § 106.40(b)(3)(i)—including through written procedures or website or syllabus statements—which some commenters also felt would minimize the burden on recipients. As noted above, the Department does not think that website or syllabi-type notifications, which are not directed at the individual student, are alone sufficient to ensure that students know about these important and time-sensitive Title IX rights. However, nothing in Title IX or this part prohibits recipients from posting information about the availability of pregnancy-related modifications on syllabi or websites.

Further, the Department agrees with the many commenters expressing concern about the privacy of student records and other information a recipient obtains related to Title IX compliance. In response to commenter concerns, the Department revised final § 106.44(j) to prohibit the disclosure of personally identifiable information obtained while carrying out a recipient's Title IX obligations, with some exceptions. To ensure that a student and their legal representative are aware of this provision, the Department has revised § 106.40(b)(3)(i) to require that the Title IX Coordinator inform them of this provision. The disclosure restrictions are explained more fully in the discussion of § 106.44(j). As explained in the discussion of final § 106.2 regarding the definition of ''pregnancy or related conditions'' and its application to termination of pregnancy, a recipient may not punish or retaliate against a student solely for seeking or obtaining an abortion.

Responding to the comment that a recipient should provide a student

information about their rights only once they ask for assistance and exhaust the remainder of a recipient's administrative requirements, the Department declines to do so for the same reasons discussed in connection with a similar comment regarding § 106.40(b)(2). Specifically, § 106.40(b)(3)(i) does not require students or their families to have any advance knowledge of a recipient's available supports, or to invoke specific words or requests, for the recipient to be required to provide them with information about the recipient's obligations under Title IX to students experiencing pregnancy or pregnancy-related conditions. This approach ensures that members of a recipient's community have access to necessary support; promotes the right of the student and the student's legal representatives to determine if, when, and what information to share with a recipient regarding a student's pregnancy or related conditions; and maximizes administrative efficiency by recognizing that the Title IX Coordinator is best positioned to coordinate the efficient provision of information. For these reasons, the recipient should inform the student or person with a legal right to act on the student's behalf of the student's relevant rights as soon as they notify the Title IX Coordinator of the student's pregnancy or related conditions to ensure that the student (and their legal representative, as applicable) has complete and timely information. The Department notes that this paragraph discusses only the obligation of the recipient to ensure that the Title IX Coordinator provides information to a student or the person who has a legal right to act on behalf of the student, upon notification of pregnancy under § 106.40(b)(3)(i). The separate responsibility of the recipient to ensure that all employees provide information about the Title IX Coordinator to a student or their legal representative regarding pregnancy or related conditions, when the student or their legal representative informs any employee of the student's pregnancy or related conditions, is addressed in the discussion of § 106.40(b)(2).

The Department understands the commenter's interest in allowing a recipient to have a single process, or similar processes, to address both pregnancy and disability. When recipients can use the same or similar processes for pregnancy and disability in a manner that is consistent with the requirements of these final Title IX regulations and applicable disability laws, recipients may do so. For example, the same staff member may be assigned to provide students with notice of their rights related to pregnancy and disability; however, staff in this role must comply with § 106.40(b)(3)(i) in addition to any other relevant requirements under Section 504, the ADA, or other applicable disability laws, and the Title IX Coordinator must retain ultimate oversight over the recipient's responsibilities under Title IX and this part, consistent with § 106.8(a)(1).

Additionally, the Department declines the proposal to limit the information a recipient must provide to a student upon notice of the student's pregnancy or related conditions. It is essential that a recipient inform the student, and the student's legal representative, as applicable, of the recipient's obligations under §§ 106.40(b)(1)–(5) and 106.44(j) and provide the recipient's notice of nondiscrimination under § 106.8(c)(1) for several reasons. First, doing so will provide the student with the broadest possible amount of information upon which to make informed choices about next steps, including information about reasonable modifications, voluntary leave, access to lactation space, the general right not to be discriminated against on the basis of pregnancy or related conditions, and limits on certifications to participate in the recipient's education program or activity. Second, the regulations will relieve the recipient of having to decide unilaterally and subjectively what information should be shared. Third, the regulations will prevent a recipient from depriving a student of information based on a staff member's own misjudgment or lack of awareness about the student's particular pregnancy or needs. For example, a student who has miscarried may need or want information about access to a lactation space, because a student can lactate following miscarriage and may wish to use such a space to express breast milk. Requiring a recipient to provide information about all of a recipient's obligations under §§ 106.40(b)(1)–(5) and 106.44(j) and to provide the recipient's notice of nondiscrimination under § 106.8(c)(1) does not obligate students to take any action after receiving the information but empowers students to make the most appropriate choices based on their own unique needs.

In connection with the commenter's question regarding the application of grievance procedures under § 106.45, and if applicable § 106.46, to pregnancy-related issues, and resolving pregnancy-related matters quickly, the Department clarifies that these procedures still apply. However, for simplicity, rather than list a number of discrete items that the recipient must disclose to the student as it did in the proposed regulations, the Department revised final § 106.40(b)(3)(i) to state that the recipient must inform the student and their legal representative (as applicable) of the recipient's obligations under §§ 106.40(b)(1)–(5) and 106.44(j) and provide the recipient's notice of nondiscrimination under § 106.8(c)(1). The notice of nondiscrimination under § 106.8(c)(1) contains the recipient's nondiscrimination statement and contact information for the Title IX Coordinator, explains how to locate the recipient's Title IX policy and grievance procedures, and provides information about how to report sex discrimination.

Further explaining how the final regulations function to resolve concerns of pregnancy-related discrimination, the Department notes that if a student notifies the recipient of the recipient's failure to implement a reasonable modification or make a lactation space available, a recipient is required to take additional steps consistent with § 106.44(f)(1) to comply with its Title IX obligation to ensure that its education program or activity is free from discrimination on the basis of sex. Such steps will vary based on the facts and circumstances. For example, if a complaint is made, a recipient's grievance procedures under § 106.45 (and § 106.46, if the situation arises at a postsecondary institution and involves sex-based harassment), would guide the recipient's investigation and resolution of the complaint. If there is a determination that sex discrimination occurred, the Title IX Coordinator must coordinate the provision and implementation of remedies to a complainant and take other appropriate prompt and effective steps to ensure that sex discrimination does not continue or recur within the recipient's education program or activity. *See* § 106.45(h)(3). Additionally, consistent with § 106.44(g), a student may need and a recipient must provide supportive measures, as appropriate, to restore or preserve access to the recipient's education program or activity in the absence of a complaint or during the pendency of grievance procedures. Finally, responding to concerns about timeliness of a recipient's response to issues regarding reasonable modifications, the Department emphasizes that under § 106.40(b)(3), a recipient always remains responsible for taking prompt and effective steps to prevent sex discrimination once the Title IX Coordinator is notified of a

student's pregnancy or related conditions, including through timely steps such as the provision of reasonable modifications, leave, and lactation space. Likewise, a recipient with knowledge of conduct that reasonably may constitute sex discrimination in its education program or activity—such as a complaint that actions required under § 106.40(b)(3) have not been appropriately taken—must respond promptly and effectively under § 106.44(a) and (f)(1).

The Department disagrees that the requirements of final § 106.40(b)(3) or (3)(i) are unduly costly or burdensome. Specifically, the requirement that a recipient inform the student of its obligations under § 106.40(b)(3)(i) could be done in the context of a single conversation, or, if appropriate to the age and ability of the student, in a standardized written communication. The Department explains in detail the potential costs and benefits of the final regulations related to pregnancy or related conditions in the *Regulatory Impact Analysis.*

Moreover, the Department disagrees that the provision is beyond the scope of the Department's authority under Title IX or requires separate congressional authorization. The Supreme Court has recognized that the Department has broad regulatory authority under Title IX to issue regulations that it determines will best effectuate the purpose of Title IX, and to require recipients to take administrative actions to effectuate the nondiscrimination mandate of Title IX. *See Gebser,* 524 U.S. at 292; 20 U.S.C. 1682. Since 1975, the Department has required recipients to provide students with information about their rights under Title IX. *See, e.g.,* 40 FR 24128 (codified at 45 CFR 86.8 (1975)); 34 CFR 106.8(c) (current). Section 106.40(b)(3)(i) expands upon this longstanding requirement in a manner that is tailored to a student's need for information in the relevant circumstance. Ensuring that students (or those who have a legal right to act on their behalf) have information about the reasonable modifications to which they are entitled is necessary to effectuate that mandate. In addition, the Department declines to conduct a separate rulemaking related to pregnancy or related conditions. The Department's clarification of the pregnancy-related regulations under Title IX at this time, aided by the input of commenters, is justified and appropriate. That the provisions related to pregnancy discrimination in the final regulations were proposed alongside other provisions implementing Title IX in no way diminished the public's notice of, and ability to comment on, those proposed provisions.

The Department notes that it has added ''Responsibility to provide information about recipient obligations'' as the title of this provision to assist readers in locating the topic more easily.

Changes: The Department has revised § 106.40(b)(3)(i) to require the recipient to provide information about the recipient's obligations under §§ 106.40(b)(1) through (5) and 106.44(j), in addition to providing the recipient's notice of nondiscrimination under § 106.8(c)(1). The Department further added a title to § 106.40(b)(3)(i) of ''Responsibility to provide information about recipient obligations.''

6. Section 106.40(b)(3)(ii) Pregnancy or Related Conditions—Reasonable Modifications

General Support

Comments: The Department notes that proposed § 106.40(b)(3)(ii) and (b)(4) have been revised and redesignated as § 106.40(b)(3)(ii) in the final regulations to consolidate into one paragraph provisions regarding a recipient's obligation to provide a student with reasonable modifications based on pregnancy or related conditions, and the following comment summaries and discussion refer to these provisions as § 106.40(b)(3)(ii).

Multiple commenters supported reasonable modifications for a student who is pregnant or experiencing pregnancy-related conditions as appropriate and necessary to allow such a student to succeed educationally. Several commenters stated that the reasonable modifications provision would clarify the protections that a recipient must provide to a student who is pregnant or experiencing pregnancy-related conditions and how a student can request reasonable modifications because of pregnancy or related conditions. Some commenters stated that pregnant students' civil rights are violated in ways other than outright exclusion such as by not providing necessary supports. Some commenters also noted that the proposed regulations would be consistent with many State antidiscrimination laws related to pregnancy. Several commenters supported § 106.40(b)(3)(ii) as particularly important for certain groups. Some commenters asked that the final regulations use terminology that provides reasonable modifications to all students based on pregnancy or related conditions.

Several commenters provided examples of how recipients' denials of reasonable modifications have forced students who are pregnant or experiencing pregnancy-related conditions to choose between their health and education, including a recipient or school official refusing to modify an exam schedule or grading policy when a student gave birth during final exams, denying a student's request for a larger desk, failing to accommodate a student's need to take lactation breaks, requiring a student to return to school days after having an emergency cesarean section despite not being able to drive or carry books, telling a student with a high-risk pregnancy to schedule medical appointments outside of class time despite having a note from their physician, encouraging a student to drop a course due to pregnancy, refusing to provide academic adjustments or excused absences, and denying basic modifications to protect pregnant students' health, including additional bathroom breaks and access to remote instruction or previously recorded classes.

Some commenters appreciated the reasonable modification provision because students who are pregnant or experiencing pregnancy-related conditions are often overlooked in discussions of a recipient's Title IX obligations. One commenter asserted that a student who is pregnant or experiencing pregnancy-related conditions will often need only modest accommodations and stated that when a recipient refuses to make these modifications, a student's education and health suffer.

Discussion: The reasonable modification provision of the final regulations under § 106.40(b)(3)(ii) will better fulfill Title IX's mandate with respect to students who are pregnant or experiencing pregnancy-related conditions. The specific examples provided by commenters are compelling, and together with the Department's Title IX enforcement experience, affirm the importance of this provision.

The Department agrees that recipients have the obligation under Title IX to provide reasonable modifications to policies, practices, or procedures for students who are pregnant or experiencing pregnancy-related conditions and that clarifying this responsibility will facilitate compliance with the nondiscrimination mandate of the statute. Accordingly, the Department has revised the proposed regulations to clarify that a recipient is ultimately responsible for taking specific actions to facilitate the reasonable modification

process when a student notifies the Title IX Coordinator that they are pregnant or experiencing pregnancy-related conditions.

Changes: Proposed § 106.40(b)(4) has been revised, consolidated with proposed § 106.40(b)(3)(ii), and redesignated as § 106.40(b)(3)(ii)(A)–(C) in the final regulations to list in one paragraph the recipient's obligations to a student regarding reasonable modifications for pregnancy or related conditions. Final § 106.40(b)(3) now states that the Title IX Coordinator must coordinate actions under paragraphs (b)(3)(i) through (vi), and final § 106.40(b)(3)(ii) now specifically states that a recipient must make reasonable modifications to the recipient's policies, practices, or procedures as necessary to prevent sex discrimination and ensure equal access to the recipient's education program or activity.

Process for Providing Reasonable Modifications

Comments: The Department notes that proposed § 106.40(b)(4)(i)–(iii) have been revised and redesignated as § 106.40(b)(3)(ii)(A)–(C) in the final regulations, and the following comment summaries and discussion refer to the provision as § 106.40(b)(3)(ii)(A)–(C).

Some commenters supported the Department's proposed process for providing students with reasonable modifications because of pregnancy or related conditions, because it would prevent a recipient from forcing a student to take leave or to accept a particular modification. One commenter stated that § 106.40(b)(3)(ii)(A) would properly place the burden on the recipient to show that a modification would fundamentally alter a program or activity and would still require the recipient to identify a suitable alternative modification. Another commenter believed that the required interactive process would facilitate student self-advocacy and foster collaboration between the student and recipient.

In contrast, several commenters expressed concern that the proposed regulations would encourage a recipient to deny a student's requested modification. One commenter, a legal services provider, characterized the proposed regulations as a regression from the Department's prior guidance, and cited the U.S. Dep't of Educ., Office for Civil Rights, Supporting the Academic Success of Pregnant and Parenting Students Under Title IX of the Education Amendments of 1972 (June 2013) (2013 Pregnancy Pamphlet), *https://www2.ed.gov/about/offices/list/ocr/docs/pregnancy.pdf,* which, the commenter stated, required a recipient to excuse any medically necessary absence and was implemented by recipients nationwide for decades. The commenter stated that they often receive calls from students who were denied minimal time off from school, such as missing two or three classes in a semester, even while facing grave health complications and staying caught up on coursework. Another commenter asked the Department to clarify whether a student has any burden in identifying how a recipient could implement a requested modification.

Several commenters asked the Department to clarify how leave that would fall under reasonable modifications—such as intermittent absences to attend medical appointments, time to address lactation needs, or bathroom breaks—would be handled. Among other things, they asked for clarification about how to ensure that students would not be penalized for accessing such modifications; what discretion a recipient has to deny such absences or breaks because they are ''reasonable modifications'' under § 106.40(b)(3)(ii) rather than absences that must be granted under § 106.40(b)(3)(iv); and whether the final regulations adopt a presumption that such absences or breaks are reasonable modifications.

Other commenters asked for clarification on how reasonable modifications because of pregnancy or related conditions should be implemented, including whether ''reasonable'' means that a modification cannot impose an excessive burden on the recipient regardless of whether it would fundamentally alter the education program or activity. Some commenters asserted that § 106.40(b)(3)(ii) would not articulate any standard by which a student must demonstrate, or a recipient must evaluate, what reasonable modification a student needs to prevent discrimination and ensure equal access to an education program or activity. Another commenter asked the Department to confirm that recipients have flexibility in providing modifications to students who are pregnant or are experiencing pregnancy-related conditions. Commenters asked the Department to clarify when a request for a modification is properly denied and a recipient's obligations in such a circumstance.

Some commenters urged the Department to modify the regulations to require a recipient to identify an alternate modification that would meet the student's needs if a requested modification is unavailable or ineffective. Other commenters recommended that the Department clarify that if a modification is ineffective or fundamentally alters an education program or activity, the recipient must engage in a good faith, interactive dialogue to identify another modification that would meet the student's needs.

Finally, some commenters urged the Department to modify the regulations to explicitly prohibit a recipient from forcing a student to accept an unwanted or unneeded modification. They stated that such a provision was necessary because it is unclear whether the use of ''voluntary'' in the proposed regulations refers to a student's voluntary acceptance of a modification or a recipient's voluntary provision of a modification.

Discussion: As stated in the July 2022 NPRM, 87 FR 41521, and as the Department reaffirms here, providing a student with the option of reasonable modifications to the recipient's policies, practices, or procedures because of pregnancy or related conditions is essential to preventing pregnancy-based discrimination and to ensuring equal access to a recipient's education program or activity. The Department acknowledges commenters who asserted that § 106.40(b)(3)(ii) should prevent a recipient from forcing a student to accept a particular modification, should place the burden of demonstrating that a particular modification would fundamentally alter the nature of an education program or activity on the recipient before denying a requested modification, and should require consultation with the student before a recipient offers or implements a particular modification. The Department clarifies and confirms that the final regulations operate consistently with these suggestions.

As discussed in the July 2022 NPRM and clarified in the final regulations, when considering the range of available reasonable modifications, a recipient must consider a student's needs on an individualized basis, as situations will vary based on unique factors such as the age of the student, the type of education program or activity, the student's health needs, and other circumstances. 87 FR 41522–23. Under the final regulations, a recipient is required to consider all reasonable modifications based on pregnancy or related conditions as necessary to prevent sex discrimination and ensure equal access to the recipient's education program or activity in each student's case rather than adopt a generalized approach for all students who are pregnant or who are experiencing pregnancy-related

conditions. *See* § 106.40(b)(3)(ii)(A). While the recipient's obligations are initiated when the student or person who has a legal right to act on behalf of the student notifies the Title IX Coordinator of the student's pregnancy or related conditions, it is not incumbent on the student or the person with a legal right to act on behalf of the student to identify or request a specific possible reasonable modification. *See* 87 FR 41524. Instead, if a student seeks a reasonable modification, a recipient must consult with the student to determine the student's individualized needs and offer options that will best prevent sex discrimination and ensure equal access. *See* § 106.40(b)(3)(ii)(A); 87 FR 41524. Identifying a reasonable modification will be a collaborative effort between the student and the recipient, but, under § 106.40(b)(3) and (3)(ii)(A) and (B), it will be the recipient's duty to offer any reasonable modifications, and—if accepted by the student—promptly and effectively implement them. *See* 87 FR 41524. As noted, the Department's final regulations ensure that a student will receive a modification only on a voluntary basis, and that a student cannot be required to accept a particular modification. *See* § 106.40(b)(3)(ii)(A), (B); 87 FR 41524. The student can decide whether to accept the reasonable modification offered by the recipient, request an alternative reasonable modification, or remain in their program under the status quo. *See* § 106.40(b)(3)(ii)(A)–(B).

Further, the Department clarifies that if there are a range of reasonable modifications that are appropriate to a student's individualized needs under the circumstances that prevent sex discrimination and ensure equal access to the education program or activity, § 106.40(b)(3)(ii) affords a recipient discretion to offer a student the full range of options or to choose to offer one or more preferred options. If a student declines an offered reasonable modification that is based on the student's individualized needs and that would prevent sex discrimination and ensure equal access, the recipient is not required to determine whether there are other reasonable modifications based on that specific need, even if there are other reasonable modifications that could be offered. A recipient would, however, be responsible to offer and make reasonable modifications consistent with final § 106.40(b)(3)(ii)(A) and (B) if any new or additional needs arise.

As discussed in the July 2022 NPRM and further clarified in the text of final § 106.40(b)(3)(ii)(A), a modification that a recipient can demonstrate would fundamentally alter the nature of its education program or activity is not a reasonable modification. *See* 87 FR 41523; *see also Alexander* v. *Choate,* 469 U.S. 287, 300 (1985) (detailing ''fundamental alteration[s]'' in the Section 504 context). The recipient has the burden of demonstrating that a modification fundamentally alters the nature of the recipient's education program or activity or is otherwise unreasonable. A recipient has no obligation to offer or make such an unreasonable modification under final § 106.40(b)(3)(ii)(A).

Demonstrating that a particular or requested action is not a reasonable modification does not, however, relieve a recipient of its obligation to otherwise comply with § 106.40(b)(3)(ii)(A) and (B) by offering, and if the student accepts, implementing reasonable modifications to policies, practices, or procedures as necessary to prevent sex discrimination and ensure equal access to the recipient's education program or activity. Because § 106.40(b)(3)(ii) requires a recipient to consider the provision of a modification based on each student's individualized needs, the determination whether a modification is reasonable will necessarily be a fact-specific inquiry that considers, for example, whether the student has a preferred modification, whether alternative modifications exist, and the feasibility and effectiveness of the modification in addressing the student's specific needs.

Jurisprudence outlining modifications that would be unreasonable or rise to the level of a fundamental alteration to the nature of the program in the educational and disability context is illustrative. For example, courts have found a requested modification to fundamentally alter a recipient's education program or activity if it would completely waive requirements that demonstrate mastery of a particular field of study, *see Brief* v. *Albert Einstein Coll. of Med.,* 423 F. App'x 88, 91–92 (2d Cir. 2011) (citing *Powell* v. *Nat'l Bd. of Med. Exam'rs,* 364 F.3d 79, 88 (2d Cir. 2004)); *Zukle* v. *Regents of Univ. of Calif.,* 166 F.3d 1041, 1051 (9th Cir. 1999); *Kaltenberger* v. *Ohio Coll. of Podiatric Med.,* 162 F.3d 432, 436–37 (6th Cir. 1998); or jeopardize an institution's accreditation, *see Harnett* v. *Fielding Graduate Inst.,* 400 F. Supp. 2d 570, 580 (S.D.N.Y. 2005), *aff'd in part, rev'd in part & remanded,* 198 F. App'x 89 (2d Cir. 2006).

Similarly, courts have held that modifications that would completely waive requirements that demonstrate academic competency, such as clinical components or examinations, were unreasonable. *McGuinness* v. *Univ. of N.M. Sch. of Med.,* 170 F.3d 974, 979 (10th Cir. 1998); *Doherty* v. *S. Coll. of Optometry,* 862 F.2d 570, 575 (6th Cir. 1988) (holding that waiver of requirement that demonstrated proficiency was not a reasonable modification); *Darian* v. *Univ. of Mass. Bos.,* 980 F. Supp. 77, 89–90 (D. Mass. 1997) (finding a student's request to not see patients or attend required clinical program to be unreasonable). In contrast, courts have indicated that a school may reasonably accommodate a student with a disability by allowing a student to defer or make up an examination at a later time, permitting a student to repeat one or more classes, providing a student with tutoring, taped lectures, and the like, and allowing a student to take untimed examinations, *see Wynne* v. *Tufts Univ. Sch. of Med. (Wynne II),* 976 F.2d 791, 795–96 (1st Cir. 1992); modifying a student's seating arrangement, *see Nathanson* v. *Med. Coll. of Pa.,* 926 F.2d 1368, 1385 (3d Cir. 1991); or reducing or modifying a student's duties in a required clinical course, or deferring to another semester completion of a program's clinical requirement, *see Darian,* 980 F. Supp. at 88–89. As a general matter, the Department notes that in the context of Federal disability law, courts have distinguished between modifications that are reasonable and those that rise to the level of a fundamental alteration to the nature of the program by analyzing whether the modification would waive academic requirements rather than providing a student another means to comply with academic requirements. The 2008 amendments to the ADA also affirm that consideration of academic requirements fits within the reasonable modifications framework. *See* 42 U.S.C. 12201(f) (''Nothing in this chapter alters the provision of section [12182] (b)(2)(A)(ii) [. . .] specifying that reasonable modifications in policies, practices, or procedures shall be required, unless an entity can demonstrate that making such modifications in policies, practices, or procedures, including academic requirements in postsecondary education, would fundamentally alter the nature of the goods, services, facilities, privileges, advantages, or accommodations involved.'').

This case law is consistent with the examples of reasonable modifications that were identified in the July 2022 NPRM, such as providing a student who must be intermittently absent from class to attend morning prenatal appointments with the opportunity to

make up lost class time without penalty or offering the student the opportunity to switch to a comparable course that met in the afternoon (as long as either arrangement would be appropriate to the pregnant student's individualized need and would not fundamentally alter the nature of the recipient's education program or activity). 87 FR 41524. In contrast, a student's request to waive their entire senior year and graduate without those credits would likely be a fundamental alteration of the nature of the recipient's program. *Id.* But a recipient would still be required to offer reasonable modifications sufficient to prevent sex discrimination and ensure equal access to its education program or activity, such as by allowing the student to complete the required number of credits at a slower pace or granting an extension to complete certain tests or assignments. *Id.* Consistent with this framework, many of the modifications referenced by commenters—such as allowing a student to miss class to attend medical appointments with the opportunity to make up exams or coursework, allowing a student to take lactation or bathroom breaks during class without penalty, or providing a larger desk—would be more akin to modifications that provide students an alternative means to access an education program or activity rather than a complete waiver of academic requirements. And it would likely follow that a recipient would have difficulty demonstrating that such modifications would fundamentally alter the nature of its education program or activity or otherwise be unreasonable.

For these reasons, the Department disagrees with commenters' assertion that § 106.40(b)(3)(ii) encourages recipients to deny reasonable modification requests. Rather, consistent with cases construing Federal disability law and the examples provided in the July 2022 NPRM, recipients must meet a rigorous standard to demonstrate that a particular or requested modification under § 106.40(b)(3)(ii)(A) would be a fundamental alteration to the nature of a program or activity. To be sure, in the context of Federal disability law, courts have afforded recipients some deference in ''genuine academic decisions,'' *Wynne* v. *Tufts Univ. Sch. of Med. (Wynne I),* 932 F.2d 19, 25 (1st Cir. 1991), such as those involving a request to waive a particular academic program requirement. But they have emphasized that such deference is not the same as the sort of ''broad judicial deference'' that courts use when applying the ''rational basis test.'' *Id.* And courts have only accorded deference to these concerns upon a showing that an academic institution has ''conscientiously carried out'' its obligation to ''seek suitable means of reasonably accommodating'' the needs of a person with a disability. *Id.* at 25–26. Courts have also indicated that new approaches or technological advances may further weaken the deference a recipient is due in its assessment that a reasonable modification would negatively impact genuine academic decisions. *Id.* at 26 (citing *Se. Comm. Coll.* v. *Davis,* 442 U.S. 397, 412 (1979)). The Department anticipates similar standards will apply when assessing whether a modification is ''reasonable'' under § 106.40(b)(3)(ii).

In the event a particular modification would result in a fundamental alteration, the Department acknowledges the concerns voiced by commenters that a recipient could interpret the proposed regulations as allowing a recipient to deny a student's request for modifications completely without any further obligation to prevent sex discrimination and to ensure equal access for a student who is pregnant or experiencing pregnancy-related conditions. To address such concerns, the Department has revised § 106.40(b)(3)(ii)(A) to clarify that a modification that a recipient can demonstrate would fundamentally alter the nature of its education program or activity is not a reasonable modification. Accordingly, demonstrating a particular modification would be a fundamental alteration does not relieve a recipient of its obligation under § 106.40(b)(3)(ii)(A) to otherwise consult with the student, determine whether there are reasonable modifications based on the student's individualized needs, offer such reasonable modifications and, if the student accepts, make such reasonable modifications that sufficiently prevent sex discrimination and ensure equal access.

The Department disagrees that § 106.40(b)(3)(ii) will retreat from previously issued guidance regarding voluntary leaves of absence for pregnancy or related conditions. A recipient's obligation to provide reasonable modifications to a student for pregnancy or related conditions under § 106.40(b)(3)(ii) is separate and distinct from its longstanding obligation—preserved in final § 106.40(b)(3)(iv)—to provide a voluntary leave of absence to a student for pregnancy or related conditions. As explained below in the discussion of § 106.40(b)(3)(iv), that provision provides a basic framework for determining leave due to a student's pregnancy or related conditions. But if a student requests leave that exceeds this framework, the recipient should consider the amount of leave the student requests in excess of that required under § 106.40(b)(3)(iv) as a request for a reasonable modification under § 106.40(b)(3)(ii). *See* 87 FR 41521 (providing examples of circumstances in which leave that exceeds the medically necessary time would be a reasonable modification, such as when the medically necessary leave would end in the middle of a college semester).

Changes: Proposed § 106.40(b)(4) has been revised, consolidated with proposed § 106.40(b)(3)(ii), and redesignated as § 106.40(b)(3)(ii)(A)–(C) in the final regulations. Final § 106.40(b)(3)(ii)(A) now states that a recipient must make reasonable modifications to its policies, practices, or procedures as necessary to prevent sex discrimination and ensure equal access to the recipient's education program or activity; that each modification must be based on a student's individualized needs; that the recipient must consult with the student when determining what modifications are required; and that a modification that a recipient can demonstrate would fundamentally alter the nature of its education program or activity is not a reasonable modification. Section 106.40(b)(3)(ii)(B) now states that a student has discretion whether to accept or decline an offered modification; and that, if the student accepts the offered modification, the recipient must implement the modification.

Inclusive List of Reasonable Modifications

Comments: The Department notes that proposed § 106.40(b)(4)(iii) has been revised and redesignated as § 106.40(b)(3)(ii)(C) in the final regulations, and the following comment summaries and discussion refer to the provision as § 106.40(b)(3)(ii)(C).

One commenter supported § 106.40(b)(3)(ii)(C) because it would provide critical guidance to recipients. Some commenters asked the Department to add various specific examples of modifications or require supplemental services, such as medical care. One commenter recommended that the Department add ''or laboratory work'' after ''coursework.'' Some commenters asked the Department to revise, rather than add to, the list of potential modifications. For example, one commenter suggested that instead of ''homebound'' instruction, the regulations should refer to online

educational programs or other home-based educational services.

Another commenter urged the Department to move ''intermittent absences to attend medical appointments'' from § 106.40(b)(3)(ii)(C) to § 106.40(b)(3)(iv), which relates to voluntary leaves of absence because of pregnancy or related conditions, and clarify that such intermittent absences or voluntary leaves of absence may include pre- and postnatal appointments, as well as bed rest and leave to recover from childbirth or related conditions such as mastitis, or otherwise clarify that a recipient must provide reasonable modifications to an absence policy after childbirth.

Discussion: The Department agrees that § 106.40(b)(3)(ii)(C) will provide critical guidance to recipients. The Department has revised this provision to clarify that online education need not be homebound and to be consistent with final § 106.40(b)(3)(vi), which references certain modifications and is explained in more detail in the discussion of § 106.40(b)(3)(vi), to clarify that breaks from class may be provided to attend to lactation, eating, drinking, using the restroom, or other needs associated with pregnancy or related conditions.

The Department declines to make other revisions to § 106.40(b)(3)(ii)(C) suggested by commenters, including the request to move ''intermittent absences to attend medical appointments'' to § 106.40(b)(3)(iv). As explained above, a recipient's obligation to provide reasonable modifications to a student for pregnancy or related conditions under § 106.40(b)(3)(ii) is separate and distinct from its longstanding obligation to provide a voluntary leave of absence to a student for pregnancy or related conditions, which is codified at § 106.40(b)(3)(iv) in the final regulations. The Department further emphasizes that the regulation's use of the introductory phrase ''[m]ay include but are not limited to'' confirms that the list of possible reasonable modifications is non-exhaustive and broadly inclusive. Section 106.40(b)(3)(ii)(C) includes reasonable modifications that are typical, unlikely to result in a fundamental alteration to the nature of a recipient's education program or activity, and effective in preventing sex discrimination and ensuring equal access for students who are pregnant or experiencing pregnancy-related conditions. For additional clarity, the Department has added the reasonable modifications of breaks to eat, drink, or use the restroom, allowing a student to sit or stand, and allowing a student to carry or keep water nearby. As discussed above, whether a particular or requested modification is reasonable is a fact-specific inquiry that must be individualized to the student in the context of the recipient's education program or activity. Nothing in these regulations prevents a student from requesting or a recipient from affirmatively offering a particular modification, including those suggested by commenters, such as tutoring, supplemental instruction, academic counseling, homework assistance, changes in course load, modification of a school or sport uniform policy, or other modifications that would apply to an athletic or extracurricular context.

As the Department indicated in the July 2022 NPRM, 87 FR 41524, reasonable modifications for a student based on pregnancy or related conditions include many possible options. A student's options for reasonable modifications because of pregnancy or related conditions will not be limited or defined by the fact that the recipient has never had occasion to provide a particular modification to any other student in the past. Further, as explained above, it is not incumbent on the student to propose or suggest any particular reasonable modification in order for the recipient to offer reasonable modifications with the student's input. Additionally, because § 106.40(b)(3)(ii)(A) requires a recipient to consider the provision of a modification on a basis individualized to each student's pregnancy or related condition and needs, a recipient may consider a variety of factors when offering reasonable modifications, such as whether the student has a preferred modification, whether alternative modifications exist, and the feasibility of a modification. However, the Department reiterates that a recipient ultimately has discretion in what reasonable modifications it offers if there is more than one reasonable modification that would address the student's individualized needs, prevent sex discrimination, and ensure equal access to the recipient's education program or activity. Additionally, a recipient has the burden of demonstrating that a particular modification would fundamentally alter the nature of its education program.

Changes: Proposed § 106.40(b)(4)(iii) has been revised and redesignated as § 106.40(b)(3)(ii)(C). The Department has revised the redesignated non-exhaustive list of examples in § 106.40(b)(3)(ii)(C) for consistency with final § 106.40(b)(3)(vi); to clarify that breaks from class may be provided to attend to lactation or other health needs associated with pregnancy or related conditions, including eating, drinking, or using the restroom; and to delete ''other'' from the phrase ''online or other homebound education'' to clarify that online education need not be homebound.

Title IX Coordinator's Role

Comments: Some commenters supported the proposed regulations—which would have required that reasonable modifications because of pregnancy or related conditions ''be effectively implemented, coordinated, and documented by the Title IX Coordinator''—because they would have made clear that the Title IX Coordinator has the authority and responsibility to ensure that reasonable modifications are actually provided to students.

In contrast, other commenters expressed concern that the proposed regulations would have (1) hindered the effectiveness of other departments within a recipient that typically address student requests for disability-related accommodations; (2) been inconsistent with proposed § 106.40(b)(5) (redesignated in the final regulations as § 106.40(b)(4)), which requires comparable treatment to temporary disabilities or conditions; (3) overburdened the Title IX Coordinator; and (4) failed to take into account the expertise and resources most recipients allocate to offices that provide accommodations for students with disabilities. Some commenters noted that other departments within a recipient may also play a role in providing accommodations or be better positioned than the Title IX Coordinator to do so, including academic affairs, student life, enrollment, and campus health services.

Some commenters urged the Department to clarify instances in which the Title IX Coordinator should consult with or defer to disabilities services staff, a student's Section 504 team, or a student's IEP team when the Title IX Coordinator is facilitating a reasonable modification because of pregnancy or related conditions, in order to increase coordinated compliance under Title IX and Federal disability laws.

Some commenters recommended a variety of revisions to the proposed regulations to decrease the role of the Title IX Coordinator in implementing reasonable modifications. Other commenters urged the Department to revise the proposed regulations to make clear that a recipient, not the Title IX Coordinator, is responsible for requests related to reasonable modifications or leaves of absence.

Discussion: The Department agrees with commenters that the recipient, not

the Title IX Coordinator, is ultimately responsible for implementing requests for reasonable modifications and other specific actions the recipient must take under final § 106.40(b)(3)(ii)–(vi). Accordingly, the Department has revised § 106.40(b)(3) to clarify that it is the recipient's responsibility to take, and the Title IX Coordinator's responsibility to coordinate, these actions, including the provision of reasonable modifications because of pregnancy or related conditions. Additionally, the final regulations expressly permit a recipient or a Title IX Coordinator to delegate specific duties as appropriate, provided the Title IX Coordinator retains ultimate oversight to ensure the recipient's consistent compliance under Title IX and the regulations. *See* discussion of § 106.8(a). Consistent with these revisions, and as noted in a similar discussion above regarding § 106.40(b)(3) generally, a recipient may delegate the provision of reasonable modifications because of pregnancy or related conditions to other personnel beyond the Title IX Coordinator.

Permission to delegate responsibilities to designees enables a recipient to assign duties to personnel who are best positioned to perform them, to address actual or perceived conflicts of interest, and to align with the recipient's administrative structure. For example, as long as the Title IX Coordinator retains oversight and a recipient's process for providing reasonable modifications because of pregnancy or related conditions is consistent with § 106.40(b)(3)(ii), a recipient may delegate responsibilities under that process to any staff or departments as appropriate, including those who support students with disabilities.[83] The Department declines to further limit the Title IX Coordinator's role in coordinating reasonable modifications because of pregnancy or related conditions, however. The Title IX Coordinator has unique and specific knowledge of a recipient's obligations to prevent sex discrimination and ensure equal access that must inform the implementation of § 106.40(b)(3)(ii), even if certain portions of the process are delegated to other employees or departments acting with the Title IX Coordinator's oversight. Additionally, the Title IX Coordinator can serve as a critical point of contact for students or provide other support to coordinate multiple departments or employees tasked with implementing reasonable modifications, such as communicating approved modifications to the student and any relevant staff members or ensuring that all other staff members involved in carrying out the modifications are performing their roles.

Revising the regulatory text to state that the Title IX Coordinator's role is to coordinate, rather than exclusively to implement, emphasizes the opportunity for the Title IX Coordinator to delegate and decreases the likelihood that reasonable modification requests overburden the Title IX Coordinator with duties better suited for other personnel. Additionally, the Department has also removed the proposed requirement for the Title IX Coordinator to ''document'' reasonable modifications to decrease administrative burdens on the Title IX Coordinator and address privacy concerns related to such documentation. The Department emphasizes that while a recipient must comply with the final regulations regarding reasonable modifications, the reasonable modification provision does not require a recipient to maintain documentation of compliance with § 106.40(b)(3)(ii). While a recipient may choose to voluntarily maintain such records, those records would be subject to § 106.44(j) of the final regulations, which prohibits the disclosure of personally identifiable information obtained in the course of complying with this part with some exceptions. The disclosure restrictions are explained more fully in the discussion of § 106.44(j).

The Department declines to require a recipient to consult with disabilities support staff in every case related to the provision of reasonable modifications because of pregnancy or related conditions. While doing so may be prudent in some cases, in other cases it will be unnecessary, inappropriate, or inefficient, and whether it is required will be a fact-specific determination. For example, if a high school student with a disability that affects mobility requests a dress code modification for gym class due to pregnancy, this may not impact the student's placement such that coordination with the student's IEP or Section 504 team is required. However, if a student with ADHD requests a six-week, medically necessary leave from high school to recover from childbirth, the student's IEP or Section 504 team would likely have to convene to discuss how to provide the student appropriate education during this period, beyond or in combination with any reasonable modifications the student is entitled to under Title IX. The Department also declines to mandate that a Title IX Coordinator coordinate with disabilities support staff or a student's IEP or Section 504 team because it will better serve a student's privacy interests in circumstances in which a student does not wish to disclose information related to their pregnancy or pregnancy-related condition to their IEP or Section 504 team. For example, a high school student with a vision disability who requests breaks from class to address lactation needs may not wish to share the reason for the breaks beyond the Title IX Coordinator if the disability has no connection to the pregnancy.

Nothing in the final regulations prevents a recipient from adopting additional mechanisms to coordinate compliance with relevant laws to maximize protection from discrimination and minimize the potential for redundancy or unnecessary burden on a recipient's students or employees.

Changes: Proposed § 106.40(b)(4) has been revised, consolidated with proposed § 106.40(b)(3)(ii), and redesignated as § 106.40(b)(3)(ii)(A)–(C) in the final regulations, and the requirement for the Title IX Coordinator to implement and document reasonable modifications has been removed. Final § 106.40(b)(3) now states that the Title IX Coordinator must coordinate actions under paragraphs (b)(3)(i) through (vi). Final § 106.40(b)(3)(ii) now specifically states that a recipient must make reasonable modifications to the recipient's policies, practices, or procedures as necessary to prevent sex discrimination and ensure equal access to the recipient's education program or activity.

Termination of Pregnancy

Comments: The Department notes that proposed § 106.40(b)(3)(ii), (iii), and (4) have been revised and redesignated as § 106.40(b)(3)(ii) and (iv) in the final regulations, and the following comment summaries and discussion refer to these provisions as § 106.40(b)(3)(ii) and (iv).

Some commenters supported reasonable modifications and voluntary leaves of absence because of pregnancy or related conditions as helpful to students in understanding their options for educational access. Several commenters asked the Department to clarify a recipient's obligation to provide reasonable modifications or a leave of absence for complications arising from termination of pregnancy or for out-of-State travel for health care related to pregnancy or related conditions. Other commenters asked that the reasonable modifications provision state that recipients would not be required to provide, pay for, or refer a student for an abortion or any abortion-related services. Some

[83] Such a delegation would not affect the legal determination whether a student has a disability.

commenters asked the Department to clarify or issue guidance on a recipient's obligations regarding disclosure of information related to modifications sought or provided to a student to access an abortion.

Discussion: The Department acknowledges the perspective of commenters who described the importance of the proposed provisions requiring reasonable modifications and voluntary leaves of absence and appreciates the opportunity to clarify a recipient's distinct obligations under these two provisions in the final regulations. Under § 106.40(b)(3)(ii), a recipient must provide a student who is pregnant or experiencing pregnancy-related conditions with reasonable modifications as necessary to prevent sex discrimination and ensure equal access to an education program or activity. Under § 106.40(b)(3)(iv), a recipient must allow a student who is pregnant or experiencing pregnancy-related conditions to voluntarily take a leave of absence from the recipient's education program or activity to cover, at a minimum, the time deemed medically necessary by the student's licensed healthcare provider. As explained more fully above in the discussion of the definition of ''pregnancy or related conditions'' in § 106.2, ''pregnancy or related conditions'' includes pregnancy, childbirth, termination of pregnancy, or lactation, as well as related medical conditions and periods of recovery.

As detailed above in the discussion of the definition of ''pregnancy or related conditions'' in § 106.2, 20 U.S.C. 1688 states that Title IX's general nondiscrimination mandate cannot ''require or prohibit any person, or public or private entity, to provide or pay for any benefit or service, including the use of facilities, related to an abortion.'' The Department does not view a recipient's reasonable modification of its policies, practices, and procedures when necessary due to a student's termination of pregnancy under § 106.40(b)(3)(ii) or allowing a voluntary leave of absence under § 106.40(b)(3)(iv), as running afoul of section 1688. Such modifications or leave are not ''benefits or services'' under 20 U.S.C. 1688. *See* 134 Cong. Rec. H565–02 (daily ed. Mar. 2, 1988) (describing the abortion neutrality provision as limited to ''the performance of or payment for abortion''). The modifications required under § 106.40(b)(3)(ii) do not require any recipient to fund or perform abortions. Rather, modifications required under § 106.40(b)(3)(ii) are specifically related to non-discriminatory access to a recipient's education program or activity and could include, for example, access to online or homebound instruction during recovery from termination of pregnancy; or allowing extra time to complete an exam or coursework for a student who needs to travel out of State to receive specialized care for a high-risk pregnancy.

Further, section 1688 contains a self-limitation; the second sentence indicates that the first must not be ''construed to permit a penalty to be imposed on any person or individual because such person or individual is seeking or has received any benefit or service related to a legal abortion.'' Thus, it is clear that section 1688 does not justify such penalties, which constitute prohibited sex discrimination under section 1681. For purposes of complying with Title IX, schools may presume that individuals seeking reasonable modifications, voluntary leaves of absence, or comparable treatment to other temporary medical conditions related to an abortion intend to obtain a legal abortion. Students can legally terminate a pregnancy either in their State or by traveling to another State where the abortion is lawful. In addition, questions about when an abortion is lawful under State law often involve complex medical and factual considerations that fall well outside the expertise of educational institutions, making recipients ill equipped to assess the legality of an abortion. In response to requests for reasonable modifications, leaves of absence, or comparable treatment, recipients have no education-related need to access information about how or where a student will obtain medical treatment or for other personal health-related information related to termination of a pregnancy.

The Department notes that recipients routinely provide reasonable modifications or accommodations for a wide array of temporary medical conditions (including illness, injury, or medical procedures) without requesting sensitive and specific healthcare information from students about the origin or timeline of such a condition, or about how, where, by whom, or in what manner the condition will be treated. Nothing in these regulations requires a different approach in the abortion context. Were a recipient to treat requests for reasonable modifications for abortion care differently than they do requests for reasonable modifications for other temporary medical conditions with respect to the information students must provide to accompany such requests, such treatment could contravene the broad nondiscrimination mandate in section 1681, as discussed above. Asking a student for such personal information in the course of providing reasonable modifications or comparable treatment may constitute sex discrimination—particularly if the inquiry is informed by sex stereotypes (*e.g.,* questions about whether the student is married or the circumstances surrounding the pregnancy) or could constitute different treatment (*e.g.,* if a recipient would not ask a student how they became disabled or specific questions about treatment of their disability, but asks a student how they became pregnant or specific questions about treatment of their pregnancy, including potential termination). And asking unnecessary and invasive questions could compromise student privacy in a manner that could chill students from seeking reasonable modifications or comparable treatment that they are entitled to under these regulations, which may also contravene Title IX.

In such a scenario, section 1688 would not justify the discrimination because requiring a recipient to apply the same information gathering policies across temporary medical conditions is not requiring a ''benefit or service'' related to abortion. More specific questions and issues related to a recipient's compliance with both Title IX and State law, including when preemption issues may arise, must be considered on a case-by-case basis given the fact-specific nature of the inquiry. Likewise, section 1688 does not preclude the requirement under § 106.40(b)(3)(iv) that a recipient must allow a student to take a voluntary leave of absence for as long as medically necessary for pregnancy or related conditions, including termination of pregnancy. Such a leave of absence is not a benefit or service relating to abortion, particularly when the recipient makes leave generally available to ensure that students with a variety of pregnancy-related (and non-pregnancy related) conditions can continue to access the recipient's education program or activity.

The Department will offer technical assistance, as appropriate, the scope of which will be determined in the future, to promote compliance with these final regulations.

Changes: None.

Interaction With Other Federal Laws

Comments: The Department notes that proposed § 106.40(b)(3)(ii) and (4) have been revised and redesignated as § 106.40(b)(3)(ii) in the final regulations, and the following comment summaries

and discussion refer to these provisions as § 106.40(b)(3)(ii).

One commenter supported § 106.40(b)(3)(ii) because it would clarify that a recipient has other obligations regarding pregnancy or related conditions beyond student and employee health plans and benefits. The commenter asserted that recipients are familiar with the Department's proposed process for pregnancy-related reasonable modifications because they have similar obligations under Title II of the ADA, and that familiarity will facilitate compliance with the proposed regulations.

Another commenter asked the Department to explicitly state that a pregnancy-related condition need not qualify as a disability under the ADA to qualify for a reasonable modification under Title IX.

In contrast, some commenters asserted that the provision of reasonable modifications because of pregnancy or related conditions would exceed the Department's authority under Title IX because the modifications would address disability discrimination. Specifically, the commenters argued that the proposed reasonable modification requirements would go beyond prohibiting different treatment to requiring a recipient to affirmatively provide modifications based on pregnancy or related conditions. The commenters asserted that this requirement would give preferential treatment to a student based on sex in violation of Title IX.

Some commenters also argued that because pregnancy or related conditions generally are not disabilities under the ADA or Section 504, the proposed regulations would impermissibly use Title IX to expand a student's rights and a recipient's obligations under disability law. These commenters further asserted that the requirement to affirmatively notify a student of available modifications and the procedures to determine whether to provide a modification would differ from those outlined in the ADA and Section 504.

Some commenters argued that because Title IX is modeled after Title VII and proposed § 106.40(b)(3)(ii) would provide more protections to a student who is pregnant or experiencing pregnancy-related conditions than a similarly situated employee would be provided under Title VII, the proposed regulations would exceed and conflict with Title VII.

Finally, one commenter asked for clarification about how proposed § 106.40 would interact with other parts of Title IX, the PDA, Section 504, and the ADA. The commenter also asked for clarification about the differences between a recipient's obligations toward pregnant students and employees, how § 106.40 would apply to a student-employee, and whether there is a distinction based on whether the individual is primarily a student (*e.g.,* undergraduate students with part-time campus-based jobs) or primarily an employee (*e.g.,* employees who may be enrolled in one or two classes at a time) and the context for the sex discrimination reported. This commenter observed that § 106.46(b) addresses this issue regarding sex-based harassment grievance procedures.

Discussion: The Department agrees that § 106.40(b)(3)(ii) will clarify that a recipient has obligations that extend beyond student health plans and benefits for students who are pregnant or experiencing pregnancy-related conditions. Additionally, the Department agrees that similarities between § 106.40(b)(3)(ii) and Title II of the ADA will facilitate compliance for recipients.

The Department disagrees that § 106.40(b)(3)(ii) exceeds the Department's authority under Title IX or provides preferential treatment to a student based on sex in violation of Title IX. Since 1975, consistent with the Department's broad statutory authority to issue regulations prohibiting sex discrimination, the Title IX regulations have included provisions that require a recipient to take proactive steps to ensure equal treatment and access for students who are pregnant or experiencing pregnancy-related conditions that differ from what accommodations are provided to other students, including students with disabilities. *See* 40 FR 24128 (codified at 45 CFR 86.40(b)(1), (5) (1975)); 34 CFR 106.40(b)(1), (5) (current); 20 U.S.C. 1682. The provision of reasonable modifications based on pregnancy or related conditions is not preferential treatment based on sex, but rather measures that are necessary to prevent sex discrimination and ensure equal access to a recipient's education program or activity for students who are pregnant or experiencing pregnancy-related conditions. A recipient's denial of reasonable modifications for a student based on pregnancy or related conditions uniquely deprives that student of an educational opportunity of which they would not otherwise be deprived, but for their sex.

Moreover, the Department disagrees with commenters' assertion that § 106.40(b)(3)(ii) impermissibly uses Title IX to expand a student's rights or a recipient's obligations under disability law. As some commenters and the July 2022 NPRM noted—and as the Department clarifies here—pregnancy itself is not a disability. 87 FR 41523. Therefore, a recipient's obligation to provide reasonable modifications because of pregnancy or related conditions under § 106.40(b)(3)(ii) is distinct from its obligation to provide reasonable modifications because of a disability under Section 504 or the ADA. Further, whether a pregnancy-related condition is categorized as a disability under Section 504 or the ADA has no effect on a recipient's separate obligation to provide reasonable modifications under § 106.40(b)(3)(ii). 87 FR 41525. The Department clarifies that nothing in § 106.40(b)(3)(ii) obviates a recipient's separate obligation to comply with other applicable civil rights law, including the ADA, Section 504, Title VII as amended by the PDA, or the Pregnant Workers Fairness Act (PWFA), codified at 42 U.S.C. 2000gg *et seq.,* which has become law since the issuance of the July 2022 NPRM.

The Department disagrees that the obligation to provide reasonable modifications because of pregnancy or related conditions conflicts with the obligation to provide reasonable modifications for a disability. As indicated in the July 2022 NPRM, the framework for reasonable modifications because of pregnancy or related conditions is similar to the framework of Title II of the ADA, and the approach of § 106.40(b)(3)(ii) will invite collaboration between the student and the recipient to determine what reasonable modifications are required considering the student's individualized needs, a process that is similar to the one used to identify the reasonable modifications or reasonable accommodations that must be implemented under the ADA. *See* 87 FR 41523. The Department expects that this framework not only will be most effective in ensuring equal access and preventing sex discrimination as required by Title IX, but also will be familiar to most recipients and thus will be relatively straightforward to adopt and implement for students who are pregnant or experiencing pregnancy-related conditions. As such, the Department declines to remove the requirement to provide reasonable modifications because of pregnancy or related conditions.

The Department disagrees with the assertion that providing unique protections to students under Title IX necessarily conflicts with Title VII. As explained in the July 2022 NPRM, the treatment of pregnancy-related discrimination under the PDA, the ACA, and other statutes enacted since 1975

informs, but does not dictate, the Department's understanding of discrimination on the basis of sex under Title IX. 87 FR 41394. Title IX regulations have long included protections and requirements that are unique to the context of education programs and activities. *See generally* 40 FR 24128 (1975). For example, the provision of a voluntary leave of absence to a student or employee for pregnancy and certain related conditions (34 CFR 106.40(b)(5) (current) and 34 CFR 106.57(d) (current)) are longstanding requirements in Title IX regulations that have no corollary in Title VII. Further, in response to a commenter's request to clarify how § 106.40(b)(3)(ii) and this part would interact with the PDA, Section 504, and the ADA, explaining all the ways that Title IX may interact with these laws is too extensive to summarize and beyond the scope of this rulemaking,

Additionally, under § 106.40(b)(3)(ii), a recipient is obligated to provide reasonable modifications to a student, defined in § 106.2 as ''a person who has gained admission,'' who is pregnant or experiencing pregnancy-related conditions. The recipient has this obligation regardless of whether the student is also an employee of the recipient. The primary purpose of reasonable modifications under Title IX is to ensure that pregnancy or related conditions do not deny educational opportunities or disrupt a student's academic progress, regardless of whether the student is enrolled full-time, part-time, or in only one or two classes. Consequently, if an employee is enrolled in the recipient's education program or activity, the recipient must offer and make reasonable modifications sufficient to allow the employee to continue their educational progress as a student consistent with § 106.40(b)(3)(ii). Additionally, the Department clarifies that a recipient must comply with grievance procedures outlined in § 106.45, and if applicable § 106.46, for any complaint that alleges a recipient failed to take specific action under § 106.40(b)(3), regardless of whether the student is also an employee. Final § 106.46(b) further discusses the application of grievance procedures to a sex-based harassment complaint, which may include pregnancy harassment, that involves a postsecondary student-employee. *See* discussion of § 106.46(b).

Changes: None.

Request To Extend Reasonable Modifications to Applicants

Comments: The Department notes that proposed § 106.40(b)(3)(ii) and (4) have been revised and redesignated as § 106.40(b)(3)(ii) in the final regulations, and the following comment summaries and discussion refer to these provisions as § 106.40(b)(3)(ii).

Some commenters recommended that the Department revise proposed § 106.40(b)(3)(ii) to state that an applicant for admission has the right to a reasonable modification to ensure that pregnancy or related conditions do not act as a barrier to entering a recipient's education program or activity, as well as to align with other civil rights laws.

Discussion: The Department declines to require a recipient to apply § 106.40(b)(3)(ii) to applicants for reasons discussed in more detail in the discussion of § 106.21(c)(1).

Changes: None.

Terminology

Comments: The Department notes that proposed § 106.40(b)(3)(ii) and (4) have been revised and redesignated as § 106.40(b)(3)(ii) in the final regulations, and the following comment summaries and discussion refer to these provisions as § 106.40(b)(3)(ii).

Some commenters recommended that the Department replace the term ''reasonable modifications'' with the term ''reasonable accommodations'' because, they stated, it would be less confusing and more appropriate for the context. Some commenters asserted that ''modification'' implies a change to what a student is expected to do while ''accommodation'' implies a support or service to help a student do an expected task. The commenters asserted that ''accommodation'' describes a broader range of support that a recipient may provide to a student who is pregnant or experiencing pregnancy-related conditions. In contrast, another commenter stated that a ''modification'' to a policy, practice, or procedure seems more permanent and implies that it would be changed for all students.

Discussion: While the Department acknowledges commenters' concerns about the term ''reasonable modifications'' and its meaning, the term is appropriate and straightforward. Final § 106.40(b)(3)(ii) clearly sets out the purpose of reasonable modifications and the very broad range of individual modifications that a recipient may provide based on the circumstances. Under the final regulations, a recipient can implement a reasonable modification for just one student, such as a modification that is provided to just the student who is pregnant or experiencing pregnancy-related conditions, or implement a broader policy or procedural change that affects many students, including the student who is pregnant or experiencing pregnancy-related conditions; for example, implementing a student's reasonable modification request for an extension on an assignment by extending the deadline for all students in the class. Additionally, the regulatory framework from which § 106.40(b)(3)(ii) primarily draws—but is not identical to—and with which many recipients must comply under Title II of the ADA uses the term ''reasonable modifications.'' 28 CFR 35.130(b)(7). Therefore, using the term ''reasonable modifications'' is less confusing and more appropriate than any other term.

Changes: None.

Cost-Benefit Analysis

Comments: The Department notes that proposed § 106.40(b)(3)(ii) and (4) have been redesignated as § 106.40(b)(3)(ii) in the final regulations, and the following comment summaries and discussion refer to these provisions as § 106.40(b)(3)(ii).

One commenter objected to proposed § 106.40(b)(3)(ii) because, the commenter asserted, the Department did not consider what reasonable modifications would be required, aside from lactation spaces and leave; the financial costs of such modifications; how providing a modification could negatively impact or be unfair to another student, such as delayed or longer times for test taking; or any reasonable modifications required for parents or fathers.

Discussion: The commenter overstates the increased costs or burdens for implementing reasonable modifications unrelated to lactation and leave. As noted in the July 2022 NPRM, recipients have existing obligations that are similar to those under § 106.40(b)(3)(ii), which require a recipient to make modest modifications to a policy, practice, or procedure, such as providing a student a larger desk, allowing more frequent bathroom breaks, or permitting temporary access to elevators. 87 FR 41560.

The Department declines to extend reasonable modifications to individuals other than students who are pregnant or experiencing pregnancy-related conditions, because such students have unique sex-based needs and requiring reasonable modifications for that population is necessary for ensuring equal access to a recipient's education program or activity and preventing sex discrimination. The Department notes

that, even though recipients are not required to extend reasonable modifications beyond the student who is pregnant or experiencing a pregnancy-related condition, any rules related to a student's parental, family, or marital status cannot treat students differently based on sex. A policy that allowed for leave for only students of one sex to, for example, provide bonding time ''for the natural caregiver''—rather than leave to recover from childbirth—would be based on impermissible sex stereotypes in violation of Title IX. Nothing in Title IX prevents a recipient from offering reasonable modifications or leave to parents or caregivers, provided the recipient does not treat students differently on the basis of sex.

Further, the Department disagrees with the implication that the costs or burdens of § 106.40(b)(3)(ii) would not be justified by the benefits of clarifying a recipient's obligation to provide, and ensuring that students are able to access, reasonable modifications and voluntary leaves of absence for pregnancy or related conditions. The Department views the final regulations as an effective means of preventing sex discrimination and ensuring equal access to a recipient's education program or activity for students who are pregnant or experiencing pregnancy-related conditions. Although there are limited data quantifying the economic impacts of sex discrimination, the Department's review of public comments shows that such barriers can prevent students from obtaining a high school diploma, pursuing higher education, or obtaining a postsecondary degree, which limits their economic opportunities and may have long-term or generational impacts. A more detailed discussion and analysis of the costs and benefits of provisions related to reasonable modifications in these final regulations is included in the *Regulatory Impact Analysis* discussion of pregnancy or related conditions.

Changes: None.

7. Sections 106.40(b)(1) and 106.40(b)(3)(iii) Pregnancy or Related Conditions—Voluntary Access to Separate and Comparable Portion of Program or Activity

Comments: The Department notes that proposed § 106.40(b)(3)(i)(C) has been redesignated as § 106.40(b)(3)(iii) in the final regulations, and the following comment summaries and discussion generally refer to this provision as § 106.40(b)(3)(iii).

Some commenters appreciated that the provisions in the proposed regulations at § 106.40(b)(1) and (3)(iii) would preserve the existing and longstanding requirement that participation in any separate program based on pregnancy or related conditions must be voluntary and that such programs must be comparable to those offered to students who are not pregnant and do not have related conditions.

Some commenters cited examples of pregnant students, particularly those in high school, being coerced or pressured into inferior alternative education programs. A group of commenters provided examples from their own experiences and reported that, when educators or counselors learn of a student's pregnancy or parental status, they often pressure the student to attend an alternate school of lower quality that offers fewer options for courses and extracurricular activities or force the student to withdraw from the recipient's education program or activity altogether instead of offering support to help them continue their education.

Some commenters urged the Department to change the proposed regulatory language to explicitly prohibit a recipient from forcing a student who is pregnant or is experiencing a pregnancy-related condition to participate in a separate portion of the recipient's education program or activity. Some commenters requested that the Department alter the standard in proposed § 106.40(b)(1) and require separate programs to be ''substantially equal'' instead of ''comparable.'' Some commenters suggested that the Department specify that such programs must be substantially equal ''in purpose, scope, and quality'' to those offered to students who are not pregnant or parenting. One commenter suggested that the Department incorporate into its standard the factors outlined in the current regulations regarding single-sex classes at § 106.34(b)(3) to evaluate whether a program offered to pregnant students is substantially equal.

Other commenters requested that the Department change proposed § 106.40(b)(1) to apply to parenting students.

Discussion: The Department disagrees that the regulations need to be revised to state that a recipient must not force a student who is pregnant or experiencing pregnancy-related conditions to participate in a separate portion of its education program or activity or to further define the terms in the proposed regulations. Under final § 106.40(b)(1) and (3)(iii), a recipient does not engage in prohibited discrimination when it allows a student who is pregnant or experiencing pregnancy-related conditions to participate voluntarily in a separate portion of the recipient's education program or activity. Indeed, since the Department's Title IX regulations were originally promulgated in 1975, they have required that such admittance be ''completely voluntary on the part of the student[.]'' 40 FR 24128 (codified at 45 CFR 86.40(b)(3) (1975)); *see also* 34 CFR 106.40(b)(3) (current). The Department clarifies here that the use of the word ''voluntarily'' means that recipients must not coerce or pressure any student to participate in such separate programs. This is consistent with OCR's public education documents regarding Title IX and pregnant and parenting students, issued first in 1991 and again in 2013, which explained the Department's policy that the regulations prohibited a recipient from requiring or pressuring a student to participate in a separate program for pregnant students. *See* 2013 Pregnancy Pamphlet at 7; U.S. Dep't of Educ., Office for Civil Rights, Teenage Pregnancy and Parenthood Issues Under Title IX of the Education Amendments of 1972, at 6 (1991) (1991 Pregnancy Pamphlet), *https://files.eric.ed.gov/fulltext/ED345152.pdf.* Because a student's participation in a separate portion of its education program or activity under final § 106.40(b)(1) and (3)(iii) on the basis of pregnancy or related conditions is voluntary, a recipient may neither coerce nor pressure such a student to participate. For these reasons, the alternate definitions or constructions offered by commenters are unnecessary.

Additionally, the Department declines the commenters' suggestion to require any voluntary and separate portion of a recipient's education program or activity to be ''substantially equal'' instead of ''comparable.'' The requirement that a separate program for pregnant students be ''comparable'' has been in the regulations as part of current § 106.40(b)(3) since they were originally promulgated in 1975, and OCR has interpreted the term, as it is generally understood, to mean of equivalent quality or similar such that it is capable of comparison. 40 FR 24128 (codified at 45 CFR 86.40(b)(3) (1975)); *see also* 34 CFR 106.40(b)(3) (current). As OCR explained in 1991, the comparability requirement means that voluntary alternative programs must provide ''educational quality and academic offerings similar to those in the regular program.'' 1991 Pregnancy Pamphlet, at 7. And in 2013 the Department further explained that, for example, an alternative program providing only a vocational track with no opportunity for

advanced academic or college-preparatory classes would not meet the comparability standard. *See* 2013 Pregnancy Pamphlet, at 7. The Department clarifies that the term ''comparable'' refers to all aspects of a student's access to educational opportunity.

There may be legitimate, nondiscriminatory reasons that a temporary program for students who are pregnant or are experiencing related conditions could not be substantially the same as the permanent academic program offered to all students. For example, while an online portion of a recipient's program in some cases may not be considered substantially equal in quality to in-person instruction (because, for example, it lacks certain extracurricular activities or opportunities for social interaction that a traditional program would have), such an option might offer a pregnant student who is confined to bed rest a comparable alternative that would keep them engaged in school for a specific timeframe and be preferable to remaining completely out of school. Likewise, an alternative program geared toward pregnant students may exceed the offerings of a recipient's general curriculum, for example by including parenting classes to support the needs of this specific population. A determination about such programs would depend on the facts and circumstances, but the Department generally considers these types of supplemental courses or services to be allowed under the § 106.40(b)(1) and (3)(iii) ''comparable'' standard. Shifting to a ''substantially equal'' standard could suggest that they are impermissible.

The Department declines the commenter's suggestion to incorporate into final § 106.40(b)(1) and (3)(iii) the factors for single-sex classes under current § 106.34(b)(3). Doing so could inaccurately imply that any ''separate portion'' of a recipient's education program or activity subject to § 106.40(b)(1) and (3)(iii) is always single-sex. However, the Department agrees that the § 106.34(b)(3) factors are nevertheless helpful and relevant to explain how the Department interprets comparability under final § 106.40(b)(1) and (3)(iii). Accordingly, the Department clarifies that in determining whether such ''separate portion'' of a recipient's education program or activity under final § 106.40(b)(1) and (3)(iii) is ''comparable'' to that offered to students who are not pregnant and do not have related conditions, the Department considers, as appropriate, factors including the policies and criteria of admission; the educational benefits provided, including the quality, range, and content of curriculum and other services and the quality and availability of books, instructional materials, and technology; the qualifications of the instructors; and the quality, accessibility, and availability of facilities and resources provided to the class.

For clarity, rather than stating that a recipient may permit a student based on pregnancy or related conditions to participate voluntarily in a separate and comparable portion of its education program or activity as outlined above and set out in proposed § 106.40(b)(1), the Department has revised the second sentence of final § 106.40(b)(1) to state that such a voluntary and comparable placement is not prohibited discrimination. This revision will increase coherence within § 106.40(b)(1) and emphasize that a recipient may allow the type of enrollment described without running afoul of the regulation's general prohibition on discrimination based on pregnancy or related conditions in the same provision.

The Department acknowledges the suggestion that the Department revise § 106.40(b)(1) to apply to parenting students. The Department notes that under the final regulations, treating parenting students differently based on sex is prohibited, *see* § 106.40(a), as is discriminating against parenting students and employees based on sex stereotypes about the proper roles of mothers and fathers, *see* § 106.10. The Department will consider the need for the suggested revision, and the cost and administrative burden it may place on recipients, in future rulemakings.

Changes: For stylistic consistency with other references to ''voluntary'' in the final regulations, the Department has replaced ''participate voluntarily'' in § 106.40(b)(1) with ''voluntarily participate.'' The Department has further replaced the words ''may permit'' with the words ''does not engage in prohibited discrimination when it allows[.]''

8. Section 106.40(b)(3)(iv) Pregnancy or Related Conditions—Voluntary Leaves of Absence

General

Comments: The Department notes that proposed § 106.40(b)(3)(ii), (iii), and (4) have been revised and redesignated as § 106.40(b)(3)(ii) and (iv) in the final regulations, and the following comment summaries and discussion refer to these provisions as § 106.40(b)(3)(ii) and (iv).

Some commenters supported proposed § 106.40(b)(3)(iv) because it would ensure a recipient's absence policy does not affect a student's access to its education program or activity due to pregnancy or related conditions. One group of commenters shared personal experiences of being penalized for pregnancy-related absences, including a student who was given a failing grade because she was in the hospital recovering from a miscarriage during final exams and a postsecondary student who was told to return to school to take exams, days after giving birth, against her doctor's recommendation. Other commenters shared experiences of feeling pressured to return to an education program or activity before they were physically capable or against medical advice, such as inducing labor to avoid missing a class or seeking a release from a doctor to return sooner than what is advised for a surgery as complicated as a cesarean section.

Some commenters supported proposed § 106.40(b)(3)(iv) because it would ensure leave is based on medical necessity and require a student to be restored to the same status upon return. One commenter said that this provision is needed based on a survey, which found that pregnant students are typically out of school from four to six weeks after childbirth but receive no academic instruction or connection to teachers or school; that students who return to school often struggle to make up for lost instruction time; and that students are unaware of the supports available to them in school to maintain access to educational opportunities.

Some commenters urged the Department to modify language related to reinstatement after a leave of absence, such as defining ''academic status'' in § 106.40(b)(3)(iv) and acknowledging that reinstatement in a particular semester may depend on the program in which the student is enrolled.

Another commenter stated that the Department should be as specific as possible regarding student-athletes, to prevent a recipient from penalizing a student-athlete for pregnancy or related conditions during a leave of absence.

Some commenters asked the Department to clarify the timeline for when a student is to be reinstated to the academic status that they held prior to taking leave consistent with § 106.40(b)(3)(iv). Another commenter asked the Department to clarify the term ''leave of absence'' in § 106.40(b)(3)(iv) as it applied to an elementary school or secondary school, because attendance is compulsory in these grades.

Discussion: The Department agrees that § 106.40(b)(3)(iv) will afford equal

opportunity and clarify a recipient's obligation to allow a student to take a voluntary leave of absence related to pregnancy or related conditions for, at a minimum, a period that is deemed medically necessary by their healthcare provider. The Department is persuaded by the perspective offered by several commenters regarding their experiences with recipients' absence policies that effectively punished or caused students who were pregnant or experiencing pregnancy-related conditions to stop participating in an education program or activity. These experiences further demonstrate the importance of § 106.40(b)(3)(iv).

The Department declines to further define ''academic status'' or ''leave of absence'' or adopt commenters' other suggested modifications to § 106.40(b)(3)(iv). As explained in greater detail in the July 2022 NPRM, a student's right to take leave for pregnancy or related conditions has been included in the Title IX regulations since 1975, and, like the proposed regulations, the final regulations are consistent with the Department's longstanding interpretation of Title IX regulations. *See* 87 FR 41521; 40 FR 24128 (codified at 45 CFR 86.40(b)(5) (1975)); *see also* 34 CFR 106.40(b)(5) (current); 1991 Pregnancy Pamphlet, at 6; 2013 Pregnancy Pamphlet, at 5. Moreover, the Department's view is that reinstating a student to the academic status that the student held when voluntary leave began, consistent with § 106.40(b)(3)(iv), necessarily will require a recipient to provide a student a meaningful opportunity and reasonable time to make up any coursework or exams missed while on leave. This position accords with the Department's view of the current Title IX regulations as stated in the 2013 Pregnancy Pamphlet, at 10, and these final regulations incorporate that position. Additionally, as discussed in more detail above, a recipient has a distinct and separate obligation under § 106.40(b)(3)(ii) to consult with the student to offer and implement reasonable modifications that meet the student's individualized needs to prevent sex discrimination and ensure equal access. A recipient must meet its obligations under § 106.40(b)(3) in all parts of its education program or activity, including programs that grant professional degrees or certifications or are subject to licensure requirements.

The Department declines to specify how a recipient's obligation to allow a student to take a voluntary leave of absence under § 106.40(b)(3)(iv) interacts with compulsory attendance requirements for students in elementary school or secondary school. This is a fact-specific inquiry that depends on the specifics of a State or local law and whether the application of such law conflicts with a recipient's obligations under Title IX or its regulations, consistent with the preemption provision at § 106.6(b). For a more detailed explanation of preemption in the final regulations, see the discussion of § 106.6(b).

The Department clarifies that, consistent with the existing regulations, a recipient may not preclude a student from participating in any part of an education program or activity due to pregnancy or related conditions under final § 106.40(b)(1). This prohibition extends to athletic and other extracurricular opportunities. Additionally, as noted in the July 2022 NPRM, the Department recognizes that if a student elects to take a voluntary leave of absence under § 106.40(b)(3)(iv), in some instances, an extracurricular activity, event, or program will have ended by the time a student returns from leave or the student may not be able to participate due to timing or other logistical reasons. 87 FR 41521. Therefore, although the final regulations create a presumption that a student returning from leave should be reinstated to the same extracurricular status, there may be some limited instances when exact reinstatement would not be administratively possible or practicable under the circumstances. Beyond these general principles, the Department declines to further specify the application of § 106.40(b)(3)(iv) to student athletes because this is a fact-specific determination best made on a case-by-case basis.

Similarly, the Department declines to further specify timelines for reinstatement after a leave of absence because this is also a fact-intensive inquiry that must be determined on a case-by-case basis. However, the Department has revised the final regulations to further clarify that any leave of absence must be voluntary on the part of the student and that the medically necessary period is only a minimum requirement. In addition, § 106.40(b)(3)(iv) clarifies that to the extent a student qualifies for leave under a recipient's leave policy for students that allows a greater period of time than the medically necessary period, the recipient must permit the student to take leave under that policy instead, if the student chooses. When a student needs additional time beyond that available under § 106.40(b)(3)(iv), the recipient should consider such a request under the reasonable modification standard of § 106.40(b)(3)(ii).

Changes: The Department has redesignated proposed § 106.40(b)(3)(iii) as § 106.40(b)(3)(iv) in the final regulations and made revisions to clarify further that ''voluntary'' refers to a student's decision to take a leave of absence, and that a recipient needs to allow a student to take leave under a leave policy that allows for a greater period of time than what is medically necessary only if the student qualifies for leave under that policy.

Implementation

Comments: Some commenters requested clarification of whether an admitted student would be entitled to a pregnancy-related leave of absence before the start of classes. Specifically, commenters asked how the proposed regulations would operate if an admitted student needed to miss the first few weeks of class due to pregnancy or related conditions. Commenters reported that many recipients currently require admitted students who need a leave of absence before the start of classes to withdraw and reapply to the recipient's education program or activity, which could impede their academic progress if a class is only offered once a year.

Some commenters asserted that the Department should further modify or clarify § 106.40(b)(3)(ii) and (iv) considering enrollment practices and leave policies at postsecondary institutions related to financial aid eligibility. Specifically, commenters interpreted financial aid regulations as limiting the amount of leave a student may take to one leave of absence for up to 180 days per academic year, and only after completion of at least one semester. Some commenters also stated that if a student goes over this limit or has not completed one semester, many recipients' leave policies require the student to withdraw from the recipient's education program or activity and reapply for admission—regardless of whether the leave of absence is due to pregnancy or related conditions. One commenter indicated that the proposed leave provision raises questions about who would be responsible for any additional expenses incurred as a result of a student taking medically necessary leave, such as additional student loan and interest expenses when a student postpones reenrollment to accommodate a structured cohort program, particularly in clinical healthcare programs. Other commenters urged the Department to require a recipient to maintain the student's access to benefits while on leave, such as housing,

financial aid, scholarships, and health care, on the grounds that a student can lose access to these benefits if required to withdraw or deregister while on medically necessary leave.

Discussion: The Department's definition of ''student'' in its Title IX regulations, which dates to 1975, is broad and includes anyone admitted to a recipient institution. *See* 40 FR 24128 (codified at 45 CFR 86.2(q) (1975) (defining student to mean ''a person who has gained admission'')); 34 CFR 106.2(r) (current) (same definition); § 106.2 (same definition). Under final § 106.40(b)(3)(iv), a recipient must allow a student to take a voluntary leave of absence from the recipient's education program or activity to cover, at minimum, the period of time deemed medically necessary by the student's healthcare provider. Therefore, any admitted or enrolled student would qualify for a voluntary leave of absence for pregnancy or related conditions. A recipient may not require a student who needs a leave of absence due to pregnancy or related conditions prior to the school year starting or in the first few weeks of classes to withdraw and reapply to the education program or activity because doing so would be inconsistent with § 106.40(b)(3)(iv). To the extent that a recipient maintains a general policy requiring that all students who need a leave of absence prior to the school year starting or in the first few weeks of classes must withdraw and reapply, a student who requires such a leave due to pregnancy or related conditions must be exempted from such a general policy in order for the recipient to comply with § 106.40(b)(3)(iv). To the extent a student needs leave that exceeds the period of time deemed medically necessary by the student's healthcare provider, a recipient must determine whether there is a reasonable modification under § 106.40(b)(3)(ii). With respect to general information about a recipient's obligations under § 106.40(b)(3)(iv) and requirements of the Federal Student Aid program as it may relate to a recipient's leave policy, as discussed more fully above, § 106.40(b)(3)(iv) requires a recipient to excuse a student's absences due to pregnancy or related conditions for as long as the student's healthcare provider deems the absences to be medically necessary. The recipient must allow the student to return to the same academic status held as before medical leave began, which must include giving the opportunity to make up any missed work. A recipient may also offer the student alternatives to making up missed work, especially after longer periods of leave. Consistent with § 106.40(b)(4), a recipient is not permitted to adopt or apply a medical leave policy that treats a student who withdraws from school due to pregnancy or related conditions worse than a student who withdraws from school due to any other temporary medical condition.

The Federal student financial programs authorized by Title IV of the Higher Education Act of 1965, as amended (Title IV), are administered by the Department's Federal Student Aid office. 20 U.S.C. 1070a. Under the Department's regulations related to Title IV at 34 CFR 668.22(a)(1), if a student who has received Title IV grant or loan funds withdraws from an education program or activity after beginning attendance, the amount of Title IV grant or loan assistance earned by the student must be determined. If the amount the recipient receives on behalf of the student is greater than the amount earned, the unearned funds must be returned to the Department. *See generally* 34 CFR 668.22. This is often referred to as the ''return to Title IV'' funds calculation. However, a recipient's Title IX obligation to provide a voluntary leave of absence for pregnancy or related conditions does not necessarily require a recipient to meet its obligations under Title IV in a manner that disadvantages a student who requests such leave. For example, the Title IV regulations at 34 CFR 668.22(d)(1) explain that a recipient does not have to treat a leave of absence as a withdrawal for Title IV purposes, if it is an approved leave of absence and meets the requirements in 34 CFR 668.22(d)(1)(i)–(viii). If a leave of absence meets these requirements, it is considered a temporary interruption and is not counted as a withdrawal for Title IV purposes, so the recipient is not required to perform the ''return to Title IV'' calculation and return unearned funds to the Department, and there cannot be unearned Title IV aid due from the student.

If a pregnant student's healthcare provider deems a leave of absence medically necessary, the recipient would be required by Title IX to grant the academic leave of absence for as long as the student's healthcare provider deems it medically necessary. *See* 34 CFR 106.40(b)(3)(iv). The Title IV regulations governing approved leave of absences are only applicable with regard to the process the recipient must have in place to determine whether or not the student's leave of absence is considered a withdrawal for Title IV purposes. Depending on the facts of the case and, in particular, the length of the pregnant student's academic leave of absence, such a leave of absence under § 106.40(b)(3)(iv) may also qualify as an approved leave of absence for Title IV purposes. Determination of whether it qualifies depends on the application of the factors specified in 34 CFR 668.22(d)(1)(i)–(vii). In addition, the Title IV regulations governing the return of funds do not prohibit a school from developing its own refund policy, consistent with the Title IX requirements described above. If the length of the leave of absence for pregnancy or related conditions in combination with any other approved leaves of absence will exceed 180 days in a 12-month period, *see id.* § 668.22(d)(1)(vi), the recipient would be required to calculate the earned and unearned portions of Title IV assistance and follow the other requirements in 34 CFR 668.22.

Changes: None.

Relation to Reasonable Modifications

Comments: One commenter asked the Department to clarify what discretion a recipient has in implementing voluntary leaves of absence under proposed § 106.40(b)(3)(iv) if leave would fundamentally alter the recipient's education program or activity, such as when a sequenced curriculum would require a student to take leave for a period that is longer than medically necessary or more than the amount of leave desired by the student.

Discussion: The Department clarifies that the inquiry related to fundamental alteration relates to reasonable modifications under § 106.40(b)(3)(ii). As such, it has no bearing on a recipient's obligation to allow a voluntary leave of absence for pregnancy or related conditions under § 106.40(b)(3)(iv). Since 1975, a recipient has had an obligation to allow a student to take a voluntary leave of absence for as long as deemed medically necessary for pregnancy or related conditions and to reinstate the student to the same status held before leave was taken. 40 FR 24128 (codified at 45 CFR 86.40(b)(5) (1975)); *see also* 34 CFR 106.40(b)(5) (current). Consistent with longstanding regulations and the need to ensure access to education for students who are pregnant or experiencing pregnancy-related conditions, § 106.40(b)(3)(iv) requires a recipient to, at a minimum, offer and provide such leave and reinstatement, regardless of whether the recipient believes that such leave and reinstatement would fundamentally alter the nature of the recipient's education program or activity. A

recipient otherwise has discretion in how it administers voluntary leaves of absence, as long as implementation is consistent with § 106.40(b)(3)(iv), Title IX, and this part, including the requirement to treat pregnancy or related conditions in the same manner and under the same medical leave policies as any other temporary medical condition under § 106.40(b)(4) and the general prohibition on discrimination based on pregnancy or related conditions under § 106.40(b)(1).

The Department preserved the requirement to offer voluntary leaves of absence for pregnancy or related conditions in the final regulations because it is widely known that most persons experiencing pregnancy or related conditions will need to take some medically necessary leave—most commonly after childbirth or termination of pregnancy, although some common pregnancy-related conditions may require a person to take a leave of absence during a pregnancy, such as preeclampsia or placenta previa. As a result, the ability to take voluntary leaves of absence is critical to ensuring pregnancy or related conditions do not deprive students of equal educational opportunities. Allowing a student to take leave and preserve their status in an education program advances Title IX's nondiscrimination objectives much more effectively than, for example, requiring a student to withdraw from a program and then go through the administratively burdensome and costly process of reenrolling in the future. Further, pregnancy is inherently time-limited and affects a segment of the general population based on sex. As such, § 106.40(b)(3)(iv) sets forth a simple and straightforward process that recipients can apply consistently with minimal administrative burdens to fulfill Title IX's mandate to prevent sex discrimination and ensure equal access to students who are pregnant or experiencing pregnancy-related conditions.

Changes: None.

Determination of Leave Period

Comments: The Department notes that proposed § 106.40(b)(3)(iii) has been revised and redesignated as § 106.40(b)(3)(iv) in the final regulations, and the following comment summaries and discussion refer to this provision as § 106.40(b)(3)(iv).

Several commenters supported language in § 106.40(b)(3)(iv) that would allow any licensed healthcare provider to verify medically necessary leave. Some commenters stated that this change would recognize that a student may be under the care of a provider who is not a physician, such as a nurse practitioner, midwife, doula, registered nurse, or lactation consultant. Some commenters stated this language would recognize that contemporary medical standards commonly allow advanced practice clinicians to provide care and that not every student has easy access to a physician, particularly students from economically disadvantaged backgrounds.

One commenter highlighted the credentials and prevalence of nurse practitioners in health care. The commenter also stated that proposed § 106.40(b)(3)(iv) would be consistent with recommendations from the National Academies of Science, Engineering, and Medicine, World Health Organization, U.S. Department of Health and Human Services, Federal Trade Commission, and several nonprofit policy organizations.

Discussion: The Department agrees with the perspective provided by commenters who stated the language in § 106.40(b)(3)(iv) would reflect contemporary medical standards, which recognize that a student may be under the care of a licensed healthcare provider who is not a physician. The Department also agrees with comments noting that students may not have ready and affordable access to physician care due to economic, geographic, or many other reasons. Finally, the Department acknowledges, and its conclusions are reinforced by, the supportive information regarding the qualifications of nurse practitioners to provide high-quality, cost-effective care, particularly in rural or economically disadvantaged areas.

Given commenters' interests in including a wide array of healthcare providers under the provision and not overburdening recipients or students with technical requirements regarding licensure, the Department clarifies that the term ''licensed'' in final § 106.40(b)(3)(iv) broadly encompasses any healthcare professional who is qualified to practice in their State. Recognizing that some students may travel for needed healthcare (because, for instance, the care they need is not available locally or they receive care in their home State during a break), final § 106.40(b)(3)(iv) does not require recipients to verify licensure or otherwise understand varying licensure requirements for different healthcare professions within and between the States, which could be onerous, inefficient, and confusing.

Changes: The Department has redesignated proposed § 106.40(b)(3)(iii) as § 106.40(b)(3)(iv) in the final regulations and revised the provision to clarify that the licensed healthcare provider who determines a medically necessary absence need not be a physician.

9. Section 106.40(b)(3)(v) Pregnancy or Related Conditions—Lactation Space

Comments: The Department notes that proposed § 106.40(b)(3)(iv) has been revised and redesignated as § 106.40(b)(3)(v) in the final regulations, and the following comment summaries and discussion refer to this provision as § 106.40(b)(3)(v).

Commenters generally supported the requirement that a recipient provide a private space and breaks for a student who is lactating and appreciated that § 106.40(b)(3)(v) would require a lactation space be clean and usable for both breastfeeding and pumping. Commenters asserted that the lack of a lactation space in a recipient's education program or activity is an issue that affects many students, impairs the health of students who are lactating and their children, interrupts learning and other educational opportunities, and increases absences due to illness.

A group of commenters noted that requiring a recipient to provide a lactation space helps support students' choices related to the health and nutrition of their child. The group of commenters provided examples of recipient practices that they reported were inconsistent and insufficient for students who are lactating, including a mother who was so discouraged by her school's failure to provide a lactation space that she almost disenrolled; a student who delayed obtaining her degree because her postsecondary institution did not provide a lactation space; and another student who stated that her school did not allow her to pump, which caused her to stop producing milk. The commenters noted that because each pumping session can take between fifteen to forty minutes, a lactation space is important to maintain access to a recipient's education program or activity. Many commenters noted that without a designated, private lactation space, a student who is pregnant or experiencing pregnancy-related conditions may resort to pumping in places such as a car, janitor's closet, or bathroom stall. Commenters added that a lack of privacy for students may lead to sexual harassment, bullying, stress-induced interruptions that could affect the student's ability to produce milk, inconvenience, and feelings of isolation. Commenters also asserted that requiring a recipient to provide a lactation space that is not a bathroom will make the

process of breastfeeding, pumping, and filling bottles more hygienic.

Further, several commenters stated that § 106.40(b)(3)(v) would significantly improve public health and be consistent with recommendations from the World Health Organization related to breastfeeding. Other commenters stated that § 106.40(b)(3)(v) would improve the health of students by minimizing obstacles to expressing breast milk and allowing students to reap the health benefits of breastfeeding, including a reduced long-term risk of diabetes, cardiovascular disease, and breast or ovarian cancer. Commenters also noted that an inability to express milk as frequently as every few hours often leads to pain, illness, infection, and reduced milk supply, and can result in an eventual inability to continue nursing. Commenters stated that a student's ability to breastfeed or express breast milk became even more important due to nationwide shortages in baby formula in 2022 and 2023.

Many commenters stated that providing a lactation space is a widely recognized accommodation that has been acknowledged by administrative agencies, Federal courts, and legal scholars to be consistent with other laws, such as the ACA, the FLSA, and State laws. Commenters asserted that because a recipient must follow these laws, compliance with § 106.40(b)(3)(v) would not be burdensome.

In contrast, one commenter asserted that § 106.40(b)(3)(v) would exceed the scope of Title IX, while another commenter asserted that the proposed regulation's cost-benefit analysis was insufficient. One commenter expressed concern that § 106.40(b)(3)(v) may be unworkable for a small elementary school or secondary school where space is limited and urged the Department to allow a recipient flexibility in complying with this requirement in final regulations.

Other commenters urged the Department to modify § 106.40(b)(3)(v) to require a recipient to equip a lactation space with a chair, flat surface, electrical outlet, running water, and a refrigerator or cooler to store expressed milk. These commenters also stated that a lactation space should be in reasonable proximity to a student's specific place of study.

Some commenters asked the Department to clarify where lactation spaces must be located, the required number of lactation spaces based on certain factors, and whether a recipient is required to make lactation spaces accessible during evenings and weekends. One commenter asked whether a recipient is required to construct new lactation spaces or features to comply with § 106.40(b)(3)(v). Some commenters expressed concern about how the administration of a lactation space would be handled if multiple students needed to access the space simultaneously.

Some commenters recommended that the Department change § 106.40(b)(3)(v) to state that a student has a right to express milk or breastfeed in a place other than a designated lactation space, such as in an office, at a childcare facility, or in a public space to be consistent with State or local laws that allow a person to breastfeed in any place they are otherwise allowed to be.

In contrast, other commenters asked the Department to clarify the circumstances in which a student in an elementary school or secondary school would be allowed to breastfeed a child in a lactation space and how the student's ability to breastfeed would change depending on whether the school had onsite childcare. One commenter suggested that the Department remove the words ''or breastfeeding'' from § 106.40(b)(3)(v) because the term implied an obligation to accommodate the presence of an infant in a recipient's education program or activity, which the commenter stated may not be safe or practicable in all circumstances.

Some commenters urged the Department to clarify that the requirement to provide lactation space is an obligation of the recipient, rather than a personal obligation of the Title IX Coordinator. Other commenters suggested that the Department revise the language to use terms such as ''express milk'' and ''nursing'' to be more inclusive of all students.

Some commenters urged the Department to require a recipient to treat breaks to use a lactation space, including those during class and exams, as well as travel time to reach the lactation space, as medically necessary absences for which medical documentation specifying when or how long someone must express milk is not required. Commenters stated that many students have difficulty accessing healthcare and that it would be overly burdensome to require lactating students to document lactation needs, which are common with pregnancy or related conditions and easily anticipated.

Discussion: The Department agrees that § 106.40(b)(3)(v) will help students who are lactating maintain access to an education program or activity by improving those students' ability to pursue their education while lactating. Having reviewed and considered all comments received, the Department concludes that without § 106.40(b)(3)(v), a student who is lactating would likely face significant barriers to participating in and benefiting from a recipient's education program or activity. These barriers can easily lead to adverse educational consequences as well, causing a student to miss or drop out of school and lose access to a recipient's education program or activity due to their lactation needs.

Further, the Department disagrees that § 106.40(b)(3)(v) exceeds the Department's authority. Congress has authorized the Department to issue regulations to effectuate Title IX's prohibition on sex discrimination in education programs or activities that receive Federal financial assistance consistent with achievement of the objectives of the statute. *See* 20 U.S.C. 1682; *Gebser,* 524 U.S. at 292. Additionally, Title IX regulations have long included provisions that require a recipient to take proactive steps to ensure equal treatment and access for students who are pregnant or experiencing pregnancy-related conditions. *See* 34 CFR 106.40(b)(5) (current). As discussed above and in the July 2022 NPRM, these requirements are part and parcel of ensuring that Title IX's nondiscrimination requirements are met, as the failure to take these steps often reflects sex-based stereotypes about the roles of men and women, sex-based indifference to the needs of this population, animus, or a failure to accommodate conditions associated with women as effectively as those associated with men. *See* 87 FR 41513. The assurance of access to clean, private, and secure lactation spaces in § 106.40(b)(3)(v) represents an appropriate application of existing Title IX principles to better effectuate the statute considering the complaints received by OCR in recent years, and the well-demonstrated, practical needs of lactating students.

Moreover, the Department carefully considered not only benefits but also costs and the abilities of recipients to provide lactation space. As explained in the July 2022 NPRM, the Department anticipates that a recipient would be able to comply with § 106.40(b)(3)(v) using existing space at minimal cost, partly because there is no requirement that a lactation space be a particular size or shape or include particular structural features. *See* 87 FR 41560. Accordingly, recipients are not required to construct new lactation spaces if an existing space otherwise meets the requirements of § 106.40(b)(3)(v). And while § 106.40(b)(3)(v) may result in increased

demand for lactation space or break time, such demand likely will vary over time, based on the composition of the student population at any time, which further reduces the potential impact to a recipient. Further, these costs are justified by the benefits of requiring a recipient to provide an appropriate space for a student who is lactating, including allowing student-parents to remain in school during the early months or years of a child's life, which helps eliminate a sex-based barrier to education. Although there are limited data quantifying the economic impacts of sex discrimination, the Department's review of public comments shows that such barriers can prevent students from obtaining a high school diploma, pursuing higher education, or obtaining a postsecondary degree, which limits their economic opportunities and may have long-term or generational impacts. A more detailed discussion and analysis of the costs and benefits of these final regulations is included in the *Regulatory Impact Analysis.*

Similarly, the assertion that a small elementary school, secondary school, or other recipient would be unable to comply with § 106.40(b)(3)(v) is speculative. At the time of the July 2022 NPRM, nearly all recipients were already required to provide a similar lactation space for non-exempt employees under a provision of the FLSA, 29 U.S.C. 207(r)(1). This provision has since been replaced by the PUMP Act, 29 U.S.C. 218d, which expanded the requirement to provide lactation space to most exempt employees as well. In addition, many recipients are required to provide the same for employees generally under many State laws. *See* 87 FR 41559 (collecting State laws). Nothing in the final regulations prohibits a recipient from complying with § 106.40(b)(3)(v) by ensuring a student who is lactating can access an existing employee lactation space or other space that otherwise meets the requirements of § 106.40(b)(3)(v).

The Department acknowledges concerns voiced by commenters that certain factors, including the location and other restrictions on the use of lactation spaces, could effectively make them inaccessible to a student who is lactating. Accordingly, the Department has revised § 106.40(b)(3)(v) to clarify that a recipient must ensure that a student can access a lactation space, rather than merely ensuring the availability of one.

Section 106.40(b)(3)(v) requires that a recipient ensure a student's access to a lactation space that ''may be used'' for pumping or breastfeeding as needed. The Department emphasizes that, as with all the requirements under final § 106.40(b)(3), the recipient's provision of lactation space must be prompt and effective to prevent sex discrimination and ensure equal access to the recipient's education program or activity. Whether the lactation space a recipient provides meets these standards is best determined on a case-by-case basis, but generally means that the space is functional, appropriate, and safe for the student's use. The Department however declines to adopt additional specific requirements about the size and setup of lactation spaces for students at this time to preserve recipient flexibility and to be able to review the degree of and obstacles to compliance with other Federal lactation laws. Section 106.40(b)(3)(v) sets minimum standards for a recipient's lactation space and nothing in the final regulations prohibits a recipient from offering additional features in its lactation space to increase functionality and comfort, either as reasonable modifications under § 106.40(b)(3)(ii) or otherwise. Likewise, the final regulations do not preempt State or local laws that require lactation spaces to have certain features, such as a chair, a flat surface, an electrical outlet, running water, or a refrigerated place to store expressed milk. The Department will take commenters' suggestions under consideration for possible technical assistance.

The Department also declines to remove references to breastfeeding from § 106.40(b)(3)(v). This provision is focused solely on what may take place in the lactation space that a recipient must make accessible to its students. To further clarify, if a student is already permitted to bring their child into the recipient's education program or activity (*e.g.,* through onsite childcare, a recipient's visitor policy, or a State or local law), they may use lactation spaces for breastfeeding instead of pumping. Moreover, nothing in the final regulations precludes a lactating student or employee from expressing breast milk or breastfeeding outside of the recipient's designated lactation spaces if a State or local law allows it.

Additionally, to ensure clarity in the implementation of the final regulations, the Department declines commenters' suggestion to revise the terminology used in § 106.40(b)(3)(v) but emphasizes that a recipient must ensure that any student who is lactating can voluntarily access a lactation space that complies with § 106.40(b)(3)(v) regardless of a student's gender identity or gender expression. Moreover, nothing in the final regulations prohibits a recipient from using any of the terminology suggested by commenters in its communications with students.

The Department clarifies that whether a recipient must make a lactation space accessible to a student in the evenings or on weekends depends on a variety of factors, including whether an inability to access a lactation space would frustrate a lactating student's ability to participate in the recipient's education program or activity, which may include extracurricular activities or attendance at school-related events in the evenings or on weekends. As long as the lactation space complies with the requirements of § 106.40(b)(3)(v), a recipient has discretion in where a lactation space is located; the number of lactation spaces; and how it handles the administration of a lactation space, including managing access to lactation spaces for multiple students, which may include suggestions proposed by commenters such as signage, a scheduling system, or a multi-person space separated by partitions that are shielded from view and free from intrusion from others.

The Department agrees with commenters that the recipient, not the Title IX Coordinator, is ultimately responsible for ensuring that a student can access a lactation space. Accordingly, the Department has revised § 106.40(b)(3) to clarify that it is the recipient's responsibility to take, and the Title IX Coordinator's responsibility to coordinate, specific actions under § 106.40(b)(3), including a student's access to a lactation space. For further explanation of the role of the Title IX Coordinator in connection with student pregnancy or related conditions, see the discussion of § 106.40(b)(3).

The Department agrees that as a general matter, medical documentation is unnecessary for a recipient to provide access to a lactation space and unduly burdensome to the student, particularly given the fact that many students lack access to or do not obtain maternity care.[84] As such, it would be difficult for

[84] *See* Christina Brigance et al., March of Dimes, *Nowhere to Go: Maternity Care Deserts Across the U.S,* at 4–5 (2022), *https://www.marchofdimes.org/sites/default/files/2022-10/2022_Maternity_Care_Report.pdf* (reporting that approximately 12 percent of births in the United States occur in counties with limited or no access to maternity care and 4.7 million women live in counties with limited maternity care access); Presidential Task Force of Redefining the Postpartum Visit, Committee on Obstetric Practice, American College of Obstetricians and Gynecologists Committee Opinion No. 736: Optimizing Postpartum Care (May 2018), *https://www.acog.org/clinical/clinical-guidance/committee-opinion/articles/2018/05/optimizing-postpartum-care* (finding that as many as 40% of women do not attend a postpartum visit and that attendance rates are lower among populations with limited resources, which contributes to health disparities).

many lactating students to obtain medical documentation—especially on an ongoing basis—as a condition of accessing a lactation space. Accordingly, the Department has added § 106.40(b)(3)(vi) to the final regulations to clarify that a recipient must not require a student to provide supporting documentation to confirm lactation needs in connection with, for example, reasonable modifications or to gain access to a lactation space. For further explanation of the limitation on recipient requests for supporting documentation, see the discussion of § 106.40(b)(3)(vi).

Changes: The Department has redesignated proposed § 106.40(b)(3)(iv) as § 106.40(b)(3)(v) in the final regulations. Final § 106.40(b)(3) now states that the Title IX Coordinator must coordinate actions under paragraphs (b)(3)(i) through (vi), and § 106.40(b)(3)(v) now states that a recipient must ensure that the student can access a lactation space.

10. Section 106.40(b)(3)(vi) Pregnancy or Related Conditions—Limitation on Supporting Documentation

Comments: The Department notes that proposed § 106.40(b)(3)(ii) and (4) have been redesignated as § 106.40(b)(3)(ii) in the final regulations, and the following comment summaries and discussion refer to these provisions as § 106.40(b)(3)(ii).

Several commenters urged the Department to state in the final regulations that medical documentation is frequently or typically unnecessary for a recipient to provide a requested modification, while other commenters expressed concern that the proposed regulations would be silent as to whether a recipient can require such supporting documentation. The commenters stated that requiring documentation for modifications such as increased bathroom breaks, a larger desk, or lactation accommodations would be unnecessarily burdensome for a student and could be used to harass or retaliate against a student who is pregnant or experiencing pregnancy-related conditions. One commenter, a legal service provider, shared that they regularly receive calls about recipients requiring students to obtain medical documentation on short notice and at significant expense, which often delays or prevents a student from receiving these modifications, even when the need is obvious.

Discussion: The Department agrees that as a general matter medical documentation is unnecessary for a recipient to determine the reasonable modifications it will offer for pregnancy or related conditions, or to take the specific actions identified under § 106.40(b)(3)(ii) through (v), including providing access to a lactation space. Accordingly, the Department has added § 106.40(b)(3)(vi) to the final regulations to clarify that a recipient must not require supporting documentation under § 106.40(b)(3)(ii) through (v) unless the documentation is necessary and reasonable under the circumstances for the recipient to determine the reasonable modifications to offer or other specific actions to take. As discussed below, the Department has also included in final § 106.40(b)(3)(vi) a non-exhaustive list of situations in which it would not be necessary and reasonable for a recipient to require a student to provide supporting documentation and in which a recipient is therefore prohibited from requiring documentation.

For several important reasons, the Department emphasizes that the final regulations do not require a recipient to seek supporting documentation from a student who seeks specific action under § 106.40(b)(3)(ii) through (v) in any circumstances. First, the Department notes that students who are pregnant or experiencing pregnancy-related conditions may need modifications before they have had any medical appointments. For example, some students may experience morning sickness and nausea early in their pregnancies and need modifications such as late arrival, breaks during class, or access to online instruction. Second, as discussed above, the Department further recognizes that it may be difficult for a student who is pregnant or experiencing pregnancy-related conditions to obtain an immediate appointment with a healthcare provider early in a pregnancy due to lack of access.[85] For example, according to one study, almost a quarter of women who gave birth did not receive prenatal care during their first trimester.[86] Finally, even for students who have access to medical care, needs may develop between scheduled medical appointments, such that requiring documentation in those situations would increase the cost to the student and could require them to take additional leave in order to obtain the documentation. For example, early in a pregnancy when medical appointments tend to be less frequent, a student could develop increasingly severe morning sickness in between medical appointments that warrants reasonable modifications that cannot wait until the next medical appointment, by which time the severeness of the morning sickness may or may not have abated.

Accordingly, consistent with § 106.40(b)(3)(ii)'s emphasis on the importance of ensuring consultation with a student to meet their individualized needs in a prompt and effective manner, a recipient may simply discuss with the student the nature of the pregnancy-related need and the desired modification or action without requesting supporting documentation. In virtually all situations, proceeding without documentation, or based on a student's self-attestation of their needs, will be the least burdensome for the student and enable the recipient to meet the student's needs fastest.

When a recipient chooses to require supporting documentation, however, clearly defined limits on such requests are critical to ensure that recipients do not overburden students or frustrate Title IX's purpose. Thus, final § 106.40(b)(3)(vi) makes clear that a recipient's ability to require supporting documentation is restricted under final § 106.40(b)(3)(vi), which provides that the documentation must be only that which is necessary and reasonable under the circumstances for the recipient to determine the reasonable modifications to make or whether to take additional specific actions under § 106.40(b)(3)(ii) through (v). Necessary and reasonable documentation generally includes no more than is sufficient to confirm—in a manner that is fair to the student under the circumstances—that a student has a need related to pregnancy or related conditions that requires a reasonable modification or other specific action under § 106.40(b)(3)(ii) through (v).

For example, if a student requests a reasonable modification in the form of access to online or homebound

[85] *See* Christina Brigance et al., March of Dimes, *Nowhere to Go: Maternity Care Deserts Across the U.S,* at 4–5 (2022), *https://www.marchofdimes.org/sites/default/files/2022-10/2022_Maternity_Care_Report.pdf.* Even where such care exists, it is not typically offered or accessed in the earliest weeks of pregnancy. *See* Am. Pregnancy Ass'n, Your First Prenatal Visit, *https://americanpregnancy.org/healthy-pregnancy/planning/first-prenatal-visit/* (last visited Mar. 12, 2024) (stating that the first prenatal visit for individuals who did not meet with their health care provider pre-pregnancy is generally around 8 weeks after their last menstrual period); Boston Med. Ctr., Newly Pregnant?, *https://www.bmc.org/newly-pregnant* (last visited Mar. 12, 2024) (stating that the first prenatal appointment will be scheduled between the 8th and 12th weeks of pregnancy).

[86] Joyce A. Martin et al., Ctrs. for Disease Control & Prevention, *Births in the United States, 2019,* 2 (Oct. 2020), *https://www.cdc.gov/nchs/data/databriefs/db387-H.pdf* (indicating that, in 2019, almost 23 percent of women who gave birth did not receive prenatal care during the first trimester).

education to follow their healthcare provider's recommendation of bed rest during the student's pregnancy, it may be necessary and reasonable under the circumstances for a recipient to require documentation from the student's healthcare provider to support a student's reasonable modification request (*i.e.,* that the student is or will be on medically ordered bed rest during their pregnancy). However, in this case, it would not be necessary and reasonable for a recipient to require additional supporting documentation to verify the pregnancy itself or other unrelated medical details regarding the pregnancy (such as the date of the student's last menstrual cycle, or whether fetal development is appropriate)—particularly if the student has already provided self-confirmation of the pregnancy.

A recipient may not justify the denial of a reasonable modification or other specific action under § 106.40(b)(3)(ii) through (v) based on the lack of documentation if its request for documentation does not comport with § 106.40(b)(3)(vi).

To provide further clarity, § 106.40(b)(3)(vi) includes a non-exhaustive list of situations in which it would not be necessary and reasonable for a recipient to require a student to provide supporting documentation and in which a recipient therefore may not require documentation. These situations are not all mutually exclusive; several may apply at the same time to bar a recipient from requesting documentation depending on the circumstances.

First, it is not necessary and reasonable for the recipient to require supporting documentation when the student's need for a specific action under paragraphs (b)(3)(ii) through (v) is obvious. Depending on the nature of the need, a need may be obvious based on the student's self-confirmation of pregnancy or related conditions, or a pregnancy or related condition that is itself physically obvious. For example, when a student states or confirms they are pregnant and asks for a different size uniform, the need for the uniform modification to accommodate the pregnancy is obvious (regardless of whether the recipient agrees that the student's pregnancy is easily noticeable), and the recipient may not require supporting documentation. However, if a student states or confirms that they are pregnant or experiencing pregnancy-related conditions (or the fact of pregnancy is apparent in some other way), but the need related to the pregnancy or related conditions or parameters of a potential reasonable modification is not obvious, the recipient may only request documentation relevant to the reasonable modification. For example, if a student states or confirms that they are pregnant and asks to avoid lifting heavy objects during their clinical placement, it may be necessary and reasonable for the recipient to request documentation about the need such as the extent of the lifting restriction and its expected duration. However, if a student provides such documentation but it omits confirmation of the pregnancy itself, it would not be necessary and reasonable for the recipient to request further documentation because the student's self-confirmation is enough to establish pregnancy under § 106.40(b)(3).

Second, it is not necessary and reasonable for the recipient to require documentation when the student has previously provided the recipient with sufficient supporting documentation—in other words, when the student has already provided the recipient with sufficient information to substantiate that the student has a need related to pregnancy or related conditions and needs a modification of the recipient's policy, practice, or procedure. For example, if a student already provided documentation that they need to be periodically late to class for the next two months because of morning sickness, it would not be necessary and reasonable for the recipient to require the student to provide a new note when the student requests a reasonable modification to leave class early for a prenatal appointment. Such a requirement would be onerous for the student, could deter them from requesting reasonable modifications or other specific actions to ensure equal access and prevent sex discrimination under § 106.40(b)(3)(ii) through (v), and could potentially infringe on a student's privacy related to treatment of their pregnancy or related conditions. As another example, if a pregnant student provided documentation of gestational diabetes to support modifications of eating in class and needing leave for frequent medical appointments, the recipient must not require the student to re-submit documentation of gestational diabetes if the condition progresses and the student later needs a new modification, such as breaks to administer insulin. In such a case, it may be necessary and reasonable for the recipient to request documentation to confirm information not already covered by the prior documentation, such as the need to take breaks during class, as opposed to re-confirming the underlying condition itself. However, the Department reiterates that nothing in these final regulations require a recipient to seek any documentation to determine what reasonable modifications to offer, and that offering and making reasonable modifications absent such documentation will be the least burdensome for the student and enable the recipient to meet the student's needs fastest.

Third, it is not necessary and reasonable for a recipient to require documentation when a student states or confirms that they are pregnant or are experiencing pregnancy-related conditions and asks for the following reasonable modifications: (1) carrying or keeping water nearby and drinking; (2) using a bigger desk; (3) sitting or standing; or (4) taking breaks to eat, drink, or use the restroom. It is not necessary and reasonable to require documentation, beyond self-attestation, when a student is pregnant or experiencing pregnancy-related conditions and seeks one of the four listed modifications because these are a small set of commonly sought modifications that are widely known to be needed during a pregnancy and for which documentation would not be easily obtainable or necessary. As noted above, particularly early in pregnancy, students are less likely to have sought or been able to obtain an appointment with a healthcare provider for their pregnancy. Further, they may not be able to obtain an appointment with a healthcare provider repeatedly on short notice for every need, as each becomes apparent. This position is consistent with the overarching goal of Title IX to ensure equal access and that a student is not deprived of educational opportunities due to pregnancy or related conditions.

A fourth example in § 106.40(b)(3)(vi)'s non-exhaustive list of when it is not necessary and reasonable to require documentation involves a student's lactation needs. Usually, beginning around or shortly after birth, lactation occurs. As it is uncommon to obtain medical documentation regarding the initiation of lactation (absent a related medical condition, like mastitis), the Department has determined that it is not necessary and reasonable for a recipient to require documentation regarding lactation or pumping. And as a practical matter, the Department notes that healthcare providers may not be able to provide documentation regarding whether a student is pumping, nor the types of modifications needed to pump breast milk. The Department notes that not all students can or choose to breastfeed after childbirth, and that those who do

elect to breastfeed do so for widely varying lengths of time. Although the final regulations state that it is not necessary and reasonable for a recipient to require supporting documentation for lactation or pumping, a recipient will not violate the final regulations simply by asking the student whether they require a lactation space while in the recipient's education program or activity, which a recipient is required to allow a student to access under § 106.40(b)(3)(v). Student confirmation—or a simple request to access a recipient's lactation space—is sufficient confirmation.

A fifth example in § 106.40(b)(3)(vi)'s non-exhaustive list of when it is not necessary and reasonable to require documentation is when the specific action under paragraphs (b)(3)(ii) through (v) is available to students for reasons other than pregnancy or related conditions without submitting supporting documentation. For example, if a recipient has a policy or practice of only requiring a student to submit supporting documentation if they miss three or more class periods, it would not be necessary and reasonable for the recipient to require supporting documentation from a student who requests to miss less than three class periods for postpartum medical appointments. Conversely, if a recipient has a policy or practice of requiring documentation that is not consistent with § 106.40(b)(3)(vi), and a student requests specific action under paragraphs (b)(3)(ii) through (v) that implicates such a policy or practice, the limitation on supporting documentation in these final regulations would apply.

Changes: The Department has added § 106.40(b)(3)(vi) to state that a recipient must not require supporting documentation under § 106.40(b)(3)(ii) through (v) unless the documentation is necessary and reasonable for the recipient to determine the reasonable modifications to make or whether to take additional specific actions under paragraphs (b)(3)(ii) through (v). The Department has also included a non-exhaustive list of situations when requiring supporting documentation is not necessary and reasonable, including when the student's need for a specific action under paragraphs (b)(3)(ii) through (v) is obvious, such as when a student who is pregnant needs a uniform; when the student has previously provided the recipient with sufficient supporting documentation; when the reasonable modification because of pregnancy or related conditions at issue is allowing a student to carry or keep water near and drink, use a bigger desk, sit or stand, or take breaks to eat, drink, or use the restroom; when the student has lactation needs; and when the specific action under paragraphs (b)(3)(ii) through (v) is available to students for reasons other than pregnancy or related conditions without submitting supporting documentation.

11. Section 106.40(b)(4) Pregnancy or Related Conditions—Comparable Treatment to Other Temporary Medical Conditions

Comparable Treatment to Other Temporary Medical Conditions

Comments: The Department notes that proposed § 106.40(b)(5) has been redesignated as § 106.40(b)(4) in the final regulations, and the following comment summaries and discussion refer to the provision as § 106.40(b)(4).

One commenter supported proposed § 106.40(b)(4), but recommended revisions to avoid the inference that a recipient should treat pregnancy as a temporary disability, which the commenter asserted conflicts with disability law. The commenter suggested that the Department amend the provision to clarify that a recipient should treat a condition or complication related to pregnancy, but not the pregnancy itself, as a temporary disability. Another commenter supported adding the phrase ''or physical condition'' to the provision, stating that recipients should be required to treat pregnant students or those with related conditions comparably to how they treat students with another temporary physical condition, whether or not it rises to the level of a disability.

Discussion: The Department acknowledges commenters' support and notes that the final regulations at § 106.40(b)(4) will require a recipient to treat pregnancy or related conditions comparably to how it treats other temporary medical conditions when also consistent with a student's rights under § 106.40(b)(3).

The Department acknowledges the commenter's concern that the text of § 106.40(b)(4), as proposed, suggested that pregnancy standing alone was a disability. The Department emphasizes, as explicitly stated in the July 2022 NPRM, that while some conditions or complications related to pregnancy might qualify as a disability under Section 504 or the ADA, pregnancy itself is not a disability. 87 FR 41523. If someone who is pregnant or experiencing pregnancy-related conditions has a disability, the individual is protected from discrimination under Section 504 and the ADA, whether or not the disability is related to pregnancy.

Regarding § 106.40(b)(4), the Department agrees with the commenter that it is important to make clear that the provision applies regardless of whether pregnancy-related conditions qualify as disabilities under Section 504 or the ADA. The Department has also determined that the proposed provision's reference to ''pregnancy or related conditions or any temporary disability resulting therefrom'' contained a redundancy: the phrase ''or any temporary disability resulting therefrom.'' Because the term ''pregnancy or related conditions'' as defined in § 106.2 would include any medical conditions related to pregnancy, childbirth, termination of pregnancy, or lactation, or recovery from any of those conditions, the term would necessarily include any such resulting disabilities. The definition of ''pregnancy or related conditions'' in the final regulations is adequate in scope for the purpose of § 106.40(b)(4) without the term ''temporary disability.''

To address these concerns, the Department revised some of the language in § 106.40(b)(4) of the final regulations compared to the proposed regulations. Specifically, the Department changed the phrase ''in the same manner and under the same policies as *any other temporary disability or physical condition*'' in the proposed regulations to ''in the same manner and under the same policies *as any other temporary medical condition*'' in the final regulations (emphases added). The Department changed ''physical condition'' to ''medical condition'' to clarify that the proper comparator with respect to a medical or hospital benefit, service, plan, or policy is not limited to conditions that are only physical in nature, and includes, for example, psychological or emotional conditions.

This revision will eliminate an inference that pregnancy standing alone is a disability and emphasize that pregnancy-related conditions do not need to qualify as disabilities for § 106.40(b)(4) to apply. The revision will also clarify coverage in cases in which a recipient does not have any medical or hospital benefit, service, plan, or policy related to temporary disabilities, but may have such benefits, services, plans, or policies related to temporary medical conditions generally. The Department notes that a recipient's ''benefits, services, plans, or policies'' with respect to temporary medical conditions may be subsumed within its ''benefits, services, plans, or policies''

related to disabilities, or they may be separate.

Changes: The Department has redesignated proposed § 106.40(b)(5) as § 106.40(b)(4) in the final regulations. In § 106.40(b)(4) of the final regulations, the Department has removed the references to ''disability'' and ''disabilities'' from the provision and revised the term ''physical condition'' to ''medical condition.'' Final § 106.40(b)(4) now states that, to the extent consistent with paragraph (b)(3), a recipient must treat pregnancy or related conditions in the same manner and under the same policies as any other temporary medical condition with respect to any medical or hospital benefit, service, plan, or policy the recipient administers, operates, offers, or participates in with respect to students admitted to the recipient's education program or activity.

Intersection With Disability Law

Comments: The Department notes that proposed § 106.40(b)(5) has been redesignated as § 106.40(b)(4) in the final regulations, and the following comment summaries and discussion refer to the provision as § 106.40(b)(4).

One commenter conveyed that because of the difference between § 106.40(b)(4) and disability law, the way a temporary disability is handled by a recipient would not necessarily align with the proposed reasonable modifications because of pregnancy, and in some cases, recipients will not be able to comply with both standards. The commenter recommended that the Department either clarify its requirement that a recipient treat pregnancy or related conditions as it would any other temporary disability or modify the requirement to provide greater flexibility for a recipient to address the needs of students who are pregnant or have related conditions.

Discussion: The Department acknowledges the commenter's concern that a difference in the requirements of Title IX and relevant disability laws may, at times, require a recipient to maintain different processes or reach different results when addressing pregnancy or related conditions versus disabilities, and that this may cause confusion. In response to the commenter's suggestions, the Department clarifies in the final regulations when a recipient must apply different rules as between pregnancy or related conditions and other kinds of temporary medical conditions, and when they should be treated the same. As proposed, the comparability provision would have applied to the extent the matter was ''not otherwise addressed'' under § 106.40(b)(3). To add clarity, the Department revises § 106.40(b)(4) in the final regulations to state the provision applies only ''to the extent consistent with'' a recipient's obligations under § 106.40(b)(3).

The Department interprets ''consistent with'' to mean that § 106.40(b)(4) applies when doing so would not deny or limit any person's rights or the recipient's obligations under § 106.40(b)(3). In other words, § 106.40(b)(3) provides a floor beneath which a recipient's treatment of pregnancy and pregnancy-related conditions may not fall, even if the recipient provides lesser protections for students with non-pregnancy related temporary medical conditions. A recipient must be able to meet its responsibilities under § 106.40(b)(3) to take specific actions, such as providing reasonable modifications, leave, and access to lactation space. When consistent with these obligations, a recipient must further apply § 106.40(b)(4) and treat pregnancy or related conditions in the same manner and under the same policies as other temporary medical conditions. As noted above, a recipient's ''benefits, services, plans, or policies'' with respect to temporary medical conditions may be subsumed within its ''benefits, services, plans, or policies'' related to disabilities, or they may be separate.

For example, if a student requires breaks during class to attend to pregnancy-related health needs, the recipient must provide reasonable modifications consistent with § 106.40(b)(3)(ii). However, a recipient must additionally consider how students with other temporary medical conditions are treated under § 106.40(b)(4) with respect to any medical or hospital benefit, service, plan, or policy it maintains. To the extent that the recipient maintains a medical or disability policy that provides breaks to students with temporary medical conditions that is more generous (for example, providing longer or more frequent breaks) than what it has provided to the pregnant student as a reasonable modification, the recipient must apply this more generous policy to the pregnant student. If its policy for non-pregnancy-related temporary medical conditions is less generous than what it is required to provide to the pregnant student as a reasonable modification, however (for example, by disallowing breaks absent emergency circumstances), the recipient must not apply this policy to the pregnant student because it would deprive the student of rights under § 106.40(b)(3)(ii) and be inconsistent with the recipient's obligations under § 106.40(b)(3). There is no conflict between these final regulations and a student's rights under the ADA or Section 504, because if a student's pregnancy-related condition qualifies as a disability and the recipient's disability policy provides a more generous result, that will have to be provided to the student. Conversely, if the recipient's disability policy would provide a less generous result, the recipient will have to provide the student with the more generous benefit consistent with § 106.40(b)(3).

The Department notes that § 106.40(b)(4) also prohibits discriminatory recipient policies even if a particular individual does not request a reasonable modification. For example, if a recipient maintains a policy that allows students with disabilities, including temporary medical conditions that qualify as disabilities, to access free at-home tutoring, but states that the option is not available to pregnant students, the recipient will violate § 106.40(b)(4) because its policy treats pregnant students differently than students with other types of temporary medical conditions. This would be the case regardless of whether an individual student is pregnant and seeking access to tutoring as a reasonable modification under § 106.40(b)(3). *See* 2013 Pregnancy Pamphlet, at 6 (''Any special services provided to students who have temporary medical conditions must also be provided to a pregnant student . . . [so] if a school provides special services, such as homebound instruction or tutoring, for students who miss school because they have a temporary medical condition, it must do the same for a student who misses school because of pregnancy or childbirth.'').

The Department notes that a recipient's processes for pregnancy or related conditions may be different from those for other temporary medical conditions if treating the two identically would not be consistent with § 106.40(b)(3). For example, as noted by a commenter, the Title IX regulations since 1975 have required that voluntary leave for pregnancy or related conditions must be granted consistent with medical necessity. 40 FR 24128 (codified at 45 CFR 86.40(b)(5) (1975)); 34 CFR 106.40(b)(5) (current). The Department acknowledges that the process for obtaining leave may include additional steps were a student seeking it in connection with a temporary medical condition unrelated to pregnancy. However, to the extent that additional steps are necessary for voluntary leave in connection with a non-pregnancy-related temporary

medical condition, final § 106.40(b)(3)(iv) requires that a recipient permit voluntary leave for pregnancy or related conditions without requiring those additional steps. The Department views the requirements of the final regulations as necessary to prevent sex discrimination and ensure equal access related to pregnancy or related conditions. The final regulations sometimes provide a simpler process for pregnancy or related conditions than might be required under laws pertaining to disability because by its nature, pregnancy is inherently time-limited, and because, for most uncomplicated pregnancies, the types of supports that a student will need are similar and foreseeable. Disability rights laws address a wider range of medical conditions and therefore, a wider range of student needs and possible supports. Accordingly, the same level of flexibility need not be afforded to the recipient in the context of pregnancy or related conditions.

Changes: Proposed § 106.40(b)(5) has been redesignated as § 106.40(b)(4) in the final regulations and revised to state the provision applies only ''to the extent consistent with'' a recipient's obligations under § 106.40(b)(3).

''Medical or Hospital'' Limitation

Comments: The Department notes that proposed § 106.40(b)(5) has been revised and redesignated as § 106.40(b)(4) in the final regulations, and the following comment summaries and discussion refer to the provision as § 106.40(b)(4).

One commenter suggested that the Department remove the words ''medical or hospital'' that modified the words ''benefit, service, plan, or policy'' in proposed § 106.40(b)(4) because, the commenter said, the proposed provision is unclear in scope and removing any limitation would further Title IX's purpose without giving preferential treatment to one group of students based on their sex.

Discussion: The Department declines to alter the language of the regulations in the manner suggested and disagrees that § 106.40(b)(4) is unclear in scope. As the Department noted in the July 2022 NPRM, the current version of § 106.40(b)(4) has required a recipient to treat pregnancy or related conditions similarly to temporary disabilities with respect to any ''medical or hospital'' benefit, service, plan, or policy the recipient offers for students since the regulations were first promulgated in 1975. 87 FR 41523; 40 FR 24128 (codified at 45 CFR 86.40(b)(4) (1975)); 34 CFR 106.40(b)(4) (current). As the Department indicated in the July 2022 NPRM, *see* 87 FR 41523, there is a need for greater clarity regarding the reasonable modifications a recipient must make to prevent discrimination and ensure equal access for pregnant students and those experiencing related conditions, in part because the wording of the current version of § 106.40(b)(4) may have suggested that a recipient's responsibility extends only to medical or hospital benefits, services, plans, or policies. However, the reasonable modifications framework in final § 106.40(b)(3) alleviates the potential ambiguity in this section and achieves Title IX's nondiscrimination goal. As discussed above, the Department has further clarified the text of § 106.40(b)(4) to state that the provision will apply only when consistent with the recipient's obligations in § 106.40(b)(3).

Changes: None.

12. Section 106.40(b)(5) Pregnancy or Related Conditions—Certification To Participate

Comments: Some commenters supported the Department's proposed prohibition on a recipient requiring a pregnant student to certify physical ability before allowing the student's participation except under narrow circumstances. Commenters' reasons for support included: the need to counteract stereotypes regarding what is safe, appropriate, or possible for a pregnant student, which may lead a recipient to restrict or exclude a student from participation; ensuring students' equal access to physically intensive extracurricular activities or course-related placements in laboratories or medical facilities; and because the provision reasonably limits required certification only to courses or activities that included a physical component. Some commenters appreciated that the Department revised the provision to remove a prior reference to a student's emotional ability to participate, which the commenters found paternalistic, outdated, and stereotyping. Finally, some commenters supported the proposed provision's clarification to apply to certifications from healthcare providers in addition to physicians.

One commenter objected that the provision requiring a recipient to compare pregnant students to non-pregnant students, as opposed to students who are also receiving medical attention for a physical or emotional condition, was inconsistent with *Young* v. *United Parcel Service, Inc.,* 575 U.S. 206, 228 (2015). The same commenter argued the provision would require a recipient to allow pregnant students to engage in unsafe activities, potentially exposing the recipient to liability; surprise a recipient with medical emergencies that pregnant students are more likely to have than other students who are neither pregnant nor experiencing other medical conditions; and force a recipient to require every student to obtain a doctor's note to engage in a physical activity before it could lawfully require the same of a pregnant student. The same commenter suggested that it may be reasonable to limit the required certification to the question of whether the student is physically able to participate but that a student's emotional stability could be relevant in some narrow situations.

One commenter opposed the proposed provision because they felt a recipient and a coach should decide whether a pregnant student should participate on an athletic team. Another commenter supported the proposed regulations, provided the Department clarify that a recipient should treat pregnancy-related conditions or complications, but not the pregnancy itself, as temporary disabilities. A final commenter asked the Department to clarify the distinction between paragraphs (b)(5)(i) and (ii) of the proposed provision.

Discussion: The Department agrees with commenters that the provision will limit the burden on students who are pregnant or experiencing pregnancy-related conditions from unnecessary requests for documentation to remain in their classes and activities. The Department acknowledges comments that explained how recipient requests for such certifications are often driven by harmful and inaccurate stereotypes that may lead a recipient to exclude a student across a variety of educational settings. To clarify the protection of this provision further, the Department expanded the types of certifications subject to this prohibition to include those by non-healthcare providers and ''any other person.'' The Department clarifies that students who are pregnant or experiencing pregnancy-related conditions should not be subject to a certification of physical ability from a healthcare provider or any other person that the student is physically able to participate in the recipient's class, program, or extracurricular activity unless such certification requirement satisfies § 106.40(b)(5)(i)–(iii). A request for certification from someone other than a student's healthcare provider—such as a student's parent, legal representative, coach, administrator, or advisor—would also be burdensome and potentially subject a student with pregnancy or related conditions to different treatment if inconsistent with § 106.40(b)(5)(i)–(iii).

The Department disagrees that final § 106.40(b)(5) would require a recipient to allow a pregnant student to engage in unsafe activities or surprise a recipient with medical emergencies. While this provision is intended to ensure that a recipient does not subject a student who is pregnant or experiencing pregnancy-related conditions to discriminatory paperwork requirements, it does not dictate any decisions a recipient may make as to participation in a program or activity as those must be made on a case-by-case basis, depending on relevant facts and consistent with Title IX's nondiscrimination requirements in totality. Responding to a further commenter concern, the Department agrees that—as set forth in § 106.40(b)(5)—while there is no requirement under Title IX that a recipient obtain pre-participation certification from any student, to the extent that a recipient wishes to require such certification from a pregnant student, it must require the same of all students in a class, program, or extracurricular activity.

With respect to the difference between paragraphs (b)(5)(i) and (ii) of § 106.40, the Department explains that paragraph (b)(5)(i) pertains to the level of physical ability or health necessary to participate in each activity, such as walking at a fast pace for 20 minutes or lifting more than 50 pounds, and paragraph (b)(5)(ii) means that all students participating in the class or activity, even those who are not pregnant or experiencing related conditions, are asked to provide the same certification.

The Department agrees with commenters that removing the reference in the current regulations to a student's emotional ability to participate will underscore that a recipient should never assume that a student who is pregnant or experiencing pregnancy-related conditions is any less emotionally able to participate than any other student. If a recipient requires a certification of emotional ability from a student who is pregnant or experiencing pregnancy-related conditions, such certification is subject to the general prohibition on sex discrimination under § 106.31(a)(1), the prohibition on sex discrimination based on pregnancy or related conditions under § 106.40(b)(1), and the requirement to provide students with reasonable modifications because of pregnancy or related conditions under § 106.40(b)(3)(ii), among other relevant provisions of the final regulations. If the student has a pregnancy-related condition that qualifies as a disability, such certification may also be subject to Section 504 or the ADA.

Regarding the suggestion that a recipient and a coach should decide whether a pregnant student remains on a team, the Department reminds recipients that a recipient's decision regarding a pregnant student's participation must comply with all specific actions to prevent discrimination and ensure equal access set out in § 106.40(b)(3), including the provision of reasonable modifications. Additionally, to the extent consistent with any reasonable modifications or other student rights under § 106.40(b)(3), if a school maintains a medical or hospital benefit, service, plan, or policy related to temporary medical conditions that is relevant to a potential exclusion from a team, the recipient must also treat a pregnant student consistent with those plans or policies under § 106.40(b)(4). Excluding a student based on pregnancy is sex discrimination in violation of §§ 106.31(a)(1) and 106.40(b)(1).

The Department disagrees with the contention that a recipient should not have to treat students who are pregnant or experiencing pregnancy-related conditions like non-pregnant students for the purpose of determining whether they may be excluded from a recipient's education program or activity. In this case, the Department finds it to be a relevant and straightforward comparison to ensure that students are not being discriminated against due to pregnancy or related conditions. For example, because the provision requires all students to be treated the same, it will be easy for pregnant students to know whether a recipient is asking them for information different from the rest of the class or team and permit the pregnant students to take prompt action to enforce their rights.

The Department disagrees that the Supreme Court's decision in *Young* controverts this approach. *Young* involved an employer's denial of an employee's request for a pregnancy-related lifting restriction under Title VII, in which the Court concluded that there was a genuine dispute of material fact as to whether the employer provided more favorable treatment to at least some non-pregnant employees ''whose situation cannot reasonably be distinguished'' from the plaintiff. *Young,* 575 U.S. at 231. The Court's holding did not limit the universe of acceptable comparators to one specific type, such as only employees with non-pregnancy-related health restrictions or suggest that other possible comparators would not be allowed. *See id.* at 228. Likewise, in the context of final § 106.40(b)(5), the issue is that in most cases, a student who is pregnant or experiencing pregnancy-related conditions will have no limitation relevant to participation, making comparison to the general student population the most appropriate.

The Department further disagrees with the assertion that the provision prevents a recipient from requiring a student who is pregnant or experiencing pregnancy-related conditions from providing certification as to physical ability; to the contrary, the provision sets out clearly that a recipient may do so when (i) the certified level of physical ability or health is necessary for participation in the class, program, or extracurricular activity; (ii) the recipient requires such certification of all students participating in the class, program, or extracurricular activity; and (iii) the information obtained is not used as a basis for discrimination prohibited by the Title IX regulations. This provides the appropriate framework to ensure that a student who is pregnant or experiencing pregnancy-related conditions is asked for relevant information on equal footing with other students, while balancing a recipient's interest in student safety.

Further, the Department did not intend to suggest that pregnancy, standing alone, is a disability. The Department reemphasizes, as explicitly stated in the July 2022 NPRM, that while some conditions or complications related to pregnancy might qualify as a disability under Section 504 or the ADA, pregnancy itself is not a disability. 87 FR 41523. If someone who is pregnant or experiencing pregnancy-related conditions has a disability, the ADA or Section 504 may apply, whether or not the disability is related to pregnancy. However, the Department notes that, as explained more fully in the discussion of final § 106.40(b)(4), that provision requires a recipient, when consistent with § 106.40(b)(3), to treat students who are pregnant or experiencing pregnancy-related conditions in the same manner and under the same policies as any other temporary medical condition with respect to any medical or hospital benefit, service, plan, or policy.

Changes: The Department has redesignated proposed § 106.40(b)(6) as § 106.40(b)(5) in the final regulations, revised the provision to state that a recipient may not require a certification from a healthcare provider or any other person unless the certification satisfies § 106.40(b)(5)(i)–(iii), and made a technical change to make clear that a recipient's compliance is required.

D. Discrimination Based on an Employee's Parental, Family, Marital Status, Pregnancy, or Related Conditions

1. Section 106.51(b)(6) Employment—Granting and Return From Leaves

Comments: Some commenters asserted that proposed § 106.51(b)(6) was not necessary and should be addressed through sub-regulatory guidance but did not object to the proposed changes.

Discussion: Changing the language in § 106.51(b)(6) from ''leave for pregnancy, childbirth, false pregnancy, termination of pregnancy'' to ''leave for pregnancy or related conditions'' is important to ensure § 106.51 is consistent with the definition of pregnancy or related conditions in § 106.2 and consistent with like changes in §§ 106.21, 106.40, and 106.57.

Changes: None.

2. Section 106.57 Parental, Family, or Marital Status; Pregnancy or Related Conditions

Comments: Some commenters opposed § 106.57 generally as inconsistent with Title IX and case law. Some commenters opposed proposed § 106.57 because they did not believe Title IX authorizes the Department to enact regulations governing employment. One commenter stated that they believed that the Department did not have jurisdiction over workplace concerns, including sex discrimination and hiring decisions, which they believed to be solely under the authority of the EEOC and a recipient's human resources department.

One commenter suggested that, because Title IX protects any ''person,'' the Department should clarify that its protections extend beyond traditional employees to other workers, such as independent contractors.

Discussion: The Department disagrees with the assertion that § 106.57 is contrary to case law. Most of the provisions in § 106.57 have been part of the Title IX regulations for nearly half a century. 40 FR 24128 (codified at 45 CFR 86.57 (1975)); 34 CFR 106.57 (current). The Department was unable to find, and commenters did not provide, any case law holding that current § 106.57 exceeded the authority granted by Congress for the Department to issue regulations to effectuate Title IX's prohibition on sex discrimination in education programs or activities that receive Federal financial assistance consistent with achievement of the objectives of the statute. *See* 20 U.S.C. 1682. To the extent commenters raised similar objections with regard to specific aspects of § 106.57, those comments are addressed in the discussion of the applicable subsections below.

In addition, contrary to commenters' assertions, § 106.57 does not exceed the scope of the Department's congressionally delegated authority under Title IX. The Supreme Court has recognized that the Department has broad regulatory authority under Title IX to issue regulations that it determines will best effectuate the purpose of Title IX and to require recipients to take administrative actions to effectuate the nondiscrimination mandate of Title IX. *See, e.g., Gebser,* 524 U.S. at 292; 20 U.S.C. 1682. Title IX provides that ''no person'' shall be subjected to sex discrimination under any education program or activity receiving Federal financial assistance, and Title IX has long been understood to prohibit discrimination against recipients' employees. *See, e.g., N. Haven Bd. of Educ.,* 456 U.S. at 530. As the Department noted in the July 2022 NPRM, 87 FR 41527, ensuring equal access to employment in the education sector was a central purpose of Title IX at the time of its passage. *See* 118 Cong. Rec. 5810 (paper by Dr. Bernice Sandler printed in the record with unanimous consent, explaining that employers in the education sector often refused to hire women because of concerns about absenteeism due to family obligations, even though the Women's Bureau of the Department of Labor found that ''men lose more time off the job because of hernias than do women because of childbirth and pregnancy'').

Finally, given the wide variety of arrangements and circumstances across recipients and variations in applicable State employment laws, recipients are best positioned to determine who is an ''employee.'' The Department declines to mandate at this time that all independent contractors be covered by § 106.57 because more information would be needed before making such a change, particularly given the possible cost, administrative burden, and interplay with common law principles and other legal requirements. The Department notes that to the extent a contractor is an employee of the recipient, the contractor will be entitled to the protections of § 106.57. In addition, nothing within the final regulations prohibits a recipient from choosing to cover independent contractors under § 106.57 if the recipient believes such protection will further its compliance with these final regulations.

Changes: None.

3. Section 106.57(a) Parental, Family, or Marital Status

Comments: Some commenters supported the proposed regulations related to the rights of employees not to be discriminated against based on sex regarding their parental, family, or marital status. Some commenters urged the Department to add greater protections for parenting employees, including reasonable modifications for parenting employees. Some commenters shared personal stories of recipients asking women whether their children would interfere with their employment responsibilities, while men were not asked similar questions.

In contrast, the Department also received feedback that protections for parenting employees should not be included because, the commenters argued, parents are not a protected class and being a parent detracts from a person's ability to perform their employment duties.

Discussion: The Department acknowledges commenters' support of the regulatory provisions regarding sex discrimination based on employees' parental, family, and marital status. As explained in the discussion of § 106.40(a) regarding parenting students and § 106.21 regarding applicants for admission, the Department declines to require a recipient to provide reasonable modifications to parenting employees or applicants for employment at this time. In the future, the Department could consider whether modifications for parenting employees are necessary to effectuate the nondiscrimination mandate of Title IX. However, the Department again notes that a recipient is prohibited from treating parenting employees or applicants for employment differently based on sex under § 106.57(a)(1) and from discriminating against them based on sex stereotypes under § 106.10.

The Department disagrees with the commenters asking to remove § 106.57(a)(1) based on an assertion that parents are not a protected class, because the prohibition on discrimination against parenting employees is limited to different treatment based on sex, and sex is a protected class under Title IX. In addition, sex discrimination in the treatment of parenting employees has been covered by the Title IX regulations for nearly 50 years and continues to be necessary to effectuate Title IX's nondiscrimination mandate. *See* 40 FR 24128 (codified at 45 CFR 86.57(a) (1975)); 34 CFR 106.57(a) (current).

The Department has, however, decided to make three small changes to

the text of final § 106.57(a) compared to the proposed regulations. Upon review, the Department has determined that replacing the word ''apply'' with ''implement'' in § 106.57(a) will improve clarity consistent with similar revisions in final §§ 106.21(c)(2)(i) and 106.40(a). The Department also has decided to replace the word ''shall'' with the word ''must'' consistent with the other final regulations but does not intend any decrease in coverage. The Department has also replaced the word ''Which'' in § 106.57(a)(2) with the word ''That'' for clarity.

Changes: Section 106.57(a) has been revised to substitute the word ''implement'' for the word ''apply'' and to substitute the word ''must'' for the word ''shall.'' Section 106.57(a)(2) has been revised to substitute the word ''That'' for the word ''Which.''

4. Section 106.57(b) Pregnancy or Related Conditions

Comments: Some commenters expressed support for the prohibition on discrimination on the basis of ''pregnancy or related conditions'' in proposed § 106.57(b), explaining that it is consistent with Title IX's mandate to prohibit sex discrimination and would improve employment opportunities for pregnant and parenting teachers and narrow the wage gap between men and women. Other commenters expressed support for the language in proposed § 106.57(b) prohibiting discrimination against employees based on ''current, potential, or past'' pregnancy or related conditions, adding that such protection will create a more welcoming environment for pregnant employees because educators historically have been fired or excluded from the classroom when they became pregnant, and they continue to face discrimination and barriers to receiving workplace accommodations for pregnancy-related medical issues. Some commenters described personal stories of pregnancy-related discrimination in the workplace and being pushed out of the workplace due to pregnancy or termination of pregnancy. Some commenters appreciated the explicit protection for ''potential'' pregnancy, stating it will protect people who are attempting to get pregnant.

Other commenters asked the Department to change the proposed regulations to require reasonable modifications for employees based on pregnancy or related conditions as the proposed regulations would for students, instead of making accommodations dependent on what is provided to employees with temporary disabilities. Some commenters stated that reasonable modifications for employees are particularly important given the fast-paced nature of the school environment to make sure employees can work while pregnant and after pregnancy. Some commenters stated that, like the Department's proposal to require that recipients provide lactation time and space to employees, clearly defined rights to reasonable modifications are essential to prevent different treatment based on sex in the workplace and that, absent reasonable modifications, employees may have no choice but to leave their employment. Some commenters stated that matching employees' rights with students' rights with respect to reasonable modifications for pregnancy or related conditions would reduce the burden and complexity of compliance on recipients. These commenters opined that recipients are already familiar with the ''reasonable accommodation'' framework and structure from its use in the disability context under Title II of the ADA.

Some commenters observed that many students, particularly at postsecondary institutions, are also paid employees of the recipient. Some commenters argued that it would be illogical to, for example, guarantee a pregnant student access to a stool to rest while studying in their science lab, but not to provide the same modification to that student while they perform work as a receptionist for the science department. These commenters maintained that in both contexts, the modification is necessary to ensure that the student can fully access the educational environment.

Discussion: The Department acknowledges the support expressed for the protections in proposed § 106.57(b) prohibiting discrimination against employees based on current, potential, or past pregnancy or related conditions, and agrees that this updated and comprehensive protection will address barriers to professional achievement and improve access to career opportunities.

The Department acknowledges commenters' suggestions about providing the same reasonable modifications to employees that are available to students. After careful consideration, the Department does not agree that reasonable modifications for employees are currently necessary to effectuate Title IX and ensure equal opportunity for recipient employees. The Department has reached that conclusion for several reasons.

First, considering recent new Federal legislation in this area, such as the PUMP Act and the PWFA, and a pending rulemaking that may address reasonable workplace accommodations for employees affected by pregnancy, childbirth, or related medical conditions, *see* 88 FR 54714, the Department declines to require reasonable modifications for employees at this time without the opportunity to more fully consider the interplay between Title IX and other employer obligations. In addition, many, if not most, of the pregnancy-related barriers employees face will be addressed by recipients in their compliance with the non-discrimination protections of § 106.57.

Second, as noted in the discussion of § 106.57(c) below, the obligation that a recipient treats an employee's pregnancy or related conditions as it treats other temporary medical conditions is more robust than the requirement that a recipient treat a student's pregnancy or related conditions comparably to other students' temporary medical conditions. Final § 106.40(b)(4) states that a recipient must treat a student's pregnancy or related conditions in the same manner and under the same policies as any other temporary medical condition with respect to any medical or hospital benefit, service, plan, or policy the recipient administers, operates, offers, or participates in. However, the language of § 106.57(c) is broader, stating that a recipient must treat an employee's pregnancy or related conditions as it does any other temporary medical conditions for all job-related purposes, including commencement, duration and extensions of leave, payment of disability income, accrual of seniority and any other benefit or service, and reinstatement, and under any fringe benefit offered to employees by virtue of employment. Accordingly, both § 106.40(b)(4) and the reasonable modification requirement in § 106.40(b)(3)(ii) are required to effectuate Title IX's nondiscrimination mandate with respect to pregnant students. But because § 106.57(c) standing alone is sufficiently broad to effectuate Title IX's nondiscrimination mandate with respect to employees who are pregnant or experiencing pregnancy-related conditions, it is unnecessary to also require recipients to provide reasonable modifications to pregnant employees without further study. And the Department disagrees with the suggestion that requiring reasonable modifications for employees because of pregnancy or related conditions under all circumstances is less burdensome than requiring reasonable modifications only to the extent that a recipient

provides the same modifications for other temporary medical conditions.

With respect to student-employees, the final regulations require that the recipient provide such students with reasonable modifications consistent with § 106.40(b)(3)(ii) as necessary to prevent sex discrimination and ensure equal access to the recipient's education program or activity. To the extent that a student's individualized, pregnancy-related needs impact their employment consistent with this standard, § 106.40(b)(3)(ii) provides the appropriate framework for a recipient to address such needs—in consultation with the student—in a manner that is flexible enough to respond to a wide variety of circumstances and types of employment. The Department agrees with the commenter that, depending on the circumstances, the provision may require reasonable modifications in connection with a student's on-campus employment when such employment is part of, or necessary to enable, access to the student's education program or activity. For further explanation of reasonable modifications with respect to students based on pregnancy or related conditions, see ''Interaction with Other Federal Laws'' in the discussion of § 106.40(b)(3)(ii).

Nothing in § 106.57 obviates a recipient's separate obligation to comply with other civil rights laws, including Title VII as amended by the PDA, Section 504, the ADA, and the PWFA, which has become law since the issuance of the July 2022 NPRM. *See* 34 CFR 106.6(a). The PWFA requires covered employers to make reasonable accommodations for a worker's known limitations related to pregnancy, childbirth, or related medical conditions, unless the accommodation will cause the employer an undue hardship. Moreover, to the extent an employee's related condition qualifies as a disability, Section 504 or the ADA may apply, which may require the recipient to provide reasonable accommodations. And nothing in these regulations precludes a recipient from using its discretion and flexibility to provide reasonable accommodations to employees for whom pregnancy or related conditions present barriers to employment. For the same reasons, the Department also declines to require a recipient to provide reasonable modifications based on pregnancy or related conditions for applicants for employment with a recipient.

Finally, the Department has changed the word ''shall'' to ''must'' in § 106.57(b) and revised the phrase ''discriminate against or exclude from employment'' to remove the words ''or exclude from employment.'' The Department makes these changes for clarity and consistency with language in the remainder of the regulations but does not intend any decrease in coverage. As explained in the July 2022 NPRM with respect to an identical change to ''exclude'' language in § 106.21(c) pertaining to the treatment of pregnancy in admissions, the words ''exclude'' and ''excludes'' were used only occasionally in the current regulations to refer to discrimination and such intermittent use was confusing. 87 FR 41517. Throughout the final regulations, the Department interprets ''discriminate'' to encompass exclusion.

Changes: The Department has changed the word ''shall'' to ''must'' and deleted the words ''or exclude from employment'' from § 106.57(b).

5. Section 106.57(c) Comparable Treatment to Other Temporary Medical Conditions

Comments: Some commenters supported proposed § 106.57(c). One commenter expressed support for proposed § 106.57(c) but raised concerns that the regulatory text would imply that a recipient should treat pregnancy as a temporary disability, which the commenter argued is inconsistent with disability law and the Department's explanation in the July 2022 NPRM. Another commenter asked for clarification regarding the interaction of § 106.57(c), the PDA, Section 504, and the ADA.

Discussion: The Department emphasizes again here, as it explicitly stated in the July 2022 NPRM, that while some conditions or complications related to pregnancy might qualify as a disability under Section 504 or the ADA, pregnancy itself is not a disability. 87 FR 41523. The Department also reemphasizes that if an employee who is pregnant or experiencing related conditions also has a disability, the ADA and Section 504 may apply.

As the Department noted in the July 2022 NPRM, there are other Federal laws in addition to Title IX that may govern a recipient's responsibilities regarding pregnancy or related conditions in its workplace, including the ADA, Section 504, the FLSA, and the PDA which amended Title VII. *See* 87 FR 41394, 41514–15. In addition, since the July 2022 NPRM was issued, Congress passed the PWFA, which also pertains to pregnancy, childbirth, and related medical conditions in the workplace, and the PUMP Act, which pertains to lactation rights. The Department clarifies that nothing in § 106.57(c) obviates a recipient's separate obligation to comply with those other civil rights laws.

In addition, as noted above in the discussion of § 106.40(b)(4) with respect to students, the Department notes that the reference to ''pregnancy or related conditions or any temporary disability resulting therefrom'' contained a redundancy because the term ''pregnancy or related conditions'' as defined in § 106.2 includes any medical conditions related to pregnancy, childbirth, termination of pregnancy, or lactation, and recovery from any of those conditions. To address these concerns, the Department revised the language in § 106.57(c) of the final regulations to delete the term ''any temporary disability resulting therefrom'' and substitute the term ''temporary medical conditions'' for the remaining references to ''temporary disabilities'' and ''temporary disability.'' The Department's revisions will eliminate any possible inference that pregnancy standing alone is a disability. The Department did not, however, change the reference to ''payment of disability income'' in the list of job-related purposes in § 106.57(c), as that is a specific benefit that may be available to employees with disabilities. The Department is not aware of anything called ''medical conditions income,'' so changing that term to correspond with the changes to ''temporary disability'' and ''temporary disabilities'' would not make sense.

Changes: In § 106.57(c) of the final regulations, the Department has removed the phrase ''or any temporary disability resulting therefrom.'' Additionally, the Department has changed the other two references to ''temporary disability'' and ''temporary disabilities'' to ''temporary medical conditions.'' Final § 106.57(c) now states that a recipient must treat pregnancy or related conditions as any other temporary medical condition for all job-related purposes. Finally, the section header has been changed from ''Comparable treatment to temporary disabilities or conditions'' to ''Comparable treatment to other temporary medical conditions.''

6. Section 106.57(d) Voluntary Leaves of Absence

Comments: Some commenters supported proposed § 106.57(d) because it would require recipients to provide leave to employees who are affected by pregnancy-related medical conditions even if a recipient does not maintain a leave policy for its employees or if an employee does not have sufficient leave or accrued employment time to qualify for leave under the recipient's policy.

Some commenters asserted that employees should have a right to all medically necessary time off for pregnancy or related conditions, just as students do under § 106.40(b)(3)(iv), such as leave to recover from pregnancy-related health conditions, to attend related medical appointments, and to accommodate bed rest. Commenters asserted that it is unclear in proposed § 106.57(d) whether leave for a ''reasonable period of time'' would include leave for pregnancy-related medical appointments. Commenters also asked the Department to clarify that to the extent a recipient maintains a leave policy for employees that is more generous, the recipient must permit the employee to take leave under that policy instead. Several commenters maintained that depriving employees of the same right students have to voluntary leave would reinforce the stereotype that motherhood and work are incompatible, contrary to the purpose of Title IX.

Some commenters asked that the Department clarify that a recipient may not require a doctor's note or other medical documentation for breaks to attend to basic health needs, such as bathroom breaks. Other commenters suggested that the Department revise the section title of proposed § 106.57(d) from ''Pregnancy leave'' to ''Pregnancy and related conditions leave'' or ''Time off for pregnancy-related needs and leave'' to make it clear that the leave is available for childbirth and other medical conditions related to pregnancy.

Discussion: The Department acknowledges commenters' support for § 106.57(d) and their questions about its implementation. Section 106.57(d) requires a recipient—only if it does not have another leave policy or an employee does not have enough leave under the policy or has not worked there long enough to qualify—to treat pregnancy or related conditions as a justification for an employee's voluntary leave of absence for a reasonable period of time. After such time, the employee shall be reinstated to the status held when the leave began or to a comparable position without a negative effect on any right or privilege of employment. The pre-existing rule referred to ''pregnancy or related conditions'' for ''pregnancy, childbirth, false pregnancy, termination of pregnancy and recovery therefrom,'' but these final regulations use ''pregnancy or related conditions'' instead; however, the substance of the provision remains the same.

Still, the Department understands that commenters had questions about the meaning of ''for a reasonable period of time'' and whether it is the same as the ''period of time deemed medically necessary'' referenced in § 106.40(b)(3)(iv) regarding voluntary leaves of absence for students. Determining what is a reasonable period of time under § 106.57(d) is a fact-specific inquiry that depends on the totality of the circumstances, including the period of time deemed medically necessary by an employee's healthcare provider. Considering recent new Federal legislation in this area, such as the PUMP Act and the PWFA, and a pending rulemaking that may address reasonable accommodations for employees who are pregnant or experiencing related conditions, *see* 88 FR 54714, the Department declines the commenters' suggestion to go further and mandate a blanket right to all medically necessary time off for employees at this time without the opportunity to more fully consider the interplay between Title IX and other employer obligations.

In response to commenters' concerns about an employee's ability to take advantage of a more generous leave policy, the Department further clarifies that § 106.57(d) only applies if the recipient does not maintain a leave policy for its employees or the employee has insufficient leave or accrued employment time to qualify for leave under the policy. Therefore, if a recipient maintains a leave policy for employees that is more generous than what is articulated in § 106.57(d), the recipient must permit the employee to take leave under that policy instead. And under § 106.57(c), a recipient must at least treat pregnancy or related conditions as it does any other temporary medical condition with respect to duration and extensions of leave. For example, if an employee with another temporary medical condition can take leave for medical appointments related to that condition, employees who are pregnant or have related conditions must be permitted to do so as well.

Although the Department declines to add to the final regulations a provision prohibiting a recipient from requiring a doctor's note or other medical documentation from employees for breaks to attend to basic health needs, such as bathroom breaks, the Department reminds recipients that such documentation may only be required for pregnancy or related conditions if it is required of all employees with temporary medical conditions. *See* § 106.57(c). Therefore, for example, if a recipient does not require an employee with a urinary tract infection to provide a doctor's note to take bathroom breaks more frequently than usual, it must not require such notes from employees who need more frequent bathroom breaks because of pregnancy or related conditions.

As for the title of the provision, the Department agrees with commenters that the title ''Pregnancy leave'' did not encompass the reach of the provision. As explained in the July 2022 NPRM, the Department proposed adding ''voluntary'' to modify ''leave of absence'' in the text of the provision to clarify that an employee must not be forced to take leave due to pregnancy or related conditions, but rather must have the right to choose whether to take leave. 87 FR 41527. For this reason, ''Voluntary leaves of absence'' is a suitable title for this provision.

Finally, the Department has changed the word ''shall'' to ''must'' in § 106.57(d) for consistency with language in the remainder of the regulations but does not intend any decrease in coverage.

Changes: The title of § 106.57(d) has been changed from ''Pregnancy leave'' to ''Voluntary leaves of absence,'' and in the text of the provision, the word ''shall'' has been changed to ''must.''

7. Section 106.57(e) Lactation Time and Space

General Support

Comments: Commenters expressed general support for the requirement in proposed § 106.57(e) that employees have a clean, private, non-bathroom lactation space and reasonable break time to express breast milk or breastfeed. Commenters stated that proposed § 106.57(e) would provide much-needed support for employees and would advance Title IX's non-discrimination goals because, they stated, pregnant educators historically were discriminated against, were fired or excluded from the classroom, and did not get paid parental leave, causing them to return to work before they were ready, and they had difficulty finding time to express breast milk or getting support from their employer to do so.

Some commenters noted that some educators had to pump in supply closets or cars while juggling schedules that made it extremely difficult to express breast milk on a regular basis and that securing break time is one of the biggest barriers faced by lactating employees in education. Some commenters noted that if a lactating employee does not express breast milk as needed, they may experience pain and end up with health complications including infection, or their milk supply will reduce, making it harder to continue breastfeeding. Therefore, commenters explained, a

lactating employee without adequate time and space to express breast milk will be forced to choose between their job and their health and that of their child.

Some commenters reported that thousands of recipients nationwide already provide their employees with lactation time and space, due to the ACA, State laws, and the rise in breastfeeding rates, and that others can learn from their peer institutions, suggesting that compliance with proposed § 106.57(e) is readily achievable.

Discussion: The Department acknowledges the commenters' variety of reasons for supporting § 106.57(e). In the final regulations, in response to comments and upon further review, the Department changed the language ''[a] recipient must ensure the availability of a lactation space'' to ''[a] recipient must ensure that an employee can access a lactation space'' to match the language adopted in final § 106.40(b)(3)(v), the corollary provision regarding student access to lactation space. As the Department explained above in the student context, for this provision to be effective a recipient must not only ensure that an appropriate lactation space is available but also that it is accessible to the employees who need it.

The Department agrees with commenters that the final regulations, by requiring access to time and space for lactating employees to breastfeed or express breast milk, will help recipients to fulfill Title IX's nondiscrimination goals of addressing sex discrimination in employment and ensuring that neither pregnancy nor its related conditions are barriers to equal opportunities in employment by recipients of Federal financial assistance. The Department also agrees with commenters that § 106.57(e) will help ensure that recipient employees do not have to choose between breastfeeding and staying in their jobs and that they can be productive in the workplace and avoid serious health complications. Finally, the Department agrees that compliance with § 106.57(e) should be achievable because so many recipients nationwide already provide their employees with lactation time and space, due to the ACA, State laws, and the rise in breastfeeding rates.

The Department notes that new Federal laws regarding lactation in the workplace, including the PWFA and the PUMP Act, both of which were passed after the issuance of the July 2022 NPRM, may also apply to recipients.

Changes: In final § 106.57(e)(2), the Department has changed ''[a] recipient must ensure the availability of a lactation space'' to ''[a] recipient must ensure that an employee can access a lactation space.''

Requests for Clarification Regarding Lactation Spaces

Comments: Some commenters expressed support for proposed § 106.57(e)(2)'s requirement that a recipient provide employee access to lactation space and requested that the Department provide more clarity by providing specifics such as the recommended location of lactation spaces, the number of spaces to be provided, whether they should have evening and weekend access, and how they must be equipped. Some commenters stated that the minimum requirements for a functional lactation space include a chair, a flat surface on which to place a pump, access to an electrical outlet, nearby access to running water, a refrigerator or other space in which an employee can store expressed milk, and reasonable proximity to an employee's specific place of work, and stated that the cost of implementing such requirements would be minimal because almost all recipients are already required to provide certain employees with a lactation space under the FLSA (as amended by the ACA) and a recipient may offer a common space for both students and employees.

In addition, some commenters asked the Department to state in the regulations and in supplemental guidance that if multiple students or employees need simultaneous access to a lactation space, the recipient should discuss various options with all parties to find a solution that meets their needs, such as using signage or a scheduling system, or installing partitions or screens in the space so it can be used by multiple persons at the same time.

Discussion: The final regulations at § 106.57(e) require recipients to ensure employees can voluntarily access a space other than a bathroom that is clean, shielded from view, free from intrusion from others, and may be used by an employee for expressing breast milk or breastfeeding as needed. This is the same as what recipients are required to provide for students under final § 106.40(b)(3)(v). Whether the lactation space a recipient provides meets the standards of § 106.57(e)—including that the space ''may be used'' for pumping and breastfeeding as needed—is best determined on a case-by-case basis, but generally means that the space is functional, appropriate, and safe for the employee's use. The Department declines to adopt additional specific requirements about the size and setup of lactation spaces for employees at this time to preserve recipient flexibility and to be able to review the degree of and obstacles to compliance with other Federal lactation laws.

The Department notes that there may be Federal, State, or local laws or regulations that contain more specific requirements regarding lactation spaces for employees, and the Department does not intend for these regulations to preempt those laws or regulations to the extent they provide employees with more rights regarding lactation spaces.

Regarding the request that the Department require lactation spaces to be reasonably close to the employee's specific place of work, the Department notes again that, in final § 106.57(e)(2), the Department changed the phrase ''ensure availability of'' to ''ensure that an employee can access'' a lactation space. This change was made in recognition of the fact that, for the provision of lactation space to be effective, a recipient must ensure not only that an appropriate lactation space is available but also that it is accessible to the employees who need it in the reasonable break time they must use it. If the lactation space is so far from an employee's workstation, office, or classroom that the employee cannot reasonably get there and back, breastfeed or pump, and store their expressed milk in the time given, the Department would not consider the space to be accessible to the employee. This change in text also parallels the revised language regarding student access to a lactation space in § 106.40(b)(3)(v).

To provide recipients flexibility, the Department also declines to mandate in the regulations any particular arrangement a recipient must follow in connection with a shared lactation space. However, the Department notes that even with multiple users a recipient must comply with its obligations under § 106.57(e)(2) with respect to each one. If multiple students or employees need simultaneous access to a lactation space, a recipient must develop a solution consistent with § 106.57(e)(2) that meets the needs of the users of the space. Such a solution might include, as commenters suggested, using signage or a scheduling system, or installing partitions or screens in the space so it can be used by multiple persons at the same time. Given the variety among recipients, the Department defers to a recipient to find a system that works best at its institution consistent with § 106.57(e)(2), taking into consideration the needs of its employees and students.

Changes: None.

Pumping and Breastfeeding

Comments: Some commenters opposed the inclusion of ''breastfeeding'' in this provision because they believed it goes beyond the obligations that exist currently in some other Federal, State, and local laws, arguing that this language implies that a recipient must accommodate the presence of nursing infants in its school or other recipient workplace, which may not be safe or feasible in all circumstances. Commenters asserted that a recipient should have discretion regarding such matters.

In contrast, some commenters urged the Department to explicitly state in the regulations that a lactating student or employee will still have the right to express breast milk or breastfeed outside of the designated lactation spaces, if they wish, consistent with laws in all 50 States, the District of Columbia, Puerto Rico, and the Virgin Islands that generally allow breastfeeding in public or private places. *See* National Conference of State Legislatures, State Breastfeeding Laws, *https://www.ncsl.org/research/health/breastfeeding-state-laws.aspx* (last visited Mar. 12, 2024).

Some commenters requested that the Department revise the language in § 106.57(e) to use terms such as ''express milk'' and ''nursing'' to be more inclusive of all employees.

Discussion: The Department acknowledges commenters' suggestions and understands their concerns but disagrees with the suggestion to remove references to breastfeeding from § 106.57(e). This provision is focused solely on what may take place in the lactation space that a recipient must make accessible to its employees, and the Department wants to be clear that an employee may use that space for breastfeeding instead of pumping if the employee has access to their child while at work. The Department is not suggesting that Title IX requires a recipient to allow nursing infants to be present in the rest of its school or other workplace. Whether or not an employee's child may be present in recipient spaces outside the lactation room is a fact-specific determination beyond the scope of this rulemaking, and the Department agrees with commenters that a wide variety of State and local laws may provide such rights and that recipients would be obligated to honor those rights as applicable. Nothing in these final regulations would preclude a lactating employee from expressing breast milk or breastfeeding outside of the recipient's designated lactation spaces if State and local laws allow it. The decision of where to pump or breastfeed is at the employee's discretion if it is consistent with all applicable laws and regulations.

Finally, the Department declines commenters' suggestion to revise the terminology used in § 106.57(e). Section 106.57(e) requires a recipient to ensure that any employee who is lactating can access a lactation space regardless of that employee's gender identity or gender expression and regardless of whether the employee plans to express milk via pumping or breastfeeding. Nothing in these final regulations prohibits a recipient from using different terminology to describe lactation spaces in its communications with employees.

Changes: None.

Other Requests for Clarification

Comments: One commenter raised a few issues they believed needed clarification regarding the intersection of proposed § 106.57(e) with employment-related rights regarding lactation spaces and break times, such as whether all claims regarding lactation rights now should be adjudicated under Title IX and whether employers need to add anything to employee handbooks about this matter. Some commenters requested that the Department prohibit a recipient from requiring an employee to get medical certification or documentation to get a lactation modification.

Discussion: In response to the commenter's question, all claims regarding lactation rights need not be adjudicated solely under Title IX. Employees can make a complaint pertaining to lactation under a recipient's Title IX grievance procedures if they wish. However, there is no requirement that an individual exhaust remedies under Title IX before pursuing a claim under another law in court or administratively. As the Department noted in the July 2022 NPRM, there are other Federal laws that govern employers' responsibilities regarding pregnancy or related conditions in the workplace including the PDA, which amended Title VII, and the ACA, which amended the FLSA. 87 FR 41514–41515. In addition, since the July 2022 NPRM was issued, Congress passed the PWFA and the PUMP Act, which also pertain to lactation in the workplace. There are State and local laws that may apply as well. Not all recipient employees will be covered by all of these laws, and whether an employee chooses to pursue a claim under Title IX will depend on the individual employee's circumstances.

In response to the question about whether a recipient must add information about lactation to employee handbooks, the Department notes that the final regulations do not require such notice standing alone; however, if the recipient provides notice of similar policies or benefits related to temporary medical conditions, the recipient will be required under § 106.57(c) to provide comparable notice related to lactation.

Regarding commenters' requests that the Department prohibit a recipient from requiring medical documentation for lactation needs, the Department has added § 106.40(b)(3)(vi) to the final regulations, which states, among other things, that a recipient may not require a student to provide supporting documentation related to lactation needs in connection with the provision of reasonable modifications or access to lactation space. Just as in the student context, the Department agrees with commenters that it is not reasonable for an employer to require documentation regarding employee lactation needs because the initiation of lactation after childbirth is nearly universal and the fact of lactation is obvious. However, considering recent new Federal legislation in this area, such as the PUMP Act and the PWFA, and a pending rulemaking that may address similar limits on medical documentation in the employee context, *see* 88 FR 54714, the Department declines to adopt similar language in § 106.57 at this time and believes that considering additional information would be appropriate before making this change, particularly given the interplay between Title IX and other employer obligations.

Changes: None.

8. Section 106.60 Pre-Employment Inquiries

Comments: Some commenters opposed proposed § 106.60 because they believe it exceeds the Department's authority and is inconsistent with Title IX and case law. Some commenters opposed proposed § 106.60(b) because they objected to the term ''self-identify,'' without providing additional information as to the reason.

Discussion: The Department disagrees with the assertion that § 106.60 exceeds the Department's authority or is contrary to case law. The provisions in § 106.60 have been part of the Title IX regulations since 1975. *See* 40 FR 24128 (codified at 45 CFR 86.60 (1975)). As discussed above, the Supreme Court has recognized that the Department has broad regulatory authority under Title IX to issue regulations that it determines will best effectuate the purpose of Title

IX and to require recipients to take administrative actions to effectuate the nondiscrimination mandate of Title IX. *See, e.g., Gebser,* 524 U.S. at 292. Regulations that ensure that employees are not discriminated against in the employment application process are consistent with this grant of authority. *See* 20 U.S.C. 1682. The Department was unable to find, and commenters did not provide, any case law to the contrary in connection with § 106.60.

Although the commenter did not provide sufficient information regarding the objection to ''self-identify'' for the Department to understand the commenter's concern, this term will assist both applicants and recipients by clarifying that recipients may ask applicants to identify their sex under certain conditions.

In addition, in § 106.60(a), the Department made a grammatical correction by adding the word ''a'' between the words ''make'' and ''pre-employment inquiry.''

Changes: Section 106.60(a) has been revised to add the word ''a'' before ''pre-employment inquiry.'' In § 106.60(b), the Department has made a technical change by inserting ''Title IX or'' for clarity and consistency.

IV. Title IX's Coverage of Sex Discrimination

A. Section 106.10 Scope

1. General

Comments: Some commenters expressed general support for proposed § 106.10's clarification of the scope of Title IX's prohibition on sex discrimination on the ground that it would help ensure that all students can learn and thrive in educational environments free from sex discrimination. Commenters stated that proposed § 106.10 would improve students' educational experiences by encouraging recipients to create inclusive, safe, and supportive learning environments and remedy discriminatory educational environments that have a negative effect on student mental health. Commenters asserted that proposed § 106.10 would help schools to better prevent and remedy sex discrimination against certain populations, including LGBTQI+ students and pregnant students, who, the commenters asserted, are disproportionately affected by discrimination. Commenters also shared research that commenters asserted shows that enumeration of bases of prohibited discrimination in school policies can reduce rates of bullying and suicidality among students.

Some commenters viewed proposed § 106.10 as necessary because LGBTQI+ and pregnant students and individuals lack clear protections in some schools. Other commenters noted proposed § 106.10 would alleviate threats, bullying, and harassment that students and employees experience in some schools. Commenters also asserted that individuals' right to be free from sex discrimination in education should not depend on the State in which they live or which school they attend.

Some commenters asserted that proposed § 106.10 conflicts with Title IX because it includes bases of discrimination that are not expressly referenced in the statute's text. Other commenters asserted that express coverage of the bases listed in proposed § 106.10 is consistent with the broad framing of the statute and court interpretations of Title IX.

Some commenters urged the Department to define ''sex.'' Some commenters argued that ''sex'' should be defined in biological terms, referring to male or female. Some commenters criticized the July 2022 NPRM for asserting that the term ''sex'' is not necessarily limited to a single component of an individual's anatomy or physiology and asserting that a definition is not necessary. Those commenters asserted that this position contradicts the history of the term, and asserted that ''sex'' is objective, immutable, innate, and biological. One commenter asserted that sexual orientation, gender identity, and transgender status are distinct concepts from sex and the word ''sex'' cannot fully encompass all of these terms at once.

Some commenters argued that proposed § 106.10 does not meet the conditions for rulemaking set out in Executive Order 12866, which directs Federal agencies to ''promulgate only such regulations as are required by law, are necessary to interpret the law, or are made necessary by compelling public need.'' Some commenters said that the July 2022 NPRM lacked substantial evidence about the prevalence of discrimination on the basis of sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity.

One commenter asserted that covering discrimination based on gender identity, sexual orientation, sex stereotypes, and sex characteristics would violate the Protection of Pupil Rights Amendment (PPRA), 20 U.S.C. 1232h. The commenter argued that recipients would have to ask a student about sex behavior or attitudes and religious practices to comply with the regulations.

Some commenters urged the Department to clarify or modify proposed § 106.10 to add examples of discrimination, including sex-based harassment, sexual violence and exploitation, and preventing a student from participating in an education program or activity consistent with their gender identity. Other commenters supported adding other terms to proposed § 106.10, including biological sex, gender norms, gender expression, intersex traits, and marital status. Some commenters urged the Department to clarify in § 106.10 that discrimination based on gender expression would be prohibited discrimination based on gender identity and sex stereotyping. Commenters also urged the Department to clarify that pay inequity based on sex is a form of sex discrimination; explicitly prohibit discrimination on the basis of ''actual or perceived'' protected classes; and clarify the application of proposed § 106.10 to digital or online harassment.

Some commenters expressed concern that proposed § 106.10 is vague and would make it difficult for recipients and the public to discern what constitutes sex discrimination (*e.g.,* one commenter objected to the Department's assertion that the bases listed in proposed § 106.10 are not exhaustive, arguing that this would deprive a school community of notice of what constitutes discrimination). Some commenters expressed concern that proposed § 106.10 could be arbitrarily or selectively enforced in the absence of clear, objective definitions of the terms used in the regulations (such as sex stereotypes, sexual orientation, gender identity, and sex). Some commenters expressed concern that terms used in the preamble are not defined (*e.g.,* transgender, intersex). Some commenters raised concerns about the term ''LGBTQI+,'' including that the identities represented by the acronym should not be conflated and that it may not encompass the full range of identities that individuals might have.

One commenter urged the Department to reopen the comment period to consider the impact of the pending Supreme Court decision in *303 Creative LLC* v. *Elenis,* No. 21–476.

Discussion: The Department agrees with commenters that § 106.10 will promote nondiscriminatory educational environments by clarifying the scope of Title IX's prohibition on sex discrimination and expects that § 106.10 will facilitate a consistent understanding of Title IX across the country.

The Department disagrees with commenters who argued that bases

specified in § 106.10 conflict with Title IX. As explained in the July 2022 NPRM, Title IX does not use the term ''on the basis of sex'' in a restrictive way, 87 FR 41531–32, and, as other commenters noted, many Federal courts have broadly interpreted the scope of prohibitions on sex discrimination in Title IX and other laws to cover the bases identified in § 106.10. *See, e.g., Bostock,* 590 U.S. at 659–62 (sexual orientation and gender identity); *Grabowski,* 69 F.4th at 1113 (sexual orientation); *Grimm,* 972 F.3d at 618–19 (sex characteristics and gender identity); *Whitaker By Whitaker* v. *Kenosha Unified Sch. Dist. No. 1 Bd. of Educ.,* 858 F.3d 1034, 1049–50 (7th Cir. 2017) (gender identity), *abrogated on other grounds as recognized by Ill. Republican Party* v. *Pritzker,* 973 F.3d 760, 762 (7th Cir. 2020); *Price Waterhouse,* 490 U.S. at 251 (sex stereotypes); *Nevada Dep't of Hum. Res.* v. *Hibbs,* 538 U.S. 721, 736 (2003) (pregnancy). The text of Title IX unambiguously covers any sex discrimination, except to the extent excluded in certain statutory provisions, and the exceptions in the statute must be construed strictly. *See, e.g., Jackson,* 544 U.S. at 175 (''Title IX is a broadly written general prohibition on discrimination, followed by specific, narrow exceptions to that broad prohibition.''); *Andrus* v. *Glover Constr. Co.,* 446 U.S. 608, 616–17 (1980) (''Where Congress explicitly enumerates certain exceptions to a general prohibition, additional exceptions are not to be implied, in the absence of evidence of a contrary legislative intent.'').

As the Department explained in the July 2022 NPRM, providing a specific definition of ''sex'' for purposes of § 106.10 is unnecessary for these regulations. 87 FR 41531. As explained in more detail below in the discussions of each basis in § 106.10, discrimination on each of those bases is sex discrimination because each necessarily involves consideration of a person's sex, even if that term is understood to mean only physiological or ''biological distinctions between male and female,'' as the Supreme Court assumed in *Bostock.* 590 U.S. at 655. The Department described each of these bases, and the justification for including each, in the July 2022 NPRM, and they are addressed in more detail below. 87 FR 41531–34. The Department believes it is important to clarify that Title IX's prohibition on sex discrimination includes discrimination on the basis of sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity.

Relatedly, the Department has determined it is not necessary to define each of the bases of discrimination listed in § 106.10 or other related terms used in the preamble. The Department has defined key terms as necessary in § 106.2. The Department disagrees that the terms in § 106.10 and the related terms in the preamble are vague. Rather, as explained in more detail below, they are well understood, informed by case law, and used widely in other laws and policies. To the extent that recipients want to further clarify the scope of discrimination under Title IX and these regulations, nothing in the final regulations prevents a recipient from adopting policies that include examples of prohibited conduct or providing training to its community on the scope of Title IX's coverage.

The Department disagrees that § 106.10 fails to comply with Executive Order 12866. The persistence of discrimination on the basis of sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity each present a compelling public need, and this need is bolstered by commenters who discussed the prevalence of such discrimination. Section 106.10 will help ensure recipients, students, and other members of the public understand how the Department interprets the scope of Title IX's prohibition on sex discrimination. As described above, commenters provided many examples of discrimination on the bases in § 106.10 and the ways such discrimination impedes access to education, which is reinforced by OCR's enforcement experience.

The Department disagrees that prohibitions on discrimination based on gender identity, sexual orientation, sex stereotypes, and sex characteristics in these final regulations violate the PPRA. The PPRA requires parental consent (unless the student has turned 18 or is an emancipated minor) before an LEA may require, as part of an applicable program (or a program that the Department/Secretary of Education administers), a student to ''submit to a survey, analysis, or evaluation that reveals information concerning'' certain issues, including ''sex behavior or attitudes'' and ''religious practices, affiliations, or beliefs of the student or student's parent.'' 20 U.S.C. 1232h(b)(3) and (7). The PPRA also requires an LEA to develop and adopt policies, in consultation with parents, to provide arrangements to protect privacy in the event of the administration or distribution of a survey to a student containing such items, including direct notification to parents (or to a student if a student has turned 18 or is an emancipated minor) of the specific or approximate dates during the school year of the administration of such a survey and the opportunity to opt their children out of such a survey. 20 U.S.C. 1232h(c)(1)(B), (2)(B), (2)(C)(ii). Neither § 106.10 nor any other part of the final regulations requires a recipient to mandate that students disclose information about their sex behavior or attitudes or their or their parents' religious practices, affiliations, or beliefs or requires that an LEA administer surveys to students that contains questions on these topics. Further, § 106.6(g) reinforces any legal right of a parent or guardian to act on behalf of their child. The Department is committed to complying with the PPRA and expects LEAs to do the same.

The Department appreciates commenters' interest in ensuring that § 106.10 is sufficiently clear to adequately notify school communities of what constitutes unlawful discrimination. The Department disagrees that the structure of § 106.10 is impermissibly vague as it is common for laws, regulations, and policies to specify the bases of discrimination that are prohibited. Section 106.6(d) makes clear that nothing in the Title IX regulations requires a recipient to restrict rights guaranteed by the U.S. Constitution, such as by restricting constitutionally protected speech, and no other provision authorizes such actions. The Department maintains that the final regulations provide adequate notice of the scope of a recipient's legal obligations without purporting to specify outcomes for all scenarios and situations, many of which will turn on particular facts and circumstances. Other sections of the regulations address specific requirements and prohibitions.

The Department disagrees with commenters' suggestion to add specific forms of discrimination to § 106.10. The Department appreciates the opportunity to clarify that § 106.10 describes *bases* of discrimination that involve consideration of sex. Sex-based harassment and sexual violence, on the other hand, are examples of discriminatory conduct; they are not themselves ''bases'' of discrimination. These two concepts—the basis of the discrimination and the form that discrimination takes—are distinct and should remain separate in the final regulations. This distinction is reflected in the definition of ''sex-based harassment'' in § 106.2, which states that harassment on the basis of sex is a ''form'' of sex discrimination, and includes harassment on the ''bases'' listed in § 106.10. The Department

therefore also disagrees with commenters' suggestions to modify § 106.10 to address issues like pay inequity, various forms of sex-based harassment, or treating a person inconsistent with their gender identity, because those are not themselves ''bases'' that involve consideration of sex, but rather, are examples of ways that sex discrimination may occur.

The Department declines to add marital status to § 106.10 because Title IX does not prohibit discrimination based on marital status *per se,* as discrimination based on marital status does not necessarily require consideration of a person's sex. Title IX does, however, prohibit a recipient from applying rules concerning marital status that treat individuals differently on the basis of sex (*e.g.,* treating married women more or less favorably than married men, treating an unmarried mother worse than a married mother based on sex stereotypes, treating a man who is married to a man worse than a woman who is married to a man). *See* 34 CFR 106.21(c), 106.37(a)(3), 106.40(a), 106.57(a), 106.60.

While the Department appreciates commenters' suggestions for including additional overlapping bases in § 106.10, the Department declines those suggestions as unnecessary. For example, as discussed in the July 2022 NPRM and below, the Department interprets ''sex characteristics'' to include ''intersex traits,'' and therefore declines to add the latter term into the regulatory text. 87 FR 41532. Similarly, the Department does not find it necessary to add commenters' suggested bases such as ''gender norms'' and ''gender expression,'' as each of these is rooted in one or more of the bases already represented in § 106.10 and does not need to be set out separately.

The Department agrees that § 106.10 extends to discrimination based on a perceived status, whether the perception is accurate or not, but this conclusion is already apparent from the text of the statute and relevant case law. Courts have recognized that discrimination based on perceived characteristics violates Title VII. *See Abercrombie & Fitch Stores,* 575 U.S. at 773–74 (holding that to prove religious discrimination under Title VII a plaintiff need not show that the employer had actual knowledge that the plaintiff needed a religious accommodation as long as the plaintiff could show that the perceived need for an accommodation was a motivating factor in the employer's adverse decision); *Roberts* v. *Glenn Indus. Group, Inc.,* 998 F.3d 111, 120–21 (4th Cir. 2021) (holding that discrimination based on perceived sexual orientation violates Title VII's prohibition on sex discrimination); *Jones* v. *UPS Ground Freight,* 683 F.3d 1283, 1299, 1304 (11th Cir. 2012) (holding that plaintiff who alleged race discrimination based, in part, on the use of epithets associated with ethnic or racial groups that differed from the plaintiff's actual ethnicity or race could survive a motion for summary judgment); *EEOC* v. *WC&M Enters., Inc.,* 496 F.3d 393, 401 (5th Cir. 2007) (quoting EEOC guidelines that state Title VII does not require a showing ''that the alleged discriminator knew the particular national origin group to which the complainant belonged [because] it is enough to show that the complainant was treated differently because of [their] foreign accent, appearance, or physical characteristics''). And the Supreme Court and lower Federal courts often rely on interpretations of Title VII to inform interpretations of Title IX, rendering it appropriate to do so here. *See, e.g., Franklin,* 503 U.S. at 75; *Jennings,* 482 F.3d at 695; *Frazier,* 276 F.3d at 65–66; *Gossett,* 245 F.3d at 1176. Further, at least one circuit court of appeals has held that Title IX similarly bars sex discrimination on the basis of perceived sex. *See Grabowski,* 69 F.4th at 1113, 1116–18 (holding that Title IX bars sexual harassment on the basis of perceived sexual orientation) (citing *Bostock,* 590 U.S. 644; *Price Waterhouse,* 490 U.S. 228). In *Grabowski,* the Ninth Circuit noted that the harassment at issue stemmed from the perception that a male student was attracted to men, was motivated by the impermissible sex stereotype that men should be attracted only to women, and thus may not have occurred if the student was a different sex. *See id.* at 1116; *id.* at 1117 (citing *Price Waterhouse,* 490 U.S. at 250; *Nichols* v. *Azteca Restaurant Enters., Inc.,* 256 F.3d 864, 874 (9th Cir. 2001)). Accordingly, as noted in the July 2022 NPRM, Title IX's broad prohibition on discrimination ''on the basis of sex'' includes, at a minimum, discrimination against an individual on the basis of their perceived sex, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity. 87 FR 41532. The inclusion of sex stereotypes in § 106.10 further underscores the point that Title IX covers discrimination based on one person's perception of another, whether or not those perceptions are accurate.

The Department disagrees that noting the bases listed in § 106.10 are not exhaustive deprives recipients of notice of what constitutes sex discrimination. The Department proposed adding the bases in § 106.10 as examples to clarify the scope of Title IX's coverage of sex discrimination, which includes any discrimination that depends in part on consideration of a person's sex. The bases listed in § 106.10 are intended to provide recipients notice of the broad scope of prohibited sex discrimination.

This preamble and the preamble to the July 2022 NPRM use terms such as ''LGBTQI+,'' ''transgender,'' and ''intersex,'' for purposes of convenience and explanation, but they do not appear in, and therefore need not be defined for purposes of applying, the final regulations because no rights and obligations under the final regulations depend on use of those terms. For example, the Department uses the term ''LGBTQI+'' as shorthand to describe ''students who are lesbian, gay, bisexual, transgender, queer, questioning, asexual, intersex, nonbinary, or describe their sex characteristics, sexual orientation, or gender identity in another similar way.'' 87 FR 41395. The Department understands the term ''transgender'' to refer to a person whose sex assigned at birth differs from their gender identity. The Department explained in the July 2022 NPRM that the term ''intersex'' ''generally describes people with variations in physical sex characteristics. These variations may involve anatomy, hormones, chromosomes, and other traits that differ from expectations generally associated with male and female bodies.'' 87 FR 41532.

The Department declines the commenter's suggestion to reopen the comment period to consider the impact of *303 Creative LLC* v. *Elenis,* 600 U.S. 570 (2023), because the decision did not address the education context and would not change the final regulations, which already specify that nothing in these regulations requires a recipient to restrict rights protected under the First Amendment.

Changes: None.

2. Authority To Enact Regulations on Sexual Orientation and Gender Identity Discrimination

Comments: Some commenters supported § 106.10, noting that Title IX provides express statutory authority for the Department to enact regulations that are ''consistent with the achievement of the objectives'' of Title IX. 20 U.S.C. 1682. Some commenters supported § 106.10 because it is consistent with the Supreme Court's description of Title IX in *North Haven Board of Education,* 456 U.S. at 521. Similarly, some commenters said proposed § 106.10

would be consistent with prior and current Department guidance and enforcement; Executive Orders 13803, 13985, 13988, 14021, and 14075; Title VII case law, including *Price Waterhouse, Oncale,* and *Bostock;* and Federal court decisions recognizing that Title IX's prohibition on sex discrimination includes discrimination based on sexual orientation and gender identity.

Other commenters asserted that Title IX's legislative history lacks reference to sexual orientation and gender identity and expressed concern that coverage of these bases of discrimination in proposed § 106.10 would be at odds with Title IX's original purpose, which commenters argued was to protect the interests of women and girls.[87] Commenters also asserted that § 106.10 reflects an unexplained departure from the Department's historical interpretation of Title IX and exceeds the Department's authority under Title IX.

Commenters argued that ''sex'' should be interpreted according to the ordinary public meaning of the term when Title IX was enacted, that ''sex'' was understood by contemporary dictionaries and courts to refer to physiological differences between males and females, that the use of the term ''gender identity'' was very limited at that time, and that the term ''gender'' has been used in contradistinction to ''sex.'' Some commenters said that Title IX's references to ''both sexes,'' 20 U.S.C. 1681(a)(2), and ''one sex'' and ''the other sex,'' 20 U.S.C. 1681(a)(8), are at odds with coverage of sexual orientation and gender identity discrimination.

Commenters also cited examples in which courts and the Department have declined to interpret sex discrimination laws to include sexual orientation and gender identity discrimination.

Some commenters expressed concern that proposed § 106.10 would circumvent Congress, which has declined to pass bills that would clarify that Title IX's coverage of sex discrimination encompasses gender identity discrimination. H.R. 1652, 113th Cong. (2013); S. 439, 114th Cong. (2015).

Some commenters asserted that Title IX's contractual nature demands a narrow reading of the law and that § 106.10 exceeds Congress's power to impose funding conditions under the Constitution's Spending Clause. The commenters said that recipients could reasonably have read Title IX as ambiguous as to whether it covered sexual orientation and gender identity discrimination when they accepted funds, that the Department may not impose post-acceptance or retroactive conditions on Federal funds, and that private recipients of Federal funds must have notice of their responsibilities.

Some commenters asserted that the Department's interpretation of Title IX to cover sexual orientation and gender identity discrimination readjusts the balance between State and Federal authority, implicating the Tenth Amendment, sets up potential conflicts with State laws, weakens local control of education, and undermines the Department's compliance with the Department of Education Organization Act, 20 U.S.C. 3403(b). Other commenters, in contrast, supported the inclusion of sexual orientation and gender identity in proposed § 106.10, in part because it would be consistent with other anti-discrimination laws and the anti-discrimination policies already in place at some recipients.

Some commenters also objected to the July 2022 NPRM's citation to OCR's Notice of Interpretation—Enforcement of Title IX with Respect to Discrimination Based on Sexual Orientation and Gender Identity in Light of *Bostock* v. *Clayton County,* 86 FR 32637 (June 22, 2021) (*Bostock* NOI), *https://www.govinfo.gov/content/pkg/FR-2021-06-22/pdf/2021-13058.pdf.* Commenters said the Department cannot rely on the *Bostock* NOI as authority for § 106.10 because the U.S. District Court for the Eastern District of Tennessee preliminarily enjoined the Department from enforcing it against twenty States. *See Tennessee* v. *U.S. Dep't of Educ.,* 615 F. Supp. 3d 807, 842 (E.D. Tenn. 2022).

Some commenters objected to the Department's reliance on Executive Orders 13988 and 14021.

Discussion: The Department agrees with commenters that, as explained in more detail below, § 106.10 is consistent with the Department's statutory authority under Title IX, prior and current Department guidance, various Executive Orders, and Federal case law precedents. The Department's authority to issue regulations governing equal opportunity to participate in an education program or activity is well established. 20 U.S.C. 1682; 20 U.S.C. 1221e–3; 20 U.S.C. 3474; Education Amendments of 1974 section 844.

The Department disagrees with commenters who argued that coverage of sexual orientation and gender identity discrimination is at odds with the purpose of Title IX. The purpose of Title IX, as shown from its text and structure, is to broadly prohibit sex discrimination. It has appropriately been applied in contexts that are covered by that broad prohibition, even if Congress did not specify those contexts when the law was passed. The Supreme Court has long recognized that statutory prohibitions on sex discrimination encompass sexual harassment, *Davis,* 526 U.S. at 647–48 (Title IX); *Gebser,* 524 U.S. at 281 (Title IX); *Harris,* 510 U.S. at 21 (Title VII); *Franklin,* 503 U.S. at 74–75 (Title IX); *Meritor Sav. Bank,* 477 U.S. at 64 (Title VII); retaliation, *Jackson,* 544 U.S. at 173–74 (Title IX); discrimination against men, *Newport News Shipbuilding & Dry Dock Co.* v. *EEOC,* 462 U.S. 669, 682 (1983) (Title VII); and same-sex sexual harassment, *Oncale,* 523 U.S. at 79 (Title VII); *Frazier,* 276 F.3d at 66 (''*Oncale* is fully transferable to Title IX cases''). Justice Scalia, writing for a unanimous Supreme Court, recognized that same-sex sexual harassment constitutes sex discrimination under Title VII because ''statutory prohibitions often go beyond the principal evil to cover reasonably comparable evils, and it is ultimately the provisions of our laws rather than the principal concerns of our legislators by which we are governed.'' *Oncale,* 523 U.S. at 79; *cf. Bostock,* 590 U.S. at 680–81 (rejecting employers' request that the Court base its decision on what the Court thinks is best instead of interpreting the underlying statute). The authority to address sexual orientation discrimination and gender identity discrimination as sex discrimination under Title IX, including supportive and contrary case law, is addressed in more detail in the separate discussion of those bases below.

The Department disagrees with commenters who asserted that the statute's use of the terms ''both sexes,'' ''one sex,'' and ''the other sex'' suggests that the statute does not cover sexual orientation and gender identity discrimination. As explained in the July 2022 NPRM, Title IX's coverage of discrimination based on sexual orientation and gender identity does not depend on whether sex is defined to encompass only certain biological characteristics. 87 FR 41531–32. Indeed, *Bostock's* reasoning dictates that, even assuming that ''sex'' refers to ''biological distinctions between male and female,'' discrimination against a person because

[87] One commenter argued that even though *Bostock* held that in 1964 Congress intended to cover sexual orientation and gender identity discrimination under Title VII, Congress's intent in passing Title IX must reflect Congress's understanding of sex discrimination in 1972, which the commenter asserted would not cover discrimination based on sexual orientation or gender identity.

they are gay or transgender is, in part, discrimination on the basis of sex. *See Bostock,* 590 U.S. at 659–62. The Department recognizes that some early Federal court decisions did not recognize sexual orientation and gender identity discrimination as sex discrimination, but many subsequent Federal court decisions have declined to extend those earlier decisions.[88] Some of these subsequent decisions cited intervening decisions of the U.S. Supreme Court, including *Bostock,* which recognized that Title VII's prohibition on sex discrimination encompasses sexual orientation and gender identity discrimination, and *Price Waterhouse,* 490 U.S. at 251, which recognized that Title VII's prohibition on sex discrimination encompasses discrimination based on a failure to conform to stereotypical gender norms.

Federal courts' more recent analyses of Title IX's coverage of sexual orientation and gender identity discrimination are more persuasive because they apply *Bostock* and *Price Waterhouse* and acknowledge the full scope of Title IX's prohibition on sex discrimination. *See, e.g., Grabowski,* 69 F.4th at 1113 (Title IX prohibits sexual orientation discrimination); *Grimm,* 972 F.3d at 616 (Title IX prohibits gender identity discrimination); *Whitaker,* 858 F.3d at 1049 (same); *cf. Adams* v. *Sch. Bd. of St. Johns Cnty.,* 57 F.4th 791, 808–09 (11th Cir. 2022) (recognizing that *Bostock* held that discrimination because a person is gay or transgender ''necessarily entails discrimination based on sex,'' but opining that this holding did not resolve the question of whether a school board's policy excluding transgender students from bathrooms consistent with their gender identity was otherwise permissible under Title IX).

Although Congress has not amended Title IX to clarify its application to sexual orientation and gender identity discrimination, the Department agrees with the Supreme Court that ''congressional inaction lacks persuasive significance because several equally tenable inferences may be drawn from such inaction, including the inference that the existing legislation already incorporated the offered change.'' *LTV Corp.,* 496 U.S. at 650 (citations and quotations omitted). The Department's interpretation of Title IX flows from the statute's ''plain terms,'' *see Bostock,* 590 U.S. at 662–63, 674–76, and is consistent with the recent analysis of the statute's text and structure by various Federal courts, *see Grabowski,* 69 F.4th at 1113; *Grimm,* 972 F.3d at 616.

The Department disagrees with commenters who argued that Title IX's contractual nature demands a narrow reading of the law or that § 106.10 constitutes an unfair surprise or retroactive condition. While Title IX is in the nature of a contract, under Congress's Spending Clause authority, recipients have been on notice since enactment of Title IX that the statute means that no recipient may discriminate on the basis of sex. *See Jackson,* 544 U.S. at 175 (''Because Congress did not list any specific discriminatory practices when it wrote Title IX, its failure to mention one such practice does not tell us anything about whether it intended that practice to be covered.''); *see also Bennett,* 470 U.S. at 665–66, 673 (noting that ''the possibility that application of [the condition] might be unclear in [some] contexts'' does not render it unenforceable under the Spending Clause); *Sch. Bd. of Nassau Cnty.* v. *Arline,* 480 U.S. 273, 184, 286 n.15 (1987) (holding that individuals with contagious diseases are covered by Section 504 and rejecting lack of notice objections given Spending Clause statute's broad nondiscrimination mandate); *Grimm,* 972 F.3d at 619 n.18. Moreover, the notice required for the Spending Clause is satisfied by the text itself; just as the Supreme Court held in *Bostock* regarding Title VII, it is clear from the statutory text that, by its plain terms, Title IX covers discrimination that, like sexual orientation and gender identity discrimination is based on ''sex.'' *Cf. Bostock,* 590 U.S. at 662–63 (holding Title VII's prohibition on discrimination on the basis of sexual orientation or gender identity flows from the statute ''plain terms''). Further, this rulemaking process has afforded recipients notice and opportunity to comment, and recipients that do not wish to comply with the requirements of the final regulations have had and continue to have the opportunity to decline Federal funding. Further, the Department will not—and does not have the authority to—enforce these final regulations retroactively; they apply only to sex discrimination that allegedly occurred on or after August 1, 2024.

Consistent with Title IX, the final regulations provide for an appropriate balance between State and Federal authority. By statute, Congress has conferred authority on the Department to promulgate regulations under Title IX to effectuate the purposes of Title IX. 20 U.S.C. 1682. Compliance with Title IX and its implementing regulations is ''much in the nature of a contract,'' because, ''in return for federal funds, the States agree to comply with federally imposed conditions.'' *Pennhurst,* 451 U.S. at 17. Consistent with its position with respect to the 2020 amendments, the Department maintains that, through these final regulations, it is not compelling recipients to do anything. Recipients—including States and educational institutions—agree to comply with Title IX and its implementing regulations as part of the bargain for receiving Federal financial assistance, so that Federal funds are not used to support sex discrimination. *See* 85 FR 30459. States retain the ability to further address discrimination on the basis of sex in education in a manner that complies with these final regulations.

Accordingly, the Department disagrees that it lacks the delegated authority to promulgate § 106.10. In enacting Title IX, Congress conferred the power to promulgate regulations on the Department. 20 U.S.C. 1682. The Supreme Court has noted that ''[t]he express statutory means of enforc[ing] [Title IX] is administrative,'' as ''th[at] statute directs federal agencies that distribute education funding to establish requirements to effectuate the nondiscrimination mandate, and permits the agencies to enforce those requirements through 'any . . . means authorized by law' including ultimately the termination of federal funding.'' *Gebser,* 524 U.S. at 280–81 (quoting 20 U.S.C. 1682). The Supreme Court has held that sex discrimination, as prohibited by Title VII, encompasses discrimination based on sexual orientation and gender identity, *Bostock,* 590 U.S. at 659–62, and lower courts have applied this reasoning to Title IX, *see, e.g., Grabowski,* 69 F.4th at 1116; *Grimm,* 972 F.3d at 616. Section 106.10's coverage of discrimination on the basis of sexual orientation and gender identity is consistent with these Federal court holdings and is properly promulgated to effectuate the purposes of Title IX's nondiscrimination mandate.

Additionally, with respect to concerns that coverage of sexual orientation and gender identity discrimination under § 106.10 will lead to conflicts with State laws, the Department notes that the obligation to comply with Title IX and these final regulations is not obviated or alleviated by any State or local law or other requirements that conflict with Title IX and these final regulations. As

[88] *See, e.g., Ulane* v. *Eastern Airlines,* 742 F.2d 1081, 1085–87 (7th Cir. 1984), *not followed as dicta by Hively* v. *Ivy Tech Cmty. Coll. of Indiana,* 853 F.3d 339 (7th Cir. 2017); *Sommers* v. *Budget Mktg., Inc.,* 667 F.2d 748, 750 (8th Cir. 1982); *Holloway* v. *Arthur Andersen & Co.,* 566 F.2d 659, 664 (9th Cir. 1977), *overruling recognized by Schwenk* v. *Hartford,* 204 F.3d 1187, 1201–02 (9th Cir. 2000).

addressed in more detail in the discussion of § 106.6(b), it is well established that State laws can be preempted by Federal statutes and regulations when it is impossible for a private party to comply with both State and Federal requirements or because State law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. *See Freightliner Corp.,* 514 U.S. at 287; *Hillsborough Cnty.,* 471 U.S. at 713; *Planned Parenthood of Hous.,* 403 F.3d 324; *O'Brien,* 162 F.3d 40. As long as State laws do not conflict with Title IX and these final regulations, recipients should be able to comply with State laws as well as these final regulations.

Relatedly, the Department disagrees that Title IX's coverage of sexual orientation and gender identity discrimination inappropriately infringes on the responsibility of State and local governments to provide public education or prevents States from customizing policies for their local communities. Nothing in these regulations prevents States or local governments from adopting innovative and customized approaches to education, as long as they are consistent with Title IX's prohibition on sex discrimination. And Title IX does not dictate curriculum. *See* 34 CFR 106.42 (''Nothing in [theseTitle IX regulations]shall be interpreted as requiring or prohibiting or abridging in any way the use of particular textbooks or curricular materials.''). The Department declines to highlight examples of existing State laws and policies that directly conflict with Title IX because the Department refrains from offering opinions about specific laws or policies without an evaluation of all of the relevant facts.

The Department also disagrees with commenters who stated that the final regulations exceed the Department's authority under the Department of Education Organization Act; the final regulations do not grant the Department authority to direct, supervise, or control the administration or personnel of any recipient. 20 U.S.C. 3403(b).

The Department acknowledges that a district court entered a preliminary injunction barring the Department from enforcing its *Bostock* NOI against twenty States because the court concluded that the plaintiffs were likely to succeed on their claim that the *Bostock* NOI and other accompanying documents were required to go through notice-and-comment rulemaking. *Tennessee,* 615 F. Supp. 3d at 840. The Department disagrees with the conclusion and is appealing that ruling. But the district court's holding has no bearing on the Department's statutory authority to promulgate and amend its Title IX regulations as failure to employ notice-and-comment rulemaking was the ground upon which the *Tennessee* court enjoined that notice. The Department disagrees that the cases commenters cited prevent the Department from regulating on Title IX's application to sexual orientation or gender identity discrimination. *Mann Construction, Inc.* v. *United States,* 27 F.4th 1138 (6th Cir. 2022), for example, does not involve Title IX and examines notice-and-comment rulemaking requirements. Here, however, the Department has complied with all applicable APA requirements for this rulemaking, and thus, *Mann* does not apply.

The Department also clarifies that it did not rely on Executive Orders 13988 or 14021 for its interpretation of Title IX. Rather, these orders directed the Department to review its current regulations implementing Title IX for consistency with Title IX's statutory prohibition on sex discrimination. The Department's statutory authority for § 106.10 comes from Title IX, 20 U.S.C. 1682, and other statutes, 20 U.S.C. 1221e–3 and 3474.

Changes: None.

3. Reliance on Bostock and Title VII Case Law

Comments: Some commenters noted that Federal courts have found that discrimination on the basis of sexual orientation and gender identity is sex discrimination under Title VII, Title IX, and other laws, and noted that courts have historically equated the meaning of sex discrimination under Title IX with Title VII and looked to Title VII to interpret Title IX.

Other commenters objected to the Department's reliance on Title VII case law because of differences between Title IX and Title VII, including that Title IX expressly permits separation or different treatment of students based on sex in certain contexts and because education and employment are different in analytically material ways; that Title IX has a contractual framework whereas Title VII is framed as an outright prohibition; that Title IX is ''sex-affirmative'' and expressly permits some sex-based distinctions whereas Title VII is ''sex-prohibitive;'' and that the text of Title VII's prohibition on discrimination ''because of sex'' and Title IX's prohibition on discrimination ''on the basis of sex'' are sufficiently different that the reasoning of *Bostock* should not apply to the latter.

Some commenters objected to the Department's reliance on *Bostock* for explicitly including sexual orientation and gender identity discrimination under Title IX, arguing that the Supreme Court assumed that ''sex'' referred to ''biological distinctions between male and female,'' 590 U.S. at 655, framed the issue before it narrowly, and stated that the decision did not apply to other Federal laws that prohibit sex discrimination, *id.* at 681. Some commenters asserted that discrimination against a person for being ''nonbinary'' or ''bisexual'' may not require consideration of sex in the same way the *Bostock* Court analyzed discrimination because a person is gay or transgender.

Some commenters argued that the Department did not provide a persuasive explanation for its change from the position taken in a memorandum from its General Counsel's office commenting on *Bostock's* application to Title IX. U.S. Dep't of Educ., Memorandum from Principal Deputy General Counsel delegated the authority and duties of the General Counsel Reed D. Rubinstein to Kimberly M. Richey, Acting Assistant Secretary of the Office for Civil Rights re *Bostock* v. *Clayton Cnty.* (Jan. 8, 2021) (archived and marked not for reliance in March 2021) (Rubinstein Memorandum), *https://www2.ed.gov/about/offices/list/ocr/correspondence/other/ogc-memorandum-01082021.pdf.* Some commenters urged that the final regulations should not extend beyond the boundaries of the Rubinstein Memorandum, which they argued is consistent with *Bostock* and better protects cisgender women and girls from discrimination.

Discussion: Some courts have declined to extend the Supreme Court's reasoning in *Bostock* to Title IX by concluding that prohibitions on discrimination ''because of sex'' and discrimination ''on the basis'' of sex do not mean the same thing. *See, e.g., Neese* v. *Becerra,* 640 F. Supp. 3d 668, 675–84 (N.D. Tex. 2022). The Department disagrees. Both phrases simply refer to discrimination motivated in some way by sex. Indeed, the Supreme Court has used the terms ''because of'' and ''on the basis of'' interchangeably, including in *Bostock* itself. *Bostock,* 590 U.S. at 650 (''[I]n Title VII, Congress outlawed discrimination in the workplace on the basis of race, color, religion, sex, or national origin.''); *see also Meritor Sav. Bank,* 477 U.S. at 64 (''[W]hen a supervisor sexually harasses a subordinate because of the subordinate's sex, that supervisor 'discriminate[s]' on

the basis of sex.''). And like Title VII, Title IX's prohibition on discrimination ''on the basis of'' sex clearly encompasses discrimination on the basis of sexual orientation and gender identity, given that such bases of discrimination meet the same but-for causation test relied upon in *Bostock. See, e.g., Sheppard* v. *Visitors of Va. State Univ.,* 993 F.3d 230, 236–37 (4th Cir. 2021); *cf. Radwan* v. *Manuel,* 55 F.4th 101, 131–32 (2d Cir. 2022) (addressing but not deciding the question). Indeed, some courts have construed Title IX to impose a ''motivating factor'' standard, and discrimination based on sexual orientation and gender identity is motivated, at least in part, by sex. *See, e.g., Doe* v. *William Marsh Rice Univ.,* 67 F.4th 702, 708–09 (5th Cir. 2023). As *Bostock* explained, ''under this more forgiving [motivating factor] standard, liability can sometimes follow even if sex wasn't a but-for cause of the . . . challenged decision.'' 590 U.S. at 657. Nonetheless, the Court concluded that even ''the more traditional but-for causation standard'' encompassed discrimination on the basis of sexual orientation and gender identity. *Id.* Thus, Title IX's statutory text is no more permissive of discrimination on the basis of sexual orientation and gender identity than Title VII's.

With respect to the justification for changes from the position taken in the now-archived Rubinstein Memorandum, the Department explained in the July 2022 NPRM that the Department found that the position taken in the Rubinstein Memorandum was at odds with Title IX's text and purpose and the reasoning of the courts that had considered the issue. 87 FR 41531–37. In particular, the Department found that Title IX and its implementing regulations did not determinatively set forth the definition of ''sex'' to mean ''biological sex.'' 87 FR 41537. The Department agrees, however, that even assuming ''sex'' means ''biological sex,'' Title IX's prohibition on sex discrimination encompasses sexual orientation and gender identity discrimination. *See* 87 FR 41531. A recipient would not therefore need to determine on a case-by-case basis whether a particular incident of sexual orientation or gender identity discrimination is rooted in ''biological sex'' as discrimination on these bases always demands consideration of sex. The Department is also concerned that a narrower interpretation could exclude some individuals from Title IX protections that properly apply to all students. Indeed, the Department recognized this concern in the Rubinstein Memorandum. *See* Rubinstein Memorandum at 2 (declining to conclude that all sexual orientation discrimination constitutes sex discrimination, but suggesting that *Bostock*'s analysis ''would logically extend to individuals who allege discrimination on the basis that they are heterosexual or non-transgender.'')

