FEDERAL REGISTER

Vol. 89 Tuesday,
No. 89 May 7, 2024

Pages 37965–38836

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 89, No. 89
Tuesday, May 7, 2024

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 981

[Doc. No. AMS–SC–21–0089]

Almonds Grown in California; Amendments to the Marketing Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rulemaking amends Marketing Order No. 981, which regulates the handling of almonds grown in California. This final rule modifies the definition of almonds and shelled almonds, establishes a definition for ''almond biomass,'' and changes dates when the Almond Board of California (Board) conducts elections to coincide with assessment collections and when the Board submits volume regulation recommendations to USDA. The amendments modify certain marketing order provisions to facilitate orderly administration of the program. Additionally, the amendments modernize, simplify, or align language with current industry practices and definitions.

DATES: This rule is effective June 6, 2024.

FOR FURTHER INFORMATION CONTACT: Thomas Nalepa, Marketing Specialist, or Matthew Pavone, Chief, Rulemaking Services Branch, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, Stop 0237, Washington, DC 20250–0237; Telephone: (202) 720–8085, Fax: (202) 720–8938, or Email: *Thomas.Nalepa@usda.gov* or *Matthew.Pavone@usda.gov.*

Small businesses may request information on complying with this regulation by contacting Richard Lower, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–8085, or Email: *Richard.Lower@usda.gov.*

SUPPLEMENTARY INFORMATION: This action, pursuant to 5 U.S.C. 553, proposes to amend regulations issued to carry out a marketing order as defined in 7 CFR 900.2(j). This final rule is issued under Marketing Order No. 981, as amended (7 CFR part 981), regulating the handling of almonds grown in California. Part 981 (referred to as the ''Order'') is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the ''Act.'' The Board locally administers the Order and is comprised of growers and handlers of almonds operating within the area of production.

The Agricultural Marketing Service (AMS) is issuing this final rule in conformance with Executive Orders 12866, 13563, and 14094. Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 14094 reaffirms, supplements, and updates Executive Order 12866 and further directs agencies to solicit and consider input from a wide range of affected and interested parties through a variety of means. This action falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Order 12866 review.

This final rule has been reviewed under Executive Order 13175—Consultation and Coordination with Indian Tribal Governments, which requires agencies to consider whether their rulemaking actions would have Tribal implications. AMS has determined this final rule is unlikely to have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

This final rule has also been reviewed under Executive Order 12988, Civil Justice Reform. This rule shall not be deemed to preclude, preempt, or supersede any State program covering almonds grown in California.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 8c(15)(A) of the Act (7 U.S.C. 608c(15)(A)), any handler subject to an order may file with the U.S. Department of Agriculture (USDA) a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed no later than 20 days after the date of entry of the ruling.

Section 1504 of the Food, Conservation, and Energy Act of 2008 (2008 Farm Bill) (Pub. L. 110–246) amended section 8c(17) of the Act, which in turn required the addition of supplemental rules of practice to 7 CFR part 900 (73 FR 49307; August 21, 2008). The amendment of section 8c(17) of the Act and the supplemental rules of practice authorize the use of informal rulemaking (5 U.S.C. 553) to amend Federal fruit, vegetable, and nut marketing agreements and orders. USDA may use informal rulemaking to amend marketing orders depending upon the nature and complexity of the proposed amendments, the potential regulatory and economic impacts on affected entities, and any other relevant matters.

AMS has considered these factors and has determined that the amendments in this final rule are not unduly complex, and the nature of the amendments is appropriate for utilizing the informal rulemaking process to amend the Order. This final rule encompasses changes that are primarily administrative or modernizing in nature. Following are the amendments voted on and the results for each:

- Amendment 1—''Modifying the definitions for ''Almonds'' and ''Shelled

almonds,'' adding a definition for ''Almond biomass,'' changing the term ''Control Board'' to ''Board,'' and replacing listed approved outlets for inedible kernels with the term ''accepted users.'' This amendment was favored by 86.61 percent of voting almond producers, representing 94.99 percent of the production volume voted in the referendum.

- Amendment 2—''Changing the date from December 31 to March 31 for determining handler weighted votes in the nomination process for handler positions on the Board.'' This amendment was favored by 85.63 percent of voting almond producers, representing 94.28 percent of the production volume voted in the referendum.
- Amendment 3—''Changing from August 1 to September 1 the date the Board is required to submit volume regulation estimates/recommendations to the Secretary of Agriculture.'' This amendment was favored by 86.61 percent of voting almond producers, representing 93.02 percent of the production volume voted in the referendum.
- Amendment 4—''Removing language that requires separate accounting of certain excess funds and sets the reserve fund limit at approximately six months' ''expenses'' instead of six months' ''budget.'' This amendment was favored by 84.59 percent of voting almond producers, representing 80.65 percent of the production volume voted in the referendum.
- Amendment 5—''Adding authority for the Board to accept advanced assessments from handlers or borrow funds from commercial lenders.'' This amendment was favored by 63.59 percent of voting almond producers, representing 56.15 percent of the production volume voted in the referendum.

These changes simplify, clarify, or align Order language with current industry practices and definitions. A discussion of the potential regulatory and economic impacts on affected entities is discussed later in the ''Final Regulatory Flexibility Analysis'' section of this final rule. The amendments apply equally to all producers and handlers, regardless of size. The amendments also have no additional impact on the reporting, record-keeping, or compliance costs of small businesses.

The Board unanimously recommended seven proposed Order amendments following deliberations at a public meeting held on August 11, 2020. The Board submitted its formal recommendation to amend the Order through the informal rulemaking process on August 9, 2021. This final rule will amend the Order by modifying the definition of almonds and shelled almonds, establishing a definition for ''almond biomass,'' and changing dates when the Almond Board of California (Board) conducts elections to coincide with assessment collections and when the Board submits volume regulation recommendations to USDA.

A proposed rule soliciting public comments on the proposed amendments published in the **Federal Register** on April 27, 2023 (88 FR 25559). AMS received one comment in support of the proposed rule. After reviewing the comment, AMS republished the proposed rule without substantive change along with the referendum order in the **Federal Register** on October 4, 2023 (88 FR 68500). For the purposes of the referendum ballots, AMS combined Proposals 1, 3, and 4 of the republished proposed rule and referendum order. These were combined into Amendment 1 because they each simplify and modernize language to align the Order with current industry practice. Therefore, the seven amendments in the originally proposed rule yielded five amendments on the referendum ballot. The proposed rule and referendum order directed that a referendum among California almond growers be conducted from October 30, 2023, through November 20, 2023, to determine whether they favor the proposals. To become effective, the amendments had to be approved by either two-thirds of the producers voting in the referendum or by those representing at least two-thirds of the volume of almonds grown by those voting in the referendum.

During the referendum, producers showed overwhelming support for Amendments 1, 2, 3, and 4, referenced above, which were related to definitions and timeframes. Amendment 5, which would have added authority for the Board to accept advanced assessments from handlers or borrow funds from commercial lenders, failed to achieve two-thirds support from producers by vote or volume voting.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), AMS has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act are unique in that they are brought about through group action of essentially small entities acting on their own behalf.

There are approximately 7,600 almond growers in the production area and approximately 100 handlers subject to regulation under the Order. In the previous proposed rule published in the **Federal Register** on April 27, 2023 (88 FR 25559), the small agricultural almond producers are defined by the Small Business Administration (SBA) as those having annual receipts of less than $3,250,000, and small agricultural service firms are defined as those having annual receipts of less than $30,000,000 (13 CFR 121.201). Since that publication, the SBA updated the definition of small businesses to those having annual receipts of less than $3,750,000 for producers (Tree Nut Farming, North American Industry Classification System code 111335), and $34,000,000 for handlers (Postharvest Crop Activities, North American Industry Classification System code 115114) (13 CFR 121.201). Thus, AMS changed the thresholds to reflect the new SBA thresholds in this final rule. The changes do not impact AMS's ultimate determination regarding the impact of the rule on small entities.

The National Agricultural Statistics Service (NASS) reported in its 2022 Census of Agriculture (Census) that there were 7,596 almond farms with bearing acres in the production area. Additionally, the Census indicates that out of the 7,596 California farms with bearing acres of almonds, 4,805 (63 percent) have fewer than 100 bearing acres.

In its annual *Noncitrus Fruits and Nuts* publication, NASS reported a 2022 crop year average yield of 1,900 pounds per acre (shelled basis) and a season average grower price of $1.40 per pound. Therefore, a 100-acre farm with an average yield of 1,900 pounds per acre would produce about 190,000 pounds of almonds (1,900 pounds times 100 acres equals 190,000 pounds). At $1.40 per pound, that farm's production would be valued at $266,000 (190,000 pounds times $1.40 per pound equals $266,000). Since the Census indicated that 63 percent of California's almond farms are less than 100 acres, it could be concluded that the majority of California almond growers had annual receipts from the sale of almonds of less than $266,000 for the 2022 crop year, which is below the SBA threshold of $3,750,000 for small producers. Therefore, the majority of growers may be classified as small businesses.

To estimate the proportion of almond handlers that would be considered small or large businesses, it was assumed that the unit value per pound of almonds exported in a particular year could serve as a representative almond price at the handler level. A unit value for a commodity is the value of exports divided by the quantity exported. Data from the Global Agricultural Trade System (GATS) database of USDA's Foreign Agricultural Service showed that the value of almond exports from August 2022 to July 2023 (shelled equivalent, combining shelled and inshell) was $4.117 billion. The quantity of almond exports over that time-period was 1.784 billion pounds. Dividing the export value by the quantity yields a unit value of $2.31 per shelled pound ($4.117 billion divided by 1.784 billion pounds equals $2.31).

NASS estimated that the California almond industry produced 2.511 billion pounds of almonds in 2022. Applying the $2.31 derived representative handler price per pound to total industry production results in an estimated total revenue at the handler level of $5.80 billion (2.511 billion pounds times $2.31 per pound). With an estimated 100 handlers in the California almond industry, average revenue per handler would be approximately $58.0 million ($5.80 billion divided by 100). Assuming a normal distribution of revenues, most almond handlers shipped almonds valued at more than $34,000,000 during the 2022 crop year. Therefore, the majority of handlers may be classified as large businesses.

AMS has determined that the amendments, as effectuated by this final rule, will not have a significant impact on a substantial number of small businesses. Rather, large and small entities alike would be expected to benefit from the Board's improved ability to address important issues of interest to all on a timely basis. No small businesses are unduly or disproportionately burdened.

The amendments to the Order are modernizing in nature and align Order provisions with current industry definitions and practices. They define commonly used industry terminology and simplify language to more broadly identify disposition outlets of almonds.

Additionally, the amendments are necessary to adjust or align dates to allow for the inclusion of more available data when determining weighting of handler votes for Board nominations and providing volume regulation recommendations to the Secretary. These changes do not impact how volume is calculated for handler vote weighting, materially affect crop estimates, or adversely impact Board activities.

Finally, these amendments remove language that distinguishes between funds for administrative-research and funds for marketing promotion activities in the accounting of excess funds. It also sets the reserve fund limit at approximately six-months' expenses instead of the current six-months' budget. This is an administrative adjustment that provides technical clarification on the accounting of assessments and reserves. It does not impact the percentage of assessments available for refund, nor does it materially impact reserves.

The Board considered the benefits and costs of maintaining the status quo as an alternative to this action. However, AMS believes the amendments are beneficial in either clarifying or updating the language of the Order for industry or improving the Board's continuity of operations at no additional costs to industry.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Order's information collection requirements have been previously approved by OMB and assigned OMB No. 0581–0178, Vegetable and Specialty Crops. No changes in those requirements are necessary because of this action. Should any changes become necessary, they would be submitted to OMB for approval.

This final rule does not impose additional reporting or recordkeeping requirements on either small or large almond handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public-sector agencies.

AMS is committed to complying with the E-Government Act, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this action.

The Board's meetings are widely publicized throughout the California almond production area. All interested persons are invited to attend the meeting and encouraged to participate in Board deliberations on all issues. Like all Board meetings, the meetings held on December 9, 2019, August 11, 2020, and December 7, 2020, were public, and all entities, both large and small, were encouraged to express their views on the proposals.

A proposed rule concerning this action published in the **Federal Register** on April 27, 2023 (88 FR 25559). A copy of the rule was sent via email to the Board staff for distribution to all Board members and California almond growers and handlers. The proposed rule was also made available by USDA through the internet and the Office of the Federal Register. A 60-day comment period ending June 26, 2023, was provided to allow interested persons to respond to the proposals. AMS received one comment during the comment period. The comment supported the proposed amendments. Based on all the information available to AMS at this time, including the comments received in response to the proposed rule, no substantive changes will be made to the amendments as proposed.

A second proposed rule and referendum order was then published on October 4, 2023 (88 FR 68500). That document directed that a referendum among California almond growers be conducted from October 30, 2023, through November 20, 2023, to determine whether they favor the proposals. To become effective, the amendments had to be approved by either two-thirds of the producers voting in the referendum or by those representing at least two-thirds of the volume of almonds grown by those voting in the referendum. The referendum results show producers supported four amendments related to definitions and time frames by an average of 85.9 percent of producers voting, who represented 90.7 percent of the volume of almonds produced by those voting. Results also show that producers did not support by two-thirds voting or volume voting, the amendment to add authority for the Board to accept advanced assessments from handlers or borrow funds from commercial lenders.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *https://www.ams.usda.gov/rules-regulations/moa/small-businesses.* Any questions about the compliance guide should be sent to Richard Lower at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

Order Amending the Order Regulating the Handling of Almonds Grown in California

Findings and Determinations [1]

(a) Findings and Determinations Upon the Basis of the Rulemaking Record

The findings and determinations hereinafter set forth are supplementary to the findings and determinations which were previously made in connection with the issuance of Marketing Order 981; and all said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

1. Marketing Order 981, as amended, and as hereby amended, and all the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

2. Marketing Order 981, as amended, and as hereby further amended, regulates the handling of almonds grown in California and is applicable only to persons in the respective classes of commercial and industrial activity specified in the Order;

3. Marketing Order 981 as amended, and as hereby further amended, is limited in application to the smallest regional production area, which is practicable, consistent with carrying out the declared policy of the Act, and the issuance of several marketing orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the Act;

4. Marketing Order 981, as amended, and as hereby amended, prescribes, insofar as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the differences in the production and marketing of almonds produced or packed in the production area; and

5. All handling of almonds grown or handled in the production area, as defined in Marketing Order 981, is in the current of interstate or foreign commerce, or directly burdens, obstructs, or affects such commerce.

(b) Determinations

It is hereby determined that:

1. The issuance of this amendatory Order, amending the aforesaid Order, is favored or approved by producers representing at least two-thirds of the volume of almonds produced by those voting in a referendum on the question of approval and who, during the period of August 1, 2022, through July 31, 2023, were engaged within the production area in the production of such almonds.

2. The issuance of this amendatory Order advances the interests of producers of citrus in the production area pursuant to the declared policy of the Act.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

Order Relative to Handling

It is therefore ordered, that on and after the effective date hereof, all handling of almonds grown in California shall be in conformity to, and in compliance with, the terms and conditions of the said Order as hereby proposed to be amended as follows:

The provisions amending the Order contained in the proposed rule and referendum issued by the Administrator and published in the **Federal Register** (88 FR 68500) on October 4, 2023, will be and are the terms and provisions of this order amending the Order and are set forth in full herein.

List of Subjects in 7 CFR Part 981

Marketing agreements, Nuts, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Agricultural Marketing Service amends 7 CFR part 981 as follows:

PART 981—ALMONDS GROWN IN CALIFORNIA

■ 1. The authority citation for part 981 continues to read as follows:

Authority: 7 U.S.C. 601–674.

■ 2. Revise § 981.4 to read as follows:

§ 981.4 Almonds and almond biomass.

(a) *Almonds* means (unless otherwise specified) all varieties of almonds (except bitter almonds), either shelled or unshelled, grown in the State of California, and, for the purposes of research includes almond biomass.

(b) *Almond biomass* means the hulls, shells, and skins of harvested almonds and woody biomass derived from almond trees (*e.g.,* tree limbs, bark, prunings).

■ 4. Revise the first sentence of § 981.6 to read as follows:

§ 981.6 Shelled almonds.

Shelled almonds mean almonds after the shells are removed and includes any form those almonds might take. * * *

■ 5. Revise § 981.32(b)(2) to read as follows:

§ 981.32 Nominations.

* * * * *

(b) * * *

(2) Each handler may vote for a nominee for each position representing the group to which the handler belongs. Each handler vote shall be weighted by the quantity of almonds (kernel weight basis computed to the nearest whole ton) handled for the handler's own account through March 31 of the crop year in which nominations are made. The nominee for each position shall be the person receiving the highest weighted vote for the position.

* * * * *

§ 981.41 [Amended]

■ 6. Amend § 981.41(b) by removing the word ''Control''.

§ 981.42 [Amended]

■ 7. Amend the second sentence of § 981.42(a) by removing the words ''accepted crushers, feed manufacturers, or feeders'' and adding, in their place, ''approved accepted users.''

§ 981.49 [Amended]

■ 8. Amend § 981.49 introductory text by removing the word ''August'' and adding in its place the word ''September''.

§ 981.59 [Amended]

■ 9. Amend § 981.59(a) by removing the word ''Control''.

■ 10. Amend § 981.81 by:

■ a. Revising the third and fourth sentences in paragraph (b); and

■ b. Revising the first sentence in paragraph (c).

The revisions read as follows:

§ 981.81 Assessment.

* * * * *

(b) * * * Any amounts, not credited pursuant to § 981.41 for a crop year may be used by the Board for its marketing promotion expenses of the succeeding crop year, and any unexpended portion of those amounts at the end of that crop year shall be retained in the operating reserve fund. Any funds of the operating reserve fund in excess of the level authorized pursuant to paragraph (c) of this section shall be refunded to handlers or used to reduce the assessment rate of the subsequent crop year, as the Board may determine. * * *

(c) *Reserves.* The Board may maintain an operating reserve fund which shall not exceed approximately six-months' expenses or such lower amount as the Board may establish with the approval of the Secretary: *Provided,* That this limitation shall not restrict the temporary retention of excess funds for

the purpose of stabilizing or reducing the assessment rate of a crop year. * * *

* * * * *

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 29

[Docket No. FAA–2021–1143; Special Conditions No. 29–055–SC]

Special Conditions: Airbus Helicopters Model H160–B Helicopter; Extended Duration of Flight After Loss of Main Gearbox Lubrication

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions.

SUMMARY: These special conditions are issued for the Airbus Helicopters (Airbus) Model H160–B helicopter. This helicopter has a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards for helicopters. This design feature is the extended duration of continued safe flight and landing beyond 30 minutes after indication to the flightcrew of the loss of main gearbox lubrication. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: Effective June 6, 2024.

FOR FURTHER INFORMATION CONTACT: Kamron Dowlatabadi, Mechanical Systems, AIR–623, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5219; email *Kamron.M.Dowlatabadi@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

On July 10, 2023, Airbus applied for an amendment to Type Certificate No. R00009RD for the Model H160–B helicopter to include continued safe flight and landing beyond 30 minutes after indication to the flightcrew of the loss of main gearbox lubrication.

The Airbus Model H160–B helicopter is a transport-category, twin-turboshaft-engine helicopter certificated under 14 CFR part 29. This helicopter has a maximum takeoff weight of 13,436 lbs. with seating for 12 passengers and 2 flightcrew members. The Airbus Model H160–B helicopter is also characterized by the integration of composite materials in its airframe, five main rotor blades (Blue Edge technology), a Fenestron tail rotor, and a Helionix avionics suite.

Type Certification Basis

Under the provisions of 14 CFR 21.101, Airbus must show that the Model H160–B helicopter meets the applicable provisions of the regulations listed in Type Certificate No. R00009RD, or the applicable regulations in effect on the date of application for the change, except for earlier amendments as agreed upon by the FAA.

If the Administrator finds that the applicable airworthiness regulations (*i.e.,* 14 CFR part 29) do not contain adequate or appropriate safety standards for the Airbus Model H160–B helicopter because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same or similar novel or unusual design feature, the special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Airbus Model H160–B helicopter must comply with the noise certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with § 11.38, and they become part of the type-certification basis under § 21.101.

Novel or Unusual Design Features

The Airbus Model H160–B helicopter will incorporate the following novel or unusual design feature:

Extended duration of continued safe flight and landing beyond 30 minutes after indication to the flightcrew of the loss of main gearbox lubrication.

Discussion

Current regulations do not prescribe a duration for continued safe flight and landing to be specifically called out in the rotorcraft flight manual when a loss of main gearbox lubrication is indicated to the flightcrew. Although § 29.927(c)(1) requires a 30-minute test to show that the rotor drive system, which is defined in § 29.917(a) and includes the main gearbox, is operational for 30 minutes following the indication to the flightcrew of a loss of lubrication, the associated bench test conditions may not be representative of aircraft flight conditions because a 30-minute bench test of the main gearbox may not translate to 30 minutes of continued safe flight and landing.

The novel or unusual design feature of the Airbus Model H160–B helicopter is intended to enable the helicopter to continue safe flight and landing, for a minimum of 30 minutes, to the intended destination or to a safe landing location after the indication to the flightcrew of a loss of main gearbox lubrication. To meet this minimum 30 minutes of continued safe flight and landing, the Airbus Model H160–B helicopter main gearbox is designed with a redundant lubrication system. This main gearbox redundant lubrication system would allow continued safe operation after the failure of a single lubrication system. Current regulations do not address a redundant lubrication system that allows operation after the failure of a single lubrication system because at the time the existing regulations were issued, the agency did not envision that a flight duration of more than 30 minutes after the indication to the flightcrew of the loss of main gearbox lubrication was needed. Accordingly, these special conditions provide testing criteria to ensure the reliability of the redundant lubrication system to provide an extended period for safe flight and landing beyond 30 minutes after indication to the flightcrew of the loss of the main gearbox lubrication.

These special conditions add new requirements in lieu of the existing airworthiness standards in §§ 29.917(a) and 29.927(c) and add a requirement to § 29.1585.

At the time of the issuance of the existing regulations, the FAA did not envision the evolving operations for these types of aircraft and the regulations did not include the main gearbox lubrication system components in the required design assessment of the rotor drive system. Accordingly, these special conditions include requirements for addressing ''any associated lubrication system components including oil coolers'' in the design assessment required by § 29.917(b).

These special conditions add a safety margin over the current 30-minute rotor drive system test specified in § 29.927(c)(1) by requiring a test duration of more than 30 minutes to

ensure that the rotor drive gearbox system has an in-flight operational endurance capability of at least 30 minutes following a failure of any one pressurized, normal-use lubrication system. The 30-minute test interval starts when the lubrication-failure indication to the flightcrew is triggered and the engine is at maximum continuous power. These special conditions require a bench test of the rotor drive system main gearbox for a minimum of 30 minutes to establish a maximum period of in-flight operation following loss of main gearbox lubrication, and to ensure that the main gearbox continues to operate safely for at least 30 minutes after an indication to the flightcrew of a loss of lubrication.

The term ''confidence'' specified in Category A and B in these special conditions necessitates the applicant provide supporting data with respect to the mechanical behavior of the main gearbox and must reflect the applicant's confidence in the repeatability of the certification test data. Test loading, in the context of these special conditions, refers to the engine, main gearbox, clutch system, and rotors (or similar test apparatus) interconnected and operating in unison, as this combination of mechanical elements pertains to power input transmitted to the main gearbox and subsequent reaction torques simulating operating conditions.

These special conditions add a requirement that the maximum duration of operation after a failure, which results in a loss of main gearbox lubrication and an associated indication to the flightcrew, must be furnished in the rotorcraft flight manual, and the duration must not exceed the maximum period of in-flight operational endurance capability substantiated.

These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Discussion of Comments

The FAA issued Notice of Proposed Special Conditions No. 29–21–01–SC for the Airbus Model H160–B helicopter, which was published in the **Federal Register** on May 12, 2023 (88 FR 30680). The FAA received several comments from Leonardo Helicopters regarding the proposed special conditions.

Leonardo Helicopters requested the FAA generally maintain harmonization and alignment with the EASA certification specifications (CS) 29 requirements by implementing the same changes to part 29 that were introduced by EASA rulemaking task RMT.0608, following notice of proposed amendment (NPA) 2017–07, *Rotorcraft gearbox loss of lubrication,* through Amendment 5.

This request relating to the pursuit of future rulemaking for part 29 is beyond the scope of these special conditions. No change was made to these special conditions as a result of this comment.

Leonardo Helicopters stated that EASA's CS–29 requirements and acceptable means of compliance (AMC) clearly define how to establish the operational endurance capability through the application of reduction factors. However, the correlation between 30 and 60 minutes, and the criteria for defining this correlation, is not clear in the proposed special conditions. Leonardo Helicopters requested the FAA revise the proposed special conditions to define the proposed reduction factors and allow the public to comment. The FAA infers that Leonardo Helicopters is also requesting clarification regarding the correlation between 30 and 60 minutes for the bench test.

The FAA disagrees with the commenter's request to include reduction factors and related material in these special conditions. The FAA considers the details referenced by Leonardo Helicopters, including the correlation between the test duration and substantiated safe operation duration, to be related to the means of compliance for these special conditions. Means of compliance for these special conditions are defined separately between the FAA and the applicant via the FAA issue paper process, which is outside the scope of these special conditions. However, to address the Leonardo Helicopters comment, the FAA has clarified language in the discussion section. Specifically, the FAA removed the previous reference in these special conditions to a 60-minute bench test scenario, since it is not a requirement under 29.927(c), but rather an example to illustrate how applicants translate the time duration of a bench test into 30 minutes of substantiated operation for continued safe flight and landing. In addition, the term ''reduction factor'' has been removed from the discussion section and replaced with language to define the term ''confidence'' used in these special conditions.

Additionally, Leonardo Helicopters stated that EASA CS–29 does not have a similar requirement for a test duration of at least 60 minutes, and therefore the special conditions are not harmonized with the EASA requirements. The FAA infers Leonardo Helicopters is requesting that the FAA revise the proposed special conditions to address an alleged contradiction and lack of harmonization with the related EASA CS–29 requirements.

The FAA does not agree to revise the proposed special conditions to address a possible contradiction because the FAA does not find that a contradiction exists. The commenter suggests that these special conditions contain a 60-minute testing requirement. There is no specific requirement in these special conditions for a 60-minute test. However, in the preamble of the proposed special conditions, the FAA discussed a scenario where it may be necessary for an applicant to perform a 60-minute test, depending on reduction factors. As explained previously, this language has been removed to address the related public comment and replaced with language to describe the context of the word ''confidence'' used in these special conditions. The details related to the test duration and maximum period of in-flight operation following loss of main gearbox lubrication are associated with the means of compliance for these special conditions. As previously explained, the means of compliance are established between the FAA and applicant through the FAA issue paper process and the FAA's acceptance of a specific means of compliance is beyond the scope of these special conditions. No changes were made to these special conditions as a result of this comment. However, the FAA has made minor editorial changes to these special conditions to ensure consistency in the language of the requirements.

Applicability

As discussed above, these special conditions are applicable to the Airbus Helicopters Model H160–B helicopter. Should Airbus Helicopters apply at a later date for a change to the type certificate to include another model incorporating the same novel or unusual design feature, these special conditions would apply to that model as well.

Conclusion

This action affects only a certain novel or unusual design feature on one model of helicopter. It is not a rule of general applicability.

List of Subjects in 14 CFR Part 29

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

Authority Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701–44702, 44704.

The Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for the Airbus Helicopters Model H160–B helicopter. Unless stated otherwise, all requirements in §§ 29.917, 29.927, and 29.1585 still apply.

In lieu of § 29.917(a), the following special condition applies:

(a) *Design: General.* The rotor drive system includes any part necessary to transmit power from the engines to the rotor hubs. This includes gearboxes, shafting, universal joints, couplings, rotor brake assemblies, clutches, supporting bearings for shafting, any attendant accessory pads or drives, any cooling fans, and any associated lubrication-system components including oil coolers that are a part of, attached to, or mounted on the rotor drive gearbox system.

In lieu of § 29.927(c), the following special condition applies:

(c) Lubrication system failure. For rotor drive gearbox systems featuring a pressurized, normal-use lubrication system, the following requirements for continued safe flight and landing apply:

(1) Category A. Confidence must be established that the rotor drive gearbox system has an in-flight operational endurance capability of at least 30 minutes following a failure of any one pressurized, normal-use lubrication system.

(i) For each rotor drive gearbox system necessary for continued safe flight or safe landing, the applicant must conduct a test that simulates the effect of the most severe failure mode of the pressurized, normal-use lubrication system, as determined by the failure analysis required by § 29.917(b). The duration of the test must be dependent on the number of tests and the component condition after each test.

(ii) The test must begin when the indication to the flightcrew shows a lubrication failure has occurred, and its loading must be consistent with 1 minute at maximum continuous power, followed by the minimum power needed for continued flight at the rotorcraft maximum gross weight.

(iii) The test must end with a 45-second out-of-ground-effect (OGE) hover to simulate a landing phase. Test results must substantiate the maximum period of operation following a loss of lubrication by means of an extended test duration or multiple test specimens, or another approach prescribed by the applicant and accepted by the FAA.

(2) *Category B.* Confidence must be established that the rotor drive gearbox system has an in-flight operational endurance capability to complete an autorotation descent and landing following a failure of any one pressurized, normal-use lubrication system.

(i) For each rotor drive gearbox system necessary for safe autorotation descent or safe landing, the applicant must conduct a test of at least 16 minutes and 15 seconds, following the most severe failure mode of the pressurized, normal-use lubrication system, as determined by the failure analysis required by § 29.917(b).

(ii) The test must begin when the indication to the flightcrew shows that a lubrication failure has occurred, and its loading must be consistent with 1 minute at maximum continuous power. Thereafter, the input torque should be reduced to simulate autorotation for a minimum of 15 minutes.

(iii) The test must be conducted using an input torque to simulate a minimum power landing for approximately 15 seconds.

In addition to § 29.1585, the following special condition applies:

(h) *Power Plant limitations.* The maximum duration of operation after a failure, resulting in any loss of lubrication of a rotor-drive-system gearbox and an associated oil-pressure warning, must be furnished in the rotorcraft flight manual, and must not exceed the maximum period substantiated in accordance with § 29.927(c) of these special conditions.

Issued in Kansas City, Missouri, on April 29, 2024.

Patrick R. Mullen,

Manager, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service.

RIN 2120–AL83

Control of Non-Volatile Particulate Matter From Aircraft Engines: Emission Standards and Test Procedures; Correction

AGENCY: Federal Aviation Administration (FAA), U.S. Department of Transportation (DOT).

ACTION: Final rule; request for comments; correction.

SUMMARY: The FAA is correcting a final rule published on April 24, 2024. In that document the FAA adopts standards for measuring non-volatile particulate matter (nvPM) exhaust emissions from aircraft engines. With this rulemaking, the FAA implements the nvPM emissions standards adopted by the Environmental Protection Agency (EPA), allowing manufacturers to certificate engines to the new nvPM emissions standards in the United States and fulfilling the statutory obligations of the FAA under the Clean Air Act. This document corrects errors in the preamble and regulatory text of that document.

DATES: Effective May 24, 2024.

FOR FURTHER INFORMATION CONTACT: For technical questions concerning this action, contact Ralph Iovinelli, Office of Environment and Energy (AEE–300), Federal Aviation Administration, 800 Independence Ave. SW, Washington, DC 20591; telephone (202) 267–3566; email *Ralph.Iovinelli@faa.gov.*

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

A copy of the Control of Non-Volatile Particulate Matter From Aircraft Engines: Emission Standards and Test Procedures final rule may be viewed online at *www.regulations.gov* using the docket number listed above. A copy of this correction will be placed in the same docket. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year. An electronic copy of this document may also be downloaded from the Office of the Federal Register's website at *www.federalregister.gov* and the Government Publishing Office's website at *www.govinfo.gov.* A copy may also be found at the FAA's Regulations and

Policies website at *www.faa.gov/regulations_policies.*

Copies may also be obtained by sending a request to the Federal Aviation Administration, Office of Rulemaking, ARM–1, 800 Independence Avenue SW, Washington, DC 20591, or by calling (202) 267–9677. Commenters must identify the docket or amendment number of this rulemaking.

All documents the FAA considered in developing this correction, including economic analyses and technical reports, may be accessed in the electronic docket for this rulemaking.

Background

On April 24, 2024, the FAA published a final rule titled ''Control of Non-Volatile Particulate Matter From Aircraft Engines: Emission Standards and Test Procedures'' (89 FR 31078). That document adopts standards for measuring non-volatile particulate matter nvPM exhaust emissions from aircraft engines. With this rulemaking, the FAA implements the nvPM emissions standards adopted by the EPA, allowing manufacturers to certificate engines to the new nvPM emissions standards in the United States and fulfilling the statutory obligations of the FAA under the Clean Air Act. After publishing the final rule, the FAA became aware that certain information in the preamble and regulatory text sections regarding compliance, were inadvertently omitted. This document corrects errors in the preamble and regulatory text of that document.

Correction

In FR Doc. 2024–08453, beginning on page 31078, in the **Federal Register** of April 24, 2024, make the following correction(s):

■ 1. On page 31081, in the first column, at the end of the second paragraph of section B, add the sentence ''To allow manufacturers with aircraft type certificated between January 1, 2023, and the effective date of this rule to demonstrate compliance with the requirements of part 34 without interruption to their manufacturing or delivery process, manufacturers will have 90 days to comply with this rule after the rule becomes effective.'' after the sentence ''This date is consistent with the effective date of the EPA final rule that adopted these standards.''

■ 2. On page 31088, in the first column, in amendatory instruction 11 for § 34.25, add paragraph (d) to read as follows:

§ 34.25 [Corrected]

* * * * *

(d) For engines type certificated after January 1, 2023 and prior to May 24, 2024, compliance with this part must be demonstrated no later than August 22, 2024.

Issued under authority provided by 49 U.S.C. 106(f), 44701(a), and 44703 in Washington, DC.

Brandon Roberts,

Executive Director, Office of Rulemaking.

International Trade Administration

15 CFR Part 326

[Docket No. 240226–0059]

RIN 0625–AB24

The U.S. and Foreign Commercial Service Pilot Fellowship Program

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: The Department of Commerce, International Trade Administration (ITA), Global Markets is issuing regulations implementing the U.S. and Foreign Commercial Service Pilot Fellowship Program to increase the level of knowledge and awareness of, and interest in employment with the United States and Foreign Commercial Service (US&FCS) among students, including students from underserved communities. This Program is intended to recruit graduate students interested in building a career with the U.S. Foreign Commercial Service. The Notice of Funding Opportunity (NOFO) on *www.grants.gov* shall provide more details regarding U.S. and Foreign Commercial Service Pilot Fellowship Program eligibility guidelines, application instructions, and program requirements.

DATES: This rule is effective on May 6.

FOR FURTHER INFORMATION CONTACT: Wendy Thompson at *wendy.thompson@trade.gov* or 202–754–4075.

SUPPLEMENTARY INFORMATION: The U.S. and Foreign Commercial Service Pilot Fellowship Program establishes a graduate student fellowship program to increase the level of knowledge and awareness of, and interest in employment with the U.S. & Foreign Commercial Service among students, including students from underserved communities. The Consolidated Appropriations Act, 2023, Public Law 117–328, Division B, Title I, under the appropriation for the International Trade Administration, authorizes funds ''for the purpose of carrying out a pilot fellowship program of the United States Commercial Service under which the Secretary of Commerce may make competitive grants to appropriate institutions of higher education or students to increase the level of knowledge and awareness of, and interest in employment with, that Service among minority students.'' The Act also states that, ''any grants awarded under such program shall be made pursuant to regulations to be prescribed by the Secretary, which shall require as a condition of the initial receipt of grant funds, a commitment by prospective grantees to accept full-time employment in the Global Markets unit of the International Trade Administration upon the completion of participation in the program.''