With respect to the Supreme Court's decision in *Bostock,* the Department first notes that the Court did not adopt a particular definition of ''sex'' in *Bostock,* instead ''assum[ing]'' a definition provided by the employers that the employees had accepted ''for argument's sake.'' 590 U.S. at 655. The Court made clear that ''nothing in [its] approach to these cases turn[ed] on the outcome of the parties' debate'' about the definition of sex. *Id.* The same is true here. Nothing in the Department's interpretation of the scope of discrimination ''on the basis of sex'' under Title IX turns on resolving the meaning of sex because, as in *Bostock* and as explained further below, it is impossible to discriminate against a person on the bases listed in § 106.10 without discriminating against that individual based, at least in part, on sex, even if ''sex'' is understood only in terms of certain physiological sex characteristics.

The Department disagrees with the commenter who argued that discrimination against a person because they are nonbinary or bisexual does not require consideration of a person's sex. As the Court explained in *Bostock,* such traits are ''inextricably bound up with sex.'' 590 U.S. at 660–61. Moreover, it is plainly sex discrimination under longstanding Supreme Court precedent to treat a person worse because of their gender nonconformance. *See Price Waterhouse,* 490 U.S. at 251. A person's nonconformity with expectations about the sex of the person to whom they should be attracted or the sex with which they should identify implicate one's sex, and discrimination on that basis is prohibited. *See Whitaker,* 858 F.3d at 1048.

The Department acknowledges that *Bostock* interpreted Title VII and did not purport to interpret other Federal laws or address issues not raised in that litigation. *See* 590 U.S. at 681. The Department notes that this is consistent with the principle that Federal courts may not provide advisory opinions and are limited to deciding particular cases and controversies. *See, e.g., Carney* v. *Adams,* 592 U.S. 53, 58 (2020). As noted above, because the statutory prohibitions against sex discrimination in Title VII and Title IX are similar, the Supreme Court and other Federal courts look to interpretations of Title VII to inform Title IX. Thus, *Bostock*'s discussion of the text of Title VII appropriately informs the Department's analysis of Title IX. Since *Bostock,* three Federal courts of appeals have held that the plain language of Title IX's prohibition on sex discrimination must be read similarly to Title VII's prohibition. The Department agrees with the reasoning in these cases. *See A.C. by M.C.* v. *Metro. Sch. Dist. of Martinsville,* 75 F.4th 760, 769 (7th Cir. 2023); *Grabowski,* 69 F.4th at 1116–17; *Doe* v. *Snyder,* 28 F.4th 103, 113–14 (9th Cir. 2022); *Grimm,* 972 F.3d at 616.

More broadly, the Department also disagrees with commenters who argued that Title VII case law should not be considered when interpreting the scope of prohibited sex discrimination under Title IX. Federal courts, including the Supreme Court, often look to interpretations of other laws barring sex discrimination, particularly Title VII, when analyzing Title IX.[89]

The Department also disagrees with commenters who asserted that the fact that Title IX and its regulations include several express exceptions that permit recipients to separate or treat students differently on the basis of sex under certain circumstances prevents the Department from interpreting Title IX's broad prohibition on sex discrimination consistent with courts' interpretation of Title VII or other Federal sex discrimination laws. Indeed, like Title IX, Title VII also includes an exception that allows an employer to differentiate or separate individuals on the basis of sex in certain circumstances. *See* 42 U.S.C. 2000e–2(e)(1) (allowing an employer to consider a person's sex in employment decisions where a person's sex is ''a bona fide occupational qualification reasonably necessary to the normal operation of that particular business or enterprise''). In addition, like Title IX, Title VII has also been interpreted to permit employers to offer sex-separate facilities despite its ''sex-prohibitive'' framework. *See, e.g.,* U.S. Equal Emp. Opportunity Comm'n, *Sexual Orientation and Gender Identity (SOGI) Discrimination, https://www.eeoc.gov/sexual-orientation-and-gender-identity-sogi-discrimination* (last visited Mar. 12, 2024). The Department therefore disagrees that Title IX's

[89] *See, e.g., Davis,* 526 U.S. at 631 (holding that Title VII agency principles do not apply in determining liability for money damages under Title IX, but finding Title VII remains relevant in determining what constitutes sex discrimination under Title IX); *Olmstead* v. *L.C. ex rel. Zimring,* 527 U.S. 581, 617, n.1 (1999) (Thomas, J., dissenting) (''This Court has also looked to its Title VII interpretations of discrimination in illuminating Title IX.'').

limited allowance for separate or different treatment on the basis of sex in certain contexts prevents the Department from relying on Title VII case law to inform its interpretation of Title IX's general prohibition on sex discrimination.

Changes: None.

4. Sexual Orientation and Gender Identity Discrimination Generally

Comments: Some commenters shared views on Title IX's coverage of sexual orientation and gender identity discrimination together. Comments that separately address coverage of those bases are discussed in separate sections below.

Many commenters expressed support for the proposed inclusion of sexual orientation and gender identity in proposed § 106.10 because they stated that it would: help recipients create more inclusive, safe, and supportive environments for all students, allowing for equal and equitable access to education; protect LGBTQI+ students and families from sex discrimination in schools; help reduce elevated rates of discrimination, suicidality, and bullying experienced by LGBTQI+ students; be consistent with congressional intent in passing Title IX, which was to broadly prohibit sex discrimination; and ensure that Title IX is given ''a sweep as broad as its language.'' Other commenters supported the inclusion of sexual orientation and gender identity in proposed § 106.10, noting the high levels of sex discrimination, including sex-based harassment, against LGBTQI+ students and school employees and the negative effects of such discrimination.

Some commenters expressed concern that coverage of sexual orientation and gender identity discrimination will harm religious students, including religious students who do not attend recipient institutions that are eligible for a religious exemption, particularly if they could be held responsible for conduct that does not constitute intentional discrimination (*e.g.,* expressing a religious belief that another individual finds offensive). Commenters also asserted that institutions with conflicting religious beliefs would be forced to choose between accepting Federal funding and adopting policies and curricula related to sexual orientation and gender identity that align with their religious beliefs. Some commenters opposed proposed § 106.10 because students who participate in Federal financial aid programs may be unable to attend their college of choice if those colleges choose to forego Federal funds to avoid obligations under the proposed regulations.

Some commenters asked the Department to amend proposed § 106.2 to include definitions of conduct and practices that may constitute discrimination on the bases of sexual orientation and gender identity, including intentional use of offensive language, and to distinguish between genuine mistakes and repeated and intentional conduct.

Some commenters raised concerns that proposed coverage of sexual orientation and gender identity discrimination will be costly for recipients to implement and may make recipients vulnerable to costly and increased complaints, investigations, and litigation. Some commenters requested that the Department issue additional guidance and provide technical assistance and training with regard to best practices creating educational environments free from discrimination against LGBTQI+ students and families, and responding promptly and appropriately to all complainants regardless of sexual orientation and gender identity.

Discussion: The Department agrees with commenters who noted that discrimination based on sexual orientation and gender identity is a serious problem that the final regulations' clarification of the scope of sex discrimination will help to address in the context of federally funded education programs and activities. The Department also agrees that the final regulations will increase the inclusion and the safety of LGBTQI+ students and employees in schools; provide them with access to a process to address sex-based harassment; and be consistent with the text and intent of Title IX. The Department agrees with the comments that the inclusion of sexual orientation and gender identity in § 106.10 will improve consistency between Title IX and the nondiscrimination laws of some States and the policies of many recipients.

The Department disagrees with the contention that including sexual orientation and gender identity in the scope of § 106.10 harms women. Recognizing these bases of sex discrimination under Title IX in no way lessens the force of Title IX's protections against discrimination that limits educational opportunities for girls and women. Further, discrimination based on sexual orientation or gender identity is typically motivated by the same sex stereotypes that limit opportunities for women regardless of whether they identify as LGBTQI+. *See, e.g., Price Waterhouse,* 490 U.S. at 250 (''In the specific context of sex stereotyping, an employer who acts on the basis of a belief that a woman cannot be aggressive, or that she must not be, has acted on the basis of gender.''); *Grabowski,* 69 F.4th at 1117 (holding that discrimination against a student because they do not conform to a particular masculine or feminine sex stereotype is prohibited under Title IX); *Whitaker,* 858 F.3d at 1049 (''A policy that . . . punishes [an] individual for his or her gender non-conformance . . . violates Title IX.''); *Pederson* v. *La. State Univ.,* 213 F.3d 858, 880 (5th Cir. 2000) (recognizing that a university violated Title IX when its athletic funding decisions were based on ''paternalism and stereotypical assumptions about [women's] interests and abilities,'' and a ''remarkably outdated view of women and athletics''); *Videckis* v. *Pepperdine Univ.,* 150 F. Supp. 3d 1151, 1160 (C.D. Cal. 2015) (''It is undisputed that Title IX forbids discrimination on the basis of gender stereotypes.''); *Pratt* v. *Indian River Cent. Sch. Dist.,* 803 F. Supp. 2d 135, 152 (N.D.N.Y. 2011) (holding that allegations of peer harassment based on nonconformity or perceived nonconformity with sex stereotypes state a claim under Title IX); *cf. United States* v. *Virginia,* 518 U.S. 515, 533 (1996) (stating that in making classifications based on sex, the State ''must not rely on overbroad generalizations about the different talents, capacities, or preferences of males and females.'').

With respect to concerns about potential conflicts with beliefs of religious students and institutions, the Department notes that it is fully committed to respecting rights protected under the First Amendment and adhering to Title IX's religious exemption. A recipient's compliance with the final regulations must be carried out consistent with § 106.6(d), which specifies that nothing in these regulations requires a recipient to restrict rights protected under the First Amendment or any other constitutional provisions, and no other provision authorizes such action. Further, Title IX does not ''apply to an educational institution which is controlled by a religious organization if the application of [20 U.S.C. 1681(a)] would not be consistent with the religious tenets of such organization.'' 20 U.S.C. 1681(a)(3).

The Department declines the suggestion to add definitions of specific conduct and practices that constitute sexual orientation or gender identity discrimination because the Department refrains from offering opinions about how the regulations apply to specific facts without first conducting an investigation. The Department notes

that school policies that limit or deny a student's participation in a recipient's education program or activity on the basis of that student's sexual orientation or gender identity are subject to Title IX's prohibitions on sex discrimination. The Department will investigate complaints and make fact-specific determinations, as appropriate, to determine whether a particular practice or policy limits or denies a student their right to participate in the recipient's education program or activity free from sex discrimination. 34 CFR 100.7 (incorporated through 34 CFR 106.81).

The Department is cognizant that some commenters disagree with Title IX's coverage of sexual orientation and gender identity discrimination, but the Department is guided by the text and purpose of the statute. The Department's goal in adopting § 106.10 is to clarify the scope of Title IX's prohibition on sex discrimination, consistent with Title IX's text and purpose and the interpretations of Federal courts.

Likewise, the Department maintains that it has sufficiently examined relevant data on the impact of these regulations and accounted for such impact. In connection with the clarification of Title IX's scope under § 106.10, the Department's view is that articulating this standard will result in greater nondiscrimination protection, which in turn will result in more students able to access education and employees able to work free from sex discrimination. For a detailed analysis of costs and benefits related to the final regulations, please see the *Regulatory Impact Analysis.* These final regulations protect recipients' discretion to shape responses to sex discrimination in nondiscriminatory ways that account for the needs of the parties involved. The final regulations clarify the scope of a recipient's legal obligations. They do not, however, specify outcomes for all scenarios, which will turn on particular facts and circumstances.

The Department agrees that discrimination or hostility toward LGBTQI+ students, parents, guardians, caregivers, and family members can deny students' equal access to educational opportunities. Anyone who believes that a recipient has engaged in prohibited discrimination against a person participating or attempting to participate in the recipient's education program or activity may file a complaint with OCR.

Changes: None.

5. Gender Identity

Comments: In addition to the comments discussed above, the Department received comments specifically focused on coverage of gender identity discrimination under proposed § 106.10. Some commenters urged the Department to articulate a specific definition of ''gender identity,'' or clarify if certain identities would constitute ''gender identity'' under proposed § 106.10. Some commenters argued that the term ''gender identity'' is subjective, unconstitutionally vague, overbroad, and requires ''self-identification'' of which others may not be aware, or that may change unbeknownst to a recipient. One commenter asserted that the failure to define the term makes it impossible for recipients to determine how to adequately ensure they do not discriminate on that basis.

Other commenters asked for clarity on how a recipient must balance a student's allegations of gender identity discrimination against another student's right to freedom of expression.

Some commenters asked whether the prohibition on gender identity discrimination protects only transgender people. One commenter stated that it would be more consistent with *Bostock* to frame proposed § 106.10 as discrimination based on transgender status.

Other commenters urged the Department to modify proposed § 106.10 or another section of the regulations to permit recipients to separate students based on biological sex rather than gender identity when reasonable to ensure privacy, safety, and fairness.

One commenter asked the Department to clarify how Title IX's coverage of gender identity discrimination may overlap with court decisions treating gender dysphoria as a disability under the Americans with Disabilities Act.

Discussion: The Department disagrees that the term ''gender identity'' is too vague, subjective, or overbroad a term to incorporate in the Title IX regulations, or that it is necessary to further clarify what ''gender identity'' means in the regulations. The Department understands gender identity to describe an individual's sense of their gender, which may or may not be different from their sex assigned at birth. Courts have used the term consistent with this understanding, *see Bostock,* 590 U.S. at 660, 669; *Parents for Priv.* v. *Barr,* 949 F.3d 1210, 1217 (9th Cir. 2020); *Whitaker,* 858 F.3d at 1049, sometimes with only a brief explanation, *Grimm,* 972 F.3d at 594 (''gender identity—or their deeply felt, inherent sense of their gender''); *Boyertown Area Sch. Dist.,* 897 F.3d at 522 (''A person's gender identity is their subjective, deep-core sense of self as being a particular gender''); *Schroer* v. *Billington,* 577 F. Supp. 2d 293, 295 (D.D.C. 2008). The term is now well understood as it is used widely in laws and policies, and so the Department determined that—consistent with the approach taken by many courts—it is unnecessary to articulate a specific definition of ''gender identity'' in § 106.10.

The Department appreciates a commenter's recognition that one person may not know another's gender identity without inquiring unless the other person volunteers the information. This, however, does not undermine the fact that gender identity discrimination is sex discrimination. By comparison, one person may not know another person's sexual orientation, religion, race, or national origin without asking, but may still discriminate against them by, for example, harassing them on one of those bases in a manner that creates a hostile educational environment, or by discriminating against them based on perceived traits. To comply with the prohibition on gender identity discrimination, a recipient must not treat individuals more or less favorably based on their gender identity and, as described in more detail in the discussion of § 106.31(a)(2), generally may not prevent a person from participating in its education program or activity consistent with the person's gender identity.

The Department declines the suggestion to revise § 106.10 to address separation of students based on sex. Permissible sex separation under the statute is discussed further below in the discussion of § 106.31(a)(2).

The Department declines the suggestion to include discrimination based on transgender status instead of or in addition to discrimination based on gender identity in § 106.10. *Bostock* instructs that when a person is discriminated against because their gender identity is not consistent with their sex assigned at birth, ''sex'' is, at least in part, a basis for that discrimination. *See Bostock,* 590 U.S. at 669. This therefore includes discrimination against a person because they are transgender, or because they identify in some other way that is inconsistent with their sex assigned at birth. *See id.* at 669, *see also, e.g., Doe* v. *Mass. Dep't of Corr.,* No. CV 17–12255, 2018 WL 2994403 (D. Mass. June 14, 2018); *EEOC* v. *R.G. & G.R. Harris Funeral Homes, Inc.,* 884 F.3d 560 (6th Cir. 2018); *Whitaker,* 858 F.3d 1034. The Department also notes that a dissent in *Bostock* asserted that ''there is no apparent difference between discrimination because of transgender status and discrimination because of

gender identity.'' 590 U.S. at 686, n.6 (Alito, J. joined by Thomas, J., dissenting). The Department has determined that ''gender identity'' encompasses a person's ''transgender status,'' but is a more widely understood term that more accurately and fully reflects the scope of Title IX's protections.

With respect to the need to respond to a student's allegations of gender identity discrimination while respecting another student's right of freedom of expression, there is no inherent conflict between one student's right to be free from sex discrimination and another student's right to freedom of expression, and the Department notes that it is fully committed to respecting rights protected under the First Amendment. For additional discussion of the First Amendment, see the definition of Hostile Environment Sex-Based Harassment—First Amendment Considerations (Section I.C) (§ 106.2).

With respect to the question about gender dysphoria, the Department notes that the Fourth Circuit recognized that Congress directed ''courts [to] construe the ADA in favor of maximum protection for those with disabilities,'' and saw ''no legitimate reason why Congress would intend to exclude from the ADA's protections transgender people who suffer from gender dysphoria.'' *Williams* v. *Kincaid,* 45 F.4th 759, 769–70, 773 (4th Cir. 2022), *cert. denied,* 143 S. Ct. 2414 (June 30, 2023) (No. 22–633). A recipient may have overlapping obligations not to discriminate against a transgender individual based on disability in addition to the final regulations' prohibition on gender identity discrimination.

Changes: None.

6. Sexual Orientation

Comments: Some commenters urged the Department to define ''sexual orientation'' and clarify what conduct may be considered discrimination or harassment based on sexual orientation. Some commenters who opposed protections based on sexual orientation argued that the term is vague and could be interpreted in ways that harm students or encompass particular sexual practices or abusive or criminal conduct. One commenter expressed concern that the July 2022 NPRM conflates ''gay'' with ''queer'' and that ''queer'' can be interpreted very broadly.

One commenter asked whether a recipient can apply provisions permitting sex separation to separate students by sexual orientation.

Another commenter asked the Department to clarify that Title IX does not and cannot interfere with the private associational rights of lesbian, gay, and bisexual individuals.

Discussion: The Department disagrees with commenters who asserted that the term ''sexual orientation'' must be defined in the Title IX regulations. Courts routinely use the term without providing an express definition. *See, e.g., Bostock,* 590 U.S. at 653–54, 671; *Grabowski,* 69 F.4th at 1113; *Hively,* 853 F.3d at 340. The term is now well understood as it is used widely in laws and policies. The Department strongly disagrees with commenters who falsely suggested that protection from sexual orientation discrimination would encompass abusive and criminal conduct that does not describe the sex of a person to whom another person is attracted, as the term sexual orientation is commonly understood to mean. Further, the idea that stronger protections for lesbian, gay, and bisexual individuals will result in protections for abusive or criminal activity is itself grounded in harmful sex stereotypes.

The Department recognizes that a concept like sexual orientation is distinct from sex, even if it is ''inextricably bound up with sex,'' *cf. Bostock,* 590 U.S. at 660–61. As discussed above, § 106.10 does not define ''sex,'' but rather clarifies the scope of Title IX's prohibition on ''sex discrimination.'' When the regulations permit separation on the basis of ''sex,'' § 106.10 does not permit a recipient to separate students on the basis of sexual orientation or other bases in § 106.10, such as pregnancy or sex stereotypes. Indeed, a recipient's intentional separation or different treatment of students based on their sexual orientation generally would constitute sex discrimination under the final regulations. *Cf. Bostock,* 590 U.S. at 659–62.

The final regulations prohibit discrimination on the basis of sexual orientation under Title IX. *See* § 106.10. Nothing in these final regulations impacts any private associational rights of lesbian, gay, and bisexual individuals.

Changes: None.

7. Sex Characteristics

Comments: Some commenters applauded the inclusion of an explicit prohibition on discrimination based on sex characteristics in proposed § 106.10. Commenters asserted that discrimination based on sex characteristics, including intersex traits, is invariably motivated by sex-based considerations, and coverage under Title IX is thus consistent with the reasoning of *Bostock* and other Federal court precedent. Some commenters asserted that the 2020 amendments failed to clarify the nondiscrimination protections for people whose anatomy is neither typically male nor typically female. Other commenters objected to the Department's reliance on court cases that address gender identity discrimination and asserted that the term ''sex characteristics'' should not encompass ''gender identity.''

Some commenters urged the Department to clarify the term ''sex characteristics,'' because they believed the term is vague, should be explicitly limited to mean only male or female, or should only refer to reproductive sex traits. Some commenters asserted that coverage of discrimination based on sex characteristics should be based on objective medical analysis or observation and limited to conditions affecting an individual's reproductive capacity. A commenter argued that sex characteristics should not be based on a subjective perception of one's identity. The commenter argued that the Department's assertion that ''[d]iscrimination based on intersex traits is rooted in perceived differences between an individual's specific sex characteristics and those that are considered typical for their sex assigned at birth'' is vague and misleading. 87 FR 41532.

Some commenters supported the proposed prohibition on discrimination on the basis of sex characteristics because it would protect intersex people from discrimination and denial of educational opportunities. Commenters noted that discrimination against intersex individuals is often rooted in sex stereotypes. One commenter urged the Department to provide examples of prohibited discrimination that intersex students may face, such as harassment based on a student's visible nonconformity with sex stereotypes caused by their intersex traits, inappropriate disclosure of medical information about a student's intersex traits, or denial of access to sex-separate facilities consistent with a student's gender identity based on a student's intersex traits.

One commenter objected to the term ''intersex,'' arguing that it is a colloquial term, and suggested that the term ''differences of sex development'' is more accurate.

Discussion: The Department agrees with commenters that the prohibition on discrimination based on sex characteristics in § 106.10 is consistent with Title IX and sex discrimination case law. *See, e.g., Bostock,* 590 U.S. at 669 (addressing discrimination against

''persons with one sex identified at birth and another today''); *Grimm,* 972 F.3d at 608. In the July 2022 NPRM, the Department cited case law involving gender identity discrimination for the principle that sex discrimination bars discrimination based on traits that are ''inextricably bound up with'' sex. 87 FR 41532; *Bostock,* 590 U.S. at 660–61.

The Department appreciates the opportunity to clarify that the term sex characteristics is intended to refer to physiological sex-based characteristics. Sex discrimination based on a person's physiological sex characteristics may include discrimination based on a person's anatomy, hormones, and chromosomes associated with male or female bodies. As explained in the July 2022 NPRM, discrimination on the basis of sex characteristics includes discrimination based on intersex traits. 87 FR 41532.

The Department disagrees with a commenter who suggested that a medical diagnosis may be required to substantiate discrimination based on sex characteristics, or that sex characteristics are necessarily limited to a person's reproductive capacity. Discrimination based on a person's physiological sex characteristics could be considered sex discrimination regardless of any specific medical diagnosis, and could include, for example, discrimination based on physiological sex characteristics that differ from or align with expectations generally associated with male and female bodies.

The Department agrees with commenters who argued that the prohibition on discrimination on the basis of sex characteristics in § 106.10 will help clarify protections from sex discrimination for people with intersex traits, among others. The Department declines to make definitive statements about examples, due to the necessarily fact-specific nature of the analysis, but the Department recognizes that examples such as inappropriate disclosure of medical information about a student's intersex traits could constitute prohibited discrimination based on sex characteristics.

With respect to the term ''intersex,'' the Department notes that it did not propose using this term in the regulations, but rather described intersex traits as an example of a context in which the prohibition on discrimination based on sex characteristics could apply. The Department uses the term ''intersex'' because it is more accessible and commonly used than ''differences of sex development.'' The Department also notes, however, that the July 2022 NPRM also cited guidelines from the Consortium on the Management of Disorders of Sex Development, and clarifies that the Department understands the term ''intersex'' to include the same spectrum of conditions. 87 FR 41532.

Changes: None.

8. Sex Stereotypes

Comments: Some commenters objected to the Department's reliance on *Price Waterhouse* for the proposition that discrimination based on sex stereotypes constitutes sex discrimination because *Price Waterhouse* interpreted Title VII rather than Title IX. Commenters further asserted that *Price Waterhouse*'s plurality deemed sex stereotyping to be probative of sex discrimination, but not to constitute sex discrimination in and of itself.

One commenter argued that the term ''sex stereotypes'' is open to overbroad and inconsistent interpretation absent an objective definition of ''sex.''

One commenter asked the Department to clarify that the application of sex-specific rules and practices is not a form of sex stereotyping.

Discussion: The July 2022 NPRM describes sex stereotypes as ''fixed or generalized expectations regarding a person's aptitudes, behavior, self-presentation, or other attributes based on sex.'' 87 FR 41533. The Department disagrees that any differences between Title VII and Title IX support a conclusion that Title IX does not prohibit discrimination based on sex stereotypes. Sex stereotyping violates Title IX when it operates to exclude a person from participation in, deny a person the benefits of, or otherwise subject a person to discrimination under a recipient's education program or activity. As noted in the July 2022 NPRM, many courts have applied the reasoning in *Price Waterhouse* to hold that sex stereotyping can be a form of sex discrimination. 87 FR 41533–34; *see, e.g., Whitaker,* 858 F.3d at 1049 (''A policy that . . . punishes [an] individual for his or her gender non-conformance . . . violates Title IX.''); *Pederson,* 213 F.3d at 880 (recognizing that a university violated Title IX when its funding decisions in athletics were based on ''paternalism and stereotypical assumptions about [women's] interests and abilities,'' and a ''remarkably outdated view of women and athletics''); *see also Grabowski,* 69 4th at 1117.

The Department also disagrees that ''sex'' must be defined narrowly to avoid overbroad application of a prohibition on discrimination based on sex stereotypes. The Department appreciates the opportunity to clarify that not all conduct one might label ''sex stereotyping'' necessarily violates Title IX. Rather, in order to establish sex discrimination under Title IX, including discrimination based on sex stereotypes, a school policy, practice, or other conduct must, on the basis of sex, exclude a person from participation in, deny a person the benefits of, or otherwise subject a person to discrimination under a recipient's education program or activity. The Department has specified in § 106.31(a)(2) that otherwise permissible sex separation is consistent with Title IX as long as it is carried out in a manner that does not impose more than de minimis harm on affected students.

Changes: None.

9. Pregnancy or Related Conditions

Comments: Many commenters supported the clarification provided in § 106.10 that Title IX's prohibition on sex discrimination applies to discrimination on the basis of pregnancy or related conditions. Commenters said that discrimination based on pregnancy or related conditions is a type of sex discrimination that is far too common, prevents students from having equal access to educational opportunities, and derails education and careers. Commenters said that the proposed regulations will increase pregnant students' access to educational opportunities.

Some commenters noted that although the Department's Title IX regulations have prohibited recipients from discriminating against students based on pregnancy or related conditions since 1975, pregnant and parenting students are routinely stigmatized, discriminated against, and denied the resources and support they need to thrive.

Some commenters appreciated that the proposed regulations would clarify that harassment based on pregnancy or related conditions is a form of sex-based harassment. Some commenters noted that pregnant students experience higher rates of sexual harassment, which negatively impacts their education.

Some commenters described personal stories of harassment based on pregnancy, noting that students who become pregnant are often subjected to shame, punishment, or unwanted sexual attention and others suggested that schools are more likely to ignore or punish pregnant or parenting students who report sexual harassment because of stereotypes that they are

''promiscuous.'' Commenters said that explicit inclusion of pregnancy or related conditions in the scope of sex discrimination in § 106.10, combined with better procedures for resolving complaints, will foster an atmosphere of respect, and that students will feel safer knowing that any discrimination and harassment they experience will be properly addressed.

Some commenters suggested that proposed § 106.10 should be amended to add ''current, potential, or past'' to the description of ''pregnancy or related conditions'' that are protected from discrimination. One commenter suggested that the Department add ''reproductive health'' to prohibit harassment a person might experience based on their views on abortion, birth control, and other aspects of reproductive health. As an alternative, the commenter suggested changing the wording of proposed § 106.10 to make the meaning of ''related conditions'' clearer but did not suggest a specific revision.

One commenter asserted that § 106.10 would for the first time expand the scope of prohibited pregnancy discrimination to apply to all aspects of a recipient's education program or activity, rather than only admissions.

Discussion: Section 106.10 makes clear that Title IX's prohibition on sex discrimination includes discrimination based on pregnancy or related conditions. While this interpretation of Title IX is longstanding, as discussed above, many of these comments further demonstrated the need for § 106.10, as they show that pregnant students face higher rates of sexual harassment than non-pregnant peers and that recipients sometimes improperly rely on sex stereotypes about this population, which impedes the recipient's response. The comments further show that although discrimination based on pregnancy or related conditions has been prohibited by the Title IX regulations for decades, the existing regulations lacked clarity and consistency regarding recipient obligations. The Department agrees with commenters that § 106.10 is both consistent with Title IX's nondiscrimination mandate and essential to ensuring that students are not denied educational opportunities because of sex discrimination, including harassment, based on pregnancy or related conditions.

The Department does not agree that it is necessary to add ''current, potential, or past'' to modify ''pregnancy or related conditions'' in § 106.10 to protect against sex discrimination on this basis because final §§ 106.21(c), 106.40(b)(1), and 106.57(b) already prohibit discrimination based on ''current, potential, or past pregnancy or related conditions.''

The Department does not need to clarify the meaning of ''related conditions'' in § 106.10 because ''pregnancy or related conditions'' is separately defined in § 106.2. The Department also declines to add ''reproductive health'' to the final regulations because the scope of the commenter's suggested ''discrimination on the basis of reproductive health'' is unclear.

The commenter who suggested that adding a reference to ''pregnancy or related conditions'' in § 106.10 would for the first time expand the scope of pregnancy nondiscrimination protection beyond a recipient's admissions process is mistaken. Sections of the current Title IX regulations in §§ 106.40, 106.51, and 106.57 have long prohibited pregnancy discrimination against students and employees in areas other than admissions. 40 FR 24128 (codified at 45 CFR 86.40(b)(2), 86.51(b)(6), 86.57(b) (1975)); 34 CFR 106.40(b)(1), 106.51(b)(6), 106.57(b) (current).

Changes: None.

10. Menstruation or Related Conditions

Requests To Add ''Menstruation or Related Conditions'' Within Scope of Sex Discrimination

Comments: Some commenters argued that to meet the goal of prohibiting all sex discrimination covered by the statute, the Department should add ''menstruation and related conditions'' to the list of prohibited bases of discrimination in proposed § 106.10. These commenters requested that the Department explicitly prohibit discrimination based on menstruation, perimenopause, and menopause, and all of their related conditions in the regulatory text to clarify that such discrimination against students and employees is a form of discrimination based on sex. They asserted that such discrimination often includes sex-based harassment and stigma and leads to learning loss and other harms. Commenters cited examples of discrimination such as unnecessary menstruation-related bathroom restrictions by teachers, coaches, and other school officials; discipline for excessive bleeding; and harassment by employees or students. Commenters asserted that adding ''menstruation and related conditions'' to the scope of discrimination based on sex is consistent with the Department's position on other types of sex discrimination, such as discrimination based on sex characteristics. Commenters added that menstruation-related coverage will help protect all persons who menstruate.

Some commenters argued that in the alternative, the Department should amend its definition of ''pregnancy or related conditions'' in § 106.2 to state that ''pregnancy or related conditions'' includes menstruation or related conditions. Commenters argued that—in a manner similar to the July 2022 NPRM's explanation of discrimination based on pregnancy or related conditions—discrimination based on menstruation or related conditions is often based on stereotypes about women and society's sex-based indifference to their needs, and that policies fail to accommodate conditions associated with women as effectively as those associated with men. A group of commenters further requested that the Department require reasonable modifications for menstruation or related conditions for students and employees, such as changes to attendance policies to enable bathroom access, dress code modifications, or permission to request a classroom or seat that is closer to the bathroom. Some commenters requested that the Department go beyond offering reasonable modifications to individual students and require all recipients to provide access to menstrual products and ''menstruation-friendly'' bathrooms, noting that one recent study showed that around 20 percent of teenagers struggled to or could not afford menstrual products, and that students from lower-income households, students of color, and those in rural communities with limited resources were most affected. Commenters pointed to other studies demonstrating that without access to menstrual products, students may face barriers to learning, such as being forced to arrive late to class, leave early, or miss school altogether, all of which can affect their academic success. To minimize loss of learning time, some commenters argued that students should not be disciplined or marginalized due to menstruation.

Discussion: Discrimination based on menstruation, perimenopause, menopause, or their related conditions is sex discrimination because, depending on the facts presented, it can overlap or fall within the scope of discrimination based on pregnancy or related conditions, sex stereotypes, or sex characteristics under § 106.10. Menstruation is a process, triggered by hormones, that prepares the body for possible pregnancy. It typically occurs from puberty until menopause. Perimenopause (the time of transition to

menopause) and menopause are processes related to cessation of menstruation. Menstruation, perimenopause, and menopause may each be accompanied by various medical conditions, such as premenstrual syndrome, premenstrual dysphoric disorder, missed or irregular periods, migraines, pain, hot flashes, or heavy bleeding.

Accordingly, while the Department acknowledges commenters' suggestion that the final regulations explicitly include ''menstruation or related conditions,'' either standing alone or as part of the definition of ''pregnancy or related conditions'' under §§ 106.2 or 106.10, the Department concludes that doing so is unnecessary as discrimination on this basis is already covered as outlined above. We appreciate the opportunity to clarify for schools, students, and employees that harassment and other discrimination based on menstruation, perimenopause, menopause, or their related conditions and symptoms is prohibited sex discrimination under § 106.10.

Recognizing that discrimination based on menstruation or related conditions is in the scope of sex discrimination is also consistent with court decisions that have reached the same conclusion when interpreting Title VII. In particular, the Department notes that those decisions held that Title VII prohibited discrimination on the basis of menstruation or related conditions based on the statute's ''because of sex'' language, not the ''pregnancy . . . or related conditions'' language of the Pregnancy Discrimination Act. *See, e.g., Petrosino* v. *Bell Atl.,* 385 F.3d 210, 215 (2d Cir. 2004) (''gender-hostile environment'' was sufficiently severe and pervasive to defeat motion for summary judgment when male supervisors ''routinely [connected] their perceptions of [a menstruating worker's job performance] and her anatomy, especially [with] vulgar references to her breasts and menstrual cycle''); *Conner* v. *Schrader-Bridgeport Int'l, Inc.,* 227 F.3d 179, 196 (4th Cir. 2000) (asking a factory worker if she was ''on the rag today'' in front of colleagues multiple times a month was evidence of a hostile work environment).

To the extent that discrimination based on menstruation or related conditions becomes a barrier to an individual's participation in a recipient's education program or activity, schools have an obligation to address such barriers, prevent their recurrence, and remedy their effects. *See* § 106.44(a) and (f)(1). These barriers could include, for example, menstruation-related harassment by students or employees, unreasonable limits on students' or employees' bathroom access to address menstrual needs, conduct by school officials that publicly exposes that a student is menstruating (*e.g.,* requiring a student to remove a garment around their waist, or prohibiting a student from changing clothes at school when the student needs to address a menstruation-related issue), or similar menstruation-related restrictions or discipline. *See generally* T4PA Center, Considerations for Menstrual Equity and Student Success, at 4 (2023).

The Department declines to change the regulatory text to explicitly require recipients to provide reasonable modifications for menstruation or related conditions for students and employees, or access to menstrual products and ''menstruation-friendly'' bathrooms. The Department intends to continue to study the issue to determine whether further action or clarification is required to address discrimination on the basis of menstruation. Presently, the Department maintains that many, if not most, of the menstruation-related issues students and employees face will be addressed by recipients in their compliance with the nondiscrimination protections of § 106.10, such as requiring flexibility in a dress code policy for a student who has experienced a menstrual leak and for whom discipline for a resulting failure to comply with the dress code would be discriminatory; requiring a recipient to address a situation in which one employee is harassed by another for having headaches related to perimenopause; or requiring a recipient to allow a teacher to use a fan in a classroom to address hot flashes due to menopause, if, for example, the recipient allows teachers to use fans or other items or make other changes in their classroom to increase comfort for other types of reasons. The Department further notes that, due to the specific facts presented, should a student's menstruation or related conditions meet the definition of ''pregnancy or related conditions'' set out in § 106.2, the student is entitled to reasonable modifications under § 106.40(b)(3)(ii). For example, a student suffering from polycystic ovary syndrome, may also be entitled to reasonable modifications for pregnancy or related conditions if the student requires time off for medical treatment. Similarly, to the extent a student's or employee's menstruation-related condition qualifies as a disability under Section 504 or the ADA, that individual must be provided full rights under those laws, as applicable, including reasonable modifications.

Nothing in these final regulations precludes a recipient from using its discretion to provide reasonable modifications to students and employees for whom menstruation or related conditions present barriers to education or employment.

Changes: None.

Privacy of Menstruation-Related Records

Comments: Commenters also encouraged the Department to clarify in the regulations that students' menstruation-related records should be kept private and may not be used to track students' or employees' menstrual cycles, as that would raise serious privacy concerns. Commenters urged the Department to specify that Title IX Coordinators may not share an individual's menstruation-related information with law enforcement or keep it in a disclosable student record. Commenters also requested that the Department issue subsequent guidance to address this concern.

Discussion: The Department agrees with comments expressing concern about the privacy of records related to menstruation or related conditions. The Department emphasizes that nothing in these regulations requires a recipient to collect and maintain more information than is necessary under the recordkeeping provision at § 106.8(f) to ensure that a student or employee is not discriminated against or harassed based on menstruation or related conditions, for example in records of complaints of sex discrimination and the steps the recipient took to meet its obligations under § 106.44. In addition, the Department's final regulations revise § 106.44(j) to prohibit a recipient from disclosing personally identifiable information—which could include information about menstruation or related conditions—obtained in the course of complying with this part, with some limited exceptions. The provision that prohibits disclosure of personally identifiable information is explained more fully in the discussion of § 106.44(j). Finally, the Department understands that supporting recipients in the implementation of these regulations is important. The Department will offer technical assistance, as appropriate, to promote compliance with these final regulations.

Changes: The Department has revised § 106.44(j) to clarify that a recipient must not disclose personally identifiable information obtained in the course of complying with this part, except in limited circumstances.

Requests for Menstrual Education and Training

Comments: Some commenters requested that the Department explicitly require a recipient to provide menstrual education and training. Regarding training for staff, some commenters said that training requirements for Title IX Coordinators and all staff should include information about menstruation and related conditions and what constitutes discrimination on that basis, so that staff members understand the recipient's obligation to address it. Commenters encouraged the Department to provide guidance to Title IX Coordinators, including examples of menstruation-related discrimination that Title IX Coordinators could use to raise awareness and sample questions that recipients could use to conduct surveys on this issue.

Regarding students, commenters said that providing menstrual health education to all students in middle to late elementary school, along with puberty education, would give students the confidence and skills they need to take care of themselves when they start menstruating, reduce the fear and shame regarding menstruation that students often experience, and lead to long-term changes in attitudes and policies regarding menstruation.

Discussion: The Department acknowledges commenters' suggestion that required training for Title IX Coordinators and other staff include information about menstruation, related conditions, and discrimination on that basis, so that all staff members understand the recipient's obligation to address it. These final regulations do not explicitly require training related to menstruation or related conditions. However, under § 106.8(d)(1), all employees must be trained on the recipient's obligation to address sex discrimination in its education program or activity and the scope of conduct that constitutes sex discrimination. Because discrimination on the basis of menstruation or related conditions falls within the scope of § 106.10, schools may benefit from including it as part of any employee training on the scope of conduct that constitutes sex discrimination. The Department also declines to mandate the content of trainings, beyond the general requirement that they provide employees with the tools necessary to identify conduct that may constitute discrimination, in order to allow recipients flexibility. Nothing in the final regulations precludes a recipient from including in its employee trainings more comprehensive information on menstruation or related conditions and how they might affect student and employee participation in the recipient's education program or activity. Regarding the request for guidance with examples of menstruation-related discrimination and sample survey questions, the Department will consider whether future guidance is appropriate and will provide technical assistance to ensure compliance with these regulations.

With respect to menstrual education for students, the Department does not control school curricula, *see* 20 U.S.C. 1232a, and does not require recipients to provide instruction regarding menstrual health. Nothing in these final regulations impedes a recipient's discretion to provide accurate educational information to students.

Changes: None.

B. Section 106.31(a) Education Programs or Activities—General

1. De Minimis Harm Standard

Comments: Some commenters supported § 106.31(a)(2) because it would be consistent with courts' analysis of discrimination on the basis of sex and would clarify a recipient's obligations under Title IX.

Several commenters objected to the ''de minimis harm'' standard, arguing that it is not rooted in Title IX or case law, that it is confusing, ambiguous, vague, or overbroad, or is too malleable, enabling recipients and the Department to act arbitrarily rather than based on objective principles.

One commenter suggested that the Department revise proposed § 106.31(a)(2) to clarify that harm must be assessed at an individual level from the perspective of a reasonable person in the individual's position.

Some commenters argued that proposed §§ 106.10 and 106.31(a)(2) violate the constitutional principle of separation of powers and the ''major questions'' doctrine as articulated by the Supreme Court in *West Virginia,* 597 U.S. 697. Commenters argued that prohibiting schools from engaging in gender identity and sexual orientation discrimination and treating individuals consistent with a gender identity that differs from their sex assigned at birth are questions of great political and economic significance. Commenters asserted that §§ 106.10 and 106.31(a)(2) will have a broad economic impact and that the Department has not accounted for costs such as construction, sanctions, litigation, and non-monetary costs of changed policies, such as risks to due process rights and free speech concerns.

Some commenters asserted that the de minimis harm standard is inconsistent with the hostile environment standard.

Discussion: The Department agrees with commenters who asserted that § 106.31(a)(2) is consistent with Title IX's text and purpose, and that it will help recipients understand their nondiscrimination obligations.

As the Department explained in the July 2022 NPRM, the Department's regulations have long specified that separate or different treatment on the basis of sex is generally prohibited under Title IX because such treatment is presumptively discriminatory. 87 FR 41534; *see* 34 CFR 106.31(b)(4), (7) (''Except as provided in this subpart, in providing any aid, benefit, or service to a student, a recipient shall not, on the basis of sex . . . [s]ubject any person to separate or different rules of behavior, sanctions, or other treatment; [or] [o]therwise limit any person in the enjoyment of any right, privilege, advantage, or opportunity.''). Despite this presumption and general prohibition, however, the Department's regulations have long recognized limited contexts in which sex separation or differentiation is allowed. *See* 87 FR 41534. The Department therefore seeks with § 106.31(a)(2) to further explain the legal authority for permitting sex separation in certain circumstances, and the limitations the statute sets on how recipients may carry out such separation.

Consistent with Supreme Court precedent, the Department interprets Title IX's nondiscrimination mandate to mean that, save for the limited instances allowed by statute and listed in the text of § 106.31(a)(2), recipients may not make ''distinctions or differences in treatment [on the basis of sex] that injure protected individuals.'' *Bostock,* 590 U.S. at 681 (citing *Burlington N. & Santa Fe Ry. Co.* v. *White,* 548 U.S. 53, 59–60 (2006)). The Department does not interpret Title IX to prohibit all sex-based distinctions or separation, but rather, only those that subject a person to injury, or harm—*i.e.,* discrimination prohibited by the statute. The Department has therefore concluded that to provide an education program or activity that does not subject participants to sex discrimination, a recipient must not provide sex-separate facilities or activities in a manner that subjects any person to legally cognizable injury—*i.e.,* more than de minimis harm—unless there is a statutory basis for allowing otherwise.

The Department disagrees with commenters who asserted that the Department's articulation of this ''de minimis harm'' standard is not

grounded in case law. Rather, it is well-established that the concept of discrimination includes an element of injury or harm. *See, e.g., Oncale,* 523 U.S. at 81 (Title VII does not reach non-harmful ''differences in the ways men and women routinely interact with'' each other); *Peltier,* 37 F.4th at 129 (''for the plaintiffs to prevail under Title IX, they must show that . . . the challenged action caused them harm''). Such harm, however, must generally be something more than innocuous, or de minimis, to be actionable discrimination. *See, e.g., Threat* v. *City of Cleveland,* 6 F.4th 672, 678 (6th Cir. 2021); *cf. Chambers* v. *DC,* 35 F.4th 870, 875 (D.C. Cir. 2022), *judgment entered,* No. 19–7098, 2022 WL 2255692 (D.C. Cir. June 23, 2022) (declining to decide whether Title VII includes a de minimis harm exception because in that case, the denial of a job transfer request easily surmounted that bar). Setting the bar at more than de minimis harm accounts for this important aspect of courts' legal construction of the meaning of the term ''discrimination.'' *See Burlington N. & Santa Fe Ry. Co.,* 548 U.S. at 59 (''No one doubts that the term 'discriminate against' refers to distinctions or differences in treatment that injure protected individuals.''); *see also Bostock,* 590 U.S. at 657 (''To 'discriminate against' a person, then, would seem to mean treating that individual worse than others who are similarly situated.''). This threshold concept is particularly important in the context of determining when separate or different treatment on the basis of sex may be permitted, and when it constitutes prohibited discrimination under Title IX. The Department notes that there are injuries, including stigmatic injuries, associated with treating individuals differently on the basis of sex, and in such circumstances, no additional showing of a more ''material'' harm is required under Title IX.

The Department appreciates commenters' questions as to how to determine whether a harm is more than de minimis, and whether the inquiry is objective or purely subjective. Harm under § 106.31(a)(2) must be genuine and objectively non-trivial and assessed from the perspective of a reasonable person in the individual's position. It is not necessary to elaborate on this point in the regulatory text, because this objective standard is consistent with and grounded in longstanding anti-discrimination law and its injury requirement. *See, e.g., Burlington N. & Santa Fe Ry. Co.,* 548 U.S. at 59, 68–69 (explaining that, under Title VII, ''judging harm must be objective. An objective standard is judicially administrable. It avoids the uncertainties and unfair discrepancies that can plague a judicial effort to determine a plaintiff's unusual subjective feelings. We have emphasized the need for objective standards in other Title VII contexts[.]''). As discussed in detail below, § 106.31(a)(2) further clarifies that preventing a person from participating in an education program or activity consistent with the person's gender identity violates this standard and is generally prohibited.

The Department disagrees that the major questions doctrine applies to the Department's adoption of §§ 106.10 and 106.31(a)(2). *West Virginia* described ''extraordinary cases'' in which an ''unprecedented'' agency action concerns issues of such ''economic and political significance'' that there is reason to hesitate before concluding that Congress conferred the authority. 597 U.S. at 700, 721–23. The case also concerned a situation in which the Court concluded that the ''agency ha[d] no comparative expertise'' in making the relevant policy judgments and had invoked an ''ancillary'' statutory provision to enact its regulations. *Id.* at 724, 729 (quotation marks omitted). The Department's issuance of these regulations does not resemble the circumstances described in *West Virginia.* The applicable statutory provisions are in no way ancillary to the statutory scheme, and there is nothing unprecedented about these regulations, which are consistent with the analysis of Federal courts and the practices of many recipients. Moreover, they reflect the Department's expertise on what constitutes sex discrimination in education programs or activities. *See* U.S. Dep't of Educ., Nondiscrimination on the Basis of Sex in Education Programs or Activities Receiving Federal Financial Assistance, 65 FR 52858, 52859 (Aug. 30, 2000) (discussing the Department's ''leadership role in Title IX enforcement'').

Further, these regulations do not require the kind of costs or restructuring that might implicate the major questions doctrine. In *West Virginia,* the Court characterized the agency action as ''substantially restructur[ing] the American energy market,'' and as a ''transformative expansion'' of agency authority. 597 U.S. at 724 (quotation marks omitted). In contrast, the final regulations more fully implement Title IX, consistent with the Department's longstanding authority, and the Department estimates that most of the costs associated with the final regulations that may accrue to federally funded education programs will be offset by savings as a result of these final regulations. Additional discussion of comments on the costs of the final regulations can be found in the *Regulatory Impact Analysis.* The Department agrees with commenters that protection from sexual orientation and gender identity discrimination is an important issue; its capacity to deprive students of equal access to educational opportunities has informed the Department's decision to clarify Title IX's coverage of sexual orientation and gender identity discrimination in this rulemaking. The importance of this application of Title IX supports the Department's decision to pursue this rulemaking, consistent with Executive Order 12866.

Even if the major questions doctrine did apply, the Department's authority is especially clear based on ordinary tools of statutory interpretation, as the Department discusses throughout this preamble. The final regulations fall within Congress's clear and explicit statutory grant of authority to the Department to issue regulations that are consistent with the objectives of Title IX. *See* 20 U.S.C. 1682 (authorizing the Department to ''issu[e] rules, regulations, or orders . . . which shall be consistent with achievement of the objectives of the statute.''). The Department is not relying on a novel or long dormant authority in this rulemaking. Congress indisputably entrusted the Department with the authority to articulate what constitutes sex discrimination in schools. For a more detailed explanation of the Department's authority, see the discussion of statutory authority (Section II.B).

In addition, §§ 106.10 and 106.31(a)(2) are consistent with Federal court decisions, including those from the Supreme Court, that have defined the contours of sex discrimination. Most recently, the Supreme Court held in *Bostock* that sex discrimination, as prohibited by Title VII, encompasses discrimination based on sexual orientation and gender identity. 590 U.S. at 659–62; *see* 87 FR 41530. The *Bostock* Court also flatly rejected the argument advanced in dissent that Title VII's prohibition on sex discrimination should not be read to include sexual orientation or gender identity because Congress had failed to add such terms to the statute. 590 U.S. at 669–70. Indeed, the Court held that while there was no way to know why Congress had not amended Title VII to include those bases in subsequent years, the issue was

irrelevant given that the existing statutory text so clearly encompassed discrimination on the basis of sexual orientation and gender identity. *Id.* The Supreme Court's statement that ''it is impossible to discriminate against a person'' because of their sexual orientation or gender identity ''without discriminating against that individual based on sex,'' *Bostock,* 590 U.S. at 660, is equally true under Title IX. Federal courts have relied on *Bostock* to recognize that Title IX's prohibition on sex discrimination encompasses discrimination based on sexual orientation and gender identity. *See, e.g., Grabowski,* 69 F.4th at 1113; *Grimm,* 972 F.3d at 616. Federal courts have likewise recognized that preventing students from participating in a recipient's education program or activity consistent with their gender identity causes harm that violates Title IX. *See, e.g., Whitaker,* 858 F.3d at 1045–46; *Grimm,* 972 F.3d at 617–18. The Department's final regulations are not ''beyond what Congress could reasonably be understood to have granted.'' *West Virginia,* 597 U.S. at 700–01, 724.

With respect to comments that the de minimis harm standard is inconsistent with the hostile environment standard, the Department disagrees. The hostile environment standard in the definition of ''sex-based harassment'' § 106.2, applies when determining whether harassing conduct rises to the level of a hostile environment, such that the conduct constitutes discrimination prohibited by the statute. A recipient's obligations to respond promptly and effectively to sex-based harassment are described in § 106.44(a). Section 106.31(a)(2), on the other hand, does not apply to sex-based harassment; it applies only to the manner in which a recipient carries out otherwise permissible different treatment or separation on the basis of sex. As explained below, however, absent a limited exception under Title IX, a recipient policy or practice that separates or treats students differently based on sex violates § 106.31(a)(2) if the policy or practice prevents a student from participating in the recipient's education program or activity consistent with their gender identity or otherwise causes a student more than de minimis harm.

Changes: None.

2. Application

Comments: Some commenters asked the Department to clarify how proposed § 106.31(a)(2) would apply to people other than students (*e.g.,* employees, parents, or other parties participating in a recipient's education program or activity).

Some commenters asked the Department to specify the types of permissible ''different treatment or separation on the basis of sex'' covered by § 106.31(a)(2), including, for example, single-sex classes and activities, social fraternities or sororities, or sex-specific appearance codes.

Some commenters urged the Department to specify when subjecting a person to more than de minimis harm is ''otherwise permitted'' by Title IX or the regulations to avoid causing ''unfair surprise'' when OCR enforces the final regulations or ad hoc judgments about when harm may be implicitly authorized. Some commenters expressed confusion as to whether and how § 106.31(a)(2) would apply to criteria a recipient uses to determine a student's eligibility to participate on a male or female athletic team.

Discussion: With respect to questions about who is covered by § 106.31(a)(2), the Department appreciates the opportunity to clarify that it applies to any ''person,'' including students, employees, applicants for admission or employment, and other individuals participating or attempting to participate in the recipient's education program or activity, which also could include parents of minor students, students from other institutions participating in events on a recipient's campus, visiting lecturers, or other community members whom the recipient invites to campus.

The Department also appreciates the opportunity to clarify that § 106.31(a)(2) applies, with some limited exceptions discussed below, to any circumstances in which a recipient engages in permissible sex separation or differentiation, such as in its provision of restrooms and locker rooms (34 CFR 106.33), access to classes and activities (34 CFR 106.34(a)–(b)), and policies such as appearance codes (including dress and grooming codes). For additional context on Title IX's application to appearance codes, see separate discussion below.

Proposed § 106.31(a)(2) specifies that the prohibition on subjecting a person to more than de minimis harm does not apply when ''otherwise permitted by Title IX or this part.'' The Department agrees with commenters that the Department should specify the contexts in which Title IX or the regulations permit such harm. Section 106.31(a)(2) recognizes that in the limited circumstances in which recipients are permitted to separate or differentiate on the basis of sex, recipients must carry out such separation consistent with the statute's nondiscrimination mandate, 20 U.S.C. 1681, except when the statute itself allows otherwise. Those contexts are limited to the enumerated exceptions in 20 U.S.C. 1681(a)(1) through (9) and the regulatory provisions that implement those statutory provisions, namely §§ 106.12 (religious exemption), 106.13 (military and merchant marine educational institutions), 106.14 (membership practices of social fraternities and sororities, YMCA, YWCA, Girl Scouts, Boy Scouts and Camp Fire Girls, and voluntary youth service organizations); § 106.15(d), (e) (admissions to certain classes of educational institutions); the provision for living facilities under 20 U.S.C. 1686 and its implementing regulatory provision, § 106.32(b)(1) (sex-separate housing); and § 106.41(b) (sex-separate athletic teams), as explained in more detail below. However, even in these limited contexts where Congress has enumerated exceptions, nothing in the final regulations prohibits a recipient from voluntarily taking steps to protect students from sex-based harm, including by permitting them to participate consistent with their gender identity.

Regarding commenters' questions on sex-separate athletic teams, § 106.31(a)(2) does not apply to male and female athletic teams a recipient offers under § 106.41(b). As background, for decades, recipients' obligations with regard to the operation of athletics in schools have been governed by an overarching nondiscrimination mandate and obligation to provide equal athletic opportunities for students regardless of sex. *See* 34 CFR 106.41(a), (c). As discussed in the July 2022 NPRM, in 1974 Congress enacted the Javits Amendment, which directed that the Title IX regulations should include reasonable provisions that take into account unique considerations that arise in athletic competition among schools. 87 FR 41538, Education Amendments of 1974 section 844. In 1975, HEW, the Department's predecessor, first promulgated regulations under Title IX after multiple congressional hearings. 87 FR 41393; 121 Cong. Rec. 20467 (1975) (statement of Sen. Birch Bayh). The regulations were subject to a statutory ''laying before'' provision, designed to afford Congress an opportunity to examine the proposed regulations and disapprove them by resolution within 45 days if Congress deemed them to be inconsistent with Title IX. *N. Haven Bd. of Educ.,* 456 U.S. at 531–32. The Supreme Court has stated that the fact that no such

disapproval resolution was adopted ''strongly implies that the [Title IX] regulations accurately reflect congressional intent.'' *Grove City Coll.* v. *Bell,* 465 U.S. 555, 568 (1984); *see also N. Haven Bd. of Educ.,* 456 U.S. at 533–35.

Consistent with the Javits Amendment and the longstanding athletics regulations, the Department has historically interpreted Title IX's nondiscrimination mandate to tolerate sex separation in athletics in a manner that imposes more than de minimis harm on individual students when such separation served educational interests consistent with Title IX's nondiscrimination mandate. *See* 34 CFR 106.41(b) (permitting exclusion of a student of a particular sex from a sex-separate athletic team in certain circumstances, even when student wishes to participate). Under the longstanding athletics regulations, individual students may be excluded from a particular male or female athletic team on the basis of their sex, even when doing so may impose on them more than de minimis harm, *see id.,* as long as students, regardless of sex, have an equal opportunity to access the recipient's athletic program as a whole, *see* 34 CFR 106.41(c). Consistent with the Javits Amendment, under § 106.41(c), the Department has also long evaluated a recipient's provision of equal athletic opportunity on the basis of sex at a program-wide level, rather than at an individual-level, as the Department does with respect to other aspects of a recipient's education program or activity. *Compare* 34 CFR 106.41(c) (''A recipient which operates or sponsors interscholastic, intercollegiate, club or intramural athletics shall provide equal athletic opportunity for members of both sexes''), *with, e.g.,* 34 CFR 106.21(a) (''No person shall, on the basis of sex, be denied admission . . . .'').

Consistent with the longstanding athletics regulations, § 106.31(a)(2) does not apply to permissible sex separation of athletic teams. The Department of Education issued a notice of proposed rulemaking that would, if finalized, provide a standard for criteria for a student's eligibility to participate on sex-separate athletic teams in the future. *See* Notice of Proposed Rulemaking on Nondiscrimination on the Basis of Sex in Education Programs or Activities Receiving Federal Financial Assistance: Sex-Related Eligibility Criteria for Male and Female Athletic Teams, 88 FR 22860 (Apr. 13, 2023) (Athletics NPRM). The Athletics NPRM said a categorical ban on transgender students playing sports consistent with their gender identity would not satisfy the proposed regulation, but more targeted criteria, substantially related to sport, level of competition, and grade or education level, could be permissible. The Department is continuing to evaluate comments on that proposed regulation, and will issue its final rule on this standard for criteria for a student's eligibility to participate on sex-separate athletic teams in the future. Until that rule is finalized and issued, the current regulations on athletics continue to apply.

Changes: To clarify the scope of § 106.31(a)(2), the Department is replacing ''unless otherwise permitted by Title IX or this part'' with ''except as permitted by 20 U.S.C. 1681(a)(1) through (9) and the corresponding regulations at §§ 106.12through 106.15, 20 U.S.C. 1686 and its corresponding regulation § 106.32(b)(1), or § 106.41(b)''.

3. Participation Consistent With Gender Identity

Comments: Some commenters supported § 106.31(a)(2) because providing access to sex-separate activities and facilities consistent with a student's gender identity aligns with Title IX's statutory text and purpose of ensuring that all students have equal opportunity to participate in federally funded education programs and activities free of sex discrimination, as well as case law interpreting Title IX and other sex discrimination laws.

Other commenters asserted that there is no basis in the statutory text or case law for the principle that treating a person inconsistent with their gender identity constitutes sex discrimination. Some commenters argued that § 106.31(a)(2) effectively eliminates the sex-based distinctions that Title IX allows. Some commenters noted that the Supreme Court in *Bostock* declined to prejudge questions about ''sex-segregated bathrooms, locker rooms, and dress codes'' and did not address whether treating a person inconsistent with their gender identity constitutes sex discrimination. 590 U.S. at 681. Other commenters asserted that § 106.31(a)(2) is at odds with *United States* v. *Virginia,* which recognized that sex-based classifications are sometimes permissible because certain ''differences between men and women'' are ''enduring.'' 518 U.S. at 533.

Some commenters argued that § 106.31(a)(2) elevates protections for transgender students over other students, especially cisgender girls and women.

Some commenters asked the Department to clarify how a recipient should determine a person's gender identity for purposes of proposed § 106.31(a)(2); what medical, procedural or documentation requirements a recipient can impose on a person prior to permitting access to sex-separate facilities; and whether a recipient may require a student to disclose medical records and related information.

Some commenters asked the Department to clarify whether the prohibition on preventing students from participating consistent with their gender identity in § 106.31(a)(2) would apply to sex-separate restrooms, locker rooms, housing, classes or portions of classes, and academic programs. Many commenters expressed concern about issues such as competitive fairness and safety in school athletic programs if § 106.31(a)(2) were applied to sex-separate athletic teams. Some commenters urged the Department to modify the proposed regulations to require recipients to provide gender-neutral facilities, noting, for example, that nonbinary students may not be fully accommodated by sex-separate facilities.

Some commenters said the de minimis harm standard could result in chilling protected speech both at an individual and group association level and feared that § 106.31(a)(2) would result in compelling and restricting speech in violation of the First Amendment.

Some commenters expressed concern about the propriety of students participating in education programs and activities consistent with their gender identity. Those commenters suggested that § 106.31(a)(2) would effectively eliminate single-sex spaces and could compromise some students' privacy and safety. Some commenters urged the Department to require that all students have access to a single-occupancy restroom or changing facility, or require transgender students to use separate facilities. Other commenters argued that requiring a student to use a separate facility can be stigmatizing and could result in the disclosure of a student's transgender status. Some commenters asked whether a recipient or a student organization would violate Title IX if they offer a transgender person a private alternative to sex-separate shared spaces, to be sensitive to their needs or preferences.

Some commenters noted that § 106.31(a)(2) is consistent with case law concluding that denying a student access to a recipient's education program or activity, including extracurricular activities or facilities, consistent with their gender identity causes students harm in violation of

Title IX. Some commenters asserted that preventing students from participating in school consistent with their gender identity causes more than de minimis harm and stated that many transgender students avoid school bathrooms or other sex-separate spaces at school because they do not feel safe using them. Some commenters argued that permitting students to participate in school consistent with their gender identity positively impacts their mental health and improves educational outcomes and noted that major organizations representing medical professionals support such policies. Other commenters argued that affirming a gender identity different than a person's sex assigned at birth could do more harm than good, particularly for young children. These commenters asserted that school policies that accept students' requests to treat them consistent with a gender identity that does not align with their sex assigned at birth are harmful.

Commenters asked the Department to clarify whether proposed § 106.31(a)(2) requires recipients to allow students to live in sex-separate housing consistent with gender identity. Some commenters felt that the Department's interpretation of 20 U.S.C. 1686 in the July 2022 NPRM—to permit sex separation in living facilities even when it causes more than de minimis harm—would conflict with *Grimm*'s analysis and Title IX's statutory text. Commenters also asked how proposed § 106.31(a)(2) applies in the context of random roommate assignment programs for students.

Some commenters argued that provisions permitting separation by ''sex'' should be interpreted to focus on physiological differences between males and females to align with contemporary dictionary definitions and courts' understanding of the term. Commenters noted that the original Title IX rulemaking did not mention ''gender identity,'' and asserted that the current regulations permitting separation by sex (*e.g.,* bathrooms, locker rooms, and athletic teams) assume ''sex'' is limited to sex assigned at birth. One commenter argued that § 106.31(a)(2)'s focus on gender identity undermines the Department's statement in the July 2022 NPRM that Title IX does not depend on any particular definition of the term ''sex.'' Some commenters said that separating locker rooms, bathrooms, and shower facilities by sex assigned at birth is authorized by 20 U.S.C. 1686, citing *Adams,* 57 F.4th 791.

Discussion: The Department disagrees with commenters who assert that § 106.31(a)(2)'s articulation of a recipient's nondiscrimination obligation with respect to gender identity is inconsistent with Title IX. As explained in the July 2022 NPRM, *see* 87 FR 41535, courts have recognized that, except as otherwise provided in the statute, Title IX prohibits all sex discrimination, including gender identity discrimination in federally funded education programs and activities, and that students experience sex-based harm that violates Title IX when a recipient bars them from accessing sex-separate facilities or activities consistent with their gender identity. *See, e.g., Whitaker,* 858 F.3d at 1045–46 (discussing district court's findings, based on expert testimony, that denying transgender student's access to a sex-separate education program or activity consistent with his gender identity imposed significant harm on his mental health and overall well-being in violation of Title IX); *Grimm,* 972 F.3d at 617–18 (holding that evidence that a transgender boy suffered physical, emotional, and dignitary harms as a result of being denied access to a sex-separate program or activity consistent with his gender identity was sufficient to constitute sex-based harm prohibited under Title IX); *Bd. of Educ. Of the Highland Loc. Sch. Dist.,* 208 F. Supp. 3d at 870–71 (describing stigma and isolation and interference with learning caused by district's exclusion of transgender girl from a sex-separate education program or activity consistent with her gender identity and concluding that such harm is sufficient to demonstrate a Title IX violation).

The Department disagrees that § 106.31(a)(2) is inconsistent with Supreme Court precedent, including *Bostock* and *Virginia*. 87 FR 41532. Under *Bostock,* treating a person worse because their sex assigned at birth differs from their gender identity is sex discrimination under Title IX, just as it is under Title VII. 87 FR 41532 (citing *Bostock,* 590 U.S. at 659–62). *Bostock,* however, did not purport to address the specific question of whether sex separation in bathrooms or locker rooms ''might not qualify as unlawful discrimination or find justifications under other provisions'' of the law, 140 S. Ct. at 1753, which is the question the Department addresses here with respect to Title IX.

The Department has determined, based on a careful reading of Title IX and each of its statutory provisions, that sex separation in certain circumstances, including in the context of bathrooms or locker rooms, is not presumptively unlawful sex discrimination. However, when such separation imposes more than de minimis injury on a protected individual, *see Bostock,* 590 U.S. at 681, such as when it denies a transgender student access to a sex-separate facility or activity consistent with that student's gender identity, this would violate Title IX's general nondiscrimination mandate, 20 U.S.C. 1681. The Department recognizes, however, that the statute created exceptions to that general nondiscrimination mandate in 20 U.S.C. 1681(a)(1)–(9), and also carved out from its general nondiscrimination mandate the maintenance of sex-separate living facilities in 20 U.S.C. 1686; and Congress further recognized that the unique circumstances of athletics also merit a different approach to addressing sex discrimination in that context, as reflected in the Department's promulgation of §§ 106.41(b) and (c). Therefore, as explained above and in the July 2022 NPRM, the Department interprets those provisions to mean that, in those contexts, recipients may carry out sex-specific policies and practices in a manner that may cause more than de minimis harm to a protected individual. 87 FR 41536.

Title IX protects students from sex discrimination, including sex-based harassment, in a recipient's education program or activity, including when they access sex-separate facilities. This protection applies with equal force to all students, including transgender and nonbinary students. Under § 106.31(a)(2), a recipient must provide access to sex-separate facilities, including bathrooms, in a manner that does not cause more than de minimis harm. Title IX also prohibits sex-based harassment, including when students access sex-separate facilities. Section 106.31(a)(2) does not specify how a recipient must provide access to sex-separate facilities for students who do not identify as male or female. For nonbinary students, a recipient may, for example, coordinate with the student, and the student's parent or guardian as appropriate, to determine how to best provide the student with safe and nondiscriminatory access to facilities, as required by Title IX. Under § 106.44(a), a recipient must respond promptly and effectively when it knows of conduct that reasonably may constitute sex discrimination, including sex-based harassment, in its education program or activity, including in any sex-separate facilities.

The Department disagrees with commenters who argued that this interpretation of Title IX is inconsistent with the Supreme Court's recognition in *Virginia* that physiological differences can sometimes justify sex-based classifications. Title IX's statutory

prohibition on sex discrimination is ''narrower in some respects and broader in others'' than the substantive rights and protections guaranteed under the Equal Protection Clause. *Fitzgerald* v. *Barnstable Sch. Comm.,* 555 U.S. 246, 256 (2009). Thus, although equal protection case law may inform the Department's interpretation, the Department does not read *Virginia* as opining on the scope of Title IX's statutory exceptions. But some lessons from *Virginia* are instructive in the Title IX context. For instance, *Virginia* recognized that, unlike in the context of race or national origin classifications, some sex-based classifications may be constitutionally permissible because of enduring physical differences between the sexes. *Virginia,* 518 U.S. at 533. Like *Virginia,* § 106.31(a)(2) acknowledges that there are circumstances in which sex differentiation is not presumptively discriminatory. Nonetheless, *Virginia* goes on to hold that reliance on these generalized differences alone cannot substantiate a categorical sex-based exclusion from an education program under the Equal Protection Clause. 518 U.S. at 533. To do so would be to rely on the ''notably circular argument'' that separation on the basis of sex can serve as both an institution's discriminatory means and its justifiable end under the intermediate scrutiny analysis. *See id.* at 544–45 (''Virginia and VMI trained their argument on 'means' rather than 'end,' and thus misperceived our precedent.'').

The Department also disagrees that § 106.31(a)(2) eliminates the sex-based distinctions permitted by Title IX. As explained in the July 2022 NPRM, the Department recognizes that Title IX does not treat all sex-based distinctions as impermissible discrimination. 87 FR 41534. The Department's regulations have always recognized that recipients can separate students on the basis of sex in contexts where separation is generally not harmful, and § 106.31(a)(2) does not change that. However, consistent with Supreme Court precedent and Title IX's general nondiscrimination mandate, § 106.31(a)(2) clarifies that when such otherwise permissible sex separation causes more than de minimis harm to a protected individual—and the harm is not otherwise permitted by Title IX—such harm cannot be justified or otherwise rendered nondiscriminatory merely by pointing to the fact that, in general, there are physical differences between the sexes.

Section 106.31(a)(2)'s prohibition on preventing students from participating consistent with their gender identity applies to any circumstance in which a recipient engages in permissible sex separation or differentiation, except when more than de minimis harm is permitted by the statute. For example, the text of § 106.31(a)(2) makes clear that it does not apply to sex-separate athletic teams permitted under 34 CFR 106.41(b). As noted above, Congress made clear that the Title IX regulations should reflect the fact that athletic competition raises unique considerations and the Department's regulations have always permitted more than de minimis harm to individual students in the context of sex-separate athletic teams. On the other hand, § 106.31(a)(2) applies in contexts for which there is no statutory exception, such as sex-separate restrooms and locker rooms under § 106.33, and single-sex classes or portions of classes under § 106.34(a) and (b). The Department has always treated access to facilities and classes differently than athletics. Classes, for example, focus on learning skills and competencies and do not raise the unique issues that are present in sex-separate interscholastic or intercollegiate athletic competition. As explained in more detail below, a recipient can address any concerns about the application of § 106.31(a)(2) to contexts like classes and facilities without preventing students from participating consistent with their gender identity.

With respect to concerns that the ''de minimis harm'' standard will chill or otherwise limit protected speech, the Department reiterates that § 106.31(a)(2) generally prohibits a recipient from preventing a person from participating in school consistent with their gender identity. The provision does not in any way limit § 106.6(d), which states that nothing in the Title IX regulations requires a recipient to restrict any rights that would otherwise be protected from government action by the First Amendment; deprive a person of any rights that would otherwise be protected from government action under the Due Process Clauses of the Fifth and Fourteenth Amendments; or restrict any other rights guaranteed against government action by the United States Constitution. The Department reaffirms that a recipient may not invoke Title IX to require restricting speech, expression, or conduct in violation of the First Amendment. Similarly, the Department also underscores that none of the amendments to the regulations change or are intended to change the commitment of the Department, through these regulations and OCR's administrative enforcement, to fulfill its obligations in a manner that is fully consistent with the First Amendment and other guarantees of the Constitution of the United States. For additional information regarding Title IX and the First Amendment, see the discussion of Hostile Environment Sex-Based Harassment—First Amendment Considerations (§ 106.2).

With respect to commenters' questions about how a recipient should determine a person's gender identity for purposes of § 106.31(a)(2), the Department is aware that many recipients rely on a student's consistent assertion to determine their gender identity, or on written confirmation of the student's gender identity by the student or student's parent, counselor, coach, or teacher. However, requiring a student to submit to invasive medical inquiries or burdensome documentation requirements to participate in a recipient's education program or activity consistent with their gender identity imposes more than de minimis harm. In particular, a recipient may not require a person to provide documentation (such as an amended birth certificate or evidence of medical treatment) to validate their gender identity for purposes of compliance with § 106.31(a)(2) if access to such documentation is prohibited by law in that jurisdiction.

The Department agrees with commenters who noted the substantial harm transgender students experience when they are excluded from a sex-separate facility consistent with their gender identity, and § 106.31(a)(2) properly accounts for such harm. As detailed in the July 2022 NPRM, several Federal courts have found that excluding students from sex-separate facilities and activities consistent with their gender identity can impose significant harm on those students' mental health and overall well-being. 87 FR 41535. These findings are consistent with the guidelines published by well-established medical organizations, which say being able to live consistent with one's gender identity is critical to the health and well-being of transgender youth.[90] To the extent there are also harms associated with being treated consistent with a gender identity that

[90] *See* World Professional Association for Transgender Health, *Standards of Care for the Health of Transgender and Gender Diverse People, Version 8,* 23 Int'l J. Transgender Health S1 (2022); Jason Rafferty et al., Am. Acad. of Pediatrics, *Ensuring Comprehensive Care and Support for Transgender and Gender Diverse Children and Adolescents* 142 Pediatrics 72 (2018); Tanya Albert Henry, *Exclusionary Bathroom Policies Harm Transgender Students,* American Medical Association (Apr. 17, 2019), *https://www.ama-assn.org/delivering-care/population-care/exclusionary-bathroom-policies-harm-transgender-students.*

differs from one's sex assigned at birth, individuals (and their parents, as appropriate) are better positioned to weigh any harms and benefits for themselves than is an educational institution. Section 106.31(a)(2) therefore simply prohibits a recipient from adopting a policy or engaging in a practice that prevents a person from participating in an education program or activity consistent with the person's gender identity when that person seeks to participate consistent with their gender identity.

The Department disagrees that prohibiting more than de minimis harm in the context of sex-separate bathrooms and locker rooms would result in the elimination of the sex-based separation that Title IX allows in this context. Recipients continue to have discretion under these regulations to provide sex-separate facilities consistent with Title IX's nondiscrimination mandate; making Title IX's protections against sex-based harms explicit does not change that.

The Department also disagrees that § 106.31(a)(2) elevates protections for transgender students over cisgender students. The application of § 106.31(a)(2) is not limited to transgender students—and indeed protects all students from harm when a recipient separates or treats students differently based on sex. As explained in more detail above, § 106.31(a)(2) recognizes that students experience sex-based harm when they are excluded from sex-separate facilities consistent with their gender identity. However, based on the Department's enforcement experience, listening sessions with stakeholders, and its review of Federal case law, the Department is unaware of instances in which cisgender students excluded from facilities inconsistent with their gender identity have experienced the harms transgender students experience as a result of exclusion from facilities consistent with their gender identity.

While the Department strongly agrees that recipients have a legitimate interest in protecting all students' safety and privacy, we disagree that such goals are inconsistent with § 106.31(a)(2). As noted in the July 2022 NPRM, a recipient can make and enforce rules that protect all students' safety and privacy without also excluding transgender students from accessing sex-separate facilities and activities consistent with their gender identity. 87 FR 41535; *see also, e.g.,* Rehearing Amicus Brief of School Administrators from Twenty-Nine States and the District of Columbia in Support of Plaintiff-Appellee Gavin Grimm, *Grimm,* 972 F.3d 586 (No. 19–1952), 2019 WL 6341095. The Department disagrees that it has disregarded potential harms to cisgender students.

The Department does not agree with commenters who alleged there is evidence that transgender students pose a safety risk to cisgender students, or that the mere presence of a transgender person in a single-sex space compromises anyone's legitimate privacy interest. In many cases, Federal courts have rejected claims that treating students consistent with their gender identity necessarily harms cisgender students in violation of Title IX. For example, when plaintiffs have asserted only unsubstantiated and generalized concerns that transgender persons' access to sex-separate spaces infringes on other students' privacy or safety, courts have rejected those claims. *See, e.g., Grimm,* 972 F.3d at 626 (Wynn, J., concurring); *Whitaker,* 858 F.3d at 1052 (holding that transgender student's presence provides no more of a risk to other students' privacy rights than does the presence of any other student in a sex-separate space); *Boyertown,* 897 F.3d at 521 (same); *Parents for Priv.,* 949 F.3d at 1228–29 (holding that ''[t]he use of facilities for their intended purpose, without more, does not constitute an act of harassment simply because a person is transgender''); *Cruzan* v. *Special Sch. Dist. # 1,* 294 F.3d 981, 984 (8th Cir. 2002) (per curiam) (holding that a transgender woman's mere presence in a sex-separate space did not constitute actionable sexual harassment of her women co-workers). The Supreme Court has also rejected the notion that the preferences or discomfort of some can justify otherwise unconstitutional discrimination against others. *See City of Cleburne* v. *Cleburne Living Ctr.,* 473 U.S. 432, 450 (1985).

The Department also appreciates the opportunity to clarify that nothing in Title IX or the final regulations prevents a recipient from offering single-occupancy facilities, among other accommodations, to any students who seek additional privacy for any reason. The Department agrees with commenters that access to gender-neutral or single-occupancy facilities may be helpful for accommodating students who do not want to use shared sex-separate facilities. The Department declines the suggestion to require that recipients provide gender-neutral or single-occupancy facilities because such facilities are not the only way a recipient could provide nondiscriminatory access to its facilities. In addition, the proposal would likely carry significant cost implications and it would be appropriate to seek public comment on this issue before making any such changes. Additionally, nothing in § 106.31(a)(2) prohibits recipients from taking nondiscriminatory steps to ensure privacy and safety for all students in a recipient's sex-separate facilities—steps that many recipients already take consistent with their general codes of conduct, including rules prohibiting harassment, assault, and other forms of misconduct.

The Department has previously made clear that all students are protected from sex discrimination under Title IX, and that a recipient generally must treat transgender students consistent with their gender identity with respect to their participation in single-sex classes and activities. *See* U.S. Dept of Educ., Office for Civil Rights, Questions and Answers on Title IX and Single-Sex Elementary and Secondary Classes and Extracurricular Activities, at 25 (Dec. 1, 2014), *https://www2.ed.gov/about/offices/list/ocr/docs/faqs-title-ix-single-sex-201412.pdf.* The Department recognizes that § 106.31(a)(2) interprets Title IX differently from the 2021 Rubinstein Memorandum. The Department explained in detail in the July 2022 NPRM why it disagreed with the reasoning in that archived memorandum. *See* 87 FR 41536–37. The Rubinstein Memorandum's suggestion that Title IX requires separation according to sex assigned at birth or that treating a student inconsistent with their gender identity does not implicate Title IX is at odds with Title IX's text and purpose and the reasoning of the courts that had considered the issue. The Department reiterates that § 106.31(a)(2) is consistent with Federal case law on this point, *see, e.g., Metro. Sch. Dist. of Martinsville,* 75 F.4th 760; *Grimm,* 972 F.3d 586; *Whitaker,* 858 F.3d 1034, and to the extent some courts have come to a different conclusion, *see, e.g., Adams,* 57 F.4th 791; *Bridge* v. *Okla. State Dep't of Educ.,* No. CIV–22–00787, 2024 WL 150598, at *8 (W.D. Okla. Jan. 12, 2024); *Roe* v. *Critchfield,* No. 1:23-cv-00315, 2023 WL 6690596, at *1 (D. Idaho Oct. 12, 2023), the Department does not agree with those courts' interpretation of Title IX for the reasons that follow.

For example, in *Adams,* the Eleventh Circuit held that a school district policy preventing a transgender boy from using the boys' restroom did not violate Title IX because the Court determined that ''sex'' as used in Title IX can only refer to ''biology and reproductive function,'' not gender identity, 57 F.4th at 812–15, and that restrooms are covered by a statutory provision permitting a recipient to maintain ''separate living

facilities for the different sexes,'' *id.* at 812–15 (quoting 20 U.S.C. 1686). The Department determined that it is not necessary to resolve the question of what ''sex'' means in Title IX for the Department to conclude that no statutory provision permits a recipient to discriminate against students—*i.e.,* to subject them to more than de minimis harm—in the context of maintaining certain sex-separate facilities or activities. In particular, contrary to the reasoning in *Adams,* even if ''sex'' under Title IX were to mean only sex assigned at birth, Title IX's ''living facilities'' provision, does not permit a recipient to subject a person to more than de minimis harm on that basis in any context *except* living facilities. As explained in the July 2022 NPRM, 20 U.S.C. 1686 specifically carves out from Title IX's general statutory prohibition on sex discrimination an allowance for recipients to maintain sex-separate living facilities. 87 FR 41536; 20 U.S.C. 1686 (''Notwithstanding anything to the contrary contained in [Title IX],'' nothing in Title IX ''shall be construed to prohibit any educational institution . . . from maintaining separate living facilities for the different sexes.''). And it provides the statutory basis for the Department's housing provision at § 106.32(b)(1). But that carve-out does not apply to the remainder of § 106.32 or to any other aspects of a recipient's education program or activity for which Title IX permits different treatment or separation on the basis of sex, such as bathrooms, locker rooms, or shower facilities—regulations that the Department adopted under different statutory authority, and which have long been addressed separately from ''living facilities.'' The Department notes that when HEW adopted the original Title IX regulations, it cited section 907 of the Education Amendments (20 U.S.C. 1686) as one of the sources of its statutory authority for the housing provision, 40 FR 24141 (codified at 45 CFR 86.32 (1975)), whereas it cited only sections 901 and 902 of the Education Amendments (20 U.S.C. 1681–1682) as its statutory authority for the provision governing toilet, locker room, and shower facilities, 40 FR 24141 (codified at 45 CFR 86.33 (1975)), and the Department of Education retained those authorities when it adopted its own Title IX regulations in 1980. 45 FR 30955 (May 9, 1980) (codified at 34 CFR 106.32 and 106.33). As the statutory sources cited in the text of the regulations themselves demonstrate, a recipient's provision of separate bathrooms and locker rooms is governed not by 20 U.S.C. 1686, but by the statute's general nondiscrimination mandate, 20 U.S.C. 1681. And § 106.33 ''cannot override the statutory prohibition against *discrimination* on the basis of sex.'' *Grimm,* 972 F.3d at 618 (emphasis in the original). The *Adams'* court's reasoning therefore cannot be reconciled with Title IX's plain text and ignores that Congress could have, but did not, address anything other than the practice of maintaining sex-separate ''living facilities'' in 20 U.S.C. 1686. *See* 87 FR 41536 (''Congress's choice to specify limited circumstances where harm resulting from sex separation is permitted illustrates that, outside of those contexts, Title IX's general prohibition on sex discrimination prohibits such harm.''). The Department therefore declines to adopt the Eleventh Circuit's reasoning in *Adams* that the statutory carve out for living facilities governs the interpretation of § 106.33, the Department's regulations on bathrooms and locker rooms, or any other regulatory provision other than housing, 34 CFR 106.32(b)(1).

With respect to commenters' questions about whether § 106.31(a)(2) prohibits a recipient from excluding students from sex-separate housing consistent with their gender identity, it does not, because of the express carve-out for sex-separate living facilities under 20 U.S.C. 1686. But that is the extent of the reach of 20 U.S.C. 1686, and nothing in the statute or final regulations precludes a recipient from voluntarily choosing to adopt policies that enable transgender students to access sex-separate housing consistent with their gender identity.

Changes: None.

4. Parental Rights

Comments: Some commenters expressed concern that proposed § 106.31(a)(2) would prevent schools from respecting a parent's wishes regarding how their child should be treated and urged the Department to clarify parental rights in this context. Some commenters asserted that in most cases parents should make important decisions about their children's health and well-being, that parents are best situated to act in the best interests of their children, and that parents have a right to ''direct the upbringing and education of children under their control,'' citing *Pierce* v. *Soc'y of Sisters,* 268 U.S. 510, 534–35 (1925).

Some commenters raised questions about matters related to gender identity, including whether a recipient should comply with a request by a minor student to change their name or pronouns used at school if their parent opposes the change and whether the proposed regulations would lead to claims that a parent is mistreating a child if the parent does not affirm the child's gender identity.

Commenters also asked the Department to clarify whether it would be a potential violation of Title IX for a recipient to treat a student according to their sex assigned at birth if requested by the parents to do so; notify a student's parents of the student's gender transition or gender identity; or to deny parents access to their child's educational records, including information about their child's gender identity. Some commenters urged the Department to amend the regulations to expressly provide that a minor student's parents must be consulted before a school could begin treating a student consistent with a different gender identity.

Some commenters expressed concern that proposed § 106.31(a)(2) would conflict with State laws, like Florida's Parental Rights in Education Act, HB 1557. Some commenters asserted that proposed § 106.31(a)(2) would affect the content of a recipient's curricula and override claimed parental rights over curricula. Some commenters worried that a school board could feel pressured to include information about gender identity in the curriculum to avoid a Title IX violation and to use Title IX to justify denying parental opt-outs from lessons on gender identity.

Some commenters argued that because the proposed regulations define ''parental status'' to include a person acting ''in loco parentis,'' a school district employee could act in place of a student's parent, including regarding the student's gender identity.

Discussion: The Department acknowledges and respects the rights of parents and their fundamental role in raising their children. The Department appreciates the opportunity to clarify that nothing in the final regulations disturbs parental rights, and accordingly the Department determined that additional regulatory text regarding parental rights is not necessary to effectuate Title IX's prohibition on sex discrimination.

Indeed, as explained in the discussion of § 106.6(g), that provision reinforces the right of a parent to act on behalf of their minor child, whether their child is a complainant, respondent, or other person. Under § 106.6(g), nothing in Title IX or the final regulations may be read in derogation of any legal right of a parent, guardian, or other authorized legal representative to act on behalf of a minor child, including but not limited to making a complaint through the

recipient's grievance procedures for complaints of sex discrimination. When a parent and minor student disagree about how to address sex discrimination against that student, deference to the judgment of a parent, guardian, or other authorized legal representative with a legal right to act on behalf of that student is appropriate.

Further, nothing in these final regulations prevents a recipient from disclosing information about a minor child to their parent who has the legal right to receive disclosures on behalf of their child. For additional explanation of the final regulations' application to disclosure of information to parents of minor children, see the discussions of §§ 106.44(j) (Section II.B) and 106.6(g) (Section I.F).

Although the hypothetical factual scenarios raised by commenters require case-by-case determinations, the Department reiterates that nothing in the final regulations restricts any right of a parent to act on behalf of a minor child or requires withholding of information about a minor child from their parents. *See* §§ 106.44(j)(2), 106.6(g). A recipient can coordinate with a minor student and their parent, as appropriate, to ensure sex discrimination does not interfere with the student's equal access to its education program or activity.

The Department declines to opine on how § 106.31(a)(2) interacts or conflicts with any specific State laws because it would require a fact-specific analysis, but refers the public to § 106.6(b), which affirms that a recipient's obligation to comply with Title IX and the regulations is not obviated or alleviated by any State or local law.

In response to comments regarding curricula, the Department does not have the authority to regulate curricula and reiterates that these final regulations do not regulate curricula or interfere with any asserted parental right to be involved in recipients' choices regarding curricula or instructional materials. The explicit regulatory limitation on the Department regulating curricular materials under Title IX remains unchanged: ''Nothing in this regulation shall be interpreted as requiring or prohibiting or abridging in any way the use of particular textbooks or curricular materials.'' 34 CFR 106.42.

In response to the comments regarding the inclusion of ''in loco parentis'' in the definition of ''parental status,'' the Department appreciates the opportunity to clarify that the definition is limited to the context of §§ 106.21(c)(2)(i), 106.37(a)(3), 106.40(a), and 106.57(a)(1), which prohibit sex discrimination related to the parental status of students, employees, and applicants for admission or employment (*e.g.,* treating mothers more or less favorably than fathers). This definition does not affect the rights or status of a student's parents, authorize a recipient to act in the place of parents, or diminish parental rights. The Department further clarifies that the definition of ''parental status'' does not relate to parental rights under § 106.6(g) and does not bestow parental authority on any person. *See* discussion of the definition of ''parental status'' in § 106.2 (Section III).

Changes: None.

5. Intersection With Health Care

Comments: Some commenters expressed concern that proposed § 106.31(a)(2) could set a new medical standard of care by virtue of Title IX's application to campus health centers, teaching hospitals, and school nurses' offices. Specifically, commenters raised concerns about whether § 106.31(a)(2) would require a recipient to provide gender-affirming care.

Commenters urged the Department to exclude minor children from any ''mandates'' concerning gender transition procedures or prohibit a recipient from treating gender dysphoria in a minor student without parental involvement. One commenter suggested the Department should require rigorous gatekeeping procedures before medical interventions.

Another commenter asserted that § 106.31(a)(2) would coerce health care providers' medical care and speech and require providers to treat gender dysphoria in ways to which they have medical, ethical, or religious objections. Some commenters argued that § 106.31(a)(2)'s effect on health care violates the Religious Freedom Restoration Act, 42 U.S.C. 2000bb–1 (RFRA), and the First Amendment's Free Speech and Free Exercise of Religion Clauses.

Another commenter asked the Department to jointly consider the impact of the proposed regulations with the impact of the regulations proposed by the U.S. Department of Health and Human Services (HHS) for Section 1557.

Discussion: Title IX applies to recipients of Federal funding that operate an ''education program or activity.'' 20 U.S.C. 1681(a). When a recipient is an educational institution, all of its operations are considered covered by Title IX. *See* Public Law 100–259, 102 Stat. 28 (Mar. 22, 1988) (codified at 20 U.S.C. 1687); U.S. Dep't of Justice, Title IX Legal Manual at III.C, *https://www.justice.gov/crt/title-ix* (last visited Mar. 12, 2024) (''In the context of traditional educational institutions, it is well established that the covered education program or activity encompasses *all* of the educational institution's operations including, but not limited to, 'traditional educational operations, faculty and student housing, campus shuttle bus service, campus restaurants, the bookstore, and other commercial activities.''' (footnote omitted) (citing S. Rep. No. 64 at 17, reprinted in 1988 U.S.C.C.A.N. at 19)). Thus, for example, when a federally funded educational institution operates a health center or nurses' office, those centers and offices are part of the institution's ''education program or activity'' and are subject to the Department's Title IX regulations. For recipients that are not educational institutions, the Department's Title IX regulations apply only to any education program or activity operated by such entities.

The Department's Title IX regulations do not (and cannot) promote any particular medical treatment, require provision of particular medical procedures, or set any standard of care. As such, these regulations do not interfere with providers' exercise of their professional medical judgment. Rather, these regulations implement the nondiscrimination requirements of Title IX.

Section 1557, 42 U.S.C. 18116, prohibits discrimination on the basis of race, color, national origin, sex, age, and disability in a range of health programs and activities. While we appreciate that some recipients may be covered under both the Department's Title IX regulations and HHS' Section 1557 regulations, the Section 1557 rulemaking undertaken by HHS is outside of the scope of the Department's Title IX rulemaking. It is the Department's practice to collaborate with other Federal agencies when there may be overlapping civil rights jurisdiction, and we are committed to continuing such collaboration should it arise in the context of these two sets of regulations. The Department will provide technical assistance in the future, as appropriate.

Further, as stated in § 106.6(d), nothing in these regulations requires a recipient to restrict rights protected under the First Amendment or any other rights guaranteed against government action under the U.S. Constitution. The Department likewise interprets and applies its regulations consistent with RFRA and Title IX's exemption for educational institutions controlled by religious organizations.

Changes: None.

6. Intersection With Individuals' Religious Beliefs

Comments: Commenters raised concerns regarding the application of proposed §§ 106.10 and 106.31(a)(2) to institutions and individuals when compliance with such provisions would violate their religious beliefs.

Some commenters raised specific concerns regarding the application of the religious exemption in Title IX, with some asserting that §§ 106.10 and 106.31(a)(2) would not apply when the provisions would conflict with the religious tenets of an organization. Other commenters suggested further clarification around the religious exemption in Title IX and posed specific hypotheticals for the Department to address and affirm as falling within the religious exemption. Some commenters raised concerns that persons of faith attending or employed by non-religious schools or religious schools are unable to invoke the religious exemption. One commenter argued that declining to consider the need of such persons to freely exercise their faith would be arbitrary and capricious.

Some commenters expressed concern that requirements under § 106.31(a)(2) would potentially interfere with their constitutionally protected free speech and free exercise rights under the First Amendment. Commenters further asserted that proposed § 106.31(a)(2) would prohibit persons with traditional religious views of family and sexuality from exercising their constitutionally protected free speech and free exercise rights. One commenter also expressed concerns that the proposed regulations would compel faculty, staff, and students to speak in particular ways about sexual orientation and gender identity that may conflict with their religious beliefs, citing *Vlaming* v. *W. Point Sch. Bd.,* 10 F.4th 300, 304 (4th Cir. 2021). One commenter also asserted that these provisions would conflict with RFRA, insofar as these provisions apply to non-exempt religious schools or insofar as they require individual religious teachers, students, and visitors at secular schools to violate their religious beliefs.

Some commenters urged the Department to clarify that free speech and religious liberty protections extend to recipients and individuals and that such protections will not be altered or abridged through the final regulations or future Department guidance or practice.

Discussion: The Department is committed to enforcing Title IX consistent with all applicable free speech and religious liberty protections.

With respect to religious educational institutions, the Department agrees with commenters that §§ 106.10 and 106.31(a)(2) do not apply to an educational institution that is controlled by a religious organization to the extent that the provisions' application would not be consistent with the religious tenets of such organization. 20 U.S.C. 1681(a)(3). If an institution wishes to claim an exemption, its highest-ranking official may submit a written statement to the Assistant Secretary for Civil Rights, identifying the provisions of Title IX that conflict with a specific tenet of the controlling religious organization. 34 CFR 106.12(b).

The Department notes that that the religious exemption in Title IX applies to an ''educational institution'' or other ''entity' that is controlled by a religious organization, 20 U.S.C. 1681(a)(3); 1687(4); it does not address an individual student or employee's exercise of their religious beliefs. As commenters also noted, however, RFRA provides that the Federal government ''shall not substantially burden a person's exercise of religion'' unless the government ''demonstrates that application of the burden to the person . . . is in furtherance of a compelling governmental interest; and . . . is the least restrictive means of furthering that compelling governmental interest.'' 42 U.S.C. 2000bb–1.

The Department cannot opine on how RFRA might be applied in particular situations, including in hypotheticals suggested by commenters, because determinations about whether the application of Title IX in a particular context substantially burdens a person's exercise of religion would necessarily depend on the circumstances at hand. The Department, however, must abide by RFRA, and OCR considers RFRA's requirements when it evaluates a recipient's compliance with Title IX. An individual may also inform the Department of a burden or potential burden under RFRA by sending an email to *RFRA@ed.gov.* The Department's Office of the General Counsel, in consultation with other Department offices or Federal agencies when appropriate, will determine whether further investigation is warranted.

With regard to commenters' concerns related to the Free Speech and Free Exercise Clauses of the First Amendment, § 106.6(d) explicitly states that nothing in the regulations requires a recipient to restrict rights protected under the First Amendment or other constitutional provisions. The Department, likewise, must act in accordance with the U.S. Constitution.

Changes: None.

7. Appearance Codes

Comments: Some commenters urged the Department to clarify how Title IX and the final regulations apply to sex-specific appearance codes, including dress and grooming codes. Some commenters urged the Department to clarify whether and how sex-specific appearance codes violate Title IX and how the final regulations' prohibition in § 106.31(a)(2) on separating or treating students differently based on sex in a manner that causes more than de minimis harm applies in this context.

Commenters said that appearance codes with sex-specific requirements perpetuate sex stereotypes and contribute to sex discrimination, including sex-based harassment. Some commenters explained that dress and appearance codes are enforced disproportionately against girls and LGBTQI+ students and often restrict common Black protective hairstyles like braids, locs, hair wraps, Bantu knots, and bandanas or impose hair length requirements on students for whom wearing long hair may be an important part of their identity, including Indigenous students, Sikh students, and others.

Some commenters stated that the Department should restore and update the dress code provision in the original 1975 Title IX regulations that was rescinded in 1982. One commenter stated that the absence of a provision regarding dress codes has led many school boards and school administrators to believe that Title IX does not cover dress codes. This commenter asked the Department to provide guidance or additional regulations making clear that dress and appearance codes that include sex-based distinctions, either on their face or as enforced, are subject to Title IX. Commenters also noted that the Fourth Circuit recently held that Title IX applies to dress codes. *Peltier,* 37 F.4th at 128.

Some commenters asked the Department to offer examples of how sex-specific dress and appearance codes could violate Title IX, including with respect to sex-specific hair length requirements for boys and girls, and asked whether a sex-specific appearance code could violate the right of any students, including cisgender and transgender students.

Discussion: The Department appreciates the opportunity to clarify that sex-specific appearance codes, including sex-specific dress and grooming codes, are subject to Title IX and § 106.31(a)(2) of the final regulations. Thus, under § 106.31(a)(2),

a recipient may adopt an appearance code with some sex-based distinctions to the extent those distinctions do not cause more than de minimis harm. For example, some sex-based distinctions may be appropriate in the protective gear or uniforms a recipient expects students to wear when participating in certain physical education classes or athletic teams. On the other hand, imposing different restrictions on how boys and girls dress or appear would violate Title IX if the sex-specific restriction causes students more than de minimis harm under § 106.31(a)(2). *See, e.g., Peltier,* 37 F.4th at 130; discussions of de minimis harm standard (below and Section IV.B.1).

Although the Title IX regulations no longer include a provision explicitly addressing appearance codes as they did from 1975 until 1982, neither the Title IX statute nor the regulations contain an exception that would permit a recipient to discriminate on the basis of sex in the context of appearance codes. However, in light of comments the Department received, the Department understands the need to clarify its view of the final regulations' application to sex discrimination in the context of appearance codes.

In addition to several of the specific prohibitions in what is now § 106.31(b), the Title IX regulations that HEW originally issued in 1975 also included a specific prohibition on ''[d]iscrimination against any person in the application of any rules of appearance.'' 40 FR 24128 (codified at 45 CFR 86.31(b)(5) (1975)). In 1982, the Department removed this specific prohibition from its Title IX regulations. The corresponding **Federal Register** notice offered three reasons for the removal: (1) to permit the Department ''to concentrate its resources on cases involving more serious allegations of sex discrimination''; (2) because ''[d]evelopment and enforcement of appearance codes is an issue for local determination''; and (3) because allegedly there was ''no indication in the legislative history of Title IX that Congress intended to authorize Federal regulations in the area of appearance codes.'' U.S. Dep't of Educ., Nondiscrimination on the Basis of Sex in Education Programs and Activities Receiving or Benefiting from Federal Financial Assistance, 47 FR 32526, 32526–27 (July 28, 1982).

The Department notes that the third reason offered in the July 1982 notice was materially incomplete. Although the legislative history preceding enactment of Title IX in 1972 may not have included any discussion of appearance codes, it also did not suggest that such codes would be treated differently from other sex-based rules of student behavior and sex-based treatment of students. And although some witnesses at congressional hearings to review HEW's proposed rules in 1975 criticized the proposed regulations' prohibition on discrimination in appearance codes (and some witnesses praised it), *see Hearings Before the Subcomm. on Postsecondary Educ. of the Comm. on Educ. and Labor in the H.R., Review of Regulations to Implement Title IX of Public Law 92–318 Conducted Pursuant to Sec. 431 of the Gen. Educ. Provisions Act,* 94th Cong. 239, 250, 252, 362, 374, 450, 514–15, 609, 637 (1975), Congress did not disapprove the regulations or amend the law before the regulations, including the appearance provision, took effect in July 1975.

More importantly, although the 1982 amendment removed a specific reference to appearance codes from the regulations, it did not create a new exception or alter in any way the Title IX regulations' central prohibition on sex discrimination or the other specific prohibitions in § 106.31(b). Indeed, the Department would not have authority to take any action that creates an exception from Congress's clear prohibition on sex discrimination or that is otherwise inconsistent with Title IX.

The Departments of Justice and Education have clarified that the 1982 amendment did not exempt rules of appearance from the regulatory prohibitions on sex discrimination. *See* Statement of Interest of the United States at 13–14 & n.13, *Arnold* v. *Barbers Hill Indep. Sch. Dist.,* No. 20-cv-01802 (S.D. Tex. July 23, 2021), *https://www.justice.gov/crt/case-document/file/1419201/download; see also* Rehearing En Banc Brief for the United States as Amicus Curiae Supporting Plaintiffs-Appellees/Cross-Appellants, at 28 n.5, *Peltier,* 37 F.4th 104 (No. 20–1001(L), 20–1023), *https://www.justice.gov/crt/case-document/file/1449811/download.*

Moreover, since 1982 Federal courts, including in a recent Fourth Circuit en banc opinion, have affirmed that a recipient's enforcement of a sex-differentiated appearance code is subject to Title IX's statutory prohibition on sex discrimination. *See, e.g., Peltier,* 37 F.4th at 114, 127–31 (holding that based on the ''plain language and structure of the statute,'' Title IX ''unambiguously covers . . . sex-based dress codes,'' and remanding the case for consideration of whether the girl plaintiffs were harmed by the charter school's policy requiring only girls to wear skirts). Courts have likewise recognized that different hair length requirements for boys and girls are subject to Title IX. *See Hayden* v. *Greensburg Cmty. Sch. Corp.,* 743 F.3d 569, 583 (7th Cir. 2014) (holding that a policy requiring male basketball players, but not female basketball players, to keep their hair cut short, violated Title IX and the Equal Protection Clause); *cf. Arnold* v. *Barbers Hill Indep. Sch. Dist.,* 479 F. Supp. 3d 511, 524 (S.D. Tex. 2020) (finding under intermediate scrutiny that plaintiff had a substantial likelihood of success on his sex discrimination claim under the Equal Protection Clause challenging school district's sex-specific hair-length policy).

With respect to questions on whether and how § 106.31(a)(2) applies to all students and all appearance codes, the Department appreciates the opportunity to clarify that a recipient is barred from carrying out different treatment or separation in a manner that subjects ''any person'' to more than de minimis harm, except as permitted by Title IX.

Note that if a sex-specific requirement or set of requirements in a recipient's appearance code violate individual students' rights under Title IX, it would not be a defense for that recipient to point to a ''comparably burdensome'' requirement for other students, or to argue that the appearance code generally imposes ''equal burdens'' on both sexes, because Title IX, like Title VII, ''works to protect individuals of both sexes from discrimination, and does so equally.'' *Bostock,* 590 U.S. at 659 (finding that it is not a defense to sex discrimination under Title VII for an employer to say that it discriminates against both men and women because of sex); *see also Peltier,* 37 F.4th at 130 (rejecting the application of the ''comparable burdens'' test to a claim of sex discrimination under Title IX and citing *Bostock* for the proposition that ''[d]iscriminating against members of both sexes does not eliminate liability, but 'doubles it.'''). The Department is aware that some courts still apply a ''comparable burdens'' test to analyze Title IX claims alleging discrimination in the application of appearance codes, *see, e.g., Doe* v. *Rocky Mountain Classical Acad.,* No. 19–CV–03530, 2022 WL 16556255, at *7 (D. Colo. Sept. 30, 2022), but the Department disagrees with that test for the reasons noted in *Peltier,* 37 F.4th at 130 n.13.

The final regulations sufficiently account for discriminatory appearance codes, including both dress and grooming codes, and no further changes to the regulations are necessary.

Changes: None.

8. Juvenile Justice Facilities

Comments: Some commenters argued that, by treating youth consistent with their gender identity, the proposed regulations would increase the risk of rape and sexual assault in juvenile justice facilities, making it more difficult for such facilities to comply with applicable standards under the Prison Rape Elimination Act (PREA), and noted that the Department is obligated to thoroughly examine this potential issue along with alternatives that would minimize or avoid increased risk of sexual assaults in these facilities. The commenter noted PREA's requirement that facilities have a written policy of zero tolerance for sexual abuse and sexual harassment (28 CFR 115.311). Other commenters referenced a lawsuit alleging that a cisgender inmate was raped by a transgender inmate. Commenters also urged the Department to allow juvenile justice facilities to make placements according to sex assigned at birth.

Discussion: The Department's Title IX regulations apply to juvenile justice facilities that receive Federal funds from the Department, but they apply only to any education program or activity offered by such facilities. Further, as noted above, § 106.31(a)(2) does not apply in contexts in which different treatment that causes more than de minimis harm is ''otherwise permitted under Title IX,'' including in ''living facilities.'' 20 U.S.C. 1686. The Department recognizes that juvenile justice facilities have an obligation to protect their populations. The generalized data and anecdotal information cited by commenters do not support the commenters' conclusion that these regulations will increase the risk of rape or sexual assault at juvenile justice facilities.

Changes: None.

9. Burden on Schools

Comments: Some commenters asserted that proposed § 106.31(a)(2) would burden recipients and other entities to the extent it causes recipients to construct or retrofit facilities to protect privacy; bear administrative and increased legal costs associated with rule changes and record-keeping; monitor for sexual assaults in restroom and locker room facilities; provide lengthier trainings; seek additional assurances of religious exemptions; and forego participation in Federal student aid programs in order to avoid application of these final regulations under Title IX.

Discussion: The *Regulatory Impact Analysis* addresses costs and benefits associated with the final regulations, including those specifically attributable to § 106.31(a)(2).

Changes: None.

V. Retaliation

A. Section 106.71 Retaliation

1. General Support and Opposition

Comments: Many commenters expressed support for the proposed retaliation provisions, indicating the provisions would encourage reporting, support a safer and more welcoming environment, promote equal access to a recipient's education program or activity, be consistent with case law, and clarify and streamline the process for handling retaliation complaints, including the obligation to comply with § 106.44.

Some commenters opposed the proposed retaliation provisions to the extent the provisions would treat all retaliation as a form of sex discrimination, noting that there are motives for retaliation that do not implicate sex.

Some commenters expressed concern that the proposed changes to § 106.71 would restrict respondents' ability to defend themselves, and some commenters urged the Department to clarify that non-frivolous cross-complaints do not constitute retaliation. Other commenters noted that respondents sometimes make a retaliatory cross-complaint against a complainant, which can force the parties to interact, lengthen the process, drain the complainant's financial resources, and cause a complainant to take a leave of absence or transfer schools.

Discussion: The Department agrees that the retaliation provisions advance Title IX's nondiscrimination mandate by protecting those who exercise their rights under Title IX and participate in grievance procedures.

The Department disagrees with commenters who argued that the proposed regulations would cover conduct that does not constitute sex discrimination and confirms that is not the Department's intent. The Supreme Court in *Jackson* made clear that retaliation against a person for complaining of sex discrimination is '' 'discrimination' 'on the basis of sex''' in violation of Title IX ''because it is an intentional response to the nature of the complaint: an allegation of sex discrimination.'' 544 U.S. at 173–74. The Department agrees with commenters who noted that Title IX does not prohibit an individual from taking adverse action against a person who engaged in protected activity for legitimate, non-retaliatory reasons and that retaliation unrelated to sex is not covered by Title IX. The definition of ''retaliation'' in the final regulations at § 106.2 accounts for this by specifying that retaliation covers only those actions taken ''for the purpose of interfering'' with Title IX rights or ''because'' the person participated in the Title IX process.[91]

The Department disagrees with commenters who suggested that proposed § 106.71 would restrict a respondent's ability to defend themself, including by filing a cross-complaint. Section 106.45(e) recognizes that a respondent may make a cross-complaint and a recipient may consolidate resolution of that complaint with other complaints that arise out of the same facts or circumstances. A cross-complaint would not constitute retaliation under these regulations as long as there is another reason for the cross-complaint that is not a pretext for sex-based retaliation.

Changes: None.

2. Intersection With § 106.45(h)(5)

Comments: Some commenters supported the proposed removal of the statement in § 106.71(b)(2) of the 2020 amendments that retaliation does not include charging an individual with a code of conduct violation for making a materially false statement in bad faith during a Title IX grievance proceeding. Commenters argued that individuals should not be punished simply because their allegations cannot be substantiated. Commenters asserted that the prospect of being disciplined for making false statements under the 2020 amendments has deterred complainants from reporting sex discrimination.

Other commenters asserted that false allegations harm respondents, future complainants, and the integrity of the grievance procedures, and argued that the proposed change would make it harder to punish people who lie during a Title IX grievance procedure.

Other commenters acknowledged that the Department moved a revised version of this provision from § 106.71(b)(2) in the 2020 amendments to new § 106.45(h)(5) but asserted that differences between the language in the

[91] References to participation ''in the Title IX process'' in Section V include contexts where a person ''reported information, made a complaint, testified, assisted, or participated or refused to participate in any manner in an investigation, proceeding, or hearing under this part, including in an informal resolution process under § 106.44(k), in grievance procedures under § 106.45, and if applicable § 106.46, and in any other actions taken by a recipient under § 106.44(f)(1),'' consistent with the definition of ''retaliation'' in § 106.2.

two provisions may be confusing to non-lawyers.

Some commenters urged the Department to clarify whether it is retaliation for a recipient to discipline a student for making a false statement or for engaging in consensual sexual conduct based solely on the recipient's determination whether sex discrimination occurred.

Discussion: Section 106.71(b)(2) in the 2020 amendments provided that when a recipient charges an individual with a code of conduct violation for making a materially false statement in bad faith in the course of a Title IX grievance proceeding, such an action would not be considered retaliatory as long as the recipient did not base its determination that a person made a materially false statement in bad faith solely on the outcome of the grievance proceeding. *See* 85 FR 30084. As explained in the July 2022 NPRM, the Department proposed removing this provision in response to feedback that the framing of § 106.71(b)(2) in the 2020 amendments was confusing and could have a chilling effect on a person's willingness to participate in a recipient's grievance procedures. 87 FR 41490. Instead, the final regulations include § 106.45(h)(5), which prohibits a recipient from disciplining a party, witness, or others participating in a grievance procedure for making a false statement based solely on the recipient's determination whether sex discrimination occurred.

The Department is not persuaded by commenters who suggested that the differences between § 106.71(b)(2) in the 2020 amendments and § 106.45(h)(5) in the final regulations would cause confusion or make it harder to discipline students for lying. The Department maintains that the affirmative prohibition on discipline based solely on a determination whether sex discrimination occurred in § 106.45(h)(5) of the final regulations will be easier to understand and apply than its prior framing as an exception to a general rule permitting discipline. A recipient will still have discretion to discipline those who make false statements based on evidence other than or in addition to the outcome of the Title IX grievance procedure. For example, a recipient may rely on the same evidence presented during the grievance procedure as evidence that a person made a false statement. However, the determination that a person made a false statement cannot be based solely on the determination whether sex discrimination occurred, because a determination that sex discrimination did not occur is not a proxy for a finding that statements made were false. For example, statements alleging that particular conduct occurred may be true and still not meet the standard for prohibited ''sex-based harassment,'' because the conduct did not create a hostile environment. Or a recipient may determine that there is insufficient evidence to conclude that the alleged conduct occurred, but that does not necessarily mean that the student lied about the conduct. Conflating the determinations of whether sex discrimination occurred and whether false statements were made can have a chilling effect on participation in Title IX grievance procedures.

The Department appreciates the opportunity to clarify that disciplining someone for making a false statement or for engaging in consensual sexual conduct would violate § 106.45(h)(5) if it is based solely on the recipient's determination whether sex discrimination occurred in a Title IX grievance procedure, and it would also constitute retaliation if it otherwise meets the standards outlined in § 106.71 and the definition of retaliation in § 106.2 (*e.g.,* the recipient engaged in the discipline for purpose of interfering with the person's Title IX rights or because they participated in Title IX grievance procedures).

Changes: None.

3. Examples of Prohibited Retaliation

Comments: Some commenters expressed support for proposed § 106.71(a), stating that the examples of prohibited retaliation would encourage reporting incidents of discrimination and promote Title IX's goal of eliminating sex discrimination.

Other commenters argued that proposed § 106.71(a) is not necessary because the definition of ''retaliation'' is broad enough to cover the circumstances described in that paragraph. One commenter argued that proposed § 106.71(a) could unintentionally limit enforcement objectives, such as by preventing alcohol or drug violations from being adjudicated against a respondent when associated with a Title IX complaint.

Some commenters suggested that the Department clarify proposed § 106.71 by providing non-exhaustive examples of retaliation, such as disciplining a pregnant student seeking reasonable modifications or disciplining a complainant for conduct that the school knows or should know results from the harassment or other discrimination (*e.g.,* defending themselves against harassers or acting out in age-appropriate ways in response to trauma). Another commenter urged the Department to modify the proposed regulations to address other code of conduct violations, beyond those arising out of the same facts and circumstances, to include any information learned as a result of the Title IX grievance procedures. As an example, the commenter stated that pursuing discipline against a student for an earlier violation of a recipient's alcohol policy could deter a complainant from reporting an unrelated sexual assault. Another commenter suggested that expressly encouraging or requiring recipients to adopt amnesty policies would more directly address the policy concern than proposed § 106.71(a).

Other commenters expressed concern that proposed § 106.71(a) fails to consider recipients' interests in maintaining codes of conduct for students, including codes of conduct that reinforce a recipient's policies on sexual morality or religious observance. Commenters asserted that recipients' inability to enforce their codes of conduct for non-Title IX transgressions during the pendency of a grievance procedure could prevent schools from maintaining effective discipline among students and have negative impacts on the community.

Discussion: Proposed § 106.71(a), which largely tracks the language from the 2020 amendments, recognized that fear of being disciplined for other code of conduct violations, such as underage drinking, can be a significant impediment to a student's willingness to report incidents of sex-based harassment and other forms of sex discrimination. 85 FR 30536; 87 FR 41542. Proposed § 106.71(a) was intended to encourage reporting of sex discrimination and participation in Title IX grievance procedures by providing assurance that a recipient may not use its code of conduct to dissuade a person from exercising their rights under Title IX or to punish them for having done so.

The Department agrees with commenters who argued that initiating a disciplinary process under the circumstances described in proposed § 106.71(a) may qualify as retaliation under the definition of ''retaliation'' absent the inclusion of that paragraph in the regulations. It is valuable to remind recipients that they violate the prohibition on retaliation if they initiate a disciplinary process against a student for the purpose of interfering with Title IX rights or because the student participated in Title IX grievance procedures. However, proposed § 106.71(a) was not intended to limit the contexts in which initiating a disciplinary process could constitute retaliation. For example, disciplining a

student who filed a complaint of sexual assault for an earlier violation of a recipient's alcohol policy that did not arise from the same facts or circumstances as the assault would not meet the standard in proposed § 106.71(a). But, in this example, it could still constitute retaliation under § 106.2 if the recipient initiated such discipline for the purpose of interfering with that student's Title IX rights or because the student had filed a Title IX complaint.

Because the example in proposed § 106.71(a) does not articulate substantive requirements or limitations beyond the standard outlined in the definition of retaliation at § 106.2, the Department has removed it from the final regulations. The Department similarly removed the example of peer retaliation in proposed § 106.71(b) and instead moved the reference to peer retaliation to the first sentence of § 106.71 of the final regulations to make clear that references to retaliation include peer retaliation. However, the removal of these examples from the text of the regulations does not reflect a change in policy; it reflects the Department's determination that examples of prohibited conduct are more appropriately discussed in this preamble.

For similar reasons, the Department declines to add other examples of prohibited retaliation to § 106.71. The analysis of whether specific conduct constitutes retaliation under the final regulations requires a close examination of all the facts and circumstances. Generally speaking, a recipient engages in retaliation in violation of Title IX when it takes an adverse action against a person because they engaged in a protected activity such as exercising their rights under Title IX. For example, in the commenter's hypothetical of a recipient disciplining a student after the student sought reasonable modifications related to the student's pregnancy, OCR would generally consider discipline to be an adverse action and a request for reasonable modifications to be a protected activity. However, OCR would also need to determine whether the recipient knew about the protected activity when it initiated the discipline and whether there was a causal connection between the protected activity and the discipline. OCR would then need to determine whether the recipient had a legitimate, non-retaliatory reason for the adverse action and whether that reason was genuine or a pretext for prohibited retaliation. OCR would also consider whether any exceptions to Title IX may apply, such as a religious exemption.

Similarly, if the trauma of a sexual assault causes a complainant to engage in problematic behavior (*e.g.,* defiant or aggressive conduct, missing class), a recipient may not initiate its disciplinary process for that misconduct for the purpose of interfering with the student's rights under Title IX. And, when the recipient knows that the student has been subject to possible sex discrimination, it must offer and coordinate supportive measures as described in § 106.44(g), which may include, as appropriate, measures to address trauma, fear of retaliation, or harassment. But the prohibition on retaliation does not bar a recipient from taking disciplinary action to address the problematic behavior described above absent a retaliatory motive.

The Department recognizes that some recipients have adopted broader ''amnesty'' policies under which a recipient will not discipline students for collateral conduct related to an incident of sex-based harassment and that such policies may help encourage reporting. Nothing in the final regulations precludes a recipient from adopting a broader amnesty policy. The Department has determined, however, that Title IX does not require all recipients to adopt such amnesty policies because recipients may have legitimate nondiscriminatory reasons for enforcing their codes of conduct with respect to collateral conduct.

At the same time, the Department also notes that under § 106.44(b) of the final regulations a recipient must require its Title IX Coordinator to monitor for potential barriers to reporting information about conduct that reasonably may constitute sex discrimination under Title IX and take steps reasonably calculated to address these barriers. To the extent a Title IX Coordinator finds fear of discipline for alcohol-related infractions, for example, to be a barrier to reporting sex discrimination, a recipient may consider adopting an amnesty policy as one approach to address that barrier.

The Department acknowledges that the prohibition on retaliation could prevent a recipient from initiating a disciplinary process for alcohol or drug violations against any person (including a complainant, respondent, or witness), but only if the recipient initiates the disciplinary process for the purpose of interfering with that person's Title IX rights or because the person participated in Title IX grievance procedures. That is, a recipient may continue to enforce its code of conduct unless it has a retaliatory motive for initiating the disciplinary process.

The Department disagrees with commenters who said that proposed § 106.71(a) would negatively impact community standards or prevent a religious institution from enforcing its policies on sexual morality or religious observance. While the Department has removed the example in proposed § 106.71(a) in the final regulations, the Department confirms that the definition of retaliation in § 106.2 and the prohibition on retaliation in § 106.71 of the final regulations clearly restrict a recipient from initiating a disciplinary process only when it does so for the purpose of interfering with an individual's Title IX rights or because an individual participated in Title IX grievance procedures. The prohibition on retaliation would not prevent a recipient from enforcing its code of conduct for legitimate, nondiscriminatory reasons.

Moreover, the Department notes that Title IX does not apply to an educational institution that is controlled by a religious organization to the extent that application of Title IX would be inconsistent with the religious tenets of the organization. 20 U.S.C. 1681(a)(3); 34 CFR 106.12.

Changes: In the final regulations, the Department has removed the last sentence of proposed § 106.71 and paragraphs (a) and (b) in their entirety. The Department also added ''including peer retaliation'' after ''retaliation'' in the first sentence of § 106.71 of the final regulations. Additional changes to proposed § 106.71 are explained further below in the discussion of this provision (Other clarifications to regulatory text).

4. First Amendment

Comments: Several commenters objected to the proposed removal of the statement from § 106.71(b) of the 2020 amendments that the exercise of First Amendment rights is not a form of retaliation. Some commenters found inadequate the Department's rationale that § 106.71(b)(1) in the 2020 amendments is redundant of § 106.6(d)(1). Other commenters expressed concern that removal of this statement would chill speech on matters related to Title IX or would make Federal funding contingent on the restriction of First Amendment rights.

Commenters asserted that criticism of a recipient's Title IX policies or practices should not be considered retaliation as that approach would conflict with a party's right to defend their interests and would unconstitutionally restrict protected speech. Some commenters asserted that criticism of another student's decision

to report sex discrimination, make a complaint, or participate in a grievance procedure is constitutionally protected unless it amounts to harassment or falls under a First Amendment exception. Commenters urged the Department to clarify that the prohibition on retaliation does not require a recipient to punish students' protected speech and association, even when those First Amendment rights are exercised with retaliatory intent.

Some commenters argued that the removal of the statement that the exercise of First Amendment rights is not a form of retaliation could result in disciplining students or employees for simply choosing not to associate with an individual who made an accusation against them in violation of their First Amendment right of association. Commenters noted that, while school-sponsored student organizations may be required to comply with anti-discrimination policies as a condition of sponsorship, citing *Christian Legal Society Chapter of the University of California, Hastings College of Law* v. *Martinez,* 561 U.S. 661, 667, 682 (2010), purely private student groups may have strong associational interests against government-backed interference in their membership and leadership decisions. Commenters asserted, for example, that the right to association would protect an organization's right to exclude a person who made a complaint of sexual harassment against the leader of the organization. The commenter argued that this exclusion is protected by the right to freedom of association.

Discussion: The Department carefully considered commenters' opinions regarding protection of First Amendment rights to speech and association. The Department has long made clear that it enforces Title IX consistent with the requirements of the First Amendment, and nothing in Title IX regulations requires or authorizes a recipient to restrict any rights that would otherwise be protected from government action by the First Amendment. *See* 34 CFR 106.6(d); 2001 Revised Sexual Harassment Guidance, at 22; 2003 First Amendment Dear Colleague Letter; 2014 Q&A on Sexual Violence, at 43–44. Section 106.6(d), which was added in the 2020 amendments, appropriately and clearly states the breadth of these protections, which extend to but are not limited to the retaliation context. Further, including language regarding First Amendment protections in the retaliation provision may create the misimpression that such First Amendment protections are limited to the retaliation context. However, the removal of this language from § 106.71 of the final regulations does not represent a substantive change.

The Department agrees with commenters who asserted that merely criticizing a recipient's Title IX policies or practices or an individual's decision to participate in a Title IX grievance procedure would not alone constitute retaliation under the final regulations and that the retaliation provisions do not require or authorize a recipient to punish students who exercise their First Amendment rights. The Department also agrees with commenters that Title IX appropriately requires a recipient to address sex discrimination in its education program or activity, including conduct that constitutes sex-based harassment or retaliation under §§ 106.2 and 106.71 of the final regulations. The Department notes that other provisions also require a recipient to protect the privacy and confidentiality of personally identifiable information it obtains in the course of complying with this part. *See* §§ 106.44(j), 106.45(b)(5).

The Department interprets and applies the final regulations consistent with the First Amendment and relevant case law, including *Christian Legal Society,* 561 U.S. at 667, 682, which permits a recipient to require school-sponsored student organizations to comply with reasonable, viewpoint-neutral nondiscrimination policies regarding access to the organization as a condition of sponsorship. The final regulations do not govern ''purely private'' groups that are not part of a recipient's education program or activity (*e.g.,* operated, sponsored, or officially recognized by a recipient).

Under the final regulations, a recipient-sponsored student organization must not exclude a student for the ''purpose of interfering'' with Title IX rights or ''because'' the person participated in the Title IX process, but such an organization may exclude a student to the extent it has another reason for the exclusion that is not a pretext for sex-based retaliation or another form of unlawful discrimination; the final regulations do not otherwise regulate student association. Whether any specific instance of exclusion from a student organization constitutes retaliation would require an examination of the individual facts and circumstances.

Changes: None.

5. Requests To Clarify or Modify

Comments: Several commenters asked for clarification as to who can make a complaint of retaliation. One commenter noted that the July 2022 NPRM indicates that retaliation complaints may be made by any person ''entitled to make a complaint of sex discrimination'' and asked whether this is meant to exclude a respondent, an ally of a respondent, or a witness from making a claim of retaliation. Some commenters urged the Department to clarify that the prohibition on retaliation is intended to protect complainants from retaliation for filing a complaint and that a complainant should never be disciplined for retaliation.

One commenter asked the Department to revise proposed § 106.71 to remind recipients about their independent obligations to remedy any hostile environment related to retaliation (such as by enforcing no-contact orders) and not limit a recipient's obligation to initiate its grievance procedures. The commenter argued that this would help to keep the burden on recipients and avoid overreliance on complainants to seek enforcement.

Some commenters asked the Department to clarify what steps parents of elementary school and secondary school students can take when they fear retaliation.

Discussion: With respect to the question of who may make a retaliation complaint, as explained in the July 2022 NPRM, any of the persons specified in § 106.45(a)(2) has a right to make a retaliation complaint. 87 FR 41541. Under the final regulations, this includes a complainant; a parent, guardian, or other authorized legal representative with the legal right to act on behalf of the complainant; the Title IX Coordinator, after making the determination specified in § 106.44(f)(1)(v); or any student, employee, or person other than a student or employee who was participating or attempting to participate in the recipient's education program or activity at the time of the alleged retaliation. *See* § 106.45(a)(2). Anyone who has participated in any way in the Title IX process, including as a complainant, respondent, or a witness, may make a retaliation complaint if they believe the recipient or any other person, including a complainant, respondent, or witness, took adverse action against them because of their participation in Title IX grievance procedures. Further, any of the persons listed in § 106.45(a)(2), regardless of any participation in the Title IX process, may make a complaint of retaliation if they believe the recipient or another person has otherwise taken adverse action against them for the purpose of interfering with their Title IX rights. The Department disagrees with a commenter's suggestion that a complainant should never be

disciplined for engaging in retaliation. Each complaint of retaliation must be assessed under the relevant facts and circumstances to determine whether it meets the definition of retaliation in § 106.2.

The Department agrees with the comment that a recipient need not wait for a complaint alleging retaliation to be filed to take actions that would protect students from retaliation. Section 106.71 states: ''When a recipient has information about conduct that reasonably may constitute retaliation under Title IX or this part, the recipient is obligated to comply with § 106.44.'' Under § 106.44(f) of the final regulations, a recipient's Title IX Coordinator must take certain actions, such as to ''offer and coordinate supportive measures'' (which may include no-contact orders), § 106.44(f)(1)(ii), ''determine whether to initiate a complaint of sex discrimination'' under certain circumstances, § 106.44(f)(1)(v), and ''take other appropriate prompt and effective steps, in addition to steps necessary to effectuate the remedies provided to an individual complainant, if any, to ensure that sex discrimination does not continue or recur within the recipient's education program or activity,'' § 106.44(f)(1)(vii). The Department has determined that additional regulatory text is not necessary to further delineate this obligation.

With respect to the steps that parents of elementary school and secondary school students can take when they fear retaliation, the Department notes that they can make a complaint under the recipient's grievance procedures pursuant to § 106.45, file a complaint with OCR pursuant to § 100.7(b) (incorporated through § 106.81), or seek relief through the courts. *See Cannon,* 441 U.S. 677.

Changes: None.

6. Other Clarifications to Regulatory Text

Comments: None.

Discussion: The Department observed that the second sentence of proposed § 106.71, which would require a response when a recipient ''receives'' information about conduct that may constitute retaliation, could be read to refer only to those circumstances in which a recipient learns of retaliation from an outside source. Because that was not the Department's intent, the Department revised this sentence so that the provision accounts for any circumstances in which the recipient ''has'' information about retaliation. The Department further revised the reference to ''may constitute retaliation'' to ''reasonably may constitute retaliation under Title IX or this part'' to align with parallel references throughout the final regulations. Lastly, the Department observed that proposed § 106.71 did not address whether a recipient may use an informal resolution process to resolve a retaliation complaint; the Department therefore added language clarifying that a recipient may, as appropriate and consistent with the requirements of § 106.44(k), offer the parties to a retaliation complaint the option of an informal resolution process. The Department also added ''both'' before ''§§ 106.45 and 106.46'' in the fourth sentence to clarify that a postsecondary recipient would have to comply with both provisions when consolidating a complaint of retaliation with a complaint of sex-based harassment involving a student party.

Changes: In addition to the changes explained above in the discussion of this provision (Examples of prohibited retaliation), the Department has revised the second sentence of proposed § 106.71 to change the term ''receives'' to ''has,'' to add ''reasonably'' before ''may constitute,'' and to add ''under Title IX or this part'' after ''retaliation.'' The Department has revised the third sentence of proposed § 106.71 to add language clarifying that a recipient may, as appropriate, initiate an informal resolution process in response to a retaliation complaint. Finally, the Department added ''both'' before ''§§ 106.45 and 106.46'' in the fourth sentence.

B. Section 106.2 Definition of ''Retaliation''

1. Protected Activity

Comments: Some commenters urged the Department to clarify the activities that are protected under the definition of ''retaliation'' (*i.e.,* what constitutes a protected activity). Some commenters urged the Department to provide examples of retaliation, including retaliation against complainants, respondents, and others. One commenter noted that since ''made a complaint'' was specifically included in the proposed § 106.2, ''responded to a complaint'' should be added as well in order for the provision to be equitable to complainants and respondents.

Some commenters urged the Department to clarify that the proposed regulations would not prevent a recipient from lawfully compelling the good-faith participation of an employee or student of the recipient in a Title IX proceeding. Commenters noted that permitting an employee of a recipient to refuse to participate in any manner in a Title IX grievance procedure would be at odds with the purpose of Title IX and other obligations under the proposed regulations. One commenter stated that the Department should consider exempting an employee complainant from compelled participation in an investigation. One commenter suggested clarifying that a recipient may compel participation on the part of a non-employee who is authorized by a recipient to provide aid, benefit, or service (such as a volunteer coach). One commenter noted that, because non-participation is not considered protected activity under Title VII, many employers have policies requiring employees to participate as witnesses in Title VII investigations. The commenter noted that many recipients changed similar requirements with respect to students in response to the 2020 amendments, which has led to recipients having inconsistent policies under Title VII and Title IX on this issue and has prevented institutions from being able to conduct as thorough an investigation as possible in the Title IX context.

Discussion: With respect to comments about what constitutes a protected activity, the Department notes that the definition of ''retaliation'' at § 106.2 includes an ''interference'' clause and a ''participation'' clause, which define two types of protected activity. The interference clause prohibits an adverse action taken ''for the purpose of interfering with any right or privilege secured by Title IX'' and protects any actions taken in furtherance of a substantive or procedural right guaranteed by Title IX and its regulations. The participation clause applies when an adverse action is taken because a person ''has reported information, made a complaint, testified, assisted, or participated or refused to participate in any manner in an investigation, proceeding, or hearing'' under the Department's Title IX regulations.

The participation and interference clauses are substantially similar to parallel clauses in the retaliation provision of the original regulations implementing Title VI, 29 FR 16301 (currently codified at 34 CFR 100.7(e)), which has been incorporated in the Department's Title IX regulations since they were originally issued in 1975. The Department's interpretation and application of these clauses is consistent with the ''protected activity'' element required to establish a prima facie case of retaliation and is informed by Federal case law. *See, e.g., Grabowski,* 69 F.4th at 1121 (reporting sex-based harassment

to school employees or otherwise speaking out against sex discrimination is ''protected activity'' for purposes of Title IX retaliation claim).

In response to a commenter's request for examples of protected activities, the Department notes that a protected activity includes the exercise of any rights under the final regulations, including, for example, a complainant's or respondent's procedural rights under §§ 106.45 and 106.46, or a pregnant student's right to seek a reasonable modification under § 106.40(b)(3)(ii). Thus, prohibited retaliation would include, for example, taking an adverse action against a complainant or respondent because either appealed a determination under § 106.46(i) or against a pregnant student based on a request for time off for a pregnancy-related medical appointment.

The Department disagrees with a commenter's suggestion to add ''responded to a complaint'' to the definition of ''retaliation.'' The final regulations include ''made a complaint'' as an example because it is an action that initiates the grievance procedures. The final regulations further specify that a recipient may not retaliate against a person because ''they participated or refused to participate in any manner'' in the Title IX process, which includes responding to a complaint. The Department has therefore determined that the suggested revision would be redundant and is unnecessary.

The Department recognizes that the ''refused to participate'' clause in the proposed definition of ''retaliation'' could be read to prevent a recipient from requiring an employee to participate in Title IX grievance procedures. This language was added to the regulations as part of the 2020 amendments to protect complainants' autonomy over how their allegations are resolved. 85 FR 30122 n.547. However, the Department agrees with commenters that giving an employee of a recipient a right under Title IX to refuse to participate in Title IX grievance procedures would be at odds with the purpose of Title IX and other obligations under the final regulations. The Department has therefore revised the final regulations to clarify that the definition of ''retaliation'' does not preclude a recipient from requiring an employee or other person authorized by a recipient to provide aid, benefit, or service under the recipient's education program or activity to participate as a witness in, or otherwise assist with an investigation, proceeding, or hearing under this part. This change also resolves commenters' concerns about inconsistency with Title VII.

With respect to employee complainants, under the revised definition, an employee may decline to make a complaint under the recipient's Title IX grievance procedures and may not be penalized for that decision under §§ 106.2 and 106.71. However, the recipient's Title IX Coordinator may determine that the risk of additional acts of sex discrimination occurring if the grievance procedures are not initiated requires the Title IX Coordinator to initiate a complaint. *See* § 106.44(f)(1)(v). In such a case, the recipient may require an employee to testify as a witness in such grievance procedures.

The Department declines to extend this exception to permit a recipient to require students to participate, because students do not share the same obligation to support a recipient's compliance with Title IX as do employees and the regulations have always recognized that Title IX applies differently to students and employees because of their different roles within a recipient's education program or activity. Thus, for example, the final regulations require a recipient to require certain employees to notify the Title IX Coordinator when they have information about conduct that reasonably may constitute sex discrimination, § 106.44(c), and do not impose a similar requirement on students. Further, a recipient generally exercises control over its employees in ways that it does not with respect to students.

Under the final regulations, a recipient may not retaliate against a student (including an actual or potential complainant, respondent, or witness) for refusing to participate in Title IX grievance procedures. A recipient may, however, investigate and resolve a complaint consistent with its grievance procedures under § 106.45, and if applicable § 106.46, despite a student respondent's refusal to participate. *See, e.g.,* § 106.46(f)(4). In such a circumstance, imposing disciplinary sanctions on a respondent because the recipient determines, following the conclusion of its grievance procedures, that the respondent violated the recipient's prohibition on sex discrimination, is not itself retaliation.

Changes: In the definition of ''retaliation'' in the final regulations, we have added a sentence clarifying that nothing in the definition or this part precludes a recipient from requiring an employee or other person authorized by a recipient to provide aid, benefit, or service under the recipient's education program or activity to participate as a witness in, or otherwise assist with, an investigation, proceeding, or hearing under this part.

2. Adverse Action

Comments: Some commenters addressed what may constitute ''intimidation, threats, coercion, or discrimination'' under the ''retaliation'' definition in proposed § 106.2. Specifically, some commenters argued that terms like ''intimidation'' and ''discrimination'' could cover trivial acts of exclusion or incivility such as staring at someone. Some commenters asked whether particular actions would constitute ''intimidation, threats, coercion, or discrimination,'' such as making a comment on social media, assigning a bad grade, exclusion from a recipient's programs, writing negative letters of recommendations or assessments, and adverse hiring and promotional decisions.

Some commenters noted that the risk of retaliatory disclosure of information about a complainant can chill reporting of discrimination and urged the Department to describe when such disclosure would constitute prohibited retaliation. One commenter asked the Department to clarify whether one party's disclosure of another party's identity (or failure to remedy such disclosure) would constitute retaliation. One commenter asked the Department to clarify that it could be considered retaliatory to disclose information related to an individual's status in a protected class, such as their gender identity or sexual orientation, because of the potential for further sex-based discrimination or harassment.

Commenters urged the Department to clarify that the Title IX regulations do not compel a recipient to punish student-journalists for the exercise of their First Amendment rights. Commenters also asked how the proposed retaliation provision would apply to media organizations, including the consequence of making materially false statements and acting in bad faith.

One commenter asked the Department to clarify that disclosure of information related to Title IX findings, as part of an employee reference check, is not retaliation.

One commenter urged the Department to clarify whether and when using additional investigation and adjudication processes could constitute retaliation by the complainant or the recipient, such as pursuing a Title IX process and a Title VII process based on the same conduct.

Some commenters asked the Department to clarify that requiring a complainant to enter a confidentiality agreement as a prerequisite to accessing

their rights under Title IX, including to obtain supportive measures or initiate an investigation or informal resolution, is a form of retaliation.

Discussion: With respect to comments seeking clarification as to what constitutes ''intimidation, threats, coercion, or discrimination'' as used in the definition of retaliation at § 106.2, the Department notes that substantially similar terms have been incorporated in the Department's Title IX regulations since they were originally issued in 1975, and these precise terms appeared in § 106.71 of the 2020 amendments. The Department's interpretation and application of these terms is consistent with the ''adverse action'' element required to establish a prima facie case of retaliation and is informed by Federal case law. *See, e.g., Ollier* v. *Sweetwater Union High Sch. Dist.,* 768 F.3d 843, 868 (9th Cir. 2014) (''Under Title IX, as under Title VII, the adverse action element is present when a reasonable person would have found the challenged action materially adverse, which in this context means it well might have dissuaded a reasonable person from making or supporting a charge of discrimination.'' (internal citations omitted)).

The Department disagrees that terms like ''discrimination'' or ''intimidation'' suggest trivial acts of exclusion or incivility. Courts have used those terms in describing prohibited retaliation, *see e.g., Jackson,* 544 U.S. at 173–74 (retaliation is a ''form of 'discrimination' because the complainant is being subjected to differential treatment''); *White* v. *Gaston Cnty. Bd. of Educ.,* No. 3:16cv552, 2018 WL 1652099, at *13 (W.D.N.C. Apr. 5, 2018) (''The record is replete with examples of intimidation''). The Department agrees with commenters that, depending on the facts, making adverse assessments or hiring and promotional decisions; lowering a student's grades, making threats or disclosing confidential information on social media; or excluding someone from an education program could constitute intimidation, threats, coercion, or discrimination that, if taken for the purpose of interfering with a person's Title IX rights or because of a person's participation in Title IX grievance procedures, would constitute retaliation under the final regulations. Whether a particular action is adverse in any given case would require a fact-specific analysis of how the action would affect a reasonable person in the complainant's position. *Cf. Burlington,* 548 U.S. at 71 (holding jury could reasonably conclude that the reassignment of responsibilities would have been materially adverse to a reasonable employee based on evidence that new position was ''more arduous and dirtier,'' required fewer qualifications, and original position ''was objectively considered a better job''). *Compare Polite* v. *Dougherty Cnty. Sch. Sys.,* 314 F. App'x 180, 183–84 (11th Cir. 2008) (transferring a teacher to another school where he had the same responsibilities, earned the same pay, and got along well with the principal was not sufficiently adverse), *with Johnson* v. *Watkins,* 803 F. Supp. 2d 561, 574 (S.D. Miss. 2011) (transferring a literacy coach from a middle school to an elementary school was adverse when it entailed more work, less independence, greater out-of-pocket expenses, and a younger age group that was outside the literacy coach's area of expertise).

In response to questions concerning when a disclosure of information may constitute retaliation, the Department agrees with commenters that disclosure of certain information, including, for example, information about a person's LGBTQI+ status or pregnancy or related condition, can be harmful and chill reporting of incidents of discrimination. Deliberately disclosing or threatening to disclose such confidential information about a person would therefore constitute an adverse action. Such disclosures may violate the prohibition on retaliation, including peer retaliation, when they are taken for the purpose of interfering with a person's Title IX rights or because of a person's participation in Title IX grievance procedures. The Department notes that other provisions also require a recipient to protect the privacy and confidentiality of personally identifiable information it obtains in the course of complying with this part. *See* §§ 106.44(j), 106.45(b)(5).

The Department agrees with commenters that the Title IX regulations do not require or authorize a recipient to punish students, including student-journalists, for the exercise of their First Amendment rights. *See* 34 CFR 106.6(d). The Department further notes that the Title IX regulations apply to education programs and activities that receive Federal financial assistance from the Department and generally would not apply to media organizations unless they are part of a recipient's education program or activity (*e.g.,* operated, sponsored, or officially recognized by a recipient).

The Department appreciates the opportunity to clarify that when a student or employee whom a recipient has determined engaged in sex discrimination transfers to another recipient institution, the final regulations do not prohibit the first recipient from informing the other recipient of the misconduct and doing so does not constitute retaliation if the recipient has a legitimate nondiscriminatory reason. *See* § 106.6(e) discussion of Interaction between Title IX and FERPA Regarding the Disclosure of Information that is Relevant to Allegations of Sex Discrimination and Not Otherwise Impermissible; § 106.44(j). A recipient does not, however, have an affirmative obligation to disclose such information under Title IX or this part.

The Department also appreciates the opportunity to clarify that initiation of a disciplinary process or filing of a complaint outside the Title IX context could constitute retaliation if these actions meet the standards in § 106.71 and the definition of ''retaliation'' or ''peer retaliation'' in § 106.2 in the final regulations. Such actions would only constitute retaliation if taken for the purpose of interfering with a person's rights under Title IX or because they participated in Title IX grievance procedures and the recipient lacks another reason for the action that is not a pretext for sex-based retaliation.

With respect to the comment on the permissibility of confidentiality agreements, § 106.45(b)(5) requires a recipient to take reasonable steps to protect the privacy of the parties and witnesses during the pendency of the grievance procedures, in recognition of the fact that a party's improper disclosure of information could compromise the fairness of the grievance procedures. Section 106.45(b)(5) also specifies, however, that those steps must not ''restrict the ability of the parties to: obtain and present evidence, including by speaking to witnesses, subject to § 106.71; consult with their family members, confidential resources, or advisors; or otherwise prepare for or participate in the grievance procedures.'' Further, requiring a student to sign a confidentiality agreement as a prerequisite to obtaining supportive measures, initiating an investigation or an informal resolution, resolving a complaint (formally or informally), or exercising any other rights under the final regulations could constitute retaliation if it is done for the purpose of interfering with Title IX rights or because the student participated in the Title IX process in any way.

Changes: None.

3. Causal Connection

Comments: One commenter asked the Department to clarify the phrase ''for the purpose of interfering with any right or

privilege secured by Title IX'' in both proposed §§ 106.2 and 106.71. Another commenter urged the Department to remove this phrase because students do not typically have access to evidence of a decisionmaker's state of mind to prove that the students were disciplined for this purpose. The commenter also noted that recipient officials who punish complainants may instead rely on sex stereotypes.

Another commenter argued that retaliatory motive is redundant because intimidation, threats, coercion, and discrimination against someone participating in Title IX grievance procedures would always violate Title IX.

Discussion: In response to commenters' request that the Department clarify or remove the phrase ''for the purpose of interfering with any right or privilege secured by Title IX,'' the Department notes that this standard has been incorporated in the Department's Title IX regulations since they were originally issued in 1975. The requirement to establish retaliatory motive is a core element of a retaliation claim. *Jackson,* 544 U.S. at 173–74 (retaliation ''is discrimination 'on the basis of sex' because it is an intentional response to the nature of the complaint: an allegation of sex discrimination''); *Mercy Cath. Med. Ctr.,* 850 F.3d at 564 (requiring proof of causal connection between recipient's adverse action and plaintiff's protected activity to establish retaliation).

Although a student may not have evidence of a decisionmaker's state of mind, a retaliatory motive may be established through either direct evidence (*e.g.,* a written or oral statement demonstrating the action was taken for the purpose of interfering with Title IX rights) or circumstantial evidence (*e.g.,* changes in the recipient's treatment of the complainant following the protected activity, the time span between when the individual engaged in a protected activity and when the recipient took the adverse action, different treatment of the complainant compared to other similarly situated individuals, deviation from established policies or practices). To the extent a recipient takes adverse action against a student based on sex stereotypes, the recipient violates the prohibition on sex discrimination based on sex stereotypes in § 106.10 and, depending on the context, may also violate the prohibition on bias and conflict of interest in § 106.45(b)(2) in the final regulations.

The Department disagrees with commenters who asserted that retaliatory motive is a redundant or unnecessary element of the definition of ''retaliation.'' Although intimidation, threats, coercion, and discrimination against a participant in a grievance procedure always raise concerns, to establish an adverse action constitutes retaliation, there must be a causal connection to the protected activity: the adverse action must have been taken ''because'' an individual engaged in a protected activity or for the purpose of interfering with a protected activity. For example, when a student participates in Title IX grievance procedures, and then an employee of the recipient denies that student's application to participate in a study abroad program, the student may believe the recipient took that action in retaliation for their participation in the grievance procedures. The denial would constitute retaliation if, for example, the employee knew the student had participated in Title IX grievance procedures and denied the student's application to punish them for participating. If, on the other hand, the employee was not aware of the student's participation in Title IX grievance procedures or the recipient had a legitimate, non-retaliatory reason for denying the application (*e.g.,* the program was already at capacity at the time the student applied), then the denial would not constitute retaliation.

Changes: None.

4. Other Clarifications to Regulatory Text

Comments: None.

Discussion: In the first sentence of the definition of ''retaliation'' in § 106.2, the Department reordered the list of persons or entities who can be alleged to have engaged in retaliation for clarity. The Department also revised a reference to ''other appropriate steps taken by a recipient in response to sex discrimination under § 106.44(f)(6)'' to align with revisions to the text and structure of § 106.44(f) in the final regulations. *Changes:* In the first sentence of the definition of ''retaliation'' in § 106.2, the reference to ''recipient'' has been moved to precede ''student'' and the reference to an ''employee'' has been combined with ''or other person authorized by the recipient to provide aid, benefit, or service under the recipient's education program or activity.'' The description of and reference to § 106.44(f)(6) has been revised to cover ''other actions taken by a recipient under § 106.44(f)(1).''

C. Section 106.2 Definition of ''Peer Retaliation''

Comments: Some commenters appreciated that the proposed regulations would clarify that prohibited retaliation includes retaliation by students against other students. Other commenters asserted that a recipient should not be responsible for the actions of students or student groups that are not sponsored by the recipient. Some commenters argued that explicit coverage of peer retaliation is unnecessary, as it is covered by other provisions in the regulations. One commenter asked whether the Department intentionally excluded retaliatory harassment from the proposed definition of ''peer retaliation.'' Some commenters urged the Department to include a more detailed description of what constitutes ''peer retaliation'' and how it differs from ''retaliation'' by a recipient.

Some commenters asked the Department to consider broadening the proposed definition of ''peer retaliation'' to cover retaliation among a recipient's employees. Another commenter noted that coverage of peer retaliation by non-supervisory employees would differ from parallel legal obligations under Title VII.

One commenter suggested that the proposed definition of ''peer retaliation'' could also extend to adult agents acting on behalf of the student, such as parents or guardians.

One commenter worried that coverage of peer retaliation would be burdensome and unworkable if recipients are expected to monitor students' interactions, including on social media platforms.

One commenter warned that, absent a clear definition of peer ''coercion'' or ''discrimination,'' mere criticism against, or ostracism of, an individual filing a claim or participating in a Title IX procedure could be considered peer retaliation and violate students' First Amendment rights.

One commenter urged the Department to restrict a recipient's responsibility for addressing peer retaliation to instances when the recipient has actual knowledge of retaliation and responds with deliberate indifference.

Discussion: The Department agrees with commenters who stated that Title IX prohibits discrimination by recipients but disagrees that recipients have no responsibility to address retaliatory misconduct by students or student groups. As explained in more detail in the discussion of § 106.44(a), a recipient with knowledge of conduct that reasonably may constitute sex discrimination in its education program or activity, whether engaged in by students, employees, or other individuals, must respond promptly and effectively. Also, as explained in the July 2022 NPRM, retaliation by peers could limit or deny a student's access to

the recipient's education program or activity on the basis of sex. 87 FR 41540. The Department determined it needed to clarify the standards applicable to student-to-student retaliation based on feedback received during the June 2021 Title IX Public Hearing, which highlighted the pervasiveness of peer retaliation against those who participate in a recipient's grievance procedures under Title IX. 87 FR 41540.

The Department recognizes that conduct that meets the definition of peer retaliation may sometimes also constitute sex-based harassment under the final regulations. The elements for establishing peer retaliation and sex-based harassment are not the same, even though both are ultimately forms of sex discrimination. To fully implement Title IX, a recipient must address such conduct whether it meets the definition of ''sex-based harassment,'' ''peer retaliation,'' or both. While the definitions of ''peer retaliation'' and ''sex-based harassment'' do not explicitly reference one another, if sex-based harassment between students is undertaken for the purpose of interfering with Title IX rights or because the person participated in the Title IX process, such conduct would also be peer retaliation. For example, to constitute ''peer retaliation'' under the final regulations, conduct must be undertaken for the purpose of interfering with Title IX rights or because the person participated in some way in Title IX grievance procedures. In contrast, hostile environment ''sex-based harassment'' between peers is unwelcome sex-based conduct that, based on the totality of the circumstances, is subjectively and objectively offensive and so severe or pervasive that it limits or denies a person's ability to participate in or benefit from the recipient's education program or activity. Under the final regulations, recipients have an obligation to address both.

With respect to requests to provide more detail about what constitutes peer retaliation, the Department notes that the definition of ''peer retaliation'' applies the longstanding understanding of retaliation (*i.e.,* actions taken for the purpose of interfering with any right or privilege secured by Title IX) to the specific context of retaliation by a student against another student. The July 2022 NPRM included examples of such conduct, such as teammates vandalizing a student's locker because he complained to school administrators about unequal opportunities for girls or a student council president threatening to remove a member from a committee if they serve as a witness in a Title IX investigation of the president's friend. 87 FR 41540.

The Department acknowledges commenters' concern about employees who may retaliate against one another in ways that constitute sex discrimination. Although the Department determined it needed to clarify in the text of the regulations that the prohibition on retaliation applies to student-to-student retaliation, as discussed above, it is not necessary to do so for employee-to-employee retaliation, which is covered under the definition of ''retaliation'' in § 106.2 and prohibited by § 106.71, as well as under Title VII. The Department therefore declines the suggestion to revise the final definition of ''peer retaliation'' to cover employee-to-employee retaliation.

The Department declines to expressly extend the final definition of ''peer retaliation'' to adults acting on behalf of a student as a recipient may lack control over the context of retaliation that takes place between individuals who are not recipient employees, students, or applicants. To the extent a recipient is aware of anyone engaging in harassment or retaliation toward a student, the recipient must respond consistent with its obligation under final § 106.44, which may include providing supportive measures or investigating a complaint.

With respect to commenters' concern about the burden of monitoring for or responding to allegations of peer retaliation, the Department notes that recipients are not required to investigate allegations of peer retaliation that, even if proven, would not meet the definition of ''peer retaliation.'' *See* § 106.45(d)(iv). And, because retaliation is a form of sex discrimination, a recipient's duty with respect to peer retaliation is to respond only to conduct that ''reasonably may'' meet the definition. Further, the Department does not expect a recipient to monitor students' interactions on social media platforms. However, to the extent a recipient has information that students are threatening and intimidating each other to dissuade them from exercising their rights under Title IX a recipient must take action to address that conduct to preserve an educational environment free from sex discrimination.

The final definitions of ''retaliation'' and ''peer retaliation'' are not intended to restrict any rights that would otherwise be protected from government action by the First Amendment. *See* 34 CFR 106.6(d)(1). Any students, including complainants and respondents, may make a complaint of peer retaliation. The Department appreciates the opportunity to clarify that merely criticizing another student's decision to participate in Title IX grievance procedures would not alone constitute peer retaliation under the final regulations. The final retaliation provisions do not require or authorize a recipient to punish students who exercise their First Amendment rights to speech and association.

The Department declines the suggestion to restrict a recipient's responsibility for addressing peer retaliation to instances when the recipient has actual knowledge of retaliation and responds with deliberate indifference. The Department similarly declined to apply the actual knowledge requirement to claims of retaliation in the 2020 amendments, because ''the Supreme Court [had] not applied an actual knowledge requirement to a claim of retaliation.'' 85 FR 30537. The Department agrees with that logic and also declines to apply the actual knowledge and deliberate indifference standards to retaliation for the same reasons it declines to apply those standards to sex-based harassment, as explained in more detail in the discussion of § 106.44(a).

Changes: None.

VI. Outdated Regulatory Provisions

A. Section 106.3(c) and (d) Self-Evaluation

Comments: While recognizing that the proposed regulations would eliminate the self-evaluation procedures in § 106.3(c) and (d) because they are outdated, some commenters noted that similar provisions for self-evaluation remain important options for future Title IX regulations or guidance.

Discussion: Although the Department appreciates that provisions requiring self-evaluation may be an option for future regulations, the Department did not propose such provisions in the July 2022 NPRM. The Department removed § 106.3(c) and (d) from the final regulations because they described requirements that are no longer operative.

Changes: None.

B. Sections 106.2(s), 106.16, and 106.17 Transition Plans

Comments: While recognizing that the proposed regulations would eliminate the transition plan requirements in §§ 106.2(s), 106.16, and 106.17 because they are outdated, some commenters noted that similar provisions for transition plans remain important options for future Title IX regulations or guidance. Other commenters speculated that the removal of these provisions related to the Department's proposal to

clarify that Title IX prohibits gender identity discrimination.

Discussion: Although the Department does not disagree that provisions requiring transition plans may be an option for other Title IX regulations in the future, the Department maintains that the provisions requiring transition plans in §§ 106.2(s), 106.16, and 106.17 are outdated, and that no similar transition plan provisions are required by these final regulations.

The removal of these provisions does not relate to Title IX's coverage of gender identity discrimination. These provisions governed the transition of certain single-sex institutions to coeducational institutions in the years immediately following adoption of the original Title IX regulations in 1975. The Department removed §§ 106.16 and 106.17 from the final regulations because they describe requirements that are no longer operative or necessary. The Department removed § 106.2(s) from the final regulations because it defined a term that, with the removal of §§ 106.16 and 106.17, is no longer included in the regulations. In addition, the authority for Title IX's coverage of gender identity discrimination is explained in the discussion of § 106.10 above.

Changes: None.

C. Section 106.41(d) Adjustment Period

Comments: One commenter was concerned that because the Department did not propose replacing § 106.41(d) with a different adjustment period, any interpretation of Title IX's application to athletics in the final regulations would take effect immediately.

Discussion: Current § 106.41(d) required recipients to come into compliance with the original athletic regulations within three years of the date those regulations became effective in 1975. The Department removed § 106.41(d) from the final regulations because that adjustment period has passed and so the provision it is no longer operative.

These final regulations do not include any changes to other provisions governing athletics.

The effective date for other provisions amended in these final regulations is addressed in the discussion of Effective Date and Retroactivity (Section VII.F).

Changes: None.

VII. Miscellaneous

A. General Support and Opposition

Comments: Many commenters expressed overall support for the proposed regulations, stating that they are necessary to effectuate the broad purpose and goals of Title IX; would realign Title IX with its core tenets; would streamline, strengthen, standardize, and update Title IX protections; and would ensure equitable Title IX enforcement. Other commenters expressed support for the proposed regulations because they believed the regulations would improve the Title IX complaint process, including by providing more effective and equitable practices for responding to sex-based harassment. Commenters identified how the proposed regulations would protect students, especially students from vulnerable or marginalized groups, from the negative short- and long-term effects of sex discrimination, including by providing an optimal educational environment in which students and others feel safe, keeping students in school and improving their future livelihoods, improving students' mental, emotional, and physical health, and teaching students to be better citizens. Some commenters expressed the belief that the proposed regulations are necessary to protect civil rights from infringement by States and balance the need for oversight with the burden on recipients while also protecting freedom of expression and freedom of religion and respecting the separation of church and state.

Many commenters also expressed general opposition to the proposed regulations. For example, some commenters opposed the proposed regulations on the grounds that the regulations are unclear, vague, ambiguous, and impose open-ended standards on recipients.

Some commenters asserted that the proposed regulations would interfere with teacher-parent relationships and increase a teacher's role in a disproportionate way. Some commenters believed that the proposed regulations increased liability for recipients, for example, due to non-compliance by teachers and other staff, without increasing protections for employees. One commenter asserted that the open-ended nature of the proposed regulations incentivized recipients to err on the side of over-enforcing Title IX at the expense of students, faculty, and staff so recipients do not lose Federal funds.

Some commenters claimed that the Department should stay out of education policy, and instead let education be handled by State or local governments, including school boards. Some commenters believed that the proposed regulations would create hostility between recipients and their staff. Some commenters further characterized the proposed regulations as distracting from what the commenters perceived as the traditional goals of education, like teaching core subjects and training students for future careers.

Discussion: The Department acknowledges the commenters' variety of reasons for expressing support for the proposed regulatory amendments. To the extent commenters expressed general support related to specific provisions of the regulations, those comments are addressed in the sections dedicated to those regulatory provisions in this preamble.

The Department similarly acknowledges commenters for sharing their diverse reasons for opposing the regulations. However, the Department has determined that the greater clarity and specificity of the final regulations will better equip recipients to create and maintain school environments free from sex discrimination. The Department developed the proposed and final regulations based on an extensive review of its prior regulations implementing Title IX, as well as the live and written comments received during a nationwide virtual public hearing and numerous listening sessions held with a wide variety of stakeholders on various issues related to Title IX. The Department understands the concerns voiced by some commenters that the proposed regulations were vague or unclear and the Department acknowledges commenters who shared feedback on proposed provisions that they believed required clarification. The Department considered those comments in the context of the specific provisions in which they were raised, and has, when appropriate, revised regulatory text or addressed commenters' concerns in the preamble. *See, e.g.,* discussion of Hostile Environment Sex-Based Harassment–First Amendment Considerations (Section I.C). The Department also acknowledges the numerous commenters during the virtual public hearing and listening sessions who described the need for students and recipients to have a clear understanding of their rights and obligations under Title IX, and the Department specifically considered these commenters' concerns while drafting the final regulations. To that end, the Department, among other things, has identified bases of prohibited sex discrimination, *see* § 106.10, has specifically articulated the duties of recipients' employees, *see* § 106.44, and has provided detailed grievance procedures for recipients to follow in addressing complaints, *see* §§ 106.45 and 106.46.

The final regulations do not interfere with teacher-parent relationships, and the Department further discusses parental rights in the section below on parental rights. Regarding the appropriate role for teachers and concerns about overenforcement, the Department notes that the final regulations at § 106.8(d) require annual Title IX training for employees so they can adhere to the regulations' requirements. Further, teachers' duties under § 106.44 are generally limited to reporting to the recipient's Title IX Coordinator information about conduct that reasonably may constitute sex discrimination under Title IX. Finally, the Department disagrees that the obligations placed on employees go beyond what Title IX requires. The statute broadly prohibits discrimination on the basis of sex in federally funded education programs and activities, and the Department—in an exercise of its authority to implement the statute under 20 U.S.C. 1682—has determined that requiring employees to identify and report sex discrimination is necessary to effectuate that prohibition.

Responding to concerns about the Department overstepping its role, the Department emphasizes that Congress, through the passage of Title IX, concluded that the Federal government must address sex discrimination in a recipient's education program or activity regardless of traditional local and State control of education policy in general. The Department is implementing that congressional mandate. 20 U.S.C. 1682. Nothing in the final regulations requires schools to teach particular subjects or use particular curricula. 34 CFR 106.42. In the Department's experience, recipients have been able to implement Title IX regulations without engendering hostility in their staff, and the commenter did not explain why this would change under the final regulations. Likewise, the Department disagrees that the regulations distract from what the commenters perceived as the traditional goals of education; to the contrary, as noted above and underscored throughout this preamble, the Department drafted these final regulations with the benefit of the input of hundreds of thousands of stakeholders through the public comment process and the final regulations are consistent with the Department's statutorily mandated role in effectuating Title IX.

Changes: None.

B. Parental Rights—Generally

Comments: Numerous commenters expressed opposition to the proposed regulations because they believed that the proposals would negatively impact or eliminate parental rights. Commenters expressed various reasons, including that they believed the proposed regulations would: interfere with parents' rights to raise their children, keep them safe, and instill their moral values; interject the Department's values into family matters; erode the traditional family structure; prevent parents from deciding their children's curricula and accessing information about their children; usurp parental control over their children's off-campus conduct; give children too much autonomy to make major life decisions without parental input; and allow recipients to ignore parents' wishes. Some commenters asserted that the proposed regulations would disrupt their children's education because families would leave the public education system, and some commenters believed the proposed regulations would expose parents to investigations, reprimands, and criminal penalties.

Some commenters argued that the proposed regulations would be contrary to case law holding that parental rights are fundamental rights and would violate parents' liberty interests under the Due Process Clause of the Fourteenth Amendment. Some commenters also felt that the proposed regulations would exceed the scope and intent of Title IX because Congress did not authorize the Department to diminish parental rights.

Finally, many commenters objected to the proposed regulations on religious grounds and asserted that the proposed regulations would violate parents' First Amendment rights by preventing parents from instilling religious values in their children and by forcing parents to approve of behavior that violates their religious tenets.

Discussion: The Department disagrees with commenters' views that the final regulations diminish parental rights and appreciates the opportunity to emphasize the importance of strong and effective partnerships between recipients and parents, guardians, or caregivers and to clarify the ways the final regulations safeguard those interests. When developing these final regulations, the Department carefully considered commenters' input regarding parental rights. For example, § 106.6(g) affirms that the regulations do not interfere with a parent's right to act on behalf of their minor child, § 106.44(j)(2) permits disclosures of information obtained in the course of complying with this part to a minor student's parent, and § 106.40(b)(3) recognizes a recipient's duty to take actions to prevent discrimination and ensure equal access upon notification by a parent of a minor student's pregnancy or related conditions.

The Department disagrees that the final regulations interfere with parents' rights to raise their children, keep their children safe, and instill their moral values; erode family structures; or interject the Department's values into family matters. To the contrary, the scope of these final regulations is limited to Title IX, and commenters' claims that these regulations will harm students, undermine or dictate family moral values, or erode traditional family structures are speculative and without supporting evidence. A nondiscriminatory and safe educational environment for all students and educators supports all students and their families. Further, the Department disagrees that these final regulations advance specific ideologies or moral values other than the broad nondiscrimination principle that Congress enacted in Title IX. Rather, the final regulations clarify the scope and application of Title IX's protections against sex discrimination. The Department acknowledges commenters' concerns about families potentially withdrawing students from school due to the final regulations, but this concern is speculative and would not necessarily be a direct consequence of the rule.

Commenters did not specify which proposed provisions would allegedly give children autonomy to make major life decisions without parental input or allow recipients to ignore parents' wishes. In any event, the Department notes that § 106.6(g), which, as explained in the discussion of that provision, only had a small number of clarifying revisions to the text of the 2020 amendments, states that these final regulations do not derogate legal rights of parents to act on behalf of their child and notes that nothing in these regulations confers parental rights to any person or recipient. The Department's final regulations do not impose criminal penalties on parents or include provisions related to investigations or reprimands of parents. Moreover, nothing in the regulations holds parents vicariously liable for the actions of their children or requires a recipient to investigate a parent whose student is a respondent in a grievance proceeding.

With regard to claims that the regulations undermine parents' rights to decide their children's curricula and to access information about their children, the Department does not regulate curricula and disagrees that the

regulations interfere with any established parental right to be involved in recipients' choices regarding curricula or instructional materials. The explicit limitation in the Title IX regulations regarding the Department regulating curricula remains unchanged: ''Nothing in this regulation shall be interpreted as requiring or prohibiting or abridging in any way the use of particular textbooks or curricular materials.'' 34 CFR 106.42. Further, as explained with respect to § 106.6(g) and elsewhere in this preamble, nothing in these regulations derogates a parent's FERPA right to review and inspect the education records of their children or interferes with teacher-parent communication.

Additionally, the Department disagrees with commenters' assertion that the final regulations interfere with control over off-campus conduct, and some commenters' reliance on *Mahanoy* to support that assertion is misplaced. *Mahanoy* did not reach the issue of a recipient's authority to discipline students for online conduct that creates a sex-based hostile environment on campus. Indeed, the Court suggested that the longstanding *Tinker* standard that schools can regulate speech that materially disrupts classwork, creates substantial disorder, or invades the rights of others—including ''harassment''—may apply to off-campus or online speech in certain circumstances. *Mahanoy,* 141 S. Ct. at 2045–46. Nonetheless, nothing in these final regulations derogates parental control over their child's off-campus conduct. *See* discussion of definition of Hostile Environment Sex-Based Harassment (Section I.C).

The commenters cited several other cases that implicate various parental rights. For example, some commenters cited *Pierce* v. *Society of Sisters,* 268 U.S. 510 (1925), in which the Supreme Court recognized the ''liberty of parents and guardians to direct the upbringing and education of children under their control.'' Id. at 534–35 (citing *Meyer* v. *Nebraska,* 262 U.S. 390 (1923)). Commenters likewise cited *Wisconsin* v. *Yoder,* 406 U.S. 205, 234 (1972), in which the Supreme Court concluded that a compulsory schooling law violated the Free Exercise Clause of the First Amendment because it conflicted with the religious beliefs of the Amish community to which it had been applied. Nothing in the final regulations prevents parents from sending their children to any particular educational institution or educating them in any particular subject, nor does anything in the final regulations otherwise violate the liberty interest recognized in *Meyer* and *Pierce* or the Free Exercise rights recognized in *Yoder.* Likewise, commenters also cited *Cleveland Board of Education* v. *LaFleur,* 414 U.S. 632, 639–40 (1974), in which the Supreme Court held invalid a local school board requirement that pregnant schoolteachers take unpaid leave for a specific period of time, recognizing ''freedom of personal choice in matters of marriage and family life'' under the Due Process Clause of the Fourteenth Amendment. The Department emphasizes that nothing in the final regulations interferes with personal choice in matters of family life, and these final regulations support the personal choices of pregnant teachers. Indeed, parents remain free to send their children to institutions that, because of their religious tenets, are exempt from certain applications of the regulations, *see* 34 CFR 106.12, and the Department's regulations provide that they ''shall [not] be interpreted as requiring or prohibiting or abridging in any way the use of particular textbooks or curricular materials,'' *see* 34 CFR 106.42. Thus, the Department maintains that these final regulations are consistent with the First and Fourteenth Amendments and throughout this preamble has reminded recipients of their obligations to respect rights protected by the U.S. Constitution.

Moreover, nothing in the final regulations encroaches on a parent's right to determine who is fit to obtain visitation rights with a parent's minor children. In contrast to the statute at issue in another case cited by commenters, *Troxel* v. *Granville,* 530 U.S. 57 (2000), the final regulations specifically protect parents' rights by providing that ''[n]othing in Title IX or this part may be read in derogation of any legal right of a parent, guardian, or other authorized legal representative to act on behalf of a complainant, respondent, or other person,'' § 106.6(g). Thus, although the Department agrees with commenters that the Supreme Court has recognized that parents have a liberty interest in controlling their children's upbringing, the Department does not agree that the final regulations undermine that interest.

Finally, the Department disagrees that these final regulations exceed the Department's authority. As an initial matter, the Department disputes the underlying premise to the commenters' argument that the final regulations diminish parental rights. Further, as explained elsewhere in this preamble. Congress assigned to the Department the responsibility to ensure full implementation of Title IX and the Supreme Court has recognized the Department's ''authority to promulgate and enforce requirements that effectuate the statute's nondiscrimination mandate.'' *Gebser,* 524 U.S. at 292.

Changes: None.

C. Religious Exemptions

1. General Support and Opposition

Comments: Some commenters expressed general support for the Department's decision not to propose changes to § 106.12, arguing that § 106.12, as revised in 2020, allows religious schools to strive to eliminate sex discrimination in their communities while acting in accordance with their religious tenets.

Some commenters expressed concern about how the proposed regulations would interact with the religious exemption to the extent the regulations conflict with religious tenets on human sexuality, gender, and marriage. Several commenters urged the Department to clarify the extent to which religious educational institutions would be required to comply with various aspects of the proposed regulations, including with respect to discrimination based on sexual orientation or gender identity and sex-separate facilities and activities.

Some commenters argued that a religious exemption for provisions related to sexual orientation and gender identity is not justified and that eliminating the religious exemption would benefit campus climate, academic scores, and student mental health. Some commenters argued that the Title IX religious exemption should not allow recipients to punish students because they are LGBTQI+ or have sought an abortion and urged the Department to clarify that institutions eligible for the religious exemption must still protect students from sex-based harassment. One commenter noted that it is difficult to conceive of a religious tenet that would be inconsistent with prohibiting sexual assault.

Discussion: The Department declines to amend § 106.12, the provision governing religious exemptions, in these final regulations. Since 1972, Title IX has provided that its prohibition on sex discrimination ''shall not apply to an educational institution which is controlled by a religious organization if the application of this subsection would not be consistent with the religious tenets of such organization.'' 20 U.S.C. 1681(a)(3). The Department acknowledges that some commenters opposed the religious exemption, but because Congress enacted the Title IX statute with the exemption, the authority to eliminate it also rests with Congress. As explained in more detail

below, the amendments the Department made to § 106.12 in 2020 codified longstanding agency practice.

The Department cannot opine on the extent to which a particular institution would be exempt from particular obligations, such as Title IX's prohibition on sex-based harassment, because such a determination requires a fact-specific analysis as to whether application of a particular provision would be inconsistent with specific tenets of an institution's controlling religious organization. *See* 20 U.S.C. 1681(a)(3); 34 CFR 106.12.

Changes: None.

2. Section 106.12(c)

Comments: Several commenters expressed concern that the 2020 amendments to § 106.12 set criteria for when a recipient is controlled by a religious organization that exceed the scope of the Department's statutory authority under Title IX. Many commenters urged the Department to rescind § 106.12(c) or narrow the evidence a recipient may offer to establish that it is controlled by a religious organization. Some commenters asserted that the religious exemption is inconsistent with Title IX's purpose and argued the Department must give the exemption a narrow interpretation.

Discussion: When the Department adopted § 106.12(c) in a rulemaking separate from the 2020 amendments, *see* 85 FR 59916 (Sept. 23, 2020) (Free Inquiry Rule), the Department stated that § 106.12(c) did not, and was not intended to, ''create new exceptions to the Title IX statute.'' 85 FR 59949. In that rulemaking, the Department explained that § 106.12(c) would not make ''a substantial number of educational institutions . . . newly eligible to assert a religious exemption under Title IX, where they could not before,'' 85 FR 59973, or ''substantially change the number or composition of entities asserting the exemption.'' 85 FR 59977.

The Department also notes that some of the concerns expressed by the commenters about § 106.12(c) were addressed in the 2020 amendments and the Free Inquiry Rule.

First, recipients ''are not entitled to any type of formal deference when invoking eligibility for a religious exemption, and recipients have the duty to establish their eligibility for an exemption, as well as the scope of any exemption.'' 85 FR 30479. The burden is not on a student or the Federal Government to disprove any claim for a religious exemption. *See* 85 FR 30475, 30480 (''The student does not bear the burden with respect to the religious exemption.''). Instead, a recipient must establish that it was eligible for an exemption at the time the alleged noncompliance occurred.

Second, although § 106.12(c) offers several different ways to show that the educational institution is controlled by a religious organization, it is not enough for recipients to show ''tenuous relationships to religious organizations.'' 85 FR 59961. A recipient ''that merely has loose ties to religious teachings or principles, without establishing 'control' by a religious organization, is not eligible to assert a religious exemption.'' 85 FR 59957.

Third, when an educational institution is controlled by a religious organization, the relevant tenets to examine are those of the religious organization, not the personal beliefs of an official or employee working for the recipient. 85 FR 30478.

Finally, even if a recipient shows it is an educational institution controlled by a religious organization and invokes the exemption, § 106.12 ''does not prevent OCR from investigating or making a finding against a recipient if its religious tenets do not address the conduct at issue. In those cases, OCR will proceed to investigate, and if necessary, make a finding on the merits.'' 85 FR 30477. And ''a recipient cannot invoke a religious exemption to retaliate against a person.'' 85 FR 30479.

These explanations issued in 2020 in conjunction with the adoption of § 106.12(c) make the scope of the provision and its operation clear.

Changes: None.

3. Section 106.12(b)

Comments: Some commenters urged the Department to continue the approach reflected in the 2020 amendments to § 106.12, permitting an educational institution to assert an exemption after OCR opens an investigation. Some commenters warned that any requirement of pre-approval of a recipient's religious exemption would be unlawful, lack statutory authority, and impose administrative and legal costs on religious schools, and require religious schools to expose internal documents that risk reputational and privacy harms. Some commenters encouraged the Department to urge other Federal agencies to adopt regulations similar to § 106.12. Some commenters suggested that the Department modify the Title IX regulations so that religious exemptions are granted automatically and the process for securing the Department's assurance of an exemption is less burdensome.

Many commenters expressed concern about the impact of the clarification in the 2020 amendments that schools may assert a religious exemption after they are already under investigation. Many commenters urged the Department to require schools to notify the Department in advance of asserting a religious exemption and bar schools from invoking the exemption retroactively. A few commenters argued that the 2020 amendments to § 106.12 had the effect of encouraging schools to be less clear regarding whether and how they intend to assert an exemption.

One commenter opined that seeking advance assurance can be considered as evidence of the sincerity of an exemption claim. One commenter expressed a concern that when schools can claim exemptions for the first time during investigations, schools may use religion as a pretext for unlawful discrimination. One commenter noted that a process for advance assurance of an exemption and the transparency it fosters is important to ensure that there is a genuine conflict between Title IX and a religious tenet.

Some commenters expressed concern that the 2020 amendments to § 106.12 do not require a school to identify any specific conflict with a tenet of its controlling religious organization. Some commenters urged the Department to amend § 106.12(b) to clarify that any claimed religious exemption must be sufficiently supported by a specific tenet of the religion.

Discussion: The Department acknowledges the view of commenters that a recipient should be able to more easily establish a religious exemption and of commenters who urged the Department to require a recipient to seek advance assurance of an exemption. Under § 106.12(b), and consistent with longstanding agency practice, a recipient may, but is not required to, submit a written statement to OCR seeking assurance of a religious exemption prior to invoking such exemption. A recipient may also assert a religious exemption in response to a pending OCR investigation. As noted previously, the Department did not propose changes to § 106.12(b) in the July 2022 NPRM, and the Department continues to believe that the process outlined in § 106.12(b) appropriately balances the requirements placed on an institution to establish an exemption and the need to ensure that asserted exemptions are consistent with the statutory requirements.

The Department acknowledges that § 106.12(b) uses different language than

the Title IX regulations of other Federal agencies and, therefore, other agencies may elect or be required to use different approaches in addressing the same issue. In 2020, the Department concluded that such interagency differences were acceptable, 85 FR 30504, and that comments ''regarding other agencies' regulations are outside the scope of this rulemaking process and the Department's jurisdiction.'' 85 FR 30072.

The Department notes that many of the comments appear to assume that, once a recipient receives an assurance from OCR that it has established its eligibility for a religious exemption, complainants are barred from filing Title IX complaints against that recipient. That is incorrect. In an OCR proceeding, an assurance does not always preclude OCR from investigating a complaint. Rather, even if a recipient shows it is controlled by a religious organization and invokes the exemption, § 106.12 ''does not prevent OCR from investigating or making a finding against a recipient if its religious tenets do not address the conduct at issue. In those cases, OCR will proceed to investigate, and if necessary, make a finding on the merits.'' 85 FR 30026, 30477.

Moreover, even when the allegations in a complaint seem to fall squarely within the scope of a religious exemption, as the Department repeatedly made clear in 2020, ''[i]f a complaint is filed, and the complaint alleges that a recipient improperly applied a religious exemption or any other exemption under Title IX, OCR will carefully consider the complaint, evaluate compliance with the statute and regulations, and respond accordingly.'' 85 FR 59948; *see also* 85 FR 59947; 85 FR 59973 (''If an individual feels the religious exemption under Title IX and these regulations does not apply to an educational institution, that individual may always file a complaint with OCR.''). If, in the context of a specific complaint of unlawful discrimination under Title IX, OCR determines that the complaint's allegations fall within any assurance of a religious exemption that OCR has previously provided, OCR may contact the controlling organization to verify those tenets. If the organization provides an interpretation of tenets that has a different practical impact than that described by the institution or if the organization denies that it controls the institution, OCR will not recognize the exemption.

With respect to comments on a recipient's obligation to identify a conflict with the tenets of its controlling organization, the Department notes that § 106.12(b) states that a recipient's statement seeking assurance of an exemption must ''identify[ ] the provisions of [the regulations] that conflict with a specific tenet of the religious organization.''

Changes: None.

4. Transparency

Comments: Some commenters stated that transparency about the existence and scope of a school's religious exemption is important for students and applicants to know whether they may be treated differently than their peers because of their sexual orientation, gender identity, reproductive history, or personal beliefs.

Discussion: The Department continues to believe, as it did in 2020, that letters exchanged with recipients regarding religious exemptions are subject to Freedom of Information Act requirements, *see* 85 FR 30480, ''including attendant rules regarding public disclosure of commonly requested documents.'' 85 FR 30481; *see* 5 U.S.C. 552(a)(2)(D). Those attendant rules require agencies to make available for public inspection in an electronic format copies of all records that have been requested three or more times or ''that because of the nature of their subject matter, the agency determines have become or are likely to become the subject of subsequent requests for substantially the same records.'' Consistent with these requirements, because the Department has received a significant number of requests for these documents, it posts correspondence regarding assurances of religious exemptions from Title IX on its website at *www.ed.gov/ocr/correspondence/other.html* (last visited Mar. 12, 2024).

The Department believes its current practice of making OCR religious exemption letters available online or through FOIA requests is responsive to commenters' concerns. The Department further notes that nothing precludes a prospective student or other individual from asking a recipient whether it relies on any exemptions under Title IX and for information about the scope of any such exemptions, to the extent such information may inform their decision to apply to or attend such recipient.

Comments on transparency regarding religious exemptions in a recipient's notice of nondiscrimination are further addressed in the discussion of § 106.8(b).

Changes: None.

5. Religious Individuals

Comments: Some commenters expressed concern that although § 106.12 protects schools controlled by religious organizations, it does not protect individual students or employees who adhere to religious tenets. One commenter urged the Department to extend § 106.12 to individuals, particularly in schools that are not controlled by a religious organization.

Some commenters stated that the religious exemption does not offer a remedy for what the commenters believe to be a conflict with individuals' First Amendment rights to speak on topics such as gender identity or abortion. One commenter urged the Department to make clear that an employee may decline to provide medical care or services when doing so would conflict with their religious beliefs.

One commenter urged the Department to consider expanding application of Title IX's religious exemption to cover religious student groups and argued that the proposed regulations would create problems for student groups that seek to follow a statement of faith that could be deemed offensive.

Discussion: The Department acknowledges that commenters raised concerns about the application of the final regulations to individuals' speech about a variety of specific topics, such as gender identity and abortion. Consistent with § 106.6(d)(1), nothing in the final regulations requires or authorizes a recipient to infringe on individuals' First Amendment or other constitutional rights. The extent to which the final regulations' prohibition on sex-based harassment intersects with First Amendment rights is addressed in the discussion of the definition of sex-based harassment in § 106.2.

While the statute's religious exemption applies to educational institutions controlled by a religious organization, it does not exempt student organizations, individual employees or students, or educational institutions not controlled by religious organizations.

Changes: None.

6. 34 CFR 75.500(d) and 76.500(d)

Comments: Some commenters urged the Department to rescind 34 CFR 75.500(d) and 76.500(d), which prohibit public postsecondary institutions receiving Department grants from enforcing certain non-discrimination policies against religious student organizations, because those regulations undermine the purpose of Title IX, are redundant of constitutional protections, and were issued without congressional authority and in violation of the APA.

Discussion: The Department did not request comments in the July 2022

NPRM on 34 CFR 75.500(d) or 76.500(d), which are outside the scope of this rulemaking. The Department has proposed rescinding these regulations in a separate rulemaking. *See* 88 FR 10857 (Feb. 22, 2023).

Changes: None.

D. Rulemaking Process

Comments: One commenter asserted the Department developed the proposed regulations without employing a rulemaking process that involved a committee of nominated Title IX practitioners and experts to help the Department. One commenter suggested that the Department create a standing advisory group of representatives from various sectors to assist with considering policy issues and implementing the final regulations so that standards can be set based on input gathered from all sectors.

Some commenters argued that by proposing two separate notices of proposed rulemaking to amend the Title IX regulations, the Department deprived the public of proper notice and opportunity to consider the interrelated interests in the proposed regulations. Some commenters urged the Department to republish a comprehensive notice of proposed rulemaking addressing Title IX in its totality rather than moving forward with final regulations. Other commenters urged the Department to issue final regulations that address all the proposed regulations.

Discussion: The Department believes the commenter who mentioned a committee of nominated Title IX practitioners was referring to the negotiated rulemaking requirements in section 492 of the Higher Education Act (HEA). The requirements of section 492 apply exclusively to regulations that implement Title IV of the HEA. Title IX is not part of the HEA; rather, it is part of the Education Amendments of 1972. Although the Department was not required to conduct negotiated rulemaking for Title IX, the Department solicited live and written comments as part of a June 2021 Title IX Public Hearing and conducted listening sessions with stakeholders expressing a variety of views on the 2020 amendments and other aspects of Title IX prior to drafting the proposed regulations. *See* 87 FR 41390, 41395. Recommendations from practitioners and experts were among the hundreds of thousands of comments on the July 2022 NPRM received by the Department during the notice-and-comment rulemaking process for these final regulations. The comments received on the proposed regulations are posted for the public to view on *Regulations.gov*. In addition, information regarding the live and written comments received during the July 2021 Title IX Public Hearing and at stakeholder meetings with the Department prior to issuing the proposed regulations is discussed in the July 2022 NPRM. *See* 87 FR 41390, 41395–96.

Consistent with the requirements of Executive Order 12866, the Department coordinated with other agencies by sharing the proposed regulations with the Office of Management and Budget (OMB) prior to their publication. Through the interagency review process, OMB provided other Federal agencies, including those that also administratively enforce Title IX, an opportunity to review and comment on the proposed regulations before they were published. In addition, in accordance with Executive Order 12250, the Assistant Attorney General for Civil Rights at the Department of Justice reviewed the proposed regulations and approved them for publication in the **Federal Register**.

The Department acknowledges the suggestion that it create a standing advisory group to assist with policy issues and implementing the final regulations, but the previously discussed public hearing, listening sessions, and notice-and-comment process provided a sufficient opportunity for affected entities and individuals to offer input on the final regulations. The Department also notes that nothing in the final regulations precludes recipients from creating their own advisory groups to help them with implementation. In addition, the Department will offer technical assistance, as appropriate, to promote compliance with the final regulations.

The Department considered all of the comments that were submitted in response to the July 2022 NPRM, including those that objected to the Department's decision to issue separate notices of proposed rulemaking. The Department disagrees with commenters who objected to the Department's issuance of two related notices of proposed rulemaking. The July 2022 NPRM made clear that proposed § 106.31(a)(2) would not apply in the context of eligibility criteria for sex-separate athletic teams because Congress recognized that athletics presents unique considerations and that the Department would issue a separate notice of proposed rulemaking to clarify Title IX's application to criteria recipients use to establish students' eligibility to participate on a particular male or female athletic team. 87 FR 41536–38.

The Department recognizes that participation in team sports is associated with many valuable physical, emotional, academic, and interpersonal benefits for students and that recipients seek greater clarity on how to comply with their Title IX obligations when determining students' eligibility to participate on a sex-separate athletic team consistent with their gender identity. Accordingly, on April 13, 2023, the Department issued its Athletics NPRM, which was approximately nine months after the Department issued its July 2022 NPRM. The Department received more than 150,000 detailed comments on the Athletics NPRM. In light of the volume and substance of comments, and to ensure full consideration of the range of views expressed in those comments, the Department intends to publish a notice of final regulations related to sex-related eligibility criteria for male and female athletic teams separate from these final regulations. The Department maintains its authority under the Javits Amendment to promulgate reasonable provisions governing athletics that consider the nature of particular sports, as detailed in the Athletics NPRM. *See* 88 FR 22862–63.

The Department declines commenters' suggestion to issue a new comprehensive notice of proposed rulemaking, as the public received proper notice and opportunity to comment, and these final regulations reflect the Department's careful consideration of those comments.

Changes: None.

E. Length of Public Comment Period and Process for Submitting and Posting Comments

Comments: Some commenters requested that the Department extend the comment period to December 30, 2022. Some commenters criticized the Department for what they perceived to be attempts to limit the solicitation of comments, including by phrasing the deadline for public comment as ''due on,'' rather than ''due before.'' Some commenters urged the Department to extend the comment period because they had difficulty submitting comments through the *Regulations.gov* website.

Some commenters expressed concern that thousands of public comments from *Regulations.gov* had been removed, citing a disparity between the number of comments posted on *Regulations.gov* and on the **Federal Register** website. Some commenters opposed the editing, redacting, or censoring comments posted on *Regulations.gov*.

Discussion: The Department published the July 2022 NPRM in the **Federal Register** on July 12, 2022 (87 FR 41390), for a 60-day comment period, stating specifically that comments must be received on or before September 12, 2022. The APA does not mandate a specific length for the comment period, but rather states that agencies must give interested persons an opportunity to participate in the proceedings. 5 U.S.C. 553(c). This provision has generally been interpreted as requiring a ''meaningful opportunity to comment.'' *See, e.g., Asiana Airlines* v. *FAA,* 134 F.3d 393, 396 (D.C. Cir. 1998). Case law interpreting the APA generally concludes that comment periods should not be less than 30 days.[92] In this case, commenters had 60 days to submit their comments on the July 2022 NPRM.

When a commenter submits a comment on *Regulations.gov*, they receive a tracking number so they can use that number to locate their comment once it is posted. The Department responded to any requests it received for assistance with submitting comments via *Regulations.gov*, including by providing the member of the public with information regarding the *Regulations.gov* help desk and by accepting written comments via mail and email for members of the public who requested an accommodation or could not otherwise submit their comments via *Regulations.gov*. The Department also consulted with the U.S. General Services Administration (GSA), which administers *Regulations.gov*, during the comment period if a member of the public contacted the Department expressing difficulty submitting comments via *Regulations.gov*. GSA indicated to the Department that there were no widespread problems submitting comments through *Regulations.gov* during the comment period. In light of this, the Department did not extend the comment period.

The Department received more than 240,000 comments on the July 2022 NPRM, many of which addressed the substance of the proposed regulations in great detail. The volume and substance of comments on practically every facet of the proposed regulations confirms that the public had meaningful opportunity to comment, and that the public in fact did meaningfully participate in this rulemaking. *Cf. Pangea Legal Servs.* v. *U.S. Dep't of Homeland Sec.,* 501 F. Supp. 3d 792, 820 (N.D. Cal. 2020) (small number of comments received on a rule relative to other, similar rules showed comment period was inadequate); *N.C. Growers' Ass'n, Inc.* v. *United Farm Workers,* 702 F.3d 755, 770 (4th Cir. 2012) (refusal to receive comments on or discuss the substance or merits of the rule did not allow for a meaningful opportunity to participate). The Department reviewed and considered all comments submitted during the comment period, including duplicate comments.

Concerns that the Department removed thousands of public comments on the July 2022 NPRM from *Regulations.gov*, on September 5, 2022, are mistaken. There was no loss of comments on the July 2022 NPRM. Rather, the Department corrected a commenter's erroneous assertion that the comment in question represented the hundreds of thousands of commenters. Specifically, a person who submits a comment on *Regulations.gov* with an attachment may indicate that they represent multiple individuals or organizations. This process allows individuals to upload a submission with multiple signatures or a single submission containing a number of comments from different individuals, and this self-reported number is then included automatically by the *Regulations.gov* system in the count of comments received. In this case, a single commenter submitted a comment with a self-reported number of 201,303 submissions. That comment consisted of a policy memorandum issued by the Consumer Financial Protection Bureau in 2013 and no other information or attachments.[93]

After the self-reported number of submissions for that comment was included in the total number of comments reflected on *Regulations.gov*, the Department determined that the self-reported number of submissions for that comment was inaccurate because the comment was actually submitted on behalf of a single commenter. Once the error was discovered, the Department informed GSA, and GSA corrected the number of submissions for that comment to one.

Further, comment tallies are generated by GSA's *Regulations.gov* and are publicly available on *Regulations.gov*. Neither the Department nor GSA's *Regulations.gov* eliminated comments or types of comments in the Department's tally count. With two narrow exceptions consistent with Department policy, the Department made all material received from members of the public available for public viewing on *Regulations.gov* for the July 2022 NPRM. As explained in the July 2022 NPRM, the Department did not make publicly available (1) portions of comments that contained personally identifiable information about someone other than the commenter or (2) comments that contained threats of harm to another person or to oneself. *See* 87 FR 41390. Prior to making comments available for public viewing on *Regulations.gov*, the Department reviewed each comment for such content. Following this review, the comments without such content were posted for public viewing on *Regulations.gov*. The Department's review process takes time and therefore, there were instances of a lag between the time an individual submitted a comment via *Regulations.gov* and when it was posted publicly. All comments that did not contain personally identifiable information about a person other than the commenter or threats of harm to the commenter or another person were made available in their entirety for public viewing on *Regulations.gov*. In addition, comments that contained personally identifiable information about someone other than the commenter were made available for public viewing on *Regulations.gov* with the personally identifiable information redacted.

The Department does not track individuals who submit comments, including those who oppose the proposed regulations. The Department made comments available for public viewing and reviewed and considered all of the comments submitted during the comment period, including comments that contained threats of harm or personally identifiable information about someone other than the commenter.

Changes: None.

F. Effective Date and Retroactivity

Comments: Some commenters, noting the scope and breadth of the requirements in the proposed regulations, asked the Department to give recipients adequate time to implement the final regulations, with many asking that the final regulations not take effect mid-year. Some commenters explained that the HEA's master calendar gives postsecondary institutions at least eight months to prepare for the adoption of new Federal regulations and requires the regulations to take effect at the start of an academic year.

[92] *See, e.g., Nat'l Lifeline Ass'n* v. *FCC,* 921 F.3d 1102, 1117 (D.C. Cir. 2019) (''When substantial rule changes are proposed, a 30-day comment period is generally the shortest time period sufficient for interested persons to meaningfully review a proposed rule and provide informed comment.''); *Nat'l Retired Teachers Ass'n* v. *U.S. Postal Serv.,* 430 F. Supp. 141, 147 (D.D.C. 1977).

[93] The comment is available at *https://www.regulations.gov/comment/ED-2021-OCR-0166-43621* (last visited Mar. 12, 2024).

Some commenters noted the proposed regulations were silent on retroactivity and asked the Department to clarify the effective date. One commenter suggested that the Department state that the applicable grievance procedures are those that were in effect on the date a complaint was made and that the applicable substantive rules are those in effect at the time the alleged conduct occurred. One commenter explained that when the 2020 amendments were released, postsecondary institutions received many questions regarding whether recipients were required to implement the new Title IX grievance procedure requirements for complaints related to conduct that occurred prior to the effective date, but that were unresolved when the 2020 amendments became effective.

Discussion: Under the APA, the effective date for the final regulations cannot be fewer than 30 days after the final regulations are published in the **Federal Register** unless special circumstances justify a statutorily specified exception for an earlier effective date. 5 U.S.C. 553(d)(3). The Department has carefully considered commenters' concerns, including concerns regarding sufficient time to prepare for compliance and the requests to have these final regulations become effective at the start of an academic year.

The Department appreciates suggestions from commenters as to an appropriate length of time between publication of the final regulations and their effective date. The Department notes again that these final regulations are not promulgated under Title IV of the HEA and thus are not subject to the master calendar under the HEA. They also are not limited to institutions of higher education, but address civil rights protections for students and employees in the education programs and activities of all recipients.

For final regulations not subject to the HEA's master calendar, 60 days is generally sufficient for recipients to come into compliance with final regulations. Consistent with the preamble to the 2020 amendments, the Department recognizes the practical necessity of allowing recipients of Federal financial assistance time to plan for implementing these regulations, including to the extent necessary, time to amend their policies and procedures. *See* 85 FR 30026, 30534.

In response to commenters' concerns about the effective date, the Department has determined that the final regulations will be effective August 1, 2024. Recipients will thus have more than 90 days, far more time than the statutory minimum of 30 days, to prepare for compliance with these final regulations. The effective date of August 1, 2024 adequately accommodates the needs of recipients while fulfilling the Department's obligations to fully enforce Title IX's nondiscrimination mandate. The Department also notes that the effective date coincides with the summer break for many recipients, which will provide them time to finalize their Title IX policies and procedures prior to the start of the new academic year.

The Department will not enforce these final regulations retroactively.[94] Federal agencies authorized by statute to promulgate regulations may only create regulations with retroactive effect when the authorizing statute has expressly granted such authority, which is not the case here.[95] The final regulations apply only to sex discrimination that allegedly occurred on or after August 1, 2024. With respect to sex discrimination that allegedly occurred prior to August 1, 2024, regardless of when the alleged sex discrimination was reported, the Department will evaluate the recipient's compliance against the Title IX statute and the Title IX regulations in place at the time that the alleged sex discrimination occurred. The Department also notes that regardless of when the final regulations become effective, some reports regarding sex discrimination occurring in a recipient's education program or activity may be handled under these final regulations while others will be addressed under the requirements of the 2020 amendments; this is not arbitrary and occurs any time regulatory requirements are amended prospectively.

The Department understands that recipients may need technical assistance during the transition period between publication of these final regulations in the **Federal Register** and the effective date of August 1, 2024, and after the regulations become effective to assist them in fully implementing the regulations. The Department will offer technical assistance, as appropriate, to promote compliance with the final regulations.

[94] This position is consistent with the Department's general practice. *See* 85 FR 30026, 30061; U.S. Dep't of Educ., Office for Civil Rights, Questions and Answers on the Title IX Regulations on Sexual Harassment, at 10 (July 2021) (updated June 28, 2022), *https://www2.ed.gov/about/offices/list/ocr/docs/202107-qa-titleix.pdf.*

[95] *See* 5 U.S.C. 551 (Administrative Procedure Act provision defining a ''rule'' as an agency action with ''future effect''); *Bowen,* 488 U.S. at 208 (''[A] statutory grant of legislative rulemaking authority will not, as a general matter, be understood to encompass the power to promulgate retroactive rules unless that power is conveyed by Congress in express terms.).

Changes: The effective date of these final regulations is August 1, 2024.

G. Prevention

Comments: A number of commenters asked the Department to include regulations requiring student-facing education and prevention programming. Some commenters noted the previously recognized benefits of such programming for helping recipients fulfill their longstanding Title IX obligation to prevent future recurrence of harassment. Commenters also recommended a broad array of requirements, such as education regarding healthy relationships, relationship violence, sex education, self-defense, safety awareness training, child sexual abuse, and the role that drugs and alcohol play in sexual assault. In addition, commenters made specific recommendations regarding sex education in schools, which included comments advocating for more comprehensive sex education, comments advocating for abstinence-only sex education, and comments objecting to any form of sex education. One commenter asked the Department to emphasize the importance of physical safety and prevention measures, such as emergency call boxes, campus security officials, and secured doors and windows.

One commenter urged the Department to provide recipients with funding for prevention education because educating and training for students and employees about the attitudes and behaviors that enable sex discrimination and how to stop it would help recipients fulfill their Title IX obligations.

Discussion: The Department acknowledges commenters' suggestions regarding prevention training and sex education for students. However, the Department declines to require certain training practices aside from § 106.8(d), which relates directly to individuals responsible for implementing these regulations. Because the Department does not control school curricula, the Department declines to add requirements that a recipient instruct students on sex-based harassment prevention or sex education but notes that nothing in these final regulations would preclude a recipient from using its discretion to provide educational programming to students that it deems appropriate. *See* 85 FR 30026, 30125–26.

Regarding Department funding for prevention education, the authority to appropriate money for certain activities lies with Congress.

Changes: None.

H. Tenth Amendment

Comments: Some commenters raised federalism concerns, stating that the primary responsibility for education rests with parents and at the State and local levels and that the proposed regulations would violate the Tenth Amendment.

Discussion: These final regulations do not violate the Tenth Amendment, which states: ''The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.'' U.S. Const. amend. X. As explained in the 2020 amendments:

> The Supreme Court's position is sufficiently clear on this topic. ''[W]hile [the Federal government] has substantial power under the Constitution to encourage the States to provide for [a set of new rules concerning a national problem], the Constitution does not confer upon [the Federal government] the ability simply to compel the States to do so.'' The Tenth Amendment ''states but a truism that all is retained which has not been surrendered.'' . . . The Supreme Court always has maintained that ''[t]he States unquestionably do retai[n] a significant measure of sovereign authority . . . to the extent that the Constitution has not divested them of their original powers and transferred those powers to the Federal Government.'' . . . [T]here can be no dispute that the Federal government retains the authority to regulate sex discrimination . . . in education programs or activities that receive Federal financial assistance, even though the same matters also fall within the traditional powers of the States.

85 FR 30459 (footnotes omitted) (citing *New York* v. *United States,* 505 U.S. 144, 149 (1992); *United States* v. *Darby,* 312 U.S. 100, 124 (1941); *Garcia* v. *San Antonio Metro. Transit Auth.,* 469 U. S. 528, 549 (1985)).

The Department maintains its position from the 2020 amendments that ''[t]he Department, through these final regulations, is not compelling the States to do anything. In exchange for Federal funds, recipients—including States and local educational institutions—agree to comply with Title IX and regulations promulgated to implement Title IX as part of the bargain for receiving Federal financial assistance, so that Federal funds are not used to fund sex-discriminatory practices. As a consequence, the final regulations are consistent with the Tenth Amendment.'' 85 FR 30459.

Changes: None.

I. Exceeding Authority

Comments: Some commenters asserted that the Department lacked congressional authorization to issue the proposed regulations. Specifically, some commenters stated Congress did not authorize the Department to unilaterally implement Title IX regulations or to force recipients to end all forms of sexual harassment and provide remedies to survivors. Some commenters expressed that only Congress, rather than the executive branch, has the authority to amend Title IX. Some commenters stated the Supreme Court has ruled that areas such as education should be decided by the people or the States because such areas have not been specifically delegated to the Federal Government in the U.S. Constitution. Some commenters asserted that the proposed changes bypass the authority of State legislatures.

Discussion: The Department has the delegated authority to promulgate the final regulations.

Under 20 U.S.C. 1682, agencies are specifically empowered to effectuate section 1681 through regulations: each agency with the power to extend Federal financial assistance to education programs or activities ''is authorized and directed to effectuate the provisions of section 1681 of this title . . . by issuing rules, regulations, or orders of general applicability which shall be consistent with achievement of the objectives of the statute authorizing the financial assistance in connection with which the action is taken.'' Further, such agencies may ensure compliance ''by the termination of or refusal to grant or to continue assistance'' to a noncompliant recipient's education program or activity. 20 U.S.C. 1682. Thus, as the Supreme Court has recognized, ''[t]he express statutory means of enforcement [of Title IX] is administrative.'' *Gebser,* 524 U.S. at 280. Congress has validly delegated its power to implement Title IX to agencies such as the Department.

Moreover, the Department disagrees with commenters' assertion that this delegation does not extend to prohibitions on sex-based harassment. The Supreme Court has held that sexual harassment is a form of sex discrimination under Title IX. *See id.* at 283 (affirming ''the general proposition that sexual harassment can constitute discrimination on the basis of sex under Title IX''). The Department thus has authority under 20 U.S.C. 1682 to implement the ban on sex discrimination in 20 U.S.C. 1681 by promulgating regulations prohibiting sex-based harassment and requiring recipients to address it. This authority extends to requiring recipients to provide remedies to complainants because such remedies eliminate the harm of sex-based harassment and prevent its recurrence. Contrary to the commenters' assertion, therefore, the regulations do not ''amend'' Title IX but rather are a key part of ''effectuat[ing]'' Title IX's requirement that recipients operate their education programs and activities free from sex discrimination. 20 U.S.C. 1682.

The Department has not bypassed the authority of State legislatures. In contrast to other statutes reflecting a cooperative federalism, such as the Clean Air Act, Congress provided for only Federal agencies, not State agencies, to adopt regulations implementing Title IX. *See* 20 U.S.C. 1682.

Changes: None.

J. Views of Assistant Secretary Lhamon

Comments: Some commenters stated that Assistant Secretary Catherine Lhamon must be recused from the rulemaking process or be removed from her position, asserting that under her previous leadership, OCR created problems that the 2020 amendments were intended to solve, was biased, and overreached by conducting investigations into all aspects of recipients' adjudication processes and campus life. These commenters asserted that due to Assistant Secretary Lhamon's past public statements, her record as Assistant Secretary from 2013 to 2017, and statements made during her Senate confirmation hearing, neither OCR nor the Department can comply with the APA's reasoned decision-making requirement. The commenters explained that these concerns were expressed in two letters sent to the Department in 2022 but said that the Department failed to discuss these concerns in the proposed regulations, thus tainting the rulemaking process and rendering any final regulations arbitrary and capricious.

Discussion: The Department maintains that no statement on the part of Assistant Secretary Lhamon and no actions taken by OCR under Assistant Secretary Lhamon prevent the Department from engaging in reasoned decision making and rulemaking.

In the context of a rulemaking such as this one, an agency member should be ''disqualified only when there has been a clear and convincing showing that the agency member has an unalterably closed mind on matters critical to the disposition of the proceeding.'' *Ass'n of Nat'l Advertisers, Inc.* v. *FTC,* 627 F.2d 1151, 1170 (D.C. Cir. 1979). This high standard recognizes that the ''legitimate functions of a policymaker . . . demand interchange and discussion about important issues'' and that, if an ''agency official is to be effective he

must engage in debate and discussion about the policy matters before him.'' *Id.* at 1168–69. The D.C. Circuit in *Association of National Advertisers* thus concluded that ''mere discussion of policy or advocacy on a legal question . . . is not sufficient to disqualify an administrator.'' *Id.* at 1171.

Here, the remarks noted by commenters indicate that Assistant Secretary Lhamon advocated for robust procedural protections for students, but nothing suggests she had an ''unalterably closed mind'' regarding any particular issue involved in this rulemaking. Moreover, like the official in *Association of National Advertisers,* Assistant Secretary Lhamon ''made the challenged comments before the [agency] adopted its notice of proposed rulemaking.'' *Id.* at 1173. Indeed, she made them even before she assumed her position as Assistant Secretary in the current Administration. Nothing suggests that ''the interchange between rulemaker and the public should be limited prior to the initiation of agency action.'' *Id.* To the contrary, ''[t]he period before [an agency] first decides to take action on a perceived problem is, in fact, the best time for a rulemaker to engage in dialogue with concerned citizens'' because ''[d]iscussion would be futile . . . if the administrator could not test his own views on different audiences'' before initiating the action. *Id.* The same rationale applies to prospective government officials, who must be able to engage the public to determine the sorts of policies they ought to attempt to implement if they later become officials. Engaging in this process and advocating for certain changes does not violate the APA. *See id.* (''an expression of opinion prior to the issuance of a proposed rulemaking does not, without more, show that an agency member cannot maintain an open mind'').

Moreover, the July 2022 NPRM was, and the final regulations are, issued by the Secretary of Education, and the final sign-off comes from the Secretary of Education, not the Assistant Secretary. There is no contention that Secretary Cardona prejudged the issues or had a closed mind.

In addition, the proposed and final regulations differ, significantly in many respects, from the standards regarding sexual harassment that were enforced during Assistant Secretary Lhamon's tenure from 2013 to 2017. This further suggests that Assistant Secretary Lhamon did not have an unalterably closed mind regarding the contents of the updated regulations.

Finally, as this preamble indicates, the Department has engaged with the many commenters who raised questions about, or opposition to, the July 2022 NPRM. The final regulations reflect this engagement, including the full consideration of the significant number of comments received on the proposed regulations, and belies the notion that the Department prejudged any issue addressed in these final regulations.

Changes: None.

K. Regulatory Action Not Necessary

Comments: Some commenters stated that the Department failed to comply with Executive Order 12866, which requires an agency to identify the problem it intends to address and assess the significance of the problem, and Executive Order 14021, which directs the Secretary to review existing regulations, orders, guidance, policies, and similar agency actions that may be inconsistent with the policy that all students should be guaranteed an educational environment free from sex discrimination, including discrimination on the basis of sexual orientation or gender identity. Other commenters asserted that the Department failed to provide substantial evidence that revisions to the 2020 amendments were necessary, particularly because recipients have had little time to assess the impact of the 2020 amendments.

One commenter asserted that the Department failed to cite adequate evidence that sex discrimination remains a serious problem to justify the proposed regulations, particularly in light of evidence that indicates a decrease in the number of Title IX investigations and a lack of data that indicates the prevalence of other forms of sex discrimination, including discrimination based on sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity. One commenter said that the Department's fact sheet about the July 2022 NPRM did not provide information about how the proposed regulations would impact Americans and only addressed the intentions and goals of the Department.

Discussion: The Department complied with all legal requirements, including Executive Orders 12866 and 14021, in promulgating the proposed regulations. In the July 2022 NPRM, the Department explained the need for regulatory action based on its review of Federal case law under Title IX; its enforcement experience; and stakeholder feedback during the June 2021 Title IX Public Hearing, listening sessions, and the meetings held in 2022 under Executive Order 12866. *See* 87 FR 41545.

Notwithstanding commenters' concerns with revising the Title IX regulations given the recency of the 2020 amendments, as discussed below, the Department's experience with application of the 2020 amendments informs its belief that changes are necessary, and that the Department need not wait to compile additional data before addressing the problems it has identified in those rules. *See, e.g., Stilwell* v. *Off. of Thrift Supervision,* 569 F.3d 514, 519 (D.C. Cir. 2009) (''The APA imposes no general obligation on agencies to produce empirical evidence,'' and ''agencies can, of course, adopt prophylactic rules to prevent potential problems before they arise. An agency need not suffer the flood before building the levee.'').

Regarding commenters who questioned the lack or adequacy of data that shows sex discrimination is a serious problem, the Department acknowledged that ''there are limited data quantifying the economic impacts of sex discrimination, including sex-based harassment, on individuals.'' 87 FR 41546. However, the Department also acknowledged ''studies suggest[ing] that there is a cost associated with being subjected to sex discrimination,'' *id.,* and requested comment on these issues, *see id.* at 41548. In response, as discussed in more detail in the discussion of the definition of ''Sex-Based Harassment'' in § 106.2, commenters referred the Department to data and other information consistent with what the Department cited in the July 2022 NPRM, supporting the prevalence and negative effects of sex discrimination, especially with regard to sex-based harassment and sex stereotyping, including information about the effects in certain educational settings and among specific populations, such as LGBTQI+ students and Black girls.

Despite the prevalence of sex discrimination, including sex-based harassment, some recipients have reported a dramatic decline in Title IX complaints since the 2020 amendments went into effect. *See, e.g.,* Heather Hollingsworth, *Campus Sex Assault Rules Fall Short, Prompting Overhaul Call,* Associated Press, June 16, 2022, *https://apnews.com/article/politics-sports-donald-trump-education-5ae8d4c03863cf98072e810c5de37048* (stating that the University of Michigan reported its number of Title IX complaints dropped from more than 1,300 in 2019 to 56 in 2021 and Title IX complaints at the University of Nevada, Las Vegas dropped from 204 in 2019 to 12 in 2021). In addition, the Department notes that Executive Order 12866

specifically directs that ''qualitative measures'' of benefits are ''essential to consider.'' 58 FR 51735. OMB's guidance for implementation of Executive Order 12866 similarly directs agencies to consider qualitative benefits of proposed regulations. *See* Off. of Mgmt. & Budget, Executive Office of the President, OMB Circular A–4 (Sept. 17, 2003), *https://obamawhitehouse.archives.gov/omb/circulars_a004_a-4/.* The final regulations will have important qualitative benefits, such as improvements for the psychological wellbeing of students, that cannot be captured in the datasets that certain commenters expected the Department to provide. These benefits support the Department's conclusion that, under Executive Order 12866, regulatory action is warranted. For a detailed discussion of data sources as well as the costs and benefits of these final regulations, see the *Regulatory Impact Analysis.*

Further, we appreciate the opportunity to clarify that the fact sheet issued with the proposed regulations is not part of the proposed regulations themselves but was developed to provide the public with an overview of the requirements in the proposed regulations. The Department has provided information regarding the impact of the regulations, including costs and benefits, in the *Regulatory Impact Analysis* section of the proposed regulations and final regulations.

Changes: None.

L. Need for Long-Lasting, Flexible Regulations

Comments: Some commenters expressed concerns about the shifting Title IX regulatory landscape and asked the Department to develop long-lasting regulations that can be maintained in future administrations. Commenters noted that Title IX requires settled expectations and expressed concern about the uncertainty arising from frequently changing regulations, which can lead to confusion and possible erosion of trust in postsecondary institutions' processes. One commenter explained that time and resources must be spent to update policies and procedures and train students and employees when Title IX regulations are updated, and asserted that this time would be better spent elsewhere. Some commenters expressed that when successive administrations make changes to the Title IX regulations, it undermines students' need for clarity about their rights and responsibilities or otherwise harms professionals who work on Title IX compliance, students, and the larger community.

One commenter noted that the Title IX regulations must be viewed and applied in the context of a wide array of additional considerations, including applicable State law, case law, Federal laws, and institutional and system policies. In light of this, the commenter urged the Department to ensure that the final regulations are flexible enough to be implemented across a variety of postsecondary institutions, incorporate a sensible level of simplicity, and provide clarity regarding Federal expectations. One commenter stated that the regulations need to align with each postsecondary institution's expectations for its educational community, ensure accountability, and provide a safe and secure environment, not punishment.

Discussion: The Department shares the commenters' interest in long-lasting regulations that are balanced, widely acceptable, and that will be maintained over time, and the Department is committed to accomplishing this goal. As explained in the July 2022 NPRM, following an extensive review of the 2020 amendments, live and written comments received during the July 2021 Title IX Public Hearing, and information received during listening sessions with a variety of stakeholders, the Department issued the proposed regulations to provide greater clarity regarding the scope of sex discrimination and better account for the diversity of education programs or activities covered by Title IX. *See* 87 FR 41390. The Department also carefully considered the views expressed in the over 240,000 comments received on the July 2022 NPRM in developing these final regulations. The Department's view is that because the final regulations are balanced and provide needed flexibility for recipients, they are more likely to be long lasting, which will ensure stability in the enforcement of Title IX over time, aid recipients in setting expectations and ensuring accountability, and provide recipients with flexibility to address sex discrimination while ensuring that they will still meet their obligation to fully effectuate Title IX's nondiscrimination mandate.

Further, as noted in the July 2022 NPRM, the final regulations promote the goal of a well-understood regulatory regime and settled expectations by providing greater clarity and restore protections that the 2020 amendments did not address. *See* 87 FR 41459. These include, for example, provisions necessary to ensure the prompt and equitable resolution of complaints of sex discrimination other than sex-based harassment, and recipient obligations to provide lactation space and reasonable modifications to prevent sex discrimination and ensure equal access for students who are pregnant or experiencing pregnancy-related conditions. *See* 87 FR 41458, 41513. The Department also notes the focus was on revising the 2020 amendments to the extent necessary to fully effectuate Title IX's nondiscrimination mandate. Some provisions from the 2020 amendments remain largely unchanged, including requiring recipients to offer and coordinate supportive measures for complainants and respondents; prohibiting bias and conflicts of interest; and permitting consolidation of complaints.

Regarding concerns about the costs associated with regulatory changes, the Department discusses the burden and benefits of the final regulations in more detail in the *Regulatory Impact Analysis.*

Changes: None.

M. Intersection With Other Laws

Comments: A number of commenters expressed concern that the United States Department of Agriculture's (USDA) funding for school meal programs would be conditioned on compliance with the Department's Title IX regulations, while another commenter noted that the USDA issued its own interpretation of Title IX stating that sex discrimination included discrimination based on sexual orientation and gender identity. Other commenters, noting that Section 1557 incorporates sex as a prohibited ground of discrimination by referencing Title IX's prohibition on sex discrimination, suggested that the Department's proposed definition of sex discrimination would significantly impact medical professionals. These commenters stated that the Department must consider the impact on other nondiscrimination laws and must clearly state that the regulations do not apply to conduct covered by these or any other laws, unless that conduct is clearly covered by these Title IX regulations.

Discussion: The Department acknowledges that there are nondiscrimination laws other than Title IX that prohibit sex discrimination and that other Federal agencies have their own Title IX regulations or other regulations interpreting Title IX. For example, as commenters observed, the USDA enforces its own Title IX regulations, and HHS maintains regulations implementing Section 1557. The commenters did not identify any

particular conflict between the proposed regulations and the regulations of other Federal agencies. The Department confirms that the final regulations only apply to recipients of Federal financial assistance from the Department, regardless of whether other agencies' regulations may also apply to a given recipient. The Department has primary responsibility for enforcing Title IX with respect to its recipients. No other Federal agency's funding is conditioned on compliance with these final regulations. When a recipient receives Federal financial assistance from the Department and another Federal agency, the Department expects recipients to comply with the Department's regulations and that other Federal agency's implementing regulations interpreting Title IX. These final regulations are not intended to and do not create a situation in which a recipient cannot comply with all applicable Title IX regulations. Compliance with these final regulations is not related to other Federal agencies' Title IX regulations.

Changes: None.

N. Family Policymaking Assessment

Comments: Some commenters noted that under Section 654 of the Treasury and General Government Appropriations Act of 1999, Federal agencies are required to assess the impact of proposed regulations on families and requested that the Department assess how the regulations will impact families.[96] Commenters stated that the proposed regulations failed to include a Family Policymaking Assessment, which would assess the proposed regulations' impact on family wellbeing, as required by the Treasury and General Government Appropriations Act of 1999, 5 U.S.C. 601 note.

Discussion: The provision of the Treasury and General Government Appropriations Act of 1999 cited by commenters pertains to ''policies and regulations that may affect family well-being.'' 5 U.S.C. 601 note (Assessment of Federal Regulations and Policies on Families). The Department has reviewed and complied with all applicable requirements for promulgating the proposed regulations and these final regulations. These regulations apply to recipients of Federal financial assistance and therefore do not directly regulate families.

Changes: None.

[96] The commenters cited Public Law 105–277.

O. National Origin and Immigration Status

Comments: One commenter recommended that the Department remind recipients in the final regulations that Title IX protects all students regardless of national origin, immigration status, or citizenship status, and referenced Supreme Court case law holding that undocumented students have an equal right to public education in the elementary school and secondary school settings.[97] This commenter also recommended that the final regulations state that threatening students with deportation or invoking a student's immigration status to intimidate or deter a student or their parents or guardians from making a Title IX complaint constitutes retaliation under Title IX.[98]

Discussion: Although Title IX prohibits discrimination on the basis of sex, the Department has stated that the Title IX regulations protect individuals regardless of race, color, national origin, immigration status, or another protected characteristic. *See, e.g.,* 85 FR 30064, 30067. The final regulations clearly define retaliation in § 106.2 and § 106.71 and make clear that retaliation is prohibited. Threatening to take retaliatory action for purposes of interfering with any right or privilege secured by Title IX or its implementing regulations would constitute retaliation. Because threats of deportation and acts of intimidation based on invoking immigration status are covered by the definition of retaliation at § 106.2 if those actions are taken for the purpose of interfering with a protected activity under Title IX, additional language in the text of the final regulations is unnecessary.

Changes: None.

P. Coverage of Employment

Comments: Some commenters objected to § 106.57 as unlawful and unauthorized and stated that the Department has no authority to include employment-related provisions in Title IX because it is an education statute.

Discussion: Title IX, 20 U.S.C. 1681, expressly states: ''No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.'' As the Department stated in the 2020 amendments, Congress did not limit the application of Title IX to students, and the regulations implementing Title IX have consistently prohibited discrimination based on sex in employment-related contexts that occur under a recipient's education program or activity. These final regulations accordingly apply to any person, including employees, in any education program or activity receiving Federal financial assistance. At the same time, nothing in these final regulations shall be read in derogation of any employee's rights under Title VII, as expressly stated in § 106.6(f). *See* 85 FR 30439. Similarly, nothing in these final regulations precludes an employer from complying with Title VII. *Id.* The Department recognizes that employers must fulfill their obligations under both Title VII and Title IX, and there is no inherent conflict between Title VII and Title IX. Nor is there any language in Title VII or Title IX preventing the Department from issuing regulations covering employment. *See* 85 FR 30439.

Changes: None.

Q. Funding for Compliance

Comments: Some commenters were concerned that the proposed regulations would constitute an unfunded mandate for recipients. Some commenters requested that Congress allocate resources for school districts to implement the final regulations, while other commenters urged the Department to allocate funds for prevention and education programming.

Discussion: Title IX imposes certain requirements on recipients of Federal financial assistance, but Congress does not appropriate funding through Title IX itself. These final regulations do not, therefore, address how recipients may acquire the funding they deem necessary to comply with Title IX's requirements. The Department recognizes that, to the extent recipients or parties realize costs as a result of the final regulations, they will need to identify sources of funding to cover those costs. These final regulations are focused on clarifying recipients' legal obligations under Title IX. For a detailed discussion of data sources as well as the costs and benefits of these final regulations, see the *Regulatory Impact Analysis*

Changes: None.

R. Technical Assistance

Comments: Some commenters urged the Department to provide technical assistance to school districts to assist them in implementing the final regulations, including sample policies, procedures, handbooks, training materials, checklists, and webinars to help reduce the implementation burden

[97] The commenter cited *Plyler* v. *Doe,* 457 U.S. 202 (1982).

[98] The commenter cited the 2014 Q&A on Sexual Violence.

for recipients, especially for those that are smaller and less well-resourced, and for elementary schools and secondary schools. Some commenters urged the Department to supplement the final regulations with technical assistance resources addressing interactions between these regulations and FERPA, the Equal Access Act, Title VI, the IDEA, and Section 504.

Discussion: The Department acknowledges the recommendation to provide technical assistance and guidance on various topics. The Department agrees that supporting all stakeholders in implementing these final regulations is important and will offer technical assistance to recipients, including elementary schools and secondary schools, as appropriate, to promote compliance with these final regulations. Individuals, including Title IX Coordinators, may contact OCR at *https://ocrcas.ed.gov/contact-ocr* if they have questions about Title IX or the other civil rights laws that OCR enforces. In addition, the Equity Assistance Centers funded by the Department provide technical assistance and training, upon request by school boards and other responsible government entities, in the nondiscrimination assistance areas of race, sex, national origin, and religion to promote equitable education opportunities. Contact information for the Equity Assistance Centers is available at *https://oese.ed.gov/offices/office-of-formula-grants/program-and-grantee-support-services/training-and-advisory-services-equity-assistance-centers/equity-assistance-centers-training-and-advisory-services-contacts/* (last visited Mar. 12, 2024). Individuals seeking assistance regarding the application of FERPA can contact the Department's Student Privacy Policy Office at *https://studentprivacy.ed.gov/?src=fpco.*

Changes: None.

S. Coordination

Comments: One commenter suggested establishing formal coordination within the Department for programs with similar and overlapping purposes as Title IX, including VAWA 2022, the Clery Act, and the Safe Schools Improvement Act, to provide consistency across programs and lead to more efficient and comprehensive implementation. The commenter also noted that many of these programs have data reporting requirements and that sharing this data would lead to more efficient enforcement. Some commenters encouraged the Department to work with the Department of Justice and other agencies to ensure that the prohibitions in the regulations apply across agencies.

Discussion: The Department understands the importance of intra-agency and interagency coordination. In 1980, President Carter signed Executive Order 12250, which among other things, directs the Attorney General to coordinate the implementation and enforcement of Title IX. The Department is committed to working with our Federal agency partners—including the Department of Justice through their coordinating authority under Executive Order 12250—to promote consistent enforcement. These final regulations apply only to recipients of Federal financial assistance from the Department.

The Department has coordinated and will continue to coordinate, including sharing data when appropriate, among offices within the Department that have jurisdiction over programs that have similar and overlapping purposes as Title IX, as appropriate.

Changes: None.

T. Terminology

Comments: Some commenters suggested the Department use the term ''person'' or ''worker'' rather than ''student'' or ''employee'' to describe the individuals Title IX protects. The commenters asserted these terms are consistent with the statutory text, which prohibits discrimination against ''any person'' under an education program or activity, including visitors and independent contractors, as well as other individuals who are either taking part or trying to take part in a recipient's education program or activity.

Discussion: While the Department acknowledges comments received about the terminology used to describe whom Title IX protects, it has determined that the language used in the final regulations is appropriate. The Department acknowledges that Title IX prohibits a recipient from discriminating on the basis of sex in its education program or activity and extends protections to any ''person'' but notes that this terminology in the Department's Title IX regulations has generally been consistent since the 1975 regulations. The final regulations similarly use ''person'' to ensure that Title IX's nondiscrimination mandate applies to anyone in a recipient's education program or activity. For example, in addition to covering students and employees, the definition of ''complainant'' also covers a person other than a student or employee who was participating or attempting to participate in the recipient's education program or activity at the time of the alleged sex discrimination, and § 106.2 defines hostile environment sex-based harassment as conduct that limits or denies a person's ability to participate in or benefit from the recipient's education program or activity. The Department notes that where the final regulations use terms like ''applicant,'' ''student,'' or ''employee'' such terms are used not to narrow the application of Title IX's nondiscrimination mandate but to require particular actions by the recipient reasonably intended to benefit applicants, students, or employees, or to require a recipient's employees to take particular actions.

Changes: None.

U. Discipline of Student Organizations

Comments: One commenter representing a trade association of men's fraternities asked the Department to clarify how a postsecondary institution must respond to allegations of sex discrimination that impact an entire student organization or group of student organizations. The commenter urged the Department to make clear that student organizations have due process rights, need a way to challenge allegations of sex discrimination, and should not be preemptively punished.

Discussion: Nothing in the final grievance procedure regulations under § 106.45, and if applicable § 106.46, confers due process rights on an organization because an organization cannot be a respondent subject to such a proceeding. *See* § 106.2 (definition of ''respondent''). However, beyond grievance procedures, the Department notes that when a recipient is notified of conduct that reasonably may constitute sex discrimination under Title IX or this part, the recipient must also take other appropriate prompt and effective steps to ensure that sex discrimination does not continue or recur within the recipient's education program or activity, and that these steps may pertain to an organization or entity. *See* § 106.44(f)(1)(vii). While the final regulations do not require a recipient to afford due process rights and an opportunity to challenge allegations of sex discrimination to a student organization as part of its Title IX obligations, nothing in the final regulations precludes a recipient from doing so. A recipient might also act against an organization if the recipient concludes that the organization violated the recipient's code of conduct, but that would be an exercise of the recipient's own disciplinary authority independent of these final regulations. Finally, any individual, or group of individuals, who believes a recipient has discriminated against them on the basis of sex in a

manner prohibited under Title IX may file a complaint with OCR, which OCR would evaluate and, if appropriate, investigate and resolve consistent with the requirement under Title IX that a recipient operate its education or activity free from sex discrimination.

Changes: None.

V. Contractors

Comments: One commenter asked the Department to strengthen the requirements in §§ 106.4(c) and 106.51(a)(3) related to contractors to clarify that recipients are responsible for any discriminatory conduct by third-party contractors and vendors, including those that provide monitoring software that discriminates against LGBTQI+ students.

Discussion: The Department acknowledges the concern about discriminatory conduct by contractors. The Department did not propose changes to §§ 106.4(c) or 106.51(a)(3), but the Department appreciates the opportunity to clarify that a recipient may not absolve itself of its Title IX obligations by delegating, whether through express contractual agreement or other less formal arrangement, its operations to contractors. The current regulations require a recipient to provide assurance that its education program or activity will be operated in compliance with the Department's Title IX regulations and authorize OCR ''to specify . . . the extent to which such assurances will be required of the applicant's or recipient's subgrantees, contractors, subcontractors, transferees, or successors in interest.'' 34 CFR 106.4(a), (c). OCR requires recipients to provide assurance that they ''will ensure that all contractors, subcontractors, subgrantees, or others with whom it arranges to provide services or benefits are not discriminating in violation of [Title IX and other laws enforced by OCR].'' U.S. Dep't of Educ., Office for Civil Rights, Assurance of Compliance—Civil Rights Certificate, *https://www.ed.gov/ocr/letters/boy-scouts-assurance-form.pdf* (last visited Mar. 12, 2024).

The Department declines to opine on how Title IX may apply to monitoring software because its application may depend on a number of factors, including the specific software and how it is used. Anyone who believes a recipient or its contractors has engaged in sex discrimination, including through monitoring of students, may file a complaint with OCR.

Changes: None.

W. Data Collection and Climate Surveys

Comments: Some commenters asked the Department to strengthen the Civil Rights Data Collection (CRDC) by, for example, collecting and disaggregating data on harassment and discipline of students based on pregnancy, parental status, gender identity, sexual orientation status, disability, family status, and economic status.

Some commenters said that the Department should require recipients to conduct or improve campus climate surveys, or that the Department should provide guidance on how to conduct such surveys. One commenter encouraged the Department to require postsecondary institutions to maintain and publish data about their sex-based harassment cases to provide transparency and identify any illegal discrimination in how postsecondary institutions implement their sex-based harassment policies.

Discussion: The Department did not specifically request comments on OCR's CRDC or future data collections in the July 2022 NPRM, and it would be appropriate to specifically solicit public comment about any changes to data collection and publication practices before making such changes. The Department notes that nothing in the final regulations precludes a recipient from collecting demographic data relating to the recipient's Title IX complaints, including sex-based harassment complaints, and from disaggregating such data, provided that it does so consistent with its nondisclosure obligations under § 106.44(j) and other Federal, State, and local laws regarding dissemination of data.

Regarding climate surveys, these final regulations provide recipients with the discretion and flexibility to determine how best to assess their students' and employees' experiences with sex-based harassment or sex discrimination generally, including through a recipient's optional use of such surveys, which may be one way to assess obstacles to equal opportunity. *See* § 106.44(b) (barriers to reporting). In addition, VAWA 2022 requires the Secretary of Education, in consultation with other Federal agencies and experts, to develop an online survey tool regarding postsecondary student experiences with domestic violence, dating violence, sexual assault, sexual harassment, and stalking.[99] Following the development of the online survey tool, postsecondary institutions that receive Federal assistance must administer the online survey and publish campus-level results of the online survey on their website. Although the requirements in VAWA 2022 regarding the creation and administration of an online survey tool are only applicable to postsecondary institutions, once the survey tool is developed, elementary schools and secondary schools may also find it useful to review and adapt for their own purposes. In addition, elementary schools and secondary schools may find it useful to review the information available from the Department's National Center on Safe Supportive Learning Environments at *https://safesupportivelearning.ed.gov* (last visited Mar. 12, 2024) for assistance in conducting a climate survey.

Changes: None.

X. OCR Enforcement Practices

Comments: Some commenters expressed concern that OCR's voluntary resolution agreements are inadequate to deter a recipient from committing additional violations of Title IX and suggested additional penalties for recipients, including fines, lawsuits, referrals to the U.S. Department of Justice, suspension of eligibility for Federal contracts and financial aid, or direct accountability for a recipient's senior leadership and legal officers.

A group of commenters asked the Department to clarify what constitutes a violation of the regulations such that a postsecondary institution would be deemed ineligible for Federal student aid, including Pell grants; how that institution would be notified of the determination; and any review or appeal process for the decision. One commenter expressed concern that OCR's complaint processing procedures are too slow to be effective. One commenter recommended that the Department provide a safe harbor for recipients who lack sufficient resources for full compliance but demonstrate good faith through a variety of means, including maintaining best practices for addressing sex-based harassment and substantial compliance with the essential requirements of Title IX.

Some commenters urged the Department to publicize OCR case resolutions involving discrimination and harassment based on sexual orientation and gender identity. Some commenters asked the Department to collect and report disaggregated OCR complaint data related to complaints of discrimination and harassment based on sexual orientation, gender identity, sex characteristics, including intersex traits, and sex stereotypes.

[99] Public Law 117–103, sec. 153 (Mar. 15, 2022).

Discussion: In connection with suggestions regarding additional penalties for recipients for Title IX violations, the Department's enforcement authority under 20 U.S.C. 1682 and as set forth in 34 CFR 100.8 (incorporated in § 106.81) provides that the Department may seek compliance ''by the suspension or termination of or refusal to grant or to continue Federal financial assistance or by any other means authorized by law.'' Remedial action required of a recipient for violating Title IX or these final regulations may therefore include any action consistent with 20 U.S.C. 1682, and may include equitable and injunctive actions as well as financial compensation to a complainant, as necessary under the specific facts of a case.

The Department disagrees that voluntary resolution agreements are inadequate to deter recipients from committing additional Title IX violations. In the Department's experience, these resolution agreements have proven effective in correcting Title IX violations.[100] In addition, if a recipient fails to comply with a voluntary resolution agreement, the Department may take additional actions to address non-compliance with Title IX, including the initiation of administrative proceedings to suspend, terminate, or refuse to grant or continue Federal financial assistance or refer the case to the U.S. Department of Justice for judicial proceedings to enforce any rights of the United States. OCR details the entirety of its enforcement process, including the process the Department must follow prior to termination of Federal financial assistance, in its Case Processing Manual.

The Department clarifies that recipients are bound by Title IX and this part as a condition of their eligibility for Department funding. The Department emphasizes that it cannot pursue termination of Federal financial assistance or refer a matter to the Department of Justice unless a recipient refuses to voluntarily correct a violation after the Department has notified the recipient of the violation. *See* 20 U.S.C. 1682; 34 CFR 100.8.

Additionally, in response to the request for OCR to publicize its case resolutions, the Department notes that it already makes OCR's resolution agreements available to the public on its website in a database that can be searched by name of recipient or generally by protected category and that this is sufficient to inform the public of OCR's work. *See, e.g., https://www2.ed.gov/about/offices/list/ocr/frontpage/caseresolutions/sex-cr.html* (last visited Mar. 12, 2024). OCR will continue to highlight specific cases of note to the public through other means as appropriate to ensure awareness.

The Department acknowledges the commenter's concerns about timely resolution of complaints. While the Department strives to resolve cases efficiently and understands the importance of timeliness to the parties, OCR's necessary case processing time will vary based on many factors, including the allegations and facts presented. The Department declines to include a safe harbor for recipients that address sex-based harassment but do not comply with all of the requirements in the final regulations because it is important for all recipients to comply with the regulations in their entirety to ensure that statutory objectives are met.

In addition, the July 2022 NPRM did not specifically propose changes to OCR's complaint procedures generally, including with respect to additional penalties or other means of deterrence, publicizing cases, and collecting and reporting data. It would be appropriate to seek public comment on that issue before making changes.

Changes: None.

Y. Severability

Comments: None.

Discussion: As discussed in the preambles to the 2020 amendments, 85 FR 30538, and the July 2022 NPRM, 87 FR 41398, it is the Department's position that each of the provisions of these final regulations discussed in this preamble serve an important, related, but distinct purpose. Each provision provides a distinct value to recipients (including elementary schools, secondary schools, and postsecondary institutions), other recipients of Federal financial assistance, students, employees, the public, taxpayers, and the Federal government separate from, and in addition to, the value provided by the other provisions. To best serve these purposes, the Department clarifies that the severability clauses in part 106, including §§ 106.9, 106.18 (redesignated in these final regulations as § 106.16), 106.24, 106.46 (redesignated in these final regulations as § 106.48), 106.62, 106.72, and 106.82 continue to be applicable. The Department also confirms that each of the provisions in the final regulations is intended to operate independently of each other and that the potential invalidity of one provision should not affect the other provisions. Thus, for example, the prohibition on retaliation (§ 106.71 of the final regulations) and the provision on application of Title IX to a sex-based hostile environment under a recipient's education program or activity even when some conduct that occurred outside of the recipient's education program or activity or outside of the United States contributed to the hostile environment (§ 106.11 of the final regulations), operate independently of each other and of each of the remaining regulatory provisions of these final regulations. Similarly, specific grievance procedure requirements in the final regulations, such as § 106.45(b)(6), which requires an objective evaluation of all evidence that is relevant and not otherwise impermissible and prohibits credibility determinations based on a person's status as a complainant, respondent, or witness, operate separately from the clarification of the scope of sex discrimination under § 106.10 of the final regulations. Further, as explained in the discussion of final § 106.10, that provision lists bases of discrimination that involve consideration of sex—sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity—which are distinct from the various forms of sex discrimination that may occur, including sex-based harassment, sexual violence, and the prevention of participation consistent with gender identity, which are addressed in §§ 106.2 and 106.31(a) of the final regulations, respectively. The Department believes that every provision of the final regulations is legally supportable, individually and in the aggregate, but includes this discussion to remove any ''doubt that [it] would have adopted the remaining provisions of the Final Rule'' without any of the other provisions, should any of them be deemed unlawful. *Mayor of Baltimore* v. *Azar,* 973 F.3d 258, 292 (4th Cir. 2020) (en banc) (citation and quotation marks omitted).

Changes: None.

Z. Addressing Other Issues

Comments: Some commenters suggested broadening the scope of the proposed regulations to address other issues, for example: removing the regulatory provisions related to single-sex education; school discipline, including with respect to the intersection of sex and race and the disparate impact of discipline on girls of color; systemic discrimination in academia; requiring recipients to publish expenditures on athletic

[100] *See generally* U.S. Dep't of Educ., Office for Civil Rights, Fiscal Year 2022 Annual Report (2023), *https://www2.ed.gov/about/reports/annual/ocr/report-to-president-and-secretary-of-education-2022.pdf* (highlighting key enforcement actions in each of OCR's jurisdictional areas).

programs and setting expenditure limits; balancing Federal financial assistance between men's and women's athletic programs; limitations on service of alcohol by on-campus organizations; mandatory availability of rape kits and drug tests in college health centers; advertisement of free legal resources for students and employees; issues impacting students with special needs, students who are immigrants, and students who are English learners; requiring individuals found responsible for sexual assault to register as sex offenders; suicidal ideation among individuals involved in Title IX matters; emphasis on science, technology, engineering, and math (STEM) and career and technical education (CTE); and stronger and more transparent connections between postsecondary administrations and the student body related to student advocacy on sex-based harassment issues, including discussions with community organizations and legal service providers.

Discussion: The July 2022 NPRM did not specifically propose changes related to these issues, including single-sex education; the intersection of sex and race in school discipline; systemic discrimination in academia; funding for athletic programs (including requirements to publish expenditures on these programs and set expenditure limits); alcohol availability on campus; advertising free legal resources; availability of rape kits and drug tests; issues related to students with special needs, immigrants, or English learners; sex offender registries; suicidal ideation; STEM and CTE; and the relationship between a postsecondary institution's administration and its student body related to student advocacy on sex-based harassment. The Department has determined it would be appropriate to specifically seek public comment before regulating on these issues. The Department also notes that, although not required, nothing in the final regulations precludes a recipient from advertising free legal resources or making rape kits and drug tests available in its health center. Similarly, although not required, nothing in the final regulations precludes a postsecondary institution from allowing students to bring representatives from community organizations and legal service providers to discussions with the postsecondary institution on sex-based harassment issues.

The Department notes that all recipients of Federal financial assistance from the Department, including institutions of vocational education and other recipients that operate STEM and CTE programs, must comply with the final regulations. The Department also clarifies that the final regulations do not alter existing regulations under the Department's other civil rights laws, including Title VI, Section 504, and the ADA. The Department will continue to enforce the Department's regulations under those laws. Anyone who believes that a recipient is discriminating on the basis of race, color, national origin, sex, or disability may file a complaint with OCR, which OCR would evaluate and, if appropriate, investigate and resolve consistent with the applicable statute and regulations. The Department also notes that the final regulations at § 106.44(g) require a recipient to offer and coordinate supportive measures as appropriate, which may include counseling for a party who is experiencing suicidal ideation. Additionally, the Department does not have the authority under Title IX to require individuals found responsible for sexual assault to register as sex offenders because sex offender registration is governed by other Federal, State, or local laws.

Changes: None.

AA. Comments Outside the Scope of Title IX

Comments: The Department received a number of comments on issues and concerns that fall outside of the scope of Title IX.

Discussion: The Department does not address comments that raised concerns not directly related to the proposed regulations or Title IX, or that were otherwise outside the scope of the proposed regulations as published in the July 2022 NPRM.

Changes: None.

Regulatory Impact Analysis (RIA)

The Department expects the final regulations to result in wide-ranging benefits for students, teachers, and other employees in federally funded schools and postsecondary institutions as it aims to fulfill Title IX's prohibition on sex discrimination. The final regulations address several topics, including the scope of sex discrimination; recipients' obligations not to discriminate based on sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity; and recipients' obligations to provide an educational environment free from discrimination on the basis of sex. When implemented, the final regulations will help ensure that all students experiencing sex discrimination receive appropriate support and that recipients' procedures for investigating and resolving complaints of sex discrimination are fair to all involved. The final regulations also embed discretion and flexibility for recipients to account for variations in school size, student populations, and administrative structures, which will minimize burdens.

Among other things, the provisions in the final regulations—in furtherance of the critical purposes of Title IX—protect student complainants who have been subjected to sex-based harassment, including sexual assault, and sex discrimination. They advance educational equity and opportunity and strengthen protections for students who face discrimination based on sexual orientation or gender identity. And they require fair, evenhanded school procedures for complaints of sex discrimination. These and other benefits discussed in this preamble significantly outweigh the modest costs imposed by the final regulations.

In response to its July 2022 NPRM, the Department received many comments on its estimates of the burden of the proposed regulations, principally regarding an anticipated increase in the number of complaints and/or the relative complexity of certain new complaints. In response to those comments, the Department has reviewed its assumptions and estimates, including making updates as discussed below. As a result of these updates, the Department estimates the final regulations will not impose substantial new burdens that are not justified by the significant benefits the Department expects from implementation of the final regulations. Below, the Department addresses comments related to the regulatory impact analysis.

A. Comments on the Department's Model and Baseline Assumptions

1. Regulatory Flexibility Act (Small Business Impacts)

Comments: Commenters offered a variety of opinions on the proposed regulations' potential effects on small entities. For example, some commenters asserted that the proposed regulations give recipients greater flexibility, which they said would benefit small recipients that will have options for compliance that better align with their resources and capacity. Other commenters expressed concern that small entities lack the capacity to handle costs associated with a potential increase in Title IX investigations due to the proposed regulations' requirements. Some commenters asserted that the Department failed to explain the methodology behind the alternative size standard it used, based on enrollment

data. One commenter stated their belief that the Department mischaracterized the Small Business Administration (SBA) threshold for small entities in the education sector as below $7,000,000 in revenue.

Another commenter noted the Department classified 44 percent of four-year educational institutions and 42 percent of two-year educational institutions as small entities under its alternative size standard, but asserted that under SBA size standards and 2017 Statistics of U.S. Businesses data, at least 61 percent of colleges, universities, and professional schools, and 81 percent of junior colleges had revenues below the SBA standard and so should be assessed as small entities.

Some commenters asserted the Department was required under the Regulatory Flexibility Act to analyze how the economic impact of its proposed regulations would differ across subsets of small entities, including small religious educational entities.

Discussion: The final regulations benefit small recipients because the regulations provide compliance options that better align with small recipients' resources and capacity. As discussed in the July 2022 NPRM, the Department's model accounts for this additional flexibility. *See* 87 FR 41546.

The Department acknowledges commenters' concerns that some small entities may lack the capacity to handle costs associated with an increase in Title IX complaints. The Department estimates that inclusion of the additional bases of sex discrimination within the scope of the Department's Title IX regulations may result in a 10 percent increase in the number of investigations conducted annually. *See* 87 FR 41548, 41550 & n.27. The Department carefully considered the potential increase in Title IX investigations in connection with the July 2022 NPRM and did not receive information that requires a change to that assumption or highlights circumstances in which the increase in the number of investigations would increase so dramatically that it would impose prohibitive burdens.

Nor did commenters submit data necessitating a change to the Department's cost estimates. Although one commenter asserted that the Department's projected net increase in costs of $3,090–$8,986 per year inaccurately assesses the impact of the regulations, the commenter did not provide information that would change that estimate. The estimated costs, moreover, may be lower for religious educational entities that claim an exemption under § 106.12.

The Department previously explained the methodology behind the alternative size standard it used. 87 FR 41564. As in the 2020 amendments, for purposes of assessing the impacts on small entities, the Department proposed using enrollment as a basis for defining ''small institutions of higher education (IHE).'' *See* 85 FR 30570. As discussed in the preamble to the 2020 amendments, the Department did not purport to adopt the SBA revenue standard under 13 CFR 121.201 and declines to do so here. Therefore, the comparative percentages, which were based on SBA regulatory size standards, are inapposite. As explained in more detail in the discussion of the Regulatory Flexibility Act below, the Department is not using a $7,000,000 revenue threshold to define small LEAs in the final regulations. The Department acknowledges the suggestion to separately analyze the impact on the smallest entities, but notes that, as stated in the July 2022 NPRM, the Department's model assumes that each small IHE would conduct the same number of investigations per year, on average, as the total universe of all affected IHEs. 87 FR 41564. That assumption probably overstates the costs because it is much more likely that small IHEs will conduct fewer investigations per year and therefore, their actual realized costs will be less than estimated by the Department.

The Department also considered the impact of the final regulations on a subset of smaller entities, noting that, according to data from the Integrated Postsecondary Education Data System (IPEDS), approximately 175 IHEs had total reported annual revenues of less than $900,000, and those IHEs enrolled, on average, 36 students in Fall 2020. *Id.* Similarly, according to data from the National Center for Education Statistics (NCES), in 2018–2019, 123 LEAs had total revenues of less than $1,760,000 and enrolled, on average, 35 students each in the 2018–2019 school year. Based on the significantly lower enrollment at small IHEs and LEAs, the Department does not anticipate that the final regulations will place a substantial burden on smaller IHEs or LEAs because, in the Department's predictive judgment, it is ''highly unlikely'' that these recipients will conduct the number of investigations that would impose significant costs. *Id. See also* the discussion of the Regulatory Flexibility Act below.

While some commenters expressed concern that the Department underestimated the resources required to implement the regulations and overestimated the administrative capacity that is available for recipients that are elementary schools or secondary schools, no new or additional data was provided that would change the Department's model or baseline assumptions on these points. Changes to the model related to nondiscrimination policies and grievance procedures are discussed below.

Changes: None.

2. Taxpayer Costs

Comments: Commenters asserted that the July 2022 NPRM ignores the cost of increased institutional compliance on State taxpayers, although they did not suggest any changes in the Department's cost estimates on that basis.

Discussion: Federal regulations often have a potential effect on State taxpayers, but commenters did not provide data that would change the Department's estimates. Moreover, the qualitative benefits of the final regulations in terms of fulfilling Title IX's mandate, which increases educational opportunities that have lasting, positive economic effects, more than justify any increase in cost.

Changes: None.

3. Cost Estimate

Comments: Some commenters asserted the Department's cost projections in the July 2022 NPRM mention a ''cost estimate'' but lack concrete figures and fail to identify the financial burden the proposed regulations would impose on recipients. Other commenters asserted that the Department underestimated the costs associated with the proposed regulations.

Discussion: The Department disagrees that the cost estimate lacks concrete figures. The July 2022 NPRM contains a detailed analysis of the estimated costs, starting at 87 FR 41551. Although the commenters did not provide any supplementary data upon which the Department could reasonably rely, the RIA of the final regulations includes a detailed analysis of estimated costs, including changes that the Department made in response to comments it received on some of the estimates in the RIA that was included in the July 2022 NPRM. The Department's overall cost estimates have not changed significantly; however, as a result of these changes and other factors outside of the Department's control, such as an increase in the number of affected entities and updated median hourly wage rates, the Department has revised its July 2022 NPRM estimated total monetary cost savings of between $9.8

million to $28.2 million, *see* 87 FR 41546, to an estimated total monetary cost of $4.6 million to $18.8 million over ten years.

Changes: As explained in greater detail below, the Department has revised its assumptions and estimates and made the following updates:

- Updated the number of affected entities to align with the most current data;
- Updated median hourly wage to the most recent Bureau of Labor Statistics data;
- Increased the Department's assumption regarding the number of incidents resulting in an offer of supportive measures; and
- Increased the Department's assumption regarding the number of hours required for Title IX Coordinators to review policies and procedures, revise grievance procedures, and assess related training requirements.

4. Definition of Sex-Based Harassment (§ 106.2)

Comments: Some commenters stated that the proposed definition of ''sex-based harassment'' would result in a significant increase in the volume of complaints and increased litigation and liability costs. One commenter stated the Department failed to consider more reasonable alternatives to its proposed changes to the definition of ''sexual harassment.'' Some commenters were concerned that the proposed definition of hostile environment sex-based harassment would require recipients to address more complaints through their Title IX grievance procedures, which would impose an additional burden and expense on recipients who revised procedures to comply with the 2020 amendments. One of these commenters also noted that, especially at smaller postsecondary institutions, this would divert attention from sexual assault and quid pro quo harassment, which commenters said should be the priority under Title IX.

Discussion: In the July 2022 NPRM, the Department explained at length that it estimates that inclusion of the additional forms of sex discrimination, including sex-based harassment, may result in a 10 percent increase in the number of investigations conducted annually. *See* 87 FR 41550 & n.27. Commenters did not provide any data that would change the Department's estimates. The Department also acknowledged in the July 2022 NPRM that there may be some costs associated with litigation. *See* 87 FR 41561. But commenters did not provide any data that would change the estimates or the Department's recognition that there may be some, but not extensive, costs associated with litigation due to the final regulations.

The Department disagrees that the definition of hostile environment sex-based harassment requires recipients to address significantly more complaints or detracts attention from sexual assault or quid pro quo harassment. At present, under the 2020 amendments, recipients are obligated to address multiple forms of sex-based harassment, including hostile environment, sexual assault, and quid pro quo harassment. Commenters did not provide an adequate basis to reject the estimates associated with the revised definition of hostile environment sex-based harassment, which has been carefully crafted to cover conduct that constitutes sex discrimination and fully effectuate Title IX's nondiscrimination mandate. With respect to the definition of hostile environment sex-based harassment, the Department carefully considered public comments, which are addressed in the discussion of the definition of ''sex-based harassment'' in § 106.2.

The Department considered several alternatives to the final definition of ''sex-based harassment,'' including maintaining the definition of ''sexual harassment'' from the 2020 amendments and different wording options for the definition of hostile environment sex-based harassment and concluded that none captures the benefits of the final definition in § 106.2.

Changes: For explanation of the changes to the definition of ''sex-based harassment,'' see the discussion of the definition of ''sex-based harassment'' in § 106.2.

5. Nondiscrimination Policy and Grievance Procedures (§ 106.8)

Comments: Some commenters asserted the Department underestimated the time and cost it will take recipients to review the regulations and revise their policies, procedures, and nondiscrimination statements.

Some commenters opposed as burdensome, duplicative, and impractical the proposed requirement that a recipient include its notice of nondiscrimination in each handbook, catalog, announcement, bulletin, application form, and recruitment material. One commenter said the Department failed to show there is a benefit that outweighs the costs of requiring a printed notice rather than a link on a recipient's website.

Discussion: The Department acknowledges that, as with any new regulations, it will take some time to review requirements and revise policies and procedures to align with those requirements. The Department, exercising its expertise and applying its knowledge based on past experiences with regulated entities taking time to come into compliance with new requirements, provided detailed estimates of costs related to reading and understanding the regulations; revising policies; publishing notices of nondiscrimination; training Title IX Coordinators; updating training materials; and other compliance-based costs. *See, e.g.,* 87 FR 41563.

In response to commenters who asserted that the costs of implementing new Title IX procedures, and training on those procedures, might be especially burdensome in the elementary school and secondary school context and the vocational context, where the commenters assert that the existing infrastructure for Title IX compliance is not as robust, the Department has factored in those costs. *See* RIA, Cost Estimates (Section 4.C), Review of regulations and policy revisions. Although any predictive judgment about these types of compliance costs includes an element of uncertainty, no commenter provided any statement beyond speculation that the Department underestimated costs in any meaningful way. Out of an abundance of caution, however, and to address commenters' concerns, the model has been updated to reflect an increase from 6 to 12 hours for a recipient's Title IX Coordinator to review the regulations and revise policies, procedures, and notices of nondiscrimination, which increases costs by $14.3 million in the first year when revisions will be necessary.

Recognizing commenter concerns about burden, duplication, and impracticability regarding publication of the notice of nondiscrimination, the Department notes that the final regulations at § 106.8(c)(2) account for space and format limitations and provide recipients flexibility by giving recipients the option to provide a shorter version of the notice of nondiscrimination, if necessary. *See* discussion of § 106.8(c)(2). The short-form notice—a one-sentence statement that the recipient prohibits sex discrimination in any education program or activity that it operates and that individuals may report concerns or questions to the Title IX Coordinator, together with a link to the full notice of nondiscrimination on the recipient's website—provides the minimum information sufficient to ensure campus community member awareness of a recipient's Title IX obligations without unduly burdening recipient resources. In addition, a recipient may include its

notice of nondiscrimination in its handbooks, catalogs, announcements, bulletins, and application forms in the same manner it makes those materials available; in print if it distributes those materials in print, and electronically if it maintains those materials only electronically. This option supports the Department's cost estimate for publishing the notice of nondiscrimination. 87 FR 41563.

Changes: The Department has increased its estimate of the number of hours necessary for a recipient's Title IX Coordinator to review policies, revise grievance procedures as necessary, and assess related training requirements from 6 hours to 12 hours.

6. Training Requirements (§ 106.8(d))

Comments: Some commenters asserted that the Department underestimated the time and expenses related to training requirements in the final regulations.

Discussion: The Department factored in time for the Title IX Coordinator to assess training requirements as part of the estimates of time needed for the Title IX Coordinator to review and revise policies, grievance procedures, and notices of nondiscrimination. As discussed above, the Department increased its estimate for these Title IX Coordinator responsibilities from 6 hours to 12 hours. The Department disagrees that its model in the July 2022 NPRM underestimated time needed to provide training in the first year and in subsequent years. 87 FR 41552.

As explained in the discussion of § 106.8(d) related to frequency of training, several commenters asked the Department to clarify how often training must be conducted and whether a recipient would be required to retrain employees when their duties shift. In response to these comments, the Department has modified § 106.8(d) to require training promptly upon hiring or a change of position that alters an employee's duties under Title IX, and annually thereafter. Training employees is accounted for in the model and does not meaningfully change recipients' annual burden to provide training as compared to the 2020 amendments.

The training obligations with respect to the notification requirements in § 106.44(c) are not unduly burdensome because the information employees will have to learn and convey to students who approach them is straightforward and can be incorporated into already-required training sessions. The Department also reviewed the potential effects of the training requirements on small entities and has determined that the cost will not impose an unreasonable burden. *See* RIA, Cost Estimates (Section 4.C), Revisions to training.

While the Department understands that recipients will need to dedicate some additional resources for training under § 106.8(d), based on the Department's estimates, the benefits of comprehensive training outweigh the costs. *See* discussion of § 106.8(d) and the benefits, time, and expense of training.

Changes: As explained in the discussion of § 106.8(d) related to frequency of training, the Department modified § 106.8(d) to require training promptly upon hiring or a change in position that alters the employee's duties under Title IX, and annually thereafter.

7. Recordkeeping (§ 106.8(f))

Comments: Some commenters stated that proposed § 106.8(f) will significantly increase the administrative burden associated with recordkeeping and case management, arguing that the proposed regulations will cause an increase in reports, outreach, supportive measures, investigations, informal resolutions, and determinations, all of which will require recipients to create and maintain more records. One commenter observed that many K–12 and smaller postsecondary recipients do not have electronic recordkeeping systems.

Discussion: The Department acknowledges the commenters' concerns regarding recordkeeping costs and notes that its estimates acknowledged that not all recipients have electronic recordkeeping systems. *See* 87 FR 41558. In response to comments, and as explained in the discussion of § 106.8(f), the Department has removed the requirement in § 106.8(f) that recipients maintain all records documenting actions the recipient took to meet its obligations under §§ 106.40 and 106.57. In addition, the final regulations require a recipient to make its training materials available upon request for inspection by members of the public, as opposed to making them publicly available on the recipient's website. These changes will relieve some of the administrative burden associated with recordkeeping.

In order to ensure that the Department's estimates fully capture any burdens related to recordkeeping, the Department has not revised its estimate of the burden associated with the requirements of § 106.8(f). The Department believes that the revisions to § 106.8(f) combined with the retained burden estimate are sufficient to address commenters' concerns regarding underestimates of the burden of recordkeeping requirements.

Changes: As explained in more detail in the discussion of § 106.8(f), the Department has modified § 106.8(f) to remove the requirement that recipients maintain all records documenting actions the recipient took to meet its obligations under §§ 106.40 and 106.57 and no longer require a recipient to make its training materials publicly available on its website.

8. Application of Title IX (§ 106.11)

Comments: Some commenters asserted the Department underestimated the costs associated with investigating a hostile environment that may result from an incident that occurred outside of the United States.

Discussion: The Department acknowledges the commenters' feedback on the costs associated with investigating hostile environment sex-based harassment that may result from an incident that occurred outside of the United States. To be clear, § 106.11 does not require recipients to investigate conduct that occurred outside of the United States. That provision requires a recipient to address a sex-based hostile environment under its education program or activity, even when some conduct alleged to be contributing to the hostile environment occurred outside of the recipient's education program or activity or outside the United States. *See* § 106.11 and the accompanying discussion. As stated in the July 2022 NPRM, the Department does not have a basis upon which to develop estimates for this change. 87 FR 41554. Commenters did not provide additional data that would lead the Department to modify its cost projections. In light of the likely small number of investigations of hostile environment sex-based harassment resulting from extraterritorial conduct, the Department maintains its current cost estimates.

Changes: None.

9. Duty To Address Sex Discrimination (§ 106.44)

Comments: Some commenters argued that the Department did not adequately consider factors, explore sufficient data, and make necessary estimates in connection with its removal of the actual knowledge requirement for sexual harassment or allegations of sexual harassment. One commenter stated that the Department must evaluate the costs of removing the actual knowledge requirement together with broadening the requirement that a recipient's administrators report and act in response to ''anything that 'may constitute sex discrimination.' '' The

commenter stated the costs of compliance the Department must consider would also include restrictions on speech to avoid liability.

Discussion: This preamble discusses the actual knowledge standard in connection with § 106.44(a), and the Department disagrees that it did not adequately consider its estimates in connection with these changes. As explained in the discussion of § 106.44(c), in response to comments, the notification requirements in § 106.44(c) have been modified to require an employee with notification duties to take action when the employee has information about conduct that reasonably may constitute sex discrimination under Title IX or this part. This change was made to address commenters' concerns that the scope of reportable conduct was unclear. In the Department's estimates, costs associated with these notification requirements are considered as part of training expenses. Other costs related to a recipient's duty to address sex discrimination in its education program or activity are considered in connection with the Title IX Coordinator's duties. Commenters did not provide additional data that would lead the Department to modify its cost projections related to its notification requirements.

The Department disagrees that the costs of compliance must include restrictions on speech to avoid liability. As discussed throughout this preamble, nothing in Title IX and the final regulations requires recipients to infringe on constitutionally protected speech.

Changes: None.

10. Title IX Coordinator Obligations: Duty To Monitor (§ 106.44(b) and (f))

Comments: Some commenters asserted that the Department underestimated the cost of implementing proposed § 106.44(b), in part because new provisions in VAWA 2022 require postsecondary institutions to conduct climate surveys, which the commenter stated will likely be administered by Title IX offices.

One commenter stated that while some recipients already monitor their education programs and activities for barriers to reporting sex discrimination, the Department's assessment that the costs of implementing proposed § 106.44(b) would be de minimis is wrong because it will take some recipients more time to perform tasks such as developing and conducting assessments, evaluating the results, and developing new initiatives or training to monitor and address barriers.

Other commenters stated that Title IX Coordinators would be unduly burdened because, for example, they would not be able to satisfy all the requirements that proposed § 106.44(f) and other proposed provisions would impose on them. In addition, they would not have the capacity to oversee each person or office of a recipient that might assist in performing the required steps and would not be permitted to delegate administrative tasks related to fulfilling these duties.

Discussion: The Department acknowledges commenters' concerns about potential compliance costs, including in light of other compliance obligations related to VAWA 2022, but provisions in statutes other than Title IX are beyond the scope of the final regulations. The Department notes that the July 2022 NPRM provided suggestions and examples of how a recipient could comply with § 106.44(b) while acknowledging that recipients vary in size and resources that may impact how they implement this provision. 87 FR 41436. The Department continues to believe that recipients should have the flexibility to determine which strategies would be most appropriate and effective in their educational setting.

In the July 2022 NPRM, the Department identified several low-cost methods recipients may use to monitor for barriers to reporting, such as incorporating questions designed to elicit information from students and employees about barriers to reporting into existing training materials and incorporating such questions into conversations with students, employees, and others during roundtable discussions or listening sessions with interested stakeholders. 87 FR 41558. The Department also identified steps with a de minimis cost that a recipient could take to remove these barriers, should they be identified, such as reminding students, employees, and others during trainings about the range of reporting options available at a particular recipient or reporting an employee who discourages students from reporting to human resources for violating the recipient's code of ethics standards. *Id.* Commenters did not provide additional data that would lead the Department to modify its cost projections related to monitoring for barriers to reporting.

The Department acknowledges commenters' concerns that § 106.44(f), alone and together with other provisions in the final regulations, impacts and expands the scope of a Title IX Coordinator's duties and responsibilities. The final regulations provide a role for a recipient's Title IX Coordinator that centralizes duties, promotes accountability, and enables effective Title IX compliance. However, nothing in § 106.44(f) precludes a recipient from authorizing its Title IX Coordinator to delegate specific duties to one or more designees as long as one Title IX Coordinator retains ultimate oversight over the assigned duties. *See* § 106.8(a).

A comprehensive response to possible sex discrimination is essential to achieving Title IX compliance so that Title IX Coordinators can respond to patterns, trends, and risk factors. The Title IX Coordinator's oversight of a recipient's response to individual reports and required action to address and prevent future sex discrimination for all participants in a recipient's education program or activity will help recipients provide a nondiscriminatory educational environment as required by Title IX.

Changes: For an explanation of the changes to § 106.44(b) and (f), see the discussions of § 106.44(b) and (f).

11. Notification Requirements (§ 106.44(c))

Comments: Some commenters stated that what they characterized as the requirement that all employees in elementary schools and secondary schools report Title IX violations would be expensive and that the Department has not shown it is necessary.

One commenter asserted that recipients with significant research, volunteer, community outreach, or land-grant programs often employ individuals in temporary or cyclical positions and stated that such employees may shift positions and take on new roles that cause them to change from one notification category to another under proposed § 106.44(c). The commenter stated that the costs of training, re-training, and tracking the training status for all such employees on their notification obligations would be a significant burden.

Another commenter suggested an alternative to proposed § 106.44(c), which the commenter stated would be less costly for recipients to implement. The commenter suggested requiring a recipient to designate some of its employees as confidential employees and to designate all other employees except employees in administrative leadership positions as ''mandatory referrers.''

Discussion: As discussed above, the notification requirements in § 106.44(c) have been modified to require employees with notification duties to take action when the employee has

information about conduct that reasonably may constitute sex discrimination under Title IX or this part. An elementary school or secondary school recipient must require all employees who are not confidential employees to notify the Title IX Coordinator when the employee has information about conduct that reasonably may constitute sex discrimination under Title IX. This requirement provides greater benefits and lower burdens as compared to the 2020 amendments, which deemed a recipient to have ''actual knowledge'' when any employee of an elementary school or secondary school had notice of allegations of sexual harassment, but provided no clear indication of what they should do with that information.

Costs associated with the final regulations' notification requirements are considered as part of training expenses. The cost associated with an employee's notification of the Title IX Coordinator is de minimis. Costs related to the recipient's duty to address sex discrimination in its education program or activity once the Title IX Coordinator is notified of conduct that reasonably may constitute sex discrimination are considered in connection with the Title IX Coordinator's duties.

As explained in the discussion of § 106.44(c), the Department has modified and streamlined the notification requirements, which will make the training requirements related to notification easier for recipients. For recipients other than elementary schools and secondary schools for whom all employees are treated the same, there are two categories of non-confidential employees with notification requirements when they have information about conduct that reasonably may constitute sex discrimination: (1) employees who have authority to institute corrective measures on behalf of the recipient or who have responsibility for administrative leadership, teaching, or advising in the recipient's education program or activity; and (2) all other non-confidential employees. The first group must notify the Title IX Coordinator when the employee has information about conduct that reasonably may constitute sex discrimination under Title IX; the second group must either notify the Title IX Coordinator or provide the contact information of the Title IX Coordinator and information about how to make a complaint of sex discrimination when the employee has information about conduct that reasonably may constitute sex discrimination under Title IX. These changes make notification less costly than what would have been required by the proposed regulations. Moreover, postsecondary recipients have the discretion to simplify training even further by training all non-confidential employees to notify the Title IX Coordinator.

With respect to the concern that recipients with significant research, volunteer, community outreach, or land-grant programs often employ individuals in temporary or cyclical positions that cause them to change from one notification category to another, the Department disagrees that the costs of training, re-training, and tracking the training status for all such employees on their notification obligations will be a significant burden under the final regulations. Under § 106.8(d)(1)(iii), a recipient must train all employees on all applicable notification requirements under § 106.44. A single training can notify all employees at such recipients of the two different notification requirements, so even if an employee were to move between categories, they would have the requisite information regarding their notification requirements. And, as mentioned above, a recipient can choose to train all employees to notify the Title IX Coordinator. In addition, the Department has revised § 106.8(d) to clarify that training must occur promptly when an employee changes positions that alters their duties under Title IX or the final regulations and annually thereafter so any changes in their notification responsibilities would be covered by this training.

The Department acknowledges the commenter's suggestion to make all non-confidential employees mandatory referrers, but the Department has determined that the final regulations appropriately balance complainant autonomy and a recipient's obligation to respond to sex discrimination. The final regulations, as modified, will more comprehensively protect students from conduct that reasonably may constitute sex discrimination under Title IX.

Changes: For an explanation of the changes to § 106.44(c), see the discussion of § 106.44(c).

12. Provision of Supportive Measures (§ 106.44(f)–(g))

Comments: Some commenters asserted that recipients are likely to provide significantly more supportive measures under the proposed regulations than they provide under the 2020 amendments because the Department proposed to broaden the scope of Title IX. The commenters asserted that the expansion of supportive measures will result in increased costs related to the provision, coordination, and implementation of supportive measures, and, in some cases, litigation. One commenter stated that, under the 2020 amendments, many people preferred supportive measures over filing a complaint and that it is likely the number of individuals accessing supportive measures rather than pursuing the formal grievance process is closer to at least ten to one, and stated this number is likely to increase with additional reports. The commenter did not provide any data or other support for their estimation.

Discussion: Recipients have an obligation under Title IX to address sex discrimination covered by the statute, including ensuring that access to the recipient's education program or activity is not limited or denied by such sex discrimination. Supportive measures are designed to restore or preserve a party's access to the recipient's education program or activity. 87 FR 41421. As such, supportive measures are available for all forms of sex discrimination, which is consistent with the proposed and final definition of ''supportive measures'' in § 106.2 and with § 106.44(a). 87 FR 41448. The Department also clarifies that supportive measures include measures that a recipient deems to be ''reasonably available,'' consistent with the definition of ''supportive measures.''

The Department recognizes that the number of incidents in which the parties would be provided supportive measures would likely increase compared to the 2020 amendments because of the broader range of incidents triggering an offer of them under the final regulations relative to the 2020 amendments. As a result, the Department estimates increases in any related costs associated with providing supportive measures.

As described in Section 4.C of the RIA below, the Department estimates the number of incidents in which supportive measures are offered (and the resulting number of instances in which such measures are provided and their related costs). Specifically, in the July 2022 NPRM, 87 FR 41553–54, the Department estimated that there would be approximately 1.5 times as many incidents in which supportive measures are offered relative to the number of times a recipient initiated its grievance procedures (*e.g.,* if a recipient annually initiated its grievance procedures 10 times, there would be 15 additional instances in which a recipient would offer supportive measures, 90 percent of which would be accepted). In reviewing these assumptions in light of public

comment, the Department recognizes that this initial estimate may have failed to capture the full range of incidents in which supportive measures would be offered. The Department has therefore increased its estimated factor from 1.5 to 2.0, effectively increasing the number of instances in which supportive measures would be offered and, as a result, provided, by 33 percent. The Department has retained its initial estimate that individuals will accept 90 percent of the supportive measures offered to them and of the cost of providing such measures ($250 per incident). For additional explanation of supportive measures, see the discussion of § 106.44(g).

Changes: The Department has increased the assumptions related to the number of incidents in which the parties would be offered supportive measures by 33 percent.

13. Impartial Review of Supportive Measures (§ 106.44(g)(4))

Comment: One commenter asserted that proposed § 106.44(g)(4), which would require an appropriate, impartial employee to consider challenges to supportive measures, would be difficult to implement at small institutions where often the Title IX Coordinator is the only employee trained in the requirements of Title IX. The commenter asserted that the administrative burden imposed by this provision would not be justified in the context of providing supportive measures.

Discussion: The Department disagrees with the commenter's assumption that § 106.44(g)(4) would require recipients to develop an entire administrative structure; it only requires, at minimum, assigning one person to handle challenged decisions. The Department estimates that providing an impartial employee to consider such challenges would incur a negligible monetary cost per incident and that the cumulative annual costs to the recipient would therefore be at a de minimis level. The Department also anticipates that these costs will either be reduced in the long-term or be offset by savings from other proposed changes (*e.g.,* changes to the grievance procedure requirements) and from the anticipated reduction in instances of sex discrimination. Moreover, the importance of this independent review outweighs any burdens it may impose. For additional explanation of the impartial review of supportive measures, see the discussion of § 106.44(g)(4).

Changes: None.

14. Grievance Procedures (§§ 106.45 and 106.46)

Comments: Some commenters, including a system of State postsecondary institutions, supported the proposed regulations as more time- and cost-effective than the existing regulations.

Other commenters disagreed with the Department's cost estimates of the new grievance procedures. For example, some commenters expressed concern that the proposed requirements for grievance procedures would place unmanageable administrative burdens on a recipient. Some commenters suggested the regulations would detract from a recipient's efforts to identify, prevent, and remedy sex discrimination in its education program or activity. And some commenters expressed concern that having one set of grievance procedures to address sex-based harassment and another set for other forms of sex discrimination would create confusion for recipients as to which requirements apply to which complaints.

One commenter said the revised definition of ''sex-based harassment'' and the application of § 106.45 to all other sex discrimination complaints would be more burdensome than the 2020 amendments.

Other commenters argued that, in connection with changes to the grievance procedures, any short-term financial savings to recipients would be offset by costs associated with respondents' diminished due process rights and the lasting economic and intangible costs related to respondents who are erroneously found responsible for sexual misconduct and expelled or dismissed.

Discussion: The Department disagrees with some commenters' assertions that respondents have diminished due process rights under the requirements related to grievance procedures and that the grievance procedures result in respondents being erroneously found responsible for sexual misconduct. As discussed in more detail in the preamble, the final regulations appropriately and fairly safeguard the due process rights of both complainants and respondents and include requirements in grievance procedures that ensure fair, transparent, and reliable outcomes. Specifically, the final regulations provide for notice of the allegations; an opportunity for the parties to respond to the allegations; an adequate, reliable, and impartial investigation; and an objective evaluation of all relevant and not otherwise impermissible evidence. Additional procedures are required for allegations of sex-based harassment involving a student party at postsecondary institutions.

The Department also observes that, under §§ 106.45 and 106.46, recipients retain significant flexibility and discretion, including regarding decisions to implement grievance procedures in a cost-effective manner. That flexibility and discretion extends to designating the reasonable timeframes that will apply to grievance procedures; using a recipient's own employees as investigators and decisionmakers or outsourcing those functions to contractors; using an individual decisionmaker or a panel of decisionmakers; offering informal resolution options; determining which disciplinary sanctions to impose following a determination that sex discrimination occurred; and selecting appeal procedures. The final regulations also remove requirements and prohibitions imposed by the 2020 amendments that stakeholders identified as overly prescriptive, restrictive, and time-consuming, including requirements related to written notice in elementary schools and secondary schools, the requirement to hold a live hearing (although recipients may still choose to hold a live hearing), the prohibition on the single-investigator model, and the requirement to create an investigative report (although recipients may still choose to create an investigative report).

For these reasons, the final regulations account for both the administrative concerns recipients have raised and the need to ensure a nondiscriminatory educational environment through procedures that are designed to promote fair, accurate outcomes in sex discrimination complaints. The 2020 amendments included requirements that applied only to sexual harassment complaints, which invited variations in the grievance procedures recipients implemented for other types of sex discrimination. The final regulations, which apply to all forms of sex discrimination and include discrete additional requirements for sex-based harassment complaints involving students at postsecondary institutions, provide greater clarity and more streamlining under one set of requirements for most of a recipient's Title IX compliance obligations than what is afforded under the 2020 amendments.

Although the streamlining and clarity that the final regulations afford will result in recipients addressing all sex discrimination complaints under § 106.45, and if applicable § 106.46, the

Department disagrees that this approach is unreasonably costly or burdensome in a manner that outweighs the benefits of ensuring that all sex discrimination complaints are resolved through grievance procedures that the Department determined are designed to ensure fair and reliable outcomes that meet the requirements of Title IX. *See* 87 FR 41546–47, 41554–58. In response to the commenter that stated that compliance with the requirements of the 2020 amendments necessitated additional staff and generated significant paperwork, the Department notes that the final regulations include specific changes to the requirements of the 2020 amendments that aim to make grievance procedures less burdensome without reducing their efficacy or fairness. For example, the final regulations leave to a recipient's discretion whether to provide a written notice of allegations outside the context of complaints of sex-based harassment involving a postsecondary student. *See* § 106.45(c). The final regulations also give postsecondary institutions the discretion to assess credibility through a live hearing or through another live questioning process when investigating complaints of sex-based harassment involving a postsecondary student. *See* § 106.46(f)(1). For further explanation of the costs and burdens related to live hearings with questioning by an advisor, see the discussions of § 106.46(f) and (g).

Further, §§ 106.45 and 106.46 provide the benefit of outlining clear requirements for grievance procedures to all parties and recipients. Additionally, the final regulations provide grievance procedures that ensure fair and reliable outcomes in all types of sex discrimination complaints, including sex-based harassment complaints that involve a postsecondary student party. Through its enforcement work, OCR has recognized that reasonably prompt timeframes and an adequate, reliable, impartial investigation, among other requirements in §§ 106.45 and 106.46, are essential to ensuring a prompt and equitable resolution for all sex discrimination complaints, including sex-based harassment. The Department also heard from a range of commenters, including recipients and entities that represent them, that the proposed grievance procedure requirements were well suited to address sex discrimination complaints in their settings. Accordingly, the Department has determined that the benefits of requiring recipients to institute grievance procedures consistent with § 106.45, and if applicable § 106.46, to resolve sex discrimination complaints justify the minimal burdens of compliance.

The Department acknowledges that Title VII and Title IX impose different requirements in some respects and that some recipients will need to comply with both Title VII and Title IX. Although commenters have noted certain differences, they have not explained why it would be impossible or unduly burdensome for a recipient to comply with both standards. There is no inherent conflict between Title VII and Title IX, including in the final regulations. For further explanation, see the discussion of Framework for Grievance Procedures for Complaints of Sex Discrimination (Section II.C).

Changes: For an explanation of the changes to specific provisions of grievance procedures in §§ 106.45 and 106.46, see the discussions of the relevant provisions (Section II.D–E).

15. Regulatory Stability and Reliance Interests

Comments: Some commenters stated that the proposed regulations would be the third set of Title IX regulations in eleven years and that each revision requires a recipient to adopt new policies that students and employees must learn and understand.

Discussion: The Department shares commenters' concerns about the importance of regulatory stability and the need for recipients and members of their educational community to have clear information about their rights and responsibilities under Title IX. By retaining and enhancing many of the requirements in the 2020 amendments, the final regulations provide the regulatory stability that is necessary to promote broad understanding of Title IX's nondiscrimination mandate and the rights and responsibilities it confers in educational settings that receive Federal financial assistance.

The Department acknowledges that a recipient may have relied on or incorporated the 2020 amendments into its policies, practices, or procedures that affect students and employees, including collective bargaining agreements. The Department considered such reliance interests and ultimately determined that certain proposed changes were warranted; however, mindful of such reliance interests, the final regulations either maintain the requirements of the 2020 amendments or make certain provisions permissive rather than mandatory. *See, e.g.,* §§ 106.45(d)(1) and 106.46(g). The Department also notes that collective bargaining agreements generally recognize an entity's obligation to comply with applicable laws and contain procedures for consulting with the union and renegotiating provisions that conflict with applicable laws.

While such negotiations may cause disruptions, the Department has determined that the benefits of the final regulations—both in terms of ensuring that recipients comply with Title IX's nondiscrimination mandate and ensuring that all participants in the grievance procedures receive the process they are due—justify the burdens caused by any renegotiation of a recipient's collective bargaining agreements. Moreover, commenters did not provide, and the Department does not have, data from which to estimate how many collective bargaining agreements would need to be renegotiated and therefore has not included the costs of such renegotiations in its cost projections.

Changes: None.

16. Training for Decisionmakers (§ 106.46(f)(4))

Comments: One commenter objected to proposed § 106.46(f)(4) and asserted it would require extra training for decisionmakers that would increase costs and outweigh any benefits.

Discussion: The Department disagrees that final § 106.46(f)(4) will result in an increase in recipient costs to implement required decisionmaker training. Recipients are already required to train decisionmakers under the 2020 amendments. While the content of the training will be adjusted, it is unlikely that the length of training would have to change for decisionmakers in connection with § 106.46(f)(4); therefore, any associated burden for these individuals would not change as a result of the final regulations. The benefits of training decisionmakers, including by ensuring that grievance procedures are equitable and ensure transparent and reliable outcomes, justify any administrative cost. For further explanation of required changes to the content of training and any associated costs and burdens, see the discussion of § 106.8(d).

Changes: None.

17. Single-Investigator Model (§ 106.45(b)(2))

Comments: Some commenters supported the single-investigator model permitted by § 106.45(b)(2) on the grounds that it would allow recipients to shorten grievance procedure timelines, allow the individual with the most knowledge of the investigation to make the determination, and increase efficiency in scheduling. One commenter stated that although the

Department and commenters asserted that small recipients struggle with the administrative capacity to handle grievance procedures, the Regulatory Impact Analysis in the 2020 amendments indicated that the regulatory changes adopted in 2020 would generate additional costs to small IHEs of only approximately 0.28 percent of annual revenue. The commenter further stated that the Department estimated the average amount of time for an IHE investigator to perform their duties as between 10 and 18 hours per complaint and between 2 and 8 hours for each decisionmaker, leading the commenter to question the Department's conclusion that the prohibition on the single-investigator model results in burdensome costs or elongated complaint resolution processes.

Discussion: The Department's decision to permit the single-investigator model was not based solely on the number of hours required for a decisionmaker to perform their tasks. As explained in the July 2022 NPRM, the single-investigator model supports quality grievance procedures and decision-making, and recipients expressed their belief that the single-investigator model resulted in more students seeking institutional support and resolution of complaints. 87 FR 41467. In light of these benefits, the Department determined that recipients should have the option of utilizing the single-investigator model to resolve complaints of sex discrimination under Title IX. For further explanation of the single-investigator model, see the discussion of § 106.45(b)(2).

Changes: None.

18. Pregnancy or Related Conditions (§§ 106.40 and 106.57(e))

Comments: Some commenters stated that the Department did not adequately estimate the costs of requiring recipients to provide reasonable modifications for students and lactation spaces to students and employees, which the commenters asserted would amount to significant costs for many recipients. One of these commenters stated the Department failed to identify how many schools currently offer a lactation space and reasonable modifications for lactation, or how many lactation spaces the proposed regulations would require. Another commenter stated that the Department must account for reasonable modifications that would be required for parents (other than those who are pregnant or experiencing pregnancy-related conditions). Some commenters raised concerns that the proposed regulations' requirements regarding notifying students of information regarding pregnancy rights under § 106.40(b)(2) or (b)(3)(i) were unduly costly or burdensome to recipients because, for example, they would require additional staff time and training. Some commenters asked about the impact and costs, including litigation costs and costs related to abortion, of the proposed regulations on postsecondary institutions, medical schools, and hospitals.

Discussion: The Department views the final regulations regarding reasonable modifications for students and lactation spaces for students and employees as best effectuating Title IX by preventing sex discrimination and ensuring equal access to a recipient's education program or activity for students who are pregnant or experiencing pregnancy-related conditions. Although there are limited data quantifying the economic impacts of sex discrimination, the Department determined, based on its review of public comments, that barriers related to pregnancy or related conditions can prevent students from obtaining a high school diploma, pursuing higher education, or obtaining a postsecondary degree, which limits their economic opportunities and may have long-term or generational impacts.

The Department does not anticipate significant costs to recipients based on the final regulations related to reasonable modifications for students and lactation spaces for students and employees. For example, the Department points out that some costs noted by commenters are not new given recipients' obligation since 1975 to provide leave in connection with pregnancy, childbirth, termination of pregnancy, and related recovery. *See* 40 FR 24128. Given these existing obligations, some commenters are likely overstating the increased costs or burdens for implementing reasonable modifications. Recipients have existing obligations that are similar to those under § 106.40(b)(3)(ii), which require a recipient to make certain modifications to a policy, practice, or procedure, such as providing a student a larger desk, allowing more frequent bathroom breaks, or permitting temporary access to elevators. 87 FR 41560. As stated in the July 2022 NPRM, the requirement for reasonable modifications because of pregnancy or related conditions builds upon the former ''reasonable and responsive'' standard and sets a clearer framework for how to assess what must be provided. *Id.* As such, the Department does not anticipate that the required steps for compliance with the ''reasonable modifications because of pregnancy or related conditions'' requirement under § 106.40(b) would be significantly more costly than under the prior OCR interpretation of a recipient's duties. Nor do the final regulations, which provide more clarity regarding a recipient's responsibilities in connection with reasonable modifications, change the cost estimates in the model. Even if a recipient were to incur some additional cost due to its new awareness of its previous responsibilities, the Department disagrees that any such minimal additional costs or burdens would outweigh the benefits of clarifying a recipient's obligation to provide, and ensuring that students are able to access, reasonable modifications for pregnancy or related conditions.

In connection with lactation spaces, the final regulations require the minimum acceptable standards for privacy, sanitation, and functionality necessary for students and employees to attend to their lactation needs at school, be free from discrimination, and maintain equal access to the recipient's education program or activity. *See* 87 FR 41522. In addition, nearly all recipients under Title IX are already required to provide a virtually identical physical space for employees under the PUMP Act, 29 U.S.C. 218d.[101] *Id.* Additionally, as explained below, many State and local laws also require recipients to provide lactation spaces. Although it is possible that the regulations' clarification that a lactation space must be available for both students and employees may result in an increase in demand for such a space, any such increase would likely result in a de minimis impact on costs as distributed over all recipients over time. The final regulations do not require recipients to make any particular changes to facilities. In particular, they do not dictate a precise number of spaces that every facility must have as this will be a fact-specific determination that may ebb and flow over time based on factors such as how many people need to use such a space, when, and where on the recipient's campus. As explained in the July 2022 NPRM, the Department anticipates that a recipient currently without a designated lactation space would likely be able to comply with § 106.40(b)(3)(v) using existing space at minimal cost, partly because there is no requirement that a lactation

[101] Although the PUMP Act, which expanded the types of employees entitled to lactation time and space under the FLSA, was signed into law on December 29, 2022 (Pub. L. 117–328), recipients have been subject to similar lactation time and space requirements since March of 2010 as part of the Affordable Care Act amendment to the FLSA that added (r)(1) to § 7. Public Law 111–148, 124 Stat 119 (2023).

space be a particular size, shape, or include features other than being private and clean, and not a bathroom. *See* 87 FR 41559–60. Lactation spaces do not need to be designated as such for 24 hours a day, so there is no need to create new space. If a recipient chose to retrofit a space, for example by adding keypad locks or a chair to an existing space, such costs are minimal. Further, it is the Department's view that these de minimis costs are outweighed by the benefits of requiring a recipient to provide an appropriate space for a student or employee who is lactating, including allowing them to remain in school or employment during the early months or years of a child's life, which helps eliminate a sex-based barrier to education or employment.

With respect to reasonable modifications required for parents (other than those who are pregnant or experiencing pregnancy-related conditions), the Department notes that the final regulations require that recipients provide reasonable modifications only to students who are pregnant or experiencing pregnancy-related conditions and not to their partners, family members, or others not pregnant or experiencing pregnancy-related conditions. Accordingly, the Department did not analyze the costs of modifications not imposed by the final regulations.

Costs associated with the final regulations' notification requirements under § 106.40(b)(2) and (b)(3)(i) are considered as part of the RIA below. *See* RIA, Cost Estimates (Section 4.C), Revisions to training. The cost associated with an employee or Title IX Coordinator informing a student of their rights is de minimis, and the latter is considered in connection with the Title IX Coordinator's duties. Training costs, including those that would address the employee actions required under § 106.40(b)(2) and (b)(3)(i), are explained above in the discussion of training requirements under § 106.40(d).

Sections 106.40 and 106.57(e) of the final regulations do not require a recipient to provide or pay for any benefit or service, including the use of facilities, related to abortion; therefore, commenters' concerns regarding abortion-related costs are unfounded. For further explanation, see the discussion of the definition of ''pregnancy or related conditions'' in § 106.2 (Section III). Other costs identified by the commenters, such as costs to taxpayers due to increased litigation were speculative or unrelated to any requirements of the pregnancy provisions.

Changes: None.

19. Scope of Sex Discrimination (§ 106.10)

Comments: Some commenters argued that the Department failed to calculate the financial, health, administrative, and legal costs to society that commenters asserted would result from the Department's proposed changes. For example, some commenters said the Department failed to consider the effects on recipients of expanding the scope of the regulations to include gender identity discrimination, including an increase in Title IX complaints.

Other commenters asserted that the Department must analyze the benefits and burdens of its proposed regulations with more granularity (*i.e.,* benefits and burdens on men versus women).

Discussion: Although the Department recognizes that clarifying the scope of Title IX could result in increased costs to recipients, especially those recipients that limited the application of their Title IX policies to those bases of discrimination explicitly referenced in the 2020 amendments, the non-monetary benefits of providing clarity and fulfilling the broad scope of Title IX's protections justify the costs associated with the implementation of these robust protections. *See* 87 FR 41562.

The Department has considered the benefits and burdens of the final regulations and their impact on all individuals on the basis of sex. While the Department strongly agrees that recipients have a legitimate interest in protecting all students from sex discrimination, it disagrees that such goals are inconsistent with § 106.10. The Department disagrees that by recognizing discrimination based on gender identity as sex discrimination, it has disregarded potential harms to students or employees and disagrees that additional granularity to quantify benefits and burdens is necessary. For further explanation, see the discussions of §§ 106.10 and 106.31(a)(2).

The Department estimates that inclusion of these bases of sex discrimination within the scope of the Department's Title IX regulations may result in a 10 percent increase in the number of investigations conducted annually. *See* 87 FR 41550 & n.27. In the July 2022 NPRM, the Department also acknowledged that there may be some costs associated with litigation and the Department disagrees with commenters who suggested that litigation costs would increase significantly due to the final regulations. 87 FR 41561. Commenters did not provide any data that would change the estimates or the Department's recognition that there may be some, but not extensive, costs associated with litigation due to the final regulations. It is the Department's view that the final regulations provide clear requirements for recipients to comply with Title IX.

Changes: None.

20. Menstruation or Related Conditions

Comments: The Department received many comments requesting that menstruation or related conditions be included within the scope of the Title IX regulations, as discussed elsewhere in this preamble.

Discussion: The Department clarifies in this preamble that menstruation or related conditions is included within the scope of Title IX as defined in § 106.10. The Department recognizes that clarifying the scope of Title IX could result in a marginal increase in costs to recipients, especially those recipients that limited the application of their Title IX policies to those forms of conduct explicitly referenced in the 2020 amendments, but the non-monetary benefits of providing clarity and fulfilling the broad scope of Title IX's protections justify the costs associated with the implementation of these robust protections. As noted in the discussion of § 106.10, these regulations do not require recipients to incur the cost of providing menstrual products.

Changes: None.

21. Other

Comments: Some commenters stated that, if the Department requires religious educational institutions to prepare a request for religious exemption, the Department would have to calculate the costs to religious educational institutions and to the Department. They also said that the Department should account for costs to religious educational institutions and their students if a request for a religious exemption is denied. One commenter stated that any proposed changes to the existing regulations would impose additional regulatory costs and paperwork burdens which would not justify making a change to the religious exemption.

Other commenters argued that the Department did not take into consideration the costs to religious students in non-religious institutions who will feel pressure to violate their religious beliefs, and who may choose not to attend or work at federally funded schools because of their sincerely held religious beliefs.

Discussion: The Department is not proposing any changes to § 106.12 related to religious exemptions, and nothing in the final regulations alters

assurances that specific religious institutions have already received from OCR. Religious institutions are not required to seek assurance of a religious exemption before asserting it, although they may do so voluntarily, and the Department does not envision an increase in such requests. The final regulations do not require religious students or employees to change their beliefs, because the regulations address conduct that constitutes sex discrimination, which is prohibited by Title IX, and not religious beliefs. Section 106.6(d) explicitly states that nothing in the regulations requires a recipient to restrict rights protected under the First Amendment or other constitutional provisions. The Department, likewise, must act in accordance with the U.S. Constitution. In addition, the Department notes that Title IV of the Civil Rights Act of 1964, which is enforced by the Department of Justice's Civil Rights Division, specifically prohibits public schools and higher education institutions from discriminating based on religion. For further information on the First Amendment and religious exemptions from Title IX, see the discussion of Hostile Environment Sex-Based Harassment—First Amendment Considerations (§ 106.2) (Section I.C) and the discussion of Religious Exemptions (Section VII).

Changes: None.

B. Regulatory Impact Analysis (RIA)

Under Executive Order 12866,[102] as amended by Executive Order 14094, the Office of Management and Budget (OMB) must determine whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive Order and subject to review by OMB.[103] Section 3(f) of Executive Order 12866, as amended by Executive Order 14094, defines a ''significant regulatory action'' as an action likely to result in regulations that may—

(1) Have an annual effect on the economy of $200 million or more (as of 2023 but adjusted every 3 years by the Administrator of the Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product), or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or Tribal governments or communities);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise legal or policy issues for which centralized review would meaningfully further the President's priorities, or the principles stated in the Executive Order, as specifically authorized in a timely manner by the Administrator of OIRA in each case.

This final regulatory action is ''significant'' and therefore subject to review by OMB under section 3(f)(4) of this Executive Order because it raises legal or policy issues for which centralized review would meaningfully further the President's priorities, or the principles stated in the Executive Order.

The Department has also reviewed the regulations under Executive Order 13563,[104] which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only on a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' OIRA has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

Under Executive Order 13563, the Department determined that the benefits of the final regulations justify their costs. In choosing among alternative regulatory approaches, the Department selected those approaches that maximize net benefits. Based on the analysis that follows, the Department determined that the final regulations are consistent with the principles in Executive Order 13563.

The Department has also determined that this regulatory action would not unduly interfere with State, local, territorial, or Tribal governments in the exercise of their governmental functions.

This RIA discusses the need for regulatory action, the potential costs and benefits, assumptions, limitations, and data sources, as well as regulatory alternatives considered. Although most of the costs related to information collection are discussed within this RIA, under the Paperwork Reduction Act of 1995, this notice also identifies and further explains burdens specifically associated with information collection requirements.

1. Need for Regulatory Action

In 2021, the President directed the Department in both Executive Order 13988 [105] and Executive Order 14021 [106] to review its regulations implementing Title IX for consistency with Title IX's statutory prohibition on sex discrimination by a recipient of Federal financial assistance in its education program or activity. Consistent with those Executive Orders, the Department reviewed the regulations based on Federal case law under Title IX, its experience in enforcement, and feedback OCR received from stakeholders, including during the June

2021 Title IX Public Hearing [107] and listening sessions. More than 280 students, parents, teachers, faculty members, school staff, administrators, and other members of the public provided live comments during the June 2021 Title IX Public Hearing, and OCR also received more than 30,000 written comments [108] in connection with the hearing. In addition, a wide variety of stakeholders participated in the listening sessions with OCR, including survivors of sexual violence, students accused of sexual misconduct, LGBTQI+ students, and advocates representing these groups of students; organizations focused on Title IX and athletics; organizations focused on free speech and due process; organizations representing elementary schools and secondary schools (or local educational agencies (LEAs)), as well as postsecondary institutions (or institutions of higher education (IHEs)), teachers, administrators, and parents; attorneys representing complainants, respondents, students, and schools; State attorneys general offices; Title IX Coordinators and other school administrators; individuals who provide training on Title IX to schools; individuals who work in campus law enforcement; and individuals who have participated in school-level Title IX proceedings. Based on this review, the Department concluded that it was necessary to amend its regulations to ensure that all aspects of its regulatory framework under Title IX are well suited to implementing Title IX's prohibition on sex discrimination in education programs or activities that receive Federal financial assistance. The Department intends these changes to improve and promote educational environments free of sex discrimination in a manner that recognizes fairness and safety concerns.

The Department considered feedback received from many stakeholders during the June 2021 Title IX Public Hearing and numerous OCR listening sessions, as well as comments received in response to the July 2022 NPRM, stating that the 2020 amendments include onerous requirements for sexual harassment grievance processes that are unnecessarily adversarial in nature—threatening to decrease students' willingness to make complaints or fully participate in the grievance process. These stakeholders also stated that the requirements in the 2020 amendments for sexual harassment grievance processes unduly increase administrative burden and intrude on a recipient's professional judgment and expertise regarding how best to respond to allegations of student misconduct without improving the recipient's ability to address sex discrimination within their educational environment. During the June 2021 Title IX Public Hearing, some stakeholders expressed support for the 2020 amendments, remarking that the requirements governing a recipient's sexual harassment grievance process should remain in place without change, while other stakeholders suggested the Department amend various provisions in the regulations that they deemed important (including the deliberate indifference standard, the actual knowledge requirement, and specific requirements related to the grievance process for formal complaints of sexual harassment). Many stakeholders expressed concerns regarding the scope of the regulatory definition of ''sexual harassment'' from the 2020 amendments, the requirement that a recipient need only respond to sexual harassment when it has actual knowledge, and that it need only respond in a manner that is not deliberately indifferent. Apart from addressing sexual harassment, many stakeholders asked the Department to clarify protections related to discrimination based on sexual orientation and gender identity, presenting a variety of positions that they urged the Department to adopt, while other stakeholders asked the Department to clarify Title IX's protections against discrimination based on pregnancy or related conditions.

The Department amends its Title IX regulations to address the concerns raised by stakeholders and anticipates that the final regulations will result in many benefits to recipients, students, employees, and others, including by:

- Requiring recipients to adopt grievance procedures that provide for the prompt and equitable resolution of complaints of sex discrimination and take other necessary steps to provide an educational environment free from sex discrimination;
- Clarifying the Department's view of the scope of Title IX's prohibition on sex discrimination, including related to a hostile environment under the recipient's education program or activity, as well as discrimination on the basis of sex stereotypes, sex characteristics, sexual orientation, pregnancy or related conditions, and gender identity;
- Clarifying a recipient's obligations to students and employees who are pregnant or experiencing pregnancy-related conditions;
- Clarifying that, unless otherwise permitted by 20 U.S.C. 1681(a)(1) through (9) and the corresponding regulations at §§ 106.12–106.15, 20 U.S.C. 1686 and its corresponding regulation § 106.32(b)(1), or § 106.41(b), a recipient must not carry out any otherwise permissible different treatment or separation on the basis of sex in a way that would cause more than de minimis harm, including by adopting a policy or engaging in a practice that prevents a person from participating in an education program or activity consistent with their gender identity.

As discussed in more detail in the following sections, it is the Department's belief that the regulatory changes will fulfill Title IX's overarching goal: to ensure that no person experiences sex discrimination in education. To that end, the Department aims to ensure that all recipients can implement Title IX's nondiscrimination mandate fully and fairly in their educational environments.

2. Discussion of Costs, Benefits, and Transfers

The Department has analyzed the costs and benefits of complying with the final regulations. Although many of the associated costs and benefits are not easily quantifiable, the Department concludes that the benefits derived from the final regulations justify the associated costs given that the objectives of the rulemaking are to ensure: (1) that sex discrimination does not take place in any education program or activity receiving Federal financial assistance, and (2) that sex discrimination is redressed promptly and effectively if it occurs.

Title IX, which applies to approximately 17,900 LEAs, more than 6,000 IHEs, and numerous other recipients such as libraries and museums, requires a recipient to provide an education program or activity that is free from sex discrimination. The final regulations introduce new obligations and clarify existing obligations of entities subject to the regulations to promote an educational environment free from sex discrimination. The final regulations require recipients to adopt grievance procedures that provide for fair, prompt, and equitable resolution of complaints of sex discrimination and take other necessary steps to provide an

[107] The transcript from the June 2021 Title IX Public Hearing is available at *https://www2.ed.gov/about/offices/list/ocr/docs/202106-titleix-publichearing-complete.pdf.*

[108] The written comments that OCR received as part of the June 2021 Title IX Public Hearing are available at *https://www2.ed.gov/about/offices/list/ocr/public-hearing.html* (last visited Mar. 20, 2024).

educational environment free from sex discrimination; clarify that Title IX's prohibition on sex discrimination includes sex-based harassment in the form of quid pro quo harassment, hostile environment harassment, and four specific offenses; and clarify that sex discrimination includes discrimination on the basis of sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity. The Department expects that the final regulations will benefit recipients, as well as students, employees, and others by ensuring that students, employees, and others understand their rights and recipients understand their responsibilities under Title IX.

The final regulations will provide numerous important benefits some of which are difficult to quantify. Still, it is the Department's view that the changes just described, in addition to others discussed more fully throughout the RIA and preamble, will reduce the occurrence of sex discrimination in a recipient's education program or activity and facilitate a prompt and equitable resolution when sex discrimination occurs, thereby supporting a recipient's efforts to provide an educational environment free from sex discrimination. Although there are limited data quantifying the economic impacts of sex discrimination, including sex-based harassment, on individuals, studies suggest that there is a cost associated with being subjected to sex discrimination. *See, e.g.,* Ctrs. for Disease Control & Prevention, *Fast Facts: Preventing Sexual Violence, https://www.cdc.gov/violenceprevention/sexualviolence/fastfact.html* (last visited Mar. 20, 2024) (describing the economic burden of sexual violence involving physical contact on survivors within their lifetimes); Cora Peterson et al., *Lifetime Economic Burden of Intimate Partner Violence Among U.S. Adults,* 55 Am. J. Preventive Med. 433 (2018) (estimating the cost of intimate partner violence on survivors within their lifetimes). The Department recognizes that sex discrimination in all forms, including sex-based harassment and prohibited retaliation, may have both qualitative and quantitative costs for educational institutions, their students and employees, applicants for admission and employment, their families, and the American educational system and workforce in general, although the Department is unable to quantify reductions in these costs resulting from the final regulations.

Due to the large number of affected recipients (more than 24,000, as discussed more fully in the discussion of Developing the Model (Section 4.B)), the variation in likely responses to any regulatory change, and the limited information available about current practices, particularly at the LEA level, the Department is not able to precisely estimate the likely costs, benefits, and other effects of the final regulations. Despite these limitations, and based on the best available evidence as explained in the discussion of Establishing a Baseline (Section 4.A), the Department estimates that the final regulations will result in an estimated net cost of $18.8 million over ten years at a 7% discount rate and an estimated net cost of $4.6 million over ten years at a 3% discount rate. This is equivalent to an annualized cost of between $543,504 and $2,671,136 depending on the discount rate, over ten years. The final regulations are expected to result in estimated costs of $98,505,145 in the first year following publication of the final regulations, and $12,038,087 in cost savings each year in subsequent years.

Year	Net annual cost
Year 1	$98,505,145
Year 2	(12,038,087)
Year 3	(12,038,087)
Year 4	(12,038,087)
Year 5	(12,038,087)
Year 6	(12,038,087)
Year 7	(12,038,087)
Year 8	(12,038,087)
Year 9	(12,038,087)
Year 10	(12,038,087)
Total Net Present Value (NPV), 7%	18,760,944
Annualized, 7%	2,671,136
Total NPV, 3%	4,636,200
Annualized, 3%	543,504

As discussed in the Cost Estimates (Section 4.C), the Year 1 costs include both one-time costs associated with reviewing and making necessary changes to policies, procedures, and training to implement the final regulations, and on-going costs associated with requirements such as training for Title IX Coordinators, the provision of supportive measures, investigations and adjudications, appeals and informal resolutions, recordkeeping, and monitoring and addressing barriers to reporting sex discrimination. In addition to these estimated Year 1 costs, the Department estimated cost savings in Years 2 through 10, which arise largely from the additional flexibility that recipients will have to design and implement grievance procedures consistent with Title IX under § 106.45, and if applicable § 106.46.

The assumptions, data, methodology, and other relevant materials, as applicable, on which the Department relied in developing its estimates are described throughout this RIA.

3. Benefits of the Final Regulations

This final regulatory action will address the potential gaps in coverage within the regulatory framework that have been raised by stakeholders and commenters and observed by the Department. These include, but are not limited to, the steps a recipient must take with respect to sex discrimination, the requirements for a recipient's grievance procedures for sex discrimination other than sexual harassment, a recipient's obligations toward students and employees who are pregnant or experiencing pregnancy-related conditions, the scope of coverage related to discrimination based on gender identity and sexual orientation, and a recipient's obligation to address prohibited retaliation.

Although the Department cannot quantify in monetary terms the ancillary benefits the final regulations may provide to those who have been subjected to sex discrimination in an educational setting, the Department recognizes that sex discrimination, including sex-based harassment, can have profound and long-lasting economic costs for students, employees, their families, and others who seek to participate in the recipient's education program or activity. Being subjected to sex discrimination in a recipient's education program or activity can affect an applicant's opportunity to enroll in a recipient's education program or activity, a student's ability to learn and thrive inside and outside of the classroom, a prospective or current employee's ability to contribute their talents to the recipient's educational mission, and the opportunity of all participants to benefit, on an equal basis, from the recipient's education program or activity. Likewise, barriers to reporting sex discrimination within a recipient's education program or activity can undermine the recipient's educational environment for the entire community. The final regulations offer a clear and fair framework for fulfilling Title IX's prohibition on sex discrimination in any education program or activity receiving Federal financial assistance.

The final regulations will reduce the long-term costs associated with providing an educational environment free from sex discrimination, thereby producing a demonstrable benefit for students, employees, and others participating or attempting to

participate in the recipient's education program or activity. The Department anticipates those benefits will be realized based on several changes to the regulations. First, the final regulations clarify the scope of Title IX's protection from sex discrimination for students, employees, and others participating or attempting to participate in a federally funded education program or activity and define terms integral to a recipient's obligations under Title IX. Second, the final regulations set out the contours of a recipient's obligation to take action to address sex discrimination, including requiring a recipient's Title IX Coordinator to monitor its education program or activity for barriers to reporting sex discrimination and take steps reasonably calculated to address those barriers. Third, the final regulations modify and strengthen existing training requirements by specifying the range of relevant persons that a recipient must train regarding the recipient's obligations under Title IX and this part. Fourth, the final regulations revise the notification requirements for a recipient, helping to ensure that specific employees notify the Title IX Coordinator when they have information about conduct that reasonably may constitute sex discrimination under Title IX or this part in the recipient's education program or activity. Fifth, the final regulations help ensure the effective provision and implementation of supportive measures, as appropriate, to all complainants and respondents and clarify that when a recipient determines that sex discrimination has occurred, the recipient must provide remedies, as appropriate, to a complainant and any person the recipient identifies as having their equal access to the recipient's education program or activity limited or denied by sex discrimination, and take other appropriate prompt and effective steps to ensure that sex discrimination does not continue or recur within the recipient's education program or activity. Sixth, the final regulations revise the requirements for grievance procedures to provide for the prompt and equitable resolution of complaints of any sex discrimination and allow a recipient the ability to adapt its grievance procedures to its size, population served, and administrative structure while ensuring equitable treatment of all parties. Seventh, the final regulations provide clarity on the rights of students and employees who are pregnant or experiencing pregnancy-related conditions including, for example, by requiring a recipient to inform students of the recipient's obligations, making reasonable modifications to its policies, practices, or procedures as necessary to prevent sex discrimination and to ensure a student's equal access to its education program or activity, requiring a recipient to provide employees with reasonable break time to express breast milk or breastfeed as needed and, with respect to both students and employees, ensuring access to an appropriate space for lactation. Finally, the final regulations clarify that, unless otherwise permitted by 20 U.S.C. 1681(a)(1) through (9) and the corresponding regulations at §§ 106.12–106.15, 20 U.S.C. 1686 and its corresponding regulation § 106.32(b)(1), or § 106.41(b), a recipient must not carry out any otherwise permissible different treatment or separation on the basis of sex in a way that would cause more than de minimis harm, including by adopting a policy or engaging in a practice that prevents a person from participating in an education program or activity consistent with their gender identity.

The Department expects that the final regulations, when reviewed in their totality, will reduce the likelihood of sex discrimination and the overall prevalence of sex discrimination in recipients' educational settings. Although the Department cannot entirely quantify the economic impacts of these benefits, the benefits noted above are substantial and far outweigh the estimated costs of the final regulations.

4. Costs of the Final Regulations

The Department's analysis reviews the Department's data sources, describes the model used for estimating the likely costs associated with the final regulations, and sets out those estimated costs. Due to limited quantitative data, the Department emphasizes that the monetary estimates reflect only the likely costs of this regulatory action and do not seek to quantify, in monetary terms, the costs of sex discrimination, including sex-based harassment and prohibited retaliation.

As described in the Discussion of Costs, Benefits, and Transfers (Section 2), there are limited data quantifying the economic impacts of sex discrimination, including sex-based harassment, on individuals, and studies suggest that there is a cost associated with being subjected to sex discrimination. *See* Ctrs. for Disease Control & Prevention, *Fast Facts: Preventing Sexual Violence;* Peterson et al., *Lifetime Economic Burden of Intimate Partner Violence Among U.S. Adults,* 55 Am. J. Preventive Med. 433. Nonetheless, the final regulations reduce the harms of sex discrimination in multiple ways, including the following:

First, final § 106.44 clarifies a recipient's obligation to take action to address sex discrimination, including sex-based harassment, and expressly covers more conduct than § 106.44 under the 2020 amendments. Specifically, the final regulations require a recipient with knowledge of conduct that reasonably may constitute sex discrimination in its education program or activity to respond promptly and effectively, regardless of whether a complaint is made. Under the 2020 amendments, § 106.44 prescribes only how a recipient must respond to allegations of sexual harassment in its education program or activity when a report is made to certain employees and § 106.44 is silent with respect to a recipient's obligation to respond to other forms of sex discrimination. By prescribing the actions a recipient must take to operate its education program or activity free from sex discrimination, the implemented changes will aid the recipient in reducing—and ultimately eliminating—sex discrimination in its education program or activity. Any initial, short-term costs associated with the implemented change are expected to be both minimal and offset in the longer term by reduced incidence of sex discrimination. The final regulations will increase recipient responsiveness to all reports and complaints of sex discrimination and are also likely to deter or prevent some incidents of sex-based harassment and its associated harms; however, the Department cannot firmly quantify the potential reduction in incidents of sex-based harassment or other forms of sex discrimination.

Second, final § 106.44(f)(1)(ii) and (g) make clear that upon being notified of conduct that reasonably may constitute sex discrimination under Title IX, including sex-based harassment and prohibited retaliation, a Title IX Coordinator must offer and coordinate supportive measures, as appropriate, to the complainant or respondent. Final § 106.44(g) also clarifies that for allegations of sex discrimination other than sex-based harassment or retaliation, a recipient's provision of supportive measures does not require the recipient, its employee, or any other person authorized to provide aid, benefit, or service on the recipient's behalf to alter the alleged discriminatory conduct for the purpose of providing a supportive measure. As the final requirement regarding supportive measures covers prohibited retaliation as well as other forms of sex discrimination not addressed by the

2020 amendments, the Department recognizes that the number of incidents in which the parties will seek supportive measures will likely increase compared to the 2020 amendments, as will any related costs in providing those supportive measures. The Department includes costs associated with such an increase in its model below. As explained in the discussion of supportive measures below, the Department expects that there will be little impact on anticipated costs associated with the final provision requiring supportive measures to be offered to complainants and respondents in connection with forms of sex discrimination other than sex-based harassment because such discrimination will likely relate either to sex discrimination allegations arising out of alleged unequal access to resources or facilities or allegations arising out of alleged sex discrimination in an educational setting such as different treatment on the basis of sex. There will be few appropriate supportive measures for such discrimination, other than eliminating the source of the sex discrimination, which is not required under the definition of ''supportive measures'' and instead may only be provided as a remedy. *See* §§ 106.2, 106.44(g). The Department also anticipates that these costs will either be reduced in the long term or offset by other savings. Those savings may come from other final changes (*e.g.,* changes to the grievance procedure requirements) or from the anticipated reduction in instances of sex discrimination.

The Department expects that the final regulations will increase the use of a recipient's grievance procedures by students and others, thereby resulting in an increase in the prompt and equitable resolution of complaints of sex discrimination in a recipient's education program or activity. The Department has estimated a 10 percent increase in investigations annually. If this estimate holds, it is also reasonable to believe that the final regulations may reduce the prevalence of sex discrimination, including sex-based harassment, as well as the adverse academic, social, emotional, and economic effects of sex discrimination on individuals and recipient communities. Commenters did not provide additional high-quality comprehensive data about the status quo, and the specific choices that recipients will make regarding how to comply with the final regulations; therefore, the Department cannot estimate the effects of the final regulations with absolute precision. However, as discussed below, we estimate the final regulations to result in a net cost of $4,636,200.

4.A. Establishing a Baseline

4.A.1. Data Sources

As discussed in the preamble to the 2020 amendments, the primary challenge associated with estimating the effects of any new regulatory action under Title IX is the lack of comprehensive data on the actions recipients are taking to comply with their current obligations.[109] As part of the comment process on the 2020 amendments and in the July 2022 NPRM, the Department requested information about data sources that would provide this information and which the Department could use to inform its estimates. *See* 83 FR 61484; 87 FR 41546, 41549. The Department did not receive such sources.

In the absence of a recent, high-quality, and comprehensive data source, the Department relies, as it did for the 2020 amendments, on a 2014 report titled Sexual Violence on Campus (2014 Senate Subcommittee Report) issued by the U.S. Senate Subcommittee on Financial and Contracting Oversight.[110] The report included survey data from 440 four-year IHEs regarding the number of investigations of sexual violence that had been conducted during the previous five-year period; however, this report did not address the prevalence of other bases of sex discrimination, including discrimination on the basis of sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity. As described in the discussion of Developing the Model (Section 4.B), the Department adjusted these data, using data from other sources such as data submitted under the Clery Act, to account for these exclusions and assumed that the final regulations may result in a 10 percent increase in the number of annual investigations by recipients that did not previously address these bases of sex discrimination. For LEAs, the Department continues to rely on the publicly available data from OCR's Civil Rights Data Collection (CRDC) regarding sexual harassment incidents to estimate the annual number of investigations in those settings.

4.A.2. Estimates of Annual Investigations of Sexual Harassment Prior to the 2020 Amendments to the Title IX Regulations

To estimate the likely impact of the final regulations, the Department must consider the policies and practices of recipients in responding to sexual harassment prior to the promulgation of the 2020 amendments. This consideration is necessary because the 2020 amendments specified in the Department's Title IX regulations, for the first time, the definition of ''sexual harassment'' and the obligation of a recipient to respond to sexual harassment under Title IX. The final regulations require a recipient to take prompt and effective steps to ensure that sex discrimination, including sex-based harassment that creates a hostile environment based on sex, does not continue or recur in the recipient's education program or activity. This required use of a hostile environment standard encompasses conduct that was addressed in enforcement practice prior to the 2020 amendments; as a result, data regarding recipients' actions regarding sexual harassment prior to the 2020 amendments is helpful for estimating the likely effects of the final regulations. Note that the Department is not assuming that information relating to recipient behavior prior to the effective date of the 2020 amendments impacts the baseline (that is, behavior and burdens in the absence of the final regulations), but rather, several of the changes made by the final regulations remove some of the restrictions on recipient responses to sexual harassment imposed by the 2020 amendments. However, the Department notes that the final regulations create different requirements from those established in its enforcement practices prior to the 2020 amendments. As a result, recipient behavior prior to the effective date of the 2020 amendments, in the Department's view, provides some, but not complete, insight into what recipient behavior will be.

In the 2020 amendments, the Department assumed that the number of incidents reported under the Clery Act could be used as an instrument to estimate total incidents of sexual harassment, including those not captured in the 2014 Senate

[109] The Department's model estimates the total costs of the final regulations. While many of these costs would be borne by recipients, some costs estimated herein may be borne by other entities or individuals. Similarly, while many of the costs detailed herein are the result of requirements of the final regulations, the model also accounts for some non-required costs that are likely to result from this regulatory action (*i.e.,* costs likely to be voluntarily borne by recipients or other entities or individuals).

[110] Claire McCaskill, *S. Subcomm. on Financial Contracting Oversight—Majority Staff, Sexual Violence on Campus,* 113th Cong. (2014), *https://www.hsgac.senate.gov/imo/media/doc/2014-07-09SexualViolenceonCampusSurveyReportwithAppendix.pdf.*

Subcommittee Report; as a result, the Department estimated that, prior to the issuance of the 2020 amendments, IHEs conducted approximately 5.7 Title IX investigations of sexual harassment per year per IHE. *See* 85 FR 30026, 30565. The Department based this estimate on an analysis of the 2014 Senate Subcommittee Report and data submitted by IHEs under the Clery Act.

At the LEA level, the Department does not have publicly reported data on the average number of investigations of sexual harassment occurring each year. The 2017–2018 data from the CRDC indicates an average of 3.23 incidents of sexual harassment per LEA per year.[111] The Department, therefore, assumes that this was the number of investigations of sexual harassment occurring, on average, each year in each LEA.

4.A.3. Lack of Data Following the Promulgation of the 2020 Amendments

Commenters did not provide the Department with reliable statistical data sources about actions taken by recipients following the promulgation of the 2020 amendments. As a result, it is difficult for the Department to conclusively estimate the number of investigations that have occurred since the issuance of the 2020 amendments or the number that would likely occur in later years in the absence of the Department's final regulations. This absence of data means the Department could not construct a baseline from which to estimate the likely effects of the final regulations. Instead, the Department has a reasonable framework for understanding the likely actions recipients would take to comply with the final regulations as well as a benchmark for generating baseline estimates of recipients' actions following the promulgation of the 2020 amendments, based on anecdotal information from experts in the field as well as anecdotal information received from comments in response to the July 2022 NPRM, and feedback from the June 2021 Title IX Public Hearing and in numerous OCR listening sessions. These sources provide some reliable information about actions taken by recipients to comply with Title IX prior to the promulgation of the 2020 amendments. However, in using this anecdotal information, the Department is mindful that the 2020 amendments introduced requirements and definitions not previously promulgated and thus actions prior to the 2020 amendments will not capture all aspects of a recipient's actions following the issuance of the 2020 amendments.

The Department is not attempting to estimate the degree of sex discrimination at recipient institutions. Rather, the Department is attempting to estimate the number of times recipients will be required to engage in activities, such as conducting investigations or providing supportive measures. For instance, in the preamble to the 2020 amendments, the Department estimated that approximately 90 percent of LEAs and 50 percent of IHEs would reduce the number of investigations conducted each year. *See* 85 FR 30567. The Department estimated that, on average, these LEAs would conduct 1.29 fewer investigations per year under the 2020 amendments. The Department also estimated that the annual average reduction in investigations would be 2.84 for those IHEs that reduced their number of investigations. Since making those assumptions in the 2020 amendments, OCR has received feedback from a variety of stakeholders, through the June 2021 Title IX Public Hearing, in listening sessions, and from comments received in response to the July 2022 NPRM, that the actual reduction may have been higher due to the deterrent effect of the perceived burden associated with the sexual harassment grievance process requirements on a complainant's willingness to report sexual harassment or participate in a process to resolve a formal complaint of sexual harassment as required by the 2020 amendments. Further, based on anecdotal reports, the Department understands that many recipients that experienced a reduction in the number of sexual harassment complaints filed at their respective institutions after the 2020 amendments shifted their resolution processes away from what would have been a proceeding under § 106.45 of the 2020 amendments to an alternative disciplinary process, such as a general student conduct process outside of the scope of Title IX. Although this information from recipients and others confirms the Department's 2020 estimate related to the decrease in the number of investigations, it is anecdotal and, as such, does not provide the Department with sufficient evidence on which to revise its 2020 estimate. Further, the Department recognizes that the COVID–19 pandemic resulted in many LEAs and IHEs operating remotely, which may have reduced the incidence or reporting of sexual harassment, the willingness of students and others to initiate a recipient's grievance process in response to alleged sexual harassment, or both. Again, however, the Department has not identified, nor have commenters provided, high-quality research studies to inform its analysis. Therefore, the Department continues to assume that the estimates of the 2020 amendments represent the baseline level of a recipient's actions to comply with Title IX in future years when considered in the absence of the final regulations.

Notwithstanding the estimates used for the 2020 amendments, for recipients that saw reductions in the number of investigations conducted each year under the 2020 amendments, the Department estimates, based on stakeholder feedback, comments it received on the July 2022 NPRM, and its enforcement experience, that many alleged incidents that were previously classified as sexual harassment under subregulatory guidance documents but did not meet the definition of ''sexual harassment'' under the 2020 amendments, were handled by a recipient in other disciplinary processes.

4.B. Developing the Model

After the effective date of the 2020 amendments, the Department assumes that recipients complied with the regulatory requirements and fell into one of three groups in how they handled complaints of sexual harassment that fell outside the scope of § 106.45 under the 2020 amendments:

- *Group A:* Recipients did not adopt a new process to handle complaints falling outside the § 106.45 grievance process in the 2020 amendments;
- *Group B:* Recipients handled complaints falling outside the § 106.45 grievance process in the 2020 amendments through a different grievance process; and
- *Group C:* Recipients handled complaints falling outside the § 106.45 grievance process in the 2020 amendments through a resolution process similar to that process.

The Department has not assumed a recipient would behave differently based on its public or private status. Further, the Department does not distinguish cost structures or burden hours based on public or private status,

[111] U.S. Dep't of Educ., Office for Civil Rights, Civil Rights Data Collection for the 2017–2018 School Year, *https://ocrdata.ed.gov/assets/ocr/docs/2017-18-crdc-data.zip* (open ''2017–18 Public Use Files''; then select ''Data''; then select ''SCH''; then select ''CRDC''; then select ''CSV''; then select the ''Harassment and Bullying.csv'' file) (last visited Feb. 20, 2024). The Department notes that CRDC data are now available for the 2020–2021 school year. However, because of the irregular nature of school attendance that year due to the COVID–19 pandemic, the Department continues to rely on data from the 2017–2018 school year, which the Department anticipates are more typical. The CRDC data for the 2020–2021 school year are available at *https://civilrightsdata.ed.gov/data (last visited Feb. 20, 2024).*

but instead applied an average across all recipients in each analytical group. The Department also assumes recipients in all three groups generally complied with the requirements of the 2020 amendments. To the extent that a recipient did not comply with some or all of those requirements, the following estimates may overestimate or underestimate actual costs of the final regulations for that recipient.

To populate each of the three groups, the Department is using the same disbursement it used in the 2020 amendments' analysis. That is, the Department assumes that approximately 5 percent of LEAs, 5 percent of IHEs, and 90 percent of other recipients [112] fall into Group A. Generally, the Department does not anticipate that LEAs or IHEs, which usually have existing disciplinary processes and a history of compliance with Title IX, would adopt the minimal framework of Group A. In contrast, other recipients, as defined in footnote 112, are less likely to have alternative disciplinary processes and the Department assumes that it is unlikely that these other recipients would have established alternative processes based on the 2020 amendments. The Department assumes that a recipient in this group, in response to the final regulations, will experience an increase in the number of incidents investigated each year but would also be likely to revise its grievance procedures to fit the context of its educational environment under final § 106.45. As a result, although the number of investigations may increase, each investigation and adjudication would be less burdensome relative to investigations and adjudications under the 2020 amendments, due to the ability of a recipient under the final regulations to adopt procedures consistent with Title IX that are prompt, equitable, and specifically adapted to its unique circumstances, including its setting, size, and administrative structure. Recipients in this group will see burden increases associated with necessary revision of procedures and recordkeeping.

The Department assumes that approximately 90 percent of LEAs, 50 percent of IHEs, and 5 percent of other recipients fall into Group B. A recipient in this group generally experienced some reduction in the number of sexual harassment investigations conducted under the grievance process requirements of the 2020 amendments, which would have been initiated only by a formal complaint of sexual harassment and, based on anecdotal evidence, would have also addressed at least some incidents that are no longer covered under the grievance process requirements in the 2020 amendments by using an alternative disciplinary process. In the preamble to the 2020 amendments, the Department did not account for such a shift in its estimates; however, the current model assumes such behavior as part of the baseline. The Department assumes that, in response to the final regulations, Group B will see an increase in the total number of investigations under Title IX due to the application of § 106.45 of the final regulations to more than sexual harassment complaints. It is assumed that Group B will benefit from some of the additional flexibilities offered under the final regulations, such as having the option to provide the parties with an equal opportunity to access the relevant and not otherwise impermissible evidence or a written investigative report that accurately summarizes the evidence under final § 106.46 (subject to the requirement to provide access to the underlying evidence upon the request of any party). A recipient in this group will likely retain many aspects of its current grievance procedures in response to the final regulations. As a result, the Department estimates that the increase in the number of investigations for Group B under the final regulations will be smaller than the increase in the number of investigations for Group A because of the number of investigations and adjudications already occurring under the auspices of an alternative student or employee conduct process. It is estimated that recipients in Group B will see burden increases associated with necessary revision of procedures and recordkeeping under the final regulations.

The Department assumes that approximately 5 percent of LEAs, 45 percent of IHEs, and 5 percent of other recipients fall into Group C. A recipient in this group is assumed to use the grievance process established under the 2020 amendments to also resolve conduct that was not required to be resolved under Title IX. As a result, it is estimated that a recipient in Group C will not see a large increase in the number of investigations conducted annually or a meaningful change in the burden per investigation. However, a recipient in Group C, like those in the other two groups, may see burden increases associated with necessary revision of procedures and recordkeeping.

For recipients in both Groups A and B, the Department assumes that the final regulations' coverage of sex discrimination based on sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity, will result in an increase in the number of investigations conducted annually above the average encountered prior to the promulgation of the 2020 amendments. Although the Department has previously addressed a recipient's obligation to address these bases of sex discrimination, including harassment on these bases, in OCR's prior guidance, at least some recipients may not have fully addressed these incidents absent a more specific regulatory requirement.[113] The Department assumes that the inclusion of these areas in the final regulations may result in a 10 percent increase in the number of investigations conducted annually.[114]

[112] Other recipients include entities other than LEAs and IHEs which operate education programs or activities supported by the Department and may include libraries, museums, and cultural centers, among other types of organizations. This group represents an exceptionally small number of LEAs and IHEs, many of which are likely to be very small in size (*e.g.,* an LEA of fewer than 100 students or an IHE of fewer than 15 students).

[113] This is explained in greater detail in the discussions of Pregnancy and Parental Status (Section III) and Title IX's Coverage of Sex Discrimination (Section IV).

[114] As part of the 2017–2018 CRDC, schools reported 44,864 allegations of harassment and bullying on the basis of sex. That same year, they reported 18,414 allegations of harassment and bullying on the basis of sexual orientation, or approximately 33 percent of the number of allegations of harassment and bullying on the basis of sex. *See* U.S. Dep't of Educ., Office for Civil Rights, Civil Rights Data Collection for the 2017–2018 School Year, *https://ocrdata.ed.gov/assets/ocr/docs/2017-18-crdc-data.zip* (open ''2017–18 Public Use Files''; then select ''Data''; then select ''SCH''; then select ''CRDC''; then select ''CSV''; then select the ''Harassment and Bullying.csv'' file) (last visited Mar. 20, 2024). The sum of the allegations of harassment or bullying on the basis of sexual orientation (18,414) is found in Column L of harassment and bullying.csv in the 2017–2018 CRDC data by excluding cells with reserve codes. Thirty-three percent represents a very high upper bound of the number of additional investigations conducted annually by recipients based on the inclusion of sexual orientation and gender identity in the final regulations. OCR has long recognized that ''[w]hen students are subjected to harassment on the basis of their LGBT status, they may also . . . be subjected to forms of sex discrimination prohibited under Title IX. The fact that the harassment includes anti-LGBT comments or is partly based on the target's actual or perceived sexual orientation does not relieve a school of its obligation under Title IX to investigate and remedy overlapping sexual harassment or gender-based harassment. 2010 Harassment and Bullying Dear Colleague Letter, at 8, *https://www2.ed.gov/about/offices/list/ocr/letters/colleague-201010.pdf*. It is extremely unlikely that the final regulations will result in such a large increase in the number of investigations occurring annually. First, such an assumption implies that no allegations of harassment and bullying on the basis of sexual orientation were also reported as allegations of harassment and bullying on the basis of sex, which is highly unlikely because the CRDC instructs

Continued

Although the Department notes that final § 106.45(a)(2) will allow a person other than a student or employee who is participating or attempting to participate in a recipient's education program or activity to make a complaint of sex discrimination, the Department assumes this change will result in a minimal increase in a recipient's overall number of complaints of sex discrimination. Specifically, the Department assumes that complaints from non-students and non-employees are somewhat uncommon (and would remain so), but that these complaints serve to inform recipients of at least some incidents of sex discrimination. In the case of a Group A recipient, the Department assumes that the recipient's treatment of information about conduct that reasonably may constitute sex discrimination received from a non-student or non-employee would solely depend on whether the reporting party made a complaint that initiated the recipient's grievance procedures. If the individual declined or was not permitted to make a complaint under the recipient's policy (for example if the individual was not participating or attempting to participate in the recipient's education program or activity at the time of the alleged sex discrimination), the Department assumes that the Group A recipient would not take action to address the information. The Department assumes that in contrast to Group A recipients, Group B and Group C recipients would take steps to address a non-student or non-employee allegation of sex discrimination—whether by way of their Title IX grievance procedures, alternative disciplinary process, or other process depending on the circumstances and nature of the report. Thus, although the final regulations may change the process under which a non-student or non-employee allegation of sex discrimination is addressed, the inclusion of such complaints will not meaningfully increase the overall number of complaints processed annually across recipients.

Unless otherwise specified, the Department's model uses median hourly wages for personnel employed in the education sector as reported by the Bureau of Labor Statistics [115] and a loading factor of 2.0 to account for the employer cost of employee compensation and indirect costs (*e.g.,* physical space, equipment, technology costs). In addition, throughout this RIA, some described calculations have results that are fractions (*e.g.,* the described analysis generates an estimate of 4.79655 incidents at LEAs in which supportive measures are offered). To improve readability, the Department presents these results rounded to two decimal places in the text (*e.g.,* 4.80), but retains the unrounded value for purposes of its underlying calculations.

LEAs, IHEs, and other recipients are subject to the final regulations. Estimates regarding the number of affected LEAs and IHEs are based on the most recent data available from the NCES [116] regarding the number of LEAs nationwide with operational schools and the number of IHEs participating in programs under Title IV of the HEA (such as Direct Loans, Federal Work Study, and Pell grants). The estimate regarding the number of other institutions is based on an internal review of the Department's grant portfolio.

- LEAs: It is assumed that 17,916 LEAs would be impacted by the final regulations. Among affected LEAs, total enrollment during the 2021–2022 school year ranged from fewer than 10 students to more than 435,000 students.
- *IHEs:* It is assumed that 6,003 IHEs would be impacted by the final regulations. Among IHEs, recipients range from small, private, professional schools with fewer than 5 full-time students enrolled during the 2022 year to large, public research universities with enrollments of more than 85,000 full-time students and institutions operating mostly virtually with enrollments exceeding 145,000 students.
- *Others:* It is assumed that 828 other recipients would be impacted by the final regulations. Other recipients include both small Tribal cultural centers located in remote rural areas and some of the largest and most well-funded arts centers and museums in the world. They also include State education agencies, State vocational rehabilitation agencies, local libraries, small parent organizations, and a range of other entities that receive Federal grant funds from the Department.

It is important to note that within each of these categories of recipients, there is wide variation in the number of students served, number of employees, administrative structure, and annual revenue. This wide variation has made estimating the effects of the final regulations challenging, and the Department notes that the estimates provided are intended to reflect the average burden across all affected entities. As a result, estimates may be lower than the actual burden realized by, for example, larger recipients or recipients with more complex administrative structures, and larger than those realized by smaller recipients with less complex administrative structures. The Department notes that the estimates in the discussion of Cost Estimates (Section 4.C) were developed based on the RIA from the 2020 amendments, as informed by comments in response to the 2018 NPRM, 83 FR 61462 (Nov. 29, 2018), as well as information received by OCR through the June 2021 Title IX Public Hearing, in listening sessions, and from comments received in response to the July 2022 NPRM. The estimates were further informed by the input of internal subject matter experts.

4.C. Cost Estimates

Review of Regulations and Policy Revisions

The Department assumes that all recipients will need to spend time reading and understanding the final regulations. The time necessary to complete this task across all recipients will likely vary widely, with some recipients opting for a close and time-consuming review of both the regulations and preamble, while others will rely on shorter third-party summaries targeted for specific audiences resulting in a less burdensome and more expedient process. The Department has developed on-average assumptions based on feedback provided by stakeholders in listening sessions and review of comments received in response to the July 2022 NPRM. On average, the

schools to count a single harassment allegation under multiple categories if it meets the definition of more than one category. In addition, such an assumption implies that no allegations of harassment and bullying on the basis of sexual orientation are currently investigated under a recipient's Title IX procedures, which is highly unlikely because harassment based on sexual orientation can be difficult to distinguish from other harassment based on sex and OCR guidance has previously asserted that many incidents of harassment that is based on sexual orientation or that targets LGBTQI+ students are prohibited by Title IX. However, it is unreasonable to assume that the express inclusion of sexual orientation and gender identity in the final regulations would have no effect on the number of investigations occurring annually. Based on the analysis set out here, the Department estimates that the additional clarity provided by the final regulations would result in a 10 percent increase in the number of investigations occurring annually.

[115] U.S. Dep't of Labor, Bureau of Labor Statistics, May 2022 National Industry-Specific Occupational Employment and Wage Estimates: Sector 61—Educational Services, *https://www.bls.gov/oes/current/naics2_61.htm* (last visited Mar. 20, 2024).

[116] U.S. Dep't of Educ., Institute of Education Sciences, National Center for Education Statistics, *http://nces.ed.gov/ccd/elsi/* (last visited Mar. 20, 2024); U.S. Dep't of Educ., Institute of Education Sciences, National Center for Education Statistics, IPEDS Data Center, *https://nces.ed.gov/ipeds/datacenter/InstitutionByName.aspx* (last visited Mar. 20, 2024).

Department assumes that it will take 4 hours each for a Title IX Coordinator ($96.46/hour) and lawyer ($146.58/hour) to complete this task. In total, the Department estimates that reading and understanding the final regulations will have a total one-time cost of approximately $24,058,044 in Year 1 across all recipients.

The Department assumes that all recipients will need to revise their grievance procedures based on the final regulations. At each recipient institution, the Department assumes that these revisions will take, on average, 12 hours for a Title IX Coordinator, 2 hours for an administrator ($96.46/hour), and 6 hours for a lawyer. In total, the Department estimates that revising grievance procedures will have a one-time cost of $55,183,830 in Year 1. This estimate includes the costs of a recipient's revisions to its grievance procedures associated with the Department's proposal to require recipients to comply with its final revisions to § 106.45 rather than § 106.45 of the 2020 amendments, and for IHEs to also comply with final § 106.46.

The final regulations provide substantial clarity on recipient obligations under Title IX. As such, some recipients may choose to engage in supplemental review of their existing policies to determine compliance and to make changes, if needed, in addition to the final changes that may impact a recipient's grievance procedures. The Department did not receive any data to contradict its estimates regarding such behavior, and therefore continues to believe these estimates are sufficient.

Although the 2020 amendments required a recipient to post nondiscrimination statements on the recipient's website, the Department assumes that approximately 40 percent of LEAs, 20 percent of IHEs, and 50 percent of other institutions will experience more than de minimis burden to modify their existing statements to comply with the requirements of the notice of nondiscrimination under final § 106.8(c). These estimates are based, in part, on how recently the 2020 amendments went into effect, potential impacts from the COVID–19 pandemic which likely delayed at least some recipients from complying with the requirement in the 2020 amendments, and any updates to existing content that may be necessary due to the final regulations. For a recipient that has not yet completed this requirement, the Department assumes doing so will take 1 hour from the Title IX Coordinator and 2 hours from a web developer ($67.16/hour).[117] In total, the Department estimates that posting nondiscrimination statements on websites will have a one-time cost of $2,032,842 in Year 1. The Department did not receive any data to contradict its estimates regarding the costs of posting nondiscrimination statements.

Revisions to Training

The final regulations will likely impact the annual training provided to Title IX Coordinators and designees, investigators, decisionmakers, and other persons who are responsible for implementing a recipient's grievance procedures or have the authority to modify or terminate supportive measures. For individuals other than the Title IX Coordinator and designees, it is unlikely that the length of training will have to change, and therefore any associated burden for these individuals will not change based on the final regulations. The Department assumes that Title IX Coordinators will revise existing training materials to incorporate any new content and adjust the remaining parts of the training accordingly to avoid extending the length and cost of administering the training.

Although the Department notes that the final regulations will require all employees to be trained promptly upon hiring or change of position that alters their duties under Title IX or this part, and annually thereafter on the scope of conduct that constitutes sex discrimination, including the definition of ''sex-based harassment,'' and all applicable notification requirements under final §§ 106.40(b)(2) and 106.44, this requirement will not significantly change the overall annual burden related to training requirements for recipient employees. As an initial matter, based on its enforcement experience and discussions with internal subject matter experts, the Department assumes that all employees of recipients receive required trainings each year and that recipients generally strive to ensure that employee trainings are as efficient as possible to avoid detracting employees from performing their core job responsibilities. The Department also assumes that recipients will not budget significant additional funds in response to the modification of the training requirement in the 2020 amendments, and thus will not experience an increased monetary burden that is more than de minimis due to this final change. The Department makes this assumption based on its understanding that recipients make purposeful decisions about the amount of time dedicated to each required training and will make adjustments, as needed, to ensure all required topics are covered. While the Department understands that recipients will need to dedicate resources to train employees, the benefits of comprehensive training justify the costs, which the Department considers to be de minimis. These benefits include ensuring that all employees receive training on aspects of Title IX that are relevant and critical to their specific roles, that those most likely to interact with students in their day-to-day work have the training necessary to understand their role in ensuring a recipient's Title IX compliance, and that all persons involved in implementing a recipient's grievance procedures and the informal resolution process are clearly designated and trained on conducting a fair process. Each of these benefits, in turn, will help ensure that members of a recipient's community are not discriminated against on the basis of sex and have equal access to its education program or activity.

Across all recipients, the Department estimates that updating training materials for individuals other than Title IX Coordinators will take 4 hours for the Title IX Coordinator for a total one-time cost of $9,548,382. In subsequent years, the Department assumes that the burden associated with the annual updating of training materials will be about the same as it would be in the absence of the final regulations.

In contrast, the Department anticipates that the final regulations will require more extensive, longer training for Title IX Coordinators compared to the 2020 amendments. As an initial matter, the Department assumes that a recipient will employ similar means by which to train its Title IX Coordinator in response to the final regulations as the recipient employed in response to the promulgation of the 2020 amendments; however, the Department acknowledges that the development and delivery method of the training varies among recipients. For example, the Department assumes that some recipients hired outside counsel, law firms, and professional organizations to train their Title IX Coordinators while other recipients relied upon internal stakeholders such as the recipient's general counsel. The Department has no reason to believe that a recipient will deviate from its current source of training because of the final regulations.

[117] Note that time burden estimates for this activity are unchanged from those used in the 2020 amendments. *See* 85 FR 30567.

The Department assumes that such trainings will be 2 hours longer for each Title IX Coordinator in Year 1, and 1 hour longer in future years. In total, the Department estimates that the training of Title IX Coordinators will have a cost of $4,774,191 in Year 1 and $2,387,096 in each succeeding year. Costs will also be incurred to update training materials for Title IX Coordinators. These materials may be developed in a variety of ways, depending on the preferences of individual recipients. These materials will be more comprehensive in nature, but certain entities may develop training materials that will be used across many recipients. As a result, the Department assumes training development costs for Title IX Coordinators equal to those estimated for other individuals, equaling a one-time cost of $9,548,382. The Department did not receive any supplementary data upon which it could reasonably rely to further revise its estimates regarding the costs to recipients of revising training materials to comply with the final regulations.

Supportive Measures

With respect to the provision of supportive measures, the Department's final regulations require a recipient to offer supportive measures, as appropriate, to complainants and respondents in response to information about conduct that reasonably may constitute sex discrimination, including sex-based harassment and prohibited retaliation. Although the 2020 amendments only required a recipient to offer supportive measures, as appropriate, to complainants and respondents in response to actual knowledge of sexual harassment, nothing in the 2020 amendments prohibited a recipient from also offering supportive measures in response to information about other types of sex discrimination. The Department assumes that any prohibited retaliation that occurs will most likely occur following a report or complaint of sex-based harassment (as opposed to other forms of sex discrimination) and that, in such instances, the types of supportive measures offered following the initial report or complaint of sex-based harassment will be largely indistinguishable from the types of supportive measures offered in response to prohibited retaliation and will not result in additional measurable cost to the recipient. Further, it is unlikely that there will be an increase in the number of individuals seeking and accepting supportive measures solely to address the impacts of ''prohibited retaliation'' as defined under amended § 106.71.

The Department notes that the final regulations state that for allegations of sex discrimination other than sex-based harassment or prohibited retaliation, the recipient will not be required to alter the conduct that is alleged to be sex discrimination for the purpose of providing a supportive measure. The Department expects that there will be little impact on anticipated costs to recipients associated with the final provision requiring supportive measures to be offered to complainants and respondents in response to information about conduct that reasonably may constitute other forms of sex discrimination. The Department's assumption is based on the belief that such information will likely fall into one of two categories. The first category consists of information a recipient will receive about sex discrimination related to unequal access to resources or facilities (*e.g.,* reports that boys' and girls' bathrooms are not maintained at the same level). In these instances, the Department anticipates that there are few, if any, appropriate supportive measures beyond eliminating the source of sex discrimination (*e.g.,* improving the quality of the facilities). Although it is the Department's belief that this type of information will not likely result in increased costs associated with the provision of supportive measures, there may be additional costs incurred when addressing these types of situations that are unrelated to providing supportive measures.

Likewise, the Department anticipates that complaints of and information about sex discrimination in educational settings (*e.g.,* a teaching assistant treating an individual student differently because of sex), the second category, will be the most likely reason for a request for supportive measures. In these instances, appropriate supportive measures will likely be academic in nature and have relatively minor costs (*e.g.,* allowing a student to attend a section of the same class taught by a different teaching assistant after a complaint of sex discrimination has been made and is proceeding, and/or counseling the teaching assistant).

For supportive measures related to sex-based harassment, the Department assumes that the final regulations will have a negligible effect on the burden per incident. Specifically, as the variety of supportive measures and need to adapt those measures to a particular situation makes estimating the full spectrum of costs impracticable, the Department used the cost of more commonly provided supportive measures when calculating cost estimates. Moreover, as it is likely that many of the supportive measures available to individuals are already provided by recipients, the Department expects that the actual costs of each type of measure will be de minimis; however, the Department has added a flat cost of $250 per incident to account for any potential costs.[118] The Department cannot provide greater specificity regarding specific supportive measures given the wide range of possible measures that could be offered, the varying administrative structures of recipients, and the need to align any supportive measures to the specific facts of each case.

At the LEA level, the Department assumes that, per incident, the provision of supportive measures currently takes 2 hours from a Title IX Coordinator and 2 hours from an administrative assistant ($61.14/hour), with a flat additional cost of $250 per incident. As such, the Department assumes that, on average, the provision of supportive measures at an LEA costs approximately $565 per incident (staff time plus flat additional cost). At the IHE level and at other recipients, the Department assumes that, per incident, the provision of supportive measures currently takes 2 hours from a Title IX Coordinator and 1 hour from an administrative assistant with a flat additional cost of $250 per incident. Therefore, the Department estimates that, on average, the provision of supportive measures at an IHE or other recipient costs approximately $504 per incident. Commenters did not provide any supplementary data upon which the Department could reasonably rely to further modify the Department's estimates. The Department anticipates that the final regulations may increase the number of incidents for which supportive measures are provided per year.

The Department assumes that a recipient offers and potentially provides supportive measures in all instances that, prior to the 2020 amendments, would have triggered an investigation, as well as in many instances that previously would not have triggered an investigation. Across all recipient types, the Department assumes that under the

[118] This flat cost is intended to capture any non-staff time costs associated with the provision of supportive measures, including but not limited to fees for services covered by the recipient (such as for counseling) or foregone fees not collected by the recipient (such as a waiver of fees for housing reassignment). Note that, due to the wide variety of supportive measures that may be offered by recipients and the need to tailor any such measures to the specific circumstances of a particular individual, more precise estimation of the costs associated with the provision of supportive measures is not practicable.

final regulations, the number of incidents prompting an offer and provision of supportive measures will be approximately 100 percent higher than the number of investigations conducted under the 2020 amendments. For example, at LEAs, where the Department assumes an average of 3.23 investigations per year were conducted before the 2020 amendments, the Department assumes that there will be an average annual increase to 6.4 incidents prompting an offer and provision of supportive measures under the final regulations. The Department assumes that, across all recipient types, supportive measures are accepted in approximately 90 percent of the incidents in which they are offered. Thus, the Department assumes that LEAs provide supportive measures 5.81 times per year. At IHEs, the Department assumes 10.26 provisions of supportive measures per year and at other recipients, 3.60 provisions per year. Across all recipient types, the Department estimates that the provision of supportive measures based on pre-2020 amendments incident data costs approximately $91,424,553 per year.

The Department's estimates also reflect an anticipated change in the behavior of complainants across all recipient types due to the final regulations. Specifically, the Department has received anecdotal reports of complainants accepting supportive measures while declining to participate in a recipient's grievance process due to the perceived burden associated with initiating that process. The Department estimates that under the 2020 amendments the number of individuals accepting supportive measures exceeded the number of individuals choosing to pursue resolution through the recipient's grievance process. Under the final regulations, however, the Department estimates that the percentage of individuals who report an incident to a recipient and choose to make a complaint to initiate the recipient's grievance procedures under final § 106.45, and if applicable § 106.46, will increase. This change is also likely to result in large, unquantified benefits to complainants by providing increased opportunities for reporting sex discrimination and accepting supportive measures, as explained in the discussion of Benefits of the Final Regulations (Section 3). In response to the final regulations, the Department assumes, as described in the discussion of Developing the Model (Section 4.B), that all recipients will see an increase in the number of incidents in which a complainant accepts some supportive measures offered. The Department notes that this is not an assumption that the final regulations will increase the number of incidents that may initiate an offer of supportive measures, but rather, this increase likely will be driven by greater clarity regarding the scope of coverage created by the final regulations and enhanced training requirements which will inform individuals who are already eligible for such measures of the availability of these measures. The Department assumes that under the final regulations, each LEA will provide supportive measures 6.40 times per year, each IHE will do so 11.29 times per year, and other recipients will do so 3.96 times each per year. In all, the Department estimates that after the enactment of the final regulations, the provision of supportive measures will cost a total of $100,567,008, for a net increase of $9,142,455 per year.

Investigations and Adjudications

Under the 2020 amendments, the geographic location of an alleged incident affects whether the allegations will be covered under Title IX. As a result, the Department recognizes that recipients spend time investigating whether incidents took place in a location that requires the use of the Title IX grievance process to investigate and adjudicate allegations of sexual harassment. Final § 106.11 clarifies that Title IX applies to every recipient and all prohibited sex discrimination occurring under a recipient's education program or activity. This includes the obligation to address a sex-based hostile environment under a recipient's education program or activity in the United States, even when some conduct alleged to be contributing to the hostile environment occurred outside the recipient's education program or activity or outside the United States. The Department emphasizes that recipients do not have an obligation under Title IX to receive and process complaints or commence grievance procedures about or otherwise address conduct occurring outside of the United States, unless the conduct is alleged to have contributed to a sex-based hostile environment under the recipient's education program or activity in the United States. In some instances, such as when an alleged incident occurred outside of the United States and may have contributed to a sex-based hostile environment under the recipient's education program or activity domestically, the Department acknowledges that the resulting investigation may be more time consuming. Although a recipient may decide to investigate other conduct that occurred outside the United States under its existing code of conduct or other policies pertaining to, for example, study abroad programs, the costs associated with such an investigation are not required by the final regulations. Commenters did not provide high-quality data on these issues in response to a request in the July 2022 NPRM, 87 FR 41546, 41549; therefore, the Department does not have a basis upon which to develop estimates of this change.

As noted in the discussion of Developing the Model (Section 4.B), it is the Department's view that recipients will fall into three groups for purposes of categorizing their likely responses to the final regulations. A recipient in Group A will likely experience an increase in the number of Title IX investigations conducted under the final regulations, but it will also likely exercise flexibilities built into the final regulations which will reduce the burden per complaint. It is important to note that the Department assumes that the exercise of these flexibilities will not impact a recipient's ability to ensure fair investigations and adjudications but rather will allow it to develop and maintain prompt and equitable procedures tailored to its educational settings, reducing the burden on the recipient while ensuring the implementation of fair and equitable proceedings for the parties. A recipient in Group B also will likely experience an increase in the number of investigations conducted annually. However, a recipient in Group B will be more likely to maintain the structures required under the 2020 amendments, as these recipients likely already investigate and adjudicate the forms of conduct covered by the final regulations but excluded from the scope of the 2020 amendments, by way of an alternative disciplinary process. Likewise, a recipient in Group C, having complied with the 2020 amendments and having continued to respond to sex discrimination as it had prior to those amendments, will be unlikely to experience any burden changes associated with increased numbers of investigations or changes in the burden of such investigations.

As described in the discussion of Developing the Model (Section 4.B), the Department has a reasonable framework for understanding the likely actions of recipients, including how long it will take for a recipient to investigate a complaint of sex discrimination, including sex-based harassment, based on discussions with organizations that work directly with Title IX Coordinators

at LEAs and IHEs and with internal subject matter experts. For LEAs in Group A, the Department estimates that an investigation currently takes, on average, 3 hours from a Title IX Coordinator, 4 hours from an administrative assistant, 2 hours each from two lawyers/advisors ($146.58/hour) when they are involved, 6 hours from an investigator ($52.10/hour), and 2 hours from an adjudicator ($63.84/hour). Note that the Department assumes that lawyers/advisors will be involved in approximately 15 percent of cases. For IHEs in Group A, the Department assumes an investigation currently takes, on average, 6 hours from a Title IX Coordinator, 8 hours from an administrative assistant, 5 hours each from two lawyers/advisors, 10 hours from an investigator, and 2 hours from an adjudicator. For other recipients in Group A, the Department assumes an investigation currently takes, on average, 2 hours from a Title IX Coordinator, 4 hours from an administrative assistant, 2 hours each from two lawyers/advisors, 1 hour from an investigator, and 2 hours from an adjudicator. Across all recipients in Group A, the Department assumes a flat rate of $100 per adjudication for recording live hearings. The Department estimates that LEAs in Group A currently conduct, on average, 1.94 investigations per year. At the IHE level, the Department estimates that Group A institutions conduct 3.82 investigations per year, while other recipients in Group A conduct, on average, one investigation per year. In total, the Department estimates that investigations and adjudications for recipients in Group A currently cost a total of approximately $6,746,684.

Under the final regulations, the Department estimates that recipients in Group A will develop revised procedures to ensure fair investigations tailored to their educational settings, which will reduce the burden associated with each investigation and adjudication. Removing LEAs from some of the obligations under § 106.45 of the 2020 amendments will mean Group A recipients will no longer be required to supplement the work of their own administrators with specialized individuals when investigating and making a determination on a complaint of sex-based harassment. The Department assumes investigations will require 4 hours from a Title IX Coordinator or other administrator (such as a building-level principal or assistant principal) and 2 hours from an administrative assistant. At the IHE level, the Department assumes each investigation and adjudication will take 5 hours from a Title IX Coordinator, 8 hours from an administrative assistant, 5 hours each from two lawyers/advisors, 10 hours from an investigator, and 2 hours from an adjudicator. For other recipients, the Department anticipates a need for 2 hours from a Title IX Coordinator, 4 hours from an administrative assistant, 2 hours each from two lawyers/advisors, 1 hour from an investigator, and 2 hours from an adjudicator.

The 2020 amendments require IHEs to create an ''audio or audiovisual recording, or transcript'' of all live hearings. As LEAs and other recipients that are not IHEs are not required to hold hearings under the 2020 amendments, the Department assumes that few, if any, have chosen to do so. However, IHEs are required to hold hearings under the 2020 amendments. Now, the final regulations provide that IHEs may, but are not required to, hold live hearings. When a live hearing is conducted, an IHE must make an audio or audiovisual recording or transcript of the live hearing and make it available to the parties for inspection and review. In addition, § 106.46(f)(1)(i)(C) of the final regulations requires a postsecondary institution to create a recording or transcript of individual meetings with a party or witness conducted by the postsecondary institution to satisfy its obligations under § 106.46(f)(1)(i)(A), even if a recipient does not elect to hold a live hearing. The Department has accounted for this cost.

For IHEs and other recipients in Group A, the Department anticipates no change in the flat rate of $100 per investigation associated with meeting the recording requirements. The Department assumes no recording costs for LEAs in Group A. Under the final regulations, the Department assumes that LEAs in Group A will conduct, on average, 3.55 investigations per year; IHEs in Group A will conduct an average of 6.27 investigations per year, and other recipients will conduct, on average, 2.20 investigations per year. The Department therefore estimates that, under the final regulations, investigations and adjudications among recipients in Group A will cost approximately $9,747,693 per year, which represents a net burden increase of $3,001,009 per year. The Department did not receive any data to contradict its estimates regarding the costs of investigations and adjudications.

TABLE I—INVESTIGATIONS AND ADJUDICATIONS BURDEN ESTIMATES—GROUP A RECIPIENTS [119]

Cost category	Baseline			After final regulations		
Sex Discrimination Grievance Procedures	LEAs	IHEs	Other	LEAs	IHEs	Other
Title IX Coordinator	3 hours	6 hours	2 hours	4 hours	5 hours	2 hours.
Adm. Assistant	4 hours	8 hours	4 hours	2 hours	8 hours	4 hours.
Lawyer/Advisor [1]	2 hours [2]	5 hours	2 hours		5 hours	2 hours.
Investigator	6 hours	10 hours	1 hour		10 hours	1 hour.
Adjudicator	2 hours	2 hours	2 hours		2 hours	2 hours.
Recording	$100	$100	$100	$0	$100	$100.
# of Investigations	1.94	3.82	1.00	3.55	6.27	2.20.

[1] When present, the Department assumes two lawyers/advisors per investigation and adjudication.
[2] The Department assumes lawyers/advisors are involved in only 15 percent of investigations and adjudications. This estimate is based on information from a professional organization.

For LEAs in Group B, the Department assumes an investigation under the 2020 amendments requires 3 hours of time from a Title IX Coordinator, 14 hours from an administrative assistant, 8 hours each from two lawyers/advisors

[119] Estimates were based on information provided by national professional organizations and discussions with internal subject matter experts.

in 15 percent of cases, 8 hours from an investigator, and 2 hours from an adjudicator. At the IHE level in Group B, the Department estimates that an investigation under the 2020 amendments requires 6 hours from a Title IX Coordinator, 20 hours from an administrative assistant, 20 hours each from two lawyers/advisors, 20 hours from an investigator, and 10 hours from an adjudicator. At other recipients in Group B, the Department assumes that an investigation under the 2020 amendments requires 8 hours from a Title IX Coordinator, 16 hours from an administrative assistant, 8 hours each from two lawyers/advisors, 5 hours from an investigator, and 2 hours from an adjudicator. At LEAs and other recipients in Group B, the Department estimates that it costs a flat rate of $100 per hearing under the 2020 amendments. At IHEs, the Department assumes a rate of $200 per hearing to account for the possibility that IHEs may want more extensive records of hearings, such as official transcripts, in addition to an audio recording. The Department assumes that under the 2020 amendments LEAs in Group B conduct, on average, 1.94 investigations per year; that IHEs in Group B conduct 3.82 investigations per year, and that other recipients in Group B conduct one investigation per year. In total, therefore, the Department estimates that under the 2020 amendments investigations and adjudications for a recipient in Group B cost approximately $176,459,489 per year.

As noted in the discussion of Lack of Data Following the Promulgation of the 2020 Amendments (Section 4.A.3) and the July 2022 NPRM, 87 FR 41549, the Department assumes that a recipient in Group B shifted approximately 90 percent of those incidents that involved complaints falling outside the § 106.45 grievance process into an alternative disciplinary process rather than not taking any action in response to incidents that were previously covered under their Title IX policies. As described in the discussion of Developing the Model (Section 4.B), the Department has determined, based on stakeholder feedback, comments it received on the July 2022 NPRM, and its enforcement experience, that many recipients developed alternative processes by which to address conduct that fell outside of the parameters of the 2020 amendments. As noted in that section, Group B and Group C recipients created alternative processes that either reflected the recipient's student or employee conduct processes (Group B recipients) or mirrored the § 106.45 grievance process under the 2020 amendments (Group C recipients). The Department assumes that resource and time expenditures for these alternative processes mirror those of the recipient's student conduct process for Group B recipients or the recipient's grievance process under the 2020 amendments for Group C recipients.

At the LEA level, the Department assumes that an alternative disciplinary process requires 3 hours from an administrator ($96.46/hour), 14 hours from an administrative assistant, 6 hours each from two lawyers/advisors in 5 percent of cases, and 6 hours from an investigator. The Department estimates that in 75 percent of LEAs, the process is adjudicated by an administrator for 3 additional hours, while in the other 25 percent of LEAs, an independent adjudicator is needed for 2 hours. At the IHE level, the Department assumes that the alternative disciplinary process requires 6 hours from an administrator, 20 hours from an administrative assistant, 10 hours each from two lawyers/advisors, and 15 hours from an investigator. The Department estimates that in 60 percent of IHEs, the process is adjudicated by an administrator for 6 additional hours, while in the other 40 percent of IHEs, an independent adjudicator is required for 8 hours. At other recipients, the Department assumes that the alternative disciplinary process requires 4 hours from an administrator and 8 hours from an administrative assistant. The Department estimates that LEAs in Group B, on average, shifted 1.16 investigations per year into alternative disciplinary processes in response to the 2020 amendments, while IHEs did the same with 1.70 investigations, and other recipients did so for 0.9 investigations. The Department therefore estimates that under the 2020 amendments a recipient spends approximately $59,998,354 per year on implementing alternative disciplinary processes for incidents that were previously covered under their grievance procedures prior to the 2020 amendments.

Under the final regulations, the Department assumes that all the incidents previously covered under a recipient's grievance procedures prior to the 2020 amendments will be handled under the recipient's Title IX grievance procedures. At LEAs in Group B, the revised procedures will require approximately 4 hours from a Title IX Coordinator or other administrator (such as a building-level principal or assistant principal) and 2 hours from an administrative assistant. The Department assumes that, in approximately 25 percent of instances, LEAs will use an investigator and adjudicator other than the Title IX Coordinator or other administrator. In such instances, the Department assumes that those LEAs will need 2 hours from an investigator and 1 hour from an adjudicator. The Department assumes that, in 5 percent of instances, each party will have a lawyer/advisor each spending 4 hours on the incident. These LEA level estimates represent an assumption that most LEAs will return to their processes from prior to the 2020 amendments due to the removal of LEAs from some of the specific obligations under § 106.45 of the 2020 amendments. At the IHE level in Group B, the revised procedures will require 5 hours from a Title IX Coordinator, 13 hours from an administrative assistant, 15 hours each from two lawyers/advisors, 18 hours from an investigator, and 8 hours from an adjudicator. For other Group B recipients, revised procedures will require 2 hours from a Title IX Coordinator, 6 hours from an administrative assistant, 2 hours each from two lawyers/advisors in 5 percent of proceedings, 2 hours from an investigator, and 1 hour from an adjudicator.

Under the final regulations, Group B LEAs will conduct, on average, 3.55 investigations per year, while IHEs will conduct 6.27 investigations per year, and other recipients will conduct 2.20 investigations per year. Therefore, under the final regulations, investigations and adjudications at a recipient in Group B will cost a total of approximately $172,807,000 per year which represents a net decrease in the burden associated with investigations and hearings by $63,650,843 per year. The Department did not receive any data to contradict its estimates regarding the costs of investigations per year.

TABLE II—INVESTIGATIONS AND ADJUDICATIONS BURDEN ESTIMATES—GROUP B RECIPIENTS

Cost category	Baseline			After final regulations		
Sex Discrimination Grievance Procedures	LEAs	IHEs	Other	LEAs	IHEs	Other
Title IX Coordinator	3 hours	6 hours	8 hours	4 hours	5 hours	2 hours.
Adm. Assistant	14 hours	20 hours	16 hours	2 hours	13 hours	6 hours.
Lawyer/Advisor [1]	8 hours [2]	20 hours	8 hours	4 hours [3]	15 hours	2 hours.
Investigator	8 hours	20 hours	5 hours	2 hours [4]	18 hours	2 hours.
Adjudicator	2 hours	10 hours	2 hours	1 hour [4]	8 hours	1 hour.
Recording	$100	$200	$100		$200	$100.
# of Investigations	1.94	3.82	1.00	3.55	6.27	2.20.
Alternative Process	LEAs	IHEs	Other			
Administrator	3 hours [5]	6 hours [6]	4 hours.			
Adm. Assistant	14 hours	20 hours	8 hours.			
Lawyer/Advisor [1]	6 hours [3]	10 hours.				
Investigator	6 hours	15 hours.				
Adjudicator	2 hours	8 hours.				
Recording	$100	$200	$100.			
# of Investigations	1.16	1.70	0.90.			

[1] When present, the Department assumes two lawyers/advisors per investigation and adjudication.
[2] The Department assumes lawyers/advisors are involved in 15 percent of investigations and adjudications.
[3] The Department assumes lawyers/advisors are involved in 5 percent of investigations and adjudications.
[4] The Department assumes investigators and adjudicators other than the Title IX Coordinator or another administrator will be used in approximately 25 percent of investigations and adjudications.
[5] The Department assumes administrators also serve as adjudicators in 75 percent of instances and their burden doubles in such cases.
[6] The Department assumes administrators also serve as adjudicators in 60 percent of instances and their burden doubles in such cases.

Appeals and Informal Resolution

The Department assumes that nothing in the final regulations will change the nature of the appeal process for fully adjudicated complaints. The Department notes that the final regulations require all recipients to offer an appeal of a dismissal of a sex discrimination complaint. This limited right to an appeal is an expansion of recipients' obligations under the 2020 amendments as it will apply to any dismissal of a sex discrimination complaint, not just to complaints of sex-based harassment. The final regulations no longer require LEAs and other recipients to offer the parties an appeal process for a determination in a sex-based harassment complaint; however, IHEs must continue to offer an appeal process for sex-based harassment complaints involving a student party. In addition, the final regulations require all recipients to offer the parties in a sex discrimination complaint an appeal process that, at a minimum, is the same as it offers in all other comparable proceedings, if any, including proceedings relating to other discrimination complaints. Although it is possible that at least some portion of recipients have an appeal process as part of their current procedures for resolving complaints of sex discrimination, the Department assumes that its current estimates may overestimate the costs of the final regulations in this area. Assuming that there is a de minimis change regarding the number of recipients that offer an appeal because all recipients will need to offer an appeal from a dismissal of a complaint of sex discrimination, there may be additional costs to a recipient associated with appeals because of the estimated increase in the number of complaints brought under the final regulations and the proportion of decisions that could be appealed.

Across all recipients, the Department estimates that one or more parties in approximately half of all fully adjudicated complaints appeal the determination. This estimate is consistent with estimates from the 2020 amendments. 85 FR 30568. The Department assumes that at the LEA level, the appeal process will require 2 hours each from a Title IX Coordinator, administrative assistant, and two lawyers/advisors as well as an additional 6 hours from an adjudicator, while at the IHE level, the Department assumes that the appeal process requires 2 hours from a Title IX Coordinator, 4 hours from an administrative assistant, 5 hours each from two lawyers/advisors, and 8 hours from an adjudicator. Likewise, at other recipients, the Department assumes that the appeal process requires 2 hours each from a Title IX Coordinator, administrative assistant, and two lawyers/advisors, with an additional 8 hours from an adjudicator. Assuming that LEAs, on average, will handle an additional 1.33 appeals per year as a result of the final regulations, IHEs, on average, will handle an additional 2.35 appeals per year, and other recipients, on average, will handle an additional 0.95 per year, the Department estimates that the increase in appeals stemming from the increase in complaints likely to be made under the final regulations will result in an additional cost of approximately $17,776,304 per year.

The Department expects that the final regulations will have a de minimis change on the proportion of complaints resolved through informal resolution and will not affect the general burden associated with each such resolution. Specifically, although the requirements for grievance procedures will be less burdensome under the final regulations than under the 2020 amendments, the Department expects that most complainants who have elected to proceed with informal resolution under the 2020 amendments will continue to do so under the final regulations because of the elimination of the formal complaint requirement prior to initiating the informal resolution process. Although it is possible that a complainant will decide to make a complaint and pursue an investigation because of the reduced burden under the final regulations, it is the Department's view that there is no basis to assume that a complainant who would have pursued informal resolution under the 2020 amendments is more or less likely to choose informal resolution under the final regulations because

individuals' rationales for choosing an informal resolution process vary widely.

Based on anecdotal reports from commenters, recipients, and other stakeholders, the Department assumes that informal resolutions require more time from a Title IX Coordinator and an administrative assistant than an investigative process. In contrast, the Department assumes that the informal resolution process will remove all costs associated with investigators, adjudicators, and recording at all levels and eliminate costs for lawyers/advisors at the LEA level. At the LEA level, informal resolution may require 1 additional hour from a Title IX Coordinator and 5 hours from an administrative assistant above the level needed for an investigation and adjudication; at the IHE level, the additional burden will be 2.5 hours from a Title IX Coordinator and 1 hour from an administrative assistant, while at other recipients, the additional burden is estimated to be 1 hour from a Title IX Coordinator and 3 hours from an administrative assistant. The Department assumes that, in instances of informal resolution, there will be no burden for investigators or adjudicators at LEAs, IHE, or other recipients, and no burden for lawyers/advisors at LEAs or other recipients. At the IHE level, the Department assumes that, even in instances of informal resolution, there will be a burden of 6 hours each for two lawyers/advisors (one working with each party), assuming that the individuals serving in those roles may become involved earlier in the process than at other educational levels or at other recipients. Based on the increase in complaints that the Department anticipates under the final regulations, the estimated increase in the cost of informal resolutions will be approximately $14,068,164 per year. The Department did not receive any supplementary data upon which it could reasonably rely to further modify its cost estimates.

Recordkeeping

The Department assumes that all recipients will need to modify their existing recordkeeping systems to comply with the final regulations. Specifically, the Department submits that final § 106.8(f) broadens the existing scope of the recordkeeping requirements under § 106.45(b)(10) of the 2020 amendments because the final recordkeeping requirement applies to all notifications to the Title IX Coordinator about conduct that reasonably may constitute sex discrimination and all complaints of sex discrimination. However, the Department assumes that many recipients already maintain records related to sex discrimination under the auspices of State, local, or other requirements and established recordkeeping systems in response to the 2020 amendments. In these instances, final § 106.8(f) will not impose any additional burden on those recipients as their existing recordkeeping activity will likely address all pertinent requirements under the final regulations.

Alternatively, for recipients that only maintain records related to sexual harassment as required by § 106.45(b)(10) of the 2020 amendments and do not preserve information related to other forms of sex discrimination, the changes will increase their burden based on the volume of records they will need to maintain related to forms of sex discrimination other than sexual harassment, as is required by final § 106.8(f). The Department estimates that the final regulations, in general, will increase the recordkeeping burden for these recipients. At the LEA level, the Department estimates that necessary modifications to current practice will require 2 hours each from a Title IX Coordinator and an administrative assistant, whereas at the IHE level, where a recipient is more likely to maintain electronic systems for these records, these changes will require 4 hours from a Title IX Coordinator, 8 hours from an administrative assistant, and 4 hours from a database administrator ($77.54/hour). At other recipients, the Department estimates that modifications will require 2 hours each from a Title IX Coordinator and an administrative assistant. In total, the Department estimates that modifications to recipients' recordkeeping systems will cost approximately $13,022,034 in Year 1.

In future years, the Department assumes the final regulations will necessitate an ongoing increase, above the baseline year, in recordkeeping costs. Specifically, at the LEA level, the Department estimates that recordkeeping will require 1 additional hour each from the Title IX Coordinator and an administrative assistant; at the IHE level, 1 additional hour from the Title IX Coordinator and 5 hours from an administrative assistant; and at other recipients, 1 additional hour each from the Title IX Coordinator and an administrative assistant. In total, the Department estimates the ongoing recordkeeping burden to increase by approximately $5,237,728 per year. The Department did not receive any supplementary data upon which it could reasonably rely to further modify its estimates regarding such costs.

Monitoring the Recipient's Education Program or Activity for Barriers To Reporting Information About Conduct That Reasonably May Constitute Sex Discrimination

The Department's final regulations require a recipient to ensure that its Title IX Coordinator monitors the recipient's education program or activity for barriers to reporting conduct that reasonably may constitute sex discrimination and that the recipient take steps reasonably calculated to address such barriers. Although a recipient was neither required to nor prohibited from monitoring its environment for these barriers under the 2020 amendments, the Department assumes that many recipients, particularly IHEs, currently monitor their education programs or activities for such barriers to avoid potential legal liability because barriers to reporting limit a recipient's ability to ensure that its education program or activity is operating free from sex discrimination. The Department also assumes that Title IX Coordinators are motivated to proactively identify and address sex discrimination in the recipient's education program or activity. Although some recipients may need to create new mechanisms to monitor their environments, many of these recipients will select options with de minimis costs, such as incorporating questions designed to elicit information from students and employees about barriers to reporting into existing training materials, incorporating such questions into conversations with students, employees, and others during roundtable discussions or listening sessions with interested stakeholders, or through other means. The Department similarly assumes that the steps a recipient will need to take to remove these barriers, should they be identified, will likely have a de minimis cost as well (*e.g.,* reminding students, employees, and others during trainings about the range of reporting options available at a particular recipient or reporting an employee who discourages their students from reporting to human resources for violating the recipient's code of ethics standards). That said, the Department recognizes that there is a wide range of possible recipient responses to this final requirement with potentially varying costs and benefits. The Department did not receive any supplementary data upon which it could reasonably rely to modify its estimates regarding such costs and benefits.

4.D. Changes in the Final Regulations Not Estimated to Have Costs

In addition to the changes explained in the discussion of Cost Estimates (Section 4.C) that are estimated to have costs, there are several final changes that the Department does not anticipate will generate costs for regulated entities above and beyond general costs described previously. Below the Department discusses some of these final changes to clarify the basis for that assumption.

Lactation Space for Students and Employees

Although the Title IX regulations since 1975 specifically prohibited discrimination against students and employees based on pregnancy, childbirth, termination of pregnancy, and recovery, the final regulations at §§ 106.2 (defining ''pregnancy or related conditions''), 106.21(c)(2)(ii), 106.40(b)(1), and 106.57(b) clarify that a recipient may not discriminate based on pregnancy or related conditions, including lactation. *See* 40 FR 24128 (codified at 45 CFR 86.21(c)(2), 86.40(b)(2), 86.57(b) (1975)); 34 CFR 106.21(c), 106.40(b)(1), 106.57(b) (current). The final regulations also require a recipient to ensure access to a lactation space for students and employees, as well as reasonable modifications for students and break time for employees to enable them to use of the space as needed. Specifically, final § 106.40(b)(3)(v) requires a recipient to ''[e]nsure that the student can access a lactation space, which must be a space other than a bathroom, that is clean, shielded from view, free from intrusion from others, and may be used by a student for expressing breast milk or breastfeeding as needed.'' Similarly, final § 106.57(e) requires a recipient to provide ''reasonable break time for an employee to express breast milk or breastfeed as needed'' and to ''ensure that an employee can access a lactation space, which must be a space other than a bathroom that is clean, shielded from view, free from intrusion from others, and may be used by an employee for expressing breast milk or breastfeeding as needed.'' Both measures are critical means for preventing discrimination and ensuring that students and employees can continue pursuing their education and employment, respectively, while taking brief breaks from their classes or job duties as needed to express breast milk or breastfeed.

The Department does not anticipate significant cost to recipients based on this final revision. Although it is possible that the final regulations' clarification that a lactation space must be available for both students and employees may result in an increase in demand for such a space, it is the Department's view that any such increase will likely result in a de minimis impact on costs as distributed over all recipients over time. The Department posits this for several reasons.

First, although it is unknown how many recipients presently offer lactation space for students or employees due to a lack of data, all or virtually all recipients are already required to comply with provisions for lactation time and space for employees covered under the Affordable Care Act's amendments to Section 7 of the FLSA.[120] The FLSA requires employers to provide reasonable break times and a private place, other than a bathroom, to employees covered under Section 7 of the FLSA who are breastfeeding to express milk for one year after their child's birth. 29 U.S.C. 207(r)(1). The space must be ''shielded from view and free from intrusion from coworkers and the public.'' *Id.* The Department of Labor (DOL) has explained that the space must also be ''functional'' and ''available when needed'' and that the ''frequency and duration of breaks needed to express milk will likely vary.'' U.S. Dep't of Labor, Fact Sheet #73: FLSA Protections for Employees to Pump Breast Milk at Work (Jan. 2023), *https://www.dol.gov/agencies/whd/fact-sheets/73-flsa-break-time-nursing-mothers.* DOL has also clarified that a temporary or converted space is sufficient if the space is available when needed, shielded from view, and free from any intrusion from co-workers and the public. *Id.* Employees who would be covered by the lactation time and space requirements of the FLSA include virtually all full-time and part-time workers in public and private education programs or activities. 29 U.S.C. 203(e). Although at the time of the July 2022 NPRM the FLSA exempted certain employees, such as professors, teachers, and certain academic administrative personnel from coverage, Congress has since amended the statute to cover these employees. 29 U.S.C. 207(r)(1) (FLSA lactation time and space requirement). The Department does not have specific information about existing lactation spaces for employees due to a lack of relevant data. The Department assumes, however, that given the limited requirements for the lactation space itself, that most recipients will be able to locate such a space within their current property or maximize the use of an existing space. The Department's final requirements regarding lactation space are similar to those of the FLSA with the additional requirement that the space be clean. The Department assumes that most, if not all, recipients already clean their facilities, including any existing lactation space, and anticipates that the additional cost of cleaning associated with the final regulations will be negligible.

Second, some States also require a recipient either to provide lactation space to employees or to make reasonable attempts to do so. *See, e.g.,* Minn. Stat. Ann. § 181.939 (2014) (requiring employers to make a reasonable effort to provide a private location, other than a bathroom or toilet stall, in close proximity to the workplace that is shielded from view, free from intrusion, and has an electrical outlet); N.M. Stat. Ann. § 28–20–2 (2007) (requiring employers to provide a clean, private place, not a bathroom, for employees who are breastfeeding to pump); N.Y. Labor Law § 206–C (2007) (requiring that employers make a reasonable attempt to provide employees a private location for lactation); Okla. Stat. tit. 70, § 5–149.3 (2021) (requiring each school district board of education to make a reasonable effort to provide a private, secure, sanitary room or other location, other than a toilet stall, for an employee to express milk or breastfeed a child); R.I. Gen. Laws § 28–5–7.4 (2015) (prohibiting employers from refusing to reasonably accommodate an employee's or prospective employee's condition related to pregnancy, childbirth, or a related medical condition, including but not limited to the need to express breast milk for a nursing child; ''reasonable accommodation'' is defined to include a ''private non-bathroom space for expressing breast milk''); S.C. Code Ann. § 41–1–130 (2020) (requiring employers to make reasonable efforts to provide certain areas where employees may express breast milk); Tenn. Code Ann. § 50–1–305 (1999) (requiring employers to make a reasonable effort to provide a private location, other than a toilet stall, near the workplace for employees' lactation); Utah Code Ann. § 34–49–202 (2015) (requiring public

[120] Under the FLSA, a covered enterprise is ''the related activities performed through unified operation or common control by any person or persons for a common business purpose and . . . is engaged in the operation of . . . a preschool, an elementary or secondary school, or an institution of higher education (whether operated for profit or not for profit)'' or ''is an activity of a public agency.'' U.S. Dep't of Labor, Handy Reference Guide to the Fair Labor Standards Act (Sept. 2016), *https://www.dol.gov/agencies/whd/compliance-assistance/handy-reference-guide-flsa.*

employers to provide employees a clean, private room or location that is not a bathroom and that has an electrical outlet for lactation, as well as access to a refrigerator or freezer for the storage of breast milk); Vt. Stat. Ann. Tit. 21, § 305 (2008) (requiring employers to ''[m]ake a reasonable accommodation [for lactation] to provide appropriate private space that is not a bathroom stall''); Va. Code § 22.1–79.6 (2014) (requiring local school boards to designate private, non-restroom locations for employees and students to express breast milk); Wash. Rev. Code 43.10.005 (2017) (requiring employers to provide a private location, other than a bathroom, for employee lactation, or if no such space exists, work with the employee to identify a convenient location for lactation). As some States already require recipients to provide lactation spaces or make reasonable attempts to do so, the final regulations will be neither burdensome nor costly as many recipients may already be required to comply with similar provisions due to State law.

In addition, for some recipients, lactation space and break times may be the subject of local laws or separate employment agreements, such as collective bargaining agreements. Some recipients may simply provide lactation space and break time voluntarily. In short, the Department anticipates that its final regulations will impose de minimis cost on a recipient that is already providing lactation space and breaks to its staff.

The Department acknowledges that in some cases, the final regulations may result in increased demand for lactation space or break time. It is difficult to quantify the extent to which demand might increase or how demand might vary over time as the Department is not aware of any available data source that tracks the numbers of students or employees in need of lactation space. The Department anticipates that demand will vary across recipients, based on the composition of the student and employee population at any time, further reducing the impact to individual recipients.

When a recipient already has a lactation space, the Department anticipates that it is likely that the space will meet the Department's final requirements for the reasons already discussed. In addition, because a lactation space is only in use by any given person for a limited time period, it is possible that many recipients already have sufficient capacity to accommodate additional users; however, the Department anticipates that a recipient that does not currently provide lactation space will be able to comply with the final regulations using existing space at minimal cost. For example, the final regulations do not require that a lactation space be of a particular size, shape, or include features other than being private and clean. Similarly, the Department anticipates that a recipient that currently provides lactation space will already have a system in place to administer use of the space (for example, through a sign-up system) to the extent needed and that this could be adapted to accommodate new demand with minimal cost.

With respect to the Department's final requirement that a recipient provide its employees with reasonable break time for lactation, the Department also anticipates that any increased demand could be managed through an existing system for coverage of employees who require brief breaks for other reasons. This is more likely to be necessary for LEA school teachers, whose breaks may require coverage because of the nature of school schedules, rather than employees at IHEs who may not require coverage during breaks needed for lactation because those employees do not typically have supervisory responsibility for children. The Department also recognizes that at some IHEs and other types of recipients, some employees will have access to a private office that is sufficient for lactation needs.

Finally, the Department anticipates that its final regulations regarding lactation time and space will also likely improve the recipient's retention of its students and employees. For example, a student-parent may be more comfortable remaining in an education program or activity in which the recipient is reducing barriers to remaining in school during the early months and years of a child's life. Likewise, an employee who has access to sufficient lactation time and space may also be more likely to return to the workplace or return earlier from parental leave than one who does not have such access because the employee knows that they can continue to breastfeed after returning to work. For these reasons, this provision will impose de minimis costs and will provide important benefits in terms of eliminating sex-based barriers to education and employment. The Department did not receive any supplementary data upon which it could reasonably rely to modify its estimates.

Reasonable Modifications for Students Because of Pregnancy or Related Conditions

The Department does not anticipate significant cost to a recipient based on final § 106.40(b)(3)(ii), which requires that a recipient make reasonable modifications because of a student's ''pregnancy or related conditions'' as defined by final § 106.2, because this requirement is similar to OCR's previous discussion of a recipient's obligations in this context. 2013 Pregnancy Pamphlet, at 9. The Title IX regulations since 1975 have also prohibited a recipient from discriminating against or excluding ''any student from its education program or activity, including any class or extracurricular activity, on the basis of the student's pregnancy, childbirth, false pregnancy, termination of pregnancy or recovery therefrom, unless the student requests voluntarily to participate in a separate portion of the program or activity of the recipient.'' *See* 40 FR 24128 (codified at 45 CFR 86.40(b)(1) (1975)); 34 CFR 106.40(b)(1) (current). Likewise, § 106.40(b)(4) since 1975 has required a recipient to treat pregnancy or related conditions similarly to other temporary disabilities ''with respect to any medical or hospital benefit, service, plan, or policy [the] recipient administers, operates, offers, or participates in with respect to students admitted to the recipient's educational program or activity.'' *See* 40 FR 24128 (codified at 45 CFR 86.40(b)(4) (1975)); 34 CFR 106.40(b)(4) (current).

OCR's 2013 Pregnancy Pamphlet clarified that to ''ensure a pregnant student's access to its educational program, when necessary, a school must make adjustments to the regular program that are reasonable and responsive to the student's temporary pregnancy status. For example, a school might be required to provide a larger desk, allow frequent trips to the bathroom, or permit temporary access to elevators.'' 2013 Pregnancy Pamphlet, at 9. As the requirement for reasonable modifications because of pregnancy or related conditions builds upon the former ''reasonable and responsive'' standard and sets a clearer framework for how to assess what must be provided, the Department does not anticipate that the required steps for compliance with the amended reasonable modifications standard under § 106.40(b)(3)(ii) will be more costly than under the prior OCR interpretation of a recipient's duties. The Department did not receive any supplementary data upon which it

could reasonably rely to modify its estimates regarding such costs.

Participation Consistent With Gender Identity

The Department does not anticipate significant cost to a recipient above and beyond the general costs described in the discussion of Costs of the Final Regulations (Section 4) to comply with final § 106.31(a)(2). Final § 106.31(a)(2) clarifies that in the limited circumstances in which different treatment or separation on the basis of sex is permitted, a recipient must not carry out such different treatment or separation in a manner that discriminates on the basis of sex by subjecting a person to more than de minimis harm, except as permitted by 20 U.S.C. 1681(a)(1) through (9) and the corresponding regulations at §§ 106.12–106.15, 20 U.S.C. 1686 and its corresponding regulation § 106.32(b)(1), or § 106.41(b). Final § 106.31(a)(2) also clarifies that adopting a policy or engaging in a practice that prevents a person from participating in an education program or activity consistent with their gender identity causes more than de minimis harm on the basis of sex. As described in the discussion of Coverage of Sex Discrimination (Section IV), the final regulations' prohibition on preventing a person from participating in an education program or activity consistent with their gender identity is consistent with the analysis of some Federal courts that have addressed how Title IX protects students from discrimination based on sex stereotypes and gender identity. Some stakeholders have expressed concern about costs associated with permitting students to participate in a recipient's education program or activity consistent with their gender identity. Compliance with final § 106.31(a)(2) may require updating of policies or training materials, but will not require significant expenditures, such as construction of new facilities or creation of new programs. For the many schools that have long maintained policies and practices that generally permit students to participate in school consistent with their gender identity, the final regulations may not require any change. *See, e.g.,* Cal. Dep't of Educ., Legal Advisory regarding application of California's antidiscrimination statutes to transgender youth in schools (updated Sept. 16, 2021), *https://www.cde.ca.gov/re/di/eo/legaladvisory.asp* (describing obligation under California and Federal law that schools afford students equal opportunity and access to the school's facilities, activities, and programs, in a manner that is consistent with each student's gender identity); Washoe Cnty. Sch. Dist., Administrative Regulation 5161: Gender Identity and Gender Non-Conformity—Students (2019), *https://www.wcsdpolicy.net/pdf_files/administrative_regulations/5161_Reg-Gender_Identify-v2.pdf* (permitting students to participate in sex-separate activities in accordance with their gender identity). A recipient that maintains policies and practices that prevent students from participating in school consistent with their gender identity will be required to review and update those policies and practices under the final regulations; however, the Department anticipates that the costs of these modifications will be subsumed into the general costs of updating policies and procedures to comply with the final regulations, which is reflected in the costs described in the discussion of the Nondiscrimination Policy and Grievance Procedures (§ 106.8) section of the RIA.

The Department notes that some other costs associated with final § 106.31(a)(2) may be addressed elsewhere in the RIA. For instance, to the extent that a recipient's failure to comply with final § 106.31(a)(2) will lead to additional investigations of alleged discrimination, those costs are addressed in the discussion of costs associated with the proposal to clarify Title IX's coverage of gender identity discrimination. Similarly, to the extent that a recipient will take steps to train employees or students on gender identity discrimination, those costs are addressed in the discussion of costs associated with training. As this is an evolving area of the law, the Department anticipates there may be some costs associated with potential litigation. Litigation costs related to commenters' concerns about specific provisions in the final regulations, including the definition of ''sex-based harassment'' (§ 106.2), supportive measures (§ 106.44(g)), pregnancy or related conditions (§§ 106.40 and 106.57(e)), and the scope of sex discrimination (§ 106.10), are discussed above.

5. Regulatory Alternatives Considered

The Department reviewed and assessed various alternatives prior to issuing the final regulations, drawing from internal sources, as well as feedback OCR received from stakeholders, including during the June 2021 Title IX Public Hearing and numerous listening sessions, and from comments received in response to the July 2022 NPRM. In particular, the Department considered the following alternative actions: (1) leaving the 2020 amendments without amendment; (2) rescinding the 2020 amendments in their entirety and reissuing past guidance, including the 2001 Revised Sexual Harassment Guidance, the 2011 Dear Colleague Letter on Sexual Violence, and the 2014 Q&A on Sexual Violence; (3) rescinding the 2020 amendments, either in whole or in part, and issuing new guidance; (4) proposing narrower amendments to the 2020 amendments; or (5) issuing completely new final amendments to address significant areas (*e.g.,* clarifying that coverage includes gender identity, applying regulatory grievance procedure requirements to all sex discrimination complaints, and adding regulatory provisions regarding a recipient's obligation to students and employees who are pregnant or experiencing pregnancy-related conditions).

The Department determined that a combination of (4) and (5), which involves issuing final amendments, is the better alternative. The combination of these alternatives means amending the 2020 amendments to make noteworthy adjustments that will better achieve the objectives of the statute, are consistent with recent case law, and account for the feedback OCR received from stakeholders, including during the June 2021 Title IX Public Hearing and numerous listening sessions, and the comments received in response to the July 2022 NPRM. Based on its internal review, the Department's view is that the 2020 amendments did not fully address all prohibited sex discrimination in a recipient's education program or activity or offer sufficient safeguards to reduce—and ultimately remove—sex discrimination in the educational setting. The approach adopted in the 2020 amendments may have created a gap in implementing Title IX's prohibition on sex discrimination: a recipient may have information about possible sex discrimination in its education program or activity and yet may have no obligation to take any action to address it if a formal complaint is not filed and the recipient's Title IX Coordinator determines that the allegations do not warrant overriding a complainant's wishes and initiating a complaint. Numerous stakeholders and commenters shared their concerns with the Department, specifically that certain requirements in the 2020 amendments may impede a recipient from taking prompt and effective action in response to allegations of sexual harassment in the recipient's education program or activity. By creating extensive obligations related only to certain forms

of sexual harassment and leaving a recipient's obligations with respect to the necessary grievance procedures to respond to other forms of sex-based harassment and sex discrimination unaddressed, the 2020 amendments may have created a risk that Title IX's prohibition on sex discrimination would be underenforced. In addition, it is the Department's view that greater clarity is required than what is in the 2020 amendments with respect to the scope of sex discrimination, including with respect to discrimination based on sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity. The Department is concerned that equal access to a recipient's education program or activity may be impaired absent this clarity.

For reasons explained in the RIA as well as throughout the preamble, and in light of stakeholder feedback received in 2021 and 2022 and comments in response to the July 2022 NPRM, alternative (1) was not a reasonable option. Alternatives (2) and (3) were rejected because the Department continues to believe that it is necessary to establish, through regulations, the legal obligations of a recipient to ensure that its education program or activity is free from sex discrimination; guidance documents, which are not legally binding on a recipient, will not serve that function.

After careful consideration of these alternatives, the Department determines that adopting alternatives (4) and (5) is the best approach for five reasons. Such an approach: (a) best fulfills Title IX's guarantee of nondiscrimination on the basis of sex by a recipient of Federal funds in its education program or activity; (b) ensures that a recipient understands its obligations to address sex discrimination in all forms, including sex-based harassment, so that students and others can participate in the educational environment free from discrimination based on sex; (c) safeguards fairness for all who participate in a recipient's grievance procedures for sex discrimination, including sex-based harassment; (d) protects a person's rights under Title IX by requiring a recipient to provide appropriate supportive measures to the complainant and the respondent and remedies to a complainant or any other person the recipient identifies as having their equal access to the recipient's education program or activity limited or denied by sex discrimination; and (e) ensures that a recipient understands its obligations to prevent discrimination against and ensure equal access for students and employees who are pregnant or experiencing pregnancy-related conditions.

In addition to reviewing stakeholder feedback and comments in response to the July 2022 NPRM, the Department considered alternatives to the final regulations based upon its internal analysis of the costs and benefits of various options.

Clarification of the Scope of Title IX

During its review of various alternatives to the final regulations, the Department considered whether to clarify and define the scope of Title IX. Specifically, although the 2020 amendments define ''sexual harassment,'' they did not clarify the scope of Title IX's prohibition on sex discrimination. The Department considered several options to address this area and chooses to specify in the final regulations that Title IX's prohibition on sex discrimination includes discrimination on the basis of pregnancy or related conditions, sex stereotypes, sex characteristics, sexual orientation, and gender identity. Although the Department recognizes that clarifying the scope of Title IX could result in increased costs to recipients, especially those recipients that had not previously addressed discrimination on the bases explicitly referenced in the regulations, the non-monetary benefits of providing clarity and recognizing the broad scope of Title IX's protections justify the costs associated with the implementation of these robust protections.

Clarification of the Geographic Scope of Title IX's Prohibition on Sex Discrimination

The Department also considered retaining the 2020 amendments' scope of coverage with respect to conduct that occurs off campus and off school grounds. Numerous stakeholders in OCR's June 2021 Title IX Public Hearing, OCR's listening sessions, and the comments received in response to the July 2022 NPRM requested that the Department explicitly include additional instances of off-campus conduct within the scope of its final regulations. Specifically, these stakeholders commented that excluding such conduct denied students, employees, and others equal access to a recipient's education program or activity and failed to fully implement Title IX. As explained in greater detail in the discussion of investigations and adjudications in Cost Estimates (Section 4.C), the Department acknowledges the potential cost increase for a recipient in addressing all sex discrimination that occurs under a recipient's education program or activity, including conduct subject to a recipient's disciplinary authority, and also in addressing a sex-based hostile environment under the recipient's education program or activity even when some conduct alleged to be contributing to the hostile environment occurs outside of a recipient's education program or activity. However, the Department expects that many recipients are already addressing such conduct and incurring related costs through their creation and implementation of alternative disciplinary proceedings to address discriminatory conduct previously addressed through their Title IX procedures prior to the 2020 amendments. Moreover, the conduct excluded from the 2020 amendments may have profound and long-lasting economic impacts on students, employees, a recipient's educational environment, and the general public and that the benefits of addressing this conduct through the final regulations justifies any associated costs.

Distinguishing Between Educational Levels

The Department also considered whether to distinguish between educational levels in the final regulations. Specifically, during the June 2021 Title IX Public Hearing, in listening sessions, and in comments received in response to the July 2022 NPRM, stakeholders associated with LEAs expressed concerns that certain requirements in the 2020 amendments impeded their ability to successfully address sexual harassment in their day-to-day school environment. Likewise, the Department considered whether all students and employees should remain subject to identical regulations or whether, for the reasons set out in the preamble, fair treatment under Title IX would be best ensured by amending the regulations in ways that require IHEs to be responsive to the unique needs of their students. For reasons explained in the discussions of Benefits of the Final Regulations (Section 3) and Costs of the Final Regulations (Section 4), the Department is unable to quantify the benefits or costs of enabling recipients to adapt fair grievance procedures to their educational environment; however, as discussed throughout the preamble, not doing so will result in continuing impediments to full implementation of Title IX's nondiscrimination guarantee. Alternatively, the final regulations create the benefit of enabling all recipients to respond promptly and effectively to sex discrimination in their program or activity, remedy that

discrimination as appropriate, and increase access and the opportunity to participate free from sex discrimination.

6. Accounting Statement

As required by OMB Circular A–4,[121] the following table is the Department's accounting statement showing the classification of the expenditures associated with the provisions of the final regulations. The regulations are expected to result in estimated costs of $98,505,145 in the first year following publication of the final regulations, and $12,038,087 in cost savings in subsequent years. This table provides the Department's best estimate of the changes in annualized monetized costs, benefits, and transfers as a result of the final regulations.

Category	Benefits (calculated on an annual basis)	
Address gaps in coverage in 2020 amendments	Not quantified.	
Clarify scope of Title IX's protection	Not quantified.	
Clarify responsibilities toward students and employees based on pregnancy or related conditions	Not quantified.	
	Costs (calculated on an annual basis)	
Discount rate	3%	7%
Reading and Understanding the Regulations	$2,738,191	$3,201,238
Policy Revisions	6,280,804	7,342,931
Publishing Notice of Nondiscrimination	231,370	270,496
Training of Title IX Coordinators	2,658,785	2,704,730
Updating Training Materials	2,173,518	2,541,074
Supportive Measures	9,142,455	9,142,455
Group A Investigations	3,001,009	3,001,009
Group B Investigations	(63,650,843)	(63,650,843)
Appeal Process	17,776,304	17,776,304
Informal Resolutions	14,068,164	14,068,164
Creation and Maintenance of Documentation	6,262,994	6,591,433
Total	543,504	2,671,136

C. Regulatory Flexibility Act (Small Business Impacts)

1. Introduction

This analysis, required by the Regulatory Flexibility Act (RFA), presents an estimate of the effect of the final regulations on small entities. The SBA Size Standards for proprietary IHEs are set out in 13 CFR 121.201. Nonprofit IHEs are defined as small entities if they are independently owned and operated and not dominant in their field of operation. *See* 5 U.S.C. 601(4). ''Public institutions and LEAs'' are defined as small organizations if they are operated by a government overseeing a population below 50,000. *See* 5 U.S.C. 601(5).

2. Final Regulatory Flexibility Analysis

As explained in the discussion of Lack of Data Following the Promulgation of the 2020 Amendments (Section 4.A.3) of the RIA, there is a lack of high quality, comprehensive data about recipients' Title IX compliance activities and burdens following the implementation of the 2020 amendments. As a result, the Department could not definitively conclude that burdens on small entities, particularly among recipients other than IHEs or LEAs, will be sufficiently low to justify certification under the RFA. If an agency is unable to make such a certification, it must prepare a Final Regulatory Flexibility Analysis (FRFA) as described in the RFA. Based on the data available, the Department has completed a FRFA.

The purpose of this analysis is to identify the number of small entities affected, assess the economic impact of the final regulations on those small entities, and consider alternatives that may be less burdensome to small entities that meet the Department's regulatory objectives. Specifically, the Department estimates the number of small entities potentially impacted by the final regulations in the discussion of the FRFA, Estimated Number of Small Entities (Section 2.B), assesses the potential economic impact of the final regulations on those small entities in the discussion of the FRFA, Estimate of the Projected Burden of the Final Regulations on Small Entities (Section 2.C), and examines and considers less burdensome alternatives to the final regulations for small entities in the FRFA, Discussion of Significant Alternatives (Section 2.D).

2.A. Reasons for Regulating

The Department's review of the 2020 amendments and of feedback received during and pursuant to the June 2021 Title IX Public Hearing, as well as stakeholder listening sessions and from comments received in response to the July 2022 NPRM, suggests that the 2020 amendments do not best fulfill the requirement of Title IX that recipients of Federal financial assistance eliminate discrimination based on sex in their education programs or activities. The Department has determined that more clarity and greater specificity will better equip recipients to create and maintain educational environments free from sex discrimination. This, in turn, will help recipients ensure that all persons have equal access to educational opportunities in accordance with Title IX's nondiscrimination mandate.

The goal of the Department's final regulations is to fully effectuate Title IX by clarifying and specifying the scope and application of Title IX's protections and recipients' obligation not to discriminate based on sex. Specifically, the final regulations focus on ensuring that recipients prevent and address sex discrimination, including but not limited to sex-based harassment, in their education programs and activities;

[121] As explained above, Executive Order 12866 has been amended and supplemented by Executive Order 14094 of April 6, 2023, which directs the Director of the Office of Management and Budget to issue within one year of April 6, 2023, revisions to OMB Circular A–4. Updated OMB Circular A–4 does not apply to the final regulations.

clarifying the scope of Title IX's protection for students and others who are participating or attempting to participate in a recipient's education program or activity; defining important terms related to a recipient's obligations under Title IX; ensuring the provision of supportive measures, as appropriate, to restore or preserve a complainant's or respondent's access to the recipient's education program or activity; clarifying a recipient's responsibilities toward students who are pregnant or experiencing pregnancy-related conditions; and clarifying that Title IX's prohibition on sex discrimination encompasses discrimination based on sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity. In addressing confusion about coverage of sex-based harassment in the 2020 amendments, the Department's final regulations also set out requirements that enable recipients to meet their obligations in settings that vary in size, student populations, and administrative structure. The final regulations will strengthen the current framework, clarify the scope and application of Title IX, and fully align the Title IX regulations with the nondiscrimination mandate of Title IX.

2.B. Estimated Number of Small Entities

As noted above, SBA defines small proprietary IHEs based on revenue. These regulations apply, however, to all postsecondary IHEs, which cannot be compared across IHEs and sectors using the SBA revenue size standard because non-profit and public sector IHEs are not measured based on revenue. As a result, for purposes of the final regulations, the Department defines ''small entities'' by reference to enrollment, as it has done in other rulemakings, to allow meaningful comparison of regulatory impact across all types of IHEs in the for-profit, non-profit, and public sectors.[122] The Department notes that enrollment and revenue are generally correlated for all IHEs and that IHEs with higher enrollment tend to have the resources and infrastructure in place to more easily comply with the Department's regulations in general and the final regulations in particular. Since enrollment data is more readily available to the Department for all IHEs, the Department has used enrollment as the basis to identify small IHEs in prior rulemakings and continues to use enrollment to identify small IHEs in the final regulations. This approach also allows the Department to use the same metric to identify small IHEs across the for-profit, non-profit, and public sectors. It also treats public IHEs operated at the behest of jurisdictions with a population of more than 50,000 but with low enrollment as small, which the SBA's standard would not treat as small. Lastly, the North American Industry Classification System (NAICS), under which SBA's revenue standards in 13 CFR 121.201 are generally established, set different revenue thresholds for IHEs that provide different areas of instruction (*e.g.,* cosmetology, computer training, and similar programs) and there is no existing data that aligns those different revenue standards to the different types of regulated institutions. Similarly, where an IHE provides instruction in several of these areas, it is unclear which revenue threshold to apply for purposes of the Department's RFA analysis. The Department received several comments regarding its alternative size standard, which are addressed in the discussion of Comments on the Department's Model and Baseline Assumptions, Regulatory Flexibility Act (Small Business Impacts).

As explained above, the enrollment-based size standard remains the most relevant standard for identifying all IHEs subject to the final regulations. Therefore, instead of the SBA's revenue-based size standard, which applies only to proprietary IHEs, the Department has defined ''small IHE'' as (1) a less-than-two-year IHE with an enrollment of fewer than 750 students, or (2) an at-least-two-year-but-less-than-four-year IHE, or a four-year institution, with enrollment of fewer than 1,000 students.[123] As a result of discussions with the SBA, this is an update from the standard used in some prior rules, such as the July 2022 NPRM associated with the final regulations, ''Financial Value Transparency and Gainful Employment (GE), Financial Responsibility, Administrative Capability, Certification Procedures, Ability to Benefit (ATB),'' published in the **Federal Register** on May 19, 2023, 88 FR 32300, ''Improving Income Driven Repayment for the William D. Ford Federal Direct Loan Program and the Federal Family Education Loan (FFEL) Program, published in the **Federal Register** on July 10, 2023, 88 FR 43820, and the final regulations, ''Pell Grants for Prison Education Programs; Determining the Amount of Federal Education Assistance Funds Received by Institutions of Higher Education (90/10); Change in Ownership and Change in Control,'' published in the **Federal Register** on October 28, 2022. 87 FR 65426. Those prior regulations applied an enrollment standard for a small two-year IHE of less than 500 full-time-equivalent (FTE) students and for a small 4-year IHE, less than 1,000 FTE students.[124] The Department consulted with the SBA Office of Advocacy on the revised alternative standard for this rulemaking. The Department continues to believe this approach most accurately reflects a common basis for determining size categories that is linked to the provision of educational services and that it captures a similar universe of small entities as the SBA's revenue standard. We note that the Department's revised alternative size standard and the SBA's revenue standard identify a similar number of total proprietary IHEs, with greater than 93 percent agreement between the two standards. Using the Department's revised alternative size standard, approximately 61 percent of all IHEs would be classified as small for these purposes. Based on data from NCES, in 2022, small IHEs had an average enrollment of

[122] *See* the proposed 2020 amendments for more background on the Department's justification for using an enrollment-based size standard. 83 FR 61462 (Nov. 29, 2018). *See, also, e.g.,* ''Student Assistance General Provisions, Federal Perkins Loan Program, Federal Family Education Loan Program, and William D. Ford Federal Direct Loan Program'' proposed rule, published in the **Federal Register** on July 31, 2018, 83 FR 37242, and final rule, published in the **Federal Register** on September 23, 2019, 84 FR 49788; and ''Gainful Employment'' (GE) final rule published in the **Federal Register** on July 1, 2019, 84 FR 31392. The Department notes that the alternative size standards that are used in the final regulations are identical to the alternative size standards used in the GE regulations published in the **Federal Register** on October 10, 2023. *See* 88 FR 70175.

[123] In regulations prior to 2016, the Department categorized small businesses based on tax status. Those regulations defined ''nonprofit organizations'' as ''small organizations'' if they were independently owned and operated and not dominant in their field of operation, or as ''small entities'' if they were institutions controlled by governmental entities with populations below 50,000. Those definitions resulted in the categorization of all private nonprofit organizations as small and no public institutions as small. Under the previous definition, proprietary institutions were considered small if they are independently owned and operated and not dominant in their field of operation with total annual revenue below $7,000,000. Using FY 2017 IPEDs finance data for proprietary institutions, 50 percent of 4-year and 90 percent of 2-year or less proprietary institutions would be considered small. By contrast, an enrollment-based definition applies the same metric to all types of institutions, allowing consistent comparison across all types.

[124] In those prior rules, at least two but less-than-four-years institutions were considered in the broader two-year category. In this iteration, after consulting with the SBA Office of Advocacy, we separate this group into its own category. Based on this consultation, we have also increased the enrollment threshold for less-than-two-year institutions from 500 to 750 in order to treat a similar number of institutions as small under the alternative enrollment standard as would be captured under a revenue standard.

approximately 289 students. In contrast, all other IHEs had an average enrollment of approximately 5,509 students.

TABLE 1—NUMBER OF SMALL IHES UNDER ENROLLMENT BASED DEFINITION

	4-year	2-year	Less than 2-year	Total
Not Small	1,612	667	89	2,368
Small	1,155	908	1,572	3,635
Total	2,767	1,575	1,661	6,003

Source: 2022 IPEDS data reported to the Department.

In addition, the Department defines ''small LEA'' as either an LEA that is (1) a traditional public school district located in a county with a total population of less than 50,000, or (2) a charter school LEA. With regard to charter school LEAs, given their average size and their inherent geographic limitations, which limit their ability to be ''dominant'' in the field, it is reasonable to treat all charter school LEAs as small LEAs for purposes of this analysis. Under this analysis, 8,914 of all LEAs would be considered ''small.''

Entity type	Small LEAs		Not small LEAs	
	Avg. revenue	Avg. enrollment	Avg. revenue	Avg. enrollment
Traditional LEA	$17,903,420	1,223	$84,430,327	5,032
Charter LEA	8,750,165	730		

2.C. Estimate of the Projected Burden of the Final Regulations on Small Entities

As discussed throughout the RIA, Group A IHEs are those most likely to see a net cost increase from the final regulations. As such, a Group A IHE will incur greater costs than an IHE in Group B or Group C. Based on the model described in the discussion of RIA, Developing the Model (Section 4.B), an IHE in Group A will see a net increase in costs of approximately $8,477 per year. For purposes of assessing the impacts on small entities, the Department defines a ''small IHE'' as a less than two-year IHE with an enrollment of less than 750 FTE and two-year or four-year IHEs with an enrollment of less than 1,000 FTE, based on official 2022 FTE enrollment. The Department notes that this estimate assumes that each small IHE will conduct the same number of investigations per year, on average, as the total universe of all affected IHEs. It is much more likely that small IHEs will conduct fewer investigations per year and therefore, their actual realized costs will be less than those estimated herein. According to data from the IPEDS, in FY 2022, small IHEs had, on average, total revenues of approximately $8,282,318.[125] Therefore, the Department estimates that the final regulations could generate a net cost for small IHEs equal to approximately 0.10 percent of annual revenue. According to data from IPEDS, approximately 684 IHEs had total reported annual revenues of less than $847,700 for which the costs estimated above will potentially exceed 1 percent of total revenues. Those IHEs enrolled, on average, 60 students in 2022. For institutions of this size, it will be highly unlikely for the recipient to conduct 6.3 investigations per year, which represents a rate of investigations approximately 45 times higher than all other institutions, on average. The Department therefore does not anticipate that the final regulations will place a substantial burden on small IHEs.

For the purpose of assessing the impacts on small entities, the Department defines ''small LEA'' as either an LEA that is (1) a traditional public school district located in a county with a total population of less than 50,000, or (2) a charter school LEA. While the Department recognizes that governance structures with respect to traditional public school districts vary both across and within States, the Department's definition with respect to these entities is intended to serve as a reasonable proxy for the SBA's standard definition of a small government entity as one with a jurisdiction of less than 50,000 people. Based on the model described in the discussion of RIA, Developing the Model (Section 4.B), an LEA in Group A will see a net increase in costs of approximately $2,623 per year. The Department notes that these estimates assume small LEAs conduct the same number of investigations per year, on average, as all other LEAs. To the extent that smaller LEAs conduct fewer investigations, on average, than all LEAs, these annual costs will be overestimated for small LEAs. Based on data from NCES, the average ''small LEA,'' as defined above, had total annual revenues of approximately $13,565,288 during the 2019–2020 academic year. As such, the Department estimates that the proposed regulations would impose gross costs on small LEAs of approximately 0.02% of their total annual revenues. Of the small LEAs, approximately 117 reported total revenues in that year of $262,300 or less, where the estimated costs would potentially exceed 1% of total revenues. On average, these schools reported an enrollment of 45 students. For these exceptionally small LEAs, it is reasonable to assume that cost structures may be different than those estimated above in the RIA. For LEAs of this size, it is highly unlikely for the recipient to conduct 3.6 investigations per year, which represent a rate of investigations approximately 63 times higher than all other LEAs, on average. The Department, therefore, does not anticipate that the final regulations will place a substantial burden on small LEAs.

Based on the model described in the discussion of the RIA, Developing the Model (Section 4.B), ''other'' recipients in Group A will see a net increase in costs of approximately $3,754 per year. As explained in the discussion of small IHEs and small LEAs, the Department

[125] Based on data reported for FY 2022 for ''total revenue and other additions'' for public institutions and ''total revenues and investment return'' for private not-for-profit and private for-profit institutions.

notes that these estimates assume other small entities will conduct the same number of investigations per year, on average, as all other recipients in this category. To the extent that smaller entities conduct fewer investigations on average than all other recipients, these annual costs will be overestimated for small other recipients. Although the Department does not have revenue data for all other recipients, for purposes of this analysis, the Department will assume that, among other recipients with annual revenues of less than $7,000,000, the average annual revenue is approximately $3,500,000, which assumes that recipient revenues are normally distributed within the range of $0 to $7,000,000. At this level, the estimated cost will constitute approximately 0.08 percent of total revenues. The Department notes that, for estimated costs to exceed 1 percent of total revenues, ''other'' recipients will need total annual revenues of less than $375,400. Very few other recipients will fall into this category, in part, because in FY 2023, among other recipients receiving less than $1,000,000 in grant funds from the Department, the average grantee received approximately $358,976 in Federal grant funds. Among those receiving less than $500,000 in funding from the Department, the average other recipient received approximately $245,223 in grant funds in FY 2023. Even with very small amounts of non-Federal funding, it is unlikely that costs of compliance with the final regulations would exceed 1 percent of annual revenues for these recipients. The Department, therefore, does not expect that the final regulations will place a substantial burden on small other recipients.

2.D. Discussion of Significant Alternatives

The Department also considered alternatives that could potentially reduce the burden for small entities. One alternative would be to extend the effective date of the Title IX regulations for small entities such that they would have additional time to implement key components of the regulations. An extension of the effective date will delay the efforts of small entities to ensure that their education programs or activities are free from sex discrimination, thereby depriving students, employees, and others of their rights under Title IX. Another alternative would be to waive certain requirements for small entities to help facilitate their compliance with Title IX. The Department declines this approach because the final regulations are critical to ensuring that all education programs or activities that receive Federal funding do not discriminate based on sex. In addition, the final regulations are more adaptable than the 2020 amendments and will provide greater opportunities for small entities to tailor their compliance efforts to their settings. Finally, the Department considered proposing different requirements for smaller-sized recipients than for mid-sized or larger ones. The Department rejects this alternative because the Title IX rights of students, employees, and other members of a recipient's educational community do not depend on the size of a recipient, and the final regulations are sufficiently adaptable for small entities to adopt the approach that works best for them. Being subjected to sex discrimination in a recipient's education program or activity can affect an applicant's opportunity to enroll in a recipient's education program or activity, a student's ability to learn and thrive inside and outside of the classroom, a prospective or current employee's ability to contribute their talents to the recipient's educational mission, and the opportunity of all participants to benefit, on an equal basis, from the recipient's education program or activity. Thus, permitting a small entity the opportunity to delay implementation of the final regulations, waiving certain requirements for smaller entities, or having different requirements for small entities could jeopardize these important civil rights and harm students, employees, and others.

Executive Order 12250 on Leadership and Coordination of Nondiscrimination Laws

Pursuant to Executive Order 12250, the President's authority under 20 U.S.C. 1682 ''relating to the approval of rules, regulations, and orders'' implementing Title IX has been delegated to the Attorney General. Executive Order 12250 at § 1–102, 45 FR 72995 (Nov. 2, 1980). The final regulations were reviewed and approved by the Attorney General.

Paperwork Reduction Act of 1995

As part of its continuing effort to reduce paperwork and the burden of responding, the Department provides the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This requirement helps ensure that: (1) the public understands the Department's collection instructions; (2) respondents can provide the requested data in the desired format; (3) reporting burden (time and financial resources) is minimized; (4) collection instruments are clearly understood; and (5) the Department can properly assess the impact of collection requirements on respondents.