In the Memorandum on *Guidance on Promoting Internships and other Student and Early Career Programs in the Federal Government,* dated January 19, 2023, the U.S. Office of Personnel Management (OPM) and the Office of Management and Budget (OMB) released guidance on increasing opportunities for internships, fellowships, apprenticeships, and other student and early career programs in the Federal Government, including paid internship programs. This guidance advances the goals of the ''Strengthening and Empowering the Federal Workforce'' priority in the President's Management Agenda (PMA) and was issued pursuant to Executive Order 14035, Diversity, Equity, Inclusion, and Accessibility in the Federal Workforce (the DEIA Executive Order).

The purpose of the U.S. and Foreign Commercial Service Pilot Fellowship Program is to educate and train graduate students in International Relations, Economics, Business, Trade or Public Policy, and International Studies to build a pool of candidates eligible for the future U.S. and Foreign Commercial Service workforce and ITA Pathways Program opportunities. ITA will conduct broad outreach to raise awareness of the Fellowship program, including to Minority Serving Institutions such as Historically Black Colleges and Universities, Hispanic Serving Institutions, Indian Tribally Controlled Colleges and Universities, Alaska Native-Serving Institutions, and Native Hawaiian-Serving Institutions to increase the level of knowledge and awareness of, and interest in employment with, the U.S. Foreign

Commercial Service among students from underserved communities.

While in school, Fellows participate in one overseas enrichment program within the U.S. Department of Commerce and several mentoring sessions throughout the end of the student's current graduate education program. After completing their current academic graduate degree programs, and successfully passing the Foreign Service entry requirements, Fellows may choose to apply for employment with the U.S. Department of Commerce Foreign Service as Foreign Commercial Service Officers or candidates for the ITA Pathways Program. Consideration for the Fellowship is given to all qualified applicants who demonstrate outstanding leadership skills and academic achievement. The number of fellowships awarded is determined by available funding. ITA will publish a Notice of Funding Opportunity (NOFO) on *www.grants.gov* that will provide more details regarding U.S. and Foreign Commercial Service Pilot Fellowship Program eligibility guidelines, application instructions, and program requirements.

This final rule implements the base parameters of the U.S. and Foreign Commercial Service Pilot Fellowship Program. The regulations are consistent with the information provided in the NOFO. Section 326.1 provides a description of the program consistent with the above description in this preamble. Section 326.2 addresses administration, noting that the eligibility criteria and the amount of funding will be determined and announced annually and publicized nationwide. Section 326.2 also provides the core eligibility requirements, including U.S. citizenship and employment criteria and requirements for Fellows upon the successful completion of their graduate degree program. Section 326.3 provides that grants are awarded directly to students to be Fellows. Section 326.4 provides that the Office of Global Talent Management within the International Trade Administration administers this program for the Department.

Classification

Pursuant to 5 U.S.C. 553(a)(2), the provisions of the Administrative Procedure Act requiring notice of proposed rulemaking and the 30-day delay in effective date for substantive rules are inapplicable because this rule pertains to personnel and grants.

This rule has been determined to be not significant for purposes of Executive Order 12866.

This regulation is exempt from the notice and comment provisions of the APA. Therefore, the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply. Accordingly, no Regulatory Flexibility Analysis is required, and none has been prepared.

This rule does not have any collection of information requirements under the Paperwork Reduction Act.

List of Subjects in 15 CFR Part 326

Education, Educational study programs, Federal aid programs, Grant programs, Scholarships and fellowships, and Students.

■ For the reasons discussed in the preamble, the U.S. Department of Commerce, International Trade Administration amends 15 CFR chapter III by adding Part 326 to read as follows:

PART 326—U.S. AND FOREIGN COMMERCIAL SERVICE PILOT FELLOWSHIP PROGRAM

Sec.

326.1 What is the Fellowship Program?
326.2 How is the Fellowship Program administered?
326.3 Who can receive a grant?
326.4 Who administers the Program?

Authority: Consolidated Appropriations Act, 2023, Pub. L. 117–328, Division B, Title I.

§ 326.1 What is the Fellowship Program?

The U.S. and Foreign Commercial Service Pilot Fellowship Program targets graduate students interested in increasing the level of knowledge and awareness of and employment with the Foreign Service, consistent with 22 U.S.C. 3905. The Program develops a source of trained individuals, from academic disciplines representing the skill needs of the Department, who are dedicated to representing the United States' commercial interests abroad.

§ 326.2 How is the Fellowship Program administered?

(a) *Eligibility.* Eligibility criteria will be determined by the Department of Commerce and publicized nationwide. Fellows must be United States citizens.

(b) *Provisions.* The amount awarded to each individual student shall not exceed $35,000.00 for the total amount of time the student is in the Program. Continued eligibility for participation is contingent upon the Fellow's ability to meet the educational requirements set forth below.

(c) *Program requirements.* (1) Participation in the Program is conditional upon successful completion of pre-employment processing specified by the Department of Commerce, including background investigation, medical examination, and drug testing.

(2) As a condition of participation, fellows are required to complete prescribed coursework.

(3) As a condition of participation, foreign travel is required for all Fellows.

(4) Fellows are required to accept employment, if offered, with the Department of Commerce U.S. and Foreign Commercial Service upon successful completion of the Program and, if applicable, Foreign Service entry requirements.

(5) If offered employment, Fellows must commit to a two-year service agreement.

(6) Additional Program requirements may be determined annually by the Department of Commerce and publicized nationwide.

§ 326.3 Who can receive a grant?

(a) *Grants to students.* The Department of Commerce may award a competitive grant directly to a student for the purpose of increasing the level of knowledge and awareness of and interest in employment with the U.S. and Foreign Commercial Service, consistent with 22 U.S.C. 3905 and employment through ITA Pathways Programs consistent with the Executive Order No. 13562.

(b) *Grants to Institutions of Higher Education.* The Department of Commerce may award a competitive grant to an institution of higher education as defined in 20 U.S.C. 1001 to administer a program to award grants to students for the purpose of increasing the level of knowledge and awareness of and interest in employment with the U.S. and Foreign Commercial Service, consistent with 22 U.S.C. 3905.

§ 326.4 Who administers the Program?

The Department of Commerce, International Trade Administration, Global Markets, Office of Global Talent Management is responsible for administering the U.S. and Foreign Commercial Service Pilot Fellowship Program and grants to students and may be contacted for more detailed information.

Dated: April 29, 2024.

Diane Farrell,

Deputy Under Secretary, International Trade Administration (ITA), Department of Commerce.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2022–0854]

RIN 1625–AA09

Drawbridge Operation Regulation; Reynolds Channel, Atlantic Beach, NY

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is altering the operating schedule that governs the Atlantic Beach Bridge across the Reynolds Channel, mile 0.4, at Atlantic Beach, NY. The bridge owner, Nassau County Bridge Authority, submitted a request on September 22, 2022 to modify the regulation to decrease the amount of openings on signal from October through May. On November 16, 2023 Nassau County Bridge Authority sent an additional request to add a bridge tower call number and remove outdated language. It is expected that this change to the regulations will better serve the needs of the community while continuing to meet the reasonable needs of navigation.

DATES: This rule is effective June 6, 2024.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov.* Type the docket number (USCG–2022–0854) in the ''SEARCH'' box and click ''SEARCH''. In the Document Type column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Ms. Stephanie E. Lopez, First Coast Guard District, Project Officer, telephone 212–514–4335, email *Stephanie.E.Lopez@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
OMB Office of Management and Budget
NPRM Notice of Proposed Rulemaking
SNPRM Supplemental Notice of Proposed Rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

On August 25, 2023, the Coast Guard published a Notice of Proposed Rulemaking (NPRM) with a request for comments, entitled ''Drawbridge Operation Regulation; Reynolds Channel, Atlantic Beach, NY'' in the **Federal Register** (88 FR 58176), to seek your comments on whether the Coast Guard should consider modifying the current operating schedule to the Atlantic Beach Bridge. No comments were received.

On February 21, 2024, the Coast Guard published a Supplemental Notice of Proposed Rulemaking (SNPRM) with a request for comments, under the same title as the NPRM in the **Federal Register** (89 FR 13013), There we stated why we issued the SNPRM, and invited comments on our proposed regulatory action related to this regulatory change. During the comment period that ended March 22, 2024, we received three comments and those comments are addressed in Section IV of this Final Rule.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority 33 U.S.C. 499. The Atlantic Beach Bridge at mile 0.4, across Reynolds Channel, Atlantic Beach, NY, has a vertical clearance of 25 feet at mean high water and a horizontal clearance of 125 feet. Waterway users include recreational and commercial vessels, including fishing vessels.

The existing drawbridge operating regulations are listed at 33 CFR 117.799(e). Under the current regulation, the bridge shall open on signal from October 1 through May 14. Nassau County is requesting the bridge shall open on signal from 8 a.m. to midnight October 1 through May 14; and from midnight to 8 a.m. year-round the draw shall open on signal if at least eight hours advance notice is given.

The Reynolds Channel is transited by recreational vessels and commercial vessels. In recent years, a significant amount of industrial and commercial business has closed along the waterfront. This change has caused a decrease in the number of bridge opening requests from midnight to 8 a.m.

Nassau County Bridge Authority held two public meetings on August 18, 2022 and August 25, 2022. No one from the public attended.

IV. Discussion of Comments, Changes, and the Final Rule

Coast Guard provided a comment period of 30 days and three comments were received. All three comments were positive and in favor of the rule change.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive Orders.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866, *as amended by Executive Order 14094 (Modernizing Regulatory Review).* Accordingly, it has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the ability of vessels to still transit the bridge given advanced notice.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received no comments from the Small Business Administration on this rule. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the bridge may be small entities, for the reasons stated in section V. A. above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions

annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01, Rev.1, associated implementing instructions, and Environmental Planning Policy COMDTINST 5090.1 (series) which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321–4370f). The Coast Guard has determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule promulgates the operating regulations or procedures for drawbridges and is categorically excluded from further review, under paragraph L49, of Chapter 3, Table 3–1 of the U.S. Coast Guard Environmental Planning Implementation Procedures.

Neither a Record of Environmental Consideration nor a Memorandum for the Record are required for this rule.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; and DHS Delegation No. 00170.1. Revision No. 01.3

■ 2. Amend § 117.799 by revising paragraph (e) to read as follows:

§ 117.799 Long Island, New York Inland Waterway from East Rockaway Inlet to Shinnecock Canal

* * * * *

(e) The draw of the Atlantic Beach Bridge across Reynolds Channel, mile 0.4, shall operate as follows:

(1) From October 1 through May 14 the draw shall open on signal from 8 a.m. to midnight.

(2) From midnight to 8 a.m. year-round, the draw shall open on signal if at least eight (8) hours of notice is given by calling the Bridge Tower at 516–239–1821.

(3) From May 15 through September 30, the bridge will open on signal except from 4 p.m. to 7 p.m. on weekdays, and from 11 a.m. to 9 p.m. on Saturdays, Sundays, Memorial Day, Independence Day, and Labor Day, when the bridge will open on the hour and half-hour.

* * * * *

Dated: April 27, 2024.

J.W. Mauger,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.

BILLING CODE 9110–04–P

GENERAL SERVICES ADMINISTRATION

41 CFR Parts 300–3, 302–6, and 302–17

[FTR Case 2022–02; Docket No. GSA–FTR–2022–0012, Sequence No. 2]

RIN 3090–AK63

Federal Travel Regulation (FTR); Relocation Allowance—Temporary Quarters Subsistence Expenses (TQSE)

AGENCY: Office of Government-wide Policy (OGP), General Services Administration (GSA).

ACTION: Final rule.

SUMMARY: The United States (U.S.) General Services Administration (GSA) is issuing a final rule amending the Federal Travel Regulation (FTR) with respect to temporary quarters subsistence expenses (TQSE) allowances. Changes include implementing a third TQSE methodology, redefining the current TQSE methods, lowering the percentage multipliers for calculating TQSE maximum daily amounts, and prohibiting adjustments to TQSE percentage multipliers for househunting days. The final rule also exempts temporary quarters (TQ) located in Presidentially-Declared Disaster areas from the ''reasonable proximity'' requirement and allows agencies to authorize TQSE at the applicable locality per diem allowance or authorize actual expenses on an individual basis. This rule establishes an exception to authorizing actual expenses on an individual basis by which agencies can issue a blanket actual expense authorization for employees authorized to occupy TQ in Presidentially-Declared Disaster areas. The final rule will also update and clarify some TQSE sections and rearrange them into a more sequential order.

DATES: Effective June 6, 2024.

Applicability Date: This rule is applicable for relocations authorized after June 30, 2024.

FOR FURTHER INFORMATION CONTACT: For clarification of content, contact Mr. Rodney (Rick) Miller, Program Analyst, Office of Government-wide Policy, at 202–501–3822 or *travelpolicy@gsa.gov.* For information pertaining to status or publication schedules, contact the Regulatory Secretariat Division at 202–501–4755 or *GSARegSec@gsa.gov.* Please cite FTR Case 2022–02.

SUPPLEMENTARY INFORMATION:

I. Background

GSA published a proposed rule at 88 FR 33067 on May 23, 2023, which proposed changes to the FTR with respect to TQSE allowances. This rule finalizes those proposed changes as summarized above, and as set forth in greater detail below.

Pursuant to 5 United States Code (U.S.C.) 5738, the Administrator of General Services is authorized to prescribe regulations necessary to implement laws regarding Federal employees when assigned a temporary change of station (TCS) or when otherwise transferred in the interest of the Government. The overall implementing authority is the FTR, codified in title 41 of the Code of Federal Regulations, chapters 300 through 304.

GSA's Office of Government-wide Policy (OGP) continually reviews and adjusts policies and regulations under its purview to address current Government relocation needs and incorporate best practices, where appropriate, as a part of its ongoing mission to provide policies for travel by Federal civilian employees and others authorized to travel at Government expense.

Each year, the Federal Government spends more than $1.2 billion on relocation allowances to reimburse an average of 28,800 employees for their related expenses. Federal agencies can offer relocation allowances as an incentive to assist with defraying some of the costs for relocating individuals. The FTR provides regulatory procedures for certain mandatory and discretionary relocation allowances depending on the individual's type of movement.

Pursuant to 5 U.S.C. 5724a(c) and 5737(a)(5), an employee transferred in the interest of the Government may be authorized a TQSE allowance to reimburse the employee and the employee's immediate family members for subsistence expenses incurred when it is necessary to occupy TQ. TQSE may be authorized for the following transfers: between official duty stations within the U.S.; from a foreign area to an official duty station in the U.S.; or assignment to a temporary official station and/or permanently assigned to a temporary official station within the U.S.

Agencies may offer two existing methods of TQSE: TQSE-actual expense (TQSE–AE) or TQSE-lump sum (TQSE–LS). From fiscal years 2018 to 2022, Federal agencies have approved about 12,000 TQSE claims annually for employees who relocated, with agencies identifying TQSE–AE as the more utilized reimbursement method.

Under the TQSE–AE method, the employee is reimbursed the cost of their actual subsistence expenses not to exceed the authorized maximum allowable amount. The TQSE–AE method uses the standard continental United States (CONUS) per diem rate or the outside the continental United States (OCONUS) non-foreign area per diem rate as the applicable per diem rate based on the TQ location. The employee and each of the employee's immediate family members receives a percentage of that rate. The rate is applied to the first 30-day increment of occupying TQ and a reduced rate is applied after 30 days. Occupancy of TQ may extend up to the statutory maximum of 120 consecutive days. The employee documents their incurred daily allowable expenses, which may include: TQ lodging, including taxes; meals and/or groceries; fees and tips incident to meals and TQ lodging; and laundry/dry cleaning of clothes. The employee provides TQ lodging receipt(s) and a receipt for every expense over $75, for each 30-day period of TQ occupancy.

In 2005, the Governmentwide Relocation Advisory Board (GRAB), which included representatives from Government agencies, private-sector corporate relocation departments, relocation industry associations, and/or relocation industry service providers, mentioned in its ''Findings and Recommendations'' that the TQSE–AE method is administratively burdensome and time-consuming for employees, travel examiners, and certifying officials.

Since 1966, Title 5 of the U.S. Code has provided authority for agencies to reimburse TQSE in connection with an employee transferred in the interest of the Government. At that time, only one per diem rate was used within CONUS—the standard CONUS rate. Since that time, however, GSA began establishing CONUS non-standard area (NSA) per diem rates for areas where the standard CONUS rate was insufficient. Currently, Federal agencies have employees assigned to offices and military bases in CONUS NSAs where the standard CONUS rate is insufficient for obtaining TQ lodging and meals under the TQSE–AE method. This is particularly true for single employees. Accordingly, for TQSE–AE and all TQSE methods, the final rule will allow for CONUS NSA per diem rates to be used as an applicable per diem rate to calculate TQSE, depending upon where TQ will be occupied.

This final rule will also clarify that there is no requirement to separate maximum amounts for TQ lodging and M&IE in calculating TQSE–AE reimbursement. Accordingly, the separate allowances for TQ lodging and M&IE may be combined to produce a single maximum daily amount (which will allow some of the M&IE rate to offset the TQ lodging cost). Agencies can still ensure that an employee is not overcompensated by using the single maximum daily amount while also accounting for the rate change after 30 days in TQ.

Under the TQSE–LS method, agencies may offer a lump sum amount based on the standard CONUS, CONUS NSA, or OCONUS non-foreign area per diem rates, as appropriate, depending on the locality of the old and/or new official stations and wherever TQ will be occupied. Under this reimbursement method, a percentage of the maximum applicable per diem rate is paid to the employee and the employee's immediate family members for a maximum of 30 days of TQSE. Under TQSE–LS, there is no requirement to document and itemize expenses; however, the employee must certify that they occupied TQ.

To improve employees' relocation experience and assist agencies in processing relocation expenses reimbursement, GSA is implementing a third method of TQSE titled ''temporary quarters subsistence expenses-lodgings plus'' (TQSE–LP). This third method will be the preferred TQSE reimbursement method for agencies to offer to employees; however, agencies may continue to offer TQSE–AE and/or TQSE–LS as an alternative. In accordance with 5 U.S.C. 5724a(h), TQSE–LP must follow the limitations prescribed for payments of subsistence expenses under 5 U.S.C. 5702. TQSE–LP is in line with 5 U.S.C. 5702 which entitles an employee who performs official business away from their official station, a per diem allowance, reimbursement for actual and necessary expenses, or a combination of both. The FTR implements the ''combination of both'' statutory language by utilizing the temporary duty (TDY) ''lodgings-plus per diem'' methodology, which entitles an employee to reimbursement of actual lodging expenses up to a maximum amount by locality area, as supported by receipts, and a meals and incidental expense (M&IE) allowance, which may be reimbursed without itemization or receipts. Accordingly, the new TQSE–LP method will follow similar principles as the TDY travel ''lodgings-plus'' method of per diem for

reimbursement of TQSE under Chapter 302.

A difference between TDY lodgings-plus and TQSE–LP is that the TDY per diem allowance excludes lodging taxes and laundry/dry cleaning expenses from the per diem rates in CONUS and allows the traveler to claim them as a separate TDY miscellaneous expense under part 301–12. However, part 302–6 does not contain or adopt by reference the provisions of Chapter 301 permitting recovery of these types of miscellaneous expenses, nor are lodging taxes and laundry/dry cleaning expenses included in part 302–16. The final rule clarifies that laundry/dry cleaning expenses are included in the TQSE daily allowable M&IE expenses and TQ lodging taxes are separately reimbursable TQSE miscellaneous expenses.

The new TQSE–LP method follows TQSE–LS and TQSE–AE by calculating reimbursement using the applicable per diem rate for the locality of the old and/or new official stations wherever TQ lodging will be occupied in the U.S. As with TQSE–AE, the new TQSE–LP method permits occupancy of TQ beyond the initial authorization of 30 days (up to a maximum of 120 consecutive days), and reduces the maximum daily amount of TQSE after the initial 30-day period of TQ occupancy. Unlike TQSE–AE, however, the TQSE–LP method will require that TQ lodging and M&IE remain as separate maximum amounts for purposes of calculating the maximum daily amount of TQSE for the employee and the employee's immediate family members.

When compared with TQSE–AE, the new TQSE–LP method results in a more efficient process for the traveler, travel examiner, and certifying official and significantly reduces the administrative burden of maintaining, submitting, and reviewing all subsistence expenses receipts and claims, other than the required lodging receipt. The reduced administrative burden should increase employee satisfaction with the relocation process, which is important for employee recruitment and retention purposes.

The final rule also, in some cases, reduces the percentage multipliers used to calculate the TQSE–AE and TQSE–LP maximum daily amount for each 30-day increment of TQSE. Because GSA is also authorizing the use of CONUS NSA rates instead of requiring use of the CONUS standard rate when applicable, GSA has determined that lowering the percentage multipliers will still provide reasonable and equitable reimbursement to employees and their immediate family members for TQSE–AE and TQSE–LP.

Pursuant to 5 U.S.C. 5724a(b), an agency may authorize an employee and/or spouse who is transferring between official stations located within the United States to take one househunting trip (HHT) to seek permanent residence quarters at a new official station. The purpose of the HHT is to lower the overall TQ cost. Accordingly, agencies may reduce the number of days of TQSE if HHT is authorized. The agency also has the discretion to authorize full HHT (5 U.S.C. 5724a(b)) and subsequent TQSE (5 U.S.C. 5724a(c)), as the two are separate entitlements.

This final rule clarifies the effect on TQSE when an employee performs an HHT prior to relocating to the new official station. Specifically, agencies may reduce the number of overall TQSE days by the HHT days, but are not permitted to use HHT days to reduce the percentage multiplier for calculating TQSE.

Further, the final rule eliminates the need for GSA to issue an FTR bulletin waiving FTR 302–6.9, which currently requires that TQ be in reasonable proximity to the old and/or new official stations, and FTR 302–6.102, which currently limits the applicable per diem allowance for TQSE–AE to the standard CONUS rate for TQ located in CONUS. Instead, the final rule lists TQ located in a Presidentially-Declared Disaster area as an exception to the ''reasonable proximity'' requirement, removes the limitation at 302–6.102, and allows agencies to authorize TQSE at the applicable locality per diem allowance or to authorize actual expenses (not to exceed the 300% ceiling) on an individual basis for TQ located in a Presidentially-Declared Disaster area. This rule establishes an exception to issuing individual actual expense authorizations by which agencies may issue a blanket actual expense authorization for employees authorized to occupy TQ in an area subject to a Presidentially-Declared Disaster. These changes should result in quicker notification to agencies and employees of their TQSE during a Presidentially-Declared Disaster rather than waiting for GSA to issue an FTR bulletin waiving such provisions.

Finally, the final rule will also modify some FTR sections regarding TQSE and rearrange them into a more sequential order.

II. Discussion of the Final Rule

A. Summary of Significant Changes

GSA has not made any significant changes to the regulatory language from the proposed to final rule, only minor technical edits and edits that clarify the intent of the rule.

B. Analysis of Public Comments

No public comments were received in response to the proposed rule.

C. Expected Cost Impact to the Public

GSA performed an economic analysis on the final rule. GSA used the Business Travel and Relocation Dashboard to calculate an average of 28,800 domestic and international relocations per year based on figures from across the Federal Government for fiscal years 2018 to 2022, with Federal agencies authorizing approximately 12,000 employees to receive TQSE annually. TQSE is a discretionary relocation entitlement that the agency may authorize. The agency chooses which TQSE methods are available to the employee and the number of days authorized for reimbursement. GSA notes that Federal agencies are only required to track specific relocation data appearing on the Business Travel and Relocation Dashboard, but are not required to specify the method of TQSE authorized (actual expense or lump sum), if TQSE is for an employee only or an employee with immediate family members, locations where TQ were occupied, or the total number of days of TQ for each claim within the U.S. GSA used the FY23 CONUS per diem rates to anticipate how TQSE–LP compares to existing policy in terms of cost for those relocating to high cost areas.

The standard CONUS per diem rate for FY23 was $157 ($98 Lodging + $59 M&IE). In FY23, there were 316 non-standard areas (NSAs) where GSA established per diem rates that were higher than the standard CONUS rate. Approximately half of the NSAs had seasonal rates. Adjustments to the TQSE percentage multipliers under the final rule, and their cost impact, are analyzed below: for the employee's (and/or unaccompanied spouse or domestic partner's) portion, the lodging and M&IE rates use the same percentage for the initial 30-days of TQ (currently 100%) and the second 30-day increment (currently 75%). However, the final rule reduces the percentage for the last 60 days of TQ from the current rate of 75% to 55%. The immediate family members' portion (currently 75% for accompanied spouses or domestic partners and immediate family members aged 12 and over; and 50% for immediate family members under 12) will be reduced for the first 30 days of TQ to 50% and 40% respectively, and further reduced for each 30 day increment (45% and 35% for the second

30-day increment, respectively; 40% and 30% for the last 60 days, respectively). There are 209 NSAs where the average (across seasons) per diem rate reduced to 75% would be less than the standard CONUS rate of $157. The average across all 316 NSAs of the average per diem rate reduced to 75% is $156, $1 less than the standard CONUS rate.

The final rule implements the TQSE–LP method which is similar to the Department of State foreign transfer allowance (FTA), ''Pre-Departure Subsistence Allowance and Home Service Allowance—Partial Flat Rate'' reimbursement methods used for Foreign Service Officers relocating to and from foreign assignments and occupying temporary quarters in the U.S. The reduction of TQSE percentage multipliers under this rule is similar to the way that temporary quarters subsistence allowance (TQSA) is structured for Foreign Service Officers and other Federal employees who relocate and occupy temporary quarters in a foreign country.

Use of the new TQSE–LP reimbursement method could result in an increase in overall cost; however, such increased costs are likely to be offset by anticipated cost savings from streamlining the administrative process for the traveler, agency travel examiners, and certifying officials. Notably, cost avoidance for employees electing TQSE–LP over TQSE–AE is difficult to measure in full as the calculations do not take into account time saved by travelers for retaining and recording each individual lodging, meal and laundry expense for all family members. TQSE–LP will increase employee satisfaction with the relocation process and significantly reduce the agency and employee administrative burden of maintaining, submitting and reviewing all subsistence expenses receipts and claims. Accordingly, TQSE–LP could maintain a budget neutral or possible cost reduction due to lower anticipated administrative costs.

III. Executive Orders 12866, 13563, and 14094

Executive Order (E.O.s) 12866 (*Regulatory Planning and Review*) directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 (*Improving Regulation and Regulatory Review*) emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. E.O. 14094 (*Modernizing Regulatory Review*) amends section 3(f) of E.O. 12866 and supplements and reaffirms the principles, structures, and definitions governing contemporary regulatory review established in E.O. 12866 and E.O. 13563. The Office of Management and Budget's Office of Information and Regulatory Affairs (OIRA) has determined that this rule is a significant regulatory action and, therefore, it was subject to review under section 6(b) of E.O. 12866.

IV. Congressional Review Act

OIRA has determined that this rule is not a ''major rule'' under 5 U.S.C. 804(2). Title II, Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (codified at 5 U.S.C. 801–808), also known as the Congressional Review Act or CRA, generally provides that before a rule may take effect, unless excepted, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each house of the Congress and to the Comptroller General of the United States. This rule is excepted from CRA reporting requirements prescribed under 5 U.S.C. 801 as it relates to agency management or personnel under 5 U.S.C. 804(3)(B).

V. Regulatory Flexibility Act

This final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* This final rule is also exempt from the Administrative Procedure Act pursuant to 5 U.S.C. 553(a)(2) because it applies to agency management or personnel. Therefore, an Initial Regulatory Flexibility Analysis was not performed.

VI. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FTR do not impose recordkeeping or information collection requirements, or the collection of information from offerors, contractors, or members of the public that require the approval of the Office of Management and Budget (OMB) under 44 U.S.C. 3501, *et seq.*

List of Subjects in 41 CFR Parts 300–3, 302–6, and 302–17

Government employees, Relocation, Travel and Transportation expenses.

Robin Carnahan,

Administrator of General Services.

For reasons set forth in the preamble, GSA amends 41 CFR parts 300–3, 302–6, and 302–17 as set forth below:

PART 300–3—GLOSSARY OF TERMS

■ 1. The authority for part 300–3 continues to read as follows:

Authority: 5 U.S.C. 5707; 40 U.S.C. 121(c); 49 U.S.C. 40118; 5 U.S.C. 5738; 5 U.S.C. 5741–5742; 20 U.S.C. 905(a); 31 U.S.C. 1353; E.O. 11609, as amended, 3 CFR, 1971–1975 Comp., p. 586, Office of Management and Budget Circular No. A–126, revised May 22, 1992.

§ 300–3.1 [Amended]

■ 2. Amend § 300–3.1 by—

■ a. Adding a note at the end of the definition ''Per diem allowance''; and

■ b. Adding in alphabetical order, the definition for ''Presidentially-Declared Disaster''.

The additions read as follows:

§ 300–3.1 What do the following terms mean?

* * * * *

Per diem allowance—* * *

Note 1 to definition of ''Per diem allowance''. For the purposes of chapter 302 of this subtitle, laundry/dry cleaning expenses are part of the incidental expenses portion of the per diem allowance for temporary quarters subsistence expenses (TQSE) and temporary quarters (TQ) lodging taxes are separately reimbursable TQSE miscellaneous expenses (see § 302–6.28 and part 302–16 of this subtitle).

* * * * *

Presidentially-Declared Disaster—A major disaster or emergency declared by the President of the United States pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (42 U.S.C. 5121 *et seq.*).

* * * * *

■ 3. Revise part 302–6 to read as follows:

PART 302–6—ALLOWANCE FOR TEMPORARY QUARTERS SUBSISTENCE EXPENSES

Subpart A—General Rules

Sec.

302–6.1 What are ''temporary quarters subsistence expenses (TQSE)''?
302–6.2 What is the purpose of the TQSE allowance?
302–6.3 What are ''temporary quarters''?
302–6.4 Am I eligible for a TQSE allowance?

302–6.5 Who is not eligible for a TQSE allowance?
302–6.6 Am I eligible for a TQSE allowance if I transfer to or from a foreign area?
302–6.7 Must my agency authorize payment of a TQSE allowance?
302–6.8 Under what circumstances will I receive a TQSE allowance?
302–6.9 Who may occupy temporary quarters at Government expense?
302–6.10 Where may I/we occupy temporary quarters at Government expense?
302–6.11 May my immediate family and I occupy temporary quarters at different locations?
302–6.12 How soon may I/we begin occupying temporary quarters at Government expense?
302–6.13 What is the latest period for which TQSE reimbursement may begin?
302–6.14 When does my authorized period for TQSE reimbursement end?
302–6.15 May I and/or my immediate family occupy temporary quarters longer than the period for which I am authorized to claim TQSE reimbursement?
302–6.16 May the period for which I am authorized to claim TQSE reimbursement for myself be different from that of my immediate family?
302–6.17 What effect do partial days of temporary quarters occupancy have on my authorized period for claiming TQSE reimbursement?
302–6.18 How is my TQSE allowance affected if my temporary quarters become my permanent residence quarters?
302–6.19 May I receive a TQSE allowance if I am receiving another subsistence expense allowance?
302–6.20 May I be reimbursed for transportation expenses incurred while I am occupying temporary quarters?
302–6.21 May I be reimbursed for TQSE while occupying my permanent residence quarters at my old official station?
302–6.22 What methods may my agency use to reimburse me for TQSE?
302–6.23 What is the ‘‘applicable per diem rate’’ under the TQSE reimbursement methods?
302–6.24 How may my TQSE reimbursement be affected if I relocate to, or currently occupy, temporary quarters in a Presidentially-Declared Disaster area?
302–6.25 Must I document my TQSE to receive reimbursement?
302–6.26 May I receive an advance of funds for TQSE?
302–6.27 Must I use a Government contractor-issued travel charge card for TQSE?
302–6.28 Are temporary quarters lodging taxes and laundry/dry cleaning expenses included in the TQSE amount?
302–6.29 How long may I be authorized to claim TQSE reimbursement?
302–6.30 May my agency reduce my authorized number of TQSE days if I am authorized a househunting trip?
302–6.31 What is a ‘‘compelling reason’’ warranting extension of my authorized period for claiming TQSE–LP or TQSE–AE reimbursement?
302–6.32 May I interrupt occupancy of temporary quarters?

Subpart B—TQSE Methods of Reimbursement

302–6.100 What am I paid under the TQSE–LP reimbursement method?
302–6.101 What am I paid under the TQSE–AE reimbursement method?
302–6.102 What am I paid under the TQSE–LS reimbursement method?
302–6.103 May my agency reduce my TQSE allowance below the ‘‘maximum allowable amount’’?

Subpart C—Agency Responsibilities

302–6.200 How should we administer the TQSE allowance?
302–6.201 What governing policies must we establish for the TQSE allowance?
302–6.202 Under what circumstances may we authorize the TQSE allowance?
302–6.203 What factors should we consider in determining whether the TQSE allowance is actually necessary?
302–6.204 What factors should we consider in determining what TQSE method(s) to offer an employee?
302–6.205 Must we require transferees to sign a statement that TQSE will be incurred?
302–6.206 When must we make the TQSE–LS payment to the transferee?
302–6.207 What factors should we consider in determining whether quarters are temporary?

Authority: 5 U.S.C. 5738; 20 U.S.C. 905(a); E.O. 11609, as amended, 3 CFR, 1971–1975 Comp., p. 586.

Subpart A—General Rules

Note 1 to subpart A. Use of pronouns ‘‘I’’, ‘‘you’’, and their variants throughout this subpart refers to the employee, unless otherwise noted.

§ 302–6.1 What are ‘‘temporary quarters subsistence expenses (TQSE)’’?

Temporary quarters subsistence expenses or *TQSE* are subsistence expenses incurred by an employee and/or the employee's immediate family while occupying temporary quarters. TQSE does not include transportation expenses incurred during occupancy of temporary quarters (see § 302–6.20).

§ 302–6.2 What is the purpose of the TQSE allowance?

The TQSE allowance is intended to reimburse an employee reasonably and equitably for subsistence expenses incurred when it is necessary to occupy temporary quarters incident to an official relocation or temporary change of station.

§ 302–6.3 What are ‘‘temporary quarters’’?

The term ‘‘temporary quarters’’ refers to lodging obtained for the purpose of temporary occupancy from a private or commercial source incident to an official relocation or temporary change of station.

§ 302–6.4 Am I eligible for a TQSE allowance?

You are eligible for a TQSE allowance if you are an employee who is authorized to transfer to a new official station, including upon assignment to a temporary official station (see FTR 302–3.413(b)) and permanent assignment to a temporary official station (see FTR 302–3.427(e)); and

(a) Your new official station is located within the United States; and

(b) Your old and new official stations are at least 50 miles apart (as measured by map distance) via a usually traveled surface route; and

(c) Your new official station meets the 50-mile distance test (see § 302–2.6(a)).

§ 302–6.5 Who is not eligible for a TQSE allowance?