As discussed in the RIA, Cost Estimates (Section 4.C.), the Department estimates that all regulated entities will experience an increased recordkeeping burden under the final regulations as a result of the changes to recordkeeping requirements in final § 106.8(f). Specifically, in Year 1, the Department estimates that compliance would require an additional 4 hours of recordkeeping burden per LEA, 16 hours per IHE, and 4 hours per other recipient. In total, the Department estimates the Year 1 recordkeeping burden associated with the final regulations to be a net increase of 171,024 hours.

In subsequent years, the Department estimates that the final regulations will require an additional ongoing burden of 2 hours per LEA, 6 hours per IHE, and 2 hours per other recipient. In total, the Department estimates an ongoing annual recordkeeping burden increase of 73,506 hours. However, the Department's view is that final § 106.8(f) will not result in a change of disclosure requirements. Specifically, there are three main reasons for this assumption: (1) recipients were already required to maintain all records related to sexual harassment under the 2020 amendments; (2) many recipients (based on anecdotal reports) were already conducting and maintaining records related to alternative disciplinary proceedings addressing conduct outside of the coverage area of the 2020 amendments; and (3) based upon anecdotal reports, many recipients were already maintaining their records related to sex discrimination. As a result, recipients falling within one or more of these categories will experience a de minimis increase in the number of disclosures.

Regulatory section	Information collection	OMB control No. and estimated change in burden
106.8(f)	This regulatory provision requires a recipient to maintain certain documentation related to Title IX activities.	OMB 1870–0505 Changes will increase burden over the first seven years by $44,448,753 612,060 hours.

The Department prepared an Information Collection Request (ICR) for this collection. This collection was identified as proposed collection OMB control number 1870–0505.

Assessment of Educational Impact

In the July 2022 NPRM the Department requested comments on whether the proposed regulations would require transmission of information that any other agency or authority of the United States gathers or makes available. 87 FR 41566.

Based on the response to the July 2022 NPRM and on the Department's review, the final regulations do not require transmission of information that any other agency or authority of the United States gathers or makes available.

Federalism

Executive Order 13132 requires the Department to ensure meaningful and timely input by State and local elected officials in the development of regulatory policies that have federalism implications. ''Federalism implications'' means substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

In the July 2022 NPRM, the Department identified specific sections that could potentially have had federalism implications and encouraged State and local elected officials to review and provide comments on the proposed regulations. *Id.* In the preamble, the Department discusses any comments received on this subject.

Accessible Format

On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document

You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

List of Subjects in 34 CFR Part 106

Civil rights, Education, Sex discrimination, Youth organizations.

Miguel A. Cardona,

Secretary of Education.

For the reasons discussed in the preamble, the Secretary amends part 106 of title 34 of the Code of Federal Regulations as follows:

PART 106—NONDISCRIMINATION ON THE BASIS OF SEX IN EDUCATION PROGRAMS OR ACTIVITIES RECEIVING FEDERAL FINANCIAL ASSISTANCE

■ 1. The authority citation for part 106 continues to read as follows:

Authority: 20 U.S.C. 1681 *et seq.,* unless otherwise noted.

■ 2. Section 106.1 is revised to read as follows:

§ 106.1 Purpose.

The purpose of this part is to effectuate Title IX, which is designed to eliminate (with certain exceptions) discrimination on the basis of sex in any education program or activity receiving Federal financial assistance, whether or not such program or activity is offered or sponsored by an educational institution as defined in this part. This part is also intended to effectuate section 844 of the Education Amendments of 1974, Public Law 93–380, 88 Stat. 484.

■ 3. Section 106.2 is revised to read as follows:

§ 106.2 Definitions.

As used in this part, the term:

Administrative law judge means a person appointed by the reviewing authority to preside over a hearing held under § 106.81.

Administratively separate unit means a school, department, or college of an educational institution (other than a local educational agency), admission to which is independent of admission to any other component of such institution.

Admission means selection for part-time, full-time, special, associate, transfer, exchange, or any other enrollment, membership, or matriculation in or at an education program or activity operated by a recipient.

Applicant, as used in the definition of educational institution in this section and as used in § 106.4, means one who submits an application, request, or plan required to be approved by a Department official, or by a recipient, as a condition to becoming a recipient.

Assistant Secretary means the Assistant Secretary for Civil Rights of the Department.

Complainant means:

(1) A student or employee who is alleged to have been subjected to conduct that could constitute sex discrimination under Title IX or this part; or

(2) A person other than a student or employee who is alleged to have been subjected to conduct that could constitute sex discrimination under Title IX or this part and who was participating or attempting to participate in the recipient's education program or activity at the time of the alleged sex discrimination.

Complaint means an oral or written request to the recipient that objectively can be understood as a request for the recipient to investigate and make a determination about alleged discrimination under Title IX or this part.

Confidential employee means:

(1) An employee of a recipient whose communications are privileged or confidential under Federal or State law. The employee's confidential status, for purposes of this part, is only with respect to information received while the employee is functioning within the scope of their duties to which privilege or confidentiality applies;

(2) An employee of a recipient whom the recipient has designated as confidential under this part for the purpose of providing services to persons related to sex discrimination. If the employee also has a duty not associated with providing those services, the

employee's confidential status is only with respect to information received about sex discrimination in connection with providing those services; or

(3) An employee of a postsecondary institution who is conducting an Institutional Review Board-approved human-subjects research study designed to gather information about sex discrimination—but the employee's confidential status is only with respect to information received while conducting the study.

Department means the Department of Education.

Disciplinary sanctions means consequences imposed on a respondent following a determination under Title IX that the respondent violated the recipient's prohibition on sex discrimination.

Educational institution means a local educational agency (LEA) as defined by section 8101 of the Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act (20 U.S.C. 7801(30)), a preschool, a private elementary or secondary school, or an applicant or recipient that is an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, or an institution of vocational education.

Elementary school means elementary school as defined by section 8101 of the Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act (20 U.S.C. 7801(19)), and a public or private preschool.

Federal financial assistance means any of the following, when authorized or extended under a law administered by the Department:

(1) A grant or loan of Federal financial assistance, including funds made available for:

(i) The acquisition, construction, renovation, restoration, or repair of a building or facility or any portion thereof; and

(ii) Scholarships, loans, grants, wages, or other funds extended to any entity for payment to or on behalf of students admitted to that entity, or extended directly to such students for payment to that entity.

(2) A grant of Federal real or personal property or any interest therein, including surplus property, and the proceeds of the sale or transfer of such property, if the Federal share of the fair market value of the property is not, upon such sale or transfer, properly accounted for to the Federal Government.

(3) Provision of the services of Federal personnel.

(4) Sale or lease of Federal property or any interest therein at nominal consideration, or at consideration reduced for the purpose of assisting the recipient or in recognition of public interest to be served thereby, or permission to use Federal property or any interest therein without consideration.

(5) Any other contract, agreement, or arrangement which has as one of its purposes the provision of assistance to any education program or activity, except a contract of insurance or guaranty.

Institution of graduate higher education means an institution which:

(1) Offers academic study beyond the bachelor of arts or bachelor of science degree, whether or not leading to a certificate of any higher degree in the liberal arts and sciences; or

(2) Awards any degree in a professional field beyond the first professional degree (regardless of whether the first professional degree in such field is awarded by an institution of undergraduate higher education or professional education); or

(3) Awards no degree and offers no further academic study, but operates ordinarily for the purpose of facilitating research by persons who have received the highest graduate degree in any field of study.

Institution of professional education means an institution (except any institution of undergraduate higher education) which offers a program of academic study that leads to a first professional degree in a field for which there is a national specialized accrediting agency recognized by the Secretary.

Institution of undergraduate higher education means:

(1) An institution offering at least two but less than four years of college level study beyond the high school level, leading to a diploma or an associate degree, or wholly or principally creditable toward a baccalaureate degree; or

(2) An institution offering academic study leading to a baccalaureate degree; or

(3) An agency or body which certifies credentials or offers degrees, but which may or may not offer academic study.

Institution of vocational education means a school or institution (except an institution of professional or graduate or undergraduate higher education) which has as its primary purpose preparation of students to pursue a technical, skilled, or semiskilled occupation or trade, or to pursue study in a technical field, whether or not the school or institution offers certificates, diplomas, or degrees and whether or not it offers fulltime study.

Parental status, as used in §§ 106.21(c)(2)(i), 106.37(a)(3), 106.40(a), and 106.57(a)(1), means the status of a person who, with respect to another person who is under the age of 18 or who is 18 or older but is incapable of self-care because of a physical or mental disability, is:

(1) A biological parent;

(2) An adoptive parent;

(3) A foster parent;

(4) A stepparent;

(5) A legal custodian or guardian;

(6) In loco parentis with respect to such a person; or

(7) Actively seeking legal custody, guardianship, visitation, or adoption of such a person.

Party means a complainant or respondent.

Peer retaliation means retaliation by a student against another student.

Postsecondary institution means an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, or an institution of vocational education that serves postsecondary school students.

Pregnancy or related conditions means:

(1) Pregnancy, childbirth, termination of pregnancy, or lactation;

(2) Medical conditions related to pregnancy, childbirth, termination of pregnancy, or lactation; or

(3) Recovery from pregnancy, childbirth, termination of pregnancy, lactation, or related medical conditions.

Program or activity and *program* means all of the operations of—

(1)(i) A department, agency, special purpose district, or other instrumentality of a State or local government; or

(ii) The entity of a State or local government that distributes such assistance and each such department or agency (and each other State or local government entity) to which the assistance is extended, in the case of assistance to a State or local government;

(2)(i) A college, university, or other postsecondary institution, or a public system of higher education; or

(ii) A local educational agency (as defined in 20 U.S.C. 8801), system of vocational education, or other school system;

(3)(i) An entire corporation, partnership, other private organization, or an entire sole proprietorship—

(A) If assistance is extended to such corporation, partnership, private organization, or sole proprietorship as a whole; or

(B) Which is principally engaged in the business of providing education, health care, housing, social services, or parks and recreation; or

(ii) The entire plant or other comparable, geographically separate facility to which Federal financial assistance is extended, in the case of any other corporation, partnership, private organization, or sole proprietorship; or

(4) Any other entity that is established by two or more of the entities described in paragraph (1), (2), or (3) of this definition, any part of which is extended Federal financial assistance.

Recipient means any State or political subdivision thereof, or any instrumentality of a State or political subdivision thereof, any public or private agency, institution, or organization, or other entity, or any person, to whom Federal financial assistance is extended directly or through another recipient and which operates an education program or activity which receives such assistance, including any subunit, successor, assignee, or transferee thereof.

Relevant means related to the allegations of sex discrimination under investigation as part of the grievance procedures under § 106.45, and if applicable § 106.46. Questions are relevant when they seek evidence that may aid in showing whether the alleged sex discrimination occurred, and evidence is relevant when it may aid a decisionmaker in determining whether the alleged sex discrimination occurred.

Remedies means measures provided, as appropriate, to a complainant or any other person the recipient identifies as having had their equal access to the recipient's education program or activity limited or denied by sex discrimination. These measures are provided to restore or preserve that person's access to the recipient's education program or activity after a recipient determines that sex discrimination occurred.

Respondent means a person who is alleged to have violated the recipient's prohibition on sex discrimination.

Retaliation means intimidation, threats, coercion, or discrimination against any person by the recipient, a student, or an employee or other person authorized by the recipient to provide aid, benefit, or service under the recipient's education program or activity, for the purpose of interfering with any right or privilege secured by Title IX or this part, or because the person has reported information, made a complaint, testified, assisted, or participated or refused to participate in any manner in an investigation, proceeding, or hearing under this part, including in an informal resolution process under § 106.44(k), in grievance procedures under § 106.45, and if applicable § 106.46, and in any other actions taken by a recipient under § 106.44(f)(1). Nothing in this definition or this part precludes a recipient from requiring an employee or other person authorized by a recipient to provide aid, benefit, or service under the recipient's education program or activity to participate as a witness in, or otherwise assist with, an investigation, proceeding, or hearing under this part.

Reviewing authority means that component of the Department delegated authority by the Secretary to appoint, and to review the decisions of, administrative law judges in cases arising under this part.

Secondary school means secondary school as defined by section 8101 of the Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act (20 U.S.C. 7801(45)), and an institution of vocational education that serves secondary school students.

Secretary means the Secretary of Education.

Sex-based harassment prohibited by this part is a form of sex discrimination and means sexual harassment and other harassment on the basis of sex, including on the bases described in § 106.10, that is:

(1) *Quid pro quo harassment.* An employee, agent, or other person authorized by the recipient to provide an aid, benefit, or service under the recipient's education program or activity explicitly or impliedly conditioning the provision of such an aid, benefit, or service on a person's participation in unwelcome sexual conduct;

(2) *Hostile environment harassment.* Unwelcome sex-based conduct that, based on the totality of the circumstances, is subjectively and objectively offensive and is so severe or pervasive that it limits or denies a person's ability to participate in or benefit from the recipient's education program or activity (*i.e.,* creates a hostile environment). Whether a hostile environment has been created is a fact-specific inquiry that includes consideration of the following:

(i) The degree to which the conduct affected the complainant's ability to access the recipient's education program or activity;

(ii) The type, frequency, and duration of the conduct;

(iii) The parties' ages, roles within the recipient's education program or activity, previous interactions, and other factors about each party that may be relevant to evaluating the effects of the conduct;

(iv) The location of the conduct and the context in which the conduct occurred; and

(v) Other sex-based harassment in the recipient's education program or activity; or

(3) *Specific offenses.* (i) Sexual assault meaning an offense classified as a forcible or nonforcible sex offense under the uniform crime reporting system of the Federal Bureau of Investigation;

(ii) Dating violence meaning violence committed by a person:

(A) Who is or has been in a social relationship of a romantic or intimate nature with the victim; and

(B) Where the existence of such a relationship shall be determined based on a consideration of the following factors:

(*1*) The length of the relationship;

(*2*) The type of relationship; and

(*3*) The frequency of interaction between the persons involved in the relationship;

(iii) Domestic violence meaning felony or misdemeanor crimes committed by a person who:

(A) Is a current or former spouse or intimate partner of the victim under the family or domestic violence laws of the jurisdiction of the recipient, or a person similarly situated to a spouse of the victim;

(B) Is cohabitating, or has cohabitated, with the victim as a spouse or intimate partner;

(C) Shares a child in common with the victim; or

(D) Commits acts against a youth or adult victim who is protected from those acts under the family or domestic violence laws of the jurisdiction; or

(iv) Stalking meaning engaging in a course of conduct directed at a specific person that would cause a reasonable person to:

(A) Fear for the person's safety or the safety of others; or

(B) Suffer substantial emotional distress.

Note 1 to the definition of sex-based harassment: The Assistant Secretary will not require a recipient to adopt a particular definition of consent, where that term is applicable with respect to sex-based harassment.

Student means a person who has gained admission.

Student with a disability means a student who is an individual with a disability as defined in the Rehabilitation Act of 1973, as amended, 29 U.S.C. 705(9)(B), (20)(B), or a child with a disability as defined in the Individuals with Disabilities Education Act, 20 U.S.C. 1401(3).

Supportive measures means individualized measures offered as appropriate, as reasonably available, without unreasonably burdening a complainant or respondent, not for punitive or disciplinary reasons, and without fee or charge to the complainant or respondent to:

(1) Restore or preserve that party's access to the recipient's education program or activity, including measures that are designed to protect the safety of the parties or the recipient's educational environment; or

(2) Provide support during the recipient's grievance procedures under § 106.45, and if applicable § 106.46, or during the informal resolution process under § 106.44(k).

Title IX means Title IX of the Education Amendments of 1972 (Pub. L. 92–318; 20 U.S.C. 1681, 1682, 1683, 1685, 1686, 1687, 1688, 1689), as amended.

§ 106.3 [Amended]

■ 4. Section 106.3 is amended by removing paragraphs (c) and (d).

■ 5. Section 106.6 is amended by:

■ a. Revising paragraphs (b), (e), and (g).

■ b. Removing paragraph (h). The revisions read as follows:

§ 106.6 Effect of other requirements and preservation of rights.

* * * * *

(b) *Effect of State or local law or other requirements.* The obligation to comply with Title IX and this part is not obviated or alleviated by any State or local law or other requirement that conflicts with Title IX or this part.

* * * * *

(e) *Effect of Section 444 of General Education Provisions Act (GEPA)/ Family Educational Rights and Privacy Act (FERPA).* The obligation to comply with Title IX and this part is not obviated or alleviated by FERPA, 20 U.S.C. 1232g, or its implementing regulations, 34 CFR part 99.

* * * * *

(g) *Exercise of rights by parents, guardians, or other authorized legal representatives.* Nothing in Title IX or this part may be read in derogation of any legal right of a parent, guardian, or other authorized legal representative to act on behalf of a complainant, respondent, or other person, subject to paragraph (e) of this section, including but not limited to making a complaint through the recipient's grievance procedures for complaints of sex discrimination.

■ 6. Section 106.8 is revised to read as follows:

§ 106.8 Designation of coordinator; nondiscrimination policy; grievance procedures; notice of nondiscrimination; training; students with disabilities; and recordkeeping.

(a) *Designation of a Title IX Coordinator.* (1) *Title IX Coordinator.* Each recipient mustdesignate and authorize at least one employee, referred to herein as a Title IX Coordinator, to coordinate its efforts to comply with its responsibilities under Title IX and this part. If a recipient has more than one Title IX Coordinator, it must designate one of its Title IX Coordinators to retain ultimate oversight over those responsibilities and ensure the recipient's consistent compliance with its responsibilities under Title IX and this part.

(2) *Delegation to designees.* As appropriate, a recipient may delegate, or permit a Title IX Coordinator to delegate, specific duties to one or more designees.

(b) *Adoption, publication, and implementation of nondiscrimination policy and grievance procedures.* (1) *Nondiscrimination policy.* Each recipient must adopt, publish, and implement a policy stating that the recipient does not discriminate on the basis of sex and prohibits sex discrimination in any education program or activity that it operates, as required by Title IX and this part, including in admission (unless subpart C of this part does not apply) and employment.

(2) *Grievance procedures.* A recipient must adopt, publish, and implement grievance procedures consistent with the requirements of § 106.45, and if applicable § 106.46, that provide for the prompt and equitable resolution of complaints made by students, employees, or other individuals who are participating or attempting to participate in the recipient's education program or activity, or by the Title IX Coordinator, alleging any action that would be prohibited by Title IX or this part.

(c) *Notice of nondiscrimination.* A recipient must provide a notice of nondiscrimination to students; parents, guardians, or other authorized legal representatives of elementary school and secondary school students; employees; applicants for admission and employment; and all unions and professional organizations holding collective bargaining or professional agreements with the recipient.

(1) *Contents of notice of nondiscrimination.* (i) The notice of nondiscrimination must include the following elements:

(A) A statement that the recipient does not discriminate on the basis of sex and prohibits sex discrimination in any education program or activity that it operates, as required by Title IX and this part, including in admission (unless subpart C of this part does not apply) and employment;

(B) A statement that inquiries about the application of Title IX and this part to the recipient may be referred to the recipient's Title IX Coordinator, the Office for Civil Rights, or both;

(C) The name or title, office address, email address, and telephone number of the recipient's Title IX Coordinator;

(D) How to locate the recipient's nondiscrimination policy under paragraph (b)(1) of this section; and the recipient's grievance procedures under paragraph (b)(2) of this section; and

(E) How to report information about conduct that may constitute sex discrimination under Title IX; and how to make a complaint of sex discrimination under this part.

(ii) Nothing in this part prevents a recipient from including in its notice of nondiscrimination information about any exceptions or exemptions applicable to the recipient under Title IX.

(2) *Publication of notice of nondiscrimination.* (i) Each recipient must prominently include all elements of its notice of nondiscrimination set out in paragraphs (c)(1)(i)(A) through (E) of this section on its website and in each handbook, catalog, announcement, bulletin, and application form that it makes available to persons entitled to notice under paragraph (c) of this section, or which are otherwise used in connection with the recruitment of students or employees.

(ii) If necessary, due to the format or size of any publication under paragraph (c)(2)(i) of this section, the recipient may instead include in those publications a statement that the recipient prohibits sex discrimination in any education program or activity that it operates and that individuals may report concerns or questions to the Title IX Coordinator, and provide the location of the notice on the recipient's website.

(iii) A recipient must not use or distribute a publication stating that the recipient treats applicants, students, or employees differently on the basis of sex, except as such treatment is permitted by Title IX or this part.

(d) *Training.* The recipient must ensure that the persons described in paragraphs (d)(1) through (4) of this section receive training related to their duties under Title IX promptly upon hiring or change of position that alters their duties under Title IX or this part,

and annually thereafter. This training must not rely on sex stereotypes.

(1) *All employees.* All employees must be trained on:

(i) The recipient's obligation to address sex discrimination in its education program or activity;

(ii) The scope of conduct that constitutes sex discrimination under Title IX and this part, including the definition of sex-based harassment; and

(iii) All applicable notification and information requirements under §§ 106.40(b)(2) and 106.44.

(2) *Investigators, decisionmakers, and other persons who are responsible for implementing the recipient's grievance procedures or have the authority to modify or terminate supportive measures.* In addition to the training requirements in paragraph (d)(1) of this section, all investigators, decisionmakers, and other persons who are responsible for implementing the recipient's grievance procedures or have the authority to modify or terminate supportive measures under § 106.44(g)(4) must be trained on the following topics to the extent related to their responsibilities:

(i) The recipient's obligations under § 106.44;

(ii) The recipient's grievance procedures under § 106.45, and if applicable § 106.46;

(iii) How to serve impartially, including by avoiding prejudgment of the facts at issue, conflicts of interest, and bias; and

(iv) The meaning and application of the term ''relevant'' in relation to questions and evidence, and the types of evidence that are impermissible regardless of relevance under § 106.45, and if applicable § 106.46.

(3) *Facilitators of informal resolution process.* In addition to the training requirements in paragraph (d)(1) of this section, all facilitators of an informal resolution process under § 106.44(k) must be trained on the rules and practices associated with the recipient's informal resolution process and on how to serve impartially, including by avoiding conflicts of interest and bias.

(4) *Title IX Coordinator and designees.* In addition to the training requirements in paragraphs (d)(1) through (3) of this section, the Title IX Coordinator and any designees under paragraph (a) of this section must be trained on their specific responsibilities under paragraph (a) of this section, §§ 106.40(b)(3), 106.44(f) and (g), the recipient's recordkeeping system and the requirements of paragraph (f) of this section, and any other training necessary to coordinate the recipient's compliance with Title IX.

(e) *Students with disabilities.* If a complainant or respondent is an elementary or secondary student with a disability, the recipient must require the Title IX Coordinator to consult with one or more members, as appropriate, of the student's Individualized Education Program (IEP) team, 34 CFR 300.321, if any, or one or more members, as appropriate, of the group of persons responsible for the student's placement decision under 34 CFR 104.35(c), if any, to determine how to comply with the requirements of the Individuals with Disabilities Education Act, 20 U.S.C. 1400 *et seq.,* and Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, throughout the recipient's implementation of grievance procedures under § 106.45. If a complainant or respondent is a postsecondary student with a disability, the Title IX Coordinator may consult, as appropriate, with the individual or office that the recipient has designated to provide support to students with disabilities to determine how to comply with Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794.

(f) *Recordkeeping.* A recipient must maintain for a period of at least seven years:

(1) For each complaint of sex discrimination, records documenting the informal resolution process under § 106.44(k) or the grievance procedures under § 106.45, and if applicable § 106.46, and the resulting outcome.

(2) For each notification the Title IX Coordinator receives of information about conduct that reasonably may constitute sex discrimination under Title IX or this part, including notifications under § 106.44(c)(1) or (2), records documenting the actions the recipient took to meet its obligations under § 106.44.

(3) All materials used to provide training under paragraph (d) of this section. A recipient must make these training materials available upon request for inspection by members of the public.

■ 7. Section 106.10 is added to subpart B to read as follows:

§ 106.10 Scope.

Discrimination on the basis of sex includes discrimination on the basis of sex stereotypes, sex characteristics, pregnancy or related conditions, sexual orientation, and gender identity.

■ 8. Section 106.11 is revised to read as follows:

§ 106.11 Application.

Except as provided in this subpart, this part applies to every recipient and to all sex discrimination occurring under a recipient's education program or activity in the United States. For purposes of this section, conduct that occurs under a recipient's education program or activity includes but is not limited to conduct that occurs in a building owned or controlled by a student organization that is officially recognized by a postsecondary institution, and conduct that is subject to the recipient's disciplinary authority. A recipient has an obligation to address a sex-based hostile environment under its education program or activity, even when some conduct alleged to be contributing to the hostile environment occurred outside the recipient's education program or activity or outside the United States.

■ 9. Section 106.15 is amended by revising paragraph (b) to read as follows:

§ 106.15 Admissions.

* * * * *

(b) *Administratively separate units.* For purposes only of this section and subpart C, each administratively separate unit shall be deemed to be an educational institution.

* * * * *

§ 106.16 [Removed]

■ 10. Section 106.16 is removed.

§ 106.17 [Removed]

■ 11. Section 106.17 is removed.

§ 106.18 [Redesignated as § 106.16]

■ 12. Section 106.18 is redesignated as § 106.16 in subpart B.

■ 13. Section 106.21 is amended by revising paragraphs (a) and (c) to read as follows:

§ 106.21 Admissions.

(a) *Status generally.* No person shall, on the basis of sex, be denied admission, or be subjected to discrimination in admission, by any recipient to which this subpart applies.

* * * * *

(c) *Parental, family, or marital status; pregnancy or related conditions.* In determining whether a person satisfies any policy or criterion for admission, or in making any offer of admission, a recipient to which this subpart applies:

(1) Must treat pregnancy or related conditions in the same manner and under the same policies as any other temporary medical conditions; and

(2) Must not:

(i) Adopt or implement any policy, practice, or procedure concerning the current, potential, or past parental, family, or marital status of a student or applicant that treats persons differently on the basis of sex;

(ii) Discriminate against any person on the basis of current, potential, or past pregnancy or related conditions, or adopt or implement any policy, practice, or procedure that so discriminates; and

(iii) Make a pre-admission inquiry as to the marital status of an applicant for admission, including whether such applicant is ''Miss or Mrs.'' A recipient may ask an applicant to self-identify their sex, but only if this question is asked of all applicants and if the response is not used as a basis for discrimination prohibited by this part.

§ 106.30 [Removed]

■ 14. Section 106.30 is removed.

■ 15. Section 106.31 is amended by revising paragraph (a) to read as follows:

§ 106.31 Education programs or activities.

(a) *General.* (1) Except as provided elsewhere in this part, no person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any academic, extracurricular, research, occupational training, or other education program or activity operated by a recipient that receives Federal financial assistance.

(2) In the limited circumstances in which Title IX or this part permits different treatment or separation on the basis of sex, a recipient must not carry out such different treatment or separation in a manner that discriminates on the basis of sex by subjecting a person to more than de minimis harm, except as permitted by 20 U.S.C. 1681(a)(1) through (9) and the corresponding regulations §§ 106.12 through 106.15, 20 U.S.C. 1686 and its corresponding regulation § 106.32(b)(1), or § 106.41(b). Adopting a policy or engaging in a practice that prevents a person from participating in an education program or activity consistent with the person's gender identity subjects a person to more than de minimis harm on the basis of sex.

(3) This subpart does not apply to actions of a recipient in connection with admission of its students to an education program or activity of:

(i) A recipient to which subpart C does not apply; or

(ii) An entity, not a recipient, to which subpart C would not apply if the entity were a recipient.

* * * * *

■ 16. Section 106.40 is revised to read as follows:

§ 106.40 Parental, family, or marital status; pregnancy or related conditions.

(a) *Status generally.* A recipient must not adopt or implement any policy, practice, or procedure concerning a student's current, potential, or past parental, family, or marital status that treats students differently on the basis of sex.

(b) *Pregnancy or related conditions.* (1) *Nondiscrimination.* A recipient must not discriminate in its education program or activity against any student based on the student's current, potential, or past pregnancy or related conditions. A recipient does not engage in prohibited discrimination when it allows a student, based on pregnancy or related conditions, to voluntarily participate in a separate portion of its education program or activity provided the recipient ensures that the separate portion is comparable to that offered to students who are not pregnant and do not have related conditions.

(2) *Responsibility to provide Title IX Coordinator contact and other information.* A recipient must ensure that when a student, or a person who has a legal right to act on behalf of the student, informs any employee of the student's pregnancy or related conditions, unless the employee reasonably believes that the Title IX Coordinator has been notified, the employee promptly provides that person with the Title IX Coordinator's contact information and informs that person that the Title IX Coordinator can coordinate specific actions to prevent sex discrimination and ensure the student's equal access to the recipient's education program or activity.

(3) *Specific actions to prevent discrimination and ensure equal access.* A recipient must take specific actions under paragraphs (b)(3)(i) through (vi) of this section to promptly and effectively prevent sex discrimination and ensure equal access to the recipient's education program or activity once the student, or a person who has a legal right to act on behalf of the student, notifies the Title IX Coordinator of the student's pregnancy or related conditions. The Title IX Coordinator must coordinate these actions.

(i) *Responsibility to provide information about recipient obligations.* The recipient must inform the student, and if applicable, the person who notified the Title IX Coordinator of the student's pregnancy or related conditions and has a legal right to act on behalf of the student, of the recipient's obligations under paragraphs (b)(1) through (5) of this section and § 106.44(j) and provide the recipient's notice of nondiscrimination under § 106.8(c)(1).

(ii) *Reasonable modifications.* (A) The recipient must make reasonable modifications to the recipient's policies, practices, or procedures as necessary to prevent sex discrimination and ensure equal access to the recipient's education program or activity. Each reasonable modification must be based on the student's individualized needs. In determining what modifications are required under this paragraph, the recipient must consult with the student. A modification that a recipient can demonstrate would fundamentally alter the nature of its education program or activity is not a reasonable modification.

(B) The student has discretion to accept or decline each reasonable modification offered by the recipient. If a student accepts a recipient's offered reasonable modification, the recipient must implement it.

(C) Reasonable modifications may include, but are not limited to, breaks during class to express breast milk, breastfeed, or attend to health needs associated with pregnancy or related conditions, including eating, drinking, or using the restroom; intermittent absences to attend medical appointments; access to online or homebound education; changes in schedule or course sequence; extensions of time for coursework and rescheduling of tests and examinations; allowing a student to sit or stand, or carry or keep water nearby; counseling; changes in physical space or supplies (for example, access to a larger desk or a footrest); elevator access; or other changes to policies, practices, or procedures.

(iii) *Voluntary access to separate and comparable portion of program or activity.* The recipient must allow the student to voluntarily access any separate and comparable portion of the recipient's education program or activity under paragraph (b)(1) of this section.

(iv) *Voluntary leaves of absence.* The recipient must allow the student to voluntarily take a leave of absence from the recipient's education program or activity to cover, at minimum, the period of time deemed medically necessary by the student's licensed healthcare provider. To the extent that a student qualifies for leave under a leave policy maintained by a recipient that allows a greater period of time than the medically necessary period, the recipient must permit the student to take voluntary leave under that policy instead if the student so chooses. When the student returns to the recipient's education program or activity, the student must be reinstated to the academic status and, as practicable, to the extracurricular status that the student held when the voluntary leave began.

(v) *Lactation space.* The recipient must ensure that the student can access a lactation space, which must be a space other than a bathroom, that is clean, shielded from view, free from intrusion from others, and may be used by a student for expressing breast milk or breastfeeding as needed.

(vi) *Limitation on supporting documentation.* A recipient must not require supporting documentation under paragraphs (b)(3)(ii) through (v) unless the documentation is necessary and reasonable for the recipient to determine the reasonable modifications to make or whether to take additional specific actions under paragraphs (b)(3)(ii) through (v). Examples of situations when requiring supporting documentation is not necessary and reasonable include, but are not limited to, when the student's need for a specific action under paragraphs (b)(3)(ii) through (v) is obvious, such as when a student who is pregnant needs a bigger uniform; when the student has previously provided the recipient with sufficient supporting documentation; when the reasonable modification because of pregnancy or related conditions at issue is allowing a student to carry or keep water nearby and drink, use a bigger desk, sit or stand, or take breaks to eat, drink, or use the restroom; when the student has lactation needs; or when the specific action under paragraphs (b)(3)(ii) through (v) is available to students for reasons other than pregnancy or related conditions without submitting supporting documentation.

(4) *Comparable treatment to other temporary medical conditions.* To the extent consistent with paragraph (b)(3) of this section, a recipient must treat pregnancy or related conditions in the same manner and under the same policies as any other temporary medical conditions with respect to any medical or hospital benefit, service, plan, or policy the recipient administers, operates, offers, or participates in with respect to students admitted to the recipient's education program or activity.

(5) *Certification to participate.* A recipient must not require a student who is pregnant or has related conditions to provide certification from a healthcare provider or any other person that the student is physically able to participate in the recipient's class, program, or extracurricular activity unless:

(i) The certified level of physical ability or health is necessary for participation in the class, program, or extracurricular activity;

(ii) The recipient requires such certification of all students participating in the class, program, or extracurricular activity; and

(iii) The information obtained is not used as a basis for discrimination prohibited by this part.

§ 106.41 [Amended]

■ 17. Section 106.41 is amended by removing paragraph (d).

■ 18. Section 106.44 is revised to read as follows:

§ 106.44 Recipient's response to sex discrimination.

(a) *General.* (1) A recipient with knowledge of conduct that reasonably may constitute sex discrimination in its education program or activity must respond promptly and effectively; and

(2) A recipient must also comply with this section to address sex discrimination in its education program or activity.

(b) *Barriers to reporting.* A recipient must require its Title IX Coordinator to:

(1) Monitor the recipient's education program or activity for barriers to reporting information about conduct that reasonably may constitute sex discrimination under Title IX or this part; and

(2) Take steps reasonably calculated to address such barriers.

(c) *Notification requirements.* (1) An elementary school or secondary school recipient must require all of its employees who are not confidential employees to notify the Title IX Coordinator when the employee has information about conduct that reasonably may constitute sex discrimination under Title IX or this part.

(2) All other recipients must, at a minimum, require:

(i) Any employee who is not a confidential employee and who either has authority to institute corrective measures on behalf of the recipient or has responsibility for administrative leadership, teaching, or advising in the recipient's education program or activity to notify the Title IX Coordinator when the employee has information about conduct that reasonably may constitute sex discrimination under Title IX or this part; and

(ii) All other employees who are not confidential employees and not covered by paragraph (c)(2)(i) of this section to either:

(A) Notify the Title IX Coordinator when the employee has information about conduct that reasonably may constitute sex discrimination under Title IX or this part; or

(B) Provide the contact information of the Title IX Coordinator and information about how to make a complaint of sex discrimination to any person who provides the employee with information about conduct that reasonably may constitute sex discrimination under Title IX or this part.

(3) A postsecondary institution must reasonably determine and specify whether and under what circumstances a person who is both a student and an employee is subject to the requirements of paragraph (c)(2) of this section.

(4) The requirements of paragraphs (c)(1) and (2) of this section do not apply to an employee who has personally been subject to conduct that reasonably may constitute sex discrimination under Title IX or this part.

(d) *Confidential employee requirements.* (1) A recipient must notify all participants in the recipient's education program or activity of how to contact its confidential employees, if any, excluding any employee whose confidential status is only with respect to their conducting an Institutional Review Board-approved human-subjects research study designed to gather information about sex discrimination as set out in the definition of confidential employee in § 106.2.

(2) A recipient must require a confidential employee to explain to any person who informs the confidential employee of conduct that reasonably may constitute sex discrimination under Title IX or this part:

(i) The employee's status as confidential for purposes of this part, including the circumstances in which the employee is not required to notify the Title IX Coordinator about conduct that reasonably may constitute sex discrimination;

(ii) How to contact the recipient's Title IX Coordinator and how to make a complaint of sex discrimination; and

(iii) That the Title IX Coordinator may be able to offer and coordinate supportive measures, as well as initiate an informal resolution process or an investigation under the grievance procedures.

(e) *Public awareness events.* When a postsecondary institution's Title IX Coordinator is notified of information about conduct that reasonably may constitute sex-based harassment under Title IX or this part that was provided by a person during a public event to raise awareness about sex-based harassment that was held on the postsecondary institution's campus or through an online platform sponsored by a postsecondary institution, the

postsecondary institution is not obligated to act in response to the information, unless it indicates an imminent and serious threat to the health or safety of a complainant, any students, employees, or other persons. However, in all cases the postsecondary institution must use this information to inform its efforts to prevent sex-based harassment, including by providing tailored training to address alleged sex-based harassment in a particular part of its education program or activity or at a specific location when information indicates there may be multiple incidents of sex-based harassment. Nothing in Title IX or this part obligates a postsecondary institution to require its Title IX Coordinator or any other employee to attend such public awareness events.

(f) *Title IX Coordinator requirements.* The Title IX Coordinator is responsible for coordinating the recipient's compliance with its obligations under Title IX and this part.

(1) A recipient must require its Title IX Coordinator, when notified of conduct that reasonably may constitute sex discrimination under Title IX or this part, to take the following actions to promptly and effectively end any sex discrimination in its education program or activity, prevent its recurrence, and remedy its effects:

(i) Treat the complainant and respondent equitably;

(ii) Offer and coordinate supportive measures under paragraph (g) of this section, as appropriate, for the complainant. In addition, if the recipient has initiated grievance procedures under § 106.45, and if applicable § 106.46, or offered an informal resolution process under paragraph (k) of this section to the respondent, offer and coordinate supportive measures under paragraph (g) of this section, as appropriate, for the respondent;

(iii)(A) Notify the complainant or, if the complainant is unknown, the individual who reported the conduct, of the grievance procedures under § 106.45, and if applicable § 106.46, and the informal resolution process under paragraph (k) of this section, if available and appropriate; and

(B) If a complaint is made, notify the respondent of the grievance procedures under § 106.45, and if applicable § 106.46, and the informal resolution process under paragraph (k) of this section, if available and appropriate;

(iv) In response to a complaint, initiate the grievance procedures under § 106.45, and if applicable § 106.46, or the informal resolution process under paragraph (k) of this section, if available and appropriate and requested by all parties;

(v) In the absence of a complaint or the withdrawal of any or all of the allegations in a complaint, and in the absence or termination of an informal resolution process, determine whether to initiate a complaint of sex discrimination that complies with the grievance procedures under § 106.45, and if applicable § 106.46.

(A) To make this fact-specific determination, the Title IX Coordinator must consider, at a minimum, the following factors:

(*1*) The complainant's request not to proceed with initiation of a complaint;

(*2*) The complainant's reasonable safety concerns regarding initiation of a complaint;

(*3*) The risk that additional acts of sex discrimination would occur if a complaint is not initiated;

(*4*) The severity of the alleged sex discrimination, including whether the discrimination, if established, would require the removal of a respondent from campus or imposition of another disciplinary sanction to end the discrimination and prevent its recurrence;

(*5*) The age and relationship of the parties, including whether the respondent is an employee of the recipient;

(*6*) The scope of the alleged sex discrimination, including information suggesting a pattern, ongoing sex discrimination, or sex discrimination alleged to have impacted multiple individuals;

(*7*) The availability of evidence to assist a decisionmaker in determining whether sex discrimination occurred; and

(*8*) Whether the recipient could end the alleged sex discrimination and prevent its recurrence without initiating its grievance procedures under § 106.45, and if applicable § 106.46.

(B) If, after considering these and other relevant factors, the Title IX Coordinator determines that the conduct as alleged presents an imminent and serious threat to the health or safety of the complainant or other person, or that the conduct as alleged prevents the recipient from ensuring equal access on the basis of sex to its education program or activity, the Title IX Coordinator may initiate a complaint.

(vi) If initiating a complaint under paragraph (f)(1)(v) of this section, notify the complainant prior to doing so and appropriately address reasonable concerns about the complainant's safety or the safety of others, including by providing supportive measures consistent with paragraph (g) of this section; and

(vii) Regardless of whether a complaint is initiated, take other appropriate prompt and effective steps, in addition to steps necessary to effectuate the remedies provided to an individual complainant, if any, to ensure that sex discrimination does not continue or recur within the recipient's education program or activity.

(2) A Title IX Coordinator is not required to comply with paragraphs (f)(1)(i) through (vii) of this section upon being notified of conduct that may constitute sex discrimination if the Title IX Coordinator reasonably determines that the conduct as alleged could not constitute sex discrimination under Title IX or this part.

(g) *Supportive measures.* Under paragraph (f) of this section, a recipient must offer and coordinate supportive measures, as appropriate, as described in paragraphs (g)(1) through (6) of this section. For allegations of sex discrimination other than sex-based harassment or retaliation, a recipient's provision of supportive measures does not require the recipient, its employee, or any other person authorized to provide aid, benefit, or service on the recipient's behalf to alter the alleged discriminatory conduct for the purpose of providing a supportive measure.

(1) Supportive measures may vary depending on what the recipient deems to be reasonably available. These measures may include but are not limited to: counseling; extensions of deadlines and other course-related adjustments; campus escort services; increased security and monitoring of certain areas of the campus; restrictions on contact applied to one or more parties; leaves of absence; changes in class, work, housing, or extracurricular or any other activity, regardless of whether there is or is not a comparable alternative; and training and education programs related to sex-based harassment.

(2) Supportive measures must not unreasonably burden either party and must be designed to protect the safety of the parties or the recipient's educational environment, or to provide support during the recipient's grievance procedures under § 106.45, and if applicable § 106.46, or during the informal resolution process under § 106.44(k). A recipient must not impose such measures for punitive or disciplinary reasons.

(3) A recipient may, as appropriate, modify or terminate supportive measures at the conclusion of the grievance procedures under § 106.45, and if applicable § 106.46, or at the

conclusion of the informal resolution process under paragraph (k) of this section, or the recipient may continue them beyond that point.

(4) A recipient must provide a complainant or respondent with a timely opportunity to seek, from an appropriate and impartial employee, modification or reversal of the recipient's decision to provide, deny, modify, or terminate supportive measures applicable to them. The impartial employee must be someone other than the employee who made the challenged decision and must have authority to modify or reverse the decision, if the impartial employee determines that the decision to provide, deny, modify, or terminate the supportive measure was inconsistent with the definition of supportive measures in § 106.2. A recipient must also provide a party with the opportunity to seek additional modification or termination of a supportive measure applicable to them if circumstances change materially.

(5) A recipient must not disclose information about any supportive measures to persons other than the person to whom they apply, including informing one party of supportive measures provided to another party, unless necessary to provide the supportive measure or restore or preserve a party's access to the education program or activity, or when an exception in § 106.44(j)(1) through (5) applies.

(6)(i) If the complainant or respondent is an elementary or secondary student with a disability, the recipient must require the Title IX Coordinator to consult with one or more members, as appropriate, of the student's Individualized Education Program (IEP) team, 34 CFR 300.321, if any, or one or more members, as appropriate, of the group of persons responsible for the student's placement decision under 34 CFR 104.35(c), if any, to determine how to comply with the requirements of the Individuals with Disabilities Education Act, 20 U.S.C. 1400 *et seq.,* and Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, in the implementation of supportive measures.

(ii) If the complainant or respondent is a postsecondary student with a disability, the Title IX Coordinator may consult, as appropriate, with the individual or office that the recipient has designated to provide support to students with disabilities to determine how to comply with Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, in the implementation of supportive measures.

(h) *Emergency removal.* Nothing in this part precludes a recipient from removing a respondent from the recipient's education program or activity on an emergency basis, provided that the recipient undertakes an individualized safety and risk analysis, determines that an imminent and serious threat to the health or safety of a complainant or any students, employees, or other persons arising from the allegations of sex discrimination justifies removal, and provides the respondent with notice and an opportunity to challenge the decision immediately following the removal. This provision must not be construed to modify any rights under the Individuals with Disabilities Education Act, 20 U.S.C. 1400 *et seq.,* Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, or the Americans with Disabilities Act of 1990, 42 U.S.C. 12101 *et seq.*

(i) *Administrative leave.* Nothing in this part precludes a recipient from placing an employee respondent on administrative leave from employment responsibilities during the pendency of the recipient's grievance procedures. This provision must not be construed to modify any rights under Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, or the Americans with Disabilities Act of 1990, 42 U.S.C. 12101 *et seq.*

(j) *Prohibited disclosures of personally identifiable information.* A recipient must not disclose personally identifiable information obtained in the course of complying with this part, except in the following circumstances:

(1) When the recipient has obtained prior written consent from a person with the legal right to consent to the disclosure;

(2) When the information is disclosed to a parent, guardian, or other authorized legal representative with the legal right to receive disclosures on behalf of the person whose personally identifiable information is at issue;

(3) To carry out the purposes of this part, including action taken to address conduct that reasonably may constitute sex discrimination under Title IX in the recipient's education program or activity;

(4) As required by Federal law, Federal regulations, or the terms and conditions of a Federal award, including a grant award or other funding agreement; or

(5) To the extent such disclosures are not otherwise in conflict with Title IX or this part, when required by State or local law or when permitted under FERPA, 20 U.S.C. 1232g, or its implementing regulations, 34 CFR part 99.

(k) *Discretion to offer informal resolution in some circumstances.* (1) At any time prior to determining whether sex discrimination occurred under § 106.45, and if applicable § 106.46, a recipient may offer to a complainant and respondent an informal resolution process, unless the complaint includes allegations that an employee engaged in sex-based harassment of an elementary school or secondary school student or such a process would conflict with Federal, State or local law. A recipient that provides the parties an informal resolution process must, to the extent necessary, also require its Title IX Coordinator to take other appropriate prompt and effective steps to ensure that sex discrimination does not continue or recur within the recipient's education program or activity.

(i) Subject to the limitations in paragraph (k)(1) of this section, a recipient has discretion to determine whether it is appropriate to offer an informal resolution process when it receives information about conduct that reasonably may constitute sex discrimination under Title IX or this part or when a complaint of sex discrimination is made, and may decline to offer informal resolution despite one or more of the parties' wishes.

(ii) In addition to the limitations in paragraph (k)(1) of this section, circumstances when a recipient may decline to allow informal resolution include but are not limited to when the recipient determines that the alleged conduct would present a future risk of harm to others.

(2) A recipient must not require or pressure the parties to participate in an informal resolution process. The recipient must obtain the parties' voluntary consent to the informal resolution process and must not require waiver of the right to an investigation and determination of a complaint as a condition of enrollment or continuing enrollment, or employment or continuing employment, or exercise of any other right.

(3) Before initiation of an informal resolution process, the recipient must provide to the parties notice that explains:

(i) The allegations;

(ii) The requirements of the informal resolution process;

(iii) That, prior to agreeing to a resolution, any party has the right to withdraw from the informal resolution process and to initiate or resume the recipient's grievance procedures;

(iv) That the parties' agreement to a resolution at the conclusion of the informal resolution process would

preclude the parties from initiating or resuming grievance procedures arising from the same allegations;

(v) The potential terms that may be requested or offered in an informal resolution agreement, including notice that an informal resolution agreement is binding only on the parties; and

(vi) What information the recipient will maintain and whether and how the recipient could disclose such information for use in grievance procedures under § 106.45, and if applicable § 106.46, if grievance procedures are initiated or resumed.

(4) The facilitator for the informal resolution process must not be the same person as the investigator or the decisionmaker in the recipient's grievance procedures. Any person designated by a recipient to facilitate an informal resolution process must not have a conflict of interest or bias for or against complainants or respondents generally or an individual complainant or respondent. Any person facilitating informal resolution must receive training under § 106.8(d)(3).

(5) Potential terms that may be included in an informal resolution agreement include but are not limited to:

(i) Restrictions on contact; and

(ii) Restrictions on the respondent's participation in one or more of the recipient's programs or activities or attendance at specific events, including restrictions the recipient could have imposed as remedies or disciplinary sanctions had the recipient determined at the conclusion of the recipient's grievance procedures that sex discrimination occurred.

■ 19. Section 106.45 is revised to read as follows:

§ 106.45 Grievance procedures for the prompt and equitable resolution of complaints of sex discrimination.

(a)(1) *General.* A recipient's grievance procedures for the prompt and equitable resolution of complaints of sex discrimination must be in writing and include provisions that incorporate the requirements of this section. The requirements related to a respondent apply only to sex discrimination complaints alleging that a person violated the recipient's prohibition on sex discrimination. When a sex discrimination complaint alleges that a recipient's policy or practice discriminates on the basis of sex, the recipient is not considered a respondent.

(2) *Complaint.* The following persons have a right to make a complaint of sex discrimination, including complaints of sex-based harassment, requesting that the recipient investigate and make a determination about alleged discrimination under Title IX or this part:

(i) A complainant;

(ii) A parent, guardian, or other authorized legal representative with the legal right to act on behalf of a complainant;

(iii) The Title IX Coordinator, after making the determination specified in § 106.44(f)(1)(v);

(iv) With respect to complaints of sex discrimination other than sex-based harassment, in addition to the persons listed in paragraphs (a)(2)(i) through (iii) of this section,

(A) Any student or employee; or

(B) Any person other than a student or employee who was participating or attempting to participate in the recipient's education program or activity at the time of the alleged sex discrimination.

(b) *Basic requirements for grievance procedures.* A recipient's grievance procedures must:

(1) Treat complainants and respondents equitably;

(2) Require that any person designated as a Title IX Coordinator, investigator, or decisionmaker not have a conflict of interest or bias for or against complainants or respondents generally or an individual complainant or respondent. The decisionmaker may be the same person as the Title IX Coordinator or investigator;

(3) Include a presumption that the respondent is not responsible for the alleged sex discrimination until a determination is made at the conclusion of the recipient's grievance procedures for complaints of sex discrimination;

(4) Establish reasonably prompt timeframes for the major stages of the grievance procedures, including a process that allows for the reasonable extension of timeframes on a case-by-case basis for good cause with notice to the parties that includes the reason for the delay. Major stages include, for example, evaluation (*i.e.,* the recipient's decision whether to dismiss or investigate a complaint of sex discrimination); investigation; determination; and appeal, if any;

(5) Require the recipient to take reasonable steps to protect the privacy of the parties and witnesses during the pendency of a recipient's grievance procedures, provided that the steps do not restrict the ability of the parties to: obtain and present evidence, including by speaking to witnesses, subject to § 106.71; consult with their family members, confidential resources, or advisors; or otherwise prepare for or participate in the grievance procedures;

(6) Require an objective evaluation of all evidence that is relevant, as defined in § 106.2, and not otherwise impermissible under paragraph (b)(7) of this section—including both inculpatory and exculpatory evidence—and provide that credibility determinations must not be based on a person's status as a complainant, respondent, or witness;

(7) Exclude the following types of evidence, and questions seeking that evidence, as impermissible (*i.e.,* must not be accessed or considered, except by the recipient to determine whether an exception in paragraphs (i) through (iii) applies; must not be disclosed; and must not otherwise be used), regardless of whether they are relevant:

(i) Evidence that is protected under a privilege as recognized by Federal or State law or evidence provided to a confidential employee, unless the person to whom the privilege or confidentiality is owed has voluntarily waived the privilege or confidentiality;

(ii) A party's or witness's records that are made or maintained by a physician, psychologist, or other recognized professional or paraprofessional in connection with the provision of treatment to the party or witness, unless the recipient obtains that party's or witness's voluntary, written consent for use in the recipient's grievance procedures; and

(iii) Evidence that relates to the complainant's sexual interests or prior sexual conduct, unless evidence about the complainant's prior sexual conduct is offered to prove that someone other than the respondent committed the alleged conduct or is evidence about specific incidents of the complainant's prior sexual conduct with the respondent that is offered to prove consent to the alleged sex-based harassment. The fact of prior consensual sexual conduct between the complainant and respondent does not by itself demonstrate or imply the complainant's consent to the alleged sex-based harassment or preclude determination that sex-based harassment occurred; and

(8) If a recipient adopts grievance procedures that apply to the resolution of some, but not all, complaints articulate consistent principles for how the recipient will determine which procedures apply.

(c) *Notice of allegations.* Upon initiation of the recipient's grievance procedures, a recipient must provide notice of the allegations to the parties whose identities are known.

(1) The notice must include:

(i) The recipient's grievance procedures under this section, and if

applicable § 106.46, and any informal resolution process under § 106.44(k);

(ii) Sufficient information available at the time to allow the parties to respond to the allegations. Sufficient information includes the identities of the parties involved in the incident(s), the conduct alleged to constitute sex discrimination under Title IX or this part, and the date(s) and location(s) of the alleged incident(s), to the extent that information is available to the recipient;

(iii) A statement that retaliation is prohibited; and

(iv) A statement that the parties are entitled to an equal opportunity to access the relevant and not otherwise impermissible evidence or an accurate description of this evidence as set out in paragraph (f)(4) of this section; and if the recipient provides a description of the evidence, the parties are entitled to an equal opportunity to access to the relevant and not otherwise impermissible evidence upon the request of any party.

(2) If, in the course of an investigation, the recipient decides to investigate additional allegations of sex discrimination by the respondent toward the complainant that are not included in the notice provided under paragraph (c) of this section or that are included in a complaint that is consolidated under paragraph (e) of this section, the recipient must provide notice of the additional allegations to the parties whose identities are known.

(d) *Dismissal of a complaint.* (1) A recipient may dismiss a complaint of sex discrimination made through its grievance procedures under this section, and if applicable § 106.46, for any of the following reasons:

(i) The recipient is unable to identify the respondent after taking reasonable steps to do so;

(ii) The respondent is not participating in the recipient's education program or activity and is not employed by the recipient;

(iii) The complainant voluntarily withdraws any or all of the allegations in the complaint, the Title IX Coordinator declines to initiate a complaint under § 106.44(f)(1)(v), and the recipient determines that, without the complainant's withdrawn allegations, the conduct that remains alleged in the complaint, if any, would not constitute sex discrimination under Title IX or this part even if proven; or

(iv) The recipient determines the conduct alleged in the complaint, even if proven, would not constitute sex discrimination under Title IX or this part. Prior to dismissing the complaint under this paragraph, the recipient must make reasonable efforts to clarify the allegations with the complainant.

(2) Upon dismissal, a recipient must promptly notify the complainant of the basis for the dismissal. If the dismissal occurs after the respondent has been notified of the allegations, then the recipient must also notify the respondent of the dismissal and the basis for the dismissal promptly following notification to the complainant, or simultaneously if notification is in writing.

(3) A recipient must notify the complainant that a dismissal may be appealed and provide the complainant with an opportunity to appeal the dismissal of a complaint on the bases set out in § 106.46(i)(1). If the dismissal occurs after the respondent has been notified of the allegations, then the recipient must also notify the respondent that the dismissal may be appealed on the bases set out in § 106.46(i)(1). If the dismissal is appealed, the recipient must:

(i) Notify the parties of any appeal, including notice of the allegations consistent with paragraph (c) of this section if notice was not previously provided to the respondent;

(ii) Implement appeal procedures equally for the parties;

(iii) Ensure that the decisionmaker for the appeal did not take part in an investigation of the allegations or dismissal of the complaint;

(iv) Ensure that the decisionmaker for the appeal has been trained as set out in § 106.8(d)(2);

(v) Provide the parties a reasonable and equal opportunity to make a statement in support of, or challenging, the outcome; and

(vi) Notify the parties of the result of the appeal and the rationale for the result.

(4) A recipient that dismisses a complaint must, at a minimum:

(i) Offer supportive measures to the complainant as appropriate under § 106.44(g);

(ii) For dismissals under paragraph (d)(1)(iii) or (iv) of this section in which the respondent has been notified of the allegations, offer supportive measures to the respondent as appropriate under § 106.44(g); and

(iii) Require its Title IX Coordinator to take other appropriate prompt and effective steps to ensure that sex discrimination does not continue or recur within the recipient's education program or activity under § 106.44(f)(1)(vii).

(e) *Consolidation of complaints.* A recipient may consolidate complaints of sex discrimination against more than one respondent, or by more than one complainant against one or more respondents, or by one party against another party, when the allegations of sex discrimination arise out of the same facts or circumstances. If one of the complaints to be consolidated is a complaint of sex-based harassment involving a student complainant or student respondent at a postsecondary institution, the grievance procedures for investigating and resolving the consolidated complaint must comply with the requirements of § 106.46 in addition to the requirements of this section. When more than one complainant or more than one respondent is involved, references in this section and in § 106.46 to a party, complainant, or respondent include the plural, as applicable.

(f) *Complaint investigation.* A recipient must provide for adequate, reliable, and impartial investigation of complaints. To do so, the recipient must:

(1) Ensure that the burden is on the recipient—not on the parties—to conduct an investigation that gathers sufficient evidence to determine whether sex discrimination occurred;

(2) Provide an equal opportunity for the parties to present fact witnesses and other inculpatory and exculpatory evidence that are relevant and not otherwise impermissible;

(3) Review all evidence gathered through the investigation and determine what evidence is relevant and what evidence is impermissible regardless of relevance, consistent with § 106.2 and with paragraph (b)(7) of this section; and

(4) Provide each party with an equal opportunity to access the evidence that is relevant to the allegations of sex discrimination and not otherwise impermissible, consistent with § 106.2 and with paragraph (b)(7) of this section, in the following manner:

(i) A recipient must provide an equal opportunity to access either the relevant and not otherwise impermissible evidence, or an accurate description of this evidence. If the recipient provides a description of the evidence, it must further provide the parties with an equal opportunity to access the relevant and not otherwise impermissible evidence upon the request of any party;

(ii) A recipient must provide a reasonable opportunity to respond to the evidence or to the accurate description of the evidence described in paragraph (f)(4)(i) of this section; and

(iii) A recipient must take reasonable steps to prevent and address the parties' unauthorized disclosure of information and evidence obtained solely through the grievance procedures. For purposes

of this paragraph, disclosures of such information and evidence for purposes of administrative proceedings or litigation related to the complaint of sex discrimination are authorized.

(g) *Questioning parties and witnesses to aid in evaluating allegations and assessing credibility.* A recipient must provide a process that enables the decisionmaker to question parties and witnesses to adequately assess a party's or witness's credibility to the extent credibility is both in dispute and relevant to evaluating one or more allegations of sex discrimination.

(h) *Determination whether sex discrimination occurred.* Following an investigation and evaluation of all relevant and not otherwise impermissible evidence under paragraphs (f) and (g) of this section, the recipient must:

(1) Use the preponderance of the evidence standard of proof to determine whether sex discrimination occurred, unless the recipient uses the clear and convincing evidence standard of proof in all other comparable proceedings, including proceedings relating to other discrimination complaints, in which case the recipient may elect to use that standard of proof in determining whether sex discrimination occurred. Both standards of proof require the decisionmaker to evaluate relevant and not otherwise impermissible evidence for its persuasiveness; if the decisionmaker is not persuaded under the applicable standard by the evidence that sex discrimination occurred, whatever the quantity of the evidence is, the decisionmaker must not determine that sex discrimination occurred.

(2) Notify the parties in writing of the determination whether sex discrimination occurred under Title IX or this part including the rationale for such determination, and the procedures and permissible bases for the complainant and respondent to appeal, if applicable;

(3) If there is a determination that sex discrimination occurred, as appropriate, require the Title IX Coordinator to coordinate the provision and implementation of remedies to a complainant and other persons the recipient identifies as having had equal access to the recipient's education program or activity limited or denied by sex discrimination, coordinate the imposition of any disciplinary sanctions on a respondent, including notification to the complainant of any such disciplinary sanctions, and require the Title IX Coordinator to take other appropriate prompt and effective steps to ensure that sex discrimination does not continue or recur within the recipient's education program or activity under § 106.44(f)(1)(vii). A recipient may not impose discipline on a respondent for sex discrimination prohibited by Title IX unless there is a determination at the conclusion of the recipient's grievance procedures that the respondent engaged in prohibited sex discrimination;

(4) Comply with § 106.45, and if applicable § 106.46, before the imposition of any disciplinary sanctions against a respondent; and

(5) Not discipline a party, witness, or others participating in a recipient's grievance procedures for making a false statement or for engaging in consensual sexual conduct based solely on the recipient's determination whether sex discrimination occurred.

(i) *Appeals.* In addition to an appeal of a dismissal consistent with paragraph (d)(3) of this section, a recipient must offer the parties an appeal process that, at a minimum, is the same as it offers in all other comparable proceedings, if any, including proceedings relating to other discrimination complaints. For a complaint of sex-based harassment involving a student complainant or student respondent, a postsecondary institution must also offer an appeal on the bases set out in § 106.46(i)(1).

(j) *Additional provisions.* If a recipient adopts additional provisions as part of its grievance procedures for handling complaints of sex discrimination, including sex-based harassment, such additional provisions must apply equally to the parties.

(k) *Informal resolution.* In lieu of resolving a complaint through the recipient's grievance procedures, the parties may instead elect to participate in an informal resolution process under § 106.44(k) if provided by the recipient consistent with that paragraph.

(l) *Provisions limited to sex-based harassment complaints.* For complaints alleging sex-based harassment, the grievance procedures must:

(1) Describe the range of supportive measures available to complainants and respondents under § 106.44(g); and

(2) List, or describe the range of, the possible disciplinary sanctions that the recipient may impose and remedies that the recipient may provide following a determination that sex-based harassment occurred.

§ 106.46 [Redesignated as § 106.48]

■ 20. Section 106.46 is redesignated as § 106.48 in subpart D.

■ 21. Add a new § 106.46 to subpart D to read as follows:

§ 106.46 Grievance procedures for the prompt and equitable resolution of complaints of sex-based harassment involving student complainants or student respondents at postsecondary institutions.

(a) *General.* A postsecondary institution's written grievance procedures for prompt and equitable resolution of complaints of sex-based harassment involving a student complainant or student respondent must include provisions that incorporate the requirements of § 106.45 and this section.

(b) *Student employees.* When a complainant or respondent is both a student and an employee of a postsecondary institution, the postsecondary institution must make a fact-specific inquiry to determine whether the requirements of this section apply. In making this determination, a postsecondary institution must, at a minimum, consider whether the party's primary relationship with the postsecondary institution is to receive an education and whether the alleged sex-based harassment occurred while the party was performing employment-related work.

(c) *Written notice of allegations.* Upon the initiation of the postsecondary institution's sex-based harassment grievance procedures under this section, a postsecondary institution must provide written notice to the parties whose identities are known with sufficient time for the parties to prepare a response before any initial interview.

(1) The written notice must include all information required under § 106.45(c)(1)(i) through (iii) and also inform the parties that:

(i) The respondent is presumed not responsible for the alleged sex-based harassment until a determination is made at the conclusion of the grievance procedures under this section and that prior to the determination, the parties will have an opportunity to present relevant and not otherwise impermissible evidence to a trained, impartial decisionmaker;

(ii) They may have an advisor of their choice to serve in the role set out in paragraph (e)(2) of this section, and that the advisor may be, but is not required to be, an attorney;

(iii) They are entitled to an equal opportunity to access the relevant and not otherwise impermissible evidence or an investigative report that accurately summarizes this evidence as set out in paragraph (e)(6) of this section; and if the postsecondary institution provides access to an investigative report, the parties are entitled to an equal opportunity to access to the relevant and not otherwise impermissible

evidence upon the request of any party; and

(iv) If applicable, the postsecondary institution's code of conduct prohibits knowingly making false statements or knowingly submitting false information during the grievance procedure.

(2) If, in the course of an investigation, the recipient decides to investigate additional allegations of sex-based harassment by the respondent toward the complainant that are not included in the written notice provided under paragraph (c) of this section or that are included in a complaint that is consolidated under § 106.45(e), the recipient must provide written notice of the additional allegations to the parties whose identities are known.

(3) To the extent the postsecondary institution has reasonable concerns for the safety of any person as a result of providing this notice, the postsecondary institution may reasonably delay providing written notice of the allegations in order to address the safety concern appropriately. Reasonable concerns must be based on individualized safety and risk analysis and not on mere speculation or stereotypes.

(d) *Dismissal of a complaint.* When dismissing a complaint alleging sex-based harassment involving a student complainant or a student respondent, a postsecondary institution must:

(1) Provide the parties, simultaneously, with written notice of the dismissal and the basis for the dismissal, if dismissing a complaint under any of the bases in § 106.45(d)(1), except if the dismissal occurs before the respondent has been notified of the allegations, in which case the recipient must provide such written notice only to the complainant; and

(2) Obtain the complainant's withdrawal in writing if dismissing a complaint based on the complainant's voluntary withdrawal of the complaint or allegations under § 106.45(d)(1)(iii).

(e) *Complaint investigation.* When investigating a complaint alleging sex-based harassment and throughout the postsecondary institution's grievance procedures for complaints of sex-based harassment involving a student complainant or a student respondent, a postsecondary institution:

(1) Must provide, to a party whose participation is invited or expected, written notice of the date, time, location, participants, and purpose of all meetings or proceedings with sufficient time for the party to prepare to participate;

(2) Must provide the parties with the same opportunities to be accompanied to any meeting or proceeding by the advisor of their choice, who may be, but is not required to be, an attorney, and not limit the choice or presence of the advisor for the complainant or respondent in any meeting or proceeding; however, the postsecondary institution may establish restrictions regarding the extent to which the advisor may participate in the grievance procedures, as long as the restrictions apply equally to the parties;

(3) Must provide the parties with the same opportunities, if any, to have persons other than the advisor of the parties' choice present during any meeting or proceeding;

(4) Has discretion to determine whether the parties may present expert witnesses as long as the determination applies equally to the parties;

(5) Must allow for the reasonable extension of timeframes on a case-by-case basis for good cause with written notice to the parties that includes the reason for the delay; and

(6) Must provide each party and the party's advisor, if any, with an equal opportunity to access the evidence that is relevant to the allegations of sex-based harassment and not otherwise impermissible, consistent with §§ 106.2 and 106.45(b)(7), in the following manner:

(i) A postsecondary institution must provide an equal opportunity to access either the relevant and not otherwise impermissible evidence, or the same written investigative report that accurately summarizes this evidence. If the postsecondary institution provides access to an investigative report, it must further provide the parties with an equal opportunity to access the relevant and not otherwise impermissible evidence upon the request of any party;

(ii) A postsecondary institution must provide the parties with a reasonable opportunity to review and respond to the evidence or the investigative report described in paragraph (e)(6)(i) of this section prior to the determination whether sex-based harassment occurred. If a postsecondary institution conducts a live hearing as part of its grievance procedures, it must provide this opportunity to review the evidence in advance of the live hearing; it is at the postsecondary institution's discretion whether to provide this opportunity to respond prior to the live hearing, during the live hearing, or both prior to and during the live hearing;

(iii) A postsecondary institution must take reasonable steps to prevent and address the parties' and their advisors' unauthorized disclosure of information and evidence obtained solely through the sex-based harassment grievance procedures. For purposes of this paragraph, disclosures of such information and evidence for purposes of administrative proceedings or litigation related to the complaint of sex-based harassment are authorized; and

(iv) Compliance with paragraph (e)(6) of this section satisfies the requirements of § 106.45(f)(4).

(f) *Questioning parties and witnesses to aid in evaluating allegations and assessing credibility.* (1) *Process for questioning parties and witnesses.* A postsecondary institution must provide a process as specified in this subpart that enables the decisionmaker to question parties and witnesses to adequately assess a party's or witness's credibility to the extent credibility is both in dispute and relevant to evaluating one or more allegations of sex-based harassment. Questioning of the parties and witnesses must take place consistent with the following provisions before determining whether sex-based harassment occurred:

(i) When a postsecondary institution chooses not to conduct a live hearing under paragraph (g) of this section, the process for proposing and asking relevant and not otherwise impermissible questions and follow-up questions of parties and witnesses under §§ 106.2 and 106.45(b)(7), including questions challenging credibility, must:

(A) Allow the investigator or decisionmaker to ask such questions during individual meetings with a party or witness;

(B) Allow each party to propose such questions that the party wants asked of any party or witness and have those questions asked by the investigator or decisionmaker during one or more individual meetings, including follow-up meetings, with a party or witness, subject to the requirements in paragraph (f)(3) of this section; and

(C) Provide each party with an audio or audiovisual recording or transcript with enough time for the party to have a reasonable opportunity to propose follow-up questions.

(ii) When a postsecondary institution chooses to conduct a live hearing under paragraph (g) of this section, the process for proposing and asking relevant and not otherwise impermissible questions and follow-up questions of parties and witnesses under §§ 106.2 and 106.45(b)(7), including questions challenging credibility, must allow the decisionmaker to ask such questions, and either:

(A) Allow each party to propose such questions that the party wants asked of any party or witness and have those questions asked by the decisionmaker,

subject to the requirements under paragraph (f)(3) of this section; or

(B) Allow each party's advisor to ask any party or witness such questions, subject to the requirements under paragraph (f)(3) of this section. Such questioning must never be conducted by a party personally. If a postsecondary institution permits advisor-conducted questioning and a party does not have an advisor to ask questions on their behalf, the postsecondary institution must provide the party with an advisor of the postsecondary institution's choice, without charge to the party, for the purpose of advisor-conducted questioning. In those instances, the postsecondary institution must not appoint a confidential employee and may appoint, but is not required to appoint, an attorney to serve as an advisor.

(2) *Compliance with § 106.45(g).* Compliance with paragraph (f)(1)(i) or (ii) of this section satisfies the requirements of § 106.45(g).

(3) *Procedures for the decisionmaker to evaluate the questions and limitations on questions.* The decisionmaker must determine whether a proposed question is relevant under § 106.2 and not otherwise impermissible under § 106.45(b)(7), prior to the question being posed, and must explain any decision to exclude a question as not relevant or otherwise impermissible. If a decisionmaker determines that a party's question is relevant and not otherwise impermissible, then the question must be asked except that a postsecondary institution must not permit questions that are unclear or harassing of the party or witness being questioned. The decisionmaker must give a party an opportunity to clarify or revise a question that the decisionmaker has determined is unclear or harassing and, if the party sufficiently clarifies or revises a question to satisfy the terms of this paragraph, the question must be asked. A postsecondary institution may also adopt and apply other reasonable rules regarding decorum, provided they apply equally to the parties.

(4) *Refusal to respond to questions and inferences based on refusal to respond to questions.* A decisionmaker may choose to place less or no weight upon statements by a party or witness who refuses to respond to questions deemed relevant and not impermissible. The decisionmaker must not draw an inference about whether sex-based harassment occurred based solely on a party's or witness's refusal to respond to such questions.

(g) *Live hearing procedures.* A postsecondary institution's sex-based harassment grievance procedures may, but need not, provide for a live hearing. If a postsecondary institution chooses to conduct a live hearing, it may conduct the live hearing with the parties physically present in the same geographic location. At the postsecondary institution's discretion the institution may, or upon the request of either party it must, conduct the live hearing with the parties physically present in separate locations, with technology enabling the decisionmaker and parties to simultaneously see and hear the party or the witness while that person is speaking. A postsecondary institution must create an audio or audiovisual recording or transcript, of any live hearing and make it available to the parties for inspection and review.

(h) *Written determination whether sex-based harassment occurred.* The postsecondary institution must provide the determination whether sex-based harassment occurred in writing to the parties simultaneously.

(1) The written determination must include:

(i) A description of the alleged sex-based harassment;

(ii) Information about the policies and procedures that the postsecondary institution used to evaluate the allegations;

(iii) The decisionmaker's evaluation of the relevant and not otherwise impermissible evidence and determination whether sex-based harassment occurred;

(iv) When the decisionmaker finds that sex-based harassment occurred, any disciplinary sanctions the postsecondary institution will impose on the respondent, whether remedies other than the imposition of disciplinary sanctions will be provided by the postsecondary institution to the complainant, and, to the extent appropriate, other students identified by the postsecondary institution to be experiencing the effects of the sex-based harassment; and

(v) The postsecondary institution's procedures for the complainant and respondent to appeal.

(2) The determination regarding responsibility becomes final either on the date that the postsecondary institution provides the parties with the written determination of the result of any appeal, or, if no party appeals, the date on which an appeal would no longer be considered timely.

(i) *Appeals.* (1) A postsecondary institution must offer the parties an appeal from a determination whether sex-based harassment occurred, and from a postsecondary institution's dismissal of a complaint or any allegations therein, on the following bases:

(i) Procedural irregularity that would change the outcome;

(ii) New evidence that would change the outcome and that was not reasonably available when the determination whether sex-based harassment occurred or dismissal was made; and

(iii) The Title IX Coordinator, investigator, or decisionmaker had a conflict of interest or bias for or against complainants or respondents generally or the individual complainant or respondent that would change the outcome.

(2) A postsecondary institution may offer an appeal to the parties on additional bases, so long as the procedures and additional bases for appeal are equally available to all parties.

(3) As to all appeals, the postsecondary institution must comply with the requirements in § 106.45(d)(3)(i), (v), and (vi) in writing.

(j) *Informal resolution.* If a postsecondary institution offers or provides the parties to the grievance procedures under § 106.45 and under this section with an informal resolution process under § 106.44(k), the postsecondary institution must inform the parties in writing of the offer and their rights and responsibilities in the informal resolution process and otherwise comply with the provisions of § 106.44(k)(3) in writing.

■ 22. Section 106.47 is added to subpart D to read as follows:

§ 106.47 Assistant Secretary review of sex-based harassment complaints.

The Assistant Secretary will not deem a recipient to have violated this part solely because the Assistant Secretary would have reached a different determination in a particular complaint alleging sex-based harassment than a recipient reached under § 106.45, and if applicable § 106.46, based on the Assistant Secretary's independent weighing of the evidence.

■ 23. Section 106.51 is amended by revising paragraph (b)(6) to read as follows:

§ 106.51 Employment.

* * * * *

(b) * * *

(6) Granting and return from leaves of absence, leave for pregnancy or related conditions, leave for persons of either sex to care for children or dependents, or any other leave;

* * * * *

■ 24. Section 106.57 is revised to read as follows:

§ 106.57 Parental, family, or marital status; pregnancy or related conditions.

(a) *Status generally.* A recipient must not adopt or implement any policy, practice, or procedure, or take any employment action, on the basis of sex:

(1) Concerning the current, potential, or past parental, family, or marital status of an employee or applicant for employment, which treats persons differently; or

(2) That is based upon whether an employee or applicant for employment is the head of household or principal wage earner in such employee's or applicant's family unit.

(b) *Pregnancy or related conditions.* A recipient must not discriminate against any employee or applicant for employment on the basis of current, potential, or past pregnancy or related conditions.

(c) *Comparable treatment to other temporary medical conditions.* A recipient must treat pregnancy or related conditions as any other temporary medical conditions for all job-related purposes, including commencement, duration and extensions of leave; payment of disability income; accrual of seniority and any other benefit or service; and reinstatement; and under any fringe benefit offered to employees by virtue of employment.

(d) *Voluntary leaves of absence.* In the case of a recipient that does not maintain a leave policy for its employees, or in the case of an employee with insufficient leave or accrued employment time to qualify for leave under such a policy, a recipient must treat pregnancy or related conditions as a justification for a voluntary leave of absence without pay for a reasonable period of time, at the conclusion of which the employee shall be reinstated to the status held when the leave began or to a comparable position, without decrease in rate of compensation or loss of promotional opportunities, or any other right or privilege of employment.

(e) *Lactation time and space.* (1) A recipient must provide reasonable break time for an employee to express breast milk or breastfeed as needed.

(2) A recipient must ensure that an employee can access a lactation space, which must be a space other than a bathroom that is clean, shielded from view, free from intrusion from others, and may be used by an employee for expressing breast milk or breastfeeding as needed.

■ 25. Section 106.60 is revised to read as follows:

§ 106.60 Pre-employment inquiries.

(a) *Marital status.* A recipient must not make a pre-employment inquiry as to the marital status of an applicant for employment, including whether such applicant is ''Miss or Mrs.''

(b) *Sex.* A recipient may ask an applicant for employment to self-identify their sex, but only if this question is asked of all applicants and if the response is not used as a basis for discrimination prohibited by Title IX or this part.

■ 26. Section 106.71 is revised to read as follows:

§ 106.71 Retaliation.

A recipient must prohibit retaliation, including peer retaliation, in its education program or activity. When a recipient has information about conduct that reasonably may constitute retaliation under Title IX or this part, the recipient is obligated to comply with § 106.44. Upon receiving a complaint alleging retaliation, a recipient must initiate its grievance procedures under § 106.45, or, as appropriate, an informal resolution process under § 106.44(k). As set out in § 106.45(e), if the complaint is consolidated with a complaint of sex-based harassment involving a student complainant or student respondent at a postsecondary institution, the grievance procedures initiated by the consolidated complaint must comply with the requirements of both §§ 106.45 and 106.46.

■ 27. Section 106.81 is revised to read as follows:

§ 106.81 Procedures.

The procedural provisions applicable to Title VI of the Civil Rights Act of 1964 are hereby adopted and incorporated herein. These procedures may be found at 34 CFR 100.6 through 100.11 and 34 CFR part 101.

RIN 1205–AC12

Improving Protections for Workers in Temporary Agricultural Employment in the United States

AGENCY: Employment and Training Administration and Wage and Hour Division, Department of Labor.

ACTION: Final rule.

SUMMARY: The Department of Labor (Department or DOL) is amending its regulations governing the certification of temporary employment of nonimmigrant workers employed in temporary or seasonal agricultural employment and the enforcement of the contractual obligations applicable to employers of these nonimmigrant workers. The revisions in this final rule focus on strengthening protections for temporary agricultural workers and enhancing the Department's capabilities to monitor program compliance and take necessary enforcement actions against program violators.

DATES: This final rule is effective June 28, 2024.

FOR FURTHER INFORMATION CONTACT: For further information regarding 20 CFR parts 651, 653, and 658, contact Kimberly Vitelli, Administrator, Office of Workforce Investment, Employment and Training Administration, Department of Labor, Room C–4526, 200 Constitution Avenue NW, Washington, DC 20210, telephone: (202) 693–3980 (this is not a toll-free number). For further information regarding 20 CFR part 655, contact Brian Pasternak, Administrator, Office of Foreign Labor Certification, Employment and Training Administration, Department of Labor, 200 Constitution Avenue NW, Room N–5311, Washington, DC 20210, telephone: (202) 693–8200 (this is not a toll-free number). For further information regarding 29 CFR part 501, contact Daniel Navarrete, Acting Director of the Division of Regulations, Legislation, and Interpretation, Wage and Hour Division, Department of Labor, Room S–3018, 200 Constitution Avenue NW, Washington, DC 20210, telephone: (202) 693–0406 (this is not a toll-free number). For persons with a hearing or speech disability who need assistance to use the telephone system, please dial 711 to access telecommunications relay services.

II. Background

A. Legal Authority

1. Immigration and Nationality Act

The Immigration and Nationality Act (INA), as amended by the Immigration Reform and Control Act of 1986, establishes an ''H–2A'' nonimmigrant visa classification for a worker ''having a residence in a foreign country which he has no intention of abandoning who is coming temporarily to the United States to perform agricultural labor or services . . . of a temporary or seasonal nature.'' 8 U.S.C. 1101(a)(15)(H)(ii)(a); *see also* 8 U.S.C. 1184(c)(1) and 1188.[1] Permanent, year-round job opportunities cannot be classified as temporary or seasonal. 87 FR 61660, 61684 (Oct. 12, 2022);[2] *see also* 8 U.S.C. 1101(a)(15)(H)(ii)(a) (the INA permits only ''agricultural labor or services . . . of a temporary or seasonal nature'' to be performed under the H–2A visa category).

The H–2A nonimmigrant worker visa program enables U.S. agricultural employers to employ foreign workers on a temporary basis to perform temporary or seasonal agricultural labor or services only where the Secretary of Labor (Secretary) certifies that: (1) there are not sufficient workers who are able, willing, and qualified, and who will be available at the time and place needed, to perform the labor or services involved in the petition; and (2) the employment of the foreign worker in such labor or services will not adversely affect the wages and working conditions of workers in the United States similarly employed. 8 U.S.C. 1188(a)(1).[3] The INA prohibits the Secretary from issuing this certification—known as a ''temporary agricultural labor certification''—unless both of the above-referenced conditions are met. The INA further prohibits the Secretary from issuing a temporary agricultural labor certification if any of the conditions in 8 U.S.C. 1188(b) apply concerning strikes or lock-outs, labor certification program debarments, workers' compensation assurances, and positive recruitment.

The Secretary has delegated the authority to issue temporary agricultural labor certifications to the Assistant Secretary for Employment and Training, who in turn has delegated that authority to the Employment and Training Administration's (ETA) OFLC. *See* Secretary's Order 06–2010 (Oct. 20, 2010), 75 FR 66268 (Oct. 27, 2010). In addition, the Secretary has delegated to WHD the responsibility under 8 U.S.C. 1188(g)(2) to assure employer compliance with the terms and conditions of employment under the H–2A program. *See* Secretary's Order 01–2014 (Dec. 19, 2014), 79 FR 77527 (Dec. 24, 2014). Pursuant to the INA and implementing regulations promulgated by DOL and the Department of Homeland Security (DHS), DOL evaluates an employer's need for agricultural labor or services to determine whether it is seasonal or temporary during the review of an H–2A Application. 20 CFR 655.161(a); 8 CFR 214.2(h)(5)(i)(A) and (h)(5)(iv).

2. Wagner-Peyser Act

The Wagner-Peyser Act of 1933 established the United States Employment Service (ES), a nationwide system to improve the functioning of the nation's labor markets by bringing together individuals seeking employment with employers seeking workers. 29 U.S.C. 49 *et seq.* Section 3(a) of the Act sets forth the basic responsibilities of the Department in the ES, which include assisting in coordinating the State public employment service offices throughout the country and in increasing their usefulness by prescribing standards for efficiency, promoting uniformity in procedures, and maintaining a system of clearing labor between the States. 29 U.S.C. 49b. The Act further authorizes the Department ''to make such rules and regulations as may be necessary to carry out [its] provisions.'' 29 U.S.C. 49k.

Consistent with the aims of sec. 3(a), the ES system provides labor exchange services to its participants and has undergone numerous changes to align its activities with broader national workforce development policies and statutory requirements. The Workforce Innovation and Opportunity Act (Pub. L. 113–128), passed in 2014, expanded upon the previous workforce reforms in the Workforce Investment Act of 1998 and, among other things, identified the ES system as a core program in the One-Stop local delivery system, also called the American Job Center network.

In 1974, the case *National Ass'n for the Advancement of Colored People (NAACP), Western Region, et al.* v. *Brennan et al.,* No. 2010–72, 1974 WL 229 (D.D.C. Aug. 13, 1974), resulted in a detailed court order mandating various Federal and State actions consistent with applicable law (Richey Order). The Richey Order required the Department to implement and maintain a Federal and State monitoring and advocacy system and set forth requirements to ensure the delivery of ES services, benefits, and protections to migrant or seasonal farmworkers (MSFWs) on a non-discriminatory basis, and to provide such services in a manner that is qualitatively equivalent and quantitatively proportionate to those provided to non-farmworkers. In 1977 and 1980, consistent with its authority under the Wagner-Peyser Act, the Department published regulations at 20 CFR parts 651, 653, and 658 to implement the requirements of the Richey Order. Part 653 sets forth standards and procedures for providing services to MSFWs and provides regulations governing the Agricultural Recruitment System (ARS), a system for interstate and intrastate agricultural job recruitment. Part 658 sets forth standards and procedures for the administrative handling of complaints alleging violations of ES regulations and of employment-related laws, the discontinuation of services provided by the ES system to employers, the review and assessment of State agency compliance with ES regulations, and the process the Department must follow if

[1] For ease of reference, sections of the INA are referred to by their corresponding section in the United States Code.

[2] Final Rule, *Temporary Agricultural Employment of H–2A Nonimmigrants in the United States,* 87 FR 61660 (Oct. 12, 2022) (2022 H–2A Final Rule).

[3] Following certification by DOL, the employer must file an H–2A petition (defined at 20 CFR 655.103(b) as the U.S. Citizenship and Immigration Services (USCIS) Form I–129, Petition for a Nonimmigrant Worker, with H Supplement or successor form and/or supplement, and accompanying documentation required by DHS for employers seeking to employ foreign persons as H–2A nonimmigrant workers) with USCIS, requesting one or more workers not to exceed the total listed on the temporary agricultural labor certification. Generally, USCIS must approve this petition before the worker(s) can be considered eligible for an H–2A visa or for H–2A nonimmigrant status. The limited exceptions from this requirement may be found at 8 CFR 274a.12(b)(20) and (21).

State agencies are not complying with the ES regulations.

B. Current Regulatory Framework

Since 1987, the Department has operated the H–2A temporary agricultural labor certification program under regulations promulgated pursuant to the INA. The standards and procedures applicable to the certification and employment of workers under the H–2A program are found in 20 CFR part 655, subpart B, and 29 CFR part 501. The majority of the Department's current regulations governing the H–2A program were published in 2010 and many were strengthened in a final rule the Department published in October 2022.[4] The Department incorporated the provisions for employment of workers in the herding and production of livestock on the range into the H–2A regulations, with modifications, in 2015.[5] The provisions governing the employment of workers in the herding and production of livestock on the range are codified at 20 CFR 655.200 through 655.235.[6] Relatedly, the regulations implementing the Wagner-Peyser Act at 20 CFR parts 651, 653, and 658 establish the ARS, through which employers can recruit U.S. workers for agricultural employment opportunities, and which prospective H–2A employers must use to recruit U.S. workers as a condition of receiving a temporary agricultural labor certification.

C. Need for Rulemaking

This final rule aims to address some concerns expressed by various stakeholders during rulemaking. It also responds to recent court decisions and program experience indicating a need to enhance the Department's ability to enforce regulations related to foreign labor recruitment, to improve accountability for successors in interest and employers who use various methods to attempt to evade the law and regulatory requirements, and to enhance worker protections, as explained further in the sections that follow.

In particular and as noted above, the Department recently published the 2022 H–2A Final Rule, which strengthened worker protections in the H–2A program, clarified the obligations of joint employers and the existing prohibitions on fees related to foreign labor recruitment, authorized debarment of agents and attorneys for their own misconduct, enhanced surety bond obligations and related enforcement authorization, modernized the prevailing wage determination process, enhanced regulation of H–2A labor contractors (H–2ALCs), and provided additional safeguards related to employer-provided housing and wage obligations. *See* 87 FR 61660. In response to the notice of proposed rulemaking (NPRM) published prior to the 2022 H–2A Final Rule, the Department received many comments suggesting changes that were beyond the scope of that rulemaking, such as suggestions relating to increased enforcement and transparency regarding the foreign labor recruitment process, increased worker protections, revisions to the definition of employer, stronger integrity provisions to account for complex business organizations and for methods used to circumvent the regulations, strengthening provisions related to piece rate pay, and suggestions to revise the Wagner-Peyser Act regulations to ensure stronger protections for workers in the event of harmful last-minute start date delays.

After careful consideration of comments from the public, the Department is adopting important provisions in this final rule that will further strengthen protections for agricultural workers and enhance the Department's enforcement capabilities, thereby permitting more effective enforcement against fraud and program violations. These revisions will help prevent exploitation and abuse of agricultural workers and ensure that unscrupulous employers do not financially gain from their violations or contribute to economic and workforce instability by circumventing the law, both of which would adversely affect the wages and working conditions of workers in the United States similarly employed, and undermine the Department's ability to determine whether there are, in fact, insufficient U.S. workers for proposed H–2A jobs. It is the Department's policy to maintain robust protections for workers and vigorously enforce all laws within its jurisdiction governing the administration and enforcement of nonimmigrant visa programs. This includes the coordination of the administration and enforcement activities of ETA, WHD, and the Department's Office of the Solicitor in the promotion of the hiring of U.S. workers and the safeguarding of wages and working conditions for workers in the United States. In addition, these agencies make criminal referrals to the Department's Office of Inspector General (OIG) in appropriate circumstances, such as when the agencies encounter visa-related fraud. The Department has determined through program experience, recent litigation, challenges in enforcement, comments on this rulemaking as well as on prior rulemakings, and reports from various stakeholders that it is necessary to adopt stronger protections for agricultural workers to better ensure that employers, agents, attorneys, and labor recruiters comply with the law, and to enhance program integrity by improving the Department's ability to monitor compliance and investigate and pursue remedies from program violators. The recent surge in use of the H–2A program amplifies these needs.[7]

III. General Comments on the Proposed Rule

On September 15, 2023, the Department published an NPRM requesting public comments on proposals intended to improve protections for workers in temporary agricultural employment in the United States. *See* 88 FR 63750 (Sept. 15, 2023).[8] The proposed revisions focused on strengthening protections for temporary agricultural workers and enhancing the Department's capabilities to monitor program compliance and take necessary enforcement actions against program violators. The NPRM invited written comments from the public on all aspects of the proposed amendments to the regulations. A 60-day comment period allowed for the public to inspect the proposed rule and provide comments through November 14, 2023.

The Department received a total of 12,928 public comments in response to the NPRM before the end of the comment period. Included in these comments were multiple form letter campaigns, which were received as bundled submissions to the

[8] NPRM, *Improving Protections for Workers in Temporary Agricultural Employment in the United States,* 88 FR 63750 (Sept. 15, 2023) (2023 NPRM).

Regulations.gov website. After accounting for duplicate submissions, the Department received comments from 8,725 unique commenters. Comments can be viewed online at *https://www.regulations.gov/docket/ETA-2023-0003.* The commenters represented a wide range of stakeholders from the public, private, and not-for-profit sectors. The Department received comments from a geographically diverse cross-section of stakeholders within the agricultural sector, including farmworkers, workers' rights advocacy organizations, farm owners, farm labor contractors, trade associations for agricultural products and services, not-for-profit organizations representing agricultural issues, and other organizations with an interest in agricultural activities. Public sector commenters included Federal elected officials, State officials, and agencies representing State governments. Private sector commenters included business owners, recruiting companies, and law firms. Not-for-profit sector commenters included both industry organizations (*e.g.,* professional associations) and worker advocacy organizations.

The Department recognizes and appreciates the value of comments, ideas, and suggestions from all those who commented on the proposal, and this final rule was developed after review and consideration of all public comments timely received in response to the NPRM. Some comments provided general opinions on the proposed rule, or on agricultural labor generally, and the Department thanks the commenters for their time to submit their feedback. Where public comments provided substantive feedback on specific proposals in the NPRM, they have been responded to in the sections that follow. When the Department has made changes from the NPRM as a result of public comment, those changes are identified in the sections below.

IV. Overview of This Final Rule

A. Summary of Major Provisions of This Final Rule

1. Protections for Worker Voice and Empowerment

In this final rule, the Department is adopting several revisions to § 655.135 that will provide stronger protections for workers protected by the H–2A program to advocate on behalf of themselves and their coworkers regarding their working conditions and prevent employers from suppressing this activity. As detailed in Section VI, the Department believes that these protections are important to prevent adverse effect on the working conditions of workers in the United States similarly employed. 8 U.S.C. 1188(a)(1). Specifically, the Department is broadening § 655.135(h), which prohibits unfair treatment by employers, by expanding and explicitly protecting certain activities all workers must be able to engage in without fear of intimidation, threats, and other forms of retaliation. For those workers engaged in agriculture as defined and applied in 29 U.S.C. 203(f) of the Fair Labor Standards Act (FLSA) (''FLSA agriculture''), who are exempt from the protections of the National Labor Relations Act (NLRA), 29 U.S.C. 151 *et seq.,* the Department also revises § 655.135(h) to include some new protections to safeguard collective action and concerted activity for mutual aid and protection, and, in a change responsive to comments, to allow those workers to decline to attend or listen to employer speech regarding protected activities without fear of retaliation.[9]

The Department also finalizes one of the provisions initially proposed at § 655.135(m) to require employers to permit workers engaged in FLSA agriculture to designate a representative of their choosing in certain interviews, with minor changes in response to comments, and adopts a new provision at § 655.135(n) to permit workers to invite or accept guests to worker housing (which has been substantially revised in response to comments received). New § 655.135(m) and (n) are intended, like the revisions and additions to § 655.135(h), to strengthen the ability of workers to advocate on behalf of themselves and their coworkers regarding their required terms and conditions of employment, to better protect against adverse effect on similarly employed workers in the United States.

The final rule does not require H–2A employers to recognize labor organizations or to engage in any collective bargaining activities such as those that may be required by the NLRA itself or by a State law such as the California Agricultural Labor Relations Act (ALRA), Cal. Lab. Code § 1140 *et seq.,* nor does it create any independent rights or obligations for labor organizations. Instead, this final rule requires employers to provide assurances that they will not intimidate, threaten, or otherwise discriminate against certain workers or others for engaging in ''activities related to self-organization,'' including ''concerted activities for the purpose of mutual aid or protection relating to wages or working conditions,'' or refusing to engage in such activities. 20 CFR 655.135(h)(2). Such activities may include seeking to form, join, or assist a labor organization, but also encompasses numerous other ways that workers can engage, individually or collectively, to enforce their rights, as further discussed below.

2. Clarification of Termination for Cause

In this final rule, the Department adopts with modifications the NPRM definition of ''termination for cause'' at § 655.122(n) by adopting five criteria that must be satisfied to ensure that disciplinary and termination processes are justified and reasonable, which are intended to promote the integrity and regularity of any such processes. These changes will help to ensure employers do not arbitrarily and unjustly terminate workers, thereby stripping them of essential rights to which they would otherwise be entitled under the H–2A program. Moreover, these changes will assist the Department in determining whether an individual worker was terminated without cause where the employer gives pretextual reasons for a termination, and will provide regulatory certainty to employers by providing clear guidelines. In response to comments, the Department adopts minor modifications from the NPRM in this final rule to clarify the definition of termination for cause, the criteria that an employer must meet to terminate a worker for cause, and the types of terminations that are not ''for cause.''

3. Immediate Effective Date for Updated AEWR

The Department adopts the proposed revisions to § 655.120(b)(2) to designate the effective date of each updated adverse effect wage rate (AEWR) as its date of publication in the **Federal**

[9] As discussed further in Section VI.C.2.b below, the NLRA excludes from its protections workers who are engaged in FLSA agriculture. See definition of ''employee'' at 29 U.S.C. 152(3) (excluding ''any individual employed as an agricultural laborer''). Congress has provided that the definition of ''agricultural'' in sec. 3(f) of the FLSA also applies to the NLRA. *See, e.g., Holly Farms Corp. et al.* v. *NLRB,* 517 U.S. 392, 397–98 (1996). The H–2A statute and the Department, however, define ''agricultural labor or services'' under the H–2A program more broadly to include FLSA agriculture as well as other activities. *See* 8 U.S.C. 1101(a)(15)(H)(ii)(a); 20 CFR 655.103(c). Certain provisions of this final rule apply only to workers or persons engaged in FLSA agriculture (who are excluded from the NLRA's protections). Therefore, workers who are not engaged in FLSA agriculture (*e.g.,* those in logging occupations) will not be covered by the provisions of this final rule that are limited to workers or persons engaged in FLSA agriculture. However, the vast majority of such workers are already covered by the NLRA as ''employees'' under 29 U.S.C. 152(3). Nothing in this final rule alters or circumscribes the rights of workers who are already protected by the NLRA to engage in conduct and exercise rights afforded under that law.

Register, and revises paragraph (b)(3) to state that the employer will be obligated to pay the updated AEWR immediately upon publication of the new AEWR in the **Federal Register**. If the update falls in the middle of a pay period, the employer may pay the updated AEWR at the end of the following pay period, but the employer must provide retroactive pay for all hours worked during the period in which the AEWR was updated, beginning immediately on the date the Department publishes the notice in the **Federal Register**. This change is intended to help ensure workers are paid at least the updated AEWR, as soon as it is published, for all work they perform, and thereby help to ensure that the employment of H–2A workers does not adversely affect the wages and working conditions of workers in the United States similarly employed.

4. Enhanced Transparency for Job Opportunity and Foreign Labor Recruitment

The Department is adopting the proposed changes for new disclosure requirements to enhance transparency in the foreign worker recruitment chain and bolster the Department's capacity to protect vulnerable agricultural workers from exploitation and abuse, as explained more fully below. This final rule includes a new § 655.137, *Disclosure of foreign worker recruitment,* and a new § 655.135(p), *Foreign worker recruitment,* which are similar to the regulations governing disclosure of foreign worker recruitment in the H–2B program. The provisions require an employer and its attorney or agent, as applicable, to provide a copy of all agreements with any agent or recruiter that the employer engages or plans to engage in the recruitment of prospective H–2A workers, regardless of whether the agent or recruiter is located in the United States or abroad. The provisions also require the employer to disclose the identity (*i.e.,* name and, if applicable, identification/registration number) and geographic location of persons and entities hired by or working for the foreign labor recruiter and any of the agents or employees of those persons and entities who will recruit or solicit prospective H–2A workers. As explained more fully below, the Department will gather the additional recruitment chain information when the employer files its H–2A Application and will require the employer to submit a Form ETA–9142A, *Appendix D,* which mirrors the Form ETA–9142B, *Appendix C.* Consistent with current practice in the H–2B program, § 655.137(d) provides for the Department's public disclosure of the names of the agents and foreign labor recruiters used by employers. These additional disclosures of information about the recruitment chain are necessary for the Department to carry out its enforcement obligations, protect vulnerable agricultural workers and program integrity, and ensure equitable administration of the H–2A program for law abiding employers.

The Department also is adopting, with minor changes, the proposal to require the employer to provide the full name, date of birth, address, telephone number, and email address of all owner(s) of the employer(s), any person or entity who is an operator of the place(s) of employment (including the fixed-site agricultural business that contracts with the H–2ALC), and any person who manages or supervises the H–2A workers and workers in corresponding employment under the H–2A Application. The Department has revised the Form ETA–9142A to require, where applicable, additional information about prior trade or doing business as (DBA) names the employer has used in the most recent 3-year period preceding its filing of the H–2A Application. Sections 655.130 and 655.167 clarify that the employer must continue to update the information required by the above paragraphs until the end of the work contract period, including extensions thereto, and retain this information for a period of 3 years from the date of certification and produce it upon request by the Department. These disclosure requirements will help prevent adverse effects on the working conditions of workers in the United States similarly employed by increasing transparency in the international recruitment chain, aiding the Department in assessing the nature of the job opportunity and the employer's need, enhancing the Department's ability to enforce the prohibition against recruitment-related fees and to pursue remedies from program violators, assisting the Department in identifying potential successors in interest to debarred employers, and better protecting agricultural workers from abuse and exploitation in the United States and abroad.

5. Enhanced Transparency and Protections for Agricultural Workers

a. Disclosure of Minimum Productivity Standards, Applicable Wage Rates, and Overtime Opportunities

In this final rule, the Department adopts the proposal to revise § 655.122(l) to require employers to disclose any minimum productivity standards they will impose as a condition of job retention, regardless of whether the employer pays on a piece rate or hourly basis. This is intended to help ensure that agricultural workers are fully apprised of the material terms and conditions of employment, including any productivity standards that may serve as a basis for termination for cause. An existing regulatory provision, § 655.122(b), would require that any such minimum productivity standard be bona fide and normal and accepted among non-H–2A employers in the same or comparable occupations and crops. This revision is intended to ensure that workers are aware of productivity standards that are a condition of job retention before accepting the job, and that an employer cannot raise productivity standards mid-contract with the goal of terminating workers.

The Department also adopts revisions at §§ 655.120(a) and 655.122(l), with minor changes responsive to comments, to require employers to offer and advertise on the job order any applicable prevailing piece rate, the highest applicable hourly wage rate, and any other rate the employer intends to pay, and to pay workers the highest of these wage rates, as calculated at the time work is performed. The Department also adopts proposed new provisions, at § 655.122(l)(4) and § 655.210(g)(3) of this final rule, that explicitly require the employer to specify in the job order any applicable overtime premium wage rate(s) for overtime hours worked and the circumstances under which the wage rate(s) for such overtime hours will be paid. These revisions are intended to help ensure that agricultural workers are fully apprised of the material terms and conditions of employment, and to aid the Department in its administration and enforcement of the H–2A program.

b. Enhanced Protections for Workers Through the ES System

The Department adopts revisions to the Wagner-Peyser Act implementing regulations at 20 CFR 653.501 to clarify an employer's obligations in the event of a delayed start date and to make conforming revisions to the H–2A regulations at 20 CFR 655.145 and a new § 655.175 to clarify pre-certification H–2A Application amendments and employer obligations in the event of post-certification changes to the start date. As noted above, the previous regulations require an employer to provide notice to the ES Office holding the job order of delayed start dates and impose obligations on employers that

fail to provide the requisite notice, but do not require employers to notify workers directly of any such delay.

The Department adopts revisions to part 658, subpart F, and related definitions at § 651.10, regarding the discontinuation of Wagner-Peyser Act ES services to employers. The Department clarifies and expands the scope of entities whose ES services can be discontinued to also include agents, farm labor contractors, joint employers, and successors in interest. The Department also adopts revisions to clarify the bases for discontinuation at § 658.501, and to clarify and streamline the discontinuation procedures at §§ 658.502 through 658.504, including the notice requirements for SWAs, evidentiary requirements for employers, when and how employers may request a hearing, and procedures for requesting reinstatement. These changes are designed to increase the reach and utility of the discontinuation of services regulations, which, as discussed in the NPRM, SWAs have infrequently used relative to the number of complaints and apparent violations that SWAs processed in recent years. *See* 88 FR 63761. These changes are described in more detail below.

c. Enhanced Transportation Safety Requirements

The Department adopts the proposal, with minor modifications, to revise § 655.122(h)(4) to require the provision, maintenance, and wearing of seat belts in most employer-provided transportation, which would reduce the hazards associated with agricultural worker transportation. Specifically, as explained in detail below, the Department revises § 655.122(h)(4) to prohibit an employer from operating any employer-provided transportation unless all passengers and the driver are properly restrained by seat belts meeting standards established by the U.S. Department of Transportation (U.S. DOT), as long as the transportation was manufactured with seat belts pursuant to U.S. DOT's Federal Motor Vehicle Safety Standards (FMVSS). Essentially, if the vehicle is manufactured with seat belts, this final rule would require the employer to retain and maintain those seat belts in good working order and ensure that each worker is wearing a seat belt before the vehicle is operated. In response to public comment, the Department clarifies in this final rule that an employer must not allow any other person, in addition to the employer, to operate employer-provided transportation unless seat belts are provided, maintained, and worn.

d. Protection Against Passport and Other Immigration Document Withholding

The Department adopts the proposal to create a new § 655.135(o) that will directly prohibit an employer from holding or confiscating a worker's passport, visa, or other immigration or government identification documents. This prohibition is independent of whether the employer is otherwise in compliance with the Victims of Trafficking and Violence Protection Act of 2000 (TVPA), Public Law 106–386 (2000), 18 U.S.C. 1592(a), as required under the current H–2A regulations. This change is intended to better protect workers from potential labor trafficking.

e. Protections in the Event of a Minor Delay in the Start of Work

The Department adopts the proposal to create a new § 655.175 that addresses post-certification changes currently addressed at § 655.145(b) and creates new obligations and procedures in the event an employer must briefly delay the start of work due to unforeseen circumstances that jeopardize crops or commodities prior to the expiration of an additional recruitment period. Section 655.175 limits minor delays to 14 calendar days or less and requires the employer to notify each worker and the SWA of any minor delay in the start of work. Consistent with § 653.501(c), § 655.175 includes new compensation obligations that require the employer to pay workers the applicable wage rate for each day work is delayed, for a period of up to 14 calendar days, starting with the certified start date, if the employer fails to provide 10 business days' notice of the delay.

6. Enhanced Integrity and Enforcement Capabilities

a. Enhancements to the Department's Ability To Apply Orders of Debarment Against Successors in Interest

The Department adopts a new § 655.104 regarding successors in interest, revised from the NPRM based on comments received, which clarifies the liability of successors in interest for debarment purposes and streamlines the Department's procedures to deny temporary agricultural labor certifications filed by or on behalf of successors in interest to debarred employers, agents, and attorneys. The Department adopts conforming revisions to §§ 655.103(b), 655.181, and 655.182 and 29 CFR 501.20. These revisions are intended to better reflect the liability of successors in interest under the well-established successorship doctrine, and to better ensure that debarred entities do not circumvent the effects of debarment.

b. Defining the Single Employer Test for Assessing Temporary Need, or for Enforcement of Contractual Obligations

The Department adopts the proposal to define the term *single employer* at a new § 655.103(e) and adopts factors to determine if multiple nominally separate employers are acting as one. Defining the term would codify the Department's long-standing practice of using the single employer test (sometimes referred to as an ''integrated employer'' test), or similar analysis, to determine if separate employers are a single employer for purposes of assessing seasonal or temporary need, or for enforcement of contractual obligations. In relation to seasonal or temporary need, the Department has received applications for temporary agricultural labor certification that purport to be for job opportunities with different employers when, in reality, the workers hired under these certifications are employed by companies so intertwined that they are operating as a de facto single employer in one area of intended employment (AIE) for a period of need that is not truly temporary or seasonal. In its enforcement experience, the Department has increasingly encountered H–2A employers that purport to employ H–2A workers under one corporate entity and non-H–2A workers under another, creating the appearance that the H–2A employer has no workers in corresponding employment when actually, the corporate entities are so intertwined that all of the workers are employed by a single H–2A employer. Some employers have attempted to use these arrangements to avoid the obligation to provide certain H–2A program requirements to workers in corresponding employment, including the required wage rate. Codifying the definition of single employer will prevent employers from using their corporate structures to circumvent statutory and regulatory requirements.

B. Section-by-Section Analyses

Sections V through VII of the preamble provide the Department's responses to public comments received on the NPRM and rationale for the amendments adopted to 20 CFR parts 651, 653, 658, and 655, and 29 CFR part 501, section by section, and generally follow the outline of the regulations. Within each section of the preamble, the Department has noted and responded to those public comments that are addressed to that particular section of this final rule. If a proposed change is

not addressed in the discussion below, it is because the public comments did not substantively address that specific provision and no changes have been made to the proposed regulatory text. The Department received some comments on the NPRM that were outside the scope of the proposed regulations, and the Department offers no substantive response to such comments. The Department has also made some non-substantive changes to improve readability and conform the document stylistically.

C. Transition Procedures

The Department is providing a short transition period for receiving and processing criteria clearance orders and *Applications for Temporary Employment Certification* in order to promote an orderly and seamless implementation of the changes required by this final rule. This transition period will provide the Department with the necessary time to implement changes to Office of Management and Budget (OMB)-approved application forms within the Foreign Labor Application Gateway (FLAG) System and to its standard operating procedures and policies, and to provide training and technical assistance to the Office of Foreign Labor Certification (OFLC), Wage and Hour Division (WHD), State workforce agencies (SWAs), employers, and other stakeholders in order to familiarize them with changes required by this final rule.

The Department's regulations require that an employer submit a completed job order on Form ETA–790/790A (including all required addenda), an *Application for Temporary Employment Certification* on Form ETA–9142A (including all required addenda), and all required supporting documentation with the National Processing Center (NPC), using the electronic method(s) designated by the OFLC Administrator. Except where the employer has received prior approval from the OFLC Administrator to submit by mail as set forth in § 655.130(c)(2) or has been granted a reasonable accommodation as set forth in § 655.130(c)(3), the NPC will return without review any job order or *Application for Temporary Employment Certification* submitted using a method other than the designated electronic method(s).

In order to promote an orderly and seamless transition to this final rule, the NPC will process all H–2A applications submitted on or after 12:00 a.m. Eastern Daylight Time, August 29, 2024, in accordance with 20 CFR part 655, subpart B. in effect as of June 28, 2024.

The NPC will continue to process all H–2A applications submitted before 7:00 p.m. Eastern Daylight Time on or before August 28, 2024, in accordance with 20 CFR part 655, subpart B in effect as of the calendar day before the effective date as stated in this rule. The Department will use the 5 hours between 7:00 p.m. Eastern Daylight Time on August 28, 2024, and 12:00 a.m. Eastern Daylight Time on August 29, 2024, to initiate procedures to deploy and test changes to the FLAG System in order to effectively implement the new changes. No job orders or applications can be filed during this timeframe. All initiated, but unsubmitted, H–2A applications in FLAG as of 7:00 p.m. Eastern Daylight Time on August 28, 2024, will be deleted as of that time.

The Department believes this short transition period will provide employers, or their authorized agents or attorneys, with adequate time to plan and prepare their job orders and *Applications for Temporary Employment Certification* for submission under this final rule and to collect all necessary information that must be filed or retained in support of an H–2A application.

After the transition period, FLAG will not permit an employer to file prior versions of forms.

V. Discussion of Revisions to Employment Service Regulations

A. Introduction

In this final rule, the Department revises the ES regulations (20 CFR parts 651 through 654 and 658) that implement the Wagner-Peyser Act of 1933. These regulations include the provision of ES services with a particular emphasis on MSFWs, as well as provisions governing the discontinuation of ES services to employers. This final rule updates the language and content of the regulations to, among other things, improve and strengthen the regulations governing discontinuation of ES services to employers, including the applicable bases and procedures. In some areas, this final rule establishes entirely new responsibilities and procedures; in other areas, this final rule clarifies and updates pre-existing requirements. The revisions make important changes to the following components of the ES system: definitions, requirements for processing clearance orders, and the discontinuation of ES services provided to employers.

Within the revisions to the ES regulations, the Department is adopting the following modifications to the proposed regulatory amendments in the NPRM as a result of public comments received: (1) revising the new *successor in interest* definition in § 651.10 to omit unnecessary and potentially contradictory language; (2) revising provisions on the discontinuation of services list in new § 653.501(b)(4) to allow employers to submit requests for determinations to the Administrator of ETA's Office of Workforce Investment (OWI); (3) clarifying the requirements in § 653.501(c)(1)(iv)(E) for disclosure of wages on the clearance order; (4) revising the provisions in § 653.501(c) on delays in the start of work to clarify the applicability of the housing requirement to migrant workers, replace the proposed subsistence requirement with a requirement that the employer provide or pay all benefits and expenses listed on the clearance order, and incorporate requirements on method of delivery and language access for notifications to workers; and (5) providing that the SWA must consider whether there is a basis to discontinue services in cases of alleged misrepresentation or noncompliance in connection with a current or prior temporary labor certification, if the circumstances occurred within the previous 3 years. Additionally, the Department is adopting the following modifications to proposed amendments in the NPRM for clarity and consistency: (1) revising the *employment-related laws* definition in § 651.10 to clarify that it includes ''rules'' and ''standards''; (2) relocating language on liability of successors from the new *successor in interest* definition in § 651.10 to § 658.500; (3) making minor conforming changes to the assurances and delayed start requirements in § 653.501(c)(3)(i) and (iv) and § 653.501(c)(5); and (4) incorporating into § 658.501(b) existing obligations on SWAs under part 655, subpart B, and 29 CFR parts 501 and 503 to notify OFLC and WHD in cases of alleged misrepresentation or noncompliance with temporary labor certification requirements.

Note that on November 24, 2023, the Department issued a final rule regarding Wagner-Peyser Act staffing (Staffing Final Rule). 88 FR 82658 (Nov. 24, 2023). In the NPRM to the Staffing Final Rule (Staffing NPRM), 87 FR 23700 (Apr. 20, 2022), the Department proposed changes to several sections in 20 CFR parts 653 and 658 that govern the provision of ES services to MSFWs. As relevant here, in the Staffing NPRM, the Department proposed changes to 20 CFR 653.501(b)(4) and (c)(3) (ES office and SWA requirements for processing clearance orders); § 658.501(a)(4), (b),

and (c) (bases for discontinuation of ES services); § 658.502(a) and (b) (notification requirements for discontinuation of ES services); and § 658.504(a) and (b) (procedures for reinstatement of ES services). 87 FR at 23717, 23722, 23736, 23740–23741.

In the NPRM to this final rule, which the Department published on September 15, 2023, the Department proposed further changes to the above-named provisions. In some instances, these changes conflicted with changes proposed in the Staffing NPRM. Because the Department had not yet issued the Staffing Final Rule when the NPRM to this rule was published, the Department recognized that the proposed changes in this rulemaking might generate questions within the regulated community about how the Department ultimately proposed to revise these provisions, including how the proposed changes in this rulemaking would affect the proposed changes in the Staffing NPRM, and what the Department might do in finalizing the changes proposed in the Staffing NPRM. As discussed in the NPRM to this final rule, where the proposed changes in this rulemaking conflicted or intersected with changes proposed in the Staffing NPRM, the Department is using this rulemaking as the operative proceeding to provide notice and an opportunity to comment on the proposed changes to the provisions referenced above. Accordingly, the Department did not finalize changes to the above referenced provisions in the Staffing Final Rule. The Staffing Final Rule notified the public that changes to the above referenced provisions would be made through this rulemaking. 88 FR at 82708–82709, 82710. The Department has concluded that the proposed changes to these provisions are better suited for this rulemaking because they are meant to strengthen protections for agricultural workers and, therefore, better align with the overall purpose of this rulemaking. Further, the Department has concluded that this is the most transparent approach to address the overlap and is the approach that best minimizes confusion within the regulated community while ensuring the public the full opportunity to receive notice and provide comments on the proposed changes.

B. 20 CFR Part 651—General Provisions Governing the Wagner-Peyser Act Employment Service

Part 651 (§ 651.10) sets forth definitions for parts 652, 653, 654, and 658. In the NPRM, the Department proposed to add or revise the following definitions primarily to clarify aspects of its discontinuation of Wagner-Peyser Act ES services regulation at 20 CFR part 658, subpart F, including new provisions added in this rulemaking that expand the scope of entities whose services can be discontinued. Where appropriate, as discussed below, the Department has sought to align these new definitions with the same or similar definitions at 20 CFR 655.103. The Department received comments on each of the proposed additions and revisions, and it notes that many commenters did not raise objections to the proposed changes. After carefully considering these comments, the Department adopts most of the additions and revisions as proposed, with exceptions, as discussed in detail below.

1. Agent

The Department proposed to add a definition to § 651.10 for *agent* to establish that an agent is a legal entity or person, such as an association of employers, or an attorney for an association, that is authorized to act on behalf of the employer for purposes of recruitment of workers through the clearance system and is not itself an employer or joint employer, as defined in this section, with respect to a specific job order. The Department has observed that individuals and entities meeting the proposed definition of *agent* often engage the ES clearance system by submitting clearance orders on behalf of *employers,* as defined in part 651, and control many aspects of *employers'* recruitment activities relating to clearance orders. Adding this proposed definition clarifies that *agents* (which include attorneys) are among the entities subject to discontinuation of services as a result of the proposed changes to part 658. Additionally, because an employer's agent for purposes of the ES clearance system is often the same agent that an employer uses for purposes of the H–2A labor certification process, the Department proposed a definition of *agent* at § 651.10 that aligns with the definition of agent in § 655.103.

Farmworker Justice, in comments joined by 40 signatories, including advocacy organizations and legal services providers, supported inclusion of the proposed definition, stating that to the greatest extent feasible, the § 651.10 definition should be consistent with that used in the H–2A regulations at § 655.103(b). Farmworker Justice suggested that the Department clarify that agents who assist in the preparation and submission of criteria clearance orders (clearance orders placed in connection with H–2A applications) on behalf of their principals must obtain certificates of registration as farm labor contractors under the Migrant and Seasonal Agricultural Worker Protection Act (MSPA). They stated that criteria clearance orders, currently submitted using Form ETA–790/790A, are used to recruit U.S. workers for the positions for which H–2A workers are requested. In such situations, Farmworker Justice said, the agent is being paid by the employer for recruiting MSFWs, thereby falling squarely within the definition of farm labor contractor under MSPA.

Relatedly, Mid-Atlantic Solutions, LLC d/b/a másLabor and AgWorks H2, LLC (másLabor) and McCorkle Nurseries, Inc. suggested that the Department remove the reference to recruitment from the definition to avoid potential implications under the MSPA. MásLabor stated that the qualifier, for purposes of recruitment of workers through the clearance system, was likely intended to refer to the employer's purposes in placing the job order, rather than the agent's—*i.e.,* the employer is placing a job order for purposes of recruitment and the agent is acting on the employer's behalf in the placement of the job order)—and that such language may inadvertently imply that an agent acting on behalf of an employer for the submission of a job order is itself, as the agent, engaged in the recruitment or solicitation or both of U.S. farmworkers. MásLabor stated that because the Department considers recruitment and solicitation activities to be farm labor contracting activities under MSPA, an interpretation to this effect would mean that agents using the ES, in all cases, would be obligated to obtain a Farm Labor Contractor Certificate of Registration under MSPA.

MásLabor further stated that not all agents are engaged in activities that would traditionally be construed as recruitment or solicitation of workers. Some agents play no representative role throughout the recruitment process, and they instead engage purely in document preparation services by recording the employer's intent on the relevant government forms. Others offer services in both document preparation and written or verbal communication with the applicable government agencies for processing purposes but stop short of any direct assistance with recruitment. Others, like másLabor, offer comprehensive services wherein the agent is also authorized to conduct interviews with potential applicants and document hiring dispositions. MásLabor stated that only the latter (*i.e.,* comprehensive) service can be construed as recruitment or solicitation or both and therefore only agents offering this range of services ought to

be carefully considered within MSPA's jurisdiction. MásLabor suggested that the Department revise the proposed definition to state that an agent is a legal person or entity that is authorized to act on behalf of the employer for any purpose related to the employer's use of the clearance system, and is not itself an employer or joint employer, as defined in this section, with respect to a specific job order. Additionally, másLabor suggested modifying the definition to more clearly delineate between recruitment conducted by an employer and recruitment conducted by the agent or attorney directly, by defining agent to mean a legal person or entity authorized to act on behalf of the employer for purposes of the employer's recruitment of workers. MásLabor emphasized recruitment by ''the employer'' as distinct from recruitment by the agent, arguing the ES definition of agent should not imply that agents acting as recruiters on behalf of employers in the submission of job orders are acting as recruiters for MSPA purposes, and therefore subject to MSPA requirements, in all cases.

An agent and a law firm, USA Farm Labor, Inc. (USAFL) and the Hall Law Office, PLLC (Hall Global) (together, USAFL and Hall Global), agreed with másLabor and further stated the proposed definition conflates the role of attorney and agent. They stated that an agent in the context of the H–2A Program refers to a company that provides specialized services focused on preparing, managing, and filing H–2A-related paperwork. While attorneys can be said to be agents because they are hired by a principal to act on the principal's behalf, attorney conduct is normally regulated by the highest court in various jurisdictions, and regulatory concerns with respect to agents and attorneys are different. The primary issue for attorneys is protecting the sanctity of the attorney-client relationship as well as the distinction between lawyer and client. Clients are entitled to zealous representation within the bounds of the law, which includes making arguments seeking the modification or reversal of existing law. By conflating attorney with agent, the commenters argued, the Department creates ambiguity as to whether it intends to respect, as required by law, 5 U.S.C. 500, that nothing in this definition nor elsewhere in the regulations supplants an attorney's duties under State law or their ability to zealously represent their client within the bounds of the law.

The Department acknowledges commenters' suggestions and concerns regarding potential MSPA implications raised by the proposed *agent* definition. The Department notes that the definitions set forth in § 651.10 govern the Wagner-Peyser ES and do not govern any obligations under the MSPA. Whether an agent meets the definition of a farm labor contractor under the MSPA is a fact-specific inquiry governed by the MSPA and its implementing regulations.

Relatedly, regarding opposition from másLabor, McCorkle Nurseries, Inc., and USAFL and Hall Global regarding use of the word recruitment in the proposed agent definition, the Department declines to remove it. The Department acknowledges commenters' concerns but reiterates that these definitions are specific to 20 CFR part 651 and do not confer any obligations under MSPA. As discussed in the NPRM, the proposed definition of *agent* is meant to encompass those entities that act on behalf of employers that utilize the ES clearance system, including, for example, by controlling aspects of employers' recruitment activities relating to clearance orders. The inquiry of whether an entity is engaged in activities that bring them within the definition of farm labor contractor under the MSPA is fact-specific and must be addressed on a case-by-case basis under that law and its implementing regulations.

Finally, the Department disagrees with USAFL and Hall Global's concern that the proposed definition conflates the roles of attorneys and agents and may impede on an attorney's duty to provide zealous representation to their clients. An attorney who engages the ES system on behalf of an employer must do so in conformance with the requirements of the ES regulations and must advise their employer-client to use the ES system in conformance with the regulations. Zealous representation within the bounds of law is a fundamental component of the attorney-client relationship, which the Department presumes includes advising clients on compliance with all applicable laws and regulations. By including agents here, the Department does not intend to hold agents, including attorneys, accountable for the acts of the employers they represent. Rather, the inclusion of the definition of agent, and the inclusion of attorneys in that definition, recognizes that attorneys can and do serve as agents in interactions with the ES system, and is meant to hold them accountable for compliance and their own misconduct that meets the bases described at § 658.501, independent of any violation by the employers they represent (87 FR 61660, 61662 (Nov. 14, 2022)). The Department reiterates that agents who engage the ES clearance system should be subject to discontinuation, if appropriate, and that inclusion of attorneys is necessary to align the definition of agent here with the definition of agent in § 655.103. For these reasons and the reasons set forth in the NPRM, the Department adopts the definition for *agent,* as proposed.

2. Criteria and Non-Criteria Clearance Orders

The Department proposed to add definitions to § 651.10 for *criteria clearance order* and *non-criteria clearance order* because they are terms that are used in the ES regulations but were previously undefined. The Department proposed that the term *criteria clearance order* means a clearance order that is attached to an application for foreign temporary agricultural workers pursuant to part 655, subpart B, of this chapter; and the term *non-criteria clearance order* means a clearance order that is not attached to an application for foreign temporary agricultural workers pursuant to part 655, subpart B, of this chapter. By defining these terms, it will be clearer which orders must comply with both the requirements at part 653, subpart F, and part 655, subpart B, and which orders do not have to comply with the requirements at part 655, subpart B.

The Department received a comment from Farmworker Justice in support of the proposed definitions. Farmworker Justice agreed that clarification is needed regarding which provisions in part 653, subpart F, and part 655, subpart B, apply to the various agricultural clearance orders filed with the Department and with the SWAs. They suggested that the Department use this rulemaking to further clarify and unequivocally state that the normal and accepted standard articulated in § 655.122(b) applies only to job qualifications in criteria clearance orders, and that all other working conditions be assessed under prevailing practices as articulated in § 653.501(c)(2)(i). Farmworker Justice stated that U.S. workers have seen their working conditions consistently eroded in recent years because SWAs have evaluated the working conditions set out in criteria clearance orders under the normal and accepted standard in § 655.122(b) rather than the more rigorous prevailing practice standard required under § 653.501(c)(2)(i). Additionally, másLabor stated that it had no substantive objections to the proposed definitions.

The Department appreciates these comments. The Department believes the

definition for *criteria clearance order* makes clear that such orders must comply with the requirements at part 655, subpart B (which in § 655.121 include the requirements at part 653, subpart F and at § 655.122). Moreover, the definition for *non-criteria clearance order* makes clear that such orders do not have to comply with the requirements at part 655, subpart B. The Department believes these definitions sufficiently distinguish between criteria and non-criteria clearance orders. For these reasons and the reasons set forth in the NPRM, the Department adopts the definitions, as proposed.

As to the request for clarification regarding application of the normal and accepted standard in § 655.122(b) and the prevailing practices standard in § 653.501(c)(2)(i) to criteria clearance orders, this request is beyond the scope of these changes, which are merely to adopt definitions for terms currently in use in the ES regulations, found at parts 651, 652, 653, 654, and 658. For information on the normal and accepted standard and the prevailing practices standard as they apply to criteria clearance orders, see, for example, §§ 655.103 and 655.122, the discussion of § 655.122(l)(3) below, and *Segura Portugal* v. *Louisiana Workforce Commission,* OALJ No. 2022–WPA–00001 (OALJ Dec. 5, 2023) (holding that work rules in employer's criteria clearance order were not included within the meaning of prevailing working conditions under § 653.501(c)(2)(i)); see also ETA Handbook 398 (53 FR 22076, 22095–22097 (June 13, 1988)).

3. Discontinuation of Services

The Department proposed to add to § 651.10 a definition for *discontinuation of services* because it is referenced throughout the ES regulations and is the subject of part 658, subpart F, but was previously undefined. Under the proposed *discontinuation of services* definition, the scope of services to which discontinuation applies includes any Wagner-Peyser Act ES service provided by the ES to employers pursuant to parts 652 and 653, and the scope of individuals and entities to whom discontinuation applies includes *employers,* as defined in part 651, and *agents, farm labor contractors, joint employers,* and *successors in interest,* as proposed to be defined in part 651.

The Department received supportive and opposing comments to the proposed definition. Farmworker Justice supported the proposed definition, stating that it would provide clarity to both SWAs and employers regarding which services are discontinued, and which entities may be subject to the discontinuation of services described in 658, subpart F. Specifically, Farmworker Justice stated that the definition is broad in scope, which is crucial for SWAs to take meaningful enforcement action against entities that act or have acted on behalf of problem employers, or are simply a reconstitution of a prior bad actor under a new name. Farmworker Justice also stated that the proposed definition would clarify that discontinuation of services impacts all ES services in parts 652 and 653, including ES services in another State, thereby preventing bad actors from continuing to receive services, absent reinstatement, elsewhere or for non-criteria orders. Farmworker Justice recommended that the Department consider adding language to the definition to clarify that SWAs cannot process H–2A applications for employers whose services are discontinued.

MásLabor stated they had no substantive objection to the proposed definition of discontinuation of services. However, USAFL and Hall Global stated that discontinuation of services should only apply to services not necessary for participation in the H–2A program. Wafla, an agricultural employer membership organization, expressed concerns that the proposed definition would include entities other than the employer. The organization contended that attorneys, agents, associations, joint employers, farm labor contractors, and any other entity that is not the principal employer to H–2A workers and that was not involved with a potential rule violation should not be subject to discontinuation of services. Wafla was also concerned that discontinuation of services to an agent would negatively affect the agent's other employer-clients, stating that if a SWA or DOL finds a problem with an agent, all of that agent's H–2 clients may be debarred from the program. Separately, the National Cotton Ginners Association and Texas Cotton Ginners' Association commented that though an employer may use an agent for recruitment services with the contracted stipulations that the agent/recruiter must follow all applicable labor rules, the employer has no ability to verify actions taken by these agents. They stated that the proposed rule allows SWAs to discontinue services to an employer due to potential violations that may be outside of the employer's control.

The Department agrees that broadening the scope of entities subject to discontinuation is crucial to ensuring meaningful application of the discontinuation of services provisions at part 658, subpart F. However, the Department clarifies that the proposed changes are meant to hold agents, farm labor contractors, joint employers, and successors in interest accountable for their own compliance with ES regulations. They are not meant to hold entities such as agents, attorneys, or farm labor contractors accountable for the independent actions of the employers they represent. SWAs should not initiate a discontinuation action against an entity that has not met one or more of the bases for discontinuation under § 658.501(a). For example, if an employer is subject to discontinuation of services because it refused to cooperate in field checks conducted pursuant to § 653.503, as described at § 658.501(a)(7), but the employer's agent was not involved in the refusal, the SWA may not initiate or apply discontinuation of services to the agent. Conversely, if an agent is subject to discontinuation of services because it was found by a final determination by an appropriate enforcement agency to have violated an employment-related law and notification of this final determination has been provided to the Department or the SWA by that enforcement agency, as described at § 658.501(a)(4), but the enforcement agency did not also find that the employer engaged in violations, then the SWA would not have a basis to discontinue services to the employer under § 658.501(a)(4). However, it is possible that there may be cases where it is appropriate and necessary to discontinue services to an employer and its agent. For example, if an agent and employer both knowingly misrepresent the number of workers needed for a clearance order or both knowingly cause workers to work at locations or to complete duties that are not described on the approved clearance order, it would be appropriate to initiate discontinuation against the employer as well as the agent. The proposed definition allows SWAs to take appropriate action against noncompliant entities while allowing those entities who are not responsible for the action or behavior giving rise to the discontinuation action to continue receiving ES services; and the ability of the SWAs to pursue discontinuation against multiple types of entities aligns with the scope of entities subject to the debarment procedures in part 655, subpart B. The Department also notes that there may be cases where it is appropriate and necessary to discontinue services to more than one entity regarding the same or similar violation (for example, to the employer,

agent, farm labor contractor, joint employer, or successor in interest). Finally, the Department notes that a SWA's initiation of the discontinuation procedures against entities such as agents/attorneys would not necessarily impact the processing and clearance of an employer's pending job order, as in most cases the SWA will continue to provide services until the discontinuation action becomes final, including the disposition of any appeals filed by such agents/attorneys.

As to the commenter recommendation that discontinuation of services should only apply to services not necessary for participation in the H–2A program, the Department disagrees. Discontinuation has historically applied to ES services available under part 653, which includes access to the ARS. Prospective H–2A employers must use the ARS to recruit U.S. workers as a condition of receiving a temporary agricultural labor certification, and the H–2A regulations provide that employers and entities who file applications for temporary agricultural labor certification under 20 CFR part 655, subpart B must comply with the ARS requirements at part 653, subpart F. *See, e.g.,* § 655.121 and §§ 655.131–132. The Department, therefore, declines to adopt the recommendation.

Relatedly, the Department has considered the recommendation to add clarifying language that SWAs cannot process H–2A applications for employers with discontinued services. The Department declines to do so because it believes that the definition already includes effective language explaining that entities with discontinued services cannot participate in or receive any Wagner-Peyser Act ES services provided by the ES to employers pursuant to parts 652 and 653. Therefore, SWAs must reject both criteria and non-criteria job orders submitted by employers with discontinued services for either local recruitment or intrastate clearance, which would therefore preclude such employers from participating in the H–2A program.

The Department believes that the proposed changes will allow SWAs to better protect workers and that the regulations are sufficiently clear that discontinuation of services must only be applied to entities that meet the bases described at part 658, subpart F. Therefore, the Department adopts the definition for *discontinuation of services,* as proposed.

4. Employment-Related Laws

The Department proposed to revise the definition of *employment-related laws* to clarify that the term means those laws and implementing regulations that relate to the employment relationship, such as those enforced by the Department's WHD, Occupational Safety and Health Administration (OSHA), or by other Federal, State, or local agencies. The pre-existing definition of this term did not include implementing regulations. Revising the definition clarifies its meaning and scope for ES staff who observe or process complaints relating to violations of employment-related laws, such as outreach workers, complaint system representatives, and those who conduct field checks.

The Department received supportive comments from the Washington State Employment Security Department and Washington State Department of Labor and Industries (Washington State) and Farmworker Justice. Washington State agreed that the new definition clarifies the meaning and scope of employment-related laws for SWA staff. Farmworker Justice stated that the proposed revision would help ES staff and characterized it as a common-sense clarification, not an actual change, to the scope of violations that require ES staff to proceed with discontinuation. Farmworker Justice further stated that a broad reading of the laws covered and agencies involved is necessary to accomplish meaningful enforcement, and that farmworker protections would be gutted if the associated implementing regulations were not also enforced.

MásLabor stated it had no substantive objection to the proposed definition of employment-related laws. USAFL and Hall Global stated that the Department should clarify that employment-related laws apply only when their jurisdictional requirements and any other substantive limitations prescribed by statute or common law have been met. They also stated that the Department should clarify that the agency with primary jurisdiction over the relevant laws and implementing regulations retains primary jurisdiction. They expressed concern that SWAs might misinterpret laws or implementing regulations and sought clarification that the agency with jurisdiction over the implementing regulations would be the authority on how to apply those regulations, not the SWA.

The Department appreciates the comments and agrees that the proposed definition provides needed clarity for SWAs and meaningfully improves worker protections. The Department notes that while SWAs may assess an entity's compliance with employment-related laws in carrying out its obligations under the ES regulations, for example by reviewing clearance orders to ensure their terms and conditions comply with employment-related laws, or by observing and referring apparent violations of employment-related laws to an appropriate enforcement agency, SWAs are not enforcement agents for employment-related laws (unless otherwise authorized). *See* 81 FR 56072, 56282 (Aug. 19, 2016). If the employment-related law at issue is not clear or otherwise does not allow the SWA to determine if there is a violation of the law, the SWA must consult with the relevant enforcement agency to ensure a consistent interpretation. The Department, therefore, agrees that the agency with jurisdiction over the applicable laws and implementing regulations would retain jurisdiction and be the final authority on how to apply those regulations, not the SWA. Regarding commenter concern that SWAs might misinterpret laws or implementing regulations, the Department notes that the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, at 2 CFR 200.303(a) and (b), broadly require SWAs to comply with Federal statutes, regulations, and the terms and conditions of their Federal award, and require that each SWA establish and maintain effective internal controls over its ES program, including controls that provide reasonable assurance that the SWA is managing the ES program in compliance with Federal statutes, regulations, and the terms and conditions of the applicable Federal award. Therefore, SWAs must have internal controls (for example policies and procedures) to ensure that their assessments and determinations regarding an entity's compliance with employment-related laws are correct, and if not the Department can take corrective action. For these reasons, the Department finalizes the definition of *employment-related laws* with the two changes discussed below.

Finally, to provide increased clarity, the Department is including in the final definition the terms ''rules'' and ''standards'' to make clear that employment-related laws include not only ''regulations,'' but also any other administrative requirement carrying the force of law, that relates to the employment relationship. For example, the Occupational Safety and Health Act of 1970 authorizes OSHA to promulgate occupational safety and health standards pursuant to the requirements of sec. 6 of the Act, 29 U.S.C. 655. These standards, which relate to the

employment relationship and are enforced by OSHA, are properly within the scope of employment-related laws. The Department is including this additional language in the definition to minimize any risk of confusion that could be caused by the use of ''regulations'' alone and to clarify rather than expand the scope of this definition.

5. Farm Labor Contractor

The Department proposed to add to § 651.10 a definition for *farm labor contractor* as any person or entity, excluding agricultural employers, agricultural associations, or employees of agricultural employers or agricultural associations, who, for any money or other valuable consideration paid or promised to be paid, recruits, solicits, hires, employs, furnishes, or transports any MSFW. The Department proposed to add this definition because the term is used throughout the ES regulations, most notably in part 653, subpart F, which recognizes that farm labor contractors use the ES clearance system, but it has never been defined. Adding this proposed definition also clarifies the entities subject to discontinuation of services as a result of the proposed changes to part 658, subpart F. As with the term *agent,* because many farm labor contractors that use the ES clearance system also seek temporary agricultural labor certifications from OFLC as H–2ALCs under part 655, subpart B, the Department proposed a definition of *farm labor contractor* that both aligns with the definition of *H–2A labor contractor* at 20 CFR 655.103 and with the definitions under MSPA of *farm labor contractor* and *farm labor contracting activity* at 29 U.S.C. 1802 and 29 CFR 500.20 to maintain consistency between Departmental program areas.

MásLabor stated that it had no substantive objections to the proposed definition. Farmworker Justice expressed concern that because the proposed definition is drawn from the definitions of *farm labor contractor* and *farm labor contracting activity* under MSPA, and MSPA does not include H–2A workers in its definition for *MSFWs* at 29 U.S.C. 1802(7), ES staff may mistakenly assume that H–2A workers would be excluded from the NPRM's definition of farm labor contractor due to its reference to MSFWs. Farmworker Justice stated that this is problematic because farm labor contractors who employ or furnish exclusively H–2A workers should also be subject to discontinuation under part 658 in appropriate circumstances. Farmworker Justice suggested that the Department clarify that the *MSFW* definition at § 651.10, which does not specifically exclude H–2A workers, is the applicable reference in the new *farm labor contractor* definition. Farmworker Justice stated that this would be consistent with longstanding Departmental interpretation that has included foreign workers legally authorized to work in the United States in the Wagner-Peyser Act definition of migrant farmworkers.

The Department clarifies that the reference to MSFWs in its proposed definition means *MSFW* as defined in § 651.10, and that definition does not exclude H–2A workers. Under § 651.10, the term *farmworker,* as it appears in the term *MSFW* (migrant or seasonal farmworker), means an individual employed in *farmwork;* and under § 651.10, the term *farmwork* is defined to also include any service or activity covered under the definition of *agricultural labor or services* at § 655.103(c).The Department notes that it added the terms *farmwork* and *farmworker* to § 651.10 in 2016 to align them with OFLC and WHD definitions and to clarify and expand the types of work covered. *See* 80 FR 20690, 20800 (Apr. 16, 2015). The term *farmworker at* § 651.10 replaced the prior term *agricultural worker,* which the Department defined in 1980 to include certain farmworkers, whether citizens or not, who were legally allowed to work in the United States. *See* 45 FR 39454, 39457 (June 10, 1980). The Department did not include this work authorization language in its 2016 *farmworker* definition—not to make any substantive change—but to align the definition with other programs, and because it determined it unnecessary to mention immigration status for only a subset of programs. *See* 81 FR 56072, 56256 (Aug. 19, 2016). Accordingly, given the Department's longstanding interpretation, the term *MSFW* under § 651.10 does not exclude H–2A workers, and the proposed *farm labor contractor* definition here encompasses those contractors who interact with the ES clearance system for purposes of the H–2A program. The Department further notes that even where farm labor contractors only employ or furnish H–2A workers, they must first engage the ARS for recruitment of U.S. workers as a condition of receiving a temporary agricultural labor certification. Because entities who engage the ES system for temporary agricultural labor certification purposes are subject to ARS requirements (*see* § 655.121), the Department believes they should be subject to discontinuation of ES services (including the ARS), if applicable. For these reasons, the Department adopts the definition for *farm labor contractor,* as proposed.

6. Joint Employer

The Department recognizes that joint employment relationships are common in agriculture, and that joint employers who submit clearance orders to the ARS are required to comply with the requirements in part 653, subpart F, including when filing a joint application for temporary agricultural labor certification under 20 CFR part 655, subpart B. *See* § 655.131. The Department, therefore, proposed to add a definition for *joint employer* to § 651.10 to clarify how the concept will be applied in the ES system and to clarify the entities subject to discontinuation of services as a result of the proposed changes to part 658, subpart F. The proposed definition is also intended to ensure consistency with recent changes to the Department's H–2A regulation, *see* 87 FR at 61793–61794, and as with the definitions of *agent* and *farm labor contractor,* the proposed definition is modeled on the definition of joint employment at § 655.103 because of the connection between the ES system and H–2A labor certification program.

Farmworker Justice supported inclusion of the joint employer definition, stating that the proposed definition makes clear that, when a fixed-site employer or H–2ALC unlawfully permits another, non-petitioning employer not listed on the clearance order to employ an H–2A worker, or otherwise permits an H–2A worker to provide services to such a non-petitioning employer, both the petitioning employer and the non-petitioning employer jointly employ the worker. MásLabor also stated that it had no substantive objections to the proposed definition.

The Department appreciates commenter support and adopts the definition for *joint employer,* as proposed.

7. Successor in Interest

The Department proposed to add to § 651.10 a definition for *successor in interest* that describes the inexhaustive factors that SWAs should use to determine if an entity is a successor in interest to another entity, and described successors in interest as any entity that is controlling and carrying on the business of a previous employer, agent, or farm labor contractor, regardless of whether such successor in interest has succeeded to all the rights and liabilities of the predecessor entity. The proposed definition allows SWAs and

stakeholders to better understand which entities may be subject to discontinuation as a result of the proposed changes to part 658, subpart F. To maintain consistency between the regulations governing the ES system and the regulations governing the H–2A labor certification program, the Department proposed to adapt the definition of successor in interest as proposed in § 655.104.

Washington State supported the proposed definition, stating that it will better position the SWA to identify such entities and determine if an entity so identified is subject to prior debarment orders when evaluating criteria clearance orders (Form ETA–790/790A). Farmworker Justice also agreed with inclusion of the definition and suggested that the Department devote resources to training SWAs on how to analyze the successor in interest factors to ensure that employers who have had services discontinued are not evading sanction with a simple rebrand. The Farm Labor Organizing Committee of the AFL–CIO (FLOC) endorsed the definition, stating that the proposed changes in § 651.10 and § 655.104 clarify the consequences to H–2A employers and labor contractors who try to avoid their responsibilities for violations of the law by transferring their operations to a new person or entity (usually an associate or family member), while all the time retaining control. In instances where farm labor contractors propose to furnish H–2A labor to farms as a replacement for farm labor contractors that have since been sanctioned or debarred or both, FLOC suggested that there be a presumption that the new farm labor contractor is a successor in interest of the discontinued predecessor; and the prospective new farm labor contractor should be required to prove that they are simply using the equipment and machinery of the previous labor contractor.

MásLabor, McCorkle Nurseries, Inc., and an individual asked that the Department reconsider the scope of the definition, particularly the language that allows for construing entities as successors in interest regardless of whether they have succeeded to all the rights and liabilities of the predecessor entity. MásLabor further explained that this language may prove problematic as it relates to asset purchase arrangements. Specifically, because an acquiring entity may be construed as a successor in interest regardless of whether it has succeeded to the rights and liabilities of the predecessor, and because the factors used to determine successorship include factors relating to the physical assets or core operations of the business itself (for example, use of the same facilities, similarity in machinery, equipment, and production methods, and similarity of products and services), másLabor stated that the proposed definition opens the door for asset purchases alone to trigger successor in interest obligations and liability. MásLabor provided an example, where Farm A is debarred from the H–2A program and subsequently sells its farming property and all the fixtures, buildings, and equipment on its premises to Farm B. MásLabor said it is conceivable that Farm B will be considered a successor in interest to Farm A simply by virtue of taking over the farming operation at the acquired property, and that this would be the case even if Farm B is a model employer that had nothing to do with Farm A's violations. MásLabor stated this possibility would discourage potential acquisitions by good, compliant employers.

The Department appreciates commenter support for the *successor in interest* definition. The Department agrees that the new definition will help SWAs identify entities that reincorporate themselves into another entity with the same interests or operations so as to avoid discontinuation of ES services. Additionally, the Department agrees with providing SWAs training on how to analyze the successor in interest factors so as to avoid a scenario where the sale of property, fixtures, and equipment alone triggers joint employment concerns. The Department will issue further guidance on application of the new *successor in interest* definition. The Department declines to adopt any presumption that a new farm labor contractor or entity is a successor in interest of a discontinued predecessor. Successor in interest inquiries are factor driven and case specific, and the Department believes that the factors outlined in the new definition are sufficient to guide the inquiry. The discussion of the parallel provisions on successors in interest at § 655.104 further address commenters' concerns and provides additional explanation of the Department's reasons for adopting these factors, as well as the language on successor liability addressed below.

The Department has decided to relocate some of the proposed language in the definition describing the scope of liability of successors in interest for ES violations of predecessor entities, from § 651.10 to § 658.500. Relocating this language places the focus of the definition squarely on the factors that SWAs will consider in order to determine whether an entity constitutes a successor in interest. The Department believes that the language on the liability of successors is more appropriate to include in part 658, subpart F, which similarly describes the situations in which entities are subject to discontinuation actions by SWAs. The discussion of § 658.500 below addresses the comments received on this language, as well as the Department's decision not to finalize the proposed introductory language of the *successor in interest* definition (''A successor in interest includes any entity that is controlling and carrying on the business of a previous employer, agent, or farm labor contractor . . .''). The Department adopts the remaining language in the *successor in interest* definition, as proposed.

8. Week

The Department proposed to add to § 651.10 a definition for *week* to clarify that a week, as used in parts 652, 653, 654, and 658, means 7 consecutive calendar days. The proposed definition allows for SWAs and employers to calculate time periods used in the ES regulations uniformly, including for wage calculations and other time-related procedures.

MásLabor commented that they had no substantive objections to the proposed definition. The Department did not receive any other comments on this proposed change.

The Department appreciates the comment indicating that the H–2A employer agent organization did not object to the proposed definition. The Department adopts the definition of *week,* as proposed.

C. 20 CFR Part 653—Services of the Wagner-Peyser Act Employment Service System

Part 653 sets forth the principal regulations of the ES concerning the provision of services for MSFWs consistent with the requirement that all services of the workforce development system be available to all job seekers in an equitable fashion and in a way ''that meets their unique needs.'' 20 CFR 653.100(a). Part 653 also describes requirements for participation in the ARS. Subpart F provides the requirements that SWAs and employers must follow when employers seek access to the ARS by submitting clearance orders for temporary or seasonal farmwork. Section 653.501 provides the responsibilities of ES Offices and SWAs when they review clearance orders submitted by employers, and the process by which

they place approved clearance orders into intra- and interstate clearance.

1. Section 653.501(b), ES Office Responsibilities

The Department proposed to add a fourth paragraph to § 653.501(b), at § 653.501(b)(4), which would require ES staff to consult the OFLC and WHD H–2A and H–2B debarment lists, and an OWI discontinuation of services list, before placing a job order into intrastate or interstate clearance. The Department further proposed a new paragraph (b)(4)(i), which states that SWAs must initiate discontinuation of ES services if the employer seeking placement of a clearance order is on a debarment list, and new paragraph (b)(4)(ii), which states that SWAs must not approve clearance orders from employers whose ES services have been discontinued by any State. Finally, the Department proposed a new paragraph (b)(4)(iii) to make clear that the provisions in paragraph (b)(4) apply to all entities subject to discontinuation under part 658, subpart F, and not just to *employers* as defined in § 651.10. The Department's response to public comments received on § 653.501(b) is set forth below. For the reasons discussed in the NPRM and below, the Department adopts § 653.501(b), with edits.

Several organizations, including United Farm Workers (UFW) (joined by 59 signatories, including advocacy organizations and legal services providers), the UFW Foundation and UFW (hereinafter, the UFW Foundation), the North Carolina Justice Center, United Migrant Opportunity Service (UMOS), Pineros y Campesinos Unidos del Noroeste (PCUN), Central Coast Alliance United for a Sustainable Economy (CAUSE), and Green America expressed uniform support for requiring initiation of discontinuation procedures where an employer is on an H–2A or H–2B debarment list and for prohibiting clearance orders from employers who have been discontinued in another State. In contrast, several trade associations, including the Western Growers Trade Association, wafla, AmericanHort, Michigan Farm Bureau, Florida Strawberry Growers Association (FSGA), National Council of Farmer Cooperatives (NCFC), and the U.S. Apple Association (USApple), along with Willoway Plant Nursery, opposed or expressed concerns regarding the proposed changes, stating that they do not provide sufficient safeguards or an appeal process, particularly where a SWA mistakes one employer for another when consulting the debarment and discontinuation lists. These commenters cautioned that even minor delays in processing a clearance order could result in irreparable harm to an employer, such as diminished crop yield and monetary loss. In circumstances where a SWA does not process a clearance order for an employer because that employer has the same or similar business name as another employer on the debarment or discontinuation lists, commenters stated that the Department must have safeguards in place for employers to demonstrate that they are not, in fact, the employer named on the lists.

Relatedly, Washington State requested that the Department ensure that the debarment and discontinuation lists are accurate, updated, and easily accessible. Washington State suggested that OFLC add an eligibility checker tool to its Foreign Labor Application Gateway system where employer names are searchable, the debarment and discontinuation lists are updated automatically, and the system alerts SWAs if employers are potentially ineligible due to debarment. They further suggested that the Department create a standard letter notifying applicants of the impact of debarment and making clear that SWAs are bound to deny clearance orders on this basis.

Finally, wafla opposed proposed new paragraph (b)(4)(iii), which clarifies that proposed § 653.501(b) applies to all entities subject to discontinuation, including agents, farm labor contractors, joint employers, and successors in interest as adopted in § 651.10 and § 658.500(b), and not just employers. Wafla stated that only principals should be subject to discontinuation, that moving beyond the employer-employee relationship penalizes third parties that may have had no fault in causing discontinuation, and that unrelated clients of third parties may unjustifiably experience the effects of discontinuation as a result.

The Department appreciates the views and recommendations of commenters that supported, opposed, and raised concerns with the proposed changes to § 653.501(b). Regarding commenter requests for adequate safeguards to ensure against SWAs mistaking one employer for another when consulting the debarment and discontinuation lists, the Department will issue guidance on SWA consultation of the lists, including guidance on identifying employers/entities and *successors in interest* to employers/entities who are on the lists. Regarding the due process concerns raised by commenters, as discussed below, the Department believes that the clearance order review processes at § 653.501 and § 655.121, the discontinuation of services procedures at part 658, subpart F, and the procedures for filing a complaint at part 658, subpart E, provide adequate process and safeguard against unwarranted or harmful delays in processing clearance orders.

First, under proposed paragraph (b)(4)(i), a SWA must initiate discontinuation of ES services pursuant to § 658.501(a)(4) if an employer seeking placement of a clearance order in the ARS is on the H–2A or H–2B debarment list. The employer may contest the SWA's notification of intent to discontinue services in accordance with proposed § 658.502(a)(4). In the specific circumstance raised by some commenters (*e.g.,* Michigan Farm Bureau, FSGA, AmericanHort), where an employer with the same or similar name incorrectly appears on a debarment list, the employer may contest the proposed discontinuation by submitting evidence that they are not, in fact, the employer listed on the applicable debarment list. During this time, the SWA must continue to process the employer's clearance orders, without delay, as no final determination on discontinuation has yet been issued and taken effect. Where the SWA ultimately issues a final determination to discontinue services under proposed § 658.503(a), if an employer appeals by timely requesting a hearing, the request stays the discontinuation pending the outcome of the hearing. The SWA must continue to process the employer's clearance orders, without delay, while the matter is on appeal.

Second, under paragraph (b)(4)(ii), SWAs must not approve clearance orders from employers whose ES services have been discontinued by any State. In the specific circumstance raised by commenters, where an employer believes they have been incorrectly identified as having been placed on the discontinuation of services list, the employer and the SWA may resolve any such discrepancy in the clearance order review processes described in § 655.121 (for criteria clearance orders) and § 653.501 (for non-criteria clearance orders). For criteria clearance orders, that process includes initial review, a deficiency notice, where applicable, an opportunity for an employer to respond, a final determination from the SWA, and allowance for employers to file an emergency Application for Temporary Employment Certification where they disagree with the SWA's final determination (*see* §§ 655.160, 655.164, and 655.171). For non-criteria clearance orders, under § 653.501, SWAs must review and approve clearance orders

within 10 business days of receipt of the order. Within that timeframe, SWAs should attempt to resolve any discrepancy regarding an employer's placement on the discontinuation of services list. For example, where Employer A Corp. files a non-criteria clearance order and a similarly named employer (*e.g.,* Employer A. Inc.) is on the discontinuation of services list, the SWA should review and consider relevant information, such as Federal Employer Identification Numbers (FEINs), Employer A, Inc.'s final determination on discontinuation, or any information provided by Employer A. Corp. indicating that they are not the named employer on the list, prior to approving or denying the clearance order. Where the SWA denies a non-criteria clearance order under § 653.501 because the employer is named on the discontinuation of services list, the employer may timely appeal the discontinuation or seek reinstatement of services under § 658.504. As discussed above, the Department will issue guidance on use of the discontinuation of services list when processing clearance orders.

The OWI discontinuation of services list will be publicly available online and regularly updated with information from States so employers can check the list before they submit their clearance order. In addition, the Department will further revise § 653.501(b)(4)(ii) to specify that employers may submit requests to the OWI Administrator to determine whether they are on the OWI discontinuation of services list. If the OWI Administrator indicates that the employer is not on the discontinuation of services list, then the SWA must approve the clearance order if all other requirements have been met.

Finally, as to consultation of either the debarment lists under proposed paragraph (b)(4)(i) or the discontinuation list under proposed paragraph (b)(4)(ii), the Department notes that where an employer believes a SWA has violated proposed paragraph (b)(4) when consulting the lists, the employer may file a complaint against the SWA under part 658, subpart E. Complaints against SWAs regarding ES regulations are processed pursuant to § 658.411(d). In sum, in all instances of consultation of the debarment and discontinuation lists, the Department believes that its clearance order review processes at § 653.501 and § 655.121, and its procedures at part 658, subparts E and F, provide sufficient safeguards against unwarranted and harmful delays in processing clearance orders, even where an employer believes they have been incorrectly placed, or incorrectly identified as having been placed, on the lists.

Regarding Washington State's request that the Department ensure that debarment and discontinuation lists are accurate, updated, and easily accessible, the Department appreciates the request and suggested methods for doing so. The Department notes that it has proposed a 10-working-day requirement in § 658.503 and § 658.504 for SWAs to notify OWI of any final, effective determination to discontinue ES services, and any determination to reinstate services. As discussed in the NPRM, the Department believes that these requirements will help facilitate prompt implementation and maintenance of the discontinuation of services list, and prompt access to ES services for employers who have been reinstated. The Department will issue guidance on maintenance and use of the discontinuation list. The Department updates the debarment list promptly upon finalizing debarment of an employer from the H–2A program. An up-to-date debarment list is publicly available on the OFLC website.

The Department appreciates Washington State's suggestion that the Department create a standard letter notifying applicants of the impact of debarment and making clear that SWAs are bound to deny clearance orders on this basis. Depending on the violation at issue, debarment is undertaken by either OFLC or WHD, and the relevant debarring agency is responsible for communicating the consequences of such action to the entity it seeks to debar and will review its communication as it implements this final rule. The Department reiterates that under proposed § 501(b)(4)(ii), SWAs are not bound to deny clearance orders to employers who are debarred. Rather, SWAs are required to initiate discontinuation of services to employers who are on the Department's debarment lists. Only where the discontinuation of services has been finalized must the SWA deny an employer's clearance order.

Finally, regarding wafla's opposition to proposed new paragraph (b)(4)(iii), the Department disagrees that discontinuation should apply only to principals. As explained more fully below in Section V.D, to better protect workers, the Department believes that all entities who engage in the ES clearance system, including agents, farm labor contractors, joint employers, and successors in interest, should be subject to possible discontinuation. Moreover, in clarifying and expanding the entities subject to discontinuation, the Department is aligning the ES regulations with existing H–2A regulations at part 655, subpart B, which already permit debarment of agents, farm labor contractors, joint employers, and successors in interest. Regarding wafla's concern about the possible effects of discontinuation on third parties and their clients, the Department believes any such effects are the same or similar as the effects of debarment on the same third parties in the existing H–2A context, and the Department did not receive comments and is not otherwise aware that there have been any unjustifiable effects to these entities under the debarment process.

2. Section 653.501(c), SWA Responsibilities

Section 653.501(c)(3) lists the assurances that each clearance order must include before the SWA can place it into clearance. The Department proposed to revise § 653.501(c) to require that, in the event the employer's date of need changes from the date the employer indicated on the clearance order, the employer must notify the SWA and all workers placed on the clearance order of the change at least 10 business days before the original start date. The Department further proposed that employers that fail to comply with these notice requirements must provide housing and subsistence to all workers placed on the clearance order who are already traveling to the place of employment, without cost to the workers, until work commences, and must pay all workers placed on the clearance order the applicable wages for each day work is delayed for a period of up to 2 weeks, starting with the originally anticipated date of need. The proposed revisions are meant to improve notification requirements and wage protections for workers, as well as align with current § 655.145(b) and proposed § 655.175 protections in the H–2A program regulations. To accomplish these changes, the Department proposed several specific revisions, which are discussed in detail below.

First, the Department proposed to revise § 653.501(c)(3)(i) to remove the requirement that the SWA must make a record of the notification and attempt to inform referred workers of the change in the date of need. The current language improperly incorporates a SWA requirement into the employer assurances and, as discussed below, the Department proposed to shift these responsibilities to the employer. The Department also proposed to move language in paragraph (c)(3)(i) regarding the employer's notice to the order-holding office to § 653.501(c)(3)(iv),

which contains other instructions the employer must follow when giving notice of changed terms and conditions of employment. The Department did not receive comments on these specific changes and adopts them, as proposed, with additional changes (the substitution of ''placed'' for ''referred'' and ''14 calendar days'' for ''week'') to conform to the other provisions of § 653.501(c) discussed below.

Second, the Department proposed to remove a redundancy in the first sentence of paragraph (c)(3)(iv), which currently states that the employer must expeditiously notify the order-holding office or SWA immediately. Because immediate notice is expeditious, the use of the word expeditiously is not necessary. The Department did not receive comments on this change and adopts it, as proposed.

Third, in paragraph (c)(3)(iv), the Department proposed that the assurance on the clearance order require that when there is a change to the start date of need, the employer, rather than the order-holding office or SWA, notify the office or SWA and each worker placed on the order. The Department further proposed that notification be in writing (email and other forms of electronic written notification are acceptable) at least 10 business days prior to the original date of need, and that the employer must maintain records of the notification and the date notification was provided to the order-holding office or SWA and workers for 3 years. In paragraph (c)(5), the Department similarly proposed to specify that the employer must notify the office or SWA and each worker placed on the order, to align this paragraph with paragraph (c)(3)(iv).

Wafla, Farmworker Justice, and Washington State supported shifting the notification requirement from the SWA to the employer. Wafla stated that given the variability of crops, crop maturation, weather, work schedules, or over-recruitment in agriculture, the employer knows the conditions on the ground and is capable and should be empowered to make this decision and provide the proposed notification. Farmworker Justice described it as a common-sense change where the employer, who has been in prior contact with the workers, either directly or through agents, is much more likely than the SWA to have the most current and effective contact information; and the employer, rather than the SWA, can more quickly reach workers, when time is critical, by going directly to the workers rather than roundabout through the SWA. Both Farmworker Justice and Washington State stated that the proposed change reduces the burden on SWAs, whose resources, as Farmworker Justice stated, are reportedly already stretched thin. On the other hand, an individual who operates a family farm opposed the employer notification requirement, stating that it would be very difficult and expensive to contact workers individually within 10 days of the start date.

Several commenters raised concerns about employers providing effective notification to workers. MásLabor, whose comments USAFL and Hall Global endorsed, stated that it would be unduly burdensome to require employers to notify workers in writing of a delay at least 10 business days before the original date of need because many U.S. applicants do not provide an email address and employers would need to notify workers by mail, which may not be feasible within 10 business days. MásLabor said the notification requirement creates perverse incentives in that workers who are aware of its limitations may intentionally avoid giving an employer a means for written notice in order to guarantee payment if there is a delay. USAFL and Hall Global additionally cautioned the Department against imposing unnecessary formal notice requirements. They raised concerns with information overload and stated that workers often receive notice and ignore it. They stated that formal notice is not needed where the employer is working with the workers to get them to its workplace, and that any information conveyed in that scenario is a natural part of working together. They requested that the Department look at each formal notice that it demands to make sure it is really justified and necessary.

Farmworker Justice requested that the Department improve the notice requirements, stating that relying on employers to give notices raises concern as to whether meaningful and effective notice will actually be received. Farmworker Justice suggested that the Department require that notice be received, and that employers provide notices in languages spoken by workers. Farmworker Justice also requested employers be required to use the most reliable or speediest form of communication. For example, they suggested, if the employer has a worker's mailing address and phone number, then the employer should be required to send a text message or use a different available phone-based application that the worker may use. Farmworker Justice also noted that the Department did not propose to require employers to contact farm labor contractors or local recruiters if they are not able to contact workers directly to ensure workers get the message.

In response to the másLabor comments, the Department notes that employers may provide written notice to each worker who has been placed on the clearance order using postal mail, email, or other forms of electronic written notification, including by text message. Because employers have a variety of options available to provide the notice, and must use electronic means when the worker provides an email address or their phone number, the Department thinks that it will be a minimally burdensome requirement on employers in the event they are required to provide notice. In response to Farmworker Justice's comments, the Department considered requiring proof that workers have actually received the employer's written notification; however, the Department believes that it will not be possible or practicable for employers to be able to document proof of receipt in all cases. The Department notes that under the proposed changes, employers will be required to maintain records showing that the notification was provided. The Department believes that it is reasonable to expect that most workers will receive written notice sent through either postal mail or electronic written mail or other electronic means before they need to depart for the original date of need. Therefore, the Department is revising paragraphs (c)(3)(iv) and (c)(5) to indicate that employers must send written notification at least 10 business days before the original date of need.

The Department agrees with Farmworker Justice that it is important for employers to provide notifications in languages spoken by workers and is further revising paragraph (c)(3)(iv) to align employer notices with 29 CFR 38.9 language access requirements. The Department made similar changes more broadly to align part 653 with these obligations as part of the Wagner-Peyser Act Staffing Final Rule, 88 FR 82658 (Nov. 24, 2023), which recognized that language access is crucial for individuals with limited English proficiency. The Department reiterates the importance of these non-discrimination obligations and believes that providing notification to workers in accordance with 29 CFR 38.9 is necessary to ensure that workers receive effective notice that apprises them of delays in the start of work. Employers and SWAs may work together as necessary and appropriate to fulfill these obligations. Additionally, the Department is further revising paragraph (c)(3)(iv) to state that if a worker provides electronic contact

information, such as an email address or telephone number, the employer will send notice using one of the electronic contact methods provided. If the employer provides non-written telephonic notice, such as a phone call, voice message, or an equivalent, the employer will also send written notice using the email or postal address provided by the worker at least 10 business days prior to the original date of need.

However, the Department declines to require employers to contact farm labor contractors or local recruiters if they are not able to contact workers directly because it would be difficult to measure when an employer met its responsibilities in notifying workers. Moreover, the purpose of these changes is to streamline communication with workers by requiring direct communication between the employer and worker, and the suggestion to permit third parties to engage in the communication undermines the changes being made in this rule. The Department believes that the adopted changes will increase the likelihood that workers will receive required notices, while making the requirements achievable for employers. The Department also identified that it would help clarify that the notice requirements to which paragraph (c)(5) refers are notices assured in paragraph (c)(3)(iv) of this section.

The Department adopts the notice requirements in paragraphs (c)(3)(iv) and (c)(5) proposed in the NPRM, with further revision to clarify that the employer's written notice must be sent at least 10 business days prior to the original date of need, must be given in languages workers understand, and that the employer must provide electronic notification, if available. The Department has revised paragraph (c)(5) to refer to the assurance in paragraph (c)(3)(iv).

Fourth, in paragraphs (c)(3)(iv) and (c)(5), the Department proposed to require that notification be provided to workers placed on the order rather than eligible workers referred from the order. Relatedly, in paragraph (c)(5), the Department proposed to remove language stating that employers must pay only workers who are eligible pursuant to paragraph (d)(4).

Farmworker Justice supported the proposed change, stating that it reduces the burden on employers by clarifying that only workers who are placed on the order, rather than all workers referred, are covered by the notice requirements. Washington State similarly stated that the proposed change slightly reduces the burden on SWAs by clarifying that neither SWAs nor employers need to notify SWA referrals of delays in start dates.

The Department appreciates commenter support and adopts this change, as proposed.

Fifth, in paragraphs (c)(3)(iv) and (c)(5), the Department proposed that where an employer fails to provide adequate notice of a change to the anticipated start date of need, the employer must provide housing and subsistence to all workers placed on the clearance order who are already traveling to the place of employment, without cost to the workers, until work commences.

The Department received several supportive comments regarding the proposal to require employers to provide housing and subsistence to workers. Wafla, an employer agent organization, agreed that the employer should provide housing and subsistence to all workers already traveling to the place of employment under these conditions. Catholic Charities USA (CCUSA) and the United States Conference of Catholic Bishops (USCCB) (together, CCUSA and USCCB) also agreed, noting that the proposal was designed to ensure workers are not deprived of basic needs because of delays. CCUSA and USCCB further stated that the provision would respect the reliance interests of workers and protect against financial hardships beyond their control. The Alliance to End Human Trafficking commented that the proposed regulation would help people who are otherwise vulnerable to trafficking to obtain the necessary support when disruptions to their employment occur through no fault of their own. CCUSA and USCCB and the Alliance to End Human Trafficking each indicated that the Department should finalize the change, as proposed.

On the other hand, McCorkle Nurseries, Inc. and másLabor expressed concern regarding the housing requirement, stating that it would extend housing obligations to U.S. workers who were otherwise ineligible for employer-provided housing. Additionally, másLabor opposed the subsistence requirement. MásLabor stated that there was a contradiction in requiring subsistence to avoid financial hardship because, under the proposed rule, employers would also be required to pay workers up to 2 weeks of wages. Therefore, workers would be paid as if there were no delay to the start date and financial hardship would not exist. MásLabor stated that because paying wages in this circumstance moots the need for meal subsistence, as workers will have the income to be able to purchase food, the Department should either keep the wage guarantee or keep the subsistence requirement, but not both.

Regarding housing, the Department notes that employers would only be required to provide housing to workers who are eligible for housing under § 653.501(c)(3)(vi), which requires the availability of housing for only those workers, and when applicable, family members, who are not reasonably able to return to their residence in the same day. Because such housing is already required to be available and to meet applicable housing standards prior to the start date of work, the Department does not think that providing housing in the event of a delay in the start date will create a burden or hardship for the employer. To clarify the scope of this requirement, the Department is further revising paragraphs (c)(3)(iv) and (c)(5) to specify that employers must provide the housing *described in the clearance order* to all *migrant* workers placed on the clearance order who are already traveling to the place of employment, without cost to the workers, until work commences.

The Department has considered each comment regarding the proposed subsistence carefully. The Department recognizes the concern raised by másLabor about the burden to employers when the benefit would not be otherwise available if there had been no delay in the start date. In light of this concern, the Department has decided not to finalize the subsistence provision. However, the Department remains concerned about workers being left in a worse position than they would have been had there been no delay. Accordingly, the Department is adding to paragraphs (c)(3)(iv) and (c)(5) that employers that fail to provide the required notice must pay all placed workers for the hours listed on the clearance order *and provide or pay all other benefits and expenses described on the clearance order.* This revision will ensure that workers receive the full monetary and non-monetary benefits they would have received if work had started on time. Therefore, if, for example, the clearance order includes as a benefit some form of payment for or access to food or meals, such as employer-provided lunches, an employer-organized food truck at the property, or simply employer-provided access to a grocer, then the worker would be entitled to those benefits to ensure they are kept whole.

Sixth, in paragraphs (c)(3)(iv) and (c)(5), the Department proposed that where an employer fails to provide adequate notice of a change to the

anticipated date of need, the employer must also pay workers for each day work is delayed up to 2 weeks starting with the originally anticipated date of need or provide alternative work. In paragraph (c)(5), the Department proposed that the employer pay the specified hourly rate of pay on the clearance order, or if the pay listed on the clearance order is a piece-rate, the higher of the Federal or State minimum wage, or if applicable, any prevailing wage. For criteria clearance orders, the employer would be required to pay the rate of pay specified at 20 CFR 655.175(b)(2)(ii). These proposed edits would align the wage requirement in this paragraph with proposed wage requirements in part 655, subpart B, as applicable. The Department also proposed language clarifying that alternative work must be stated on the approved clearance order.

Several organizations submitted supportive comments regarding the proposal to require employers pay up to 2 weeks of wages, when employers do not properly notify workers. The UFW Foundation, UFW, North Carolina Justice Center, UMOS, PCUN, CAUSE, and Green America noted that employers would have to pay such wages if the job started on time and said that the rule proposed a safety net during a particularly vulnerable time, when farmworkers have little or no savings and are awaiting their first paycheck. The UFW Foundation shared stories of multiple farmworkers who experienced delayed start dates, one up to 15 days, which caused the farmworkers to go into debt because their cost of living continued, despite their income being delayed. One farmworker described repeatedly traveling back and forth to the job site each day during a delay, where they were told work was not available that day. The farmworker spent time, energy, and money for gas during the delay. The farmworker further stated that workers return each day only to find they have been replaced, leaving them with no money to pay their mortgages or to purchase groceries. The Agricultural Workers Advocacy Coalition (AWAC) also supported the wage requirement, stating that numerous workers on the Eastern Shore have experienced significant delays in receiving wages at the start of their contracts and have had to go for lengthy periods without enough money to even buy food. Farmworker Justice said the increase to 2 weeks wages was warranted given incoming travel costs and potential economic harm to workers impacted by delay. The Alliance to End Human Trafficking stated that the proposal would help people who are otherwise vulnerable to trafficking to obtain the necessary support when disruptions to their employment occur through no fault of their own. Marylanders for Food and Farmworker Protection stated the proposal promotes accountability, and CCUSA and USCCB stated that the proposed changes are designed to ensure workers are not deprived of basic needs because of delays.

USA Farmers, a national trade association that exclusively represents agricultural employers of H–2A foreign workers, opposed the 2-week wage requirement, calling it unreasonable. USA Farmers proposed that instead of requiring wage payment for up to 2 weeks, the Department instead should align the period of payment to correspond to the number of days the employer was late in providing the notice after the employer knew that start date would change. MásLabor, whose comments USAFL and Hall Global endorsed, and McCorkle Industries, Inc. contended that there are already procedural protections to prevent financial hardship, including the preexisting guarantee of the first week wages as well as existing H–2A employer obligations under the three-fourths guarantee. They described the proposal to extend wages up to 2 weeks as unduly punitive and redundant. MásLabor also stated that the requirement for wage payments to all workers placed on the clearance order extends the wage rate guarantee to H–2A workers, which it described as a drastic expansion of existing requirements. USAFL and Hall Global further stated that the Department did not disclose the reason why any change to the existing regulation was warranted and requested that the Department provide a factual basis for why one week of pay is not sufficient. MásLabor noted that an employer requesting a delay to the start date is itself experiencing hardship and said that the Department must strike an appropriate balance of the equities. MásLabor said that tipping the scales too heavily in favor of the workers by dramatically increasing the costs to employers is not equitable.

Wafla disagreed that an employer should be required to pay workers' wages when they do not meet the 10-business-day notice provision. Wafla said that some delays are due to surprise events, like an unexpected, unforeseeable weather storm or an act of God, and that such events should be considered as valid reasons to delay notification of workers after the 10 business days. The Agricultural Justice Project stated that the wage requirement was fair but noted that this level of detail will make the application process even more daunting for smaller farms while larger business have designated staff or contracted specialists to handle these matters. They stated that honest employers will be penalized here because of the work of other unscrupulous employers who will find new loopholes or workarounds to evade these provisions, particularly where the chance of enforcement is low.

Regarding alternative work, Farmworker Justice said the proposed rule makes clear that alternative work must be in the approved job order, and that this is an important clarification to deter unsafe and uncompensated work. USA Farmers commented that it is not logical to limit alternative work to work described on the clearance order. USA Farmers contended that if the employer is offering work included in the job order, then there would be no need for the employer to delay the start date of work because the alternative work would already be a part of the job order. MásLabor also commented that limiting alternative work to work described on the clearance order makes sense for H–2A workers who cannot perform duties outside the scope of the job order, but not for U.S. workers who are not subject to similar limitations. MásLabor stated that it is unclear why the employer should be restricted to work activities within the scope of the job order for U.S. workers, and why an employer may not count other alternative work if the job duties anticipated are not available. MásLabor contended that if an employer finds such alternative work, the work would also be compensable, and expressed concern that workers might receive double payment.

Regarding the methods for calculating wages, wafla expressed concern that the required wages would need to be hourly, piece rate, or any prevailing wage listed in the job order. Wafla asked how an employer can pay a piece rate to a worker when work has not yet started, and no piece rate has been established. Wafla suggested that the provision require only payment of the hourly rate listed in the job order and nothing more.

The Department agrees that expanding the wage payment requirement in the event of a delay, about which the employer failed to provide required notice, to 2 weeks is necessary for worker protection. As stated in the NPRM, the Department has made a policy decision that one week of wages is insufficient to protect workers from the financial hardships associated with a delayed starting date when such

delays were not communicated, particularly if a worker traveled for the job. Instead of adjusting the number of days wages must be paid to be equal to the number of days the employer's notice was late, as USA Farmers suggested, the Department is finalizing its proposed requirement that the number of days wages must be paid must be equal to the number of days work is delayed, up to 2 weeks. This helps ensure workers receive compensation commensurate with the amount of financial impact they experience due to the delay.

While it may add an additional cost, these requirements are not intended to be punitive to employers. Instead, the wage payment is designed to be protective for workers by ensuring that they are not disadvantaged due to circumstances beyond their control. The Department notes that in lieu of paying the 2 weeks' worth of wages, if the employer fails to comply with the notice requirements, employers can provide workers alternative work if such alternative work is listed on the approved clearance order. The Department has determined that this alternative effectively addresses the hardship concern by providing the worker a source of income, which would otherwise have been available but for the delay, while continuing to allow the employer flexibility to adjust their anticipated start date. Alternative work may be provided to help employers recover from unexpected weather events or acts of God. Finally, the requirement to pay up to 14 days of wages does not mean that workers will receive more money than they otherwise would have under the offered and agreed-upon terms of the clearance order, had the work begun on time. For example, if a delay lasts 10 days and the workers begin work on the 11th day, the employer, if having not provided adequate notice and not providing alternative work, is required to pay the worker only what they originally promised to pay.

As described in the discussion for parallel proposals in § 655.175, the Department disagrees that preexisting protections are sufficient to prevent financial hardship, including the preexisting requirements to pay one week of wages as well as existing H–2A employer obligations under the three-fourths guarantee. The requirements in § 653.501(c) ensure workers receive the first 2 weeks of wages at the beginning of the contract term and with the first scheduled paycheck. This helps avoid financial hardship workers might experience at the beginning of work, which is distinct from the three-fourths guarantee described for criteria clearance orders in part 655. The Department also notes that the requirements in § 653.501(c) apply to both criteria and non-criteria clearance orders, so this provision provides a necessary protection to workers not otherwise covered by the requirements in the Department's H–2A regulations.

The Department notes that the option for an employer to provide alternative work is preexisting and the Department did not propose to change that part of the regulation, except to clarify that the alternative work must be in the *approved* clearance order. The addition of *approved* is intended to clarify the existing regulation but not to change its meaning. Regardless, the Department believes it is important to retain the option to provide alternative work and that any alternative work must be described in the clearance order. Maintaining this option provides employers with flexibility to employ workers through other duties that are useful to the employer, though not their primary or anticipated need. For example, if an employer files a clearance order for apple pickers, the employer might include a description of alternative work that explains workers may be required to perform related work to prepare or maintain growing areas or to prepare containers and other specific support activities. In the event of a delay related to weather conditions, where the employer failed to properly notify workers, the employer could offer alternative work that would help the business be ready for work to start or to recover from the weather condition that caused the delay. Such work would be considered alternative because the primary job duties for the workers would be apple picking but, if apple picking is not possible, workers could be offered work that supports the primary work activity or business. The Department maintains that it is necessary for the alternative work to be described in the clearance order so that potential applicants have adequate notice of the duties they may be asked to perform, which are material terms and conditions. Applicants may decide to apply or not to apply based on the alternative work described in clearance orders. For these reasons, the Department declines to revise the option to provide alternative work and the specification that any alternative work must be described on the clearance order.

Additionally, though the Department did not receive comments requesting the Department to align the language of § 653.501(c)(3)(iv) and (c)(3)(5) with the parallel requirements in part 655, the Department has determined that it would be clearer to revise § 653.501(c)(3)(iv) and (c)(3)(5) so that the wage requirement is stated in days, instead of weeks, to be consistent with § 655.175. This revision does not change the proposed requirement.

The Department is finalizing the proposal to expand the period during which employers must pay the applicable wage to 2 weeks, from the current 1-week period, with one edit to describe the required 2-week period as 14 calendar days.

Finally, in paragraph (c)(5), the Department proposed new language instructing SWAs to process noncompliance with the employer's obligations in paragraph (c)(5) as an apparent violation pursuant to § 658.419. The Department did not receive comments on this change and adopts it, as proposed.

3. Section 653.501(d), Processing Clearance Orders

The Department proposed to remove paragraphs (d)(4), (7), and (8) in their entirety because, with the proposed change in paragraph (c) to have employers notify workers of any change in the start date, the requirement that the applicant holding office notify workers of any changes is no longer relevant or necessary.

Farmworker Justice supported the removal of paragraph (d)(4), stating that it eliminates an additional obstacle for U.S. workers in that previously they had to contact the ES Office to verify the original date of need to be eligible for the first week's pay. The Department did not receive any other comments.

The Department appreciates commenter support and adopts the removal of paragraphs (d)(4), (7), and (8), as proposed.

D. 20 CFR Part 658, Subpart F—Discontinuation of Services to Employers by the Wagner-Peyser Act Employment Service

This subpart sets forth the regulations governing the discontinuation of Wagner-Peyser Act ES services to employers. The Department adopts revisions throughout this subpart to clarify the bases and process for discontinuing services. The Department also reorganizes these regulations to more accurately group subjects and to more logically arrange procedural steps, including when and how employers may request a hearing. Finally, the Department clarifies what ES services would be unavailable after discontinuation and the entities subject to discontinuation.

The Department believes that revising the regulations, as described below, provides SWAs the needed additional clarity to better implement the discontinuation provisions and would allow ETA, including its regional offices, to better monitor and support SWAs to ensure they initiate discontinuation of services as required by the regulations. This will improve worker protection by preventing noncompliant employers from using the ES service to obtain workers (including H–2A workers, as employers seeking to use the H–2A visa program must first file a clearance order through the ES) which, in turn, aids the Department in ensuring a fair labor exchange system for compliant employers, and meeting its statutory obligations to maintain and increase the usefulness of the ES system. Additionally, the proposed clarifications and improvements to the discontinuation procedures provide greater certainty to employers seeking to provide information to SWAs in response to a notice of intent to discontinue, or seeking to reinstate services, and protect employers' interests by ensuring that they receive informative and timely determinations from SWAs. Specific changes are discussed below.

1. General Comments

The Department received several supporting and opposing comments on the general revisions to discontinuation of services provisions in part 658. The National Women's Law Center said that improving protections for both H–2A and corresponding workers is key to ensuring that abusive employers do not take advantage of the H–2A program to discriminate against their non-H–2A workforce and exploit the vulnerability of H–2A workers. It described the changes proposed to the discontinuation of services provisions as key improvements. Farmworker Justice said that discontinuation provides vital protections for workers who want to receive what they are owed and work under improved conditions without losing their jobs altogether. According to Farmworker Justice, unlike debarment, which is a discretionary sanction, discontinuation of services is mandatory whenever an H–2A employer is determined to have violated an employment-related law. Farmworker Justice further said that the detailed provisions for reinstatement of services can ensure farmworkers impacted by the employer's violations receive restitution, which may not routinely occur in debarment cases, and also highlighted the importance of corrective action plans described in part 658. Farmworker Justice also noted underapplication of the pre-existing discontinuation of services regulations by SWAs and said that, if properly applied, discontinuation of services would be a major deterrent to employers who might otherwise violate the law.

The U.S. Chamber of Commerce stated that it was concerned that the proposed revisions to the Wagner-Peyser ES regulations would have a significantly negative impact upon employers' ability to obtain and retain H–2A workers. The U.S. Chamber of Commerce said that the proposed revisions would incur additional processing costs, increase the likelihood of delays in obtaining workers, and create significant risks for business disruptions should employers run afoul of the new requirements in the middle of the seasons. The U.S. Chamber of Commerce stated that additional operating costs would affect American consumers in the form of higher food prices.

USA Farmers described the proposed regulations as an attempt to weaponize the Wagner-Peyser system against farmers and U.S. workers seeking agricultural employment and that the changes could block employers from utilizing the ARS for minor or unproven alleged violations of regulations and deny employers due process. USA Farmers contended that there is no rational need for the changes. USA Farmers stated that the Department already has a robust debarment program with due process rights. They argued that, as a result of this proposal, employers with violations that are not serious enough to warrant debarment by the Department will nonetheless effectively be debarred. USA Farmers also stated that the process to request a hearing and for SWAs to make decisions is flawed.

USAFL and Hall Global stated that the Department should defer adoption of the proposal and engage in detailed discussions with stakeholders. USAFL and Hall Global noted that discontinuation of services applies to the H–2A program and to non-H–2A related services and that, because the H–2A regulations mandate that a prospective H–2A employer access the interstate clearance system, discontinuation of services can amount to a permanent debarment of an employer.

The Northwest Horticultural Council (NHC) said that it is aware that many SWAs have limited resources and are often short staffed, which may contribute to the low use of discontinuation of services. NHC noted that many SWAs work closely with growers where clarification or questions may arise rather than simply discontinuing access to the services, which the commenter said it believes should be encouraged. NHC stated a concern that the proposed expansion of those subject to discontinuation of services, as well as the proposal to remove SWA discretion prior to discontinuation, will lead to delays in processing clearance orders for all employers, not just those subject to additional scrutiny. Additionally, NHC had concerns about limited employer recourse to the Department if there is ongoing conflict with the respective SWA.

The Department agrees with the comments from National Women's Law Center and Farmworker Justice, and believes that the changes are necessary to ensure worker protections, while offering adequate due process to employers. The Department notes that employers that comply with applicable laws and regulations should not experience delays or expenses related to these procedures because they will not have met the bases described at § 658.501 that mandate SWAs to initiate procedures for discontinuation of services. As described in greater detail in the following comment responses, the bases at § 658.501 in many cases describe that, to meet the basis for discontinuation, the employer must have *refused* to comply with the stated requirements. The bases that describe employer refusal to comply assume that the SWA has already attempted to resolve issues, which provided the employer with an opportunity to avoid initiation of discontinuation of services. For example, the SWA may be required to initiate discontinuation of services after the SWA attempted to informally resolve apparent violations under § 658.419 or complaints under § 658.411. The Department believes that the provisions of part 658, subpart F clearly explain that discontinuation of services is not the SWA's first response when it identifies apparent violations, or in response to complaints, except in cases where immediate discontinuation is warranted. The Department further notes that where immediate discontinuation is warranted, under § 658.502(b), the employer must also have met one of the stated bases at § 658.501(a), therefore, employers are not at risk of experiencing discontinuation of services for unsubstantiated claims, as some commenters suggested. The Department affirms that employers must comply with all applicable employment-related laws, as well as the full terms and

conditions of clearance orders, to employ workers through the ES system. The Department maintains that all ES regulations and employment-related laws are important and notes that the preexisting bases at § 658.501 similarly required SWAs to initiate discontinuation of services to employers who failed to comply with such requirements.

The Department will discuss comments specific to each of the proposed changes below but wishes to provide a response to these general comments to indicate that the interest of worker protection is compelling and supports the Department's determination to implement most of the changes, as proposed. The Department maintains that there are adequate procedural protections to protect the due process rights of employers, including several mechanisms to allow employers to respond to and resolve identified noncompliance, prior to discontinuation of services. The Department also maintains that the purpose and application of discontinuation of services is distinct from debarment actions, which more narrowly apply to certain programs. The proposed changes foster a culture of compliance between employers, workers, and SWAs, which is necessary to uphold the laws of the United States and their implementing regulations.

2. Section 658.500, Scope and Purpose of Subpart F

The Department proposed to revise § 658.500, which describes the scope and purpose of subpart F, to add language consistent with proposed revisions to § 658.503 that discontinued services include services otherwise available under parts 652 and 653. This revision clarifies the scope of services discontinued to include the labor exchange services—such as recruitment, career, and labor market information services—available to employers under part 652.

Farmworker Justice supported the proposed change, stating that it provides needed clarification that all job services in parts 652 and 653 are impacted by discontinuation. Additionally, the UFW Foundation, UFW, North Carolina Justice Center, UMOS, PCUN, CAUSE, and Green America expressed general support for inclusion of labor exchange services at part 652. On the other hand, USAFL and Hall Global stated that discontinuation of services should only apply to services *not* necessary for participation in the H–2A program, meaning discontinuation should only apply to the services available at part 652, and not part 653.

The Department appreciates commenter support for this clarification. Regarding the recommendation that discontinuation of services should only apply to services *not* necessary for participation in the H–2A program, the Department disagrees. Discontinuation has historically applied to ES services available under part 653, including access to the ARS. As explained above, prospective H–2A employers must use the ARS to recruit U.S. workers as a condition of receiving a temporary agricultural labor certification, and employers and entities who file applications for temporary agricultural labor certification under 20 CFR part 655, subpart B must comply with the ARS requirements at part 653, subpart F. *See, e.g.,* §§ 655.121 and 655.131655.133. The Department, therefore, declines to adopt the recommendation. and adopts this paragraph, as proposed.

The Department also proposed to add paragraph (b) to § 658.500, which would explain that for purposes of this subpart, employer refers to *employers,* as defined at § 651.10, and *agents, farm labor contractors, joint employers,* and *successors in interest,* as proposed to be defined at § 651.10. Proposed paragraph (b) therefore describes which entities may experience discontinuation of services. Each of these entities may engage in the ES clearance system by creating or submitting clearance orders, or by managing or utilizing workers placed on ES clearance orders. *Agents* and *farm labor contractors* often engage the ES clearance system by submitting clearance orders and controlling many aspects of recruitment activities relating to clearance orders. *Joint employers* may utilize workers placed on clearance orders in the same or similar manner as the *employer,* defined at § 651.10, with whom they jointly employ those workers, and each joint employer is responsible for the violations of the other joint employers. A *successor in interest* may have reincorporated itself from an *employer* whose ES services have been discontinued into another business entity that maintains the same operations or interests, allowing that entity to undermine the effect of the discontinuation of the original entity in contravention of the purpose of the discontinuation regulation. The revisions were proposed to clarify and expand the entities who engage the ES clearance system and are, thus, subject to discontinuation. Specifically, the proposed change would make it clear that agents, farm labor contractors, joint employers, and any successor in interest to an agent, farm labor contractor, or joint employer, are subject to discontinuation of services.

Finally, as the proposed *agents, farm labor contractors, joint employers,* and *successors in interest* also seek temporary agricultural labor certifications from OFLC under part 655, subpart B, adding these entities here brings the discontinuation regulation in line with the existing H–2A regulations, which permit the debarment of agents, farm labor contractors, joint employers, and successors in interest, as well as fixed-site H–2A employers, and agricultural associations. For the reasons set forth in the NPRM and below, the Department adopts the proposed paragraph (b), with one addition.

The UFW Foundation, UFW, North Carolina Justice Center, UMOS, PCUN, CAUSE, and Green America all expressed support for greater accountability to third parties, stating one of the strongest protections in the proposed rule would be a series of changes that would strengthen enforcement actions against employers' agents, contractors, joint employers, and successors in interest. Similarly, the National Women's Law Center stated that the proposed rule would improve administration of the H–2A program, including discontinuation of services, to help prevent employers and their agents from abusing the H–2A program.

Several commenters expressed concern that the proposed changes would make third parties liable for the actions of employers, and employers liable for the actions of third parties. The Arizona Farm Bureau Federation, North Carolina Farm Bureau Federation, Inc., Golden Plain Farms, Inc., Western Range Association, and Roossinck Orchards, Inc. opposed the proposed changes, stating that they hold farmers responsible for violations committed by farm labor contractors, recruiters, attorneys, etc. Similarly, wafla stated that the inclusion of entities who are not the principal employer, have no clear control of day-to-day workplace conditions, and have nothing to do with potential rule violations giving rise to discontinuation is overbroad. The American Immigration Lawyers Association (AILA) opposed inclusion of successors in interest, stating that successors in interest are not responsible for issues created by former owners and should not have to answer for those issues merely by purchasing a business. The National Cotton Ginners Association and Texas Cotton Ginners' Association opposed the inclusion of agents, stating that the rule makes small agricultural business that rely on agents for recruitment services subject to

discontinuation because of potential violations by the agent that may be outside of the employer's control. The Mountain Plains Agricultural Service stated that the proposal extends enforcement of employment-related laws to agents that are not employers and not subject to said laws and regulations. Relatedly, the International Fresh Produce Association (IFPA), the Georgia Fruit and Vegetable Growers Association (GFVGA), U.S. Custom Harvesters, Inc., Texas International Produce Association (TIPA), NHC, the U.S. Chamber of Commerce, Titan Farms, LLC, Demaray Harvesting and Trucking, LLC, an individual, and an anonymous commenter all opposed the changes stating that they do not make clear who—whether the filing entity, the underlying employer, or both—will be subject to discontinuation of services when a SWA determines that a basis for discontinuation exists.

Additionally, commenters opposed the inclusion of agents and attorneys because of the legal and ethical duties they owe to their clients. USApple stated that agents and attorneys are legally and ethically bound to carry out their clients' intentions, and the proposed rule would allow for discontinuation of services to agents and attorneys where their client refuses to, for example, modify a job order. Similarly, másLabor stated that agents and attorneys are not free to unilaterally take action that is contrary to the intent of the client, and if an employer disagrees in good faith with the SWA and instructs the agent or attorney not to modify an application in accordance with the SWA's instructions, the agent is therefore duty-bound to follow that instruction and push back against the SWA.

Several commenters asked that the Department consider the economic implications of the proposed changes and their potential effect on the industry. IFPA, GFVGA, U.S. Custom Harvesters, Inc., TIPA, NHC, the U.S. Chamber of Commerce, Titan Farms, LLC, Demaray Harvesting and Trucking, LLC, an individual, and an anonymous commenter all stated that agents and attorneys play an invaluable role in processing criteria clearance orders, certifications, and petitions for employers—particularly for small farm employers without staff or expertise to undertake the process. Discontinuation of services to third parties would impact farm employers across the country who, in good faith, rely on that third party and could not anticipate the SWA action. Because the timing for filing a clearance order and date of need is incredibly tight, under the proposed rule, farmers will suffer significant financial losses caused by circumstances over which they have no control, leaving them with crops in the field and no harvesters to collect them. Additionally, farmers will have increased costs associated with hiring a new third party to file their clearance orders or redirect staff resources to undertake the task while the company is preparing for harvest.

Relatedly, wafla stated that discontinuation to an attorney or filing agent would negatively impact the other clients that attorney or agent serves, such that all of that attorney's or agent's clients would be debarred from the program. MásLabor stated that discontinuation to an attorney or agent would preclude that agent or attorney from filing job orders in that State for its other clients. The Western Range Association stated that discontinuation to agents would be disconcerting to the entire industry because there are only two agents that the majority of ranchers in its service area use. USApple stated that discontinuation to an attorney or agent would reach much further than a single clearance order to affect many employers and upwards of hundreds, if not thousands, of workers. The Wyoming Department of Agriculture stated that discontinuation to any affiliate of the employer would result in a domino effect of reduced services and job opportunities for employees who work with agents, attorneys, or others due to their names being placed on the discontinuation list.

The Department reiterates that all entities who engage the ES clearance system, including agents (which include attorneys), farm labor contractors, joint employers, and successors in interest, should be subject to discontinuation, if appropriate. The proposed changes are meant to hold these entities accountable for compliance with ES regulations. They are not meant to hold, for example, agents, attorneys, or farm labor contractors accountable for the actions of the employers they represent, or vice versa. For example, if an employer is discontinued because, under § 658.501(a)(4), they are found by a final determination by OSHA or WHD to have violated an employment-related law, the discontinuation is not imputed to the employer's agent who had nothing to do with the violation. If an employer is discontinued because, under § 658.501(a)(1), they refuse to correct terms and conditions in the job order that are contrary to employment-related laws, and the employer's agent made a good-faith attempt to bring the employer's terms and conditions into compliance, the discontinuation is not imputed to the employer's agent. Conversely, an agent or farm labor contractor's noncompliance would not necessarily be imputed to an employer. Thus, under the proposed rule, an agent, attorney, or farm labor contractor who is blameless would not be subject to discontinuation based on the acts of the employer, and an employer who is blameless would not be subject to discontinuation based on the acts of their agent, attorney, or farm labor contractor. As to joint employers and successors in interest, the Department reiterates that joint employers who utilize workers placed on clearance orders should be subject to discontinuation; and successors in interest, who maintain the same or similar operations as the former employer whose services have been discontinued, should also be subject to discontinuation.

Regarding the legal and ethical duties that agents and attorneys owe to their clients, the proposed changes do not interfere with those duties. For example, an agent or attorney who engages the ES system on behalf of an employer must do so in conformance with the requirements of the ES regulations and must advise their employer-client to use the ES system in conformance with the regulations. In the example provided by commenters, if an employer refuses to modify a job order to comply with employment-related laws, the agent or attorney will have presumably advised the employer to bring the terms or conditions in the job order into compliance. In that instance, and as noted above, a blameless agent or attorney would not be subject to discontinuation based on the acts of the employer.

The Department recognizes and acknowledges the critical role that agents and attorneys play in navigating the ES system for the employers they serve. The Department also recognizes that the discontinuation of services to an agent or attorney may have an economic impact on the industry, particularly for small farms that rely heavily on agent/attorney services. However, the Department considers requiring SWAs to discontinue services to agents and attorneys, where appropriate, necessary to protect the integrity of the ES system and protect users—both workers and employers—of the ES system. Without the ability to discontinue services to agents and attorneys, SWAs would have no mechanism to prevent agents or attorneys that violated ES regulations from accessing the ES system. The impact to the industry may be mitigated in light of other changes made to the

discontinuation regulations. Specifically, the discontinuation action will be stayed pending any appeal of a final SWA decision to discontinue services to an agent or attorney; alternatively, an agent or attorney can have services reinstated at any time if they have resolved the issues leading to the discontinuation. In addition, the Department reiterates that inclusion of agents, farm labor contractors, joint employers, and successors in interest is necessary to align the definition of agent here with the definition of agent in § 655.103; and that the economic effects of discontinuation to third parties are the same or similar as the effects of debarment on the same third parties in the existing H–2A context. Finally, as noted in the discussion of the *successor in interest* definition in § 651.10, the Department is relocating part of that proposed definition, on liability of successors in interest, to this section of part 658 (''A successor in interest to an employer, agent, or farm labor contractor may be held liable for the duties and obligations of that employer, agent, or farm labor contractor for purposes of recruitment of workers through the ES clearance system or enforcement of ES regulations, regardless of whether such successor in interest has succeeded to all the rights and liabilities of the predecessor entity.'') As with the separate structure of § 655.104(a) and (b), the Department is separating the language relating to liability for discontinuation purposes from the definitional language of § 651.10 and has determined this liability language is more appropriately located in part 658, subpart F, which generally describes the situations in which entities are subject to discontinuation of services, Regarding the concerns commenters raised with the scope of successor liability and the language in proposed §§ 651.10 and 655.104, ''regardless of whether such successor in interest has succeeded to all the rights and liabilities of the predecessor entity,'' the Department is retaining this and other proposed language on successors as part of § 658.500—and is not finalizing the remainder of the proposed sentence (''A successor in interest includes an[y] entity that is controlling and carrying on the business of a previous employer, agent, or farm labor contractor'')—for the reasons stated in the discussion of § 655.104 below.

3. Section 658.501, Basis for Discontinuation of Services

Section 658.501 describes eight bases for which SWA officials must initiate discontinuation of services to employers. The Department proposed several edits to paragraphs (a)(1) through (7), except paragraph (a)(3), including a substantive revision to paragraph (a)(4).

In paragraph (a)(1), the Department proposed to state that SWA officials must discontinue services to employers who submit and refuse to correct or withdraw job orders containing terms and conditions contrary to *employment-related laws.* The existing regulation contains the terms *alter* and *specifications.* The Department proposed to change *alter* to *correct* to more clearly articulate that the employer must specifically correct the noncompliant term or condition rather than simply change the term or condition, which might not result in correction of the noncompliance. The Department also proposed to change *specifications* to *terms and conditions* to align the language in paragraph (a)(1) with the language used in § 653.501. For the reasons discussed in the NPRM and below, the Department adopts paragraph (a)(1) as proposed.

Several trade associations, including the Florida Fruit and Vegetable Association (FFVA), GFVGA, Western Growers, USA Farmers, USApple, NHC, Snake River Farmers' Association (SRFA), AmericanHort, NCFC, IFPA, wafla, and FSGA, along with másLabor, USAFL and Hall Global, the Michigan Farm Bureau, McCorkle Nurseries, Inc., Northern Family Farms, LLP, Mountain Plains Agricultural Service, Willoway Nurseries, an individual, and an anonymous commenter, opposed or expressed concerns regarding the Department's proposal to change the word ''alter'' to ''correct.'' These commenters stated that SWAs often misstate, misinterpret, or incorrectly apply the meaning of various employment-related laws when processing jobs orders. Some cautioned that SWAs do not have sufficient familiarity with applicable laws to make determinations as to whether the terms and conditions in an employer's job order comply with employment-related laws. Others stated that SWAs have limited resources to conduct fact investigations in making such determinations. One commenter noted that the NPRM does not indicate whether SWAs will receive training or guidance on applicable State and Federal laws.

Additionally, commenters raised concerns as to how disagreements between employers and SWAs under proposed paragraph (a)(1) will be resolved. Some stated that use of the proposed ''correct'' presumes that the SWA's interpretation of employment-related laws is accurate, does not allow employers to challenge the SWA's interpretation, flips the burden of demonstrating a basis for discontinuation onto employers, and requires employers to prove a negative. Others stated that proposed paragraph (a)(1) is vague, does not allow employers to resolve disagreements with SWAs in good faith, and allows for discontinuation where the employer's alleged noncompliance with employment-related laws has not been adjudicated on the merits.

In the H–2A context, several commenters questioned the interplay between proposed paragraph (a)(1) and the emergency application procedures at §§ 655.121 and 655.134, which allow employers to appeal to a DOL Certifying Officer (CO) where they are unable to resolve outstanding deficiencies in the contents of H–2A job orders with the SWA. Because proposed § 658.501 describes the circumstances in which SWAs *must* initiate discontinuation, commenters asked whether every emergency application will automatically require initiation of discontinuation proceedings. Additionally, commenters asked whether employers would undergo discontinuation proceedings before the DOL CO resolves the emergency application; and whether the SWA would still be under an obligation to discontinue services after a CO has determined that a job order is, in fact, compliant with employment-related laws. Commenters stated that SWAs frequently assert that the contents of a job order are contrary to employment-related laws—only to have the CO overturn that determination in a subsequent emergency filing under § 655.134.

Finally, commenters opposed application of proposed paragraph (a)(1) to agents and attorneys. One commenter stated that proposed paragraph (a)(1) extends enforcement of employment-related laws to agents, who are not employers and, thus, not subject to said laws. Another commenter stated that application to agents and attorneys may unlawfully force agents and attorneys to violate legal and ethical duties to their clients by requiring them to change terms and conditions in job orders contrary to the express wishes of their clients. That commenter also expressed concern with the effect of proposed paragraph (a)(1) on agents and attorneys, stating that a SWA's incorrect interpretation of an employment-related law, and subsequent discontinuation of services, could lead to irreparable harm to that agent or attorney's business, and

to the clients who use the agent or attorney to file job orders.

Commenters suggested several changes to proposed paragraph (a)(1), including: (1) requiring an enforcement agency to make a predicate finding of a violation of an employment-related law; (2) limiting proposed paragraph (a)(1) to repeated failures to correct or withdraw job orders that have already been adjudicated; (3) allowing employers to contest discontinuation by demonstrating that the matter has not been adjudicated on the merits; (4) clarifying that failure to include State and local laws in a job order is not a basis to refuse to open a job order or discontinue services; (5) automatically staying discontinuation proceedings if an employer files an emergency application under § 655.121, § 655.134, or § 655.171 until the CO or Administrative Law Judge (ALJ) reaches a final determination on the merits; (6) automatically terminating discontinuation if a CO issues a Notice of Acceptance under § 655.143; (7) modifying § 658.504 to require reinstatement where a CO determines that the job order is compliant with employment-related laws; (8) allowing employers to appeal directly to an ALJ in lieu of a State hearing official; and (9) excluding application to agents and attorneys.

The Department appreciates commenters' views and recommendations. The Department emphasizes that its proposal to change the word *alter* to *correct* in paragraph (a)(1) is a clarifying edit that is not intended to make any substantive change to the regulation. As discussed above, the proposed change more clearly articulates that employers must correct terms and conditions in job orders that are contrary to employment-related laws, rather than simply change them. For example, § 653.501(d)(2) provides that SWAs may place an intrastate or interstate order seeking workers to perform farmwork for a specific farm labor contractor or for a worker preferred by an employer, provided the order meets ES non-discrimination criteria. It further states that an order would not meet such criteria, for example, if it requested a *white male crew leader* or *any white male crew leader.* In this example, were an employer to subsequently change this term from ''white male crew leader'' to ''white crew leader,'' the employer has altered the term but has not corrected it to bring it in compliance with non-discrimination laws (including, *e.g.,* the requirement at § 653.501(c)(1)(ii) that clearance orders not contain an unlawful discriminatory specification). The word *correct,* therefore, better aligns with the intent of paragraph (a)(1), which is to ensure that clearance order terms and conditions comport with employment-related laws and that SWAs take appropriate action where such terms and conditions are not corrected.

The Department further emphasizes that proposed paragraph (a)(1) does not impose any new requirements, and the discontinuation process is separate and distinct from the review process for criteria clearance orders (orders that are attached to H–2A applications) in § 655.121. That process includes an initial review, a deficiency notice, where applicable, an opportunity for an employer to respond, a final determination from the SWA, and an allowance for employers to file an emergency Application for Temporary Employment Certification when the SWA and the employer are unable to resolve outstanding deficiencies regarding the contents of criteria clearance orders. Where the SWA ultimately approves a criteria clearance order there would be no basis for the SWA to initiate discontinuation proceedings. Where the SWA disapproves the order and the employer files an emergency application, a CO will review and approve or deny certification (*see* § 655.160). Where the CO denies certification, and the employer does not appeal, the CO's written determination is final (*see* § 655.164). Where the employer appeals, an ALJ will issue a written determination (*see* § 655.171). Applicable here, only where there is a final determination from either the CO or ALJ that the terms and conditions in an employer's criteria clearance order are contrary to employment-related laws, and the employer refused to bring the terms and conditions into compliance, would the SWA have reason to initiate a discontinuation action.

For *non-criteria clearance orders* (orders that are not attached to H–2A applications), under § 653.501, SWAs must review and approve clearance orders within 10 business days of receipt of the order. Where a SWA reviews and approves the clearance order, there would be no basis for the SWA to initiate discontinuation proceedings. Where a SWA reviews and the terms and conditions of the order are contrary to employment-related laws, and the employer updates the order by correcting the terms and conditions, there would be no basis for discontinuation. However, where a SWA reviews and the terms and conditions of the order are contrary to employment-related laws, and the employer refuses to bring the terms and conditions into compliance or to withdraw the clearance order, the SWA must initiate discontinuation of services under § 658.501(a)(1). Only where the SWA denies the clearance order because the employer refused to bring the terms and conditions into compliance, would the SWA have reason to initiate a discontinuation action.