(a) New appointees;

(b) Employees assigned under the Government Employees Training Act (5 U.S.C. 4109);

(c) Senior Executive Service (SES) employees making their last move home for the purpose of separation from Government service;

(d) Employees returning from an overseas assignment for the purpose of separation from Government service; and

(e) Employees who were granted a waiver to the 50-mile distance test under § 302–2.6(b).

§ 302–6.6 Am I eligible for a TQSE allowance if I transfer to or from a foreign area?

(a) You may not receive a TQSE allowance under this part when you transfer to a foreign area. However, you may qualify for a comparable allowance under the Department of State Standardized Regulations (DSSR) (Government Civilians, Foreign Areas) (see § 302–3.101 of this chapter).

(b) You may receive a TQSE allowance under this part when you transfer from a foreign area and occupy temporary quarters in the United States. You may also be authorized a comparable allowance, prescribed by the Department of State, at the foreign area preceding final departure subsequent to the necessary vacating of residence quarters (see § 302–3.101 of this chapter).

§ 302–6.7 Must my agency authorize payment of a TQSE allowance?

No, TQSE is a discretionary allowance. Your agency determines whether it is in the Government's interest to pay TQSE.

§ 302–6.8 Under what circumstances will I receive a TQSE allowance?

You will receive a TQSE allowance if:

(a) Your agency authorizes it before you occupy the temporary quarters;

(b) Your relocation authorization specifies the TQSE method and the number of days allowed for you to receive TQSE;

(c) You have signed a service agreement; and

(d) You meet any additional conditions your agency has established.

§ 302–6.9 Who may occupy temporary quarters at Government expense?

Only you and/or your immediate family, as annotated on the relocation authorization, may occupy temporary quarters at Government expense.

§ 302–6.10 Where may I/we occupy temporary quarters at Government expense?

You and/or your immediate family may occupy temporary quarters in the United States at Government expense within reasonable proximity (approximately 50 miles) of the geographical area of your old and/or new official stations. Neither you nor your immediate family may be reimbursed for occupying temporary quarters at any other location, unless justified by special circumstances (*e.g.,* the temporary quarters location is subject to a Presidentially-Declared Disaster) that are reasonably related to your transfer.

§ 302–6.11 May my immediate family and I occupy temporary quarters at different locations?

Yes. Under various circumstances, you and your immediate family may need to occupy temporary quarters at different locations (*e.g.,* if you must report to the new official station while the immediate family delays the relocation to have family members complete the school year) (see § 302–6.16 regarding concurrent TQSE).

§ 302–6.12 How soon may I/we begin occupying temporary quarters at Government expense?

You may begin occupying temporary quarters at Government expense after your agency has authorized you to receive a TQSE allowance and you have signed a service agreement.

§ 302–6.13 What is the latest period for which TQSE reimbursement may begin?

The period must begin before the maximum time for completing all aspects of your relocation under § 302–2.9.

§ 302–6.14 When does my authorized period for TQSE reimbursement end?

The period for TQSE reimbursement ends at midnight on either the day before you and/or any member of your immediate family occupies permanent residence quarters (even if some, but not all household goods have been delivered such that the residence is suitable for permanent occupancy), or the day your authorized period for TQSE reimbursement expires, whichever occurs first. (See § 302–6.207 for details.)

§ 302–6.15 May I and/or my immediate family occupy temporary quarters longer than the period for which I am authorized to claim TQSE reimbursement?

Yes, but you will not be reimbursed for any of the expenses you incur during the unauthorized period.

§ 302–6.16 May the period for which I am authorized to claim TQSE reimbursement for myself be different from that of my immediate family?

No, the eligibility period for which you are authorized to claim TQSE reimbursement for yourself and for each member of your immediate family must run concurrently.

§ 302–6.17 What effect do partial days of temporary quarters occupancy have on my authorized period for claiming TQSE reimbursement?

Occupancy of temporary quarters is based on calendar days and partial days are counted as full days of TQSE. You may not receive reimbursement under both TQSE allowance and another subsistence expenses allowance within the same day, with one exception. If you claim TQSE reimbursement on the same day that official travel en route to your new official station ends, your per diem will be computed under applicable partial day rules, and you also may be reimbursed for actual TQSE you incur after 6 p.m. of that day.

§ 302–6.18 How is my TQSE allowance affected if my temporary quarters become my permanent residence quarters?

If your temporary quarters become your permanent residence quarters, you may receive a TQSE allowance only if you show in a manner satisfactory to your agency that you initially intended to occupy the quarters temporarily. You will not be entitled to TQSE once your agency determines that your temporary quarters are your permanent residence. (See § 302–6.207 for details.)

§ 302–6.19 May I receive a TQSE allowance if I am receiving another subsistence expenses allowance?

No, unless your immediate family is claiming TQSE and you are performing separate official TDY travel, or you receive a cost-of-living allowance payable under 5 U.S.C. 5941 in addition to a TQSE allowance. (See § 302–6.17 for partial days for en route travel days.)

§ 302–6.20 May I be reimbursed for transportation expenses incurred while I am occupying temporary quarters?

Transportation expenses incurred in the vicinity of the temporary quarters, such as rental car or mileage for commuting to/from work, parking, and bus or mass transit, etc., are not TQSE expenses, and therefore, there is no authority to pay such expenses under TQSE.

§ 302–6.21 May I be reimbursed for TQSE while occupying my permanent residence quarters at my old official station?

Your agency may authorize TQSE for a reasonable time when your residence at your old official station becomes temporary and no longer suitable for permanent residence (*e.g.,* household goods have been shipped and are unavailable to you and your immediate family).

§ 302–6.22 What methods may my agency use to reimburse me for TQSE?

(a) Your agency may use one of the following TQSE methods:

(1) TQSE—Lodgings-Plus (TQSE–LP);

(2) TQSE—Actual Expense (TQSE–AE); or

(3) TQSE—Lump Sum (TQSE–LS).

(b) Your agency will reimburse you for TQSE under the ''lodgings-plus'' method unless it offers you one or more of the alternate methods. If your agency makes multiple methods available to you, you may select the one you prefer; however, once your travel has begun, the authorized TQSE method may not be changed.

§ 302–6.23 What is the ''applicable per diem rate'' under the TQSE reimbursement methods?

The ''applicable per diem rate'' is the rate in effect for the locality at the old or new official station or combination thereof, wherever temporary quarters will be occupied. The applicable per diem rate could be the standard CONUS, CONUS non-standard area (NSA), or OCONUS non-foreign locality per diem rate as determined by GSA or the Department of Defense.

§ 302–6.24 How may my TQSE reimbursement be affected if I relocate to, or currently occupy, temporary quarters in a Presidentially-Declared Disaster area?

Your agency should consider delaying all non-essential relocations to Presidentially-Declared Disaster areas because the ability to secure temporary quarters lodgings in those areas may be

compromised. If relocation cannot be delayed, or if you are already occupying temporary quarters that have been affected by the disaster in a Presidentially-Declared Disaster area, for temporary quarters located within CONUS your agency may:

(a) Authorize you to occupy temporary quarters outside of the proximity requirements at § 302–6.10; and

(b) Authorize TQSE at the applicable locality per diem allowance under FTR §§ 301–11.100 through 301–11.102 of this subtitle or authorize actual expenses on an individual basis under FTR §§ 301–11.300 through 301–11.306 of this subtitle not to exceed 300 percent of the applicable per diem in accordance with § 301–11.303 of this subtitle; or

(c) Issue a blanket actual expense authorization for official relocation travel performed on or after the date of the Presidentially-Declared Disaster.

(d) The authorizations in paragraphs (a), (b), and (c) of this section must apply to a specific Presidential Disaster Declaration, and must end on the expiration date of the Declaration, or one year from the date the Declaration is issued, whichever is sooner. The maximum limit of 120 consecutive days that TQSE may be authorized is statutorily based and remains in effect in accordance with FTR § 302–6.29(a). A blanket authorization issued under this section shall not apply to any travel performed pursuant to chapter 301 of this subtitle and does not permit an agency to change the TQSE method authorized once the travel has begun. See § 302–6.22(b).

§ 302–6.25 Must I document my TQSE to receive reimbursement?

(a) *TQSE–LP method.* You must file a voucher and provide documentation for your temporary quarters lodging expenses, lodging taxes, and other subsistence expenses over $75. There is no requirement to document meals and incidental expenses.

(b) *TQSE–AE method.* You must file a voucher and document all temporary quarters lodging, lodging taxes, meals, and other subsistence expenses over $75.

(c) *TQSE–LS method.* You are not required to document your subsistence expenses or file a voucher. However, your agency will require you to sign a statement or other document, and provide proof that you actually occupied temporary quarters, even if not for the full length of time on which the lump sum calculation was based. In the absence of sufficient proof of temporary quarters occupancy, your agency may demand repayment of the TQSE–LS payment in accordance with § 302–6.205.

§ 302–6.26 May I receive an advance of funds for TQSE?

(a) *TQSE–LP and TQSE–AE methods.* You may receive an advance of funds if authorized in accordance with your agency policy and § 302–2.24 of this chapter. Your agency may advance the amount of funds necessary to cover your estimated TQSE expenses for up to 30 days. Your agency may subsequently advance additional funds for periods up to 30 days.

(b) *TQSE–LS method.* You will not receive an advance of funds as your agency will offer a one-time lump sum payment as close as is reasonably possible to the time you will begin occupancy of temporary quarters; no additional payments will be authorized. If your TQSE–LS payment is more than adequate to cover your actual TQSE expenses, any balance belongs to you (*e.g.,* your agency authorizes and you accept a lump sum payment for 15 days of TQSE and you vacate temporary quarters after 10 days, you would retain the remaining balance for the 5 days of TQSE not incurred).

§ 302–6.27 Must I use a Government contractor-issued travel charge card for TQSE?

Yes, you must use the Government contractor-issued travel charge card as the method of payment for all official relocation expenses, including TQSE, unless exempted under part 301–51 of this subtitle.

§ 302–6.28 Are temporary quarters lodging taxes and laundry/dry cleaning expenses included in the TQSE amount?

Temporary quarters lodging taxes are not included in your daily temporary quarters lodging rate and may be documented as a separate TQSE–LP or TQSE–AE miscellaneous expense. Lodging taxes for TQSE–LS are included in your overall lump sum amount. Laundry/dry cleaning expenses are included in your incidental portion of the daily M&IE allowance and are not separately reimbursed.

§ 302–6.29 How long may I be authorized to claim TQSE reimbursement?

(a) *TQSE–LP and TQSE–AE methods.* Your agency may initially authorize you to claim expenses in increments of 30 days or less, not to exceed 60 consecutive days. Your agency may authorize an extension of up to 60 additional consecutive days, for a maximum total of 120 consecutive days, if your agency determines that there is a compelling reason for you to continue occupying temporary quarters.

(b) *TQSE–LS method.* If your agency offers, and you select TQSE–LS, your agency may authorize a lump sum for each day authorized up to a maximum of 30 consecutive days of TQSE; no extensions are allowed under the lump sum payment method. You will not receive additional TQSE reimbursement if the lump sum payment is not adequate to cover your actual TQSE.

§ 302–6.30 May my agency reduce my authorized number of TQSE days if I am authorized a househunting trip?

Your agency may reduce the total number of days you are authorized for TQSE by the number of househunting days (*e.g.,* instead of authorizing 60 days of TQSE your agency can authorize 50 days to account for your 10-day househunting trip); however, the percentage multiplier used for calculating TQSE may not be reduced based on the number of days used for a househunting trip.

§ 302–6.31 What is a "compelling reason" warranting extension of my authorized period for claiming TQSE–LP or TQSE–AE reimbursement?

A ''compelling reason'' is an event that is beyond your control and is acceptable to your agency. Examples include, but are not limited to:

(a) Delivery of your household goods to your new residence is delayed due to availability of service providers, pandemics, strikes, customs clearance, hazardous weather, fires, floods or other acts of God, or similar events.

(b) You cannot occupy your new permanent residence because of unanticipated problems (*e.g.,* delay in settlement on the new residence, or short-term delay in construction of the residence).

(c) You are unable to locate a permanent residence that is adequate for your family's needs because of housing conditions at your new official station.

(d) Sudden illness, injury, your death or the death of your immediate family member.

§ 302–6.32 May I interrupt occupancy of temporary quarters?

Yes, your authorized period for claiming TQSE–LP and TQSE–AE reimbursement is measured on consecutive days, and once begun, normally continues to run whether or not you continue to occupy temporary quarters. However, you may interrupt your authorized period for claiming reimbursement in the following instances:

(a) For the time allowed for official travel en route between the old and new official stations;

(b) For circumstances attributable to official necessity such as an intervening temporary duty assignment or military duty; or

(c) For a non-official necessary interruption such as hospitalization, approved sick leave, or other reasons beyond your control and acceptable to your agency.

Subpart B—TQSE Methods of Reimbursement

§ 302–6.100 What am I paid under the TQSE–LP reimbursement method?

Your agency will pay your actual daily temporary quarters lodging cost and a daily M&IE allowance not to exceed the single maximum lodging amount and the single maximum M&IE amount for the applicable per diem rate (see § 302–6.23) for the locality at the old or new official station or combination thereof, wherever temporary quarters will be occupied. Your TQSE expenses must be reasonable and if expenses exceed the maximum allowable amount, you will not be reimbursed for more than the maximum allowable amount. The ''maximum allowable amount'' is the ''maximum daily amount'' multiplied by the number of days you actually incur TQSE not to exceed the number of days authorized, taking into account that the rates change after 30 days in temporary quarters. The ''maximum daily amount'' (see Note 1 to § 302–6.100) is determined by adding the rates for you and each member of your immediate family authorized to occupy temporary quarters:

(a) For the first 30 days of temporary quarters:

(1) You and/or your unaccompanied spouse or domestic partner (see Note 2 to § 302–6.100) may receive 100 percent of the temporary quarters lodging portion of the applicable per diem rate and 100 percent of the M&IE portion of the applicable per diem rate.

(2) Your accompanied spouse, domestic partner, or a member of your immediate family who is age 12 or older may receive 50 percent of the temporary quarters lodging portion of the applicable per diem rate and 50 percent of the M&IE portion of the applicable per diem rate.

(3) A member of your immediate family who is under age 12 may receive 40 percent of the temporary quarters lodging portion of the applicable per diem rate and 40 percent of the M&IE portion of the applicable per diem rate.

(b) For the second 30 days of temporary quarters:

(1) You and/or your unaccompanied spouse or domestic partner (see Note 2 to § 302–6.100) may receive 75 percent of the temporary quarters lodging portion of the applicable per diem rate and 75 percent of the M&IE portion of the applicable per diem rate.

(2) Your accompanied spouse, domestic partner, or a member of your immediate family who is age 12 or older may receive 45 percent of the temporary quarters lodging portion of the applicable per diem rate and 45 percent of the M&IE portion of the applicable per diem rate.

(3) A member of your immediate family who is under age 12 may receive 35 percent of the temporary quarters lodging portion of the applicable per diem rate and 35 percent of the M&IE portion of the applicable per diem rate.

(c) For any additional authorized days of temporary quarters:

(1) You and/or your unaccompanied spouse or domestic partner (see Note 2 to § 302–6.100) may receive 55 percent of the temporary quarters lodging portion of the applicable per diem rate and 55 percent of the M&IE portion of the applicable per diem rate.

(2) Your accompanied spouse, domestic partner, or a member of your immediate family who is age 12 or older may receive 40 percent of the temporary quarters lodging portion of the applicable per diem rate and 40 percent of the M&IE portion of the applicable per diem rate.

(3) A member of your immediate family who is under age 12 may receive 30 percent of the temporary quarters lodging portion of the applicable per diem rate and 30 percent of the M&IE portion of the applicable per diem rate.

Note 1 to § 302–6.100. Temporary quarters lodging and M&IE remain as separate maximum amounts for purposes of calculating TQSE–LP. Examples of TQSE calculations are published in an FTR bulletin at *https://gsa.gov/ftrbulletins.*

Note 2 to § 302–6.100. That is, when your spouse or domestic partner necessarily occupies temporary quarters in lieu of yourself or in a location separate from you.

§ 302–6.101 What am I paid under the TQSE–AE reimbursement method?

Your agency will pay your actual TQSE incurred, provided the expenses are reasonable and if expenses exceed the maximum allowable amount, you will not be reimbursed for more than the maximum allowable amount. The ''maximum allowable amount'' is the ''maximum daily amount'' multiplied by the number of days you actually incur TQSE not to exceed the number of days authorized, taking into account that the rates change after 30 days in temporary quarters. The ''maximum daily amount'' (see Note **1** to § 302–6.101) is determined by using the applicable per diem rate (see § 302–6.23) for the locality at the old or new official station or combination thereof, wherever temporary quarters will be occupied, and adding the rates for you and each member of your immediate family authorized to occupy temporary quarters:

(a) For the first 30 days of temporary quarters:

(1) You and/or your unaccompanied spouse or domestic partner (see Note 2 to § 302–6.101) may receive 100 percent of the applicable per diem rate.

(2) Your accompanied spouse, domestic partner, or a member of your immediate family who is age 12 or older may receive 50 percent of the applicable per diem rate.

(3) A member of your immediate family who is under age 12 may receive 40 percent of the applicable per diem rate.

(b) For the second 30 days of temporary quarters:

(1) You and/or your unaccompanied spouse or domestic partner (see Note 2 to § 302–6.101) may receive 75 percent of the applicable per diem rate.

(2) Your accompanied spouse, domestic partner, or a member of your immediate family who is age 12 or older may receive 45 percent of the applicable per diem rate.

(3) A member of your immediate family who is under age 12 may receive 35 percent of the applicable per diem rate.

(c) For any additional days of temporary quarters:

(1) You and/or your unaccompanied spouse or domestic partner (see Note 2 to § 302–6.101) may receive 55 percent of the applicable per diem rate.

(2) Your accompanied spouse, domestic partner, or a member of your immediate family who is age 12 or older may receive 40 percent of the applicable per diem rate.

(3) A member of your immediate family who is under age 12 may receive 30 percent of the applicable per diem rate.

Note 1 to § 302–6.101. Under TQSE–AE, separate amounts for temporary quarters lodging and M&IE may be combined to produce a single maximum daily amount to allow some of the M&IE rate to offset the lodging cost. Examples of TQSE calculations are published in an FTR bulletin at *https://gsa.gov/ftrbulletins.*

Note 2 to § 302–6.101. That is, when your spouse or domestic partner necessarily

occupies temporary quarters in lieu of yourself or in a location separate from you.

§ 302–6.102 What am I paid under the TQSE–LS reimbursement method?

(a) For you or your unaccompanied spouse or domestic partner (see Note 1 to § 302–6.102), if you are receiving a lump sum for TQSE, multiply the number of days (up to 30 days) your agency authorizes TQSE–LS by 75 percent of the applicable per diem rate (see § 302–6.23) for the locality at the old or new official station or combination thereof, wherever temporary quarters will be occupied.

(b) For each member of your immediate family (excluding your unaccompanied spouse or domestic partner), multiply the same number of days by 25 percent of the same per diem rate, as referenced in paragraph (a) of this section.

(c) Your lump sum payment will be the sum of the calculations in paragraphs (a) and (b) of this section.

Note 1 to § 302–6.102. That is, when your spouse or domestic partner necessarily occupies temporary quarters in lieu of yourself or in a location separate from you. Examples of TQSE calculations are published in an FTR bulletin at *https://gsa.gov/ftrbulletins.*

§ 302–6.103 May my agency reduce my TQSE allowance below the "maximum allowable amount"?

Yes, if the estimated daily amount of your TQSE is determined in advance to be lower than the maximum daily amount, your agency may reduce the maximum allowable amount to your expected expenses provided the new applicable amount is annotated on the relocation authorization before you occupy temporary quarters. However, see § 302–6.30 regarding househunting trips.

Subpart C—Agency Responsibilities

Note 1 to subpart C. Use of pronouns ''we'', ''you'', and their variants throughout this subpart refers to the agency.

§ 302–6.200 How should we administer the TQSE allowance?

Temporary quarters should be authorized only if, and only for as long as necessary until the employee and the employee's immediate family can move into permanent residence quarters. You must administer the TQSE allowance to minimize or avoid other relocation expenses.

§ 302–6.201 What governing policies must we establish for the TQSE allowance?

You must establish policies and procedures governing:

(a) When you will authorize temporary quarters for employees;

(b) Who will determine if temporary quarters is appropriate in each situation;

(c) What method of TQSE will be authorized;

(d) Who will determine the appropriate period of time for which TQSE reimbursement will be authorized, including approval of extensions and interruptions of temporary quarters occupancy;

(e) Who will determine whether quarters were indeed temporary; and

(f) Who will determine, and in what instances, to issue the authorizations at § 302–6.24, including a blanket authorization for actual expenses.

§ 302–6.202 Under what circumstances may we authorize the TQSE allowance?

You may authorize a TQSE allowance on an individual-case basis when use of temporary quarters is justified in connection with an employee's transfer to a new official station, including upon assignment to a temporary official station and permanent assignment to a temporary official station. You may not authorize a TQSE allowance for vacation purposes or other reasons unrelated to the transfer.

§ 302–6.203 What factors should we consider in determining whether the TQSE allowance is actually necessary?

The factors you should consider include:

(a) The length of time the employee should reasonably be expected to occupy their residence at the old official station before reporting for duty at the new official station. An employee and the employee's immediate family should continue to occupy the residence at the old official station for as long as practicable to avoid the necessity for temporary quarters.

(b) The existence of less expensive alternatives. If a less expensive alternative to the TQSE allowance exists that will enable the employee to find permanent quarters at the new official station, you should consider such an alternative. For example, authorize a househunting trip instead of temporary quarters if it would cost less overall.

(c) The existence of other opportunities to arrange for permanent quarters. Consider whether the employee had adequate opportunity to arrange for permanent quarters. For example, you should not authorize temporary quarters if the employee had adequate opportunity during an extended temporary duty assignment or long-term temporary change of station that became permanent, to arrange for permanent quarters.

§ 302–6.204 What factors should we consider in determining what TQSE method(s) to offer an employee?

When determining what TQSE method(s) to offer an employee the following factors should be considered:

(a) *Ease of administration.* You should consider the administrative requirements for each method of TQSE. Factors such as obtaining and reviewing receipts to verify validity, accuracy, and reasonableness of each expense carry an administrative burden to the employee, their immediate family, and you.

(b) *Cost consideration.* You should weigh the cost of each alternative. TQSE–LP and TQSE–AE reimbursement may extend up to 120 days, while the TQSE–LS payment is limited to a maximum of 30 days.

(c) *Treatment of employee.* The employee will be reimbursed for TQSE under the ''lodgings-plus'' method unless you offer one or more of the alternate methods. If you make all methods available to the employee, the employee is allowed to select any one of the methods. You should therefore consider employee morale and productivity against actual cost in determining which method(s) to offer.

§ 302–6.205 Must we require transferees to sign a statement that TQSE will be incurred?

(a) Transferees authorized TQSE–LP or TQSE–AE are not required to sign a statement asserting that they will occupy temporary quarters since they must document temporary quarters lodging expenses.

(b) Transferees electing the TQSE–LS payment option if offered by you, must sign a statement, which should be included as part of the service agreement, asserting that they will occupy temporary quarters and will incur TQSE. If a lump sum amount was paid, and if no TQSE are incurred, the transferee must return all monies received for the TQSE–LS payment to the agency.

§ 302–6.206 When must we make the TQSE–LS payment to the transferee?

You must pay the transferee the TQSE–LS payment before the occupancy of temporary quarters begins. You should make the TQSE–LS payment as close as is reasonably possible to the time that the transferee will begin occupancy of temporary quarters.

§ 302–6.207 What factors should we consider in determining whether quarters are temporary?

In determining whether quarters are ''temporary'', you should consider factors such as reasonable time when

the employee's residence at the old official station becomes temporary and no longer suitable for permanent residence (*e.g.,* household goods have been shipped and are unavailable to the employee and their immediate family), the duration of the lease, movement of household goods into the quarters, the type of quarters, the employee's expressions of intent, attempts to secure a permanent dwelling, and the length of time the employee occupies the quarters.

PART 302–17—TAXES ON RELOCATION EXPENSES

■ 4. The authority for part 302–17 continues to read as follows:

Authority: 5 U.S.C. 5724b; 5 U.S.C. 5738; E.O. 11609, as amended, 3 CFR, 1971–1975 Comp., p. 586.

§ 302–17.21 [Amended]

■ 5. Amend § 302–17.21(d) by removing ''actual expense or lump sum method'' in the second sentence and adding in its place ''lodgings-plus, actual expense, or lump sum method''.

BILLING CODE 6820–14–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 665

[RTID 0648–XD180]

Pacific Island Fisheries; Standardized Bycatch Reporting Methodologies

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Agency decision.

SUMMARY: NMFS announces the approval of Amendments to the five fishery ecosystem plans (FEP) for fisheries in the Pacific Islands Region. The FEPs are amended to update data collection mechanisms identified as standardized bycatch reporting methodologies (SBRM) and to revise descriptions of SBRM for consistency with current NMFS regulations. These Amendments ensure conformance with national guidance for compliance with the SBRM requirement in the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

DATES: The Amendments were approved on May 2, 2024.

ADDRESSES: Electronic copies of the Amendments may be obtained via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and type NOAA–NMFS–2023–0151 in the Search box (*Note:* copying and pasting this Docket Number directly from this document may not yield search results). Documents can be found on the Council's website at *https://www.wpcouncil.org.*

FOR FURTHER INFORMATION CONTACT: Brett Schumacher, Sustainable Fisheries Division, NMFS Pacific Islands Regional Office, 808–725–5176.

SUPPLEMENTARY INFORMATION:

Background

The Magnuson-Stevens Act requires that each regional fishery management council submit any fishery management plan (FMP) amendment it prepares to NMFS for review and approval, disapproval, or partial approval by the Secretary. 16 U.S.C. 1854(a). In lieu of FMPs, NMFS manages the fisheries in the Pacific Islands Region exclusive economic zone under five FEP: the American Samoa Archipelago FEP, the Hawaii Archipelago FEP, the Mariana Archipelago FEP, the Pacific Remote Island Areas (PRIA) FEP, and the Pelagic Fisheries of the Western Pacific Region FEP. The Western Pacific Fishery Management Council (Council) prepared these FEPs under the authority of the Magnuson-Stevens Act, 16 U.S.C. 1801 *et seq.*

Regulations governing U.S. fisheries and implementation of the FEPs appear at 50 CFR parts 600 and 665. Section 303(a)(11) of the Magnuson-Stevens Act requires that any FEP establish a SBRM to assess the amount and type of bycatch occurring in the fishery, and include conservation and management measures that, to the extent practicable, minimize bycatch and minimize the mortality of bycatch that cannot be avoided.

On January 19, 2017, NMFS published a final rule (82 FR 6317) establishing national guidance regulations at 50 CFR 600.1600 through 50 CFR 600.1610 for compliance with the Magnuson-Stevens Act SBRM requirement (SBRM regulations). The SBRM regulations define SBRM as a consistent procedure or procedures used to collect, record, and report bycatch data in a fishery managed under a FEP. The SBRM regulations require the Council to explain how each FEP's SBRM meets the purpose described in the national guidelines, based on an analysis of four considerations: (1) characteristics of bycatch in the fishery, (2) the feasibility of the reporting methodology, (3) the uncertainty of data resulting from the methodology, and (4) how the data will be used to assess the amount and type of bycatch occurring in the fishery. The Council undertook a review of its FEPs to ensure they met these requirements. That review resulted in the Amendments referenced in this notice. The Amendments update data collection mechanisms identified as SBRM as needed, and revise descriptions of SBRM in each FEP for consistency with the SBRM regulations. The Amendments are administrative in nature and would not change any fishery data collection, recording, or reporting methods or requirements, and would not implement any new regulations.

Further detail describing the Amendments was provided in the Notice of Availability (NOA) for this action and is not repeated here.

Procedural Aspects of the Amendments

The Council submitted the Amendments to the Secretary for review on February 1, 2024. On February 9, 2024, NMFS published a NOA for the Amendments, including background on the rationale for how the amendments proposed to satisfy the requirements of the SBRM regulations, and requested public review and comment (89 FR 9111). The public comment period for the subject Amendments ended on April 9, 2024. Two public comments were received pertaining to the omnibus amendment and are addressed below.

The Amendments do not add any new reporting requirements and do not change any regulatory requirements. Therefore, no proposed or final rule was prepared.

Comments and Responses

NMFS received two comments in support of the omnibus Amendment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 2, 2024.

RIN 0648–BM65

Pacific Island Fisheries; Annual Catch Limits and Accountability Measures for Main Hawaiian Islands Kona Crab for Fishing Years 2024–2026

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This final rule implements an annual catch limit (ACL), annual catch target (ACT), and accountability measures (AM) for main Hawaiian Islands (MHI) Kona crab for fishing years 2024, 2025, and 2026. NMFS will close Federal waters to Kona crab fishing for the remainder of the fishing year if NMFS projects the fishery will reach the ACT. NMFS will reduce the ACT and ACL in the subsequent fishing year by the overage amount if landings exceed the ACL in a fishing year. NMFS intends this final rule to support the long-term sustainability of MHI Kona crab.

DATES: This rule is effective June 6, 2024.

ADDRESSES: Background information on main Hawaiian Island Kona crab fishery is found in the Fishery Ecosystem Plans for the Hawaii Archipelago (FEP) available from the Western Pacific Fishery Management Council (Council), 1164 Bishop St., Suite 1400, Honolulu, HI 96813, telephone 808–522–8220, fax 808–522–8226, or *https://www.wpcouncil.org.* Copies of supporting documents for this action are available from *https://www.regulations.gov/docket/NOAA-NMFS-2023-0071,* or from Sarah Malloy, Acting Regional Administrator, NMFS Pacific Islands Regional Office (PIRO), 1845 Wasp Blvd., Bldg. 176, Honolulu, HI 96818.

FOR FURTHER INFORMATION CONTACT: Savannah Lewis, NMFS Pacific Islands Regional Office (PIRO) Sustainable Fisheries, 808–725–5144.

SUPPLEMENTARY INFORMATION:

NMFS and the Council manage the Kona crab fishery in the U.S. Exclusive Economic Zone (Federal waters) around Hawaii under the Fishery Ecosystem Plan for the Hawaiian Archipelago (FEP), as authorized by the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) (50 CFR part 665). The FEP contains a process for the Council and NMFS to specify ACLs, ACTs, and AMs (see 50 CFR 665.4). NMFS must specify ACLs and AMs for each stock and stock complex of each management unit species (MUS) in an FEP, as recommended by the Council, and must consider the best available scientific, commercial, and other information about the fishery. If a fishery exceeds an ACL, the regulations require the Council to take action (*e.g.,* an AM reducing the ACL for the subsequent fishing year by the amount of the overage). ACTs can be used as an additional management measure to help ensure catch does not exceed the ACL.

NMFS is implementing for the MHI Kona crab, an ACL of 30,802 pounds (lb; 13,972 kilograms (kg)) and an ACT of 25,491 lb (11,563 kg). The fishing year begins on January 1 and ends on December 31, and catch from both State (generally from the shoreline to three nautical miles, or 5.6 kilometers (km), offshore) and Federal waters are counted towards catch limits.

TABLE 1—ANNUAL CATCH LIMITS AND ANNUAL CATCH TARGETS FOR MAIN HAWAIIAN ISLANDS KONA CRAB

Fishing year	2024	2025	2026
ACL (lb)	30,802	30,802	30,802
ACT (lb)	25,491	25,491	25,491

The rule will not change the current AM for the MHI Kona crab fishery (50 CFR 665.253(b)). As an in-season AM, NMFS will close Federal waters to commercial and non-commercial fishing for Kona crab for the remainder of the fishing year if NMFS projects that the fishery will reach the ACT. If a closure occurs, NMFS will publish a document to that effect in the **Federal Register** at least 7 days in advance of the closure. We will also request the State of Hawaii notify Commercial Marine License holders of any changes in the fishery, including an in-season closure or a post-season correction. The State of Hawaii does not currently require closure of state waters when the federal ACT is reached. Catch from state waters will continue to be attributed to the ACT and ACL. As a post-season AM, NMFS will reduce the ACT and ACL in the subsequent fishing year by the overage amount if the landings exceed the ACL in a fishing year. If catch exceeds the ACT, but is below the ACL, NMFS will not apply a post-season correction.

This rule is consistent with recommendations made by the Council at its 195th meeting in June 2023, and the 2024–2026 catch limits are identical to those implemented in 2020 for fishing years 2020–2023.

Additional background information on this action is in the preamble to the proposed rule (89 FR 7658, February 04, 2024).

Comments and Responses

On February 04, 2024, NMFS published a proposed rule and request for public comments (89 FR 7658). The comment period ended March 05, 2024. NMFS received two comments from the interested public generally supporting the action. One of these comments also expressed concern for effects on local businesses that may result if NMFS implements the AMs and closes the fishery early. NMFS summarizes the comments and responds below.

Comment 1: I support the analysis and rationale of the proposed ACL and ACT.

Response: NMFS agrees, and we will continue to manage the Kona crab fishery in Federal waters to perpetuate sustainable fisheries resources for communities in Hawaii, consistent with the Magnuson-Stevens Act, the FEP and implementing regulations.

Comment 2: The effect of the proposed regulations on small island businesses cannot be overlooked. Cutting off the season prematurely may disproportionately affect the locals who rely upon the crabs for their livelihood. More investigation into these effects seems necessary.

Response: With respect to potential impacts to small businesses, NMFS quantitatively evaluated potential economic and social effects of all proposed management actions and determined this action would not cause significant social or economic effects. During the proposed rule stage, the Chief Counsel for Regulation of the

Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that the rule will not have a significant economic impact on a substantial number of small business entities.

NMFS and the Council monitor the fishery in collaboration with the State of Hawaii based on monthly catch reports. This consistent data stream ensures that the fishery would not be closed prematurely, and would be closed only if necessary to prevent overfishing. NMFS does not anticipate the fishery will reach the ACT or ACL based on recent performance. Average catch of Kona crab over the last 3 years was 3,581 lb (1,624 kg), only 12 percent of the ACL and 14 percent of the ACT, and the fishery has not caught over 25,000 lb (11,340 kg) since 1998. Further, the Kona crab fishery has been managed under the same ACL, ACT and AM since 2020, and catch has not reached the ACT since in any year since 2020. Based on this information, we do not anticipate that we will need to apply the in-season AM to close the fishery in Federal waters. Should catch in the fishery reach the ACT and NMFS implement the AM to close the fishery in Federal waters, fishers could continue to operate in State waters, minimizing the potential socio-economic effects of the closure. Nevertheless, closing the fishery in Federal waters would provide enhanced protection of Kona crab stock in Federal waters to prevent overfishing of the stock and perpetuate the Kona crab fishery for communities in Hawaii. Therefore, NMFS does not anticipate the rule will result in significant environmental, social, or economic impacts.

Changes From the Proposed Rule

This final rule contains no changes from the proposed rule.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this final rule is consistent with the FEP, other provisions of the Magnuson-Stevens Act, and other applicable laws.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 665

Accountability measures, Annual catch limits, Fisheries, Fishing, Hawaii, Kona crab, Pacific Islands.

Dated: May 1, 2024.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS proposes to amend 50 CFR part 665 as follows:

PART 665—FISHERIES IN THE WESTERN PACIFIC

■ 1. The authority citation for 50 CFR part 665 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 665.253, revise paragraph (b)(1) to read as follows:

§ 665.253 Annual Catch Limits (ACL) and Annual Catch Targets (ACT).

* * * * *

(b) * * * (1) In accordance with § 665.4, the ACLs and ACTs for each fishing year are as follows:

TABLE 1 TO PARAGRAPH (b)(1)

Fishing year	2024	2025	2026
ACL (lb)	30,802	30,802	30,802
ACT (lb)	25,491	25,491	25,491

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 89, No. 89
Tuesday, May 7, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

10 CFR Part 430

[EERE–2020–BT–STD–0039]

RIN 1904–AF62

Energy Conservation Program: Energy Conservation Standards for Miscellaneous Refrigeration Products

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Energy Policy and Conservation Act, as amended (''EPCA''), prescribes energy conservation standards for various consumer products and certain commercial and industrial equipment, including miscellaneous refrigeration products (''MREFs''). In this notice of proposed rulemaking (''NOPR''), DOE proposes new energy conservation standards for MREFs identical to those set forth in a direct final rule published elsewhere in this issue of the **Federal Register**. If DOE receives adverse comment and determines that such comment may provide a reasonable basis for withdrawal of the direct final rule, DOE will publish a notice of withdrawal and will proceed with this proposed rule.

DATES: DOE will accept comments, data, and information regarding this NOPR no later than August 26, 2024. Comments regarding the likely competitive impact of the proposed standard should be sent to the Department of Justice contact listed in the **ADDRESSES** section on or before June 6, 2024.

ADDRESSES: See section IV of this document, ''Public Participation,'' for details. If DOE withdraws the direct final rule published elsewhere in this issue of the **Federal Register**, DOE will hold a public meeting to allow for additional comment on this proposed rule. DOE will publish notice of any meeting in the **Federal Register**.

Interested persons are encouraged to submit comments using the Federal eRulemaking Portal at *www.regulations.gov* under docket number EERE–2020–BT–STD–0039. Follow the instructions for submitting comments. Alternatively, interested persons may submit comments, identified by docket number EERE–2020–BT–STD–0039, by any of the following methods:

(1) *Email: ApplianceStandardsQuestions@ee.doe.gov.* Include the docket number EERE–2020–BT–STD–0039 in the subject line of the message.

(2) *Postal Mail:* Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, Mailstop EE–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 287–1445. If possible, please submit all items on a compact disc (''CD''), in which case it is not necessary to include printed copies.

(3) *Hand Delivery/Courier:* Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, 1000 Independence Avenue SW, Washington, DC 20024. Telephone: (202) 287–1445. If possible, please submit all items on a CD, in which case it is not necessary to include printed copies.

No telefacsimiles (''faxes'') will be accepted. For detailed instructions on submitting comments and additional information on this process, see section IV of this document.

Docket: The docket for this activity, which includes **Federal Register** notices, comments, and other supporting documents/materials, is available for review at *www.regulations.gov.* All documents in the docket are listed in the *www.regulations.gov* index. However, not all documents listed in the index may be publicly available, such as information that is exempt from public disclosure.

The docket web page can be found at *www.regulations.gov/docket/EERE-020-BT-STD-0039.* The docket web page contains instructions on how to access all documents, including public comments, in the docket. See section IV of this document for information on how to submit comments through *www.regulations.gov.*

EPCA requires the Attorney General to provide DOE a written determination of whether the proposed standard is likely to lessen competition. The U.S. Department of Justice Antitrust Division invites input from market participants and other interested persons with views on the likely competitive impact of the proposed standard. Interested persons may contact the Division at *energy.standards@usdoj.gov* on or before the date specified in the **DATES** section. Please indicate in the ''Subject'' line of your email the title and Docket Number of this proposed rulemaking.

FOR FURTHER INFORMATION CONTACT:

Mr. Lucas Adin, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 287–5904 Email: *ApplianceStandardsQuestions@ee.doe.gov.*

Mr. Matthew Schneider, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 597–6265. Email: *matthew.schneider@hq.doe.gov.*

For further information on how to submit a comment, review other public comments and the docket, or participate in the public meeting, contact the Appliance and Equipment Standards Program staff at (202) 287–1445 or by email: *ApplianceStandardsQuestions@ee.doe.gov.*

I. Synopsis of the Proposed Rule

The Energy Policy and Conservation Act, Public Law 94–163, as amended (''EPCA''),[1] authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. (42 U.S.C. 6291–6317) Title III, Part B of EPCA[2] established the Energy Conservation Program for Consumer Products Other Than Automobiles. (42 U.S.C. 6291–6309) These products include miscellaneous refrigeration products (''MREFs''), the subject of this proposed rulemaking.

Pursuant to EPCA, any new or amended energy conservation standard must, among other things, be designed to achieve the maximum improvement in energy efficiency that DOE determines is technologically feasible and economically justified. (42 U.S.C. 6295(o)(2)(A)) Furthermore, the new or amended standard must result in significant conservation of energy. (42 U.S.C. 6295(o)(3)(B))

In light of the above and under the authority provided by 42 U.S.C. 6295(p)(4), DOE is proposing this rule establishing and amending the energy conservation standards for miscellaneous refrigeration products and is concurrently issuing a direct final rule elsewhere in this **Federal Register**. DOE will proceed with this notice of proposed rulemaking only if it determines it must withdraw the direct final rule pursuant to the criteria provided in 42 U.S.C. 6295(p)(4). The amended standard levels in the proposed rule and the direct final rule were recommended in a letter submitted to DOE jointly by groups representing manufacturers, energy and environmental advocates, consumer groups, and a utility. This letter, titled ''Energy Efficiency Agreement of 2023'' (hereafter, the ''Joint Agreement''[3]), recommends specific energy conservation standards for miscellaneous refrigeration products that, in the commenters' view, would satisfy the EPCA requirements in 42 U.S.C. 6295(o). DOE subsequently received letters of support from States including New York, California, and Massachusetts[4] and utilities including San Diego Gas and Electric and Southern California Edison[5] advocating for the adoption of the recommended standards. As discussed in more detail in the accompanying direct final rule and in accordance with the provisions at 42 U.S.C. 6295(p)(4), DOE has determined that the recommendations contained in the Joint Agreement comply with the requirements of 42 U.S.C. 6295(o).

In accordance with these and other statutory provisions discussed in this document, DOE proposes new and amended energy conservation standards for miscellaneous refrigeration products. The standards for miscellaneous refrigeration products are expressed in terms of integrated annual energy use (''AEU''), measured in kilowatt-hours per year (''kWh/year''), as measured according to DOE's current test procedure codified at title 10 of the Code of Federal Regulations (''CFR'') part 430, subpart B, appendix A (''appendix A'').

Table I.1 presents the proposed standards for MREFs. The proposed standards are the same as those recommended by the Joint Agreement. These standards would apply to all products listed in Table I.1 and manufactured in, or imported into the United States starting on January 31, 2029, as recommended in the Joint Agreement.

Table I.1 Energy Conservation Standards for Miscellaneous Refrigeration Products (Compliance Starting January 31, 2029)

[1] All references to EPCA in this document refer to the statute as amended through the Energy Act of 2020, Public Law 116–260 (Dec. 27, 2020), which reflect the last statutory amendments that impact Parts A and A–1 of EPCA.

[2] For editorial reasons, upon codification in the U.S. Code, Part B was redesignated Part A.

Product Class ("PC")	Equations for maximum energy use (kWh/yr)
	Based on AV (ft^3)
1. Freestanding Compact Coolers (FCC)	5.52AV +109.1
2. Freestanding Coolers (FC)	5.52AV +109.1
3. Built-in Compact Coolers (BICC)	5.52AV +109.1
4. Built-in Coolers (BIC)	6.30AV + 124.6
C-3A. Cooler with all-refrigerator – automatic defrost	4.11AV + 117.4
C-3A-BI. Built-in cooler with all-refrigerator – automatic defrost	4.67AV + 133.0
C-5-BI. Built-in cooler with refrigerator-freezer – automatic defrost with bottom-mounted freezer	5.47AV + 196.2 +28I
C-9. Cooler with upright freezer with automatic defrost without an automatic icemaker	5.58AV + 147.7 + 28I
C-9-BI. Built-in cooler with upright freezer with automatic defrost without an automatic icemaker	6.38AV + 168.8 + 28I
C-13A. Compact cooler with all-refrigerator – automatic defrost	4.74AV + 155.0
C-13A-BI. Built-in compact cooler with all-refrigerator – automatic defrost	5.22AV + 170.5

AV = Total adjusted volume, expressed in ft^3, as determined in appendices A and B of subpart B of 10 CFR part 430.
av = Total adjusted volume, expressed in Liters.
I = 1 for a product with an automatic icemaker and = 0 for a product without an automatic icemaker.

II. Introduction

The following section briefly discusses the statutory authority underlying this proposed rule, as well as some of the relevant historical background related to the establishment of standards for MREFs.

A. Authority

EPCA authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. Title III, Part B of EPCA [6] established the Energy Conservation Program for Consumer Products Other Than Automobiles, which, in addition to identifying particular consumer products and commercial equipment as covered under the statute, permits the Secretary of Energy to classify additional types of consumer products as covered products. (42 U.S.C. 6292(a)(20)) DOE added MREFs as covered products through a final determination of coverage published in the **Federal Register** on July 18, 2016 (the ''July 2016 Final Coverage Determination''). 81 FR 46768. MREFs are consumer refrigeration products other than refrigerators, refrigerator-freezers, or freezers, which include coolers and combination cooler refrigeration products. 10 CFR 430.2. MREFs include refrigeration products such as coolers (*e.g.,* wine chillers and other specialty products) and combination cooler refrigeration products (*e.g.,* wine chillers and other specialty compartments combined with a refrigerator, refrigerator-freezers, or freezers). EPCA further provides that, not later than 6 years after the issuance of any final rule establishing or amending a standard, DOE must publish either a notice of determination that standards for the product do not need to be amended, or a NOPR including new proposed energy conservation standards (proceeding to a final rule, as appropriate). (42 U.S.C. 6295(m)(1)) Not later than three years after issuance of a final determination not to amend standards, DOE must publish either a notice of determination that standards for the product do not need to be amended, or a NOPR including new proposed energy conservation standards (proceeding to a final rule, as appropriate). (42 U.S.C. 6295(m)(3)(B))

The energy conservation program under EPCA, consists essentially of four parts: (1) testing, (2) labeling, (3) the establishment of Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of the EPCA specifically include definitions (42 U.S.C. 6291), test procedures (42 U.S.C. 6293), labeling provisions (42 U.S.C. 6294), energy conservation standards (42 U.S.C. 6295), and the authority to require information and reports from manufacturers (42 U.S.C. 6296).

Federal energy efficiency requirements for covered products established under EPCA generally supersede State laws and regulations concerning energy conservation testing, labeling, and standards. (42 U.S.C. 6297(a)–(c)) DOE may, however, grant waivers of Federal preemption in limited instances for particular State laws or regulations, in accordance with the procedures and other provisions set forth under EPCA. (*See* 42 U.S.C. 6297(d))

Subject to certain criteria and conditions, DOE is required to develop test procedures to measure the energy efficiency, energy use, or estimated annual operating cost of each covered product. (42 U.S.C. 6295(o)(3)(A) and 42 U.S.C. 6295(r)) Manufacturers of covered products must use the prescribed DOE test procedure as the basis for certifying to DOE that their products comply with the applicable energy conservation standards adopted under EPCA and when making representations to the public regarding the energy use or efficiency of those

[6] For editorial reasons, upon codification in the U.S. Code, Part B was redesignated Part A.

products. (42 U.S.C. 6293(c) and 6295(s)) Similarly, DOE must use these test procedures to determine whether the products comply with standards adopted pursuant to EPCA. (42 U.S.C. 6295(s)) The DOE test procedure for MREFs appears at appendix A (*Uniform Test Method for Measuring the Energy Consumption of Refrigerators, Refrigerator-Freezers, and Miscellaneous Refrigeration Products*).

DOE must follow specific statutory criteria for prescribing new or amended standards for covered products, including MREFs. Any new or amended standard for a covered product must be designed to achieve the maximum improvement in energy efficiency that the Secretary of Energy (''Secretary'') determines is technologically feasible and economically justified. (42 U.S.C. 6295(o)(2)(A) and 42 U.S.C. 6295(o)(3)(B)) Furthermore, DOE may not adopt any standard that would not result in the significant conservation of energy. (42 U.S.C. 6295(o)(3))

Moreover, DOE may not prescribe a standard (1) for certain products, including MREFs, if no test procedure has been established for the product, or (2) if DOE determines by rule that the standard is not technologically feasible or economically justified. (42 U.S.C. 6295(o)(3)(A)–(B)) In deciding whether a proposed standard is economically justified, DOE must determine whether the benefits of the standard exceed its burdens. (42 U.S.C. 6295(o)(2)(B)(i)) DOE must make this determination after receiving comments on the proposed standard, and by considering, to the greatest extent practicable, the following seven statutory factors:

(1) The economic impact of the standard on manufacturers and consumers of the products subject to the standard;

(2) The savings in operating costs throughout the estimated average life of the covered products in the type (or class) compared to any increase in the price, initial charges, or maintenance expenses for the covered products that are likely to result from the standard;

(3) The total projected amount of energy (or as applicable, water) savings likely to result directly from the standard;

(4) Any lessening of the utility or the performance of the covered products likely to result from the standard;

(5) The impact of any lessening of competition, as determined in writing by the Attorney General, that is likely to result from the standard;

(6) The need for national energy and water conservation; and

(7) Other factors the Secretary considers relevant.

(42 U.S.C. 6295(o)(2)(B)(i)(I)–(VII))

Further, EPCA, as codified, establishes a rebuttable presumption that a standard is economically justified if the Secretary finds that the additional cost to the consumer of purchasing a product complying with an energy conservation standard level will be less than three times the value of the energy savings during the first year that the consumer will receive as a result of the standard, as calculated under the applicable test procedure. (42 U.S.C. 6295(o)(2)(B)(iii))

EPCA, as codified, also contains what is known as an ''anti-backsliding'' provision, which prevents the Secretary from prescribing any amended standard that either increases the maximum allowable energy use or decreases the minimum required energy efficiency of a covered product. (42 U.S.C. 6295(o)(1)) Also, the Secretary may not prescribe an amended or new standard if interested persons have established by a preponderance of the evidence that the standard is likely to result in the unavailability in the United States in any covered product type (or class) of performance characteristics (including reliability), features, sizes, capacities, and volumes that are substantially the same as those generally available in the United States. (42 U.S.C. 6295(o)(4))

EPCA specifies requirements when promulgating an energy conservation standard for a covered product that has two or more subcategories. A rule prescribing an energy conservation standard for a type (or class) of product must specify a different standard level for a type or class of products that has the same function or intended use if DOE determines that products within such group (A) consume a different kind of energy from that consumed by other covered products within such type (or class); or (B) have a capacity or other performance-related feature which other products within such type (or class) do not have and such feature justifies a higher or lower standard. (42 U.S.C. 6295(q)(1)) In determining whether a performance-related feature justifies a different standard for a group of products, DOE considers such factors as the utility to the consumer of such a feature and other factors DOE deems appropriate. (*Id.*) Any rule prescribing such a standard must include an explanation of the basis on which such higher or lower level was established. (42 U.S.C. 6295(q)(2))

Additionally, pursuant to the amendments contained in the Energy Independence and Security Act of 2007 (''EISA 2007''), Public Law 110–140, any final rule for new or amended energy conservation standards promulgated after July 1, 2010, are required to address standby mode and off mode energy use. (42 U.S.C. 6295(gg)(3)) Specifically, when DOE adopts a standard for a covered product after that date, it must, if justified by the criteria for adoption of standards under EPCA (42 U.S.C. 6295(o)), incorporate standby mode and off mode energy use into a single standard, or, if that is not feasible, adopt a separate standard for such energy use for that product. (42 U.S.C. 6295(gg)(3)(A)–(B)) DOE's current test procedure for MREFs addresses standby mode and off mode energy use. The standards proposed in this NOPR incorporate standby and off mode energy use.

Finally, EISA 2007 amended EPCA, in relevant part, to grant DOE authority to issue a final rule (*i.e.,* a ''direct final rule'') establishing an energy conservation standard upon receipt of a statement submitted jointly by interested persons that are fairly representative of relevant points of view (including representatives of manufacturers of covered products, States, and efficiency advocates), as determined by the Secretary, that contains recommendations with respect to an energy or water conservation standard. (42 U.S.C. 6295(p)(4)) Pursuant to 42 U.S.C. 6295(p)(4), the Secretary must also determine whether a jointly-submitted recommendation for an energy or water conservation standard satisfies 42 U.S.C. 6295(o) or 42 U.S.C. 6313(a)(6)(B), as applicable.

A NOPR that proposes an identical energy efficiency standard must be published simultaneously with the direct final rule, and DOE must provide a public comment period of at least 110 days on this proposal. (42 U.S.C. 6295(p)(4)(A)–(B)) Based on the comments received during this period, the direct final rule will either become effective, or DOE will withdraw it not later than 120 days after its issuance if: (1) one or more adverse comments is received, and (2) DOE determines that those comments, when viewed in light of the rulemaking record related to the direct final rule, may provide a reasonable basis for withdrawal of the direct final rule under 42 U.S.C. 6295(o). (42 U.S.C. 6295(p)(4)(C)) Receipt of an alternative joint recommendation may also trigger a DOE withdrawal of the direct final rule in the same manner. (*Id.*) After withdrawing a direct final rule, DOE must proceed with the NOPR published simultaneously with the direct final rule and publish in the **Federal Register** the reasons why the direct final rule was withdrawn. (*Id.*)

DOE has previously explained its interpretation of its direct final rule authority. In a final rule amending the Department's ''Procedures, Interpretations and Policies for Consideration of New or Revised Energy Conservation Standards for Consumer Products'' at 10 CFR part 430, subpart C, appendix A, DOE noted that it may issue standards recommended by interested persons that are fairly representative of relative points of view as a direct final rule when the recommended standards are in accordance with 42 U.S.C. 6295(o) or 42 U.S.C. 6313(a)(6)(B), as applicable. 86 FR 70892, 70912 (Dec. 13, 2021). But the direct final rule provision in EPCA, under which this proposed rule is issued, does not impose additional requirements applicable to other standards rulemakings, which is consistent with the unique circumstances of rules issued as consensus agreements under DOE's direct final rule authority. *Id.* DOE's discretion remains bounded by its statutory mandate to adopt a standard that results in the maximum improvement in energy efficiency that is technologically feasible and economically justified—a requirement found in 42 U.S.C. 6295(o). *Id.* As such, DOE's review and analysis of the Joint Agreement is limited to whether the recommended standards satisfy the criteria in 42 U.S.C. 6295(o).

B. Background

1. Current Standards

In a direct final rule published on October 28, 2016 (''October 2016 Direct Final Rule''), DOE prescribed the current energy conservation standards for MREFs manufactured on and after October 28, 2019. 81 FR 75194. These standards are set forth in DOE's regulations at 10 CFR 430.32(a)(1)–(2). These standards are consistent with a negotiated term sheet submitted to DOE by interested parties representing manufacturers, energy and environmental advocates, and consumer groups.[7]

2. Current Test Procedures

On October 12, 2021, DOE published a test procedure final rule (''October 2021 TP Final Rule'') establishing test procedures for MREFs, at appendix A. 86 FR 56790. The test procedure amendments included adopting the latest version of the relevant industry standard published by the Association of Home Appliance Manufacturers (''AHAM''), updated in 2019, AHAM Standard HRF–1, ''Energy and Internal Volume of Refrigerating Appliances'' (''HRF–1–2019''). 10 CFR 430.3(i)(4). The standard levels adopted in this direct final rule are based on the annual energy use (''AEU'') metrics as measured according to appendix A.

3. History of Standards Rulemaking for MREFs

On April 1, 2015, DOE published a notice announcing its intention to establish a negotiated rulemaking working group under the Appliance Standards Rulemaking Advisory Committee (''ASRAC'') to negotiate energy conservation standards for refrigeration products such as wine chillers. 80 FR 17355. DOE then created a working group of interested parties to develop a series of recommended energy conservation standards for MREFs. On July 18, 2016, DOE published the July 2016 Final Coverage Determination that added MREFs as covered products. 81 FR 46768. In that determination, DOE noted that MREFs, on average, consume more than 150 kilowatt-hours per year (''kWh/yr'') and that the aggregate annual national energy use of these products exceeds 4.2 terawatt hours (''TWh''). 81 FR 46768, 46775. In addition to establishing coverage, the July 2016 Final Coverage Determination established definitions for ''miscellaneous refrigeration products,'' ''coolers,'' and ''combination cooler refrigeration products'' in 10 CFR 430.2. 81 FR 46768, 46791–46792.

On October 28, 2016, a negotiated term sheet containing a series of recommended standards and other related recommendations were submitted to ASRAC for approval and, subsequently, DOE published the October 2016 Direct Final Rule adopting energy conservation standards consistent with the recommendations contained in the term sheet. 81 FR 75194. Concurrent with the October 2016 Direct Final Rule, DOE published a NOPR in which it proposed and requested comments on the standards set forth in the direct final rule. 81 FR 74950. On May 26, 2017, DOE published a notice in the **Federal Register** in which it determined that the comments received in response to the October 2016 Direct Final Rule did not provide a reasonable basis for withdrawing the rule and, therefore, confirmed the adoption of the energy conservation standards established in that direct final rule. 82 FR 24214.

4. The Joint Agreement

On September 25, 2023, DOE received a joint statement of recommended standards (*i.e.,* the Joint Agreement) for various consumer products, including MREFs, submitted jointly by groups representing manufacturers, energy and environmental advocates, consumer groups, and a utility.[8] In addition to the recommended standards for MREFs, the Joint Agreement also included separate recommendations for several other covered products.[9] And, while acknowledging that DOE may implement these recommendations in separate rulemakings, the Joint Agreement also stated that the recommendations were recommended as a complete package, and each recommendation is contingent upon the other parts being implemented. DOE understands this to mean that the Joint Agreement is contingent upon DOE initiating rulemaking processes to adopt all of the recommended standards in the agreement. That is distinguished from an agreement where issuance of an amended energy conservation standard for a covered product is contingent on issuance of amended energy conservation standards for the other covered products. If the Joint Agreement were so construed, it would conflict with the anti-backsliding provision in 42 U.S.C. 6295(o)(1), because it would imply the possibility that, if DOE were unable to issue an amended standard for a certain product, it would have to withdraw a previously issued standard for one of the other products. The anti-backsliding provision, however, prevents DOE from withdrawing or amending an energy conservation standard to be less stringent. As a result, DOE will be proceeding with individual rulemakings that will evaluate each of the recommended standards separately

[7] The negotiated term sheets are available in docket ID EERE–2011–BT–STD–0043 on *www.regulations.gov.*

[8] The signatories to the Joint Agreement include AHAM, American Council for an Energy-Efficient Economy, Alliance for Water Efficiency, Appliance Standards Awareness Project, Consumer Federation of America, Consumer Reports, Earthjustice, National Consumer Law Center, Natural Resources Defense Council, Northwest Energy Efficiency Alliance, and Pacific Gas and Electric Company. Members of AHAM's Major Appliance Division that manufacture the affected products include: Alliance Laundry Systems, LLC; Asko Appliances AB; Beko US Inc.; Brown Stove Works, Inc.; BSH; Danby Products, Ltd.; Electrolux Home Products, Inc.; Elicamex S.A. de C.V.; Faber; Fotile America; GEA, a Haier Company; L'Atelier Paris Haute Design LLG; LGEUSA; Liebherr USA, Co.; Midea America Corp.; Miele, Inc.; Panasonic Appliances Refrigeration Systems (PAPRSA) Corporation of America; Perlick Corporation; Samsung; Sharp Electronics Corporation; Smeg S.p.A; Sub-Zero Group, Inc.; The Middleby Corporation; U-Line Corporation; Viking Range, LLC; and Whirlpool.

[9] The Joint Agreement contained recommendations for six covered products: refrigerators, refrigerator-freezers, and freezers; residential clothes washers; consumer clothes dryers; dishwashers; consumer conventional cooking products; and miscellaneous refrigeration products.

under the applicable statutory criteria. The Joint Agreement recommends amended standard levels for MREFs as presented in Table II.1. (Joint Agreement, No. 34 at p. 4) Details of the Joint Agreement recommendations for other products are provided in the Joint Agreement posted in the docket.[10]

Table II.1 Recommended Amended Energy Conservation Standards for Miscellaneous Refrigeration Products

BILLING CODE 6450–01–P

Product Class	Level (Based on AV (ft^3))	Compliance Date
1. Freestanding Compact Coolers (FCC)	5.52AV +109.1	January 31, 2029
2. Freestanding Coolers (FC)	5.52AV +109.1	January 31, 2029

C-9-BI. Built-in cooler with upright freezer with automatic defrost without an automatic icemaker	6.38AV + 168.8 + 28I	January 31, 2029
C-13A. Compact cooler with all-refrigerator – automatic defrost	4.74AV + 155.0	January 31, 2029
C-13A-BI. Built-in compact cooler with all-refrigerator – automatic defrost	5.22AV + 170.5	January 31, 2029
AV = Total adjusted volume, expressed in ft3, as determined in appendices A and B of subpart B of 10 CFR part 430. I = 1 for a product with an automatic icemaker and = 0 for a product without an automatic icemaker.		

DOE has evaluated the Joint Agreement and believes that it meets the EPCA requirements for issuance of a direct final rule. As a result, DOE published a direct final rule establishing energy conservation standards for MREFs elsewhere in this issue of the **Federal Register**. If DOE receives adverse comments that may provide a reasonable basis for withdrawal and withdraws the direct final rule, DOE will consider those comments and any other comments received in determining how to proceed with this proposed rule.

For further background information on these proposed standards and the supporting analyses, please see the direct final rule published elsewhere in this issue of the **Federal Register**. That document, and the accompanying technical support document (''TSD''). Those documents contain an in-depth discussion of the analyses conducted in evaluating the Joint Agreement, the methodologies DOE used in conducting those analyses, and the analytical results.

DOE also notes that it was conducting a rulemaking to consider amending the standards for MREFs when the Joint Agreement was submitted. As part of that process, DOE published a NOPR and announced a public meeting on March 31, 2023 (''March 2023 NOPR'') seeking comment on its proposed amended standards to inform its decision consistent with its obligations under EPCA and the Administrative Procedure Act (''APA''). 88 FR 19382. DOE held a public webinar on May 2, 2023, to discuss and receive comments on the March 2023 NOPR and NOPR TSD (''May 2, 2023, public meeting''). The NOPR TSD is available at: *www.regulations.gov/document/EERE-2020-BT-STD-0039-0026*. The March 2023 NOPR proposed amended standards defined in terms of the AEU metrics as measured according to appendix A. *Id.* at 88 FR 19383–19384.

III. Proposed Standards

When considering new or amended energy conservation standards, the standards that DOE adopts for any type (or class) of covered product must be designed to achieve the maximum improvement in energy efficiency that the Secretary determines is technologically feasible and economically justified. (42 U.S.C. 6295(o)(2)(A)) In determining whether a standard is economically justified, the Secretary must determine whether the benefits of the standard exceed its burdens by, to the greatest extent

[10] The Joint Agreement is available in the docket at: *www.regulations.gov/document/EERE-2020-BT-STD-0039-0034.*

practicable, considering the seven statutory factors discussed previously. (42 U.S.C. 6295(o)(2)(B)(i)) The new or amended standard must also result in significant conservation of energy. (42 U.S.C. 6295(o)(3)(B))

DOE considered the impacts of proposed standards for MREFs at each trial standard level (''TSL''), beginning with the maximum technologically feasible (''max-tech'') level, to determine whether that level was economically justified. Where the max-tech level was not justified, DOE then considered the next most efficient level and undertook the same evaluation until it reached the highest efficiency level that is both technologically justified and economically justified and saves a significant amount of energy. DOE refers to this process as the ''walk-down'' analysis.

To aid the reader as DOE discusses the benefits and/or burdens of each TSL, tables in this section present a summary of the results of DOE's quantitative analysis for each TSL. In addition to the quantitative results presented in the tables, DOE also considers other burdens and benefits that affect economic justification. These include the impacts on identifiable subgroups of consumers who may be disproportionately affected by a national standard and impacts on employment.

DOE also notes that the economics literature provides a wide-ranging discussion of how consumers trade off upfront costs and energy savings in the absence of government intervention. Much of this literature attempts to explain why consumers appear to undervalue energy efficiency improvements. There is evidence that consumers undervalue future energy savings as a result of (1) a lack of information; (2) a lack of sufficient salience of the long-term or aggregate benefits; (3) a lack of sufficient savings to warrant delaying or altering purchases; (4) excessive focus on the short term, in the form of inconsistent weighting of future energy cost savings relative to available returns on other investments; (5) computational or other difficulties associated with the evaluation of relevant tradeoffs; and (6) a divergence in incentives (for example, between renters and owners, or builders and purchasers). Having less than perfect foresight and a high degree of uncertainty about the future, consumers may trade off these types of investments at a higher-than-expected rate between current consumption and uncertain future energy cost savings.

In DOE's current regulatory analysis, potential changes in the benefits and costs of a regulation due to changes in consumer purchase decisions are included in two ways. First, if consumers forgo the purchase of a product in the standards case, this decreases sales for product manufacturers, and the impact on manufacturers attributed to lost revenue is included in the manufacturer impact analysis (''MIA''). Second, DOE accounts for energy savings attributable only to products actually used by consumers in the standards case; if a standard decreases the number of products purchased by consumers, this decreases the potential energy savings from an energy conservation standard. DOE provides estimates of shipments and changes in the volume of product purchases in chapter 9 of the direct final rule TSD [11] available in the docket for this rulemaking. However, DOE's current analysis does not explicitly control for heterogeneity in consumer preferences, preferences across subcategories of products or specific features, or consumer price sensitivity variation according to household income.[12]

[11] The TSD is available in the docket for this rulemaking at *www.regulations.gov/document/EERE-2017-BT-STD-0003-0046/document.*

[12] P.C. Reiss and M.W. White. Household Electricity Demand, Revisited. *Review of Economic Studies.* 2005. 72(3): pp. 853–883. doi: *10.1111/0034–6527.00354.*

DOE continues to explore additional potential updates to the quantifiable framework for estimating the benefits and costs of changes in consumer purchase decisions due to an energy conservation standard, and DOE is committed to developing a framework that can support empirical quantitative tools for improved assessment of the consumer welfare impacts of appliance standards. DOE has posted a paper that discusses the issue of consumer welfare impacts of appliance energy conservation standards, and potential enhancements to the methodology by which these impacts are defined and estimated in the regulatory process.[12] DOE welcomes comments on how to more fully assess the potential impact of energy conservation standards on consumer choice and how to quantify this impact in its regulatory analysis in future rulemakings.

A. Benefits and Burdens of TSLs Considered for MREF Standards

Table III.1 and Table III.2 summarize the quantitative impacts estimated for each TSL for MREFs. The national impacts are measured over the lifetime of MREFs purchased in the 30-year period that begins in the anticipated year of compliance with amended standards (2029–2058). The energy savings, emissions reductions, and value of emissions reductions refer to full-fuel-cycle (''FFC'') results. DOE is presenting monetized benefits of greenhouse gas (''GHG'') emissions reductions in accordance with the applicable Executive orders and DOE would reach the same conclusion presented in this document in the absence of the social cost of GHGs, including the Interim Estimates presented by the Interagency Working Group. The efficiency levels contained in each TSL are described in section V.A of the direct final rule published elsewhere in this issue of the **Federal Register**.

Table III.1 Summary of Analytical Results for Miscellaneous Refrigeration Product TSLs: National Impacts for Products Shipped 2029–2058

Consumer Net Benefits	0.19	0.24	0.31	0.17	-1.36
Total Net Benefits	0.37	0.60	0.69	0.73	-0.40

Note: This table presents the costs and benefits associated with MREFs shipped during the period 2029−2058. These results include benefits to consumers which accrue after 2058 from the products shipped in 2029−2058.

* Climate benefits are calculated using four different estimates of the SC-CO_2, SC-CH_4 and SC-N_2O. Together, these represent the global SC-GHG. For presentational purposes of this table, the climate benefits associated with the average SC-GHG at a 3 percent discount rate are shown; however, DOE emphasizes the importance and value of considering the benefits calculated using all four sets of SC-GHG estimates. To monetize the benefits of reducing GHG emissions, this analysis uses the interim estimates presented in the *Technical Support Document: Social Cost of Carbon, Methane, and Nitrous Oxide Interim Estimates Under Executive Order 13990* published in February 2021 by the IWG.

** Health benefits are calculated using benefit-per-ton values for NO_X and SO_2. DOE is currently only monetizing (for NO_X and SO_2) $PM_{2.5}$ precursor health benefits and (for NO_X) ozone precursor health benefits, but will continue to assess the ability to monetize other effects such as health benefits from reductions in direct $PM_{2.5}$ emissions. The health benefits are presented at real discount rates of 3 and 7 percent. For more details, see section IV.L of the direct final rule published elsewhere in this issue of the *Federal Register*.

† Total and net benefits include consumer, climate, and health benefits. For presentation purposes, total and net benefits for both the 3-percent and 7-percent cases are presented using the average SC-GHG with 3-percent discount rate.

‡ Costs include incremental equipment costs.

Table III.2 Summary of Analytical Results for MREFs TSLs: Manufacturer and Consumer Impacts

Category	TSL 1	TSL 2	TSL 3	TSL 4	TSL 5

* Weighted by shares of each product class in total projected shipments in 2029.

BILLING CODE 6450–01–C

DOE first considered TSL 5, which represents the max-tech efficiency levels. For coolers (*i.e.,* FCC, FC, BICC, and BIC), which account for approximately 82 percent of MREF shipments, DOE expects that products would require use of vacuum insulated panels (''VIPs''), variable speed compressors (''VSCs''), and triple-glazed doors at this TSL. DOE expects that VIPs would be used in the products' side walls. In addition, the products would use the best-available-efficiency variable-speed compressors, forced-convection heat exchangers with multi-speed brushless-DC (''BLDC'') fans, and increase in cabinet wall thickness as compared to most baseline products. TSL 5 would save an estimated 0.55 quadrillion British thermal units (''quads'') of energy, an amount which DOE considers significant. Under TSL 5, the net present value (''NPV'') of consumer benefit would be negative, *i.e.,* −$1.36 billion using a discount rate of 7 percent, and −$1.68 billion using a discount rate of 3 percent.

The cumulative emissions reductions at TSL 5 are 10.0 Mt of CO_2, 3.15 thousand tons of SO_2, 18.5 thousand tons of NO_X, 0.02 tons of Hg, 83.4 thousand tons of CH_4, and 0.10 thousand tons of N_2O. The estimated monetary value of the climate benefits from reduced GHG emissions (associated with the average SC–GHG at

a 3-percent discount rate) at TSL 5 is $0.6 billion. The estimated monetary value of the health benefits from reduced SO_2 and NO_X emissions at TSL 5 is $0.4 billion using a 7-percent discount rate and $1.1 billion using a 3-percent discount rate.

Using a 7-percent discount rate for consumer benefits and costs, health benefits from reduced SO_2 and NO_X emissions, and the 3-percent discount rate case for climate benefits from reduced GHG emissions, the estimated total NPV at TSL 5 is −$0.4 billion. Using a 3-percent discount rate for all benefits and costs, the estimated total NPV at TSL 5 is −$0.07 billion. The estimated total monetized NPV is provided for additional information, however, consistent with the statutory factors and framework for along with appropriate consideration of its full range of statutory factors when determining whether a proposed standard level is economically justified, DOE considers a range of quantitative and qualitative benefits and burdens, including the costs and cost savings for consumers, impacts to consumer subgroups, energy savings, emission reductions, and impacts on manufacturers.