As noted in the NPRM, the Department intends to increase the reach and utility of the discontinuation of services provisions, which SWAs have underutilized in recent years. While proposed paragraph (a)(1) does not include any substantive changes or new requirements, the Department recognizes and appreciates the concerns and recommendations raised by commenters—particularly those regarding effective and efficient resolution of employer and SWA disagreements, and the interplay of proposed paragraph (a)(1) and the H–2A emergency application process. In addition to the discussion above, the Department intends to issue further guidance on this basis for discontinuation.

Regarding application of proposed paragraph (a)(1) to agents and attorneys, the Department disagrees with commenter concerns. The Department reiterates that agents, attorneys, and other entities who engage the ES clearance system should be subject to discontinuation if they meet a basis for discontinuation; and that the effects and reach of discontinuation on agents/attorneys will be the same or similar as the effect of debarment on agents/attorneys in the existing H–2A context. As to the commenter concern that the proposal may unlawfully force agents and attorneys to violate legal and ethical duties to their clients by requiring them to change terms and conditions in job orders contrary to the express wishes of their clients, the Department emphasizes that paragraph (a)(1) is intended to ensure terms and conditions in clearance orders comply with employment-related laws. It does not require or compel agents/attorneys to violate any legal or ethical duties to their clients. To the extent an employer includes terms or conditions that violate employment-related laws, the employer's agent or attorney—who has professional and ethical duties relating to representation of the employer—would advise the employer to bring the term or condition into compliance. Discontinuation of services would not apply to an agent or attorney who attempted to bring the employer's terms and conditions into compliance. On the

other hand, a SWA would initiate discontinuation procedures where, for example, an agent/attorney instructs an employer to include in its clearance order a rate of pay that is contrary to employment-related laws and refuses to correct the rate of pay. An agent or attorney who is blameless would not be subject to discontinuation based on the acts of the employer, just as an employer who is blameless would not be subject to discontinuation based on the acts of their agent/attorney. Additionally, where there is, in fact, a good-faith disagreement with the SWA as to whether a term or condition complies, the procedures at § 658.502(a)(1) allow for submission of evidence to show that the terms and conditions are not contrary to employment-related laws; and the procedures at §§ 658.503 and 658.504 allow for appeal.

The Department proposed to reorganize paragraph (a)(2) for clarity by moving the language regarding withdrawal of job orders that do not contain required assurances to earlier in the sentence. The Department also proposed to remove language in paragraph (a)(2) that currently limits this basis for discontinuation to only those assurances involving *employment-related laws.* The Department proposed to remove this language because employers must provide all assurances described at § 653.501(c)(3), which include more than the assurance to comply with *employment-related laws.*

Wafla opposed the proposed removal of language that limits this basis for discontinuation to assurances involving *employment-related laws.* Wafla stated that the proposed change broadens the scope of discontinuation beyond employment related laws, and that discontinuation of services can be for any H–2A assurance violation.

The Department notes that the proposal did not broaden the scope of discontinuation beyond those assurances listed in § 653.501(c)(3). The proposed change to paragraph (a)(2) was made because the Department thought that discontinuation was appropriate where an employer refused to include any assurance required by subpart F of Part 653. The proposed change makes clear that employers must provide all assurances described at § 653.501(c)(3) when requesting the placement of a job order into clearance, and that SWAs must provide the same treatment to all required assurances (*i.e.,* the SWA will initiate discontinuation for employers' refusals), regardless of which assurance is involved. For these reasons and the reasons set forth in the NPRM, the Department adopts paragraph (a)(2) as proposed.

The Department proposed to amend paragraph (a)(4) to add that SWA officials must initiate procedures for discontinuation of services for employers who are currently debarred from participating in the Department's H–2A or H–2B foreign labor certification programs. It proposed no changes to the regulatory text that states that SWA officials must initiate procedures for discontinuation of services to employers who are found by a final determination by an appropriate enforcement agency to have violated any employment-related laws and notification of this final determination has been provided to the Department or the SWA by that enforcement agency. The Department received numerous comments on proposed paragraph (a)(4), though the vast majority of them related to this existing language in § 658.501(a)(4) where no changes were proposed.

The Department also requested comments on whether the SWAs should also initiate discontinuation of services to employers who are debarred from participation in any of the Department's foreign labor certification programs. The Department did not receive many comments in relation to this question.

After careful consideration of the comments, the Department has adopted the proposed language without change. The comments are discussed in detail below.

In relation to the portion of (a)(4) that states that discontinuation of services must be initiated for employers who are found by a final determination by an appropriate enforcement agency to have violated any employment-related laws, the Department received many comments expressing opposition. IFPA, U.S. Custom Harvesters, Inc., GFVGA, NHC, USApple, TIPA, Titan Farms, LLC, wafla, Texas Cotton Ginners' Association, Wyoming Department of Agriculture, Burley and Dark Tobacco Producer Association, and a couple of individuals believed that the ''new'' proposal would result in discontinuation of services for minor infractions by employers who are acting in good faith to comply with regulations. For example, wafla expressed concerns that this proposal would allow discontinuation of services for minor paperwork violations, or a lack of documented safety meeting records. The commenters explained that there are a lot of regulations and stated that even the best employers have unintentional violations as a result of misunderstanding the requirements or conflicting guidance from government agencies.

The commenters also alleged that the discontinuation of services based on minor infractions would lead to delays in processing as well as the cost of time for agents/attorneys to respond to the discontinuation notice. Instead, they argued that discontinuation of services should be a result of willful violations that affect the health and safety of workers.

NCFC, Western Growers, AmericanHort, and Willoway Nurseries also objected to this provision. They explained that sometimes WHD may cite an employer for a violation but ultimately decide not to debar that employer, and in such a case, it argued that the SWA should not then effectively debar an employer by discontinuing services. They stated that if the Federal government, via WHD, already conducted an investigation and issued what it viewed to be an appropriate citation without debarment, then the SWA should not then subsequently try to issue another punitive sentence against the employer by discontinuing services.

The Department thanks the commenters for their concerns but believes they are unfounded. The provision of paragraph (a)(4) relating to a final determination by an appropriate enforcement agency to have violated any employment-related laws is not new—it has been a part of the regulations for over 40 years and the Department did not propose any changes regarding that aspect of paragraph (a)(4) in this rulemaking.

Regardless, the Department disagrees with the argument that more minor infractions, as opposed to willful violations, do not warrant a sanction such as discontinuation of services—if an employer has been found by an enforcement agency to have violated an employment-related law, then discontinuation is appropriate to protect the integrity of the ES system and protect workers. They may rebut the proposed discontinuation or apply for reinstatement after a final discontinuation order has been issued by, among other methods, providing evidence that they have adequately responded to any findings, including any restitution or payment of fines. The Department does not believe it unreasonable to require an employer, who has been found in a final determination to have violated an employment-related law to have to remedy the violation or appeal the discontinuation before they are permitted to recruit workers through the ES system. While the Department does not think that this provision will lead to any greater delays than may currently

occur under this pre-existing ground, as noted above the Department thinks that the benefit of the provision outweighs any potential delay that may occur.

Finally, the Department is also unconvinced by the notion that if an enforcement agency, such as WHD, decides to issue a final determination against an employer, but ultimately not debar the employer, this prevents or should prevent the SWA from discontinuing services. Debarment is not the same as a discontinuation of services—while discontinuation would preclude an employer's ability to access the H–2A program, they are different actions taken by different actors with different consequences under different authority. As discussed in the NPRM, the goal of discontinuation is to protect workers and the integrity of the ES system by preventing employers from using the system to recruit workers if they have misused the ES system or otherwise engaged in actions that are harmful to workers until they have corrected the issue(s) giving rise to their discontinuation. Sections 658.502 and 658.504 explain that an employer can respond to a proposed discontinuation or seek reinstatement if they have responded to the findings of an enforcement agency, including payment of restitution or fines, and establish that they have addressed or revised any policies, procedures, or conditions that gave rise to the violation(s). The ability to seek reinstatement is an important distinction from debarment, which is for a set period of time regardless of any remedial action taken by the debarred entity.

IFPA, GFVGA, NHC, and an anonymous commenter stated that this proposal to allow for discontinuation of services for an employment-law related violation was overly punitive because the underlying issue would have already been cited by another agency, and a final determination would have already been reached. They also argued that this went beyond the legal purview of the SWA in its review of the job orders.

The Department disagrees. Again, as noted above, the Department thinks that it is reasonable for an employer to have to remedy their violations before being allowed to receive services. Until those violations are remedied, it is appropriate and well within the purview of a SWA to discontinue ES services to better protect workers, and to maintain the proper functioning of the ES system by serving employers who demonstrate the ability to comply with State and Federal laws governing the employment relationship.

Wafla, USA Farmers, AgriMACS, Inc., and one individual argued that this proposal lacked due process, but it is unclear if this comment related specifically to provision (a)(4), or how this section lacks due process. USA Farmers elaborated that with regard to H–2A applications, the Department will not refuse to process them simply because an employer is under investigation by WHD, for example, but in this context, an employer would have their services discontinued without an appeals process.

The SWA must *initiate* discontinuation of services to employers who are found by a final determination by an appropriate enforcement agency to have violated employment-related laws, or those who have already been debarred. First, in both instances, employees would have had the opportunity to go through appropriate procedures, including, in the case of H–2A and H–2B findings (including those resulting in debarment), a robust appellate process. Second, this provision only relates to the *initiation* of the discontinuation of services. Employers will still have 20 working days to respond to the discontinuation notice pursuant to § 658.502 and may appeal a final determination regarding discontinuation of services pursuant to § 658.504. As discussed throughout the preamble, if a final determination regarding discontinuation is appealed then the effect of the discontinuation is generally stayed. The Department therefore thinks that this provides entities with ample due process protections.

U.S. Custom Harvesters, Inc., IFPA, GFVGA, NHC, TIPA, and one individual requested the Department identify a look back period so that they could know whether noncompliance adjudications or settlements from previous years would affect them.

In the NPRM, in the section of the preamble discussing § 658.501(b), the Department had asked commenters if SWAs should limit their examination of previous labor certifications or potential violations of a labor certification to a certain time period. 88 FR at 63763. The Department believes that this comment is more appropriately addressed in the section relating to § 658.501(b). To the extent the comment is relevant to this provision, while the Department did not propose a look-back period or suggest that it was contemplating adding such a provision, we note that H–2A and H–2B program debarments are time limited and that an employer whose services have been discontinued as a result of an H–2A or H–2B debarment can seek reinstatement once their period of debarment has ended.

An anonymous commenter opposed the new provision of the regulation that requires discontinuation for employers who are currently debarred from participating in the H–2A or H–2B foreign labor certification programs pursuant to § 655.73 or § 655.182 of this chapter or 29 CFR 501.20 or 503.24. They argued that this would be overly punitive and that debarment is a harsh enough punishment. They explained that if they were a farm that was dependent on H–2A workers and was debarred, and then subsequently not able to hire U.S. workers via the SWA, they would need to go out of business or alter their business significantly. Another anonymous commenter stated it did not support expanding or empowering SWA authority under a Federal program.

The Department does not believe it punitive to initiate discontinuation of services against a debarred H–2A or H–2B employer, but rather believes it is necessary to protect workers and effectuate the purpose of the ES system, which is to improve the functioning of the nation's labor markets by bringing together individuals who are seeking employment and employers who are seeking workers. As stated in the NPRM, the Department recognizes that many employers who use the ARS also seek temporary agricultural labor certifications from OFLC under part 655, subpart B. These employers may attempt to recruit workers through non-criteria orders in the ARS if they are prohibited from using the H–2A program as a result of their debarment. The Department does not want the ES system to facilitate placement of U.S. workers with employers whom the Department has determined should not be permitted to employ nonimmigrant workers through its H–2A and H–2B programs, particularly where the U.S. workers may perform similar work and, thus, be subject to the same or similar violations giving rise to the employer's debarment.

This requirement will protect workers who use the ARS by ensuring that ES offices do not place U.S. workers with H–2A/H–2B debarred employers during any such period of debarment. Debarment is a serious sanction that, in the case of H–2A employers for example, results from a finding not only that an employer violated a material term or condition of its temporary agricultural labor certification, but also that the violation is so substantial as to merit debarment, and it is imposed only after an employer has exhausted or forfeited an opportunity to respond to

the debarment action, appeal it, or both. Violations may be related to worker safety, failure to provide required wages or working conditions, failure to comply with recruitment requirements or participate in required investigations or audits, or failure to pay required fees, among other substantial violations. Entities that have committed such violations should be excluded from participation in the ES, and the Department is better able to protect U.S. workers by ensuring that they will not be placed with debarred employers that have substantially violated a material term or condition of their temporary agricultural labor certification.

The new regulatory provision would also ensure that the ES system would have more resources to assist law-abiding employers to recruit available U.S. workers for jobs because SWAs would spend less time and resources serving noncompliant employers, and law-abiding employers would receive referrals of qualified U.S. workers that might otherwise go to noncompliant employers.

UMOS, Green America, CAUSE, PCUN, North Carolina Justice Center, UFW, the UFW Foundation, and CCUSA and USCCB provided generalized support for the provision that requires the initiation of discontinuation of services against employers who are debarred from H–2A and H–2B labor certification programs without much further elaboration.

The Agricultural Justice Project and an individual supported expanding the provision to require SWAs to initiate discontinuation proceedings against employers who are debarred from any of the Department's other foreign labor certification programs. The Agricultural Justice Project stated that doing so will help stop repeat violators. An individual expressed the opinion that requiring a discontinuation of services against employers debarred from other programs would not have ''any negative effect.'' Also, it would provide more consistent outcomes between DOL and SWA actions rather than allowing employers to circumvent debarment.

The Colorado Department of Labor and Employment did not directly oppose the expansion to include other debarred employers but noted that it would be difficult to initiate a discontinuation of services because they are not as knowledgeable about the rules and regulations that govern the programs not administered by the SWAs.

The Department thanks commenters for their supportive comments. As noted above, the Department will adopt the proposed regulation without change. It is true that expanding the provision to require an initiation of discontinuation of services against an employer who is debarred from any foreign labor certification program may deter repeat violators, or those who attempt to circumvent debarment in one program by using another. However, at this time, the Department will not expand this provision to include employers who are debarred under any foreign labor certification program, only the H–2A and H–2B programs. The Department did not receive a significant number of comments in support of the expansion. Furthermore, the Department, as articulated above, has had more experience with H–2 employers who use or misuse the ES system and will therefore focus current efforts on employers that have been debarred from the H–2A and H–2B programs. Finally, the Department appreciates the comment from the Colorado Department of Labor and Employment and, should expansion be proposed again, will consider if additional guidance to SWAs will be needed.

Finally, the Department did receive some additional comments that offered conditional support, suggestions, or both. The Colorado Department of Labor and Employment lamented that enforcement agencies do not have a standard practice of sharing findings with the SWA. It suggested that if a debarment action is taken against an H–2A or H–2B employer, the Department should immediately inform the SWAs of said debarment. Another anonymous commenter suggested something similar as well.

Farmworker Justice echoed some of these concerns noting that SWA officials have informed them that they have been unable to discontinue services in some instances because they were not given the final investigative determinations by enforcement agencies. Farmworker Justice further explained that, allegedly, SWA officials have been told to file Freedom of Information Act (FOIA) requests for information on employers, but if they do not know which employers are being investigated, they cannot submit such a request. Farmworker Justice suggested that the Department adjust § 501(a)(4) to adopt more expansive language from § 501(a)(3) to trigger mandatory discontinuation of services whenever the SWA learns of a final determination from the enforcement agency, or via another manner.

Farmworker Justice also suggested the Department require its agencies to notify SWAs of final determinations where an employer was found to have violated an employment-related law or regulation. In support of expanding discontinuation of services, Farmworker Justice noted that discontinuation, unlike debarment, can result in more farmworkers receiving restitution, and an employer adopting corrective action plans.

The Department thanks the commenters for their suggestions but declines to adopt further changes to the regulatory text. Many SWAs have existing relationships with the Department's enforcement agencies, and the Department will continue to engage with appropriate enforcement agencies to encourage the sharing of information with SWAs where appropriate to provide SWAs the information necessary to initiate a discontinuation action.

The Department notes that a SWA may also learn of a final determination of noncompliance issued by an appropriate enforcement agency through sources other than the enforcement agency (*e.g.,* through a press release, a newspaper, or farmworker advocates). While the initial information the SWA receives from another source would not require the SWA to initiate discontinuation of services, the information might constitute an *apparent violation,* which § 651.10 defines as a suspected violation of employment-related laws or ES regulations by an employer that an ES staff member observes, has reason to believe, or regarding which an ES staff member receives information (other than a complaint as defined in this part). Under § 658.419(b), if the employer has filed a job order with the ES office within the past 12 months, the ES office must attempt informal resolution of the apparent violation as described at § 658.411. As a part of the SWA's informal resolution attempt, the SWA may contact the enforcement agency to confirm the final determination and, at that point, the enforcement agency may provide notice to the SWA of the final determination, which would prompt the SWA to initiate discontinuation of services.

The Department further notes that under § 658.501(a)(3), which the Department did not propose to revise, a SWA must initiate procedures for discontinuation of services to employers that the SWA finds, either through field checks or otherwise, to have either misrepresented the terms or conditions of employment specified on job orders or failed to comply fully with assurances made on job orders. Therefore, if a SWA obtains sufficient facts evidencing that an employer failed to comply fully with assurances made on job/clearance orders and, after reviewing the matter, determines that

discontinuation is warranted, it should initiate discontinuation even absent a final determination from an enforcement agency. For example, if a SWA has sufficient evidence that an employer violated an employment-related law relative to a clearance order and after reviewing or investigating the matter as appropriate, the SWA determines that the employer did not comply with the required assurance at § 653.501(c)(3)(iii) that the working conditions comply with applicable Federal and State minimum wage, child labor, social security, health and safety, farm labor contractor registration and other employment-related laws, the SWA should initiate discontinuation of services citing § 658.501(a)(3). This could occur in situations where the SWA has conclusive evidence of a violation. For example, there have been several recent cases where employers were on video threatening workers with physical violence in retaliation for workers asserting their employment-related rights. The Department notes that, in addition to initiating discontinuation of services, SWAs are required to refer unresolved apparent violations and complaints that involve employment-related laws to applicable enforcement agencies, as described at part 658, subpart E.

The Department is committed to providing protections for both U.S. workers and H–2A workers, as well as providing a fair and equitable ES system for employers. In light of the above-discussed comments, the Department adopts the proposed regulatory language at § 658.501(a)(4) without change.

The Department proposed to amend § 658.501(a)(5) by adding that this basis for discontinuing services includes employers who are found to have violated ES regulations pursuant to § 658.411 or § 658.419. This edit is intended to clarify that ES violations may also be found as a result of apparent violations that are described at §§ 651.10 and 658.419 (*i.e.,* violations that ES staff observe or about which they otherwise receive information).

USA Farmers opposed the inclusion of apparent violations, stating that, as proposed, a mere suspicion of a violation now constitutes a finding of a violation under proposed paragraph (a)(5). Washington State inquired generally as to whether the proposed changes in the H–2A program will result in additional findings during field checks or apparent violations or complaints. As to the H–2A program, they stated that while they provide business services and help ensure employer compliance through outreach and technical assistance, using discontinuation of ES services when warranted, SWAs are not enforcement agencies with jurisdiction over H–2A program violations. SWAs should not be positioned as a substitute for timely and comprehensive WHD enforcement of potential violations of H–2A rules.

The Department appreciates the commenters' concerns. As noted in the proposed rule, the change in paragraph (a)(5) is a clarifying edit that does not make any substantive change or impose any new requirement. Section 658.411, entitled ''Action on complaints,'' addresses complaints filed with the ES. However, under § 658.419, apparent violations are also documented and processed under the ES Complaint System (*see* part 658, subpart E), including, in some instances, pursuant to procedures in § 658.411. The Department's change just clarifies that ES violations triggering discontinuation may be found as a result of either the complaints or apparent violations that are processed in the ES Complaint System. The Department emphasizes that discontinuation under paragraph (a)(5) is limited to findings of violations of ES regulations only and does not require or compel SWAs to make formal findings regarding apparent violations of other employment-related laws. Nor does it allow SWAs to initiate discontinuation based on suspicion alone. Rather, the SWA must make formal findings as it relates to the apparent violation of ES regulations before the requirement to initiate discontinuation is triggered. As to apparent violations of employment-related laws, the Department notes that § 658.419 continues to provide for informal resolution and referral to appropriate enforcement agencies. Where an informal resolution of ES violations is reached that remedies the immediate violation and ensures future compliance, the Department does not think that discontinuation would be appropriate. Further, neither § 658.419 nor proposed paragraph (a)(5) impede on WHD's enforcement authority over the H–2A program or the enforcement authority of other appropriate agencies, and none of the changes made in this regulation are meant to give SWAs authority to enforce the requirements of the H–2A program. For these reasons and the reasons set forth in the NPRM, the Department adopts paragraph (a)(5), as proposed.

a. Section 658.501(a)(6)

The Department proposed to amend paragraph (a)(6) by clarifying that discontinuation of services on the basis of failure to accept qualified workers would be appropriate only for employers placing criteria clearance orders. The requirement to accept qualified workers referred through the clearance system applies only to criteria clearance orders filed pursuant to § 655.121. For non-criteria clearance orders, the regulations at part 653, subpart F, do not require employers to hire all qualified workers referred through the ES, so this basis for discontinuation does not apply to non-criteria clearance orders.

USAFL and Hall Global commented that the final rule should modify paragraph (a)(6) to only permit SWAs to initiate discontinuation of services for employers that willfully refuse to accept qualified workers referred through the clearance system. As an example, they described a rancher who advertises a ranch hand job with an experience requirement. If the SWA refers a person who had experience but two decades in the past and in a different country, that person has no experience with modern U.S. production methods, and it is unclear whether that person is qualified. They explained that adding the word willfully would allow the employer to use its best good-faith judgment even in cases where the SWA or enforcement agency may disagree in similar good faith. They also contended that instead of qualified workers, the proposal should apply to workers who are able, willing, and qualified, and who will be available at the time and place needed to conform to 8 U.S.C. 1188.

The Department does not find it appropriate to add that an employer must willfully refuse to accept qualified workers, as the commenter described. The example the commenter provided describes a situation where a SWA or an enforcement agency may disagree with an employer regarding a worker's qualifications. While SWAs are responsible for making accurate determinations, under § 658.502(a)(6), the employer may present evidence to the SWA that workers were not qualified upon initial notification or during the 20 days that the employer has to respond to the SWA's intent to discontinue services. The Department also notes that the corresponding requirement in § 655.135(c)(3) requires that the employer must consider all U.S. applicants for the job opportunity until the end of the recruitment period, as set forth in § 655.135(d). Under § 655.135(c)(3), the employer must accept and hire all applicants who are qualified and who will be available for the job opportunity, and U.S. applicants can be rejected only for lawful, job-related reasons, and those not rejected on this basis will be hired. The requirements in part 655, subpart B do

not state or contemplate a willfulness standard. The Department declines to add a willfulness requirement here because it would not align with the requirements in part 655, subpart B.

The Department also declines to further revise § 658.501(a)(6) to expand the description of qualified workers. The Department notes, however, that as the change proposed and adopted by the Department is meant to clarify that § 658.501(a)(6) applies to criteria orders, SWAs should be applying this basis for discontinuation of services in light of the standards outlined in part 655, subpart B. Finally, the Department notes that proposed § 658.502(a)(6) allows employers to avoid discontinuation by providing evidence that the workers were not available or qualified.

The Department adopts paragraph (a)(6), as proposed.

b. Section 658.501(a)(7)

In paragraph (a)(7), the Department proposed to remove the words *in the conduct of,* which are currently present but do not add meaning and are therefore extraneous and unnecessary.

USAFL and Hall Global commented that the Department should revise paragraph (a)(7) to include a scienter element, which requires that an individual have both knowledge that an act or conduct is wrongful, and intent to act despite that knowledge. They contended that paragraph (a)(7) should begin with the words *bad faith refusal* and that the bad-faith standard should have a subjective and objective component. Citing Rule 11 of the Federal Rules of Civil Procedure, they stated that bad faith would not exist if the employer or legal counsel subjectively believed that the refusal was warranted by existing law or by a nonfrivolous argument for extending, modifying, or reversing existing law or for establishing new law, and that a reasonable person would agree that the refusal may be reasonably warranted by existing law or by a nonfrivolous argument for extending, modifying, or reversing existing law or for establishing new law. They stated that a bad-faith standard would provide a mechanism to effectively petition to redress grievances and ensure that issues are resolved cooperatively early on rather than having an enforcement proceeding reversed.

The Department declines to adopt a bad-faith standard. The Department's proposed change to paragraph (a)(7) is a clarifying edit that does not make any substantive change. Additionally, the commenters' recommendation exceeds the scope of the Department's proposed change and, if adopted, would deprive the full regulated community of its opportunity to comment. Even if it were not beyond the scope of the non-substantive clarifying edit, the Department thinks that implementing this suggestion would not be appropriate. The ES has a responsibility for conducting unannounced field checks on agricultural orders where U.S. workers have been placed, and employers utilizing ES services must assure that ES staff have reasonable access to workers so that ES staff can adequately fulfill their field check duties. *See* 45 FR 39454, 39455 (June 10, 1980). The field check provisions at § 653.503 reflect the Department's longstanding recognition that ES staff must abide by applicable laws when entering employer premises while employers must simultaneously allow the ES reasonable access to placed workers. *See id.* The Department believes that this balance of ES and employer obligations sufficiently mitigates against circumstances where, as the commenters describe, an employer's refusal to participate in a field check is warranted by existing law. As such, the Department does not view a ''bad faith refusal'' standard as necessary or appropriate. For these reasons, the Department adopts paragraph (a)(7), as proposed.

c. Section 658.501(a)(8)

Paragraph (a)(8) requires SWAs to initiate discontinuation of services to employers who repeatedly cause the initiation of discontinuation procedures pursuant to paragraphs (a)(1) through (7) of this section. The Department did not propose changes to paragraph (a)(8) in the NPRM but received several comments, discussed below.

The Michigan Farm Bureau, Western Growers, FSGA, NCFC, USApple, FFVA, AmericanHort, and Willoway Nurseries all stated that the Department should provide more clarity on what repeatedly causes the initiation of discontinuation of services under paragraph (a)(8). The commenters asked whether there is a prescribed number of times discontinuation must be initiated to be considered repeated. The commenters stated that the Department's intent and how the basis for discontinuation would be implemented is not clear. The commenters stated that employers are concerned that simple disagreements on terms and conditions and relevant labor laws might lead to SWAs initiating discontinuation services more often, which could also result in SWAs citing the basis in paragraph (a)(8) more frequently. USAFL and Hall Global also stated that the Department should eliminate paragraph (a)(8) entirely.

Willoway Nurseries, Michigan Farm Bureau, FSGA, NCFC, FFVA, and AmericanHort asked how paragraph (a)(8) affects criteria employers that file emergency applications under part 655, subpart B. They asked whether each time an employer files an emergency H–2A application because of a dispute with the SWA, the SWA will initiate discontinuation of services, and argued that, if so, there will be increased discontinuation actions under § 658.501(a)(8).

The Department appreciates these comments. As the Department did not propose to revise paragraph (a)(8), the comments exceed the scope of this rulemaking. Making changes to this paragraph through this final rule would deprive the full regulated community of its right to comment on any changes. Therefore, the Department declines to revise paragraph (a)(8).

d. Section 658.501(b)

Current § 658.501(b) explains the circumstances and procedures for immediate discontinuation of services. The Department proposed to move paragraph (b) to §§ 658.502 and 658.503 to clarify that existing paragraph (b) is not an independent basis for discontinuation and to better align it with the discontinuation procedures in §§ 658.502 and 658.503. The Department did not receive any comments on this proposed change and adopts it, as proposed.

e. Section 658.501(c)

The Department proposed to redesignate current § 658.501(c), which recognizes the unique interplay between the ES and H visa programs, to § 658.501(b), with revisions. The proposed § 658.501(b) explained what a SWA would be required to do when it has learned that an employer participating in the ES system may not have complied with the terms of its temporary agricultural labor certification under, for example, the H–2A and H–2B programs. The current regulation states that SWA officials must engage in the *procedures* for discontinuation of services to employers pursuant to paragraphs (a)(1) through (8) of § 658.501. The Department proposed to clarify that SWA officials must determine whether the SWA must *initiate* discontinuation of services pursuant to § 658.501(a). The proposed change would clarify that SWAs cannot proceed with discontinuation procedures based solely on information that an employer *may* have violated the terms of its temporary agricultural labor

certification. Rather, SWAs must take that information and look to paragraph (a) to determine whether one of the bases for discontinuation applies. Once a SWA determines that one of the bases for discontinuation under paragraph (a) does apply, then the SWA *must* initiate discontinuation of services. Finally, as the proposed paragraph (b) would apply to both currently active and previous labor certifications, in the NPRM, the Department invited comments on whether it would be appropriate to limit the scope of previous labor certifications or potential violations of a labor certification to a particular time period.

The Department received comments from Willoway Nurseries, Michigan Farm Bureau, Western Growers, FSGA, NCFC, USApple, FFVA, and AmericanHort, who each opined that it would be appropriate to limit the scope of previous labor certifications or potential violations of a labor certification to the previous 3 years. The commenters cited that employers in the H–2A and H–2B program are only required to maintain records under those programs for 3 years. They said that a longer time period would frustrate fact finding because employers may not have records beyond 3 years. Additionally, the commenters noted, WHD generally limits the investigative period for its H–2 investigations to no more than 3 years and the FLSA has a 3-year statute of limitations for willful violations and 2-year statute of limitations for non-willful violations. USA Farmers stated that if the Department finalizes any of the suggested changes for discontinuation of services, as to prior labor certifications, the SWAs should use only violations that are finalized after the date of this final rule when making a decision about discontinuing services. They stated that prior to the NPRM, employers would not expect that a minor violation could result in discontinuation of servicers; and that oftentimes employers choose to just pay fines for alleged violations because challenging them will often cost more money in legal fees even if the challenge is successful. They stated that under the current system, an employer has no idea that a minor violation can effectively get them debarred from the H–2A program, and that using a prior violation that the employer had no way of knowing would be used to exclude them from the program is unjust.

The Department agrees with the commenters that it is appropriate to limit the scope of previous labor certifications or potential violations of a labor certification, which SWAs must consider in determining whether there is a basis under paragraph (a) for which the SWA must initiate discontinuation of services. The Department also acknowledges that part 655 requires employers to retain certain records for not less than 3 years after the date of the certification. *See* § 655.122(j)(4) and (n); § 655.167(b); and § 655.173(b)(1)(i). Additionally, 2 CFR 200.334 generally requires SWAs to keep records pertinent to the ES program for 3 years from the date of submission of the final grant expenditure report. For these reasons, records necessary to determine if any basis under paragraph (a) is met should be available within a 3-year lookback. Finally, the Department does not find it appropriate to limit the applicability of proposed § 658.501(b) to violations that are finalized after the date of this final rule.

The Department noted in the preamble that this provision, which is substantively the same as the current regulation, would apply to both active and previous labor certifications. Regardless of whether an employer has already resolved a matter with, for example, WHD, including through a settlement, a SWA would have a basis to initiate a discontinuation action if sufficient facts exist under § 658.501, but, as discussed below under § 658.502, an employer can respond to a proposed SWA's notice of intent to discontinue services by providing evidence that it has taken all actions required by the enforcement agency, including payment of restitution or fines, and that they have addressed or revised any policies, procedures, or conditions that gave rise to the violation(s). When considering an employer's response to a notice of intent to discontinue, SWAs will consider and assess the evidence provided by an employer that they have, in fact, corrected policies, procedures, or conditions responsible for the violation and that the same or similar violations are not likely to occur in the future. The Department notes that, in order to avoid discontinuation of services, the employer must provide the evidence requested in the SWA's notice of intent to discontinue services, as described in § 658.502.

Accordingly, the Department is revising proposed paragraph (b) to limit the scope of previous labor certifications or potential violations of a labor certification that prompt SWAs to determine whether there is a basis under paragraph (a) to initiate discontinuation of services to the 3 previous years. The Department is making additional changes to incorporate the existing obligations on SWAs and ES offices under part 655 and 29 CFR parts 501 and 503 to notify OFLC and WHD upon receiving information that an employer may have committed fraud or misrepresentation in applying for a labor certification or may have violated its terms. The Department otherwise adopts changes to this section as proposed.

4. Section 658.502, Notification to Employers

Section 658.502 describes the notification and procedural requirements a SWA must follow when it intends to discontinue services to an employer. The Department proposed several changes throughout § 658.502 to clarify and streamline these requirements.

First, the Department proposed to revise the section heading to state that it relates to notification to employers of the SWA's intent to discontinue services. This change clarifies that this section relates only to initial notices proposing discontinuation and not to the final notices described in § 658.503. The Department did not receive comments on this change and adopts the section heading at § 658.502, as proposed.

Second, the Department proposed to add introductory language to the beginning of paragraph (a) to clarify that the procedures at paragraphs (a)(1) through (a)(8) relating to notification of intent to discontinue services apply where the SWA determines that there is an applicable basis for discontinuation under § 658.501(a), but do not apply to immediate discontinuation. The Department proposed additional revisions to paragraph (a) to clarify that the initial notices must provide the reasons for proposing discontinuation and must state that the SWA intends to discontinue services in accordance with this section. The proposed language removes the reference to part 654, to which discontinuation of services does not apply. The Department notes that if more than one basis under paragraph (a) applies, the SWA must initiate discontinuation under all applicable bases. The Department did not receive comments on these changes and adopts paragraph (a), as proposed.

Third, paragraphs (a)(1) through (7) provide specific notification requirements for each of the corresponding bases for discontinuation of services outlined in § 658.501(a)(1) through (7). The Department proposed to remove language in § 658.502(a)(1) through (7) that describes the applicable bases for discontinuation and instead cross-reference the applicable citations for clarity. For example, the Department proposed to revise § 658.502(a)(1) to state that the paragraph applies where

the proposed discontinuation is based on § 658.501(a)(1). This would replace current language that describes § 658.501(a)(1) and more clearly and succinctly directs the SWA to § 658.501(a)(1) as the applicable basis. The Department did not receive comments on these changes and adopts them throughout paragraphs (a)(1) through (7), as proposed.

Fourth, the NPRM proposed to remove language in § 658.502(a)(1) through (7) and § 658.502(b) and (d) providing employers the opportunity for a pre-discontinuation hearing—while maintaining the opportunity for employers to submit evidence contesting a SWA's notice of intent to discontinue services under § 658.502 and the opportunity for a post-discontinuation hearing in § 658.504. The Department proposed this change to better align the hearing procedures for discontinuation of services at part 658, subpart F, with the hearing procedures for the ES Complaint System at §§ 658.411(d) and 658.417, which allow for a hearing by a State hearing official only after the SWA issues a final decision on a complaint. This change also allows for a more efficient process without removing due process protections for employers and ensures that post-discontinuation hearings are decided on a more complete record. Having carefully considered the public comments, the Department adopts the language of the NPRM without change in the final rule.

The comments shared by several trade associations, employers/farmers, SWAs and H–2A consulting firms generally opposed the NPRM proposal to remove the option of a pre-discontinuation hearing asserting it would penalize employers by denying them access to the clearance system prior to the notice or opportunity to refute the alleged claims. USA Farmers asserted that the Department sought to weaponize the Wagner-Peyser system by creating a ''backdoor'' debarment process without meaningful due process. Other trade associations, such as IFPA and the U.S. Chamber of Commerce, as well as a couple of farm employers, submitted similar comments noting that the proposal took a guilty-first mentality and sharing the same due process concern. The American Farm Bureau Federation, for example, opposed the proposed change in the NPRM by arguing that failing to provide an employer the opportunity of a hearing before discontinuation would be burdensome and disruptive to the operation of any business, but it would be particularly injurious to America's farmers and ranchers.

Other commenters expressed similar concerns that the proposal would allow for immediate discontinuation, without notice or opportunity to refute claims against the employer or affiliate, and effectively debar employers from the H–2A program. The same commenters and others also worried that this proposal would cause an increase in notices sent without proper basis and cautioned that the proposed change might not protect employers from frivolous charges based on small infractions, such as failure to notify the ES of a delayed start date for a single employee. The lack of a pre-discontinuation hearing might place an employer or affiliate immediately on the discontinuation list and could cause a reduction of services and job opportunities for employees who work with agents, attorneys, or others due to their names being placed on the discontinuation list. A couple of commenters emphasized that the ability to present facts and information to refute the evidence the SWA is relying on to an impartial hearing officer is integral to an efficient clearance system.

Similarly, other commenters were concerned that the proposal would provide SWA officials sole discretion over an employer's ability to participate in the H–2A program. IFPA cautioned that removing the option of a pre-discontinuation hearing would lead to delays in processing clearance orders for all employers, not just those subject to additional scrutiny. MásLabor urged the Department to adopt reasonable standards to protect due process, and also cautioned against conferring broad powers to SWAs while limiting an employer or agent's recourse in contesting or refuting the SWA's findings, since, it argued, such actions would likely result in irreparable harm to the impacted businesses. An anonymous commenter expressed concern that the proposal would shift the burden of proof to the employer to show program compliance, instead of the SWA demonstrating noncompliance prior to issuing a notice of discontinuation.

USA Farmers referred to a purported case involving a farm where the SWA pursued discontinuation of services based on what the commenter perceived to be mere allegations, which the commenter claimed had disastrous results for the farm and was an egregious denial of the farm's due process rights, but the commenter provided no further explanation or details of the case.

After reviewing these comments, the Department has decided to adopt the NPRM proposal without change. The Department believes that removing the opportunity for a pre-discontinuation hearing allows SWAs to resolve discontinuation proceedings while providing sufficient due process expeditiously and fairly to employers. As discussed in the NPRM, the current process allows employers to bypass a formal decision from the SWA anytime they request a hearing and, because State administrative hearings may take several months to complete, inadvertently prolong any formal determinations. The proposed change allows for a more complete record than would result from an immediate appeal of a notice from the SWA proposing discontinuation as the record would include the employer's response to the proposed discontinuation, including relevant evidence and argument, as well as the SWA's final determination with the SWA's response to the employer's evidence and arguments.

The Department recognizes the commenters' concerns regarding due process, but the Department believes both the States and employers have sufficient time to address and resolve any disputes under the NPRM proposal. The Department's decision to remove the pre-discontinuation hearing is not injurious or disruptive to employers given that they still have the opportunity to submit rebuttal evidence to the SWA under the procedures in § 658.502 to resolve the SWA's initial findings. Once the SWA issues its final decision to discontinue services under the proposed § 658.503(a), the decision letter must specify the reasons for its final determination and state that the discontinuation of services is effective 20 working days from the date of the determination. The final determination also must notify employers that they may request reinstatement or appeal the discontinuation determination by requesting a hearing pursuant to § 658.504, and that a request for a hearing stays the discontinuation pending the outcome. The stay during the 20-day period allows SWAs to continue processing an employer's clearance orders, as no final determination on discontinuation has taken effect. A timely filing of an appeal also stays the discontinuation determination pending the outcome of the appeal. Contrary to the concerns of many commenters, the changes the Department is adopting will not result in the immediate discontinuation of services or limit employers' access to the clearance system; rather, the proposal provides sufficient due process to employers to refute any claims in the SWA's final determination, maintains employers' access to the ES system

pending resolution of a discontinuation action, and enables the development of a more complete record in the event of an appeal.

By staying the effect of discontinuation during an employer's appeal, the Department's process also provides the same due process rights to employers available in the current H–2A debarment procedures found at § 655.182(f)(3) and 29 CFR 501.20(e). Both sections grant stays in the debarment action so long as employers file timely appeals, and the stay continues through the appeal process. As with an H–2A debarment proceeding, an employer would not appear on a discontinuation list until final resolution of the discontinuation proceeding, including resolution of any appeals. Allowing employers to request a hearing only after issuance of a final determination is akin to the current OFLC process for H–2A labor certification applications under §§ 655.141 and 655.164, which provides employers the opportunity to remedy deficiencies in their applications before the CO issues a denial, but only allows employers to appeal after a denial has been issued, and not in response to a Notice of Deficiency (NOD). Providing for the opportunity to submit rebuttal evidence prior to the final determination and file an appeal after the final determination is also similar to the Department's audit resolution process for grant recipients under 2 CFR part 2900. The Department believes that the proposed discontinuation process is efficient, fair, and reasonable, and that because employers will have a full opportunity to contest the SWA's findings before they take effect, employers will be adequately safeguarded from the risk of erroneous deprivation of services.

As mentioned in previous sections, the Department also maintains that the purpose and application of discontinuation of services is distinct from debarment actions, which more narrowly apply to certain programs with different consequences under different authorities, though it notes that the process afforded employers under this regulation is similar to the process provided in a debarment proceeding. For these reasons, the Department adopts the changes to § 658.502(a)(1) through (7), as proposed.

Finally, in § 658.502(a)(1) through (7), the Department proposed changing the language that SWAs must notify employers that all *employment services* will be terminated to state that all *ES services* will be terminated. The proposed language would clarify that the services at issue are specific to the ES. The Department did not receive comments on this change and adopts it throughout paragraphs (a)(1) through (7), as proposed.

In addition to the changes described above, the Department proposed further revisions to paragraphs (a)(1) through (7) to provide greater detail and specificity regarding the type of information that SWAs must provide to employers when proposing to discontinue services. The proposed changes ensure that SWAs adequately explain their reasons for proposing discontinuation, and that employers have sufficient factual detail to respond to the proposed discontinuation. In these paragraphs, the Department also proposed small changes for clarity, including rewording sentences so they use the active voice. Specific proposed changes are discussed below.

MasLabor and USAFL and Hall Global expressed general, overall support for these proposed changes, stating that they include a greater level of detail and specificity regarding what SWAs must provide to justify discontinuation of services, and that they support and concur with the Department's reasoning in making the changes. Western Growers, Michigan Farm Bureau, AmericanHort, Willoway Nurseries, FSGA, NCFC, USApple, and FFVA expressed concern that employers, agents, attorneys, agricultural associations, joint employers, farm labor contractors, and successors in interest would likely receive more notices of intent to discontinue services and recommended that the Department provide clear instruction to SWAs regarding information they must include in notices. Additionally, they stated that it is prudent that the Department is providing instruction to the SWAs regarding what must be in the notices.

The Department thanks commenters for their support for these proposed changes. Given the greater level of detail and specificity regarding what SWAs must provide to justify discontinuation of services, the Department agrees with commenters that additional guidance for SWAs will help facilitate effective implementation of the notice requirement. As discussed throughout this final rule, the Department will issue guidance on the discontinuation of services regulation, including the SWA notification requirements in § 658.502.

a. Section 658.502(a)(1)

The Department proposed to revise paragraph (a)(1) to replace references to *specifications* with *terms and conditions* to clarify that the notification specifically involves terms and conditions of the job order, to align this paragraph with the proposed changes to § 658.501(a)(1), discussed above.

USAFL and Hall Global suggested that paragraph (a)(1)(i), which allows employers to submit evidence that the terms and conditions on clearance orders are not contrary to employment-related laws, should expressly permit legal argument. They further stated that SWAs should be allowed to invoke paragraph (a)(1) only when an agency with primary jurisdiction over the alleged violation has made a preliminary determination, with employer participation, that the language is in violation of employment-related laws. Additionally, they asked the Department to allow employers to contest and stay discontinuation pursuant to § 658.501(a)(1) by demonstrating that the matter has not yet been adjudicated on the merits. The commenters also added that the regulation should specify that the terms and conditions are those in § 655.122 and that the SWA may not add to them.

The Department appreciates the commenters' recommendations but declines to adopt them because they are beyond the scope of the non-substantive changes to this paragraph. Additionally, the Department believes a revision to expressly permit legal argument is unnecessary because submission of legal argument is not prohibited under § 658.502(a). The Department declines to specify that the terms and conditions in this paragraph mean only those terms and conditions in § 655.122 because §§ 658.501(a)(1) and 658.502(a)(1) apply to criteria and non-criteria orders, such that the terms and conditions in part 653, subpart F, and part 655, subpart B are applicable. Finally, as discussed above in the discussion of § 658.501(a)(1), the Department recognizes and appreciates the concerns and recommendations raised by commenters regarding effective and efficient resolution of employer and SWA disagreements under §§ 658.501(a)(1) and 658.502(a)(1). The Department intends to issue further guidance on discontinuation, including the notification and response procedures outlined in this paragraph. The Department adopts paragraph (a)(1), as proposed.

b. Section 658.502(a)(2)

In paragraph (a)(2), the Department proposed to add language explaining that SWAs must specify the assurances involved and must explain how the employer refused to provide the assurances. The Department also proposed a revision to paragraph (a)(2)(ii) to align this paragraph with the proposed changes to § 658.501(a)(2),

discussed above, regarding the scope of the required assurances.

USAFL and Hall Global stated that the regulation should specify in an appropriate section that the required assurances are those specified in § 655.135 and that the SWA may not add to them.

The Department declines to adopt the commenters' recommendation because it is outside the scope of the proposed changes in this paragraph. Additionally, the Department disagrees that assurances described in paragraph (a)(2) should be limited or otherwise pertain to those that are described in part 655, subpart B. Section 658.501(a)(2) states that the referenced assurances are those assurances required pursuant to the ARS for U.S. workers at part 653, subpart F, of this chapter. Accordingly, the assurances referenced in this paragraph are limited to those assurances listed in part 653, subpart F. The Department adopts paragraph (a)(2), as proposed.

c. Section 658.502(a)(3)

In paragraph (a)(3), to provide clearer direction to SWAs and better notice to entities receiving a notice, the Department proposed to add language stating that SWAs must specify the terms and conditions the employer misrepresented or the assurances with which the employer did not fully comply, and explain how the employer misrepresented the terms or conditions or failed to comply with assurances on the job order. In paragraph (a)(3)(iii), the Department proposed to remove the requirement that employers provide *resolution of a complaint which is satisfactory to a complainant referred by the ES,* replacing it with the requirement that an employer provide *adequate evidence that it has resolved the misrepresentation of terms and conditions of employment or noncompliance with assurance.* Evidence is adequate if the SWA could reasonably conclude that the employer has resolved the misrepresentation or noncompliance. The proposed change removes unnecessary and out-of-place language regarding ES complaints, which are addressed in paragraph (a)(5), and better aligns § 658.502(a)(3) with proposed § 658.501(a)(3). The Department also proposed combining paragraphs (a)(3)(iii) and (iv) to make clear that employers need to provide the information in paragraphs (a)(3)(iii) and (iv) together.

USAFL and Hall Global commented that the regulation should specify what *misrepresentation* means so that it identifies serious wrongdoing for which a serious penalty might be warranted and so that there is a uniform Federal standard as to its meaning. They stated that an employer in Michigan should be no better or worse than an employer in California. They suggested that the Department adopt the California misrepresentation standard because California offers wide-ranging worker protections and a large portion of H–2A workers work in that State. They stated that under the California standard, misrepresentation means: (1) a misrepresentation of a past or existing material fact; (2) without reasonable grounds for believing it to be true; (3) with intent to induce another's reliance on the fact misrepresented; (4) justifiable reliance thereon by the party to whom the misrepresentation was directed; and (5) damages. *See Petersen* v. *Allstate Indem. Co.,* 281 FRD. 413, 417 (C.D. Cal. 2012). They stated that this would allow the enforcement system to expend resources going after true and damaging misrepresentations rather than good-faith errors.

The Department declines to adopt the standard articulated in *Petersen* as it represents California's negligent misrepresentation standard (a misrepresentation made without reasonable ground for believing it to be true) and does not encompass intentional misrepresentation (a misrepresentation with knowledge of falsity). *See Nazemi* v. *Specialized Loan Servicing, LLC,* 637 F. Supp. 3d 856, 861 (C.D. Cal. 2022). The Department believes that any misrepresentation of the terms and conditions specified on the job order, whether intentional or negligent, is a basis for discontinuation. Job orders represent offers of employment and must include all material terms and conditions. Where a job order contains false, erroneous, or misleading statements regarding a term or condition of employment, for example an omission of a required job duty or an incorrect statement regarding rate or frequency of pay, potential workers are not fully apprised of the terms under which they might be employed and may rely (or reasonably be expected to rely) on the incorrect terms and conditions to their detriment. While this is important for all job orders, it is especially important in the case of intrastate and interstate clearance orders, through which employers recruit migrant farmworkers from outside of the commuting distance. Such workers rely on the accuracy of job orders to decide whether they will accept the offered employment, for which they must travel and are not able to return home within the same day, should they find that the employment is different than described. For criteria clearance orders, which represent most of the clearance orders SWAs process, H–2A workers travel from other countries for the advertised work and may have limited resources in the event of misrepresentation. Thus, it is critical that employers, agents, farm labor contractors, etc. do not misrepresent, intentionally or negligently, any terms or conditions on job orders. Finally, contrary to the commenter's concern, the Department thinks that this approach can be uniformly applied by the SWAs and is concerned that a multi-factor test could be inconsistently implemented or applied in States and, therefore, thinks that the commenter's suggestion will lead to less, not more, uniformity. The Department will issue guidance on § 658.501(a)(3) and § 658.502(a)(3) to ensure uniform application of these provisions.

Additionally, as discussed above, the Department intends for SWAs to initiate discontinuation proceedings against the party responsible for the misrepresentation. Where an employer reasonably relies on their agent or attorney regarding the contents of the clearance order, or the agent or attorney reasonably relies on an employer's description of the terms and conditions of the job, the Department does not anticipate that the SWA would initiate proceedings against those parties. While a SWA may initiate discontinuation against multiple parties, the ability for the SWA to initiate proceedings against only the party responsible for the misrepresentation will protect entities that act in good faith in the development and submission of clearance orders. For these reasons, the Department declines to adopt the California negligent misrepresentation standard suggested by commenters. The Department adopts paragraph (a)(3), as proposed.

d. Section 658.502(a)(4)

In paragraph (a)(4), the Department proposed to add language that SWAs must provide evidence of the final determination by an enforcement agency of a violation of an *employment-related law* or debarment with the notice of intent to discontinue services. For final determinations, the Department proposed adding language clarifying that the SWA must specify—as discussed in the final determination or debarment—the enforcement agency's findings of facts and conclusions of law as to the employment-related law violation(s). For final debarment orders, the Department proposed adding language requiring the SWA to specify the time

period for which the employer is debarred from participating in one of the Department's foreign labor certification programs.

The Department also proposed revisions to § 658.502(a)(4)(i) through (iii) to clarify and explain the evidence and assurances that the employer may provide to avoid discontinuation of services. In paragraph (a)(4)(i), the Department proposed to remove existing language stating that the employer may provide evidence that the enforcement agency reversed its ruling and that the employer did not violate employment-related laws; and to replace it with language stating that the employer may provide evidence that the determination at issue is not final because, for example, it has been stayed pending appeal, overturned, or reversed. The Department proposed a new paragraph (a)(4)(ii) that requires employers to submit evidence that their period of debarment is no longer in effect and that they have taken all actions required by the enforcement agency as a consequence of the violation. The proposed paragraph (a)(4)(ii)(B) incorporated existing language and was meant to more clearly encompass any and all actions required by final determination but does not substantively change what an employer has to show under current § 658.502(a)(4)(ii). The Department did not receive any comments on these proposed changes and adopts paragraph (a)(4), as proposed.

e. Section 658.502(a)(5)

In paragraph (a)(5), the Department proposed new language to clarify that the SWA must specify which ES regulation the employer has violated and must provide basic facts to explain the violation. The proposed language ensures that SWAs provide sufficient factual detail regarding the ES violation at issue so the employer can respond. The Department did not receive comments on this change and adopts, paragraph (a)(5), as proposed.

f. Section 658.502(a)(6)

The Department proposed to revise § 658.502(a)(6) to explain that SWAs must state that the job order at issue was filed pursuant to part 655, subpart B and specify the name of each worker who was referred and not accepted. The proposed revision would be consistent with the proposed change to § 658.501(a)(6) and would ensure that SWAs provide sufficient factual detail regarding the workers at issue so the employer can respond. In paragraph (a)(6)(iii), the Department proposed changing *and* to *or* to decouple paragraph (a)(6)(iii) from the assurances required in existing paragraph (a)(6)(iv), as it is not necessary for employers that did not violate the requirement to provide assurances of future compliance. The Department proposed a new paragraph (a)(6)(iv), to add an option for the employer to show that it was not required to accept the referred workers, because the time period under 20 CFR 655.135(d) had lapsed, and a new paragraph (a)(6)(v), to add an option for the employer to show that, after initial refusal, it subsequently accepted and offered the job to the referred workers or to show that it had provided all appropriate relief imposed as a result of the refusal. Finally, the Department proposed to move existing paragraph (a)(6)(iv) to paragraph (a)(6)(vi) to maintain the requirement that the employer provide assurances that qualified workers referred in the future will be accepted; and add new language to clarify the assurance that is required depending on whether the period described in 20 CFR 655.135(d) has lapsed, as after the end of the period the employer would no longer be required to accept referred workers on the particular clearance order involved. This change would provide a means of ensuring future compliance with the requirement that employers submitting criteria clearance orders hire all qualified workers referred to the order, as described in part 655, subpart B.

MásLabor and USAFL and Hall Global stated that they support the Department's proposal to add new paragraph (a)(6)(v), as written. They also supported the Department's proposal to require SWAs to provide the precise factual and legal basis, including concrete information regarding the specific job order and workers involved, for any initiation of discontinuation procedures.

The Department appreciates the supportive comments and adopts paragraph (a)(6), as proposed.

g. Section 658.502(a)(7)

In paragraph (a)(7), the Department proposed clarifying edits that provide clearer direction to the SWA but that do not change the regulation's meaning, including rephrasing sentences and changing the pronoun used for employers to *it* instead of *he/she.* The Department did not receive comments on these clarifications and adopts paragraph (a)(7), as proposed.

h. Section 658.502(a)(8)

The Department proposed to add a new paragraph (a)(8) to explain information the SWA must include in its notice to an employer proposing to discontinue services where the decision is based on § 658.501(a)(8) (repeatedly causes the initiation of discontinuation of services). The Department proposed that the SWA must list and provide basic facts explaining the prior instances where the employer has repeatedly caused initiation of discontinuation proceedings to provide notice of the basis for the SWA's action and to facilitate the employer's response. The Department proposed that the SWA must notify the employer that all ES services will be terminated unless the employer within that time provides adequate evidence that the SWA's initiation of discontinuation in prior proceedings was unfounded. The proposed paragraph (a)(8) would replace existing paragraph (c), which discusses discontinuation based on § 658.501(a)(8) but does not include clear direction to the SWA and does not provide sufficient notice to employers to allow them to respond. The Department did not receive comments on these changes and adopts paragraph (a)(8), as proposed.

i. Section 658.502(b) and (d)

The Department proposed to remove existing § 658.502(b) and (d) because these paragraphs pertain to the employer's pre-determination opportunity to request a hearing. As described in the discussion of § 658.502(a)(1) through (7) above, the Department proposed to eliminate the opportunity for an employer to request a hearing until after the SWA has provided its final notice on discontinuation of services to the employer. The Department received several comments regarding the removal of the opportunity for a pre-discontinuation hearing, which are summarized and addressed above. For the reasons fully explained in the discussion of § 658.502(a)(1) through (7), the Department adopts the NPRM's proposed removal of existing § 658.502(b) and (d) without modification.

The Department proposed a new § 658.502(b) to explain the circumstances that warrant immediate discontinuation of services. The proposed addition replaces existing § 658.501(b), in part, and states that SWA officials must discontinue services immediately, in accordance with § 658.503, without providing the notice of intent and opportunity to respond described in this section, if an employer has met any of the bases for discontinuation of services under § 658.501(a) and, in the judgment of the State Administrator, exhaustion of the administrative procedures set forth in

this section would cause substantial harm to workers. The prior version of § 658.501(b) stated that SWA officials *may* discontinue services immediately in these circumstances, whereas the proposed new § 658.502(b) states that SWAs *must* discontinue services immediately. Additionally, the prior § 658.501(b) allows for discontinuation when there would be substantial harm to a *significant number* of workers, whereas the proposed new § 658.502(b) requires immediate discontinuation when there would be substantial harm to workers. The Department proposed these changes because it thought that immediate discontinuation is warranted where the harm at issue would involve only one or a small number of workers, and that where such harm would occur, SWAs must be required to initiate discontinuation to prevent the harm from actually occurring to workers. Finally, this proposed paragraph clarified that immediate discontinuation is appropriate only when a basis under proposed § 658.501 exists *and* the SWA determines that substantial harm would occur; risk of substantial harm alone is not enough for a SWA to immediately discontinue services.

UMOS, Green America, CAUSE, PCUN, the North Carolina Justice Center, UFW, and the UFW Foundation expressed general support for *requiring* SWAs to immediately discontinue services in circumstances where it is warranted. In contrast, IFPA, GFVGA, NHC, Titan Farms, LLC, U.S. Custom Harvesters, Inc., Demaray Harvesting and Trucking, LLC, TIPA, the U.S. Chamber of Commerce, the American Farm Bureau Federation, USA Farmers, the Wyoming Department of Agriculture, wafla, an individual, and an anonymous commenter opposed the proposed changes to § 658.502(b), citing due process concerns. Specifically, they stated that the proposed changes do not define ''substantial harm'' and give State Administrators broad and vague discretion to determine what it means. They expressed concern that allegations of substantial harm to a single worker could give rise to immediate discontinuation, and that such allegations do not require any verification prior to immediate discontinuation. IFPA and TIPA both stated that the proposed changes pave the way for abuse by singularly disgruntled employees. Overall, commenters stated that the proposed changes curtail the rights of employers to meaningfully address allegations of substantial harm and will cause significant economic loss through delays or ultimate denial of access to the H- 2A program. They stated that mandatory, immediate discontinuation must be substantiated, must be based on more than one claim by a single worker, must be reserved for egregious acts causing significant harm, and must provide an opportunity for review prior to discontinuation.

Regarding what constitutes *substantial harm,* as discussed in the NPRM, the Department envisions immediate discontinuation in situations involving significant health and safety issues, including, but not limited to, physical violence, sexual harassment, assault, coercion, and human trafficking. The Department envisions a SWA will also consider immediate discontinuation of services when employers cause substantial risk of injuries due to unsafe working conditions like heat stress, infectious disease, exposure to chemicals or pesticides, and work-related machinery. Thus, where the State Administrator determines that exhaustion of the administrative procedures set forth in this section would cause such harm, the Department thinks immediate discontinuation is warranted to protect the safety and welfare of workers.

As discussed above, the Department believes that immediate discontinuation is warranted even where the harm at issue would involve only one or a small number of workers. The Department understands commenters' concerns that the allegations of a single employee, such as a disgruntled employee, could lead to immediate discontinuation. However, the Department believes that its proposed changes to the immediate discontinuation regulation safeguard against these concerns. The Department reiterates that immediate discontinuation is appropriate only where a basis under proposed § 658.501 exists; and is reserved only for those situations where the State Administrator determines that substantial harm to at least one worker will occur if action is not immediately taken. Thus, even where a single employee makes an allegation, the SWA must *first* have sufficient factual information—*e.g.,* a finding via a field check that an employer has misrepresented the terms in its job order (§ 658.501(a)(3)) or a finding of violations of ES regulations (§ 658.501(a)(5))—to articulate a basis for discontinuation. The SWA must *then* have a sufficient basis, supported by factual detail, to support its determination that *not* taking immediate action would cause substantial harm to workers (*see* proposed § 658.503(b)). For example, the SWA may rely on observation or findings of substantial harm from field checks and determine that such harm will continue if the SWA does not take immediate action. Similarly, the SWA may receive documentation or photos from public sources, such as newspapers, that an employer's working conditions have caused substantial harm to workers; and, after verifying or corroborating its accuracy, determine that such harm will continue if the SWA does not take immediate action. In all instances, there must be a basis for discontinuation that is supported by factual detail and a determination, with sufficient reasoning supported by factual detail, that exhaustion of administrative procedures would cause substantial harm. The Department will issue further guidance on immediate discontinuation, including the circumstances giving rise to immediate discontinuation.

As discussed in the NPRM and below, where a SWA issues a determination to immediately discontinue services, the discontinuation is effective the date of the notice. An employer's appeal will not stay the discontinuation, and the SWA will not process that employer's clearance orders during the period of discontinuation. Regarding commenter concerns that immediate discontinuation curtails the rights of employers to meaningfully address allegations of substantial harm, the Department emphasizes that, at any time following the issuance of the discontinuation notification, employers may rebut a SWA's determination via the reinstatement process (*see* proposed §§ 658.503(b) and 658.504). Regarding commenter concerns that immediate discontinuation will cause employers economic loss through delays or ultimate denial of access to the H–2A program, the Department believes that any delayed access to the ES Clearance System as a result of immediate discontinuation is warranted, as any burden employers face by not having access to ES services is outweighed by the Department's interest in protecting workers from the harmful, potentially dangerous situations giving rise to immediate discontinuation. Moreover, the Department notes that in lieu of an appeal, an employer subject to immediate discontinuation may request reinstatement from the SWA under proposed § 658.504(b). Thus, the burden to any employer is mitigated by the opportunity to request reinstatement, and the proposed 20-day timeframe for the SWA to respond to such a request may provide for timely and efficient resolution of an immediate discontinuation.

5. Section 658.503, Discontinuation of Services

Section 658.503 describes the procedural requirements a SWA must follow when issuing a final determination regarding discontinuation of services to an employer. The Department proposed to revise paragraph (a) to require that within 20 working days of receipt of the employer's response to the SWA's notification under § 658.502, or at least 20 working days after the SWA's notification is received by the employer if the SWA does not receive a response, the SWA must notify the employer of its final determination. When the SWA sends its notification, the Department proposed that it do so in a manner that allows the SWA to track receipt of the notification, such as certified mail. If the SWA determines that the employer did not provide a satisfactory response in accordance with § 658.502 the SWA's notification must specify the reasons for its determination, state that the discontinuation of services is effective 20 working days from the date of the notification, state that the employer may request reinstatement or a hearing pursuant to § 658.504, and state that a request for a hearing stays the discontinuation pending the outcome of the hearing. The Department proposed this stay pending appeal and the 20-working-day period to ensure that employers are provided an opportunity to challenge the SWA's determination before losing access to all ES services. Staying the effect of discontinuation during the pendency of an appeal is appropriate to allow for full adjudication and resolution of any issues related to the SWA's findings before they become final and binding on the employer and the ES system, mitigating the risk that an employer is erroneously deprived of access to services, similar to the procedures in § 658.502. Additionally, placing the effective date at the end of the 20-day period, rather than at the issuance of the notification, avoids depriving appealing employers of ES services for a short period of time prior to their request for hearing. This also makes for a more efficient process for SWAs and ETA, as these agencies would otherwise expend time and resources to effectuate a discontinuation that may be premature—if the employer requests a hearing a short time later, agencies would need to use additional resources to then stay the discontinuation they just effectuated. To facilitate implementation and maintenance of the proposed OWI discontinuation of services list, discussed above, the Department proposed that the SWA must also notify OWI of any final determination to discontinue ES services, including any decision on appeal upholding a SWA's determination to discontinue services. Proposed § 658.503(a) removed language regarding pre-discontinuation hearings to correspond with proposed changes to § 658.502.

The Department did not receive comments that identified § 658.503(a). However, the Department received many comments regarding the proposal to remove pre-discontinuation hearings through revisions to § 658.502, which the Department discussed above in the response to that section. The Department finalizes the changes to § 658.503(a) as proposed.

a. Section 658.503(b)

The Department proposed to add a new § 658.503(b) to explain the procedures for immediate discontinuation of services and to incorporate them into the general discontinuation procedures at § 658.503. The proposed new paragraph (b) replaces existing § 658.501(b), in part, and states that the SWA must notify the employer in writing that its services are discontinued as of the date of the notice. The proposed provision would also require that the notification must also state that the employer may request reinstatement or a hearing pursuant to § 658.504, and that a request for a hearing relating to immediate discontinuation would not stay the discontinuation pending the outcome of the hearing. The proposed new § 658.503(b) adds that SWAs must specify the facts supporting the applicable basis for discontinuation under § 658.501(a) and the reasons that exhaustion of the administrative procedures would cause substantial harm to workers. The proposed addition ensures that employers have sufficient information regarding the SWA's rationale for immediate discontinuation and makes clear that employers have recourse to the State administrative hearing process or reinstatement process if a SWA immediately discontinues services. While discontinuation under a determination issued under § 658.503(a) is delayed until the employer's time to appeal the determination has ended, in proposing this provision the Department determined that the circumstances justifying a notice of immediate discontinuation also justify that the discontinuation be effective immediately, and that it remain in effect unless the employer is reinstated or the determination is overturned. As noted in the NPRM and as discussed above, immediate discontinuation is reserved for those situations where the State Administrator determines that substantial harm to at least one worker will occur if action is not immediately taken. Delaying the effective date of the discontinuation would undermine the protection that the immediate discontinuation procedure is designed to provide. Finally, as with proposed § 658.503(a), to facilitate implementation and maintenance of the proposed OWI discontinuation of services list, discussed above, the Department proposed that the SWA must also notify OWI within 10 days of any determination to immediately discontinue ES services.

Wafla opposed the proposed change that would mean a request for a hearing does not stay discontinuation, stating that it allows SWAs to discontinue services without full due process. The Colorado Department of Labor and Employment asked that the Department provide examples of *information evidencing* that employers have made threats or perpetuated violence or other substantial harm, and whether a complaint or allegation alone is sufficient to immediately discontinue services. IFPA, GFVGA, TIPA, NHC, Titan Farms, LLC, and an individual asked that the Department substantiate its rationale for the proposed changes with evidence and verified data, particularly as it pertains to the Department stating that it received information regarding violations over the last several years. The commenters stated that the Department did not provide further information, such as whether that information included mere allegations by an unhappy employee, or whether the alleged incidents were isolated or represented a statistically valid percentage of violation to justify the proposed changes to immediate discontinuation.

The Department appreciates the commenters' concerns and requests for clarification. As to the Department's proposal that a request for a hearing will not stay discontinuation, the Department reiterates that employers who experience immediate discontinuation of services have recourse to the State administrative hearing process or reinstatement process. In instances that would give rise to an immediate discontinuation, the Department believes that its interest in protecting workers from the harmful, potentially dangerous situations giving rise to immediate discontinuation outweighs any burden employers may experience while services are discontinued. The burden to any employer is mitigated by the

opportunity to request reinstatement from the SWA, and that the proposed 20-day timeframe for the SWA to respond to such a request may provide for timely and efficient resolution of an immediate discontinuation.

As to the SWA's request for examples of information or evidence that would demonstrate substantial harm, the Department emphasizes that a complaint or allegation alone is insufficient to warrant immediate discontinuation. The State Administrator must have *information evidencing* that substantial harm to workers will occur if action is *not* immediately taken. For example, the SWA may rely on observation or findings of substantial harm from field checks and determine that such harm will continue if the SWA does not take immediate action. Similarly, the SWA may receive documentation or photos from public sources, such as newspapers, indicating that an employer's working conditions have caused substantial harm to workers; and, after verifying or corroborating its accuracy, determine that such harm will continue if the SWA does not take immediate action. The Department further reiterates that immediate discontinuation is appropriate only where there is a basis to discontinue services under § 658.501(a).

Finally, as to the request that the Department substantiate its rationale for the proposed changes, particularly as it pertains to the Department stating that it received information regarding violations over the last several years, the Department reiterates that the ability of SWAs to immediately discontinue services to employers due to substantial harm is not new. The Department confirms that SWAs have obtained conclusive evidence of employers in Virginia and Louisiana [10] threatening workers with physical violence in retaliation for workers asserting their employment-related rights, which could warrant immediate discontinuation of services. In these cases, evidence included video and audio recordings. For these reasons and the reasons set forth in the NPRM, the Department adopts § 658.503(b), as proposed.

b. Section 658.503(c) and (d)

The Department proposed to move current § 658.503(b), which requires the SWA to notify the relevant ETA regional office if services are discontinued to an employer subject to Federal Contractor Job Listing Requirements, to proposed new paragraph (c) and to make minor edits to use active voice and to improve clarity. The Department proposed to add paragraph (d) to require SWAs to notify the complainant of the employer's discontinuation of services, if the discontinuation of services is based on a complaint filed pursuant to § 658.411. This requirement would align with § 658.411(b)(2) and (d). The Department did not receive comments on these changes and adopts them, as proposed.

c. Section 658.503(e)

The Department proposed to add a new paragraph (e) to explain the effect discontinuation of services has on employers. The proposed new paragraph explains that employers that experience discontinuation of services may not use any ES activities described in parts 652 and 653, and that SWAs must remove the employer's active job orders from the clearance system and must not process any future job orders from the employer for as long as services are discontinued. The Department proposed that an employer's loss of access to ES services applies in all locations throughout the country where such services may be available. Through the NPRM, the Department solicited comments on the effect on both workers and employers of removing active job orders, particularly criteria orders.

The Department received a comment from wafla that disagreed that an employer's loss of access to ES services should apply in all locations throughout the country where such services may be available. Wafla said that the proposed change would allow SWA staff from different sides of the country to determine actions of other SWAs and alleged that this would cause due process concerns. They expressed concern that enforcement could be inconsistent and subjective between States. Wafla was also concerned that SWAs might initiate discontinuation of services to multistate employer organizations as a result of frontline supervisors or rogue individual management in different locations and said that national employers may not be aware of all supervisor actions in their companies. Wafla contended that if a violation is found in one State related to a supervisor or manager, the employer should have an opportunity to evaluate their management in different States without fear of one bad actor causing discontinuation of services, including access to the H–2A program for the entire company.

The Department believes it is necessary to establish that discontinuation of services in one State means that the employer cannot participate in or receive Wagner-Peyser Act ES Services provided by any SWA in any other State. The ES System is a national labor exchange service that facilitates job recruitment and placement across the States. The Department has an interest in ensuring proper, effective, and lawful use of the ES System, and the discontinuation provisions at part 658, subpart F are meant to prevent employers who do not comply with ES regulations from accessing ES services. As discussed in the NPRM, if the effect of discontinuation were limited to only the State that discontinued services, it would frustrate the purpose of discontinuation.

The Department disagrees that the proposed national effect of discontinuation would create inconsistencies or due process concerns. The regulations in part 658, subpart F prescribe uniform standards that all SWAs must follow, and against which the Department monitors and assesses SWA performance. If a SWA is not complying with the requirements in this part, the Department will take appropriate action. Moreover, the proposed OWI discontinuation of services list provides a mechanism to ensure that SWAs are not providing services to employers whose services have been discontinued, thereby facilitating consistent application of the discontinuation provisions across the States. The Department believes that these regulations provide sufficient due process as they provide employers several opportunities to address the SWA's action—first by responding to the SWA's initial notice under § 658.502, then by appealing the SWA's final determination by requesting a hearing or by requesting reinstatement (including requesting a hearing if the SWA denies the request for reinstatement) under § 658.504. If the employer requests a hearing, the SWA must follow procedures at § 658.417. As described at § 658.418(c), all decisions of a State hearing official must be accompanied by a written notice informing the parties that they may appeal the decision in writing with the ETA Regional Administrator, within 20 working days of the certified date of receipt of the decision. As noted above, if an employer requests a hearing in response to a SWA's decision to discontinue services, the discontinuation is stayed pending the outcome of the appeal, thereby

[10] *See, e.g.,* DOL, News Release, *Federal Court Orders Louisiana Farm, Owners to Stop Retaliation After Operator Denied Workers' Request for Water, Screamed Obscenities, Fired Shots* (Oct. 28, 2021), *https://www.dol.gov/newsroom/releases/whd/whd20211028-0.*

providing employers an opportunity to challenge the discontinuation *before* losing access to all ES services. Employers may also file complaints against the SWA or ETA regional office under part 658, subpart E if they believe the SWA's discontinuation of services procedures are not compliant with ES regulations. These complaints are processed pursuant to § 658.411(d).

Employers, including multistate employers, are responsible for ensuring that their staff do not perpetrate violations that cause SWAs to initiate discontinuation of services. If an employer identifies that an individual staff member is responsible for a violation that is not pervasive throughout the company, the employer has an opportunity to present that evidence along with remedial actions the employer has taken to resolve the violation and prevent future offenses, during the period described in § 658.502 or as part of a request for reinstatement pursuant to § 658.504.

The Department maintains that it is critical to worker protection for discontinuation of services to apply nationally to prevent discontinued employers from filing job orders or using other ES services without first resolving the violation at issue. Accordingly, the Department adopts paragraph (e), as proposed.

d. Section 658.503(f)

The Department proposed new paragraph (f) to explain that SWAs must continue to provide the full range of ES and other appropriate services to workers whose employers' services have been discontinued. The proposed new paragraph makes it clear that discontinuation of services to employers does not, and should not, negatively affect workers. SWAs must continue to provide necessary support to workers, including outreach to MSFWs, access to the ES and Employment-Related Law Complaint System, and all available ES services. The Department did not receive any comments on this provision and adopts the changes to paragraph (f), as proposed.

e. Section 658.504

Section 658.504 describes the procedural requirements for seeking reinstatement of ES services, which can be done either by requesting that the SWA reconsider its decision or by requesting a hearing. The Department proposed to restructure this section to more clearly explain how services may be reinstated, the timeframes in which the employers and SWA must act, and the circumstances under which services must be reinstated.

The Department proposed to revise paragraph (a) to make clear that employers have two avenues with which to seek reinstatement of services—via a hearing or a written request to the SWA at any time following the discontinuation. The revised paragraph (a) adds the new requirement that an employer who requests a hearing following discontinuation do so within 20 working days of the date of discontinuation.

The National Council of Agricultural Employers (NCAE), Ventura County Agricultural Association, Florida Citrus Mutual, and Labor Services International opposed the new requirement that the employer file an appeal within 20 working days of the SWA's final determination, stating that the requirement raises due process concerns and is arbitrary and capricious.

As discussed in the NPRM, the Department believes that both the State and the employer have an interest in timely and efficient adjudication of disputes. For example, SWAs have an interest in resolving discontinuation proceedings quickly and efficiently so that it can better protect workers who use the ES system and so that it uses Federal funds efficiently. Employers have an interest in quick and efficient access to the ES clearance system as part of their business operations, which includes efficient and timely resolution of discontinuation proceedings. The Department continues to think that providing 20 working days to appeal a final discontinuation determination balances the needs and interests of the SWAs and employers. In addition, the proposed 20-day requirement aligns with proposed § 658.503, which provides that a SWA's final determination is effective 20 working days from the date of notification, and that a timely appeal stays the discontinuation. Taken together, the stay pending appeal and the 20-day requirements in proposed §§ 658.503 and 658.504 ensure that employers who timely appeal can challenge a SWA's determination without losing access to ES services during the appeal process while ensuring timely and efficient adjudication of discontinuation matters. The Department further notes that the proposed 20-working-day requirement aligns with a similar requirement in the prior regulation as well as the new paragraph (b), which states that employers may request a hearing within 20 working days of a SWA's reinstatement determination. Finally, the Department notes that there is no time limit for requesting reinstatement under § 658.504, so if an employer missed the 20-day deadline to appeal, they could seek reinstatement at any time and appeal an adverse reinstatement decision. For these reasons, the Department adopts § 658.504(a), as proposed.

f. Section 658.504(b)

The Department proposed to revise § 658.504(b) by combining the parts of § 658.504(a) and (b) into a new § 658.504(b) to more clearly explain the circumstances and procedures under which SWAs must reinstate services when an employer submits a written request for reinstatement. The Department proposed new paragraph (b)(1), which retains the current 20-day timeline in existing paragraph (b) within which the SWA must notify the employer whether it grants or denies the employer's reinstatement request. The proposed paragraph (b)(1) also requires that if the SWA denies the request, the SWA must specify the reasons for the denial and must notify the employer that it may request a hearing, in accordance with proposed paragraph (c), within 20 working days.

The Department also proposed to move current paragraph (a)(2), which describes the evidence necessary for reinstatement, to proposed paragraph (b)(2) to align with the overall restructuring of the section. The Department also proposed to remove the word *any* to require that the employer show evidence that all applicable specific policies, procedures, or conditions responsible for the previous discontinuation are corrected, instead of *any* policies, procedures, or conditions responsible for the previous discontinuation. The Department is concerned that the current language could permit reinstatement despite an employer not correcting all relevant policies, procedures, or conditions, which would be inconsistent with the purpose of discontinuation. Finally, the Department also proposed to change the pronoun used for employers to *it* instead of *his/her.*

Farmworker Justice supported the proposed changes to paragraph (b) and suggested that the Department provide examples of employer action that would constitute adequate evidence of corrective action and restitution, as described under proposed paragraph (b)(2). For example, under proposed § 658.504(b)(2)(i), Farmworker Justice suggested that the Department require that corrective action plans be disclosed in future job orders as evidence that policies, procedures, or conditions responsible for the previous discontinuation of services have been

corrected; that corrective actions plans be in English and the native language of workers at the site; and that the Department create an anonymous tip line for workplaces subject to a corrective action plan to report any noncompliance with the plan. Farmworker Justice also suggested that the Department provide a nonexhaustive list of the types of restitution that may be available to employers under proposed § 658.504(b)(2)(i), and suggested liquidated damages paid to the workers for housing violations set on a scale based on the severity of the violation, damages paid to non-H–2A workers who were offered fewer hours than their H–2A counterparts, and damages to workers assigned non-agricultural duties.

The Department notes that it did not make any substantive edits to proposed paragraph (b). The Department's proposal was limited to restructuring paragraph (b) to more clearly explain how services may be reinstated. The Department moved existing paragraph (a)(2) to proposed paragraph (b)(2), and existing paragraph (b) to proposed paragraph (b)(1), with minor clarifying edits. While the Department appreciates the commenter's suggestions, they are outside of the scope of the proposed changes in this paragraph. Accordingly, the Department adopts paragraph (b), as proposed, without change.

g. Section 658.504(c)

The Department proposed to revise § 658.504(c) to explain the circumstances and procedures under which SWAs must reinstate services when an employer submits a timely, written request for a hearing. The proposed revisions maintain the procedures in existing paragraphs (a)(1), (c), and (d), but have reorganized them into the same paragraph for clarity. The Department also proposed to replace the abbreviated term *Federal ALJ* in the existing regulation with *Federal Administrative Law Judge,* commonly abbreviated as ALJ.

MásLabor submitted comments that USAFL and Hall Global adopted. They recommended that the Department modify paragraph (c)(2) to also state that SWAs must reinstate services where a CO determines that a job order is compliant with all employment-related laws, as evidenced through the CO issuing a Notice of Acceptance. MásLabor also said that the Department should modify the hearing procedures to allow the employer to appeal directly to an ALJ in lieu of a State hearing official and that, at minimum, the Department should permit an appeal to an ALJ if the basis for the SWA's discontinuation is a dispute about Federal employment-related laws.

The Department declines to modify paragraph (c)(2) to require SWAs to reinstate services if a CO determines that the job order was compliant with all employment-related laws, as evidenced through the CO issuing a Notice of Acceptance. Such a change would exceed the scope of proposals that the Department made in this section and, were the Department to implement it in this final rule, it would deprive the public of its right to comment. The Department did not propose substantive changes in paragraph (c)(2); rather it proposed to maintain the procedures in existing paragraphs (a)(1), (c), and (d), and to reorganize them for clarity. The Department notes that an employer may provide evidence during a hearing or other appeal procedures that a CO issued a Notice of Acceptance related to a criteria clearance order. The Department also notes that employers may submit such evidence to SWAs during the 20-day response period before SWAs make a final determination to discontinue services, which is described at § 658.502. This evidence will be evaluated based on the particular facts and circumstances. As mentioned in other sections, the Department plans to provide guidance to SWAs regarding these procedures for discontinuation of services, including reinstatement.

Similarly, the Department declines to modify the hearing procedures to allow the employer to appeal directly to an ALJ in lieu of a State hearing official or to permit a direct appeal to an ALJ if the basis for the SWA's discontinuation is a dispute about Federal employment-related laws. These changes are also outside of the scope of the non-substantive clarifying edits to this paragraph. Regardless, the Department notes that the State hearing process is long established and remains necessary because States have an interest in hearing issues involving employers in their territories. Additionally, SWAs carry out requirements of the Wagner-Peyser Act ES, which is a Federal grant program, and have authority to apply the requirements of the Federal program. As described at § 658.504(c)(1), if the employer submits a timely request for a hearing, the SWA must follow the procedures set forth in § 658.417. Section 658.417(a) states that a State hearing official may be any State official authorized to hold hearings under State law. Examples of hearing officials are referees in State unemployment compensation hearings and officials of the State agency authorized to preside at State administrative hearings. Pre-existing regulations at § 658.418(a)(4) further state that a State hearing official may render rulings as are appropriate to resolve the issues in question. While a State hearing official does not have authority or jurisdiction to consider the validity or constitutionality of the ES regulations or of the Federal statutes under which they are promulgated, the State hearing official does have jurisdiction to rule on employer compliance with Federal ES regulations.

For the reasons described above, the Department adopts § 658.504(c), as proposed.

h. Section 658.504(d)

The Department proposed a new paragraph (d) to require that SWAs notify OWI of any determination to reinstate ES services, or any decision on appeal upholding a SWA's determination to discontinue services, within 10 working days of the date of issuance of the determination.

The Department received a comment from the Colorado Department of Labor and Employment that asked how SWAs would know if an employer is reinstated in the State that discontinued services to the employer, and whether the discontinuation of services list will be updated when an employer is removed from the list.

The Department notes that the purpose of new paragraph (d), is to facilitate the Department's ability to update and keep the discontinuation of services list accurate. The list will be updated continually as SWAs notify ETA of determinations regarding discontinuation and reinstatement. SWAs will know if an employer has been reinstated because the employer will have been removed from the list. The Department expects that SWAs will regularly consult the discontinuation of services list and will provide further guidance regarding notification procedures relating to its maintenance and use. The Department adopts new paragraph (d), as proposed.

VI. Discussion of Revisions to 20 CFR Part 655, Subpart B

A. Introductory Sections

1. Section 655.103(e), Defining Single Employer Test

In the NPRM the Department proposed to define a new term, ''single employer,'' to codify and clarify its long-standing approach to determine if multiple separate employers are operating as one employer for the purposes of the H–2A program. As

noted in the NPRM, the Department has encountered numerous instances over at least the last decade where it appears separate entities are using their corporate structure—intentionally or otherwise—to bypass statutory and regulatory requirements to receive a temporary agricultural labor certification or to circumvent regulations aimed at protecting workers in the United States. *See, e.g., Lancaster Truck Line,* 2014–TLC–00004, at *2–3, 5 (BALCA Nov. 26, 2013) (employer was ''frank about separating the legal entities of his operation'' from his father to ''comply with the H–2A program's seasonal permitting restrictions'' and the ALJ held the attempt to divide work did not demonstrate temporary need).

The Department received numerous comments both opposed to and in support of this proposal and will address the comments in turn. Several comments from advocacy organizations, States, an individual, U.S. House Members, and U.S. Senators expressed general support for the proposal without further elaboration. Numerous other commenters expressed at least some support for the additional definition and will be discussed further below. The remaining comments opposed the addition of the definition of the single employer test. After careful consideration, the Department will incorporate the proposed definition of the single employer test, also known as the integrated employer test, into the regulations without change.

This section discusses: (1) the definition and use by OFLC; (2) the authority by which the Department adds this definition to the regulation; (3) the Four Factor Test, various business structures, and NODs; (4) Board of Alien Labor Certification Appeals (BALCA) case law and ''joint employers''; (5) other OFLC-related comments pertaining to the new definition; and (6) application of the test during enforcement by WHD.

a. Definition and Use by OFLC

As noted in the NPRM, the Department already applies a single employer test in the H–2A program in certain contexts. OFLC currently uses this test to determine if multiple nominally separate employers should be considered as one entity for the purposes of determining whether an applicant for labor certification has a temporary or seasonal need, and WHD uses this test to determine whether H–2A employers complied with program requirements. This test originated with the National Labor Relations Board (NLRB) and has been adopted by courts and Federal agencies under a wide variety of statutes. *See South Prairie Const. Co.* v. *Local No. 627, Int'l Union of Operating Eng'rs, AFL–CIO,* 425 U.S. 800, 803 (1975) (NLRA); *see also Knitter* v. *Corvias Military Living LLC,* 758 F.3d 1214, 1215 (10th Cir. 2014) (Title VII); *Bristol* v. *Bd. Of Cty. Comm'rs,* 312 F.3d 1213, 1218 (10th Cir. 2002) (Americans with Disabilities Act (ADA)). As the Second Circuit has explained, the single employer test may be used to determine liability for employment-related violations, as well as to determine employer coverage. *Murray* v. *Miner,* 74 F.3d 402, 404 n.1 (2d Cir. 1996). The policy underlying the doctrine is ''fairness . . . where two nominally independent entities do not act under an arm's length relationship.'' *Id.* at 405. Consistent with judicial and administrative decisions, the Department has typically looked to four factors to determine whether the entities at issue should be considered a single employer for purposes of temporary need and compliance: (1) common management; (2) interrelation between operations; (3) centralized control of labor relations; and (4) degree of common ownership/financial control (the ''Four Factor Test''). *See, e.g., Sugar Loaf Cattle Co.,* 2016–TLC–00033, at *6 (BALCA Apr. 6, 2016) (citing to *Spurlino Materials LLC* v. *NLRB,* 805 F.3d 1131, 1141 (D.C. Cir. 2015)). The new definition incorporates the four factors noted above and, as under current practice, the Department will consider the totality of the circumstances surrounding the relationship among the entities, with no one factor determinative in the analysis. The factors will be discussed in further detail below.

The Department's main purpose in determining whether two or more entities are operating as one is preventing employers from utilizing corporate structure to circumvent the program's statutory and regulatory requirements. As such, the Department's focus when examining whether two or more employers are a single employer is both the relationship between the employers themselves and each employer's use of the H–2A program. *See Knitter* v. *Corvias Military Living LLC,* 758 F.3d 1214, 1227 (10th Cir. 2014) (Title VII case in which the court noted that ''the single employer test focuses on the relationship between the potential employers themselves''). The Department emphasizes again that no one factor is determinative as to whether entities are acting as one.

The California Labor & Workforce Development Agency (California LWDA) supported the proposal and echoed the concerns of the Department by explaining that it had ''encountered numerous instances . . . where related entities use separate corporate structures to evade statutory and regulatory wage and hour requirements.'' As examples it noted that its Labor Commissioner's Office has discovered some agricultural employers who ''attempt to insulate themselves from liability'' via their multiple entities, as well as instances where businesses have separated their corporations to hire less than the minimum numbers of workers that would trigger minimum wage and overtime obligations. An individual also expressed support for the proposal and believes it will help ensure consistent application by BALCA. They nevertheless expressed concern that the employers who are already exploiting the system via their corporate structures would develop other methods to continue to do so, and then suggested that there is no clear solution for the issue other than continuing to find the separate entities who are so intertwined as to be a single employer. The Department appreciates and shares the concern about corporations utilizing their structures to circumvent regulatory requirements and agrees that determining which separate entities are so intertwined as to be a single employer is a way to ensure statutory compliance.

As noted in the NPRM and adopted in this final rule, OFLC's COs will use the single employer test to determine if an employer's need is truly temporary or seasonal. As noted below in the *Authority* section, sec. 101(a)(15)(H)(ii)(a) of the INA permits only ''agricultural labor or services . . . of a temporary or seasonal nature'' to be performed under the H–2A visa category. 8 U.S.C. 1101(a)(15)(H)(ii)(a). Thus, as part of the Department's adjudication of applications for temporary agricultural labor certification, the Department assesses on a case-by-case basis whether the employer has established a temporary or seasonal need for the agricultural work to be performed. *See* 8 U.S.C. 1101(a)(15)(H)(ii)(a); 20 CFR 655.103(d), 655.161(a).

Some nominally distinct employers have agricultural operations such that when they apply for H–2A workers it appears that two or more separate entities are each requesting a different temporary agricultural labor certification. However, in reality, the workers on these certifications are employed by a single enterprise in the same AIE and in the same job opportunity for longer than the attested period of need on any one application.

For example, if Employer A has a need for two Agricultural Equipment Operators from February to December, and Employer B has a need for two Agricultural Equipment Operators from December to February at the same worksite, this may reflect a single year-round need for Agricultural Equipment Operators. *See, e.g., Katie Heger,* 2014–TLC–00001, at *6 (BALCA Nov. 12, 2013) (''Considering that the [two entities] appear to function as a single business entity and have identified sequential dates of need for the same work, their 'temporary' needs merge into a single year-round need for equipment operators.''). In these situations, the two nominally separate employers may be applying for certification for, and advertising for, one continuous, sometimes permanent, job opportunity, which calls into question whether either employer has a temporary or seasonal need.

The issue of whether an employer or nominally distinct employers have truly established a temporary need only arises when employers are filing multiple applications for the same or similar job opportunities in the same AIE, such that the combined period of need is continuous or permanent. It should be noted that determinations by OFLC and WHD as to single employer status may differ based on the evidence and information available at the time of assessment, though generally the agencies expect to reach the same conclusions when assessing single employer status.

Authority

An anonymous commenter and the Cato Institute, a public policy organization, alleged that the Department had failed to document its authority for adding this definition to the regulations. In particular, the Cato Institute argued that the Department provided no legal justification and instead used ''circular reasoning'' to justify the new definition. An anonymous commenter argued that the Department must provide statutory authority based on the INA and the authority granted to the Department in relation to the H–2A program, rather than looking to the NLRB as justification.

The Department articulated its authority for this proposal in the NPRM (*see* 88 FR at 63769) but will nevertheless explain in more detail the legal basis for the addition of this regulatory text in this final rule. The INA permits H–2A nonimmigrant workers to come ''temporarily to the United States to perform agricultural labor or services . . . of a temporary or seasonal nature,'' and authorizes the Secretary to issue regulations. 8 U.S.C. 1101(a)(15)(H)(ii). The Department must evaluate the temporary or seasonal nature of the work, pursuant to the statutory definition of H–2A workers. 8 U.S.C. 1101(a)(15)(H)(ii) (describing a nonimmigrant ''who is coming temporarily to the United States''); 8 CFR 214.2(h)(5)(iv)(B) (''In temporary agricultural labor certification proceedings the Department of Labor separately tests whether employment qualifies as temporary or seasonal.''); *see also* 52 FR 20496, 20497–20498 (June 1, 1987) [11] (''What is relevant to the temporary alien agricultural labor certification determination is the employer's assessment—*evaluated, as required by statute, by DOL*—of its need for a short-term (as opposed to permanent) employee. The issue to be decided is whether the employer has demonstrated a *temporary need for a worker* in some area of agriculture.'' (emphasis in original)). Furthermore, the Secretary is authorized to take enforcement action ''to assure employer compliance with terms and conditions of employment under this section [8 U.S.C. 1188].'' 8 U.S.C. 1188(g)(2).

Therefore, the Department has the authority to publish regulations with respect to the employers—as defined by DOL's long-standing definition discussed further below—who are applying for an H–2A labor certification and to determine the true nature of those employers' need for temporary workers, as well as whether the employment of such workers will have an adverse effect upon wages and working conditions of workers in the United States similarly employed.

A trade association, agents, and a policy organization argued that the Department is not allowed to model its definition of the single employer test after the definition used by the NLRB because the definitions arise in entirely different contexts and the NLRA does not cover agricultural workers. *See* 29 U.S.C. 152(3). An agent, másLabor, pointed to BALCA's decision in *Mid-State Farms, LLC,* 2021–TLC–00115 (BALCA Apr. 16, 2021) for support of this proposition. The ALJ in that case noted that the single employer test was developed by the NLRB, and that the ''concerns of the NLRB, or for that matter cases under Title VII, are not the same as those under the INA.'' *Id.* at *22. The ALJ also stated that ''[t]he policy behind the use of the 'Single Employer Test' appears to be in favor of broadening jurisdiction in collective bargaining cases and widening the number of employers who fall under its dictates'' and then declared that this ''over-inclusive policy'' is not appropriate for the H–2A program. *Id.* An anonymous commenter agreed with the ALJ's sentiment and argued that the single employer framework in the H–2A context is too broad and overinclusive. The Department disagrees.

This rulemaking abrogates *Mid-State Farms, LLC* to the extent that it found that the single employer test was inappropriate in the H–2A context. As discussed further below, the Department believes that the single employer test may actually be the most appropriate way to assess temporary or seasonal need in certain circumstances. The Department has authority to craft regulations relating to the H–2A program and has the authority to overturn ALJ decisions. 8 U.S.C. 1101(a)(15)(H)(ii); 5 U.S.C. 305 (providing for continuing review of agency operations); *see also* 85 FR 30608, 30611 (May 20, 2020) (final rule allowing the Secretary to review decisions issued by BALCA ''lest disagreement on law and policy within the Department lead to protracted uncertainty and intractable problems''). The Department is not convinced by the ALJ's logic set forth in *Mid-State Farms, LLC* that because the single employer test originated in a different context, it may not be used in the context of foreign labor certifications. Nor is the Department convinced by the ALJ's policy-related conclusion that the test is not appropriate because allegedly it is used to broaden the jurisdiction of the NLRB and is ''over-inclusive.'' *Mid-State Farms, LLC,* 2021–TLC–00115, at *22 (Apr. 16, 2021). The INA authorized the Secretary, not ALJs, to promulgate appropriate regulations, adopt appropriate legal standards, and make policy. 8 U.S.C. 1101(a)(15)(H)(ii); *see also supra* ''*Authority.*''

Furthermore, while the single employer test included in the regulations may have originated with the NLRB, as noted above, the concept of a ''single'' or ''integrated'' employer evolved from common law, not statute.[12] It has been adopted by courts

[11] Interim Final Rule; Request for Comments, *Labor Certification Process for the Temporary Employment of Aliens in Agriculture and Logging in the United States,* 52 FR 20496 (June 1, 1987) (1987 H–2A IFR).

[12] *See* Crandley, M., *The Failure of the Integrated Enterprise Test: Why Courts Need to Find New Answers to the Multiple-Employer Puzzle in Federal Discrimination Cases* (2000), 75 Ind. L. J., pp. 1041, 1052, 1057 (explaining that the test arose in the NLRB in the late 1940s and 1950s, and first appeared in Equal Employment Opportunity Commission (EEOC) administrative decisions in the 1970s). As noted below, 8 U.S.C. 1188 does not define ''employer'' and the common law definition applies. *See Nationwide Mut. Ins. Co.* v. *Darden,*

and Federal agencies under a wide variety of statutes. *See supra* ''*Definition and Use by OFLC.*'' While the Department agrees that the concept of a single or integrated employer may sometimes be utilized differently under the NLRA—or Title VII or the ADA—that does not preclude the Department from adopting the test for use in the H–2A context. For the reasons discussed in the NPRM and below, the Department thinks that this test is appropriate to assess the nature of an employer's need.

The Cato Institute stated that the term ''employer'' as used in the INA ''clearly'' does not apply to related businesses. It also argued that Congress could have defined ''employer'' to include other entities if it had chosen to do so. As an example, it pointed to how Congress articulated a definition of ''employer'' in the context of the H–1B program, or how Congress discussed the concept of a ''joint employer'' in the INA. It then stated that the ''absence of this defining language limits the meaning of this term to its ordinary definition: the employer entity that has submitted the petition.''

The Department agrees that the INA does not define the word ''employer'' in the context of the H–2A program at 8 U.S.C. 1101 and 8 U.S.C. 1188 and thus the common law definition is applied. ''[W]here Congress uses terms that have accumulated settled meaning under . . . the common law, a court must infer, unless the statute otherwise dictates, that Congress means to incorporate the established meaning of these terms.'' *Nationwide Mut. Ins. Co.* v. *Darden,* 503 U.S. 318, 322 (1992) (quoting *Community for Creative Non-Violence* v. *Reid,* 490 U.S. 730, 739 (1989)). The common law definition for ''employer'' is the basis for the Department's regulatory definition of ''employer.'' *See* 20 CFR 655.103(b); 84 FR 36168, 36174 (July 26, 2019) [13] (footnote omitted) (''Controlling judicial and administrative decisions provide that to the extent a federal statute does not define the term employer, the common law of agency governs whether an entity is an employer. Accordingly, the proposal continues to use the common law of agency to define the terms employer and joint employment for associations and growers that have not filed applications.''); 73 FR 8538, 8555 (Feb. 13, 2008) (''The Department is proposing to include the definition of employee and to modify the definition of employer to conform these definitions to those used in other Department-administered programs. The definition of employee conforms to the Supreme Court's holding in *Nationwide Mutual Insurance* v. *Darden,* 503 U.S. 318, 322–324 (1992).''); *see also* 20 CFR 655.103(b) (defining an employee as ''[a] person who is engaged to perform work for an employer, as defined under the general common law of agency''). Congress authorized the Secretary to implement the statute via regulations, and they do so by appropriately using the common law definition of the term. 8 U.S.C. 1101(a)(15)(H)(ii). The Department disagrees with, and does not accept, the Cato Institute's articulated definition—that an ''employer'' is the ''entity that has submitted the petition''—a definition that is not included in the statute, not found in common law, is not a generally established meaning of the term, and is inconsistent with the Department's regulatory definition and historic practice in the H–2A program.

The Cato Institute argued that the Department may not define ''employer'' at all, stating that the Department must utilize DHS's definition of ''employer.'' The commenter claims, with no support, that ''DHS now has sole authority over deciding the outcome of a petition and who is a petitioner, meaning that DHS's definition of 'employer' governs the meaning of employer in section 218 [8 U.S.C. 1188].'' The Cato Institute also argued that ''INA section 218 clearly defines a petitioning employer . . .'' but provides no citation for this definition. A definition of ''petitioning employer'' does not appear in INA sec. 218. *See* 8 U.S.C. 1188(i) (the ''Definitions'' section).

The Department is not convinced by the Cato Institute's arguments. While DHS does have authority to adjudicate the H–2A petition, Congress clearly envisioned that DOL would play a crucial role in the process as the Secretary issues certifications, assesses temporary need, and takes actions to ensure employer compliance with the terms and conditions of employment, including promulgating regulations to effectuate their responsibilities under the INA. 8 U.S.C. 1101(a)(15)(H)(ii); 8 U.S.C. 1188(a)–(g)(2). DHS did not reference its own definition of employer when it recognized the Department's nonexclusive responsibility to assess an employer's need as either seasonal or temporary. 8 U.S.C. 1188(a); 8 CFR 214.2(h)(5)(iv)(B) (''In temporary agricultural labor certification proceedings the Department of Labor separately tests whether employment qualifies as temporary or seasonal.''). Therefore, in carrying out this responsibility, the Secretary is authorized to adopt a common law definition of the term ''employer.''

In discussing the Department's authority in this space, the Cato Institute claimed that the Department may ''only deny a certification'' when certification would ''adversely affect'' workers in the United States similarly employed, or when workers in the United States are not able to perform the labor or services in the petition. In actuality, the Department may deny a certification for a number of reasons, as outlined in the statute at 8 U.S.C. 1188(b), and may only issue a certification if the ''employer has complied with the criteria for certification'' and ''the employer does not actually have, or has not been provided with referrals of, qualified eligible individuals who have indicated their availability to perform such labor or services on the terms and conditions of a job offer which meets the requirements of the Secretary.'' 8 U.S.C. 1188(c)(3).

The Cato Institute argued that the Department's analysis of an application is limited to only the labor or services in the labor certification application it is currently adjudicating, and not to any other labor or services involved in other petitions or applications by separate employers. It stated that the Department may not identify adverse effects to workers in the United States similarly employed that were or are caused by job offers that are not the present employer-applicant's job offer. The Department disagrees with this characterization.

The statute does not limit the Department's review to one application or job offer. As discussed above, the Department must assess the employer's need for temporary workers when reviewing an application, an assessment that may require the Department to review other applications spanning more than one job opportunity, and looking to the same employer's filing history (and in the case of a single employer, the nominally distinct entities' filing histories) is part of analyzing an employer's need for said employment. This temporary need assessment is distinct from any adverse effect determination made by the Department.

It is well established that to analyze temporary need, the Department may look to other previously or simultaneously filed applications. 86 FR 71373, 71377 (Dec. 16, 2021) (''Similar

503 U.S. 318, 322 (1992) (''[W]here Congress uses terms that have accumulated settled meaning under . . . the common law, a court must infer, unless the statute otherwise dictates, that Congress means to incorporate the established meaning of these terms.'') (citations omitted).

[13] NPRM, *Temporary Agricultural Employment of H–2A Nonimmigrants in the United States,* 84 FR 36168 (July 26, 2019) (2019 H–2A NPRM).

to USCIS' approach [which is the same for all H–2A petitions, including H–2A sheep and goat herder petitions] . . . the Department's adjudication will be conducted on a case-by-case basis and will take into consideration the totality of the facts presented, of which past periods of need will be one element that is considered in determining whether an employer's need is truly temporary or seasonal.''); *see also* USCIS, *Policy Memorandum: Updated Guidance on Temporary or Seasonal Need for H–2A Petitions Seeking Workers for Range Sheep and/or Goat Herding or Production* (Feb. 28, 2020) (''USCIS evaluates all H–2A petitions based on the facts presented in the petitions as well as the past filings of the petitioner, as appropriate.''); [14] *see, e.g., Donald Parrish Dairy Inc.,* 2019–TLC–00006, at *4–5 (BALCA Dec. 19, 2018) (relying on previous certification to determine that employer had not proven that its need was seasonal). Having the ability to examine an employer's filing history is crucial to determining whether consecutive applications have been filed such that an employer truly has a temporary or seasonal need. 1987 H–2A IFR, 52 FR at 20498 (''DOL will take a careful look at repeated temporary alien agricultural labor certification applications for the same job''). If an employer files an application covering January to June, and another from June to December, the Department would only know about the sequential period of need and potential year-round employment if it may look at previous filing history. Furthermore, it would also be impossible to determine if multiple applications have been filed in the same AIE without the ability to look at other applications. 20 CFR 655.130(e)(2) (''[a]n employer may file only one *Application for Temporary Employment Certification* covering the same AIE, period of employment, and occupation or comparable work to be performed''). This approach is consistent with the above-referenced USCIS Policy Memorandum regarding the assessment of an employer's need.

The Cato Institute also argues that the purpose of the H–2A program is to ''secur[e] the border or stop[ ] illegal immigration'' and faults the Department for not mentioning this purpose in its stated justification for codifying the single employer test. The Department disagrees. The plain language of the statute does not create any such obligation by DOL to secure the border or stop unauthorized immigration. *See* 8 U.S.C. 1188(a). Statutory construction begins with the statute and ends with the statute if the statute is unambiguous. *Rotkiske* v. *Klemm,* 140 S. Ct. 355, 360 (2019). Congress may have many different purposes when enacting a statute, but the particular provisions of the INA that relate to DOL's role in the H–2A program do not mandate the Department consider how to secure the border or stem unauthorized immigration.

For these reasons, the Department concludes that the above-mentioned commenters' assertions that the Department lacks authority to promulgate a definition of the single employer test in the context of the H–2A program are unfounded, and the Department adopts the definition as proposed.

b. The Four Factor Test, Business Structures, and Notices of Deficiency

As noted above, the four factors that the Department proposed to determine single employer status were: (1) common management; (2) interrelation between operations; (3) centralized control of labor relations; and (4) degree of common ownership/financial control. The Department reiterates and expands upon the discussion of the factors in the NPRM below.

Regarding the ''common management'' factor, the ''relevant inquiry is whether there is 'overall control of critical matters at the policy level.' '' *K & S Datthyn Farms,* 2019–TLC–00086, at *6 (BALCA Oct. 7, 2019) (quoting *Spurlino Materials,* 805 F.3d at 1142). Shared day-to-day management may also indicate common management. *Spurlino Materials,* 805 F.3d at 1142. For example, where the same president, treasurer, and chief operating officer oversee the actions of multiple entities and resolve disputes, this suggests a common management between entities. *Pepperco-USA, Inc.,* 2015–TLC–00015, at *30–31 (BALCA Feb. 23, 2015).

Regarding the ''interrelation between operations'' factor, the Department may look to whether the entities operate at arm's length. *Id.* It may examine whether companies share products or services, costs, worksites, worker housing, insurance, software, or if they share a website, supplies, or equipment. *See, e.g., id.; Sugar Loaf Cattle Co.,* 2016–TLC–00033, at *6–7 (Apr. 6, 2016) (finding an interrelation of operations in part because the work locations were ''fundamentally at the same place''); *David J. Woestehoff,* 2021–TLC–00112, at *11 (BALCA Apr. 2, 2021) (comparing employers' housing locations and worksites to analyze their relationship).

Regarding the ''centralized control of labor relations'' factor, the Department may look to whether the persons who have the authority to set employment terms and ensure compliance with the H–2A program are the same. *K & S Datthyn Farms,* 2019–TLC–00086, at *5 (Oct. 7, 2019) (noting the same manager signed different H–2A applications and this was a ''fundamental labor practice[ ], at the core of employer-employee relations for any business'').

Finally, regarding ''common ownership and financial control,'' the Department may look to the corporate structure and who owns the entities, whether it be, for example, a parent company or individuals. *See Pepperco-USA, Inc.,* 2015–TLC–00015, at *30–31 (Feb. 23, 2015) (two nominally distinct entities were owned by one parent company). It may also explore whether the owners of the entities at issue are related in some way. *See, e.g., JSF Enterprises,* 2015–TLC–00009, at *12–13 (BALCA Jan. 22, 2015) (entities owned in varying degrees by members of the same family); *Larry Ulmer,* 2015–TLC–00003, at *3–4 (BALCA Nov. 4, 2014) (two companies with similar names were owned by father and son); *Lancaster Truck Line,* 2014–TLC–00004, at *2–3 (Nov. 26, 2013) (father and son sought to separate a business in an attempt to meet seasonal need requirements); *see also Overlook Harvesting,* 2021–TLC–00205, at *13 (BALCA Sept. 9, 2021) (though analyzing the relationship using joint employment test, looking to the marital relationship between owners). These examples of analysis and lines of inquiry related to each of the factors are not exhaustive.

The Department received several comments on this aspect of the proposal. After consideration of the comments, discussed in detail below, the Department adopts the proposal without change.

One anonymous commenter, as well as USAFL and Hall Global, commented that the factors are inappropriately vague, open-ended, and that they are not defined within the text of the definitions. USAFL and Hall Global stated that these factors are ''superficial'' and that something as simple as a ''shared mailbox'' would lead OFLC to draw a conclusion that multiple employers' needs are the same need. An anonymous commenter lamented that these four factors would establish an unjustified ''limitless standard'' that would make it

[14] USCIS, *Policy Memorandum: Updated Guidance on Temporary or Seasonal Need for H–2A Petitions Seeking Workers for Range Sheep and/or Goat Herding or Production* (Feb. 28, 2020). *https://www.uscis.gov/sites/default/files/document/memos/2-PMH2A-SeasonalSheepGoatHerder_PolicyMemo.pdf.*

impossible to know if they have satisfied some or all of the factors.

The Department understands the concerns that this test and these factors do not establish a bright-line rule, which can present difficulties in administration. Tests that involve weighing factors are naturally fact-dependent, and reasonable people may disagree as to the outcome of the test. However, as noted previously, the single employer test has been used by administrative tribunals and Federal courts for decades. As stated above, DOL itself has been using this test already in the H–2A context as well. To date, the Department has found this to be a reasonable test that the Department has been able to apply fairly without overburdening employers.

USAFL and Hall Global suggested that rather than use the Four Factor Test, the Department should focus its inquiry on ''economic substance,'' or in other words, whether there is a valid business reason for the corporate structure. Allegedly this ''economic substance'' analysis would help determine whether employers have only divided their business for ''sham'' reasons. The Cato Institute made a similar suggestion that if the Department were to keep the single employer test, it should be limited to times where evidence shows that the separation of business occurred solely to obtain a labor certification. USAFL and Hall Global claimed that this ''economic substance'' standard is administrable, easy to litigate, and protects business interests.

The Department disagrees with commenters that this ''economic substance'' type test would be easier to administer and litigate and declines to accept the suggestions. The Department must determine that an employer's need is temporary or seasonal regardless of whether there is a legitimate reason for dividing a business, therefore adopting this suggestion would be inconsistent with the INA. Furthermore, while it may be possible to determine in some cases whether the businesses have been separated to specifically meet H–2A requirements—*see, e.g., Lancaster Truck Line,* 2014–TLC–00004, at *2–3, 5 (Nov. 26, 2013), in which the employer was ''frank about separating the legal entities of his operation'' from his father to ''comply with the H–2A program's seasonal permitting restrictions,''—it is rarely so clearly established, making a test based on whether there is or is not a ''sham'' reason for splitting a business *more* difficult to administer. What the Department is tasked with determining, and what is well-within its authority to administer, however, is whether or not the employer has a true temporary or seasonal need.

The Department understands that, as many commenters noted, there are legitimate business reasons for complex corporate structures, and that there are many family-owned and family-run farms that may form various entities for insurance, tax, inheritance, or other purposes, including risk management. One example provided was of a fixed-site grower who also created a labor contracting company to provide labor services to other growers. U.S. Custom Harvesters, Inc. gave an example of intertwined businesses that have both ''seasonal custom harvesting needs'' and ''seasonal needs for their farm business.'' It expressed concern that these types of legitimate arrangements would be questioned as to their single employer status.

The fact that an employer is not trying to circumvent regulatory requirements, does not mean that it then automatically has a valid temporary or seasonal need for agricultural labor. Even if an employer, or single employer, has legitimate reasons for dividing their business(es) and then separately applying for H–2A workers, it is a statutory requirement that the H–2A work be of a temporary or seasonal nature, and therefore employers submitting an application for temporary agricultural labor certification are required to establish that they have a temporary or seasonal need for agricultural labor. 8 U.S.C. 1101(a)(15)(H)(ii)(a); 20 CFR 655.103(d), 655.161. Permitting employers with a permanent need to simply divide their business so that multiple entities can establish a temporary need, and thereby obtain a labor certification, would violate the statute. *See, e.g., Intergrow East, Inc.,* 2019–TLC–00073, at *5 (BALCA Sept. 11, 2019) (''An employer may not circumvent the temporary need requirement by using a closely related business entity to file an overlapping application'').

Even if employers have genuine business needs for dividing their business and then separately applying for H–2A workers, this approach to filing labor certification applications is problematic. It undermines the statutorily required labor market test and the Department's ability to protect workers in the United States as each application, standing alone, does not fully convey the potential job opportunity to any applicant—for example, the job opportunity could be for 12 total months rather than 6 months with one employer and 6 months with only a nominally separate entity. It is possible that a U.S. worker would be interested in a job that could last a year, or even permanently, rather than only 6 months—a sentiment echoed by numerous supporters of this proposal. These supporters agreed that U.S. workers may be more interested in a year-round job, as opposed to numerous temporary job opportunities posted separately.

The Cato Institute argued that the Department cannot assert that there is harm to prospective U.S. workers who are unable to see the full nature of the job opportunity because the Department, in order to state that these workers are not aware of the full nature of the job opportunity, must make an assumption about the full nature of the job opportunity.

The Department disagrees with the commenter's assertion because it is the employer's burden to establish eligibility for this program. 8 U.S.C. 1361. If the employer cannot establish that it has truthfully disclosed the full nature of its job opportunity, then the employer has not established eligibility for the program. *Id.* Furthermore, even if the Department were to ''assume'' that a job opportunity is not as it seems, many commenters echoed and supported the ability of the Department to investigate and conclude that there may be impacts on the labor market test if the full nature of the job opportunity is not disclosed.

The Cato Institute also asserted that employers could ''already hire U.S. workers without bureaucratic interference . . . [and] [t]he only reason that [an employer] would participate in the H–2A program is because they cannot find U.S. workers to do the jobs.'' The commenter did not provide evidence for their assertion, and it is unclear what conclusion the Department is supposed to draw from this statement, but to the extent that it is implying that an employer who applies for the program must automatically be eligible because it applied, the Department disagrees. Again, the statute requires petitioners to obtain a certification from the Secretary. The statute specifically notes that a certification may only be issued after an employer ''has complied with the criteria for certification (including criteria for the recruitment of eligible individuals as prescribed by the Secretary),'' thereby establishing that not only must an employer meet all the criteria and engage in recruitment, but also that Congress did not presume an employer would be automatically eligible for a certification simply because it applied to the H–2A program. 8 U.S.C. 1188(c)(3)(A)(i). The Secretary has an active role to play in recruitment

and for this recruitment to be meaningful, as noted above, the employer must truthfully disclose the full nature of its job opportunity. *See* 8 U.S.C. 1188(b); 8 U.S.C. 1188(g)(1)(A).

Americans for Prosperity Foundation, another public policy organization, in response to the idea that a single employer may not accurately convey the full nature of a permanent job opportunity because it has split the job between two nominally distinct companies, stated that prospective workers could simply ''search through the [SWA] interstate employment system'' to ''have full view of all the H–2A job opportunities available by all employers.'' The Department points out that this would not solve the problem that the job opportunity the employer-applicant is putting forth in their application is not fully accurate, and furthermore, it should not be the responsibility of worker-applicants to piece together job postings from nominally distinct entities, nor may it even be possible for worker-applicants to tell from a job posting alone that any two employers are so intertwined as to be acting as a single employer.

The Cato Institute argued that it is legal for employers to split their businesses to comply with the law. The commenter went so far as to state that the Department requires certain employers—in its example H–2ALCs—to manipulate its need. The commenter further stated that ''[a] contractor that continuously services all types of farms in the same area throughout the year will automatically have a year-round need in that area'' and that if they want to ''operate in the same area but service different crops, the owner must create a separate legal entity.'' The commenter wrote that it is a ''good thing'' for employers to arrange their businesses so that they comply with the law.

The Cato Institute has taken a presumably hypothetical example of an H–2ALC that has a full-time, permanent need and explained that it purposely manipulates its structure to find a loophole to a statutory requirement. The position that employers should be able to utilize existing loopholes to circumvent statutory requirements of temporary or seasonal need is not a convincing argument to rescind or amend the proposal. In fact, it is concerning to the Department. It is also concerning that the Cato Institute believes the Department is requiring employers to manipulate their corporate structures to qualify to use the program. The INA makes clear that employers may only use the H–2A program if they establish eligibility for the program, including that they have a temporary or seasonal, as opposed to permanent, need; they are not entitled to use it as a matter of course. *See* 8 U.S.C. 1361; 8 U.S.C. 1188(b). Therefore, if an employer cannot qualify because their need is permanent, they are in no way required to manipulate their need; they simply do not qualify.

USAFL and Hall Global argued that the Department has not ''take[n] into account reliance interests,'' presumably in relation to business and corporate structures. It explains that employers have tax, estate planning, and other legitimate reasons for dividing their businesses and that this creates ''reliance interests.'' However, it is unclear exactly what ''reliance interests'' this commenter is referring to or how this proposal would affect employers. As previously noted, the Department has been utilizing some variation of the single employer test for nearly a decade, so there should be no change with regard to these ''reliance interests.'' Also, regardless of how it structures its business or the reasons for doing so, as stated above, an employer must establish its temporary or seasonal need pursuant to the statutory requirements. To the extent the commenter is suggesting reliance interests in prior certifications, if an employer is denied certification for failure to establish a temporary need it does not matter that it was approved in the past, as a previous certification does not mandate approval of a subsequent application, especially when this past certification was in error, as each application must be evaluated on its own merits. *See Sussex Eng'g, Ltd.* V. *Montgomery,* 825 F.2d 1084, 1090 (6th Cir. 1987) (''It is absurd to suggest that . . . any agency must treat acknowledged errors as binding precedent''). If the employer did not have a seasonal or temporary need in the past, it should not have been certified.

The Department acknowledges again that there are legitimate reasons that agricultural employers structure their businesses the way they do, and also believes the vast majority of users are not attempting to manipulate the program, but that the Department nonetheless has a statutory responsibility to verify that the employers are eligible to participate in this program.

Should a CO suspect that an employer-applicant has an actual need that stretches longer than their stated need because the employer is a single employer with another entity or entities based on the four factors above, the COs may issue a NOD or NODs to clarify the status of said entities. To analyze whether entities are a single employer, COs may request, via NOD, information necessary for this determination, including, but not limited to: (1) documents describing the corporate or management structure, or both, for the entities at issue; (2) the names of directors, officers, or managers and their job descriptions; (3) incorporation documents; or (4) documents identifying whether the same individual(s) have ownership interest or control. The COs may additionally ask for explanation as to: (1) why the businesses may authorize the same person or persons to act on their behalf when signing contracts, applications, etc.; (2) whether the businesses intermingle money or share resources; (3) whether workspaces are shared; and (4) whether the companies produce similar products or provide similar services. These lists of documentation or evidence are not exclusive, and the COs may request other information or documentation as necessary. An anonymous commenter and USAFL and Hall Global both expressed concern that these factors and related NODs would lead to a limitless inquiry into the business operations of employers and, as noted above, arguing that the Department has not provided justification as to why the factors are so open-ended and vague. Wafla stated that these factors and related NODs would lead to intrusive inquiries, responses for which would take ''40 to 100 hours or more to compile.'' NHC believed that the Department was giving itself too much authority to ask for information and that it would cause an undue burden on employers. Many commenters felt that OFLC questioning an employer as to their single or integrated employer status would generate more NODs and delays in processing of applications, or even delays in the arrival of H–2A workers. Many also stated that this test would be overly burdensome for the whole industry, just to target a ''few bad apples.'' An anonymous commenter criticized the Department's use of NODs and stated that the Department should ask for information about temporary or seasonal need before ''rendering a decision.'' It is unclear what the commenter meant by this statement, as the NOD is the means by which the Department requests further information before rendering a final determination on a case.

The Department understands the concerns regarding NODs and delays in processing but believes the concern is exaggerated and that the benefits of an additional NOD or slight delay, if one

occurs, nevertheless outweigh the potential inconvenience. The Department may issue multiple NODs if the application or job order is incomplete, contains errors or inaccuracies, or does not meet the regulatory requirements. 20 CFR 655.141 and 655.142. If an employer has not demonstrated their eligibility or compliance with the regulations, the NOD is the opportunity for the employer to remedy the deficiencies. A NOD is not punitive, as suggested by one anonymous commenter; instead, it is a means by which employer-applicants are given the opportunity to remedy the deficiencies without the need to wait for a decision denying the application and a subsequent appeal, and without the need to start the application process over.

NODs may request information related to the four factors discussed above, but the Department does not intend to use the NOD to gather unnecessary business information or, as one anonymous commenter suggested, to engage in ''a never-ending fishing expedition.'' Instead, the NOD is the employer's opportunity to submit what evidence it deems appropriate to establish its eligibility for the program. The Department may require the actual submission of materials that are required to be maintained by the regulations, materials that are commonly and routinely used by businesses such as tax documentation, or materials that should be readily available like an organizational chart. Generally, though, employers have some flexibility to provide documentation that establishes their own eligibility for the program. The factors for the single employer test are purposely open-ended to allow employers some choice with how to support, or refute, findings related to the said factors. Employer relationships are increasingly complex, and it would be difficult for the Department to outline every type of documentation or information that could be used to analyze these factors. It would also not be to the advantage of employers, who may have different types of documentation, to submit only specific types of documents, if the submission or maintenance of this documentation is not otherwise required, to prove that they do or do not satisfy the factors, provided that the alternative documentation actually demonstrates their eligibility.

Employers must establish their eligibility for the H–2A program, including that they have a temporary or seasonal need. Should the situation arise that an employer must establish that it is not a single employer with another entity to establish that it does in fact have a temporary or seasonal need, the Department does not believe this to be an undue burden, as this is a statutory requirement. 8 U.S.C. 1101(a)(15)(H)(ii); 8 U.S.C. 1188(a)(1).

Furthermore, as stated in the NPRM and discussed further below, the Department has already been applying this single employer test for at least the last decade. As the Department has already been issuing NODs related to single employer status, there should only be a nominal increase in NOD issuance, *if* there is an increase at all. The Department only intends to utilize the single employer test for the purposes of determining temporary or seasonal need if the employer and its nominally distinct counterparts are applying for certifications in the *same* AIE, for the *same or comparable* job opportunities, for a period of time that would suggest the single employer does not have a temporary or seasonal need. *See* 20 CFR 655.130(e)(2) (''[a]n employer may file only one *Application for Temporary Employment Certification* covering the same [AIE], period of employment, and occupation or comparable work to be performed''). The Department does not intend to determine if every employer-applicant happens to be a single employer, or even a related employer, without any basis to do so.

c. Single Employers, BALCA, and Joint Employers

As noted in the NPRM, OFLC used an informal, fact-focused method of inquiry, involving a comparison of case information (*e.g.,* owner and manager names, locations and AIEs, recruitment information, job descriptions, and other operational similarities across applications) for nearly a decade to address the issue of nominally separate entities using their corporate structure—either purposefully or not—to circumvent statutory requirements. In approximately 2015, OFLC began to frame its analysis using the single employer test (see above under *Definition and Use by OFLC*) to improve consistency and transparency and to address more complex business structures (*e.g.,* corporate organizations) filing H–2A applications through nominally different employers. *See Pepperco-USA, Inc.,* 2015–TLC–00015, at *2–5 (Feb. 23, 2015). Some commenters argued that, in fact, the single employer test was not a ''long-standing'' approach, with an anonymous commenter observing that the ALJ in the *Pepperco-USA* case described the test as ''novel.'' The Department notes that *Pepperco-USA, Inc.* was decided in February 2015—almost a decade ago—and it is no longer ''novel.'' The Western Range Association opposed the addition of the definition and stated that they wished for the Department to continue to use ''current practice.'' It is unclear what this commenter meant, as the current practice is and has been to utilize some form of the single employer test.

Historically, BALCA has affirmed many OFLC denials that either explicitly used the single employer test or used a similar analysis. *See, e.g., D & G Frey Crawfish, LLC,* 2012–TLC–00099, at 2, 4–5 (BALCA Oct. 19, 2012) (affirming the CO's denial and stating that ''[employer's] ability to separate her operation into two entities does not enable her to hire temporary H–2A workers to fulfill her permanent need'').[15] However, in more recent decisions, BALCA has sometimes rejected the single employer test, noting that it had not been promulgated through notice-and-comment rulemaking. *See Mid-State Farms, LLC,* 2021–TLC–00115, at *16 (Apr. 16, 2021) (''This court can find no published instance where the 'Single Employer Test' has been debated openly, subjected to public comment or accepted as official Department policy.''). In response to these concerns, some ALJs have applied the ''joint employer'' test to analyze temporary

[15] Other decisions either explicitly applying the single employer test, or simply using a similar analysis include: *David J. Woestehoff,* 2021–TLC–00112, at *11 (Apr. 2, 2021) (ALJ looked to the four factors in the single employer test to determine if the entities were a single employer but was unable to determine if they were); *K.S. Datthyn Farms, LLC,* 2019–TLC–00086, at *4–6 (Oct. 7, 2019) (applying four-part NLRA and Title VII integrated employer test to determine whether two H–2A applicants for temporary labor agricultural certification were one integrated employer with single labor need); *Intergrow East, Inc.,* 2019–TLC–00073, at *5–6 (Sept. 11, 2019) (same); *Pepperco-USA, Inc.,* 2015–TLC–00015, at *26, 30–31 (Feb. 23, 2015) (see above); *JSF Enterprises,* 2015–TLC–00009, at *12 (Jan. 22, 2015) (''The four entities . . . fill the same need on a year round basis because of the interlocking nature of the businesses and regardless of the distinction in crops each harvests.''); *Anthony Mock,* 2015–TLC–00008, at *6–8 (BALCA Dec. 30, 2014) (ALJ, while not mentioning the single employer test, looked to whether or not the two entities at issue were separate legal entities, and looked at whether there was shared ownership, employees, or assets); *Cressler Ranch Trucking,* 2013–TLC–00007, at *3 (BALCA Nov. 26, 2012) (''The Employer only disguises this need through subsequent applications from a separate entity with the same owner and slight alterations in the wording of the Form ETA–9142. Accordingly, the CO reasonably concluded that the Employer failed to demonstrate a temporary need for agricultural labor or services, as required by 20 CFR 655.103(d).''); *see also Maroa Farms Inc.,* 2020–TLC–00110, at *13 (BALCA Sept. 4, 2020) (affirming the CO's decision on other grounds but noting that ''an employer may not circumvent the temporary need requirement by using a closely related business entity to file an overlapping application'').

need because a definition of ''joint employment'' is included in the regulations. *See, e.g., id.* at *26; *Overlook Harvesting,* 2021–TLC–00205, at *10 (Sept. 9, 2021) (adopting a modified ''joint employer'' test).

Many commenters, in agreeing with the logic of the ALJ in *Mid-State Farms, LLC,* opposed the addition of the single employer test and argued that the ''joint employer'' test was more appropriate as it was already defined in the regulations and BALCA had endorsed it. *See Mid-State Farms, LLC,* 2021–TLC–00115, at *25–26 (Apr. 16, 2021). Many commenters argued that the Department may not now adopt the single employer test because BALCA had ''rebuffed'' attempts to use the test. The Americans for Prosperity Foundation also cited *Mid-State Farms, LLC* and noted that BALCA had criticized the single employer test, stating that it had not been subject to notice and comment. USAFL and Hall Global argued that the Department lacks ''clear criteria'' for identifying applications that may have integrated enterprises and that there is seemingly no discernable way to know why some employers are questioned as to their status and others are not.

These commenters ignore that a lack of a regulatory definition pursuant to notice-and-comment rulemaking was a major reason BALCA ''rebuffed'' the single employer test in *Mid-State Farms, LLC.* As noted above, the Department disagrees with BALCA's conclusion in *Mid-State Farms,* but in any event, the Department here is engaging in the notice-and-comment rulemaking to enact the single employer or integrated employer test and to provide clear criteria to stakeholders, COs, and ALJs, such as the one in *Crop Transport,* who stated that ''[i]t would be helpful . . . if meaningful regulatory criteria were promulgated through notice-and-comment procedures as to when ETA will consider two nominally separate entities as a single applicant for purposes of temporary [agricultural] labor certifications under the Act.'' *Crop Transport, LLC,* 2018–TLC–00027, at 6 n.6 (Oct. 19, 2018). The Secretary is authorized to establish policy and promulgate regulations. *See supra,* the *Authority* section. This rulemaking will provide more uniformity as to the application of the single employer test.

Many commenters argued that the Department proposed to change how to determine when two employers were jointly employing an employee by adding the single employer definition to the regulations. These comments mischaracterize the Department's proposal. The Department is not proposing to change the definition of ''joint employer'' located in 20 CFR 655.103(b), or proposing to change how to determine if two employers are jointly employing an employee. As stated in the NPRM, ''this proposal is not meant to eliminate or undermine appropriate use of the joint employment test.'' 88 FR at 63770. A ''joint employer'' is not necessarily a ''single employer,'' nor is a ''single employer'' necessarily a ''joint employer.''

Joint employment under the H–2A program, generally, is ''[w]here two or more employers each have sufficient definitional indicia of being a joint employer of a worker under the common law of agency.'' 20 CFR 655.103(b) (definition of ''joint employment'' at paragraph (i)).[16] This joint employment inquiry thus focuses on the relationship between the putative joint employer and the employee(s), while the single employer test focuses on the relationship between the nominally distinct employers. *See Knitter,* 758 F.3d at 1227 (''Unlike the joint employer test, which focuses on the relationship between an employee and its two potential employers, the single employer test focuses on the relationship between the potential employers themselves.''). Joint employment assumes that the entities are separate while the single employer test asks whether ''two nominally separate entities should in fact be treated as an integrated enterprise.'' *Id.* at 1226–27 (quoting *Bristol* v. *Bd. Of Cty. Comm'rs,* 312 F.3d 1213, 1218 (10th Cir. 2002) (en banc)). ''In the case of the single employer doctrine, the two entities are essentially the same entity. In the case of the joint employer doctrine, the two share control of the employee to such an extent that they both function as an employer, even though they are operationally distinct.'' *Bonilla* v. *Liquilux Gas Corp.,* 812 F. Supp. 286, 289 (D.P.R. 1993).

Determining whether two entities are joint employers, contrary to BALCA's assertion in *Mid-State Farms,* is unhelpful when assessing temporary or seasonal need where, for example, an employer splits their business between two seemingly separate entities in order to circumvent the requirement to establish a temporary or seasonal need. In those situations, employees are generally not employed at the same time, though there may be overlap between the periods of need, making the analysis of joint employment largely impractical. In assessing the temporary or seasonal need of nominally distinct entities, the focus of the Department's analysis is not on the relationship between the employer and the employees, but rather between the employers themselves.

As an anonymous commenter noted, and another alluded to, *Mid-State Farms* claimed that ''the leading BALCA decisions'' applied a ''joint employer analysis.'' However, upon closer examination, the cases the ALJ referenced in *Mid-State Farms* were analyzed using the factors of the single employer test, and furthermore, several of them may not have met the joint employer test. *Mid-State Farms, LLC,* 2021–TLC–00115, at 27. Specifically, *Mid-State Farms* cited the following cases that actually utilized some form of the single-employer test: *Larry Ulmer,* 2015–TLC–00003, at 4 (Nov. 4, 2014) (''Since the business entities of Larry Ulmer and Ulmer Farms are so intertwined, it would be reasonable to infer that they function as one and are attempting to circumvent the temporary employment requirement.'' (citations omitted)); *Lancaster Truck Line,* 2014–TLC–00004, at 1–3 (Nov. 25, 2013) (The companies shared the same FEIN, business address and owners, and ''[e]mployer was frank about separating the legal entities of his operation in order to comply with the H–2A program's seasonal permitting restrictions.''); *Katie Heger,* 2014–TLC–00001, at 6 (Nov. 12, 2013) (''Considering that the [two entities] appear to function as a single business entity and have identified sequential dates of need for the same work, their 'temporary' needs merge into a single year-round need for equipment operators.''); *Altendorf Transport,* 2013–TLC–00026, at 8 (Mar. 28, 2013) (employer's argument ''does not overcome the interlocking nature of the business organizations . . . . The Employer has the burden of persuasion to demonstrate it and [the other entity] are truly independent entities.''); *D & G Frey Crawfish, LLC,* 2012–TLC–00099, at 2, 4 (Oct. 19, 2012) (noting that two companies had the same owner, mailing address, and worksite location and offered similar job opportunities, and stating that ''[employer's] ability to separate her operation into two entities does not enable her to hire temporary H–2A workers to fulfill her permanent need'').

FFVA, a trade association, and másLabor, an agent, expressed a preference for using the ''joint employer'' test, observing it would sufficiently prevent employers from circumventing the seasonal need requirements. As noted in the NPRM,

[16] Note that the regulations also define ''joint employment'' for specific filing contexts as well. 20 CFR 655.103(b) (definition of ''joint employment'' at paragraphs (ii) and (iii)).

however, the Department is hesitant to only use the H–2A joint employer test in these situations because it may not capture instances, such as those outlined above, where employers who are not H–2A joint employers, but who are only nominally distinct, hire workers sequentially such that they are employing workers all year or permanently. Neither commenter, however, addressed this shortcoming of the joint employer test.

MásLabor argued that the single employer test is ''more restrictive'' than the joint employer test. Wafla lamented that the Department formally adopting the single employer test will cause some employers who operate in the same AIE to no longer qualify for this program because they will no longer be able to demonstrate a temporary or seasonal need. If an employer is unable to demonstrate a temporary or seasonal need for workers, they are ineligible for the program; they also would have been ineligible before the promulgation of this rule.

As explained in the NPRM, joint employment can still be useful in analyzing temporary need in the H–2A program, and this proposal is not meant to eliminate or undermine appropriate use of the joint employment test. For example, there may be a situation where an employer applies for workers from January to April and then hires an H–2ALC or subcontractor for the months of May to December. It is possible that this relationship could be joint employment as defined in the regulations. If such an employer-applicant hires workers from January to April, and then jointly employs workers from May to December, this employer-applicant would have a year-round need. The use of the single employer test in temporary need analysis is meant to cover situations where employees may *not* be jointly employed, or not jointly employed for the entire alleged period of need. ''Joint employer'' is a concept also used in other aspects of the H–2A regulations, and again, the single employer test does not change or undermine the regulations regarding joint employers. *See, e.g.,* 20 CFR 655.131.

Farmworker Justice suggested that the Department specifically state in the regulations that the single employer test does not eliminate or undermine the joint employer test, and that the single employer test is about the relationship between the two different employers as opposed to a relationship between an employer and employee.

The Department appreciates the commenter's suggestions but declines to include them. The two definitions in the H–2A regulations—joint employer and single employer test—are distinct, not exclusive; describe different types of corporate relationships (relationships between two or more employers, versus relationships between employers and employees); and have been sufficiently explained in the preamble, such that additional text in the definition in the regulations could be cumbersome and confusing. It is likewise redundant to note that the single employer test applies between employer-entities and not between an employer and employee. The preamble and articulated definition make this clear, and furthermore the Department does not believe it would be possible to apply the ''single employer test'' to an employer and employee. Finally, Farmworker Justice suggested including the words ''nominally distinct'' somewhere in the definition, although they did not specify where. The Department also believes this to be unnecessary for the reasons specified earlier in this paragraph, as well as the fact that this test is used to determine whether any two or more entities are a single employer.

In light of the BALCA case law criticizing the Department's lack of notice-and-comment rulemaking regarding the single employer test, BALCA case law inappropriately applying the joint employer test to single employer situations, and to codify its long-standing practice, the Department now incorporates the single employer definition as proposed into the regulations and notes that COs will use the definition to analyze the temporary or seasonal need of nominally separate entities.

d. Other Comments on § 655.103(e)

i. Area of Intended Employment

One topic of concern that many commenters raised was whether the Department's assessment of temporary need would involve only those job opportunities in the same AIE. They suggested amending the definition of single employer such that it would read, in part, ''[s]eparate entities *filing for the same or similar job opportunities in the same [AIE]* will be deemed a single employer.'' After consideration, the Department declines to add the requested text to the regulatory provision as it believes the language is redundant.

The regulations state that ''[a]n employer may file only one *Application for Temporary Employment Certification* covering the same AIE, period of employment, and occupation or comparable work to be performed.'' 20 CFR 655.130(e)(2). It is already clear from the regulations that employers are limited to *one* application for *one* AIE and period of employment, and the *same occupation or comparable* work. Therefore, there is no benefit to adding to the single employer definition that temporary or seasonal need be evaluated based on only one AIE, as this is how it is already assessed. There is no prohibition on employers filing for labor certifications in multiple AIEs if they can establish eligibility in each application.

Furthermore, such constraining language may hinder WHD's ability to apply the single employer test in the context of enforcement, as such additional language could be construed as requiring each nominally distinct entity to have filed applications for labor certifications to be deemed part of a single employer.

ii. Single Employer Status Is Not an Automatic Bar

It is possible for a singular employer to have multiple needs—it may have a need for different job opportunities or may have needs in different AIEs. One anonymous commenter, who stated they opposed this proposal, argued that DOL's ''role here is to evaluate whether a need is temporary or seasonal, not to determine whether farms may be some, or any measure constitute a single or otherwise connected employer.'' As discussed extensively above, by adopting and applying the single employer test OFLC is assessing whether the employer's need is temporary or seasonal.

Multiple commenters, including an agent, an agricultural association, and trade associations, stated that the Department should move forward with caution so that the Fifth Amendment and due process rights are not violated but did not elaborate on how including this definition would violate the Fifth Amendment or any due process rights. It appeared, based on language used in the comments, though not always explicitly stated, that many commenters believe that the Department would be ''accusing,'' penalizing, or punishing employers who happen to be single or integrated employers and automatically denying applications for temporary agricultural labor certification if that employer were deemed to be a single or integrated employer.

The Department wants to make clear that being found to be a single employer is *not* an automatic bar to utilizing the H–2A program. One agricultural organization believed that the Department was going to deem all employers in a single industry as a single employer. Others suggested that

sharing an office space, or the fact that entities may both be agricultural producers, would make them ''single employer.'' This is not true. Just because an employer is related to, or is only nominally distinct from another company, does not mean that they are prohibited from using the H–2A program. Nor does it necessarily mean that they will be questioned as to their status via NODs.

The Department is not ''accusing'' any employers of wrongdoing simply by virtue of operating as a single employer with a nominally distinct entity. The single employer test is a means by which OFLC may ascertain an employer's true need for workers. Should entities who are acting as a single employer have distinct needs for workers, and assuming the applications are otherwise consistent with the regulations, the applications will not be denied simply because the employer is an integrated or single employer.

If the CO believes that an employer is unable to establish their temporary or seasonal need because they are a single employer, the employer will be given an opportunity through a NOD, if necessary, to explain their corporate structure and show their eligibility for the H–2A program and will still have the ability to appeal any final determination. The Department wants to make clear that the burden to establish eligibility for the H–2A program lies solely with the employer, and it is the employer, who even if found to be a single employer, must demonstrate its eligibility for the program. *See* 8 U.S.C. 1361. It is therefore unclear, with all these procedural protections in place, how adding this definition would violate due process.

iii. Clarifications

Many organizations expressed support for this proposal, but the Department wishes to clarify what appear to be some misconceptions in some of those comments surrounding the added definition. It appeared that a couple of organizations believed this proposal would group a wider range of entities together as one single employer than was intended, and the Department wants to reiterate two things. One, the single employer test is not the joint employer test and is not meant to undermine or replace the joint employer test. Two, the single employer test is to be used to determine if two or more separate entities are actually so intertwined as to be one entity for the purposes of determining temporary need and for enforcement purposes. It is not intended as a means by which to group any and all employers who have business relationships together under one umbrella.

e. Enforcement by WHD

As stated in the NPRM, the definition of single employer will explicitly provide that the Department may apply this test for purposes of enforcing an H–2A employer's program obligations. As noted in the preamble to the NPRM, and consistent with BALCA and Federal case law, WHD already applies the single employer test in certain circumstances to determine whether the H–2A employer has complied with its program obligations. Over the past several years, WHD has increasingly encountered H–2A employers that utilize multiple seemingly distinct corporate entities under common ownership. The employers have divided their H–2A and non-H–2A workforces onto separate payrolls, paying the non-H–2A workers less than the H–2A workers. However, the H–2A and other workers generally work alongside one another, performing the same work, under the same common group of managers, subject to the same personnel policies and operations. In these circumstances, to determine whether the H–2A employer listed on the *H–2A Application* employed the non-H–2A workers in corresponding employment, the common law test for joint employment may not be a useful inquiry because the interrelation of operations makes it difficult to determine the relationship between each distinct corporate entity and the workers. The single employer test is a more useful inquiry because it focuses on the relationship between the corporate entities to determine whether they are so intertwined as to constitute a single, integrated employer such that it is appropriate and ''fair'' to treat them as one for enforcement purposes. Absent application of the single employer test, this burgeoning business practice might be used—whether intentionally or not—to deprive corresponding workers of the protections of the H–2A program by superficially circumventing an employment relationship with the H–2A employer as described herein, contrary to the statute's requirements. 8 U.S.C. 1188(a)(1). And while WHD already utilizes this test, the Department believes that explicitly noting in the regulations the potential applicability of this test for purposes of enforcement, and the factors the Department will consider in applying this test, will provide clarity for internal and external stakeholders and could also deter employers from intentionally seeking to circumvent the H–2A program's requirements in this manner. However, as for purposes of temporary need, the Department is not replacing or superseding the definition of ''joint employment'' under the existing regulations. Rather, the single employer test would be used as an alternative to joint employment for purposes of enforcement, where appropriate.

The Cato Institute, in criticizing the authority of the Department to adopt this definition, commented that there is no ''adverse effect'' when employers have divided their H–2A and non-H–2A workforces onto separate payrolls, via nominally distinct companies, even if this allows the employer to pay H–2A workers more than other workers. They explained that this type of corporate structure is legal, and that the employment of H–2A workers was not adversely affecting the other workers because allegedly these other workers would not receive higher wages from these employers if the H–2A workers were not employed. In other words, the non-H–2A workers are no worse off because the company hired H–2A workers. The Department does not agree.

The Cato Institute's proffered hypothetical is completely inapposite because the hypothetical employer *has* in fact hired H–2A workers. What that employer would pay its other workers in the absence of H–2A workers is irrelevant to the topic at hand. Instead, the employer in this hypothetical is paying its non-H–2A workers less than it pays its H–2A workers to perform the same work, adversely affecting these workers. *Overdevest* v. *Walsh,* 2 F.4th 977, 984 (D.C. Cir. 2021) (finding the Department's corresponding employment regulations that require H–2A employers ''to pay non-H–2A workers the same amount that they pay the H–2A workers when they are doing the same work'' to be an ''eminently reasonable'' interpretation of the adverse effect mandate). The Cato Institute appears to argue that this hypothetical employer should be allowed to circumvent this requirement by splitting the payroll under nominally distinct entities despite operation of one single, integrated enterprise. Again, the argument that a business or businesses should be allowed to find loopholes to a regulatory system meant to protect workers in the United States is not a convincing one.

USAFL and Hall Global commented on the Department's application of the single employer test for enforcement purposes, stating that ''the use of 'contractual' liability is ambiguous'' and that questions of contract liability are typically matters of State law. USAFL and Hall Global posited that the

regulation thus impermissibly purports to ''preempt state law rules governing attribution of contractual liability.''

These concerns are unfounded. Significantly, the Department did not purport in the NPRM to apply the single employer test for purposes of attributing an entity's contractual ''liability'' under State contract law. *See* 88 FR 63770–63771. The Department has enforcement obligations under the H–2A program that are separate and distinct from any contractual liability that might arise under State law. As set forth in the NPRM and in this final rule, the Department has and will continue to apply the single employer test in the context of its ''enforcement of contractual obligations,'' *id.* Such obligations ''includ[e] requirements under 8 U.S.C. 1188 and 20 CFR part 655, subpart B, applicable to the employment of H–2A workers and workers in corresponding employment.'' 29 CFR 501.0; *see also* 8 U.S.C. 1188(g)(2) (authorizing the Department ''to take such actions . . . as may be necessary to assure employer compliance with terms and conditions of employment under this section''). In this final rule the Department has simply made explicit the potential application of the single employer test in the context of DOL enforcement. *See* 88 FR 63770–63771. Such enforcement is pursuant to and under the authority of the H–2A statute and regulations and not pursuant to State common laws of contract. *Cf. Sun Valley Orchards, LLC* v. *U.S. Dep't of Labor,* No. 1:21–cv–16625, 2023 WL 4784204, *15 (D.N.J July 27, 2023), *appeal filed* (3d Cir. No. 23–2608) (finding DOL's administrative adjudication of H–2A enforcement cases to be Constitutional because such proceedings arise from the employer's ''violations of DOL's regulations, deriv[e] from a federal regulatory scheme under the federal government's immigration related powers, and [are] integrally related to a particular Federal Government action'').

f. Conclusion

The Department sought comments relating to the impact this proposal may have on specific industries or types of employers, and while commenters discussed how this definition would affect agricultural organizations, sometimes with specific examples, there were no comments in response to the question of whether this would impact specific industries more than others. The Department now adopts the single employer definition as it relates to temporary need and contractual obligations without change.

2. Section 655.104, Successors in Interest

The Department proposed several revisions to its current regulations to clarify the liability of successors in interest and to streamline the procedures for applying debarment to a successor in interest to a debarred employer, agent, or attorney. As explained in the NPRM, since 2008 the Department's H–2A regulations have made explicit that successors in interest to employers, agents, and attorneys may be held liable for the responsibilities and obligations of their predecessors, including debarment, to prevent debarred entities from evading the effects of debarment. 73 FR 77110, 77116, 77188 (Dec. 18, 2008) (2008 H–2A Final Rule). However, the Department's current regulations governing debarment, as interpreted by the Administrative Review Board (ARB) and BALCA, are insufficient to effectively prevent program violators from ''circumvent[ing] the effect of the debarment'' as the Department originally intended. *Id.* at 77116. *See Admin.* v. *Fernandez Farms,* ARB No. 2016–0097, 2019 WL 5089592, at *2–4 (ARB Sept. 16, 2019) (holding that 29 CFR 501.31 requires WHD to issue a new notice of debarment to a successor before subjecting the successor to the predecessor employer's WHD order of debarment); *Gons Go, Inc.,* BALCA Nos. 2013–TLC–00051, –00055, –00063 (BALCA Sept. 25, 2013) (holding that 20 CFR 655.182 requires OFLC to first debar a successor of a debarred employer, by completing the full debarment procedures in § 655.182, before it may deny the successor's application for labor certification).

Accordingly, in the NPRM the Department proposed several revisions to its regulations to better effectuate its intent in 2008 when enacting its successor in interest regulations. Most significantly, the Department proposed a new § 655.104, *Successors in interest.* Proposed paragraph (a) clarified the liability of successors in interest and proposed paragraph (b) set forth the definition of a successor in interest. These proposed paragraphs were similar to—but slightly broader than—the first paragraph of the current definition of successor in interest at § 655.103(b). Proposed § 655.104(c) set forth streamlined procedural requirements to apply debarment to a successor in interest, explaining that when an employer, agent, or attorney is debarred, any successor in interest to the debarred employer, agent, or attorney would also be debarred. This proposed paragraph also set forth the procedures by which a putative successor could request review of a CO's determination of successor status. The Department proposed corresponding revisions to §§ 655.103, 655.181, and 655.182 and 29 CFR 501.20. The proposals and the changes adopted in this final rule are discussed more fully below.

The Department received many comments on its proposed revisions to its successor in interest regulations. Various worker rights advocacy organizations, Members of Congress, and public policy organizations, among other commenters, fully supported the proposed revisions, stating that the changes would improve the Department's existing enforcement remedies by expanding the definition of a successor in interest and streamlining debarment proceedings. Several commenters supporting the proposed revisions underscored the need for stronger enforcement against successors in interest in general. For example, FLOC commented that it has become ''all too common'' for H–2A employers to ''try to avoid their responsibilities for violations of the law by transferring their operations to a new person or entity, while all the time retaining control.'' FLOC also recommended additional revisions that would further strengthen debarment, such as applying a ''presumption'' of successor status to any H–2ALC hired by a farm to replace a debarred H–2ALC. Other commenters provided specific examples of entities that have evaded debarment under the current regulations through reconstituting under a different corporate entity with reshuffled ownership.

Along these lines, Farmworker Justice ''urge[d] the Department to focus on overlap of the work actually being done, the workforce, and the product that comes from the work'' when applying any revised regulations. Farmworker Justice and the Agricultural Worker Project of Southern Minnesota Regional Legal Services argued that ''the Department must scrutinize whether the principals or managers of [new] entities are family members of recently debarred entities . . . [and] scrutinize addresses contained in applications for labor certification.'' These commenters underscored the need for robust training and support for Department officials responsible for determining successor status to capture these nuances, so that debarred entities are not able to evade enforcement through rebranding or nominal changes in ownership. Similarly, a couple of SWAs requested guidance on the role of SWAs in determining successor status.

On the other hand, several commenters, including employers, employer associations, and agents, objected to the proposed revisions, though the majority of these commenters took issue with only the proposed definition of a successor in interest, as discussed further below. However, FFVA, a trade association, opined that the debarment of successors as a general matter is unnecessary to meet the Department's goals of ensuring that debarred entities do not continue to operate in the H–2A program because the Department can apply joint employment principles to achieve these goals.

After consideration of the comments received, the Department adopts the proposed changes to its successor in interest regulations in this final rule, with modifications to the discussion of the liabilities of a successor at § 655.104(a) and to the definition of a successor at § 655.104(b). With respect to FFVA's comment on the necessity of debarring successors in interest to debarred employers, agents, and attorneys, the Department notes that application of debarment to a successor in interest is not a new concept in this final rule. As explained in the NPRM, since 2008 the Department's H–2A regulations have explicitly provided for debarment of successors in interest to debarred employers, agents, or attorneys. As explained in the 2008 rulemaking and in the NPRM, application of debarment to successors in interest is necessary to ensure that debarment is an effective remedy, and that debarred entities are not able to circumvent the effects of debarment and continue operating in the H–2A program, despite having been found to have committed substantial violations of the program's requirements. *See* 73 FR at 77116, 77188. It is also unclear how a joint employment analysis could achieve this same goal, as FFVA suggested without further explanation. The Department therefore disagrees with FFVA that debarment of successors is unnecessary to ensure that debarred entities do not evade the effects of debarment. As multiple commenters agreed, however, the Department concludes that changes to its existing successor regulations are needed to better effectuate the intent of the regulations.[17] The Department discusses and responds to the specific comments received on each aspect of the proposal below.

a. Liability of Successors in Interest

Proposed § 655.104(a) set forth the liability of successors in interest, explaining that a successor in interest to an employer, agent, or attorney that has violated the H–2A program requirements may be held liable for the duties and obligations of the violating employer, agent, or attorney in certain circumstances. As discussed in the NPRM, the language in proposed § 655.104(a) is similar to the language in current § 655.103(b) defining a successor in interest, but the proposed language does not purport to limit application of the successorship doctrine to instances where the predecessor ''has ceased doing business or cannot be located for purposes of enforcement,'' as under the current regulations. *Id.* at 63772.

The Department received only one comment on this specific proposed revision. Farmworker Justice applauded the change, explaining that this revision combined with other proposed revisions would better reflect that ''[c]orporate succession, even when it is not based in fraud and deceit, is often far more complicated than, for example, Corporation A becomes Corporation B'' and that ''[f]irms often continue in existence while transferring some operations to a successor—liability attaches to that successor despite the original firm's continued existence.'' Farmworker Justice stated that the proposed revisions would close this ''loophole.'' The Department agrees. As reflected in the case law applying the successorship doctrine in the labor and employment law context, a successor may be deemed liable in a variety of factual circumstances, including but not limited to mergers, acquisitions, transfers of assets, and transfers of operations. *See, e.g., Golden State Bottling Co.* v. *NLRB,* 414 U.S. 168, 182 n. 5 (1973). Application of the successorship doctrine in the labor and employment law context is not limited to instances where the predecessor cannot be located or has ceased operating altogether. *Id.* The Department thus concludes that the revised language better reflects the weight of authority applying the successorship doctrine in the labor and employment context, and better achieves the Department's intent in enacting the successorship regulations in the first place. Therefore, the Department adopts proposed § 655.104(a), with one addition. For the reasons discussed below, the Department adds language from proposed paragraph (b) to the end of paragraph (a) in this final rule, clarifying that a successor in interest is liable for the H–2A program liabilities and obligations of the predecessor regardless of whether the successor has succeeded to such liabilities or obligations.

b. Definition of Successors in Interest

Proposed § 655.104(b) set forth a definition of a successor in interest similar to, but modified from, the current definition of a successor in interest at § 655.103(b). However, this proposed paragraph included a new sentence, not found in the current regulation, providing that a successor in interest ''includes an entity that is controlling and carrying on the business of a previous employer, agent, or farm labor contractor, regardless of whether such successor in interest has succeeded to all the rights and liabilities of the predecessor entity.'' 88 FR 63822. The Department explained that this new sentence, along with the proposed revisions in paragraph (a), was intended to capture successorship scenarios more accurately in the context of the H–2A Program. *Id.* at 63772. As discussed more fully below, the Department also proposed revisions to the list of nonexhaustive factors it would consider when determining a given individual's or entity's successor status.

The Department received various comments in support of the proposed revisions to the definition of a successor in interest. For example, the California LWDA stated that the proposed revisions more closely align with the successorship doctrine as well as with California's own efforts to increase enforcement against successor in interest. The Agricultural Worker Project of Southern Minnesota Regional Legal Services commented that these revisions are ''necessary.''

However, several commenters objected to the proposed definition, particularly inclusion of the new sentence that would describe a successor as ''an entity that is controlling and carrying on the business of a previous employer, agent, or farm labor contractor, regardless of whether such successor in interest has succeeded to all the rights and liabilities of the predecessor entity.'' Commenters asserted that this language is overbroad and conflicts with the notion that the definition of a successor is a factor-driven inquiry. For example, másLabor commented that this language would seemingly upset the fact-dependent ''balancing test'' under the current definition of successor in interest because ''[b]y stating that an acquiring

[17] *See also* U.S. Gov't Accountability Office (GAO), GAO–15–154, *H–2A and H–2B Visa Programs: Increased Protections Needed for Foreign Workers* (2015; Rev. 2017), p. 41, *https://www.gao.gov/assets/gao-15-154.pdf.* (GAO 2015 Report) (describing challenges of imposing debarment where debarred entities ''reinvent'' themselves under current procedures).

entity may be construed as a successor in interest regardless of whether it has succeeded to the rights and liabilities of the predecessor, the Department opens the door for asset purchases alone to trigger successor in interest obligations and liability if the asset purchase involves any degree of continuity with the seller's original operation.'' MásLabor recommended that the Department retain the current definition of a successor in interest at § 655.103(b), opining that it is ''sufficient to address the Department's stated objectives and has a balancing test that is clear and well-understood by the regulated community.'' Wafla, an employer association, commented that this language amounts to an ''automatic assumption of guilt'' that ''binds a new employer to the decisions of the previous employer even if the new employer wants to comply with the law in ways the previous employer did not.''

Similarly, NHC opined that debarment will likely leave an H–2A employer with few economic options but to sell or lease their farm, and in such instances, the purchaser or lessee (often a neighboring farm) typically will use the same land, equipment, and even staff, at least initially, to avoid disruption in operations. NHC expressed concern that under the proposed revised definition, even if the purchaser or lessee has no connection to the debarred employer, they could be considered a successor. NHC requested that the Department ''revise this definition to clarify that purchasing or leasing entities with no connection with the debarred entity should not be considered successors-in-interest.'' Several other employers and employer associations made similar comments.

The Department appreciates these concerns. Insofar as these commenters argue that State laws of corporate succession or contractual limitations on liability should govern the successorship inquiry under the H–2A program, the Department disagrees. The successorship doctrine, as applied in the employment and labor law context, is an equitable inquiry, focused on continuity of the business identity. *See, e.g., Golden State Bottling Co.,* 414 U.S. at 182 n. 5. Whether a given entity is a successor is not dependent on the contractual arrangements between the entities, nor subject to State corporate laws of succession. *Id.* (''The refusal to [adhere to the strict corporate-law definition] is attributable to the fact that, so long as there is a continuity in the 'employing industry,' the public policies underlying the doctrine will be served by its broad application.''); *see also Teed* v. *Thomas & Betts Power Solutions, LLC,* 711 F.3d 763, 764–65 (7th Cir. 2013) (summarizing case law distinguishing application of successor doctrine in contexts of labor and employment law versus corporate-law, and demonstrating that disclaimer of successor lability is not a defense in the labor and employment law context). Thus, a determination of successor status in the labor and employment law context, including the H–2A program, is not dependent on whether the successor agreed to accept some or all of the predecessor's liabilities. Rather, the inquiry is circumstance specific. *Howard Johnson Co., Inc.* v. *AFL–CIO,* 417 U.S. 249, 264 n.9 (1974).

The Department intended its proposed revisions to the definition of a successor in interest to better reflect application of the successorship doctrine in the labor and employment law context, particularly the notion that successors may not disclaim successor liability through contractual agreement with the predecessor. However, the Department agrees with commenters that the proposed language in § 655.104(b) providing that a successor in interest includes ''an entity that is controlling and carrying on the business of a previous employer, agent, or farm labor contractor'' is itself seemingly at odds with the remainder of the proposed definition of a successor, and with application of the successor doctrine in the context of labor and employment law generally. The Department is concerned that this proposed sentence could have the unintended effect of placing an outsized focus by decision-makers on the degree of control exercised by the successor over the predecessor's operations. Instead, as the Supreme Court has explained, ''[t]here is, and can be, no single definition of 'successor' which is applicable in every legal context.'' *Howard Johnson,* 417 U.S. at 262 n.9. Rather, in the labor and employment law context, ''the real question in each of these 'successorship' cases is, on the particular facts, what are the legal obligations of the new employer to the employees of the former owner or their representative?'' *Id.* The Court further detailed that ''[t]he answer to this inquiry requires analysis of the interests of the new employer and the employees and of the policies of the labor laws in light of the facts of each case and the particular legal obligation which is at issue.'' *Id.* The Department therefore concludes that the proposed language is unnecessary and potentially conflicts with its intent that the determination of a successor in any instance be a fact specific inquiry, guided by multiple factors.

However, as explained above and reflected in the comments received on the proposal, in the labor and employment law context, a successor in interest's liability is not dependent on whether the successor has agreed to accept all of the liabilities and obligations of the predecessor. The Department continues to believe it is appropriate and useful to clarify this point in the regulatory text, but believes this clarification is better placed in § 655.104(a), which sets out the liability of successors in the H–2A program, rather than in paragraph (b) setting out the definition of a successor. As a result, § 655.104(a) of this final rule includes the language from proposed § 655.104(b), explaining that a successor is liable for the obligations and liabilities of the predecessor, ''regardless of whether such successor in interest has succeeded to all the rights and liabilities of the predecessor.'' Section 655.104(b) in this final rule, providing the definition of a successor in interest, does not include the proposed first sentence, and instead defines successors in interest pursuant to a circumstance-specific inquiry (as under the current definition at § 655.103(b)), applying a nonexhaustive list of factors set out in the regulation.

With respect to those factors, proposed § 655.104(b) set out a revised list that the Department would consider when determining successor status of any given entity or individual. The proposed list of factors largely mirrored those used in the Department's current definition of successor in interest found at § 655.103(b), which incorporates the factors applied under Title VII of the Civil Rights Act and the Vietnam Era Veterans' Readjustment Assistance Act. Under the current definition of a successor in interest at § 655.103(b), however, the Department provides that, ''[f]or purposes of debarment only, the primary consideration will be the personal involvement of the firm's ownership, management, supervisors, and others associated with the firm in the violation(s) at issue.'' § 655.103(b) (2024). The Department proposed in the NPRM to remove the ''primary consideration'' requirement, such that for purposes of debarment, personal involvement in the underlying violation would remain a consideration, but not the primary consideration. As the Department explained in the NPRM, it proposed this change because the current emphasis on this factor is unduly limiting and in tension with the general principle that no one factor

should be dispositive in determining successor status.

The Department received some comments objecting to the proposed revised list of factors. MásLabor commented that the successor in interest framework in general is ''murkier'' when applied in the context of debarred agents and attorneys, given the nature of their role in the labor certification process, but that these concerns are somewhat alleviated under the current definition of successor in interest at § 655.103(b) with its focus on the personal involvement of those responsible for the underlying violation. Accordingly, másLabor ''encourage[d] the Department to retain . . . the qualification that, in the context of an agent or attorney, the primary consideration for purposes of debarment is the personal involvement in the violation(s) at issue.''

The Department appreciates these concerns but notes that whether any given entity or individual is deemed a successor in interest is a highly fact-dependent inquiry that requires consideration of all circumstances; in some instances, certain factors will be more relevant or useful to the inquiry than in other instances. *See, e.g., Fall River Dyeing & Finishing Corp.* v. *NLRB,* 482 U.S. 27, 43 (1987) (the successor inquiry ''is primarily factual in nature and is based upon the totality of the circumstances of a given situation''); *Cobb* v. *Contract Transport, Inc.,* 452 F.3d 543, 553–54 (6th Cir. 2006) (''[A]ll nine factors will not be applicable to each case. Whether a particular factor is relevant depends on the legal obligation at issue in the case. The ultimate inquiry always remains whether the imposition of the particular legal obligation at issue would be equitable and in keeping with federal policy.''). The same is true in the H–2A context. For example, whether a new agent is a successor to a debarred agent will involve significantly different facts and considerations than whether the purchaser or lessee of farm equipment from a debarred farmer is a successor to the debarred farmer.

Similarly, courts have recognized that definitions of a successor in interest similar to the Department's proposed definition properly balance the interests of employers, workers, and the Federal policy at issue, with equity and fairness at the heart of the inquiry. *See, e.g., Cobb,* 452 F.3d at 553–54; *Leib* v. *Georgia-Pac. Corp.,* 925 F.2d 240, 241–47 (8th Cir. 1991); *see also Criswell* v. *Delta Air Lines, Inc.,* 868 F.2d 1093, 1094 (9th Cir. 1989) (''Because the origins of successor liability are equitable, fairness is a prime consideration in its application.''). The revised list of factors is intended to better promote the balancing of such interests, rather than reduce it, by ensuring that the inquiry is always reasonable and fact dependent. The Department concludes that the proposed revised list of factors at new § 655.104(b), which remove dependence on any one given factor in any certain circumstance, better reflects the weight of authority applying the successorship doctrine in the labor and employment law context. Therefore, the Department adopts the list of nonexhaustive factors at § 655.104(b) as proposed.

Relatedly, the Department agrees with those commenters that observed the need for sufficient training to Department officials responsible for identifying potential successors in interest and determining successor status, such that relevant facts and factors are considered on a case-by-case basis. The Department provides training that is needed to effectively perform various job duties and will train staff about the provisions of this rule, including how to appropriately use the enhanced data collection elements in § 655.130 to determine successorship status. With respect to the comment requesting clarification on the role of the SWA in identifying and determining successor status, the Department notes that the SWA will have a primary role in making this determination for purposes of discontinuation of ES services under 20 CFR part 658, discussed further in Sections V.B and V.C. However, determinations of successor status for purposes of enforcement and debarment under 20 CFR part 655, subpart B, and 29 CFR part 501 would be the responsibility of the Department.

c. Streamlined Procedures To Apply Debarment to Successors

The Department proposed various revisions to its current regulations to streamline the procedures for applying debarment to successors in interest, set forth in proposed §§ 655.104(c), 655.181, 655.182, and 29 CFR 501.20. Under proposed § 655.104(c), applications filed by or on behalf of a putative successor in interest to a debarred employer, agent, or attorney would be treated like applications filed by the debarred employer, attorney, or agent. If the CO determines that such an application was filed during the debarment period, the CO would issue a NOD under § 655.142 or deny the application under § 655.164, depending upon the procedural status of the application. The NOD or denial would be based solely on the applying entity's successor status and would not address (nor would it waive) any other potential deficiencies in the application. If the CO determines that the entity was not a successor, the CO would resume with processing of the application under § 655.140. However, if the CO determines that the entity is a successor, the CO would deny the application without further review, pursuant to § 655.164. As with any other application denial, the putative successor could appeal the CO's determination under the appeal procedures at § 655.171, although review would be limited to whether the entity was, in fact, a successor in interest to a debarred employer, agent, or attorney. Accordingly, should a reviewing ALJ conclude that the entity was not a successor, the application would require further consideration and thus the ALJ would remand the application to OFLC for further processing.

Similarly, proposed § 655.104(c) also provided that the OFLC Administrator could revoke a certification that was issued, in error, to a successor in interest to a debarred employer, pursuant to § 655.181(a), and the entity could appeal its successor status pursuant to § 655.171. The Department explained in the NPRM that it currently may revoke a certification issued in error to a debarred employer or to a successor of a debarred employer under its current revocation authorities, but the Department proposed revisions to the grounds for revocation at § 655.181(a)(1) to clarify that fraud or misrepresentation in the application includes an application filed by a debarred employer (and, by extension, an application filed by a successor to a debarred employer). The proposed changes would simply clarify this existing authority. However, given the impact of revocation on both employers and workers, proposed §§ 655.104(c) and655.181(a)(1) did not explicitly contemplate revocation of a certification issued in error, based on an application filed by a debarred agent or attorney or by successors to a debarred agent or attorney, as distinct from a debarred employer or successor in interest to a debarred employer. The Department invited comment on whether revocation may be warranted in such circumstances.

The Department also proposed revisions to § 655.182 governing debarment, corresponding to proposed § 655.104(c), to state clearly that debarment of an employer, agent, or attorney would apply to any successor in interest to that debarred employer, agent, or attorney. The Department also proposed corresponding revisions to the

procedures governing WHD debarments under 29 CFR 501.20, including a new proposed paragraph (j) that explicitly addressed successors in interest. Under the successorship doctrine, as discussed above, and under the proposed rule, WHD would not be required to issue a notice of debarment to a successor in interest to a debarred employer, agent, or attorney; rather, debarment of the predecessor would apply equally to any successor in interest. However, as provided in proposed paragraph (j), as a matter of expediency WHD could, but would not be required to, name any known successors to an employer, agent, or attorney in a notice of debarment issued under § 501.20(a).

The Department received only a few comments in opposition to or commenting specifically on these revised procedures. Wafla commented that the revised procedures, coupled with the revised definition of a successor, ''would force a legitimate employer to prove its innocence in order to receive equal treatment under the law'' and opined that the Department should only impose debarment on a successor if the successor also violates the H–2A program requirements. NCAE, AILA, and others urged the Department to exercise caution in its application of the proposed regulations, if finalized, to protect the due process rights of employers, agents, and attorneys.

The Department also received comments in support of these proposed revisions, observing that the revised procedures would better effectuate the Department's debarment authority. For example, the California LWDA stated that the ''streamlined debarment process safeguards workers and compliant employers from those who violate H–2A requirements and hide behind shell companies and paper farms.'' Farmworker Justice opined that the proposed revisions are ''logically sound and in line with successorship doctrine'' and provide sufficient due process. Similarly, Farmworker Justice supported the proposed revision to § 655.181(a)(1) clarifying that OFLC may revoke a certification issued in error to a successor in interest to a debarred employer and explaining that ''[s]ituations where successors to debarred predecessor employers attempt to apply for workers during a debarment should be treated as cases of fraud and/or misrepresentation and warrant revocation under 20 CFR 655.181(a).''

The Department did not receive any comments in response to its request for input on whether revocation may be warranted under circumstances where a labor certification has been issued, in error, to an employer represented by debarred agent or attorney or a successor in interest to a debarred agent or attorney, although the Colorado SWA requested clarification on the effect of revocation of a labor certification on the visa process. The Colorado SWA also requested clarification as to when and whether WHD would name a known successor in interest in a debarment proceeding of a predecessor employer, agent, or attorney under 29 CFR 501.20(j).

After consideration of these comments, and for the reasons stated in the NPRM, the Department adopts these revised procedures as proposed. The Department concludes that the streamlined procedures are more consistent with the successorship doctrine than the Department's current procedures for imposition of debarment on successors while affording putative successors sufficient due process. These revised procedures also are more consistent with, and better effectuate, the Department's original intent in enacting its successor in interest regulations in 2008, namely ''to ensure that violators are not able to re-incorporate to circumvent the effect of the debarment provisions,'' and ''to prevent persons or firms who were complicit in the cause of debarment from reconstituting themselves as a new entity to take over the debarred employer's business.'' 73 FR 77116, 77188 (Dec. 18, 2008).

With respect to concerns for due process, rather than imposing a ''presumption of guilt,'' the revised debarment procedures coupled with the revised definition of a successor in interest will better reflect application of the successorship doctrine in the context of labor and employment law, which is an equitable, fact-driven inquiry. *Howard Johnson,* 417 U.S. at 264. For similar reasons, the Department declines to adopt the suggestion received in a comment that the Department impose a presumption of successor status on any given entity. Rather, the Department will determine on a case-by-case basis whether a given individual or entity is a successor in interest to a debarred employer, agent, or attorney, with notice and opportunity for hearing on successor status given to the putative successor. However, where an entity is deemed to be a successor to a debarred employer, agent, or attorney, the Department need not obtain a new order of debarment against the successor to impose the predecessor's debarment on the successor, as that is the ''whole point'' of the successorship doctrine, namely that the liabilities of the predecessor attach to the successor. *Criswell,* 868 F.2d at 1095.

In response to the Colorado SWA's request for clarification under 29 CFR 501.20(j) as to when and whether WHD would name a known successor in interest in a notice of debarment, such a decision will be a matter of enforcement discretion. For example, where WHD issues a notice of debarment to a violating employer and, at that time, a successor entity already is known to WHD, WHD may decide to name the successor in the predecessor's notice of debarment. If so, the putative successor could request a hearing on its successor status through the administrative procedures under 29 CFR part 501, subpart C. The intent of this new paragraph (j), however, is to reflect that WHD is not *required* to name successors in a notice of debarment issued to a predecessor, even if known at the time of issuance, for OFLC to apply the revised procedures to that successor under 20 CFR 655.104(c), 655.181, and 655.182. For example, where WHD obtains a final order of debarment against an employer under 29 CFR 501.20, it would not be a defense to OFLC's denial of an application filed by a successor in interest to that debarred employer, under new 20 CFR 655.104(c), that WHD was aware of the existence of the successor entity at the time WHD issued the underlying debarment notice to the debarred employer.

Finally, with respect to revocations under 20 CFR 655.181(a)(1), the Department adopts that revised paragraph as proposed, for the reasons as stated in the NPRM and as reflected in Farmworker Justice's comment. However, as in the NPRM, the revised regulations do not explicitly contemplate revocation where a labor certification has been issued in error to an employer represented by a debarred agent or attorney or a successor in interest to a debarred agent or attorney, given the severity of debarment as a remedy and the impact of a revocation on the workers. However, as under current § 655.181(a)(1), the Department retains authority and discretion to revoke a labor certification due to fraud or misrepresentation in the application process. Whether the above circumstances would warrant revocation would be determined on a case-by-case basis. In response to the Colorado SWA's request for clarification of the effect of revocation of a labor certification on the petition and visa application processes, the regulations at § 655.181(c) impose certain obligations on the employer in the event of revocation, including inbound and

outbound transportation requirements and satisfaction of the three-fourths guarantee. In addition, pursuant to § 655.181(b)(5), the Department notifies DHS and the Department of State of each revocation; further consequences are subject to and pursuant to the authorities of those agencies.

3. Section 655.190, Severability

The NPRM proposed to add new and identical regulatory text at § 655.190 and § 501.10 stating that if any provision of the Department's H–2A regulations is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, or stayed pending further agency action, the provision will be construed so as to continue to give the maximum effect to the provision permitted by law. The proposed regulatory text further stated that where such holding is one of total invalidity or unenforceability, the provision will be severable from the corresponding part and will not affect the remainder thereof.

As the NPRM explained, the Department believes that a severability provision is appropriate because each provision within the H–2A regulations is capable of operating independently from the others, including where the Department proposed multiple methods to strengthen worker protections and to enhance the Department's capabilities to conduct enforcement and monitor compliance. The NPRM also emphasized that it is important to the Department and the regulated community that the H–2A program continue to operate consistent with the expectations of employers and workers, even if a portion of the H–2A regulations is held to be invalid or unenforceable.

Several commenters offered views on the proposed severability provision. Farmworker Justice suggested two revisions related to severability: (1) require that clearance orders include a severability clause specifying that if any part of a clearance order is found unenforceable, the rest remains in effect; (2) revise the proposed access-to-housing provision, at proposed § 655.135(n), to ''clearly separate the access provisions for labor organizations from key service providers.'' As a rationale for the second suggestion, Farmworker Justice stated their view that access to housing for labor organizations and for key service providers have separate legal bases, citing *Cedar Point Nursery* v. *Hassid,* 141 S. Ct. 2063 (2021).

A few commenters objected to the proposed severability provision. One trade association, wafla, opposed the severability provision because, in its view, the topics covered by the proposed rule are linked together and build on each other to achieve the same goal of improving protections for workers in temporary agricultural employment in the United States. Another trade association, NCAE, argued that the Department should withdraw the severability provision because, in its view, Congress did not intend for the Department to enforce parts of the H–2A regulations without other parts. The trade association added that, in its view, the executive branch—including the Presidents who have signed H–2A legislation and the administrations that have administered the H–2A program—have similarly intended that the regulations be enforced as a comprehensive set.

Finally, an agent, másLabor, expressed the view that a severability provision would undermine the H–2A program's ''balanc[ing]'' of ''interests'' of ''multiple stakeholders.'' This commenter identified several provisions that, it said, provided ''examples of such interoperable and interdependent regulatory provisions.'' In particular, the agent asserted that § 655.122(i), which outlines the employer's obligations under the three-fourths guarantee, is inextricably intertwined with § 655.122(n) (relieving employers from the three-fourths guarantee where workers ''abandon'' employment or are ''terminated for cause''); § 655.122(o) (modified three-fourths guarantee in the event of contract impossibility); and § 655.122(j) (requiring employers to track earnings records). The commenter added that § 655.122(l) (which requires employers to pay certain pay rates) would be rendered ''ambiguous'' if proposed § 655.120 (which would require monitoring and tracking of piece rate production) were invalidated. MásLabor further asserted that proposed § 655.135(p) (respecting foreign labor recruitment) and § 655.137 (requiring disclosure of foreign labor recruitment) would ''make little sense'' absent § 655.135(j) and (k) (concerning foreign recruitment). The commenter further explained its position that the various recruitment provisions are ''interdependent'' such that ''[t]he invalidation of one provision would undermine the integrity of the scheme as a whole,'' citing § 655.135(c) (cooperation with the SWA on accepting and processing applicants and referrals); § 655.135(d) (pertaining to duration of recruitment activities); §§ 655.150–655.158 (specifying obligations concerning positive recruitment activities); and § 655.167 (pertaining to document retention).

The Department adopts the severability provision as proposed in the NPRM, with a few minor, non-substantive changes to the language of the provision. This final rule substitutes ''will'' for ''shall'' for internal consistency and to incorporate plain language. This final rule also omits references to ''subparts'' and ''subparagraphs'' for internal consistency.

As an initial matter, with respect to this final rule, it is the Department's intent that all provisions and sections be considered separate and severable and operate independently from one another. In this regard, the Department intends that: (1) in the event that any provision within a section of this rule is stayed, enjoined, or invalidated, all remaining provisions within that section will remain effective and operative; (2) in the event that any whole section of this rule is stayed, enjoined, or invalidated, all remaining sections will remain effective and operative; and (3) in the event that any application of a provision is stayed, enjoined, or invalidated, the provision will be construed so as to continue to give the maximum effect to the provision permitted by law. It is the Department's position, based on its experience enforcing and administering the H–2A provisions of the INA, that the provisions and sections of this rule can function sensibly in the event that any specific provisions, sections, or applications are invalidated, enjoined, or stayed. Furthermore, the Department believes that it has balanced the interests of stakeholders in modifying this final rule in response to public comments, and that this rule covers a number of different topics, each of which furthers the Department's general goals of improving protections in the H–2A program but which can stand independently as a legal and practical matter. For example, the worker voice and empowerment provisions adopted in this rule, along with other provisions, provide layers of protection to prevent adverse effect, and these layers of protection would remain workable and effective at preventing adverse effect even if any individual provision is invalidated.

Farmworker Justice urged the Department to require that clearance orders include a severability clause specifying that if any part of a clearance order is found unenforceable, the rest remains in effect. The Department declines to adopt this proposal. The severability provision in this final rule and a severability provision in a

clearance order would serve different goals and would implicate different legal considerations. For example, while the severability provision in this final rule would ensure continuity in the H–2A program should a particular provision be invalidated, a severability provision in a clearance order would be relevant only to the interactions between a single employer and its workers.

Farmworker Justice also proposed separating, at proposed § 655.135(n), housing-access provisions for labor organizations from housing-access provisions for key service providers. As explained below in the discussion of § 655.135(n), the Department has decided to modify the access-to-housing provision in response to comments, and, given these modifications, this comment is no longer applicable.

Some commenters suggested the Department abandon the proposed severability provision; the Department declines to do so. Whether a regulatory provision is severable turns on: (1) the agency's intent; and (2) whether other provisions ''could function sensibly'' even if an individual provision is invalidated. *Belmont Mun. Light Dep't* v. *FERC,* 38 F.4th 173, 188 (D.C. Cir. 2022). As explained above and below, the Department intends that the provisions of this rule be severable and, based on the Department's experience implementing the program, believes its remaining provisions could function sensibly even if one is invalidated.

One commenter, wafla, objected to the proposed severability clause because every provision in the NPRM is intended to serve the same goal of improving protections for workers in temporary agricultural employment in the United States. However, whether regulatory provisions serve the same goal is not dispositive of whether the provisions may ''function sensibly'' if a single provision is invalidated. Moreover, this objection would render difficult the incorporation of a severability provision in *any* regulation, as agencies routinely issue regulations to serve a particular unified goal. Additionally, this rule covers a wide range of diverse topics, each of which furthers the goals of improving protections in the H–2A program but which can stand independently as a legal and practical matter.

Another commenter, NCAE, focused on intent, asserting that Congress and the executive branch have historically intended that the regulations be enforced as a comprehensive set, but did not point to any authority demonstrating such intent. The Department believes that the goal of enforcing the regulations comprehensively is not incompatible with the Department's stated intent that invalidated provisions be deemed severable. On the contrary, severing invalid provisions serves the aim of preserving the regulatory scheme and allowing the program to proceed even if one provision is deemed invalid.

Finally, although másLabor cited concerns about balancing competing interests in asserting that a severability provision would ''impair the proper functioning of the program [and] introduce conflicts and ambiguities,'' the Department believes that including a severability provision is the best way to balance those interests and promote certainty. Again, severing invalidated provisions permits the program to continue absent those provisions, and program continuity is in the interests of employers, workers, and the Department alike.

MásLabor also responded to the NPRM's request for comments on whether specific parts of the rule could operate independently. The Department believes that the provisions in this rule, including the provisions másLabor cited, can operate independently of each other.

The Department addresses in more detail másLabor's characterization of § 655.122(i) (establishing the three-fourths guarantee) as inextricably intertwined with several other provisions. The Department disagrees with this characterization. MásLabor asserted that without § 655.122(n), which relieves employers from the three-fourths guarantee where workers ''abandon'' employment or are ''terminated for cause,'' workers will have an incentive to abandon work to secure payment promised under the three-fourths guarantee. To be sure, the NPRM proposed clarifications to the construction of ''termination for cause'' under § 655.122(n) (although the NPRM did not make any changes respecting abandonment), but even absent that clarification, the regulatory term ''termination for cause'' would still be subject to interpretation by an adjudicator, and would therefore still serve as a limitation on the three-fourths guarantee. MásLabor further asserted that if § 655.122(o) (modifying the three-fourths guarantee in the event of contract impossibility) were invalidated, employers facing contract impossibility would sustain significant economic ramifications and argued that enforcement of the three-fourths guarantee would be ''all but impossible'' without the earnings record provision under § 655.122(j). This final rule does not propose any modifications to § 655.122(o) or § 655.122(j); therefore, should any provision of this final rule be invalidated that will not affect the validity of § 655.122(o) or § 655.122(j).

Similarly, the Department believes that the various protections for workers through the ES System can operate independently from the protections in Part 655. Additionally, the updates to the successor in interest provision at § 655.104 and the definition of single employer at § 655.103(b) operate independently from each other and from the new protections proposed at § 655.135(h), (m), and (n). The protected activities at § 655.135(h)(1)(v) and (vi) are, as the Department set forth in the NPRM, already protected by the existing regulations, and do not rely upon the existence of the other protected activities being added at § 655.135(h)(2). Furthermore, the addition of the explicit protection against passport withholding at § 655.135(o) does not rely upon the existence of the other worker protections being added to § 655.135. The provisions at § 655.135(j) and § 655.135(k), which the Department did not propose to change in this rulemaking, also do not rely upon the existence of new § 655.135(p) or § 655.137. Relatedly, new § 655.135(p) and § 655.137 do not mention § 655.135(j) and can operate even if the changes made to § 655.135(k) under the 2022 H–2A Final Rule were invalidated, as the version of § 655.135(k) under the 2010 H–2A Final Rule still requires contracts with third parties to prohibit the charging of fees from prospective employees. And, as discussed above, whether regulatory provisions serve the same objective is not dispositive of whether the provisions may ''function sensibly'' if a single provision is invalidated. The Department notes that although this preamble does not address every possible interrelationship between the various provisions included in this final rule, that does not imply that the Department believes that provisions not discussed are interdependent. Again, as explained, it is the Department's intent that each provision of this final rule be deemed independent and severable from other provisions.

Therefore, this final rule again states the Department's general intent that invalidated provisions should be severed.

B. Prefiling Procedures

1. Section 655.120(b), Offered Wage Rate

The Department proposed to clarify in the H–2A regulations the date on which an AEWR, for non-range occupations and wage sources, published in the

Federal Register will become effective. As noted in the NPRM, under the current regulations, the Department protects against adverse effect on the wages of workers in the United States similarly employed, in part, by requiring that an employer offer, advertise in its recruitment, and pay a wage that is the highest of the AEWR, the prevailing wage, the agreed-upon collective bargaining wage, the Federal minimum wage, or the State minimum wage. If an updated AEWR for the occupational classification and geographic area is published during the work contract and becomes the highest applicable wage rate, the employer must pay at least that updated AEWR upon its effective date, as published in the **Federal Register**. 20 CFR 655.120(b)(3). In accordance with § 655.120(b)(2) and (3), the Department publishes the updated AEWR at least once annually in the **Federal Register**. One **Federal Register** notice (FRN) provides annual adjustments to the AEWR for the field and livestock workers (combined) occupational grouping based on the U.S. Department of Agriculture's (USDA) publication of the Farm Labor Reports (better known as the Farm Labor Survey, or FLS), effective on or about January 1st, and a second FRN will provide annual adjustments to the AEWR for all other non-range occupations based on the Department's Bureau of Labor Statistics' (BLS) publication of the Occupational Employment and Wage Statistics (OEWS) survey, effective on or about July 1st.[18] Each notice specifies the effective date of the new AEWR, which, in recent notices, has been not more than 14 calendar days after publication. The current regulatory text does not address when an AEWR published in a **Federal Register** would become effective.

The Department proposed to revise § 655.120(b)(2) to designate the effective date of updated AEWRs as the date of publication in the **Federal Register**. For further clarity, the Department also proposed to revise § 655.120(b)(3) to state that the employer is obligated to pay the updated AEWR immediately upon the date of publication of the new AEWR in the **Federal Register**. The Department sought comments on all aspects of this proposal. After careful consideration of the comments, the Department is finalizing the proposal without change, as explained below.

The Department received many comments both in support of and in opposition to the proposed changes. Several trade associations, including NCAE, NCFC, Western Growers, and FFVA, as well as an agent, másLabor, opposed the proposal, asserting it abandoned the ''longstanding'' practice to delay the effective date of the AEWR, with some commenters noting delayed implementation has been in place ''as recently as June 16, 2023,'' and a couple of commenters adding that the delayed implementation simplified program requirements by eliminating the need for payroll changes in the middle of a pay period. Several trade associations (USApple, TIPA, IFPA, U.S. Custom Harvesters, Inc., NHC, and SRFA) and one employer (Titan Farms, LLC) commented that the adjustment period was needed because monitoring the BLS and FLS websites is burdensome, especially for small employers that may lack the resources to regularly check those websites for updates. In addition, the National Association of State Departments of Agriculture asserted that many farms lack access to the internet and cannot view the announcement on the OFLC website or the notice in the **Federal Register**. An agent, másLabor, acknowledged a delay to the effective date may deprive workers of earnings during the notice period, but noted workers are not ''harmed by a modest delay in the implementation of new rates'' because ''workers willingly accepted the job at the advertised pay rate, which would have been the existing AEWR.''

The Cato Institute, a public policy organization, wrote that the obligation to update AEWRs mid-contract constitutes a mandate imposed only on H–2A farmers, stating ''U.S. workers and [unauthorized] workers do not get pay bumps in the middle of contracts—let alone the middle of a pay period.'' This commenter also asserted, without elaborating as to how or providing any form of support for its contention, that the proposal ''makes planning for H–2A costs that much more difficult and incentivizes illegal employment.'' Several of the trade association commenters, the New York State Farm Bureau, American Farm Bureau Federation, Titan Farms, LLC, and AILA observed that advance notice of AEWR changes, a 14-day grace period prior to the effective date, or some other flexibility with respect to AEWR updates was necessary for various reasons. Some trade associations and an employer generally asserted payroll systems are not always simple adjustments, cannot always be accomplished by ''just chang[ing] a few items in [the employer's] payroll system,'' and may take weeks to adjust, while another commenter noted that agricultural employers, especially small employers, may need time to secure funds or sell assets because many of these employers do not have ''immediate cash flow'' to pay an updated AEWR due to ''incredibly tight'' operating margins. Several of the trade association commenters and an employer, Titan Farms, LLC, asserted it is not possible for employers to simply ''include into their contingency planning certain flexibility'' to account for AEWR adjustments because ''variability in wage rates can cost a single employer thousands, if not millions, of dollars and it is impossible to 'contingency' plan accurately.'' The U.S. Chamber of Commerce expressed general concern that immediate effective dates for AEWR would impose an ''administrative burden'' by ''forc[ing] employers to update the wages they need to pay'' on the ''date of publication in the **Federal Register**.''

Several commenters urged the Department to alternatively retain the 14-day grace period or a longer grace period, commit to publish updated AEWRs on dates certain in December and July, permit employers to provide back pay at a later date, provide employers notice of upcoming FRN publications via email, or some combination of those suggestions. A couple of U.S. House Members stated that this proposed change is unnecessary and would be challenging or impossible for employers to meet. Another U.S. House Member called the change unnecessary. An employer stated that the proposed change would lead to involuntary noncompliance by employers because they cannot update wages quickly enough. SRFA and NHC asserted that the Department did not provide reasoning for why the **Federal Register** publication date is more appropriate than other dates, such as when the wage data are published. The Western Range Association asserted that it is unreasonable to expect immediate wage adjustments when the Department takes 45 days to calculate the AEWR. AILA suggested the Department should provide ''a notification to employers via email'' when the Department is preparing to publish in the **Federal Register** and ''when the AEWR is updated.'' This commenter and NHC, NCFC, FFVA, Western Growers, and SRFA urged the Department to set annual dates certain for the effective date for each AEWR wage, which Western Growers asserted would allow ''for expectations to be met, and a reasonable period of time to adjust

[18] 2022 H–2A Final Rule; Final Rule, *Adverse Effect Wage Rate Methodology for the Temporary Employment of H–2A Nonimmigrants in Non-Range Occupations in the United States*, 88 FR 12760 (Feb. 28, 2023) (2023 AEWR Final Rule).

payroll rates.'' IFPA, U.S. Custom Harvesters, Inc., TIPA, GFVGA, and Demaray Harvesting and Trucking, LLC said the Department should consider requiring that employees ''be back paid for the [AEWR] increase . . . while still giving an employer the flexibility to see the [FRN] and update systems accordingly.'' NCFC and the U.S. Chamber of Commerce suggested the Department should permit employers to provide retroactive payment to workers within 14 days of publication of notice in the **Federal Register**. New York State Farm Bureau urged the Department to ''exempt through an enforcement waiver, for a two-week period'' after publication of notice in the **Federal Register**, ''those farms who may need to move and adjust their payroll to pay the full back pay of affected employees.'' Finally, wafla urged the Department to make new AEWRs effective on the ''first day of the employer's next pay period.''

The Department also received many comments in support of the proposal to make AEWRs effective on the date they are published in the **Federal Register**. Federal elected officials and advocacy organizations supported the proposal as a way to provide clarity and ''make wages more predictable in the H–2A program.'' California LWDA, a SWA, supported the proposal because it would ''provide clarity regarding the effective dates of [AEWRs]'' and noted that it will help the SWA ''better determine when to issue notice of deficiencies when an employer is not paying the highest wage or the AEWR is incorrect'' because the SWA ''uses the **Federal Register** to determine the current and appropriate AEWR.'' Several advocacy organizations, Proteus, Inc., UMOS, Green America, and CAUSE, expressed support for the proposed rule noting specifically, among other items, the Department's proposal regarding the immediate implementation of the AEWR. The Economic Policy Institute (EPI), a public policy organization, supported the proposal as necessary to ''ensure that farmworkers are paid appropriately,'' asserting that farmworkers ''are likely being underpaid'' because the FLS-based AEWR ''are always one year behind,'' given the FLS data ''reflects average wages surveyed for the previous year.'' EPI also urged the Department to reject any suggestions to retain a delayed AEWR effective date, asserting that delayed implementation is not necessary because ''there are adequate public sources of information'' to provide employers early notice of forthcoming AEWR updates and the Department ''will publish a notice directing employers to those sources.''

The Department additionally received comments from a Federal elected official, a workers' rights organization (Agricultural Justice Project), a few trade associations (NCAE, SRFA, and Michigan Asparagus Advisory Board), a couple of agents (másLabor and Labor Services International), a public policy organization (EPI), and an anonymous commenter expressing general concerns related to the AEWR amounts or the methodology for calculating the AEWR. These comments are beyond the scope of this rulemaking and the Department's proposal regarding when updated AEWRs should become effective.

The Department appreciates the comments. After due consideration, the Department is adopting the proposed changes in this final rule. The proposed changes were intended to restore the longstanding practice in the H–2A program that workers be paid at least the updated AEWR, for all hours worked after the updated AEWR is published. The Department believes adoption of the proposed changes in this final rule is the best way to achieve that objective. As stated in the NPRM, the duty to pay an updated AEWR where it is higher than the other wage sources is not a new requirement, nor is the requirement to pay an increased AEWR immediately upon publication in the **Federal Register**. Between 1987 and January 2018, the Department required employers participating in the H–2A program to offer and pay the highest of the AEWR, the prevailing wage, any agreed-upon collective bargaining wage, or the Federal or State minimum wage at the time the work had been performed, effective upon the date of publication of new AEWRs in the **Federal Register**.[19] As noted in the NPRM, setting the effective date of updated AEWRs as the date of publication in the **Federal Register** is a return to longstanding prior practice. This change will ensure that agricultural workers are paid at least the most current AEWR when work is performed, thereby preventing the harm caused through even a modest delay. Moreover, the workers employed under the H–2A Application accepted terms and conditions of employment that include the employer's agreement to comply with the obligation to pay an updated AEWR if a higher AEWR is published during the work contract period. Immediate implementation also better aligns with the Department's mandate to prevent adverse effect on the wages of workers in the United States similarly employed by keeping wages paid to H–2A workers and workers in corresponding employment consistent with wages paid to similarly employed workers. The Department therefore disagrees that a delay in payment of an updated AEWR would not harm workers or that workers do not or should not expect the employer to fulfill this obligation.

The Department acknowledges that this rule is a departure from more recent practice and the proposal in the 2019 H–2A NPRM, which allowed a minor period for wage adjustment after publication of the FRN. However, as noted in the 2022 H–2A Final Rule in which the Department declined to adopt the proposal to allow an adjustment period of up to 14 calendar days, ''employers participating in the H–2A program historically have been required to offer and pay the highest of the AEWR, the prevailing wage, or the Federal or State minimum wage at the time the work is performed'' and ''employers have been required to make these adjustments for many years and neither program experience nor comments on the NPRM demonstrated that a longer adjustment period would be necessary to avoid significant operational burdens on employers or the layoffs and crop deterioration cited by some commenters.'' [20] Several commenters asserted, generally, that payroll adjustment may be difficult and require time to complete, but no commenter cited specific difficulties encountered when adjusting payroll systems to a new AEWR, and while one commenter did note it could take weeks to update payroll, this commenter provided no further explanation as to why that number of days, which is longer than even the 14-day period other comments suggested, would be necessary to make adjustments to payroll systems.

However, the Department is sensitive to commenter concerns that payroll systems may not allow adjustments to be made instantaneously and that some flexibility should be provided to permit difficult payroll adjustments and provide prompt retroactive payment. Under this final rule, where an employer's payroll systems permit pay to be adjusted in the middle of a pay period, it must immediately adjust them

[19] *See, e.g.,* 1987 H–2A IFR, 52 FR 20496, 20521; *Labor Certification Process for the Temporary Employment of Aliens in Agriculture in the United States; H–2A Program Handbook,* 53 FR 22076, 22095 (June 13, 1988) (''Certified H–2A employers must agree, as a condition for receiving certification, to pay a higher AEWR than the one in effect at the time an application is submitted in the event publication of the [higher] AEWR coincides with the period of employment.'').

[20] 87 FR at 61688.

to reflect the updated AEWR (where the updated AEWR is or remains the highest of all potential wage sources). However, where the employer is able to demonstrate to the Department that it is not possible for it to update payroll systems by the pay date, the employer may provide payment on the pay date for the following pay period. For example, consider a scenario where the Department publishes an AEWR update notice in the **Federal Register** on January 1st, which is the middle of a pay period for an employer whose workers are paid biweekly. The next pay date is January 5th. The AEWR remains the highest of the applicable wages. It is not, however, possible for the employer to update payroll in time for the January 5th pay date. In this example, the worker would be momentarily underpaid for the remainder of that pay period when they receive their paycheck for that pay period. This final rule requires that the employer cure that underpayment by providing the entirety of all back wages due, calculated beginning on January 1st, no later than the following pay date, along with the following pay period's wages calculated entirely at the new AEWR for the entire pay period.

The Department declines to adopt suggestions to provide a delayed implementation period for the reasons described above, permit payment of back wages beyond the manner discussed in the preceding paragraph, or publish AEWRs on a specific date each year or around the time the FLS or OEWS data publishes. Revising the effective date to coincide with BLS or USDA publications or on certain dates is not possible and would represent a substantial deviation from longstanding pre-2018 practice. If the Department were to tie the effective date to the FLS or BLS publication dates, doing so would deprive the stakeholder community of any advance notice prior to effectiveness as, in neither instance, is the wage data made public prior to publication. The Department does not control the publication of the FLS data. Separately, it is administratively impractical for the Department to publish AEWRs on the same date that BLS and USDA publishes the underlying data, given that the Department lacks early access to that data and given the resources required to draft an FRN. While the Department does not control the publication dates of BLS and USDA data, it does prepare the OFLC FRN expeditiously upon publication of the corresponding BLS or USDA data.

Moreover, as noted in the NPRM and by a public policy organization commenter, EPI, employers have ample prior notice of upcoming changes to wage requirements in the H–2A program.[21] In particular, the vast majority of employers will be subject to the FLS wage and will continue to have the opportunity to view and assess the impact of the new AEWR rates prior to their publication by the OFLC Administrator in the **Federal Register** on or around January 1st.[22] Prior to that publication, USDA publishes its FLS in late November showing the wage data findings that become the new AEWR for the field and livestock workers (combined) occupational grouping.[23] The Department has no role in the development or finalization of the FLS wage rate findings and adopts them for each State or area without change as the AEWR. Employers can therefore review the FLS and know with certainty what the following year's AEWR wages will be several weeks before they become official.

Similarly, employers of workers subject to the OEWS will be able to view updated wages when BLS publishes its OEWS data each spring, which contains the wage data that become the new AEWR on or around July 1st for the small percentage of job opportunities that cannot be encompassed within the six SOC codes and titles in the FLS field and livestock workers (combined) reporting category. Moreover, the Department will provide employers advance notice of these AEWR changes through an announcement on the OFLC website. Specifically, and as mentioned in the NPRM, the Department will post a notice on the OFLC website when USDA publishes the FLS and when BLS publishes the OEWS data that will direct employers to the publicly available information.[24] Because the Department does not control the publication schedule for the underlying data on which AEWR are based, it cannot commit to publishing AEWR FRNs on the same date each year. Once OFLC publishes the FRN updating the AEWR, however, OFLC also will post an announcement on its website to notify employers that the FRN containing updated AEWRs has been published, consistent with current practice. Finally, the Department also emails notice to stakeholders that have registered for OFLC's email updates when the AEWR changes. Taken together, these measures help ensure stakeholders have advance notice of new AEWRs to the extent possible and do not need to monitor the BLS and FLS websites themselves. The Department believes that the revisions contained in this final rule will clarify employer wage obligations, provide sufficient notice of AEWR updates, and ensure that agricultural workers are paid at least the AEWR in effect at the time the work is performed, without new or additional impact to employers' ability to budget and plan.

2. Sections 655.120(a) and 655.122(l), Requirement To Offer, Advertise, and Pay the Highest Applicable Wage Rate

In the NPRM, the Department proposed revisions to 20 CFR 655.120(a) and 655.122(l) to clarify that where there is an applicable prevailing piece rate, or where an employer intends to pay a piece rate or other non-hourly wage rate, the employer must include the non-hourly wage rate on the job order along with the highest hourly rate. Under this proposal, all potential wage rates must be listed on the job order notwithstanding the fact that it may not be possible to determine in advance which of these rates is the highest. Once work has been performed, the employer must then calculate and pay workers' wages using the wage rate that will result in the highest wages for each worker in each pay period.

As the Department explained in the NPRM, the current regulations at §§ 655.120(a) and 655.122(l) require an employer to ''offer, advertise in its recruitment, and pay'' the highest of the AEWR, prevailing wage rate, collective bargaining agreement (CBA) rate, or Federal or State minimum wage. While seemingly straightforward, this requirement has been difficult to apply in practice because, for instance, where there is an applicable prevailing piece

An overview of the OEWS survey methodology is available at *https://www.bls.gov/oes/current/oes_tec.htm*. An explanation of the survey standards and estimation procedures is available at *https://www.bls.gov/opub/hom/oews/pdf/oews.pdf*.

[24] As noted in the NPRM, employers of a small number of field and livestock workers (combined) job opportunities in States or regions, or equivalent districts or territories, for which the FLS does not report a wage (*e.g.,* Alaska and Puerto Rico) will not have similar direct access to the AEWR information prior to publication of the OFLC FRN. 88 FR 63750, 63773–63774.

rate, it is usually not possible to determine until the time work is performed whether the prevailing piece rate will be higher than the highest of the applicable hourly wage rates as this will depend on worker productivity. In such cases, OFLC currently only requires H–2A employers to list a wage offer that is at least equal to the highest applicable hourly wage—usually the AEWR—on job orders, consistent with BALCA decisions dating from 2009 to 2011 that concluded that under the regulations OFLC cannot require employers to include an applicable prevailing piece rate on the job order where OFLC does not know at the certification stage whether the prevailing piece rate will be higher than the hourly wage. *See, e.g., Golden Harvest Farm,* 2011–TLC–00442, at *3 (BALCA Aug. 17, 2011); *Dellamano & Assocs.,* 2010–TLC–00028, at *5–7 (BALCA May 21, 2010); and *Twin Star Farm,* 2009–TLC–00051, at *4–5 (BALCA May 28, 2009). The Department expressed concern with the uncertainty this practice can generate as to which rate or rates an employer must include as the required wage in a job order and pay to H–2A workers and workers in corresponding employment. Moreover, because the prevailing piece rate is not included on the job order, in most such instances, WHD is not able to enforce the prevailing piece rate. In other instances, such as when there is not a prevailing wage, employers sometimes voluntarily elect to pay a piece rate or other non-hourly wage rate but fail to include such rates on the job order, potentially mispresenting the offered wage rate and failing to meet their recruitment obligations.

The Department proposed several changes to the existing regulations to address these issues. First, the Department proposed to retain the current list of wage rates in § 655.120(a), redesignated as § 655.120(a)(1)(i) through (v), and to add to this list, at paragraph (a)(1)(vi), ''[a]ny other wage rate the employer intends to pay.'' This proposed addition was intended to clarify an employer's obligation to include on the job order any wage rate it intends to pay that could end up being the highest applicable wage rate for any worker, in any pay period. The Department also proposed to add at § 655.120(a)(2) an explicit requirement that, where the wage rates in paragraph (a)(1) are expressed in different units of pay, the employer must list the highest applicable wage rate for each unit of pay in its job order and must advertise all of these wage rates in its recruitment. Under this proposal, where one of the wage rates in paragraph (a)(1) is expressed as a piece rate and the others are expressed as hourly wage rates, the employer must list both the piece rate and the highest hourly wage rate on the job order. Where more than one of the wage rates in paragraph (a)(1) are expressed as non-hourly wage rates, the employer would be required to list the highest applicable wage rate for each potential unit of pay on the job order.

Next, the Department proposed corresponding changes at § 655.122(l), including replacing the list of wage rates with a cross-reference to § 655.120(a)(1), removing the current language in § 655.122(l)(1) that would be made redundant by the changes to § 655.120(a), and making other technical edits. In addition, the Department proposed to remove the current language at § 655.122(l)(2)(i) and (ii) that requires an employer to supplement workers' pay where a worker is paid by the piece and does not earn enough to meet the required hourly wage rate for each hour worked, but does not include an analogous requirement that an employer supplement workers' pay when a worker who is paid by the hour does not earn enough to meet the applicable prevailing piece rate. The Department proposed to replace this language with a new provision at paragraph (l)(1) explaining that the employer must always calculate and pay workers' wages using the wage rate that will result in the highest wages for each worker, in each pay period. Because employers would be required to pay whichever wage rate will result in the highest wages in a particular pay period, supplementing workers' pay to ensure that the required hourly wage is met would no longer be necessary. Proposed new paragraph (l)(2) explains that, where the wage rates set forth in § 655.120(a)(1) include both hourly and non-hourly wage rates, the employer must calculate each worker's wages in each pay period using the highest wage rate for each unit of pay and must pay the worker the highest of these wages for that pay period. Under this proposal, the employer would be responsible for evaluating the different wage rates applicable in each pay period of the growing season, including any mid-season increases in wage rate(s) that might not be reflected in the job order. Proposed paragraphs (l)(1) and (2) clarify that the wages actually paid cannot be lower than the wages that would result from the wage rate(s) guaranteed in the job order, so that, if there is a mid-season decrease in wage rate(s), the workers are still entitled to the higher wage rate(s) listed on the job order. Further, where an employer includes in a single job order multiple activities or tasks, each of which have different applicable wage rates, the employer would be required to engage in the analysis set forth above with respect to each activity or task.

The Department explained that these proposed changes were intended to help ensure that employers' recruitment efforts reflect the correct applicable wage rates so as to more accurately determine whether there are U.S. workers who would be available and willing to accept the employment. Further, they were intended to help ensure that H–2A workers and workers in corresponding employment are paid the wages to which they are entitled (*i.e.,* the highest of the AEWR, prevailing hourly wage or piece rate, CBA rate, Federal minimum wage, State minimum wage, or any other wage rate the employer intends to pay). The Department noted that, because H–2A employers are already required to accurately track and record both hours worked and field tallies pursuant to § 655.122(j), employers should already have processes in place to accurately record information needed for compliance with the proposed changes to §§ 655.120(a) and 655.122(l), minimizing any additional administrative burden these proposed changes would place on employers.