At TSL 5, for the product classes with the largest market share, which are FCC, FC, and C–13A and together account for approximately 92 percent of annual shipments, the life-cycle cost (''LCC'') savings are all negative (−$45.3, −$178.8, and −$73.4, respectively) and their payback periods are 13.0 years, 29.9 years, and 19.5 years, respectively, which are all longer than their corresponding average lifetimes. For these product classes, the fraction of consumers experiencing a net LCC cost is 81.6 percent, 98.2 percent, and 93.9 percent due to increases in first cost of $185.0, $420.5, and $167.5, respectively. Overall, a majority of MREF consumers (84.5 percent) would experience a net cost and the average LCC savings would be negative for all analyzed product classes.

At TSL 5, the projected change in industry net present value (''INPV'') ranges from a decrease of $421.0 million to a decrease of $283.2 million, which corresponds to decreases of 51.2 percent and 35.1 percent, respectively. DOE estimates that industry must invest $555.1 million to comply with standards set at TSL 5.

DOE estimates that approximately 2.9 percent of current MREF shipments meet the max-tech levels. For FCC, FC, and C–13A, which together account for approximately 92 percent of annual shipments, DOE estimates that zero shipments currently meet max-tech efficiencies.

At TSL 5, manufacturers would likely need to implement all the most efficient design options analyzed in the engineering analysis. Manufacturers that do not currently offer products that meet TSL 5 efficiencies would need to develop new product platforms, which would require significant investment. Conversion costs are driven by the need for changes to cabinet construction, such as increasing foam insulation thickness and/or incorporating VIP technology. Increasing insulation thickness could result in a loss of interior volume or an increase in exterior volume. If manufacturers chose to maintain exterior dimensions, increasing insulation thickness would require redesign of the cabinet as well as the designs and tooling associated with the interior of the product, such as the liner, shelving, racks, and drawers. Incorporating VIPs into MREF designs could also require redesign of the cabinet to maximize the efficiency benefit of this technology. In addition to insulation changes, manufacturers may need to implement triple-pane glass, which could require implementing reinforced hinges and redesigning the door structure.

At this level, DOE estimates a 13-percent drop in shipments in the year the standard takes effect compared to the no-new-standards case, as some consumers may forgo purchasing a new MREF due to the increased upfront cost of baseline models.

At TSL 5, the Secretary tentatively concludes that the benefits of energy savings, emission reductions, and the estimated monetary value of the emissions reductions would be outweighed by the economic burden on many consumers, negative NPV of consumer benefits, and the impacts on manufacturers, including the significant potential reduction in INPV. A majority of MREF consumers (84.5 percent) would experience a net cost and the average LCC savings would be negative. Additionally, manufacturers would need to make significant upfront investments to update product platforms. The potential reduction in INPV could be as high as 52.1 percent. Consequently, the Secretary has tentatively concluded that TSL 5 is not economically justified.

DOE then considered the Recommended TSL (*i.e.,* TSL 4) which represents efficiency level (''EL'') 3 for all analyzed product classes except for C–3A and C–3A–BI, for which this TSL corresponds to EL 1, and BIC, for which this TSL corresponds to EL 2. At the Recommended TSL, products of most classes would use high-efficiency single-speed compressors with forced-convection evaporators and condensers using brushless-DC fan motors. Doors would be double-glazed with low-conductivity gas fill (*e.g.,* argon) and a single low-emissivity glass layer. Products would not require use of VIPs, but the FC product class would require thicker walls than corresponding baseline products. The Recommended TSL would save an estimated 0.32 quads of energy, an amount DOE considers significant. Under the Recommended TSL, the NPV of consumer benefit would be $0.17 billion using a discount rate of 7 percent, and $0.77 billion using a discount rate of 3 percent.

The cumulative emissions reductions at the Recommended TSL are 5.9 Mt of CO_2, 1.8 thousand tons of SO_2, 10.8 thousand tons of NO_X, 0.01 tons of Hg, 48.6 thousand tons of CH_4, and 0.06 thousand tons of N_2O. The estimated monetary value of the climate benefits from reduced GHG emissions (associated with the average SC–GHG at a 3-percent discount rate) at the Recommended TSL is $0.3 billion. The estimated monetary value of the health benefits from reduced SO_2 and NO_X emissions at the Recommended TSL is $0.2 billion using a 7-percent discount rate and $0.6 billion using a 3-percent discount rate.

Using a 7-percent discount rate for consumer benefits and costs, health benefits from reduced SO_2 and NO_X emissions, and the 3-percent discount rate case for climate benefits from reduced GHG emissions, the estimated total NPV at the Recommended TSL is $0.7 billion. Using a 3-percent discount rate for all benefits and costs, the estimated total NPV at the Recommended TSL is $1.7 billion. The estimated total monetized NPV is provided for additional information, however, consistent with the statutory factors and framework for determining whether a standard level is economically justified, DOE considers a range of quantitative and qualitative benefits and burdens, including the costs and cost savings for consumers, impacts to consumer subgroups, energy savings, emission reductions, and impacts on manufacturers.

At the Recommended TSL, for the product classes with the largest market share, which are FCC, FC, and C–13A, the LCC savings are $12.6, $28.0, and $12.0, respectively, and their payback periods are 6.8 years, 8.5 years, and 7.3 years, respectively, which are all shorter than their corresponding average lifetimes. For these product classes, the fraction of consumers experiencing a net

LCC cost is 46.8 percent, 44.0 percent, and 47.2 percent, and increases in first cost for these classes are $91.7, $360.9, and $124.3, respectively. Overall, the LCC savings would be positive for all MREF product classes, and, while 43.7 percent of MREF consumers would experience a net cost, slightly more than half of MREF consumers would experience a net benefit (52.9 percent).

At the Recommended TSL (*i.e.,* TSL 4), the projected change in INPV ranges from a decrease of $92.1 million to a decrease of $60.3 million, which correspond to decreases of 11.4 percent and 7.5 percent, respectively. DOE estimates that industry must invest $130.7 million to comply with standards set at Recommended TSL.

DOE estimates that approximately 3.9 percent of shipments currently meet the efficiencies required at the Recommended TSL. For most product classes (*i.e.,* FCC, BICC, BIC, C–13A, C–13A–BI, C–3A, C–3A–BI), DOE expects manufacturers could reach the required efficiencies with relatively straightforward component swaps, such as implementing incrementally more efficient compressors, rather than the full platform redesigns required at max-tech. DOE expects that FC manufacturers would need to increase foam insulation thickness and incorporate variable-speed compressor systems at this level. At the Recommended TSL, DOE estimates a 4-percent drop in shipments in the year the standard takes effect compared to the no-new-standards case, as some consumers may forgo purchasing a new MREF due to the increased upfront cost of baseline models.

After considering the analysis and weighing the benefits and burdens, the Secretary has tentatively concluded that a potential standard set at the Recommended TSL for MREFs would be economically justified. At this TSL, the average LCC savings are positive for all product classes for which an amended standard is considered, with a shipment-weighted average of $15.2 savings. The FFC national energy savings are significant and the NPV of consumer benefits is positive using both a 3-percent and 7-percent discount rate. The standard levels at TSL 4 are economically justified even without weighing the estimated monetary value of emissions reductions. When those emissions reductions are included—representing $0.3 billion in climate benefits (associated with the average SC–GHG at a 3-percent discount rate), and $0.6 billion (using a 3-percent discount rate) or $0.2 billion (using a 7-percent discount rate) in health benefits—the rationale becomes stronger still.

As stated, DOE conducts the walk-down analysis to determine the TSL that represents the maximum improvement in energy efficiency that is technologically feasible and economically justified as required under EPCA. The walk-down is not a comparative analysis, as a comparative analysis would result in the maximization of net benefits instead of energy savings that are technologically feasible and economically justified, which would be contrary to the statute. *See* 86 FR 70892, 70908. Although DOE has not conducted a comparative analysis to select the proposed energy conservation standards, DOE notes that the Recommended TSL represents the option with positive LCC savings ($15.2) for all product classes compared to TSL 5 (−$99.5). Further, when comparing the cumulative NPV of consumer benefit using a 7-percent discount rate, TSL 4 ($0.7 billion) has a higher benefit value than TSL 5 (−$0.4 billion), while for a 3-percent discount rate, TSL 4 ($1.7 billion) is also higher than TSL 5 (−$0.07 billion), which yields negative NPV in both cases. These additional savings and benefits at the Recommended TSL are significant. DOE considers the impacts to be, as a whole, economically justified at the Recommended TSL.

Although DOE considered amended standard levels for MREFs by grouping the efficiency levels for each product class into TSLs, DOE evaluates all analyzed efficiency levels in its analysis. TSL 4, the Recommended TSL and the one proposed here, includes an EL for BIC that is lower than the EL at TSL 2. That is because TSL 2 represents ENERGY STAR for all product classes for which an ENERGY STAR criterion exists, including EL 3 for BIC and EL2 for C–3A–BI. As such, DOE analyzed TSL 2 with a higher efficiency level for BIC than TSL 4 because of the ENERGY STAR criterion. TSL 4 also includes an EL for C–3A–BI, EL1, that is lower than another EL, EL2, considered but not discussed as part of DOE's consideration of TSL 5. DOE has considered standards at those ELs for those products and found them not to be economically justified. For all product classes, except for BIC and C–3A–BI, the amended standard level represents the maximum energy savings that does not result in negative LCC savings. For BIC and C–3A–BI, the standard level represents the maximum energy savings that is economically justified; for these classes, DOE examined higher ELs, which were not included in TSL 4 (EL3 and EL2, respectively). Although these ELs have positive LCC savings, they would result in a majority of purchasers experiencing a net cost (53 percent and 57 percent, respectively). Further, for BIC products, DOE expects some manufacturers would likely need to increase insulation thickness to meet efficiency levels above EL 2, which could require new cabinet designs and fixtures. Due to the high percentage of consumers with a net cost and the extensive redesigns that would be needed to support EL3 for BIC and EL2 for C–3A–BI, DOE has tentatively concluded that efficiency level 3 for BIC and efficiency level 2 for C–3A–BI is not economically justified. However, at the Recommended TSL (EL 2 for BIC), DOE expects manufacturers could likely meet the efficiency level required for BIC without significant redesign. The ELs at the proposed standard level result in positive LCC savings for all product classes and reduce the decrease in INPV and conversion costs to the point where DOE has tentatively concluded they are economically justified, as discussed for the Recommended TSL in the preceding paragraphs.

Therefore, based on the previous considerations, DOE proposes to adopt the energy conservation standards for MREFs at the Recommended TSL.

While DOE considered each potential TSL under the criteria laid out in 42 U.S.C. 6295(o) as discussed in the preceding paragraphs, DOE notes that the Recommended TSL for MREFs in this direct final rule is part of a multi-product Joint Agreement covering six rulemakings (refrigerators, refrigerator-freezers, and freezers (''RFs''); MREFs; conventional cooking products; residential clothes washers; consumer clothes dryers; and dishwashers). The signatories indicate that the Joint Agreement for the six rulemakings should be considered as a joint statement of recommended standards, to be adopted in its entirety. As discussed in section V.B.2.e of the direct final rule published elsewhere in this issue of the **Federal Register**, many MREF OEMs also manufacture RFs, conventional cooking products, residential clothes washers, consumer clothes dryers, and dishwashers. Rather than requiring compliance with five amended standards in a single year (2027),[13] the

[13] The refrigerators, refrigerator-freezers, and freezers rulemaking (88 FR 12452); consumer conventional cooking products rulemaking (88 FR 6818); residential clothes washers rulemaking (88 FR 13520); consumer clothes dryers rulemaking (87 FR 51734); and dishwashers rulemaking (88 FR 32514) utilized a 2027 compliance year for analysis at the proposed rule stage. The miscellaneous refrigeration products rulemaking (88 FR 12452) utilized a 2029 compliance year for the NOPR analysis.

negotiated multi-product Joint Agreement staggers the compliance dates for the five amended standards over a 4-year period (2027–2030). DOE understands that the compliance dates recommended in the Joint Agreement would help reduce cumulative regulatory burden. These compliance dates help relieve concern on the part of some manufacturers about their ability to allocate sufficient resources to comply with multiple concurrent amended standards, about the need to align compliance dates for products that are typically designed or sold as matched pairs, and about the ability of their suppliers to ramp up production of key components. The Joint Agreement also provides additional years of regulatory certainty for manufacturers and their suppliers while still achieving the maximum improvement in energy efficiency that is technologically feasible and economically justified.

The proposed energy conservation standards for MREFs, which are expressed in kWh/yr, are shown in Table III.3.

BILLING CODE 6450–01–P

Table III.3 Proposed Energy Conservation Standards for Miscellaneous Refrigeration Products (Compliance Starting January 31, 2029)

Product Class	Equations for maximum energy use (kWh/yr)
	Based on AV (ft^3)
1. Freestanding Compact Coolers (“FCC”)	5.52AV +109.1
2. Freestanding Coolers (“FC”)	5.52AV +109.1
3. Built-in Compact Coolers (“BICC”)	5.52AV +109.1
4. Built-in Coolers (“BIC”)	6.30AV + 124.6
C-3A. Cooler with all-refrigerator – automatic defrost	4.11AV + 117.4
C-3A-BI. Built-in cooler with all-refrigerator – automatic defrost	4.67AV + 133.0
C-5-BI. NEW PRODUCT CLASS: Built-in cooler with refrigerator-freezer – automatic defrost with bottom-mounted freezer	5.47AV + 196.2 +28I
C-9. Cooler with upright freezer with automatic defrost without an automatic icemaker	5.58AV + 147.7 + 28I
C-9-BI. Built-in cooler with upright freezer with automatic defrost without an automatic icemaker	6.38AV + 168.8 + 28I
C-13A. Compact cooler with all-refrigerator – automatic defrost	4.74AV + 155.0
C-13A-BI. Built-in compact cooler with all-refrigerator – automatic defrost	5.22AV + 170.5
C-3A-BI. Built-in cooler with all-refrigerator – automatic defrost	4.67AV + 133.0
AV = Total adjusted volume, expressed in ft^3, as determined in appendices A and B of subpart B of 10 CFR part 430. av = Total adjusted volume, expressed in Liters. I = 1 for a product with an automatic icemaker and = 0 for a product without an automatic icemaker.	

B. Annualized Benefits and Costs of the Proposed Standards

The benefits and costs of the proposed standards can also be expressed in terms of annualized values. The annualized net benefit is (1) the annualized national economic value (expressed in 2022$) of the benefits from operating products that meet the proposed standards (consisting primarily of operating cost savings from using less energy), minus increases in product purchase costs, and (2) the annualized monetary value of the climate and health benefits from emission reductions.

Table III.4 shows the annualized values for MREFs under the Recommended TSL, expressed in 2022$. The results under the primary estimate are as follows.

Using a 7-percent discount rate for consumer benefits and costs and NO_X and SO_2 reduction benefits, and a 3-percent discount rate case for GHG social costs, the estimated cost of the standards for MREFs is $72.7 million per year in increased product costs, while the estimated annual benefits are $90.6 million in reduced product operating costs, $18.3 million in climate benefits, and $25.6 million in health benefits. The net benefit amounts to $61.7 million per year. Using a 3-percent discount rate for all benefits and costs, the estimated cost of the proposed standards for MREFs is $70.8 million per year in increased equipment costs, while the estimated annual benefits are $115 million in reduced operating costs, $18.3 million in climate benefits, and $35.6 million in health benefits. The net benefit amounts to $98 million per year.

Table III.4 Annualized Benefits and Costs of Proposed Standards (TSL 4, the Recommended TSL) for Miscellaneous Refrigeration Products

	Million 2022$/year		
	Primary Estimate	**Low-Net-Benefits Estimate**	**High-Net-Benefits Estimate**
3% discount rate			
Consumer Operating Cost Savings	115.0	111.5	116.3
Climate Benefits*	18.3	17.7	18.5
Health Benefits**	35.6	34.5	36.0
Total Monetized Benefits †	168.9	163.7	170.7
Consumer Incremental Product Costs‡	70.8	74.9	68.7
Monetized Net Benefits	98.0	88.8	102.0
Change in Producer Cashflow (INPV‡‡)	(7.7) - (5.0)		
7% discount rate			
Consumer Operating Cost Savings	90.6	88.1	91.5
Climate Benefits* (3% discount rate)	18.3	17.7	18.5
Health Benefits**	25.6	24.9	25.8
Total Benefits†	134.4	130.7	135.7
Consumer Incremental Product Costs‡	72.7	75.8	70.9
Net Benefits	61.7	54.9	64.8
Change in Producer Cashflow (INPV‡‡)	(7.7) - (5.0)		

Note: This table presents the costs and benefits associated with MREFs shipped during the period 2029–2058. These results include consumer, climate, and health benefits that accrue after 2058 from the products shipped in 2029−2058. The Primary, Low Net Benefits, and High Net Benefits Estimates utilize projections of energy prices from the *AEO2023* Reference case, Low Economic Growth case, and High Economic Growth case, respectively. In addition, incremental equipment costs reflect a medium decline rate in the Primary Estimate, a low decline rate in the Low Net Benefits Estimate, and a high decline rate in the High Net Benefits Estimate. The methods used to derive projected price trends are explained in section IV.H.3 of the direct final rule published elsewhere in this issue of the *Federal Register*. Note that the Benefits and Costs may not sum to the Net Benefits due to rounding.

* Climate benefits are calculated using four different estimates of the SC-CO_2, SC-CH_4 and SC-N_2O. For presentational purposes of this table, the climate benefits associated with the average SC-GHG at a 3 percent discount rate are shown, but DOE does not have a single central SC-GHG point estimate, and it emphasizes the importance and value of considering the benefits calculated using all four sets of SC-GHG estimates. To monetize the benefits of reducing GHG emissions, this analysis uses the interim estimates presented in the *Technical Support Document: Social Cost of Carbon, Methane, and Nitrous Oxide Interim Estimates Under Executive Order 13990* published in February 2021 by the IWG.

** Health benefits are calculated using benefit-per-ton values for NO_X and SO_2. DOE is currently only monetizing (for SO_2 and NO_X) $PM_{2.5}$ precursor health benefits and (for NO_X) ozone precursor health benefits but will continue

to assess the ability to monetize other effects such as health benefits from reductions in direct $PM_{2.5}$ emissions. See section IV.L of the direct final rule published elsewhere in this issue of the *Federal Register* for more details.
† Total benefits for both the 3-percent and 7-percent cases are presented using the average SC-GHG with 3-percent discount rate, but DOE does not have a single central SC-GHG point estimate.
‡ Costs include incremental equipment costs.
‡‡Operating Cost Savings are calculated based on the life cycle costs analysis and national impact analysis as discussed in detail below. *See* sections IV.F and IV.H of the direct final rule published elsewhere in this issue of the *Federal Register*. DOE's national impacts analysis includes all impacts (both costs and benefits) along the distribution chain beginning with the increased costs to the manufacturer to manufacture the product and ending with the increase in price experienced by the consumer. DOE also separately conducts a detailed analysis on the impacts on manufacturers (*i.e.*, manufacturer impact analysis, or "MIA"). *See* section IV.J of the direct final rule published elsewhere in this issue of the *Federal Register*. In the detailed MIA, DOE models manufacturers' pricing decisions based on assumptions regarding investments, conversion costs, cashflow, and margins. The MIA produces a range of impacts, which is the rule's expected impact on the INPV. The change in INPV is the present value of all changes in industry cash flow, including changes in production costs, capital expenditures, and manufacturer profit margins. The annualized change in INPV is calculated using the industry weighted average cost of capital value of 7.7 percent that is estimated in the manufacturer impact analysis (*see* chapter 12 of the direct final rule TSD for a complete description of the industry weighted average cost of capital). For MREFs, the annualized change in INPV ranges from -$7.7 million to -$5.0 million. DOE accounts for that range of likely impacts in analyzing whether a trial standard level is economically justified. *See* section V.C of the direct final rule published elsewhere in this issue of the *Federal Register*. DOE is presenting the range of impacts to the INPV under two manufacturer markup scenarios: the Preservation of Gross Margin scenario, which is the manufacturer markup scenario used in the calculation of Consumer Operating Cost Savings in this table; and the Preservation of Operating Profit scenario, where DOE assumed manufacturers would not be able to increase per-unit operating profit in proportion to increases in manufacturer production costs. DOE includes the range of estimated annual change in INPV in the above table, drawing on the MIA explained further in section IV.J of the direct final rule published elsewhere in this issue of the *Federal Register* to provide additional context for assessing the estimated impacts of this proposal to society, including potential changes in production and consumption, which is consistent with OMB's Circular A-4 and E.O. 12866. If DOE were to include the INPV into the annualized net benefit calculation for this proposed rule, the annualized net benefits would range from $90.3 million to $93.0 million at 3-percent discount rate and would range from $54.0 million to $56.7 million at 7-percent discount rate. Parentheses indicate negative (-) values.

BILLING CODE 6450–01–C

IV. Public Participation

A. Submission of Comments

DOE will accept comments, data, and information regarding this proposed rule until the date provided in the **DATES** section at the beginning of this proposed rule. Interested parties may submit comments, data, and other information using any of the methods described in the **ADDRESSES** section at the beginning of this document.

Submitting comments via www.regulations.gov. The *www.regulations.gov* web page will require you to provide your name and contact information. Your contact information will be viewable to DOE Building Technologies staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment.

However, your contact information will be publicly viewable if you include it in the comment itself or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. Otherwise, persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to *www.regulations.gov* information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information ("CBI")). Comments submitted through *www.regulations.gov* cannot be claimed as CBI. Comments received through the website will waive any CBI claims for the information submitted. For information on submitting CBI, see the Confidential Business Information section.

DOE processes submissions made through *www.regulations.gov* before posting. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that *www.regulations.gov* provides after you have successfully uploaded your comment.

Submitting comments via email, hand delivery/courier, or postal mail. Comments and documents submitted via email, hand delivery/courier, or postal mail will also be posted to *www.regulations.gov.* If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information in a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. If you submit via postal mail or hand delivery/courier, please provide all items on a CD, if feasible, in which case it is not necessary to submit printed copies. No telefacsimiles (''faxes'') will be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, that are written in English, and that are free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Campaign form letters. Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters' names compiled into one or more PDFs. This reduces comment processing and posting time.

Confidential Business Information. Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email two well-marked copies: one copy of the document marked ''confidential'' including all the information believed to be confidential, and one copy of the document marked ''non-confidential'' with the information believed to be confidential deleted. DOE will make its own determination about the confidential status of the information and treat it according to its determination. It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

B. Public Meeting

As stated previously, if DOE withdraws the direct final rule published elsewhere in this issue of the **Federal Register** pursuant to 42 U.S.C. 6295(p)(4)(C), DOE will hold a public meeting to allow for additional comment on this proposed rule. DOE will publish notice of any meeting in the **Federal Register**.

V. Procedural Issues and Regulatory Review

The regulatory reviews conducted for this proposed rule are identical to those conducted for the direct final rule published elsewhere in this issue of the **Federal Register**. Please see the direct final rule for further details.

A. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (''IRFA'') and a final regulatory flexibility analysis (''FRFA'') for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As required by E.O. 13272, ''Proper Consideration of Small Entities in Agency Rulemaking,'' 67 FR 53461 (Aug. 16, 2002), DOE published procedures and policies on February 19, 2003, to ensure that the potential impacts of its rules on small entities are properly considered during the proposed rulemaking process. 68 FR 7990. DOE has made its procedures and policies available on the Office of the General Counsel's website (*www.energy.gov/gc/office-general-counsel*). DOE has prepared the following IRFA for the products that are the subject of this proposed rulemaking.

For manufacturers of MREFs, the Small Business Administration (''SBA'') has set a size threshold, which defines those entities classified as ''small businesses'' for the purposes of the statute. DOE used the SBA's small business size standards to determine whether any small entities would be subject to the requirements of the rule. (*See* 13 CFR part 121.) The size standards are listed by North American Industry Classification System (''NAICS'') code and industry description and are available at *www.sba.gov/document/support--table-size-standards.* Manufacturing of MREFs is classified under 335220: ''Major Household Appliance Manufacturing'' or NAICS code 333415: ''Air-Conditioning and Warm Air Heating Equipment and Commercial and Industrial Refrigeration Equipment Manufacturing.'' The SBA sets a threshold of 1,500 employees or fewer and 1,250 employees or fewer for an entity to be considered as a small business for NAICS codes 335220 and 333415, respectively. DOE used the higher (*i.e.,* more inclusive) threshold of 1,500 employees to identify small business manufacturers.

1. Description of Reasons Why Action Is Being Considered

DOE is proposing amended energy conservation standards for MREFs. EPCA authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. Title III, Part B of EPCA established the Energy Conservation Program for Consumer Products Other Than Automobiles which, in addition to identifying particular consumer products and commercial equipment as covered under the statute, permits the Secretary of Energy to classify additional types of consumer products as covered products. (42 U.S.C. 6292(a)(20)) DOE added MREFs as covered products through a final determination of coverage published in the **Federal Register** on July 18, 2016. 81 FR 46768. EPCA further provides that, not later than 6 years after the issuance of any final rule establishing or amending a standard, DOE must publish either a notice of determination that standards for the product do not need to be amended, or a NOPR including new proposed energy conservation standards (proceeding to a final rule, as appropriate). (42 U.S.C. 6295(m)(1))

Pursuant to EPCA, any new or amended energy conservation standard must be designed to achieve the maximum improvement in energy efficiency that DOE determines is technologically feasible and economically justified. (42 U.S.C. 6295(o)(2)(A)) Furthermore, the new or amended standard must result in significant conservation of energy. (42 U.S.C. 6295(o)(3)(B))

In light of the above and the requirements under 42 U.S.C. 6295(p)(4)(A)–(B), DOE is issuing this NOPR proposing energy conservation standards for MREFs. These standard levels were submitted jointly to DOE on September 25, 2023, by groups representing manufacturers, energy and environmental advocates, consumer groups, and a utility.[14] This letter, titled ''Energy Efficiency Agreement of 2023''

[14] The signatories to the Joint Agreement include AHAM, American Council for an Energy-Efficient Economy, Alliance for Water Efficiency, Appliance Standards Awareness Project, Consumer Federation of America, Consumer Reports, Earthjustice, National Consumer Law Center, Natural Resources Defense Council, Northwest Energy Efficiency Alliance, and Pacific Gas and Electric Company. Members of AHAM's Major Appliance Division that manufacture the affected products include: Alliance Laundry Systems, LLC; Asko Appliances AB; Beko US Inc.; Brown Stove Works, Inc.; BSH; Danby Products, Ltd.; Electrolux Home Products, Inc.; Elicamex S.A. de C.V.; Faber; Fotile America; GEA, a Haier Company; L'Atelier Paris Haute Design LLG; LGEUSA; Liebherr USA, Co.; Midea America Corp.; Miele, Inc.; Panasonic Appliances Refrigeration Systems (PAPRSA) Corporation of America; Perlick Corporation; Samsung; Sharp Electronics Corporation; Smeg S.p.A; Sub-Zero Group, Inc.; The Middleby Corporation; U-Line Corporation; Viking Range, LLC; and Whirlpool.

(hereafter, the ''Joint Agreement'' [15]), recommends specific energy conservation standards for MREFs that, in the commenters' view, would satisfy the EPCA requirements in 42 U.S.C. 6295(o).

2. Objectives of, and Legal Basis for, Rule

EPCA authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. Title III, Part B of EPCA established the Energy Conservation Program for Consumer Products Other Than Automobiles, which in addition to identifying particular consumer products and commercial equipment as covered under the statute, permits the Secretary of Energy to classify additional types of consumer products as covered products. (42 U.S.C. 6292(a)(20)) DOE added MREFs as covered products through a final determination of coverage published in the **Federal Register** on July 18, 2016 (the ''July 2016 Final Coverage Determination''). 81 FR 46768. MREFs are consumer refrigeration products other than refrigerators, refrigerator-freezers, or freezers, which include coolers and combination cooler refrigeration products. 10 CFR 430.2. MREFs include refrigeration products such as coolers (*e.g.,* wine chillers and other specialty products) and combination cooler refrigeration products (*e.g.,* wine chillers and other specialty compartments combined with a refrigerator, refrigerator-freezers, or freezers). EPCA further provides that, not later than 6 years after the issuance of any final rule establishing or amending a standard, DOE must publish either a notice of determination that standards for the product do not need to be amended, or a NOPR including new proposed energy conservation standards (proceeding to a final rule, as appropriate). (42 U.S.C. 6295(m)(1)).

3. Description and Estimated Number of Small Entities Regulated

DOE reviewed this proposed rule under the provisions of the Regulatory Flexibility Act and the procedures and policies published on February 19, 2003. 68 FR 7990. DOE conducted a market survey to identify potential small manufacturers of MREFs. DOE conducted a market survey to identify potential small manufacturers of MREFs. DOE reviewed DOE's Compliance Certification Database (''CCD''),[16] California Energy Commission's Modernized Appliance Efficiency Database System,[17] individual company websites, and prior MREF rulemakings to identify manufacturers of the covered product. DOE then consulted publicly available data, such as manufacturer websites, manufacturer specifications and product literature, import/export logs (*e.g.,* bills of lading from ImportYeti [18]), and basic model numbers to identify original equipment manufacturers (''OEMs'') of covered MREFs. DOE further relied on public data and subscription-based market research tools (*e.g.,* Dun & Bradstreet reports [19]) to determine company, location, headcount, and annual revenue. DOE also asked industry representatives if they were aware of any small manufacturers during manufacturer interviews conducted in advance of the March 2023 NOPR. 88 FR 19382. DOE screened out companies that do not offer products covered by this proposed rulemaking, do not meet the SBA's definition of a ''small business,'' or are foreign-owned and operated.

Through DOE's review of its product database and other public sources, DOE identified 49 OEMs that sell MREFs in the United States for this proposed rule. Of the 49 OEMs identified, DOE determined that one company qualifies as a small business and is not foreign-owned and operated.

4. Description and Estimate of Compliance Requirements Including Differences in Cost, if Any, for Different Groups of Small Entities

The small business identified has 14 MREF models certified in DOE's CCD. Of those 14 models, nine models are FCCs, two are built-in coolers, and three are C–13A combination coolers. None of the nine FCC models meet the Recommended TSL (*i.e.,* TSL 4) efficiencies. Of the two built-in coolers, one meets the efficiencies required at the Recommended TSL. However, based on a review of their product specifications, the two models have identical dimensions and share many components. Given the product similarities, DOE expects the manufacturer would likely discontinue the non-compliant model. None of the three C–13A models meet the Recommended TSL efficiencies. To meet the required efficiencies for their FCC models, DOE expects the manufacturer would likely need to incorporate incrementally more efficient compressors, along with other design options. DOE expects these updates to be relatively straight forward component replacements. Some product conversion costs would be necessary for sourcing, qualifying, and testing more efficient components. To meet the efficiencies required for their C–13A models, DOE expects the manufacturer would likely need to implement variable-speed compressors, along with other design options. Implementing variable-speed compressors could require more advanced controls and electronics and new test stations. DOE expects this manufacturer would incur minimal capital conversion costs as the design options analyzed do not require changes to insulation (*i.e.,* VIPs or increased wall insulation thickness). DOE estimated conversion costs for this small manufacturer by using product platform estimates to scale-down the industry conversion costs. DOE estimates that the small business would incur product conversion costs of approximately $1.41 million related to sourcing and testing more efficient components and variable-speed compressors to meet proposed standards. Based on subscription-based market research reports, the small business has an annual revenue of approximately $85.3 million.[20] The total conversion costs of $1.41 million are less than 1 percent of the estimated company revenue over the 5-year conversion period.

5. Duplication, Overlap, and Conflict With Other Rules and Regulations

DOE is not aware of any rules or regulations that duplicate, overlap, or conflict with this proposed rule.

6. Significant Alternatives to the Rule

The discussion in the previous section analyzes impacts on small businesses that would result from DOE's proposed rule, represented by TSL 4 (*i.e.,* the Recommended TSL). In reviewing alternatives to the proposed rule, DOE examined energy conservation standards set at lower efficiency levels. While TSLs 3, 2, and 1 would reduce the impacts on small

[15] This document is available in the docket at: *www.regulations.gov/document/EERE-2020-BT-STD-0039-0034.*

[16] U.S. Department of Energy's Compliance Certification Database. (Last accessed August 17, 2023.) *www.regulations.doe.gov/certification-data/#q=Product_Group_s%3A*.*

[17] *California Energy Commission's Modernized Appliance Efficiency Database System. (Last accessed* August 17, 2023.) *cacertappliances.energy.ca.gov/Pages/ApplianceSearch.aspx.*

[18] ImportYeti, LLC. ImportYeti. (Last accessed December 4, 2023) *www.importyeti.com/%20.*

[20] D&B Hoover. Company Profiles. Various companies. (Last accessed November 29, 2023.) *app.dnbhoovers.com.*

business manufacturers, it would come at the expense of a reduction in energy savings. TSL 1 achieves 69 percent lower energy savings compared to the energy savings at TSL 4. TSL 2 achieves 38 percent lower energy savings compared to the energy savings at TSL 4. TSL 3 achieves 31 percent lower energy savings compared to the energy savings at TSL 4.

Based on the presented discussion, establishing standards at TSL 4 balances the benefits of the energy savings at TSL 4 with the potential burdens placed on MREF manufacturers, including small business manufacturers. Accordingly, DOE does not propose one of the other TSLs considered in the analysis, or the other policy alternatives examined as part of the regulatory impact analysis and included in chapter 17 of the direct final rule TSD.

Additional compliance flexibilities may be available through other means. EPCA provides that a manufacturer whose annual gross revenue from all of its operations does not exceed $8 million may apply for an exemption from all or part of an energy conservation standard for a period not longer than 24 months after the effective date of a final rule establishing the standard. (42 U.S.C. 6295(t)) Additionally, manufacturers subject to DOE's energy efficiency standards may apply to DOE's Office of Hearings and Appeals for exception relief under certain circumstances. Manufacturers should refer to 10 CFR part 430, subpart E, and 10 CFR part 1003 for additional details.

VI. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this notice of proposed rulemaking.

List of Subjects in 10 CFR Part 430

Administrative practice and procedure, Confidential business information, Energy conservation, Household appliances, Imports, Intergovernmental relations, Small businesses.

Signing Authority

This document of the Department of Energy was signed on April 10, 2024, by Jeffrey Marootian, Principal Deputy Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on April 11, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

For the reasons set forth in the preamble, DOE proposes to amend part 430 of chapter II, subchapter D, of title 10 of the Code of Federal Regulations, as set forth below:

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

■ 1. The authority citation for part 430 continues to read as follows:

Authority: 42 U.S.C. 6291–6309; 28 U.S.C. 2461 note.

■ 2. Amend § 430.32 by revising paragraph (aa) to read as follows:

§ 430.32 Energy and water conservation standards and their compliance dates.

* * * * *

(aa) *Miscellaneous refrigeration products.* The energy standards as determined by the equations of the following table(s) shall be rounded off to the nearest kWh per year. If the equation calculation is halfway between the nearest two kWh per year values, the standard shall be rounded up to the higher of these values.

(1) *Coolers.* (i) Coolers manufactured on or after October 28, 2019, and before January 31, 2029, shall have an Annual Energy Use (AEU) no more than:

Product class	AEU (kWh/yr)
(A) Freestanding compact	7.88AV + 155.8
(B) Freestanding	7.88AV + 155.8
(C) Built-in compact	7.88AV + 155.8
(D) Built-in	7.88AV + 155.8

AV = Total adjusted volume, expressed in ft^3, as determined in appendix A to subpart B of this part.

(ii) Coolers manufactured on or after January 31, 2029, shall have an Annual Energy Use (AEU) no more than:

Product class	AEU (kWh/yr)
(A) Freestanding compact	5.52AV + 109.1
(B) Freestanding	5.52AV + 109.1
(C) Built-in compact	5.52AV + 109.1
(D) Built-in	6.30AV + 124.6

AV = Total adjusted volume, expressed in ft^3, as determined in appendix A to subpart B of this part.

(2) *Combination cooler refrigeration products.* (i) Combination cooler refrigeration products manufactured on or after October 28, 2019, and before January 31, 2029, shall have an Annual Energy Use (AEU) no more than:

Product class	AEU (kWh/yr)
(A) C–3A. Cooler with all-refrigerator—automatic defrost	4.57AV + 130.4
(B) C–3A–BI. Built-in cooler with all-refrigerator—automatic defrost	5.19AV + 147.8
(C) C–9. Cooler with upright freezer with automatic defrost without an automatic icemaker	5.58AV + 147.7
(D) C–9–BI. Built-in cooler with upright freezer with automatic defrost without an automatic icemaker	6.38AV + 168.8
(E) C–9I. Cooler with upright freezer with automatic defrost with an automatic icemaker	5.58AV + 231.7
(F) C–9I–BI. Built-in cooler with upright freezer with automatic defrost with an automatic icemaker	6.38AV + 252.8
(G) C–13A. Compact cooler with all-refrigerator—automatic defrost	5.93AV + 193.7
(H) C–13A–BI. Built-in compact cooler with all-refrigerator—automatic defrost	6.52AV + 213.1

AV = Total adjusted volume, expressed in ft^3, as determined in appendix A to subpart B of this part.

(ii) Combination cooler refrigeration products manufactured on or after January 31, 2029, shall have an Annual Energy Use (AEU) no more than:

Product class	AEU (kWh/yr)
(A) C–3A. Cooler with all-refrigerator—automatic defrost	4.11AV + 117.4
(B) C–3A–BI. Built-in cooler with all-refrigerator—automatic defrost	4.67AV + 133.0
(C) C–5–BI. Built-in cooler with refrigerator-freezer with automatic defrost with bottom-mounted freezer	5.47AV + 196.2 + 28I
(D) C–9. Cooler with upright freezer with automatic defrost without an automatic icemaker	5.58AV + 147.7 + 28I
(E) C–9–BI. Built-in cooler with upright freezer with automatic defrost without an automatic icemaker	6.38AV + 168.8 + 28I
(F) C–13A. Compact cooler with all-refrigerator—automatic defrost	4.74AV + 155.0
(G) C–13A–BI. Built-in compact cooler with all-refrigerator—automatic defrost	5.22AV + 170.5

AV = Total adjusted volume, expressed in ft^3, as determined in appendix A to subpart B of this part.
I = 1 for a product with an automatic icemaker and = 0 for a product without an automatic icemaker.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. FAA–2023–2412; Notice No. 25–23–06–SC]

Special Conditions: Airbus Model A321neo Extra-Long Range (XLR) Airplane; Cabin Evacuation—Protection From Fuel Tank Explosion Due to External Fuel-Fed Ground Fire

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes special conditions for the Airbus Model A321neoXLR airplane. This airplane will have a novel or unusual design feature when compared to the technology envisaged by the airworthiness standards for transport category airplanes. This design feature is an integral rear center tank (RCT). The applicable airworthiness regulations do not contain adequate or appropriate safety standards for fire-safety performance of fuel-tank skin or structure in a post-crash external fuel-fed ground fire. These proposed special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: Send comments on or before June 21, 2024.

ADDRESSES: Send comments identified by Docket No. FAA–2023–2412 using any of the following methods:

Federal eRegulations Portal: Go to *www.regulations.gov* and follow the online instructions for sending your comments electronically.

Mail: Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC, 20590–0001.

Hand Delivery or Courier: Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: Fax comments to Docket Operations at 202–493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Douglas Bryant, Engine and Propulsion Section, AIR–625, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service, Federal Aviation Administration, 2200 South 216th Street, Des Moines, Washington 98198; telephone and fax 206–231–3166; email *douglas.n.bryant@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the proposed special conditions, explain the reason for any recommended change, and include supporting data.

The FAA will consider all comments received by the closing date for comments, and will consider comments filed late if it is possible to do so without incurring delay. The FAA may change these special conditions based on the comments received.

Privacy

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in title 14, Code of Federal Regulations (14 CFR) 11.35, the FAA will post all comments received without change to *www.regulations.gov,* including any personal information you provide. The FAA will also post a report

summarizing each substantive verbal contact received about these special conditions.

Confidential Business Information

Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to these special conditions contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to these special conditions, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and the indicated comments will not be placed in the public docket of these special conditions. Send submissions containing CBI to the individual listed in the For Further Information Contact section. Comments the FAA receives, which are not specifically designated as CBI, will be placed in the public docket for these special conditions.

Background

On September 16, 2019, Airbus applied for an amendment to Type Certificate No. A28NM to include the new Model A321neo XLR series airplane. The Airbus Model A321neo XLR series airplane, which is a derivative of the Model A321neo Airbus Cabin Flex (ACF) currently approved under Type Certificate No. A28NM, is a twin-engine transport category aircraft that seats up to 244 passengers and has a maximum takeoff weight of 222,667 lbs.

Type Certification Basis

Under the provisions of title 14, Code of Federal Regulations (14 CFR) 21.101, Airbus must show that the Model A321neo XLR series airplane meets the applicable provisions of the regulations listed in Type Certificate No. A28NM, or the applicable regulations in effect on the date of application for the change, except for earlier amendments as agreed upon by the FAA.

If the Administrator finds that the applicable airworthiness regulations (*e.g.,* 14 CFR part 25) do not contain adequate or appropriate safety standards for the Airbus Model A321neo XLR series airplane because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Airbus Model A321neo XLR series airplane must comply with the fuel venting and exhaust emission requirements of 14 CFR part 34 and the noise certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with § 11.38, and they become part of the type certification basis under § 21.101.

Novel or Unusual Design Features

The Airbus Model A321neo XLR series airplane will incorporate the following novel or unusual design feature:

An integral RCT.

Discussion

The proposed Airbus Model A321neo XLR series airplane incorporates an integral RCT. This tank is a ''center'' fuel tank, that would, if approved, be located in the airplane fuselage rather than in its wings. The tank is a ''rear'' tank, that would be located aft of the center wing fuel tank and behind the wheel bay; it would be in an area of the lower section of the fuselage, partially replacing the aft cargo compartment of the airplane from which this proposed model is derived. The top of the tank would be directly below the floor of the passenger cabin. The fuel tank would be ''integral'' to the airplane, in that its walls would be part of the airplane structure. The exterior skin of the airplane fuselage would constitute part of the walls of the fuel tank, and these areas are usually separate boundaries (not integral) on other fuselage fuel tanks. An integral fuel tank may be referred to as a conformal fuselage structural fuel tank since boundaries of the fuel tank ''conform'' with the airplane exterior. The integral RCT is installed in a location that may be exposed to the direct effects of post-crash ground, or pool, fuel-fed fires. An external fuel-fed ground fire or external fuel-fed pool fire is also referred to as 'external ground fire'.

The airworthiness standards applicable to the Model A321neo XLR do not contain specific standards for post-crash fire-safety performance of fuel-tank skin or structure. In addition, the integral RCT on the A321neo XLR was not envisaged by the FAA when promulgating requirements related to occupant protection when fuel tanks are exposed to external fuel-fed fires. The FAA considered fuel tank designs in widespread use on transport airplanes, including main fuel tanks and auxiliary fuel tanks when promulgating requirements related to occupant protection. Auxiliary fuel tanks are normally located in the center wing and within cargo holds, and in such cases are sometimes referred to as an auxiliary center tank (ACT).

Airplane manufacturers commonly incorporate a center wing fuel tank as an auxiliary fuel tank to make fuel available for increasing the flight range of the airplane. Continued expansion of range performance requirements has resulted in airplane designs using other areas of the airplane to carry fuel, such as incorporating fuel tanks in the empennage and fuselage. The Airbus model A321neo XLR airplane includes a center wing fuel tank, an integral RCT and the option for additional ACTs within the fuselage. Unlike an integral RCT, a center wing fuel tank and optional ACTs are not expected by the FAA or manufacturers to be exposed to the direct effects of post-crash ground fire because the fuel tank walls are not exterior airplane skin on the center fuel tank or ACT designs.

Due to its unusual configuration, the A321neo XLR's integral RCT will also not incorporate the insulation that usually lines the fuselage skin of a modern transport category airplane. Therefore the FAA has issued, after notice and comment, a set of special conditions that address that novel or unusual aspect of the A321neo XLR's integral RCT with regard to certain of the FAA's regulatory requirements for thermal/acoustic insulation installations, specifically 14 CFR 25.856(b). Those special conditions, No. 25–825–SC, require that the lower half of the fuselage spanning the longitudinal location of the RCT resist penetration from an external fuel-fed fire, in order to ensure that the design provides the same level of passenger protection from such fires as do the FAA's existing regulations for such insulation.[1] The special conditions

[1] Special Conditions: Airbus Model A321neoXLR Airplane; Passenger Protection from External Fire. 87 FR 74503 (Dec. 6, 2022).

proposed herein address a different flammability aspect of the A321neo XLR's integral RCT.

Pertinent to the fuel tank structure, post-crash-fire occupant survivability is dependent on the time available for occupant evacuation prior to fuel-tank breach or structural failure. Structural failure can be a result of degradation in load-carrying capability caused by a fuel-fed ground fire. Structural failure can also be a result of over-pressurization caused by ignition of fuel vapors inside the fuel tank.

Past experience indicates that occupant survivability following a post-crash fire is greatly influenced by the size and intensity of any fire that occurs. The ability of main fuel tanks, when they have aluminum wing surfaces wetted by fuel on their interior surface, to withstand post-crash-fire conditions, has been demonstrated by tests conducted at the FAA William J. Hughes Technical Center.[2] Results of these tests have verified adequate dissipation of heat across wetted aluminum fuel-tank surfaces so that localized hot spots do not occur, thus minimizing the threat of explosion. This inherent capability of aluminum to dissipate heat also allows the aircraft's lower surface, which is also the fuel tank boundary, to retain its load-carrying characteristics during a fuel-fed ground fire, and significantly delays structural collapse or burn-through for a time interval that usually exceeds evacuation times. In addition, as an aluminum fuel tank with significant quantities of fuel inside is heated, fuel vapor accumulates in the ullage space, exceeding the upper flammability limit relatively quickly and thus reducing the threat of a fuel-tank explosion prior to fuel-tank burn-through.

The center wing tank and optional ACTs are surrounded by fuselage structure and would not be directly exposed to a post-crash ground fire. This inherent separation is also expected to significantly delay structural collapse or burn-through and reduce the threat of explosion for a time interval that usually exceeds evacuation times. Service history of conventional aluminum airplanes has shown that fuel-tank explosions caused by ground fires have been rare on airplanes configured with flame arrestors in the fuel-tank vent lines. The Model A321neo XLR integral RCT may or may not have equivalent capability of past designs approved with existing regulations, due to the RCT design and location being integral with the fuselage.

There are several Part 25 requirements that address fire-safety performance of the fuel tanks and fuselage in the Model A321neo XLR certification basis. However, these requirements do not directly or adequately address standards for post-crash fire-safety performance of fuel-tank skin or structure. These standards address failure conditions or minimize the hazard to the occupants in the event ignition of flammable fluids or vapors occurs. For example, § 25.863 requires applicants to minimize the probability of ignition and resultant hazards if ignition occurs for flammable fluid systems on the airplane. Another example is § 25.981(a) which requires applicants to demonstrate no ignition source may be present at each point in the fuel tank or fuel tank system where catastrophic failure could occur due to ignition of fuel or vapors. Specifically, § 25.981(a)(1) requires ''determining the highest temperature allowing a safe margin below the lowest expected autoignition temperature of the fuel in the fuel tanks.'' Then § 25.981(a)(2) requires ''demonstrating that no temperature at each place inside each fuel tank where fuel ignition is possible will exceed the temperature determined under paragraph (a)(1) of this section. This must be verified under all probable operating, failure, and malfunction conditions of each component whose operation, failure, or malfunction could increase the temperature inside the tank.'' In addition, § 25.981(a)(3) requires ''except for ignition sources due to lightning addressed by § 25.954, demonstrating that an ignition source could not result from each single failure, from each single failure in combination with each latent failure condition not shown to be extremely remote, and from all combinations of failures not shown to be extremely improbable, taking into account the effects of manufacturing variability, aging, wear, corrosion, and likely damage.'' These airworthiness requirements address ignition sources and are part of the FAA's regulatory framework for preventing fires and explosions; however, taken together, they do not adequately address the potential for a post-crash external ground fire to affect the safety of airplane occupants.

The FAA therefore determined that the airworthiness standards applicable to the Model A321neo XLR airplane do not contain adequate standards for post-crash fire-safety performance of fuel-tank skin or structure. The FAA therefore proposes that special conditions are needed for the Model A321neo XLR airplane, because the integral RCT design, including location in the lower fuselage, is considered an unusual or novel design feature that could expose the RCT to an external ground fire. Factors influencing occupant survival time when a fuel tank is exposed to a ground-fed fire are the structural integrity of the tank; burn-through resistance; flammability of the tank; and the presence of auto-ignition threats during exposure to a fire. As previously discussed, the FAA issued Special Conditions No. 25–825–SC were issued to address the novel or unusual aspect of the A321neo XLR's integral RCT with regard to requirements for thermal/acoustic insulation installations. The FAA considers the occupant survival time related to the burn-through resistance of the integral RCT to be adequately accounted for in those special conditions.

These proposed special conditions address standards for post-crash fire-safety performance of fuel-tank skin or structure by proposing a requirement to prevent the ignition of fuel vapor during an external fuel-fed ground fire. These proposed special conditions include accounting for the potential for hot surface ignition created by the external fuel-fed fire. As described in FAA Advisory Circular 25.981–1D, ''Fuel Tank Ignition Source Prevention Guidelines,'' hot surfaces that can exceed the autoignition temperature of the flammable vapor under consideration are considered to be ignition sources. The FAA intends this proposed requirement to adequately protect the airplane occupants from the consequences of an integral RCT exposed to an external fuel-fed ground, or pool fire.

The intention of the proposed requirement for the design to prevent ignition is for the applicant to show that ignition sources do not occur, such as from a hot surface, due to the external heat applied to the integral RCT from an external fuel-fed ground fire. Where previously discussed, § 25.981(a) requires applicants to demonstrate that no ignition source may be present but does not specifically address ignition due to an external fuel-fed ground fire.

To provide the same level of safety as provided by the relevant regulations in this model's certification basis, Airbus must demonstrate that the Model A321neo XLR series airplane has sufficient post-crash fire-safety performance of fuel-tank skin or structure to enable occupants to safely evacuate in the event that the integral RCT is exposed to an external fuel-fed ground fire.

[2] Hill, R., and Johnson, G.R., ''Investigation of Aircraft Fuel Tank Explosions and Nitrogen Inerting Requirements During Ground Fires,'' FAA Report DOT/FAA/RD–75–119, October 1975. Available via the FAA Technical Center website for Fire Safety at *http://www.fire.tc.faa.gov/.*

The FAA assessed post-crash-survival time during the adoption of § 25.856 and revisions to appendix F to part 25 at Amendment 25–111 for fuselage burn-through protection. Studies conducted by and on behalf of the FAA indicated that following a survivable accident, prevention of fuselage burn-through for approximately 5 minutes can significantly enhance survivability.[3]

The FAA would consider Airbus showing the design prevents ignition of fuel tank vapors in the integral RCT during at least 5 minutes of exposure to an external fuel-fed ground fire as a sufficient time duration for the purposes of these special conditions. The time duration of 5 minutes is consistent with the aforementioned studies showing prevention of fuselage burn-through for approximately 5 minutes enhances occupant survivability. The requirements of the proposed special conditions and the time duration are consistent with the European Union Aviation Safety Agency Special Conditions No. SC–D25.863–01, Cabin Evacuation—Protection from Fuel Tank Explosion due to External Fuel Fed Ground Fire applicable to integral RCTs.[4]

Airbus may consider a flammability reduction system or ignition mitigation means that complies with § 25.981 when showing compliance with the proposed special conditions, provided the system's performance is demonstrated to meet the proposed special conditions. As discussed previously, showing compliance with only § 25.981(b) is insufficient to show post-crash fire-safety performance of fuel-tank skin or structure. Airbus must also meet the proposed special conditions.

The proposed special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these proposed special conditions are applicable to the Airbus Model A321neo XLR series airplane for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would apply to the other model as well.

Conclusion

This action affects only certain novel or unusual design feature on A321neo XLR series airplanes. It is not a rule of general applicability.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

Authority Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701, 44702, and 44704.

The Proposed Special Conditions

■ Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for Airbus Model A321neo XLR series airplanes.

Cabin Evacuation—Protection from Fuel Tank Explosion Due to External Fuel-Fed Ground Fire.

The applicant must show the design prevents ignition of fuel tank vapors (due to hot surface) from occurring in the integral rear center tank during the time required for evacuation. The applicant's showing must also demonstrate that the design provides sufficient time for a safe evacuation of all occupants after the initiation of an external fuel-fed ground fire.

Issued in Kansas City, Missouri, on April 29, 2024.

Patrick R. Mullen,

Manager, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 76

[MB Docket No. 24–115; FCC 24–44; FR ID 216063]

Fostering Independent and Diverse Sources of Video Programming

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) seeks comment on the current state of the marketplace for diverse and independent programming and on the obstacles faced by independent programmers seeking carriage on multichannel video programming distributors (MVPDs) and online platforms. In order to alleviate such obstacles, the Commission proposes to prohibit two types of contractual provisions in program carriage agreements between independent programmers and MVPDs: most favored nation (MFN) provisions, and unreasonable alternative distribution method (ADM) provisions. The Commission also seeks comment on current program bundling practices.

DATES: Comments are due on or before June 6, 2024; reply comments are due on or before July 8, 2024.

ADDRESSES: Pursuant to §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS). *See Electronic Filing of Documents in Rulemaking Proceedings,* 63 FR 24121 (1998). You may submit comments, identified by MB Docket No. 24–115, by any of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *https://apps.fcc.gov/ecfs/.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing.
- Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.
- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.
- Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19.

See FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy, Public Notice, DA 20–304 (March 19, 2020). *https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy.*

- *People with Disabilities:* To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

FOR FURTHER INFORMATION CONTACT: For additional information, contact Kathy Berthot, *Kathy.Berthot@fcc.gov,* of the Media Bureau, Policy Division, (202) 418–7454.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking (NPRM), FCC 24–44, adopted on April 17, 2024 and released on April 19, 2024. The full text of this document is available on the FCC website at *https://docs.fcc.gov/public/attachments/FCC-24-44A1.pdf.* This document will also be available via ECFS at *https://www.fcc.gov/cgb/ecfs/.*

Paperwork Reduction Act of 1995 Analysis: This document proposes new or modified information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens and pursuant to the Paperwork Reduction Act of 1995, Public Law 104–13, invites the general public and the Office of Management and Budget (OMB) to comment on these information collection requirements. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the Commission seeks specific comment on how it might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Providing Accountability Through Transparency Act: Consistent with the Providing Accountability Through Transparency Act, Public Law 118–9, a summary of this document will be available on: *https://www.fcc.gov/proposed-rulemakings.*

Synopsis

1. Through this Notice of Proposed Rulemaking (NPRM), the Commission initiates a new proceeding to seek comment on the current state of the marketplace for diverse and independent programming. The Commission also seeks comment on the obstacles faced by independent video programmers seeking MVPD carriage and carriage on online platforms and how this impacts consumers. In order to alleviate marketplace obstacles that may hinder independent programmers from reaching consumers, the Commission proposes to prohibit two types of contractual provisions in program carriage agreements between independent programmers and MVPDs: (i) most favored nation (MFN) provisions, and (ii) unreasonable alternative distribution method (ADM) provisions. Additionally, the Commission seeks comment on current program bundling practices.

2. In 2016, the Commission launched a proceeding in MB Docket No. 16–41 to examine how certain contractual provisions in carriage agreements between programmers and distributors, such as most favored nation (MFN) and alternative distribution method (ADM) clauses, impact programming competition, innovation, and diversity. In general, an MFN provision entitles an MVPD to more favorable economic or non-economic contract terms that a video programming vendor has provided to another video programming distributor, whether an MVPD or an OVD. An ADM provision generally prohibits or restricts a video programming vendor from exhibiting its programming on OVDs, often for a specified period of time (sometimes referred to as a ''holdback period'' or ''window'') following the programming's original linear airing, or until certain conditions are met. In 2020, having not received any new comments in the proceeding in over two years, Commission staff terminated this proceeding under the dormant proceedings rule.

Current State of the Marketplace for Independent Programming

3. The Commission seeks comment on developments and changes in the marketplace for independent programming and the availability of such programming to consumers since the comment cycle in the MB Docket No. 16–41 proceeding closed in 2017. For example, what is the current state of the marketplace? Are independent programmers still experiencing the same obstacles to carriage that the record described in response to our inquiries in 2016? Has the availability of carriage on a variety of platforms, including OVDs and MVPDs, increased or decreased in the intervening years? Specifically, we seek information on how many independent programmers currently are carried exclusively by MVPDs, how many are carried exclusively by OVDs, and how many are carried by both MVPDs and OVDs. Has the number of independent programmers carried on each of these platforms increased or decreased since 2017? If it has decreased, what factor or factors have led to such decrease? Is there more or less independent and diverse programming available to consumers today than there was in 2017? Have changes in the marketplace exacerbated the difficulty of independent programmers in obtaining carriage? We note that in the *2022 Communications Marketplace Report,* NTCA asserts that a number of MVPDs have discontinued offering video service to its customers, and Rural Media Group contends that the vertical integration of MVPDs has restricted access to independent cable networks. Does the continued decrease in MVPD subscribers have any effect on the ability of independent programmers to obtain carriage?

4. In addition, the Commission seeks comment on whether it is more difficult for independent programmers to obtain carriage on certain types of MVPDs (*e.g.,* cable vs. non-cable MVPDs, or smaller vs. larger MVPDs). How does the level of competition among MVPDs impact the bargaining leverage of independent programmers in negotiations for carriage deals? To what extent does the ability of independent programmers to grow and thrive today depend on their ability to secure carriage on MVPDs? For each of these questions, the Commission requests that commenters support their responses with relevant information regarding specific independent program networks. The Commission also seeks comment on what, if any, difficulties independent programmers have experienced in gaining carriage on OVDs.

Marketplace Obstacles Faced by Independent Programmers

5. *Most Favored Nation Provisions.* MFN provisions generally authorize a contracting video programming distributor to modify a programming agreement to incorporate more favorable rates, contract terms, or conditions that the contracting programmer later agrees to with another distributor. The Commission seeks comment on the current usage of MFN provisions, both conditional and unconditional, in contracts for carriage of non-broadcast video programming. Has there been a notable change in the prevalence of MFNs provisions, particularly unconditional MFNs, since 2017? If unconditional MFN provisions are used less frequently today, what accounts for this change and is the downward trend in the use of such provisions expected to continue? Conversely, if unconditional MFN provisions are used more frequently today, what accounts

for this change and is the upward trend in the use of such provisions expected to continue? Are conditional and unconditional MFN provisions typically only included in carriage agreements between independent programmers and MVPDs or are they also included in agreements with OVDs? Do both cable and non-cable MVPDs require MFN provisions? Are MFN provisions in general, and unconditional MFNs in particular, more likely to be included in carriage contracts with independent programmers than in carriage contracts with vertically integrated programmers? Do certain types of MFN provisions restrain the ability of independent programmers to compete fairly and, if so, what types and how? To what extent does the size of the MVPD or the number of channels offered by an independent programmer impact whether MFN provisions are included in carriage contracts? Do MFN provisions in carriage agreements between MVPDs and independent programmers cover the terms of both other MVPD agreements and OVD agreements? If so, how often do such MFN provisions extend to OVD agreements?

6. Additionally, the Commission seeks comment on the current costs and benefits of both conditional and unconditional MFN provisions. What impact do conditional and unconditional MFNs have on the development and distribution of diverse and niche programming today? To what extent do MFN provisions limit the ability of independent programmers to experiment with new or unique distribution models or to tailor deals with smaller MVPDs or online distributors? Are there particular types of conditional MFN provisions that hinder the development and distribution of such programming and, if so, how do they have this effect? What impact do audits and other mechanisms used to enforce MFN provisions have on independent programmers' ability to compete in the marketplace? What benefits are associated with conditional and unconditional MFN provisions? Are there specific types of MFN provisions that are pro-competitive and enhance independent programmers' ability to gain MVPD carriage, making more diverse programming offerings available for consumers? How do MFN provisions ultimately affect consumers? What, if any, consideration, economic or non-economic, do independent programmers receive from MVPDs in exchange for agreeing to MFN provisions? To what extent do the benefits of MFN provisions, either conditional or unconditional, outweigh any harmful effects of such provisions?

7. The Commission proposes to adopt a rule prohibiting the inclusion of MFN provisions, either conditional or unconditional, in carriage agreements between MVPDs and independent programmers. The Commission proposes to define ''independent video programmer'' or ''independent programmer'' for purposes of this proceeding as ''a non-broadcast programmer that (1) is not vertically integrated with an MVPD and (2) is not affiliated with a broadcast network or entity that holds broadcast station licenses.'' The definition of ''affiliated'' set forth in 47 CFR 76.1300(a), which provides that ''entities are affiliated if either entity has an attributable interest in the other or if a third party has an attributable interest in both entities,'' would apply to the definition of ''independent programmers.'' For purposes of the prohibition on inclusion of MFN provisions in program carriage agreements, the Commission proposes to define ''most favored nation provision'' as ''a provision that entitles a multichannel video programming distributor to contractual rights or benefits that an independent video programming vendor has offered or granted to another multichannel video programming distributor or online video distributor, either conditionally or unconditionally.'' The Commission further proposes to define the terms (i) ''conditionally'' as ''subject to the multichannel video programming distributor's acceptance of terms and conditions that are integrally related, logically linked, or directly tied to the grant of such rights or benefits in the other video programming distributor's agreement, and with which the multichannel video programming distributor can reasonably comply technologically and legally,'' and (ii) ''unconditionally'' as ''without obligating the multichannel video programming distributor to accept any such terms and conditions.'' The Commission seeks comment on this proposal and the proposed definitions of ''most favored nation provision,'' ''conditionally,'' and ''unconditionally.'' In particular, the Commission seeks comment on how the proposed prohibition would enhance the ability of independent programmers to obtain MVPD carriage and compete in the marketplace. The Commission also seeks comment on whether the proposed prohibition would benefit consumers by, for example, facilitating the development and distribution of more diverse and niche programming. Would the proposed prohibition result in other benefits to consumers? Are there particular types of MFN provisions that should be excluded or exempted from the proposed prohibition because they provide procompetitive benefits that outweigh any harmful effects? What are the costs and benefits of the proposed prohibition to MVPDs, particularly small entities?

8. The Commission seeks comment on whether it should preclude MVPDs on a going forward basis from enforcing all MFN provisions in existing contracts. If so, should parties be afforded some period of time to reform their existing contracts before the prohibition takes effect? How much time would be reasonable? Commenters should explain the rationale for any time period proposed. The Commission proposes that complaints alleging violations of the prohibition on MFN provisions would be addressed under the program carriage complaint procedures. The Commission seeks comment on any amendments to the program carriage complaint procedures that would be necessitated by adoption of proposed prohibition on MFN provisions. What remedies and penalties should be imposed on an MVPD that violates the proposed prohibition on MFN provisions? To what extent, if any, would costs or other concerns associated with pursuing a program carriage complaint affect the ability of independent programmers to obtain relief if an MVPD violates the proposed prohibition?

9. *Alternative Distribution Method Provisions.* ADM provisions generally bar or restrict a video programming vendor from exhibiting its programming on alternative video distribution platforms (such as online platforms), often for a specified window of time following the programming's original linear airing, or until certain conditions are met. The Commission seeks comment on the prevalence and scope of ADM provisions in contracts for carriage of non-broadcast video programming today. Has there been any change in the usage or scope of ADMs since 2017? If ADM provisions are less common today, what accounts for this change and is the downward trend in usage of these provisions expected to continue? If ADM provisions are used more frequently today, what accounts for this change and is the upward trend in such usage expected to continue? Are ADM provisions today generally included only in carriage agreements between independent programmers and MVPDs or are they also included in carriage agreements between independent programmers and OVDs?

Do both cable and non-cable MVPDs require such provisions? Are ADM provisions more likely to be included in carriage contracts with independent programmers than in carriage contracts with vertically integrated programmers? Do certain types of ADM provisions restrain independent programmers from competing fairly? If so, what types of ADM provisions have this effect and how do such provision restrain independent programmers from competing fairly? Is there currently an industry standard for the windowing restrictions included in ADM provisions (*i.e.,* is there a particular window of time that is typically required in agreements today)? Are certain windowing restrictions more harmful to independent programmers' ability to compete than other windowing restrictions, and if so, why, and how common are such restrictions?

10. The Commission also seeks comment on the current costs and benefits of ADM provisions. What effect do ADM provisions have on the video marketplace and the availability of independent programming today? Do ADM provisions thwart competition, diversity, or innovation? If so, how? Parties should describe in detail. To what extent are ADM provisions used to limit the ability of independent programmers to experiment with new or unique distribution models or to tailor deals with smaller MVPDs or OVDs, and how does that impact their ability to compete? For example, are certain types of ADM provisions aimed more at restricting new means of distribution than at facilitating efficient negotiations or protecting an MVPD's investment in programming? What benefits are associated with ADM provisions? Do independent programmers receive any consideration, economic or non-economic, from MVPDs in exchange for agreeing to ADM provisions? Do certain types of ADM provisions enhance independent programmers' ability to gain MVPD carriage and thereby increase the exposure of their programming by incentivizing MVPDs to carry new content? How are ADM provisions enforced? Are there particular enforcement mechanisms for ADM provisions that are more common to independent programmers than other enforcement mechanisms? Do certain types of enforcement mechanisms for ADM provisions have a uniquely harmful impact on independent programmers' ability to compete?

11. The Commission proposes to prohibit the inclusion of ''unreasonable'' ADM provisions in carriage agreements between MVPDs and independent programmers. The Commission further proposes to define ''alternative distribution method provision'' to mean ''a provision that prohibits or restricts a video programming vendor from exhibiting its programming on alternative, non-traditional video distribution platforms (such as OVDs) for a specified period of time following the programming's original linear airing, or until certain conditions are met.'' Under the proposed prohibition on ''unreasonable'' ADM provisions, the issue of whether a particular ADM clause is ''unreasonable'' would be fact-specific and decided in the context of a program carriage complaint proceeding brought under section 616 of the Act. In determining whether a particular ADM provision is ''unreasonable,'' the Commission proposes to consider, among other factors, the extent to which an ADM provision prohibits an independent programmer from licensing content to other alternative, non-traditional distributors, including OVDs. By prohibiting only those ADM provisions determined to be ''unreasonable,'' this proposal would recognize that some ADM provisions may serve the public interest by incentivizing MVPDs to invest in new or emerging programming sources, including independent or niche content, while other ADM provisions may have no pro-competitive justifications and hinder the provision of diverse programming to consumers.

12. The Commission seeks comment on the proposed prohibition on unreasonable ADM provisions. The Commission seeks comment on whether the proposed prohibition would enhance the ability of independent programmers, particularly small entities, to compete fairly in the marketplace for video programming. Alternatively, would prohibiting certain ADM provisions make it less likely that MVPDs would agree to carry independent programmers or incentivize MVPDs to seek exclusive programming arrangements with independent programmers (subject to the restrictions in 47 U.S.C. 536(a)(2)) that would limit rather than expand their carriage opportunities? Additionally, the Commission seeks comment on how the proposed prohibition would affect consumers. Would it be expected to result in a greater choice of programming sources or lower costs for consumers? How would the proposed prohibition on unreasonable ADM provisions likely affect MVPDs, including small MVPDs? What costs and benefits are associated with the proposed prohibition for each of the affected parties? Should the Commission provide additional guidance in this proceeding on what constitutes an ''unreasonable'' ADM provision or should we make such determinations on a case-by-case basis in the context of program carriage complaint proceedings as proposed above? In this regard, the Commission seeks comment on what factors should be considered in determining whether an ADM provision is ''unreasonable.'' Are there specific ADM provisions that should be deemed presumptively ''unreasonable''? Conversely, are there certain ADM provisions that should be considered to be presumptively reasonable?

13. The Commission seeks comment on whether it should preclude MVPDs on a going forward basis from enforcing existing contracts that contain unreasonable ADM provisions and, if so, whether it should afford the parties a specified period of time to revise their contracts to replace any unreasonable ADM provision with an ADM provision with reasonable terms before the prohibition takes effect. The Commission also seeks input on what, if any, amendments to the program carriage complaint procedures would be warranted if the proposed prohibition on unreasonable ADM provisions is adopted. In addition, the Commission seeks comment on what remedies and penalties should be imposed on an MVPD that violates the proposed prohibition on unreasonable ADM provisions. In such circumstances, would it be appropriate for the Media Bureau to simply order that an unreasonable ADM provision not be enforced or be replaced with an ADM provision with reasonable terms? Moreover, the Commission seeks comment on the extent to which costs or other concerns associated with pursuing a program carriage complaint would affect the ability of independent programmers to obtain relief if an MVPD violates the proposed ban on unreasonable ADM provisions.

14. *Program Bundling.* The Commission seeks comment on what the current program bundling practices are today and how such practices affect the ability of MVPDs to carry independent and diverse programming and competition in the video distribution market. For example, is forced bundling prevalent today? What impact, if any, does the carriage of bundled channels have on the ability of MVPDs to carry independent channels? Are there examples of independent programmers being dropped or not carried at all due to the constraints placed on MVPD systems by bundling

since 2017? To what extent does bundling have a greater impact on smaller MVPDs than it does on large MVPDs? How much has MVPD channel capacity (*i.e.,* the number of MVPD channels available for programming) increased or decreased among both large and smaller MVPDs since 2017? To the extent there have been increases, will this alleviate the constraints placed on MVPD systems by bundling? Are there any plans for large and small MVPDs to increase capacity in the future? Alternatively, is MVPD capacity increasingly being used for broadband today, and does this consequently leave fewer additional channels available for independent programming? Are there other factors, such as financial resources, that continue to constrain the ability of MVPDs to carry independent programming as a result of bundling notwithstanding increases in channel capacity? How does bundling affect consumer choice? Does bundling raise or lower costs for consumers? What are the costs and benefits associated with program bundling? Commenters should describe the extent to which bundling may impede the ability of MVPDs to carry independent programming and whether this is outweighed by any associated benefits of this practice.