The Department sought comments on this proposal, particularly with respect to how the proposal would work in practice; whether there are circumstances, such as when an employer includes multiple activities or tasks in a single job order, where further clarification would be needed on which wage rates must be listed in the job order and how to calculate the worker's wages; whether corresponding changes to the recordkeeping requirements at § 655.122(j) and (k) or to the requirements for SWAs' review of job orders at part 653, subpart F, would be needed; and whether the requirement to list the highest applicable wage rate for each unit of pay on job orders placed in connection with an H–2A application would render unnecessary the requirement at 20 CFR 653.501(c)(2)(i) that an employer that pays by the piece or other non-hourly unit calculate and submit an estimated hourly wage rate with the job order. The Department explained that it was considering making similar revisions to the regulations at §§ 655.210(g) and 655.211 to require employers to disclose all potentially applicable rates of pay in the job orders for herding and range livestock production occupations, as well as to the regulations at 20 CFR

653.501(c) to require employers to disclose all potentially applicable rates of pay in non-H–2A (or non-criteria) clearance orders, and sought comments on whether it should include these proposed revisions in any final rule.

Worker advocates were largely supportive of the proposal and commented that the proposed changes are necessary to ensure that workers are receiving the wages to which they are entitled. Farmworker Justice explained that the proposal, which clarifies that employers must offer and pay the prevailing piece rate when it would result in higher wages for a worker than the AEWR or other hourly wage offered, is needed ''despite the clear language in the current regulation'' because the approval of clearance orders that fail to offer to pay prevailing piece rates limits the Department's ability to enforce and collect legally required piece rate earnings. A joint comment from 43 U.S. House Members stated that the proposal would help ''create stronger protections against exploitative practices commonly used by employers'' and a joint comment from 15 U.S. Senators commended the Department for ''taking this step toward ensuring fair and transparent wages for agricultural workers.'' Multiple worker advocacy organizations stated that the proposed changes around disclosure and consistency of wages are needed to address wage theft, and the UFW Foundation provided stories of workers' experiences with wage theft, such as employers orally promising to pay piece rates and then later paying an hourly wage rate that results in lower earnings.

These commenters also explained that the proposed changes are necessary to prevent an adverse effect on the wages of similarly employed workers in the United States. Using Washington State as an example of how permitting employers to offer only the hourly AEWR has had an adverse effect on the agricultural labor market, Farmworker Justice explained that experienced local workers will choose job opportunities that offer a market piece rate and thus, historically, employers have needed to offer these piece rates to attract experienced local workers. They further stated, ''[a]llowing these employers to bring temporary foreign workers to do this work without requiring them to pay these piece rates has exactly the adverse effect on local working conditions that Congress directed the Department to prevent in the H–2A statute.'' Similarly, a joint comment from 15 U.S. Senators asserted that low wages discourage American workers from taking these ''critical jobs'' and that the H–2A program was not intended to ''replace American workers with cheap, exploited labor'' to the detriment of workers and the economy as a whole.

Farmworker Justice explained that the proposal does not impose additional recordkeeping burdens on employers as employers already must track the number of hours worked and calculate workers' potential hourly earnings to ensure compliance with the AEWR and applicable minimum wage and employers already track production for business purposes.

The Department received comments from employers, trade association, and agents opposing the proposal. Several commenters, including FFVA and NCAE, asserted that the proposal is unnecessary because employers are already required to include any required wage rate in the job order. FFVA explained that the employers are already required to include piece rates in the job order both because of the requirement at § 655.120(a) and because of the prohibition against preferential treatment of H–2A workers at § 655.122(a). FFVA also asserted, without citation, that the current regulations provide employers sufficient flexibility by allowing employers to ''temporarily suspend piece-rate pay when worker safety or crop conditions require it.'' In contrast, NCAE stated that, while applicable wage rates must already be disclosed, the Department ''failed to recognize that whereas productivity incentive pay may be available with some employers, there is no 'prevailing piece rate''' and thus the proposal would require employers ''to disclose that which does not exist.'' Western Growers indicated that the current regulation is ''straightforward and sufficient to test the labor market and apprise workers of the wages they should expect to receive.'' A couple of commenters, SRFA and USAFL and Hall Global, stated that the proposal exceeds the Department's authority because it has not adequately connected the requirement to offer and pay an applicable prevailing piece rate to the need to prevent an adverse effect on the wages or working conditions of similarly employed workers in the United States. SRFA further stated that ''[c]reating a system whereby U.S. employers are required to offer a more attractive and lucrative pay structure than the employer might otherwise pay goes far beyond the Secretary's statutory authority.''

Many of the commenters opposed the proposal on the ground that it requires employers to offer and pay an applicable prevailing piece rate even when the employer does not wish to do so. For instance, the Cato Institute stated that under the proposal H–2A employers ''will no longer get to pick whether they pay a piece rate or not.'' SRFA asserted that the proposed change would be a ''de facto mandate'' that would require employers to pay by piece rate. Several commenters, including wafla, másLabor, NHC, and the U.S. Chamber of Commerce, opined that the proposal would eliminate an employer's ability to change wage rates based on market and crop conditions, or whether they wish to incentivize (or disincentivize) workers to work quickly. MásLabor asserted that prevailing piece rates are established based on survey results of employers already paying a piece rate and, therefore, do not accurately reflect wages in the marketplace. It suggested that employers should only be required to pay prevailing piece rates if they choose to use a piece rate compensation plan.

Commenters also asserted that complying with the proposal would be unduly burdensome, or even impossible. Employers and trade associations, including the U.S. Chamber of Commerce, USApple, and NHC, explained that the proposal would be confusing and difficult to implement because many employers use piece rates that vary based on the commodity, variety within that commodity, quality of the crop, and units of measurement of commodities. The U.S. Chamber of Commerce expressed concern that employers, especially smaller farms, would not be able to comply with these proposed changes because they do not have processes in place to accurately record the information required. Similarly, US Apple and NHC stated that employers are unlikely to have the existing staffing or software needed to implement the required changes. Wafla stated that only hourly rates should be required to be posted in the job order because piece rates cannot be determined before work starts.

Several commenters emphasized what they believed to be unintended consequences of the proposal. NCFC and AmericanHort stated that the proposal, if adopted, would ''further incentivize employers to not pay piece rates where they do not have to'' and ''in areas where there is a prevailing piece rate that has been certified by the Department, it will drive employers away from planting crops that have a prevailing piece rate.'' FFVA concurred and stated that this ''would likely reduce workers' wages, rather than ensuring they are higher, while reducing overall production for the employer.''

In response to the Department's specific request, several commenters identified language in the proposal for

which further clarification would be helpful. The U.S. Chamber of Commerce, Western Growers, and AmericanHort explained that the Department's proposed language at § 655.122(l)(2)—*i.e.,* ''the employer must calculate each worker's wages . . . using the highest wage rate for each unit of pay, and pay the worker the highest of these wages for that pay period. The wage actually paid cannot be lower than the wages that would result from the wage rate(s) guaranteed in the job offer''—is unclear and asked how this language would apply to employers that offer both hourly wages and piece rate wages in their job orders. Specifically, the U.S. Chamber of Commerce asked whether such employers would be required to pay a piece rate, where higher, ''even if the worker did not work on a piece-rate basis'' during the relevant time period. Farmworker Justice recommended several changes to the language of the proposal. Given the ''history of misinterpretation'' of the wage obligations of § 655.120(a), they recommended incorporating explicit references to piece rates in the language of the regulation by adding to paragraph (a)(1)(ii) the phrase ''whether expressed as a piece rate or other unit of pay,'' and to paragraph (a)(2) the parenthetical ''(including piece rates or other pay structures).''

The Department specifically sought comments on whether the requirement to list the highest applicable wage rate for each unit of pay on job orders placed in connection with an H–2A application would render unnecessary the requirement at 20 CFR 653.501(c)(2)(i) that an employer that pays by the piece or other non-hourly unit calculate and submit an estimated hourly wage rate with the job order. A private employer asserted that the requirement to submit an estimated hourly wage rate is burdensome, inaccurate, and unnecessary. MásLabor asserted that removing the requirement to include estimated hourly wage would improve disclosures for workers and avoid misleading them as to their earning potential because it is difficult to estimate the expected hourly wage for an average worker.

In the NPRM, the Department explained that it was considering making similar revisions to the regulations at §§ 655.210(g) and 655.211 to require employers to disclose all potentially applicable rates of pay in the job orders for herding and range livestock production occupations, as well as to 20 CFR 653.501(c) to require employers to disclose all potentially applicable rates of pay in non-H–2A (or non-criteria) clearance orders, and sought comments on whether these similar revisions should be made. Farmworker Justice expressed support for making similar revisions with respect to herders, reasoning that they should have the same job order transparency as farm labor workers. The Department received no other comments on these proposed revisions.

The Department received no comments on whether corresponding changes to the recordkeeping requirements at § 655.122(j) and (k) or to the requirements for SWAs' review of job orders at part 653, subpart F, would be needed.

While generally supportive, several worker advocacy organizations suggested that the proposal did not go far enough. Farmworker Justice recommended addressing the wages owed to misclassified H–2A workers who are assigned non-agricultural work for which higher prevailing wage rates should be paid (*e.g.,* landscaping or work at retail nurseries that falls under the ambit of the H–2B program and which would have potentially entitled a worker to a higher prevailing wage as set by the National Prevailing Wage Center (NPWC) if the work had been properly classified). Specifically, they suggested adding language explaining that the Federal minimum wage listed in paragraph (a)(1)(iv) ''includes the appropriate NPWC prevailing wage in the case of misclassified workers,'' and stated that ''[t]o do otherwise is inviting fraud'' because, in such cases, employers who are caught are only required to reimburse back wages at the lower AEWR rate instead of the appropriate and typically higher NPWC prevailing wage rate. They noted that such misclassification adversely affects local workers and working conditions. American Industrial Hygiene Association (AIHA) stated that ''regardless of whether or not the contract is for payment on a piece-work basis, there should be a limit on the number of working hours per day.''

After considering the comments discussed above, the Department adopts with certain modifications the proposed revisions to §§ 655.120(a) and 655.122(l) to clarify that where there is an applicable prevailing piece rate, or where an employer intends to pay a piece rate or other non-hourly wage rate, the employer must include the non-hourly wage rate on the job order along with the highest hourly rate, and must pay workers' wages using the wage rate that will result in the highest wages for each worker in each pay period.

The Department believes that these clarifying changes are necessary to ensure that employers' recruitment efforts reflect the correct applicable wage rates so as to more accurately determine whether there are U.S. workers who would be available and willing to accept the employment; that H–2A workers and workers in corresponding employment are paid the wages to which they are entitled under § 655.120(a), including any prevailing piece rate when it would result in higher earnings; and that the employment of H–2A workers does not adversely affect the wages or working conditions of similarly employed workers in the United States.

As set forth in the NPRM and above, and as evidenced by the numerous comments from employers, trade associations, and agents, the trio of BALCA decisions—*i.e., Golden Harvest Farm,* 2011–TLC–00442, at *3 (Aug. 17, 2011); *Dellamano & Assocs.,* 2010–TLC–00028, at *5–7 (May 21, 2010); and *Twin Star Farm,* 2009–TLC–00051, at *4–5 (May 28, 2009)—created significant confusion among the regulated community as to their obligations under §§ 655.120(a) and 655.122(l). *See, e.g.,* FFVA comment (opining that current regulations allow employers to ''temporarily suspend piece-rate pay''), and NCAE comment (arguing that prevailing piece rates do not exist). Specifically, while these decisions restricted OFLC from requiring employers to include an applicable prevailing piece rate on the job order on the ground that OFLC does not (and cannot) know at the certification stage whether a prevailing piece rate will be higher than the hourly wage and, as a result, also limited WHD's enforcement abilities, these decisions did not negate the clear regulatory requirement that an employer ''offer, advertise in its recruitment, and pay'' the highest of the wage rates enumerated in § 655.120(a), including any applicable prevailing piece rate. Yet, because employers are able to avoid this obligation, it is not possible for the Department to determine whether there are local workers who would choose the job opportunity if an applicable prevailing wage rate were offered, or to ensure that the employment of H–2A workers at the offered wage rate, instead of a potentially higher prevailing piece rate, will not depress local wages or working conditions. Permitting employers unfettered flexibility to pay wages rates not listed in the job order similarly undermines the Department's labor market test and its ability to prevent an adverse effect on the wages or working conditions of similarly employed workers in the United States.

Accordingly, the Department adopts the clarifying language proposed in the

NPRM with minor edits. Specifically, the Department agrees with Farmworker Justice that their suggested additions to the regulatory text to explicitly reference piece rates are warranted given the history of misinterpretation and confusion among the regulated public.

The Department disagrees with commenters who asserted that the Department failed to adequately connect the requirement to offer and pay an applicable prevailing piece rate to the need to prevent an adverse effect on the wages or working conditions of similarly employed workers in the United States. In addition to the explanation provided in the NPRM and above, the comment from Farmworker Justice explained the mechanisms by which such an adverse effect can occur. The Department similarly disagrees with commenters who stated that piece rates should not be required in the job order because prevailing piece rates are determined based on the survey results of employers who already choose to offer piece rates (másLabor), or because it is impossible to determine piece rates before the work is completed (wafla). Prevailing wage rates (whether hourly or by the piece) are determined by surveying a variety of agricultural employers; these surveys are not limited to employers that pay by the piece or by the hour. If a prevailing piece rate is issued, that unit of pay was used to compensate the largest number of U.S. workers whose wages were reported in the survey. *See* 20 CFR 655.120(c)(1)(v). Moreover, while it is not possible to determine at the certification stage whether an hourly wage rate or a piece rate will result in higher earnings, as this will vary based on a worker's productivity in the pay period, this does not mean that the piece rate itself cannot be identified and listed in the job order.

Nonetheless, the Department acknowledges the practical impact these clarifying changes will have on the regulated community, including, in some instances, the need to change their longstanding compensation practices and to ensure that they collect and maintain sufficient information to implement these changes (though the Department continues to believe that most employers do maintain the requisite information either for compliance with § 655.122(j) or for business reasons).

To assist the regulated community, the Department will consider issuing further guidance explaining an employer's obligations under §§ 655.120(a) and 655.122(l), particularly in instances where the relevant job order covers multiple crop activities or tasks for which there are different applicable piece rates.

In addition, the Department has determined that it is appropriate to make clarifying revisions to the regulations at §§ 655.210(g) and 655.211 to require employers to disclose all potentially applicable rates of pay in the job orders for herding and range livestock production occupations. Sections 655.210(g) and 655.211 include language analogous to that in § 655.120(a) and § 655.122(l). Specifically, the introductory text in § 655.210(g) has been redesignated to paragraph (g)(1) and revised to reflect that the employer must disclose any other wage rate it intends to pay if higher than the other potential wage sources listed in current § 655.210(g). Current § 655.210(g)(1) has been redesignated as § 655.210(g)(2), and revised to include reference to any other wage rate the employer intends to pay. Current § 655.210(g)(2) has been redesignated as § 655.210(g)(3). While the monthly AEWR will generally be the highest of these enumerated wage rates, in some cases an applicable State minimum wage, which may be expressed as an hourly wage rate, or another applicable wage rate (such as a higher monthly rate the employer intends to pay) may be higher. In addition, § 655.211(a)(1) has been revised to include reference to any other offered wage rate and the following language: ''The employer must list all potentially applicable wage rates in the job order and must offer and advertise all of these wage rates in its recruitment.''

Likewise, the Department has determined that it is appropriate to make such clarifying revisions to 20 CFR 653.501(c) to require employers to disclose all potentially applicable rates of pay in non-H–2A (or non-criteria) clearance orders. Because the SWAs are responsible for the review of both H–2A (criteria) clearance orders and non-H–2A (non-criteria) clearance orders, having analogous processes and requirements, where possible, is preferable, and the Department has revised 20 CFR 653.501(c)(1)(iv)(E) to require that intrastate and interstate clearance orders state both the hourly wage rate, if applicable, as well as any applicable piece rate or other non-hourly wage rate.

The Department has decided not to eliminate the requirement at 20 CFR 653.501(c)(2)(i) that an employer that pays by the piece, or other non-hourly unit, calculate and submit an estimated hourly wage rate with the job order. While some employers consider the inclusion of these estimated hourly wage rates in the job order to be burdensome or potentially confusing, these estimates provide additional information a potential job candidate may find relevant in evaluating whether to apply for a specific job opportunity.

Because the Department received no comments on whether corresponding changes to the recordkeeping requirements at § 655.122(j) and (k) or to the requirements for SWAs' review of job orders at part 653, subpart F, are needed, the Department declines to change these provisions at this time.

Finally, while the Department appreciates the suggestions from worker advocacy organizations that it address the wages owed to misclassified H–2A workers assigned to non-agricultural work for which higher prevailing wage rates should be paid, and limit the permissible number of working hours per day under the H–2A program, it declines to adopt either proposed change in this final rule as neither is within the scope of the current rulemaking.

3. Section 655.122, Contents of Job Offers

a. Paragraph (h)(4) Employer-provided Transportation

The NPRM proposed to revise § 655.122(h)(4) to require the provision, maintenance, and wearing of seat belts in most employer-provided transportation. Specifically, the NPRM proposed to prohibit an employer from operating any employer-provided transportation that is required by the U.S. DOT's FMVSS, including 49 CFR 571.208, to be manufactured with seat belts unless all passengers and the driver are properly restrained by seat belts meeting standards established by 49 CFR 571.209 and 571.210. In other words, the Department proposed that, if the vehicle was required by the U.S. DOT's FMVSS to be manufactured with seat belts, the employer would be required to retain and maintain those seat belts in good working order. The NPRM also proposed requiring that employers ensure that vehicles are not operated unless employees are wearing seat belts.

Additionally, the Department specifically sought comments in four areas: (1) whether there are any other factors or types of vehicles that it should consider when promulgating the regulations; (2) how this provision should interact with the limited exemption from the requirement under MSPA that vehicles have a seat securely fastened to the vehicle for each occupant found at 29 CFR 500.104(l),

which is also applicable to some H–2A employer-provided transportation; (3) whether employers ever retrofit vehicles with additional seats in such a way that complies with existing vehicle safety standards and how these vehicles should comply with proposed seat belt standards; and (4) whether it should require employers to enforce the wearing of seat belts.

The Department received numerous comments in support and in opposition to the proposal, and many commenters supported in part and opposed in part. Most opposition centered on the proposal that an employer should not operate the vehicle unless all passengers and the driver are properly restrained by a seat belt; this provision is discussed separately below. After consideration, the Department is adopting the proposal with minor modifications. Specifically, the Department has clarified that an employer must not allow any other person to operate employer-provided transportation unless seat belts are provided, maintained, and worn, and has replaced the word ''shall'' with ''must.'' Additionally, the Department has replaced the term ''DOT regulation'' with ''U.S. DOT's Federal Motor Vehicle Safety Standards,'' abbreviated as ''FMVSS,'' to use the same terminology as U.S. DOT does when referencing their regulations.

Some commenters submitted comments relating to transportation safety that are outside the scope of this rulemaking. Specifically, Farmworker Justice suggested that the Department not accept workers' compensation insurance as acceptable for an H–2A employer to meet their obligations under 20 CFR 655.122(h). MásLabor requested that the Department eliminate the requirement that the job offer include ''a description of the modes of transportation (*e.g.,* type of vehicle)'' from § 655.122(h)(4)(iii). Because the Department did not propose changes to these provisions in the NPRM, there are no such changes in this final rule.

Provision of Seat Belts in Vehicles Required by U.S. DOT's FMVSS to be Manufactured With Seat Belts

Worker rights advocacy organizations, unions, a couple of State government agencies, some Members of Congress, and some individual commenters expressed support for the proposal. Farmworker Justice and the Agricultural Justice Project stated that the requirement to provide seat belts was long overdue. Governmental commenters emphasized that the proposal was necessary due to the increased risks that agricultural workers face in transit. Specifically, a comment from Members of Congress cited reports from BLS that 271 of 589 fatal workplace injuries suffered by agricultural workers in 2022 were caused by transportation-related incidents, and the California LWDA stated that Cal/OSHA regularly cites employers for agricultural transportation-related violations.

Many employers, associations, and some individuals stated that they did not oppose the proposal that employers be expected to provide seat belts in vehicles required by U.S. DOT's FMVSS to be manufactured with seat belts. However, many of these commenters requested exemptions, as discussed further below. Mountain Plains Agricultural Service stated that seat belt ''use is important and should be available in the majority of vehicles and equipment during on-farm transportation. DOL's proposed change regarding this is redundant with OSHA regulations.'' Other employers and associations were silent on the proposal that employers provide and maintain seat belts in vehicles required to be manufactured with seat belts, expressing their opposition only to the proposed requirement that employers ensure that workers wear seat belts, which is discussed in more detail below.

The Wyoming Department of Agriculture and some agents and associations opposed the proposal to require the provision of seat belts. The Wyoming Department of Agriculture, Fuerza Consulting Solutions, and másLabor observed that employers commonly use older vehicles that do not have seat belts for on-the-farm transportation, and stated that compliance for these entities would be difficult. MásLabor and SRFA pointed out that the Department had previously opined that universal seat belt requirements would place an unreasonable economic burden on employers, and further said that the proposal may result in some employers completely forgoing the use of motor vehicles and turning to less regulated options such as all-terrain vehicles (ATVs), off-highway vehicles (OHVs), or motorcycles. MásLabor further urged the Department to defer to the judgment of State and local authorities to interpret existing laws, and to allow H–2A employers to use the same exemptions from seat belt usage as those that apply to non-H–2A employers under State law. The Wyoming Department of Agriculture also opposed the Department's reasoning for making the change. MásLabor and USA Farmers said that the proposal would result in enhanced safety standards for H–2A workers, but not for other agricultural workers. USA Farmers further stated that the more reasonable course of action would be to propose regulations applicable to all farmworkers, not simply to H–2A workers who represent a fraction of farmworkers in the United States.

Many commenters agreed with the proposal but requested that exemptions be included in the final rule. Many associations and employers requested the inclusion of an exemption for on-the-farm transportation, arguing that rural transportation is not inherently dangerous or, even if it is, on-the-farm transportation does not pose the same risks as off-farm transportation. Most of these commenters suggested that vehicles primarily operated on private farm roads when the distance traveled does not exceed 10 miles be exempt from seat belt requirements. SRFA suggested that small employers (*i.e.,* those employing 10 or fewer workers) be exempt, and an individual commenter and FFVA similarly suggested that vehicles already in use be exempt from the seat belt requirements, as such exemption, in the commenters' view, would cushion growers from the economic impacts of the proposal.

Some commenters misunderstood the proposal as requiring the retrofitting of vehicles not originally manufactured with seat belts. For example, Burley and Dark Tobacco Producer Association stated that many of the surplus buses acquired by employers to transport workers to and from job sites do not have seat belts, and that retrofitting these vehicles with seat belts would be expensive. One anonymous employer asked why seat belts would be required on buses when school systems do not require them, and stated that it would cost $750 per small bus and $1,050 per large bus to install seat belts, for a total cost to this employer of $14,100. Many commenters requested a grace period (many recommended 6–12 months) to retrofit vehicles with seat belts.

One commenter suggested that the proposal be expanded. Farmworker Justice suggested that employers be required to equip all vehicles with seat belts, not just those that are required by U.S. DOT's FMVSS to be manufactured with seat belts. They reasoned that employers frequently use old school buses to transport workers and excluding this larger vehicle category creates a meaningful gap in vehicle safety. Farmworker Justice also suggested that the Department clarify that the seat belt standard applies to all transportation of H–2A workers, including between worksites, inbound/outbound transportation, interstate and

intrastate transportation between job sites, and that provided by farm labor contractors or third-party transportation agents.

The Department received very few comments on how the proposal to require the provision of seat belts should interact with the limited exemption from MSPA's general requirement that vehicles have a seat for each occupant, as well as whether employers ever retrofit vehicles with seats. Farmworker Justice stated that the MSPA limited exemption from seats found at 29 CFR 500.104(l) [25] should be inapplicable to H–2A employers. SRFA stated that it appreciated the consideration of a 10-mile exemption for certain seatless vehicles under 29 CFR 500.104(l), but most farm vehicles have seats and producers in the Western States have worksites spanning a mile radius far exceeding 10 miles. Farmworker Justice also stated that the rule should expressly prohibit the retrofitting of any vehicles with additional seats but did not identify whether they had ever seen such a situation.

Upon consideration, the Department adopts the language as proposed in this final rule with minor modifications and does not modify the requirement that employers provide seat belts in vehicles required by U.S. DOT's FMVSS to be manufactured with seat belts.

The Department appreciates the suggestion that all vehicles be equipped with seat belts, not just those required by U.S. DOT's FMVSS to be manufactured with seat belts, and recognizes the commenter's concern that some workers will continue to be transported without seat belts, most commonly in school buses with a Gross Vehicle Weight Rating (GVWR) exceeding 10,000 pounds. However, as stated in the NPRM, the Department believes that it is appropriate to rely on U.S. DOT's considerable research and expertise and, at this point, U.S. DOT's FMVSS do not require school buses with a GVWR exceeding 10,000 pounds to be manufactured with seat belts because of the vehicles' safety features, among other factors. Specifically, school buses use ''compartmentalization'' to ensure that passengers are cushioned and contained by seats or padded restraining barriers in the event of a crash.[26] Additionally, U.S. DOT has stated that large school buses' greater weight and higher seating height than most other vehicles, high visibility to motorists, joint integrity of the bus body panels, and stringent fuel system integrity requirements contribute to the vehicles' safety record.[27] Furthermore, requiring seat belts in all employer-provided transportation, regardless of whether U.S. DOT's FMVSS required the vehicle to be manufactured with seat belts, would represent a substantial change from the proposal in the NPRM that would have significant economic impacts on some employers.[28] Therefore, the Department declines to adopt this proposal from Farmworker Justice's comment without providing the regulated community with a meaningful opportunity for notice and comment. The Department will continue to monitor vehicle safety conditions in the field and consult with U.S. DOT to consider whether the H–2A program should require seat belts in vehicles not manufactured with seat belts, including whether the conditions under which farmworkers are transported in large school buses are safe without seat belts. Also, as stated in the NPRM, if, at a later date, U.S. DOT were to amend the FMVSS to require school buses with a GVWR exceeding 10,000 pounds, or any other vehicle, to be manufactured with seat belts, § 655.122(h)(4) would automatically, and without further revision, similarly require the employer to provide and maintain seat belts in those vehicles. *See* 88 FR 63777–63778.

The Department also reminds employers that any bus exceeding 26,000 pounds GVWR that was not manufactured as a school bus or other category of bus explicitly excluded from seat belt requirements (transit bus, perimeter-seating bus, or prison bus) has been manufactured with seat belts pursuant to U.S. DOT's FMVSS if manufactured on or after November 28, 2016. *See* 78 FR 70416 (Nov. 25, 2013). Therefore, in these vehicles, the employer must provide and maintain seat belts.

Similarly, the Department declines to create exemptions from the seat belt standard for vehicles that U.S. DOT requires to be manufactured with seat belts. While many commenters sought the inclusion of an exemption from the seat belt requirement for on-the-farm transportation, sometimes suggesting using the same or similar parameters as found in the limited MSPA exemption from seats found in 29 CFR 500.104(l), the Department believes that it is inappropriate to universally exempt on-the-farm transportation from seat belt requirements. While the Department's enforcement experience demonstrates that many vehicle crashes occur on public roads, some crashes occur on property owned or leased by the grower. Additionally, it may be difficult for the Department to identify in an investigation which vehicles are solely used on the farm as opposed to being driven on public roads. The Department believes that it is similarly inappropriate to exempt small employers or vehicles currently in use from compliance with the seat belt requirements because the size of an employer or the current use of the vehicle has no bearing on the safety of the transportation provided.

MásLabor and SRFA correctly noted that the Department had previously opined that requiring employers to provide seat belts would place an unreasonable economic burden on employers. However, as previously explained in the NPRM, the Department made this statement while promulgating MSPA regulations in 1983.[29] In the last 40 years, every State except New Hampshire has passed seat belt laws [30] and national seat belt usage increased from 14% in 1983 to 91.6% in 2022.[31]

[25] Transportation subject to this exemption is limited to those vehicles that are subject to the vehicle safety standards in 29 CFR 500.104 when those vehicles are primarily operated on private farm roads when the total distance traveled does not exceed 10 miles, so long as the trip begins and ends on a farm owned or operated by the same employer. *See* 29 CFR 500.102; 29 CFR 500.104(l). *See also* DOL, *WHD Fact Sheet #50: Transportation Under the Migrant and Seasonal Agricultural Worker Protection Act* (June 2016), *https://www.dol.gov/agencies/whd/fact-sheets/50-mspa-transportation.*

[31] *Compare* NHTSA, *Seat Belts, https://www.nhtsa.gov/risky-driving/seat-belts#resources (last accessed Feb. 8, 2024)* (''*Seat Belts*'') (estimating that seat belt use by adult front-seat passengers was about 91.6 percent in 2022), *with*

Research has solidified the importance of the seat belt as an essential life-saving technology; NHTSA estimates that using a seat belt in the front seat of a passenger car can reduce fatal injury by 45 percent and reduce moderate to critical injury by 50 percent. The safety effect increases in a light truck, where seat belts reduce fatal injury by 60 percent and reduce moderate to critical injury by 65 percent.[32] Further, NHTSA estimates that 50 percent of those passenger vehicle occupants killed in crashes in 2021 were unrestrained.[33] Given the dramatic increase in use, expansions of State seat belt laws, and developments in safety research since 1983, the Department no longer believes that requiring employers to provide seat belts in 2024 places an unreasonable economic burden on employers. Even more, the Department's regulation requires seat belts only in vehicles that have been manufactured with seat belts and thus an employer's only expenses would be to fix any seat belts that have broken. In response to commenters who warned the Department that a seat belt requirement may motivate employers to provide transportation via less regulated modes of transport, such as ATVs, OHVs, and motorcycles, the Department believes that it is unlikely to be more cost effective for employers employing more than a few workers to purchase motorcycles or ATVs for workers in lieu of repairing seat belts in a 15-passenger van, for example. Additionally, the Department reminds employers that all employer-provided transportation must comply with all Federal, State, and local laws and regulations. *See* 20 CFR 655.122(h)(4).

Many commenters used the term ''retrofit'' when discussing seat belt installation, emphasizing the costs that would be passed onto growers, as well as the need for a grace period to permit sufficient time for such retrofitting. The Department clarifies that this final rule does not require employers to add seat belts to vehicles that were manufactured without them. The language adopted by the Department in this final rule references U.S. DOT's FMVSS, including those found at 49 CFR 571.208, which vary based on the type of vehicle and the year of manufacture. If an employer transports workers in an old vehicle that was not required, at the time of manufacture, to have seat belts, the Department will not require an employer to install seat belts in that vehicle. However, it should be noted that, because U.S. DOT has required passenger cars and light trucks and vans to be manufactured with seat belts since the 1970s,[34] buses (excluding school buses) with a GVWR under 10,000 pounds to be manufactured with seat belts since 1991,[35] and school buses with a GVWR under 10,000 pounds to be manufactured with seat belts since 1976,[36] the Department anticipates that relatively few vehicles originally manufactured without seat belts remain in use. Employers' costs to come into compliance will consist of repairing or replacing any broken or damaged seat belts, which the Department anticipates will be less expensive and take less time than retrofitting vehicles that were never engineered for seat belt installation. The Department also declines to institute a grace period for employers to retrofit their vehicles, as no retrofitting will be required. The Department similarly believes that many vehicles will already have functional seat belts to comply with existing State laws, and that those vehicles with broken seat belts may be fixed relatively quickly, and therefore declines to institute a grace period for employers to repair broken seat belts.

Some commenters identified that the proposal would implement more stringent safety requirements for H–2A workers and workers engaged in corresponding employment than for other farmworkers in the United States. The Department continues to believe that it is appropriate to amend the H–2A regulations given the significant growth of the program and its increasing importance in agriculture in the United States.[37] The Department is tasked with, among other things, ensuring that the employment of H–2A workers does not adversely affect the wages and working conditions of similarly employed workers in the United States. As discussed in greater detail below in Section VI.C.2.b, H–2A workers may have more limited recourse when placed in an inherently dangerous situation, such as being transported in a vehicle without seat belts, than workers in the United States similarly employed. As AIHA noted, H–2A workers are incentivized to continue employment even when presented with working conditions that are hazardous to their health and safety. Additionally, unbelted passengers in a vehicle pose significant risks to other passengers and the driver; studies have found that unrestrained occupants can become projectiles in a crash and increase the risk of death for other occupants.[38] An employer that only offers dangerous transportation (in this case, transportation without seat belts in a vehicle required by U.S. DOT's FMVSS to be manufactured with seat belts) has offered terms and working conditions below the minimum level at which a worker in the United States could be expected to accept. Given the accepted and established safety record of seat belts, the Department believes that it is appropriate to require seat belts in these vehicles as a baseline safety standard in the H–2A program to prevent adverse effect on similarly employed workers in the United States and to ensure that H–2A workers are employed only when there are not sufficient able, willing, and qualified workers available to perform the work.

In response to comments submitted by Farmworker Justice, the Department clarifies that vehicle safety standards found in § 655.122(h)(4), including the requirement that vehicles manufactured with seat belts have seat belts, apply to all employer-provided transportation of H–2A workers, including between worksites, inbound/outbound transportation, and interstate and intrastate transportation between job sites. If an employer contracts with

Am. Med. Ass'n, 291(3), pp. 343–49, *https://pubmed.ncbi.nlm.nih.gov/14734597/* (finding that the risk ratio for death among belted occupants varied between 1.22 and 1.15 when exposed to an unbelted passenger in a vehicle crash, depending on the location of the belted and unbelted occupants; in other words, the restrained passenger was more likely to die when exposed to an unrestrained passenger in a vehicle crash).

another entity, such as a farm labor contractor, to provide transportation that is the employer's responsibility, such as transportation between the living quarters and worksite or inbound/outbound transportation, that transportation continues to be employer-provided and is subject to all the vehicle safety standards found in 20 CFR 655.122(h)(4), including the seat belt standards. To clarify that the employer cannot avoid responsibility for seat belt requirements by using a subcontractor to provide required transportation to workers, the Department has edited § 655.122(h)(4)(ii) in this final rule to prohibit an employer from allowing any other person to operate any employer-provided transportation required by U.S. DOT's FMVSS to be manufactured with seat belts unless workers are properly restrained by seat belts.

Upon consideration of the comments, the Department declines to modify the proposal to accommodate the limited MSPA exemption from seats found at 29 CFR 500.104(l). No commenter identified that they used the exemption, and SRFA confirmed that most vehicles have seats. Commenters who mentioned the exemption appeared to contemplate a blanket exemption from the seat belt requirement for on-the-farm transportation, which the Department declines to adopt and is discussed above. Based on the comments received, the Department concludes that employer usage of the limited exemption from seats found in 29 CFR 500.104(l) (for vehicles that are operated primarily on farm roads in trips not exceeding 10 miles, so long as the trip begins and ends on a farm owned or operated by the employer) is rare and therefore needs no accommodation in these regulations.

No commenters identified that they retrofitted vehicles with seats or saw such retrofitted vehicles. As such, the Department will not contemplate hypothetical compliance in that situation at this time.

Wearing of Seat Belts

The Department proposed to prohibit employers from operating vehicles manufactured with seat belts unless all passengers and the driver are properly restrained by seat belts. Associations, agents, and employers were unanimous in their opposition to the proposal that employers require the wearing of seat belts. These commenters stated that this requirement would be unreasonable, place an undue burden on employers, and infantilize workers. Commenters also stated that even if they checked for seat belt use before departure, they would have no way to ensure that workers not remove the seat belt in transit. An individual and wafla stated that often the drivers are H–2A workers with no supervisory authority and would be unable to require the wearing of seat belts. SRFA, wafla, AILA, and an individual employer emphasized that employers would need to invest heavily in surveillance technology, such as cameras, to ensure that workers wear seat belts at all times. AILA suggested that the Department accept an employer as being in compliance if it has a sign posted advising the workers to wear seat belts. NHC similarly suggested that this provision be replaced with a requirement that employers provide training on proper use of seat belts. The Wyoming Department of Agriculture stated that this provision would expose employers to labor organization audits of seat belt use.

Worker rights advocacy organizations, unions, a couple of State government agencies, some Members of Congress, and individual commenters supported the proposal in its entirety, including that the employer not operate vehicles manufactured with seat belts unless all passengers and the driver wear seat belts. A couple of advocacy organizations submitted specific feedback supporting the proposal that employers require the wearing of seat belts. AIHA noted that making seat belts available without a requirement to wear the seat belts leads to low adoption of the practice of wearing them and that ''if the goal of the [Department] is to decrease incidents of injury associated with transportation of [H–2A] workers, then required enforcement is one of the best ways to increase the use of seat belts.'' Farmworker Justice stated that oftentimes workers come from rural communities in Mexico where seat belt use may not be customary, and therefore employers should be required to verify that all passengers are wearing seat belts. The California LWDA noted that the proposed regulation aligned with the California regulation and that there are numerous OSHA decisions interpreting the regulations requiring the provision of personal protective equipment to also require use thereof.

The Department adopts the proposal without modification. The history of seat belt adoption shows that the provision of seat belts does not automatically result in their use; rather, enforcement and education is necessary for adoption. As previously explained in the NPRM, seat belt usage in the United States was very low before States required and national campaigns encouraged their use (compare 14% usage in 1983 to 86% usage in 2012,[39] and up to 90% in 2020).[40] Seat belts do not serve their designed purpose when not worn, and, as noted above, an unbelted passenger poses a significant safety risk to other passengers in the vehicle in the case of a crash. As the objective of this regulatory change is to avoid degrading worker safety conditions to prevent adverse effect on similarly employed workers in the United States and to ensure that H–2A workers are employed only when there are not sufficient able, willing, and qualified workers available to perform the work, the Department believes that employers requiring their workers to wear seat belts is necessary to achieve this objective.

With respect to employer concerns that it is not possible for employers to ensure their workers wear seat belts, the Department notes that numerous other workplace safety and health laws and regulations require employers to shape and influence the behavior of their workers so that the employer may be in compliance. Consider, for example, regulations promulgated by OSHA, many of which mandate specific behaviors or the use of safety equipment by their workers. For example, 29 CFR 1928.51(b)(2)(i) requires an employer to ensure that a worker required to use a Roll-Over Protective Structure (ROPS) on a tractor not only use a seat belt, but that the employee tighten the seat belt sufficiently to confine the worker to the protected area provided by the ROPS. The employer is expected to comply with the OSHA standard; however, the Department anticipates that the employer is not fastening the seat belt themselves nor are they watching the worker each moment to ensure that the seat belt is fastened. Rather, the employer creates and communicates operating procedures to shape worker behavior to comply with the standard, including by issuing work rules to prevent the violation, communicating those rules to workers, taking measures to discover violations, and taking action when violations are discovered. *See, e.g., Burford's Tree, Inc.,* 22 BNA OSHC 1948 (No. 07–1899, 2010), aff'd without opinion, 431 F. App'x. 222 (11th Cir. 2011).

Similarly, regulations promulgated by the Food and Drug Administration (FDA) at 21 CFR 117.10 require an employer to take reasonable measures and precautions to ensure that, for example, all persons working in direct

[39] 2015 NHTSA Report, at 103.

[40] NHTSA, *Seat Belt Use in 2020—Overall Results* (Feb. 2021), *https://crashstats.nhtsa.dot.gov/Api/Public/ViewPublication/813072.*

contact with food conform to hygienic practices while on duty, including: (1) maintaining adequate personal cleanliness; (2) washing hands thoroughly before starting work and after each absence from the work station; and (3) not eating food, chewing gum, drinking beverages, or using tobacco in areas where food may be exposed or where equipment or utensils are washed. As with OSHA regulations, compliance with these FDA regulations require employers to develop reasonable compliance plans to influence employee behavior.

Certainly, the Department does not expect employers to install expensive surveillance technology in vehicles to monitor compliance. However, it does expect employers to implement common-sense measures to ensure that workers are wearing seat belts while a vehicle is being operated. The Department expects that employers already have similar common-sense measures in place to comply with other regulatory safety requirements, such as those enforced by OSHA and the FDA.

With respect to the Wyoming Department of Agriculture's concern that this provision would expose employers to labor organization audits of seat belt use, this final rule does not grant the right to conduct audits to such organizations, but some organizations may conduct or attempt to conduct independent evaluations of employer compliance and make referrals when they encounter violations. However, the Department believes that this provision is no more likely than others in the H–2A regulations to result in organizations attempting to evaluate employer compliance. In all, the Department believes that the importance of mitigating unsafe working conditions far outweighs the inconvenience to an employer resulting from an outside organization surveying (or attempting to survey) an employer about compliance.

b. Paragraphs (i)(1)(i) and (ii) Shortened Work Contract Period

The Department proposed to remove the language at § 655.122(i)(1)(i) and (ii) that permitted the work contract period to be shortened by agreement of the parties with the approval of the CO, consistent with changes to the delayed start date procedure at § 655.175. The Department received one comment from a trade association that expressed general support for this minor change. The Department is adopting the proposal without revision in this final rule. These minor conforming changes will ensure these paragraphs are consistent with changes to delayed start of work requirements at new § 655.175(b), which permits only minor delays to the start of work and requires notice to workers and the SWA, but not CO approval, as discussed in the preamble explaining changes in that section.

The Department also received comments on this section that it has determined were beyond the scope of this rulemaking. A workers' rights advocacy organization expressed concern that providing workers the three-fourths guarantee at the end of the contract period results in financial hardship for workers and may incentivize employers to find pre-textual reasons to avoid fulfilling the obligation. The commenter urged the Department to revise the three-fourths guarantee at § 655.122(i) to require employers to guarantee and compensate workers for three-fourths of the work hours in each weekly or biweekly period. Alternatively, the commenter urged the Department to require employers provide a ''basic 'per diem' to cover food costs during work stoppages exceeding 3 days at any time'' during the employment period.

These suggestions would require amendments to § 655.122(i) or § 655.122(g) that would constitute major changes to the regulations that commenters and stakeholders could not have anticipated as an outcome of the proposed minor change to § 655.122(i)(1) or proposed changes to the delayed start date procedure at § 655.175(b), thus warranting additional public notice and opportunity for comment. As such, the Department declines to adopt the suggested changes. However, as the Department noted in the 2022 H–2A Final Rule, the three-fourths guarantee ''is intended to address the normal variability of weather, crop readiness, and other circumstances in agricultural work'' and ''is not intended to allow an employer to include periods without work'' for other reasons. 87 FR at 61774. The employer's job order must accurately reflect the actual hours that the employer intends to offer workers.[41]

c. Paragraph (l)(3) Productivity Standards as a Condition of Job Retention

The NPRM proposed that if the employer requires one or more productivity standards as a condition of job retention, such standards must be specified in the job offer and be no more than those required by the employer in 1977, unless the OFLC Administrator approves a higher minimum. Additionally, the NPRM proposed that if the employer first applied for temporary agricultural labor certification after 1977, such productivity standards must be no more than those normally required (at the time of the first *Application for Temporary Employment Certification*) by other employers for the activity in the AIE. Under the current regulations at § 655.122(l)(2)(iii), these conditions apply only to those employers paying a piece rate and requiring one or more productivity standards as a condition of job retention. The NPRM proposed to expand these conditions to all employers requiring one or more productivity standards as a condition of job retention, regardless of whether the workers are paid on a piece rate or hourly basis. The NPRM explained that this change was necessary so that all workers would be informed of the conditions that may serve as a basis for termination for cause, consistent with proposed changes to § 655.122(n), and to ensure that employers do not terminate workers for excessively high productivity standards.

Many individuals, public policy or other advocacy organizations, workers' rights advocacy organizations, unions, and State agencies, as well as some Members of Congress, unconditionally supported the proposal. These commenters agreed that the disclosure of this productivity-standard information would ensure that workers are informed of the material terms and working conditions of the job offer before accepting the job and noted the harm that increased productivity standards have on workers, regardless of whether workers are paid on an hourly or piece-rate basis. Specifically, Farmworker Justice noted that they have encountered workers who were required to work at such a rapid pace that the workers reasonably feared an increased incidence of accidents. Many commenters, including the North Carolina Justice Center, PCUN, and UMOS, also said that uncapped productivity standards would have the effect of dissuading U.S. workers from finding or keeping these jobs. A number of agricultural associations and employers, such as the Michigan Asparagus Advisory Board, TIPA, and NHC, agreed with the proposal on the condition that employers have the ability to adjust productivity standards if the crop or market conditions are different than anticipated at the time of the job offer.

Other employers and associations opposed the proposal. Some employers

[41] DOL, *WHD Fact Sheet #26E: Job Hours and the Three-Fourths Guarantee under the H–2A Program* (Nov. 2022), *https://www.dol.gov/agencies/whd/fact-sheets/26e-job-hours-three-fourths-guarantee-H-2A.*

opposed the proposal based on a mistaken perception that qualitative reasons for evaluation would not be acceptable. One anonymous employer misunderstood the proposal, believing that it would require employers to create productivity standards, and stated that creating a productivity standard would be impossible because of the needs of different crops and conditions (*e.g.,* fresh market versus juicing apples). AILA did not support or oppose the proposal but requested that the Department add a section for this information on the applicable forms. As explained more fully in the discussion below, this final rule will permit employers to consider qualitative reasons for discipline and termination and will not require employers to establish productivity standards if they choose not to do so.

Some commenters expressed concerns as to how the Department would determine whether a productivity standard is normal and accepted for the activity in the AIE. Wafla opposed the proposal, stating that the proposed guidelines for establishing productivity standards were unclear. Other commenters, including Titan Farms, LLC and NHC, characterized as problematic the requirement that productivity standards be frozen at the time an employer first used the program, stating that technological advancements have increased worker efficiency levels. While Farmworker Justice supported the proposal, they suggested that SWAs request documentation to substantiate the appropriateness of qualifications to ensure they do not approve arbitrary and inappropriate productivity standards.

This final rule adopts the language as proposed. After evaluating all comments, the Department continues to believe that the productivity standards that will be used as a basis for job retention are a core term and working condition that must be disclosed to workers in the job offer, regardless of whether those workers are paid on a piece-rate or hourly basis. Workers must know, before accepting a job, the criteria for which they may be later terminated, including any applicable productivity standards. As discussed further below and in the preamble corresponding with § 655.122(n), the employer may consider other applicable criteria for job retention, including an evaluation of work quality, but these criteria are not considered productivity standards. The Department also continues to believe that it is appropriate to require that productivity standards in the H–2A program not exceed the standards normally required by other employers for the activity in the AIE when the employer first used the program (unless otherwise permitted by the OFLC Administrator, or if the standards reflect the standards the employer used in 1977, for employers that first used the program before 1977). This requirement will prevent productivity standards from constantly increasing arbitrarily, thus preventing potential unsafe working conditions and exclusion of U.S. workers from the agricultural workforce, while at the same time permitting reasonable adjustments by the OFLC Administrator when appropriate.

As described above, some opposition to this proposal resulted from a misunderstanding that employers would not be permitted to evaluate work quality for purposes of job retention and would be required to use productivity standards alone to address any performance issues. In § 655.122(n)(2) of this final rule, the Department clarifies language to state that a worker may be terminated for cause for a failure to satisfactorily perform job duties in accordance with the employer's reasonable expectations based on criteria described in the job offer. These criteria for evaluation may include a productivity standard, qualitative criteria, or both. Therefore, the Department clarifies that it will not require employers to use productivity standards to evaluate their workers if they do not choose to do so. However, any employer that uses a productivity standard to evaluate job performance must disclose that productivity standard in the job offer, pursuant to § 655.122(l)(3).

The Department stated in the preamble to the NPRM that, consistent with current guidance, productivity standards must be static, objective, and specifically quantify the expected output per worker. The NPRM further stated that vague standards, such as requiring workers to ''perform work in a timely and proficient manner,'' ''perform work at a sustained, vigorous pace,'' or ''keep up with the crew'' would not be acceptable productivity standards as they lack objectivity, quantification, and clarity, and would not be accepted as valid reasons for termination for cause.[42] In light of the changes to § 655.122(n)(2) in this final rule, specifically the allowance for consideration of qualitative criteria as a reason for termination for cause, the Department believes that this statement requires further clarification. In this final rule, the Department maintains that productivity standards must be static, quantifiable, and specifically quantify the expected output per worker. Productivity standards must comply with § 655.122(l)(3) in this final rule, meaning they must be disclosed to the worker in the job offer and be no more than those required by the employer in 1977, unless the OFLC Administrator approves a higher minimum, or, if the employer first applied for temporary agricultural labor certification after 1977, no more than those normally required (at the time of the first *Application for Temporary Employment Certification)* by other employers for the activity in the AIE. As described above, qualitative criteria for evaluation are not productivity standards, as they are not quantifiable, and therefore will not fall within the scope of § 655.122(l)(3) in this final rule.

However, the Department will not permit the use of allegedly qualitative criteria for evaluation as a reason for termination for cause where they are exclusively a proxy for measures of quantitative output (*i.e.,* productivity standards) and, therefore, attempt to circumvent § 655.122(l)(3). For example, the standard ''failure to keep up with the crew'' exclusively measures quantitative output and thus would be an impermissible productivity standard because it is not static and does not quantify the expected output per worker. An employer using such a standard for evaluation would essentially be able to create different productivity standards at its discretion and without the knowledge of the worker, thus circumventing the purpose of § 655.122(l)(3). An employer wishing to evaluate the speed or quantity of work should disclose a productivity standard (or multiple productivity standards, if different standards apply to different crops or situations).

On the other hand, a genuinely qualitative or behavioral standard that incidentally affects productivity, such as a requirement that a worker know how to correctly use a tool or a prohibition on watching streaming video during work hours, would be permissible. While these standards may affect the speed and quantity of work performed (*e.g.,* a worker spending excessive time watching streaming video during work hours may harvest fewer apples than other workers), the underlying standard is not quantitative in nature and, therefore, would be acceptable. One anonymous employer identified that they often know ''when a worker is working slower than the

[42] *See* 88 FR 63779; and OFLC, *Frequently Asked Questions, H–2A Temporary Agricultural Foreign Labor Certification Program, 2010 Final Rule, Round 9* (Oct. 30, 2015), *https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/H-2A_FAQ_Round9.pdf.*

other workers[,] or when he is on his cell phone while others working beside him are working hard[,] or when he is deliberately obstructing the work of others.'' The first standard (''working slower than other workers'') would be an impermissible productivity standard, whereas rules or policies governing the other two standards (excessive use of a phone during work hours and obstructing the work of others) would be acceptable bases for discipline, including termination when appropriate, if all procedures in § 655.122(n) are followed.

The Department declines to allow employers to change productivity standards during the work contract period, as doing so would undermine the purpose of this provision. If an employer were to be permitted to modify the productivity standards at its discretion, workers would not have adequate notice of the productivity standards that they must meet. If an employer wishes to use productivity standards and believes that different productivity standards will be applicable in different situations (*e.g.,* fruit for fresh market versus fruit for juicing), the employer should disclose the applicable productivity standards in each of those situations.

The Department will continue to use its established procedures to determine whether productivity standards were normally required (at the time of the first *Application for Temporary Employment Certification*) by other employers for the activity in the AIE. The Department has previously defined ''normal'' as ''not unusual,'' and has clarified that ''normal'' in this context differs from prevailing. In other words, the Department does not require that a majority of employers in the AIE use the same productivity standard, only that the use of that productivity standard not be unusual. *See* 73 FR 77110, 77153–77154 (Dec. 18, 2008).

The Department significantly relies on SWAs' expertise in determining whether productivity standards are no more than those normally required (at the time of the first *Application for Temporary Employment Certification)* by other employers for the activity in the AIE. SWAs are familiar with the specific agricultural and labor conditions in their respective geographic areas and serve an essential role in reviewing job orders for sufficiency. *See* 87 FR at 61706–61707.

Consistent with § 655.122(b), SWAs or the Department may, at their discretion, request documentation from the employer to substantiate the appropriateness of any job qualification (including productivity standards). The Department has previously stated that this documentation may include the names of other employers that can verify the adequacy of the employer's requirement, information from the Cooperative Extension System, university personnel with expertise in agricultural sciences, or a prevailing practice survey. *See* 53 FR 22076, 22096–22097 (June 13, 1988). Although a prevailing practice survey may be used to demonstrate the appropriateness of a productivity standard, it is not required because productivity standards need only be normal, not prevailing. *See* 53 FR 22076, 22096.

Additionally, regardless of the year that the employer first applied for temporary agricultural labor certification (whether before or after 1977), the Department will consider requests for a higher minimum productivity standard upon receiving substantive written documentation showing that an increase is justified by technological, horticultural, or other labor-saving means. For example, the Department stated in the 2010 final rule that apple growers had been allowed to raise productivity standards to reflect the introduction of dwarf trees. *See* 53 FR 22076, 22083 (June 13, 1988) and 2010 H–2A Final Rule, 75 FR 6884, 6914.

d. Paragraph (l)(4); § 655.210(g)(4) Disclosure of Available Overtime Pay

The Department proposed to add a new paragraph at § 655.122(l)(4) to explicitly clarify that the employer must specify in the job offer any applicable overtime premium wage rate(s) for overtime hours worked and the circumstances under which the wage rate(s) for such overtime hours would be paid. Under the Department's longstanding regulations, an H–2A employer must assure that it will comply with all applicable Federal, State, and local laws, including any applicable overtime laws, during the work contract period. *See* § 655.135(e). In addition, an H–2A employer must accurately disclose the actual, material terms and conditions of employment, including those related to wages, in the job order. *Id.* Sections 655.103(b), 655.121(a)(3), and 655.122(l).

Therefore, the Department proposed to revise the current wage disclosure requirements found at § 655.122(l) to expressly clarify in a new paragraph (4) that an employer must disclose in the job order any applicable overtime pay. Specifically, under proposed § 655.122(l)(4), whenever overtime pay is required by law or otherwise voluntarily offered by an employer, an employer would be required to disclose in the job order the availability of overtime hours, the wage rate to be paid for any overtime hours, and the circumstances under which overtime will be paid.[43] The proposed paragraph at § 655.122(l)(4)(iii) provided illustrative examples of circumstances that might apply, such as after how many hours in a day, week, or pay period the overtime premium wage rate will be paid, or if overtime premium wage rates will vary between worksites. However, an employer must accurately disclose the actual circumstances under which overtime would be paid. Similarly, the Department proposed to amend the pay disclosure requirements at § 655.210(g), governing the contents of job orders for herding and range livestock production occupations, to include a new paragraph (g)(3) that would require employers to disclose any available overtime pay, whether voluntarily offered by the employer or required by State or Federal law, and the details regarding such pay.

The Department largely received supportive comments regarding this proposal. Many of the comments, including those representing employers, employer associations, SWAs, State Attorneys General, U.S. Senators, U.S. House Members, and worker advocates, voiced support for the addition of this language to explicitly disclose to prospective workers the opportunity for overtime pay. One of these commenters, Marylanders for Food and Farmworker Protection, explained that ''[p]roviding workers with clear expectations promotes fairness and prevents exploitation.'' Another commenter, másLabor, who voiced general support for this provision, acknowledged that workers need to know when overtime payment is applicable, and how much they may expect to be paid.

The Department also received some comments in opposition to this specific proposal, stating that overtime payment is already a required data element of the job orders and the new provision is generally unnecessary. The two prevailing sentiments in opposition were: (1) payment of piece rates complicate the employers' ability to properly disclose what overtime rate will be applicable; and (2) the lawful reason for applicable overtime payment is irrelevant to workers. Related to the former, wafla suggested that the proposal is administratively overburdensome and that, ''[t]he proposed language is problematic for employers because requiring some

[43] *See, e.g.,* Cal. Indus. Welfare Comm'n Order No. 14–2001 (as amended), Cal. Code Regs., tit. 8, § 11140.

actual calculation of the wage is impossible and not accurate particularly when considering piece rate.'' Wafla provided an alternative, more simplified example of required language: ''Overtime will be paid at 1.5 times the weekly regular rate of pay for any hours exceeding 40 hours.''

The New York State Farm Bureau explained, ''these piece rates vary due to factors often outside of farmers' control such as the weather, equipment, and type of commodity. This creates additional paperwork for farmers that are often hard to predict in order to include in a job order.'' Another complexity cited by the New York State Farm Bureau is due to a newly effectuated New York State law in which overtime for agricultural workers will be phased in over a period of 8 years, with a lowering threshold every other year.

Another commenter, másLabor, did not object to the disclosure of overtime pay, if applicable, but opposed ''requir[ing] the employer to specify whether overtime is paid voluntarily by the employer or is required by law, and to cite the specific Federal, State, or local law requiring the payment of overtime pay.'' MásLabor said ''[i]t is unclear why such disclosures are necessary, as the reason for overtime pay is completely irrelevant to prospective workers.'' MásLabor also posited that explaining the legal requirements for applicable overtime pay would only serve to lengthen the job orders, confuse workers, and likely result in increased NOD findings from OFLC.

NCAE asserted that data compiled by the National Agricultural Worker Survey indicate that in jurisdictions where overtime pay is applicable, workers' net earnings have declined due to those overtime payment requirements.

With regard to the same proposal for the herding and range livestock production occupations, Colorado Legal Services submitted the only comment, which was a copy of the letter it and other organizations previously submitted in response to the 2015 herder rulemaking NPRM and generally supported increased worker protections.

After consideration of all the comments received, the Department adopts the proposal and finalizes the new provisions at §§ 655.122(l)(4) and 655.210(g)(4) of this final rule. As discussed in the NPRM, the H–2A program does not mandate the payment of an overtime premium wage rate for hours worked exceeding a certain number in the day, week, or pay period. However, the FLSA's overtime requirements, as well as various State and local laws that require overtime pay, apply independently of the H–2A program's wage requirements. Some H–2A workers and workers in corresponding employment may be entitled to overtime pay under one or more of these laws. Pursuant to these authorities, an H–2A employer already must disclose in the job order any available overtime pay, whether required under Federal, State, or local law, or otherwise voluntarily offered by the employer. As noted in the NPRM, despite these existing authorities, OFLC and WHD frequently encounter H–2A job orders that either omit disclosure of, or fail to accurately describe, applicable overtime pay. Accordingly, the Department believes these new provisions are necessary and will provide needed transparency to workers regarding the terms and conditions of the employer's job opportunity. Failure to clearly and fully disclose any available overtime pay in the job order harms prospective workers who may be more interested in the job opportunity if they are aware of the availability of overtime pay. Incomplete or nonexistent disclosures also hamper the Department's ability to effectively administer and enforce the H–2A program requirements.

The Department does not view this requirement as overly burdensome because the intent is to accurately disclose to the workers the availability of overtime pay, already a requirement under the existing regulations. However, the Department appreciates the opportunity to clarify that disclosure of the ''wage rate(s) to be paid'' under §§ 655.122(l)(ii) and 655.210(g)(4)(ii) may be in the form of a formula such as ''1.5 times the regular rate of pay'' and is not required to be a specific dollar amount. Of course, where the specific dollar amount of the premium rate is known, the employer is free to disclose this. For example, the Department agrees with wafla's comment suggesting that language such as ''[o]vertime will be paid at 1.5 times the weekly regular rate of pay for any hours exceeding 40 hours'' should be sufficient to satisfy the requirements of the §§ 655.122(l)(4)(i) through (iii) and 655.210(g)(4)(i) through (iii), as long as the language accurately describes the employer policy or the local, State, or Federal standard applicable.

Where the offer of overtime is pursuant to a Federal, State, or local law, the employer must explicitly disclose that as well, under §§ 655.122(l)(4)(iv) and 655.210(g)(4)(iv), for example by adding ''according to the Fair Labor Standards Act'' or ''as required under California Industrial Welfare Commission Order 14–2001.'' Lastly, as it is the employer's responsibility to be aware of all laws to which it is subject, the employer should not incur an undue burden by disclosing what the law requires of it, or that it plans to voluntarily make overtime pay available to the worker.

Further, the comment suggesting that the net earnings of the worker are decreased by the requirement to pay overtime when required by law is not relevant to the Department's proposal adopted here. This final rule does not newly mandate the payment of overtime pay, but rather furthers the Department's intent to increase transparency by requiring the disclosure of available overtime pay when otherwise required by law or voluntarily offered by the employer.

As noted in the NPRM, this provision will align the Department's administration of the H–2A and H–2B programs more closely. The disclosures required under §§ 655.122(l)(4) and 655.210(g)(4) in this final rule are similar to the overtime disclosure requirement under the H–2B program regulations at 20 CFR 655.18(b)(6).[44]

Finally, the NPRM also proposed corresponding amendments to Form ETA–790A and Form ETA–9142A to include dedicated spaces for disclosure of any applicable overtime pay. The Department believes these revisions will improve the consistency and accuracy of disclosures of available overtime pay, thereby providing greater notice to prospective workers of the actual terms and conditions of the job opportunity and improving the Department's enforcement of any applicable overtime pay requirements.

e. Paragraph (n) Termination for Cause or Abandonment of Employment

The NPRM proposed to revise § 655.122(n) to define termination for cause. The Department stated that this revision was necessary because a worker who is terminated for cause no longer is entitled to the three-fourths guarantee (including meals and housing until the worker departs for other H–2A employment or to the place outside the United States from which the worker came (§ 655.122(i)); outbound transportation (§ 655.122(h)(2)); and, if a U.S. worker, to be contacted for work in

[44] *See* WHD Field Assistance Bulletin 2021–3, *Overtime Obligations Pursuant to the H–2B Visa Program* (Dec. 7, 2021), *https://www.dol.gov/sites/dolgov/files/WHD/legacy/files/fab_2021_3.pdf;* Form ETA–9142B, *H–2B Application for Temporary Employment Certification,* Sec. F(b), *https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/Form-ETA-9142B-1205-0509.pdf.*

the next year (§ 655.153), each of which is an important protection that safeguards workers in the United States against adverse effect from the hiring of H–2A workers and ensures that H–2A workers are employed only when there are not sufficient able, willing, and qualified workers in the United States available to perform the work. Specifically, the NPRM proposed the creation of a new paragraph (n)(2) stating that a worker would be terminated for cause when the employer terminates the worker for failure to meet productivity standards or failure to comply with employer policies or rules. Further, the NPRM proposed that a worker would be terminated for cause only if six straightforward conditions—listed in in proposed paragraphs (n)(2)(i)(A) through (F)—were satisfied: the employee had been informed (in a language understood by the worker) of the policy, rule, or productivity standard, or reasonably should have known of the policy, rule, or productivity standard; if the termination is for failure to meet a productivity standard, such standard was disclosed on the job offer; compliance with the policy, rule, or productivity standard was within the worker's control; the policy, rule, or productivity standard was reasonable and applied consistently; the employer undertook a fair and objective investigation into the job performance or misconduct; and the employer engaged in progressive discipline to correct the worker's performance or behavior.

In 20 CFR 655.122(n)(2)(ii), the NPRM proposed to define progressive discipline as a system of graduated and reasonable responses to an employee's failure to meet productivity standards or failure to comply with employer policies or rules. The NPRM also clarified that disciplinary measures should be proportional to the failure but may increase in severity if the failure is repeated, and may include immediate termination for egregious misconduct. This paragraph further stated that, following each disciplinary measure, except where the appropriate disciplinary measure is termination, the employer must provide relevant and adequate instruction to the worker; must afford the worker reasonable time to correct the behavior or to meet the productivity standard following such instruction; and must clearly communicate to the worker that a disciplinary measure has been imposed.

In 20 CFR 655.122(n)(2)(iii), the NPRM proposed that termination for cause would not exist where the termination is contrary to a Federal, State, or local law; is for an employee's refusal to work under conditions that the employee reasonably believes will expose them or other employees to an unreasonable health or safety risk; is because of discrimination on the basis of race, color, national origin, age, sex (including sexual orientation or gender identity), religion, disability, or citizenship; or, where applicable, where the employer failed to comply with its obligations under § 655.135(m)(4) to permit workers to designate a representative to attend a meeting that contributed to the termination.

In 20 CFR 655.122(n)(2)(iv), the NPRM proposed that an employer would bear the burden of demonstrating that any termination for cause meets the requirements of paragraph (n)(2). The NPRM proposed to redesignate language in current § 655.122(n) as a new paragraph (n)(3). Proposed paragraph (n)(4) listed the recordkeeping obligations associated with any termination for cause, including recordkeeping obligations in current § 655.122(n) related to notification to the NPC and DHS, and new recordkeeping obligations if a worker were to be terminated for cause.

The Department received a significant number of comments both in support and in opposition to the proposal. After reviewing comments, this final rule adopts the proposal with modifications, discussed below. This section will first discuss general comments and responses, and then will go into greater detail about comments relating to specific language in the proposed regulations.

General Comments and Responses

Worker rights advocacy organizations, unions, commenters affiliated with academic institutions, workers, State labor and employment agencies, State Attorneys General representing 11 States, and some Members of Congress and individuals supported the proposal. An individual commented that this proposal would provide workers with an important safeguard against arbitrariness and injustice in the workplace, and another stated that the proposal would protect workers from being fired on a whim and would protect the livelihood of agricultural workers. Farmworker Justice stated that the proposal would make clear that arbitrary terminations, and terminations with no reasons given, are not for cause. Many of these commenters, including Farmworker Justice, the UFW Foundation, and a worker, echoed the Department's reasoning that clarification was necessary because of the serious consequences associated with a termination for cause, including that a worker terminated for cause is no longer entitled to payment for outbound transportation (including meals and housing until the worker departs for other H–2A employment or to the place outside the United States from which the worker came) under § 655.122(h)(2); the three-fourths guarantee under § 655.122(i); and, if the worker is a U.S. worker, the right to be contacted for employment in the subsequent year as required by § 655.153. Commenters also identified that there were additional consequences associated with unjust termination. Farmworker Justice said that workers accepting an H–2A job often invest substantial resources in that job, including travel expenses and illegal recruitment fees, which are lost investments if the worker is terminated, and workers may lose access to other job opportunities. Farmworker Justice also stated that unjustly terminated U.S. workers may struggle to obtain unemployment benefits and find a subsequent job. The California LWDA also said that terminated workers may lose access to employer-provided housing. Many commenters, including 15 U.S. Senators and 11 State Attorneys General, also stated that a clear definition of termination for cause may encourage workers to exercise their rights because pretextual terminations would become more apparent.

Conversely, employers, farm bureaus, agricultural associations, the Wyoming Department of Agriculture, employer representatives, State Attorneys General representing 22 States, one Senator, and some U.S. House Members and individuals opposed the proposed regulation. Many of these commenters, including AILA and Georgia Farm Bureau, questioned the Department's reasoning, stating that the Department only cited a few real-life examples of this issue that were insufficient to demonstrate that the problem warranted a regulatory change. Other commenters, including the New York and California Farm Bureaus, emphasized that workers are a valuable part of an employer's operations and that most employers terminate workers rarely, and only after careful consideration. Titan Farms, LLC stated that they have a 95-percent return rate of workers each year and Northern Family Farms, LLP stated they have a 98-percent return rate of workers each year and a waitlist of potential workers seeking work on their farm. Some commenters stated that, in their view, the proposal implied that most users of the H–2A program were seeking to evade regulatory obligations.

The Department recognizes that most employers using the H–2A program seek to comply with regulatory requirements

and treat their workers with dignity and respect. Employers invest significant resources in workers and most do not make termination decisions lightly. Further, the Department believes that many employers, prior to the publication of the NPRM, already operate under procedures that largely meet the standards finalized in this rule. Most of the criteria described in proposed § 655.122(n)(2) are common-sense criteria (*e.g.,* the worker knows the rule, the rule is reasonable, and compliance is within the worker's control) that many workplaces have already implemented to protect against liability under other laws (*e.g.,* anti-discrimination laws, anti-retaliation laws, and unemployment insurance laws), or simply to be fair and equitable in the workplace. Other criteria, such as the requirement that the employer engage in progressive discipline before terminating workers, ensure that workers are not terminated for minor, isolated infractions. Employers who terminate or discipline only after thoughtful consideration to ensure a fair and equitable process will be minimally affected by the final rule.

Furthermore, the Department did not intend to suggest that most employers are seeking to evade program obligations. However, through its enforcement efforts, WHD regularly finds such conduct from employers. Sometimes WHD finds terminations that are predicated on unreasonable grounds. In a recent example, an H–2A worker was terminated for seeing a doctor after being instructed to do so by a crew leader. Other times, WHD finds that rules are created for the purpose of terminating a worker. For example, WHD found that an employer terminated a corresponding worker for allegedly stealing a can of soda from the employer's truck after the worker had been informed that the soda was theirs to take. Sometimes the reason for termination is simply pretext. In this same example, the termination of the corresponding worker occurred on the same day that an H–2A worker arrived, and the investigation determined that the employer was searching for an excuse to terminate the corresponding worker and replace them with the H–2A worker.

Other times, WHD finds that employers inconsistently enforce rules and neglect to notify workers of minor transgressions that will ultimately result in termination. For example, an employer terminated six corresponding workers and provided most with no reason for their termination, but then presented WHD with evolving reasons, including an entire crew allegedly not performing well after weeks of training and workers taking unauthorized breaks. After settling on tardiness as the reason for termination, the employer could not provide any evidence of the tardiness, and the workers themselves did not recall that the employer counseled them for tardiness or informed them that tardiness was the reason for their termination. Although the employer eventually provided timecards documenting some tardiness, other workers similarly were tardy and were not terminated, suggesting that the reason for termination was pretextual.

Sometimes WHD finds that employers simply tell workers they are no longer needed for the season, or stop providing work so that the workers grow desperate and leave allegedly of their own volition (even though such a circumstance constitutes constructive discharge). Other times, employers may try to disguise the termination as job abandonment. On more than one occasion, WHD has found that employers have required workers to sign ''voluntary'' resignation forms when, in fact, the workers were terminated.

One commenter, the UFW Foundation, also provided examples of unjust terminations and discipline. For example, a Washington farmworker described that she and her husband were both terminated for ''abandoning [their] work'' after the supervisor told them to go home for a few hours, and a Georgia farmworker stated that her employer arbitrarily and selectively used productivity standards against new H–2A workers, inspecting the work of new H–2A workers and finding ''bad grapes'' to justify nonpayment of wages. The UFW Foundation also provided numerous examples of workers who were terminated because they asserted their rights. These types of schemes to evade program responsibilities are sufficiently common that the Department continues to believe that adoption of the proposal, with the modifications explained below, is warranted.

Many commenters, including the U.S. Chamber of Commerce, NCFC, and Willoway Nurseries, stated that the proposal would be too complex and burdensome to implement, particularly for small farms. Many of these commenters stated that the proposed regulations would require employers to maintain a large human resources (HR) team and contract with employment law attorneys to ensure compliance, thus increasing costs for growers. Wafla estimated that a small employer would need at least 80 hours to develop, train staff, and implement policies to comply with the proposal.

Commenters opposed the proposal for a variety of other reasons. NCFC, AmericanHort, Willoway Nurseries, Michigan Farm Bureau, and FSGA stated that the proposal was unworkable even for larger growers because corrections and instructions occur on the fly in the orchard or field. They asked if instructing someone on how to do their job was a disciplinary action or training.

U.S. Custom Harvesters, Inc. stated that the proposal was particularly difficult for custom harvesting operators because workers in that industry are often working without supervision in various locations. Some commenters, including USA Farmers, FFVA, and Seso, Inc., said that the parameters for termination were vague and subjective and would leave employers unsure as to whether they had complied with the proposed rule. MásLabor, USA Farmers, McCorkle Nurseries, Inc., and an individual questioned whether the Department had exceeded its statutory authority. Wafla stated that employers need the right to terminate workers if they are not a good fit with the work culture and environment. NCFC, FFVA, AmericanHort, Willoway Nurseries, Michigan Farm Bureau, and FSGA stated that the regulation would chill an employer's ability to terminate so-called ''toxic employees'' and thus could expose employers to allegations of a hostile work environment. MásLabor and an individual stated that the proposal stripped an employer of discretion on matters of worker misconduct. These commenters further provided the example of a worker who was openly insubordinate and obscene in the workplace, and they suggested that the employer would be required to coach the worker on how not to be insubordinate and obscene and only take further action if the behavior continued. MásLabor characterized the proposal as a ''get out of jail free'' card. USA Farmers stated that the proposal would override American common law traditions of at-will employment, and the Cato Institute similarly stated that the proposal would terminate at-will employment on H–2A farms.

First, the Department seeks to clarify a possible misunderstanding about employers' current obligations to H–2A and corresponding workers. The Department has long maintained that regulating the employment decisions made by an employer using the H–2A program is necessary to achieve statutory objectives—specifically, to ensure that H–2A workers are employed only when there are insufficient qualified, able, and available U.S. workers to complete the work, and to

ensure that the employment of H–2A workers does not adversely affect the wages and working conditions of workers in the United States similarly employed, *see* 8 U.S.C. 1188(a)(1)—and has a long history of regulating in this space. For example, the job opportunity must remain open to U.S. workers until 50 percent of the work contract has elapsed (20 CFR 655.135(d)); U.S. applicants can be rejected only for lawful, job-related reasons (20 CFR 655.135(c)(3)); and the employer may not lay off a similarly employed U.S. worker unless all H–2A workers are laid off first (and even then only for lawful, job-related reasons) (20 CFR 655.135(g)). Under both the regulations currently in effect and those adopted in this final rule, an H–2A worker or corresponding worker terminated without cause is entitled to the three-fourths guarantee (and other rights as well). These long-established obligations mean DOL has always required employers to comply with certain requirements relating to hiring and terminating workers while using the H–2A program. The regulations adopted in this final rule continue in this same vein.

Second, many aspects of this proposal are not new and many employers likely already have developed policies for compliance. Since the inception of the H–2A program, and in the H–2 program before that, the Department has been required to make determinations as to what constitutes a for-cause termination.[45] While there have not previously been regulatory factors outlining the requirements for a for-cause termination, the Department previously stated in *Field Assistance Bulletin 2012–1* that ''it is important to inquire into the circumstances surrounding the termination of the worker's employment . . . because of the potential for the employer to mischaracterize termination for cause, the underlying facts of any such assertion should be explored through interviews and any other relevant documentation that can be obtained.'' [46]

Historically, when determining whether a worker has been terminated for cause, the Department has reviewed all relevant factors, including, for example, the reasonableness of the rule, consistent application of a rule among employees, and whether the employer fairly reviewed the misconduct or job performance. The Department similarly reviews all facts of the case when investigating allegations of retaliatory termination or improper discharge of U.S. workers in the H–2A program, as well as alleged violations of other laws that the Department enforces (*e.g.,* if a worker is terminated for taking leave to which they are entitled under the Family and Medical Leave Act).

In the examples listed earlier in this section, WHD cited violations, computed back wages, and assessed civil money penalties because workers were terminated not-for-cause and the employer failed to provide the required remedies. Factors that alerted WHD that the terminations were not-for-cause included items such as the reasonableness of the termination (*e.g.,* an employer tells a worker to see a doctor and then terminates them for doing so, or a worker was specifically informed that he could take a soda and then terminated for doing so), and consistent application among employees (*e.g.,* all workers are late, but only some were terminated for lateness). In these enforcement efforts, WHD applied the Department's understanding of what criteria signify termination-not-for-cause, and in the final rule, the Department codifies many of these criteria in regulation. Codifying these criteria will aid WHD's enforcement efforts and will allow employers to more fully understand the scope of their obligations and to better manage their workplaces.

These criteria are not unique to laws that WHD enforces. Similar, albeit not identical, criteria exist in other laws as well. State unemployment compensation laws, which should be familiar to most employers, generally define eligible recipients as having separated from work through no fault of their own (among other criteria).[47] Therefore, an employer challenging an unemployment claim is accustomed to showing that, for example, a worker was terminated because of willful misconduct, as opposed to a termination that was no fault of the worker. Many State laws deny unemployment benefits to workers discharged because they were in ''knowing violation of a reasonable and uniformly enforced rule,'' [48] and, in interpreting their own laws, State courts may review factors such as whether a rule or policy was consistently enforced, whether the worker knew or should have known about the policy or rule, and whether the rule was reasonable. See, *e.g., Coahoma Cty.* v. *Miss. Emp. Sec. Comm'n,* 761 So. 2d 846, 849–50 (Miss. 2000) (finding that a worker was not engaged in misconduct because the rule was not fair and consistently enforced); *Rios Moreno* v. *Ariz. Dep't of Econ. Sec.,* 873 P.2d 703, 705 (Ariz. Ct. App. 1994) (finding that the worker was not engaged in misconduct because there was no evidence that he should have known of the rule he was claimed to have violated); *Caterpillar, Inc.* v. *Unemployment Comp. Bd. of Rev.,* 703 A.2d 452, 456–57 (Pa. 1997) (finding that a violation of a rule cannot be considered willful misconduct if the rule was applied in an unreasonable manner). There are significant parallels between unemployment insurance laws and the H–2A termination for cause provision. Under both, the employer may terminate workers for any lawful reason, but may have financial or other obligations to workers who are terminated for reasons outside of the worker's control, whether not-for-cause (under H–2A), or through no fault of the worker (under unemployment insurance laws). Additionally, in the context of Federal and State anti-retaliation and anti-discrimination protections, courts routinely cite inconsistent or disparate discipline as evidence of pretext for an unlawful termination. *See, e.g., Chattman* v. *Toho Tenax Am., Inc.,* 686 F.3d 339, 348–49 (6th Cir. 2012); *Gordon* v. *United Airlines, Inc.,* 246 F.3d 878, 8992–93 (7th Cir. 2001); *Graham* v. *Long Island R.R.,* 230 F.3d 34, 43 (2d Cir. 2000).

The Department acknowledges that some aspects of this final rule as adopted—specifically, the requirements that an employer engage in progressive discipline and maintain particular records (§ 655.122(n)(2)(i)(E) and (n)(4)(ii)–(iii))—may require some employers to develop new procedures for compliance. However, the Department believes that these aspects of the proposal complement the other provisions to ensure that any for-cause termination is sufficiently warranted by the disciplinary circumstances and that a record of those circumstances exists.

As explained in the NPRM, progressive discipline ensures that

[45] *See, e.g.,* Final Rule, *Temporary Employment of Alien Agricultural And Logging Workers in the United States,* 43 FR 10306, 10315 (Mar. 10, 1978) (1978 Final Rule) (employer need not pay outbound transportation for workers terminated for cause); 1987 H–2A IFR, 52 FR 20496, 20501, 20515 (where a worker is terminated for cause, the worker is not entitled to the three-fourths guarantee and the employer need not pay outbound transportation).

[48] *See, e.g.,* Conn. Gen. Stat. Ann. § 31–236(a)(16)(B) (2022); Iowa Code § 96.5(2)(d)(2) (2023); Mass. Gen. Laws ch. 151A § 25(e) (2018).

workers are not harshly punished for minor, first-time infractions and reinforces the conditions for termination found in § 655.122(n)(2)(i), specifically that rules, policies, and productivity standards are communicated to the workers and are reasonable. *See* 88 FR 63783. A for-cause termination nullifies a worker's entitlement to important protections (§§ 655.122(h)(2), 655.122(i), and 655.153) that serve the statutory purpose of preventing adverse effect on the wages and working conditions of similarly employed workers in the United States, and ensuring that an employer only hires H–2A workers when there are insufficient able, willing, and qualified workers in the United States.[49]

The Department therefore has a responsibility pursuant to 8 U.S.C. 1188(a)(1) to ensure that an employer is relieved of these obligations only in situations where the employer has sufficient justification to terminate a worker for cause. The protections afforded by §§ 655.122(h)(2) (outbound transportation), 655.122(i) (three-fourths guarantee, including meals and housing until the worker departs for other H–2A employment or to the place outside the United States from which the worker came), and 655.153 (the right of a U.S. worker to be contacted for work in the next year) lose all meaning if any infraction or failure to meet performance standards, no matter how minor or occasional, results in the loss of those protections. A progressive discipline process applied in a rational and consistent manner to all employees with similar infractions ensures that consequences are commensurate with the severity of the infraction and that the most serious consequences (*i.e.,* termination) are reserved for the most serious offenses. However, a progressive discipline process also acknowledges that frequent minor infractions may compound the severity of misconduct and provides employers with the tools to manage their workforce, up to and including termination for a frequent violator of a relatively non-serious rule (*e.g.,* arriving late for work) if all the proposed criteria for for-cause termination have been met.

In response to criticisms both that the proposal was too complex and too vague, the Department recognizes that the complexity of administrative and management procedures will vary among employers. Procedures developed by a small family farm with two employees will look very different than those developed by a corporation with thousands of workers. Owing to these differences, as well as to the unique circumstances in different regions and industries, the Department opts to maintain flexibility in the regulations for employers to develop their own progressive discipline system and maintain supporting records. While many commenters interpreted this flexibility as being too vague, the Department continues to believe that this flexibility allows employers to develop and implement the systems that work best for their businesses. A progressive discipline system need not be overly complex to comply with the Department's definition. In its enforcement, the Department will accept progressive discipline and recordkeeping systems as compliant so long as they conform with the regulatory requirements described in § 655.122(n)(2)(ii) and 655.122(n)(4). Similarly, the Department declines to identify certain behaviors as being worthy of termination or not as it believes that the circumstances surrounding these behaviors is crucial to determine the appropriate action and this final rule provides the employer with the appropriate framework to make these determinations, including by allowing for immediate termination for egregious misconduct, discussed in greater detail below.

The Department disagrees with commenters who stated that the proposal, and particularly progressive discipline, is inappropriate for use in agricultural settings or by small growers. Use of progressive discipline, and maintenance of the associated records, permeates the employment landscape in the United States, including in agricultural industries. Some organizations supporting the agricultural industry writ large or specific agricultural sectors provide resources and guidance to assist agricultural employers to implement progressive discipline systems that may be adaptable to H–2A program requirements. Some employers already disclose progressive discipline policies in their job orders[50] and one anonymous employer commented that they already had a progressive discipline system. Similarly, a Departmental ALJ has previously held an employer liable for the three-fourths guarantee and transportation costs after finding that the employer terminated a worker without following the progressive discipline process that it disclosed in the job order.[51]

Some commenters characterized the recordkeeping provisions (especially pertaining to records of discipline that do not ultimately result in termination) as a significant portion of the perceived burden of the progressive discipline system. The Department emphasizes that recordkeeping need not be complex or take any particular format (although it should be understandable to the worker and to outside parties, such as WHD investigators). Therefore, the Department will accept recordkeeping in any format (*e.g.,* handwritten notes, computer spreadsheet, notation in worker file), so long as the content complies with the regulations. That is, the records must document each infraction and step of progressive discipline, any evidence the worker presented in their defense, any investigation related to the discipline, and any subsequent instruction afforded the worker, in compliance with § 655.122(n)(4)(ii). Additionally, the employer must provide a copy of this documentation (except for a record of any investigation related to the discipline) to the worker in a language understood by the worker within 1 week of the implementation of the disciplinary measure, in compliance with § 655.122(n)(4)(i)(E).

These records form an important part of the progressive discipline process; without the records, the employer would be unable to show the record of misconduct or failure to comply with

[49] *See* the NPRM for a more extensive analysis as to how the protections afforded by § 655.122(h)(2), § 655.122(i), and § 655.153 protect against adverse effect to the wages and working conditions of similarly employed workers in the United States and ensure that H–2A workers are only hired if there are insufficient workers who are able, willing, qualified, and available to do the work. *See* 88 FR 63781.

[50] See, *e.g.,* H–300–23035–750680: ''Violation of these rules will be disciplined as follows First offense: Oral warning and correction. Second offense: Written warning and unpaid leave for balance of day. Third/Final Offense: immediate job termination.'' H–300–22333–610058: ''The employer generally uses a 3-step disciplinary process: (1) verbal warning for first violation; (2) written warning for second violation; and (3) termination upon third violation. Certain violations are so severe that they may result in termination without prior warning.''

[51] *See In re John Peroulis & Sons Sheep, Inc.,* ARB Case No. 2013–0083, 2015 WL 4071576 (June 15, 2015), at *2, n. 5 (quoting the work contract as disclosing that ''[t]ermination may be carried out by the employer but only after *two written warnings* (not necessarily for the same offense). The warnings will be written in a language understandable to the worker and the worker will be given an opportunity to sign the warning. Termination may be carried out without first having issued any warning if the employee's offense is of a severe or emergency nature such as a threat to the life, safety and/or health of the worker, livestock, or others; or, is the intentional destruction of property.'') *See also In re John Peroulis & Sons Sheep, Inc.,* ALJ Case No. 2012–TAE–00006 (ALJ Mar. 19, 2013) (Order on Cross-Motions for Summary Decision); (ALJ June 27, 2013) (Decision and Order); re-issued on different grounds after remand (ALJ May 24, 2017) (Order on Remand).

performance expectations that ultimately resulted in the termination. While the Department recognizes many employers will be required to maintain disciplinary records even when workers are not terminated, these records are relevant for two reasons: (1) in case the misconduct or failure to meet performance standards eventually rises to the level or the frequency at which termination is necessary; and (2), to show consistent application of disciplinary procedures amongst the employer's agricultural workforce. These records may also provide the employer with exculpatory evidence if under investigation for illegally terminating a U.S. worker in violation of § 655.135(g), retaliating against a worker for engaging in a protected right in violation of § 655.135(h), or engaging in discriminatory behavior in violation of Federal or State anti-discrimination laws.

Comments on Specific Provisions

The paragraphs below describe and discuss the comments on specific provisions. In the NPRM, the Department did not propose substantive changes to language in § 655.122(n)(1) (which outlines the process for notifying authorities about the abandonment or termination for cause of a worker and the obligations of which the employer is relieved upon proper notification), but received one comment, and ultimately does not adopt changes to that paragraph in this final rule. The NPRM proposed in § 655.122(n)(2) to define termination for cause, establish six conditions to be satisfied in order for a termination for cause to exist, list reasons for termination that would not constitute termination for cause, and require the employer to bear the burden of demonstrating that any termination for cause meets these requirements. The Department received comments on these provisions, and this final rule clarifies the definition of termination for cause; finalizes five conditions, not six, that must be satisfied in order for a termination for cause to exist; clarifies among whom a policy, rule, or performance expectation must be consistently applied; adds a definition of egregious misconduct; lists additional reasons for termination that would not constitute termination for cause; and makes other minor edits as described in more detail below. The NPRM did not propose substantive changes to language in § 655.122(n)(3) (regarding when job abandonment begins), received one comment, and does not adopt changes in this final rule. The NPRM proposed some changes to recordkeeping obligations in § 655.122(n)(4) and received comments, and this final rule adopts the proposed language with a minor clarification.

Consequences for a Worker Terminated for Cause or Who Voluntarily Abandons Employment, § 655.122(n)(1)

The NPRM did not propose substantive changes to the language in this paragraph, which outlines the consequences for a worker who is terminated for cause or voluntarily abandons employment—namely, loss of access to the three-fourths guarantee; payment for outbound transportation; and, if a U.S. worker, the right to be called back for work the next year. Farmworker Justice suggested that the provision be expanded to require employers to ''call-back'' any H–2A workers who were not terminated for cause for the next year's contract. The Department declines to make this change as it did not propose any such revisions in the NPRM.

Definition of Termination for Cause, § 655.122(n)(2)

As described earlier in this section, the NPRM proposed that a worker would be terminated for cause when the employer terminates the worker for failure to meet productivity standards or for failure to comply with employer policies or rules. This final rule adopts the proposed regulation with modifications. Specifically, in this final rule, the Department removes the specific reference to ''productivity standards'' and defines termination for cause as occurring when the employer terminates the worker for failure to comply with employer policies or rules or satisfactorily perform job duties in accordance with reasonable expectations based on criteria described in the job offer.

Some commenters, including Northern Family Farms, LLP, McCorkle Nurseries, Inc., and NCAE, stated that the definition as proposed was too narrow because it did not allow for terminations for qualitative reasons. Commenters stated that qualitative evaluations are essential for an employer's ability to manage its workforce and hold workers to appropriate standards, and that growers producing fresh market produce (*i.e.,* produce for sale in the grocery store) are likely to emphasize quality of work over quantity produced, which would be measured by a productivity standard. MásLabor stated that the NPRM was ambiguous as to whether a failure to comply with employer policies or rules would allow for qualitative criteria.

The Department agrees with commenters that an employer's ability to manage their workforce by assessing work quality is essential. Not all work is quantifiable and, even when quantifiable, the quality of work performed may be of equal or greater importance than the speed at which it is performed. For example, a worker who harvests peaches such that every peach is bruised may not be performing up to the employer's standards, even if meeting outlined productivity standards. In the NPRM, the Department intended the term ''employer policies and procedures'' to include qualitative criteria for evaluation. However, commenters stated that the proposed regulatory language was unclear on this point. As such, the Department modifies the proposal to explicitly include qualitative criteria for evaluation, as explained more fully below. MásLabor also stated that it was reasonable for the Department to require employers to articulate in the job offer the standards by which workers are measured, including the level of skill and care exhibited in the performance of duties (*e.g.,* performing duties in a careful manner that protects the marketability of the crop). The Department agrees and has incorporated the agent's feedback into this final rule as described below.

The Department modifies the definition to allow for termination for cause if a worker fails to ''satisfactorily perform job duties in accordance with reasonable expectations based on criteria listed in the job offer.'' The Department intends for the term ''criteria'' to be broad and encompass the components of a job offer, including job qualifications and requirements as described in § 655.122(b), and job duties. If terminating a worker for failure to satisfactorily perform job duties, the employer must be able to identify the specific criteria described in the job offer upon which they are basing the termination. If a job duty is not included in the job offer, failure to satisfactorily perform that job duty is not a valid reason for termination for cause. The Department includes the term ''reasonable expectations'' in the regulatory text to allow for some flexibility in applying broad or general criteria. The Department uses the same definition of ''reasonable'' as discussed in the preamble corresponding with proposed § 655.122(n)(2)(i)(D).[52]

After consideration of these comments, the Department removes the explicit reference to productivity standards in the adopted regulatory language. However, if an employer uses productivity standards to evaluate employees or as a condition of job

[52] Proposed § 655.122(n)(2)(i)(C).

retention or both, that employer would be required to describe this standard as one of the criteria in the job offer to comply with both this section and § 655.122(l)(3).

MásLabor also suggested that the Department require that employers disclose behavioral attributes (such as not taking excessive breaks during productive hours, no loafing or recalcitrance, and an ability to maintain respectful and positive relations with supervisors and other workers) in the job offer when those attributes may serve as a basis for termination. The Department declines to make this change. The Department believes that such behavioral attributes better fit within the realm of policies and rules, and previously stated in the NPRM that policies and rules need not be disclosed in the job offer (although they must be clearly communicated to the workers). *See* 88 FR 63782. The Department continues to believe that it should not require all policies and procedures to be disclosed in the job offer, as policies and rules may be extensive and fill an entire sizable employee handbook. However, while the Department will not require it, an employer may include whatever policies and rules in the job offer that it deems appropriate, as long as they do not conflict with applicable law or regulation. As § 655.122(n)(2)(i)(A) requires that the worker be informed of the policy or rule, and § 655.122(n)(iv) states that the employer has the burden of showing that any termination for cause meets the requirements of paragraph (n)(2), inclusion of the policy or rule in the job offer will document to the Department's satisfaction that the worker was informed of the policy or rule, so long as the job offer was accurately communicated to the worker (usually via a copy of the work contract provided in compliance with § 655.122(q)). The Department notes that many job orders currently include policies and rules, such as policies pertaining to cell phone usage.

Conditions for Termination for Cause: Worker Knowledge, § 655.122(n)(2)(i)(A)

The first of these conditions is that the employee has been informed (in a language understood by the worker) of the policy, rule, or productivity standard, or reasonably should have known of the policy, rule, or productivity standard. The Department adopts the proposal with minor modifications for readability and conformance with changes to § 655.122(n)(2) as explained below.

There were no comments explicitly in opposition to this first criterion. Farmworker Justice emphasized that this criterion is critical to any termination for cause provision and provided numerous suggestions as to how to strengthen this provision. These suggestions included requiring employers to inform workers in a variety of formats to ensure accessibility—including using images to communicate to workers with low literacy skills and large font size and easy-to-read fonts for workers with visual impairments—and they stated that workers need the opportunity to ask questions. Farmworker Justice also suggested that all policies and rules be individually provided in writing to the workers, that policies and rules not be permitted to be communicated solely in meetings or via posters, and that the employer has the burden to show that it has a policy and that any union received a copy of the policy. Farmworker Justice also urged the Department to interpret ''reasonably should have known'' narrowly and place the burden on the employer to show why a worker reasonably should have known about any rules or policies that were not explicitly communicated. The Department declines to make further changes to the regulation as it believes that this final rule addresses many of the commenter's concerns as discussed below.

The regulation as proposed and as finalized requires that the worker be informed (in a language understood by the worker), or reasonably should have known, of the policy, rule, or performance expectation. If an employer informs a worker of a policy or rule in such a way that the worker could not reasonably be expected to understand, the Department will not consider that worker to be informed of the policy or rule. The Department will review on a case-by-case basis whether the worker reasonably could be expected to understand the policy or rule in the way that it was communicated. The Department declines to require employers to provide all policies and rules in writing and individually to workers. The Department appreciates the commenter's concerns that information provided in meetings may be unclear and that workers may be reluctant to review posters and expects that many employers will provide many policies and rules in writing (*e.g.,* in an employee handbook or a list of rules). However, the Department believes that verbal notices, meetings, and posters may be effective avenues for employers to communicate important information to workers, and sometimes may be more effective than dissemination of a written policy that the worker may not read. The Department will not consider a worker to be informed of a policy or rule if the communication occurs in a meeting where the worker is unable to hear or understand, or via a poster that workers are discouraged from reviewing or placed in a location that workers do not frequent. Additionally, the Department reminds employers that, in an investigation by the Department, WHD will confirm that the worker has been informed, or reasonably should have known, of the rule or policy—*i.e.,* the meeting or verbal notice occurred, the employer disseminated the written notification, or the employer posted the poster.

Additionally, the Department revises § 655.122(n)(2) to require that employers disclose in the job offer all criteria for evaluation, not just productivity standards. The work contract, which must be provided in writing no later than when an H–2A worker applies for the visa or the first day that a corresponding worker begins work, § 655.122(q), discloses the terms of the job offer and thus should include these criteria. The provision of this document while the H–2A worker remains in their home country allows them to review terms and conditions with trusted family, friends, or advisors. The Department believes that this will alleviate some of the commenter's concerns.

As stated in the preamble to the NPRM, if the employer does not explicitly communicate the policy or rule, the Department will review, in the event of a termination, on a case-by-case basis, whether a reasonable person would know that the policy or rule exists. For example, a reasonable person would know that conduct that is obviously illegal, such as unlawful sexual harassment or assault, can be a basis for discipline or termination. Similarly, a reasonable person would know that purposefully damaging the crop would be a basis for discipline or termination. *See* 88 FR 63782.

With respect to the suggestion that the regulation clarify that the employer has the burden of proof that it has informed workers of policies and rules, or that workers reasonably should have known of the policy or rule, § 655.122(n)(2)(iv), both in the NPRM and as adopted in this final rule, already communicates this. The Department declines to require an employer to provide any union with a copy of rules and policies as the Department believes that this would be a significant policy proposal warranting greater development and public feedback via the rulemaking process. However, a worker may share

documents related to their employment with whomever they wish, including unions, and an employer may not retaliate against a worker for having done so when such sharing constitutes protected activity under § 655.135(h) or is in furtherance of such protected activity. For example, if a worker seeks advice from a legal services provider or other representative regarding a proposed disciplinary action or deduction from wages, or consults with other workers regarding whether they are being paid the proper piece rate as required by the job order, such activity would be protected.

Conditions for Termination for Cause: Compliance Is Within the Worker's Control, § 655.122(n)(2)(i)(B) [53]

The Department proposed that the third criterion for termination for cause (second as adopted in this final rule) would require that compliance with the policy, rule, or productivity standard is within the worker's control. The Department adopts this proposal with a minor edit to change ''productivity standard'' to ''performance expectations'' to conform with edits to § 655.122(n)(2), and redesignates the paragraph as (n)(2)(i)(B).

No commenters explicitly opposed this criterion. Farmworker Justice asked the Department to provide additional details, examples, or both as to what would be evaluated to determine if compliance was within the worker's control. The Department will consider the following examples as illustrative of situations where compliance with a policy, rule, or performance standard may fall outside the worker's control: the appropriate tools or equipment are broken, faulty, or not provided; the crop is immature and not fully ready for harvest, but the worker is held to a productivity standard for a fully mature crop; workers are unable to meet productivity standards because of waiting time (*e.g.,* for fields to dry, or for the product to be weighed and measured); performance is evaluated on a per-crew basis instead of a per-worker basis, and a worker has no control over their coworkers' performances; and all residents of a housing unit are held responsible for housing policy violations committed by one worker. These examples are intended to be illustrative, not exhaustive.

Farmworker Justice also suggested that any disclosure of a productivity standard include a notice that workers with disabilities may request reasonable accommodation. The Department declines to make this change but will make referrals to the Equal Opportunity Employment Commission as appropriate. Additionally, the Department notes that employers must comply with all applicable Federal, State, and local laws and regulations during the period of employment that is the subject of the *Application for Temporary Employment Certification.* 20 CFR 655.135(e).

Conditions for Termination for Cause: Reasonableness and Consistent Application, § 655.122(n)(2)(i)(C) [54]

The Department proposed that the fourth criterion (third as adopted in this final rule) would require that the policy, rule, or productivity standard is reasonable and applied consistently. This final rule adopts this proposal with minor edits to change ''productivity'' to ''performance'' to conform with edits to § 655.122(n)(2), to confirm that consistent application must occur amongst the employer's H–2A workers and workers in corresponding employment, and to redesignate the paragraph as § 655.122(n)(2)(i)(C).

MásLabor stated that the term ''applied consistently'' left no room for consideration of degrees of severity in making termination decisions. MásLabor stated that true congruency in employment decisions is impossible because the contributing factors are so varied. They suggested that the Department strike the term ''applied consistently'' and add qualifiers that expressly allow for discretion, such as degree of severity, whether the infraction is a first offense or a repeat violation, and whether termination considered other infractions or performance issues.

The Department believes that it is reasonable to require an employer to apply rules, policies, and performance standards (both qualitative and quantitative) consistently among its workforce. It is fundamentally unjust to hold some workers to a standard or rule with which other workers are not required to meet or comply. However, the consequences of failure to comply with rules or standards may vary depending on the employer's progressive discipline policy as required by § 655.122(n)(2)(ii). The Department believes that the language as adopted affords employers the flexibility to consider these additional qualifiers that másLabor suggested, such as degree of severity and frequency of the offense, when determining the appropriate disciplinary measure. Two workers with equivalent disciplinary records who both are equally tardy, or who both have equally failed to meet performance standards, should be subject to the same or equivalent discipline (or no discipline), depending on the employer's procedures. On the other hand, a worker who is 45 minutes tardy may face different consequences than a worker who is 3 minutes tardy. Similarly, as long as any disciplinary actions are undertaken as part of progressive discipline, a worker who is tardy every day may face different consequences than a worker who is tardy for the first time, and a worker with a legitimate excuse for tardiness may face different consequences than a worker without an excuse. In these examples, the employer has consistently enforced a rule (that workers should not be tardy) but is considering legitimate factors (such as severity of the violations, frequency of the infraction, and explanation from the worker) when determining appropriate disciplinary consequences. A progressive discipline system of the type that the Department proposed and adopts here, where discipline involves graduated and reasonable responses to worker misconduct or failure to meet performance standards and where disciplinary measures are proportional to the misconduct or failure but may increase in severity if the misconduct or failure is repeated, actually requires the employer to make determinations of the type the commenter suggested. The Department believes that this comment demonstrates the importance of a progressive discipline system as well as recordkeeping; an employer may impose a severe disciplinary measure after a relatively minor infraction because of a history of other offenses, but must be able to produce a record of those offenses.

AILA, másLabor, wafla, and USA Farmers disagreed with the use of the term ''reasonable,'' saying that the term is too subjective. Farmworker Justice supported the provision, but recommended that the Department define how a rule, policy, or standard is reasonable. Farmworker Justice also suggested that the Department define housing rules as being reasonable only when the purpose is to preserve the safety and health of the workers. The Department believes that the term ''reasonable'' is appropriate and sufficient in this provision and therefore declines to modify the regulation, and provides additional explanation in this section.

The Department will consider a policy, rule, or performance expectation to be reasonable where it clearly represents the employer's permissible interests, meaning that the rule has a

[53] Proposed § 655.122(n)(2)(i)(C).

[54] Proposed § 655.122(n)(2)(i)(D).

clear relationship to the employer's legitimate business needs. This definition is consistent with how some State courts have interpreted the term ''reasonable'' in the context of unemployment benefits. *See, e.g., Best Lock Corp.* v. *Review Bd. of Ind. Dep't of Emp. & Training Servs.,* 572 NE2.d 520 (Ind. Ct. App. 1991); *Snyder Indus., Inc.* v. *Otto,* 321 NW2d 77 (Neb. 1982). For example, the Department will not consider housing rules to be reasonable if they are unrelated to safety, health, legal, or other legitimate interests of the employer. Farmworker Justice stated that some workers have been terminated for ''having too many cars at the labor camp''; the Department would not consider such a rule to be reasonable unless the employer can show that the number of cars at the labor camp affects the employer's legitimate interests.

An employer's interest will not be considered legitimate where it is contrary to Federal, State, or local law. For example, the Department will not consider rules to be reasonable if they unduly restrict workers' movement or communication in off-work time (*e.g.,* no cell phones permitted in the housing, or workers may only leave if escorted by a supervisor) or are discriminatory (*e.g.,* women—but not men—residing in housing must ensure that the residence is maintained in a clean and tidy manner). To be considered reasonable, it must also be possible to comply with a policy, rule, or performance expectation, meaning that a worker can feasibly follow the rule or policy, or meet the performance expectation, in the context of the specific circumstances. The Department will consider all facts of the situation when determining whether compliance with the rule, policy, or performance expectation is possible.

As stated earlier in this section, a requirement that rules and policies be reasonable and enforced consistently is not novel or unique to this final rule. Many State adjudicators examine the reasonableness and consistent enforcement of rules when determining when to award unemployment compensation, and selective enforcement of rules may also result in disparate treatment of similarly situated employees, thus indicating illegal discrimination. Even in the Department's H–2A enforcement, in the examples described earlier, lack of consistent application of rules or policies sometimes is used as evidence that the employer had terminated a worker not-for-cause. In other words, employers must already ensure that their rules are reasonable and consistently enforced.

Farmworker Justice encouraged the Department to codify in regulations that productivity standards must be static, quantifiable, and objective. The Department believes that clarification in the preamble is sufficient, and notes that productivity standards no longer appear in § 655.122(n) in this final rule (although they continue to appear in § 655.122(l)(3) and this topic is discussed further in the corresponding preamble). Some commenters, including IFPA, TIPA, GFVGA, NHC, Titan Farms, LLC, and an individual, commented that the term ''applied consistently'' was unclear in terms of the comparators (*i.e.,* among whom the rule should be consistently applied). Farmworker Justice suggested that the employer be required to show consistent applicability of a rule, policy, or standard across its corporate structure. This final rule clarifies that the rule, policy, or performance expectation must be applied consistently amongst the employer's H–2A workers and workers in corresponding employment. The Department believes that this is the appropriate class of comparators because these workers will be engaged in the same job duties at the same time. Policy and rule changes from year to year may occur, and therefore the Department does not think it necessary to require consistency over a longer period of time than that covered by an *Application for Temporary Employment Certification.* However, to the extent that workers do return year after year and encounter different policies, rules, and performance expectations, the employer should ensure the workers are aware of any changes to comply with § 655.122(n)(2)(i)(A). Where an employer has multiple *Applications for Temporary Employment Certification* and corresponding job orders covering different scopes of work at the same time, these groups of workers may be held to policies or performance expectations unique to the criteria listed in the job order (*e.g.,* a supervisor employed under one job order may be held to a different standard of conduct than a non-supervisor employed under a different job order, or a truck driver employed under one job order may be required to maintain a Commercial Driver's License whereas a harvester employed under a different job order may not). While the Department understands Farmworker Justice's desire for consistency in all levels of a corporate structure, such a requirement may require an employer to hold workers in very different positions to the same standard, potentially resulting in illogical outcomes and contradicting the requirement found in § 655.122(n)(2) of this final rule that performance expectations be based on criteria listed in the job order.

Finally, Farmworker Justice stated that the employer should bear the burden of showing that policies, rules, and standards are applied consistently. The Department believes that this requirement is already incorporated in the regulations in § 655.122(n)(2)(iii), which provides that ''the burden of demonstrating that any termination for cause meets the requirements'' in § 655.122(n)(2) falls on the employer.

Conditions for Termination for Cause: Fair and Objective Investigation, § 655.122(n)(2)(i)(D) [55]

The Department proposed that the fifth criterion (fourth as adopted in this final rule) would require that the employer undertake a fair and objective investigation into the job performance or misconduct. In this final rule, the Department adopts the language as proposed but redesignates the paragraph as (n)(2)(i)(D).

MásLabor stated that the terms ''fair'' and ''objective'' were unclear and subjective. MásLabor requested that, absent a clear, unambiguous, and easily enforced and understood definition, this provision should be removed. Farmworker Justice supported the Department's proposal, but similarly requested clarification on what constituted a fair and objective investigation. The Department believes that these terms are clear given their common meanings and are often used in law without definition. *See, e.g., O'Rourke* v. *City of Lambertville,* 963 A.2d 339 (N.J. Super. Ct. App. Div. 2008); *Adamovich* v. *Pa. Dep't of Pub. Welfare,* 504 A.2d 952 (Pa. Commw. Ct. 1986). A fair and objective investigation means that an employer will evaluate the job performance or misconduct impartially and without favoritism, and that it will not assume that the worker engaged in misconduct or failed to meet performance expectations before reviewing relevant facts.

Farmworker Justice also requested that the Department require specific steps in a fair and objective investigation, including informing the worker of the process; giving written notice of the allegations; and providing the worker an opportunity to provide information in response. The Department declines to make this edit, as these steps are covered in this final rule at § 655.122(n)(2)(i)(E), which provides a definition of progressive discipline that includes components

[55] Proposed § 655.122(n)(2)(i)(E) in the NPRM.

such as, among other things, notification, instruction by the employer, and opportunity to correct conduct. Finally, Farmworker Justice suggested that any fair and objective investigation include a worker interview with a competent interpreter, if necessary. Farmworker Justice noted that sometimes a supervisor with a biased viewpoint serves as interpreter in investigatory interviews. The Department does not believe that a worker interview will always be a necessary component of a fair and objective investigation, and therefore declines to expressly incorporate this requirement into the regulation. However, the Department cautions employers that, if it determines a supervisor acted in bad faith when interpreting (*e.g.,* by deliberately mistranslating a worker's explanation to paint the supervisor in a better light), the Department may conclude that the employer did not conduct a fair and objective investigation. Additionally, this final rule requires an employer to permit any worker engaged in agriculture as defined and applied in 29 U.S.C. 203(f) to designate a representative to attend any investigatory interview that the worker reasonably believes might result in disciplinary action (*see* § 655.135(m)), and this representative may serve as an interpreter.

Conditions for Termination for Cause: Progressive Discipline, § 655.122(n)(2)(i)(E) [56]

The Department proposed that the sixth criterion (fifth in this final rule) would require that the employer correct the worker's performance or behavior using progressive discipline. Additionally, the Department proposed to define progressive discipline as a system of graduated and reasonable responses to an employee's failure to meet productivity standards or failure to comply with employer policies or rules. The Department further proposed that disciplinary measures should be proportional to the infraction, but may increase in severity if the infraction is repeated, and may include immediate termination for egregious misconduct.

The NPRM also proposed that, prior to each disciplinary measure, the employer must notify the worker of the infraction and allow the worker to present evidence in their defense. Following each disciplinary measure, except where the appropriate disciplinary measure is termination, the employer must provide relevant and adequate instruction to the worker and afford the worker reasonable time to correct the behavior or meet the productivity standard following such instruction. The employer must document each disciplinary measure, the evidence the worker presented in their defense, and the resulting instruction, and must clearly communicate to the worker that a disciplinary measure has been imposed.

This final rule adopts this proposal with minor edits. Specifically, the Department edits ''productivity standard'' to ''performance expectation'' to conform with edits to § 655.122(n)(2), defines egregious misconduct in the regulation, clarifies that the infraction must be documented, and requires that the employer must provide a copy of documentation to the worker within one week of the disciplinary measure. Also, this final rule combines two separate paragraphs in the NPRM into one paragraph at § 655.122(n)(2)(i)(E). The Department received a substantial number of general comments, summarized above, both in support and in opposition to the inclusion of a progressive discipline condition. Comments on the regulatory language and specific components of a progressive discipline system are discussed in this section.

Farmworker Justice stated that an employer's progressive discipline policies should articulate steps with specific examples of proportionality regarding common rule violations, such as tardiness. Farmworker Justice also stated that the Department's regulations should require consideration of mitigating and extenuating circumstances and list out the types of egregious behavior that could lead to immediate termination and the mitigating factors that must be considered. The Department declines to incorporate additional requirements for an employer's progressive discipline system into the regulation. As previously mentioned, the Department opts to maintain flexibility in the regulations for employers to develop their own progressive discipline system that may include consideration of mitigating and aggravating factors and maintain supporting records. The Department believes that this flexibility protects workers while allowing employers to develop and implement the systems that work best for their businesses.

Farmworker Justice also suggested specific steps for a progressive discipline policy, including the requirements that an employer document each step in writing; prepare all documents contemporaneously; provide all documents to the worker within a short period of time; provide documentation to a worker union; communicate the consequences of any future misconduct or failure to meet performance standards; and provide a contemporaneously created written notice to the worker. Sections 655.122(n)(2)(i)(E) and (n)(4) in this final rule already require an employer to document each disciplinary measure. The Department modifies § 655.122(n)(2)(i)(E) in this final rule to require an employer to provide a copy of the resulting documentation to the worker, in a language understood by the worker, within 1 week of the implementation of the disciplinary measure. Even if the disciplinary measure is a verbal warning (which is often the first step of a progressive discipline system), the regulations (both as proposed and as adopted) require the employer to later document that verbal warning. Therefore, it should not be overly burdensome to provide a copy of that documentation to the worker, although additional time may be required to translate the documentation. Additionally, the Department believes that 1 week is sufficient time for any relevant instruction to be provided or planned. Because of this change, the Department removes the regulatory requirement that the employer must ''clearly communicate to the worker that a disciplinary measure has been imposed,'' as the provision of such documentation will communicate this concept.

The Department declines to modify the regulations to require that documentation be maintained contemporaneously. Some corrections in the field will be verbal and, therefore, may not be documented until a manager or foreperson returns to the office that evening or the next day. Therefore, these records would not be created ''contemporaneously'' in the strictest definition of the term. However, the requirement that documentation be provided to the worker within 1 week means that documentation must be created within 1 week. The Department will view with great skepticism any documentation of disciplinary records that occurs significantly after the infraction occurs.

The Department declines to require an employer to provide any union with a copy of disciplinary documentation as this would be a significant policy proposal warranting greater development and public feedback via the rulemaking process. However, the worker may share their own disciplinary records with whomever they wish, and an employer may not retaliate against the worker when such

[56] Proposed § 655.122(n)(2)(i)(F) and (n)(2)(ii).

sharing constitutes protected activity under § 655.135(h) or is in furtherance of such protected activity, as described above. The Department also declines to require that the employer communicate the consequences of any future rule or policy violation. The consequences for a future rule or policy violation may vary depending on, for example, the severity of the future infraction. Therefore, an employer may not be able to communicate with certainty the appropriate next step in the progressive discipline process until the infraction or failure to meet performance standards occurs. However, the Department encourages employers to maintain as transparent a process as possible, and notes that employers may communicate to workers what the consequences would be for any future infraction if it has already determined what those consequences would be (*e.g.,* if behavioral issues are so extensive and well documented that any future infraction, regardless of severity, will result in termination). This communication would constitute instruction to the worker as required by § 655.122(n)(2)(i)(E).

In the preamble to the NPRM, the Department identified egregious misconduct as ''behavior that is plainly illegal or that a reasonable person would understand as being offensive, such as violence, drug or alcohol use on the job, or unlawful assault, as opposed to failure to meet performance expectations or productivity standards.'' 88 FR 63783. However, the Department did not include a definition of egregious misconduct in the proposed regulatory text of the NPRM. FLOC suggested that the Department define egregious misconduct in the regulations so that it is ''limited to instances of serious or gross misconduct, such as those involving violence, threats of violence or willful destruction of property.'' The Department agrees that a regulatory definition of egregious misconduct is useful and has added a definition to § 655.122(n)(2)(i)(E) in this final rule. This definition included in this final rule is similar to what the Department included in the preamble to the NPRM, but provides additional detail. Specifically, the Department defines egregious misconduct as intentional or reckless conduct that is plainly illegal, poses imminent danger to physical safety, or that a reasonable person would understand as being outrageous. The Department believes that this definition is sufficiently broad so that it will encompass all circumstances for which the appropriate discipline for a first-time offense is termination, but narrow enough that workers who commit minor infractions, or who commit infractions unintentionally and in a manner that cannot be considered reckless, will continue to be entitled to the progressive discipline protections in § 655.122(n)(2)(i)(E). Importantly, failure to meet performance expectations will never constitute egregious misconduct. The Department also emphasizes that an employer terminating a worker for cause for egregious misconduct must meet all other conditions outlined in § 655.122(n)(2)(i)(A) through (D) of this final rule.

As with the description of egregious misconduct in the preamble to the NPRM, the definition in § 655.122(n)(2)(i)(E) of this final rule includes conduct that is plainly illegal. Examples of plainly illegal conduct include battery and sexual assault.

The description of egregious misconduct in the NPRM preamble included conduct that a reasonable person would understand as being grossly offensive. In § 655.122(n)(2)(i)(E) of this final rule, the Department has clarified this definition by breaking it into two parts: conduct that poses imminent danger to physical safety, and conduct that a reasonable person would understand as being outrageous. Conduct that poses imminent danger to physical safety is behavior that could reasonably be expected to cause death or serious physical harm either to the worker or to others if not immediately stopped. An example of conduct that poses imminent danger to physical safety is a worker operating heavy machinery while drunk. Conduct that a reasonable person would understand as being outrageous is conduct that a reasonable person would understand as going beyond all possible bounds of decency to be regarded as atrocious and utterly intolerable. Examples of conduct that is outrageous include severe sexual harassment and racial harassment, and intentional destruction of property.

This definition of egregious misconduct also includes a requirement that the conduct be intentional or reckless. This aspect of the definition is important to ensure that workers are not penalized with immediate termination for cause for unintentional errors, unless those errors are so careless and without regard for safety, decency, or the law that the worker's judgment cannot be trusted in the future.

The Department also makes minor changes to this section for readability and to clarify that any documentation of the disciplinary measure must also record the infraction.

Conditions for Termination for Cause: Disclosure of Productivity Standards in the Job Order, Proposed § 655.122(n)(2)(i)(A).

The NPRM proposed that the second criterion for termination for cause would require that where termination is for failure to meet a productivity standard, such standard must be disclosed in the job offer. The Department does not adopt this proposal as it is now substantively included in the definition of termination for cause found in § 655.122(n)(2). Any comments are discussed in the preamble corresponding with that section and with § 655.122(l)(3).

Termination for Reasons That Are Not For-Cause, § 655.122(n)(2)(iii)

The NPRM proposed four different reasons that could never be considered termination for cause, including where the termination is contrary to law; for an employee's refusal to work under conditions that the employee reasonably believes will expose them or other employees to an unreasonable health or safety risk; because of discriminatory reasons; or where the employer failed to comply with its obligations under proposed § 655.135(m)(4) (finalized as § 655.135(m)) in an investigatory interview that contributed to the termination. This final rule adopts the proposal with minor modifications. Specifically, the Department adds ''familial status'' and changes ''citizenship'' to ''citizenship status'' as reasons for which an employer may not discriminate. The Department also changes ''meeting'' to ''investigatory interview'' to conform with changes to § 655.135(m).

Farmworker Justice suggested that the Department provide further clarifying examples as to where the termination is contrary to a Federal, State, or local law. The Department would consider terminations to be contrary to applicable law where, for example, the termination is in retaliation for the worker filing for workers' compensation benefits; in retaliation for a worker taking leave to which they are entitled by law; and for refusal to take a lie detector test. Farmworker Justice also recommended that ''citizenship'' be replaced with ''citizenship status,'' and that ''family status'' be added. This final rule uses the term ''citizenship status'' because this term is used in 8 U.S.C. 1324b(a) prohibiting discrimination. This final rule also adds that discriminatory termination based on familial status will not be considered for cause; this change is consistent with State law in many

States [57] and the Department believes that workers should not be penalized for (or for not) being married or having children. Moreover, discriminatory termination based on familial status would not constitute a for-cause termination because it would not have a clear relationship to the employer's legitimate business needs. The Department also reminds employers that any termination that does not meet the standards in § 655.122(n)(2)(i) of this final rule will not be considered a for-cause termination, even if that termination is not for a reason explicitly prohibited in § 655.122(n)(2)(ii).

Farmworker Justice made a few suggestions that the Department declines to adopt for various reasons. Specifically, Farmworker Justice recommended that the Department clarify that termination is not for cause when done in retaliation against workers seeking improvements in worker housing. The Department declines to make this edit because this right exists under H–2A anti-retaliation regulations at § 655.135(h). Farmworker Justice also suggested that termination would not be for cause where the employer failed to comply with progressive discipline process. The Department believes that this final rule is already clear that termination for cause does not exist without progressive discipline (*see* finalized § 655.122(n)(2)(i)(E)). Farmworker Justice additionally suggested that the Department clarify that termination is not for cause where the employer has failed to provide reasonable accommodations required by the ADA and other State and Federal laws. The Department declines to make this edit because this final rule already states that a termination that is contrary to a Federal, State, or local law will not be considered for-cause.

Finally, Farmworker Justice suggested that the Department clarify, either in regulations or in other guidance, that refusing to lift excessive weight cannot be the basis for termination for cause because OSHA guidance recommends that workers not lift more than 50 pounds without assistance. The Department declines to make this edit because OSHA does not have a standard limiting how much a person may lift or carry; rather, the National Institute for Occupational Safety and Health (NIOSH) has a mathematical equation for calculating a recommended weight limit for one person, which is a maximum of 51 pounds.[58] Given that this is a recommendation, not a requirement, and because agriculture often involves heavy lifting, the Department declines to explicitly state that refusing to lift weight in excess of 50 pounds cannot be the basis for termination for cause. However, WHD may still review, in the course of an investigation, whether a worker has refused to lift weight because they reasonably believed that doing so would expose them to an unreasonable health and safety risk.

The Employer Bears the Burden of Demonstrating That any Termination for Cause Meets Requirements, § 655.122(n)(2)(iv)

The Department proposed that the employer bear the burden of demonstrating that any termination for cause meets the requirements of § 655.122(n)(2). No comments necessitated changes to the regulatory language, but the Department makes one non-substantive edit for readability, specifically replacing ''of this'' with ''in.'' Many agents, associations, and employers, including IFPA and GFVGA, opposed this provision, but did not provide a reason other than stating that employers did not terminate their employees to evade regulatory requirements. The California LWDA supported this provision because it aligned with their State policy and because the employer is the entity that drafts and implements the rules underlying the factors for termination.

Abandonment, § 655.122(n)(3)

The NPRM did not propose changes to regulatory language but proposed to redesignate the language describing abandonment in current paragraph § 655.122(n) to a new paragraph § 655.122(n)(3). The Texas Cotton Ginners' Association submitted comments suggesting that abandonment occur sooner than 5 days without reporting to work, but as the Department did not propose changes beyond renumbering, it did not consider this comment. The Department adopts the proposed redesignation in this final rule.

Recordkeeping, § 655.122(n)(4)(i)–(iii)

The NPRM proposed that, in addition to the records of notification of termination for cause or abandonment, the employer maintain disciplinary and termination records. This final rule adopts the proposal with minor edits for clarity. Specifically, in paragraph § 655.122(n)(4)(i), the Department clarifies that the employer must document the infraction in addition to each step of progressive discipline. All comments on this provision are covered in the section describing general comments.

C. Application for Temporary Employment Certification Filing Procedures

1. Section 655.130, Application Filing Requirements

a. The Department Proposes To Require Enhanced Disclosure of Information About Employers: Owners, Operators, Managers, and Supervisors

The Department proposed to expand its collection of information about employers and the managers and supervisors of workers at places of employment by collecting additional information about the owner(s) of agricultural businesses that employ workers under the H–2A Application, the operators of the place(s) of employment identified in the job order, and the managers and supervisors of the workers performing labor or services at those place(s) of employment. OFLC currently requires an employer to disclose information about the identity of the employer and its agent or attorney; the places where work will be performed; and, when requested by the CO, the employer's use of a foreign labor recruiter. *See* § 655.135(k); Form ETA–9142A; Form ETA–790A; Form ETA–790A, *Addendum B.* Obtaining this information is necessary for the Department to assess the nature of the employer's job opportunity, monitor program compliance, and protect program integrity. For example, employers must identify in the H–2A Application and job order all places of employment and provide identifying information like the FEIN and DBA name on the Form ETA–9142A, Form ETA–790A, and Form ETA–790A, *Addendum B.*

In the NPRM, the Department proposed to require that each prospective H–2A employer, as defined at 20 CFR 655.103(b), provide the following information in relation to the owner(s) of each employer, any person or entity (if different than the employer(s)) who is an operator of the place(s) of employment, including an H–2ALC's fixed-site agricultural business client(s), and any person who manages or supervises the H–2A workers and workers in corresponding

[57] *See, e.g.,* 775 Ill. Comp. Stat. 5/1–102(A), 5/1–103(Q) (prohibiting employment discrimination based on marital status); Minn. Stat. § 363A.08 (prohibiting employment discrimination based on marital status and familial status).

[58] OSHA, *OSHA procedures for safe weight limits when manually lifting, https://www.osha.gov/laws-regs/standardinterpretations/2013-06-04-0* (last accessed Feb. 8, 2024), and NIOSH, *NIOSH Lifting Equation App: NLE Calc, https://www.cdc.gov/niosh/topics/ergonomics/nlecalc.html* (last accessed Feb. 21, 2024).

employment under the H–2A Application: full name, date of birth, address, telephone number, and email address.

The Department also proposed to revise the Form ETA–9142A to require that the employer provide additional information about prior trade or DBA names the employer used in the 3 years preceding its filing of the H–2A Application, if any, rather than collecting only the DBA name the employer currently uses. Accordingly, the Department proposed to revise and restructure § 655.130 by adding four new paragraphs, (a)(1) through (4), to specify the information employers must provide at the time of filing an H–2A Application.

In a new paragraph (a)(1), the Department proposed to retain the first sentence currently in § 655.130(a), which addresses the H–2A Application and supporting documentation the employer must submit. The Department proposed to move the second sentence of § 655.130(a), which contains language regarding collection of the employer's information—*i.e.,* FEIN, valid physical location in the United States, and means of contact for recruitment—to proposed paragraph (a)(2). In paragraph (a)(2), the Department proposed to explicitly require disclosure of the employer's name and the additional employer information collection the Department proposed to require (*i.e.,* the identity, location, and means of contact for each owner). Proposed paragraph (a)(3) required the employer to provide the identity, location, and contact information of all persons or entities who are operators of the place(s) of employment listed in the job order, if different from the employer(s) identified under paragraph (a)(2), including an H–2ALC's fixed-site agricultural business client(s) who operate the place(s) of employment where the workers employed under the H–2A Application will perform labor or services. In addition, proposed paragraph (a)(3) required the employer to provide the identity, location, and contact information of all persons who will manage or supervise H–2A workers and workers in corresponding employment under the H–2A Application at each place of employment.

Proposed paragraph (a)(4) required the employer to continue to update the information required by the above paragraphs until the end of the work contract period, including extensions thereto, and retain this information post-certification and produce it upon request by the Department. To effectuate proposed § 655.130(a)(4), the Department proposed a new record retention paragraph at § 655.167(c)(9) that would require the employer to retain the information specified in paragraphs (a)(2) and (3) of § 655.130 for the 3-year period specified in § 655.167(b).

The Department received comments both in support of and opposed to the proposed information collections from Federal elected officials, labor unions, workers' rights advocacy organizations, individuals, employers, trade associations, farm bureaus, and agents. After consideration of all comments, the Department is finalizing the proposals with minor changes, as explained below.

The Department received comments in support of the proposal from elected officials, workers' rights advocacy organizations, and labor unions. A joint comment from 15 U.S. Senators supported the proposed information collection as a way to ''strengthen protections against abusive third parties by enhancing DOL's enforcement capabilities against supervisors, contractors, joint employers, successors in interest, and others who coordinate so closely with employers that they should be considered a single employer.'' Some workers' rights advocacy organizations, UFW Foundation, CAUSE, UMOS, and PCUN, and a couple of other advocacy organizations, Green America and the North Carolina Justice Center, asserted the proposal would provide the Department ''more understanding of [an employer's] operation and seasonality of it, and ultimately, the ability to take enforcement actions against more people who are taking part in abusive and unlawful activities, including successors in interest.'' UFW included worker accounts of various abuses by agents, crew leaders, and foremen, including sexual assault, retaliatory pretextual terminations, withholding of food and water, and various types of threats against workers, and believed the proposed information collection would aid enforcement related to these egregious violations.

Farmworker Justice supported the proposed information collections as a necessary means to carry out vital program integrity and worker protection responsibilities. They cited numerous examples of debarred employers reconstituting with owners and managers switching roles to avoid enforcement, including cases in which family members have applied for certification for the benefit of another family member and owner of a debarred employer. They supported the collection of owner information, asserting it would be ''obviously useful in detecting fraud in the H–2A program, as it would allow the Department to more easily detect instances in which a single owner/operator uses multiple business entities in an attempt to skirt H–2A regulations or to continue seeking H–2A workers despite having been debarred.'' They believed the proposed information collections would assist in identifying employer reconstitution to subvert the law because ''[o]verlapping management with the debarred employer is a giveaway'' that the employer has ''attempt[ed] to evade debarment by rebranding'' and ''obfuscat[ing] management structure.'' Farmworker Justice and the Agricultural Worker Project of Southern Minnesota Regional Legal Services commented that the manager and supervisor information would permit the Department to ''scrutinize whether the principals or managers of those entities [filing for labor certification] are family members of recently debarred entities.'' Farmworker Justice also believed the proposals would assist the Department in conducting the single employer test at the filing stage because, they asserted, employers ''often use overlapping job orders from two separate but jointly-owned and operated entities, so that the employer can keep H–2A workers at their place of employment year-round on alternating job orders.'' Finally, Farmworker Justice supported the collection of fixed-site grower information, asserting it is ''useful in preventing the displacement of US workers by H–2A workers, particularly when a grower that employs domestic workers begins outsourcing its labor to an H–2ALC,'' in which case ''it is impossible for the workers (or worker advocates) to determine whether the fixed-site grower is using H–2A workers because the grower's name never appears at all on the job order or supporting documentation.'' The Department values and appreciates these commenters' support and their informed perspectives on the need for and potential impact of the proposal.

In contrast, the Department received many comments from employers, trade associations, agents, a public policy organization, and an immigration lawyers' association expressing opposition to the proposal as an unnecessary breach of privacy that would expose employers to litigation risk, potentially expose the private information of employees to the public, and impose an unreasonable and unjustified information production burden at the filing stage.

Many comments from employers, agents, and trade associations asserted the Department failed to provide a

''rational basis'' to conclude it needed the additional information, showing only that the information is helpful, not necessary. USA Farmers asserted the Department provided ''no statutory authority for this extreme invasion of personal privacy and dramatic departure from the decades of operation of the H–2A program,'' the information is ''not necessary or reasonable to further any legitimate purpose,'' and the Department ''fail[ed] to provide any data whatsoever that describes the magnitude of the supposed problem it claims to be addressing.'' An employer, Willoway Nurseries, and several trade associations, including AmericanHort, Michigan Farm Bureau, and USApple, more specifically asserted the info collection proposal is ''onerous and unnecessary to catch the 32 employers debarred from the H–2A program from reconstituting as another employer.'' USA Farmers asserted the Department need not collect this information at the filing stage because ''during an investigation of an H–2A employer, the Department already routinely . . . collects information on any other businesses the employer operates.''

Similarly, másLabor asserted that the Department did not ''offer any compelling reason why this information ought to be disclosed on the H–2A application itself, rather than merely as a document retention requirement on par with payroll and earnings records.'' Several trade associations—including AmericanHort, NCFC, FSGA, and FFVA—and Willoway Nurseries objected to collection of ''information of all managers and supervisors'' specifically, asserting it ''is unnecessary at the application stage of the H–2A program and is easily and regularly attainable at the enforcement stage of the H–2A program.'' NHC added that employers who refuse to produce the information during a later investigation face consequences and this should be sufficient incentive.

While the Department appreciates the comments, the Department disagrees with employer, trade association, and agent assertions that the NPRM failed to explain the Department's need for this information generally or, specifically, its need for the information at the time the employer files the H–2A Application. As discussed above, as part of its review of an application, OFLC assesses whether the employer has a temporary or seasonal need for workers, including whether two facially distinct employers are a single employer, and the Department is authorized to enforce ''employer compliance with terms and conditions of employment'' in the H–2A program. 8 U.S.C. 1188(g)(2). The Secretary has delegated the responsibility of issuing temporary agricultural labor certifications to OFLC [59] and has delegated responsibility for enforcement of the worker protections to the WHD Administrator.[60] The information the Department collects through the Form ETA–9142A, *H–2A Application for Temporary Employment Certification,* and all required supporting documentation, constitutes the information necessary for the Department to assess an employer's need and whether there is an insufficient number of qualified U.S. workers who are available to fill the employer's job opportunity, and that the wages and working conditions of workers in the United States similarly employed will not be adversely affected by the employment of H–2A workers. The Department also may use this information in post-adjudication audit examinations or in program integrity proceedings (*e.g.,* revocation or debarment actions) or in both, and WHD or other enforcement agencies may request this information from OFLC during an investigation or enforcement proceedings.

The NPRM explained that the new collections of information about owners, operators, managers, and supervisors would allow the Department to gain a more accurate and detailed understanding of the scope and structure of the employer's agricultural operation, which is essential to the Department's fulfillment of various obligations in the administration and enforcement of the H–2A program. The Department noted the additional information would enhance its enforcement capabilities by helping the Department identify, investigate, and pursue remedies from program violators; ensure that sanctions, such as debarment or civil money penalties, are appropriately assessed and applied to responsible entities, including individuals and successors in interest when appropriate; and determine whether an H–2A employer subject to investigation has prior investigative history under a different name. For example, contact information for owners, operators, and supervisors will assist the Department in locating the employer and workers for the purposes of conducting an investigation, presenting findings (either verbally or in a written determination) and obtaining payment for back wages and civil money penalties following a final order of the Secretary. OFLC also may use this information in post-adjudication audit examinations or in program integrity proceedings (*e.g.,* revocation or debarment actions) or in both. The information will help OFLC verify that persons representing employers both in the labor certification process and in the process of recruiting, managing, or supervising workers are acting on behalf of the employers within the scope of the terms and conditions of the labor certification and any contracts or agreements with employers, and in compliance with the revised regulations and all employment-related laws, such as laws prohibiting discrimination, retaliation, or the imposition of unlawful recruitment or visa-related fees. The new information collections will also facilitate interagency information sharing and permit OFLC and WHD to share relevant identifying information with other agencies when necessary to aid an investigation or enforcement action.

The NPRM also explained the Department's need to collect the information at the time the employer files the H–2A Application, rather than require production of this information only in the event of an investigation or audit, and the Department will expand on those reasons here. During the application process, the new information collections will assist the Department in determining whether the employer has demonstrated a bona fide temporary or seasonal need, or, conversely, whether an employer has, through multiple related entities, sought to obtain a year-round H–2A labor force. As the Department noted in more detail above in the preamble to § 655.103(e) *Definition of single employer for purposes of temporary or seasonal need and contractual obligations,* some employers divide their business such that it appears two separate entities are each requesting a temporary agricultural labor certification when, in fact, the workers are in the same AIE engaged in the same job opportunity for longer than the attested period of need on any one application. Having information about the owners, operators, and managers at the filing stage will assist the Department in detecting potential nominally distinct employers who are acting as a single employer. It will also greatly assist the Department in discovering if an employer is acting as a single employer with a debarred non-petitioning entity, as the Department will already have the debarred entity's

[59] *See* Secretary's Order 06–2010, *Delegation of Authority and Assignment of Responsibility,* 75 FR 66268 (Oct. 27. 2010).

data on record. As stated above in the preamble to § 655.103(e), the Department considers the totality of the circumstances surrounding the relationship among the entities, and no one singular detail—such as having the same owner—is determinative in the analysis.

The NPRM further noted that collection of prior DBA names and identifying information for people other than the employer at the time of filing would make it easier for OFLC and WHD to search across applications within a filing system database to identify instances in which employers have changed names, or roles, to avoid complying with program regulations or avoid monetary penalties or serious sanctions such as program debarment. The Department noted the information collected about owners, operators, and supervisors provided at the application stage may assist the Department to identify whether an individual or successor in interest should be named on any determination and therefore subject to any sanctions or remedies assessed. Although the NPRM did not provide ready data, it explained that in the experience of the Department, some H–2A employers have sought to avoid penalties and continue participating in the program despite having been debarred by reconstituting as a new legal entity while ultimately retaining the underlying business that was debarred from the H–2A program. Commenters including Farmworker Justice and the Agricultural Worker Project of Southern Minnesota Regional Legal Services also provided specific examples of entities that have evaded debarment under the current regulations through reconstituting under a different corporate entity with reshuffled ownership, as noted above and in the preamble discussing the Department's revisions to the successor-in-interest provision. In an audit or investigation of an employer, this information will allow the Department to better identify those persons with a financial stake in the certified H–2A employer. Collecting this information from all applicants at the time of filing, rather than only collecting this information during an audit or investigation, can be useful for other similar purposes as well, such as identifying instances when an H–2ALC Application indicates it is supplying an H–2A workforce to a debarred employer during the debarment period.

As previously mentioned, some trade association commenters supported collection of owner data as a means to prevent debarred employers from reconstituting to evade the law, but TIPA, McCorkle Nurseries, Inc., Titan Farms, LLC, and IFPA asserted the Department failed to provide a sufficient definition of owner and expressed concern that the ''complex ownership structure'' common to many agricultural operations due to high capital costs would make it difficult to provide information on owners and operators. Titan Farms, LLC, IFPA, and NHC asserted the Department's ''failure to provide an adequate definition of what operator, manager, and supervisor would include'' prevented ''meaningful comment'' on the proposal. Commenters including Titan Farms, LLC, IFPA, TIPA, U.S. Custom Harvesters, Inc., and Demaray Harvesting and Trucking, LLC similarly opposed collecting information about owners because it would place an ''extensive administrative burden on employers'' due to the imprecise definition of owner, complex ownership structure of many operations, and a potential requirement to include even landowners, rather than business owners.

NHC, Titan Farms, LLC, and IFPA expressed concern that the Department would require employers to collect information on leaseholders, shareholders and other investors, and other types of ''owners'' in various ownership situations, for which the Department has no need. AmericanHort and NCFC similarly expressed concern they would have to disclose information about silent partners and minority shareholders. Commenter including Titan Farms, LLC, IFPA, and NHC expressed concern that the Department would require disclosure of information on owners who ''do not have a controlling interest or are [not] involved in any way with business decisions, including workforce decisions.'' USA Farmers similarly asserted collection of ownership information would be particularly burdensome if the collection includes ''an owner who may have no involvement in the operation of the company'' and USApple added that ''[m]inority owners and other investment groups will have very little knowledge of the day-to-day business practices, and some invest in multiple entities.'' USApple expressed concern the Department would require disclosure of landlords if an association member rented land on which the business operates, which would be unnecessary because the landlord has no ''information or authority over the operation.'' MásLabor urged the Department to clarify how it expects employers to disclose owner information if the place of employment is ''owned by a consortium of investors and entities, including multinational corporations and conglomerates with complicated business structures.'' MásLabor also asked the Department to clarify how it expects employers to disclose this information if the place of employment is ''owned by a private equity group'' or ''[a] multinational conglomerate with layers of holding companies and subsidiaries.''

U.S. Custom Harvesters, Inc. and Demaray Harvesting and Trucking, LLC asserted the ownership disclosure requirement would be particularly burdensome for custom combine employers who only have information for a client's point of contact and ''do not have access to additional information about that farm's ownership structure'' because these employers ''provide services for multiple farm owners and operators'' while ''operat[ing] on a disclosed itinerary.'' Demaray Harvesting and Trucking, LLC asserted the disclosure requirement would be particularly burdensome for farm labor contractors, because they do not have information about the full ownership structure of every employer to which they provide labor.

Some commenters, including Michigan Asparagus Advisory Board and an individual commenter, expressed similar concerns about the Department proposal to collect the name, date of birth, and contact information for managers and supervisors of H–2A workers. Titan Farms, LLC, IFPA, NHC, and TIPA expressed concern the proposal would require employers to disclose information on ''potentially hundreds'' of employees, ''depending on the size of the operation.'' Western Range Association asserted the disclosure requirement would be particularly burdensome for employers of workers in herding and production of livestock on the range because many of these employers ''operate on publicly-owned ground'' and a requirement to ''collect and track the names of every manager of the [Bureau of Land Management], Forest Service, State Government, or municipality would be difficult if not impossible. The records the employers would need to retain would be abundant and unreasonable to keep up to date.''

Titan Farms, LLC, IFPA, NHC, and TIPA expressed concern that the duty to update this information would impose a substantial burden due to high ''turnover rate within agriculture.'' USApple expressed concern about potential enforcement or other ''ramifications for not having listed an individual due to employment changes

during processing'' of the H–2A Application.

Willoway Nurseries and several trade associations, including Michigan Farm Bureau, FSGA, FFVA, and NCFC, also expressed concern about the Department's burden estimate calculations. Specifically, AmericanHort expressed concerns that the Department's ''analysis under both of those acts of impact and burden is drastically low'' and a ''gross underestimation,'' which it asserted ''is evidenced by the Department's claim that small businesses will be faced with a mere one-time cost of $54.00 to familiarize themselves with this rulemaking, and only $108.00 to complete the new application with all owner, manager, and supervisor information.''

The Department also received a comment from Farmworker Justice that suggested several changes to strengthen the proposed provisions in this final rule. Farmworker Justice expressed concern that the NPRM did not propose to ''collect information for fixed-site growers who may not be joint employers of the H–2A workers'' and did ''not require the applicant to list the actual business name of the operator of the fixed-site location, their trade names, or the names of owners.'' Farmworker Justice urged the Department to require employers ''provide information for all owners and operators of fixed-site locations at which workers will perform work'' to collect the DBA, business name, and owner name for all fixed-site places of employment, which Farmworker Justice asserted would be ''obviously useful in detecting fraud in the H–2A program, as it would allow the Department to more easily detect instances in which a single owner/operator uses multiple business entities in an attempt to skirt H–2A regulations or to continue seeking H–2A workers despite having been debarred.'' Farmworker Justice also suggested the Department should require employers to ''submit information detailing exactly what workers performed the work at the fixed-site in the previous year, how they were recruited for those jobs, and what efforts have been undertaken to pursue those recruitment avenues in the current year,'' which they asserted would prevent employers from using an H–2ALC to avoid the requirement to contact its former U.S. workers.

Farmworker Justice further urged the Department to revise paragraph § 655.130(a)(2) to ''provide that the applicant must include information for *all* employers.'' Farmworker Justice also urged the Department to collect additional information, including information about: (1) transportation providers, to better ensure they are properly licensed; (2) workers' compensation policyholders, so the Department knows whether the policyholder is a professional employer organization, in which case DOL should ''follow up with the employer to ensure that coverage extends to workers in transit during the entire period of the clearance order''; (3) information about owners and operators of housing, to ''allow workers and worker advocates to better understand whether the housing is in compliance''; and (4) ''additional information from first-time employers and fixed-site growers'' about their positive recruitment efforts prior to using the program, to ensure the employer does not alter this recruitment to avoid hiring U.S. workers in favor of H–2A workers. Finally, Farmworker Justice emphasized the need for the Department to collect and analyze information indicating family relationships in multiple filings for program integrity and enforcement purposes.

The Department appreciates and agrees with comments indicating a need for the Department to more clearly define the type of owner information sought and to clarify the level of due diligence expected of employers when providing this information, and the information related to supervisors and managers. The definitions of the terms ''owner'' and ''operator,'' as well as the terms ''supervisor'' and ''manager,'' are included in the Paperwork Reduction Act (PRA) information collection request (ICR) package that accompanies this final rule. Specifically, definitions for both ''owner'' and ''operator'' were proposed in the draft instructions for completing Form ETA–9142A and its appendices, which were published along with the NPRM and for which the Department also requested public comment. The proposed form instructions not only included proposed definitions of both terms but also provided an explanation of how the Department determined each proposed definition. After review of the public comments, the Department has revised the definitions to clarify that, for purposes of § 655.130, ''owner'' or ''operator'' means any person who owns or has a controlling operational role in the employer(s) and place(s) of employment. With respect to owners specifically, the Department will consider a person or entity an owner if the person or entity legally owns or is an owner with a controlling operational role in the employer's business. The Department will require the employer to disclose the majority owners, defined as an owner with ownership of more than 50 percent of a business, and any owner who owns less than 50 percent of an organization, but exercises any decision-making responsibilities over the business. If the owner or operator of the place(s) of employment is a branch, subsidiary, or affiliate of a parent corporate or joint venture, the employer must list the owners and operators of the parent entity. As noted in the PRA package and form instructions for the NPRM and this final rule, the Department also expects the employer to provide information about operators of the place(s) of employment, defined as any person or entity who runs the agricultural business, making day-to-day management decisions. Finally, as explained in the NPRM and above, the Department is collecting this information to enhance the Department's ability to identify, investigate, and pursue remedies from program violators, including entities debarred from the H–2A program, and to that end, the Department also expects the employer to provide this information for any owner or operator of a business that is currently debarred from the H–2A program by OFLC, by WHD, or by a court of law, regardless of ownership stake or level of control.

The Department considers the totality of the circumstances surrounding the business formation and conduct of the owner in determining ownership of an entity. No one factor would be determinative in the analysis. Some examples that demonstrate ownership are official State, local, or Federal documentation (*e.g.,* articles of incorporation, business license, deed) of the ownership of an entity. Another example demonstrating entity ownership is whether a judicial or administrative decision or action makes a definitive determination about ownership of an entity.

If an individual or entity is listed as an owner or operator of the places of employment, or as the employing entity, on an official Federal, State, or local document, like incorporation documents, or judicial or administrative records like those that indicate transfer of ownership, the Department expects the employer to provide identifying information for these individuals or entities. In many cases, this information will be publicly available on State or local websites.

This final rule requires the employer to exercise due diligence when determining and disclosing primary owners and owners that exercise control over the entity that operates the place(s) of employment for the integrity and

enforcement purposes noted in the NPRM and this preamble. This final rule does not seek to take enforcement action against employers for failing to disclose every person or entity that may have an indirect or marginal stake in a complex organization and does not require the employer to disclose owner or operator information for any person or entity that does not fall into the above definitions, such as individual shareholders of corporate, cooperative, or joint arrangements that do not have a majority stake in or exercise control over the entity. Similarly, this final rule requires the employer to exercise due diligence, and demonstrate a good-faith effort, in gathering, disclosing, and updating as necessary the identity, location, and contact information of owners, operators, managers, and supervisors.

In response to comments specifically about disclosure of landlord information, the Department expects the employer to disclose this information if the landlord is an owner of the employer(s) or is an operator of the place(s) of employment who runs the agricultural business, making day-to-day management decisions. In response to the comments specifically expressing concern about disclosure of the required information where land is owned or operated by Federal, State, or local government, the Department expects the employer to provide the name of the Federal, State, or local agency or government entity that owns or operates the land or employs the managers or supervisors of workers employed under the H–2A Application.

The Department is not revising the proposed definitions of ''manager'' and ''supervisor'' in this final rule. As defined in the instructions and PRA package accompanying Form ETA–9142A, Appendix C, and in the preamble to this final rule, a manager is a person whose duties and responsibilities include formulating policies, managing daily operations, and planning the use of materials and HR with respect to the employment of H–2A workers. A supervisor is the person(s) who supervises and coordinates the activities of H–2A and corresponding agricultural, range, aquacultural, and related workers. The Department based these definitions on the O*NET definitions used for related occupational codes and believes these definitions are sufficient to ensure employers understand and comply with the requirement to disclose information about the managers and supervisors of H–2A and corresponding workers. In response to comments about the burden of production and the Department's estimates, the Department has addressed these two issues in the supporting documentation in the PRA package the Department has prepared for this rulemaking under OMB Control Number 1205–0466, available at *https://www.reginfo.gov.*

While the Department appreciates the Farmworker Justice suggestion to expand the proposed information collection to include transportation providers, workers' compensation policy holders, owners and operators of housing, recruitment information from first-time employers and fixed-site growers, as well the collection of family relationships, the Department declines to adopt these suggestions. The Department has determined that the collection of additional information items exceeds the scope of the proposed collections, which focus on the enhanced disclosure of information about employers, and if adopted, would deprive the full regulated community of its opportunity to comment. Even if the additional collections items did not exceed the scope of the proposed collections, the Department has determined that the collections, as proposed, are sufficient to accomplish the purpose as noted above and in the NPRM. The Department appreciates Farmworker Justice's concern regarding the use of family members in varying roles to avoid regulatory requirements and enforcement. However, the Department has determined that collection of information on the owners, operators, managers, and supervisors, in addition to information the Department already collects like point of contact, agent, and various other potential identifying information, is sufficient to ensure employers do not utilize family members to evade compliance with the law.

More specifically, the Department agrees with Farmworker Justice that family relationships in various roles across multiple applications can indicate potential noncompliance and attempts to evade the law or sanctions. However, the Department does not believe it is necessary for this final rule to more explicitly require the employer to disclose any potential owners, supervisors, managers, or operators with a family relationship to any owner or operator of the employer. The disclosure requirements in this final rule, combined with the existing requirement to disclose information like the identity of the agent and point of contact, address(es), occupation, and period of need, will be sufficient to assist the Department in identifying family relationships in filings that may indicate fraud or other intentional failures to comply with the law.

In response to Farmworker Justice, the Department is clarifying language at § 655.130(a)(2) to specify that this provision applies to all employers of any worker employed under the *Application for Temporary Employment Certification.* The Department is not adopting the commenter's suggestions to collect additional information about fixed-site employers. Currently, on the Form ETA–790A, H–2ALCs must identify the name(s) and location(s) of each fixed-site agricultural business where the H–2A worker(s) will perform labor or services, and provide fully executed work contract(s) with each fixed-site agricultural business, which assists OFLC in determining compliance with all application filing requirements for H–2ALCs under § 655.132. This information is collected on the job order. As proposed in the NPRM, this final rule requires that each prospective H–2A employer, as defined at § 655.103(b), provide the following information in relation to the owner(s) of each employer, any person or entity (if different than the employer(s)) who is an operator of the place(s) of employment, including an H–2ALC's fixed-site agricultural business client(s), and any person who manages or supervises the H–2A workers and workers in corresponding employment under the H–2A Application: full name, date of birth, address, telephone number, and email address. The Department is adopting as proposed paragraph (a)(3), which requires the employer to provide the identity, location, and contact information of all persons or entities that are operators of the place(s) of employment listed in the job order, if different from the employer(s) identified under paragraph (a)(2), including an H–2ALC's fixed-site agricultural business client(s) that operate the place(s) of employment, and of all persons who manage or supervise any H–2A worker sponsored under the H–2A Application or any worker in corresponding employment. As noted above, employers must exercise due diligence when gathering, disclosing, and updating this information and be able to demonstrate good faith in their efforts to do so. The Department believes the additional information collected under this final rule will bolster the Department's enforcement capabilities with respect to H–2ALCs and fixed-site employers and will ensure the Department is able to accomplish the objectives explained above and in the NPRM.

The Department also received many comments from trade associations,

employers, and agents expressing concern about disclosure of personally identifiable information (PII) and the Department's assurances that it would protect this information from unauthorized disclosure. MásLabor asserted that the proposed information collection was ''morally and ethically objectionable,'' that it ''raises major questions of compliance with privacy and data protection laws,'' and that the NPRM failed to adequately address ''the implications of this disclosure requirement under the Privacy Act of 1974.'' Citing 5 U.S.C. 552a(e)(1), IFPA, TIPA, GFVGA, NHC, and Titan Farms, LLC noted that the Privacy Act permits Federal agencies to ''maintain in their records only information about an individual 'relevant and necessary to accomplish a purpose of the agency required to be accomplished by statute or by executive order of the President.''' USA Farmers generally asserted the proposed collections would violate ''various state laws on the collection and dissemination of [PII]'' and másLabor stated the Department failed to consider the implications of State privacy laws in States like California, Colorado, Connecticut, Utah, and Virginia.

Many commenters, including Willoway Nurseries, FFVA, and NCFC, asserted that requiring an employer to provide ''such an onerous amount of information just to file an application is unnecessary and starkly against the requirements of the Paperwork Reduction Act and the Small Business Regulatory Enforcement Fairness Act.'' USApple expressed concern that the Department did not explain how it would protect this information from ''unlawful disclosure under [FOIA].'' Finally, SRFA expressed concern that the Department provided only a general assertion that it would disclose information only according to the law and information sharing agreements and that was not sufficient to ''assuage concerns the information would be subject to data breaches.''

Some commenters expressed concern that the proposed information collections would violate the privacy of owners, operators, and employees, expose them to data breaches and potential harassment or security threats, and expose the employer to liability for non-consensual disclosure of their information or to potential immigration enforcement if the manager and supervisor is not authorized to work in the United States. Titan Farms, LLC, IFPA, TIPA, U.S. Custom Harvesters, Inc., and Demaray Harvesting and Trucking, LLC opposed the collection of owner information for similar reasons, expressing concerns the collection would ''infring[e] on owners' privacy rights,'' potentially ''disclos[e] confidential business information,'' and ''pose an extensive administrative burden on employers, without any documented regulatory value or authority.'' MásLabor asserted ''there may be compelling financial or public relations reasons for not disclosing ownership interests'' and noted ''[i]nstitutional or other passive investors may insist on anonymity as a strict contractual condition.''

New York State Farm Bureau, Labor Services International, an individual commenter, TIPA, SRFA, and másLabor opposed the proposal to collect information about managers and supervisors, asserting this disclosure would be a ''direct violation,'' ''serious invasion,'' and ''egregious breach'' of employee privacy and would constitute a ''routine . . . unjustified disclosure of employee information.'' MásLabor asserted the proposal would risk effectively ''doxing'' employees and putting them at risk of ''potential harassment and threats from online sources, increasing the likelihood [they] will be the target of junk mail/spam, commercial solicitations, phishing emails'' and other potential dangers. TIPA and SRFA asserted the proposal would expose employees to ''retaliatory targeting'' and would be ''abjectly dangerous.'' AmericanHort, NCFC, and USApple expressed concern, specifically, that the Department would publish employees' PII on the public disclosure data on the OFLC website or on *Seasonaljobs.dol.gov* because entries in the disclosure data and the Seasonaljobs website are produced using scans of information in the employer's Form ETA–9142A and Form ETA–790A. Similarly, an individual commenter expressed concern that the proposal would ''forc[e] employers to disclose the private information of their employees on the internet'' because ''any information provided on the face of the H–2A application is subject to public disclosure'' and the commenter asserted this public disclosure would ''endanger[ ] so many people.''

Several commenters specifically expressed concern about disclosing PII about an employee without obtaining the employee's consent. Some commenters, including IFPA, Titan Farms, LLC, and TIPA, noted ''employees have not chosen to participate in the H–2A program and should not be required to have their information disclosed to the government.'' Similarly, másLabor asserted the proposed collection of manager and supervisor information violated ''a fundamental tenet of the employer-employee relationship that employees have a right to keep their personal information private and to require their consent before their employers disclose personal information.'' These commenters also expressed concern that disclosure may require some employers to breach employment or union contracts if they contain provisions prohibiting disclosure of an employee's information. USA Farmers asserted the Department lacks any reasonable basis to subject an employee to having their personal information delivered to the government and then made public merely because an employee works for an employer that participates in the H–2A program. An individual commenter expressed concern it would be unable to retain managers and supervisors if the Department required disclosure of their identifying information. Commenters including Titan Farms, LLC, IFPA, NHC, and TIPA expressed concern that non-consensual disclosures or disclosures in data breaches could expose employers to ''risk of employment-based litigation'' for the disclosure, though the commenters did not elaborate on what employment-based litigation might result. These commenters also expressed concern disclosing manager and supervisor information may expose employers or their employees to immigration enforcement, citing a high number of agricultural employees who are not authorized to work in the United States.

The Department is not requesting the disclosure of immigration status and therefore does not anticipate increased immigration enforcement by DHS as a direct result of this information collection. Also, as noted in the NPRM, the Department will collect, store, and disseminate all information and records in accordance with the Department's information sharing agreements and System of Records Notice (SORN), principles set forth by OMB, and all applicable laws, including the Privacy Act of 1974 (Pub. L. 93–579, sec. 7, 88 Stat. 1909 (1974)), Federal Records Act of 1950 (Pub. L. 81–754, 64 Stat. 585 [codified as amended in chapters 21, 29, 31, and 33 of 44 U.S.C.] (1950)), the PRA (44 U.S.C. 3501 *et seq.*), and the E-Government Act of 2002 (Pub. L. 107–347 (2002)).

As noted by commenters, the Privacy Act of 1974 requires the Department ''maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required to be accomplished by statute or by executive order of the President.'' 5 U.S.C.

552a(e)(1). The Privacy Act also requires the Department ''collect information to the greatest extent practicable directly from the subject individual when the information may result in adverse determinations about an individual's rights, benefits, and privileges under Federal programs.'' 5 U.S.C. 552a(e)(2). In the NPRM and above, the Department explained at length the need for this information to accomplish its statutory mandates under the INA. Collection of this information directly from each owner, operator, manager, and supervisor for each H–2A Application would not be practicable because the Department will not know the identity of these persons or entities until the employer provides the information required under new § 655.130, and even assuming the Department knew these identities, it would be administratively infeasible for the Department alone to obtain this information directly from each person and entity while continuing to effectively review and process H–2A Applications within the relevant statutory deadlines.

Pursuant to Department policies, all PII collected on the H–2A Application is extended Privacy Act protections to the maximum extent practicable. In accordance with the Privacy Act, the Department publishes a SORN in the **Federal Register** when the Department creates or substantively modifies a system of records. The SORN addresses the authority underpinning the system of records, the measures the Department takes to safeguard information, the Department's record access and retention procedures, and the Department's routine uses for the records.[61] For the purposes of this rulemaking, the Department will modify the existing SORN, DOL/ETA–7, Foreign Labor Certification System and Employer Application Case Files. All PII the Department collects is protected by administrative, technical, procedural, and physical safeguards against unauthorized access and disclosure, and all PII the Department maintains is stored in a manner that is safe from access by unauthorized persons at all times. When the collected information is no longer needed, all electronic or paper information is erased or destroyed in accordance with applicable National Archives and Records Administration (NARA) approved record retention schedules.

The Department appreciates commenters' concerns that the collection and retention of this information could require an employer to violate State-level privacy laws. However, commenters failed to note specific State law provisions that would prohibit the employer's production or retention of this information. Without this information, it is difficult to assess the commenters' concerns more closely, including whether the State laws apply to the proposed collection here. However, as discussed above and in the NPRM, the Department will collect, store, and disseminate all information and records in accordance with the Department's information sharing agreements and SORN, principles set forth by OMB, and all applicable laws. In addition, the Department has explained the critical need for this information and will collect and store this information in the same manner it collects and stores other information necessary to process H–2A Applications and administer the H–2A program. The Department expects the employer to fulfill its retention obligations with respect to this information the same way the employer is expected to retain information specified in § 655.167 and records required under § 655.122.

In response to concerns about potential disclosures of this information, the Department reiterates that it may release this information if authorized under FOIA or may share the information with other agencies when authorized and necessary for criminal, civil, or administrative law enforcement and investigative purposes. The Department will only be required to provide PII under limited circumstances when authorized by law. Similarly, the Department will only provide this information in response to a FOIA request when there is no applicable FOIA exemption to permit the Department to withhold the information in full or in part, and the Department routinely processes incoming FOIA requests. The Privacy Act strictly limits the information that may be disclosed, but has several potentially relevant disclosure exemptions, such as those at 5 U.S.C. 552a, paragraphs (b)(2), (b)(7), and (b)(9)–(11).

As noted in the PRA package accompanying the NPRM, the Department may release this information when authorized in connection with appeals of denials before the Department's Office of Administrative Law Judges (OALJ) and Federal courts, in which case records may be released to the employers that filed such applications, their representatives, or to named foreign workers or their representatives. The Department also may release this information in connection with the administration and enforcement of immigration laws and regulations, in which case the records may be released to such agencies as the Department's OIG or WHD, the Department of Justice (DOJ), DHS, or the Department of State. As noted above, more information about the Department's proposed changes to the H–2A information collection instruments, the Department's collection and use of this information, and the Department's estimate of the corresponding burden is available in supporting documentation in the PRA package the Department has prepared for this rulemaking under OMB Control Number 1205–0466, available at *https://www.reginfo.gov.* In addition, please refer to the Administrative Information section below for the Department's responses to comments regarding the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA).

The Department appreciates and takes seriously the comments related to privacy concerns, including comments regarding how the proposed collection would affect both the retention of managers and supervisors and immigration enforcement, but reiterates that pursuant to policy, all PII collected on the H–2A Application is extended Privacy Act protections to the maximum extent practicable. All PII the Department collects is protected by administrative, technical, procedural, and physical safeguards against unauthorized access and disclosure, and all PII the Department maintains is stored in a manner that is safe from access by unauthorized persons at all times. When the collected information is no longer needed, all electronic or paper information is erased or destroyed in accordance with applicable NARA approved record retention schedules.

Additionally, the Department will only provide PII under limited circumstances when authorized by law. The Department will not publish PII as part of its regular disclosure data. The Department will redact this information as it currently does for information such as Employer's FEIN, Attorney's FEIN, and Attorney's State Bar Number. Similarly, the Department will not publish this information on the Seasonaljobs websites, which is primarily used for the dissemination of information about agricultural job opportunities to job seekers.

Finally, the Department explained above and in the NPRM why there is a vital need to collect this information. The Department expects that employers will provide this information completely and accurately at the time of filing. As with information regarding

[61] *See* DOL/ETA–7, *Foreign Labor Certification System and Employer Application Case Files, https://www.dol.gov/agencies/sol/privacy/eta-7* (last accessed Apr. 9, 2024).

anticipated worksites or use of foreign labor recruiters, for example, the Department expects employers to make a good-faith effort in obtaining this vital information about the persons or entities that will manage or supervise the agricultural workers and those who own or operate places where those workers will be employed.

2. Section 655.135, Assurances and Obligations of H–2A Employers

a. Section 655.135, Introductory Language, WHD Authority

In the NPRM, the Department proposed a minor clarifying revision to the introductory language to § 655.135 to include explicit reference to compliance with 29 CFR part 501 as part of an H–2A employer's obligations. Previously, the introductory language in the regulations specified only that an employer seeking to employ H–2A workers must agree as part of the job order and Application that it will comply with all requirements under 20 CFR part 655, subpart B. Those requirements included compliance with WHD's investigative and enforcement authority under 29 CFR part 501, as specified in 20 CFR 655.101(b). The Department proposed revisions in the NPRM to make these obligations more explicit in § 655.135 and on the job order, to better ensure that both workers and employers are fully aware of WHD's authorities. The Department did not receive any comments on this proposed revision. Therefore, for the reasons set forth in the NPRM, the Department adopts the language as proposed.

b. Sections 655.135(h), (m), and (n), 655.103(b), Worker Voice and Empowerment

Before an employer may hire H–2A workers, it must apply for and obtain from the Department a certification that: (1) there are insufficient available U.S. workers who are able, willing, and qualified to perform the employer's job opportunity; and (2) the employment of H–2A workers in the job opportunity ''will not adversely affect the wages and working conditions of workers in the United States similarly employed.'' 8 U.S.C. 1188(a)(1). Courts have long recognized that Congress delegated to the Department broad authority to implement the INA's prohibition on adverse effect at 8 U.S.C. 1188(a)(1)(B). *See, e.g., Overdevest,* 2 F.4th at 982–83; *AFL–CIO* v. *Dole,* 923 F.2d 182, 184–85 (D.C. Cir. 1991) (citing *AFL–CIO* v. *Brock,* 835 F.2d 912, 917 (D.C. Cir. 1987)); *see also Nat'l Council of Agric. Emps.* v. *U.S. Dep't of Lab.,* No. 22–3569, 2024 WL 324235, at *2 (D.D.C. Jan. 29, 2024) (discussing the Department's regulatory authority under the H–2A program). The Department has historically understood the INA's adverse effect requirement both as requiring parity between the terms and conditions of employment provided to H–2A workers and other workers employed by an H–2A employer, and as establishing a baseline ''acceptable'' standard for working conditions below which workers in the United States would be adversely affected. *See, e.g.,* 1978 Final Rule, 43 FR at 10312, 10314; 1987 H–2A IFR, 52 FR at 20508, 20513; *see also Garcia-Celestino* v. *Ruiz Harvesting, Inc.,* 843 F.3d 1276, 1285 (11th Cir. 2016) (explaining that the regulations' provision of minimum ''baseline benefits'' to H–2A workers, including sound working conditions, ''ensure[s] that foreign workers will not appear more attractive to the 'employer' than domestic workers, thus avoiding any adverse effects for domestic workers'') (citations omitted). As courts have observed, the Department cannot seek to make jobs more attractive to U.S. workers, but instead must ''neutralize any 'adverse effect' resultant from the influx of temporary foreign workers.'' *Williams* v. *Usery,* 531 F.2d 305, 307 (5th Cir. 1976).

As explained in the NPRM, the Department recognizes that some of the characteristics of the H–2A program, including the temporary nature of the work, frequent geographic isolation of the workers, and dependency on a single employer, create a vulnerable population of workers for whom it is uniquely difficult to advocate or organize regarding the terms and conditions of employment or to seek access to certain service providers. The Department also has significant enforcement experience with H–2A workers who have faced retaliation for asserting or advocating for their rights. The Department explained in the NPRM that it believed that this vulnerability of the H–2A workforce, and the ability of employers to hire this vulnerable workforce, may suppress or undermine the ability of farmworkers in the United States to negotiate with employers and advocate on their own behalf regarding working conditions in their shared workplaces, in light of the availability of the H–2A workforce. In other words, even if workers in the United States were to raise concerns regarding their terms and conditions of employment, under the current H–2A regulatory framework, employers may turn to the H–2A program for an alternative workforce that faces significant barriers to similar advocacy, thus undermining advocacy efforts by or on behalf of similarly employed workers in the United States. In addition, in light of the barriers they face, H–2A workers are less able and less likely to advocate on behalf of themselves or their coworkers to seek compliance with the terms and conditions of employment set forth in the Department's regulations, employment below which will adversely affect workers in the United States.[62]

In the NPRM, the Department expressed its concern that the H–2A program currently does not provide sufficient protections for H–2A and corresponding workers to advocate on behalf of themselves or their coworkers regarding working conditions without fear of reprisal. Therefore, in the NPRM, the Department proposed changes to its regulations that would expand the H–2A anti-retaliation provision and include new employer obligations that would reduce or remove these barriers to worker empowerment.

In addition to seeking comment on the specific proposed revisions, discussed further below, the Department sought comment on whether H–2A workers are more vulnerable to labor exploitation than similarly employed workers in the United States, whether the existing worker protections are sufficient to prevent violations of the H–2A program, and whether agricultural workers in the United States have greater voice and empowerment to advocate regarding the terms and conditions of their employment. The Department received significant comments on these issues.

Those commenters that agreed that H–2A workers are a more vulnerable workforce than their counterparts in the United States cited a range of evidence in support of this conclusion, including

specific examples of worker experiences, data, and studies on the H–2A program. These comments reflect that the nature of the H–2A program makes these workers particularly vulnerable to retaliation and threats of retaliation, and that the existing worker protections are insufficient to ensure program compliance. For example, CCUSA and USCCB stated that several Catholic Charities agencies that serve migrant farmworkers across the country ''report the regular and widespread occurrence of illicit and unjust practices'' among H–2A workforces, including restrictions on mobility, worker isolation, and insufficient health care. The California LWDA, a State labor agency, stated that it has seen that ''[f]armworkers experience a range of abusive labor practices, including underpayment of wages, inadequate implementation and enforcement of workplace safety measures, and substandard employer-provided housing conditions.'' With respect to H–2A workers in particular, the agency stated that in its experience ''H–2A workers appear to be even more fearful to seek assistance or otherwise exercise their legal rights because they are more vulnerable to employer misconduct'' than other farmworkers, citing a ''grave imbalance of power between employers and H–2A workers because their visas, encompassing both their authorization for employment and right to remain in the United States, are tied to a single employer.''

AIHA, an association committed to occupational health and safety, noted that, as compared to H–2A workers, similarly employed agricultural workers do not face threats of deportation, are not tied to a single employer, and ''[t]hey are also more likely to be English-speaking, less likely to depend on the employer for housing, and less likely to lose future job opportunities.'' The National Women's Law Center echoed these same concerns, commenting that H–2A workers are dependent upon their employers to work and to remain in the United States: ''If workers lose their H–2A employment, they must leave the country unless they can find another employer to sponsor them. As a result, H–2A workers will work to the limits of human endurance in an effort to please their employers, keep their jobs, and have the chance of being rehired in future years.'' CAUSE, which advocates on behalf of H–2A workers and other working-class and immigrant communities in California's Central Coast, stated that ''H–2A workers who wish to stand up to unfair or illegal conduct have reason to fear retaliation in the form of discharge and deportation as well as denial of a job and visa in a future season.''

Many commenters also stated that greater worker protections are needed to empower workers to advocate regarding working conditions without fear of retaliation and to prevent H–2A program violations. The UFW Foundation gathered and submitted with their comment the first-hand experiences of numerous farmworkers to demonstrate these needs. For example, the comment quoted an H–2A worker as saying that ''most workers stay silent because of fear of not being allowed to come back'' and another H–2A worker explaining that he didn't advocate for himself because ''I know the consequences if I speak and I don't want to lose my job.'' Yet another H–2A worker stated that ''we cannot ask for better treatment because they will simply return us to our country.'' A former H–2A worker reported that colleagues who complained about wages, housing, or other working conditions were punished.

Many commenters also cited a 2020 report from EPI which reflects a similar conclusion, noting that farmworkers' fear of retaliation and deportation can contribute to an underreporting of violations.[63] The GAO 2015 Report reflects this potential for underreporting as well, explaining that the dependency of H–2A workers on the employer for a visa and employment authorization creates disincentives for workers to report program abuses, leading to an underreporting of violations.[64]

The EPI 2020 Report also set forth that 70 percent of WHD investigations of farms found violations and that a farm employer's probability of being investigated in any year is 1.1 percent.[65] The National Women's Law Center stated, ''less than one percent of agricultural employers are investigated per year, yet when WHD does investigate . . . it detects wage and hour violations 70 percent of the time, indicating that wage theft by employers is grossly undetected.'' In fact, in the previous 5 fiscal years, in 88 percent of WHD's H–2A investigations, WHD found employers in violation of the law. In H–2A cases where back wages are owed, the average worker is owed $746.[66] In its 2020 report, among other recommendations to address its findings, EPI encouraged the Department to ''build on the good work done by advocates and unions to educate farmworkers about their rights and the process of reporting violations.'' [67] In its comment on the NPRM, EPI reiterated its conclusion from its 2020 report and also cited a more recent EPI study from 2023 that ''found that violations of H–2A rules account for much higher shares of back wages owed and civil money penalties assessed than violations of other laws on farms, and now account for an overwhelming share of the back wages owed and civil money penalties assessed in agriculture that are the result of closed investigations.'' [68]

An individual commenter also noted that the recruitment of H–2A workers ''is tainted by rampant abuses,'' including trafficking and labor exploitation. A group of 15 U.S. Senators identified labor trafficking as a major concern in the H–2A program, citing the Polaris 2018–2020 Report finding that the Human Trafficking Hotline identified 2,841 victims of labor trafficking who held an H–2A visa from 2018 to 2020, that 58 percent of those reported they had worked excessive hours, and that 41 percent reported their wages had been withheld or taken. The Alliance to End Human Trafficking noted that, in its experience, ''traffickers thrive where vulnerability is high.''

Commenters also observed that agricultural labor is dangerous, and these risks are compounded for H–2A workers who may be less likely to report safety concerns out of fear of reprisal. The California LWDA reported that ''Cal/OSHA considers the agricultural industry a high hazard industry, an industry with the highest incidence of preventable occupational injuries and illnesses and workers' compensation losses.'' A group of State Attorneys General cited a report from Union of Concerned Scientists outlining the dangers of farmwork and how these dangers are likely to be increasing, particularly dangers related to climate change.[69] These State Attorneys General also cited to a NIOSH website that observed, based on BLS data, that agricultural workers report one of the highest fatal injury rates and also that there is ''well-known underreporting of

injury'' in the industry.[70] Specifically, according to NIOSH, in 2021, workers in the agriculture, forestry, fishing, and hunting industry experienced one of the highest fatal injury rates at 20 deaths per 100,000 full-time workers, compared to a rate of 3.6 deaths per 100,000 workers for all U.S. industries. The State Attorneys General comment also pointed out that ''workers trapped in abusive or coercive environments are less likely to take rests or complain about lack of adequate environmental protections, which enables dangerous health and safety violations to persist.'' Citing a study from the *Annual Review of Public Health,* AIHA noted that H–2A workers ''are incentivized to continue employment even when presented with working conditions and labor standards violations that are hazardous to their health and safety.'' [71]

Some commenters also noted that the proposed rule would benefit employers as well as workers. As one individual commenter noted, ''[a]n employer may be economically disadvantage[d] if it prefers not to cut wage and safety corners but its competitors do.'' Another individual commenter explained that ''consistent and fair treatment of workers across the country not only helps the worker, but helps the farmers who do the right thing in the first place.''

On the other hand, many commenters refuted that H–2A workers are a vulnerable workforce or that greater worker protections are needed to ensure program compliance. Several commenters, including IFPA, U.S. Custom Harvesters, Inc., TIPA, and Titan Farms, LLC, opined that the conditions the Department cited in the NPRM as underpinning the perceived vulnerability of H–2A workers—including the workers' dependence on one employer for employment, housing, food, water, and transportation—are conditions the Department ''itself has created'' through regulations and that it is ''unfathomable that the Department is utilizing its own extensive regulatory requirements as its rationale for more regulatory requirements on U.S. businesses.'' Several commenters, including Western Growers, AmericanHort, and Willoway Nurseries, cited a number from a report of the Cato Institute observing that there are over 200 regulatory requirements in the H–2A program.[72] Several commenters suggested that ''[i]f the Department is concerned with the impact its regulation has on the workforce,'' the Department should consider ''revisions to the existing regulations to provide more flexibilities for the workers'' to make workers less vulnerable.

The Department disagrees that its regulations have created the conditions giving rise to the vulnerability of H–2A workers, such as the statutory dependency on a single employer for a visa, frequent geographic isolation, and language barriers described above. The Department's existing regulations and those included in this final rule are intended to empower workers to voice concerns regarding their terms and conditions of employment without fear of reprisal by employers, agents, recruiters, and other persons who may seek to exploit this dependence. In addition, the Department's regulations do not reduce worker flexibilities related to housing, transportation, meals, and other needs, but instead establish the minimum terms and conditions of employment under this unique program that are necessary to prevent adverse effect on similarly employed workers in the United States.

Several commenters also asserted that the H–2A program ''provides a significant financial opportunity for this critical workforce and their families, which is not accounted for by the Department within this proposal.'' For example, GFVGA observed that many workers return to the same employer year after year, and ''are eager to recruit friends and family members into the program.'' USA Farmers stated that H–2A workers are not more vulnerable but instead have ''more legal protections and benefits'' than U.S. farmworkers. In addition, many commenters felt that the Department's statements in the NPRM regarding the vulnerability of H–2A workers exhibited bias against agricultural employers. Several commenters, including NCFC and FFVA, noted that the ''vast majority of employers who use the [H–2A program] do so with an eye towards compliance.'' IFPA explained that over the years many ''employers have developed a deeper understanding of the program and as a result continue to adopt protocols to ensure compliance, more transparent and efficient recruiting practices, as well as incentive packages for workers to return.'' In support of this point, IFPA, NCAE, the U.S. Chamber of Commerce, and several other commenters cited a blog post from the Rural Migration News at the University of California-Davis. According to the commenters, that blog post—relying on the 2020 EPI report discussed above—stated that between 2005 and 2019, ''71 percent of all violations found on vegetable farms occurred on only 5 percent of all the U.S. vegetable farms.'' [73] These commenters asserted that this data suggests that the proposed regulations are unnecessary and the Department should instead focus on targeted enforcement against the ''bad apples.'' Similarly, citing the House Committee on Agriculture's Agricultural Labor Working Group Interim Report, wafla commented that the Department and SWAs should better utilize existing regulatory and enforcement tools rather than adopt the proposed worker voice and empowerment regulations.[74]

The Department appreciates the opportunity to state clearly that its mission is to promote and achieve compliance with labor standards to protect and enhance the welfare of the nation's workforce. The Department respects that the majority of H–2A employers seek to comply with the law. Unfortunately, despite these good intentions and as explained above, violations of the H–2A program requirements remain pervasive. Although the so-called ''bad apple'' employers may commit a large share of the violations WHD encounters in its investigations, the fact remains that when WHD investigates H–2A employers, it typically does not find full compliance with the law, with back wages averaging several hundred dollars owed per worker. But WHD cannot investigate every farm on which H–2A workers are employed. WHD's enforcement initiatives are data-driven and seek to target the agency's limited

resources where needed most. WHD also supplements its enforcement efforts through employer and worker outreach programs, understanding that it may reach a larger audience by leveraging advocacy organizations, employer associations, community-based organizations, and State and Federal agencies. For example, WHD partnered with the North Carolina Department of Labor's Agriculture Safety and Health Bureau to reach farmworkers in the Southeast. In recent years, WHD has also hosted regional multi-day virtual agricultural seminars educating hundreds of stakeholders—including employers, associations, agents, workers, and advocates—about their rights and obligations under the H–2A provisions of the INA and other laws enforced by the agency. In addition, the Department has developed websites in both English and Spanish, *www.MigrantWorker.gov* and *www.TrabajadorMigrante.gov,* that aim to educate workers about their rights, increase WHD's visibility, and streamline workers' ability to contact WHD with questions, concerns, or complaints.[75] Even so, as many commenters pointed out and as discussed above, a farm employer's probability of being investigated by WHD in any year is small. This final rule seeks to supplement these data-driven enforcement and outreach efforts by giving workers the tools they need to ensure that they are being properly paid and to advocate on their own behalf regarding working conditions, without fear of reprisal. And, as one individual commenter stated, ''consistent and fair treatment of workers across the country not only helps the worker but helps farmers who do the right thing in the first place.''

The Department also recognizes that the H–2A program benefits H–2A workers in many ways and that the program provides many workers with a financial opportunity that may not exist in their home communities. Many workers do return to the same employer year after year. But, as several commenters pointed out, this dynamic can lead to significant vulnerability for these workers—the fact that workers rely upon the same employer for such an important economic opportunity makes them less likely to speak up about working conditions or noncompliance; workers may not feel empowered to raise concerns with their employer for fear of retaliation, not only by their current employer, but by labor recruiters and other H–2A employers as well, and may lack resources to find other H–2A employment. The Department seeks, in this final rule, to empower workers to seek compliance and protection of their rights.

In addition, a number of commenters, including NCAE and IFPA, took issue with the Department's statement that the dangers and hardships inherent in agricultural labor and the lack of protections for worker organizing have contributed to worsening working conditions and led to a decreasing number of agricultural workers in the United States willing to accept such work. Citing data from USDA, IFPA asserted that the growth in the H–2A program is ''more likely a result of an aging domestic agricultural work force and a decrease in the number of migratory farmworkers.'' The Department acknowledges these trends in the agricultural workforce but notes that regardless of the root cause, use of the H–2A program has grown dramatically over the past decade while overall agricultural employment in the United States has remained stable, meaning that fewer workers in the United States are employed as farmworkers.[76] This increasing reliance upon the H–2A program makes the entire agricultural workforce as a whole more vulnerable to abuse and exploitation for the reasons discussed above, and therefore greater worker protections are needed to ensure that workers feel safe and have the ability to ensure that their rights are being protected.

As several commenters noted, the Department's H–2A regulations already include numerous and substantial protections for workers, including various minimum terms and conditions of employment under the H–2A program that are necessary to prevent adverse effects on similarly employed workers. However, as the Department's enforcement experience and the above comments, data, and studies reflect, greater protections are needed to empower workers to speak up on their own behalf to enforce these terms and conditions of employment. As the American Federation of Labor & Congress of Industrial Organizations (AFL–CIO) stated in its comment, ''[g]uaranteeing such wages and working conditions on paper means nothing if the H–2A workers are unable or unwilling because of fear and intimidation to take action if they are not paid the required wages or are otherwise abused.'' Workers' rights cannot be secured unless they are protected from all forms of discrimination resulting from any worker's attempt to advocate on behalf of themselves or their coworkers. The Department and courts have long recognized that such protections are necessary and essential to the effective functioning of a complaint-based enforcement system. *See, e.g.,* 88 FR at 63790; *Mitchell* v. *Robert DeMario Jewelry, Inc.,* 361 U.S. 288, 292 (1960) (agreeing with the Department's interpretation of the FLSA's anti-retaliation provision that ''effective enforcement could . . . only be expected if employees felt free to approach officials with their grievances''). As the comments and the Department's enforcement experience make clear, the current protections are not enough to prevent adverse effect. Therefore, after consideration of the comments received, the Department concludes that the H–2A workforce is uniquely vulnerable, and as a result, H–2A workers are less able and less likely to advocate on behalf of themselves or their coworkers to seek compliance with the terms and conditions of H–2A employment that the Department has determined are necessary to prevent adverse effect on the wages and working conditions of workers in the United States similarly employed. Additionally, the ability of employers to hire this uniquely vulnerable workforce may suppress the ability of agricultural workers in the United States to negotiate with employers and advocate on their own behalf regarding their terms and conditions of employment.

The Department proposed in the NPRM to prevent such adverse effect by revising the assurances and obligations of H–2A employers to include stronger protections for workers who advocate regarding their working conditions on behalf of themselves and their coworkers. Specifically, the Department proposed to broaden the provision at § 655.135(h), which prohibits unfair treatment, by adding a number of protected activities that the Department considered would play a significant role in safeguarding collective action—activities that workers must be able to

[75] *See www.MigrantWorker.gov* (English language version) and *www.TrabajadorMigrante.gov* (Spanish language version), at *https://www.dol.gov/general/migrantworker* and *https://www.dol.gov/general/trabajadormigrante. See also https://www.dol.gov/agencies/whd/espanol* and *https://www.worker.gov/es* for additional Spanish language Department resources for workers.

[76] According to USDA's Economic Research Service, employment of farmworkers in the United States has remained stable since the 1990s, but the number of positions certified in the H–2A program has increased sevenfold from 2005 to 2022. *See USDA, Farm Labor, https://www.ers.usda.gov/topics/farm-economy/farm-labor* (last visited Apr. 2, 2024); USDA, *H–2A Seasonal Worker Program Has Expanded Over Time, https://www.ers.usda.gov/data-products/chart-gallery/gallery/chart-detail/?chartId=104874* (last visited Apr. 2, 2024).

engage in without fear of intimidation, threats, and other forms of retaliation. The Department also proposed several new employer obligations at § 655.135(m) that would ensure H–2A employers do not interfere with workers' efforts to advocate regarding their working conditions, including a number of requirements that would advance worker voice and empowerment and further protect the rights proposed under § 655.135(h). The Department also proposed a new employer obligation at § 655.135(n) that would explicitly allow H–2A workers and workers in corresponding employment the right to invite or accept guests to worker housing and also would provide a narrow right of access to worker housing to labor organizations. Some of these provisions were limited to those workers who are engaged in agriculture as defined and applied in 29 U.S.C. 203(f)—that is, those who are exempt from the protections of the NLRA.

As detailed below in the section-by-section analysis, the Department is adopting several of its proposals relating to worker voice and empowerment in this final rule, modified as discussed in response to the comments received. The Department concludes that these provisions, which safeguard worker voice and empowerment, will prevent adverse effect on similarly employed workers in the United States by alleviating some of the barriers H–2A workers face when raising complaints about violations of their rights under the program and advocating regarding working conditions.

Many commenters opposing the proposed rule argued that the Department failed to provide a ''rational basis'' for its conclusion that the proposed worker voice and empowerment provisions will prevent the identified adverse effect on similarly employed workers in the United States. As IFPA phrased the issue, ''[w]hat remains unanswered throughout the entire Department proposal is how greater access for labor organizations to foreign-citizen workers in the [H–2A] program will improve conditions for U.S. workers elsewhere.'' Similarly, wafla posited that the Department ''assumes that unionization is the answer to additional worker protections.'' Commenters also observed that many employees may not wish to join a union and should not be forced to do so.

The Department welcomes the opportunity to clarify this point. This final rule does not provide for collective bargaining rights nor does the rule compel a worker to join a union. As finalized, the rule does not grant any rights to labor organizations. Rather, as detailed below, the final rule does the following: clarifies and expands protections for engaging in protected activities, including exercising rights under State and local laws; offers new protections for workers engaged in FLSA agriculture to engage in concerted activity; provides limited access to representation in disciplinary proceedings; and ensures greater access for workers to key service providers and to information about workers' rights. The Department believes that each of these provisions, taken individually, will reduce the fear of retaliation and other barriers currently faced by the H–2A workforce when seeking to advocate on behalf of themselves and their coworkers regarding their working conditions or violations of their rights, if they so choose. Empowering workers in this way thus can improve compliance with the various terms and conditions of H–2A employment that the Department has separately determined are necessary to prevent adverse effect on similarly employed workers. The Department believes that these improved protections also will help place the H–2A workforce on more equal footing with similarly employed workers and thus reduce the potential for this workforce's vulnerability to undermine the advocacy efforts of similarly employed workers.

The right to engage in concerted activity specifically, as described in greater detail in Section VI.C.2.b.viii below, is a demonstrated and powerful tool to empower worker voice to address working conditions, whether or not the workers' concerted activity results in formal representation by a labor union or other organized group. For example, in its comment, the AFL–CIO pointed to evidence that worker engagement in concerted activity ''significantly increases the enforcement of a broad range of employment laws and thus prevents the exploitation of workers.'' It particularly noted the role that representation by labor unions has played in increasing the likelihood that workers will voice complaints and increasing the likelihood of inspections under the Occupational Safety and Health Act.[77] In its comment, FLOC also provided evidence that collective action by workers can help prevent adverse effect, particularly through improving employer compliance with the terms and conditions of employment under the H–2A program. For example, FLOC noted that it has negotiated CBAs covering about 10,000 farmworkers in North Carolina, including many H–2A workers as well as non-H–2A workers. It also noted that although the H–2A regulations prohibit workers from paying recruitment fees, many H–2A workers are still illegally required by unscrupulous recruiters to pay such fees. FLOC stated that it ''has to a large extent eliminated these fees for workers employed under its [CBA] . . . due to the extensive provisions in the [CBA] providing job protection for those H–2A workers who file complaints regarding their U.S. employment, including complaints concerning recruitment fees.'' FLOC explained that its CBA indirectly assists in enforcing the regulatory provision by barring the blacklisting of union members who complain about illegal recruitment fees. FLOC also noted that its negotiated CBA with the North Carolina Growers Association also requires that all disciplinary actions and terminations be subject to a ''just cause'' standard, and provides union staff with access to all employer housing facilities and work sites, in order to inspect working conditions and assist workers in enforcing compliance. The UFW also quoted one H–2A worker stating that having representation would be helpful because the employers ''would stop threatening us all the time with returning us to our country and not giving us more work.'' It also cited evidence that many farmworkers regularly experience wage theft, especially regarding piece rates, and that concerted activity helps ensure that workers are paid the wages as promised in the job order. For example, one worker stated that after she worked on a piece rate basis for a month picking tangerines, the contractor refused to pay the workers because they did not have proof of how many tangerine bins they had picked. After the workers sought help from the UFW, the contractor finally paid the workers the wages they had earned. As reflected in the comments received, concerted activity by farmworkers can result in significantly fewer violations and improved compliance with laws even in non-union settings. As further detailed below, workers in several States have joined together to seek better enforcement of laws against sexual harassment, retaliation, and discrimination on farms, either by campaigning for voluntary agreements or by working with legal aid groups and/or government agencies to file complaints under applicable State laws and/or Federal anti-discrimination, minimum wage, and anti-human

[77] *See* David Weil, *Enforcing OSHA: The Role of Labor Unions,* 30 Indus. Rel. 20 (1991).

trafficking laws. Indeed, workers can engage in advocacy and concerted activities for the purpose of mutual aid and protection without engaging with or being represented by a labor organization. For example, although farmworkers in some States have been able to enforce their rights by joining unions, in other States they have chosen instead to band together in worker centers to campaign for voluntary agreements. *See, e.g.,* comments by FLOC, the UFW Foundation, the Farmworker Association of Florida, and CDM; *see also* the Campaign for Fair Food supported by the Coalition of Immokalee Workers in Florida. Farmworkers also have engaged in concerted, collective action through litigation to enforce their rights. *See, e.g., Garcia-Celestino,* 843 F.3d at 1285 (class action filed by H–2A workers in Florida bringing claims against labor contractor and fruit grower under FLSA, State minimum wage law, and State breach of contract law for failure to pay required wages); *Gonzalez-Rodriguez* v. *Gracia,* No. 5:21–CV–406, 2023 WL 2450170 (E.D.N.C. Feb. 6, 2023) (collective action filed under FLSA by H–2A workers who worked as both cooks and field workers in North Carolina alleging that employer failed to pay them, physically and sexually abused them, took possession of their passports and threatened violent retaliation if they attempted to escape); *Reyes-Trujillo* v. *Four Star Greenhouse, Inc.,* 513 F. Supp. 3d 761, 773–74 (E.D. Mich. 2021) (complaint filed by H–2A workers against grower under Federal and State laws alleging that employer and its labor contractor did not pay them properly and retaliated against workers who raised concerns by having them jailed and removed from the United States).

And as detailed in the NPRM and below, concerted activity under this rule need not include any formal organization of workers, as it includes employee activity ''engaged in with or on the authority of other employees, and not solely by and [on] behalf of the employee himself,'' and can consist of two or more workers presenting joint requests or grievances to their employer, among other activities. 88 FR at 63793 (citations omitted). Concerted activity also encompasses workers' individual actions when they seek to initiate, induce, or prepare for group action, or when workers bring shared complaints to the attention of management or an enforcement agency. *Id.* As stated in the NPRM, activity for ''mutual aid or protection'' encompasses activities for which ''there is a link between the activity and matters concerning the workplace or employees' interests as employees.'' *Id.* (citations omitted). For example, as further detailed below, ''concerted activity for mutual aid and protection'' can be as simple as one worker speaking up for another, or two workers approaching their employer jointly, to complain about a lack of clean drinking water or inadequate or unsanitary toilet facilities in violation of OSHA field sanitation standards.[78] The Department also recognizes that there are many ways that workers can seek to advocate on behalf of their working conditions and seeks in this final rule to protect all such activities. Therefore, after consideration of the comments, the Department has modified the worker voice and empowerment provisions from those proposed in the NPRM. As described in greater detail below, in response to concerns raised by commenters, the Department will not finalize the proposals to require employers to provide a requesting labor organization with a list of employee contact information, nor the requirement that an employer disclose whether it will bargain in good faith over a neutrality agreement with a labor organization, nor the right of access to employer-furnished housing for labor organizations. The Department will finalize, with the modifications described below, the worker protections against unfair treatment at § 655.135(h) and the right to a representative in certain disciplinary proceedings at § 655.135(m). The Department also adopts a significantly modified version of the ''captive audience meetings'' provision at proposed § 655.135(m)(3). Finally, the Department will finalize the explicit right of H–2A or corresponding workers to invite or accept guests to worker housing.

A number of commenters argued that the Department lacks statutory authority to promulgate its proposed worker voice and empowerment regulations. Several trade associations, including FFVA and IFPA, commented that the Department's proposal unlawfully sought to make jobs more attractive to U.S. workers. These commenters also argued the Department lacks authority to establish a ''baseline'' of acceptable standards for working conditions below which workers in the United States would be adversely affected. Other commenters stated that the Department's proposals could not prevent adverse effect when many agricultural workers in the United States lack collective bargaining rights. For example, wafla commented that the baseline of working conditions is ''the absence of collective bargaining rights in agriculture'' and that the Department therefore lacked authority to attempt to expand collective bargaining rights for H–2A workers. Commenters also asserted that the Department failed to properly consider the needs and rights of employers in developing these worker voice and empowerment proposals, noting that the H–2A statute requires the Department to balance the competing goals of providing U.S. employers with a needed workforce while preventing adverse effect on similarly employed workers in the United States. Relatedly, commenters stated that the Department selectively proposed to adopt only certain provisions of the NLRA, excluding protections built into the NLRA for employers to challenge unfair labor practices by unions.

The Department does not intend with this final rule to make jobs more attractive to U.S. workers. *See Williams,* 531 F.2d at 306–07 (Department may not set AEWR based on ''attractiveness to workers''). Neither is the Department granting collective bargaining rights to H–2A and corresponding workers, nor regulating the conduct of unions. Instead, as described above, the Department seeks to prevent adverse effect on similarly employed workers by ensuring that workers have the tools to ensure that their rights under the H–2A program are not violated and to advocate regarding the terms and conditions of their employment, on more equal footing with similarly employed workers in the United States. Though such similarly employed workers may be excluded from the NLRA's protections, they may be less likely to face the unique vulnerabilities and forms of retaliation experienced by H–2A workers described above. The tools adopted in this final rule include the right for workers to engage in protected, concerted activity without fear of retaliation and additional worker protections to empower workers in order to engage in advocacy regarding the terms and conditions of employment. In adopting these provisions, the Department is exercising its long-recognized authority to establish the minimum terms and conditions of employment (*i.e.,* the ''baseline'' of working conditions) necessary to ''neutralize any 'adverse effect' resultant from the influx of temporary foreign workers.'' *Id.; see also Garcia-Celestino,* 843 F.3d at 1285. As

[78] *See, e.g.,* DOL, *OSHA Fact Sheet #51: Field Sanitation Standards under the Occupational Safety and Health Act* (2008), *https://www.dol.gov/agencies/whd/fact-sheets/51-osh-act-field-sanitation.*

detailed below in the section-by-section analysis, the Department has determined that the worker voice and empowerment provisions adopted in this final rule are necessary to address a demonstrated imbalance of power between employers and H–2A workers and prevent adverse effect on similarly employed workers. The Department has considered the burden imposed on employers for each proposal and has determined that the provisions adopted in this final rule strike the necessary balance, such that the Department can satisfy its statutory mandate under 8 U.S.C. 1188(a)(1) when granting a labor certification to a prospective H–2A employer.

Many commenters also asserted that the Department's proposals would be preempted by the NLRA if finalized. As the Department explained in the NPRM, some of the provisions of the proposal, including some of those adopted in this final rule, are limited to persons who are engaged in FLSA agriculture (*i.e.,* as defined and applied in 29 U.S.C. 203(f)). This final rule provides, as described more fully below, certain protections for these workers to engage in concerted activity and provides certain rights necessary to safeguard collective action. The Department explained in the preamble of the NPRM that these provisions are not preempted by the NLRA because the NLRA's coverage extends only to workers who qualify as ''employee[s]'' under sec. 2(3) of that Act, and the NLRA's definition of employee expressly excludes ''any individual employed as an agricultural laborer.'' 29 U.S.C. 152(3). Congress has provided that the definition of ''agriculture'' in sec. 3(f) of the FLSA also applies to the NLRA. *See, e.g., Holly Farms Corp.* v. *NLRB,* 517 U.S. 392, 397–98 (1996). Following the plain text of the statute, both Federal courts and the NLRB have long held that the NLRA does not apply to agricultural workers, worker organizing by agricultural workers, or unions ''composed exclusively of agricultural laborers.'' *Di Giorgio Fruit Corp.* v. *NLRB,* 191 F.2d 642, 647 (D.C. Cir. 1951); *see also, e.g., Villegas* v. *Princeton Farms, Inc.,* 893 F.2d 919, 921 (7th Cir. 1990). Because the rights and protections relating to concerted activity in this final rule apply only to workers who fall within the NLRA and FLSA definitions of ''agriculture,'' these provisions apply exclusively to workers who are exempt from the NLRA.

As the Supreme Court explained in *San Diego Building Trades Council* v. *Garmon,* 359 U.S. 236 (1959), the NLRA preempts regulation of activities that either are or arguably are ''protected by § 7 of the [NLRA], or . . . an unfair labor practice under § 8.'' *Id.* at 244; *see also UAW-Labor Emp. & Training Corp.* v. *Chao,* 325 F.3d 360, 363 (D.C. Cir. 2003). Conduct may be ''arguably'' governed by sec. 7 or 8 of the NLRA when there is a plausible argument for preemption ''that is not plainly contrary to [the Act's] language and that has not been authoritatively rejected by the courts or the Board.'' *Int'l Longshoremen's Ass'n* v. *Davis,* 476 U.S. 380, 395 (1986) (citations omitted). Because agricultural workers are expressly excluded from the NLRA by the plain text of the statute, agricultural worker concerted activity is neither protected by sec. 7 of the Act nor subject to sec. 8's limitations on unfair labor practices. *See* 29 U.S.C. 152(3); *see also Bud Antle, Inc.* v. *Barbosa,* 45 F.3d 1261, 1274 (9th Cir. 1994) (''If Bud's employees are 'agricultural laborers,' then the NLRA does not apply, and the company's conduct is not arguably prohibited under the Act.''); *Villegas,* 893 F.2d at 921 (agricultural workers' retaliation claim not preempted by NLRA because they are excluded from the NLRA's protections); *Di Giorgio,* 191 F.2d at 647–49 (holding that NLRA sec. 8's prohibition on secondary boycotts did not apply to a farm union, because an organization composed exclusively of agricultural workers is not governed by the NLRA). Therefore, because this final rule's provisions relating to concerted activity apply only to agricultural workers, the conduct that is protected under those provisions is not even arguably governed by the NLRA and thus not preempted under *Garmon. Id.*

The NLRA also preempts regulation of employer or worker conduct that Congress intended to leave unregulated ''to be controlled by the free play of economic forces.'' *Int'l Ass'n of Machinists & Aerospace Workers* v. *Wis. Emp't Relations Comm'n,* 427 U.S. 132, 140 (1976) (citation omitted). *Machinists* preemption applies to State or Federal regulation of ''economic weapons'' that would ''frustrate effective implementation of the [NLRA's] processes.'' *Id.* at 147–48 (citations omitted). However, Federal courts have held repeatedly that Congress' exclusion of agricultural employees from the NLRA's protection indicates that Congress did not intend to occupy the field of agricultural labor relations and that labor regulations covering agricultural employees do not frustrate effective implementation of the NLRA. *See United Farm Workers of Am.* v. *Ariz. Agric. Emp't Rels. Bd.,* 669 F.2d 1249, 1257 (9th Cir. 1982) (NLRA does not preempt State regulation of agricultural laborers); *Willmar Poultry Co.* v. *Jones,* 430 F. Supp. 573, 577–78 (D. Minn. 1977) (same). Similarly, courts have held that *Machinists* preemption does not bar labor relations regulations that apply to other workers excluded from the NLRA. *See, e.g., Davenport* v. *Wash. Educ. Ass'n,* 551 U.S. 177, 181 (2007) (public employees); *Chamber of Commerce* v. *City of Seattle,* 890 F.3d 769, 793 (9th Cir. 2018) (independent contractors); *Greene* v. *Dayton,* 806 F.3d 1146, 1149 (8th Cir. 2015) (domestic service workers). Accordingly, the provisions of this final rule applicable only to agricultural employees excluded from the NLRA are not prohibited under *Machinists* preemption.

Many commenters attempted to distinguish *Garmon* and *Machinists,* and related cases, from the Department's proposed rule, opining that because the Department is a Federal agency, rather than a State, a different preemption analysis must apply. For example, Willoway Nurseries stated that the Department's preemption analysis ''negates the point that Congress spoke as to what the Executive could do when it comes to agricultural workers, and they are exempt from the provisions of the NLRA.'' FFVA similarly opined that, ''[w]hile states may be able to legislate where Congress has not 'occupied the field,' the U.S. Department of Labor, importantly, is not a state.'' The comment continued, ''[r]egarding labor policy for agricultural workers, Congress was in no way silent as to a policy. The NLRA expressly excluded agriculture laborers from the provisions of the Act.''

These commenters fail to recognize that, as the Supreme Court and circuit courts have made clear, both the *Machinists* and *Garmon* analyses apply to consideration of whether the NLRA preempts any laws or regulations, whether promulgated by the Federal government or by State governments. Over 30 years ago, the Supreme Court observed that ''[t]he *Machinists* rule creates a free zone from which all regulation, whether federal or State, is excluded.'' *Golden State Transit Corp.* v. *City of Los Angeles,* 493 U.S. 103, 111 (1989) (citations omitted). The lower courts have recognized this as well. *See, e.g., Chamber of Commerce* v. *Reich,* 74 F.3d 1322 (D.C. Cir. 1996) (''Nor, as we have noted, is there any doubt that *Machinists* 'pre-emption' applies to federal as well as state action.''). As set forth above, the Department's rule is not preempted under *Machinists.* Similarly, *Garmon* preemption is equally relevant to determining whether the NLRA preempts Federal or State laws or

regulations. *See, e.g., UAW-Labor Emp. & Training Corp.,* 325 F.3d at 363 (considering whether Department posting regulation was preempted by the NLRA under *Garmon*); *Nat'l Ass'n of Mfrs.* v. *Perez,* 103 F. Supp. 3d 7, 22 (D.D.C. 2015) (same). As the D.C. Circuit has explained, the relevant inquiry under *Garmon* is whether the activity in question is ''arguably'' protected or prohibited under the NLRA; this question applies equally to examine State and Federal laws and regulations. *UAW,* 325 F.3d at 363–65. And as explained above, the provisions of this final rule relating to self-organization are neither arguably protected nor arguably prohibited under the NLRA.

For the most part, though, commenters asserted that the Department's proposals would be preempted by the NLRA because, in their view, the Department lacks any authority to protect rights relating to self-organization and concerted activity for workers excluded from the NLRA. Commenters, including employers, trade associations, and a group of State Attorneys General, also contended that the Department exceeded its authority under the INA by regulating labor relations in the agricultural sector. In particular, these commenters pointed to the exclusion from the NLRA's protections of agricultural workers to demonstrate that the Department lacks authority for its proposed regulations. A comment from 22 State Attorneys General stated that the Department is ''seeking to circumvent'' Federal law ''by granting foreign workers federal rights that no American agricultural worker has.'' The U.S. Chamber of Commerce stated that ''nothing in INA § 1188's words or context suggests that Congress meant to enact a full-scale program of labor-management relations.'' The National Right to Work Legal Defense Foundation, Inc. stated that there is ''no reasonable basis for concluding that [the INA] grants the Department sweeping authority to create substantive labor laws for agricultural employees.'' And the Michigan Farm Bureau stated, ''Congress spoke as to what the Executive could do when it comes to agricultural workers, and they are exempt from the provisions of the NLRA.''

In other words, these commenters argue that because the NLRA does not protect concerted activity involving agricultural workers, no other Federal law nor agency may do so. The D.C. District Court confronted and rejected a similar argument in *Nat'l Ass'n of Mfrs.* v. *Perez,* regarding a Departmental posting regulation, explaining that ''[t]he Supreme Court has never found that Congress intended for the NLRA to occupy the 'field' with respect to the regulation of labor concerns.'' 103 F. Supp. 3d at 25. The district court further explained that ''Congress did not intend for the NLRA to wholly occupy the field with respect to labor regulation and thereby foreclose all other regulation of that area.'' *Id.* Importantly, the court also observed that the Department's regulation there was subject to the authority of the Procurement Act and not the NLRA. *Id.*

Here too, the Department is neither attempting to extend the full rights and benefits of the NLRA to agricultural workers nor attempting to devise a ''full-scale program of labor-management,'' as the U.S. Chamber of Commerce asserted. Instead, as set forth above, the Department is issuing these regulations pursuant to its statutory authority under the INA to better protect against adverse effect on similarly employed workers caused by the use of the H–2A program. This final rule, as detailed more fully in the section-by-section analysis below, provides for certain rights and protections to better protect workers employed under the H–2A program and excluded from the NLRA's coverage to engage in concerted activity, including self-organization, to better protect against adverse effect in light of the unique vulnerability of this workforce described above. Accordingly, these provisions establish and clarify labor standards for workers employed under the H–2A program. The labor standards in this rule do not apply to agricultural workers beyond the scope of the H–2A program. While the Department recognizes and appreciates the significant labor needs of U.S. agricultural employers, it notes that employer participation in the H–2A program is voluntary. Employers that object to compliance with the requirements of this final rule need not participate in the H–2A program at all. However, those employers that do seek the benefits of the H–2A program—namely, the ability to employ H–2A workers—must agree, as a condition of receiving the necessary labor certification, to comply with the terms and conditions of employment that the Department has determined are necessary to prevent adverse effect on similarly employed workers. *Cf. Adm'r* v. *Azzano Farms, Inc.,* ARB No. 2020–0013, 2023 WL 3042229, at *10 (ARB Mar. 30, 2023) (observing that the ARB has long recognized that employers that opt to participate in and obtain the benefits of the INA's temporary labor certification programs may not later disavow the requirements of those programs). As detailed in this section, the Department has determined that certain additional or expanded requirements are necessary to prevent such adverse effect.

In addition, even within the context of the H–2A program, the Department's final rule does not require collective bargaining, employer recognition, or any other action by the employer in response to worker organizing. *Cf. Rest. Law Ctr.* v. *City of New York,* 90 F.4th 101, 118 (2d Cir. 2024) (concluding that a New York State law protecting workers from arbitrary terminations and reductions in work hours and providing for arbitration is not preempted by the NLRA under *Machinists*). Instead, as outlined above and further detailed in the section-by-section analysis below, this final rule clarifies and expands existing protections for workers engaging in protected activities, including exercising rights under State and local laws; offers new protections for workers engaged in FLSA agriculture to engage in concerted activity; provides limited access to representation in disciplinary proceedings; and ensures greater access for workers to key service providers and to information about workers' rights.

Finally, the rights and protections detailed herein, which are pursuant to and in furtherance of the INA's requirements, are mutually supplemental to those required under the NLRA; an employer subject to either act (or both acts, in certain cases, as discussed below) must comply with all applicable laws and neither precludes application of the other. *See Powell* v. *U.S. Cartridge Co.,* 339 U.S. 497, 518–520 (1950).

For example, as noted in the preamble to the NPRM, because certain provisions of this proposed rule would be limited to workers engaged in FLSA agriculture, the Department recognizes and intends that workers who are not engaged in FLSA agricultural labor (*e.g.,* those workers engaged in logging occupations) will not be covered by those provisions of this final rule. The vast majority of workers excluded from these protections, however, are covered by the NLRA and are thus already afforded a right to engage in concerted activity under that law. Nothing in this final rule alters or circumscribes the rights of workers already protected by the NLRA to engage in conduct and exercise rights afforded under that law.

A number of commenters also stated that the Department's proposed regulations would violate the major questions doctrine, as set forth by the Supreme Court in *West Virginia* v. *EPA,* in which the Court held an agency

''must point to clear congressional authorization for the power it claims,'' rather than a ''merely plausible textual basis,'' in ''certain extraordinary cases.'' 597 U.S. 697, 723 (2022) (citations omitted). The Department's final rule does not implicate the major questions doctrine. First, this is not a rule that asserts ''extravagant statutory power over the national economy,'' *id.* at 724. The Department does not seek to regulate employers generally with this rule, or even agricultural employers at large; this rule applies only to those agricultural employers that have opted to participate in the H–2A program. Accordingly, the labor standards and protections in this rule do not apply to agricultural workers beyond the scope of the H–2A program. While an increasing number of employers have chosen to participate in the H–2A program, the program still makes up only a small fraction of the agricultural workforce.[79]

Second, this is not a case where the agency relied on statutory language in the ''vague language of an ancillary provision.'' *West Virginia,* 597 U.S. at 724 (citation omitted). Nor has the Department relied on a ''long-extant statute'' to claim ''unheralded power.'' *Util. Air Regul. Grp.* v. *EPA,* 573 U.S. 302, 324 (2014). Nor is this a case in which the Department lacks ''comparative expertise in making [the relevant] policy judgments,'' *West Virginia,* 597 U.S. at 729 (citation omitted), or has asserted authority that falls outside its ''particular domain,'' *Ala. Ass'n of Realtors* v. *HHS,* 141 S. Ct. 2485, 2489 (2021). To the contrary, as previously noted, the relevant grant of authority at issue here at 8 U.S.C. 1188(a) is one that the Department has long relied on to establish program requirements that ensure that the employment of H–2A workers does not adversely affect the wages and working conditions of workers in the United States similarly employed, and is an area where the Department has significant expertise. *See, e.g.,* 2023 NPRM, 88 FR at 63787; 2010 H–2A Final Rule, 75 FR at 6948 (discussing the need to ''prevent[] the exploitation of foreign workers, with its concomitant adverse effect on U.S. workers''); 2008 H–2A Final Rule, 73 FR at 77159 (noting that foreign workers ''may be subject to exploitation in ways that would adversely affect the wages and working conditions of U.S. workers by creating conditions resembling those akin to indentured servitude, driving down wages and working conditions for all workers, foreign and domestic''); 1987 H–2A IFR, 52 FR at 20508, 20513 (describing the ''minimum'' terms and conditions of employment necessary to prevent adverse effect). Since the inception of the H–2A program, these program requirements have included protections from retaliation for workers who exercise or assert their rights under the H–2A program, including by raising concerns or filing a complaint regarding the terms and conditions of their employment. 1987 H–2A IFR, 52 FR at 20517. Similarly, the Department has long required H–2A employers to provide workers with certain rights and benefits not required of other agricultural employers that do not utilize the H–2A program, such as the provision of meals or kitchen facilities and the provision of transportation and subsistence costs, on the basis that such requirements are necessary under the H–2A program to prevent adverse effect. *Id.* at 20513–16. This final rule simply continues the Department's long history of establishing the minimum terms and conditions of employment necessary under the H–2A program to prevent adverse effect on similarly employed workers. It does so by seeking to expand and improve the tools available to workers protected under the H–2A program to prevent exploitation and to ensure compliance with the law, in light of the Department's program experience and evidence described above demonstrating that the current framework of protections are insufficient to satisfy the Department's statutory mandate. In other words, this final rule does not purport to broadly grant collective bargaining rights to agricultural workers, nor to grant rights to labor organizations; rather, consistent with the Department's history of regulating under the H–2A program, this rule seeks to provide protections to workers in the H–2A program in order to prevent adverse effect.

i. Section 655.103(b), Definitions

In support of the new employer obligations the Department proposed in the NPRM, the Department proposed adding two new definitions to § 655.103(b). For the reasons discussed below, in this final rule the Department adopts the proposed definition of ''key service provider'' with modifications and adopts the definition of ''labor organization'' as proposed.

The Department proposed to define ''key service provider'' to mean a health-care provider; a community health worker; an education provider; an attorney; a legal advocate or other legal service provider; a government official, including a consular representative; a member of the clergy; and any other service provider to which an agricultural worker may need access. The list of service providers included in the proposed definition was intended to be illustrative and not exhaustive. The Department sought comment on the scope of this proposed definition, in particular as to whether it would be sufficient, whether other types of service providers should be included in the list of examples in the regulation, or whether this definition would be too broad.

The Department also proposed to define ''labor organization'' to mean ''[a]ny organization of any kind, or any agency or employee representation committee or plan, in which workers participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work.'' The proposed definition is similar to the one used under the NLRA, with a key difference to reflect the nature of the H–2A program. While the proposed definition would thus incorporate many NLRA principles regarding the meaning of the term ''labor organization,'' the Department intended the range of organizations that would be considered labor organizations under these proposed regulations to be broader than under the NLRA because the Department's proposed definition would include organizations in which agricultural workers participate, whereas such organizations are excluded under the NLRA. The Department conveyed its belief that this broader definition is appropriate given the unique characteristics of the H–2A program and sought comment on the scope of the proposed definition. The Department also sought comment on whether the definition should include additional criteria or protections to ensure that any such organization would not be dominated, interfered with, or supported by employers, as would be prohibited by sec. 8(a)(2) of the NLRA, 29 U.S.C. 158(a)(2). The Department also welcomed comments on whether other terms introduced by the proposed regulations should be defined in 20 CFR 655.103(b) and on other definitions that the Department should consider.

[79] In 2022, direct on-farm employment amounted to 2.6 million jobs. *See* USDA, *Agriculture and its related industries provide 10.4 percent of U.S. employment, https://www.ers.usda.gov/data-products/chart-gallery/gallery/chart-detail/?chartId=58282* (last visited Apr. 4, 2024). By comparison, in 2022 the Department certified H–2A temporary labor certifications for around 370,000 jobs. *See* USDA, *Florida, California, and Georgia accounted for one-third of H–2A jobs in FY 2022, https://www.ers.usda.gov/data-products/chart-gallery/gallery/chart-detail/?chartId=106604#* (last visited Apr. 4, 2024).

The Department received several comments in support of the proposed definition of ''key service provider'' from farmworker advocates and labor unions, and several comments in opposition to the proposed definition from agricultural associations and agricultural employers.

Several commenters commended the proposed definition as appropriate and not overly broad. CCUSA and USCCB expressed gratitude for the Department's inclusion of ''member of the clergy'' within the definition of ''key service provider,'' commending the Department on its explicit recognition of the important role played by clergy and religious representatives in the lives of H–2A workers.

Many commenters opposing the proposed definition said that the inclusion of the phrase ''and any other service provider to which a worker may need access'' would result in ambiguity and lead to confusion about the types of service providers the definition is intended to cover. Additionally, some commenters supported the addition of the provision but also urged the Department to consider adding other types of service providers to the illustrative list of examples in the definition, such as emergency responders, law enforcement officers, community outreach workers, and translators and interpreters. One commenter, the National Legal Aid & Defender Association (NLADA), asked the Department to clarify that it is the function and not the title of a service provider that determines whether the service provider falls within the definition.

The Department received comments in support of the proposed definition of ''labor organization'' from farmworker advocates and a SWA stating that the definition would provide clarity on the rights in the corresponding changes under the proposed rule. It also received comments in opposition to the proposed definition from agricultural associations, agricultural employers, and farm bureaus. Several commenters opposing the proposal commented that the proposed definition was overly broad, insufficiently clear, and would cause confusion among employers and workers alike about which organizations would be eligible for inclusion. Many pointed out that the Department's proposed definition was broader than the definition included in the NLRA. Some commenters recommended that the Department establish a directory of eligible labor organizations but did not suggest specific criteria for inclusion or exclusion in such a directory. Other commenters expressed that the Department should not expand the proposed definition of ''labor organization.'' The Department did not receive any comments regarding sec. 8(a)(2) of the NLRA, suggesting other needed definitions, or recommending other changes to existing definitions.

In response to comments about the definition of ''key service provider,'' in the final rule, the Department revises the definition to improve clarity and to expand the list of illustrative examples. Specifically, the Department adds ''a translator or interpreter,'' ''an emergency services provider,'' and ''a law enforcement officer'' to the list of illustrative examples in the definition. The Department agrees with commenters that such service providers should be explicitly included, as the services they provide are indispensable to a population of workers that is so often geographically and culturally isolated. The Department declines to add ''community outreach worker'' as the meaning of this term may not be commonly understood; the Department, nevertheless, believes that such individuals fall within the other illustrative examples included in the definition. The Department also replaces the phrase ''and any other service provider to which the worker may need access'' with the phrase ''and any other provider of similar services.'' The Department believes that this wording is clearer and avoids potential confusion about the meaning of ''key service provider'' while retaining the broad and inclusive meaning of the term. The Department also believes that this phrasing will properly convey that it is the function of the service provider and not the provider's title that determines inclusion under this definition, as suggested by commenters. The Department believes that this definition of ''key service provider,'' particularly as applied under new § 655.135(h)(1)(v), will help to prevent adverse effect on similarly employed workers in the United States by ensuring that H–2A and corresponding workers can consult with and receive necessary services to assist them in ensuring employer compliance with the terms and conditions of employment and advocating regarding working conditions, including health and safety, without fear of retaliation.

Upon consideration of comments related to the definition of ''labor organization,'' the Department adopts the definition as proposed in the NPRM. The definition will only be used in connection with the new protection under final 20 CFR 655.135(h)(2)(i) for ''concerted activity'' by persons engaged in agriculture as defined and applied in 29 U.S.C. 203(f). The Department believes that the proposed definition is sufficiently clear to provide a reasonable standard by which employers, workers, and labor organizations may determine the organizations to which the new provision refers. The Department also believes that this definition is sufficient to effectuate the rights under new § 655.135(h)(2)(i) intended to prevent adverse effect on similarly employed workers.

While the Department appreciates commenters' suggestions that the Department maintain a directory of eligible labor organizations, it does not believe that any such directory or list is necessary. The Department is not finalizing its proposals to provide employee contact information to labor organizations, to require H–2A employers to provide access to labor organizations, or to state whether they would agree to bargain with such an organization upon request over neutrality. Thus, this final rule does not create any independent rights or obligations for which such labor organizations would be ''eligible,'' as originally proposed.

ii. Section 655.135(h), No Unfair Treatment

The Department proposed to expand the scope of what constitutes prohibited unfair treatment under § 655.135(h) to better protect workers who exercise certain rights or engage in self-advocacy from intimidation or discrimination, including protections for consulting with key service providers; for exercising rights under any applicable Federal, State, or local laws or regulations, including safety and health laws; and, for certain workers, for engaging in concerted activities for the purpose of mutual aid or protection relating to wages or working conditions. The Department also proposed to redesignate current paragraphs (h)(1) through (h)(5) as (h)(1)(i) through (h)(1)(iv) and (h)(1)(vi). These prohibitions on unfair treatment would continue to require an employer to assure that it ''has not and will not intimidate, threaten, restrain, coerce, blacklist, or in any manner discriminate against, any person'' who has engaged in certain enumerated protected activities pertaining to the H–2A program requirements, namely, filing a complaint, instituting a proceeding, testifying in a proceeding, consulting with an attorney or legal assistance program regarding any H–2A violation, or exercising or asserting any right or protection under the H–2A program. *See* 20 CFR 655.135(h) (2023). The Department also proposed three new

categories of protected activity. First, the Department proposed to protect consulting with a ''key service provider'' (as defined above) on any matter pertaining to the H–2A program requirements, in proposed new § 655.135(h)(v). Second, the Department proposed to explicitly protect exercising rights (including filing a complaint, instituting a proceeding, or testifying in any proceeding) under applicable Federal, State, or local laws or regulations, including safety and health laws, in proposed new § 655.135(h)(vii). Third, the Department proposed a new category of protected activity limited to persons engaged in FLSA agriculture, to protect them from intimidation or other discrimination if the person has engaged in activities related to self-organization, including: any effort to form, join, or assist a labor organization; a secondary activity such as a secondary boycott or picket; or other concerted activities for the purpose of mutual aid or protection relating to wages or working conditions; or for refusing to engage in any or all of such activities. *See* proposed § 655.135(h)(2). To help inform workers of their rights under the H–2A program, the Department also proposed to include the protections that would be afforded under proposed § 655.135(h) in the disclosures required on the job order. The Department sought comments on each of these proposed provisions, which will be discussed separately below.

General Comments

The Department received many comments in support of its proposal to expand retaliation protections from Members of Congress, State Attorneys General, farmworker advocates, State agencies, legal aid organizations, farm labor unions, and others. These commenters noted that farmworkers in general, and H–2A workers in particular, are living and working in a foreign land, are often unfamiliar with their geographical surroundings and legal rights, often live in isolated environments where their access to information and resources is limited, and are entirely dependent on their employers due to their visa status. As noted above in Section VI.C.2.b, these factors make them particularly vulnerable to intimidation, retaliation, and coercion by employers when they seek to advocate for their rights.[80] They noted that preventing employers from suppressing the exercise of those rights is critically important for H–2A workers and that the proposed changes would strengthen farmworkers' rights and ability to advocate for and enforce the minimum working conditions required under the H–2A program without fear of retaliation from employers.

Commenters cited numerous examples of farmworkers who have experienced threats, retaliation, or both from employers when they sought to assert their rights, file complaints, or pursue legal action. The UFW Foundation asserted that many farm employers have prohibited their workers from meeting with service providers, including legal services, medical providers, or other advocates, and that other farmworkers have been unable to access needed services for fear of retaliation, leaving many farmworkers unaware of or afraid to assert their rights. They noted that such tactics make it difficult for the Department or worker advocates to detect egregious violations such as wage theft, charging workers for recruiter fees, and other violations of employment-related laws, and to enforce existing worker protections under the H–2A program. Farmworker Justice noted that some employers have attempted to surveil workers and restrict their movements, which can intensify workers' isolation and fear of retaliation.

Another commenter cited a number of court cases in which H–2A workers have complained of retaliation, as well as studies showing that H–2A workers are unlikely to complain about unlawful and substandard working conditions because of fear. *See, e.g., West* v. *Butikofer,* No. 19–cv–1039, 2020 WL 5245226, at *2 (N.D. Iowa Aug. 18, 2020); *Arreguin* v. *Sanchez,* 398 F. Supp. 3d 1314, 1320, 1325 (S.D. Ga. 2019); *Ruiz* v. *Fernandez,* 949 F. Supp. 2d 1055, 1076 (E.D. Wash. 2013); *Lopez* v. *Fish,* No. 2:11–cv–113, 2012 WL 2126856, at *1 (E.D. Tenn. May 12, 2012). These commenters stated that better access to advocates and service providers would help correct these problems and ensure acceptable working conditions for both H–2A and other farmworkers. They supported strengthening protections against retaliation and making sure that these protections are clearly communicated at the beginning of the employment relationship, such as through the job order, to help ensure that employers who break the law and engage in intimidation do not go unpunished.

The Department also received several comments from agricultural associations and agricultural employers generally opposing its proposals, as discussed above in Section VI.C.2.b, although very few specifically referenced the ''unfair treatment'' proposals. Other commenters contended that the proposed rules were overbroad, redundant, and unnecessary, that workers are already protected against retaliation by the existing rules, and that expanding the prohibitions would lead to unfounded accusations against employers.

Some commenters requested clarification or modification of the existing anti-retaliation protections. Farmworker Justice requested that the Department include broader language expressly protecting workers from retaliation for asking questions about pay; suggesting that restrooms be cleaned more frequently; or ''exercising any right'' or ''opposing any practice'' covered under Federal, State, or local laws; and asked the Department to clarify that ''filing a complaint'' in § 655.135(h)(1)(i) and proposed § 655.135(h)(1)(vii) should be interpreted broadly. A State agency suggested that the Department add the specific term ''interfere with'' to the list of prohibited adverse actions in § 655.135(h)(1), since ''interference'' with protected rights is a prohibited unfair labor practice under both the NLRA, 29 U.S.C. 158(a)(1) and the ALRA, Cal. Lab. Code § 1153, and also appears in California anti-retaliation statutes. The commenter also recommended adding a subsection that specifically prohibits discrimination against any person who has ''assisted, or participated in any manner in an investigation, proceeding, or hearing under 8 U.S.C. 1188,'' opining that participating in or providing evidence in an investigation is not currently protected under the Department's existing language.

An employer agent suggested that in lieu of redesignating and expanding the ''unfair treatment'' framework as outlined in the NPRM, the Department should instead simply require employers to provide ''assurances'' that they will not discriminate or retaliate, and should also include ''affirmative defenses'' stating that an adverse employment action will not be deemed unfair treatment if the adverse employment action was for a lawful, job-related reason or the employer had no actual or constructive knowledge of the protected actions taken by the worker. This comment suggested that the absence of a requirement that the employer had actual or constructive notice of a worker's engagement in protected activity could create perverse incentives for fraud and abuse,

[80] *See* Farmworker Justice Report at 30–31 (noting that H–2A workers fear retaliation in the form of discharge, deportation, or the denial of a job in the future; H–2A workers work for short periods and often ''lack the trust established among co-workers over a longer period of time''); CDM Report at 4–6.

especially where an employer may have legitimate, job-related reasons for discharging a worker. The comment contended that, under the existing language, any grievance or consultation would trigger legal protection from adverse employment action, even if the grievance or consultation does not concern any legally protected action or right, making it difficult or impossible for an employer to terminate a worker's employment even where they have a legitimate basis for doing so.

General Discussion

The Department adopts the proposed revisions with the modifications described in this section-by-section analysis. As explained in the NPRM and above, the Department continues to believe that these additional protections for unfair treatment and retaliation are necessary to prevent an adverse effect on the working conditions of workers in the United States similarly employed, as required under 8 U.S.C. 1188(a)(1), since workers must be free to file complaints and otherwise seek to enforce their rights without fear of retaliation or discrimination. The Department has long recognized that such protections are essential to the effective functioning of a complaints-based enforcement regime. *Mitchell* 361 U.S. at 292 (agreeing with the Department's interpretation of the FLSA's anti-retaliation provision and explaining that Congress ''chose to rely on information and complaints received from employees seeking to vindicate rights'' and ''effective enforcement could thus only be expected if employees felt free to approach officials with their grievances''); WHD, Field Assistance Bulletin No. 2022–02, Protecting Workers from Retaliation (Mar. 10, 2022) (FAB 2022–02);[81] *see also Kasten* v. *St.-Gobain Performance Plastics Corp.,* 563 U.S. 1, 12 (2011) (explaining that the FLSA ''antiretaliation provision makes [its] enforcement scheme effective by preventing 'fear of economic retaliation' from inducing workers 'quietly to accept substandard conditions.' '') (quoting *Mitchell,* 361 U.S. at 292). Based on both its enforcement experience and on the numerous comments citing examples of intimidation and retaliation against workers in the H–2A program, the Department believes that expanding the regulations' protections against unfair treatment is necessary to prevent adverse effect on the working conditions of workers in the United States.

For example, in the last few years alone, the Department has debarred and assessed penalties against H–2A employers that instructed workers to lie about their pay to investigators and threatened to kill, harm, punish, fire, blacklist, or deport workers for talking to authorities.[82] The Department also assessed penalties against at least two H–2ALC employers who confiscated workers' passports at three different farms to keep them from leaving their employment after they discovered that they were being underpaid.[83] In other recent cases, the Department charged a vineyard employer with unfair treatment violations after it retaliated against H–2A employees who asked why they were not being paid the required contract wage rate by dismissing them and sending them back to their home countries before the termination of the work contract.[84] In another instance, nine H–2A farmworkers filed a civil lawsuit against the employers for wage theft, underpayment, false imprisonment, and retaliation.[85] The Department has also recently obtained temporary restraining orders and preliminary injunctions against H–2A employers who, after workers requested more food and water, threatened workers with a gun, shooting twice near the workers, and who have threatened to physically assault, harm, fire, and deport workers who complained or spoke to WHD investigators.[86] In many of these cases, investigators reported that workers sought to remain anonymous for fear of retaliation, and often refused to speak with or cooperate with investigators at the worksite for fear that their employer would find out; in one case, the employer interrupted an employee interview and sought to eject the investigator from the property. These examples are just a few among the many cases where WHD has investigated and uncovered retaliation by H–2A employers against workers who raised concerns regarding their rights under the program.

The Department did not propose any changes to the prohibited conduct or existing protected activities under current § 655.135(h), other than to redesignate current paragraphs (h)(1) through (h)(5) into paragraphs (h)(1)(i) through (h)(1)(iv) and paragraph (h)(1)(vii). Therefore, it declines to adopt any substantive changes suggested by commenters to those provisions and finalizes those redesignations as proposed. However, the Department seeks to clarify that the existing protections for ''fil[ing] a complaint'' in final § 655.135(h)(1)(i) and ''exercis[ing] or assert[ing] . . . any right or protection'' under the program in final § 655.135(h)(1)(vi) already protect a wide range of advocacy, including asking questions about pay, requesting compliance with health and safety requirements, opposing illegal practices, reporting criminal conduct, talking to WHD investigators, and participating in or providing evidence in an investigation. *See, e.g., Kasten,* 563 U.S. at 17 (holding that ''filing any complaint'' includes oral complaints under the FLSA); FAB No. 2022–02 at 9 (explaining that asking an H–2A employer to provide food and water is covered under the existing ''no unfair treatment'' provisions).

iii. Section 655.135(h)(1)(v), Consulting With Key Service Providers

Recognizing that H–2A workers frequently face barriers in accessing certain services, as discussed in the NPRM, the Department proposed to broaden the range of service providers and advocates with whom consultation regarding the terms and conditions of employment under the H–2A program is explicitly protected. Specifically, the Department proposed to add a new paragraph (h)(1)(v) to the existing list of protected activities at § 655.135(h), which would protect consulting with a ''key service provider,'' as defined in proposed § 655.103(b), regarding matters under the H–2A program. This proposal, like those in the existing list of protected activities at current § 655.135(h), would not be limited to persons engaged in FLSA agriculture. The Department noted that workers are already entitled to access and meet with many different service providers to discuss or assert rights under the H–2A program, without fear of retaliation under the Department's current regulatory framework. For example, under the current regulations, an employer may not retaliate against a worker because the worker goes to see a doctor to care for an injury the worker incurred while on the job, or because the worker consults a worker's rights advocacy organization regarding the employer's failure to pay the wages promised in the job order. *See, e.g.,* 20 CFR 655.135(e) and (h)(5). However, it proposed to make these rights explicit, and to include this express assurance on the job order (Form ETA–790A), in order to help ensure that workers will be aware of this protection. The Department stated that clarifying protections for consultation with such providers would increase the likelihood that workers will receive necessary services, help prevent the frequent isolation that renders workers more vulnerable to H–2A violations and other forms of labor exploitation, and better equip workers to enforce their rights under the program.

The Department received many comments in support of this proposal from farmworker advocates, State agencies, legal aid organizations, and others. In particular, the UFW Foundation asserted that farmworkers need better protections for consulting with key service providers such as health-care providers, education providers, legal services providers, clergy, governmental officials, or consular representatives. They cited many examples where employers have prohibited employees from meeting with such providers, including legal services and medical providers, and where workers have been unable to access needed services for fear of retaliation. For example, the comment highlighted ''a [farmworker] from Oaxaca . . . [who] fainted because of the heat and he was fired after going to the doctor'' and another farmworker of 35 years explained that he ''was once fired unjustly due to me telling the foreman that I had a foot injury.'' Another farmworker was threatened with losing her job after she complained about the lack of water while working in extreme heat.

An H–2A farmworker in Washington stated that his employer prohibited him from meeting with a key service provider and that he feared retaliation if the employer found out about the meeting. Another H–2A farmworker in Washington mentioned that his employer also prohibited him from meeting with key service providers, and, if other workers did meet with providers, they had to do so covertly. An H–2A worker in Nevada stated that workers on his farm have to pay for each medical visit outside of their workplace, and, if the worker gets too sick, the employer sends them back to their home country so that the employer is not responsible for any medical bills. He also commented that two H–2A farmworker colleagues died in a car accident in October 2023 and their employer refused to do anything about it until the Mexican consulate intervened.

Another farmworker association, the Farmworker Association of Florida, commented that many farmworkers remain isolated and lack access to medical care, transportation, and necessary medications, and that guaranteed access to advocates and service providers would help correct these problems, reduce fear of retaliation, and improve working conditions. Farmworker Justice also strongly supported the proposal, commenting that H–2A workers need access to a variety of essential services, including access to medical care for routine appointments, care for chronic conditions, emergency medical attention, and access to legal service providers, consulates, and other advocates to obtain important information about their rights and legal representation when their rights are violated. They stated that workers are commonly prevented from filing for workers' compensation or obtaining medical care out of fear of retaliation, that some employers threaten to send workers home because they are injured and cannot work, and that other employers insist on going with workers to the doctor, or refuse to transport them to the doctor, to prevent the report of a workplace injury. Farmworker Justice also recommended that the provision should be expanded to include additional rights for legal service providers, emergency providers, and others. The Department received a few comments from trade associations and agents opposing the proposal as unnecessary, because workers already enjoyed the right to meet with legal services and medical providers, and because the right was already guaranteed in certain States.

The Department adopts the proposal without modification, for the reasons set forth in the NPRM, and because the comments demonstrated the need for this protection to be made explicit. Although such consultation is protected under the Department's current regulations, the comments demonstrate that workers are being prohibited from accessing these key service providers, and thus the Department believes it is necessary to clearly spell out this right for both workers and employers. This final rule will help increase the likelihood that workers receive the vital services that they need to ensure compliance with their rights and protections under the program and to advocate regarding working conditions. As explained above, workers must be free to exercise such rights without fear of retaliation to avoid adverse effect on similarly employed workers.

iv. Section 655.135(h)(1)(vii), Exercising Rights Under Federal, State, or Local Laws

The Department also proposed to clarify existing regulations by adding a new provision, § 655.135(h)(1)(vii), to explicitly protect complaints, proceedings, and testimony under any applicable labor- or employment-related Federal, State, or local law or regulation, including those related to health and safety. It explained that the proposal was intended to explicitly prohibit employers from retaliating against any person who files a complaint, institutes or causes to be instituted any proceeding, or testifies or is about to testify in any proceeding under or related to any applicable Federal, State, or local labor- or employment-related law, rule, or regulation. The Department noted that these activities are already protected under the Department's existing regulatory framework because existing 20 CFR 655.135(e) requires employers to comply with all applicable Federal, State, and local laws, and § 655.135(h)(1) and (5) prohibit retaliation against workers who assert

their rights under the H–2A program. However, the Department explained that making these rights explicit would better inform workers and employers of their rights and protections both under the H–2A program itself and under other applicable laws. To this end, the new provision would expressly protect workers who seek to enforce their rights under other worker protection laws, including Federal, State, or local laws and regulations that may apply to workers protected under the H–2A program (*see, e.g.,* the Occupational Safety and Health Act, 29 U.S.C. ch. 15, or the FLSA, 29 U.S.C. 201 *et seq.*) against retaliation.

As noted above, the Department received many comments generally supporting this proposal to expand retaliation protections, including comments from Members of Congress, State Attorneys General, farmworker advocates, State agencies, legal aid organizations, farm labor unions, and others. Many workers' rights advocacy organizations expressed support for the proposed provision protecting individuals who exercise rights under Federal, State, or local laws, for a variety of reasons. For example, a number of State Attorneys General commented that the provisions would promote access to information about worker rights, reduce their fear of retaliation, prevent employers from suppressing workers' exercise of those rights, encourage self-advocacy and organizing, and positively impact H–2A workforces. The California LWDA stated that it has encountered instances of employers retaliating against agricultural employees for filing charges or testifying in a proceeding related to State labor law violations, which the commenter said the rule would help prevent. The commenter cited numerous examples of retaliation arising under the ALRA, Cal. Lab. Code § 1153, noting that such retaliation ''strikes at the very protections that the ALRA seeks to enforce by denying workers access'' to processes and remedies administered by the California Agricultural Labor Relations Board (ALRB).[87] The commenter noted that such cases demonstrate that farmworkers need protections not only when they file complaints or initiate proceedings under 8 U.S.C. 1188, but also when they file complaints under other applicable Federal, State, or local laws or regulations like the ALRA. Finally, the commenter also recommended adding language to specifically prohibit discrimination against any person who has ''assisted, or participated in any manner in an investigation, proceeding, or hearing,'' noting that the Department's proposed language does not expressly protect persons who may not testify in a proceeding, but who have participated in or supported the investigation by providing evidence or being interviewed by the Department or a legal service provider. Given the heightened vulnerability that H–2A workers face, the commenter suggested that such protections would provide further protection for workers and encourage them to cooperate in government enforcement proceedings. Another commenter, CDM, highlighted the frequency of sexual harassment and discrimination in the H–2A program, asserting that H–2A employers and recruiters routinely violate U.S. anti-discrimination laws by discriminating based on race, color, age, sex (including pregnancy, sexual orientation, and gender identity), and national origin in both hiring and employment.[88] It asked that the Department make it easier to file complaints and improve remedies for H–2A workers and applicants who face discrimination. CDM also stated that the proposed protection was insufficient and asked the Department to create additional independent anti-discrimination protections for H–2A workers that would be enforceable both by the Department and by private rights of action.

A workers' rights advocacy organization, PCUN, strongly supported the proposal, stating that the organization works with dozens of farmworkers who have experienced retaliation for seeking better working conditions and that the proposed rule would be especially helpful for such workers. In particular, it noted that farmworkers in Oregon recently experienced retaliation for seeking to enforce the new State OSHA regulations to protect workers from extreme heat (see footnote 79 for citations to these and other State employment regulations governing heat exposure). Workers contacted PCUN to report that they were laboring in over 100-degree heat and that the labor contractor they were working for did not provide them with water or shade. After the workers spoke out, they were all fired. This kind of retaliation is a major deterrent for workers to speak out when they see violations, including violations of labor law, discrimination on the basis of sex and immigration status, threats of violence, and issues of human trafficking, in addition to occupational health and safety standards.

The Department received a few comments opposing this and the other unfair treatment proposals as unnecessary or overly burdensome. For example, one commenter noted that such provisions duplicate existing laws and protections, and that this topic is already sufficiently covered by existing H–2A program requirements and by protections offered by the Department of State, various agencies within DHS, DOJ, and even multiple agencies among the 50 States. Another commenter suggested that in lieu of or in addition to expanding the ''unfair treatment'' framework to encompass the exercise of rights under any applicable Federal, State, or local laws as outlined in the NPRM, the Department should require employers to provide assurances or attestations that they do not discriminate.

The Department considered the comments and adopts the proposal to explicitly protect complaints, proceedings, and testimony under any applicable labor- or employment-related Federal, State, or local law or regulation, with the modifications described. The Department believes that making such protection explicit will help clarify and inform workers of their rights, reduce their fear of retaliation for seeking to exercise those rights, protect self-advocacy, and empower workers to enforce their existing rights to be free from discrimination and to a safe and healthy workplace, which in turn will better protect against adverse effect on similarly employed workers. As revised, the provision will expressly protect workers seeking to file complaints under Federal, State, or local anti-discrimination, health, or safety laws. This includes recently adopted regulations to protect against heat stress in States like California, Colorado,

[87] *See, e.g., H & R Gunlund Ranches, Inc.,* 39 ALRB No. 21 (2013) (finding that an employer violated the Act when it laid off a crew that had filed an unfair labor practice charge). The commenter also noted that many such investigations uncover violations of multiple Federal, State, or local laws or regulations, citing *Cinagro Farms, Inc.,* 48 ALRB No. 2 (2022) (Board found an unfair labor practice where the employer fired workers protesting misclassification and unpaid wages, and an independent violation where the employer misclassified employees as independent contractors in violation of the California Labor Code); *Gurinder S. Sandhu dba Sandhu Bros. Poultry and Farming,* 40 ALRB No. 12 (2014) (finding that worker's sexual harassment complaints were protected concerted activity); *Oceanview Produce Co.,* 21 ALRB No. 8 (1995) (finding that employees engaged in protected concerted activity when they refused to sign employer's attendance form for a required safety training that never occurred).

[88] *See, e.g.,* CDM and Penn Law Transnational Legal Clinic, *Engendering Exploitation: Gender Inequality in U.S. Labor Migration Programs* (Jan. 2018), *https://cdmigrante.org/wp-content/uploads/2018/01/Engendered-Exploitation.pdf.*

Oregon, and Washington,[89] and will also protect workers' rights to organize, to engage in collective bargaining, and to be free of unfair labor practices in States like California and New York that have passed laws guaranteeing such rights under State law. *See, e.g.,* ALRA, Cal. Lab. Code § 1153 (West 2024); N.Y. Lab. Law §§ 701–718 (West 2024). The Department disagrees with commenters who contended that the proposal is unnecessary, given the ample evidence of ongoing retaliation and fear of retaliation provided by other commenters. However, the Department adopts the recommendation of commenters who suggested that the new provision include language expressly clarifying that individuals who assist or participate in an investigation or hearing under such laws are protected. As revised, the final provision will expressly protect such participation or assistance in proceedings arising under State employment laws and State labor laws such as those cited above, as well as safety and health laws, consistent with this rulemaking's stated goals of disclosure and ensuring that workers are aware of their rights. The Department has therefore modified the provision to add the specific terms ''assisted or participated'' (or is about to ''assist or participate'') in any ''investigation'' or ''hearing,'' and to specifically reference ''employment laws and labor laws'' in addition to health and safety laws, as previously proposed. Thus, the revised provision will protect any person who has ''[f]iled a complaint, instituted, or caused to be instituted any proceeding; or testified, assisted, or participated (or is about to testify, assist, or participate) in any investigation, proceeding, or hearing under or related to any applicable Federal, State, or local laws or regulations, including safety and health, employment, and labor laws'' from unfair treatment on that basis. Finally, the Department declines to modify the proposal to include a private right of action in this provision (or any of the provisions at § 655.135(h)), since it did not propose or seek comment on such a proposal.

v. Prohibitions on Seeking To Alter or Waive the Terms and Conditions of Employment, Including the Right to Communicate With the Department

In the preamble to the NPRM, the Department noted that its regulations, including § 655.135(h), have long protected a worker's ability to communicate with the Department. In addition, the Department noted that its H–2A regulations have long required employers to fully disclose in the job order the material terms and conditions of employment under the job opportunity and have long prohibited employers from seeking to later alter those terms and conditions. *See* 20 CFR 655.103(b), 655.122(b) and (q); 29 CFR 501.5.

The Department also shared its observation, however, that in recent years, there has been a troubling trend of H–2A employers imposing ''side agreements'' that purport to add or waive certain terms and conditions of employment as compared to those disclosed in the job order. For example, after terminating a group of workers without cause, one H–2A employer presented the workers with forms falsely asserting that the workers had left voluntarily, purporting to waive the workers' rights to the three-fourths guarantee. *Sun Valley Orchards,* 2021 WL 2407468, at *10–11. Other H–2A employers have required workers to sign arbitration agreements after the workers have arrived at the place of employment, without having disclosed such a requirement in the job order. *See, e.g., Martinez-Gonzalez* v. *Elkhorn Packing Co.,* 25 F.4th 613, 619 (9th Cir. 2022); *Magana-Muñoz* v. *West Coast Berry Farms, LLC,* No. 5:20–cv–02087, 2020 WL 3869188, at *5 (N.D. Cal. July 9, 2020); *Cisneros* v. *Alco Harvest, Inc.,* 97 Cal. App. 5th 456, 459 (Cal. Ct. App. 2023). These practices violate the H–2A regulations and may mislead workers regarding their rights under the H–2A program, including their ability to communicate with the Department. Therefore, the Department reiterated in the preamble to the NPRM, as it does here, its longstanding requirements relevant to these ''side agreements.''

First, the Department's H–2A regulations include robust disclosure requirements. Specifically, employers must disclose in the job order all material terms and conditions of employment. *See* 20 CFR 655.103(b) (defining ''job order'' as ''[t]he document containing the material terms and conditions of employment''); 20 CFR 655.121(a)(4) (requiring H–2A job orders to meet the requirements specified for agricultural clearance orders under 20 CFR part 653, subpart F); 20 CFR 653.501(c)(1)(iv) and (c)(3)(viii) (requiring agricultural clearance orders to include material terms and conditions of employment). Each job qualification and requirement listed in the job order must be bona fide, as well as normal and accepted among non-H–2A employers in the same or similar occupations. 20 CFR 655.122(b) (job qualifications and requirements). Finally, the employer must provide H–2A workers with a copy of the written work contract (at minimum, the terms of the job order) before the worker travels to the place of employment. Such written disclosure must be made to workers in corresponding employment no later than the first day work commences. 20 CFR 655.122(q) (disclosure of work contract).

These requirements ensure that employers seeking to employ H–2A workers are adequately and accurately testing the local labor market to determine the availability of U.S. workers for the actual job opportunity and are not imposing inappropriate requirements that discourage otherwise qualified U.S. workers from applying. *See* 2010 H–2A Final Rule, 75 FR at 6901, 6906–6908. These requirements also ensure that workers are apprised of the accurate terms and conditions of employment before accepting employment with the employer and, in the case of many workers, traveling great distances and at significant personal expense to do so. *Adm'r* v. *Frank's Nursery LLC,* ARB Nos. 2020–0015 and 2020–0016, 2021 WL 4155563, at *3–4 (ARB Aug. 25, 2021) (describing the importance of disclosure to workers of all material terms and conditions of employment before the worker accepts the job offer), *aff'd,* No. 21–cv–3485, 2022 WL 2757373 (S.D. Tex. July 14, 2022).

Thus, pursuant to these requirements, an employer may not seek to add new material terms and conditions of employment after the worker arrives at the place of employment, even if such terms and conditions would otherwise be permissible if they had been disclosed in the job order. For example, even if a mandatory arbitration agreement would be a permissible term and condition of employment for a particular H–2A job opportunity if disclosed in the job order, it is a violation of the H–2A regulations for the employer to impose such a material term and condition of employment on the workers if it was not disclosed in the job order. *See Frank's Nursery,* 2022 WL 2757373, at *3–4 (affirming WHD

[89] *See, e.g.,* Cal. Code Regs. tit. 8, § 3395 (Heat Illness Prevention in Outdoor Places of Employment) (2024); Colo. Rev. Stat. Ann. § 8–13.5–203 (Extreme overwork protections) (West 2024); *Or. Mfrs. & Com.* v. *Or. Occupational Safety and Health Division,* No. 1:22–cv–00875, 2022 WL 17820312, at *9 (D. Or. Dec. 20, 2022) (dismissing challenge to Oregon Administrative Rules that protect Oregon workers from exposure to excessive ambient heat temperatures and hazardous levels of wildfire smoke while at work); Wash. Admin. §§ 296–62–095–296–62–09560 (General Occupational Health Standards—Outdoor Heat Exposure), 296–307–097–WAC 296–307–09760 (Safety Standards for Agriculture—Outdoor Heat Exposure) (2024).

Administrator's determination of violation and assessment of a civil money penalty for employer's failure to disclose in the job order a drug testing policy); *see also Magana-Muñoz,* 2020 WL 3869188, at *5 (discussing the Department's regulatory requirements for H–2A job orders and concluding that an arbitration agreement is a material term or condition of employment that must be disclosed in the job order); *Cisneros,* 97 Cal. App. 5th at 460–61 (same); *cf. ETA* v. *DeEugenio & Sons #2,* OALJ No. 2011–TLC–00410, slip op. at 3–5 (OALJ June 13, 2011) (affirming CO's denial of labor certification because employer failed to demonstrate that arbitration and grievance clauses listed in job order were normal and accepted requirements among non-H–2A employers in the occupation); *ETA* v. *Bourne, et al.,* OALJ No. 2011–TLC–00399, slip op. at 9–11 (OALJ June 6, 2011) (same); *ETA* v. *Head Bros.,* OALJ No. 2011–TLC–00394, slip op. at 5–7 (OALJ May 18, 2011) (same); *but see ETA* v. *Frey Produce et al.,* OALJ No. 2011–TLC–00403, slip op. at 6 (OALJ June 3, 2011) (concluding arbitration is not a job ''qualification or requirement'').

Second, and in addition to the disclosure requirements, the Department's H–2A regulations prohibit any person from seeking to have a worker waive any right afforded under the H–2A program. 29 CFR 501.5. Thus, an employer may not—at any time—request that a worker waive or reduce any of the terms and conditions of employment disclosed in the job order or other rights under the H–2A program, such as the provision of meals as disclosed in the job order, the right to the three-fourths guarantee, the prohibition on the payment of fees, the right to file complaints under Federal, State or local laws, or the payment of the H–2A wage rate for hours spent engaged in corresponding employment. For example, through its enforcement experience, the Department has learned of H–2A employers presenting their entire workforces with side ''opt-out'' agreements under which the workers purport to waive their right to employer-provided meals on certain days, despite the employer's disclosure in the job order that meals will be provided every day. The regulations prohibit such practices. In addition, an employer may never seek to prevent a worker from engaging in activity protected under the H–2A regulations, such as filing a complaint with, speaking with, or cooperating with the Department or other Federal, State, or local agency concerning the worker's rights. *See* 20 CFR 655.135(h); 29 CFR 501.4(a).

As explained in the NPRM, the Department is concerned that ''side agreements'' carry significant potential to mislead workers regarding their rights under the H–2A program, including the right to file complaints with and communicate with the Department. For example, an H–2A worker who is terminated without cause but is required to sign a form purportedly ''resigning'' from the job may believe—incorrectly—that they may no longer file a complaint with the Department to enforce their right to the three-fourths guarantee or their right to the cost of return transportation and subsistence. Another worker may misunderstand a ''side'' arbitration agreement as preventing the worker from filing a complaint with the Department before first submitting the issue to the employer's arbitration procedures, even though an employee who agrees to arbitrate a statutory claim is not waiving any substantive rights under the statute. *Gilmer* v. *Interstate/Johnson Lane Corp.,* 500 U.S. 20, 25 (1991). Moreover, an H–2A worker's agreement with their employer to arbitrate employment disputes does not limit the Department's ability to enforce the H–2A program's requirements. *Cf. EEOC* v. *Waffle House, Inc.,* 534 U.S. 279 (2002) (arbitration agreement between employer and employee did not bar EEOC enforcement action under the ADA); *Walsh* v. *Arizona Logistics, Inc.,* 998 F.3d 393, 397 (9th Cir. 2021) (arbitration agreement between employer and employee did not bar Department enforcement under FLSA). Accordingly, where an H–2A employer's job order discloses the existence of an arbitration clause that is otherwise permissible, the SWA and OFLC review the disclosure for actual or implied restrictions on workers' access to complaint systems and may require employers to include language in the job order affirmatively stating that the worker may not be prevented from filing complaints or communicating with the Department.

For efficiency and clarity, and to better inform workers of their rights under the H–2A program, the Department proposed in the NPRM to add standard language to the job order affirmatively stating that a worker may not be prevented from communicating with the Department or any other Federal, State, or local government agencies regarding the worker's rights. The Department also invited comments suggesting other means it could use to better inform workers of their rights and to better inform employers and workers alike of the longstanding limitations on ''side agreements.''

The Department received comments in support and in opposition to this proposal. Farmworker Justice expressed concern that such agreements are often presented in writing even though a worker may not be able to read, and that even if a worker can read, these side agreements are often presented in English, rather than the worker's primary language. Farmworker Justice also stated that workers may be denied the opportunity to have someone review the side agreements with them prior to signing them or may be forced to sign these agreements through intimidation, yelling, threats, or other unlawful measures. This same commenter also noted that such side agreements may force workers to waive rights afforded to them under the H–2A program, or, in the case of arbitration agreements, may lead workers to believe that they do not have a right to communicate with the Department. Another commenter, CDM, expressed concern over the imposition of breach of contract fees and other severe penalties on H–2A workers who leave—or attempt to leave—employment before the scheduled conclusion of the work contract.

Commenters in opposition, which included agricultural employers and agricultural associations, raised several concerns. First, some commenters pointed to the Ninth Circuit decision in *Martinez-Gonzalez* v. *Elkhorn Packing Co., LLC,* asserting that an H–2A employee and employer may enter into a binding arbitration agreement not specifically disclosed in the H–2A job order. These same commenters also asserted that the U.S. Supreme Court has held that arbitration agreements in the employment context are valid and enforceable under the Federal Arbitration Act. Additionally, these commenters stated that if the Department wanted to review arbitration agreements as part of an employer's job order, it could do so by defining such agreements as a ''material term and condition of employment.'' Commenters then asked the Department to specify what it would want to review with respect to an employer's arbitration agreement upon submission of a job order or temporary agricultural labor certification application. Additionally, one anonymous employer commented that it allows its U.S. workers to opt out of the H–2A contract.

For the reasons stated in the NPRM and as reflected in the comments in support of the proposal, the Department reiterates here its position prohibiting these side agreements. Similarly, the Department is including on the job

order the proposed standard language affirmatively stating that a worker may not be prevented from communicating with the Department or any other Federal, State, or local government agencies regarding the worker's rights. The Department believes that these clarifications will help prevent adverse effect on similarly employed workers in the United States by better informing workers of the terms and conditions of the job opportunity and of their rights under the program, improving employer compliance with the Department's longstanding requirements regarding disclosure of the terms and conditions of employment, and protecting workers from retaliation for asserting their rights under the program, including when communicating with any Federal, State, or local agency regarding those rights.

With respect to Farmworker Justice's concern regarding the disclosure of some ''side agreements'' in a language not understood by the worker, the Department notes that, in addition to the disclosure requirements discussed above, the employer must provide each worker a copy of the work contract ''in a language understood by the worker as necessary or reasonable.'' 20 CFR 655.122(q).

In response to concerns from commenters opposed to this proposal, the Department clarifies that it did not take a position in the NPRM and does not take a position in this final rule on whether an undisclosed arbitration agreement may be valid under the Federal Arbitration Act or under any applicable State law. Rather, as in the NPRM, the Department reiterates its longstanding policy that under the Department's H–2A regulations, an arbitration agreement is a material term and condition of the job that must be disclosed in the job order and that it is a violation for the employer to impose such a material term and condition of employment on the workers if it is not included in the job order and disclosed in the work contract. The Ninth Circuit's decision in *Elkhorn* does not require a different conclusion. There, the court addressed only the enforceability of the arbitration agreement at issue under the doctrines of economic duress and undue influence. *Elkhorn,* 25 F. 4th at 629. The court did not consider whether failure to disclose the existence of the agreement in the job order constituted a violation of the H–2A regulations, nor did it consider the impact of any such violation on the enforceability of the agreement under the Federal Arbitration Act or California law. *Id.; see also Cisneros,* 97 Cal. App. 4th at 461 (distinguishing questions presented in *Elkhorn* from question of whether failure to disclose arbitration agreement in H–2A job order violated the H–2A program regulations).

With respect to some commenters' assertions that the Department should amend its regulations to list arbitration agreements as a material term or condition that must be disclosed in the job order, the Department declines to do so, as such a revision is neither required nor practical. As described in the NPRM, the Department's H–2A regulations have long required an employer to include in the job order all material terms and conditions of the employer's specific job opportunity. While the regulations identify certain such materials terms and conditions, the regulations are not exhaustive and make plain that the employer must include those additional material terms and conditions of employment specific to the employer's job opportunity. *See, e.g.,* 20 CFR 655.121(a)(4) (incorporating requirements of 20 CFR part 653, subpart F) and 653.501(c)(iv) (providing nonexhaustive list of material terms and conditions of employment that must be disclosed in job order); *cf. Frank's Nursery,* 2021 WL 4155563, at *3–4 (concluding that drug testing—which also is not explicitly listed in the Department's regulations as a material term or condition of employment—is a material term or condition of employment that must disclosed on the job order). Similarly, the Department did not intend in the NPRM to suggest that H–2A employers must submit for SWA or CO review every arbitration agreement or other ''side agreement.'' Employers that intend to seek such agreements from workers as a requirement or condition of employment must disclose their existence in the job order and work contract in sufficient detail to provide adequate disclosure to workers and to permit the Department to consider whether such agreements constitute normal and accepted requirements among non-H–2A employers in the occupation; employers need not submit the entire agreement to satisfy these requirements. As in the normal course of processing job orders and applications, the reviewing SWA or CO may require additional information from the employer, if necessary.

In response to the comment from an anonymous employer indicating that it allows its U.S. workers to opt out of the H–2A contract, the Department notes that under the H–2A regulations, an H–2A employer's non-H–2A workers engaged in corresponding employment are entitled to the required wage rate for time spent performing that work, and to other benefits offered in the job order. *See, e.g.,* 20 CFR 655.103(b) (definition of corresponding employment); 20 CFR 655.122(l) (rates of pay); 20 CFR 655.122(i) (three-fourths guarantee). Moreover, in accordance with 29 CFR 501.5, it is unlawful for any person to seek to have an H–2A worker, a worker in corresponding employment, or a U.S. worker improperly rejected for employment or improperly laid off or displaced waive any rights afforded to that worker under the INA or under the H–2A regulations. Moreover, under 29 CFR 501.5, any agreement by a worker purporting to waive or modify any rights, even if entered into voluntarily, is void, with certain very limited exceptions.

vi. Section 655.135(h)(2)(i), Activities Related to Self-Organization and Concerted Activity

At § 655.135(h)(2), the Department also proposed a new protected activity relating to self-organization and concerted activity, which would be limited to persons engaged in FLSA agriculture, namely those workers who are not eligible for protection under sec. 7 of the NLRA, 29 U.S.C. 157, because they are not ''employees'' as defined in 29 U.S.C. 152(3). As discussed above, the Department explained that these additional proposed protections are necessary to prevent an adverse effect on the working conditions of workers in the United States similarly employed. 8 U.S.C. 1188(a)(1). Specifically, the Department proposed at § 655.135(h)(2) to protect engaging in activities related to self-organization, including any effort to form, join, or assist a labor organization, as defined in proposed § 655.103(b); a secondary activity such as a secondary boycott or picket; or other concerted activities for the purpose of mutual aid or protection relating to wages or working conditions. The Department also proposed to protect a person's refusal to engage in any such activities.

The Department explained that its enforcement experience has shown that the existing H–2A regulations currently do not provide sufficient protections for such workers to safely and consistently engage in self-advocacy to assert their rights, which adversely affects workers in the United States similarly employed. To address these concerns, the Department proposed to explicitly protect H–2A and corresponding workers engaged in FLSA agriculture who engage in concerted activity. The Department sought comments on whether the proposed additional protections would better empower and equip workers to enforce their existing

rights, thus reducing adverse effect on the working conditions of all similarly situated workers. The Department specifically sought comment on its proposed use of the terms ''concerted activity'' and ''mutual aid or protection,'' which it explained were based upon the general body of case law from the Federal courts and the NLRB broadly construing similar language in sec. 7 of the NLRA; however, it recognized that these terms must ultimately be interpreted consistently with the statutory purpose of the INA and the H–2A program, including the need to prevent adverse effect on workers in the United States and in light of the H–2A program's unique characteristics. It also specifically sought comments on whether to include the terms ''a secondary activity such as a secondary boycott or picket.'' Because the NLRA's prohibition on labor organizations engaging in secondary boycotts or pickets does not apply to the agricultural employees to whom the Department's proposed rule would apply (*see* 29 U.S.C. 158(b)(4)), the Department suggested that expressly protecting such activities would clarify workers' existing rights, prevent unnecessary confusion, avoid disputes, and help parties comply with their obligations under the proposed rule.

Many commenters endorsed the proposal to protect ''concerted activity'' as necessary to ensure effective enforcement and to avoid adverse effect on working conditions for all workers engaged in agriculture, noting that H–2A and other farmworkers frequently suffer from retaliation when seeking to engage in self-advocacy and organizing efforts. For example, Farmworker Justice commented that such additional regulatory safeguards against retaliation for engaging in concerted protected activity are essential to protecting and enforcing safe, fair, and legal working conditions, and that ''affording employees the right to freely discuss workplace concerns without fear of reprisal assures self-enforcement and employer compliance'' with their legal obligations. Farmworker Justice recommended that the regulations specifically protect workers' rights to discuss their workplace concerns among themselves and that employers be prohibited from taking any action to suppress these conversations, noting that ensuring the rights of agricultural workers to provide each other mutual aid and support can reinforce and improve enforcement. They further noted that the ability to confer and to engage in concerted protected activity with their coworkers to assert their legal rights and safe working conditions is even more important to H–2A workers, because their legal and work permit status is tied to a single employer. PCUN noted that many farmworkers report never having seen a DOL or State labor or safety inspector during their time working in agriculture. PCUN supported the proposal because it would give farmworkers more information and agency in making decisions about whether they want to act collectively, give ''modest protections'' to farmworkers who wish to advocate for regarding their working conditions through the use of a union, and reduce unlawful interference from employers.

Other workers' rights advocacy organizations also expressed support for the proposed provision, stating that farmworkers are very concerned about retaliation for taking concerted action to organize and enforce their rights, that retaliation against workers is very common, and that such tactics both violate workers' freedom of association and reduce the ability of authorities to enforce labor laws. Several advocacy organizations commented that these additional proposed protections are important to address the intimidation that farmworkers routinely face and to equip them with agency to advocate regarding their working conditions. Many individual commenters expressed support for strengthening workers' rights to advocate and unionize, with one adding that such activity can help protect them from unjust firing and retaliation.

As described above in Section VI.C.2.b, FLOC commented that it has been able to achieve many improvements for agricultural workers through collective bargaining with employers covering about 10,000 farmworkers in North Carolina, including many H–2A workers. It commented that the proposed protections would greatly help H–2A farmworkers in their efforts to act collectively and to obtain remedies for likely violations of the H–2A program's requirements. A joint comment from several State Attorneys General also expressed support for the provision, reasoning that it would positively impact H–2A workforces, who are particularly at risk of coercion by employers, by preventing employers from suppressing their exercise of their rights. The California LWDA expressed support for the proposed protections, stating that similar protections in its State have led to both workers being better able to advocate regarding their working conditions and stronger enforcement of labor laws. This commenter further recommended that the Department more closely align the proposed provision with language in the NLRA, removing references to wages and working conditions, arguing that such alignment would reduce litigation and allow relevant parties to rely on existing legal interpretations.

By contrast, many employers and trade associations opposed the proposal, for a variety of reasons. As described and addressed in Section VI.C.2.b, they contended that the Department's proposal exceeds its statutory authority, and that the Department failed to demonstrate how the proposed provision would prevent adverse effects on similarly employed workers in the United States, many of whom do not currently enjoy the protections the Department is proposing since they are excluded from the NLRA.

Wafla, a trade association, commented that the provision is redundant because Federal and State laws already protect individuals from threats, intimidation, restraint, coercion, and blacklisting; the commenter also expressed concern that the language defining concerted activity is too broad and that the protection could ''morph from employee discussions among themselves into activity by labor union officials and labor advocates who could claim to represent workers without their explicit consent.'' The National Right to Work Legal Defense Foundation, Inc. commented that the proposed provision would be unworkable because the Department cannot provide an enforcement body or mechanism such as the NLRB, which administers the similar rights and obligations created by the NLRA. The commenter asserted that the Department has not explained how the ''substantive rights and privileges'' created by the proposed rule would be enforced. The commenter stated that, since the Department has no statutory authority to regulate union conduct or punish unions and their officials for their transgressions against employees, the proposal would be particularly unclear for employees who wish to refrain from supporting a union or engaging in union activity.

An agent requested that the Department amend its proposals under § 655.135(h) to include objective standards, notice provisions, and other revisions to ensure due process toward employers. They contended that employers should remain free to take adverse employment action for lawful, job-related reasons against workers who engage in protected activity as long as the adverse employment action is unrelated to the protected activity, the employer did not know about the

protected activity, or both. They pointed out that the proposed provision was so broad that it would be difficult or impossible for an employer to discipline any worker who has ever engaged in concerted activity, even where they have a legitimate basis for doing so. A couple of unions and several advocacy groups specifically took issue with the Department's statement in the NPRM that it did not intend for its proposal to preempt any applicable State laws or regulations that may regulate labor-management relations, organizing, or collective bargaining by agricultural workers. 88 FR 63795. These commenters urged the Department to clarify in both preamble and regulatory text that the proposal is, in fact, intended to preempt State laws that, in the commenters' views, are less protective than the proposed provision, specifically citing two provisions of North Carolina State law, N.C. Gen. Stat. sec. 95–79(b), which prohibit agreements by farmworker unions providing for deduction of union dues and certain agreements relating to litigation with agricultural producers. *See, e.g., Farm Labor Organizing Committee* v. *Stein,* 56 F.4th 339, 345–51 (4th Cir. 2022). By contrast, wafla commented that States are free to choose whether to create agricultural collective bargaining rights applicable to workers in their own States under our system of federalism, and the Department cannot set or enforce a national baseline that applies to H–2A workers in every State.

Many commenters opposed the proposal to explicitly protect workers' rights to engage in secondary activity. The U.S. Chamber of Commerce commented that the proposal violates the NLRA even though that law does not cover agricultural employees, contending that the NLRA would still prohibit a labor organization with mixed membership of agricultural and non-agricultural employees from engaging in a secondary boycott. Thus, the Chamber contended that the Department cannot protect individual workers who engage in such activity because the NLRA bans covered or ''mixed'' labor organizations from engaging in that activity. The Chamber also cited the legislative history of the secondary boycott provision in the NLRA, suggesting that Congress was concerned about the impact of labor disputes in the agricultural sector. Several other trade associations, including AmericanHort, NHC, USApple, the Michigan Farm Bureau, Western Growers, and FSGA, also opposed the proposal. Many of these commenters asserted that the proposal to protect secondary activity, boycotts, and picketing was specifically preempted by the NLRA, that it exceeds the Department's statutory authority under the INA, and that the Department has failed to explain how the proposal would alleviate adverse effects on workers in the United States.

Other commenters, including a workers' rights advocacy organization and a labor union, expressed support for the proposal to specifically protect ''secondary activity,'' but expressed concern that the term ''secondary activity'' is not defined in either the rule or the NLRA. These commenters recommended that the Department include a specific definition, set forth in the AFL–CIO's comment, in the final rule. The AFL–CIO also stated that protecting secondary activity would be appropriate given the ''fissured structure'' of the farm labor industry, where labor recruiters supply workers to farm labor contractors who, in turn, provide labor on farms, who later sell their products to food processors, restaurants, and grocery stores. The comment stated that this severely fissured structure leads to abuse of workers because it involves a complex, hidden supply chain where labor recruiters and labor contractors must compete with one another based on labor costs. Additionally, one employer expressed general support for allowing workers to boycott and picket.

The Department has considered the comments and adopts the provision with modifications as described below. After reviewing the comments, it is clear that the fear of retaliation against farmworkers for taking concerted action to organize and enforce their rights is very common, and that the lack of legal protections for most farmworkers, especially H–2A workers who are vulnerable for the reasons set forth in Section VI.C.2.b, particularly because they are tied to a single employer, has contributed to this problem. The Department believes that prohibiting discrimination against workers for engaging in such activity would help address the intimidation reported by farmworkers, and thereby empower workers to join together to take action to enforce their rights under the program. As detailed in the NPRM and above, H–2A and corresponding workers must be free to advocate on behalf of themselves and their coworkers regarding the terms and conditions of their employment, without fear of retaliation, to prevent adverse effect on similarly employed workers. The Department emphasizes that the activity that is being protected in this final rule is not ''collective bargaining'' or ''unionization,'' but instead is ''concerted activity for mutual aid and protection,'' which encompasses numerous ways that workers can engage, individually or collectively, to enforce their rights. As discussed above in Section VI.C.2.b, farmworkers across the nation have engaged in a variety of concerted activity for mutual aid and protection to enforce their rights, including by banding together in worker centers to campaign for voluntary agreements and working with legal aid groups to file class action lawsuits.

As explained above in Section VI.C.2.b, providing additional protections for H–2A and corresponding workers to safely and consistently advocate on their own behalf regarding working conditions and assert their rights is necessary to ensure that the employment of H–2A workers does not adversely affect the wages and working conditions of similarly employed workers in the United States. Proposals to prohibit retaliation for self-advocacy and concerted activity thus fall within the Department's authority to ensure that foreign labor certification of H–2A workers does not adversely affect similarly employed workers in the United States. And, as explained in Section VI.C.2.b, this proposal is not preempted by the NLRA.

In addition, the Department disagrees that the proposed provision is redundant or unnecessary, that it would provide H–2A workers with more protection than other agricultural workers, that it would protect ''labor union officials and labor advocates'' rather than workers, or that it would create ''new rights and privileges'' for labor organizations. The provision is carefully crafted to apply only to ''any person engaged in agriculture as defined and applied in 29 U.S.C. 203(f)'' (*i.e.,* only those workers who are not already protected by sec. 7 of the NLRA), and it applies equally to H–2A and corresponding workers. By contrast, it does not apply to or create any rights for ''labor union officials,'' ''labor advocates,'' or labor organizations. It also does not purport to require recognition, collective bargaining, or any other action by an employer in response to worker organizing activity. Any such obligations, if they exist, would only apply in those States that have elected to apply their State labor relations programs to agricultural workers and would be unaffected by the new provision proposed by the Department. Instead, this new provision simply prohibits discrimination or retaliation against farmworkers who seek to self-organize or engage in other

concerted activity for mutual aid or protection.

Under the new provision, as explained in the NPRM preamble, an employer generally could not prohibit activities related to self-organization or other concerted activities for the purpose of mutual aid or protection that occur during nonproductive time, for example during lunch breaks, rest breaks, or while workers are riding as passengers in a vehicle when being transported between worksites. Nonproductive time also includes any noncompensable time, such as time after the end of the worker's workday. Similarly, the new provision is intended to permit workers to gather and converse for the purpose of mutual aid or protection in nonwork or common areas during nonwork hours, even if such areas are on employer premises, as explained in the NPRM preamble. For example, workers should generally be free to meet with one another after the end of their workday to discuss wages or working conditions in parking areas; common areas of worker housing, such as indoor or outdoor eating areas; recreational facilities; or other locations on the premises where workers would otherwise typically gather after work. In addition, although employers may establish reasonable work rules that limit discussions or meetings unrelated to the job while the worker is actively performing work, they may not apply or enforce work rules selectively to discourage worker self-organization or other concerted activities. For example, employers may place reasonable restrictions on employees' use of personal devices while in the field but may not apply such restrictions only to certain individuals who the employer suspects are engaged in organizing or other concerted activities, or only to those text messages or phone conversations that the employer perceives to be related to worker self-organization or other concerted activities. Similarly, employers may establish reasonable work rules limiting personal conversations during productive working hours where such conversations would affect productivity but may not selectively enforce such rules against workers for conversing about self-organization or other concerted activities. Such selective enforcement or discrimination in response to protected activity would likely violate this final rule as set forth in 20 CFR 655.135(h)(2)(i).

However, because of the breadth of activity that is protected under § 655.135(h)(2)(i) as concerted activity for mutual aid and protection, and in response to the commenters' concerns that this provision may limit employers from taking disciplinary actions against employees for reasons unrelated to protected activity, the Department has clarified in the final regulatory text that § 655.135(h)(2) prohibits only those adverse actions that are taken because of the listed protected activities. In particular, the Department has revised the language at § 655.135(h)(2) to prohibit adverse actions against any person because such person has engaged in the protected activities set forth in that provision or has refused to engage in such activities. This revision is consistent with the Department's original language prohibiting discrimination and its intent to expressly prohibit intimidation, threats, restraint, coercion, blacklisting, discharging, or any other form of discrimination by an H–2A employer in retaliation against agricultural workers, including prospective or former workers, for engaging in protected activities and ensures due process for employers who are charged with such a violation. As recently explained by the Supreme Court, discrimination typically means ''[t]o make a difference in treatment or favor (of one as compared with others),'' or treating someone worse than another who is similarly situated. *Bostock* v. *Clayton Cty.,* 140 S. Ct. 1731, 1740 (2020) (construing Title VII's prohibition against discrimination, and quoting *Webster's Second* 745 (1954)); *see also Murray* v. *UBS Sec., LLC,* 144 S. Ct. 445, 453 (2024); *Burlington N. & Santa Fe Ry.* v. *White,* 548 U.S. 53, 59 (2006) (''[T]he term 'discriminate against' refers to distinctions or differences in treatment that injure protected individuals.''). Finally, the Department notes that this revision does not require that protected activity be the sole reason for the action against an employee. Rather an employer will violate § 655.135(h)(2) whenever protected activity is a but-for cause of an adverse action against an employee. *See Bostock,* 140 S. Ct. at 1739 (explaining that an adverse action can have multiple but-for causes).

The Department declines the suggestion to delete the phrase ''relating to wages or working conditions.'' As the Department explained in the NPRM, the use of the terms ''concerted activity'' and ''mutual aid and protection'' draws upon the general body of case law from the Federal courts and the NLRB broadly construing similar language in the NLRA. The Department adopts its proposed interpretations of ''concerted activity'' and ''mutual aid and protection'' in this final rule. *See* 88 FR 63793–63794. The Department believes it is appropriate to interpret these terms broadly in order to protect workers' ability to advocate on behalf of themselves and their coworkers regarding the terms and conditions of employment without fear of retaliation, in order to prevent adverse effect. As explained herein and in the NPRM, such advocacy can take a number of forms and the Department concludes it would be contrary to its intent and purpose in adopting this new provision to protect only a narrow set of concerted activities. However, the Department's regulation must ultimately be interpreted consistently with the statutory purpose of the INA and the H–2A program, and thus the Department retains the reference to the general term ''wages and working conditions,'' which it believes is broad and encompassing. For example, as discussed above, farmworkers who band together to protest unsafe housing or transportation, lack of clean drinking water or bathroom facilities, lack of accessible kitchen facilities, unfair or undisclosed deductions for food and beverages, or being offered poor quality or spoiled food would be covered, as would workers who jointly discussed or expressed concerns about their wages or an employer's failure to comply with health and safety laws.

In addition, the Department has modified the language in this final rule to remove the express reference to ''a secondary activity such as a secondary boycott or picket.'' It recognizes the concerns expressed by commenters about the complexity of the concept of secondary activity as developed under decades of caselaw construing NLRA sec. 158(b)(4)(i) and (ii),[90] and has determined that the inclusion of such

[90] The term ''secondary activity,'' as developed in the caselaw, generally regulates the activities of labor organizations, and refers to a key distinction under the NLRA between lawful ''primary strikes and primary picketing,'' which are expressly protected, and threatening or coercive ''secondary'' conduct—that is, conduct aimed at a ''secondary'' or ''neutral'' employer, which is expressly prohibited. *See* 29 U.S.C. 158(b)(4). As explained by the NLRB, ''[t]he NLRA protects the right to strike or picket a primary employer—an employer with whom a union has a labor dispute. But it also seeks to keep neutral employers from being dragged into the fray. Thus, it is unlawful for a union to coerce a neutral employer to force it to cease doing business with a primary employer. That is only one aspect, however, of a complex legal picture.'' NLRB, *Secondary boycotts (Section 8(b)(4)), https://www.nlrb.gov/about-nlrb/rights-we-protect/the-law/secondary-boycotts-section-8b4* (last accessed Feb. 22, 2024); *see also Di Giorgio Fruit Corp.* v. *NLRB,* 191 F.2d 642, 649 (D.C. Cir. 1951) (explaining that a Teamsters Local was engaged in ''primary picketing'' at the place of its members' own employment, in support of a strike against their employer, which is ''called a primary activity in the language of labor law,'' and thus did not fall within the NLRA's ban against secondary activity.)

terms in this final rule would create unnecessary confusion and would not further the stated goals of clarity and disclosure. As the Supreme Court has recognized, the question of what constitutes secondary activity is ''among the labor law's most intricate.'' *NLRB* v. *Local 825 Int'l Union of Operating Eng'rs,* 400 U.S. 297, 303 (1971). Thus, the Department has determined that including this term, even with the definition proposed by some commenters, could lead to uncertainty, and therefore is removing the term from this final rule. Instead, the Department seeks to clarify the breadth of activities that are protected as ''concerted activities for the purpose of mutual aid or protection relating to wages or working conditions'' of H–2A workers and similarly employed workers.

The Department generally agrees with the AFL–CIO and Farmworker Justice that otherwise lawful ''peaceful expressive activity'' by groups of individual workers, such as handing out flyers, leafleting, or picketing outside a grocery store that sells agricultural products derived from the labor of H–2A workers in order to discourage customers from buying those specific products, would generally be protected as ''concerted activity for mutual aid and protection'' under this final rule. Notably, this type of concerted activity has been deemed permissible even in the NLRA context. *See, e.g., NLRB* v. *Fruit and Vegetable Packers and Warehousemen, Local 760,* 377 U.S. 58, 71–73 (1964) (a labor union's engaging in peaceful expressive activity, such as consumer handbilling or picketing at a retail grocery store seeking to persuade customers not to buy apples that were produced by a certain agricultural employer, was not prohibited ''secondary activity'' under NLRA sec. 8(b)(4)(ii) where the activity did not ''threaten, coerce, or restrain'' anyone and was directed at customers rather than employees of the store); *see also Edward J. DeBartelo Corp.* v. *Florida Gulf Coast Building Trades Council,* 485 U.S. 568, 578 (1988) (peaceful consumer handbilling or leafleting by a labor union at the entrances to a shopping center urging consumers not to patronize those stores was protected under the First Amendment and was not an unfair labor practice under NLRA); *Wartman* v. *United Food and Commercial Workers Local 653,* 871 F.3d 638, 644 (8th Cir. 2017) (labor union did not violate NLRA by picketing grocery stores, even though the picketing effectively disrupted the stores' relationships with customers and suppliers, where union's objective was to urge the public not to shop at the stores and to pressure the store owners to resolve a labor dispute but not to force or require any person to cease doing business with any other person); *but see 520 South Michigan Avenue Associates, Ltd.* v. *Unite Here Local 1,* 760 F.3d 708, 711 (7th Cir. 2014) (remanding for trial on whether certain activities engaged in by a labor union against a hotel were coercive and whether any such coercive conduct actually caused damages to the hotel or was protected under the NLRA or the First Amendment or both).

Thus, under this final rule, a group of workers engaged in a labor dispute who meet with the management of a grocery store to explain their labor dispute and seek to persuade the store to stop carrying the products sold by the workers' employer until the labor dispute is resolved would be engaged in protected concerted activity, as long as otherwise not prohibited by law. Similarly, in response to the comment from the AFL–CIO, the Department clarifies that, to the extent that individual workers are engaged in otherwise lawful peaceful leafleting or picketing at an agricultural worksite, including a ''fissured workplace'' (such as an employee of a farm labor contractor picketing on the premises of the farm where they work, which is owned by a grower or other entity that may or may not be a joint employer of the workers), such lawful activity is generally protected under this final rule, since the object of the activity is to affect working conditions at the workers' own place of work. These examples are intended to be illustrative and not exhaustive.

As explained in the NPRM, the Department intends to interpret the terms ''concerted activity'' broadly, to include concerted activities for the broad purpose of ''mutual aid or protection'' as well as for the narrower purpose of ''self-organization,'' as long as the object of the activity is related to the workers' own wages and working conditions. *See, e.g., Eastex, Inc.* v. *NLRB,* 437 U.S. 556, 565–66 (1978) (explaining that the terms as set forth in NLRA sec. 7 are intended to protect workers from retaliation by their employers, even ''when they seek to improve terms and conditions of employment or otherwise improve their lot as employees through channels outside the immediate employee-employer relationship,'' such as through political or administrative action). And even though ''some concerted activity bears a less immediate relationship to employees' interests as employees than other such activity[, and w]e may assume that at some point . . . becomes so attenuated that an activity cannot fairly be deemed to come within the 'mutual aid or protection' clause,'' it is neither necessary nor appropriate to attempt to precisely delineate those boundaries here. *Id.* at 567–68.

As further discussed below, the Department does not intend to protect concerted activity that is currently prohibited by State law,[91] or to preempt, supersede, or otherwise interfere with the operation of State laws that authorize or regulate organizing, collective bargaining, unfair labor practices, or labor-management relations in the agricultural sector. Instead, it intends for this rule to complement State collective bargaining laws, not to conflict with them, as well as to ensure workers are able to engage in lawful concerted activity without being retaliated against in States without such laws. As under its existing unfair treatment provisions, the Department will thoroughly investigate any complaint and consider all the facts, including, among other things, relevant State laws, the nature of the adverse action, any judicial or administrative findings of unlawful conduct, and evidence relating to causation, before determining whether unlawful retaliation or discrimination has occurred.

Finally, as noted in the NPRM, the remedies provided for under this proposed regulation are not intended to be exclusive; if an agricultural worker has other remedies available under State or local law, the remedies contemplated under this proposal are not intended to displace them. 88 FR at 63792. In addition, the Department does not intend for this provision to preempt any applicable State laws or regulations that expressly protect agricultural workers or regulate labor-management relations, organizing, or collective bargaining in the agricultural sector. 88 FR at 63792, 63795. Several commenters, such as the AFL–CIO, FLOC, Comité de Apoyo a los Trabajadores Agrícolas, and CDM, asked

[91] For example, in New York, ''[n]otwithstanding any other provision of law, for farm laborers the term 'concerted activities' shall not include a right to strike or other concerted stoppage of work or slowdown.'' N.Y. Lab. Law § 703); *See also* N.Y. Lab. Law § 704–b(1)) (''It shall be an unfair labor practice for a farm laborer or an employee organization representing farm laborers to strike any agricultural employer.''); *See also* Cal. Lab. Code §§ 1154(d)(2) and 1154.5 (making it an unfair labor practice for ''a labor organization or its agents'' to engage in secondary strikes, or boycotts; ''publicity which includes picketing and has the effect of requesting the public to cease patronizing such other employer'' permitted only by certified representative labor organizations; publicity other than picketing permitted only in certain circumstances).

the Department to ''clarify'' that it does intend for this regulation to preempt State laws that, in their view, are less protective than the proposed provision. They specifically cited two provisions of North Carolina's 2017 Farm Act, N.C. Gen. Stat. sec. 95–79(b), which prohibit certain agreements providing for deduction of union dues or litigation with agricultural producers or both. *See Farm Labor Organizing Committee* v. *Stein,* 56 F.4th 339, 345–51 (4th Cir. 2022) (finding that the provisions did not violate the equal protection clause or the First Amendment rights of the union or its members to expressive activity and to freedom of association, and were rationally related to legitimate state interests). In the commenters' view, the North Carolina statute directly conflicts with the proposed regulation protecting concerted activity, and the proposed regulation should therefore preempt the State law, as in *Maine Forest Products Council* v. *Cormier,* 51 F.4th 1 (1st Cir. 2022). That case held that a Maine statute prohibiting certain employment by non-U.S. residents was preempted by the INA and the H–2A regulations, because the H–2A program unmistakably conflicted with the restrictions imposed by the Maine law. *See also Rogers* v. *Larson,* 563 F.2d 617, 626 (3d Cir. 1977) (holding that a Virgin Islands statute prohibiting hiring of foreign workers was preempted by the INA for similar reasons).

It is generally true where State laws are ''in conflict or at cross-purposes'' with Federal law, such as the INA, ''Congress has the power to preempt state law,'' *Arizona* v. *United States,* 567 U.S. 387, 399 (2012), and that courts have found preemption where it is impossible for a private party to comply with both State and Federal law (*i.e.,* conflict preemption) or where under the circumstances of a particular case the challenged State law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress (*i.e.,* obstacle preemption). *Id.; Cormier,* 51 F.4th at 3 (citing *Arizona,* 567 U.S. at 399). Federal regulations can be just as preemptive as Federal laws. For example, in *Cormier,* the First Circuit recently held that the federally enacted H–2A program confers a right on private actors (either explicitly or implicitly) that unmistakably conflicted with the restrictions imposed by the Maine law, which prohibited Maine landowners from hiring anyone who is not a ''resident of the United States,'' including an H–2A worker, to drive trucks ''transport[ing] forest products'' within the State. 51 F.4th at 3, 8. *See also Dandamudi* v. *Tisch,* 686 F.3d 66, 80 (2d Cir. 2012) (State statute was obstacle to accomplishment and execution of the full purposes and objectives of Congress where it disqualified certain immigrants merely because of their immigration status); *Rogers* v. *Larson,* 563 F.2d at 626 (same, where Territorial law gave preference to citizens and permanent residents over lawful immigrants who were authorized to work). However, to find preemption, there must be a clear conflict between the two provisions, or at least a ''direct and significant obstacle.'' In *Cormier,* the court held the Maine statute was ''a blunt intrusion on the implicit federal right,'' and ''constitutes a direct and significant obstacle to achieving the H–2A program's clear and manifest objectives,'' since it ''would nullify the implicit federal right of the employer to hire foreign laborers on a temporary basis, and ''thus rudely ''interfere[s] with the careful balance struck by Congress.'' *Cormier,* 51 F.4th at 10 (quoting *Arizona,* 567 U.S. at 406). Furthermore, the State law was ''in tension with the structure and purpose of the H–2A statutory provisions and would effectively give states a veto power over the federal program'' by overriding ''the specific H–2A work authorizations provided by federal law.'' *Cormier,* 51 F.4th at 11.

By contrast, courts have declined to find that all State employment laws relating to immigrants are preempted by the INA. *See, e.g., DeCanas* v. *Bica,* 424 U.S. 351, 355 (1976) (holding that a California State law restricting employment of unauthorized immigrants was not preempted by the INA); *LeClerc* v. *Webb,* 419 F.3d 405, 424 (5th Cir. 2005) (Louisiana Supreme Court rule that rendered ''nonimmigrant aliens'' ineligible to sit for the Louisiana Bar was not preempted by the H–1B provisions of the INA, since ''the field of alien employment law tolerates harmonious state regulation''). ''Federal regulation . . . should not be deemed preemptive in the absence of persuasive reasons—either that the nature of the regulated subject matter permits no other conclusion, or that the Congress has unmistakably so ordained.'' *LeClerc* v. *Webb,* 419 F.3d at 423 (quoting *DeCanas,* 424 U.S. at 356). Indeed, *Cormier* itself notes that the H–2A regulations themselves specifically require compliance with all applicable employment-related laws that pertain to working conditions. 51 F.4th at 10 (citing 20 CFR 653.501(c)(3)(iii)). Here, unlike the Maine law at issue in *Cormier,* the Department does not believe that the North Carolina State law presents a clear conflict or a ''direct and significant obstacle'' to the operation of the H–2A program or the specific regulation in question. The law does not appear to govern whether a farmworker in North Carolina may engage in protected concerted activity as outlined herein, or whether a North Carolina employer could discipline a worker for such activity, and unlike the Maine law at issue in *Cormier* would not ''effectively give states a veto power over the federal program'' or ''override the specific H–2A work authorizations provided by federal law.'' 51 F.4th at 7–8. As noted in the preamble to the NPRM, the Department is cognizant that over a dozen States have enacted laws that regulate organizing, collective bargaining, labor-management relations, overtime, heat stress, tools, and other issues affecting agricultural workers.[92] It has carefully crafted its new protections for concerted activity to avoid creating conflicts with existing State laws and regulations that provide for a system of collective bargaining for farmworkers and/or explicitly prohibit retaliation against farmworkers for exerting other rights guaranteed by State laws or regulations.[93]

vii. Section 655.135(h)(2)(ii), Refusing To Attend or Participate in ''Captive Audience Meeting'' Related to Protected Activity

The Department proposed a new provision at § 655.135(m)(3) to prohibit employers from engaging in ''coercive speech'' intended to oppose workers' protected activity, such as organizing or advocating regarding their working conditions on behalf of themselves and their coworkers. Specifically, the Department proposed to prohibit employers from engaging in ''coercive employer speech intended to oppose workers' protected activity'' (sometimes

[92] *See, e.g.,* ALRA, Cal. Lab. Code § 1153; Colorado Agricultural Labor Rights and Responsibilities Act, Colo. Rev. Stat. 8–13.5–201 (state law requiring access and employer-provided transportation to ''key service providers''); Arizona Agricultural Employment Relations Act, Ariz. Rev. Stat. Ann. § 3–3101–3125; Ariz. Rev. Stat. Ann. § 23–1381–1395; New York Farm Laborers Fair Labor Practices Act (2020) (amending New York Labor Law Code §§ 701–718, Chapter 31, Article 20. Or. Rev. Stat. secs. 658.405 through 658.511 (state laws requiring licensing and bonding of agricultural recruiters); Generally speaking, the Department supports such protections for farmworkers and believes that they can help to avoid adverse impact on the working conditions of workers in the United States by helping to improve such conditions for all workers.

[93] In addition, this final rule does not require employers to recognize any labor organization, to engage in collective bargaining, or to reach any CBA; rather, any such agreement would be governed and enforced solely under any applicable Federal, State, or local law.

referred to as ''captive audience meetings'' or ''cornering''), in which the employer seeks to persuade workers not to engage in protected activity, unless the employer (a) explains the purpose of the meeting or communication; (b) informs employees that attendance or participation is voluntary and that they are free to leave at any time; (c) assures employees that nonattendance or nonparticipation will not result in reprisals (including any loss of pay if the meeting or discussion occurs during their regularly scheduled working hours); and (d) assures employees that attendance or participation will not result in rewards or benefits (including additional pay for attending meetings or discussions concerning their rights to engage in protected activity outside their regularly scheduled working hours). The proposal was modeled on the ''*Johnnie's Poultry*'' safeguards that were developed by the NLRB to ensure that workers are not coerced into cooperating with their employers in various situations. *See* 88 FR at 63798 (citing *Johnnie's Poultry Co.,* 146 NLRB 770, 774 (1964) (providing safeguards required when employers question employees about protected activity to prepare a defense against unfair-labor-practice charges); *Sunbelt Rentals, Inc.,* 374 NLRB No. 24 (2022) (reaffirming *Johnnie's Poultry* rule). The Department explained that it sought to balance workers' rights to engage in (or to refrain from engaging in) concerted activity, and employers' rights to engage in speech concerning any such activity, without unduly infringing on either party's expression. It also sought to prohibit employers from retaliating against a worker for attending or refusing to attend such a ''captive audience'' meeting or discussion, even if the meeting were to occur during their regularly scheduled working hours.

The Department sought comment on whether there would be other ways to better protect workers' rights to refrain from listening to employers' coercive speech, whether other safeguards or employer disclosures would be appropriate, and how to most appropriately tailor the prohibition to avoid infringing on employer's free speech rights while protecting workers' right to engage in protected activity.

The Department received a significant number of comments in strong opposition to proposed § 655.135(m)(3), many of which raised First Amendment concerns and contended that the proposed prohibition exceeded the Department's authority. The U.S. Chamber of Commerce, for example, contended that ''the Department's proposal contains unconstitutional restrictions on employers' free speech rights.'' Referring to this proposed provision and other proposed provisions relating to worker voice and empowerment, U.S. Representatives Foxx and Thompson opined that ''Congress has given no authority to DOL to impose these mandates on H–2A employers,'' and that ''[s]uch authority cannot be found in the Immigration and Nationality Act or the Fair Labor Standards Act.'' Wafla contended that ''this proposed section silences employer free speech rights,'' and that ''[t]he proposed rules, taken as a whole, are hypocritical because they recognize employee association and speech rights while gagging employers' free speech rights.'' The U.S. Chamber of Commerce noted that ''mandatory work meetings in which an employer talks about unions . . . have long been lawful under the NLRA and, more important, protected by the U.S. Constitution.'' Commenters also contended that both the First Amendment and the NLRA protect employers' freedom to hold mandatory work meetings and to express their views, regardless of the subject matter, stating that NLRA precedent balances the interests of employers and employees by expressly protecting employer speech, except when the speech amounts to a ''promise of benefit'' or ''threat of reprisal.'' The Chamber said that the Department cannot mean that all mandatory work meetings are inherently coercive and thus ''it seems to mean that all meetings about unions are coercive,'' and that doing so ''draws the Department into regulating the substance of an employer's speech—a subject it is constitutionally forbidden to touch.''

USA Farmers opined that this proposal ''lacks a valid legal basis and plainly violates an employer's First Amendment rights.'' USA Farmers also stated that ''[a]n employer has the right to communicate with employees,'' and that ''[a]n employer can also require employee attendance at meetings and such meetings are routinely counted as compensable time.'' It also suggested that any restrictions on speech should be applied evenly, not just to employers but to outside groups. The Cato Institute commented that the proposal was too broad because the proposed ''speech restrictions apply not just during a union campaign but any time an employer opposes unionization.'' Many commenters, including IFPA, asked for clarification of the proposal, stating that it is not clear how or when employers would need to provide the required disclosures to employees, and that the proposal did not provide guidance regarding the records that would be needed to verify such notice was given to workers.

Labor unions and worker advocates generally supported the proposal, stating that it would help to protect workers by preventing employers from trying to discourage workers from advancing their rights in the workplace and would help to ensure that the employment of H–2A workers does not adversely affect the working conditions of similarly employed workers in the United States. Farmworker Justice expressed support for the proposal, commenting that agricultural employers have a ''unique ability'' to control and require the attendance of H–2A workers at mandatory meetings, while the UFW shared personal anecdotes from farmworkers they have worked with, describing experiences with employers using captive audience meetings to stifle union activity.

Several elected officials and State agencies also supported the proposal, commenting that it would help to address the intimidation and isolation faced by farmworkers. For example, 11 State Attorneys General observed that this proposal, combined with other worker voice and empowerment proposals in the NPRM, would help protect workers from misinformation, retaliation, and coercive speech that hinders self-advocacy and organizing. The California LWDA said that employer captive audience meetings have detrimental effects on workers' ability to organize, reasoning that the proposed prohibition would protect both employers' speech rights and workers' rights to refrain from listening to coercive speech.

However, several of these commenters questioned the practical effect of the proposed rule without modification. For example, the AFL–CIO suggested that any final rule should clarify when employer speech should be deemed ''coercive'' and when it would be permissible. It suggested that the rule be revised to entirely prohibit employers from engaging in ''speech addressed to H–2A workers intended to oppose those workers' protected activity'' without providing express warnings. Farmworker Justice suggested that the proposal should also require ''that the employer supplement any oral assurances in writing to the worker before the employer engages in a discussion of union activity or participation.''

After consideration of the comments received, this final rule adopts a modified version of the proposal. This final rule does not adopt the language at proposed § 655.135(m)(3) prohibiting

coercive employer speech, but instead incorporates a version of that proposal into the protected activity framework at § 655.135(h)(2)(ii). The Department considered the objections voiced by many commenters, in particular those questioning whether the proposed prohibition as drafted would interfere with employers' speech. In addition, the Department notes that at least five States have enacted laws that target the same problem in a way that avoids concerns about potential infringement on the First Amendment rights of employers while protecting workers' rights as well. Four States, namely Connecticut (2022), New York (2023), Maine (2023), and Minnesota (2023), have recently joined Oregon (2010) [94] by enacting laws that do not prohibit mandatory captive audience meetings *per se,* but instead protect workers who leave or refuse to attend such meetings (or who refuse to listen to such speech) from being disciplined or fired. For example, the New York law prohibits employers from disciplining or discriminating against employees for refusing to attend employer-sponsored meetings, listen to speech, or view communications that are primarily intended to convey the employer's opinion about ''religious or political matters,'' including the decision to join or support any labor organization. The Department therefore concludes that the interest underlying this proposal—*i.e.,* preventing employers from coercing or threatening farmworkers into attending meetings or listening to employer speech intended to oppose protected activity, under the implied threat of discipline if the farmworkers exercise their protected right not to listen to such speech—can be better served by instead adding a new protected activity to the proposed anti-retaliation provision at § 655.135(h)(2).

Therefore, the Department is not adopting the proposed language to prohibit coercive speech outright, but instead incorporates a version of the proposed provision into the list of protected activities in the ''unfair treatment'' provisions at § 655.135(h)(2)(ii). The final provision expressly prohibits employers from retaliating or discriminating against a worker for refusing to attend a ''captive audience'' meeting (or portion thereof), if the primary purpose of the meeting (or a certain portion of the meeting) is to communicate the employer's opinion concerning any activity protected under these regulations. It also protects a worker from retaliation for refusing to listen to employer-sponsored speech or view employer-sponsored communications, if the primary purpose of the speech or communication (or that portion of the speech or communication) is to communicate the employer's opinion concerning any activity protected under these regulations, even if the meeting, speech, or communication occurs during their regularly scheduled working hours.

This protection is limited to those workers engaged in FLSA agriculture. As explained in the NPRM, the Department believes that ''a worker's right to engage, or not engage, in self-organization and concerted activity under [final § 655.135(h)(2)(i)] [95] would include the worker's right to listen and the worker's right to refrain from listening to employer speech concerning the worker's exercise of those rights.'' 88 FR at 63797 (citing NLRA sec. 7). This modification is intended to permit H–2A employers to freely engage in speech regarding these topics, as requested by certain commenters, including employers, trade associations, Members of Congress, and a think tank. At the same time, the revision responds to comments by worker advocates urging the Department to protect workers' rights to refrain from listening to employer speech on these topics. Therefore, this final rule includes regulatory text to expressly protect those rights in § 655.135(h)(2)(ii).

As with the protection for ''concerted activity'' in 20 CFR 655.135(h)(2)(i), this provision is limited to those workers who are not already protected by sec. 7 of the NLRA. And as with the other protections against unfair treatment for concerted activity, this new protection will also be disclosed to workers through the job order and through other worker outreach tools. The Department believes that this approach strikes a better balance between protecting workers' rights to engage in (or to refrain from engaging in) concerted activity and protecting employers' First Amendment right to engage in speech concerning any such activity, without unduly infringing on either party's expression. The Department acknowledges that employers generally have First Amendment rights to express any views, arguments, or opinions on any subject, including but not limited to the protected concerted activities outlined in 20 CFR 655.135(h)(2)(i), as long as they do not engage in unlawful threats or coercion. However, the Department also believes that workers enjoy First Amendment rights to decline or refuse to attend mandatory employer-sponsored speeches or meetings concerning the exercise of their rights to engage in protected activities. Workers should therefore be free to leave (or refuse to attend) such a ''captive audience meeting,'' and should not be threatened, disciplined, coerced, suffer other reprisals, or lose out on any reward or benefit if they exercise their protected rights not to listen to such speech or to attend such a meeting. As detailed above, the Department believes that ensuring that workers can individually or collectively advocate regarding their working conditions, without fear of reprisal, will better prevent adverse effect as required under 8 U.S.C. 1188(a)(1). As also detailed above, protecting the right to engage in (or to refuse to engage in) concerted activity is a demonstrated method to empower such worker advocacy. The Department also believes that protecting workers' rights to refuse to attend such ''captive audience meetings'' is an important aspect of the worker's right to engage in or refuse to engage in concerted activity, as set forth in new § 655.135(h)(2)(i). As the comments received on the ''captive audience'' proposal reflect, a worker must have the freedom to choose whether to listen to—or not to listen to—speech concerning the benefits or drawbacks of engaging in concerted activity to fully effectuate their right to engage in, or to refuse to engage in, such activity. The Department believes that expressly protecting a worker's right to refuse to attend or to leave such a meeting is the simplest and fairest method of ensuring that workers' participation is voluntary at all times.

Finally, consistent with the preamble discussion in the NPRM, this revised provision is not intended to affect attendance at mandatory meetings on subjects other than those involving workers' exercise of protected rights (*e.g.,* work assignments for the day, tools, job training, or safety instructions). The Department recognizes, as it did in the NPRM, that employers may and do regularly require workers to attend meetings on such work-related subjects. But if the employer announces a special meeting at the beginning or end of the workday to express their opinion regarding labor unions, health and safety complaints, or whether workers should communicate with government investigators, a worker may choose not to attend that meeting and may instead choose to continue performing their regularly assigned duties. Similarly, if the ''primary

[94] *See, e.g.,* Conn. Gen. Stat. Ann. § 31–51q (2022), Me. Rev. Stat. Ann., tit. 26, § 600–B (effective Sept. 19, 2023); 2023 Minn. S.F. No. 3035, codified as Minn. Stat. Ann. § 181.531 (effective August 1, 2023); N.Y. Lab. Law § 201–d (McKinney 2023); Or. Rev. Stat. § 659.786(1) (2010).

[95] Proposed § 655.135(h)(2).

purpose'' of a regular 30-minute daily meeting is to discuss work assignments, but the employer changes topics and instead devotes the last 15 minutes to discussing whether workers should engage in certain protected activity, a worker would have the choice to leave that meeting at that point. Of course, the employer may choose to minimize any disruption by, for example, announcing that the first 10 minutes of the meeting will be about organizing, and allowing workers who object to wait elsewhere, then invite them into the meeting when they change topics and begin making work assignments. However, the employer is not required to do so. And if a retaliation complaint is received, WHD will thoroughly investigate all the facts and circumstances of the case (as it does with any complaint) before charging the employer with unfair treatment.

viii. Proposed § 655.135(m)

The Department proposed a new employer obligation at § 655.135(m) that included a number of protections intended to help prevent an adverse effect on the working conditions of workers in the United States similarly employed, 8 U.S.C. 1188(a)(1). The obligations under proposed § 655.135(m) would apply only to workers engaged in FLSA agriculture. Specifically, the Department proposed requirements that an employer provide to a requesting labor organization the contact information of H–2A workers and workers in corresponding employment employed at the place(s) of employment; permit a worker to designate a representative of their choosing to attend any meeting that may lead to discipline; refrain from captive audience meetings unless the employer provides certain information to ensure that any such meeting is not coercive; and attest either that they will bargain in good faith over the terms of a proposed labor neutrality agreement with a requesting labor organization or that they will not do so and provide an explanation for why they have declined. For the reasons explained below, the Department finalizes, with modifications, the proposal that employers must permit workers to designate a representative in certain disciplinary meetings. The Department does not finalize the proposal to provide a requesting labor organization contact information for H–2A and corresponding workers, nor does it finalize the proposal requiring employers to attest that they will bargain in good faith over a labor neutrality agreement or provide a reason for declining to do so. As explained above in Section VI.C.2.b.vii, the Department has also withdrawn the proposal to prohibit all coercive employer speech or require that certain warnings be given to ensure that the workers have the opportunity to opt out of attending such speeches or meetings, and instead has finalized an alternative at § 655.135(h)(2)(ii) that protects a worker from retaliation for opting out of (or refusing to attend) such a ''captive audience meeting'' or speech.

A. Section 655.135(m), Designation of Representative

In the NPRM, the Department proposed to require employers to permit a worker to designate a representative of their choosing to attend any meeting between the employer and the worker where the worker reasonably believes that the meeting may lead to discipline and to permit the worker to receive advice and assistance from the representative during any such meeting. As noted above, this proposal was limited to workers engaged in FLSA agriculture.

The NPRM set forth two rationales for the proposal. First, the Department believes that this obligation would help safeguard workers against unjust discipline (including termination) by giving workers the opportunity to secure a witness, advisor, or advocate in a potentially adversarial situation. Second, allowing H–2A workers and workers in corresponding employment the option to have a representative in these meetings (if they so choose) would allow them to better advocate for themselves regarding the terms and conditions of their employment and thereby prevent adverse effect on the working conditions of similarly employed workers in the United States. That is, the ability to have a representative's presence at such a meeting would enhance workers' ability to act in concert with their coworkers to protect their mutual interest in ensuring that their employer does not impose punishment unjustly.

In the preamble to the NPRM, the Department clarified that there was no limit to who a worker may designate as a representative. As the NPRM explained, it would be impractical to limit such representatives to union representatives, given low union density in agricultural workplaces, or to coworkers, because the temporary nature of H–2A work may limit the development of relationships with coworkers. For example, the worker may prefer to designate a representative who is not employed by the employer, such as a legal aid advocate, member of the clergy, or other key service provider.

The NPRM requested commenter feedback on a few specific questions. First, the Department sought comments regarding the scope of situations in which employers' obligations under the proposal would apply, including, for example, whether the obligation should apply in all situations that a worker may reasonably believe could involve or lead to discipline (such as where employers correct work techniques, give instructions, or provide training), or should apply only in situations more analogous to the ''investigatory interviews'' addressed in *NLRB* v. *J. Weingarten, Inc.,* 420 U.S. 251, 267 (1975). The Department further sought comment on whether it should draw on sources other than *Weingarten* (and the line of cases applying *Weingarten*) in determining applicability of this obligation or should consider any other interactions between farm employers and their interactions with nonunionized agricultural workers. Second, the Department sought comments on how to ensure that workers are adequately informed of the employer's obligation to permit workers to request a representative and the circumstances under which this obligation would arise. Finally, the Department requested comments as to how to best implement this obligation in an agricultural setting, including those settings subject to §§ 655.200 through 655.235 (herding and livestock production workers).

Several commenters expressed support for the proposal. A group of State Attorneys General expressed the view that the proposal would have a positive impact on H–2A workers who face heightened risks of coercion and abuse by employers, adding that the proposal would prevent employers from suppressing workers from exercising their rights. A group of U.S. Senators also supported the proposal as one way to ensure that workers can advocate regarding their working conditions without fear. Similarly, an advocacy organization expressed the view that the proposal would bolster workers' ability to engage in concerted activity and would prevent unfair discipline by employers. A State government agency, California LWDA, observed that agricultural workers in California already enjoy a right to representation in investigatory or pre-disciplinary meetings and opined that access to such representatives should be extended to H–2A workforces.

Other commenters objected to the provision as a general matter or expressed concerns about certain aspects of the provision. A few trade associations questioned the

Department's authority for the proposal. For example, one commenter, FFVA, stated that the proposal lacks congressional authority, and another, USA Farmers, stated that the proposal lacks a valid statutory basis. Along similar lines, a few commenters expressed the view that the Department did not adequately explain how the proposal would protect workers in the United States from adverse effect. Other commenters stated that the proposal amounted to an attempt by the Department to selectively apply provisions of the NLRA to H–2A workers.

Because the NPRM proposed that the designated representative would not be limited to union representatives or coworkers, several commenters identified that this proposal would require employers to permit third parties unaffiliated with farming operations to enter the workplace. Some of these commenters expressed employer concerns about a requirement to permit unaffiliated third parties to enter the workplace. For example, several commenters—FFVA, AmericanHort, and Western Growers—expressed the view that the proposal would effect a physical taking of property under *Cedar Point,* 141 S. Ct. 2063. Other commenters, including FFVA, Western Growers, NCAE, and American Farm Bureau Federation, expressed concern that the provision would allow outsiders who may be unaware of food safety protocols in worksites where workers are harvesting or otherwise preparing food products. These commenters stated that the provision would therefore interfere with employers' obligations under the Food Safety Modernization Act and its implementing regulations and under the Global Food Safety Initiative, which FFVA stated requires producers to restrict site access to certain personnel trained in food safety protocols. Another trade association, the American Farm Bureau Federation, further commented that requiring H–2A employers to permit unaffiliated third parties onsite would increase liability risks and insurance costs for employers.

Many commenters opposed the rule on the grounds that it was vague and could unnecessarily delay disciplinary actions. Some trade associations expressed the view that the proposal would cause significant disruption to the workplace because the proposed definitions of ''meeting'' and ''discipline'' are vague, which could be interpreted to require employers to allow an employee to have a representative present for minor counseling or correction of job performance. One advocacy group, the Cato Institute, observed that the proposal does not include a requirement that the representative appear at the appointed time for the ''meeting.'' Other commenters, including wafla and USA Farmers, stated that representation could take days or weeks to arrange in the setting of agricultural work and expressed concerned that the proposal would leave employers open to liability in cases where the behavior needing correction is dangerous to other employees. Commenters, including Cato and Mercer Ranch, Inc., similarly said that the proposal is vague and impractical. Another trade association expressed concern that involving additional parties in each disciplinary meeting could lead to breaches of confidential business information or further disputes or perceptions of unequitable treatment between employees.

After considering comments discussed above, the Department adopts the proposed revisions at § 655.135(m) with some modifications. First, this final rule provides that the employer's obligation will be limited to investigatory interviews analogous to investigatory interviews under *Weingarten.* However, this final rule maintains the approach, as described in the preamble to the NPRM, of permitting workers to designate the person of their choice as a representative, regardless of whether the designated representative is a union representative, a coworker, or someone else. Second, the Department deletes the final sentence of the provision which would have required employers to permit third-party designated representatives to physically access the worksite. In its place, the Department adds two new sentences clarifying that: (1) where the worker's designated representative is present at the worksite, the employer must permit the representative to attend the investigatory interview in-person; but (2) when the worker's designated representative is not present at the worksite, the employer must permit the representative to attend the investigatory interview remotely, by telephone or videoconference. Third, the Department makes non-substantive changes to the regulatory text to revise ''workers'' to read ''a worker'' or ''the worker,'' for consistency with other parts of this final rule. Fourth, the provision is renumbered as § 655.135(m). The Department further explains the first and second modifications in turn.

First, in a modification to the provision as proposed in the NPRM, this final rule adopts from the NLRA context the principle that employees should have recourse to representatives in ''investigatory interviews.'' As discussed in the NPRM, it is well-established that under the NLRA, in a workplace covered by a CBA, employers must grant an employee's request to have a representative present in an investigatory interview that the employee reasonably believes might result in disciplinary action. *See Weingarten,* 420 U.S. at 256, 267. In *Weingarten,* the Supreme Court concluded that denying a representative constitutes interference with an employee's right to engage in concerted activities for mutual aid or protection under sec. 7 of the NLRA. *Id.* An employee's request for a representative constitutes concerted activity because a representative's presence safeguards the interests of employees generally, not solely the interest of the requesting employee. *See id.* at 260–61. Courts have cited similar considerations in deeming reasonable the view that sec. 7 of the NLRA permitted nonunion workers to designate a coworker to provide assistance during investigatory interviews that may lead to disciplinary action. *See Epilepsy Found. of Ne. Ohio* v. *NLRB,* 268 F.3d 1095, 1100 (D.C. Cir. 2001).

The NPRM proposed that in the H–2A program, the employer's obligation would apply in the context of ''meetings between the employer and a worker where the worker reasonably believes that the meeting may lead to discipline.'' Under the original proposal, the scope of situations in which this obligation would have applied is broader than the ''investigatory interviews'' in which a worker's right to a representative is recognized under sec. 7 of the NLRA. *See Weingarten,* 420 U.S. at 253, 257–58 (recognizing right to representative in ''investigatory interview which the employee reasonably believed might result in disciplinary action'').

After reviewing the comments, the Department adopts the ''investigatory interview'' concept from *Weingarten* and its progeny. The Department's decision to draw from a concept that developed in the NLRA context is similar to its decision to adopt language similar to sec. 7 in § 655.135(h)(2)(i). As in § 655.135(h)(2)(i), the Department adopts the ''investigatory interview'' concept from the NLRA context to enhance workers' ability to engage in concerted activities for the purpose of mutual aid or protection, thus helping to avoid adverse effects on similarly employed workers in the United States. In incorporating the term ''investigatory

interview'' in this final rule, the Department draws on the *Weingarten* body of case law but notes that the term must be interpreted consistently with the statutory purpose of the INA and the H–2A program, in light of the H–2A program's unique characteristics and the changes the Department is making in this final rule.

The Department also believes that adopting the ''investigatory interview'' concept is the best way to address several concerns raised by commenters while still maintaining protections for workers. In particular, trade associations expressed the view that the terms ''meeting'' and ''discipline'' in the NPRM proposal are vague, creating challenges for employers in determining when their obligation arises. Trade associations also expressed the view that ''meetings'' would capture an overly wide range of communications between employers and employees, thereby burdening employers. Adopting the ''investigatory interview'' concept addresses both these concerns because it clearly limits the obligation to a narrower and more clearly defined range of employer-employee communications. Moreover, adopting the ''investigatory interview'' concept from *Weingarten* will assist employers and employees in determining the scope of an employer's obligation under these regulations, because stakeholders may refer to a wide body of interpretive material applying *Weingarten,* including decisions by courts and the NLRB. The Department intends that the following core principles—taken from decisions applying *Weingarten*—should apply in determining the scope and application of ''investigatory interviews'' under these regulations. These core principles will apply to these regulations regardless of whether, in the future, courts or the NLRB limit the scope of the *Weingarten* right under sec. 7 of the NLRA.

As noted above, an ''investigatory interview'' arises in a ''situation where [a worker] *reasonably believes* the investigation will result in disciplinary action.'' *Weingarten,* 420 U.S. at 257 (emphasis added). Therefore, whether a meeting or conversation constitutes an ''investigatory interview'' must be evaluated from an objective standard. *Consol. Edison Co. of New York, Inc.,* 323 NLRB 910 (1997). The question is whether a similarly situated worker would reasonably believe that discipline might result from the interview, considering all the circumstances. *Weingarten,* 420 U.S. at 257–58 & n.5; *Consol. Edison,* 323 NLRB 910. For example, ''run-of-the-mill shop-floor conversation as, for example, the giving of instructions or training or needed corrections of work techniques,'' generally do not constitute ''investigatory interviews,'' since ''[i]n such cases there cannot normally be any reasonable basis for an employee to fear that any adverse impact may result from the interview.'' *Weingarten,* 420 U.S. at 258. Moreover, an employee does not have a reasonable fear of discipline in a conversation where the employer merely announces a disciplinary decision that the employer has already made, *see Baton Rouge Water Works Co.,* 246 NLRB 995, 997 (1979), or where the employer states that the worker does not face discipline, *Gen. Elec. Co.,* 240 NLRB 479, 480 (1979).

However, the intent of the employer or its representative is not dispositive of whether an interaction constitutes an investigatory interview; that is, an interaction may constitute an ''investigatory interview'' even where the employer did not intend to seek discipline, so long as a similarly situated worker would reasonably believe that discipline might result. *Consol. Edison,* 323 NLRB 910. In that analysis, the individual worker's previous treatment by the employer (including prior discipline of the worker) is relevant to assessing whether a similarly situated worker would reasonably maintain such a belief. *See Verizon Cal., Inc. & Commc'ns Workers of Am., Loc. 9588, AFL–CIO,* 364 NLRB 1008, 1011–12 (2016); *E.I. Dupont De Nemours & Co., Inc.,* 362 NLRB 843, 843, 855–56 (2015).

The worker's request for a representative need not take a particular form or incorporate any particular words, so long as the request is sufficient to place the employer on notice that the worker desires a representative. *Montgomery Ward & Co.,* 269 NLRB 904, 905 n.3 (1984). Of course, the worker's explicit request for a representative is sufficient, *see, e.g., Consol. Edison,* 323 NLRB at 914; *Montgomery Ward,* 273 NLRB at 1227, but the request need not be explicit if it provides sufficient notice, such as, for example, where the worker asks the employer whether he needs assistance from a representative, *see, e.g., NLRB* v. *N.J. Bell Tel. Co.,* 936 F.2d 144, 145 (3d Cir. 1991).

A worker may make a request for a representative at any point during an investigatory interview. *See, e.g., Prudential Ins. Co. of Am.,* 251 NLRB 1591, 1591–92 (1980), *enforcement denied on other grounds,* 661 F.2d 398 (5th Cir. 1981). Before the interview, the employer must inform the worker about the subject matter of the interview and must permit the worker to consult with the representative. *Pac. Tel. & Tel. Co.* v. *NLRB,* 711 F.2d 134, 136–37 (9th Cir. 1983). During the interview, the employer must permit the representative to provide active assistance and advice to the worker. *NLRB* v. *Texaco, Inc.,* 659 F.2d 124, 126 (9th Cir. 1981) (citing *Weingarten,* 420 U.S. at 262–63). The worker may designate the representative of his choice, absent extenuating circumstances. *Anheuser-Busch, Inc.* v. *NLRB,* 338 F.3d 267, 276–78 (4th Cir. 2003). Finally, once the worker has requested a representative, the employer has several options: (1) grant the request (including delaying the interview if necessary); (2) forgo the interview; or (3) offer the employee the choice between continuing the interview without a representative or having no interview at all. *NLRB* v. *N.J. Bell Tel. Co.,* 936 F.2d 144, 148–49 (3d Cir. 1991).

As explained, these core principles defining the scope of ''investigatory interviews'' under this final rule reflect decisions applying *Weingarten.* Under *Weingarten,* of course, the designated representatives are typically shop stewards or other union representatives. However, although the Department adopts *Weingarten's* ''investigatory interview'' concept, the Department maintains the NPRM's approach that, under the H–2A regulations, a worker who chooses to designate a representative in an investigatory interview is not limited to designating a union representative. Again, ''investigatory interview'' as used in this final rule must be interpreted consistently with the statutory purpose of the INA and the H–2A program, in light of the H–2A program's unique characteristics. In the H–2A context, due to low unionization rates in agricultural workplaces, limiting designated representatives to union representatives would severely curtail workers' ability to identify a representative. Also, the Department believes it is appropriate to permit a worker to designate a non-coworker as a representative because the temporary nature of H–2A work contracts means that it may be difficult for a H–2A worker to build trusted relationships with coworkers. This approach is consistent with the core principle that an employer must permit the worker to designate the representative of their choice. *Anheuser-Busch,* 338 F.3d at 276–78. In the NLRA setting, that principle protects the worker's ability to select the union representative of their choice, but in the H–2A context, that principle protects the worker's ability to select any representative of their choice.

The second modification to the NPRM involves removing the final sentence of the proposed provision requiring representatives to be guaranteed physical access to the worksite and adding two sentences pertaining to representatives' attendance at investigatory interviews. First, where the designated representative is present at the worksite at the time of the investigatory interview, the employer must permit the representative to attend the investigatory interview in person. The second sentence clarifies that where the designated representative is not present at the worksite at the time of the investigatory interview, the employer must permit the designated representative to ''attend'' an investigatory interview remotely, by telephone or videoconference.

The proposal to require a designated representative access to the worksite or property was intended to facilitate the worker's ability to designate the representative of their choice. The Department believes that removing that requirement and substituting the new modified requirements will continue to serve that goal, while also mooting employers' concerns about the entry of unaffiliated third parties on employer worksites, liability risks, and food safety obligations, and their assertion that the entry of unaffiliated third parties raises ''takings'' concerns under *Cedar Point.* Clarifying that representatives may attend remotely also ensures that the worker may designate the representative of their choice. *See Anheuser-Busch,* 338 F.3d at 276–78. With remote attendance as an option, a worker may more easily obtain participation from their representative of choice, even if the representative is not local. Also, if the employer, worker, and worker's representative are all amenable, this final rule does not prohibit a worker's representative who is not usually present at the worksite from attending a scheduled investigatory interview in person. In other words, if the employer schedules an investigatory interview for a future date and agrees to the in-person participation of a worker's representative who is not usually present at the worksite (*e.g.,* a key service provider such as a member of the clergy), that representative may attend the investigatory interview in person. The Department notes that the final rule's requirement that the employer ''must permit the worker to receive advice and active assistance from the designated representative during any such investigatory interview'' applies equally where the representative participates remotely and where the representative participates in person.

As explained, the Department believes that these modifications will address comments stating the language proposed in the NPRM was vague or unclear. The Department believes that its modifications to the regulatory language will also mitigate implementation concerns raised in the comments. For examples, the modifications will address employers' concerns that the language proposed in the NPRM could prevent employers from providing minor counseling or routine corrections of job performance. Under the core principles outlined above, investigatory interviews normally do not include giving instructions or providing corrections of work techniques. Typically, the Department will consider that an employer's obligation under § 655.135(m) will arise when the employer's representative (such as an owner, manager, or supervisor) seeks to question a worker, the questioning is part of an investigation, and the worker reasonably believes that they might face discipline. Along similar lines, the modifications address concerns that the proposal would expose employers to liability for dangerous circumstances. Under the core principles, investigatory interviews do not include interactions where the employer announces a disciplinary decision that the employer has already reached. In certain situations implicating safety considerations, employers routinely impose discipline without conducting an interview; for example, where an employer's representative witnesses conduct such as unsafe operation of a vehicle or machinery. Nothing in this final rule prevents an employer from intervening to stop a dangerous situation. However, any situation where an employer seeks to question a worker, and the worker believes that questioning may result in discipline, constitutes an investigatory interview.

The modifications will also mitigate concerns that the proposal would lead to wasted time on the worksite (on the rationale that arranging a representative could take days or weeks to arrange) and that the proposal did not explain what employers should do if a representative is not available or does not timely appear. Under the core principles, if an employer is concerned about delays in arranging a representative, the employer has the option to forgo the interview or offer the employee the choice between continuing the interview without a representative or having no interview at all. Should the employer opt to forgo the interview, an employer may impose discipline without conducting an interview so long as any resulting termination complies with the requirements of for cause termination as described further below. Or, if applicable in actual fact, the employer may tell the worker that the interview will not lead to discipline and may in that case proceed with an interview without a representative present. The Department believes that these options for employers will significantly mitigate delays.

However, where the employer requires an investigatory interview to undertake a fair and objective investigation into job performance or misconduct in compliance with § 655.122(n)(2)(i)(D) and the worker requests a representative, the employer must allow a reasonable delay for the representative to join the investigatory interview (either in person or remotely). The Department will look at all facts and circumstances when determining what constitutes a reasonable delay, including, for example, whether the designated representative is engaged in time-sensitive work that cannot be paused, is assigned to work in a different location, or cannot readily be contacted due to lack of telephone service in remote areas. The Department will also consider the time sensitivity of the employer's need to conduct the investigatory interview. Moreover, the Department emphasizes that the employer must not consider the worker's request for a representative in any way in the employer's decision whether to impose discipline. Additionally, employers must adhere to the core principle requiring that employers inform workers of the subject of the interview and employers must not intimidate or coerce workers into declining a representative. For example, an employer does not fulfill its obligation under § 655.135(m) where the employer misrepresents the subject of the interview, or where the employer relays to a worker that the worker will avoid discipline if they decline a representative, but that the worker may face discipline if it requests a representative.

The Department further underscores that, should the employer eventually seek to terminate a worker for cause under 20 CFR 655.122(n) based on such discipline, or based on a series of infractions, the employer must establish that it satisfied the five conditions specified in § 655.122(n), including that it undertook a fair and objective investigation into the performance or misconduct and that it engaged in progressive discipline. Where an employer opts to forgo an investigatory

interview after a worker requests a representative, the Department will examine whether the investigation was fair and objective even absent the investigatory interview. Moreover, more generally, because § 655.135(m) is an employer obligation, the Department may take enforcement action against an employer that unlawfully fails to permit a worker to designate a representative.

The changes to the regulatory text respecting remote attendance of representatives will also mitigate employers' concerns about delays. Because the regulations now provide for remote attendance by representatives, in the case of remote participation, employers need not delay an investigatory interview until such representatives arrive in person. Moreover, consistent with the regulatory text and the core principles outlined above, if the worker designates a representative who is not immediately available, the worker may select an alternative representative, including a representative who is available to attend remotely. Under the core principles, the worker may select the representative of their choice, but if there are extenuating circumstances, the employer need not delay the interview. The Department will consider such extenuating circumstances to include where the designated representative's failure to timely appear causes undue delay. As explained above, the Department will consider all facts and circumstances in analyzing whether longer delays are reasonable.

The Department believes that requirements of new § 655.135(m), as modified from the NPRM as discussed above, will help to protect against adverse effect on similarly employed workers. As explained above, the Department believes that protecting workers' right to engage in concerted activity will better prevent adverse effect caused by use of the H–2A program. Allowing H–2A workers and workers in corresponding employment the option to have a representative in an investigatory interview (if they so choose) under new § 655.135(m) will enhance workers' ability to act in concert with their coworkers to protect their mutual interest in ensuring that their employer does not impose punishment unjustly. The protections in new § 655.135(m) also will help safeguard workers against unjust discipline (including termination and infractions that may lead to termination) by giving workers the opportunity to secure a witness, advisor, or advocate in a potentially adversarial situation. These protections thus will bolster the clarifications made regarding a termination for cause under § 655.122(n) of this final rule—clarifications that are intended to protect a worker's entitlement to protections under other regulatory provisions that prevent adverse effect (§§ 655.122(h)(2), 655.122(i), and 655.153).

Finally, the Department has considered the question it posed in the NPRM about the best means to ensure that workers are informed of employer's obligation to permit workers to designate a representative in an investigatory interview. The Department did not receive comments on this subject, but upon reflection, the Department concludes that the best means to ensure that workers are adequately informed of this obligation is to require that employers include notification in the job offer. Therefore, the Department has included on the job order, in the conditions of employment and assurances to which an employer must agree, a statement regarding the requirements of new § 655.135(m).

B. Proposed § 655.135(m)(1), Employee Contact Information

The Department proposed in § 655.135(m)(1) to require employers to provide to a requesting labor organization an electronic list of employee contact information for all H–2A workers and workers in corresponding employment engaged in agriculture as defined under the FLSA and employed at the place(s) of employment included within the employer's H–2A Application. 88 FR at 63795–63796, 63825. The Department proposed to require the employer to update the list once per certification period, if requested by the labor organization. *Id.* The Department explained in the NPRM that this provision was intended to bolster the ability of workers to effectively self-organize and to engage in concerted activity protected under proposed § 655.135(h)(2), by providing workers with access to information regarding the arguments both for and against organization and with information and resources necessary to engage in concerted activity regarding working conditions. *Id.* at 63795. The proposal was modeled on the NLRB's voter list requirements under the NLRA. *Id.* at 63795–96 (citing 29 CFR 102.62(d), 102.67(l); *RadNet Mgmt., Inc.* v. *NLRB,* 992 F.3d 1114, 1122–23 (D.C. Cir. 2021) (provision of contact information to labor organizations is fundamental to effective exercise of organizing rights).

The Department received a significant number of comments in strong opposition to proposed § 655.135(m)(1). The majority of these comments cited the potential risks to workers' privacy and safety posed by sharing this information without the employee's consent. Many commenters, including trade associations, an agent, and an individual employer, observed that employers would have little if any means to verify the legitimacy of an organization requesting the employee contact information under this provision. As a result, an employer could inadvertently provide sensitive and private employee contact information to illegitimate third parties. Even where the request came from a bona fide labor organization, commenters noted that such an organization may not have received a majority of support from the workers nor have successfully petitioned for an election from a governing labor board. For example, citing *Excelsior Underwear, Inc.,* 156 NLRB 1236, 1245 (1966), the National Right to Work Legal Defense Foundation, Inc. stated that the NLRB requires disclosure of voter lists ''only after an election has been directed'' in light of the organizational interests at stake, namely that a ''real question concerning representation exists.'' Relatedly, several commenters expressed concern with the potential liability to employers for providing worker information without the worker's explicit consent, in the event of an abuse of that information by the third party. These commenters requested that, if finalized, the provision include an opt-out mechanism for employees and a disclaimer of liability for employers, or some mechanism for pre-registration or other vetting of the requesting organizations by the Department. Many commenters also objected to the proposal due to the potential burden on employers to comply with the proposed provision, since multiple labor organizations could request the list each season, along with one update per season. For similar privacy-related and employer-burden reasons, many commenters opposed any expansion of the proposed provision to include a provision of employee contact information to other organizations. Finally, the North Carolina Farm Bureau Federation, Inc. and U.S. Representatives Foxx and Thompson each opined that the proposal was unconstitutional, citing respectively First Amendment and separation of powers concerns.

The Department also received some comments in support of the proposal, citing the need for workers to have access to information regarding their rights. For example, 11 State Attorneys

General observed that this proposal, combined with other worker voice and empowerment proposals in the NPRM, would ''connect workers to important information about their employers and their rights.'' A group of U.S. Senators observed that the worker voice and empowerment proposals, including the employee contact information proposal, would ''ensur[e] workers can advocate for and seek out better working conditions without fear.'' Some of the comments in support of the proposal, however, reflected similar concerns as noted above regarding worker privacy and recommended that any final rule include some verification or enforcement mechanism. For example, the AFL–CIO suggested that any final rule include a proviso that ''[t]he requesting labor organization shall not use the list for purposes other than seeking to represent H–2A workers or otherwise assisting them in relation to their terms and conditions of employment and related matters.'' Farmworker Justice suggested a similar caveat. On the other hand, the California LWDA advised against including an ''opt out'' mechanism in any final rule as a means to mitigate the privacy concerns, noting the potential for abuse of such a mechanism.

After consideration of the comments received, the Department has decided not to adopt the proposed employee contact information provision in this final rule. The Department believes that the interest underlying this proposal (*i.e.,* workers' access to information about their rights) is better furthered through other provisions of this final rule, including § 655.135(n), regarding access to worker housing, § 655.135(h)(1)(v), protecting employees from retaliation for inquiring about or asserting their rights or consulting with key service providers, and § 655.135(h)(2)(i), protecting persons engaged in FLSA agriculture from retaliation for engaging in activities related to self-organization. These protections also will be disclosed to workers through the job order and through other employee outreach tools.

However, as discussed in the NPRM, a worker's ability to gather and share coworkers' contact information, both amongst other workers and with labor organizations, is itself concerted activity, and therefore is protected activity under § 655.135(h)(2) of this final rule. *Quicken Loans, Inc.* v. *NLRB,* 830 F.3d 542, 545 (D.C. Cir. 2016) (citing *Beth Israel Hospital* v. *NLRB,* 437 U.S. 483, 491 (1978) and *Eastex, Inc.* v. *NLRB,* 437 U.S. 556, 565 (1978) (rights to organization and to engage in concerted activity ''necessarily encompass employees' rights to communicate with one another and with third parties'' about organization and working conditions). For example, a worker who gathers coworkers' contact information and shares that information with a union so that the union can contact the workers regarding the benefits of unionization is engaging in protected, concerted activity and self-organization. Under § 655.135(h)(2)(i), as adopted in this final rule, an employer may not retaliate against the worker for gathering or sharing this information.

C. Proposed § 655.135(m)(4), Commitment To Bargain in Good Faith Over Proposed Labor Neutrality Agreement

The Department proposed adding a new provision at 20 CFR 655.135(m)(4) that would require an H–2A employer to attest either that they will bargain in good faith over the terms of a proposed labor neutrality agreement with a requesting labor organization, or that they will not so bargain and provide an explanation for why they have declined to do so. The Department also proposed that the employer's response must be disclosed in the job order. The Department stated that the goal of this proposal was to provide workers and worker advocacy groups with this information about employers to enhance transparency. 88 FR at 63798–63799.

Commenters that supported the proposal, such as the UFW Foundation, stated that they appreciated the transparency it would provide. For example, a comment by several State Attorneys General stated that the required disclosures would allow workers to use the information to assess job opportunities. California LWDA believed the proposal would increase workers' access to information about job opportunities and workers' rights.

Many commenters, however, opposed the proposal. Although the Department stated that an employer's choice whether to bargain over any labor neutrality agreement, and whether to ultimately enter any labor neutrality agreement, would be entirely voluntary, several commenters, including wafla and USA Farmers, raised concerns that the proposal would compel speech from employers, in violation of the First Amendment.

Commenters also questioned whether the Department's proposal would prevent adverse effect. For example, USA Farmers, a national trade association representing agricultural employers, claimed that the information that the Department sought was ''wholly irrelevant to an employer's request for a temporary [agricultural] labor certification'' under the H–2A program and ''has nothing whatsoever to do with an employer's need for temporary labor or with preventing adverse effect.'' A number of trade associations that represent H–2A employers, such as IFPA, TIPA, and GFVGA, questioned the Department's authority for the proposal, stating that the INA ''does not grant the authority to advance labor organization, rather the authority is intended to prevent the adverse effect'' on workers in the United States. The National Right to Work Legal Defense Foundation, Inc. claimed that the Department lacked a statutory basis for the proposal.

A number of commenters also expressed confusion with the proposal's requirements. For example, wafla, a trade association, argued that it would ''require an employer to disclose their hypothetical position on labor organizing'' without the benefit of a specific request from a labor organization. USA Farmers noted that it would not be possible for an employer to reasonably respond to the Department's request because of the potential unknown scenarios that might arise in the future. Employers and groups representing employers also raised concerns about facing enhanced enforcement from the Department if they chose to decline to bargain on the job order.

After consideration of the comments and the concerns raised by a number of commenters, the Department has decided not to finalize the proposal. The Department also believes that a number of other provisions of this final rule, such as the expanded rights of access to worker housing at § 655.135(n), the protections surrounding termination for cause at § 655.122(n), and disclosures regarding productivity standards and overtime wage rates at § 655.122(l)(4), will adequately serve the proposal's stated goals of transparency and disclosure of information for workers.

ix. Section 655.135(n), Access to Worker Housing

In the NPRM, the Department proposed the addition of a new provision, § 655.135(n), governing access to worker housing, intended to protect the rights of association and access to information for H–2A workers and workers in corresponding employment and to address the isolation that contributes to the vulnerability of some H–2A workers.

The Department explained that, due to the temporary nature of their work and dependency on a single employer for work, housing, transportation, and

necessities, among other factors, H–2A workers are particularly vulnerable to labor exploitation, including violations of H–2A program requirements, dangerous working conditions, retaliation, and labor trafficking. Geographic isolation and employer-imposed limitations on workers' movements and communication exacerbate this vulnerability. The Department discussed studies by nongovernmental organizations highlighting the vulnerability faced by H–2A workers, as well as some employers' use of isolation and monitoring—including rules or practices limiting workers' ability to leave employer-furnished housing, leaving workers in remote areas without transportation or means of communication, deliberately limiting workers' access to their support systems, and confiscating workers' personal cellular phones and passports—as a means of controlling workers and forcing them to accept substandard and illegal working conditions.[96] The Department explained that it was proposing the new provision at § 655.135(n), governing access to worker housing, to protect workers' rights to association and access to information both to make them less susceptible to labor exploitation, including trafficking, and to interrupt factors that impose barriers to workers advocating or complaining regarding working conditions and thus have an adverse effect on workers in the United States similarly employed.

In light of these serious concerns, the Department proposed two distinct, but complementary, protections: § 655.135(n)(1), which would protect the right of workers in employer-furnished housing to invite guests to their living quarters and nearby common areas, and § 655.135(n)(2), which would provide a narrow right of access to labor organizations as a backstop to the protections of § 655.135(n)(1).

Specifically, the proposed § 655.135(n)(1) would provide that workers residing in employer-furnished housing must be permitted to invite, or accept at their discretion, guests to their living quarters and/or the common areas or outdoor spaces near such housing during time that is outside of workers' workday and subject only to reasonable restrictions designed to protect worker safety or prevent interference with other workers' enjoyment of these areas. The proposed regulation would explicitly permit workers to invite guests or to accept (or reject) visitors wishing to speak with them. As explained in the NPRM, this protection would recognize that workers do not relinquish their rights to association or access to information simply by virtue of residing in employer-furnished housing. Further, it would prevent employers from using the statutorily required provision of housing as a means to isolate or control their workforce by blocking their access to information and assistance from the outside. The Department explained that, because the right to invite or accept visitors would be limited to housing areas and to time that is outside of workers' workday, it did not anticipate that this proposal would disrupt employers' business operations. As proposed, § 655.135(n)(1) would apply to all housing furnished pursuant to the employer's statutory and regulatory obligations. The Department explained that while it anticipated that this protection would be the most beneficial for workers who reside in housing that is geographically isolated, it recognized that even workers whose housing is more centrally located may be isolated by virtue of employer policies that limit their ability to leave housing or to interact with the public, even during time that is outside of workers' workday, and would benefit from a protected right to invite and accept visitors. Because workers typically reside in shared quarters, the Department proposed to permit reasonable restrictions designed to protect worker safety or to prevent interference with other workers' enjoyment of the housing.

Recognizing that the effectiveness of proposed § 655.135(n)(1) may be limited where H–2A workers are unaware of, or afraid to exercise, their right to invite or accept visitors in employer-furnished housing, the Department proposed a second requirement at § 655.135(n)(2) that would provide a narrow right of access to labor organizations. The Department explained that labor organizations would have an incentive to report concerns of labor exploitation to the Department or other law enforcement agencies, as well as to provide information to workers on their rights under the H–2A program and to engage in self-organization. Under the proposed § 655.135(n)(2), where employer-furnished housing for H–2A workers and workers in corresponding employment who are engaged in FLSA agriculture is not readily accessible to the public, a labor organization would be permitted to access the common areas or outdoor spaces near worker housing for the purposes of meeting with workers during time that is outside of workers' workday for up to 10 hours per month.

The Department proposed to include the protections that would be afforded under proposed § 655.135(n) in the disclosures required on the job order to help inform workers of their rights under this proposal. Additionally, the Department proposed corresponding edits to § 655.132(e)(1) to address instances in which the employer-furnished housing is provided by the fixed-site agricultural business (''grower'') as part of its agreement with an H–2ALC. Under the current provision, where housing is owned, operated, or secured by the grower, the H–2ALC is required to include with its H–2A Application proof that the housing complies with the applicable standards set forth in § 655.122(d) and certified by the SWA. The Department proposed to add to this provision the requirement that the H–2ALC also provide with its H–2A Application proof that the grower has agreed to comply with the requirements of proposed § 655.135(n). The Department explained that, in doing so, it sought to ensure that the protections for access to worker housing would be met even where the H–2ALC fulfills its obligation to furnish housing through its agreement with its client grower.

The Department sought comments on all aspects of this proposal. With respect to the proposed § 655.135(n)(1), the Department asked whether this provision should be limited to workers residing in certain types of employer-furnished housing or in certain locations. The Department also sought comments on what would constitute reasonable or unreasonable restrictions and other means of balancing different workers' interests in shared housing and on visitor policies that may unduly hinder workers' rights to invite or accept guests. With respect to the proposed § 655.135(n)(2), the Department sought comments on the proposed limitations placed on labor organizations' right of access, including the cap of 10 hours per month, and how to understand when worker housing is not readily accessible to the public; how the proposal would apply when workers engaged in FLSA agriculture share housing with workers not engaged in FLSA agriculture (§ 655.135(n)(2) applies only with respect to the former); whether the right of access in this provision should be expanded to provide similar access to some or all key service providers as defined in proposed § 655.103(b); and, if so, whether the

[96] 88 FR at 63750, 63799–63801 & nn.80–81 (citing Polaris 2018–2020 Report; CDM Report; Farmworker Justice Report; *U.S.* v. *Patricio,* No. 5:21-cr-00009 (S.D. Ga.)).

Department should limit the scope of the catchall term ''any other service provider to which an agricultural worker may need access.'' With respect to the proposed corresponding edits to § 655.132(e)(1), the Department sought comments on what would constitute the requisite proof that an H–2ALC would be required to submit with its application, as well as alternative means of ensuring compliance with the access protections where housing is provided directly by a grower. In addition, the Department sought comments on whether and how the protections of proposed (n) should apply with respect to workers housed pursuant to §§ 655.230 (housing for work performed on the range in herding and range production of livestock occupations) and 655.304 (mobile housing for workers engaged in animal shearing or custom combining).

As described in more detail below, this proposal received general support from some legislators and many worker advocacy groups and individuals. For example, a joint comment of 15 U.S. Senators expressed support for the access provision, stating that in combination with the rest of the proposed rule, this would ensure workers can advocate for better working conditions without fear. The Alliance to End Human Trafficking explained that H–2A workers' isolation and vulnerability increases their risk of being subject to labor exploitation or trafficking and that the provision would help reduce this risk by protecting H–2A workers' rights of association and access to information. Farmworker Justice and NLADA explained that farmworker housing is often physically isolated from the surrounding community, creating ''conditions in which workers are vulnerable to abuse and may be denied their rights,'' and expressed support for the Department's proposal to increase workers' access to information about their rights and to recognize their rights to have visitors and to access essential services. Numerous individuals submitted public comments supporting the access provision, particularly the protection in paragraph (n)(1) of workers' right to invite guests to employer-furnished housing. Additionally, Farmworker Justice and NLADA noted that in some areas, rights of access to farmworker housing have already been established under State law or interpretations of Federal law and asked the Department to ensure that any regulatory provisions regarding access are minimum standards and are not intended to preempt any more expansive or permissive State access requirements.

Employers, trade associations, and agents were generally opposed to the access provision, though this opposition was largely directed at the narrow right of access for labor organizations in paragraph (n)(2).

Protecting Workers' Right To Invite Guests to Housing Areas

Worker advocacy organizations generally supported the proposed language of paragraph (n)(1), which was intended to protect the right of workers in employer-furnished housing to invite guests to their living quarters and nearby common areas. Advocacy organizations, such as the North Carolina Justice Center, UMOS, PCUN, the National Women's Law Center, and the UFW Foundation, explained that this provision would help address isolation and vulnerable living situations among H–2A workers. Farmworker Justice, the UFW Foundation, and AWAC described instances in which employers prohibited visits from service providers, labor organization representatives, and family, or retaliated against workers who met with such outside parties. The UFW Foundation explained that while some States already recognize the right of farmworkers to invite or accept guests, ''a federal rule clearly protecting that right is long overdue.'' Individuals also expressed support for this provision on a variety of grounds, including that it would allow workers to build connections with the surrounding community, access legal and medical services, and feel secure in their homes, and would ''facilitate liberty and the pursuit of happiness.''

While expressing support for the proposed provision, several worker advocacy groups, including Farmworker Justice and AWAC, explained that merely requiring that workers be allowed to invite guests would be an insufficient means of preventing worker isolation because many workers would be afraid to exercise this right. Both organizations suggested the Department should protect access for a range of service providers.

Some employers and trade associations also supported this aspect of the proposal. For example, USApple described it as ''reasonable,'' noting that most employers permit the occupants (*i.e.,* the workers) to determine who may visit and have policies in place for guests, such as specified hours and check-in procedures. The National Cotton Ginners Association and Texas Cotton Ginners' Association stated that ''the requirement to allow access to housing by non-employees must be tempered by recognizing that the employer is responsible for meeting all housing requirements.'' For instance, allowing workers to invite guests could result in guests staying overnight without the employer's knowledge and, potentially, in violation of occupancy requirements.

While most of the opposition to this proposal was reserved for the limited right of access for labor organizations, some commenters also opposed the proposed language in paragraph (n)(1) intended to protect the right of workers in employer-furnished housing to invite guests to their living quarters and nearby common areas. One employer, McCorkle Nurseries, Inc., objected to what it characterized as ''mandatory access to worker housing for guests.'' Several other employers stated that they must be able to limit access to employer-furnished housing for workers' safety but noted that most employers already permit guests during specified hours or allow family members to pick up and drop off workers for visits. Several trade associations, including NHC, IFPA, and GFVGA, stated that they do not support ''blanket access'' for guests in employer-provided housing and that it is imperative to give employers the discretion to impose restrictions on guest access, but that it is common for growers providing housing to provide access to a specific place on the housing property to meet guests, such as a common area or parking lot. These organizations also noted that allowing guests increases both the risk of disruptions at workers' homes and employers' liabilities, such as potential injuries, nuisance complaints, and insurance costs. Seso, Inc. opined that without procedural safeguards around the meaning of workers' right to ''invite or accept'' guests, there is the ''obvious potential for rampant abuse,'' and Americans for Prosperity Foundation speculated that allowing employees to invite guests could result in union representatives ''pos[ing] as bona fide job seekers,'' ''get[ting] hired for the sole purpose of sowing discord,'' and then ''invit[ing] their labor contacts on the property.'' The Wyoming Department of Agriculture opined that the proposal would prohibit employers from ''providing any level of restrictions or guidance to their employees regarding who they bring on their premises'' and ''allow undocumented friends or family to stay'' in the housing.

The Department sought comment on whether the protections in proposed § 655.135(n)(1) should be limited to workers in certain types of employer-

furnished housing or in certain locations. Farmworker Justice and NLADA responded that these protections ''should apply without qualification to all H–2A workers,'' explaining that H–2A workers often have difficulty accessing information and services due to limited transportation, limited English language proficiency, and a lack of integration into a local community, and that even workers in housing that is less physically or geographically isolated may be isolated by virtue of employer policies either intended to isolate workers or which have that effect.

The Department also sought commenters' feedback on the types of visitor policies that would be reasonable to protect worker safety and to balance different workers' interests in shared housing versus those that may unduly hinder workers' rights to invite or accept guests. Farmworker Justice and NLADA reasoned that any determination of what constitutes a reasonable restriction must recognize that H–2A workers' legal status ties them to a single employer, making them uniquely vulnerable. These commenters explained that restrictions that interfere with workers' privacy rights or make them vulnerable to undue influence or retaliation, such as requiring visitors to provide prior notice or submit to surveillance during their visit, would not be reasonable. Similarly, these commenters opined that restrictions that have the effect of making visitation difficult would be unreasonable. For instance, they reasoned, while restricting visitors' shared access to sleeping quarters during ''sleeping hours'' may be reasonable where there are alternate private places to meet, it would generally not be reasonable if it ''unfairly and unreasonably limits a worker's ability to meet with their guest at the time outside work hours of that worker's choosing.'' These commenters also asserted that no restriction of emergency services should be considered reasonable and that the final rule should require employers to assist workers in contacting and accessing emergency services, particularly in areas that are difficult to access or where language barriers exist. The California LWDA emphasized the need to ensure that such reasonable restrictions are ''narrowly construed'' and recommended minor edits to the language of proposed paragraph (n)(1) to provide that workers' right to invite or accept guests is ''subject only to reasonable restrictions to protect workers from immediate risks to their physical safety or prevent significant interference with other workers' enjoyment of these areas.''

Wafla stated that owners and operators of worker housing should be allowed to set reasonable rules and limits regarding visitors on the property, including rules governing sleeping hours and locations of visits; workers should work within these visitation rules or conduct visits offsite.

Narrow Right of Access for Labor Organizations

Commenters supporting this provision stated it was necessary due to H–2A workers' relative isolation. For instance, California LWDA expressed support for granting a narrow right of access to labor organizations, stating that because H–2A workers living on their employers' property are isolated, providing labor organizations access to workers in areas near their homes is ''an important and necessary tool to provide workers with information about their right to organize.'' The Concerned Law Students of the University of Georgia also noted that this provision would make it easier for labor organizations to contact workers and protect them from retaliation. AFL–CIO explained that allowing access by labor organizations when H–2A workers are both working and living on the farm will ''ensure that H–2A workers are not insulated from outside entities who can apprise workers of their rights and help them enforce their rights, thereby protecting them from exploitation.''

Some commenters expressed opposition to this provision on the ground that it unfairly favors unions over employers. A couple of U.S. House Members opined that it would interfere with the important work that takes place on farms. MásLabor and USApple stated that labor organizations should only be granted access after being invited by workers. Wafla criticized the Department for not proposing a mechanism by which labor organizations could be sanctioned if they engage in intimidation or coercion. Several trade associations, including GFVGA, NHC, and employers expressed concern that the provision would burden employers that would have to determine which organizations—potentially more than one—are entitled to the proposed right of access and monitor their access. Organizations such as AmericanHort and USApple noted that it is not clear how the Department would enforce the provision.

Other commenters opposed providing a narrow right of access for labor organizations on the grounds that doing so would conflict with existing legal precedent or requirements. The U.S. Chamber of Commerce, NCAE, and other trade associations argued that the provision would constitute a *per se* physical taking of property under *Cedar Point,* 141 S. Ct. 2063. Multiple trade associations, such as NCAE, FFVA, GFVGA, NHC, and wafla, and some employers warned that this proposed right of access would conflict with farms' food safety and biosecurity protocols required by either the Food Safety Modernization Act of 2011 or the Global Food Safety Initiative. For example, FFVA stated that these generally accepted practices require employers to restrict access to only authorized personnel who are trained in practices to ensure food safety.

Access for Key Service Providers

The Department received many comments in response to its question on whether the right of access in proposed § 655.135(n)(2) should be expanded to provide a similar right of access to some or all ''key service providers,'' as defined in proposed § 655.103(b). In particular, Farmworker Justice and AWAC emphasized the critical role that service providers play in ensuring that workers' basic needs are met. Noting the vulnerable nature of H–2A workers (*see* Section VI.C.2.b), these commenters described H–2A workers' need to access a variety of essential services during their period of employment, including routine and emergency medical care, legal information and representation, and consular services. AWAC emphasized that in rural areas, workers also depend on churches, food banks, educators, and other providers for assistance in meeting their basic needs.

These commenters all raised the need for such service providers to have an independent right of access, explaining that relying on workers' right to extend invitations alone would be insufficient because workers are often unaware of their rights or the available services and agencies, or are afraid to exercise their rights due to a fear of retaliation. AWAC stated that, in the rural areas it serves, workers often feel trapped in remote labor camps and understand from the presence of camp gates and ''Private Property'' or ''No Trespassing'' signs that they are not permitted contact with outside guests. According to the commenter, workers' isolation and lack of access to information is exacerbated by the fact that internet and cell phone service are extremely limited in these areas. Farmworker Justice cited to testimony from the passage of Oregon's farmworker housing access protections, which described egregious incidents such as armed camp guards interfering with workers' access to legal services

employees, workers not being permitted to see close family members, and a Catholic priest and nun witnessing or experiencing interference while trying to connect workers to medical care. They also cited a recent example of a farmworker who became ill and died after being unable to access emergency medical services.

Advocacy organizations such as CDM, Migration that Works, and NLADA stated that service providers' access should not be limited by what they called the ''arbitrary restrictions'' that apply to labor organizations' access under proposed § 655.135(n)(2), such as the 10-hour-per-month limit or the requirement that the housing not be readily accessible to the public. Farmworker Justice explained that the First Amendment jurisprudence governing service providers' access—*see, e.g., Schneider* v. *New Jersey,* 308 U.S. 147, 152 (1939); *Martin* v. *City of Struthers, Ohio,* 319 U.S. 141, 144 (1943); *Rivero* v. *Montgomery Cty.,* 259 F. Supp. 3d 334, 346 (D. Md. 2017)—differs from that governing labor organizations.

Some trade associations concurred in the importance of service providers' access. For example, the National Cotton Ginners Association and Texas Cotton Ginners' Association stated that ''workers should have the ability to reasonably allow access of housing to 'key service providers' such as health care-providers or community health workers.''

Job Order Disclosure and Corresponding Edits to § 655.132(e)(1)

The California LWDA supported the Department's proposal to include the paragraph (n) protections that are adopted in the disclosures required on the job order to help inform workers of their rights. It also supported the Department's proposed corresponding edits to § 655.132(e)(1) to address instances in which the employer-provided housing is provided by the grower as part of its agreement with an H–2ALC by requiring the H–2ALC to include proof that the grower has agreed to comply with the requirements of § 655.135(n), and suggested that a written statement agreeing to compliance could constitute the requisite proof. Farmworker Justice and NLADA likewise supported the Department's proposed corresponding edits to § 655.132(e)(1), calling these ''necessary and appropriate.'' They stated that an H–2ALC could meet this requirement by submitting a grower's acknowledgement of its responsibility to comply with the protections of § 655.135(n).

Wafla opposed the corresponding edits to § 655.132(e)(1) because it would require growers to comply with the requirements of paragraph (n) where an H–2ALC meets its obligation to furnish housing through an agreement with the grower.

Workers Housed Pursuant to §§ 655.230 and 655.304

Farmworker Justice and NLADA expressed support for applying the protections of proposed paragraph (n) with respect to workers housed pursuant to §§ 655.230 (housing for work performed on the range in herding and range production of livestock occupations) and 655.304 (mobile housing for workers engaged in animal shearing or custom combining), noting that these workers are even more isolated than other H–2A workers and are entirely dependent on their employers for access to food and water, medical care, and other basic essential needs. According to the commenters, these workers have also been subject to some of the most egregious reports of abuse and exploitation—including assault and battery, false imprisonment, denial of medical care, withholding of food and water, confiscating documents, visa fraud, wage theft, and labor trafficking. In light of the workers' extreme isolation and vulnerability, these commenters asserted that the protections of paragraph (n) are necessary to enable these workers to access needed service providers. Further, these commenters suggested that the Department revise § 655.210(d)(2) to require employers to provide these workers—who are often outside of cell phone service range with their whereabout known only by their employer—with a means to communicate directly with emergency responders at all times, such as a satellite phone, as well as a GPS tracking device or locator to allow them to provide their coordinates to emergency or other services.

The Department did not receive any comments specifically opposing the application of the protections in paragraph (n) to workers housed pursuant to §§ 655.230 and 655.304, though, in its opposition to the proposed narrow right of access for labor organizations, the Western Range Association stated that workers employed in the range production of livestock are often housed in remote locations, not on private property, and thus ''the employer may not have control of who is allowed on the property.''

After considering the totality of the comments discussed above in this Section VI.C.2.b.ix, the Department adopts this proposal with significant modifications. As explained below, the Department finds it appropriate to retain the language of paragraph (n)(1) recognizing workers' right to invite guests, but to eliminate the language of paragraph (n)(2) providing a narrow right of access for labor organizations. The resulting paragraph is redesignated as paragraph (n). To paragraph (n), the Department adds additional language clarifying what is meant by workers' ability to ''accept'' guests. The Department also adopts the corresponding edits at § 655.132(e)(1), and confirms that the protections of § 655.135(n) will apply equally to workers housed pursuant to §§ 655.230 (housing for work performed on the range in herding and range production of livestock occupations) and 655.304 (mobile housing for workers engaged in animal shearing or custom combining). As detailed above in Section VI.C.2.b, the Department has serious concerns regarding H–2A workers' unique vulnerabilities, which make them significantly more likely to accept employers' noncompliance with H–2A and other legal requirements and place them at a greater risk of serious abuse, labor exploitation, and trafficking. Workers' isolation and lack of information regarding their rights exacerbate these vulnerabilities. In this rule, the Department seeks to protect workers' rights to association and access to information to prevent labor exploitation, including trafficking, and to interrupt factors that impose barriers to workers advocating or complaining regarding working conditions and thus have an adverse effect on workers in the United States similarly employed.

Removal of Narrow Right of Access for Labor Organizations

In light of the significant concerns raised by commenters regarding proposed paragraph (n)(2)'s narrow rights of access for labor organizations, the Department withdraws this portion of its proposal. In particular, the Department found persuasive commenters' operational concerns regarding employers' ability to determine which organizations would be entitled to access and how to appropriately monitor such access; the potential cumulative impact should multiple labor organizations seek access to employer-furnished housing areas; and the Department's authority to resolve any disputes between employers and labor organizations that may arise. Additionally, the Department has determined that it could address workers' isolation and the resultant

risks of labor exploitation and worsening working conditions through a more tailored measure.

While the Department appreciates and has fully considered the other concerns raised by commenters, particularly those related to potentially conflicting legal authority or obligations, it does not believe these raised significant barriers to the implementation of the proposed right of access for labor organizations. Most notably, *Cedar Point,* 141 S. Ct. 2063, which was cited by many commenters opposing this provision, did not address the circumstances at issue here—namely, agricultural workers, *who by virtue of residing on employer property,* are subject to extreme isolation and generally inaccessible to labor organizations or others who may wish to communicate or associate with the workers. *See also Lechmere, Inc.* v. *NLRB,* 502 U.S. 527, 534 (1992) (where '''the location of a plant and the living quarters of the employees place the employees beyond the reach of reasonable union efforts to communicate with them,' employers' property rights may be 'required to yield to the extent needed to permit communication of information on the right to organize''' (citing *NLRB* v. *Babcock & Wilcox Co.,* 351 U.S. 105, 113 (1956))); *Cedar Point,* 141 S. Ct. at 2080–81 (Kavanaugh, J. concurring) (characterizing the *Babcock* Court's interpretation of the NLRA to afford union organizers access to company property only when ''needed''—*i.e.,* when employees live on company property and union organizers have no other reasonable means of communicating with the employees—as consistent with a *Cedar Point* exception).

Similarly, the Department does not believe that the requirements of the FDA Food Safety Modernization Act of 2011 [97] are incompatible with guest access to employer-furnished *housing* areas. While whole-heartedly agreeing with commenters on the importance of this legislation and food safety requirements more generally, the Department believes that employers can balance reasonable guest access to housing areas with the need to have more restrictions in place with respect to the actual worksites. Moreover, based on the comments the Department received, many employers *do* manage to balance their obligations to ensure food safety and to permit reasonable guest access.

[97] Public Law 111–353, 124 Stat. 3885 (Jan. 4, 2011).

Protecting Workers' Right To Invite Guests to Housing Areas

As explained in the NPRM and above, the Department has serious concerns regarding the isolation of H–2A workers and how this isolation, when combined with these workers' unique vulnerabilities, render them particularly at risk of being subject to workplace abuses, labor exploitation, and trafficking. The Department's regulatory change governing the right to invite guests to worker housing is intended to protect workers' rights to association and access to information. The Department believes that this change will help protect workers against abuse, exploitation, and trafficking, and lessen barriers to workers' ability to advocate or complain regarding working conditions, as detailed above. Thus, the change should help prevent adverse effects on workers in the United States similarly employed.

These concerns are shared by many of the commenters. Many worker advocacy organizations shared stories of workers subject to extreme isolation, as well as abuse and exploitation. *See, e.g.,* AWAC comment (describing workers' isolation due to physical isolation of worker camps and the deliberate assertion of ''no entry'' policies by owners; cultural and linguistic isolation; near-total absence of transportation and resultant inability to leave the camp area, even for critical medical care; the lack of internet access and irregularity and unreliability of cellphone service; and workers' fear of retaliation due in part to their dependency of their employer); Farmworker Justice comment (describing workers' vulnerability due to dependency on employer and isolation due to location of housing, lack of transportation and often cell phone reception, fear of retaliation, and employer policies, as well as instances in which workers' family members and church representatives experienced difficulty accessing the workers); and UFW Foundation comment (describing workers' isolation and numerous instances of worker abuse and retaliation against workers).

Indeed, most commenters, including employers, appeared to support workers' right to invite guests to employer-provided worker housing areas, provided that employers may put in place reasonable restrictions necessary to protect the health and safety of their workers and help balance the competing needs of workers in shared housing. To address these concerns, the Department adopts the language in proposed paragraph (n)(1) recognizing the right of workers residing in employer-furnished housing to invite, or accept at their discretion, guests to their living quarters and/or the common areas or outdoor spaces near such housing during time that is outside of the workers' workday. The paragraph that contained this language is redesignated as paragraph (n). The Department disagrees with comments that suggested that this would provide unrestricted access for workers' guests, noting that it adopts the proposed language permitting ''reasonable restrictions designed to protect worker safety or prevent interference with other workers' enjoyment of these areas.'' The Department declines the California LWDA's suggestion that the Department narrow this language permitting reasonable restrictions, believing that the proposed language strikes the right balance of protecting workers' right to invite guests with the property owner's right to adopt reasonable guest policies.

After considering the comments received, the Department believes that the reasonableness of rules governing guest access must be determined by those rules' effect on workers' rights of association and access to information in light of all the available facts. For example, several employers raised concerns that the language of paragraph (n)(1) would allow workers to invite friends or relatives to stay overnight or even to reside with them in worker housing for extended periods. Although it will evaluate questions on a guest policy's reasonableness based on the specific facts before it, the Department believes that, under many circumstances, an employer policy prohibiting overnight guests would be reasonable. Where such a policy would raise concern is in instances where evidence suggests that an employer is using the policy as a pretext to limit visitation, either more generally or with respect to specific individuals. For instance, a guest policy restricting visitation during ''sleeping hours,'' broadly defined as 7:00 p.m. to 7:00 a.m. and encompassing the time that most workers and their guests are likely to be off work and available, would most likely be considered unreasonable. Similarly, a restriction on bringing guests into shared sleeping quarters may be reasonable where there are alternate spaces in the housing area in which to have a private conversation, but would be less so if a worker were forced to meet with a service provider in a crowded common area where the conversation could be overheard. Moreover, the Department will consider any restriction of the access of

emergency medical personnel to be unreasonable.

The Department remains concerned that the effectiveness of the protection adopted may be limited where H–2A workers are unaware of, or afraid to exercise, their right to invite or accept visitors in employer-furnished housing, particularly in light of its decision to withdraw proposed paragraph (n)(2), and similar concerns raised by commenters. Worker advocacy organizations such as Farmworker Justice, AWAC, and NLADA described the importance of third parties, such as key service providers, having an independent right of access as a means of addressing these concerns and bolstering workers' right to invite guests. Several of these organizations also emphasized the need to broaden the range of service providers or entities with such access.

Rather than create a specific right of access for key service providers, the Department has added language to the regulatory text clarifying workers' right to accept guests. A worker cannot choose to accept (or reject) a visitor if the worker has no way of knowing that a potential visitor wishes to communicate with them. *See Rivero,* 259 F. Supp. 3d at 345 (''Migrant farmworkers' right to receive information . . . would have little force if it did not also implicitly (or . . . explicitly) protect providers' right to contact the workers.''). Therefore, the Department has added the following language explaining this connection: ''Because workers' ability to accept guests at their discretion depends on the ability of potential guests to contact and seek an invitation from those workers, restrictions impeding this ability to contact and seek an invitation will be evaluated as restrictions on the workers' ability to accept guests.'' The Department believes this language will help ensure that all potential visitors—whether family or friends, key service providers, labor organizations, or others—are able to contact workers, express their interest in communicating, and seek an invitation from one or more workers. For example, a representative from a local church who wishes to invite workers to worship and to share information on the services the church provides and does not have the workers' telephone numbers would be able to enter the employer's property, make their way to the employer-furnished housing, knock on the door or otherwise approach workers to see if they would like to receive the information the church representative wishes to share, and perhaps leave a note or flyer for a worker or workers who are not present in the employer-furnished housing. The potential guests' ability to permissibly enter employer-furnished housing to contact and seek an invitation from one or more workers will vary depending on the location and layout of the housing and other relevant facts. This language will also be incorporated into the job order to provide clarity to both workers and employers.

Paragraph (n) is intended to protect workers' First Amendment rights as a means of both preventing the isolation that can lead to serious instances of labor exploitation and trafficking and advancing the Department's statutory duty of preventing adverse effect. Agricultural workers in the United States, including H–2A workers and workers in corresponding employment, enjoy fundamental First Amendment rights, including the rights of association and to receive information from those who wish to provide it. *Rivero* v. *Montogomery Cty.,* 259 F. Supp. 3d 334, 355 (D. Md. 2017) (explaining that H–2A workers, who are lawful residents of the United States, ''are entitled to unfettered exchange of information just as much as any other individual in a community,'' and do not ''forfeit their constitutional rights by living on their employer's premises''); *see also, e.g., Petersen* v. *Talisman Sugar Corp.,* 478 F.2d 73, 82–83 (5th Cir. 1973) (holding that property owner that housed migrant farmworkers on its property ''must accommodate its property rights to the extent necessary to allow the free flow of ideas and information'' between the migrant farmworkers and the labor and faith-based organizers that wished to visit them); *Mid-Hudson Legal Servs., Inc.* v. *G & U, Inc.,* 437 F. Supp. 60, 62 (S.D.N.Y. 1977) (legal service providers had First Amendment right to enter migrant community on farm property at reasonable times for the purpose of discussing with its inhabitants the living or working conditions prevalent at the farm); *Folgueras* v. *Hassle,* 331 F. Supp. 615, 623 (W.D. Mich. 1971) (explaining that property owner who opened up portions of his property as the living areas for those working on his farm does not have the right to censor the associations, information, and friendships of the migrants living in his camps); *see also Rivero,* 259 F. Supp. 3d at 345–48 (discussing the right of service providers and other visitors ''to impart information and opinions'' to these workers in their homes); *Martin* v. *City of Struthers,* 319 U.S. 141, 141 (1943) (''For centuries it has been a common practice in this and other countries for persons not specifically invited to go from home to home and knock on doors or ring doorbells to communicate ideas to the occupants or to invite them to political, religious, or other kinds of public meetings.''). While these rights must be balanced against the rights of property owners, a ''farm owner should not be able to wield his property rights through trespass law to completely suppress the exchange of ideas and information that might benefit the workers he houses and, potentially, the public as a whole.'' *Rivero,* 259 F. Supp. 3d at 355. Given the myriad factors that isolate H–2A workers, from the often remote location of farmworker housing, cultural and linguistic barriers, lack of transportation and, often, internet and cell phone reception, the Department finds that there are not reliable alternate avenues of communication available that would justify limiting workers' right to invite or accept guests into their homes. *See Rivero,* 259 F. Supp. 3d at 355 & n.15 (noting that H–2A workers ''lead lives especially tethered to their employer''); *Asociacion de Trabajadores Agricolas de Puerto Rico* v. *Green Giant Co.,* 518 F.2d 130, 140 (3d Cir. 1975) (explaining that First Amendment protections would extend to situations involving improper isolation of workers and mistreatment of migrant workers). This is particularly true given the importance of preventing serious instances of labor exploitation and trafficking and the Department's statutory duty of preventing adverse effect.

Job Order Disclosure and Corresponding Edits to § 655.132(e)(1)

As noted above, the Department proposed to include the paragraph (n) protections in the disclosures required on the job order to help inform workers of their rights and to make corresponding edits to § 655.132(e)(1) to require an H–2ALC that meets its obligation to furnish housing through an agreement with a grower to include proof that the grower has agreed to comply with the requirements of § 655.135(n). The Department believes that these steps will inform workers of their rights and help ensure compliance with the new requirements at § 655.135(n) and hereby adopts them. The Department believes that a written statement from the grower agreeing to comply with the requirements at § 655.135(n) would constitute the requisite proof an H–2ALC would be required to submit with its *Application* under § 655.132(e)(1).

Workers Housed Pursuant to §§ 655.230 and 655.304

As noted above, the Department sought comments on whether and how the protections of proposed paragraph (n) should apply with respect to workers housed pursuant to §§ 655.230 (housing for work performed on the range in herding and range production of livestock occupations) and 655.304 (mobile housing for workers engaged in animal shearing or custom combining). The Department agrees with the commenters that addressed this issue that the protections adopted in paragraph (n) should apply equally to workers housed pursuant to §§ 655.230 and 655.304. As the relevant requirements of §§ 655.132(e)(1) and 655.135 apply equally with respect to employers who house workers pursuant to §§ 655.230 and 655.304, no further regulatory changes are required. *See* §§ 655.215(a) (requiring compliance with §§ 655.130 through 655.132 unless otherwise specified), 655.303(a) (same), and 655.130(a) (requiring all H–2A applicants to agree to the assurances and obligations of § 655.135). In response to the concern that employers may not have the ability to control who is allowed on the range land on which workers work and reside, the Department notes that such employers can make arrangements with property owners to ensure that access is provided pursuant to § 655.135(n), just as H–2ALCs who meet their obligation to furnish housing through contractual arrangements with growers will now need to do. While the Department appreciates the suggestion by Farmworker Justice and NLADA that it revise § 655.210(d)(2) to require employers to provide such workers with the means to communicate directly with emergency responders at all times, such as a satellite phone as well as a GPS tracking device or locator, it declines to adopt this suggestion in this final rule. As the Department did not propose changes to § 655.210(d) in the NPRM, it did not get sufficient comments to determine whether this suggestion is feasible.

No Preemption of Greater Protections

As explained in the NPRM and herein, the Department is aware that farmworker housing access protections already exist in some parts of the country under State law or by virtue of Federal First Amendment jurisprudence. This final rule is intended to establish minimum standards for access to employer-provided housing in the H–2A program. It is not intended to preempt or curtail any other more expansive access protections, whether established under the First Amendment to the United States Constitution, and/or other Federal, State, or local law. Accordingly, in addition to enforcement of § 655.135(n) by the Department, H–2A workers, workers in corresponding employment, and those seeking to visit them in or near employer-provided housing may also be able to assert their rights through private litigation or complaints to State government agencies.

x. Section 655.135(o), Passport Withholding

In the NPRM, the Department proposed adding a new paragraph (o) to § 655.135 to better protect workers from potential labor trafficking by directly prohibiting an employer from confiscating a worker's passport, visa, or other immigration or government identification documents. Under the proposal, the only exceptions to this prohibition would be where the worker has stated in writing: that the worker voluntarily requested that the employer keep these documents safe, that the employer did not direct the worker to submit such a request, and that the worker understands that the passport, visa, or other immigration or government identification document will be returned to the worker immediately upon the worker's request. Even in such cases, the worker must be able to have ready access to the document, at least during regular business hours and at a location that does not meaningfully restrict the worker's ability to access the document.

As set forth in the NPRM, H–2A workers are extremely vulnerable to labor exploitation, and an employer taking or holding a worker's passport is an egregious act that can be a strong indication of such exploitation. Labor trafficking, including the restriction of a worker's movements, harms not only the worker who is trafficked but also the agricultural workforce in the area by subjecting workers to depressed working conditions. While the current regulation at § 655.135(e) requires an employer to comply with all applicable Federal, State, and local laws, including the TVPA's prohibition on destroying or confiscating a passport, immigration document, or government identification document while committing or with the intent to violate certain trafficking offenses, 18 U.S.C. 1592(a), WHD has encountered difficulty enforcing this prohibition absent a trafficking conviction. Accordingly, to protect workers subject to this practice from potential labor trafficking, as well as protect other agricultural workers from the resulting adverse effects on working conditions pursuant to 8 U.S.C. 1188(a)(1), the Department proposed to flatly prohibit the taking or withholding of a worker's passport, visa, or other immigration or government identification documents against the worker's wishes, independent of the requirements of other Federal, State, or local laws. In addition, the Department proposed to include the failure to comply with this prohibition among the violations that may subject an employer to debarment under § 655.182 and 29 CFR 501.20. To help inform workers of their rights under this proposal, the Department proposed to include the prohibition on the withholding of passports, visas, and other immigration or government identification documents in the disclosures required on the job order. Finally, the Department explained that nothing in the current regulation at § 655.135(e), nor in the proposed § 655.135(o), is intended to prohibit an employer or agent from facilitating a prospective H–2A worker's submission of the worker's passport, visa, or other identification documents to the United States Government for purposes of visa application, processing, or entry to the United States, provided that the worker voluntarily requests the employer's assistance in these processes and that the documents are returned to the worker immediately upon return by the United States Government.

The Department sought comments on this proposal, particularly regarding whether the Department should include any other requirements for application of the proposed exception to this prohibition, and whether the Department should include any additional exceptions to this prohibition.

The vast majority of comments the Department received on this proposal were supportive. Trade associations, including IFPA and NHC; a workers' rights advocacy organization, the AWAC; Washington State; and several private employers expressed support for the proposed prohibition on passport withholding, without offering further rationale. One employer stated that it had no objection to the proposal.

Numerous commenters, including the National Women's Law Center, Marylanders for Food and Farmer Protection, and Proteus, Inc., expressed general support for the proposal on the ground that it could help prevent human trafficking. Individuals commented that the proposal would protect workers from coercion and exploitation, as well as scams and other abuses. One individual expressed

support, saying that passport confiscation gives an employer too much leverage over an employee.

Advocacy organizations and legislators expressed similar support, citing studies of labor trafficking in the H–2A program and specific instances of labor trafficking and reasoning that the proposal would provide urgently needed protections. For example, the UFW Foundation cited a report by Polaris, the organization that operates the National Human Trafficking Hotline, that identified over 2,800 H–2A workers who experienced labor trafficking from 2018 to 2020 [98] and provided stories from five H–2A workers who experienced passport withholding. The Alliance to End Human Trafficking stated that, in its work with migrant workers, it has found that withholding of travel documents is a common method of coercion used by traffickers. Similarly, CCUSA and USCCB expressed support for the proposal, identifying restrictions on mobility, including restricting workers' access to their passports and other documents, as a pattern often seen by those engaged in pastoral outreach to migrant farmers. Several other workers' rights advocacy organizations, including Migration that Works, UMOS, CDM, and the North Carolina Justice Center, described the anecdotal experiences of specific H–2A workers whose travel documents were confiscated by employers and who were subsequently subjected to abusive working conditions. A joint comment from 15 U.S. Senators stated that prohibiting employers from confiscating or holding a worker's passport, visa, or other identification would prevent labor trafficking, and a joint comment from 43 U.S. House Members described the proposal as an urgently needed precaution.

A variety of commenters expressed support based on the workability of the proposal. Farmworker Justice noted that the requirement is not so complex or overly broad as to hamper legitimate and consensual document safekeeping by employers. Specifically, according to Farmworker Justice, the exception will ''still allow workers to provide their passports or documents to their employers if they so wish, and will allow for employers to help facilitate any submission of these documents to the U.S. Government for the purposes of visa application, entry to the United States, or any other proper purpose.'' AILA expressed similar support, stating that employees must have unfettered access to their documents, but it can be helpful to allow employers to safeguard employee documents. SRFA commented that, although allowing honest employers to help safeguard employees' documents can protect them from problems that arise from document theft, damage, or loss, the proposal strikes a reasonable balance between safeguarding and ensuring access. CDM expressed strong support for the prohibition on passport withholding, including the proposal to make this violation a ground for debarment under § 655.182 and 29 CFR 501.20, and also urged the Department not to broaden the proposed exceptions to this prohibition ''as their narrowness is critical to ensuring that these proposed changes can achieve their goal of preventing forced labor through this type of coercion.''

While supporting the proposal, several commenters suggested that it does not go far enough to protect workers. Farmworker Justice stated that concerns remain about similar abuses like Social Security number and mail withholding. An individual called the proposal ''necessary but insufficient,'' recommending that the Department create an independent body to which workers can report abuses without fear of reprisal or deportation and that can conduct unannounced inspections and levy sanctions against noncompliant employers.

Finally, some commenters addressed the potential overlap of the proposal with the existing TVPA prohibition at 18 U.S.C. 1592(a), which is incorporated into the H–2A regulations via § 655.135(e). CCUSA and USCCB explained that the proposed prohibition on passport withholding is a ''more direct approach'' than finding a violation of § 655.135(e) based on a violation of the TVPA and ''would be easier for the Department to enforce, including through potential debarment, and would provide clearer expectations for employers and workers alike.'' While stating that document confiscation is already prohibited by law, a couple of university professors said it would be helpful to include the specific prohibition in the H–2A regulations because it would enhance enforceability, ensure all program actors are aware of the prohibition, and promote a ''whole of government'' approach. The trade associations NCAE and Florida Citrus Mutual expressed support for the proposed prohibition on passport withholding, while stating that it is redundant with existing regulations, and the agent másLabor stated that it did not object to the proposal as it ''simply mirrors existing law.'' Another agent, Mountain Plains Agricultural Service, stated that existing law makes it ''very clear'' that passport withholding is prohibited and questioned what the proposal would accomplish. While agreeing that employers should not withhold employee passports, the trade association, wafla, stated that the proposal is duplicative and unnecessary.

After considering the comments discussed above, the Department adopts the proposed prohibition on passport withholding as proposed in the NPRM.

As explained in the NPRM and above, the withholding of a worker's passport, visa, or other immigration or government identification documents is an egregious restriction of a worker's movements and may be indicative of labor exploitation or trafficking. Not only does this harm the specific workers whose documents are taken, it harms the agricultural workforce more broadly by subjecting workers to depressed working conditions. While a few commenters questioned the necessity of the proposal given the TVPA's existing prohibition on the destruction or confiscation of passports and other immigration and government identification documents, the Department continues to believe that the addition of a direct prohibition at § 655.135(o) will enhance its enforcement and ensure that workers and employers alike are aware of the prohibition. The majority of comments received support the Department's position on the importance and necessity of adding § 655.135(o), and thus the Department has determined that this addition is necessary to better help prevent such exploitation and trafficking, as well as to prevent an adverse effect on the working conditions of similarly employed workers in the United States as is required by 8 U.S.C. 1188(a)(1)(B).

The Department notes that this prohibition applies equally to a worker's immigration documents that may be provided by the U.S. Government to the employer or employer's agent in the first instance. For example, after approving an employer's petition (Form I–129) to extend an H–2A worker's period of authorized employment, USCIS typically attaches the worker's new arrival/departure record (Form I–94) to the Form I–129 approval notice that USCIS provides to the employer and relies on the employer to give the Form I–94 to the worker. In such instances, an employer's failure to give the Form I–94 to the worker would constitute a violation of § 655.135(o) unless the employer is keeping the document safe at the worker's request and meets the

[98] Polaris 2018–2020 Report, at 7, 10. *See also* 2023 NPRM, 88 FR at 63750, 63799.

requirements of that exception (*i.e.,* the worker provided a written statement indicating that the worker voluntarily requested that the employer keep this immigration document safe, that the employer did not direct the worker to submit such a request, and that the worker understands that the immigration document will be returned to the worker immediately upon the worker's request). While the Department appreciates the suggestions that it should address similar abuses, such as Social Security number and mail withholding, and that it should create an independent body to which workers can report violations, it declines to adopt either in this final rule. Neither suggestion is within the scope of the current rulemaking, and there is insufficient detail to determine whether the Department has the authority to implement the latter suggestion. The Department notes that, in addition to reporting violations to WHD, workers may report such violations to the applicable SWA, which has the authority to investigate, resolve, or refer worker complaints to enforcement agencies as appropriate, as well as to remove access to services for noncompliant employers. Workers may also access resources and assistance through DHS's Blue Campaign website, *https://www.dhs.gov/blue-campaign,* which includes information on reporting suspected human trafficking to law enforcement and getting help from the National Human Trafficking Hotline.

3. Section 655.137, Disclosure of Foreign Worker Recruitment.

a. Summary of Proposal in §§ 655.137, 655.135(p), and 655.167(c)(8)

The Department proposed new disclosure requirements to enhance foreign worker recruitment chain transparency and bolster the Department's capacity to protect vulnerable agricultural workers from exploitation and abuse, as explained more fully below. Pursuant to its authority under the INA, the Department regulates the conduct of U.S. employers using foreign labor certification programs and doing business with foreign labor recruiters. 8 U.S.C. 1188(c)(3)(A)(i); 8 U.S.C. 1188(g)(2). The INA authorizes the Department to promulgate regulations governing recruitment. 8 U.S.C. 1188(c)(3)(A)(i). The Department may only issue a labor certification to an employer that has ''complied with the criteria for certification (including criteria for the recruitment of eligible individuals as prescribed by the Secretary).'' *Id.* The INA states that ''[t]he Secretary of Labor is authorized to take such actions, including imposing appropriate penalties and seeking appropriate injunctive relief and specific performance of contractual obligations, as may be necessary to assure employer compliance with terms and conditions of employment under this section.'' 8 U.S.C. 1188(g)(2).

As the Department has noted in prior rulemaking, though there are limits to the liability the Department can impose on employers for the actions of recruiters abroad, the Department can regulate the conduct of recruiters in the H–2A program through enforcement of employer obligations to foreign workers, such as enforcement of the prohibition on the imposition of recruitment fees. 2010 H–2A Final Rule, 75 FR at 6926. Specifically, employers must contractually forbid any foreign labor contractor or recruiter (or any agent of such foreign labor contractor or recruiter) whom the employer engages, either directly or indirectly, in international recruitment from seeking payments or other compensation from prospective employees in both the H–2A and H–2B programs, at 20 CFR 655.135(k) and 655.20(p), respectively. The Department's H–2B regulations at §§ 655.9 and 655.20(aa) additionally require employers to provide copies of their agreements with foreign labor recruiters and disclose information about the foreign labor recruiters that have or will be engaged in the recruitment of H–2B workers in connection with the employer's applications.

In the NPRM, the Department proposed similar additional foreign labor recruiter disclosure requirements in the H–2A program to require the employer to identify any foreign labor recruiters, provide copies of the agreements between the employer and recruiter, and ensure the agreement clearly prohibits the foreign labor contractor or recruiter from seeking or receiving payments or other compensation from prospective employees. Specifically, the Department proposed a new § 655.137, *Disclosure of Foreign Worker Recruitment,* a new related assurance at § 655.135(p), and a new § 655.167(c)(8) that provides applicable document retention requirements.

The proposed new provisions at § 655.137 govern what information and documentation an employer must provide at filing regarding foreign worker recruitment, as well as how it must maintain and update that information. These proposed provisions also cover how the Department may disseminate or publish the information it receives. Paragraph (a) proposed that if the employer engaged or plans to engage an agent or foreign labor recruiter, directly or indirectly, in international recruitment, the employer, and its attorney or agent, as applicable, must provide copies of all contracts and agreements with any agent or recruiter or both, executed in connection with the job opportunity, a requirement that is also covered by a new assurance proposed at § 655.135(p). These agreements must contain the contractual prohibition against charging fees as set forth in § 655.135(k). In paragraph (b), the Department proposed to require that applications must contain all recruitment-related information required in the *Application for Temporary Employment Certification,* as defined in § 655.103(b), including the identity and location of all persons and entities hired by or working for the recruiter or agent, and any of the agents or employees of those persons and entities, to recruit prospective foreign workers for the H–2A job opportunity.

Paragraph (c) of § 655.137 proposed that employers must continue to keep the foreign labor recruiter information referenced in paragraphs (a) and (b) up to date until the end of the work contract period, with this updated information available in the event of a post-certification audit or upon request by the Department. Proposed § 655.167(c)(8) governs applicable employer document retention requirements. The Department likewise proposed sharing the foreign worker recruitment information it received from employers with any other Federal agency, as appropriate for investigative or enforcement purposes, as set forth in § 655.130(f). Finally, the Department proposed in paragraph (d) to maintain a publicly available list of agents and recruiters (including government registration numbers, if any) who are party to the agreements employers submit, as well as the persons and entities the employer identified as hired by or working for the recruiter and the locations in which they are operating.

As explained in the NPRM, the Department proposed these changes because disclosure of information about the recruitment chain will assist the Department to carry out its enforcement obligations, protect vulnerable agricultural workers and program integrity, and ensure equitable administration of the H–2A program for law abiding employers. Determining the identity and location of persons hired by or working for the recruiter or its agent to recruit or solicit prospective H–2A workers—effectively acting as sub-

recruiters, sub-agents, or sub-contractors—bolsters program integrity by aiding enforcement of provisions like § 655.135(k), which prohibits the seeking or receiving of recruitment fees. In addition, the information collection would require additional disclosures relating to foreign worker recruitment that will bring a greater level of transparency to the H–2A worker recruitment process. By maintaining and making public a list of agents and recruiters, the NPRM observed that the Department will be in a better position to map international recruitment relationships, identify where and when prohibited fees are collected, ensure that contractual prohibitions on collecting prohibited fees are bona fide, and, when contractual prohibitions are not bona fide or do not exist, implement sanctions against and collect remedies from the appropriate entity. Workers will be better protected against fraudulent recruiting schemes because they will be able to verify whether a recruiter is in fact recruiting for legitimate H–2A job opportunities in the United States. A list of foreign labor recruiters will enhance transparency and aid enforcement by facilitating information sharing between the Departments and the public, and assist OFLC, other agencies, workers, and community and worker advocates to better understand the roles of recruiters and their agents in the recruitment chain, while permitting a closer examination of applications or certifications involving recruiters who may be engaged in improper behavior.

The NPRM also noted that information about the identity of the international and domestic recruiters of foreign labor will assist the Department in more appropriately directing its audits and investigations. For example, in the course of its enforcement, WHD sometimes reviews allegations from H–2A workers that they have been charged recruitment fees. Those workers, however, are frequently unaware of the contractual arrangements between the individuals alleged to have charged those fees and the recruitment agencies for which they may serve as sub-agents or sub-recruiters, and may only know the names, partial names, or nicknames of such individuals. The information required under § 655.137 will improve WHD's ability to identify individuals charging fees, connect such individuals' relationships with recruitment agencies contracted by the employer, determine whether all entities had contractually prohibited cost-shifting as required under § 655.135(k), and hold the appropriate parties responsible. Such information will also improve WHD's ability to plan enforcement actions if, for example, a sub-recruiter working for multiple agencies or serving multiple employers is found, as a matter of practice, to be charging prohibited fees or otherwise engaging in conduct in violation of the requirements of the H–2A program. Finally, enhancing tools to strengthen enforcement of the prohibition on the collection of prohibited fees and other recruitment abuses ensures that employers who comply with the H–2A program requirements are not disadvantaged by the actions of unscrupulous employers, such as those who pass recruitment fees on to workers.

The Department received comments both in support of and opposed to the proposal. After consideration of the comments received, the Department is adopting the proposals with a minor technical change, as discussed in more detail below.

General Support: The Department received some comments that were generally supportive of the new disclosure requirements. Many Federal elected officials and a State government expressed support for the proposal to increase transparency in the recruitment process, with some Federal elected officials noting that the current process has ''enabled third party recruiters to charge prospective H–2A workers exorbitant fees, indebting workers who come here just to make ends meet,'' and others noting that the proposals will ''not only improve worker protections, but . . . also bring the H–2A program in line with the H–2B program.'' Some Federal elected officials further observed that ''[s]imilar protections . . . already exist for H–2B workers; DOL's rule simply extends these protections to H–2A workers.'' Concerned Law Students of University of Georgia, a student group, submitted a comment noting that ''[g]reater recruitment transparency should help enforcement officials and advocates find and eliminate the roots of the problem.'' PCUN, CAUSE, UMOS, UFW Foundation, and Green America and North Carolina Justice Center, workers' rights advocacy and public policy organizations, respectively, expressed support for how these changes would ''bolster DOL's enforcement capacity against exploitative and abusive recruiters.'' Another workers' rights organization, AWAC, ''strongly endorse[d] . . . [the] additional transparency [and] protections in recruitment practices and hiring process,'' contained within the proposed rule. The Agricultural Justice Project, UMOS, and Marylanders for Food and Farmworker Protection were supportive, with Marylanders for Food and Farmworker Protection noting specifically that ''[e]nhanced transparency . . . is crucial for preventing recruitment fraud.'' CCUSA and USCCB was also broadly supportive of this rulemaking effort, stating that ''[i]ncreased oversight of the H–2A recruitment process through the proposed provisions is commendable, as it aims to provide more protection to prospective workers through enhanced transparency.'' Additionally, many individuals expressed general support for the proposal. The Department values and appreciates these commenters' general support and their unique and informed perspectives on the need for and potential impact of the proposal.

b. Section 655.137(a), Collecting Contracts/Agreements; Prohibition on Fees

Consistent with §§ 655.9(a) and 655.20(aa) in the H–2B program, the Department proposed new provisions at §§ 655.137(a) and 655.135(p) to require an employer and its attorney or agent, as applicable, to provide a copy of all agreements with any agent or recruiter that the employer engages or plans to engage in the recruitment of prospective H–2A workers, regardless of whether the agent or recruiter is located in the United States or abroad. This proposed requirement to disclose agreements with recruiters would encompass all agreements, whether written or verbal, involving the whole recruitment chain that brings an H–2A worker to the employer's certified H–2A job opportunity in the United States. The Department received several comments on this proposal. The Department's responses to these comments are provided below. Following full consideration of these comments, the Department has decided to retain the proposal in this final rule, with one minor technical change. The Department has revised proposed § 655.137(a) to include language clarifying the paragraph applies where an employer engages or plans to engage a foreign labor recruiter. This technical correction is necessary to ensure the paragraph is consistent with the Department's practice in the H–2B program, the Department's proposal to require disclosure of agreements where the employer engages or plans to engage a foreign labor recruiter, and the Department's proposed language at § 655.135(p), which requires the employer provide a copy of all agreements with any agent or recruiter whom it engages or plans to engage in the recruitment of H–2A workers.

A couple of employers, including Titan Farms, LLC, and some trade associations, including TIPA, IFPA, GFVGA, USApple, and NHC, supported sharing recruitment agreements with the Department, but only if ''all confidential business information is redacted.'' Wafla opposed this aspect of the proposal because sharing the agreements may expose ''trade secrets, pricing information, or other unique information that cannot be made public'' and suggested that the Department request these agreements only if ''[it] suspects an issue . . . during a post-certification inspection.'' Similarly, the U.S. Chamber of Commerce, a trade association, opposed collection of the agreements because they may contain ''sensitive, proprietary business information.''

The Department appreciates the concerns cited by commenters and reiterates that confidential business information or sensitive data will not be disclosed to the public. Consistent with the handling of such contracts in the H–2B program, ''[a]greements between the employer and the foreign labor recruiter will not be made public unless required by law.'' 2015 H–2B IFR, 80 FR 24042, 24057 (Apr. 29, 2015).[99] The Department notes that in all the years it has been collecting these contracts in the H–2B program, it is not aware of an instance where the confidential terms or business information was disclosed to the public.

Collecting the contracts and agreements allows the Department to verify that the contractual prohibition required by § 655.135(k) has been included. As noted in the NPRM, the Department remains concerned about workers being charged fees unlawfully. A recent report published by Polaris, an organization working to combat labor trafficking, notes that abuses by foreign labor recruiters continue, with workers reporting unlawful fees charged by ''foreign labor recruiters, their employers, or their direct supervisors at their jobs,'' and that additional transparency in the recruitment chain is needed to ensure the Department can identify, investigate, and hold accountable those employers and other entities who engage in abusive and unlawful behavior at various stages of the international recruitment process.[100]

In their comment, Farmworker Justice, citing a 2018 CDM report,[101] stated that 58% of workers recruited from Mexico ''reported paying a recruitment fee that on average amounted to $590 per worker'' and almost half of these workers ''needed to take out a loan to cover illegal recruitment fees and other pre-employment expenses.'' The commenter expressed concern that in other cases, ''individuals purporting to be recruiters who have no relationship with an actual H–2A employer often charge prospective foreign workers for the chance to get a job that does not even exist.'' A different workers' rights advocacy organization, the North Carolina Justice Center, stated that some workers are ''explicitly coached by the recruiter to lie about the [recruitment] fee at their consular interview,'' further noting that ''the person charging and collecting the fee is a step or two removed from the U.S. based employer and is not directly in touch with the employer.'' This commenter expressed support for the Department's proposal as a way to ''make it easier to recover illegal fees in the future, and hopefully, motivate employers to take more proactive steps to make sure that no one in their recruiting pipeline is charging illegal fees.'' The UFW Foundation cited accounts of workers who were charged exorbitant fees of as much as $10,000 to obtain H–2A employment. These comments reflect the Department's concerns regarding unlawful collection of fees and reiterate to the Department the need to collect the foreign labor recruiter information to shed light on the process of recruitment, as well as to aid in the enforcement of the regulations.

The NPRM did not propose to change, and this final rule retains, § 655.135(k), which will continue to require the employer to contractually prohibit in writing any agent or recruiter (or any agent or employee of such agent or recruiter) whom the employer engages, either directly or indirectly, from seeking or receiving payments from any prospective employees. The specific language covers subcontractors. In addition, the required contractual prohibition applies to the agents and employees of the recruiting agent, and the prohibition against charging workers recruitment-related fees encompasses both direct and indirect fees. As such, the written contract(s) the employer submits under this final rule must contain this contractual prohibition on charging fees and the prohibition language must include the quoted language specified in § 655.135(k).

A workers' rights advocacy organization, CDM, citing an account from a Florida worker, also urged the Department to prohibit recruiters or employers from requiring that workers, or people acting on behalf of workers, sign promissory notes or pay breach of contract fees. To this end, the commenter recommended amending § 655.135(j) so that ''payments'' include any payment provided by the employee, a relative, or any person acting on the employee's behalf. It also suggested that ''payment'' include requiring that any employee, relative, or person acting on the employer's behalf ''sign a negotiable instrument or grant a security interest in any collateral.'' It further alleged that this amendment would bring the rule into ''alignment with DHS's proposed revisions to 8 CFR 214.2(h)(5)(xi), which would clarify that fees prohibited in H–2A recruitment include breach of contract fees and penalties.''

The Department agrees with CDM that it is important to clearly and explicitly prohibit breach of contract fees from being collected from prospective employees, but did not propose the suggested change in the NPRM and the Department does not believe such a change is necessary for enforcement of breach of contract fees. The Department takes the opportunity to clarify, however, that the existing contractual fee prohibition language is broadly interpreted and § 655.135(k) already requires employers to prohibit, in writing, foreign labor contractors or recruiters from receiving payments or compensation from prospective employees, and includes language that employers must include in contracts with foreign labor contractors or recruiters. The required contractual prohibition against recruitment-related fees applies to the agents and employees of the recruiting agent, and the prohibition against charging workers recruitment-related payments encompasses both direct and indirect fees. As such, the written contract(s) the employer submits under this final rule must contain this contractual prohibition on charging fees and the prohibition language must include the language specified in § 655.135(k): ''Under this agreement, [name of foreign labor contractor or recruiter] and any agent or employee of [name of foreign labor contractor or recruiter] are prohibited from seeking or receiving payments from any prospective employee of [employer name] at any

[99] Interim Final Rule, *Temporary Non-Agricultural Employment of H–2B Aliens in the United States,* 80 FR 24042 (Apr. 29, 2015) (2015 H–2B IFR).

[100] Polaris, *Human Trafficking on Temporary Work Visas: A Data Analysis 2015–2017* 13 (2018), *https://polarisproject.org/wp-content/uploads/2019/01/Human-Trafficking-on-Temporary-Work-Visas.pdf.*

[101] CDM, *Recruitment Revealed, Fundamental Flaws in the H–2 Temporary Worker Program and Recommendations for Change* 16,18 (2018), *http://www.cdmigrante.org/wp-content/uploads/2018/02/Recruitment_Revealed.pdf.*

time, including before or after the worker obtains employment. Payments include but are not limited to any direct or indirect fees paid by such employees for recruitment, job placement, processing, maintenance, attorney fees, agent fees, application fees, or any fees related to obtaining H–2A labor certification.''

Consistent with the H–2B program, this final rule requires employers to provide a copy of the agreement at the time the employer files the H–2A Application. Employers, and their attorneys or agents, as applicable, are expected to provide these names and geographic locations to the best of their knowledge at the time the application is filed. The Department expects that, as a normal business practice, when completing the written agreement with the primary recruiting agent or recruiter, the employer and, if applicable, the employer's authorized attorney or agent, will ask whom the recruiter plans to use to recruit workers in foreign countries, and whether those persons or entities plan to hire other persons or entities to conduct such recruitment, throughout the recruitment chain.

At the time of collection, the Department will review the agreements to obtain the names of the foreign labor recruiters and government registration and license numbers, if any (for purposes of maintaining a public list, as described below), and to verify that these agreements include the required contractual prohibition against charging fees.[102] The Department may further review the agreements during the course of an audit examination or investigation. Certification of an employer's application that includes such an agreement does not indicate general approval of the agreement or the terms therein. Where the required contractual prohibition is not readily discernible, the Department may request further information to ensure that the contractual prohibition is included in the agreement.

To reiterate, agreements between the employer and the foreign labor recruiter will not be made public unless required by law. Consistent with the Department's current practice in the H–2B program, this final rule allows the Department to obtain the agreements, but the Department will only share with the public the identity of the recruiters, not the agreements in their entirety.

c. Section 635.137(b), Information Collection, and (c), Retention

The NPRM proposed at §§ 655.137(b) and 655.135(p) to require an employer and its attorney or agent, as applicable, to disclose to the Department the identity (*i.e.,* name and, if applicable, identification number) and geographic location of persons and entities hired by or working for the foreign labor recruiter and any of the agents or employees of those persons and entities who will recruit or solicit prospective H–2A workers for the job opportunities offered by the employer. As the NPRM explained, these proposed new provisions are consistent with the H–2B provisions at §§ 655.9(b) and 655.20(aa). As in the H–2B program, the NPRM proposed to interpret the term 'working for' to encompass any persons or entities engaged in recruiting prospective foreign workers for the H–2A job opportunities offered by the employer, whether they are hired directly by the primary recruiter or are working indirectly for that recruiter downstream in the recruitment chain. 2015 H–2B IFR, 80 FR at 24057. If the recruiter has a valid registration number or license number that is issued by a government agency and authorizes the recruiter to engage in the solicitation or recruitment of workers, the proposal required the employer to provide this unique identification information.

The NPRM also proposed that the Department will gather the additional recruitment chain information when the employer files its application and will require the employer to submit a Form ETA–9142A, *Appendix D,* that mirrors the Form ETA–9142B, *Appendix C,* used in the H–2B program, and collects information about the identity and location of the recruiter(s) and recruitment organization(s) the employer used or will use to recruit foreign workers. In addition, the Department proposed at § 655.137(c), and in corresponding language in the new assurance provision at § 655.135(p), to require the employer to update the foreign worker recruitment information disclosed in accordance with paragraphs (a) and (b) of § 655.137 with any changes to foreign labor recruiter contracts, loss or revocation of registration number, or changes to the names and locations of people involved in recruitment after filing the H–2A Application, and to continue to make these updates until the end of the work contract period. Under the proposal, the employer must maintain updates to the foreign labor recruiter information disclosed at the time of filing the H–2A Application and be prepared to submit the record to the Department, upon request. Finally, to make clear the employer's record retention obligation, proposed § 655.167(c)(8) required the employer to maintain the foreign worker recruitment information required by proposed § 655.137(a) and (b) for a period of 3 years.

The Department received several comments on this proposal. After careful consideration of the comments, the Department has decided to retain the proposal in this final rule, as explained below.

Many trade associations, individuals, employers, a State government agency, and agents opposed the collection of this information. They asserted that the proposal would impose an undue burden on employers to identify all links in a foreign recruitment chain, may lead to penalties for employers for the actions or inaccurate statements of recruiters abroad, and may expose recruiting agency employees to risks in their country of origin. Some trade associations (NHC, IFPA, TIPA, and USApple) and an employer (Titan Farms, LLC) expressed concerns regarding limited employer resources, with NHC noting specifically that employers ''do not have the resources, nor practical ability, to identify and maintain the information required under this section.'' GFVGA, USApple, IFPA, TIPA, and an employer, Titan Farms, LLC, asserted that many employers, especially small employers, ''rely on their agent's network to recruit and may not have access to the foreign recruiter's name and geographic location.'' The Western Range Association, an agent, noted disclosure would be difficult at the time of filing because employers ''may not know what country they will be requesting a worker from'' and they may ''change their minds and request workers from a different country'' than initially

[102] The Department uses all available tools to ensure that prohibited fees are not collected by employers, agents, recruiters, or facilitators. The Department has previously stated that an employer must make it abundantly clear that the recruiter and its agents are not to receive remuneration from the worker recruited in exchange for access to the job opportunity. For example, evidence showing that the employer paid the recruiter no fee or an extraordinarily low fee, or continued to use a recruiter about whom the employer had received numerous credible complaints, could be an indication that the contractual prohibition was not bona fide. *See* 2010 H–2A Final Rule, 75 FR at 6925–6926. The Department has similarly stated that, if it determines ''that the employer knew or reasonably should have known that the H–2A worker paid or agreed to pay a prohibited fee . . . to a foreign labor contractor or recruiter, the employer can still be in violation of 20 CFR 655.135(j). However, should the circumstances demonstrate that the employer made a good faith effort to ensure that prospective workers were not required to pay prohibited fees (such as inquiry of both workers and agents/recruiters/facilitators regarding payment of such fees), the Department will take the circumstances into consideration in determining whether a violation occurred.'' WHD, Field Assistance Bulletin No. 2011–2, *H–2A ''Prohibited Fees'' and Employer's Obligation to Prohibit Fees* (May 6, 2011), *https://www.dol.gov/agencies/whd/field-assistance-bulletins/2011-2.*

planned. This commenter suggested that collection of recruiter information at the DHS petition stage would be more effective. Wafla, a trade association, supported requiring the disclosure of only the foreign recruiter's name and owner on the application but opposed any further disclosure requirements. In particular, it stated that the additional disclosure requirements would be difficult because ''[s]ome recruiters have 10–100 employees'' and it could take ''two to three hours of additional preparation time'' to gather this information and then ''type it into FLAG.'' The Georgia Farm Bureau, a trade association, noted that ''any such evidence of this would take place between the prospective employee and third-party recruiters. Much of the information required to be reported by employers is not guaranteed to be provided by a foreign third-party entity.'' Fuerza Consulting Solutions incorrectly contended that the desired information was already collected during the audit process, rendering the proposed changes unnecessary.

The U.S. Chamber of Commerce, IFPA, TIPA, NHC, USApple, GFVGA, and an employer, Titan Farms, LLC, asserted that the Department provided ''no guidance on how an employer should come to identify the foreign recruiter information'' and ''no definition of what level of due diligence is required of the employer.'' Wafla expressed concern that the NPRM failed to clarify if the employer must ''vet the information'' provided by a recruiter to ensure ''the information provided by the foreign recruiter is [not] false'' or if employers must ''travel to a foreign country to verify the information'' or face potential liability or penalty. Some trade associations and employers opposed the obligation to update recruitment information throughout the contract period because the employer, in the words of NHC, ''would be relying on the foreign recruiter to communicate [updated] information to them.'' AILA, an immigration lawyers' association, asserted that the collection of information on recruiting agency employees is unnecessary because the actions of these employees are legally imputed to their employer, the recruitment agency, and thus disclosing only the recruitment agency is sufficient.

The Department appreciates these comments and understands the concerns about time and burden to collect the information; the need for employers to understand their information disclosure, retention, and production obligations; the ability to access this information and the timing of the collection, including the obligation to update information; and concerns about how the Department will safeguard confidential and sensitive information. The collection of this information adds transparency and helps in locating individuals for enforcement purposes. As GAO has explained, ''[w]ithout accurate, accessible information about employers, recruiters, and jobs during the recruitment process, potential foreign workers are unable to effectively evaluate the existence and nature of specific jobs or the legitimate parties contracted to recruit for employers, potentially making them more vulnerable to abuse.'' [103] The new provisions in this final rule are also consistent with the assessment of organizations investigating migrant worker abuse globally. For example, the United Nations Office on Drugs and Crime, in a 2015 report entitled ''The Role of Recruitment Fees and Abusive and Fraudulent Practices of Recruitment Agencies in Trafficking in Persons,'' noted that recruitment systems are often ''opaque,'' and that a ''[l]ack of evidence'' contributes to low levels of trafficking convictions for recruiters and recruitment agencies.[104]

The obligation to obtain information on recruiters and downstream employees or contractors of the recruiters is something employers or agents should already be doing. As the Department has noted, by submitting an H–2A Application, the employer ''is assuring the federal government that it has contractually forbidden those parties who will recruit workers on its behalf from seeking or receiving payments from prospective workers for costs which are to be borne by the employer.'' [105] Making this assurance necessarily requires that ''the employer (either directly or through its agent) has taken affirmative, specific action to contractually prohibit such parties from seeking or from receiving such payments.'' [106] With these actions already a part of the H–2A filing process, identifying this foreign recruiter information should not be unfamiliar to employers and collecting and maintaining records of the same would not be burdensome. The disclosure of this information to the Department, including disclosing information beyond the foreign recruiter's name and owner, should therefore also not be unduly burdensome. In response to the comment that noted disclosing only the recruitment agency is sufficient because the actions of employees are legally imputed to their employer, the Department believes that it is necessary for all parties involved in the recruiting process to be identified. Identifying each individual who will be recruiting allows for more complete disclosure as to who is legitimately recruiting for jobs and for that information to be made available to the public, including potential H–2A workers. Additionally, complete disclosure of recruiters, their employees, and any downstream recruiters will assist WHD in its investigations to identify who is collecting prohibited fees when such fees are collected.

The Department, however, understands that recruitment arrangements may not be finalized at the time of filing or may change after filing. The Department is only requiring that employers provide the information available to them at the time of filing with the understanding that an employer's recruiting arrangements may change after that. Similarly, the Department understands that it may not be possible for the employer or agent to capture everyone involved in the recruitment process and that they may receive inaccurate statements from those downstream from the employer. The Department only expects that employers or agents make reasonable efforts to obtain the requested information, and in the event of an audit or investigation, the extent of the employer's good-faith efforts may be considered. *See also* 20 CFR 655.182(e)(4) and 29 CFR 501.19(b)(4) (the OFLC and WHD Administrators already consider ''efforts made in good faith'' in other contexts).

Lastly, the Department takes seriously concerns with safeguarding confidential and sensitive information and will collect this information in accordance with the Privacy Act of 1974, the Department's SORN, FOIA disclosure requirements, and the PRA, as explained in the PRA package submitted in conjunction with this final rule. Department has collected this information in the H–2B program under the 2015 H–2B IFR without any reported incidents of privacy breach and without any indication that the requirement imposes an excessive burden on employers that would outweigh the benefits of enhanced transparency in the foreign labor recruitment process.

d. Section 635.137(d), Registry List

As in the H–2B program, the Department proposed at § 655.137(d) to publicly disclose, in a public registry, the names of the agents and foreign labor recruiters used by employers, as well as the identities and locations of all the persons or entities hired by or working for the primary recruiter in the recruitment of prospective H–2A workers, and the agents or employees of these entities. The Department also proposed to state explicitly that it may share the foreign worker recruitment information it receives from employers with any other Federal agency, as appropriate for investigative or enforcement purpose, as set forth in § 655.130(f). The Department received both comments supporting and opposing the proposal to publish a foreign labor recruiter list on the OFLC website. After full consideration of the comments, the Department has decided to retain § 655.137(d) without change in this final rule, as explained below.

Many commenters supported the concept of a public recruiter list but asserted that the Department must create a more transparent, easily searchable system that would permit workers to verify that recruiters are connected to legitimate job opportunities and do not charge illegal fees. Farmworker Justice supported the proposed public labor recruiter list to help ''enforce the removal of program access after fraud'' is identified. However, they expressed concern that the recruiter list would be inadequate if modeled after the existing recruiter list in the H–2B program. They stated that the existing recruiter list ''is an English language spreadsheet housed on an English language website that lists foreign recruiter names and their companies, recruitment regions, and a 14-digit case number for the clearance orders that they are associated with'' and thus is opaque and inaccessible to workers, who often do not speak English and typically conduct their research into recruiters and jobs using a smartphone. The commenter further claimed that worker advocacy organizations themselves were unable to match employer case numbers from the recruiter list ''to clearance orders using the Case Number search field on'' the Seasonaljobs website.

The commenter recommended changes to the Seasonaljobs website to allow workers to ''log on and view information'' about recruiters and the jobs they are connected to, in the same way they use Seasonaljobs to learn about other elements of ''specific jobs . . . , including job duties, pay, work location, expected hours, and employer information,'' which the commenter asserted would provide workers with ''real-time information that could help them avoid abusive recruiters and recruitment scams.'' This suggestion was endorsed by CDM, and largely echoed by another workers' rights advocacy organization, Migration that Works, that encouraged the Department to create ''an accessible way to verify that an individual claiming to be a recruiter represents the employer and the job offer they purport to represent,'' and suggested that the Department ''combin[e] the employment information already available on *Seasonaljobs.dol.gov* with the recruiter registry, making this information available to all prospective workers at the time of recruitment in Spanish and other languages.'' This commenter further suggested that the Department require employers to continually update recruiter information throughout the recruitment process and require disclosure in a standardized format to aid searchability.

The Department will update the H–2A Foreign Labor Recruiter List on a quarterly basis and will post an announcement on the OFLC website when updates are available. As with the H–2B recruiter list, any person with internet access, including U.S. and foreign workers, can access the public recruiter list and identify the H–2A Application numbers connected to recruiters in the list. The Department appreciates the suggestions regarding the H–2B Foreign Labor Recruiter List's format and will consider these suggestions but notes that the format of the forthcoming recruiter list is not something that would require amendments to the regulatory language in this final rule. However, as explained above, the Department will require employers in this final rule to continue to keep the foreign labor recruiter information requested in § 655.137(a) and (b) up to date until the end of the work contract period and make this updated information available in the event of a post-certification audit or upon request by the Department. 20 CFR 655.137(c). Similar to the H–2B list, the H–2A list will be posted on the Department's website in a standardized format. In addition, the H–2A Foreign Labor Recruiter List will contain the government registration number, if applicable, of agents and recruiters to further enhance transparency of the recruitment process for prospective H–2A workers.