15. *Other Marketplace Obstacles.* The Commission seeks comment on other practices that may impede entry into the market by or growth of independent programmers, thereby harming competition and/or consumer choice. For example, what impact do tier placement and penetration requirements (*i.e.,* requirements in some programming agreements that programming be placed on a particular tier or that specify a minimum percentage of subscribers who must receive the programming) have on independent programmers? Are such requirements more typically found in programming agreements with independent programmers than in agreements with vertically-integrated programmers? Are there negotiation practices that hinder independent programmers' entry into the market? If so, what are these practices and how do they impede independent programmers' entry into the market? Do independent programmers that reject certain provisions or requirements in programming agreements face retaliatory conduct that impacts their ability to compete fairly? Are there other marketplace practices that limit the ability of independent programmers to reach consumers? What are the costs of such practices? In particular, do such practices have an adverse effect on diversity, competition, or innovation? What, if any, benefits do such practices offer and do the benefits outweigh the harms?

Legal Authority To Address Marketplace Obstacles to Independent Programming

16. The Commission seeks comment on its legal authority to take action to curb practices that may adversely impact the ability of independent programmers to compete fairly. In particular, the Commission seeks comment on its authority under section 616 of the Act to adopt rules prohibiting the use of MFN provisions and unreasonable ADM provisions in program carriage agreements between MVPDs and independent programmers, as proposed above. Section 616(a) directs the Commission to ''establish regulations governing program carriage agreements and related practices between cable operators or other [MVPDs] and video programming vendors.'' The Commission seeks comment on whether the grant of authority under section 616(a) to adopt rules ''governing program carriage agreements and related practices between [MVPDs] and video programming vendors'' is sufficiently broad to permit us to ban the use of MFN or unreasonable ADM provisions. The Commission notes that the prohibitions on MFN provisions and unreasonable ADM provisions proposed above would apply to agreements between MVPDs and independent programmers, which are encompassed within the term ''video programming vendors.'' Congress's goal in enacting section 616 was ''to stem and reduce the potential for abusive or anticompetitive actions [by MVPDs] against programming entities.'' Consistent with this objective, the proposed prohibitions on MFN provisions and unreasonable ADM provisions discussed above are intended to enhance competition in the video marketplace and reflect Congress's belief that ''competition is essential both for ensuring diversity in programming and for protecting consumers from potential abuses by cable operators possessing market power'' and other MVPDs.

17. Moreover, the Commission tentatively concludes that Congress did not intend to limit the Commission's authority under section 616(a) to the specific practices listed in that section. The introductory language in section 616(a) grants the Commission broad authority to ''establish regulations governing program carriage agreements and related practices between cable operators and multichannel video programming distributors and video programming vendors,'' and nothing in the statute expressly precludes the Commission from establishing rules apart from those specifically listed. Further, sections 616(a)(1)–(a)(3)—the subsections relating to substantive requirements—are introduced by the verbs ''include'' or ''contain,'' which suggests that such requirements are not exhaustive. In instances where Congress intends to limit the Commission's rulemaking authority to specified areas, it has done so expressly. The Commission seeks comment on this analysis.

18. The Commission also seeks comment on whether section 616(a)(3) provides a basis for our proposed bans on MFN provisions and unreasonable ADM provisions in carriage agreements between MVPDs and independent programmers. Section 616(a)(3) directs the Commission to adopt rules ''designed to prevent [an MVPD] from engaging in conduct the effect of which is to unreasonably restrain the ability of an unaffiliated video programming vendor to compete fairly by discriminating in video programming distribution on the basis of affiliation or nonaffiliation of vendors in the selection, terms, or conditions for carriage of video programming provided by such vendors.'' The Commission seeks comment on whether this provision authorizes it to adopt rules that prohibit vertically integrated MVPDs from including MFN and unreasonable ADM clauses in carriage agreements with independent programmers, where such MVPDs do not include the same clauses in carriage agreements with affiliated programming networks. If so, would the application of such rules only to vertically integrated MVPDs adequately address the competition and diversity concerns raised by restrictive MFN and ADM clauses? Would such rules be effective given that an MVPD could enter into the same restrictive MFN and/or ADM clauses with both an affiliated programming network and an independent programmer but simply not exercise its rights with respect to the affiliated network?

19. The Commission further seeks comment on whether section 628 provides legal authority for adoption of our proposed rules. Similar to our proposed rules, the purpose of section 628 is to ''increase[e] competition and diversity in the [[MVPD] market . . . and to spur the development of communications technologies.'' Section 628(b) precludes a cable operator, a common carrier or its affiliate that provides video programming, and an Open Video System (OVS) operator, as

well as a satellite-delivered programmer affiliated with one of those entities, from engaging in ''unfair methods of competition or unfair or deceptive acts or practices, the purpose or effect of which is to hinder significantly or to prevent any'' MVPD from providing programming to subscribers or consumers. Section 628(c)(1) directs the Commission to ''prescribe regulations to specify particular conduct that is prohibited by [section 628(b)]'' in order to ''increase[e] competition and diversity in the [MVPD] market and the continuing development of communications technologies.'' Considering that section 628(b) appears to target only methods, acts, and practices that adversely affect MVPDs, the Commission seeks comment on whether it could lawfully invoke this provision to proscribe, as an ''unfair'' method, act or practice, the use of certain MFN and ADM provisions in agreements between MVPDs and independent programmers. Given that direct broadcast satellite (DBS) carriers are not subject to the provisions of section 628, the Commission seeks comment on whether reliance on that provision to limit the use of MFN and ADM provisions would result in a disparity in regulatory treatment among MVPDs.

20. Finally, the Commission seeks comment on whether there are other provisions in the Act that afford the Commission the authority to alleviate marketplace obstacles to the distribution of independent and diverse programming, including obstacles posed by MFN provisions and unreasonable ADM provisions. For example, section 335(a) provides the Commission with authority to ''impose, on providers of direct broadcast satellite service, public interest or other requirements for providing video programming.'' Does the Commission have authority under other provisions of Title III? The Commission also seeks comment on whether it has—and should exercise—ancillary authority under section 4(i) of the Act to address MFN and ADM provisions.

Digital Equity and Inclusion

21. The Commission, as part of its continuing effort to advance digital equity for all, including people of color, persons with disabilities, persons who live in rural or Tribal areas, and others who are or have been historically underserved, marginalized, or adversely affected by persistent poverty or inequality, invites comment on any equity-related considerations and benefits (if any) that may be associated with the issues discussed herein. Specifically, we seek comment on how any Commission actions taken to address barriers to the distribution of independent and diverse programming may promote or inhibit advances in diversity, equity, inclusion, and accessibility.

Initial Regulatory Flexibility Act Analysis

22. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission has prepared this Initial Regulatory Flexibility Act Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this Notice of Proposed Rulemaking (NPRM). Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments provided on the first page of the NPRM. The Commission will send a copy of the NPRM, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the NPRM and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

23. One of the Commission's primary objectives with respect to multichannel video programming is to foster a diverse, robust, and competitive marketplace for the delivery of such programming. We recognize that competition among distributors of video programming continues to evolve and consumers today have a wealth of video programming platforms from which to choose. Nevertheless, stakeholders continue to raise concerns that certain marketplace practices by distributors may hinder independent video programmers from reaching consumers and deprive them of access to their choice of diverse programming—one of the benefits of enhanced competition in the video marketplace. Specifically, independent programmers contend that their ability to thrive in the marketplace and reach consumers today depends on their ability to negotiate and secure carriage on multichannel video programming distributors (MVPDs) or online video distributors (OVDs). Despite the changes in the way that consumers access video programming—including via the growing number of platforms available to video consumers and the protracted decline in MVPD subscribers—independent video programmers have consistently asserted over the past several years that certain practices by incumbent cable operators and other MVPDs, particularly most favored nation (MFN) and alternative distribution method (ADM) clauses in program carriage agreements, have impeded their ability to reach consumers across all video platforms, leading to less competition and fewer choices for those who watch.

24. The NPRM seeks comment on the state of the marketplace for independent and diverse programming and the availability of such programming to consumers today. The NPRM also seeks comment on the obstacles faced by independent programmers in reaching consumers and the actions the Commission can take to alleviate such obstacles. Specifically, the NPRM seeks comment on the current usage of MFN provisions, both conditional and unconditional, in contracts for carriage of non-broadcast video programming and on the costs and benefits of conditional and unconditional MFN provisions. Additionally, the NPRM requests comment on the prevalence and scope of ADM provisions in contracts for carriage of non-broadcast video programming today and on the current costs and benefits of ADM provisions. The NPRM seeks comment on what the current program bundling practices are today and how such practices affect the ability of MVPDs to carry independent and diverse programming. Further, the NPRM seeks comment on other practices that may impede entry into the market by or growth of independent programmers. Finally, the NPRM invites comment on the need for Commission action to address any obstacles to the distribution of independent and diverse programming, as well as the Commission's legal authority to take action to curb program carriage practices that may adversely impact the ability of independent programmers to compete fairly.

25. In order to alleviate marketplace obstacles that may hinder independent programmers from reaching consumers, the NPRM proposes to prohibit the use of MFN provisions, either conditional or unconditional, in carriage agreements between MVPDs and independent programmers. In addition, the NPRM proposes to bar unreasonable ADM provisions in carriage agreements between MVPDs and independent programmers. The NPRM proposes that the issue of whether a particular ADM clause is ''unreasonable'' would be fact-specific and decided in the context of a program carriage complaint proceeding brought under section 616 of the Act, taking into account, among other factors, the extent to which an ADM provision prohibits an independent

programmer from licensing content to other distributors, including OVDs. The NPRM also seeks comment on whether further guidance should be provided on the meaning of ''unreasonable'' in this context.

B. Legal Basis

26. The proposed action is authorized pursuant to sections 1, 4(i), 4(j),, 303, 307, 316, 335, 616 and 628 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 154(j), 303, 307, 316, 335, 536, and 548.

C. Description and Estimates of the Number of Small Entities To Which the Proposed Rules Will Apply

27. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A small business concern is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

28. *Broadband Radio Service and Educational Broadband Service.* Broadband Radio Service systems, previously referred to as Multipoint Distribution Service (MDS) and Multichannel Multipoint Distribution Service (MMDS) systems, and ''wireless cable,'' transmit video programming to subscribers and provide two-way high speed data operations using the microwave frequencies of the Broadband Radio Service (BRS) and Educational Broadband Service (EBS) (previously referred to as the Instructional Television Fixed Service (ITFS)). Wireless cable operators that use spectrum in the BRS often supplemented with leased channels from the EBS, provide a competitive alternative to wired cable and other multichannel video programming distributors. Wireless cable programming to subscribers resembles cable television, but instead of coaxial cable, wireless cable uses microwave channels.

29. In light of the use of wireless frequencies by BRS and EBS services, the closest industry with a SBA small business size standard applicable to these services is Wireless Telecommunications Carriers (*except* Satellite). The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

30. According to Commission data as December 2021, there were approximately 5,869 active BRS and EBS licenses. The Commission's small business size standards with respect to BRS involves eligibility for bidding credits and installment payments in the auction of licenses for these services. For the auction of BRS licenses, the Commission adopted criteria for three groups of small businesses. A very small business is an entity that, together with its affiliates and controlling interests, has average annual gross revenues exceed $3 million and did not exceed $15 million for the preceding three years, a small business is an entity that, together with its affiliates and controlling interests, has average gross revenues exceed $15 million and did not exceed $40 million for the preceding three years, and an entrepreneur is an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding $3 million for the preceding three years. Of the ten winning bidders for BRS licenses, two bidders claiming the small business status won 4 licenses, one bidder claiming the very small business status won three licenses and two bidders claiming entrepreneur status won six licenses. One of the winning bidders claiming a small business status classification in the BRS license auction has an active licenses as of December 2021.

31. The Commission's small business size standards for EBS define a small business as an entity that, together with its affiliates, its controlling interests and the affiliates of its controlling interests, has average gross revenues that are not more than $55 million for the preceding five (5) years, and a very small business is an entity that, together with its affiliates, its controlling interests and the affiliates of its controlling interests, has average gross revenues that are not more than $20 million for the preceding five (5) years. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

32. *Cable and Other Subscription Programming.* The U.S. Census Bureau defines this industry as establishments primarily engaged in operating studios and facilities for the broadcasting of programs on a subscription or fee basis. The broadcast programming is typically narrowcast in nature (*e.g.,* limited format, such as news, sports, education, or youth-oriented). These establishments produce programming in their own facilities or acquire programming from external sources. The programming material is usually delivered to a third party, such as cable systems or direct-to-home satellite systems, for transmission to viewers. The SBA small business size standard for this industry classifies firms with annual receipts less than $41.5 million as small. Based on U.S. Census Bureau data for 2017, 378 firms operated in this industry during that year. Of that number, 149 firms operated with revenue of less than $25 million a year and 44 firms operated with revenue of $25 million or more. Based on this data, the Commission estimates that a majority of firms in this industry are small.

33. *Cable Companies and Systems (Rate Regulation).* The Commission has developed its own small business size standard for the purpose of cable rate regulation. Under the Commission's rules, a ''small cable company'' is one serving 400,000 or fewer subscribers nationwide. Based on industry data, there are about 420 cable companies in the U.S. Of these, only seven have more than 400,000 subscribers. In addition, under the Commission's rules, a ''small system'' is a cable system serving 15,000 or fewer subscribers. Based on industry data, there are about 4,139 cable systems (headends) in the U.S. Of these, about 639 have more than 15,000 subscribers. Accordingly, the Commission estimates that the majority of cable companies and cable systems are small.

34. *Cable System Operators (Telecom Act Standard).* The Communications Act of 1934, as amended, contains a size standard for a ''small cable operator,'' which is ''a cable operator that, directly or through an affiliate, serves in the aggregate fewer than one percent of all

subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000.'' For purposes of the Telecom Act Standard, the Commission determined that a cable system operator that serves fewer than 498,000 subscribers, either directly or through affiliates, will meet the definition of a small cable operator. Based on industry data, only six cable system operators have more than 498,000 subscribers. Accordingly, the Commission estimates that the majority of cable system operators are small under this size standard. We note however, that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed $250 million. Therefore, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

35. *Competitive Local Exchange Carriers (LECs).* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. Providers of these services include several types of competitive local exchange service providers. Wired Telecommunications Carriers is the closest industry with a SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 3,378 providers that reported they were competitive local exchange service providers. Of these providers, the Commission estimates that 3,230 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

36. *Direct Broadcast Satellite (DBS) Service.* DBS service is a nationally distributed subscription service that delivers video and audio programming via satellite to a small parabolic ''dish'' antenna at the subscriber's location. DBS is included in the Wired Telecommunications Carriers industry which comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution; and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry.

37. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that 3,054 firms operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Based on this data, the majority of firms in this industry can be considered small under the SBA small business size standard. According to Commission data however, only two entities provide DBS service—DIRECTV (owned by AT&T) and DISH Network, which require a great deal of capital for operation. DIRECTV and DISH Network both exceed the SBA size standard for classification as a small business. Therefore, we must conclude based on internally developed Commission data, in general DBS service is provided only by large firms.

38. *Fixed Microwave Services.* Fixed microwave services include common carrier, private-operational fixed, and broadcast auxiliary radio services. They also include the Upper Microwave Flexible Use Service (UMFUS), Millimeter Wave Service (70/80/90 GHz), Local Multipoint Distribution Service (LMDS), the Digital Electronic Message Service (DEMS), 24 GHz Service, Multiple Address Systems (MAS), and Multichannel Video Distribution and Data Service (MVDDS), where in some bands licensees can choose between common carrier and non-common carrier status. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with a SBA small business size standard applicable to these services. The SBA small size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of fixed microwave service licensees can be considered small.

39. The Commission's small business size standards with respect to fixed microwave services involve eligibility for bidding credits and installment payments in the auction of licenses for the various frequency bands included in fixed microwave services. When bidding credits are adopted for the auction of licenses in fixed microwave services frequency bands, such credits may be available to several types of small businesses based average gross revenues (small, very small and entrepreneur) pursuant to the competitive bidding rules adopted in conjunction with the requirements for the auction and/or as identified in Part 101 of the Commission's rules for the specific fixed microwave services frequency bands.

40. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

41. *Home Satellite Dish (HSD) Service.* HSD or the large dish segment of the satellite industry is the original satellite-to-home service offered to consumers and involves the home reception of signals transmitted by satellites operating generally in the C-band frequency. Unlike DBS, which uses small dishes, HSD antennas are between four and eight feet in diameter and can receive a wide range of unscrambled (free) programming and scrambled programming purchased from program packagers that are licensed to facilitate subscribers' receipt of video programming. Because HSD provides subscription services, HSD falls within the industry category of Wired Telecommunications Carriers. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for

2017 show that there were 3,054 firms that operated for the entire year. Of this total, 2,964 firms operated with fewer than 250 employees. Thus, under the SBA size standard, the majority of firms in this industry can be considered small.

42. *Incumbent Local Exchange Carriers (Incumbent LECs).* Neither the Commission nor the SBA have developed a small business size standard specifically for incumbent local exchange carriers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 1,212 providers that reported they were incumbent local exchange service providers. Of these providers, the Commission estimates that 916 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, the Commission estimates that the majority of incumbent local exchange carriers can be considered small entities.

43. *Internet Publishing and Broadcasting and Web Search Portals.* This industry comprises establishments primarily engaged in (1) publishing and/or broadcasting content on the internet exclusively or (2) operating websites that use a search engine to generate and maintain extensive databases of internet addresses and content in an easily searchable format (and known as Web search portals). The publishing and broadcasting establishments in this industry do not provide traditional (non-internet) versions of the content that they publish or broadcast. They provide textual, audio, and/or video content of general or specific interest on the internet exclusively. Establishments known as web search portals often provide additional internet services, such as email, connections to other websites, auctions, news, and other limited content, and serve as a home base for internet users. The SBA small business size standard for this industry classifies firms having 1,000 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were firms that 5,117 operated for the entire year. Of this total, 5,002 firms operated with fewer than 250 employees. Thus, under this size standard the majority of firms in this industry can be considered small.

44. *Open Video Systems.* The open video system (OVS) framework was established in 1996 and is one of four statutorily recognized options for the provision of video programming services by local exchange carriers. The OVS framework provides opportunities for the distribution of video programming other than through cable systems. OVS operators provide subscription services and therefore fall within the SBA small business size standard for the cable services industry, which is ''Wired Telecommunications Carriers.'' The SBA small business size standard for this industry classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this total, 2,964 firms operated with fewer than 250 employees. Thus, under the SBA size standard the majority of firms in this industry can be considered small. Additionally, we note that the Commission has certified some OVS operators who are now providing service and broadband service providers (BSPs) are currently the only significant holders of OVS certifications or local OVS franchises. The Commission does not have financial or employment information for the entities authorized to provide OVS however, the Commission believes some of the OVS operators may qualify as small entities.

45. *Satellite Master Antenna Television (SMATV) Systems, also known as Private Cable Operators (PCOs).* SMATV systems or PCOs are video distribution facilities that use closed transmission paths without using any public right-of-way. They acquire video programming and distribute it via terrestrial wiring in urban and suburban multiple dwelling units such as apartments and condominiums, and commercial multiple tenant units such as hotels and office buildings. SMATV systems or PCOs are included in the Wired Telecommunications Carriers' industry which includes wireline telecommunications businesses. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this total, 2,964 firms operated with fewer than 250 employees. Thus under the SBA size standard, the majority of firms in this industry can be considered small.

46. *Television Broadcasting.* This industry is comprised of ''establishments primarily engaged in broadcasting images together with sound.'' These establishments operate television broadcast studios and facilities for the programming and transmission of programs to the public. These establishments also produce or transmit visual programming to affiliated broadcast television stations, which in turn broadcast the programs to the public on a predetermined schedule. Programming may originate in their own studio, from an affiliated network, or from external sources. The SBA small business size standard for this industry classifies businesses having $41.5 million or less in annual receipts as small. 2017 U.S. Census Bureau data indicate that 744 firms in this industry operated for the entire year. Of that number, 657 firms had revenue of less than $25,000,000. Based on this data we estimate that the majority of television broadcasters are small entities under the SBA small business size standard.

47. As of September 30, 2023, there were 1,377 licensed commercial television stations. Of this total, 1,258 stations (or 91.4%) had revenues of $41.5 million or less in 2022, according to Commission staff review of the BIA Kelsey Inc. Media Access Pro Television Database (BIA) on October 4, 2023, and therefore these licensees qualify as small entities under the SBA definition. In addition, the Commission estimates as of September 30, 2023, there were 383 licensed noncommercial educational (NCE) television stations, 380 Class A TV stations, 1,889 LPTV stations and 3,127 TV translator stations. The Commission, however, does not compile and otherwise does not have access to financial information for these television broadcast stations that would permit it to determine how many of these stations qualify as small entities under the SBA small business size standard. Nevertheless, given the SBA's large annual receipts threshold for this industry and the nature of these television station licensees, we presume that all of these entities qualify as small entities under the above SBA small business size standard.

48. *Wired Telecommunications Carriers.* The U.S. Census Bureau defines this industry as establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired communications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this

industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution, and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry. Wired Telecommunications Carriers are also referred to as wireline carriers or fixed local service providers.

49. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 4,590 providers that reported they were engaged in the provision of fixed local services. Of these providers, the Commission estimates that 4,146 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

50. The rule changes proposed in the NPRM, if adopted, will impose compliance obligations on small, as well as other entities. Specifically, the NPRM proposes to prohibit MFN provisions, either conditional or unconditional, in carriage agreements between MVPDs and independent programmers. The NPRM also proposes to prohibit unreasonable ADM provisions in carriage agreements between MVPDs and independent programmers. The NPRM proposes that a determination of whether a particular ADM provision is ''unreasonable'' would be fact-specific and decided in the context of a program carriage complaint proceeding brought under section 616 of the Act.

E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

51. The RFA requires an agency to describe any significant, specifically small business, alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rule for such small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

52. The proposals to prohibit MFN provisions and unreasonable ADM provisions, if adopted, would be expected to benefit small independent programmers by enhancing their ability to compete in the video marketplace and to create new, innovative program offerings. These proposals would also likely benefit small MVPDs and OVDs by removing barriers to mutually-beneficial carriage deals between these small entities and independent programmers. Nevertheless, the Commission seeks comment in the NPRM on how these proposals would affect small entities and expects to more fully consider the impact of these proposals and any alternatives on small entities, following review of the comments received in response to the NPRM.

53. The NPRM proposes to use the existing program carriage complaint procedures to address any complaints regarding violations of the proposed bans on MFN provisions and unreasonable ADM provisions. The NPRM seeks comment on whether costs or other concerns associated with pursuing a program carriage complaint would affect the ability of independent programmers, including small entities, to obtain relief if an MVPD violates the proposed ban on MFN provisions or unreasonable ADM provisions and asks whether any modifications to the program carriage complaint procedures are warranted.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rule

54. None.

Ordering Clauses

55. *It is ordered* that, pursuant to the authority found in sections 1, 4(i), 4(j), 303, 307, 316, 335, 616 and 628 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 154(j), 303, 307, 316, 335, 536 and 548, this Notice of Proposed Rulemaking *is adopted*.

56. *It is further ordered* that, pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments on the Notice of Proposed Rulemaking in MB Docket No. 24–115 on or before thirty (30) days after publication in the **Federal Register** and reply comments on or before sixty (60) days after publication in the **Federal Register**.

List of Subjects in 47 CFR Part 76

Television

Federal Communications Commission.

Marlene Dortch,

Secretary.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 76 as follows:

PART 76—MULTICHANNEL VIDEO AND CABLE TELEVISION SERVICE

■ 1. The authority citation for part 76 continues to read as follows:

Authority: 47 U.S.C. 151, 152, 153, 154, 301, 302, 302a, 303, 303a, 307, 308. 309. 312, 315, 317, 325, 335, 338, 339, 340, 341, 503, 521, 522, 531, 532, 534, 535, 536, 537, 543, 544, 544a, 545, 548, 549, 552, 554, 556, 558, 560, 561, 571, 572, 573.

■ 2. Amend § 76.1300 by:

■ a. Redesignating paragraphs (b), (c), (d) and (e) as paragraphs (c), (d), (g) and (h); and

■ b. Adding new paragraphs (b), (e) and (f).

The additions read as follows:

§ 76.1300 Definitions.

* * * * *

(b) *Alternative distribution method provision.* The term ''alternative distribution method provision'' means a provision that prohibits or restricts an independent video programming vendor from exhibiting its programming on alternative, non-traditional video distribution platforms (such as online video distributors) for a specified period of time following the programming's original linear airing, or until certain conditions are met. For purposes of this section, the term ''original linear airing'' refers to the initial prescheduled airing of the programming by the programmer.

* * * * *

(e) *Independent video programming vendor.* The term ''independent video programming vendor'' means ''a non-broadcast programmer that (1) is not vertically integrated with a multichannel video programming distributor and (2) is not affiliated with a broadcast network or entity that holds broadcast station licenses.''

(f) *Most favored nation provision.* The term ''most favored nation provision'' means ''a provision that entitles a

multichannel video programming distributor to contractual rights or benefits that an independent video programming vendor has offered or granted to another multichannel video programming distributor or online video distributor, either conditionally or unconditionally. The term ''conditionally'' means ''subject to the multichannel video programming distributor's acceptance of terms and conditions that are integrally related, logically linked, or directly tied to the grant of such rights or benefits in the other multichannel video programming distributor's or online video distributor's agreement.'' The term ''unconditionally'' means ''without obligating the multichannel video programming distributor to accept any such terms or conditions.''

* * * * *

■ 3. Amend § 76.1301 by adding paragraphs (d) and (e) to read as follows:

§ 76.1301 Prohibited Practices.

* * * * *

(d) *Most favored nation provisions.* No multichannel video programming distributor shall enter into an agreement with an independent video programming vendor that contains a most favored nation provision.

(e) *Unreasonable alternative distribution method provisions.* No multichannel video programming distributor shall enter into an agreement with an independent video programming vendor that contains an unreasonable alternative distribution method provision.

Notices

Federal Register

Vol. 89, No. 89

Tuesday, May 7, 2024

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

[Docket ID: NRCS–2024–0007]

Urban Agriculture and Innovative Production Advisory Committee

AGENCY: Natural Resources Conservation Service, United States Department of Agriculture.

ACTION: Notice to solicit nominees; correction.

SUMMARY: The Department of Agriculture's (USDA) Office of Urban Agriculture and Innovative Production (OUAIP) notice published in the **Federal Register** on May 1, 2024, concerning nominations for four new members to serve on the Urban Agriculture and Innovative Production Advisory Committee (UAIPAC). We are republishing the entire contents of the May 1, 2024, notice to correct the list of the four vacancies for which OUAIP is seeking nominations for individuals to serve on UAIPAC. The UAIPAC advises the Secretary of Agriculture on the development of policies and outreach relating to urban, indoor, and other emerging agricultural production practices. The 12 members appointed by the Secretary of Agriculture are expected to serve a 3-year term. The 2024 nomination period includes four vacancies, including one individual who is an agriculture producer or farmer using innovative technology; one individual from an institution of higher education or extension program; one individual with supply chain experience, which may include a food aggregator, wholesale food distributor, food hub, or an individual who has direct-to-consumer market experience; and one individual with related experience in urban, indoor, and other emerging agriculture production practices.

DATES: USDA will consider nominations received via email or postmarked by July 6, 2024.

ADDRESSES: Please send nominations via email to: *UrbanAgricultureFederalAdvisoryCommittee@usda.gov.* Email is the preferred method for sending nominations. Alternatively, nominations can be mailed to Brian Guse, Director of the Office of Urban Agriculture and Innovative Production, Department of Agriculture, 1400 Independence Avenue SW, Room 4083, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Markus Holliday, Coordinator, Office of Urban Agriculture and Innovative Production; telephone: (301) 974–1287; email: *UrbanAgricultureFederalAdvisoryCommitee@usda.gov.*

Individuals who require alternative means for communication may contact the USDA TARGET Center at (202) 720–2600 (voice and text telephone (TTY)) or dial 711 for Telecommunications Relay service (both voice and text telephone users can initiate this call from any telephone).

SUPPLEMENTARY INFORMATION:

Correction

The USDA OUAIP notice published in the **Federal Register** on May 1, 2024, (89 FR 35053—35054) concerning nominations for four new members to serve on the Urban Agriculture and Innovative Production Advisory Committee (UAIPAC). We are republishing the entire contents of the May 1, 2024, notice to correct the list of the four vacancies for which OUAIP is seeking nominations for individuals to serve on UAIPAC. The 2024 nomination period includes four vacancies, including one individual who is an agriculture producer or farmer using innovative technology; one individual from an institution of higher education or extension program; one individual with supply chain experience, which may include a food aggregator, wholesale food distributor, food hub, or an individual who has direct-to-consumer market experience; and one individual with related experience in urban, indoor, and other emerging agriculture production practices.

UAIPAC Overview and Membership

Section 222 of the Department of Agriculture Reorganization Act of 1994, as amended by section 12302 of the 2018 Farm Bill (7 U.S.C. 6923; Pub. L. 115–334), directed the Secretary of Agriculture to establish an ''Urban Agriculture and Innovative Production Advisory Committee'' to advise the Secretary on any aspect of section 222, including the development of policies and outreach relating to urban, indoor, and other emerging agricultural production practices as well as identify any barriers to urban agriculture. UAIPAC will host public meetings to deliberate on recommendations for the Secretary of Agriculture. These recommendations provide advice to the Secretary on supporting urban agriculture and innovative production through USDA's programs and services. For additional background and member information visit the UAIPAC website at *https://www.usda.gov/partnerships/federal-advisory-committee-urban-ag.*

The UAIPAC consists of 12 members including:

- 4 representatives who are agriculture producers including 2 individuals who are located in an urban area or urban cluster; and 2 individuals who are farmers that use innovative technology;
- 2 representatives from an institution of higher education or extension program;
- 1 representative from a nonprofit organization, which may include a public health, environmental, or community organization;
- 1 representative who represents business and economic development, which may include a business development entity, a chamber of commerce, a city government, or a planning organization;
- 1 expert with supply chain experience, which may include a food aggregator, wholesale food distributor, food hub, or an individual who has direct-to-consumer market experience;
- 1 representative from a financing entity; and
- 2 representatives with related experience or expertise in urban, indoor, and other emerging agriculture production practices, as determined by the Secretary.

Member Nominations

Nominations are open to the public. Any interested person or organization may nominate qualified individuals for membership, including self-nominations. Individuals who wish to be considered for membership must

submit a nomination package to include the following required items:

(1) A completed background disclosure form (Form AD–755) signed by the nominee (see *https://www.usda.gov/sites/default/files/documents/ad-755.pdf*);

(2) A brief summary explaining the nominee's interest in one or more open vacancies including any unique qualifications that address the membership composition and criteria described above; and

(3) A résumé providing the nominee's background, experience, and educational qualifications.

It will be helpful to include the following optional items in your nomination package:

(1) Recent publications by the nominee relative to extending support for urban agriculture or innovative production; and

(2) Letter(s) of endorsement.

Please send nominations via email to: *UrbanAgricultureFederalAdvisoryCommittee@usda.gov* as the preferred method. Alternatively, nominations can be mailed to Brian Guse, Director of the Office of Urban Agriculture and Innovative Production, Department of Agriculture, 1400 Independence Avenue SW, Room 4083, Washington, DC 20250.

The USDA OUAIP is seeking nominations for individuals to serve on UAIPAC. The nomination period includes the following four vacancies:

- One individual who is an agirculture producer or farmer using innovative technology;
- One individual from an institution of higher education or extension program;
- One individual with supply chain experience, which may include a food aggregator, wholesale food distributor, food hub, or an individual who has direct-to-consumer market experience; and
- One individual with related experience in urban, indoor, and other emerging agriculture production practices.

Ethics Statement

To maintain the highest levels of honesty, integrity, and ethical conduct, no committee or subcommittee member may participate in any ''specific party matters'' (for example, matters are narrowly focused and typically involve specific transactions between identified parties) such as a lease, license, permit, contract, claim, grant, agreement, or related litigation with USDA in which the committee or subcommittee member has a direct financial interest. This includes the requirement for committee or subcommittee members to immediately disclose to the Designated Federal Officer (DFO) (for discussion with USDA's Office of Ethics) any specific party matter in which the member's immediate family, relatives, business partners or employer would be directly seeking to financially benefit from the committee's recommendations.

All members will receive ethics training to identify and avoid any actions that would cause the public to question the integrity of the committee's advice and recommendations. Members who are appointed as ''Representatives'' are not subject to Federal ethics laws because the appointment allows them to represent the point(s) of view of a particular group, business sector or segment of the public.

Members appointed as ''Special Government Employees'' (SGEs) are considered intermittent Federal employees and are subject to Federal ethics laws. SGE's are appointed due to their personal knowledge, academic scholarship, background or expertise. No SGE may participate in any activity in which the member has a prohibited financial interest. Appointees who are SGEs are required to complete and submit a Confidential Financial Disclosure Report (OGE–450 form) via the FDonline e-filing database system. Upon request USDA will assist SGEs in preparing these financial reports. To ensure the highest level of compliance with applicable ethical standards USDA will provide ethics training to SGEs on an annual basis. The provisions of these paragraphs are not meant to exhaustively cover all Federal ethics laws and do not affect any other statutory or regulatory obligations to which advisory committee members are subject.

USDA Non-Discrimination Policy

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family or parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Individuals who require alternative means of communication for program information (for example, braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA TARGET Center at (202) 720–2600 (voice and text telephone (TTY)) or dial 711 for Telecommunicaions Relay Service (both voice and text telephone users can initiate this call from any phone). Additionally, program information may be made available in languages other than English.

Equal opportunity practices in accordance with USDA's policies will be followed in all appointments to the FACA Committee: UAIPAC. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by the Department, membership shall include, to the extent practicable, individuals with demonstrated ability to represent the many communities, identities, races, ethnicities, backgrounds, abilities, cultures, and beliefs of the American people, including underserved communities. USDA is an equal opportunity provider, employer, and lender.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at *https://www.usda.gov/oascr/how-to-file-a-program-discrimination-complaint* and at any USDA office or write a letter addressed to USDA and provide in the letter all the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by: (1) mail to: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; (2) fax: (202) 690–7442; or (3) email: *OAC@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Dated: May 2, 2024.

Cikena Reid,

Committee Management Officer, USDA.

[FR Doc. 2024–09952 Filed 5–2–24; 4:15 pm]

BILLING CODE 3410–16–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Commonwealth of the Northern Mariana Islands Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: Commission on Civil Rights.

ACTION: Notice of public meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules

and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act, that the Commonwealth of the Northern Mariana Islands Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a public meeting via Zoom at 9:00 a.m. ChST on Wednesday, June 5, 2024 (7:00 p.m. ET on Tuesday, June 4, 2024). The purpose of this meeting is to collect further testimony related to and discuss the next steps for the Committee's project, *Access to Adequate Health Care for Incarcerated Individuals in the CNMI Judicial System.*

DATES: Wednesday, June 5, 2024, 9:00 a.m.–10:30 a.m. Chamorro Standard Time (Tuesday, June 4, 2024, 7:00 p.m.–8:30 p.m. Eastern Time)

ADDRESSES: The meeting will be held via Zoom Webinar. *Registration Link (Audio/Visual): https://www.zoomgov.com/webinar/register/WN_IZbKDXhVR_-CAb0FiW32ig.*

Join by Phone (Audio Only): (833) 435–1820 USA Toll-Free; Meeting ID: 161 735 5327

FOR FURTHER INFORMATION CONTACT: Kayla Fajota, Designated Federal Officer, at *kfajota@usccr.gov* or (434) 515–2395.