The Department declines to publish foreign labor recruiter information using Seasonaljobs for the same reasons it declined to adopt commenter suggestions to publish foreign worker demographic data on Seasonaljobs in the 2022 H–2A Final Rule. The intended use of the information published on Seasonaljobs differs from the intended use of OFLC's forthcoming H–2A Foreign Labor Recruiter List. The Foreign Labor Recruiter List in the context of the H–2B program is ''a list of people and entities that employers have indicated that they engage or plan to engage to carry out the recruitment of prospective H–2B workers'' that facilitates information sharing and helps to ensure ''workers are better protected against fraudulent recruiting schemes by enabling them to verify whether a recruiter is in fact recruiting for legitimate H–2B job opportunities . . . .'' [107] The H–2A Foreign Labor Recruiter List will serve the same function in the H–2A context. In contrast, Seasonaljobs ''is a recruitment tool designed for broad dissemination of available temporary or seasonal job opportunities to U.S. workers . . . [that] provides information for job seekers, including work locations, duties to be performed, qualifications required, and dates of employment. . . . automate[s] the electronic advertising of H–2A job opportunities and ensures copies of H–2A job orders are promptly available for public examination.'' 2022 H–2A Final Rule, 87 FR at 61749.

An agent, másLabor, writing in opposition to the proposed change, argued that recruiters based in foreign countries often exist as alternatives to ''violence by cartels, cayotes, and other criminal enterprises'' involved in trafficking migrant workers and that making their identities public could make them the target of threats and violence by these organizations. An employer, McCorkle Nurseries, Inc., registered a similar concern.

The Department appreciates the comments and concerns expressed therein. The comments, however, were submitted without any supporting evidence. Absent more particular evidence of specific harms that will

[107] OFLC, *2015 H–2B Interim Final Rule FAQs, Round 16: Foreign Labor Recruiter List, https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/Round-16_Foreign_Labor_Recruiter.pdf.*

result from the Department's publishing this information, as the Department currently does in the H–2B program, the Department cannot weigh the previously noted benefits of adding transparency to the recruitment process against generalized and unsubstantiated concerns about potential consequences of disclosing this information on the H–2A Foreign Labor Recruiter List.

e. Miscellaneous Comments

The Department received a few other comments that were generally supportive of the Department's efforts but also provided suggestions for further improvement. They are discussed below.

CDM supported the Department's proposals but urged the Department to require H–2A employers ''affirmatively vet and monitor'' all recruiters used, which the commenter suggested could be accomplished by requiring employers to hire a recruitment compliance officer who would monitor recruitment efforts and investigate and address unlawful recruitment fees. The commenter suggested that the Department require that employers create and retain reports documenting the findings of the recruitment compliance officer.

Several State Attorneys General urged the Department to play a more active role in regulating the recruitment of foreign workers and counseled the Department to model the final rule provisions on regulatory schemes used in States like California and Washington. These commenters noted that California's labor commissioner administers a program charged with the registration and supervision of foreign labor contractors that includes additional requirements specific to recruiters. The commenters urged the Department to create and maintain a similar program that would require registration of foreign labor recruiters and prohibit employers from using recruiters that are not subject to registration and oversight, either by the Department or in the countries in which they operate. Finally, these commenters urged the Department to make it explicit in the final rule that the Department will share recruiter information with State-level enforcement agencies, as necessary.

The Department declines to adopt the suggestion to require that each employer hire a compliance officer and conduct compliance reporting and the suggestion to create and implement a system under which foreign labor recruiters would register with the Department. Requiring employers to hire compliance officers and conduct routine foreign labor recruitment compliance reporting would constitute a substantial change to the current regulations that was not proposed in the NPRM, and adoption in this final rule would preclude commenters from providing meaningful input. Similarly, the NPRM did not contemplate either the creation of a system to register and monitor foreign labor recruiters or the explicit sharing of recruiter information with State-level enforcement agencies. Both such proposals would require not only additional opportunity for stakeholder comment, but also a more thorough consideration of the costs, the additional information sharing requirements and monitoring systems, and the potential administrative, jurisdictional, and legal implications of their adoption; with respect to sharing recruiter information with enforcement agencies at the State level, the Department will do so as is permitted and required by law.

The Alliance to End Human Trafficking, an advocacy organization, likewise endorsed the Department's proposed rule while advocating for more changes in this area. This advocacy organization urged the Department to enhance enforcement by focusing efforts more specifically on human and labor trafficking as a ''key component'' of overall H–2A program compliance efforts. It suggested increased training for agency employees on addressing human trafficking and the creation of a mechanism to provide H–2A workers with information in multiple languages about human trafficking and how to report violations or request help. This commenter recommended that the Department sanction employers, as well as ''downstream entities/contractors and subcontractors,'' if they either falsify or withhold documents, or deceive workers about the terms and conditions of employment. This commenter further suggested that the Department issue model language for employers to include in recruitment agreements that would prohibit recruitment-related fees. This commenter also urged the Department to provide guidance for reimbursing workers who have been charged unlawful recruitment-related fees.

The Department appreciates the commenter's suggestions about additional staff training related to human trafficking and establishing requirements to provide H–2A workers with information about human trafficking and how to report violations or request help. However, these suggestions go beyond the scope of the current proposal, which focuses on increased transparency related to foreign labor worker recruitment. With respect to the request for sanctions and specific guidance regarding reimbursement for workers who have been unlawfully charged recruitment fees, the Department already cites violations, assesses penalties, and collects back wages, when appropriate, from an employer who has sought or received fees from workers in violation of § 655.135(j), or contracted with a foreign labor recruiter without contractually forbidding that foreign labor recruiter from collecting fees in violation of § 655.135(k). The Department can, and regularly does, debar employers from future participation in the program after finding that those employers have violated § 655.135(j) or § 655.135(k). *See* 29 CFR 501.20(d). Additionally, in 2011, the Department issued Field Assistance Bulletin No. 2011–2 providing further guidance on H–2A prohibited fees and the employer's obligation to prohibit fees.[108] This guidance clarifies that WHD may hold the employer responsible for fees collected by a person acting on the employer's behalf, which may include an employee of the employer (*e.g.,* a foreperson collects the fees) or a foreign labor recruiter. The Department reiterates that § 655.135(k) already requires employers to prohibit, in writing, foreign labor contractors or recruiters from receiving payments or compensation from prospective employees and includes specific language that employers must include in contracts with foreign labor contractors or recruiters.

The Department also currently cites violations and assesses penalties against employers who have misrepresented or failed to comply with the terms and working conditions that were disclosed to the workers, and against employers who have failed to provide a written copy of the work contract, in a language understood by the worker, no later than the time the worker applies for the visa or, for a corresponding worker, no later than the day the work commences, in violation of § 655.122(q). While the Department had previously prohibited the confiscation of passports, it has further clarified and made explicit at § 655.135(o) in this final rule that an employer may not hold or confiscate a worker's passport, visa, or other immigration or government identification document except for specific circumstances, and that such

[108] *See* WHD, Field Assistance Bulletin No. 2011–2, *H–2A ''Prohibited Fees'' and Employer's Obligation to Prohibit Fees* (May 6, 2011), *https://www.dol.gov/agencies/whd/field-assistance-bulletins/2011-2.*

confiscation constitutes a reason for debarment. With regard to the suggestion that the Department similarly sanction entities downstream from the employer for misrepresenting terms and working conditions or falsifying or withholding documents, the Department declines to adopt this suggestion at this time because these actions were not proposed in the NPRM and the public was not given an opportunity to provide input.

SRFA, a trade association, asked the Department to clarify what is meant by ''agent or recruiter.'' Specifically, the commenter noted that the definitions at § 655.103 do not define the term ''recruiter'' and further explained that it is unclear how the definition of ''agent'' is applied within the context of §§ 655.137(a) and 655.135(p). The commenter asked the Department to clarify if it will consider ''a fulltime employee of the applicant employer (as defined in § 655.103(b)) in a capacity that, under normal conditions and in the course of normal daily work, does not actively undertake traditional recruitment activities [as] an 'agent' or a 'recruiter' for purposes of clauses §§ 655.137(a) and 655.135(p).'' For example, the commenter asks if the employer would be required to disclose the name of one of its employees if that employee, for no fee, provided the employer names of H–2A-eligible foreign workers for potential employment and if the employer would be required to obtain an agreement from the employee that prohibits the imposition of fees and provide the Department a copy of this agreement at the time of filing.

Similarly, AILA urged the Department to revise the ''definition of foreign labor recruiters in §§ 655.137(a) and 655.135(p)'' to clarify ''whether DOL considers a full-time employee employed by the applicant employer (as defined in § 655.103(b)) in a capacity that, under normal conditions and in the course of normal daily work, does not actively undertake traditional recruitment activities [as] an 'agent' or 'recruiter' for purposes of'' §§ 655.137(a) and 655.135(p).

The Department declines to either define ''recruiter'' in the regulatory text or modify the definition of ''agent'' at this time. As the Department explained in the 2015 H–2B IFR, the duty to disclose information encompasses ''any persons or entities engaged in recruiting prospective foreign workers for the H–2B job opportunities offered by the employer, whether they are hired directly by the primary recruiter or are working indirectly for that recruiter downstream in the recruitment chain.'' 2015 H–2B IFR, 80 FR at 24057. Regarding the definition of ''agent,'' the Department believes the commenters' concerns are misplaced. The proposal requires employers to disclose the names of recruiters and downstream employees of the recruiter when the employer has ''engaged'' the recruiter ''directly or indirectly, in international recruitment.'' In cases where an *employee* of the employer has conducted recruitment on the employer's behalf, the Department will consider the *employer* to have conducted its own recruitment of foreign workers and will not require the employer to disclose the employee's contact information. The employer would remain bound by the prohibition against seeking or receiving prohibited payments from prospective employees, including recruitment-related fees at 655.135(j).

f. Foreign Government Sharing/SORN

The Department also received comments regarding whether to allow the sharing of recruitment information, including the contracts and agreements between agents or recruiters and employers, with foreign governments that have territorial jurisdiction over the agent or recruiter at issue for investigative or enforcement purpose. In particular, the Department sought comments on the potential benefits of sharing this information, the scope of the content that should be shared, whether confidential business information is often included in recruiter agreements, and whether the Department should disclose the information or agreements to foreign governments in any circumstances.

As discussed above with regard to the disclosure of information of recruiters generally, the Department believes sharing this information where appropriate would not only increase transparency throughout the international recruitment chain, but also help hold accountable those foreign labor recruiters who engage in improper conduct.

Trade associations and a couple of farmers generally opposed the sharing of foreign labor recruiter information with foreign governments, with employer Titan Farms, LLC alongside trade associations IFPA, TIPA, and GFVGA expressing concern that this could impact farmers and businesses ''beyond the purpose of this rulemaking,'' including ''food safety, trade impacts, and foreign enforcement at business operations within the foreign country,'' but did not articulate how this information would have these impacts. Another advocacy organization, the U.S. Chamber of Commerce, opposed such sharing and stated employers would be ''loathe to share such sensitive business information,'' without specifying if this information referred to those in contracts and agreements or any information-sharing with foreign governments. Farmworker Justice expressed support for sharing information with foreign governments but noted that they did not believe this would meaningfully address alleged fraud in foreign labor recruitment. Wafla believed the information should be shared only if the U.S. suspected a violation of international law, noting the information contained in the agreements needed to remain confidential otherwise.

In light of commenters' general opposition, and only limited support, the Department declines at this time to amend the regulatory text to allow for the sharing of foreign labor recruiter information, including the contracts and agreements among agents, recruiters, and employers, with foreign governments. However, the Department still believes that open lines of communication and transparency are important. Therefore, the Department intends to modify the relevant SORN, which details how the Department collects and maintains information, to allow for the sharing of foreign labor recruiter information that will be available to the public with the foreign government that has jurisdiction over a foreign labor recruiter for appropriate investigative or enforcement purposes. The Department emphasizes that the contracts and agreements between the employers and the foreign labor recruiters will not be made public, or disclosed to foreign governments, unless otherwise required by law. The Department believes this strikes a respectful balance between the privacy concerns of commenters and the need for open lines of communication with our international partners.

D. Labor Certification Determinations

1. Section 655.167, Document Retention Requirements of H–2A Employers

The Department proposed a technical change to § 655.167(c)(6) to update this paragraph's outdated cross-reference to the regulatory citation for the definition of ''work contract.'' The Department proposed another technical change to § 655.167(c)(7) to add ''to'' before ''DHS.''

As discussed above, the Department proposed a new record retention paragraph at § 655.167(c)(8) that would require the employer to maintain the foreign worker recruitment information

required by § 655.137(a) and (b) for a period of 3 years. The Department received some comments related to the burden of retaining this information and keeping the information up-to-date. The Department responded to these comments in the preamble to § 655.137 above. The Department also proposed a new § 655.167(c)(9) that would require the employer to retain the additional employment and job-related information specified in § 655.130(a)(2) and (3) for the 3-year period specified in § 655.167(b). As noted above, the Department received one comment specifically addressing this document retention requirement. The Department addressed this comment in the preamble to § 655.130. The Department is adopting this proposal with one change, consistent with § 655.130(a)(3), to clarify that the employer must retain information about all managers and supervisors of workers employed under the H–2A Application, notwithstanding whether those managers or supervisors are employed by the employer or another entity. The Department also proposed new paragraphs at § 655.167(c)(10) and (11) to require records of progressive discipline and termination for cause, as discussed more fully in the preamble to § 655.122(n).

The Department proposed a new paragraph (c)(12) that requires the employer to retain evidence demonstrating the employer complied with new § 655.175(b)(2)(i), which requires employers with an unforeseen minor start date delay to notify the SWA and each worker to be employed under the approved H–2A Application of the delay. The Department did not receive comments on this evidence of notice retention obligation and has adopted the proposal, without change, in this final rule.

E. Post-Certification

1. Section 655.175, Post-certification Changes to Applications for Temporary Employment Certification

The Department proposed a new § 655.175, as well as a related recordkeeping obligation at § 655.167(c)(12) and conforming changes to § 655.145(b), to clarify employer obligations in the event of a delay in the start of work. The changes distinguish post-certification delays to the start of work from pre-certification requests to change the total period of employment and they also extend existing compensation protections from § 653.501 to all H–2A and corresponding workers. In the current regulations, § 655.145(b) addresses both the process an employer must follow to request a minor change to the total period of employment before the CO has made a final determination and the process an employer must follow to request a post-certification delay in the start date of work. Under existing paragraph (b), an employer seeking a minor change to the period of employment must request approval from the CO, show that the delay was caused by unforeseeable circumstances, and demonstrate that the crops or commodities will be in jeopardy prior to the expiration of an additional recruitment period. Paragraph (b) also requires an employer seeking a post-certification delay in the start of work provide housing and subsistence to workers who had already begun traveling to the place of employment, and the Wagner-Peyser Act regulations at § 653.501(c) separately require the employer to provide notice of the delay to the SWA and compensation to workers where the employer failed to comply with notice requirement.

For clarity, the NPRM proposed to revise § 655.145(b) to address only pre-determination amendments to the period of employment and proposed to relocate the provisions that address post-certification delays to the start of work from § 655.145(b) to a new provision at § 655.175, within the section of the regulations that would broadly address post-certification activities. To further distinguish the topics, the Department proposed to continue to use the term ''amendment'' in § 655.145(b) to refer to minor changes requested by the employer before the CO's determination and to use the term ''delay'' in proposed § 655.175 to refer to a post-certification delay in the start of work. The Department additionally clarified that post-certification changes are not permitted unless specified in this subpart (*i.e.,* post-certification extensions continue to be permitted under § 655.170).

Proposed § 655.175 included several changes to modify the post-certification requirements for delays in the start of work and to strengthen protections for workers in the event they are not provided adequate notice of the delay. The Department proposed to define a ''minor'' delay in the start of work as a delay of 14 calendar days or fewer. Consistent with proposed § 653.501(c) and current § 655.170(a), the Department proposed to eliminate the requirement that the employer must request CO approval for a minor delay to the start of work. Instead, the Department proposed to require employers to notify the SWA and each worker to be employed under the approved H–2A Application of the delay, at least 10 business days before the certified start date, and to retain evidence of notification to workers for 3 years. As such, under this proposal, the contractual start date would not change as it would under the current process requiring CO approval to change the start date of employment.

The Department proposed to extend the compensation protections at § 653.501(c)(5) to H–2A and corresponding workers by requiring the employer to compensate workers during the delay period when the employer fails to provide notice to workers. Specifically, where the employer fails to provide timely notification to workers, proposed § 655.175(b)(2)(ii) would require the employer to compensate workers at the rate of pay required under subpart B for each hour of the offered work schedule in the job order that work is delayed, for a period up to 14 calendar days. The Department proposed to require that the employer fulfill this obligation to the worker by no later than the first date the worker would have been paid had they begun employment on time. The Department proposed to consider compensation paid to workers under paragraph (b)(2)(ii) to be hours offered to the worker when determining an employer's compliance with the § 655.122(i) three-fourths guarantee obligation. The Department also proposed to permit an employer to reduce the compensation owed under paragraph (b)(2)(ii) by an amount equal to any wages paid to the worker(s) for work performed during the delay period specified in paragraph (b)(2)(ii), provided the wages are paid timely and the work is otherwise authorized by law. However, the Department did not propose to permit the employer to credit wages for unauthorized work, including work performed by H–2A workers outside the location or duties certified in the job order. Finally, proposed § 655.175(b)(1) modified the existing subsistence obligations, which are currently outlined in § 655.145(b), by requiring employers to provide daily subsistence to all workers who are already traveling to the place of employment, upon their arrival and without cost to the workers until work commences, except for days when the employer provides workers compensation under proposed paragraph (b)(2)(ii). Proposed paragraph (b)(1) also would remind employers of their obligations under the contract, including housing as required under § 655.122(d).

The Department received many comments on these proposed changes from individuals, workers' rights advocacy organizations, labor unions,

public policy organizations, legal aid organizations, employers, trade associations, agents, Federal elected officials, SWAs, and an immigration lawyers' association. Most of these comments were generally supportive of the proposed modification of employer obligations in the event of a delay in the start of work, clarification of the definition of minor delay, and changes to the procedures to provide workers notice of the delay. Farmworker Justice requested stronger employer requirements related to notice of the delay to workers and to housing and subsistence obligations. Several trade associations and agents requested revisions to clarify an employer's obligations in the event of government processing delays and to provide additional flexibility related to post-certification delays in the start date.

A comment submitted by an agent, másLabor, and endorsed by other commenters generally supported the definition of 'minor delay' as a delay of 14 calendar days or fewer. Trade association and employer commenters like IFPA, U.S. Custom Harvesters, Inc., and Titan Farms, LLC supported ''the clear delineation of what constitutes a minor delay'' and believed the proposal struck ''a balance of the reality of agricultural production which inherently is hard to predict, subject to weather patterns, and crop growth.'' Similarly, wafla was ''generally supportive of [the] idea'' of clarifying post-certification amendments, supported defining 'minor delay' as 14 calendar days or fewer, noted it ''aligns with 'short-term' extensions of two weeks,'' supported elimination of CO review of start date delay requests, and endorsed changes that require ''employer notification . . . to the SWA and each worker at least 10-days before the certified start date.''

MásLabor urged the Department to broaden the ''unforeseeable circumstances'' definition and remove the requirement that the circumstances jeopardize crops or commodities. MásLabor asserted that circumstances may delay work before crops or commodities exist, such as where catastrophic flooding requires the employer to ''prepar[e] a new field for planting'' and delays the start date of work. MásLabor suggested the final rule should ''partially mirror the standards utilized in contract impossibility requests'' at § 655.122(o) to permit delays caused by ''external circumstances that do not directly or precisely result in the crops themselves being in jeopardy.'' MásLabor noted that a ''start date delay is far less extreme of a measure than contract impossibility'' and asserted it does not make sense to ''have a more stringent standard for the former than currently exists for the latter.'' Specifically, másLabor urged the Department to revise § 655.175(b) to replace the language ''due to circumstances that could not have been foreseen, and the crops or commodities will be in jeopardy prior to the expiration of an additional recruitment period'' with the broader language ''due to unforeseeable circumstances beyond the control of the employer.'' The Department received similar comments from McCorkle Nurseries, Inc.

The Department declines to adopt a broad standard that would permit a delay in the start of work in any circumstance the employer determines is unforeseeable and necessitates a delay. This final rule retains the standard OFLC has applied historically under § 655.145(b) and proposed to retain in § 655.175(b). The Department intends for post-certification delays in the start of work under § 655.175(b) to be rare and limited to situations where unforeseen circumstances necessitate a minor delay after the Department has certified the H–2A Application and the employer's crops or commodities would be in jeopardy prior to the expiration of an additional recruitment period. The Department acknowledges that the actual day work begins may vary due to such factors as travel delays or crop conditions at the time the employer expects work to begin. The need for flexibility has been accounted for by permitting minor delays in limited circumstances under § 655.175(b) and by providing for emergency filing procedures in cases where an employer faced with exigent circumstances necessitating a longer delay must withdraw the application and file a new application under § 655.134. However, such flexibilities must be measured against the need to ensure employers provide accurate start dates to the Department and the need to ensure H–2A and corresponding workers are provided employment and compensation under the terms included in the work contract.

When filing an H–2A Application, the employer represents that it has a need for full-time workers during the entire certification period. It is important to the integrity of the H–2A program to have policies in place to ensure that employers have accurately stated their temporary need and the terms and conditions of employment to prospective U.S. workers, H–2A workers, and corresponding workers. The first date the employer identifies on the job order and H–2A Application is used as the date on which work will start for purposes of recruitment and for calculating program requirements (*e.g.,* the positive recruitment period under § 655.158). As the Department has noted in prior rulemaking, ''[c]hanges to start dates, especially as the practice has become more common, also raise a concern that U.S. workers who might indeed be available for work on the new start date were not given the chance to apply originally.'' 2008 H–2B FR, 73 FR 78019, 78046 (Dec. 19, 2008). In addition, ''[t]o the extent that employers more accurately describe the amount of work available and the periods during which work is available, it gives both U.S. and foreign workers a better chance to realistically evaluate the desirability of the offered job.'' 2012 H–2B FR, 77 FR 10038, 10073 (Feb. 21, 2012); 2015 H–2B IFR, 80 FR at 24066. Accurate start dates help to ensure ''U.S. workers will not be induced to abandon employment [or] to seek full-time work elsewhere at the beginning of the season . . . because the employer overstated the number of employees it actually needed to ramp up'' operations. 2012 H–2B FR, 77 FR at 10073. Similarly, it helps to ensure U.S. workers will not be ''induced to leave employment at the beginning of the season . . . due to limited hours of work because the employer misstated the months during which it reasonably could expect to perform the particular type of work involved in that geographic area.'' *Id.* As Farmworker Justice commented—and the Department agrees—''[a]ll workers consider the dates of employment in choosing between job options and may further suffer an opportunity cost for having foregone alternative work at home in reliance on a particular start date for the new employment.''

As under the current regulations, this final rule permits an employer to delay the start of work for a brief period in a limited set of unforeseeable circumstances, instead of filing a new H–2A Application, if crops or commodities would be in jeopardy prior to an additional recruitment period. This final rule, however, does not require the employer to obtain CO approval for a minor delay request and requires compensation under § 655.175(b)(2)(ii) only where the employer fails to provide the notice required under paragraph (b)(2)(i). The current limitation on the circumstances in which an employer may delay the start of work rather than file a new application is necessary to ensure employers provide accurate start dates at the time of filing and to protect workers from the adverse effects of a delay in the start of work. The

Department has not encountered difficulties in administering this standard when adjudicating employer requests under current § 655.145(b). The Department believes this limitation remains necessary, especially given that this final rule eliminates the process for requesting and adjudicating an employer's request for a minor delay of the start date of work under § 655.175(b). Broader language permitting the employer to delay the start of work, without CO approval, in any case where an employer determines unforeseen circumstances require delaying work, would be overly broad and ambiguous and likely would make § 655.175(b) less clear to employers and more difficult for the Department to enforce. It would also be less effective in ensuring accurate start dates are indicated at the time of filing and recruitment, and it would be insufficient to protect the interests of U.S. job seekers, who may be available to accept the job on a different start date, or H–2A and corresponding workers, who expect to begin work at the time and place specified in the work contract.

The Department also disagrees with commenters' characterization of the § 655.122(o) contract impossibility standard as broader or more flexible than the standard in § 655.175(b) and disagrees with commenters' assertion that a broader or more flexible standard at § 655.175(b) is necessary or more consistent with the policy aims of § 655.175(b) and § 655.122(o). The contract impossibility provision requires the employer to not only show the ''services of the worker are no longer required for reasons beyond the control of the employer due to fire, weather, or other Act of God,'' but also that these specific circumstances ''make[] the fulfillment of the contract impossible.'' The Department does not believe it is necessary to specifically reference ''fire, weather, or other Act of God'' in § 655.175(b) because the language ''circumstances that could not have been foreseen'' is broad enough to encompass each type of potential circumstance. The limitation on delays under § 655.175(b) (formerly § 655.145(b)) to situations in which crops or commodities would be in jeopardy prior to an additional round of recruitment and the § 655.122(o) requirement to show that circumstances make it impossible to fulfill the work contract serve similar functions and aim to prohibit the abuse or overuse of what the Department considers to be drastic measures in response to unforeseeable exigent circumstances.

The Department disagrees as well with commenters' assertion that it is necessary to broaden § 655.175(b) to encompass all exigent circumstances that may necessitate a delay after OFLC has certified the H–2A Application. If, as hypothesized by one commenter, the employer had to undertake remedial measures to ''prepare the ground for planting activities'' after ''catastrophic flooding'' before planting crops, the employer may withdraw its application and file a new application under the emergency procedures provision at § 655.134. In fact, the extent of damage contemplated by the example in those comments is unlikely to meet the definition of ''minor delay'' in § 655.175(b) because the necessary delay would likely be greater than the maximum 2-week minor delay provided for in that regulatory provision. The emergency procedures provision at § 655.134 permits an employer to use the emergency application filing process where the employer shows there is good and substantial cause to waive the required time period for filing an H–2A Application and the CO has determined there is ''sufficient time to test the domestic labor market on an expedited basis.'' The factors that may constitute good and substantial cause are nonexclusive, but the Department has clarified that these situations involve ''the substantial loss of U.S. workers due to Acts of God or similar unforeseeable man-made catastrophic events (*e.g.,* a hazardous materials emergency or government-controlled flooding), unforeseeable changes in market conditions, pandemic health issues, or similar conditions that are wholly outside of the employer's control.'' 2019 H–2A NPRM, 84 FR at 36205. The Department has noted, for example, that ''if unusually heavy storms and rains occur after the employer submits its [H–2A Application], the employer can assess impacts on crop conditions and its temporary need and may determine it is appropriate to reduce staffing levels for the job opportunity described on the pending [Application] and file an emergency situation [Application] to address its need for labor or services under the new circumstances.'' 2022 H–2A Final Rule, 87 FR at 61768.

The Department also received comments from SWAs, trade associations, agents, elected officials, and workers' rights advocacy organizations regarding the proposed requirement that employers contact workers and the SWA, rather than the OFLC CO, to provide notice of the delay. Most comments were supportive of the proposal. Farmworker Justice supported the proposal as ''a common-sense change'' because the employer ''has been in prior contact with the workers, either directly or through agents'' and ''is much more likely than the SWA to have the most current and effective contact information.'' They added that the proposal would relieve some of the burden on SWAs that must prioritize allocation of limited resources. California LWDA supported the proposal to require employers notify workers of the delay directly, asserting it would be more effective than the current approach that requires employers and workers to contact the SWA.

Some commenters suggested specific changes to the proposal to ensure notice of the delay is timely and can be understood by the worker who receives it. Washington State expressed concern that the proposed rule did not contain a requirement to ''notify SWAs of post-certification changes'' and urged the Department to ''include a requirement that employers notify SWAs of post-certification changes at the same time they notify [the Department].'' Farmworker Justice urged the Department to strengthen the notice requirement by requiring that the notice of delay be provided in the primary language spoken by the worker; clarifying that workers ''must actually receive the notice'' and it is not sufficient for employers to show ''merely that notice be sent out;'' requiring employers ''use the most reliable or speediest form of communication'' such as requiring ''electronic or telephonic correspondence'' instead of slower methods like postal mail that workers may not receive before departing; and requiring employers ''reach out to farm labor contractors or local recruiters, if unable to reach workers themselves, to ensure workers get the message.''

A comment submitted by másLabor and endorsed by several other commenters opposed any written contact requirement because ''[m]any U.S. applicants do not provide an email address, meaning an employer would be forced to notify workers by mail[,] which may not be feasible given the time constraints.'' The commenters stated that, in many instances, ''the employer is only given a phone number and perhaps a physical address'' and in such cases the employer ''cannot satisfy the Department's [written] notice requirement.'' The commenters also asserted postal mail is not an effective means to communicate a last-minute delay to the start date because workers may not receive notice in time if the Department uses the date the employer

sends the notice by postal mail and, conversely, the employer must send the postal mailing more than 10 days prior to the delay if the Department uses the date the workers receive notice of the delay. The commenters objected to any overnight mail delivery requirement as costly and noted that it would still require employers to send the notice more than 10 days prior to the start date.

In response to Washington State, the Department notes that the NPRM and this final rule require the employer to notify both workers and the SWA that the start of work is delayed. In response to workers' rights advocacy organization commenters and a trade association, the Department agrees that electronic notice of delays will be most effective given the time-sensitive nature of the notice. This final rule requires the employer to provide notice by email, telephone, or both if the worker provides an email address and telephone number. If the worker does not provide an email address or phone number, the employer must provide written notice using the worker's postal address or other contact information. The Department also agrees that the notice to workers must be in a language that workers can read and understand. The Department has revised proposed § 655.175(b)(2)(i) to require the employer send notice to each worker in a language understood by the worker, as necessary or reasonable. This is consistent with existing work contract disclosure requirements at § 655.122(q), which the Department has noted are necessary to ensure an employer ''provide[s] the terms and conditions of employment to a prospective worker in a manner permitting the worker to understand the nature of the employment being offered and the worker's commitment under that employment.'' 2009 H–2A NPRM, 74 FR 45906, 45916 (Sept. 4, 2009). The Department is not adopting the workers' rights advocacy organization suggestion to require that the employer confirm all workers received the notice of delay by reaching out to labor contractors and recruiters to locate workers who do not respond. This would impose an undue burden on employers, in part due to the same time sensitivity concerns that necessitate an electronic notice requirement. The Department recognizes that sending a notice of delay by mail may not ensure that the worker receives notification of the delay. Late notice, however, may still be preferable to no notice at all where more expedient means are not available. For this reason, notice by mail may not be utilized if communicating via email, telephone, or both is a viable option. An employer who does not possess electronic means of contacting a worker will not be required to send a notice by mail earlier than it is required to send an electronic notification. The Department recognizes that the unexpected nature of circumstances that justify a delayed start date may not permit the employer to send postal notice that reaches a worker at least 10 days before the date of need. It may also be difficult for the Department to define the scope and level of due diligence imposed by the requirement and to later enforce such a requirement. However, the Department notes that the employer remains obligated to comply with the terms and conditions of the certified H–2A *Application for Temporary Employment Certification* beginning on the first date of need certified, including employer-provided housing, as well as subsistence under § 655.175(b)(1), if the worker does not receive the notice.

The Department also received comments both in support of and in opposition to the proposal to require that employers compensate workers, for a period of up to 14 calendar days, in the event of a delay in the start of work if the employer fails to provide the notice required by paragraph (b)(2)(i). Forty-three Federal elected officials supported the proposal to require compensation for up to 14 days in the event of a delay without proper notice, stating generally that the proposal will help to ''protect[ ] against exploitative practices commonly used by employers, especially as it relates to worker pay.'' Farmworker Justice noted that employers must provide compensation to U.S. workers in the event of a delay under § 653.501(c) and stated there is ''no legitimate reason to exclude H–2A workers, who often travel further, absorb greater costs, and have fewer alternative options such as finding interim employment elsewhere.'' They asserted this provision ''is particularly important in light of the number of complaints farmworker legal services providers have received from H–2A workers who have no food and no money for days to weeks at the start of the job when no work is available, notwithstanding the promised start date on the clearance order.'' The UFW Foundation cited accounts from eight farmworkers detailing the ways delayed start dates had caused severe financial hardship to workers and UFW, and other commenters like the North Carolina Justice Center stated the Department's proposals would help to provide ''a safety net during a particularly vulnerable time, when farmworkers have little or no savings and are awaiting their first paycheck.'' Similarly, Farmworker Justice supported the proposal as a necessary protection for foreign workers who ''incur significant incoming travel expenses and fees, sometimes while paying high interest rates, including transportation to the U.S. consulate, hotel costs while waiting for their consular appointment, transportation costs to the worksite, visa fees, border crossing fees, and daily subsistence while en route with travel sometimes taking ten or more days.'' They added that delayed start dates also burden U.S. workers who ''incur significant inbound travel expenses when traveling from their homes to remote worksites, only to find that the start of work has been delayed.'' They noted, ''[a]ll workers consider the dates of employment in choosing between job options and may further suffer an opportunity cost for having foregone alternative work at home in reliance on a particular start date for the new employment.''

Farmworker Justice also supported the Department's proposal to consider only employer offers of work that are within the scope of the approved job order, stating this is a necessary ''clarification to deter unsafe or undercompensated work'' not approved in the job order. MásLabor supported the proposal to permit employers to credit the required compensation toward the employer's three-fourths guarantee obligation at § 655.122(i) because it will help ''mitigate the financial burden associated with the requirement'' and avoid ''potential 'double dipping' that would result'' if employers are required to compensate workers for the delay and then also must provide ''compensation under the three-fourths guarantee for the same two weeks if there is a shortfall.''

In contrast, several comments submitted by trade associations, agents, and employers expressed opposition to the compensation proposal, in whole or in part. MásLabor expressed concern that the proposed changes at § 653.501(c) and new § 655.175 failed to consider that ''an employer requesting a delay to the start date is itself experiencing hardship of some sort'' and the proposal ''tip[s] the scales too heavily in favor of the workers by *dramatically* increasing the costs to employers.'' Labor Services International asserted, generally, that the proposal will create ''communication chaos'' and an ''administrative nightmare'' and expressed concern employers will be required to provide compensation for delays in the start of work caused by a government delay in processing,

especially delays in ''availability of consular appointments.'' FFVA specifically expressed concern employers will be required to compensate workers for minor delays caused by ''the government's failure to timely approve H–2A workers to cross the border,'' such as when worker entry into the U.S. is delayed ''for multiple days without any notice'' to the employer due to ''unannounced section 221g investigations'' by the State Department. The commenter urged the Department not to require compensation in cases where the delay is ''caused solely by the government.'' Alternatively, the commenter urged the Department not to require compensation ''until 7 days after the initial start date . . . , and only for those workers who have departed for the job opportunity,'' which the commenter asserted would ''allow practical flexibility for employers [and] account for the very real delay caused by the government, while considering the protections needed for workers who have already left their homes for the job.''

The Cato Institute opposed the proposal because it would provide benefits and compensation not received by workers outside of the H–2A program and asserted this would incentivize employment of undocumented workers by ''rais[ing] the cost of the H–2A program relative to illegal hiring.'' NCAE supported clarifications of the post-certification delay process, generally, but ''oppose[d] a requirement to pay for work not performed.'' The commenter provided a hypothetical in which an employer's start of work is delayed due to a hurricane pushing predators into an orange grove and it may take longer than the employer anticipated to dry the grove or clear it of predators, in which case, the commenter expressed concern, ''due to this 'Act of God' '' the proposed compensation obligation would require the employer ''to make payment for work that was never performed,'' which ''may jeopardize the enterprise.'' AILA noted that brief start date delays due to weather and other unforeseen circumstances are common in agriculture and the commenter urged the Department ''not to require additional compensation obligations for employers in this context.'' MásLabor opposed extending to H–2A and corresponding workers the compensation benefits currently provided to U.S. workers under § 653.501 because it would be a ''dramatic expansion of the existing requirements.''

As noted above, under existing regulations, if an employer seeking to employ workers under either a criteria (H–2A) or non-criteria (non-H–2A) job order fails to timely notify the SWA of a start date change it must pay hourly wages to U.S. farmworkers who followed SWA contact procedures. *See* § 653.501(c)(3)(i) and (c)(5). Section 655.175(b)(2)(ii) in this final rule extends this obligation to H–2A workers and corresponding workers under the H–2A Application to ensure workers are compensated for anticipated hours not offered at the beginning of the work contract, similar to § 653.501(c), and applies in conjunction with the existing three-fourths guarantee at § 655.122(i), which ensures workers receive compensation for anticipated hours not offered during the contract period. The obligations in § 655.175(b)(2)(ii) will apply only in circumstances where the employer's start of work is delayed due to unforeseeable circumstances and crops or commodities would be in jeopardy prior to an additional recruitment period, and the compensation obligation will apply only where the employer fails to provide workers notice of the delay under paragraph (b)(2)(i). The procedure at § 655.175(b) will not apply when a worker's arrival and start of work is delayed due to, for example, government delays in scheduling appointments and interviews at the U.S. embassy or consulate. As the Department has explained under the current regulations, the ''provision for requesting a delayed start date applies when the employer wishes to delay the start date of all workers covered by the [H–2A Application],'' and it ''does not cover minor travel delays or slower than expected processing times at USCIS or a U.S. Consulate for workers coming from outside the U.S.; however, these delays should not delay any other worker's start date or the employer's start date of work.'' [109] The same is true under new § 655.175. The provisions at § 655.175(b) will apply only where the work under the approved H–2A Application will not begin on the certified first date of need but instead will be delayed for a period of no more than 14 calendar days. In a situation where the employer faces exigent circumstances and does not know how long the start of work will be delayed, such as when the employer does not know how long it will take to prepare an orange grove after a hurricane, the employer may withdraw the application and file a new application using emergency procedures at § 655.134, if applicable.

Wafla expressed concern the proposal would require employers to compensate workers under a piece rate in some cases, which would not be possible where no work has been performed due to a delay. The commenter urged the Department to revise proposed § 655.175(b)(2)(ii) by removing the language ''same rate of pay required under this subpart B'' and adding reference to an hourly rate. The Western Range Association expressed concern the compensation proposal would impact ''employers who pay monthly salaries under the 'special procedures' in 20 CFR 655.200 *et seq.* in a way that it would not for farms that pay on an hourly basis'' and the commenter noted that where one of these employers experiences a start date delay, the employer's ''season is usually pushed back or additional hours are worked in order to catch up for the delay.''

The Department agrees with the trade association commenter that paragraph (b)(2)(ii) should not reference production-dependent compensation rates like piece rates, which cannot be calculated during a delay in the start of work, and agrees the provision should reference only an hourly rate. The Department has revised paragraph (b)(2)(ii) to require the employer provide compensation at the highest applicable hourly rate. The Department has also revised paragraph (b)(2)(ii) to provide that an employer that is subject to the wage rates at § 655.211(a) and fails to provide the required notice of delay must compensate workers during the delay at the hourly rate that is the highest of the agreed-upon collective bargaining wage rate, the applicable hourly minimum wage imposed by Federal or State law or judicial action, the monthly AEWR, or any other wage rate the employer intends to pay. If that rate is expressed as a monthly rate, such as the monthly AEWR, the employer must prorate the monthly rate as necessary to compensate the worker for each hour during the delay period in accordance with § 655.175(b)(2)(ii). Employers of workers in the herding and production of livestock on the range are subject to a monthly AEWR due to ''difficulties in tracking and paying an hourly wage rate to workers.'' 2015 H–2A Herder FR, 80 FR at 62987. Herder employers are subject to the ''standard H–2A pay frequency, and the [2015] Final Rule requires that payments be made at least twice monthly.'' *Id.* at 62986. The Department noted that ''calculating the twice-monthly payment can be easily accomplished by evenly dividing the required monthly rate into

[109] DOL, *OFLC FAQs, Round 6* (Feb. 29, 2012), *https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/h-2a_faq_round6.pdf.*

two payments.'' *Id.* In addition, prorating the monthly wage rate is already permitted in certain circumstances under § 655.210(g)(2). The Department does not believe it will be any more difficult for employers to determine the rate it must pay a worker for a period of up to 2 weeks during which the start date is delayed and to provide this compensation on this same date it would have provided workers the first of 2 monthly payments had work begun on time.

The Department also received comments from workers' rights advocacy organizations, labor unions, SWAs, individuals, and elected officials in support of the proposed changes to the housing and subsistence obligations, though some commenters suggested additional protections. Farmworker Justice supported the housing and subsistence provisions and noted this existing requirement has ''helped encourage a correct assessment of the start date.'' Washington State supported the proposal to require employer-provided housing during the delay but noted the NPRM did not require the employer to provide meals or money for meals during the delay. The SWA expressed concern this existing regulatory ''gap'' ''has caused considerable hardship for workers'' in situations where the employer provides kitchen facilities during the delay period but does not provide workers groceries or money and transportation to purchase groceries. The SWA urged the Department to require employers to provide workers meals, or provide money and transportation to buy groceries, during the delay period. An individual commenter urged the Department to go further in this final rule and require employers provide a ''minimum standard compensation package'' to workers even where the employer provides notice of the delay.

The Department declines to adopt the suggestion to require employers provide workers a daily per diem payment or a total compensation package during any delay period and is adopting the proposed housing and subsistence provision at § 655.175(b)(1) without change. The Department believes the requirements to provide or reimburse workers subsistence in the same amount required during travel, together with the notice and compensation obligations in § 655.175(b)(2) and three-fourths guarantee obligation at § 655.122(i), will ensure workers are not disadvantaged by a delay in the start of work and will place workers in the position they would have been in had work begun on time. Employers also must comply with all other requirements of the certified H–2A Application, including housing under § 655.122(d), beginning on the first date of need certified. However, the Department appreciates the comments and encourages stakeholders to review the Department's existing, extensive guidance relating to travel-related subsistence requirements under § 655.122(h) and the provision of meals under § 655.122(g).[110]

This final rule adopts the proposal to extend to H–2A and corresponding workers the existing obligation, at § 653.501(c), to compensate workers for the delay if the employer fails to provide notice of the delay to workers. These provisions will ensure that, in rare cases a worker who is already en route to the worksite despite the employer's provision of 10 business days' notice or does not receive such notice (and therefore, is not entitled to compensation under § 655.175(b)(2)), the worker will still receive subsistence costs no later than the first date the worker would have been paid had work started on time. The Department has concluded these provisions best balance the need for agricultural employers to respond to unforeseeable exigent circumstances and the need to ensure workers receive compensation and benefits under the anticipated terms and conditions of employment and do not suffer financial hardship due to a minor delay in the start of work.

The Department also received some comments that were beyond the scope of this rulemaking. MásLabor urged the Department to revise § 655.175 by adding a provision that would permit custom combine employers to ''add worksites and customers to its itinerary [after certification] provided that such worksites/customers are within the previously-approved [AIEs]'' and suggested the new provision should incorporate language from an FAQ the Department published in February 2013. Specifically, másLabor urged the Department to add a new § 655.175(c) that states an employer certified under §§ 655.300 through 655.304 that ''performs work in multiple [AIEs] . . . may augment its scheduled itinerary with additional worksites located within the previously approved [AIEs],'' provided the employer maintains an up-to-date itinerary and retains copies of contracts or agreements with previously undisclosed fixed-site businesses. These commenters also urged the Department to permit additional pre-certification amendments, such as requests to ''add, modify, or remove a job requirement from the Application after the Notice of Acceptance has been issued.'' Specifically, the commenters suggested the Department should add a new § 655.145(c) that would permit pre-certification changes ''including but not limited to changes or additions to job duties, job requirements in accordance with § 655.122(b), productivity standards, or worksite or housing locations,'' if approved by the CO.

The Department declines to adopt the commenters' suggestions. Adding provisions permitting the addition of worksites after certification would not be a regulatory change that could have been anticipated by the public and the public would therefore not have been aware it is a proposal on which comments should be offered. The comment is, therefore, beyond the scope of this rulemaking, and the Department declines to adopt the suggestion at this time. However, the Department notes that it addressed special procedures and post-certification changes to H–2A Applications for custom combine employers in the 2022 H–2A Final Rule. That rule rescinded special procedures contained in informal guidance (Training and Employment Guidance Letters), codified procedures for employers that employ workers engaged in custom combining according to a planned itinerary across multiple AIEs, and ''provide[d] appropriate flexibilities for employers engaged in these unique agricultural activities that are substantially similar to the processes formerly set out in administrative guidance letters.'' 2022 H–2A FR, 87 FR at 61663.

Similarly, revising § 655.145 to permit additional pre-certification application amendments, as suggested, would be a major change to the regulation that commenters and stakeholders could not have anticipated as an outcome of the minor proposed changes to that section or the substantive proposed changes to the provisions governing post-certification start date delays at new § 655.175, thus warranting additional public notice and opportunity for comment. As such, the Department declines to adopt the suggestion in this final rule. However, when addressing similar comments in the 2022 H–2A Final Rule, the Department concluded that ''allowing applicants to request corrections to applications without restrictions would run counter to the Department's efforts to modernize the temporary agricultural labor certification process'' and noting that employers who wish to make

[110] *See, e.g.,* OFLC, *Meal Charges and Travel Subsistence, https://www.dol.gov/agencies/eta/foreign-labor/wages/meals-travel-subsistence* (last accessed Feb. 8, 2024); DOL, *WHD Fact Sheet #26D: Meal Obligations for H–2A Employers, https://www.dol.gov/agencies/whd/fact-sheets/26d-meal-obligations-H-2A* (last accessed: Feb. 8, 2024).

application changes outside of those permitted in § 655.145 may file a new H–2A Application to accommodate the changes needed, utilizing emergency filing procedures at § 655.134, if applicable. *Id*. at 61750.

After considering all comments, the Department is adopting the proposals with some revisions to paragraphs (b)(2)(i) and (b)(2)(ii), as noted above. As under the current regulations, this final rule permits delays in the start of work only when such a delay is minor and due to unforeseen circumstances and the employer's crops or commodities will be in jeopardy prior to expiration of an additional recruitment period. Paragraph (b) limits minor delays to delays of no more than 14 calendar days from first date of need.

Paragraph (b)(2)(i) requires the employer to notify the SWA and each worker to be employed under the approved *Application for Temporary Employment Certification* of the delay at least 10 business days before the certified start date of need and § 655.167(c)(12) requires the employer to retain evidence demonstrating the employer notified the SWA and each worker of the delay for a period of 3 years. This final rule requires the employer to contact the worker in writing, in a language understood by the worker, as necessary or reasonable, using the contact information the worker provided to the employer. If the worker provides electronic contact information, such as an email address or telephone number, the employer must send notice using that email address and telephone number and must send notice using both if the worker provides contact information in both formats. The employer may provide notice to the worker telephonically, provided the employer also sends written notice to the email or postal address provided by the worker. If the worker does not provide an email address or phone number, the employer must provide written notice using the worker's postal address or other contact information.

Paragraph (b) provides that in the event of a minor delay (no more than 14 calendar days), the employer must provide to all workers who are already traveling to the place of employment, upon their arrival and without cost to the workers until work commences, daily subsistence in the same amount required during travel under § 655.122(h)(1), except for days for which the worker receives compensation under § 655.175(b)(2)(ii) of this section. The employer must fulfill this subsistence obligation to the worker no later than the first date the worker would have been paid had they begun employment on time. Paragraph (b)(1) also includes a reminder to employers that, even in the event of a minor delay in the start of work, the employer must continue to comply with all other requirements under the certified H–2A Application, including, but not limited to, the provision of housing as described in the job order. The Department has made a minor revision to this paragraph and paragraph (b)(ii) to remove introductory clauses that reference the 14-calendar-day minor delay period, as this language is necessary only in paragraph (b) and inclusion of the language in subordinate paragraphs may create confusion or uncertainty regarding an employer's obligation to provide subsistence until work commences under paragraph (b)(1) or compensation for anticipated hours during the delay under paragraph (b)(2)(ii).

Under paragraph (b)(2)(ii), if the employer fails to provide the timely notification required under paragraph (b)(2)(i) of this section to any worker(s), the employer must pay the worker(s) the highest of the hourly rates of pay at § 655.120(a) (or, if applicable, the rate required under § 655.211(a)(1)), for each hour of the offered work schedule in the job order, for each day that work is delayed, for a period up to 14 calendar days. The employer must provide this compensation on the date workers anticipated they would receive their first paycheck had the work begun on time. Under paragraph (b)(2)(ii), the employer's wage obligation will apply in any case where the employer fails to provide notice of the delayed start of work at least 10 business days prior to the certified start date. This obligation will apply in conjunction with the three-fourths guarantee at § 655.122(i), which will continue to require employers to offer workers employment for a total number of work hours equal to at least three-fourths of the workdays of the total period, beginning with the first workday after the arrival of the worker at the place of employment or the advertised contractual first date of need, whichever is later. However, under § 655.175(b)(2)(iii), compensation paid to a worker under paragraph (b)(2)(ii) of this section for any workday included within the time period described in § 655.122(i) will be considered hours offered to the worker when determining an employer's compliance with the § 655.122(i) three-fourths guarantee obligation. The employer may reduce the compensation owed to any worker(s) under § 655.175(b)(2)(ii) by the amount of wages paid to the worker(s) for work performed within the time period described in paragraph (b)(2)(ii), insofar as such wages are paid timely and such work is covered by the job order or otherwise authorized by law. The employer may not credit toward the three-fourths guarantee any wages for unauthorized work, including work performed by H–2A workers outside the location or duties certified in the job order.

Paragraph (a) reminds employers that post-certification changes are not permitted unless specified in this subpart (*e.g.,* post-certification extensions continue to be permitted under § 655.170). Paragraph (a) also reminds employers that they must continue to comply with the terms and conditions of employment contained in the *Application for Temporary Employment Certification* and job order with respect to all workers recruited in connection with its certification. Employers are reminded as well that sanctions and remedies for an employer's failure to comply with the obligations required under this section may include, as appropriate, the recovery of such compensation, the assessment of civil money penalties, revocation of the approved certification under § 655.181, and, if warranted, debarment of the employer under § 655.182.

The Department has determined the new start date delay process at § 655.175(b) strikes an appropriate balance between the employer's need to respond to unforeseen exigent circumstances and the needs of agricultural workers to be apprised of changes to the terms and conditions of the job opportunity and compensated in accordance with the terms of employment the workers accept. The provisions related to compensation and subsistence will effectively address the hardship concern (discussed above in the preamble to § 653.501(c)) by providing workers a source of income should the employer fail to provide such workers sufficient notice of a delay in the start of work, while continuing to allow the employer flexibility to delay the start of work for up to 14 calendar days if necessitated by circumstances that could not have been foreseen and the crops or commodities will be in jeopardy prior to the expiration of an additional recruitment period. The new compensation obligation in situations where workers are not notified of a start date delay will better protect agricultural workers from financial hardship they are likely to experience should they travel or otherwise rely on the information included in the job order, only to discover upon arriving

that work is not available to them. As workers' rights advocacy organizations noted in response to the NPRM, delayed start dates are harmful to workers, who value predictability and certainty in employment start dates, particularly where they turn down other work or must travel far to make themselves available to work at the time and place advertised in the job order. Farmworkers have expenses beyond housing and meals and cannot afford to lose expected pay for up to 2 weeks, should the actual start date be later than the first date of need offered. The beginning of the certification period is a particularly vulnerable time for workers, who may have little or no savings as they await a first paycheck; delays in the start of work and resulting first paycheck exacerbate this vulnerability and can lead to financial hardships. Providing up to 2 weeks of compensation, due at the time workers anticipate receiving their first paycheck had the work begun on time, provides a safety net for workers to support themselves when work is not available. Imposing these pay obligations in the event workers are not notified of a delayed start of work also may help to ensure growers accurately disclose the first date of need in the job order. The new provisions in this final rule also will increase the likelihood that workers will receive timely notification of any delay in the start of work and that employers maintain accurate records of notices they provide.

Limiting ''minor'' delays to delays of 14 calendar days or fewer eliminates ambiguity and aligns this provision with the conceptually similar provision at § 655.170(a), which limits ''short-term'' extensions to 2 weeks and does not require CO approval. As is the case for non-minor delays, where the anticipated delay would be more than 2 weeks or indefinite and cannot be considered ''minor,'' the employer may withdraw the application and refile, using emergency processing under § 655.134, as applicable, to engage in recruitment for the job opportunity, which will begin on a newly identified start date. If the employer cannot employ workers under the terms and conditions promised beginning on the certified start date and can only offer a fraction of the work hours in the 2 weeks following the certified start date (*e.g.,* the employer can offer only a single day of work, followed by several days without work or a similar offer of only minimal hours upon the worker's arrival, followed by an extended rest period), the Department will consider the employer's start date delayed and the employer will be required to comply with proposed § 655.175(b), including all housing, subsistence, and compensation obligations and the obligation to provide notice of the delay to workers and the SWA.

F. Integrity Measures

1. Section 655.182, Debarment

The NPRM proposed to revise 20 CFR 655.182 to shorten the time to submit rebuttal evidence to OFLC as well as shorten appeal times for debarment matters. The Department proposed these changes to increase the speed with which debarments would become effective by decreasing the time for parties to submit rebuttal evidence to OFLC, appeal Notices of Debarment to the OALJ, or appeal debarment decisions to the ARB from the OALJ. The Department received over 35 comments on this section and, for the reasons explained below, has decided not to adopt the proposal to reduce rebuttal and appeal times for debarment matters.

The Department proposed to amend § 655.182(f)(1) and (2) by reducing the period to file rebuttal evidence or request a hearing in response to a Notice of Debarment from 30 calendar days to 14 calendar days. The NPRM indicated that if the party received a Notice of Debarment but did not file rebuttal evidence, the Notice of Debarment would take effect at the end of the 14-calendar-day period unless the party requested, and the Administrator granted, an extension of time to submit rebuttal evidence. The Department proposed limited circumstances for granting an extension of time. The NPRM also proposed a reduction in time from 30 calendar days to 14 calendar days for employers to appeal a final determination of debarment and for any party to request the ARB to review the decision of the ALJ. In the NPRM, the Department reasoned that reducing these timeframes would lead to faster final agency adjudications that would more efficiently prevent H–2A program violators from accessing this program. As a result of a more expedited debarment process, workers in the United States would be protected from further harm.

The Department received comments both opposed to and in favor of these proposals. The comments supporting the proposed changes expressed general agreement with the NPRM's proposals to enhance integrity measures in the H–2A program but did not offer any specific explanation.

Many trade organizations, employers, and individuals expressed concerns that the shortened time frame could negatively impact a party's ability to defend themselves and their due process rights by limiting the time to review and gather all evidence needed to prepare and submit a rebuttal or file an appeal. Most of the same commenters worried that the shortened timeframe could infringe on a party's ability to obtain new counsel or consult counsel. Some commenters went as far as to say these likely outcomes went against the main goal of the NPRM, which sought to bolster program integrity and help protect workers from further harm. These commenters, and other SWAs, employers, and trade organizations, reasoned that parties should be afforded a broader timeframe to consider options and evaluate the evidence given the gravity and severe penalty imposed with a debarment action and argued the proposal would likely increase appeal filings, thereby creating backlogs in processing times.

Several trade associations argued that due process concerns were heightened during farmers' busy season given the time-sensitive and perishable nature of agricultural operations and products. Another commenter believed the likely result of the proposed change would incentivize a greater number of appeals that would result in an additional administrative burden for all parties.

To guard against any due process concerns, the Department proposed permitting parties to request an extension of time to submit rebuttal evidence. Several commenters, including trade associations and an individual employer, believed the standard to obtain an extension was too high in the NPRM and would only be granted in limited circumstances but did not explain why. Several commenters, including trade associations and an individual employer, offered an alternative approach that would require a party to notify the Department if it planned to file rebuttal evidence or request a hearing within the 14-day period but allowed parties the full 30 days from the Notice of Debarment or final determination of debarment to provide rebuttal evidence or request a hearing.

Having carefully considered the public comments, the Department does not adopt the proposal to shorten rebuttal and appeals time for debarment matters in the final rule. Although the proposed reduction in time would expedite the debarment process, the Department recognizes the due process concerns expressed by most commenters and has decided to retain the current regulatory timeframes. Given the severe penalty imposed by a

debarment action, the Department appreciates the comments emphasizing that it is important to safeguard an employer's due process rights and allow sufficient time to hire or consult counsel, if desired, and obtain the evidence needed for a rebuttal or to request a hearing. The Department also appreciates the comments from several agricultural organizations that noted that the shortened timeframe additionally could adversely impact farmers during their busy season given the nature of their work and products. Therefore, the Department has decided not to adopt such a change at this time for the reasons described above. Similarly, the Department, as described in the discussion of 29 CFR 501.20, has decided not to adopt the proposed changes to WHD's regulations governing the timeframe to appeal WHD debarment determinations.

After considering the commenters' alternative approach requiring notice to be filed within the 14-day period, but allowing 30 days to file a rebuttal or request a hearing, the Department declines to adopt the alternative approach for two reasons. First, since the Department is not adopting the NPRM proposal, there is no need to consider the alternative offered by several commenters. Second, the Department believes the alternative approach would unnecessarily complicate the rebuttal and debarment appeals process by increasing the administrative burden in tracking and processing these cases. Specifically, the alternative suggestion would increase the administrative burden on the Department, and potentially delay OFLC processing of these cases, by requiring additional tracking of: (1) employers who notify the Department of their intent to file rebuttals and a subsequent determination of whether the rebuttals were timely filed or not filed; and (2) employers who notify the Department of their intent to request a hearing and a determination of whether the requests were timely filed or not ultimately filed. The suggestion also would require modifications to the Department's electronic processing system, which currently does not have the functionality to track such notifications.

VII. Discussion of Revisions to 29 CFR Part 501

The Department proposed various revisions to the regulations at 29 CFR part 501, which set forth the responsibilities of WHD to enforce the obligations of employers under the H–2A program. The Department proposed these amendments concurrent with and to complement the changes ETA proposes to its regulations in 20 CFR part 655, subpart B, governing the certification of temporary employment of nonimmigrant workers employed in temporary or seasonal agricultural employment. As with the proposed revisions to ETA's regulations, the proposed revisions to 29 CFR part 501 focused on strengthening protections for agricultural workers and enhancing the Department's capabilities to monitor program compliance and take necessary enforcement actions against program violators.

A. Section 501.3, Definitions

In the NPRM, the Department proposed to define the terms *key service provider* and *labor organization* in § 501.3(a) to conform to the proposed definitions of these terms in 20 CFR 655.103(b) and for the reasons set forth in the discussion of proposed 20 CFR 655.135(h). The Department also proposed to remove the definition of the term *successor in interest* from § 501.3(a), to conform to and for the reasons described in the discussion of proposed 20 CFR 655.104. Finally, the Department proposed to add a new § 501.3(d), defining the term *single employer,* to conform to and for the reasons described in the discussion of proposed 20 CFR 655.103(e).

For the reasons described in the preamble discussion of 20 CFR 655.103(b), this final rule adopts the definition of *labor organization* as proposed. This final rule also adopts the definition of *key service provider* in 29 CFR 501.3(a) with the same modification as explained in the preamble discussing 20 CFR 655.103(b). For the reasons described in the discussion of 20 CFR 655.104, this final rule removes the definition of the term *successor in interest* from 29 CFR 501.3(a) as proposed. Additionally, this final rule adopts new § 501.3(d) as proposed, defining the term *single employer* to conform to and for the reasons described in the above discussion of 20 CFR 655.103(e).

B. Section 501.4, Discrimination Prohibited

In the NPRM, the Department proposed to revise § 501.4(a) to conform to the changes proposed to 20 CFR 655.135(h) that would expand and strengthen the Department's existing anti-retaliation provisions. The reasons for this proposal are described fully in the preamble discussion of 20 CFR 655.135(h). The Department did not propose any revisions to § 501.4(b) regarding WHD investigations and enforcement of § 501.4.

For the reasons described in the preamble discussion of the revisions to 20 CFR 655.135(h), this final rule adopts the proposed revisions to 29 CFR 501.4(a) with the same modifications as outlined in the preamble discussion of 20 CFR 655.135(h).

C. Section 501.10, Severability

As set forth in the discussion of proposed 20 CFR 655.190, the Department proposed a new § 501.10 stating that if any provision is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, or stayed pending further agency action, the provision will be construed so as to continue to give the maximum effect to the provision permitted by law. The proposed regulatory text further stated that where such holding is one of total invalidity or unenforceability, the provision will be severable from the corresponding part and will not affect the remainder thereof.

As the NPRM explained, the Department believes that a severability provision is appropriate because each provision within the H–2A regulations can operate independently from one another, including where the Department proposed multiple methods to strengthen worker protections and to enhance the Department's capabilities to conduct enforcement and monitor compliance. The NPRM also emphasized that it is important to the Department and the regulated community that the H–2A program continue to operate consistent with the expectations of employers and workers, even if a portion of the H–2A regulations is held to be invalid or unenforceable.

For the reasons described in the preamble discussion of the revisions to 20 CFR 655.190, the Department adopts the severability provision at § 501.10 with minor modifications.

D. Sections 501.20, 501.33, 501.42, Debarment and Revocation

The Department proposed revisions to WHD's debarment and revocation regulations at §§ 501.20, 501.33, and 501.42, to align with the proposed changes to ETA's revocation and debarment regulations at 20 CFR 655.181 and 655.182. These proposals and the Department's final determinations in this rule are described briefly here, and are described fully in the section-by-section analysis of 20 CFR part 655, subpart B.

1. Timeline To Appeal

For consistency with and conformance to the Department's

proposal under 20 CFR 655.182 to expedite debarment processing, the Department proposed to shorten the timeframe to appeal any WHD determination seeking debarment from 30 calendar days to 14 calendar days. In shortening the appeal timeframes for matters involving debarments, the Department sought to bolster program integrity and help protect workers from further harm they might suffer as a result of substantial violations.

The Department received comments both in favor of and opposed to this proposal. The comments supporting the proposal expressed general agreement with the provision to enhance integrity measures in the H–2A program but did not offer any specific explanation for their support of this proposal.

The Department received several comments from agricultural employers, agricultural associations, agents, think tanks, and others opposing this proposal. Commenters in opposition expressed concern that this shortened appeals period would not allow adequate time for employers to secure counsel and gather rebuttal evidence. Many of these same commenters stated that during busier times of the year, some agricultural employers may not be available to receive or respond to a notice in a timely fashion. Some commenters raised concerns that shortening the timeline may impact employers' due process rights. In light of these challenges and the severe implications of debarment, commenters urged the Department to abandon this proposal. Other commenters recommended that the Department consider implementing a staggered approach, whereby employers would be required to request a hearing within 14 calendar days of receiving notice but, under 20 CFR 655.182, would have a full 30 calendar days from the date of the notice to gather evidence and present a rebuttal. Additionally, one commenter suggested that, as an alternative to a reduction in appeal times for all of WHD's determinations seeking debarment, the Department consider reducing the amount of time an employer has to respond to a notice only for certain egregious cases, such as those involving forced labor, trafficking, or other criminal violations.

After consideration of the comments received, the Department will not make this change to the appeals process at this time and will not finalize the proposal. As discussed in the preamble to 20 CFR 655.182, the Department is sensitive to commenters' assertions that some agricultural employers may face challenges in receiving and responding to notices of debarment within the proposed expedited timeline. The Department is committed to ensuring that respondents have an adequate opportunity to prepare and present appeals and is mindful of the need to balance this commitment with its interest in streamlining the debarment process. Therefore, this final rule retains the 30-day appeals period for all WHD determinations, including those determinations that include a notice of debarment.

2. Passport Withholding

The Department proposed adding a new paragraph (o) to § 655.135 to better protect workers from potential labor trafficking by directly prohibiting an employer from confiscating a worker's passport, visa, or other immigration or government identification documents. The Department also proposed to include the failure to comply with this prohibition among the violations that may subject an employer to debarment under § 655.182 and 29 CFR 501.20. As explained fully in the preamble discussion of new 20 CFR 655.135(o), the Department received numerous comments in response to its proposal to directly prohibit an employer from confiscating a worker's passport, the vast majority of which were in support of the proposal. For the reasons set forth in the preamble discussion of new 20 CFR 655.135(o), the Department adopts this provision as proposed, and includes a violation of the new § 655.135(o) as a violation for which the Department may seek debarment under § 655.182 and 29 CFR 501.20.

3. Successors in Interest

The Department proposed revisions to existing § 501.20(a) and (b) to conform to proposed 20 CFR 655.104 and 655.182 regarding the effect of debarment on successors in interest. The Department also proposed a new § 501.20(j). As explained fully in the preamble discussion of new 20 CFR 655.104, the Department received several comments both for and against its proposals relating to successors in interest, including the proposed new § 501.20(j). For the reasons set forth in the preamble discussion of new 20 CFR 655.104, the Department adopts the proposed revisions to 29 CFR 501.20(a) and (b), and new paragraph (j), as proposed. Under this final rule, a WHD debarment of an employer, agent, or attorney applies to any successor in interest to that debarred entity, and WHD need not issue a new notice of debarment to a successor in interest to a debarred employer, agent, or attorney. However, as reflected in new § 501.20(j), WHD is permitted, but not required, to identify any known successor(s) in interest in a notice of debarment issued to an employer, agent, or attorney.

E. Section 501.33, Request for Hearing

As the Department explained in the NPRM, the current regulations at 29 CFR 501.33(b) provide that the party requesting a hearing before the OALJ must ''[s]pecify the issue or issues stated in the notice of determination giving rise to such request'' and ''[s]tate the specific reason or reasons the person requesting the hearing believes such determination is in error.'' 29 CFR 501.33(b)(2) and (3). Despite these provisions, parties frequently attempt to raise new issues at later stages of proceedings, whether before the OALJ, the ARB, or a Federal court, that were not raised in the party's request for a hearing. Under relevant case law, however, issue exhaustion requirements are applicable and appropriate under the H–2A administrative review procedures and, as a result, issues not raised in a request for hearing to the OALJ may be deemed waived. *See* 88 FR at 63809. Under the current regulatory framework, the Department and courts expend significant resources considering or defending against newly raised issues that are ultimately deemed to have been waived. Similarly, parties have asserted that they lacked notice that issues not raised in a request for hearing before the OALJ may be deemed waived.

Accordingly, the Department proposed to revise § 501.33(b)(2) to state that any issue not raised in a party's request for a hearing before the OALJ ''ordinarily will be deemed waived'' in any further proceedings. The proposed revisions were intended to clarify that issue exhaustion requirements apply to H–2A enforcement proceedings, to better inform parties of the potential consequences of failing to raise an issue in a request for review, and to better preserve agency and judicial resources. The proposed language was modeled on similar provisions in OSHA's whistleblower regulations governing the procedures for administrative review of OSHA's findings in those contexts. *See, e.g.,* 29 CFR 1982.110(a).

The Department received only one comment on this specific proposal, from an H–2A agent, másLabor. MásLabor acknowledged that ''[t]he Department may impose reasonable limitations to avoid expending significant issues or preserving judicial resources'' but ''urge[d] the Department to reconsider'' the proposal to allow for some mechanism by which parties may raise new issues after the filing of an initial request for hearing, consistent with

principles of due process, fairness, and equity.

The Department adopts the proposed revisions to § 501.33(b)(2) with one modification to clarify the appropriate standard for issue exhaustion under these regulations. As explained in the NPRM, issue exhaustion requirements already are applicable and appropriate under the H–2A administrative review procedures. *See WHD* v. *Sun Valley Orchards, LLC,* ARB No. 2020–018, 2021 WL 2407468, at *7 (ARB May 27, 2021), *aff'd sub nom. Sun Valley Orchards, LLC* v. *Dep't of Labor,* No. 1:21–cv–16625, 2023 WL 4784204 (D.N.J. July 27, 2023), *appeal filed* No. 23–2608 (3d Cir. Sept. 5, 2023); *In re Sandra Lee Bart,* ARB No. 2018–0004, 2020 WL 5902444, at *4 (ARB Sept. 22, 2020); *see also Carr* v. *Saul,* 141 S. Ct. 1352, 1358 (2021) (''Typically, issue-exhaustion rules are creatures of statute or regulation'' but where the ''regulations are silent, . . . courts decide whether to require issue exhaustion based on an analogy to the rule that appellate courts will not consider arguments not raised before trial courts.'') (quotation omitted). Absent a statutory or regulatory mandate that issues not exhausted will or must be deemed waived, however, reviewing tribunals regularly exercise discretion to determine whether ''exceptional'' or ''special'' circumstances permit consideration of a newly raised issue. *See Ross* v. *Blake,* 578 U.S. 632, 639 (2016) (comparing mandatory and discretionary issue exhaustion requirements). Likewise, under OSHA's whistleblower regulations governing issue exhaustion, the ARB regularly considers whether to permit consideration of newly raised issues under special circumstances. *See, e.g., Williams* v. *QVC, Inc.,* ARB No. 2020–0019, 2023 WL 1927097, at *4 n.43 (ARB Jan. 17, 2023) (construing pro se litigant's petition for review broadly to include issues not specified in petition despite issue exhaustion requirements under parallel provision at 29 CFR 1980.110); *Furland* v. *Am. Airlines, Inc.,* ARB Nos. 09–102, 10–130, 2011 WL 3413364, at *7 n.5 (ARB July 27, 2011) (ARB retained authority under parallel regulation at 29 CFR 1979.110(a) to hear issue on appeal not specifically listed in petition for review but consistently advanced before ALJ).

In the NPRM, the Department intended to make explicit the existing application of discretionary issue exhaustion principles to H–2A enforcement proceedings. 88 FR at 63809. This revision was intended to better inform parties of the potential consequences of failing to include issues for review in a request for hearing, and thus ultimately to reduce the instances in which parties attempt to raise new issues in later stages of the proceedings. *Id.* By use of the language ''ordinarily will be deemed waived'' in the NPRM, the Department intended to retain the discretion currently afforded reviewing tribunals in determining whether a particular issue may be raised at a later stage in the proceeding, consistent with the principles of due process and equity raised in the comment. The Department did not intend to propose a mandatory waiver rule. However, considering másLabor's comment, the Department recognizes it may have suggested otherwise in the NPRM and therefore replaces the phrase ''ordinarily will'' with ''may'' in this final rule. The revised language better reflects the discretionary nature of issue exhaustion under these regulations, whereby waiver is the general rule, though tribunals, in their discretion, may consider whether ''special'' or ''exceptional'' circumstances exist. *Ross,* 578 U.S. at 640. In addition, the Department notes that this revised language is more consistent with the language used in OSHA's more recently promulgated whistleblower regulations, which OSHA adopted to address similar concerns as raised here by másLabor. *See, e.g.,* 89 FR. 69115 (Nov. 9, 2015); 77 FR 40494 (July 10, 2012).

VIII. Administrative Information

A. Executive Order 12866: Regulatory Planning and Review, Executive Order 14094: Modernizing Regulatory Review, and Executive Order 13563: Improving Regulation and Regulatory Review

Under Executive Order (E.O.) 12866, OMB's Office of Information and Regulatory Affairs (OIRA) determines whether a regulatory action is significant and, therefore, subject to the requirements of the Executive Order and review by OMB. Regulatory Planning and Review, 58 FR 51735 (Oct. 4, 1993). Section 3(f) of E.O. 12866, as amended by E.O. 14094, defines a ''significant regulatory action'' as an action that is likely to result in a rule that: (1) has an annual effect on the economy of $200 million or more, or adversely affects in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, Territorial, or Tribal governments or communities; (2) creates serious inconsistency or otherwise interferes with an action taken or planned by another agency; (3) materially alters the budgetary impacts of entitlement, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or (4) raises legal or policy issues for which centralized review would meaningfully further the President's priorities or the principles set forth in the Executive Order. Modernizing Regulatory Review, 88 FR 21879, 21879 (Apr. 11, 2023). OIRA has reviewed this rule and designated it a significant regulatory action under E.O. 12866. The Secretary of Homeland Security, in consultation with the Secretary of Labor and Secretary of Agriculture, has approved this rule consistent with section 301(e) of the Immigration Reform and Control Act of 1986, 8 U.S.C. 1188 note.[111]

E.O. 13563 directs agencies to, among other things, propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs; the regulation is tailored to impose the least burden on society, consistent with achieving the regulatory objectives; and in choosing among alternative regulatory approaches, the agency has selected those approaches that maximize net benefits. Improving Regulation and Regulatory Review, 76 FR 3821, 3821 (Jan. 21, 2011). E.O. 13563 recognizes that some costs and benefits are difficult to quantify and provides that, where appropriate and permitted by law, agencies may consider and discuss qualitatively values that are difficult or impossible to quantify, including equity, human dignity, fairness, and distributive impacts. *Id.*

Outline of the Analysis

Section VIII.A.1 describes significant issues raised in the public comments. Section VIII.A.2 describes the need for the rule. Section VIII.A.3 describes the process used to estimate the costs of the rule and the general inputs used, such as wages and number of affected entities. Section VIII.A.4 explains how the provisions of the rule will result in quantified costs and transfer payments and presents the calculations the Department used to estimate them. In addition, Section VIII.A.4 describes the unquantified transfer payments and unquantified cost savings of the rule and a description of qualitative benefits. Section VIII.A.5 summarizes the estimated first-year and 10-year total and annualized costs and transfer payments of the rule. Section VIII.A.6 describes the regulatory alternatives that were considered during the development of the rule.

[111] Although this provision vests approval authority in the ''Attorney General,'' the Secretary of Homeland Security now may exercise this authority. *See* 6 U.S.C. 202(3)–(4), 251, 271(b), 291, 551(d)(2), 557; 8 U.S.C. 1103(c) (2000).

Summary of the Analysis

The Department estimates that the rule will result in costs and transfer payments. As shown in Exhibit 1, the rule is expected to have an annualized quantifiable cost of $1.96 million and a total 10-year quantifiable cost of $13.74 million, each at a discount rate of 7 percent.[112] The rule is estimated to result in annualized quantifiable transfer payments from H–2A employers to H–2A employees of $12.66 million and total 10-year transfer payments of $88.92 million at a discount rate of 7 percent.[113]

EXHIBIT 1—ESTIMATED MONETIZED COSTS AND TRANSFER PAYMENTS OF THE FINAL RULE

[2022 $millions]

	Costs	Transfer payments
Undiscounted 10-Year Total	$18.35	$123.42
10-Year Total with a Discount Rate of 3%	16.08	106.46
10-Year Total with a Discount Rate of 7%	13.74	88.92
10-Year Average	1.84	12.34
Annualized at a Discount Rate of 3%	1.89	12.48
Annualized with at a Discount Rate of 7%	1.96	12.66

The total quantifiable cost of the rule is associated with rule familiarization and the provisions requiring additional information disclosure on the H–2A Applications. Transfer payments are the results of the elimination of the effective date delay for updated AEWRs. See the ''Costs'' and ''Transfer Payments'' subsections of Section VIII.A.4 (Subject-by-Subject Analysis) below for a detailed explanation.

The Department was unable to quantify some costs, transfer payments, cost savings, and benefits of the rule. Unquantified costs include costs to employers to reinstall or repair seat belts in vehicles used for worker transportation to comply with this final rule and costs to newly included entities whose ES services can be discontinued. Unquantified transfer payments include compensation to workers under § 655.175(b)(2)(i)–(ii) in cases where the start of work is delayed without sufficient notice and clarifying that applicable prevailing piece rates and other non-hourly wage rates should be included in the job order where such rates have the potential to be the highest wage rate of those listed at § 655.120(a), § 653.501(c), or § 655.210(g). Unquantified cost savings include the Department's ability to deny labor certification applications filed by or on behalf of successors in interest to debarred employers, agents, or attorneys. Unquantified benefits include better protection from inappropriate termination, protection for worker advocacy, reduction in risk of injury during employer-sponsored transportation, and reduction in improper holding of passports or other immigration documents. The Department describes them qualitatively in Section VIII.A.4 (Subject-by-Subject Analysis).

1. Significant Issues Raised in Public Comments

Several commenters submitted feedback in response to the NPRM's regulatory impact analysis or otherwise addressing the potential impact of this rulemaking on affected entities. Commenters, including IFPA, GFVGA, and the Michigan Asparagus Advisory Board, contended that the Department did not quantify benefits. As explained in Section VIII.A.4.d, the Department considered various benefits of this rule, but due to data limitations, the Department was not able to quantitatively estimate the benefits. The commenters that requested additional robust benefit quantification did not provide any information or data that would help the Department quantitatively assess the benefits of this rule, either. As a result, the Department qualitatively discusses the benefits, but nonetheless believes that the benefits outweigh the costs of this rule.

Several commenters, such as trade associations and individual employers, submitted feedback that the estimate of the time burden for rule familiarization was an underestimate. As explained in Section VIII.A.4.a, the Department considered these comments and has increased the time burden associated with rule familiarization cost to 4 hours on average. The Department used the words per minute (WPM) approach to estimate the time to read and understand the regulatory text by assuming a reading speed of 238 words per minute.[114] Because the regulatory text contains over 12,500 words, the Department estimates that employers will need about 1 hour to read and understand this text.[115] The Department assumes that not all employers will read the entire final rule preamble, although some may review portions of it in an effort to better understand particular provisions. As such, the Department quadrupled the time required to read the regulatory text to account for the fact that some employers will read some sections of the preamble, as relevant, in addition to the regulatory text, alongside compliance assistance materials provided by the Department.

Several commenters, including trade associations and individual employers, submitted feedback that the time burden costs of the rule were underestimated, including those related to wage costs, labor contractors, rule familiarization, and application additions. The Department notes that, while some H–2A employers may not directly employ an HR specialist to conduct these tasks, many use HR service providers for consulting on regulatory and HR matters and, therefore, using the wage rate for an HR specialist is appropriate. As explained in Section VIII.A.4.a, the Department considered all of the comments received on this cost component and, as discussed above, revised the time burden associated with rule familiarization cost.

These commenters also stated that the time burden estimate of the provisions requiring additional information disclosure on the H–2A Applications

[112] The rule will have an annualized quantifiable cost of $1.89 million and a total 10-year quantifiable cost of $16.08 million at a discount rate of 3 percent in 2022 dollars.

[113] The rule will have annualized quantifiable transfer payments from H–2A employers to H–2A employees of $12.48 million and total 10-year transfer payments of $106.46 million at a discount rate of 3 percent in 2022 dollars.

[114] Marc Brysbaert, *How Many Words Do We Read Per Minute? A Review and Meta-Analysis of Reading Rate,* PsyArXiv (Apr. 12, 2019), *https://doi.org/10.31234/osf.io/xynwg.* We use the average speed for silent reading of English nonfiction by adults.

[115] 12,500 ÷ 238 = 53 minutes, and the Department used 1 hour for employers to read and understand the regulatory text.

was underestimated but did not provide any information or data that would help the Department assess how to modify the time costs of the provisions. The Department did not change its estimate of time burden for these provisions because most of the information required should be readily available to employers and they should likely maintain and update them in their personnel records system or files. Given the data available and the lack of additional information from commenters, the Department did its best to quantify costs, transfers, and benefits. For costs, transfers, and benefits that were not quantifiable, the Department provided qualitative discussions and sought public comments and input. The Department believes that these time burden estimates are appropriate because they represent an average impact across all impacted employers.

American Farm Bureau Federation submitted feedback that the estimated growth rates regarding the H–2A program were low, which reduced the estimated costs of the rule. The Department has updated the growth rate analyses with 2022 H–2A certification data, and the corresponding estimates of H–2A program growth metrics have increased. The Department believes that these growth rate estimates are appropriate because they utilize the most recently available data on the H–2A program.

NHC submitted feedback that the estimated time burdens of the rule for employers were underestimated because they did not consider time costs of revising payroll systems, worker productivity tracking, productivity loss from third-party participation in disciplinary meetings, losses due to more injured workers, and costs of retrofitting employer transportation. The trade association stated that employee contract changes would cost a large grower more than 275 hours per year. The Department quantifies average costs, transfers, and benefits for all impacted entities, not just large employers. For costs and benefits that were not quantifiable, the Department provided qualitative discussions and sought public comments and input. Neither this commenter nor other commenters, however, provided any information or data that would help the Department better quantitatively assess the relevant costs.

Wafla submitted feedback that the estimated time burden for application additions, specifically the additional disciplinary steps, was underestimated. However, it did not provide any information or data that would help the Department better quantitatively assess the average time costs for all impacted entities. The Department contends that the progressive disciplinary process to terminate H–2A workers for cause may not occur for every employer and, as a result, has sought to quantify the average time burden for application additions across all employers using available data.

2. Need for Regulation

The Department adopts provisions in this final rule that will strengthen protections for agricultural workers and enhance the Department's enforcement capabilities against fraud and program violations. The Department has determined that these revisions will help prevent exploitation and abuse of agricultural workers and ensure that unscrupulous employers do not gain from their violations or contribute to economic and workforce instability by circumventing the law. It is the policy of the Department to maintain robust protections for workers and to vigorously enforce all laws within its jurisdiction governing the administration and enforcement of nonimmigrant visa programs. As set forth above in detail in sections V through VII, the Department has determined through program experience, recent litigation, comments on prior rulemaking, and reports from various workers' rights advocacy organizations that the provisions in this final rule are necessary to strengthen protections for agricultural workers; ensure that employers, agents, attorneys, and labor recruiters comply with the law; and enhance the Department's ability to monitor compliance and investigate and pursue remedies from program violators. For example, in 421 investigations of agricultural employers using the H–2A program in FY 2022, the Department assessed more than $3.6 million in back wages and more than $6.3 million in civil money penalties. Evidence revealed in recent Department investigations suggests that H–2A workers continue to be vulnerable to human trafficking.[116] H–2A workers also continue to be vulnerable to retaliation when asserting their rights or engaging in self-advocacy.[117] Meanwhile, recent vehicle crashes involving agricultural workers demonstrate the need for transportation safety reform.[118]

The rule aims to address some of the comments that were beyond the scope of the 2022 H–2A Proposed Rule and concerns expressed by workers' rights advocacy groups, labor unions, and organizations that combat human trafficking. It also seeks to respond to recent court decisions and program experience indicating a need to enhance the Department's ability to enforce regulations related to foreign labor recruitment, to improve accountability for successors in interest and employers who use various methods to attempt to evade the law and regulatory requirements, and to enhance worker protections for a vulnerable workforce, as explained further in the section-by-section discussion above. The Department has also made adjustments to the proposed regulations after consideration of the comments received, including declining to adopt the proposals to reduce submission periods for appeal requests for OFLC and WHD debarment matters and submittal of rebuttal evidence to OFLC, to require employers to provide labor organizations with employee contact information and access to employer-furnished housing, and to require employers to attest to whether they will bargain in good faith over the terms of a proposed labor neutrality agreement.

The Department intends for this rulemaking to better protect the rights,

health, and safety of agricultural workers as well as to prevent adverse effect on workers similarly employed in the United States and to safeguard the integrity of the H–2A program, while continuing to ensure that responsible employers have access to willing and available agricultural workers and are not unfairly disadvantaged by employers that exploit workers and attempt to evade the law.

3. Analysis Considerations

The Department estimated the costs and transfer payments of this final rule relative to the existing baseline (*i.e.,* the current practices for complying, at a minimum, with the H–2A program as currently codified at 20 CFR part 655, subpart B, and 29 CFR part 501).

In accordance with the regulatory analysis guidance articulated in OMB's Circular A–4 [119] and consistent with the Department's practices in previous rulemakings, this regulatory analysis focuses on the likely consequences of the rule (*i.e.,* costs, benefits, and transfer payments that accrue to entities affected). The analysis covers 10 years (from 2025 through 2034) to ensure it captures major costs, benefits, and transfer payments that accrue over time. The Department expresses all quantifiable impacts in 2022 dollars and uses discount rates of 3 and 7 percent, pursuant to Circular A–4 published on October 9, 2003.

Exhibit 2 presents the number of affected entities that are expected to be impacted by this final rule.[120] The average number of affected entities is calculated using OFLC H–2A certification data from FY 2016 through FY 2022. Exhibit 3 presents the number of workers who are expected to be impacted by this final rule. The exhibit contains the number of certified H–2A workers from FY 2012 through FY 2022.

EXHIBIT 2—NUMBER OF UNIQUE EMPLOYERS BY YEAR

FY	Number
2016	6,713
2017	7,187
2018	7,902
2019	8,391
2020	7,785
2021	9,442
2022	10,571
Average	8,284

EXHIBIT 3—HISTORICAL H–2A PROGRAM DATA

FY	Workers certified
2012	85,248
2013	98,814
2014	116,689
2015	139,725
2016	165,741
2017	199,924
2018	242,853
2019	258,446
2020	275,430
2021	317,619
2022	371,619

a. Growth Rate

The Department estimated growth rates for certified H–2A workers based on program data presented in Exhibit 3 and estimated growth rates for unique H–2A employers based on program data presented in Exhibit 2.

The compound annual growth rate (CAGR) for certified H–2A workers using the program data in Exhibit 3 is calculated as 15.9 percent. This growth rate, applied to the analysis timeframe of 2025 to 2034, would result in more H–2A certified workers than projected employment of workers in the relevant H–2A SOC codes by BLS.[121] Therefore, to estimate realistic growth rates for the analysis, the Department applied the growth rate for unique employers, assuming the growth rate for unique employers and workers should be similar. The Department used FY 2016–2022 data on unique employers, where the use of FY 2016 as the first year is due to data availability on calculated unique employers. The Department calculated a CAGR based on FY 2016 unique employers (6,713) and the FY 2022 unique employers (10,571). The result is an estimate of 7.9 percent.[122]

The estimated annual growth rates for unique employers (7.9 percent) and workers (7.9 percent) were applied to the estimated costs and transfers of this final rule to forecast participation in the H–2A program.[123]

b. Compensation Rates

In Section VIII.A.4 (Subject-by-Subject Analysis), the Department presents the costs, including labor, associated with the implementation of the provisions of the rule. Exhibit 4 presents the hourly compensation rates for the occupational categories expected to experience a change in the number of hours necessary to comply with the rule. The Department used the mean hourly wage rate for a private sector HR Specialist (SOC code 13–1701).[124] Wage rates are adjusted to reflect total compensation, which includes nonwage factors such as overhead and fringe benefits (*e.g.,* health and retirement benefits). We use an overhead rate of 17 percent [125] and a fringe benefits rate based on the ratio of average total compensation to average wages and salaries in 2022.[126] We then multiply the loaded wage factor by the wage rate to calculate an hourly compensation rate. The Department used the hourly compensation rates presented in Exhibit 4 throughout this analysis to estimate the labor costs for each provision.

[119] OMB Circular No. A–4, *Regulatory Analysis* (2023).

[120] OFLC, *Performance Data, https://www.dol.gov/agencies/eta/foreign-labor/performance* (last visited Feb. 8, 2024).

[121] Comparing BLS 2032 projections for combined agricultural workers (SOC 45–2000) with a 14.8-percent growth rate of H–2A workers yields estimated H–2A workers about 178 percent greater than BLS 2032 projections. The projected workers for the agricultural sector were obtained from BLS's Occupational Projections and Worker Characteristics, *https://www.bls.gov/emp/tables/occupational-projections-and-characteristics.htm.*

[122] Calculation: $7.9\% = (10{,}571 \div 6{,}713)^{(1 \div 6)} - 1$.

[123] Proposed forecasted estimates of H–2A employer participation: 11,419 in 2023; 12,335 in 2024; 13,325 in 2025; 14,394 in 2026; 15,548 in 2027; 16,796 in 2028; 18,143 in 2029; 19,599 in 2030; 21,171 in 2031; and 22,869 in 2032.

EXHIBIT 4—COMPENSATION RATES

[2022 dollars]

Position	Grade level	Base hourly wage rate	Loaded wage factor	Overhead costs	Hourly compensation rate
	(a)	(b)	(c)	(d)	(d = a + b + c)
HR Specialist	N/A	$35.13	$14.75 ($35.13 × 0.42)	$5.97 ($35.13 × 0.17)	$55.79

4. Subject-by-Subject Analysis

The Department's analysis below covers the estimated costs, transfer payments, and qualitative benefits of this final rule. In accordance with Circular A–4, the Department considers transfer payments as payments from one group to another that do not affect total resources available to society. This final rule estimated the cost of rule familiarization and application additions and transfer payments associated with the elimination of the delayed effective date for updated AEWRs.

a. Costs

The following section describes the quantified and unquantified costs of this final rule.

i. Quantified Costs

The following sections describe the quantified costs of rule familiarization and the provisions requiring additional information disclosure on the H–2A Application.

A. Rule Familiarization

When the rule takes effect, H–2A employers will need to familiarize themselves with the new regulations. Consequently, this will impose a one-time cost in the first year. New employers in each subsequent year will need to familiarize themselves with current regulations regardless of this final rule.

To estimate the cost of rule familiarization, the Department applied the growth rate of H–2A employers (7.9 percent) to the number of unique H–2A employers (8,284) to determine the number of unique H–2A applicants impacted in the first year. For subsequent years, the number of new employers was estimated by multiplying the previous year's employer count by the growth rate of H–2A employers (7.9 percent) and then subtracting that value from the previous year's total employer count. Exhibit 5 details the number of new employers for each year of the analysis.

EXHIBIT 5—NUMBER OF NEW EMPLOYERS BY YEAR

FY	Total employers	New employers
2025	8,938	N/A
2026	9,645	706
2027	10,406	762
2028	11,229	822
2029	12,116	887
2030	13,073	957
2031	14,106	1,033
2032	15,220	1,114
2033	16,422	1,202
2034	17,720	1,297

The number of unique H–2A employers in the first year (8,947), and the new H–2A employers in subsequent years (see Exhibit 5), was multiplied by the estimated amount of time required to review the rule (4 hours). This number was then multiplied by the hourly compensation rate of an HR specialist ($35.13 per hour) and the loaded wage factor and the overhead rate for the private sector (1.59). This calculation results in a total undiscounted cost of $3,954,528 over the 10 years after the rule takes effect. The annualized cost over the 10-year period is $429,662 and $479,217 at discount rates of 3 and 7 percent, respectively.

B. Additional Information Disclosure on the H–2A Application

Once the rule takes effect, H–2A employers will need to submit additional information on the H–2A Application, which will impose a yearly cost as the time associated with filling out this information is required for every application for certification. The additional information includes the names, addresses, business phone numbers, and dates of birth for the owner(s) of each employer, each operator of the place(s) of employment, and all managers and supervisors of workers employed under the H–2A Application; DBA information; and information about the identity and location of any foreign labor recruiter the employer engaged, directly or indirectly, in international recruitment, as well as all persons and entities hired by or working for the recruiter or agent, and any of the agents or employees of those persons and entities.

To estimate the yearly cost of the application additions, the Department applied the growth rate of H–2A employers (7.9 percent) to the current number of unique certified H–2A employers (8,284) to determine the number of unique H–2A employers in the first year (8,938). The number of unique certified H–2A employers in the first year is then multiplied by the growth rate again to determine the number of unique certified H–2A employers in the second year. This process is repeated each year to determine the total number of unique certified H–2A employers every year during the study period. Since it is assumed that only a single HR specialist per employer will incur the additional time investment, the estimated total yearly cost can be calculated by multiplying the total number of unique certified H–2A employers (8,938) by the HR specialist hourly wage rate ($35.13 per hour), the loaded wage factor and the overhead rate for the private sector (1.59), and the estimated additional time taken to gather and enter the information on a yearly basis (2 hours on average). Lastly, this value is multiplied by the growth rate of unique employers (7.9 percent) to the *n*th power, with *n* being equal to the period year. The result is $999,543 in the first year, an undiscounted average cost over a 10-year period of $1,439,694, and discounted annualized costs of $1,455,791, and $1,476,738 at rates of 3 and 7 percent, respectively.

ii. Unquantified Costs

A. Transportation: Seat Belts for Drivers and Passengers

As part of this final rule, employers will have to ensure seat belts are provided for drivers and passengers in transportation vehicles used to transport H–2A and corresponding workers that were required by U.S. DOT's FMVSS to be manufactured with seat belts. This could impose both a one-time and annual cost to those employers who had previously lawfully modified or removed seat belts in such vehicles and

would be required to reinstall or repair seat belts to comply with this final rule through the cost of reinstalling or repairing the necessary seat belts and the decreased fuel efficiency of transportation vehicles caused by the additional weight of the seat belts. The Department estimates the cost of installing a driver's seat belt to be $26.60 per seat belt and the cost of installing a passenger seat belt to be $17.44 per seat belt.[127] The Department does not have data to estimate the number of seat belts to be reinstalled or repaired, or (in the alternative) vehicles that would need to be purchased, to provide seat belts for drivers and passengers in the above scenario. The Department requested public comments on data and information that would support estimating the cost of reinstalling or repairing seat belts but received no responses.

B. Discontinuation of Services to Employers by the ES System

The final rule clarifies and expands the scope of entities whose ES services can be discontinued to include agents, farm labor contractors, joint employers, and successors in interest. Because the final rule expands the scope of applicable entities that may experience discontinuation of services, the Department does not have preexisting data available on costs to those entities, and the Department is not able to quantify potential increased costs for them. However, the Department recognizes that some commenters contend that employers might incur costs related to delays in processing clearance orders, including administrative costs, legal fees, and productivity losses. The Department cannot quantify these specific costs because each employer's circumstances will be unique. Additionally, it is possible that the number of discontinuation-of-services actions SWAs initiate might increase due to the changes in the final rule that clarify when and how the procedures apply. However, because the procedures were not frequently used previously and because the number of actions will depend on actual employer compliance, it is not possible to estimate the related potential burden.

b. Unquantified Cost Savings

The following section describes the unquantified cost savings of this final rule.

i. Successors in Interest

Once this final rule takes effect, the Department will be able to deny labor certification applications filed by or on behalf of successors in interest to debarred employers, agents, or attorneys. Currently, the Department must first issue a separate notice of debarment to the successor in interest, and go through a lengthy administrative hearing and review process, before it may deny an application filed by or on behalf of a successor. The rule will, therefore, result in cost savings to the Department from not having to go through the process to debar successors in interest but instead applying the predecessor's debarment to the successor. The Department lacks detailed data on the length of time necessary to enter a proposed order of debarment against successors under the current regulations, as well as the annual number of successor debarments, and as a result is unable to accurately quantify this cost savings.[128]

c. Transfer Payments

The following section describes the transfer payments of this final rule.

i. Quantified Transfer Payments

This section discusses the quantifiable transfer payments related to the elimination of the 2-week effective date delay for AEWR publication. The Department considers transfers as payments from one group to another that do not affect total resources available to society. The transfers measured in this analysis are wage transfers from U.S. employers to H–2A workers. H–2A workers are migrant workers who will spend some of their earnings on consumption goods in the U.S. economy but likely send a large fraction of their earnings to their home countries.[129] Therefore, the Department considers the wage transfers in the analysis as transfer payments within the global economic system.

A. Elimination of the effective date delay for updated AEWRs

Currently, the Department publishes the AEWR as soon as data are available, typically in the middle of December for AEWRs based on FLS data.[130] There is then a 2-week delay until the AEWR is effective, typically January 1st of the following year. Once the rule takes effect, the 2-week delay until the AEWR is effective will be removed and the AEWR will be effective immediately upon publication in the **Federal Register**. Therefore, employers that employ workers during the 2-week period from mid-December to early January will see a transfer to employees

[127] These costs were calculated by inflation-adjusting the 2008 cost of types of seat belts listed in NHTSA, *Final Regulatory Impact Analysis: FMVSS No. 208, Lap/Shoulder Belts for All Over-The-Road Buses, and Other Buses with GVWRs Greater Than 11,793 kg (26,000 lb)* (Sept. 2013), *https://www.regulations.gov/document/NHTSA-2013-0121-0002.*

[128] The Department lacks such information because each debarment action is unique and the facts of each situation dictate how long a debarment action will take. At the time of drafting this final rule, there are currently 35 debarred H–2A entities and 59 debarred H–2B entities, which, as a result of the cross-program debarment provisions at 20 CFR 655.73(i), also debar those entities from filing applications in any other DOL-administered immigration programs such as the H–2A program. Any of those entities could potentially file one or more applications each year for one or more successor in interest employers or as successor in interest agents or attorneys or both. Due to the variables mentioned above, the Department is unable to estimate how many such filings may be submitted in any given period of time nor to estimate how complex each debarment action would be if the Department were to seek debarment against the successor.

[129] Elimination of the effective date delay for updated AEWRs will also result in wage transfers from U.S. employers to workers in corresponding employment, but the Department is not able to quantify this transfer due to the lack of data for workers in corresponding employment and their wages. In particular, the Department does not collect or possess sufficient information about the number of corresponding workers affected and their wage payment structures to reasonably measure the transfers to corresponding workers. Employers are not required to provide the Department, on any application or report, the estimated or actual total number of workers in corresponding employment. Although each employer, as a condition of being granted a temporary agricultural labor certification, must provide the Department with a report of its initial recruitment efforts for U.S. workers, including the name and contact information of each U.S. worker who applied or was referred to the job, such information typically reflects only a very small portion of the total recruitment period, which runs through 50 percent of the certified work contract period, and does not account for any other workers who may be considered in corresponding employment and already working for the employer. Because the report of initial recruitment efforts for U.S. workers only captures information from a limited portion of the recruitment period and does not account for workers already employed by the employer who may be in corresponding employment, the Department is not able to draw on this information to meaningfully assess the total number of corresponding workers affected or their wage payment structures, without which the Department is unable to reasonably measure the transfers to corresponding workers. The Department sought public comment on how these wage transfer impacts can be calculated but received no comments.

[130] New AEWRs based on OEWS data currently become effective on or around July 1st for the small percentage of job opportunities that cannot be encompassed within the SOC codes for AEWRs that are based on the FLS field and livestock workers (combined) data. The use of OEWS data to calculate AEWRs in limited circumstances was the result of a change made under the Department's 2023 AEWR Final Rule. *See* 88 FR 12760, 12764–65 (Feb. 28, 2023). The analysis here is limited to FY 2020 and FY 2021 H–2A certification data, during which period the AEWR was calculated based only on FLS data, and thus, the analysis focuses on the 2-week period from mid-December to early January that is associated with the publication and effective dates of FLS-based AEWRs under current practice.

due to the elimination of the 2-week delay of wage increases from the publication date of updated AEWRs.

To estimate the transfer, the Department first uses FY 2020 and FY 2021 H–2A certification data to calculate the weighted average increase in AEWR from one year to the next.[131] The Department weights the average by the number of workers in each State with employment between December 14th and the end of the year to account for regional differences in employment during December. The result is an average increase in the AEWR by $1.09.[132] The Department then calculates the average number of days worked between December 14th and the end of the year (11.87) using the FY 2020 and FY 2021 H–2A certification data. The Department estimates the average annual number of workers with work during this period using the H–2A certification data (89,208).[133]

The Department determines the total amount of the transfers by multiplying the 2-year weighted AEWR difference for end-of-year employment (1.09), the 2-year average number of days worked between December 14th and the end of year (11.87), the average number of work hours in a day (7.4),[134] and the number of H–2A workers during this period (89,208). To determine the transfers for every year in the 10-year period, the total number of H–2A workers during the period is multiplied by the growth rate of H–2A workers (7.9 percent). The same process is repeated for every year in the period. The total undiscounted average annual transfers associated with this provision is $12,342,109 and the discounted annualized transfers are $12,480,377 and $12,660,319 at discount rates of 3 and 7 percent, respectively. The Department also conducted a sensitivity analysis using the CAGR of 15.9 percent for H–2A workers. The resulting total undiscounted average annual transfers is $18,135,595, and the discounted annualized transfers are $18,037,709 and $17,901,328 at discount rates of 3 and 7 percent, respectively.

ii. Unquantified Transfer Payments

This section discusses the unquantifiable transfer payments related to compensation during a minor delay in the start of work and piece rates.

A. Compensation During a Minor Delay in the Start of Work Under §§ 655.175(b)(2)(ii) and 653.501(c)(5)

Currently, if an employer fails to notify the SWA of a start date change at least 10 days ahead of the originally anticipated date of need, it must offer work hours and pay the first week's wages to each farmworker referred through the ARS who followed the procedure to contact the SWA for updated start date information. If an H–2A employer delays the start of work after workers have departed for the place of employment, the employer must provide housing and subsistence to these workers until work commences. After this final rule takes effect, employers that do not notify both the SWA and the workers at least 10 business days before the anticipated start date will also be required to pay workers the hourly rate for the hours listed on the job order for each day work is delayed for a period of up to 14 calendar days, and, for workers placed on clearance orders via the ARS, will be required to provide housing to placed migrant workers until work commences, and to provide or pay workers all other benefits and expenses described on the clearance order, in addition to wages at the applicable rate, for up to 14 days, or provide alternative work approved on the clearance order, resulting in a transfer from employers to employees. The Department is unable to quantify this transfer because it lacks detailed data on the prevalence of job delays, the number of employees impacted by these delays, and the number of hours impacted by the delays on average, or the number of hours employers must spend contacting employees, and as a result is unable to accurately quantify this transfer.

B. Piece Rates

This final rule clarifies language within 20 CFR 655.120(a) and 655.122(l) to make clear that the employer is required to advertise and pay the highest of the AEWR, prevailing hourly wage or piece rate, CBA rate, Federal or State minimum wage, or any other wage rate the employer intends to pay. The final rule makes analogous changes to 20 CFR 653.501(c) and 655.210–655.211, which govern the required wage rates for non-H–2A (non-criteria) clearance orders and clearance orders for herding and range livestock production occupations, respectively. The Department is unable to quantify these transfers because it lacks data on the frequency of instances when employers will have to pay higher wages as a result of including and considering applicable piece rates or other non-hourly wage rates in job offers. Specifically, from the comments received in response to the substantive proposal, it appears that some employers are already paying the applicable prevailing piece rates to be in compliance with the requirements of 20 CFR 655.120(a) and 655.122(l); in such cases, there would be no transfer. The Department sought public comment on how these wage transfer impacts can be calculated but did not receive comments on this issue.

d. Unquantified Benefits

i. Termination for Cause

This final rule requires that workers only be terminated for cause for failure to comply with employer policies or rules or to satisfactorily perform job duties in accordance with reasonable expectations based on criteria listed in the job offer, and only if the termination was justified and reasonable. The designation of a termination as being for cause strips workers of essential rights to which they would otherwise be entitled—specifically, the three-fourths guarantee, payment for outbound transportation, and, if a U.S. worker, the right to be contacted for re-hire in the following season—and, therefore, it is essential that workers not be deprived of these rights using inconsistent or unfair procedures. This final rule will require fairness in disciplinary and termination proceedings if the termination were to be designated as being for cause, which will prevent workers from being unjustly stripped of certain rights under the H–2A program. The Department

[131] OFLC, *Performance Data, https://www.dol.gov/agencies/eta/foreign-labor/performance* (last visited Feb. 8, 2024).

[132] Because FY 2020 and FY 2021 H–2A certification data do not reflect the wage increases due to the 2023 AEWR Final Rule, as explained in a previous footnote, the transfer payments estimated in the analysis are likely understated in that they may not account for the main change under that rule, namely the limited job opportunities that would be subject to updated AEWRs based on the OEWS data. *See* 88 FR at 12764–65. The 2023 AEWR Final Rule became effective on March 30, 2023, and, therefore, the Department does not have any readily available FY H–2A certification data to estimate wage transfer payments after the publication of the 2023 AEWR Final Rule. The Department, moreover, sought public comment on how these wage transfer impacts can be calculated but received no comments. However, the 2023 AEWR Final Rule explained that the Department anticipates a very limited number of H–2A job opportunities would be subject to the OEWS-based AEWR, as the majority of H–2A job opportunities are and will continue to remain subject to FLS-based AEWRs. *See* 88 FR at 12766, 12799. As such, the Department considers the impacts of the potential underestimation here to be *de minimis* because of the low incidence of job opportunities assigned the OEWS AEWR pursuant to the 2023 AEWR Final Rule.

[133] The Department uses the growth rate of H–2A workers (7.9 percent) to produce proposed forecasted estimates of H–2A workers: 96,247 in 2023; 103,840 in 2024; 112,033 in 2025; 120,873 in 2026; 130,410 in 2027; 140,699 in 2028; 151,800 in 2029; 163,777 in 2030; 176,699 in 2031; and 190,641 in 2032.

[134] The Department analyzed FY 2020 and FY 2021 certification data for end-of-year employers that reported anticipated hours per day, resulting in an average of 7.4 hours per day.

lacks data on the numbers of terminations for cause each year and whether those terminations were justified and reasonable, and the number of hours required by employers to document termination proceedings as defined by this rule.

ii. Protections for Worker Advocacy and Self-Organization

The Department's final rule will provide stronger protections for workers covered by the H–2A program to advocate regarding their working conditions on behalf of themselves and their coworkers and will prevent employers from suppressing this activity. These protections will help prevent adverse effect on the working conditions of similarly employed agricultural workers in the United States and will increase the likelihood of worker advocacy and organizing while protecting those workers from intimidation and retaliation by employers. Worker advocacy organizations may also complement the Department's enforcement efforts in preventing wage-related violations and in ensuring workplace safety and health. In sum, protection for worker advocacy and self-organization provides unquantifiable benefits to workers under the H–2A program.

Although the Department lacks data on how to quantify the benefits of such improved compliance with existing worker protections, the final regulations should increase workers' dignity and safety and should help ensure that workers under the H–2A program can assert their rights without the unique risks associated with retaliation, thus helping to avoid an adverse effect from the H–2A program on similarly employed workers in the United States.

iii. Transportation: Seat Belts for Drivers and Passengers

Once this final rule takes effect, employer-provided transportation will be required to have seat belts available for all workers transported, if those vehicles were required by U.S. DOT's FMVSS to be manufactured with seat belts. Seat belt use reduces the severity of crash-related injuries and deaths. The Department lacks data on the baseline number of crashes, whether those vehicles involved in crashes were equipped with seat belts and the occupants were using seat belts, and subsequent injuries or fatalities involving vehicles transporting H–2A workers, and, therefore, is not able to estimate the benefit from reduced fatalities or injuries.[135] The benefit from reducing even a single fatality or serious injury is significant. The value of a statistical life (VSL) that would measure the benefit of avoiding a fatality is estimated to be $11.8 million.[136] Recent NHTSA reports suggest avoiding injury crashes can be highly beneficial, with estimates that avoiding a critical injury crash is worth $3.8 million (32 percent of a fatality) and avoiding minor injuries is worth $63,000 (0.5 percent of a fatality), respectively.[137]

iv. Protection Against Passport and Other Immigration Document Withholding

To better protect this vulnerable workforce from potential labor trafficking, the Department adopts revisions to flatly prohibit an employer, including through its agents or attorneys, from taking or withholding a worker's passport, visa, or other immigration or identification documents against the worker's wishes, independent of any other requirements under other Federal, State, or local laws, in a new provision at 20 CFR 655.135(o). This new provision will help ensure that H–2A workers are less likely to be subject to labor exploitation and, thus, it safeguards the health, safety, and dignity of those workers and also prevents the depression of working conditions for the local agricultural workforce.

5. Summary of the Analysis

Exhibit 6 summarizes the estimated total costs and transfer payments of this final rule over the 10-year analysis period. The Department estimates the annualized costs of the rule at $1.96 million and the annualized transfer payments (from H–2A employers to employees) at $12.66 million, each at a discount rate of 7 percent. Unquantified transfer payments include the clarified employer obligation to include in the job order applicable prevailing piece rates and other non-hourly wage rates where such rates have the potential to be the highest wage rate of those listed at § 655.120(a), as well as the employer's obligation to compensate workers for a period of up to 14 calendar days where the employer delays the start date and fails to provide at least 10 business days' notice, as required under §§ 655.175(b)(2)(i)-(ii) and 653.501(c)(5). Unquantified cost savings include the Department's ability to deny labor certification applications filed by or on behalf of successors in interest to debarred employers, agents, or attorneys. Unquantified benefits include better protection from inappropriate termination, protection for worker advocacy, reduction in risk of injury during employer-sponsored transportation, reduction in improper holding of passports or immigration documents, and enhanced integrity and enforcement.

[135] BLS reported that 271 of 589 fatal workplace injuries suffered by agricultural workers in 2022 were caused by transportation-related incidents. However, the Department lacks data on the number of fatal workplace injuries that were caused by not wearing a seat belt or the number of vehicles involved in transportation-related incidents that were not equipped with seat belts.

[136] The VSL is used by U.S. DOT to value fatalities associated with vehicle crashes. The VSL is based upon the base year's VSL adjusted for the annual change in the Consumer Price Index. U.S. DOT, *Departmental Guidance on Valuation of a Statistical Life in Economic Analysis* (2021), *https://www.transportation.gov/office-policy/transportation-policy/revised-departmental-guidance-on-valuation-of-a-statistical-life-in-economic-analysis* (last visited Feb. 8, 2024).

[137] These figures are based on MAIS4 (severe) and MAIS1 (minor) injury-per-crash costs estimated by NHTSA in Table 1–9 Summary of Comprehensive Unit Costs. NHTSA, *The Economic and Societal Impact of Motor Vehicle Crashes,* 2019 (Revised) (Feb. 2023), *https://crashstats.nhtsa.dot.gov/Api/Public/ViewPublication/813403.*

EXHIBIT 6—ESTIMATED MONETIZED COSTS AND TRANSFER PAYMENTS OF THE FINAL RULE

[2022 $millions]

	Costs	Transfer payments
2024	$2.99	$8.56
2025	1.24	9.24
2026	1.33	9.97
2027	1.44	10.76
2028	1.55	11.60
2029	1.67	12.52
2030	1.81	13.51
2031	1.95	14.57
2032	2.10	15.72
2033	2.27	16.96
Undiscounted 10-Year Total	18.35	123.42
10-Year Total with a Discount Rate of 3%	16.08	106.46
10-Year Total with a Discount Rate of 7%	13.74	88.92
10-Year Average	1.84	12.34
Annualized with a Discount Rate of 3%	1.89	12.48
Annualized with a Discount Rate of 7%	1.96	12.66

6. Regulatory Alternatives

The Department considered two regulatory alternatives to provisions adopted in this final rule. The Department discusses below the advantages and disadvantages of these regulatory alternatives.

First, the Department considered a regulatory alternative to this final rule's provision in 20 CFR 655.120(b) to make updated AEWRs effective on the date of publication in the **Federal Register**. Under the alternative proposal, the AEWRs would become effective 7 calendar days after publication in the **Federal Register**. This proposal would have been a compromise between the immediate effective date finalized in this rule and the current effective date, which can be as many as 14 calendar days after the Department publishes the updated AEWR in the **Federal Register**. The benefit of the alternative proposal is that it would continue to provide employers a short window of time to adjust payroll or recordkeeping systems or make any other adjustments that may be necessary after the Department's announcement of updated AEWRs, while providing a shorter adjustment window than under the current rule.

However, the Department has determined the disadvantages of a 7-calendar-day implementation period for updated AEWRs outweighed any potential benefits. Although this alternative would require employers to begin paying agricultural workers at least the newly required higher wage within a calendar week of the date the updated AEWRs are published in the **Federal Register**, it would not require the employer to pay the updated AEWR for work performed during the 7-calendar-day delayed implementation period. Further, unlike the up to 14-day period in the current rule, the 7-calendar-day period would not correspond with a typical 2-week pay period; potentially creating more logistical challenges than it avoids. As the Department has explained in prior rulemaking, the duty to pay an updated AEWR during the employment period if it is higher than other required wage sources is not a new employer obligation. The Department recognizes that AEWR adjustments may alter employer budgets, but the Department believes the difference in the impact [138] on budget and payroll planning between the immediate effective date and a 7-day period after publication is outweighed by the benefits to agricultural workers noted above. Moreover, as the Department noted in the 2010 H–2A Rule, employers are aware of the annual AEWR adjustment, and the Department encourages employers to continue to include the annual adjustment in their contingency planning to allow flexibility to account for any possible wage adjustments.[139]

Second, the Department considered a regulatory alternative to the application filing requirements. Under this regulatory alternative, H–2A employers would not be required to fill out additional information about owners, operators, managers, and supervisors on the H–2A Application. Instead, this alternative would have required the employer to attest that it will collect this information and retain it for a period of 3 years from the date of certification or final determination and would provide the information upon request by the Department. This alternative would have been slightly less burdensome to H–2A employers because the employer would not need to provide this information at the time of filing each H–2A Application; rather, they would need to retain the information and produce it if requested during an audit or investigation.

However, the Department has determined the application filing and information disclosure requirements in this final rule, combined with the existing requirement to disclose information like the identity of the agent and point of contact, address(es), occupation, and period of need, will be necessary to assist the Department for reasons explained in the preamble discussion of § 655.130 above. This information will also assist the Department in ensuring employers do not evade penalties or regulatory requirements and will permit the Department to more effectively hold employers accountable for failures to comply with the law.

B. Regulatory Flexibility Analysis, Small Business Regulatory Enforcement Fairness Act, Executive Order 13272: Proper Consideration of Small Entities in Agency Rulemaking

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601 *et seq.,* as amended by SBREFA, Public Law 104–121, requires agencies to determine whether regulations will have a significant economic impact on a substantial number of small entities. The Department certifies that this final rule does not have a significant economic

[138] The wage transfer under this alternative would be approximately up to half of the impact of this final rule's provision to make updated AEWRs effective on the date of publication in the **Federal Register** ($13.69 million at a discount rate of 7 percent).

[139] *See* 2022 H–2A Final Rule, 87 FR at 61688 (quoting 2010 H–2A Final Rule, 75 FR at 6901).

impact on a substantial number of small entities. Therefore, a final regulatory flexibility analysis is not required. The factual basis for this certification is set forth below.

1. Significant Issues Raised in Public Comments, Including by the Small Business Administration Office of Advocacy

Several commenters, like Willoway Nurseries, Michigan Farm Bureau, and American Farm Bureau Federation, submitted feedback that the estimate of time burden for rule familiarization for small businesses was an underestimate, suggesting that small businesses lack HR specialists and that the time burdens were underestimated. The Department notes that while some H–2A small business employers may not directly employ an HR specialist to conduct these tasks, many use HR service providers for consulting on regulatory and HR matters and, therefore, the wage rate for an HR specialist is appropriate for H–2A small business employers. As explained in Section VIII.A.4.a, the Department has increased the time burden associated with rule familiarization to 4 hours. The Department believes these changes to the time estimate are appropriate because they represent more accurately the costs incurred by small businesses.

American Farm Bureau Federation submitted feedback that the number of small businesses and impacted industries was not accurately captured in the NPRM's RFA analysis. As explained in Section VIII.B.2 below, the Department has revised its RFA analysis methodology to include data from the Census Bureau's Statistics of U.S. Businesses (SUSB) [140] to add additional evidence on the scope of impact to small businesses in agriculture industries. The Department notes that a broader industry level (2-digit North American Industry Classification System (NAICS)) was used due to limitations in the publicly available data of 4-digit NAICS industries cited by the commenter (1112, 1113, 1114, 1121, 1122, 1123, 1125, and 1129).[141]

2. Description of the Number of Small Entities to Which This Final Rule Will Apply

a. Definition of Small Entity

The RFA defines a ''small entity'' as a: (1) small not-for-profit organization; (2) small governmental jurisdiction; or (3) small business.[142] The Department used the entity size standards defined by the Small Business Administration (SBA), in effect as of December 19, 2022, to classify entities as small.[143] SBA establishes separate standards for individual 6-digit NAICS industry codes, and standard cutoffs are typically based on either the average number of employees or the average annual receipts. Small governmental jurisdictions are defined as the governments of cities, counties, towns, townships, villages, school districts, or special districts with populations of less than 50,000 people.[144]

b. Number of Small Entities

The Department collected employment and annual revenue data from the business information provider Data Axle [145] and merged those data into the estimated costs for small businesses from the H–2A certification data for FY 2020 and FY 2021. This process allowed the Department to identify the number and type of small entities in the H–2A certification data as well as their annual revenues. The Department determined the number of unique employers in the FY 2020 and FY 2021 certification data based on the employer name and city. Using these data allows the Department to estimate the per-provision cost of this final rule as a percent of revenue by firm size. The Department identified 9,927 unique employers (excluding labor contractors). Of those 9,927 employers, the Department was able to obtain data matches of revenue and employees for 2,615 H–2A employers in the FY 2020 and FY 2021 certification data. Of those 2,615 employers, the Department determined that 2,159 were small (82.5 percent). These unique small entities had an average of 11 employees and average annual revenue of approximately $3.6 million. Of these small unique entities, 2,139 of them had revenue data available from Data Axle. The Department's analysis of the impact of this proposed rule on small entities is based on the number of small unique entities (2,139 with revenue data).

To provide clarity on the agricultural industries impacted by this regulation, Exhibit 7 shows the number of unique H–2A small employers with certifications in the FY 2020 and FY 2021 certification data within each NAICS code at the 6-digit level.

EXHIBIT 7—NUMBER OF H–2A SMALL EMPLOYERS BY NAICS CODE

6-Digit NAICS	Description	Number of employers	Percent	Size standard
111998	All Other Miscellaneous Crop Farming	611	29	$2.5 million.
444240	Nursery, Garden Center, and Farm Supply Stores	162	8	$21.5 million.
561730	Landscaping Services	135	6	$9.5 million.
445230	Fruit and Vegetable Markets	127	6	$9.0 million.
424480	Fresh Fruit and Vegetable Merchant Wholesalers	78	4	100 employees.
111339	Other Noncitrus Fruit Farming	78	4	$3.5 million.
112990	All Other Animal Production	57	3	$2.75 million.
424930	Flower, Nursery Stock, and Florists' Supplies Merchant Wholesalers	47	2	100 employees.
424910	Farm Supplies Merchant Wholesalers	39	2	200 employees.
484230	Specialized Freight (except Used Goods) Trucking, Long-Distance	37	2	$34.0 million.
	All Other	768	36	
	Total	2,139	100

[144] 5 U.S.C. 601(5).

[145] *See* Data Axle, *Business Data, https://www.data-axle.com/our-data/business-data* (last visited Apr. 4, 2024).

The Department also collected employment and annual revenue data for the NAICS Agricultural major industry [146] from SUSB [147] and merged those data into the estimated costs for small businesses from the H–2A certification data for FY 2020 and FY 2021. The Department assumes that NAICS sectors related to H–2A employment (1112, 1113, 1114, 1121, 1122, 1123, 1124, 1125, and 1129) have similar representation in size distribution as the broader 2-digit industry. The Department believes it is a reasonable assumption for the analysis because the broader 2-digit industry completely covers the 4-digit NAICS industries (1112, 1113, 1114, 1121, 1122, 1123, and 1129). The size distribution in the broader 2-digit industry mirrors the average size distribution in the 4-digit NAICS industries (1112, 1113, 1114, 1121, 1122, 1123 and 1129). No small businesses are left out for estimating impact on small entities in the affected NAICS industries. This assumption allows the Department to conduct a robust analysis of the most inclusive set of small businesses, which includes the number of firms, number of employees, and annual revenue by firm size. Using these data allows the Department to estimate the per-provision cost of this final rule as a percent of revenue by firm size.

3. Projected Impacts to Affected Small Entities

The Department has estimated the incremental costs for small entities from the baseline (*i.e.,* the current practices for complying, at a minimum, with the H–2A program as currently codified at 20 CFR part 655, subpart B, and 29 CFR part 501) to this final rule. As discussed in previous sections, the Department estimates impacts using historical certification data and, therefore, simulates the impacts of this final rule to each actual employer in the H–2A program rather than using representative data for employers within a given sector. The Department estimated the costs of (a) time to read and review this final rule, (b) time required to collect and maintain additional information for the application additions provision and add that information to H–2A applications, and (c) wage transfers due to the removal of the 2-week effective date delay from the AEWR publication. The estimates included in this analysis are consistent with those presented in the E.O. 12866 section.

The Department estimates that 2,139 unique small entities will incur a one-time cost of $223.43 to familiarize themselves with the rule and an annual cost of $111.71 to collect and maintain information due to the additional disclosure requirements associated with this final rule.[148]

In addition to the cost of rule familiarization and the cost of information and record keeping due to application additions, each small entity may have an increase in wage costs due to the revisions to the effective date of the AEWR. To estimate the wage impact for each small entity, we followed the methodology presented in the E.O. 12866 section. For each certification of a small entity, the Department calculated total wage impacts of this final rule in calendar year (CY) 2020 and CY 2021 based on each certification for employment between December 14th and the end of the year and the annual increase in the AEWR. The Department estimates the wage impact to all small entities is $826 on average in the first year.[149] Many of the small entities have no wage impact from this final rule because they do not have workers employed at the end of December.

Exhibit 8 shows the estimated cost per small entity for each year of the analysis. The first-year cost per small entity is estimated at $1,143 at a discount rate of 7 percent. The annualized cost per small entity is estimated at $1,553 at a discount rate of 7 percent. These estimates are *average costs,* meaning that some small entities will have higher costs while other small entities will have lower costs, regardless of firm size.

EXHIBIT 8—ESTIMATED COST TO SMALL ENTITIES

Year	Rule familiarization	Application additions	End of year wage impact	Average total cost per employer
1	$223.43	$111.71	$808	$1,143
2	223.43	111.71	872	1,207
3	223.43	111.71	941	1,276
4	223.43	111.71	1,015	1,350
5	223.43	111.71	1,095	1,430
6	223.43	111.71	1,181	1,516
7	223.43	111.71	1,264	1,610
8	223.43	111.71	1,375	1,710
9	223.43	111.71	1,483	1,819
10	223.43	111.71	1,600	1,936
	First-year cost ($), 7% discount rate			1,143

[146] Due to omissions in collected data, 6-digit and 4-digit NAICS code data were not available. *See* U.S. Census Bureau, *Economic Census: NAICS Codes & Understanding Industry Classification Systems* (Sept. 28, 2023). *https://www.census.gov/programs-surveys/economic-census/year/2022/guidance/understanding-naics.html.*

[147] *See* U.S. Census Bureau, *Statistics of U.S. Businesses* (Sept. 19, 2023). *https://www.census.gov/programs-surveys/susb/data.html.*

[148] Calculation: ($35.13 + $35.13(0.42) + $35.13(0.17)) × 4 = $223.43. $35.13 (1.59) × 1 = $55.86. $35.13 (1.59) × 2 = $111.71.

[149] In CY 2020 the average wage impact to all small entities is $620, and in CY 2021 it is $1,032. Because CY 2020 and CY 2021 H–2A certification data do not reflect the wage increases due to the 2023 AEWR Final Rule, the transfer payments estimated in the analysis are likely understated. As explained in a previous footnote, the transfer payments are likely understated in that they may not account for the main change under the 2023 AEWR Final Rule, namely the limited job opportunities that would be subject to updated AEWRs based on OEWS data. *See* 88 FR at 12764–12765. Because the 2023 AEWR Final Rule became effective on March 30, 2023, the Department does not have readily available calendar year H–2A certification data to estimate wage transfer payments after the publication of that rule. While the Department sought public comment on how these wage transfer impacts can be calculated, it received no comments. However, the 2023 AEWR Final Rule explained that the Department anticipates a very limited number of H–2A job opportunities would be subject to the OEWS-based AEWR, as the majority of H–2A job opportunities are and are estimated to continue to remain subject to FLS-based AEWRs. *See* 88 FR at 12766, 12799. The Department therefore considers the impacts of the potential underestimation to be *de minimis* because of the low incidence of job opportunities assigned the OEWS AEWR under the 2023 AEWR Final Rule.

EXHIBIT 8—ESTIMATED COST TO SMALL ENTITIES—Continued

Year	Rule familiarization	Application additions	End of year wage impact	Average total cost per employer
	Annualized cost ($), 7% discount rate			1,553

The Department used the following steps to estimate the cost of this final rule per small entity as a percentage of annual receipts. First, the Department used SBA's Table of Small Business Size Standards to determine the size thresholds for small entities within the agricultural industry.[150] Next the Department obtained data on the number of firms, number of employees, and annual revenue by industry and firm size category from SUSB.[151] The Department used the Gross Domestic Product deflator to convert revenue data from 2017 dollars to 2022 dollars.[152] Then, the Department divided the estimated first-year cost and the annualized cost per small business (discounted at a 7-percent rate) by the average annual receipts per firm to determine whether this final rule will have a significant or substantial economic impact on small businesses in each size category. The Department used a total cost estimate of 3 percent of revenue as the threshold for a significant individual impact and set a total of 20 percent of small entities incurring a significant impact as the threshold for a substantial impact on small entities. A threshold of 3 percent of revenues has been used in prior rulemakings for the definition of significant economic impact.[153] This threshold is also consistent with that sometimes used by other agencies.[154]

Exhibit 9 provides a breakdown of small entities by the proportion of revenue affected by the costs of this final rule. Of the 2,139 unique small entities with revenue data in the FY 2020 and FY 2021 certification data, only 0.7 percent of employers are estimated to have more than 3 percent of their total revenue impacted in the first year based on 2020 data and only 2.0 percent of employers are estimated to have more than 3 percent of their total revenue impacted in the first year based on 2021 data. In addition, no individual NAICS code sector has 20 percent or more of entities with an impact greater than 3 percent of revenue.

EXHIBIT 9—COST IMPACTS AS A PROPORTION OF TOTAL REVENUE FOR SMALL ENTITIES

Proportion of revenue impacted	111998	444240	561730	445230	All Other	Total
2020, by NAICS Code						
<1%	593 (97.1%)	162 (100.0%)	132 (98.5%)	127 (100.0%)	1,078 (97.6%)	2,093 (97.8%)
1%–2%	13 (2.1%)	0 (0.0%)	2 (1.5%)	0 (0.0%)	13 (1.2%)	28 (1.3%)
2%–3%	2 (0.3%)	0 (0.0%)	0 (0.0%)	0 (0.0%)	2 (0.2%)	4 (0.2%)
3%–4%	1 (0.2%)	0 (0.0%)	0 (0.0%)	0 (0.0%)	1 (0.1%)	2 (0.1%)
4%–5%	1 (0.2%)	0 (0.0%)	0 (0.0%)	0 (0.0%)	4 (0.4%)	5 (0.2%)
>5%	1 (0.2%)	0 (0.0%)	0 (0.0%)	0 (0.0%)	6 (0.5%)	7 (0.3%)
Total >3%	3 (0.5%)	0 (0.0%)	0 (0.0%)	0 (0.0%)	11 (1.0%)	14 (0.7%)
2021, by NAICS Code						
<1%	561 (91.8%)	161 (99.4%)	129 (96.3%)	127 (100.0%)	1,059 (95.9%)	2,038 (95.3%)
1%–2%	23 (3.8%)	1 (0.6%)	4 (3.0%)	0 (0.0%)	18 (1.6%)	46 (2.2%)
2%–3%	7 (1.1%)	0 (0.0%)	0 (0.0%)	0 (0.0%)	5 (0.5%)	12 (0.6%)
3%–4%	4 (0.7%)	0 (0.0%)	1 (0.7%)	0 (0.0%)	4 (0.4%)	9 (0.4%)
4%–5%	5 (0.8%)	0 (0.0%)	0 (0.0%)	0 (0.0%)	3 (0.3%)	8 (0.4%)
>5%	11 (1.8%)	0 (0.0%)	0 (0.0%)	0 (0.0%)	15 (1.4%)	26 (1.2%)
Total >3%	20 (3.3%)	0 (0.0%)	1 (0.7%)	0 (0.0%)	22 (2.0%)	43 (2.0%)

Exhibit 10, below, presents results of the analysis using the SUSB data, which show that for the first-year and annualized costs, small businesses in the agriculture industry are not estimated to have a significant economic impact (3 percent or more) for any entities. The largest proportion of revenue from first-year costs is estimated to be 1.91 percent of the average receipts per firm and the annualized costs are estimated to be 2.60 percent of the average receipts per firm for the smallest firms with revenue below $100,000. Furthermore, it is very unlikely that agricultural employers with revenue below $100,000 will request H–2A workers as their small revenue will not be sufficient to pay the H–2A worker(s) and cover other operating costs.

Enterprises with receipts of $20,000,000 to $24,999,999	60	0.27	1,357	22,619,811	1,143	0.01	1,553	0.01
Enterprises with receipts of $25,000,000 to $29,999,999	28	0.12	710	25,343,408	1,143	0.00	1,553	0.01
Enterprises with receipts of $30,000,000 to $34,999,999	17	0.08	475	27,948,978	1,143	0.00	1,553	0.01

[1] Source: U.S. Census Bureau, Statistics of U.S. Businesses.
[2] Number of firms ÷ Small firms in industry.
[3] Source: U.S. Census Bureau, Statistics of U.S. Businesses.
[4] Annual receipts ÷ Number of firms.
[5] First-year cost per firm with 7% discounting ÷ Average receipts per firm.
[6] Annualized cost per firm with 7% discounting ÷ Average receipts per firm.

Based on the above analysis and results provided in both Exhibit 9 and Exhibit 10, the Department certifies that this final rule will not have a significant economic impact on a substantial number of small entities.

C. Paperwork Reduction Act

In order to meet its statutory responsibilities under the INA, the Department collects information necessary to render determinations on requests for temporary agricultural labor certification that allow employers to bring foreign labor into the United States on a seasonal or other temporary basis under the H–2A program. The Department uses the collected information to determine if employers satisfy their statutory and regulatory obligations. This information is subject to the PRA, 44 U.S.C. 3501 *et seq.* A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The Department has OMB approval for its H–2A program information collection under Control Number 1205–0466.

In accordance with the PRA, the information collection requirements that must be implemented as a result of this regulation must receive approval from OMB. Therefore, the Department submitted a clearance package in connection with the NPRM that contained proposed revisions to the information collection pending OMB approval under 1205–0466.

In this package, the Department proposed changes to the forms used to collect required information (*i.e.,* Form ETA–9142A and appendices; Form ETA–790/790A and addenda) to conform to proposed revisions to the Department's H–2A regulations. The Department also introduced new appendices to the *Application for Temporary Labor Certification,* Form ETA–9142A. Appendix C will facilitate satisfaction of additional filing requirements by identifying information, such as name, location, and contact information, for owners and operators of places where work is performed and the people who manage and supervise workers under the H–2A Application, as discussed above. Additionally, employers must continue to keep this information updated throughout the work contract period, and in the event of audit will provide the updated information to the Department. Appendix D will satisfy new filing requirements for foreign labor recruiters. Specifically, the Department now requires the employer to disclose the identity (*i.e.,* name and, if applicable, identification/registration number) and geographic location of persons and entities hired by or working for the foreign labor recruiter that the employer engages or plans to engage in the recruitment of prospective H–2A

workers, regardless of whether the agent or recruiter is located in the United States or abroad. Additionally, the Department has revised Form ETA–790A, *Addendum B,* to collect more detailed information about employers and the places of employment at which workers will provide the agricultural labor or services described in the job order. More information about the Department's changes to the H–2A information collection instruments and the Department's collection and use of this information is available in supporting documentation in the PRA package the Department has prepared for this rulemaking.

These modifications reflect the regulatory changes proposed in the NPRM and adopted in this final rule, such as consistent use and clarification of defined terms and revised assurances.[155] The public was given 60 days to comment on the information collection and the comment period closed on November 14, 2023.[156]

During the 60-day comment period, the Department received some comments on the proposed form revisions. A farm owner and many trade associations, including Michigan Farm Bureau and NCFC, indicated that the burden numbers presented by the Department were low; however, none of those commenters provided an alternative burden number or a justification as to why the Department's burden numbers were inaccurate. Therefore, in this final rule, the Department's estimates of the time burden to complete the information collection will remain the same as estimated in the NPRM. Commenters primarily addressed aspects of the information collection while discussing the proposed regulations. After considering public comments submitted in response to the NPRM, the Department has adopted certain proposals, with some changes, as discussed in the preamble above, but has retained the proposed changes for the information collection in this final rule.

In response to comments, as described below, the Department has made additional modifications to the forms implemented with this final rule to clarify certain requirements, reflect the provisions of this final rule (*e.g.,* collection of additional employer information), and conform to similar collections (*e.g.,* manner of collecting name information). In addition to editing language on the forms, the Department has modified some data collection fields after considering public comments. Many commenters addressed the Department's proposal to collect information about owners, operators, managers, and supervisors, which is now reflected in this final rule and will be implemented using *Appendix C,* and will require an employer to submit contact information (address, phone, and email, if applicable) about owners, operators, managers, and supervisors. Although many commenters questioned the necessity of this requirement at the filing stage, the Department will retain this requirement because, as noted in the preamble to § 655.130 above, gathering this information at the time of filing, rather than only in the event of an investigation or audit, will assist the Department to gain a more accurate and detailed understanding of the scope and structure of the employer's agricultural operation, which is essential to the Department's fulfillment of various obligations in the administration and enforcement of the H–2A program. The information will assist the Department in determining whether two ostensibly separate employers are in fact one entity filing multiple applications, and whether they have demonstrated a bona fide temporary or seasonal need as required by the INA, 8 U.S.C. 1101(a)(15)(H)(ii)(a). Collection at the time of filing also will assist the Department in determining whether an employer has filed as a single employer with a debarred entity, as the Department will already have the debarred entity's data on record. Obtaining this information at the time of filing also enables OFLC and WHD to search across applications within a filing system database to identify instances in which employers have changed names, or roles, to avoid complying with program regulations or avoid monetary penalties or program debarment. Furthermore, the information collected about owners, operators, and supervisors at the application stage may assist the Department to identify whether an individual or successor in interest should be named on any determination and, therefore, subject to any sanctions or remedies assessed. Finally, as noted above, collecting this information from all applicants at the time of filing, rather than only collecting the information during an audit or investigation, can be useful for other similar purposes as well, such as identifying instances when an H–2ALC Application indicates that an applicant intends to supply an H–2A workforce to a debarred employer during the debarment period.

Additionally, commenters expressed concerns about publication of the required contact information of an owner, operator, manager, or supervisor. The Department, as discussed in the above preamble, will only collect, store, and disseminate all information and records in accordance with the Department's information sharing agreements and SORN, principles set forth by OMB, and applicable laws, including the Privacy Act of 1974 (Pub. L. 93–579, 7, 88 Stat. 1896, 1909), Federal Records Act of 1950 (Pub. L. 81–754, 64 Stat. 583, 585 [codified as amended in scattered sections of 44 U.S.C.]), the PRA (44 U.S.C. 3501 *et seq.*), and the E-Government Act of 2002 (Pub. L. 107–347 (2002)).

As a result, the forms implemented with this final rule align information collection requirements with the Department's regulation and continue its ongoing efforts to provide greater clarity to employers on regulatory requirements, and to standardize information collection to reduce employer time and burden preparing applications. Overall, the revisions discussed above place no undue public burden to respond to the information collection required under this final rule from that proposed in connection with the NPRM.

The information collection change in requirements associated with this final rule are summarized as follows:

Title: H–2A Temporary Agricultural Employment Certification Program.

Agency: DOL–ETA.

Type of Information Collection: OMB Control Number 1205–0466.

Affected Public: Individuals or Households, Private Sector—businesses or other for-profits, Government, State, Local and Tribal Governments.

Form(s): ETA–9142A, *H–2A Application for Temporary Employment Certification;* ETA–9142A—*Appendix A;* ETA–9142A—*Appendix B, H–2A Labor Contractor Surety Bond; Appendix C,* ETA–9142A; *Appendix D,* ETA–9142A*;* ETA–9142A—*H–2A Approval Final Determination: Temporary Agricultural Labor Certification;* ETA–790/790A, *H–2A Agricultural Clearance Order;* ETA–790/790A—*Addendum A;* ETA–790/790A—

[155] *See* 2023 NPRM, 88 FR 63750.

[156] On October 26, 2023, in response to several requests, the Department published a letter on regulations.gov declining to extend the 60-day comment period for the NPRM that expired on November 14, 2023. The Department found that 60 days would be a reasonable and adequate amount of time to provide notice and an opportunity to comment on the NPRM to this rule. As a result, the Department encouraged all interested parties to submit comments electronically on *https://www.regulations.gov* (RIN 1205–AC12) by 11:59 p.m. ET on November 14, 2023. Letter from Rajesh D. Nayak, Asst. Sec'y for Pol'y, DOL (Oct. 16, 2023), *https://www.regulations.gov/document/ETA-2023-0003-0040.*

Addendum B; ETA–790/790A—*Addendum C;* ETA–232, *Domestic Agricultural In-Season Wage Report.*

Obligation to Respond: Required to Obtain or Retain Benefits.

Total Annual Respondents: 467,843.

Annual Frequency: On Occasion.

Total Annual Responses: 14,586.

Estimated Time per Response (averages):

—Forms ETA–9142A, Appendix A, Appendix B, Appendix C, and Appendix D—3.63 hours per response.

—Forms ETA–790/790A—.70 hours per response.

—Form ETA–232—3.30 hours per response.

Estimated Total Annual Burden Hours: 102,864.74.

Total Annual Burden Cost for Respondents: $0.

Title of Collection: Agricultural Recruitment System Forms Affecting Migrant and Seasonal Farmworkers.

Type of Review: Revision of a Currently Approved Information Collection.

OMB Control Number: 1205–0134.

Description: The NPRM proposed to revise Agricultural Clearance Order Form, Form ETA–790B, which will be attached to the Agricultural Clearance Order Form, Form ETA–790 (see OMB Control Number 1205–0466). Form ETA–790B is only used for employers who submit clearance orders requesting U.S. workers for temporary agricultural jobs that are not attached to requests for foreign workers through the H–2A visa program (non-criteria clearance orders). ETA included the estimated burden to the public for the completion of Form ETA–790 as it relates to those employers seeking to place non-criteria job orders through the ARS in addition to the estimated burden for Form ETA–790B because employers would fill out both forms. The Department must update Form ETA–790B to implement changes at § 653.501(c)(3)(iv) regarding assurances that employers must make on clearance orders. The Department has also made changes to align Form ETA–790B with the structure of Form ETA–790A. *Affected Public:* State Governments, Private Sector: Business or other for-profits, not-for-profit institutions, and farms.

Obligation to Respond: Required to Obtain or Retain Benefits.

Estimated Total Annual Respondents: 7,568.

Estimated Total Annual Responses: 7,568.

Estimated Total Annual Burden Hours: 6,622.

Estimated Total Annual Other Burden Costs: $0.

Regulations Sections: Subpart F of part 653.

Agency: DOL–ETA.

Interested parties may obtain a copy of the information collection revisions submitted to OMB on the OIRA website at *https://www.reginfo.gov/public/do/PRAMain.* From that page, select Department of Labor from the ''Currently under Review'' dropdown menu, click the ''Submit'' button, and find the applicable control number among the ICRs displayed, or use the search bar at the top right of the page and type in the OMB Control Number (1205–0134).

D. Small Business Regulatory Enforcement Fairness Act of 1996 (Congressional Review Act)

The Congressional Review Act (CRA) was included as part of SBREFA, Public Law 104–121, 110 Stat. 847, 868 (codified at 5 U.S.C. 801 *et seq.*). OIRA has determined that this final rule does not meet the criteria set forth in 5 U.S.C. 804(2). DOL has complied with the CRA's reporting requirements and has sent this rule to Congress and to the Comptroller General as required by 5 U.S.C. 801(a)(1).

E. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104–4, codified at 2 U.S.C. 1501 *et seq.*) is intended, among other things, to curb the practice of imposing unfunded Federal mandates on State, local, and Tribal governments. UMRA requires Federal agencies to assess a regulation's effects on State, local, and Tribal governments, as well as on the private sector, except to the extent the regulation incorporates requirements specifically set forth in law. Title II of the UMRA requires each Federal agency to prepare a written statement assessing the effects of any regulation that includes any Federal mandate in a proposed or final agency rule that may result in $100 million or more expenditure (adjusted annually for inflation) in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. A Federal mandate is any provision in a regulation that imposes an enforceable duty upon State, local, or Tribal governments, or upon the private sector, except as a condition of Federal assistance or a duty arising from participation in a voluntary Federal program.

This final rule does not result in unfunded mandates for the public or private sector because private employers' participation in the program is voluntary, and State governments are reimbursed for performing activities required under the program. The requirements of title II of the UMRA, therefore, do not apply, and the Department has not prepared a statement under the UMRA.

F. Executive Order 13132 (Federalism)

This final rule would not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with sec. 6 of E.O. 13132,[157] it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

G. Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

The Department has reviewed this final rule in accordance with E.O. 13175 [158] and has determined that it does not have Tribal implications. This rule does not have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Tribal governments.

List of Subjects

20 CFR Part 651

Employment, Grant programs—labor.

20 CFR Part 653

Agriculture, Employment, Equal employment opportunity, Grant programs—labor, Migrant labor, Reporting and recordkeeping requirements.

29 CFR Part 501

Administrative practice and procedure, Agricultural, Aliens, Employment, Housing, Housing standards, Immigration, Labor, Migrant labor, Penalties, Transportation, Wages.

For the reasons stated in the preamble, the Department of Labor amends 20 CFR parts 651, 653, 655, and 658 and 29 CFR part 501 as follows:

Title 20: Employees' Benefits

Employment and Training Administration

PART 651—GENERAL PROVISIONS GOVERNING THE WAGNER-PEYSER ACT EMPLOYMENT SERVICE

■ 1. The authority citation for part 651 continues to read as follows:

Authority: 29 U.S.C. 49a; 38 U.S.C. part III, 4101, 4211; Secs. 503, 3, 189, Pub. L. 113–128, 128 Stat. 1425 (Jul. 22, 2014).

■ 2. Amend § 651.10 by:

■ a. Adding definitions of ''Agent'', ''Criteria clearance order'', and ''Discontinuation of services'', in alphabetical order;

■ b. Revising the definition for ''Employment-related laws''; and

■ c. Adding definitions for ''Farm labor contractor'', ''Joint employer'', ''Non-criteria clearance order'', ''Successor in interest'', and ''Week'' in alphabetical order.

The additions and revision read as follows:

§ 651.10 Definitions of terms used in this part and parts 652, 653, 654, and 658 of this chapter.

* * * * *

Agent means a legal entity or person, such as an association of employers, or an attorney for an association, that is authorized to act on behalf of the employer for purposes of recruitment of workers through the clearance system and is not itself an employer or joint employer, as defined in this section, with respect to a specific job order.

* * * * *

Criteria clearance order means a clearance order that is attached to an application for foreign temporary agricultural workers pursuant to part 655, subpart B, of this chapter.

* * * * *

Discontinuation of services means that an employer, agent, farm labor contractor, joint employer, or successor in interest, as defined in this section, cannot participate in or receive any Wagner-Peyser Act employment service provided by the ES to employers pursuant to parts 652 and 653 of this chapter.

* * * * *

Employment-related laws means those laws and implementing rules, regulations, and standards that relate to the employment relationship, such as those enforced by the Department's WHD, OSHA, or by other Federal, State, or local agencies.

* * * * *

Farm labor contractor means any person or entity, other than an agricultural employer, an agricultural association, or an employee of an agricultural employer or agricultural association, who, for any money or other valuable consideration paid or promised to be paid, recruits, solicits, hires, employs, furnishes, or transports any migrant or seasonal farmworker (MSFW).

* * * * *

Joint employer means where two or more employers each have sufficient definitional indicia of being an employer of a worker as defined in this section, they are, at all times, joint employers of that worker. An employer that submits a job order to the ES clearance system as a joint employer, is a joint employer of any worker placed and employed on the job order during the period of employment anticipated, amended, or otherwise extended in accordance with the order.

* * * * *

Non-criteria clearance order means a clearance order that is not attached to an application for foreign temporary agricultural workers pursuant to part 655, subpart B, of this chapter.

* * * * *

Successor in interest—The following factors, including those as used under Title VII of the Civil Rights Act and the Vietnam Era Veterans' Readjustment Assistance Act, may be considered in determining whether an employer, agent, or farm labor contractor is a successor in interest; however, these factors are not exhaustive, and no one factor is dispositive, but all of the circumstances will be considered as a whole:

(1) Substantial continuity of the same business operations;

(2) Use of the same facilities;

(3) Continuity of the work force;

(4) Similarity of jobs and working conditions;

(5) Similarity of supervisory personnel;

(6) Whether the former management or owner retains a direct or indirect interest in the new enterprise;

(7) Similarity in machinery, equipment, and production methods;

(8) Similarity of products and services;

(9) The ability of the predecessor to provide relief; and

(10) For purposes of discontinuation of services, the involvement of the firm's ownership, management, supervisors, and others associated with the firm in the violation(s) at issue.

* * * * *

Week means 7 consecutive calendar days.

* * * * *

PART 653—SERVICES OF THE WAGNER-PEYSER ACT EMPLOYMENT SERVICE SYSTEM

■ 3. The authority citation for part 653 continues to read as follows:

Authority: Secs. 167, 189, 503, Public Law 113–128, 128 Stat. 1425 (Jul. 22, 2014); 29 U.S.C. chapter 4B; 38 U.S.C. part III, chapters 41 and 42.

■ 4. Amend § 653.501 by:

■ a. Adding paragraph (b)(4);

■ b. Revising paragraph (c)(1)(iv)(E);

■ c. Revising paragraphs (c)(3) introductory text, (c)(3)(i) and (iv), and (c)(5); and

■ d. Removing and reserving paragraphs (d)(4), (7), and (8).

The additions and revisions read as follows:

§ 653.501 Requirements for processing clearance orders.

* * * * *

(b) * * *

(4) Prior to placing a job order into intrastate or interstate clearance, ES staff must consult the Department's Office of Foreign Labor Certification and Wage and Hour Division debarment lists, and the Department's Office of Workforce Investment discontinuation of services list.

(i) If the employer requesting access to the clearance system is currently debarred from participating in the H–2A or H–2B foreign labor certification programs, the SWA must initiate discontinuation of services pursuant to part 658, subpart F, of this chapter.

(ii) If the employer requesting access to the clearance system is currently discontinued from receiving ES services under § 658.503 of this chapter by any State, the SWA must not approve the clearance order for placement into intrastate or interstate clearance. Employers may submit written requests to the OWI Administrator to determine whether they are on the OWI discontinuation of services list. If the OWI Administrator indicates that the employer is not on the discontinuation of services list then the SWA must

approve the clearance order, as long as all other requirements have been met.

(iii) For purposes of this paragraph (b)(4), ''employer'' has the meaning given in § 658.500(b) of this chapter.

(c) * * *

(1) * * *

(iv) * * *

(E) The hourly wage rate, if applicable, and any non-hourly wage rate offered, including a piece rate or base rate and bonuses and, for any non-hourly wage rate, an estimate of its hourly wage rate equivalent for each activity and unit size;

* * * * *

(3) SWAs must ensure that the employer makes the following assurances in the clearance order:

(i) The employer will provide to workers placed through the clearance system the number of hours of work cited in paragraph (c)(1)(iv)(D) of this section for the 14 calendar days beginning with the anticipated date of need, unless the employer has amended the date of need at least 10 business days prior to the original date of need (pursuant to paragraph (c)(3)(iv) of this section).

* * * * *

(iv) The employer will notify the order-holding office or SWA immediately upon learning that a crop is maturing earlier or later, or that weather conditions, over-recruitment, or other factors have changed the terms and conditions of employment. If there is a change to the date of need, the employer will notify the order-holding office or SWA, and each worker who has been placed on the clearance order using the contact information the worker provided to the employer, in writing (email and other forms of electronic written notification are acceptable) at least 10 business days prior to the original date of need. Notification to workers must be made in accordance with the language access requirements of 29 CFR 38.9 for workers with limited English proficiency. If a worker provides electronic contact information, such as an email address or telephone number, the employer will send notice using one of the electronic contact methods provided. If the employer provides non-written telephonic notice, such as a phone call, voice message, or an equivalent, the employer will also send written notice using the email or postal address provided by the worker at least 10 business days prior to the original date of need. The employer will maintain records of the notification and the date notification was sent to the order-holding office or SWA and workers for 3 years. Consistent with paragraph (c)(5) of this section, if the employer does not properly send notification to the order-holding office or SWA and workers at least 10 business days prior to the original date of need, the employer will provide the housing described on the clearance order to all migrant workers placed on the clearance order who are already traveling to the place of employment, without cost to the workers, until work commences. The employer will pay all placed workers for the hours listed on the clearance order and will provide or pay all other benefits and expenses described on the clearance order for each day work is delayed up to 14 calendar days or provide alternative work.

* * * * *

(5) If there is a change to the anticipated date of need and the employer fails to notify the order-holding office or SWA and all workers placed on the clearance order at least 10 business days prior to the original date of need, as assured in paragraph (c)(3)(iv) of this section, the employer must provide housing to all migrant workers placed on the clearance order who are already traveling to the place of employment, without cost to the workers, until work commences, and must pay all placed workers the specified hourly rate of pay, or if the pay is piece-rate, the higher of the Federal or State minimum wage, or an applicable prevailing wage, or for criteria orders the rate of pay required under part 655, subpart B, of this chapter, and must provide or pay all other benefits and expenses described on the clearance order for each day work is delayed up to 14 calendar days starting with the originally anticipated date of need or provide alternative work if such alternative work is stated on the approved clearance order. If an employer fails to comply under this paragraph (c)(5) the order-holding office must process the information as an apparent violation pursuant to § 658.419 of this chapter and may refer an apparent violation of the employer's payment obligation under this paragraph (c)(5) to the Department's Wage and Hour Division.

* * * * *

PART 655—TEMPORARY EMPLOYMENT OF FOREIGN WORKERS IN THE UNITED STATES

■ 5. The authority citation for part 655 continues to read as follows:

Authority: Section 655.0 issued under 8 U.S.C. 1101(a)(15)(E)(iii), 1101(a)(15)(H)(i) and (ii), 8 U.S.C. 1103(a)(6), 1182(m), (n), and (t), 1184(c), (g), and (j), 1188, and 1288(c) and (d); sec. 3(c)(1), Pub. L. 101–238, 103 Stat. 2099, 2102 (8 U.S.C. 1182 note); sec. 221(a), Pub. L. 101–649, 104 Stat. 4978, 5027 (8 U.S.C. 1184 note); sec. 303(a)(8), Pub. L. 102–232, 105 Stat. 1733, 1748 (8 U.S.C. 1101 note); sec. 323(c), Pub. L. 103–206, 107 Stat. 2428; sec. 412(e), Pub. L. 105–277, 112 Stat. 2681 (8 U.S.C. 1182 note); sec. 2(d), Pub. L. 106–95, 113 Stat. 1312, 1316 (8 U.S.C. 1182 note); 29 U.S.C. 49k; Pub. L. 107–296, 116 Stat. 2135, as amended; Pub. L. 109–423, 120 Stat. 2900; 8 CFR 214.2(h)(4)(i); 8 CFR 214.2(h)(6)(iii); and sec. 6, Pub. L. 115–218, 132 Stat. 1547 (48 U.S.C. 1806).

Subpart A issued under 8 CFR 214.2(h).

Subpart B issued under 8 U.S.C. 1101(a)(15)(H)(ii)(a), 1184(c), and 1188; and 8 CFR 214.2(h).

Subpart E issued under 48 U.S.C. 1806.

Subparts F and G issued under 8 U.S.C. 1288(c) and (d); sec. 323(c), Pub. L. 103–206, 107 Stat. 2428; and 28 U.S.C. 2461 note, Pub. L. 114–74 at section 701.

Subparts H and I issued under 8 U.S.C. 1101(a)(15)(H)(i)(b) and (b)(1), 1182(n), and (t), and 1184(g) and (j); sec. 303(a)(8), Pub. L. 102–232, 105 Stat. 1733, 1748 (8 U.S.C. 1101 note); sec. 412(e), Pub. L. 105–277, 112 Stat. 2681; 8 CFR 214.2(h); and 28 U.S.C. 2461 note, Pub. L. 114–74 at section 701.

Subparts L and M issued under 8 U.S.C. 1101(a)(15)(H)(i)(c) and 1182(m); sec. 2(d), Pub. L. 106–95, 113 Stat. 1312, 1316 (8 U.S.C. 1182 note); Pub. L. 109–423, 120 Stat. 2900; and 8 CFR 214.2(h).

■ 6. Amend § 655.103 by:

■ a. In paragraph (b), adding the definitions of ''Key service provider'' and ''Labor organization'' in alphabetical order and removing the definition of ''Successor in interest''; and

■ b. Adding paragraph (e).

The additions read as follows:

§ 655.103 Overview of this subpart and definition of terms.

* * * * *

(b) * * *

Key service provider. A health-care provider; a community health worker; an education provider; a translator or interpreter; an attorney, legal advocate, or other legal service provider; a government official, including a consular representative; a member of the clergy; an emergency services provider; a law enforcement officer; and any other provider of similar services.

Labor organization. Any organization of any kind, or any agency or employee representation committee or plan, in which workers participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work.

* * * * *

(e) *Definition of single employer for purposes of temporary or seasonal need and contractual obligations.* Separate

entities will be deemed a single employer (sometimes referred to as an ''integrated employer'') for purposes of assessing temporary or seasonal need and for enforcement of contractual obligations if they meet the definition of single employer in this paragraph (e). Under the definition of single employer, a determination of whether separate entities are a single employer is not determined by a single factor, but rather the entire relationship is viewed in its totality. Factors considered in determining whether two or more entities consist of a single employer include:

(1) Common management;

(2) Interrelation between operations;

(3) Centralized control of labor relations; and

(4) Degree of common ownership/financial control.

■ 7. Add § 655.104 to read as follows:

§ 655.104 Successors in interest.

(a) *Liability of successors in interest.* Where an employer, agent, or attorney has violated 8 U.S.C. 1188, 29 CFR part 501, or this subpart, a successor in interest to that employer, agent, or attorney may be held liable for the duties and obligations of the violating employer, agent, or attorney in certain circumstances, regardless of whether such successor in interest has succeeded to all the rights and liabilities of the predecessor employer, agent, or attorney.

(b) *Definition of successors in interest.* The following factors, including those as used under Title VII of the Civil Rights Act and the Vietnam Era Veterans' Readjustment Assistance Act, may be considered in determining whether an employer, agent, or attorney is a successor in interest; however, these factors are not exhaustive, and no one factor is dispositive, but all of the circumstances will be considered as a whole:

(1) Substantial continuity of the same business operations;

(2) Use of the same facilities;

(3) Continuity of the work force;

(4) Similarity of jobs and working conditions;

(5) Similarity of supervisory personnel;

(6) Whether the former management or owner retains a direct or indirect interest in the new enterprise;

(7) Similarity in machinery, equipment, and production methods;

(8) Similarity of products and services;

(9) The ability of the predecessor to provide relief; and

(10) For purposes of debarment, the personal involvement of the firm's ownership, management, supervisors, and others associated with the firm in the violation(s) at issue.

(c) *Effect of debarment on successors in interest.* When an employer, agent, or attorney is debarred under § 655.182 or 29 CFR 501.20, any successor in interest to the debarred employer, agent, or attorney is also debarred. No application for H–2A workers may be filed by or on behalf of a successor in interest to a debarred employer, agent, or attorney, subject to the term limits set forth in § 655.182(c)(2). If the CO determines that an application for H–2A workers was filed by or on behalf of a successor in interest to a debarred employer, agent, or attorney during the period of debarment as set forth in § 655.182(c)(2), the CO will issue a Notice of Deficiency (NOD) pursuant to § 655.141 or deny the application pursuant to § 655.164, as appropriate depending upon the status of the H–2A application, solely on the basis that the entity is a successor in interest to a debarred employer, agent, or attorney. If the OFLC Administrator determines that a certification for H–2A workers was issued to a successor in interest to a debarred employer, the OFLC Administrator may revoke the certification pursuant to § 655.181(a). The employer, agent, or attorney may appeal its status as a successor in interest to the debarred entity, pursuant to the procedures for appeals of CO determinations at § 655.171.

■ 8. Amend § 655.120 by revising paragraphs (a) and (b)(2) and (3) to read as follows:

§ 655.120 Offered wage rate.

(a) *Employer obligation.* (1) Except for occupations covered by §§ 655.200 through 655.235, to comply with its obligation under § 655.122(l), an employer must offer, advertise in its recruitment, and pay a wage that is at least the highest of:

(i) The AEWR;

(ii) A prevailing wage rate, whether expressed as a piece rate or other unit of pay, if the OFLC Administrator has approved a prevailing wage survey for the applicable crop activity or agricultural activity and, if applicable, a distinct work task or tasks performed in that activity, meeting the requirements of paragraph (c) of this section;

(iii) The agreed-upon collective bargaining wage;

(iv) The Federal minimum wage;

(v) The State minimum wage; or

(vi) Any other wage rate the employer intends to pay.

(2) Where the wage rates set forth in paragraph (a)(1) of this section are expressed in different units of pay (including piece rates or other pay structures), the employer must list the highest applicable wage rate for each unit of pay in its job order and must offer and advertise all of these wage rates in its recruitment. The employer's obligation to pay the highest of these wage rates is set forth at § 655.122(l)(2).

(b) * * *

(2) The OFLC Administrator will publish a notice in the **Federal Register**, at least once in each calendar year, on a date to be determined by the OFLC Administrator, establishing each AEWR. The updated AEWR will be effective as of the date of publication of the notice in the **Federal Register**.

(3) If an updated AEWR for the occupational classification and geographic area is published in the **Federal Register** during the work contract, and the updated AEWR is higher than the highest of the previous AEWR; a prevailing wage for the crop activity or agricultural activity and, if applicable, a distinct work task or tasks performed in that activity and geographic area; the agreed-upon collective bargaining wage; the Federal minimum wage; or the State minimum wage, the employer must pay at least the updated AEWR beginning on the date the updated AEWR is published in the **Federal Register**.

* * * * *

■ 9. Amend § 655.122 by revising paragraphs (h)(4), (i)(1)(i) and (ii), (l), and (n) to read as follows:

§ 655.122 Contents of job offers.

* * * * *

(h) * * *

(4) *Employer-provided transportation.* (i) All employer-provided transportation must comply with all applicable local, State, or Federal laws and regulations, and must provide, at a minimum, the same transportation safety standards, driver's licensure, and vehicle insurance required under 29 U.S.C. 1841, 29 CFR 500.104 or 500.105, and 29 CFR 500.120 through 500.128.

(ii) The employer must not operate, or allow any other person to operate, any employer-provided transportation that is required by the U.S. Department of Transportation's Federal Motor Vehicle Safety Standards, including 49 CFR 571.208, to be manufactured with seat belts, unless all passengers and the driver are properly restrained by seat belts meeting standards established by the U.S. Department of Transportation, including 49 CFR 571.209 and 571.210.

(iii) The job offer must include a description of the modes of transportation (*e.g.,* type of vehicle) that will be used for inbound, outbound, daily, and any other transportation.

(iv) If workers' compensation is used to cover transportation in lieu of vehicle insurance, the employer must either ensure that the workers' compensation covers all travel or that vehicle insurance exists to provide coverage for travel not covered by workers' compensation and it must have property damage insurance.

(i) * * *

(1) * * *

(i) For purposes of this paragraph (i)(1), a workday means the number of hours in a workday as stated in the job order and excludes the worker's Sabbath and Federal holidays. The employer must offer a total number of hours to ensure the provision of sufficient work to reach the three-fourths guarantee. The work hours must be offered during the work period specified in the work contract.

(ii) In the event the worker begins working later than the specified beginning date of the contract, the guarantee period begins with the first workday after the arrival of the worker at the place of employment, and continues until the last day during which the work contract and all extensions thereof are in effect.

* * * * *

(l) *Rates of pay.* Except for occupations covered by §§ 655.200 through 655.235, the employer must pay the worker at least the highest wage rate set forth in § 655.120(a)(1).

(1) The employer must calculate workers' wages using the wage rate that will result in the highest wages for each worker in each pay period. When calculating wages based on an hourly wage rate, the calculation must reflect every hour or portion thereof worked during a pay period. The wages actually paid cannot be lower than the wages that would result from the wage rate(s) guaranteed in the job order.

(2) Where the wage rates set forth in § 655.120(a)(1) include both hourly and non-hourly wage rates, the employer must calculate each worker's wages, in each pay period, using the highest wage rate for each unit of pay, and pay the worker the highest of these wages for that pay period. The wage actually paid cannot be lower than the wages that would result from the wage rate(s) guaranteed in the job offer.

(3) If the employer requires one or more minimum productivity standards of workers as a condition of job retention, such standards must be specified in the job offer and be no more than those required by the employer in 1977, unless the OFLC Administrator approves a higher minimum, or, if the employer first applied for temporary agricultural labor certification after 1977, such standards must be no more than those normally required (at the time of the first *Application for Temporary Employment Certification*) by other employers for the activity in the area of intended employment.

(4) If applicable, the employer must state in the job order:

(i) That overtime hours may be available;

(ii) The wage rate(s) to be paid for any such overtime hours;

(iii) The circumstances under which the wage rate(s) for overtime hours will be paid, including, but not limited to, after how many hours in a day or workweek the overtime wage rate will be paid, and whether overtime wage rates will vary between places of employment; and

(iv) Where the overtime pay is required by law, the applicable Federal, State, or local law requiring the overtime pay.

* * * * *

(n) *Termination for cause or abandonment of employment.* (1) If a worker is terminated for cause or voluntarily abandons employment before the end of the contract period, and the employer notifies the NPC, and DHS in the case of an H–2A worker, in writing or by any other method specified by the Department in a notice published in the **Federal Register** or specified by DHS not later than 2 working days after such termination for cause or abandonment occurs, the employer will not be responsible for providing or paying for the subsequent transportation and subsistence expenses of that worker under this section, and that worker is not entitled to the three-fourths guarantee described in paragraph (i) of this section, and, in the case of a U.S. worker, the employer will not be obligated to contact that worker under § 655.153.

(2) A worker is terminated for cause when the employer terminates the worker for failure to comply with employer policies or rules or to satisfactorily perform job duties in accordance with reasonable expectations based on criteria listed in the job offer.

(i) An employer may terminate a worker for cause only if all of the following conditions are satisfied:

(A) The employee has been informed (in a language understood by the worker), or reasonably should have known, of the policy, rule, or performance expectation;

(B) Compliance with the policy, rule, or performance expectation is within the worker's control;

(C) The policy, rule, or performance expectation is reasonable and applied consistently to the employer's H–2A workers and workers in corresponding employment;

(D) The employer undertakes a fair and objective investigation into the job performance or misconduct; and

(E) The employer corrects the worker's performance or behavior using progressive discipline, which is a system of graduated and reasonable responses to an employee's failure to satisfactorily perform job duties or comply with employer policies or rules. Disciplinary measures should be proportional to the misconduct or failure to meet performance expectations but may increase in severity if misconduct or failure to meet performance expectations is repeated, and may include immediate termination for egregious misconduct, meaning intentional or reckless conduct that is plainly illegal, poses imminent danger to physical safety, or that a reasonable person would understand as being outrageous. Prior to each disciplinary measure, the employer must notify the worker of the infraction and allow the worker to present evidence in their defense. Following each disciplinary measure, except where the appropriate disciplinary measure is termination, the employer must provide relevant and adequate instruction to the worker, and must afford the worker reasonable time to correct the behavior or to meet the performance expectation following such instruction. The employer must document each infraction and corresponding disciplinary measure, evidence the worker presented in their defense, and resulting instruction, and provide a copy of this documentation to the worker (in a language understood by the worker) within 1 week of the implementation of the disciplinary measure.

(ii) A worker is not terminated for cause where the termination is: contrary to a Federal, State, or local law; for an employee's refusal to work under conditions that the employee reasonably believes will expose them or other employees to an unreasonable health or safety risk; because of discrimination on the basis of race, color, national origin, age, sex (including sexual orientation or gender identity), religion, disability, familial status or citizenship status; or, where applicable, where the employer failed to comply with its obligations under § 655.135(m) in an investigatory interview that contributed to the termination.

(iii) The employer bears the burden of demonstrating that any termination for

cause meets the requirements in paragraph (n)(2).

(3) Abandonment will be deemed to begin after a worker fails to report to work at the regularly scheduled time for 5 consecutive working days without the consent of the employer.

(4) The employer is required to maintain records described in this section for not less than 3 years from the date of the certification.

(i) Records of notification to the NPC, and to DHS in the case of an H–2A worker, of termination for cause or abandonment.

(ii) Disciplinary records, including the infraction and each step of progressive discipline, any evidence the worker presented in their defense, any investigation related to the termination, and any subsequent instruction afforded the worker.

(iii) Records indicating the reason(s) for termination of any worker, including disciplinary records as described in paragraph (n)(4)(ii) of this section and § 655.167.

* * * * *

■ 10. Amend § 655.130 by revising paragraph (a) to read as follows:

§ 655.130 Application filing requirements.

* * * * *

(a) *What to file.* (1) An employer that desires to apply for temporary agricultural labor certification of one or more nonimmigrant workers must file a completed *Application for Temporary Employment Certification,* all supporting documentation and information required at the time of filing under §§ 655.131 through 655.137, and, unless a specific exemption applies, a copy of Form ETA–790/790A, submitted as set forth in § 655.121(a).

(2) The *Application for Temporary Employment Certification* must include the employer's legal name, trade name(s), and a valid FEIN as well as a valid place of business (physical location) in the United States and a means by which it may be contacted by prospective U.S. applicants for employment. For each employer of any H–2A worker sponsored under the *Application for Temporary Employment Certification* or any worker in corresponding employment, the *Application for Temporary Employment Certification* must include the identity, location, and contact information of all persons who are the owners of that entity.

(3) For each place of employment identified in the job order, the *Application for Temporary Employment Certification* must include the identity, location, and contact information of all persons and entities, if different than the employer(s), who are the operators of the place of employment, and of all persons who manage or supervise any H–2A worker sponsored under the *Application for Temporary Employment Certification* or any worker in corresponding employment, regardless of whether those managers or supervisors are employed by the employer or another entity.

(4) If the information specified in paragraphs (a)(2) and (3) of this section changes during the work contract period, the employer must update its records to reflect the change. The employer must continue to keep this information up to date until the end of the work contract period, including any extensions. The employer must retain the updated information in accordance with § 655.167(c)(9) and must make this updated information available in the event of a post-certification audit or upon request by the Department. The Department may share the information it receives from employers with any other Federal agency, as appropriate for investigative or enforcement purpose, as set forth in paragraph (f) of this section.

* * * * *

■ 11. Amend § 655.132 by revising paragraph (e)(1) to read as follows:

§ 655.132 H–2A labor contractor filing requirements.

* * * * *

(e) * * *

(1) All housing used by workers and owned, operated, or secured by the fixed-site agricultural business complies with the applicable standards as set forth in § 655.122(d) and certified by the SWA and that the fixed-site agricultural business has agreed to comply with the requirements at § 655.135(n); and

* * * * *

■ 12. Amend § 655.135 by revising the introductory text and paragraph (h) and adding paragraphs (m) through (p) to read as follows:

§ 655.135 Assurance and obligations of H–2A employers.

An employer seeking to employ H–2A workers must agree as part of the *Application for Temporary Employment Certification* and job offer that it will abide by the requirements of this subpart and of 29 CFR part 501 and must make each of the following additional assurances:

* * * * *

(h) *No unfair treatment.* (1) The employer has not and will not intimidate, threaten, restrain, coerce, blacklist, discharge or in any manner discriminate against, and has not and will not cause any person to intimidate, threaten, restrain, coerce, blacklist, or in any manner discriminate against, any person who has:

(i) Filed a complaint under or related to 8 U.S.C. 1188 or this subpart or any Department regulation in this chapter or 29 CFR part 501 promulgated under 8 U.S.C. 1188;

(ii) Instituted or caused to be instituted any proceeding under or related to 8 U.S.C. 1188 or this subpart or any Department regulation in this chapter or 29 CFR part 501 promulgated under 8 U.S.C. 1188;

(iii) Testified or is about to testify in any proceeding under or related to 8 U.S.C. 1188 or this subpart or any Department regulation in this chapter or 29 CFR part 501 promulgated under 8 U.S.C. 1188;

(iv) Consulted with an employee of a legal assistance program or an attorney on matters related to 8 U.S.C. 1188 or this subpart or any Department regulation in this chapter or 29 CFR part 501 promulgated under 8 U.S.C. 1188;

(v) Consulted with a key service provider on matters related to 8 U.S.C. 1188 or this subpart or any Department regulation in this chapter or 29 CFR part 501 promulgated under 8 U.S.C. 1188;

(vi) Exercised or asserted on behalf of themself or others any right or protection afforded by 8 U.S.C. 1188 or this subpart or any Department regulation in this chapter or 29 CFR part 501 promulgated under 8 U.S.C. 1188; or

(vii) Filed a complaint, instituted, or caused to be instituted any proceeding; or testified, assisted, or participated (or is about to testify, assist, or participate) in any investigation, proceeding, or hearing under or related to any applicable Federal, State, or local laws or regulations, including safety and health, employment, and labor laws.

(2) With respect to any person engaged in agriculture as defined and applied in 29 U.S.C. 203(f), the employer has not and will not intimidate, threaten, restrain, coerce, blacklist, discharge or in any manner discriminate against, and has not and will not cause any person to intimidate, threaten, restrain, coerce, blacklist, or in any manner discriminate against, any person because such person:

(i) Has engaged in activities related to self-organization, including any effort to form, join, or assist a labor organization; or has engaged in other concerted activities for the purpose of mutual aid or protection relating to wages or working conditions; or has refused to engage in any or all of such activities; or

(ii) Has refused to attend an employer-sponsored meeting with the employer or its agent, representative or designee, if the primary purpose of the meeting is to communicate the employer's opinion concerning any activity protected by this subpart; or has refused to listen to employer-sponsored speech or view employer-sponsored communications, the primary purpose of which is to communicate the employer's opinion concerning any activity protected by this subpart.

* * * * *

(m) *Designation of representative.* With respect to any H–2A worker or worker in corresponding employment engaged in agriculture as defined and applied in 29 U.S.C. 203(f), employed at the place(s) of employment included in the *Application for Temporary Employment Certification,* the employer must permit a worker to designate a representative to attend any investigatory interview that the worker reasonably believes might result in disciplinary action and must permit the worker to receive advice and active assistance from the designated representative during any such investigatory interview. Where the designated representative is present at the worksite at the time of the investigatory interview, the employer must permit the representative to attend the investigatory interview in person. Where the designated representative is not present at the time and place of the investigatory interview, the employer must permit the representative to attend the investigatory interview remotely, including by telephone, videoconference, or other means.

(n) *Access to worker housing.* Workers residing in employer-furnished housing must be permitted to invite, or accept at their discretion, guests to their living quarters and/or the common areas or outdoor spaces near such housing during time that is outside of the workers' workday subject only to reasonable restrictions designed to protect worker safety or prevent interference with other workers' enjoyment of these areas. Because workers' ability to accept guests at their discretion depends on the ability of potential guests to contact and seek an invitation from those workers, restrictions impeding this ability to contact and seek an invitation will be evaluated as restrictions on the workers' ability to accept guests.

(o) *Passport withholding.* During the period of employment that is the subject of the *Application for Temporary Labor Certification,* the employer may not hold or confiscate a worker's passport, visa, or other immigration or government identification document *except* where the worker states in writing that: the worker voluntarily requested that the employer keep these documents safe, the employer did not direct the worker to submit such a request, and the worker understands that the passport, visa, or other immigration or government identification document will be returned to the worker immediately upon the worker's request.

(p) *Foreign worker recruitment.* The employer, and its attorney or agent, as applicable, must comply with § 655.137(a) by providing a copy of all agreements with any agent or recruiter whom it engages or plans to engage in the recruitment of H–2A workers, and the identity and location of the persons and entities hired by or working for the agent or recruiter and any of the agents and employees of those persons and entities, to recruit foreign workers. Pursuant to § 655.130(a), the agreements and information must be filed with the *Application for Temporary Employment Certification.* The employer must update this documentation in accordance with § 655.137(c).

■ 13. Add § 655.137 to read as follows:

§ 655.137 Disclosure of foreign worker recruitment.

(a) If the employer engages or plans to engage an agent or foreign labor recruiter, directly or indirectly, in international recruitment, the employer, and its attorney or agent, as applicable, must provide copies of all contracts and agreements with any agent and/or recruiter, executed in connection with the job opportunity, as specified in § 655.135(p). These agreements must contain the contractual prohibition against charging fees as set forth in § 655.135(k).

(b) The employer, and its attorney or agent, as applicable, must provide all recruitment-related information required in the *Application for Temporary Employment Certification,* as defined in § 655.103(b), which includes the identity and location of all persons and entities hired by or working for the recruiter or agent, and any of the agents or employees of those persons and entities, to recruit prospective foreign workers for the H–2A job opportunity.

(c) The employer must continue to keep the foreign labor recruiter information referenced in paragraphs (a) and (b) of this section up to date until the end of the work contract period. The employer must retain the updated information in accordance with § 655.167(c)(8) and must make this updated information available in the event of a post-certification audit or upon request by the Department. The Department may share the foreign worker recruitment information it receives from employers with any other Federal agency, as appropriate for investigative or enforcement purpose, as set forth in § 655.130(f).

(d) The Department of Labor will maintain a publicly available list of agents and recruiters (including government registration numbers, if any) who are party to the agreements employers submit, as well as the persons and entities the employer identified as hired by or working for the recruiter and the locations in which they are operating.

■ 14. Amend § 655.145 by revising the section heading and paragraph (b) to read as follows:

§ 655.145 Pre-determination amendments to applications for temporary employment certification.

* * * * *

(b) *Minor changes to the period of employment.* The *Application for Temporary Employment Certification* may be amended to make minor changes in the total period of employment before the CO issues a final determination. Changes will not be effective until submitted in writing and approved by the CO. In considering whether to approve the request, the CO will review the reason(s) for the request, determine whether the reason(s) are on the whole justified, and take into account the effect any change(s) would have on the adequacy of the underlying test of the domestic labor market for the job opportunity. An employer must demonstrate that the change to the period of employment could not have been foreseen, and the crops or commodities will be in jeopardy prior to the expiration of an additional recruitment period. Upon acceptance of an amendment, the CO will submit to the SWA any necessary modification to the job order.

■ 15. Amend § 655.167 by revising paragraphs (c)(6) and (7) and adding paragraphs (c)(8) through (12) to read as follows:

§ 655.167 Document retention requirements of H–2A employers.

* * * * *

(c) * * *

(6) The work contract or a copy of the *Application for Temporary Employment Certification* as defined in § 655.103(b) and specified in § 655.122(q).

(7) If applicable, records of notice to the NPC and to DHS of the abandonment of employment or

termination for cause of a worker as set forth in § 655.122(n).

(8) Written contracts with agents or recruiters as specified in § 655.137(a) and the identities and locations of persons hired by or working for the agent or recruiter and the agents and employees of these agents and recruiters, as specified in § 655.137(b).

(9) The identity, location, and contact information of all persons who are the owners of each employer, as specified in § 655.130(a)(2), and the identity, location, and contact information of all persons and entities who are the operators of the place of employment (if different than the employers) and of all persons who manage or supervise any H–2A worker sponsored under the *Application for Temporary Employment Certification* or any worker in corresponding employment, as specified in § 655.130(a)(3).

(10) If applicable, disciplinary records, including each step of progressive discipline, any evidence the worker presented in their defense, any investigation related to the termination, and any subsequent instruction afforded the worker.

(11) If applicable, records indicating the reason(s) for termination of any worker, including disciplinary records described in § 655.122(n)(4)(ii) and this section, relating to the termination as set forth in § 655.122(n).

(12) If applicable, evidence demonstrating the employer notified the SWA and each worker of an unforeseen minor delay in the start date of need, as specified in § 655.175(b)(2)(i).

* * * * *

■ 16. Add § 655.175 to read as follows:

§ 655.175 Post-certification changes to applications for temporary employment certification.

(a) *No post-certification changes.* The *Application for Temporary Employment Certification* may not be changed after certification, except where authorized in this subpart. The employer is obligated to comply with the terms and conditions of employment contained in the *Application for Temporary Employment Certification* and job order with respect to all workers recruited in connection with its certification.

(b) *Post-certification changes to the first date of work.* Where the work under the approved *Application for Temporary Employment Certification* will not begin on the first date of need certified and will be delayed for a period of no more than 14 calendar days, due to circumstances that could not have been foreseen, and the crops or commodities will be in jeopardy prior to the expiration of an additional recruitment period, the employer need not withdraw an approved *Application for Temporary Employment Certification,* provided the employer complies with the obligations at paragraphs (b)(1) and (2) of this section.

(1) In the event of a delay, the employer must provide to all workers who are already traveling to the place of employment, upon their arrival and without cost to the workers until work commences, daily subsistence in the same amount required during travel under § 655.122(h)(1), except for days for which the worker receives compensation under paragraph (b)(2)(ii) of this section. The employer must fulfill this subsistence obligation to the worker no later than the first date the worker would have been paid had they begun employment on time. Employers must comply with all other requirements of the certified *Application for Temporary Employment Certification* beginning on the first date of need certified, including but not limited to housing under § 655.122(d).

(2)(i) In the event of a delay, the employer must notify the SWA and each worker to be employed under the job order associated with the approved *Application for Temporary Employment Certification* of the delay at least 10 business days before the certified start date of need. The employer must notify the worker in writing, in a language understood by the worker, as necessary or reasonable, using the contact information the worker provided to the employer. If the worker provides electronic contact information, such as an email address or telephone number, the employer must send notice using that email address and telephone number. The employer may provide telephonic notice, provided the employer also sends written notice using the email or postal address provided by the worker. The employer must retain evidence of such notification under § 655.167(c)(12).

(ii) If the employer fails to provide timely notification required under paragraph (b)(2)(i) of this section to any worker(s), the employer must pay such worker(s) the highest of the hourly rates of pay at § 655.120(a), or, if applicable, the rate required under § 655.211(a)(1), for each hour of the offered work schedule in the job order, for each day that work is delayed, for a period up to 14 calendar days. The employer must fulfill this obligation to the worker no later than the first date the worker would have been paid had they begun employment on time.

(iii) For purposes of an employer's compliance with the three-fourths guarantee under § 655.122(i), any compensation paid to a worker under paragraph (b)(2)(ii) of this section for any workday included within the time period described in § 655.122(i) will be considered hours offered to the worker.

■ 17. Amend § 655.181 by revising paragraph (a)(1) to read as follows:

§ 655.181 Revocation.

(a) * * *

(1) The issuance of the temporary agricultural labor certification was not justified due to fraud or misrepresentation in the application process, including because the certification was issued in error to a debarred employer, including a successor in interest, during the period of debarment as set forth in § 655.182(c)(2);

* * * * *

■ 18. Amend § 655.182 by revising paragraphs (a), (b), and (d)(1)(viii) to read as follows:

§ 655.182 Debarment.

(a) *Debarment of an employer, agent, or attorney.* The OFLC Administrator may debar an employer, agent, or attorney from participating in any action under 8 U.S.C. 1188, this subpart, or 29 CFR part 501 subject to the time limits set forth in paragraph (c) of this section, if the OFLC Administrator finds that the employer, agent, or attorney substantially violated a material term or condition of the temporary agricultural labor certification, with respect to H–2A workers; workers in corresponding employment; or U.S. workers improperly rejected for employment, or improperly laid off or displaced.

(b) *Effect on future applications.* (1) No application for H–2A workers may be filed by or on behalf of a debarred employer, or by an employer represented by a debarred agent or attorney, subject to the term limits set forth in paragraph (c)(2) of this section. If such an application is filed, it will be denied without review.

(2) No application for H–2A workers may be filed by or on behalf of a successor in interest to a debarred employer, agent, or attorney, subject to the term limits set forth in paragraph (c)(2) of this section. If the CO determines that such an application is filed, the CO will issue a NOD pursuant to § 655.141 or deny the application pursuant to § 655.164, as appropriate depending upon the status of the *Application for Temporary Employment Certification,* solely on the basis that the entity is a successor in interest to a debarred employer, agent, or attorney. The employer, agent, or attorney may appeal its status as a successor in

interest to the debarred entity, pursuant to the procedures for appeals of CO determinations at § 655.171.

* * * * *

(d) * * *

(1) * * *

(viii) A violation of the requirements of § 655.135(j), (k), or (o);

* * * * *

■ 19. Add § 655.190 to read as follows:

§ 655.190 Severability.

If any provision of this subpart is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, or stayed pending further agency action, the provision will be construed so as to continue to give the maximum effect to the provision permitted by law, unless such holding is one of total invalidity or unenforceability, in which event the provision will be severable from this part and shall not affect the remainder thereof.

■ 20. Amend § 655.210 by revising paragraph (g) to read as follows:

§ 655.210 Contents of herding and range livestock job orders.

* * * * *

(g) *Rates of pay.* (1) The employer must offer, advertise in its recruitment, and pay a wage that is at least the highest of the following rates in effect at the time work is performed, whichever is highest, for every month of the job order period or portion thereof:

(i) The monthly AEWR, as specified in § 655.211;

(ii) The agreed-upon collective bargaining wage;

(iii) The applicable minimum wage imposed by Federal or State law or judicial action; or

(iv) Any other wage rate the employer intends to pay.

(2) The offered wage shall not be based on commissions, bonuses, or other incentives, unless the employer guarantees a wage that equals or exceeds the monthly AEWR, the agreed-upon collective bargaining wage, the applicable minimum wage imposed by Federal or State law or judicial action, any agreed-upon collective bargaining rate, or any other wage rate the employer intends to pay, whichever is highest, and must be paid to each worker free and clear without any unauthorized deductions.

(3) The employer may prorate the wage for the initial and final pay periods of the job order period if its pay period does not match the beginning or ending dates of the job order. The employer also may prorate the wage if a worker is voluntarily unavailable to work for personal reasons.

(4) If applicable, the employer must state in the job order:

(i) That overtime hours may be available;

(ii) The wage rate(s) to be paid for any such overtime hours;

(iii) The circumstances under which the wage rate(s) for overtime hours will be paid, including, but not limited to, after how many hours in a day or workweek the overtime wage rate will be paid, and whether overtime wage rates will vary between-place(s) of employment; and

(iv) Where the overtime pay is required by law, the applicable Federal, State, or local law requiring the overtime pay.

* * * * *

■ 21. Amend § 655.211 by revising paragraph (a) to read as follows:

§ 655.211 Herding and range livestock wage rate.

(a) *Compliance with rates of pay.* (1) To comply with its obligation under § 655.210(g), an employer must offer, advertise in its recruitment, and pay each worker employed under §§ 655.200 through 655.235 a wage that is at least the highest of the monthly AEWR established under this section, the agreed-upon collective bargaining wage, the applicable minimum wage imposed by Federal or State law or judicial action, or any other wage rate the employer intends to pay. The employer must list all potentially applicable wage rates in the job order and must offer and advertise all of these wage rates in its recruitment.

(2) If the monthly AEWR established under this section is adjusted during a work contract, and is higher than the agreed-upon collective bargaining wage, the applicable minimum wage imposed by Federal or State law or judicial action in effect at the time the work is performed, and any other wage rate the employer offered to pay, the employer must pay at least that adjusted monthly AEWR upon the effective date of the updated monthly AEWR published by the Department in the **Federal Register**.

* * * * *

PART 658—ADMINISTRATIVE PROVISIONS GOVERNING THE WAGNER-PEYSER ACT EMPLOYMENT SERVICE

■ 22. The authority citation for part 658 continues to read as follows:

Authority: Secs. 189, 503, Pub. L. 113–128, 128 Stat. 1425 (Jul. 22, 2014); 29 U.S.C. chapter 4B.

■ 23. Revise § 658.500 to read as follows:

§ 658.500 Scope and purpose of subpart.

(a) This subpart contains the regulations governing the discontinuation of services provided by the ES to employers pursuant to parts 652 and 653 of this chapter.

(b) For purposes of this subpart only, where the term ''employer'' is used, it refers to employers, agents, farm labor contractors, joint employers, and successors in interest to any employer, agent, farm labor contractor, or joint employer, as defined at § 651.10 of this chapter. A successor in interest to an employer, agent, or farm labor contractor may be held liable for the duties and obligations of that employer, agent, or farm labor contractor for purposes of recruitment of workers through the ES clearance system or enforcement of ES regulations, regardless of whether such successor in interest has succeeded to all the rights and liabilities of the predecessor entity.

■ 24. Revise and republish § 658.501 to read as follows:

§ 658.501 Basis for discontinuation of services.

(a) SWA officials must initiate procedures for discontinuation of services to employers who:

(1) Submit and refuse to correct or withdraw job orders containing terms and conditions that are contrary to employment-related laws;

(2) Submit job orders and refuse to provide assurances, or refuse to withdraw job orders that do not contain assurances, required pursuant to the Agricultural Recruitment System for U.S. Workers at part 653, subpart F, of this chapter;

(3) Are found through field checks or otherwise to have either misrepresented the terms or conditions of employment specified on job orders or failed to comply fully with assurances made on job orders;

(4) Are found by a final determination by an appropriate enforcement agency to have violated any employment-related laws and notification of this final determination has been provided to the Department or the SWA by that enforcement agency, including those who are currently debarred from participating in the H–2A or H–2B foreign labor certification programs pursuant to § 655.73 or § 655.182 of this chapter or 29 CFR 501.20 or 503.24;

(5) Are found to have violated ES regulations pursuant to § 658.411 or § 658.419;

(6) Refuse to accept qualified workers referred through the clearance system for criteria clearance orders filed pursuant to part 655, subpart B, of this chapter;

(7) Refuse to cooperate in field checks conducted pursuant to § 653.503 of this chapter; or

(8) Repeatedly cause the initiation of the procedures for discontinuation of services pursuant to paragraphs (a)(1) through (7) of this section.

(b) If an ES office or SWA has information that an employer participating in the ES may have committed fraud or misrepresentation in connection with its current or prior temporary labor certification or may not have complied with the terms of such certification, under, for example the H–2A and H–2B visa programs, SWA officials must notify the OFLC National Processing Center and the Wage and Hour Division of the alleged noncompliance as applicable under § 655.185 and 29 CFR 501.2, 501.6, 503.3, and 503.7. If the circumstances occurred within the previous 3 years, SWA officials must determine whether there is a basis under paragraph (a) of this section for which the SWA must initiate procedures for discontinuation of services.

(c) [Reserved]

■ 25. Revise § 658.502 to read as follows:

§ 658.502 Notification to employers of intent to discontinue services.

(a) Except as provided in paragraph (b) of this section, where the SWA determines that there is an applicable basis for discontinuation of services under § 658.501(a)(1) through (8), the SWA must notify the employer in writing that it intends to discontinue the provision of ES services in accordance with this section and must provide the reasons for proposing discontinuation of services.

(1) Where the decision is based on § 658.501(a)(1), the SWA must specify the date the order was submitted, the job order involved, and the terms and conditions contrary to employment-related laws and the laws involved. The SWA must notify the employer in writing that all ES services will be terminated unless the employer within 20 working days:

(i) Provides adequate evidence that the terms and conditions are not contrary to employment-related laws;

(ii) Withdraws the terms and conditions and resubmits the job order in compliance with all employment-related laws; or

(iii) If the job is no longer available, makes assurances that all future job orders submitted will be in compliance with all employment-related laws.

(2) Where the decision is based on § 658.501(a)(2), the SWA must specify the date the order was submitted, the job order involved, the assurances involved, and explain how the employer refused to provide the assurances. The SWA must notify the employer that all ES services will be terminated unless the employer within 20 working days:

(i) Resubmits the order with the required assurances; or

(ii) If the job is no longer available, makes assurances that all future job orders submitted will contain all assurances required pursuant to the Agricultural Recruitment System for U.S. Workers at part 653, subpart F, of this chapter.

(3) Where the decision is based on § 658.501(a)(3), the SWA must specify the terms and conditions the employer misrepresented or the assurances with which the employer did not fully comply, and explain how the employer misrepresented the terms or conditions or failed to comply with assurances on the job order. The SWA must notify the employer that all ES services will be terminated unless the employer within 20 working days:

(i) Provides adequate evidence that terms and conditions of employment were not misrepresented;

(ii) Provides adequate evidence that there was full compliance with the assurances made on the job orders; or

(iii) Provides adequate evidence that it has resolved the misrepresentation of terms and conditions of employment or noncompliance with assurances and provides adequate assurance that specifications on future orders will accurately represent the terms and conditions of employment and that there will be full compliance with all job order assurances.

(4) Where the decision is based on § 658.501(a)(4), the SWA must provide evidence of the final determination, including debarment. For final determinations, the SWA must specify the enforcement agency's findings of facts and conclusions of law as to the employment-related law violation(s). For final debarment orders, the SWA must specify the time period for which the employer is debarred from participating in one of the Department's foreign labor certification programs. The SWA must notify the employer that all ES services will be terminated unless the employer within 20 working days:

(i) Provides adequate evidence that the enforcement agency's determination is not final because, for example, it has been stayed pending appeal, overturned, or reversed; or

(ii) Provides adequate evidence that, as applicable:

(A) The Department's debarment is no longer in effect; and

(B) The employer has completed all required actions imposed by the enforcement agency as a consequence of the violation, including payment of any fines or restitution to remediate the violation; and

(iii) Provides assurances that any policies, procedures, or conditions responsible for the violation have been corrected and the same or similar violations are not likely to occur in the future.

(5) Where the decision is based on § 658.501(a)(5), the SWA must specify which ES regulation, as defined in § 651.10, the employer has violated and must provide basic facts to explain the violation. The SWA must notify the employer that all ES services will be terminated unless the employer within 20 working days:

(i) Provides adequate evidence that the employer did not violate ES regulations; or

(ii) Provides adequate evidence that appropriate restitution has been made or remedial action taken; and

(iii) Provides assurances that any policies, procedures, or conditions responsible for the violation have been corrected and the same or similar violations are not likely to occur in the future.

(6) Where the decision is based on § 658.501(a)(6), the SWA must indicate that the employer filed the job order pursuant to part 655, subpart B, of this chapter, and specify the name of each worker the SWA referred and the employer did not accept. The SWA must notify the employer that all ES services will be terminated unless the employer within 20 working days:

(i) Provides adequate evidence that the workers were accepted; or

(ii) Provides adequate evidence that the workers were not available to accept the job; or

(iii) Provides adequate evidence that the workers were not qualified; or

(iv) Provides adequate evidence that the workers were referred after the time period described in § 655.135(d) of this chapter elapsed; or

(v) Provides adequate evidence that:

(A) After refusal, the employer accepted the qualified workers referred; or

(B) Appropriate restitution has been made or other remedial action taken; and

(vi) Provides assurances that qualified workers referred in the future will be accepted or, if the time period described in § 655.135(d) of this chapter has lapsed, provides assurances that qualified workers referred on all future criteria clearance orders will be accepted.

(7) Where the decision is based on § 658.501(a)(7), the SWA must explain how the employer did not cooperate in the field check. The SWA must notify the employer that all ES services will be terminated unless the employer within 20 working days:

(i) Provides adequate evidence that it did cooperate; or

(ii) Immediately cooperates in the conduct of field checks; and

(iii) Provides assurances that it will cooperate in future field checks.

(8) Where the decision is based on § 658.501(a)(8), the SWA must list and provide basic facts explaining the prior instances where the employer has repeatedly caused initiation of discontinuation proceedings. The SWA must notify the employer that all ES services will be terminated unless the employer within 20 working days provides adequate evidence that the SWA's initiation of discontinuation in prior proceedings was unfounded.

(b) SWA officials must discontinue services immediately in accordance with § 658.503, without providing the notice described in this section, if an employer has met any of the bases for discontinuation of services under § 658.501(a) and, in the judgment of the State Administrator, exhaustion of the administrative procedures set forth in this section would cause substantial harm to workers.

■ 26. Revise § 658.503 to read as follows:

§ 658.503 Discontinuation of services.

(a) Within 20 working days of receipt of the employer's response to the SWA's notification under § 658.502(a), or at least 20 working days after the SWA's notification has been received by the employer if the SWA does not receive a response, the SWA must notify the employer in writing of its final determination. If the SWA determines that the employer did not provide a satisfactory response in accordance with § 658.502(a), the SWA's notification must specify the reasons for its determination and state that the discontinuation of services is effective 20 working days from the date of the notification. The notification must also state that the employer may request reinstatement or appeal the determination by requesting a hearing pursuant to § 658.504, and that a request for a hearing stays the discontinuation pending the outcome of the hearing. If the employer does not request a hearing, the SWA must also notify the ETA Office of Workforce Investment of any final determination to discontinue ES services within 10 working days of the date the determination becomes effective.

(b) Where the SWA discontinues services immediately under § 658.502(b), the SWA's written notification must specify the facts supporting the applicable basis for discontinuation under § 658.501(a), the reasons that exhaustion of the administrative procedures would cause substantial harm to workers, and that services are discontinued as of the date of the notification. The notification must also state that the employer may request reinstatement or appeal the determination by requesting a hearing pursuant to § 658.504, and that a request for a hearing relating to immediate discontinuation does not stay the discontinuation pending the outcome of the hearing. Within 10 working days of the date of issuance, the SWA must also notify the ETA Office of Workforce Investment of any determination to immediately discontinue ES services.

(c) If the SWA discontinues services to an employer that is subject to Federal Contractor Job Listing Requirements, the SWA must notify the ETA regional office immediately.

(d) If the SWA discontinues services to an employer based on a complaint filed pursuant to § 658.411, the SWA must notify the complainant of the employer's discontinuation of services.

(e) If the SWA discontinues services to an employer, the employer cannot participate in or receive Wagner-Peyser Act ES Services provided by the ES, including by any SWA, to employers pursuant to parts 652 and 653 of this chapter. From the date of discontinuance, the SWA that issued the determination must remove the employer's active job orders from the clearance system. No SWA may process any future job orders from the employer or provide any other services pursuant to parts 652 and 653 of this chapter to the employer unless services have been reinstated under § 658.504.

(f) SWAs must continue to provide the full range of ES and other appropriate services to workers whose employers experience discontinuation of services under this subpart.

■ 27. Revise § 658.504 to read as follows:

§ 658.504 Reinstatement of services.

(a) Where the SWA discontinues services to an employer under § 658.502(b) or § 658.503, the employer may submit a written request for reinstatement of services to the SWA or may, within 20 working days of receiving notice of the SWA's final determination, appeal the discontinuation by submitting a written request for a hearing.

(b) If the employer submits a written request for reinstatement of services to the SWA:

(1) Within 20 working days of receipt of the employer's request for reinstatement, the SWA must notify the employer of its decision to grant or deny the request. If the SWA denies the request for reinstatement, it must specify the reasons for the denial and notify the employer that it may request a hearing, in accordance with paragraph (c) of this section, within 20 working days.

(2) The SWA must reinstate services if:

(i) The employer provides adequate evidence that the policies, procedures, or conditions responsible for the previous discontinuation of services have been corrected and that the same or similar circumstances are not likely to occur in the future; and

(ii) The employer provides adequate evidence that it has responded to all findings of an enforcement agency, SWA, or ETA, including payment of any fines or restitution to remediate the violation, that were the basis of the discontinuation of services, if applicable.

(c) If the employer submits a timely request for a hearing:

(1) The SWA must follow the procedures set forth in § 658.417; and

(2) The SWA must reinstate services to the employer if ordered to do so by a State hearing official, Regional Administrator, or Federal Administrative Law Judge as a result of a hearing offered pursuant to paragraph (c)(1) of this section.

(d) Within 10 working days of the date of issuance, the SWA must notify the ETA Office of Workforce Investment of any determination to reinstate ES services, or any decision on appeal upholding a SWA's determination to discontinue services.

Title 29: Labor

Wage and Hour Division

PART 501—ENFORCEMENT OF CONTRACTUAL OBLIGATIONS FOR TEMPORARY ALIEN AGRICULTURAL WORKERS ADMITTED UNDER SECTION 218 OF THE IMMIGRATION AND NATIONALITY ACT

■ 28. The authority citation for part 501 continues to read as follows:

Authority: 8 U.S.C. 1101(a)(15)(H)(ii)(a), 1184(c), and 1188; 28 U.S.C. 2461 note; and sec. 701, Pub. L. 114–74, 129 Stat. 584.

■ 29. Amend § 501.3 by:

■ a. In paragraph (a), adding the definitions of ''Key service provider'' and ''Labor organization'' in alphabetical order and removing the definition of ''Successor in interest''; and
■ b. Adding paragraph (d).
The additions read as follows:

§ 501.3 Definitions.

(a) * * *

Key service provider. A health-care provider; a community health worker; an education provider; a translator or interpreter; an attorney, legal advocate, or other legal service provider; a government official, including a consular representative; a member of the clergy; an emergency services provider; a law enforcement officer; and any other provider of similar services.

Labor organization. Any organization of any kind, or any agency or employee representation committee or plan, in which workers participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work.

* * * * *

(d) *Definition of single employer for purposes of temporary or seasonal need and contractual obligations.* Separate entities will be deemed a single employer (sometimes referred to as an ''integrated employer'') for purposes of assessing temporary or seasonal need and for enforcement of contractual obligations if they meet the definition of single employer in this paragraph (e). Under the definition of single employer, a determination of whether separate entities are a single employer is not determined by a single factor, but rather the entire relationship is viewed in its totality. Factors considered in determining whether two or more entities consist of a single employer include:

(1) Common management;

(2) Interrelation between operations;

(3) Centralized control of labor relations; and

(4) Degree of common ownership/financial control.

■ 30. Amend § 501.4 by revising paragraph (a) to read as follows:

§ 501.4 Discrimination prohibited.

(a)(1) A person may not intimidate, threaten, restrain, coerce, blacklist, discharge, or in any manner discriminate against any person who has:

(i) Filed a complaint under or related to 8 U.S.C. 1188 or this part;

(ii) Instituted or causes to be instituted any proceedings related to 8 U.S.C. 1188, 20 CFR part 655, subpart B, or this part;

(iii) Testified or is about to testify in any proceeding under or related to 8 U.S.C. 1188, 20 CFR part 655, subpart B, or this part;

(iv) Consulted with an employee of a legal assistance program or an attorney on matters related to 8 U.S.C. 1188, 20 CFR part 655, subpart B, or this part;

(v) Consulted with a key service provider on matters related to 8 U.S.C. 1188, 20 CFR part 655, subpart B, or this part;

(vi) Exercised or asserted on behalf of themselves or others any right or protection afforded by 8 U.S.C. 1188, 20 CFR part 655, subpart B, or this part; or

(vii) Filed a complaint, instituted, or caused to be instituted any proceeding, or testified, assisted, or participated (or is about to testify, assist or participate) in any investigation, proceeding or hearing under or related to any applicable Federal, State, or local laws or regulations, including safety and health, employment, and labor laws.

(2) With respect to any person engaged in agriculture as defined and applied in 29 U.S.C. 203(f), a person may not intimidate, threaten, restrain, coerce, blacklist, discharge or in any manner discriminate against, and may not cause any person to intimidate, threaten, restrain, coerce, blacklist, or in any manner discriminate against, any person because such person:

(i) Has engaged in activities related to self-organization, including any effort to form, join, or assist a labor organization; has engaged in other concerted activities for the purpose of mutual aid or protection relating to wages or working conditions; or has refused to engage in any or all of such activities; or

(ii) Has refused to attend an employer-sponsored meeting with the employer or its agent, representative or designee, the primary purpose of which is to communicate the employer's opinion concerning any activity protected by this subpart; or listen to speech or view communications, the primary purpose of which is to communicate the employer's opinion concerning any activity protected by this subpart.

* * * * *

■ 31. Add § 501.10 to subpart A to read as follows:

§ 501.10 Severability.

If any provision of this part is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, or stayed pending further agency action, the provision will be construed so as to continue to give the maximum effect to the provision permitted by law, unless such holding is one of total invalidity or unenforceability, in which event the provision will be severable from this part and will not affect the remainder thereof.

■ 32. Amend § 501.20 by revising paragraphs (a), (b), (d)(1)(viii), and adding paragraph (j) to read as follows:

§ 501.20 Debarment and revocation.

(a) *Debarment of an employer, agent, or attorney.* The WHD Administrator may debar an employer, agent, or attorney from participating in any action under 8 U.S.C. 1188, 20 CFR part 655, subpart B, or this part, subject to the time limits set forth in paragraph (c) of this section, if the WHD Administrator finds that the employer, agent, or attorney substantially violated a material term or condition of the temporary agricultural labor certification, with respect to H–2A workers, workers in corresponding employment, or U.S. workers improperly rejected for employment, or improperly laid off or displaced, by issuing a Notice of Debarment.

(b) *Effect on future applications.* (1) No application for H–2A workers may be filed by or on behalf of a debarred employer, or by an employer represented by a debarred agent or attorney, subject to the time limits set forth in paragraph (c)(2) of this section. If such an application is filed, it will be denied without review.

(2) No application for H–2A workers may be filed by or on behalf of a successor in interest, as defined in 20 CFR 655.104, to a debarred employer, agent, or attorney, subject to the term limits set forth in paragraph (c)(2) of this section. If the CO determines that such an application is filed, the CO will issue a Notice of Deficiency (NOD) pursuant to 20 CFR 655.141 or deny the application pursuant to 20 CFR 655.164, as appropriate depending upon the status of the *Application for Temporary Employment Certification,* solely on the basis that the entity is a successor in interest to a debarred employer, agent, or attorney. The employer, agent, or attorney may appeal its status as a successor in interest to the debarred entity, pursuant to the procedures for appeals of CO determinations at 20 CFR 655.171.

* * * * *

(d) * * *

(1) * * *

(viii) A violation of the requirements of 20 CFR 655.135(j), (k), or (o);

* * * * *

(j) *Successors in interest.* When an employer, agent, or attorney is debarred

under this section, any successor in interest to the debarred employer, agent, or attorney is also debarred, regardless of whether the successor is named or not named in the notice of debarment issued under paragraph (a) of this section.

■ 33. Amend § 501.33 by revising paragraph (b)(2) to read as follows:

§ 501.33 Request for hearing.

* * * * *

(b) * * *

(2) Specify the issue or issues stated in the notice of determination giving rise to such request (any issues not raised in the request may be deemed waived);

* * * * *

José Javier Rodríguez,

Assistant Secretary for Employment and Training, Labor.

Jessica Looman,

Administrator, Wage and Hour Division.