SUPPLEMENTARY INFORMATION: This committee meeting is available to the public through the registration link above. Any interested member of the public may listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Closed captioning will be available for individuals who are deaf, hard of hearing, or who have certain cognitive or learning impairments. To request additional accommodations, please email Liliana Schiller, Support Services Specialist, at *lschiller@usccr.gov* at least 10 business days prior to the meeting.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to Kayla Fajota at *kfajota@usccr.gov.* Persons who desire additional information may contact the Regional Programs Coordination Unit at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meetings will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Commonwealth of the Northern Mariana Islands Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at *lschiller@usccr.gov.*

Agenda

I. Welcome & Roll Call
II. Approval of Minutes
III. Panelist Presentations
IV. Committee Q&A
V. Discussion and Project Planning: Access to Health Care for incarcerated individuals within the CNMI Judicial System
VI. Public Comment
VII. Next Steps
VIII. Adjournment

Dated: May 2, 2024.

BILLING CODE P

DEPARTMENT OF COMMERCE

International Trade Administration

United States Travel and Tourism Advisory Board: Meeting of the United States Travel and Tourism Advisory Board

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of an open meeting.

SUMMARY: The United States Travel and Tourism Advisory Board (Board or TTAB) will hold a meeting on Monday, June 3, 2024. The Board advises the Secretary of Commerce on matters relating to the U.S. travel and tourism industry. The main purpose of this meeting is for Board members to deliberate and potentially adopt three letters of recommendation and discuss priority issues related to travel and tourism. The final agenda will be posted on the Department of Commerce website for the Board at *https://www.trade.gov/ttab-meetings* at least two days prior to the meeting.

DATES: Monday, June 3, 2024, 2 p.m.–3 p.m. EDT. The deadline for members of the public to register for the meeting or to submit written comments for dissemination prior to the meeting is 5 p.m. EDT on Thursday, May 30, 2024.

ADDRESSES: The meeting will be held virtually. The access information will be provided by email to registrants. Requests to register (including to speak or for auxiliary aids) and any written comments should be submitted by email to *TTAB@trade.gov.*

FOR FURTHER INFORMATION CONTACT: Jennifer Aguinaga, the United States Travel and Tourism Advisory Board, National Travel and Tourism Office, U.S. Department of Commerce; telephone: 202–482–2404; email: *TTAB@trade.gov.*

SUPPLEMENTARY INFORMATION:

Public Participation: The meeting will be open to the public and will be accessible to people with disabilities. Any member of the public requesting to join the meeting is asked to register in advance by the deadline identified under the **DATES** caption. Requests for auxiliary aids must be submitted by the registration deadline. Last minute requests will be accepted but may not be possible to fill. There will be fifteen (15) minutes allotted for oral comments from members of the public joining the meeting. To accommodate as many speakers as possible, the time for public comments may be limited to three (3) minutes per person. Members of the public wishing to reserve speaking time during the meeting must submit a request at the time of registration, as well as the name and address of the proposed speaker. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, the International Trade Administration may conduct a lottery to determine the speakers. Speakers are requested to submit a written copy of their prepared remarks by 5 p.m. EDT on Thursday, May 30, 2024, for inclusion in the meeting records and for circulation to the members of the Board.

In addition, any member of the public may submit pertinent written comments concerning the Board's affairs at any time before or after the meeting. Comments may be submitted to Jennifer Aguinaga at the contact information indicated above. To be considered during the meeting, comments must be received no later than 5 p.m. EDT on Thursday, May 30, 2024, to ensure transmission to the Board prior to the meeting. Comments received after that date and time will be transmitted to the Board but may not be considered during

the meeting. Copies of Board meeting minutes will be available within 90 days of the meeting.

This Notice is published pursuant to the Federal Advisory Committee Act, as amended (FACA), 5 U. S. C. app., section 10(a)(2). The Committee was established pursuant to section 607 of the Visit America Act, subtitle A of title VI of division BB of the Consolidated Appropriations Act, 2023, Public Law 117–328, and in accordance with the provisions of the FACA, 5 U.S.C. 1001 *et seq.*

Jennifer Aguinaga,

Designated Federal Officer, United States Travel and Tourism Advisory Board.

[A–301–806]

Aluminum Extrusions From Colombia: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that Aluminum Extrusions from Colombia are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Jose Rivera or Lingjun Wang, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0842 or (202) 482–2316, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation in the **Federal Register** on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Colombia. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export prices in accordance with section 772(a) of the Act. Constructed export prices have been calculated in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in a preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, Commerce calculated estimated weighted-average dumping margins for Aluminio Nacional S.A. (Alumina)[7] and Tecnoglass, S.A.S. (Tecnoglass) that are not zero, *de minimis,* or based entirely on facts otherwise available. Commerce calculated the all-others rate using a weighted average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged values for the merchandise under consideration.[8]

---

[2] *See Aluminum Extrusions from the People's Republic of China, Colombia, the Dominican Republic, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations,* 89 FR 11814 (February 15, 2024).

[3] *See* Memorandum, "Decision Memorandum for the Preliminary Affirmative Determination in the Less-Than-Fair-Value Investigation of Aluminum Extrusions from Colombia," dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See Antidumping Duties; Countervailing Duties, Final Rule,* 62 FR 27296, 27323 (May 19, 1997).

[5] *See Initiation Notice.*

[6] *See* Memorandum, "Preliminary Scope Decision Memorandum II," dated concurrently with this memorandum.

[7] Aluminio Nacional S.A. is currently operating under the legal name Aluminio Nacional S.A. en reorganizacion, as it is undergoing a debt reorganization process.

[8] With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents; (B) a simple average of the estimated weighted-average dumping margins calculated for the examined respondents; and (C) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged U.S. sales values for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. *See, e.g., Ball*

Continued

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
Aluminio Nacional S.A.[9]	34.47
Tecnoglass, S.A.S.; C.I. Energia Solar S.A.S. E.S. Windows; and C.I. E.S. Metals S.A.S.[10]	8.85
All Others	12.42

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the timeline of scope comments. After the submission of comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[11] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[12] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[13]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[14] Further, we request that interested parties limit their executive summary of each issue to no more than 450 words, not including citations. We intend to use the public, executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public, executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[15]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part, 75 FR 53661, 53662 (September 1, 2010), and accompanying Issues and Decision Memorandum at Comment 1. As complete publicly ranged sales data were available, Commerce based the all-others rate on the publicly ranged sales data of the mandatory respondents. For a complete analysis of the data, *see* Memorandum, ''Preliminary Calculation of the All-Others Rate,'' dated concurrently with this notice.

[9] As noted above, Aluminio Nacional S.A. is currently operating under the legal name Aluminio Nacional S.A. en reorganizacion.

[10] For purposes of this preliminarily determination, we are collapsing Tecnoglass, S.A.S., C.I. Energía Solar S.A.S. E.S. Windows, and C.I. E.S. Metals S.A.S. and treating them as a single entity. *See* Preliminary Decision Memorandum.

[11] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[12] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[13] *See* 19 351.309(c)(2) and (d)(2).

[14] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[15] *See APO and Service Final Rule.*

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Between April 17 and 24, 2024, pursuant to 19 CFR 351.210(e), the petitioners,[16] Alumina, and Tecnoglass each requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[17] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, wedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigation.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigation on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigation are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical

[16] The petitioners are U.S. Aluminum Extruders Coalition and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union.

[17] *See* Petitioners' Letter, ''Request for Postponement of Final Determinations,'' dated April 17, 2024; *see also* Alumina's Letter, ''Request for Postponement of Final Determinations,'' dated April 18, 2024, and Tecnoglass' Letter, ''Tecnoglass' Request to Postpone Final Determination,'' dated April 24, 2024.

weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of the order resulting from this investigation) are excluded from the scope of this investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigation.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 $\mu\Omega$/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a

tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m² and no greater than 30 g/m², and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of these antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Aluminum Extrusions From Indonesia: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from Indonesia are being sold, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Samuel Brummitt or Katherine Sliney, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–7851 or (202) 482–2437, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Indonesia. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export prices in accordance with section 772(a) of the Act. Constructed export prices have been calculated in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. In addition, pursuant to section 776(a) and (b) of the Act, Commerce has preliminarily relied upon facts otherwise available, with adverse inferences for Alupro Asia Tech (Alutech). For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act. Pursuant to section 735(c)(5)(B) of the Act, if the estimated weighted-average dumping margins established for all exporters and producers individually examined are zero, *de minimis* or determined based entirely on facts otherwise available, Commerce may use any reasonable method to establish the estimated weighted-average dumping margin for all other producers and exporters.

In this investigation, Commerce calculated estimated weighted-average dumping margins that are above *de minimis* for the mandatory respondents, PT Alfo Citra Abadi (Alca) and PT Indal Aluminium Industry and its subsidiary PT Indal Reiwa Auto (collectively, Indal). Therefore, Commerce calculated the all-others rate by weight averaging the estimated weighted-average dumping margins that it calculated for the individually examined respondents. Commerce weight averaged these dumping margins using the publicly ranged total values of each respondent's sales of subject merchandise to the United States during the POI.[7]

[2] *See Aluminum Extrusions from the People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations,* 89 FR 11814 (February 15, 2024).

[3] *See* Memorandum, ''Decision Memorandum for the Preliminary Affirmative Determination in the Less-Than-Fair-Value Investigation Aluminum Extrusions from Indonesia'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See Antidumping Duties; Countervailing Duties, Final Rule,* 62 FR 27296, 27323 (May 19, 1997).

[5] *See Initiation Notice.*

[6] *See* Memorandum, ''Antidumping Duty Investigations and Countervailing Duty Investigations of Aluminum Extrusions from People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Türkiye, the United Arab Emirates, and the Socialist Republic of Vietnam: Preliminary Scope Decision Memorandum II,'' dated concurrently with this notice (Preliminary Scope Decision Memorandum II).

[7] With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents; (B) a simple average of the estimated weighted-average dumping margins calculated for the examined respondents; and (C) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly ranged U.S. sale values for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closer to (A) as the most appropriate rate for all other producers and exporters. *See, e.g., Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part,* 75 FR 53661, 53663

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offset) (percent)
PT Alfo Citra Abadi	5.66	5.65
PT Indal Reiwa Auto and PT Indal Aluminium Industry	18.79	18.79
Alupro Asia Tech	* 112.21	* 112.21
All Others	9.18	9.17

* Rates based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Commerce normally adjusts cash deposits for estimated antidumping duties by the amount of export subsidies countervailed in a companion countervailing duty (CVD) proceeding, when CVD provisional measures are in effect. Accordingly, where Commerce preliminarily made an affirmative determination for countervailable export subsidies, Commerce has offset the estimated weighted-average dumping margin by the appropriate CVD rate. Any such adjusted cash deposit rate may be found in the ''Preliminary Determination'' section above.

Should provisional measures in the companion CVD investigation expire prior to the expiration of provisional measures in this LTFV investigation, Commerce will direct CBP to begin collecting estimated antidumping duty cash deposits unadjusted for countervailed export subsidies at the time that the provisional CVD measures expire. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the timeline of scope comments. After the submission of comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[8] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[9] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[10]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[11] Further, we request that interested parties limit their public, executive summary of each issue to no more than 450 words, not including citations. We intend to use the public, executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public, executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[12]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and

(September 1, 2010), and accompanying Issues and Decision Memorandum at Comment 1.

[8] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[9] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[10] *See* 19 351.309(c)(2) and (d)(2).

[11] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[12] *See APO and Service Final Rule.*

Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Between April 17 and 19, 2024, pursuant to 19 CFR 351.210(e), the petitioners,[13] Alca, and Indal, respectively, requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[14] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigation.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements

[13] The petitioners are U.S. Aluminum Extruders Coalition and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union.

[14] *See* Petitioner's Letter, ''Request for Postponement of Final Determinations,'' dated April 17, 2024; *see also* Alca's Letter, ''Alca Request to Postpone Final Determination in the Less-Than-Fair-Value Investigation of Aluminum Extrusions from Indonesia (A–560–840),'' dated April 18, 2024; and Indal's Letter, ''Aluminum Extrusions from Indonesia,'' dated April 19, 2024.

and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigation are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of orders resulting from this investigation) are excluded from the scope of this investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigation.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 $\mu\Omega$/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/

−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m2 and no greater than 30 g/m2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under Harmonized Tariff Schedule of the United States (HTSUS) 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under HTSUS subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of these antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

International Trade Administration

[A–570–158]

Aluminum Extrusions From the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from the People's Republic of China (China) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2023, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Luke Caruso or Jonathan Hill, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2081 or (202) 482–3518, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination in this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics discussed in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from China. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export prices in accordance with section 772(a) of the Act and calculated constructed export prices in accordance with section 772(b) of the Act. Because China is a non-market economy, within the meaning of section 771(18) of the Act, Commerce has calculated normal value in accordance with section 773(c) of the Act. In addition, Commerce has applied partial facts available under section 776(a)(1) of the Act to the collapsed single entity that includes mandatory respondent Sanhua (Hangzhou) Micro Channel Heat Exchanger Co., Ltd (SHMC) and applied adverse facts available under sections 776(a) and (b) of the Act to the China-wide entity. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

Combination Rates

In the *Initiation Notice,*[7] Commerce stated that it would calculate producer/exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.[8]

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

---

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the weighted average amount by which normal value exceeds U.S. price, as indicated in the table above as follows: (1) for the producer/exporter combinations listed in the table above, the cash deposit rate is equal to the estimated weighted-average dumping margin listed for that combination in the table; (2) for all combinations of Chinese producers/exporters of merchandise under consideration that have not established eligibility for their own separate rates, the cash deposit rate will be equal to the estimated weighted-average dumping margin established for the China-wide entity; and (3) for all third-county exporters of the merchandise under consideration not listed in the table above, the cash deposit rate is the cash deposit rate applicable to the Chinese producer/exporter combination or China-wide entity that supplied that third-country exporter.

To determine the cash deposit rate, Commerce normally adjusts the estimated weighted-average dumping margin by the amount of domestic subsidy pass-through and export subsidies determined in a companion countervailing duty (CVD) proceeding when CVD provisional measures are in effect. Accordingly, where Commerce has made a preliminary affirmative determination for domestic subsidy pass-through or export subsidies, Commerce has offset the calculated estimated weighted-average dumping margin by the appropriate rate(s). Any such adjusted rates may be found in the ''Preliminary Determination'' section's table of estimated weighted-average dumping margins above.

Should provisional measures in the companion CVD investigation expire prior to the expiration of provisional measures in this LTFV investigation, Commerce will direct CBP to begin collecting cash deposits at a rate equal to the estimated weighted-average dumping margins calculated in this preliminary determination unadjusted for the passed-through domestic subsidies or for export subsidies at the time that the CVD provisional measures expire.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose to parties to the proceeding the calculations and analysis it performed in this preliminary determination within five days of public announcement or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register** in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the deadlines for scope comments. After the submission of scope comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

[9] Commerce has preliminarily determined that the mandatory respondent Sanhua (Hangzhou) Micro Channel Heat Exchanger Co., Ltd. is affiliated with the following companies and has treated these companies as a single entity: (1) Sanhua Intelligent Controls Co., Ltd.; (2) Zhejiang Sanhua Automotive Components Co., Ltd.; (3) Shaoxing Sanhua New Energy Automotive Components Co., Ltd.; (4) Shaoxing Sanhua Automotive Thermal Management Technology Co., Ltd.; (5) Sanhua Heat Exchanger (Zhengzhou) Co., Ltd.; and (6) Sanhua International Singapore Pte. Ltd. *See* Preliminary Decision Memorandum.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this investigation.[10] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[11] Interested parties who submit case or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[12]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide, at the beginning of their briefs, a public, executive summary for each issue raised in their briefs.[13] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue.

Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[14]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice in the **Federal Register**. Requests should contain (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On April 21, 2024, pursuant to 19 CFR 351.210(e), SHMC requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[15] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce's will make its final determination no later than 135 days after the date of publication of this notice of preliminary determination in the **Federal Register**.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied

[10] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[11] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[12] *See* 19 CFR 351.309(c)(2) and (d)(2).

[13] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[14] *See APO and Service Final Rule.*

[15] *See* SHMC's Letter, ''Aluminum Extrusions from China,'' dated April 22, 2024.

to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigation.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigations are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A "part or subassembly" is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of the order resulting from this investigation) are excluded from the scope of the investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigation.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series

designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m2 and no greater than 30 g/m2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of the antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as

parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Aluminum Extrusions From Mexico: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from Mexico are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Carolyn Adie or Fred Baker, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6250 and (202) 482–2924, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation in the **Federal Register** on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics discussed in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Mexico. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export prices in accordance with section 772(a) of the Act. Constructed export prices have been calculated in accordance with section

[1] *See Aluminum Extrusions from the People's Republic of China, Colombia, the Dominican Republic, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Initiation of Less-Than-Fair-Value Investigations,* 88 FR 74421 (October 31, 2023) (*Initiation Notice*).

[5] *See Initiation Notice,* 88 FR at 33576.

[6] *See* Memorandum, ''Antidumping Duty Investigations and Countervailing Duty Investigations of Aluminum Extrusions from People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Türkiye, the United Arab Emirates, and the Socialist Republic of Vietnam: Preliminary Scope Decision Memorandum II,'' dated concurrently with this notice (Preliminary Scope Decision Memorandum II).

772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. Furthermore, pursuant to sections 776(a) and (b) of the Act, Commerce preliminarily relied upon facts otherwise available, with adverse inferences for Merit Stamping and Tubos y Perfiles de Aluminio. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act. In this investigation, Commerce preliminarily calculated estimated weighted-average dumping margins for Aluminio de Baja California, S.A. de C.V. (ABC) and Aluminio Texcoco S.A. de C.V. (ALUTEX) that are not zero, *de minimis,* or based entirely on facts otherwise available. Commerce calculated the all-others rate using a simple average of the estimated weighted-average dumping margins calculated for the examined respondents.[7]

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offset(s)) (percent)
Aluminio de Baja California S.A. de C.V	18.07	17.40
Aluminio Texcoco, S.A. de C.V./NEO Aluminio, S.A. de C.V./Extrusiones Metálicas, S.A. de C.V./ Extrusiones Metálicas Expo[8]	9.18	9.18
Merit Stamping	* 82.03	82.03
Tubos y Perfiles de Aluminio	* 82.03	82.03
All Others	13.63	13.63

* Rates based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Commerce normally adjusts cash deposits for estimated antidumping duties by the amount of export subsidies countervailed in a companion countervailing duty (CVD) proceeding, when CVD provisional measures are in effect. Accordingly, where Commerce preliminarily made an affirmative determination for countervailable export subsidies, Commerce has offset the estimated weighted-average dumping margin by the appropriate CVD rate. Any such adjusted cash deposit rate may be found in the ‘‘Preliminary Determination’’ section above.

Should provisional measures in the companion CVD investigation expire prior to the expiration of provisional measures in this LTFV investigation, Commerce will direct CBP to begin collecting estimated antidumping duty cash deposits unadjusted for countervailed export subsidies at the time that the provisional CVD measures expire. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the timeline of scope comments. After the submission of comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

---

[7] With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents; (B) a simple average of the estimated weighted-average dumping margins calculated for the examined respondents; and (C) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged U.S. sales values for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. *See, e.g., Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part,* 75 FR 53661, 53662 (September 1, 2010), and accompanying Issues and Decision Memorandum at Comment 1. However, because complete publicly ranged sales data are not available for both examined respondents, Commerce based the all-others rate on the simple average of the weighted-average dumping margins calculated for the mandatory respondents.

[8] Commerce preliminarily determines that these companies are a single entity. *See* Preliminary Decision Memorandum.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[9] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[10]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public executive summary for each issue raised in their briefs.[11] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[12]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On April 17 and 24, 2024, pursuant to 19 CFR 351.210(e), the petitioners,[13] ABC, and ALUTEX each requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[14] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow

[9] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[10] *See* 19 351.309(c)(2) and (d)(2)

[11] We use the term "issue" here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[12] *See APO and Service Final Rule.*

[13] The petitioners are the U.S. Aluminum Extruders Coalition and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union.

[14] *See* Petitioners' Letter, "Request for Postponement of Final Determinations," dated April 17, 2024; *see also* ABC's Letter, "Postponement of Final Determination and Extension of Provisional Measures Period," dated April 17, 2024; and ALUTEX's Letter, "Request for Postponement of Final Determination and Provisional Measures Period," dated April 24, 2024.

profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigation.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigations are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of orders resulting from this investigation) are excluded from the scope of this investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of this investigation.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions

made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m2 and no greater than 30 g/m2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under Harmonized Tariff Schedule of the United States (HTSUS) 8418.99.8050, which is being included for convenience.

Also excluded from the scope of the investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under HTSUS subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of the antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000;

7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.00. While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.00000

Aluminum Extrusions From Thailand: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from Thailand are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 01, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Jun Jack Zhao, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1396.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation in the **Federal Register** on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The product covered by this investigation are aluminum extrusions from Thailand. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export prices in accordance with section 772(a) of the Act and constructed export prices in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the

methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act. Where the rates for individually investigated companies are all zero or *de minimis,* or determined entirely using facts otherwise available, section 735(c)(5)(B) of the Act instructs Commerce to rely on ''any reasonable method to establish the estimated all-others rate for exporters and producers not individually investigated, including averaging the estimated weighted-average dumping margins determined for exporters and producers individually investigated.''

In this investigation, Commerce calculated estimated weighted-average dumping margins for Thai Metal Aluminum Co., Ltd. (Thai Metal) and for United Aluminum Industry Co., Ltd. (United) that are not zero, *de minimis,* or based entirely on facts otherwise available. As such, Commerce has preliminarily determined the dumping margin for all-others companies to be a simple average of Thai Metal's and United's calculated rates, pursuant to section 735(c)(5)(B) of the Act.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Weighted-average dumping margin (percent)
Thai Metal Aluminum Co., Ltd	2.02
United Aluminum Industry Co., Ltd	4.04
All Others	3.03

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce with direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation measures will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed in connection with this preliminary determination to interested parties within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the timeline of scope comments. After the submission of comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[7] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[8] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[9]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[10] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[11]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date of the hearing.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such

[7] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[8] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[10] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[11] *See APO and Service Final Rule.*

postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination may be accompanied by a request for extension of provisional measures from a four-month period to a period of not more than six months in duration.[12]

On April 17, 24, and 25, 2024, pursuant to 19 CFR 351.210(e), the petitioner, Thai Metal, and United requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[13] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports of aluminum extrusions from Thailand are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

[12] *See* 19 CRF 351.210(e)(2).

[13] *See* Petitioner's Letter, "Request for Postponement of Final Determinations," dated April 17, 2024; Thai Metal's Letter, "Request to Postpone the Deadline for Final Determinations," dated April 24, 2024; United's Letter, "Request to Postpone the Deadline for Final Determinations," dated April 25, 2024.

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, wedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigation.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigation on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigation are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is

a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of the order resulting from this investigation) are excluded from the scope of this investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigation.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m2 and no greater than 30 g/m2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator

shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under Harmonized Tariff Schedule of the United States (HTSUS) 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under HTSUS subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of these antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Aluminum Extrusions From the Republic of Türkiye: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from the Republic of Türkiye (Türkiye) are being, or are likely to be, sold in the

United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Sean Grossnickle or Taylor Hatley, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: 202–482–3818 or (202) 482–4886, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation in the **Federal Register** on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Türkiye. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export prices in accordance with section 772(a) of the Act and constructed export prices in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. Furthermore, pursuant to section 776(a) and (b) of the Act, Commerce preliminarily relied upon facts otherwise available, with adverse inferences for certain companies. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(A)(ii) and 735(c)(5)(A) of the Act provide that, in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, Commerce calculated estimated weighted-average dumping margins for Erdoganlar Aluminyum San. ve Tic. A.S. (Erdoganlar) and Sistem Aluminyum Sanayi ve Ticaret A.S. (Sistem) that are not zero, *de minimis,* or based entirely on facts otherwise available. Commerce calculated the all-others rate using a weighted average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged values for the merchandise under consideration.[7]

We received timely Q&V responses from the following companies in addition to the mandatory respondents, Erdoganlar and System: ASAS Aluminyum Sanayi ve Ticaret A.S. (ASAS); Cansan Aluminyum Profil San Tic AS (Cansan); Cuhadaroglu Metal Sanayi ve Pazarlama A.S. (Cuhadaroglu); HAS Aluminyum San. Ve Tic. A.S (HAS Aluminyum);[8] Kurtoglu Bakir Kursun Sanayi A.S. (Kurtoglu); and Saray Dokum ve Madeni Aksam San. Tur. A.S. (Saray).[9] ASAS,

[1] *See Aluminum Extrusions from the People's Republic of China, Colombia, the Dominican Republic, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Türkiye, the United Arab Emirates, and the Socialist Republic of Vietnam: Initiation of Less-Than-Fair-Value Investigations,* 88 FR 74421 (October 31, 2023) (*Initiation Notice*).

[2] *See Aluminum Extrusions from the People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Türkiye, the United Arab Emirates, and the Socialist Republic of Vietnam: Postponement of Preliminary Determinations of Antidumping Duty Investigations,* 89 FR 11814 (February 15, 2024).

[3] *See* Memorandum, ''Decision Memorandum for the Preliminary Determination in the Less-Than-Fair-Value Investigation of Aluminum Extrusions from Republic of Türkiye,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See Antidumping Duties; Countervailing Duties, Final Rule,* 62 FR 27296, 27323 (May 19, 1997).

[5] *See Initiation Notice.*

[6] *See* Memorandum, ''Antidumping Duty Investigations and Countervailing Duty Investigations of Aluminum Extrusions from People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Preliminary Scope Decision Memorandum II,'' dated concurrently with this notice (Preliminary Scope Decision Memorandum II).

[7] With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents; (B) a simple average of the estimated weighted-average dumping margins calculated for the examined respondents; and (C) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged U.S. sales values for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. *See, e.g., Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part,* 75 FR 53661, 53662 (September 1, 2010), and accompanying Issues and Decision Memorandum at Comment1. As complete publicly ranged sales data were available, Commerce based the all-others rate on the publicly ranged sales data of the mandatory respondents. For a complete analysis of the data, *see* the All-Others Rate Calculation Memorandum.

[8] While we did not issue a Q&V questionnaire to HAS Aluminyum; it submitted a timely Q&V response. *See* HAS Aluminyum's Letter, ''Q&V Questionnaire Response,'' dated November 7, 2023 (HAS Aluminyum's Q&V Response).

[9] *See* ASAS's Letter, ''Submission of Quantity and Value Questionnaire Response,'' dated November 7, 2023; Cansan's Letter, ''Submission of Quantity and Value Questionnaire Response,'' dated November 6, 2023; Cuhadaroglu Metal's Letter, ''Submission of Quantity and Value Questionnaire Response,'' dated November 7, 2023; Kurtoglu Aluminym's

Continued

Cansan, Cuhadaroglu, Kurtoglu and Saray: (1) were not selected as mandatory respondents; (2) responded to our Q&V questionnaire in a timely manner; and (3) were not otherwise collapsed with a mandatory respondent. Accordingly, these companies are subject to the all-others rate.

Commerce issued a Q&V questionnaire to Birgi Birlesik Giyim (Birgi) following the initiation of the investigation which was not delivered.[10] Therefore, Commerce preliminarily finds that Birgi is subject to the all-others rate. Additionally, HAS Aluminyum responded to our Q&V questionnaire in a timely manner and stated that it had no shipments during the POI;[11] therefore, Commerce preliminarily finds that it is subject to the all-others rate.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offset(s)) (percent)
Erdoganlar Aluminyum San. ve Tic. A.S	85.14	84.94
Sistem Aluminyum Sanayi ve Ticaret A.S	45.41	45.41
Alkor Aluminyum Enerji Insaat Sanayi ve Ticaret Anonim Sirketi	* 605.72	594.55
Astas Aluminyum San ve Tic A.S	* 605.72	594.55
Ayde Aluminyum LTD. STI	* 605.72	594.55
Burak Aluminyum San	* 605.72	594.55
P.M.S. Aluminyum Sanayi ve Ticaret A.S	* 605.72	594.55
Tuna Aluminium Ltd	* 605.72	594.55
Uluson Aluminum	* 605.72	594.55
All-Others Rate	73.43	73.23

* Rates based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margins or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Commerce normally adjusts cash deposits for estimated antidumping duties by the amount of export subsidies countervailed in a companion countervailing duty (CVD) proceeding, when CVD provisional measures are in effect. Accordingly, where Commerce preliminarily made an affirmative determination for countervailable export subsidies, Commerce has offset the estimated weighted-average dumping margin by the appropriate CVD rate. Any such adjusted cash deposit rate may be found in the ''Preliminary Determination'' section above.

Should provisional measures in the companion CVD investigation expire prior to the expiration of provisional measures in this LTFV investigation, Commerce will direct CBP to begin collecting estimated antidumping duty cash deposits unadjusted for countervailed export subsidies at the time that the provisional CVD measures expire. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose the calculations and analysis performed in connection with this preliminary determination to interested parties within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the timeline of scope comments. After the submission of comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[12] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[13] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[14]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged

Letter, ''Submission of Quantity and Value Questionnaire Response,'' dated November 7, 2023; and Saray Dokum's Letter, ''Submission of Quantity and Value Questionnaire Response,'' dated November 6, 2023.

[10] *See* Memorandum, ''Quantity and Value Delivery Confirmation in the Less-Than-Fair Value Investigation of Certain Aluminum Extrusions from the Republic of Turkey,'' dated November 6, 2023 (Delivery Confirmation Memorandum).

[11] *See* HAS Aluminyum's Q&V Response.

[12] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[13] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[14] *See* 19 CFR 351.309(c)(2) and (d)(2).

interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[15] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[16]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice in the **Federal Register**. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce will inform parties of the time and date for the hearing. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.[17]

On April 17, 2024, pursuant to 19 CFR 351.210(e), all parties requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[18] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports of aluminum extrusions from Türkiye are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, wedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigation.

The types of products that meet the definition of subject merchandise include but

[15] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[16] *See APO and Service Final Rule.*

[17] *See* 19 CFR 351.210(e)(2).

[18] *See* Erdoganlar's and Sistem's Letter, ''Request for Postponement of Final Determination,'' dated April 17, 2024; *see also* Petitioners' Letter, ''Request for Postponement of Final Determinations,'' dated April 17, 2024. The petitioners are U.S. Aluminum Extruders Coalition and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union.

are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigation on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigation are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of the order resulting from this investigation) are excluded from the scope of this investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigation.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as

designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m2 and no greater than 30 g/m2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of these antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000;

8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Renewable Energy and Energy Efficiency Advisory Committee

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of an open meeting.

SUMMARY: The Renewable Energy and Energy Efficiency Advisory Committee (REEEAC or the Committee) will hold an in-person meeting, accessible to the public in-person and online, on Wednesday, May 22, 2024 at the U.S. Department of Commerce in Washington, DC Registration instructions for the public to attend either in-person or online are provided below. The meeting has a limited number of spaces for members of the public to attend in-person. Requests to attend in-person will be considered on a first-come first-served basis.

DATES: Wednesday, May 22, 2024, from approximately 9:30 a.m. to 3:30 p.m. Eastern Daylight Time (EDT). Members of the public wishing to participate must register in advance with Cora Dickson at the contact information below by 5:00 p.m. EDT on Friday, May 17, 2024, including any requests to make comments during the meeting or for accommodations or auxiliary aids.

ADDRESSES: To register, please contact Cora Dickson, Designated Federal Officer (DFO), Office of Energy and Environmental Industries (OEEI), Industry and Analysis, International Trade Administration, U.S. Department of Commerce at (202) 482–6083; email: *Cora.Dickson@trade.gov.* In their registration, members of the public wishing to attend in-person must request in-person attendance by the firm deadline above.

FOR FURTHER INFORMATION CONTACT: Cora Dickson, DFO, Office of Energy and Environmental Industries (OEEI), Industry and Analysis, International Trade Administration, U.S. Department of Commerce at (202) 482–6083; email: *Cora.Dickson@trade.gov.* Registered participants joining virtually will be emailed the login information for the meeting, which will be accessible as a livestream via WebEx Webinar. Registered participants joining in-person will be emailed instructions on accessing the designated meeting space.

SUPPLEMENTARY INFORMATION:

Background: The Secretary of Commerce established the REEEAC pursuant to discretionary authority and in accordance with the Federal Advisory Committee Act, as amended (5 U.S.C. 1001 *et. seq.*), on July 14, 2010. The REEEAC was re-chartered most recently on May 27, 2022. The REEEAC provides the Secretary of Commerce with advice from the private sector on the development and administration of programs and policies to expand the export competitiveness of U.S. renewable energy and energy efficiency products and services. More information about the REEEAC, including the list of appointed members for this charter, is published online at *http://trade.gov/reeeac.*

On Wednesday, May 22, 2024, the REEEAC will hold the eighth meeting of its current charter term. The Committee, with officials from the Department of Commerce and other agencies, will discuss major issues affecting the competitiveness of the U.S. renewable energy and energy efficiency industries. The Committee will provide an overview of its recommendations to the relevant U.S. Government officials from the Trade Promotion Coordinating Committee agencies. An agenda will be made available by May 17, 2024 upon request to Cora Dickson.

The meeting will be open to the public and will be accessible to people with disabilities. All guests are required to register in advance by the deadline identified under the **DATE** caption. Requests for auxiliary aids must be submitted by the registration deadline. Last minute requests will be accepted but may not be possible to fill.

A limited amount of time before the close of the meeting will be available for oral comments from members of the public attending the meeting. Members of the public attending virtually who wish to speak during the public comment period must give the DFO advance notice in order to facilitate their access. To accommodate as many speakers as possible, the time for public comments will be limited to two to five minutes per person (depending on number of public participants). Individuals wishing to reserve speaking time during the meeting must contact Cora Dickson using the contact information above and submit a brief statement of the general nature of the comments, as well as the name and address of the proposed participant, by 5:00 p.m. EDT on Friday, May 17, 2024. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, the International Trade Administration may conduct a lottery to determine the speakers. Speakers are requested to submit a copy of their oral comments by email to Cora Dickson for distribution to the participants in advance of the meeting.

Any member of the public may submit written comments concerning the REEEAC's affairs at any time before or after the meeting. Comments may be submitted via email to the Renewable Energy and Energy Efficiency Advisory Committee, c/o: Cora Dickson, Designated Federal Officer, Office of Energy and Environmental Industries, U.S. Department of Commerce; *Cora.Dickson@trade.gov.* To be considered during the meeting, public comments must be transmitted to the REEEAC prior to the meeting. As such, written comments must be received no later than 5:00 p.m. EDT on Friday, May 17, 2024. Comments received after that date will be distributed to the members but may not be considered at the meeting.

Copies of REEEAC meeting minutes will be available within 30 days following the meeting.

Man K. Cho,

Deputy Director, Office of Energy and Environmental Industries.

Aluminum Extrusions From Ecuador: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from Ecuador are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Elizabeth Bremer or Stephanie Trejo, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4987 or (202) 482–4390, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Ecuador. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export price in accordance with section 772(a) of the Act. Constructed export prices have been calculated in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(A)(ii) and 735(c)(5)(A) of the Act provide that, in the preliminary determination, Commerce shall determine an estimated all-others rate for all other exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually examined, excluding rates that are zero, *de minimis,* or determined entirely under section 776 of the Act.

In this investigation, Commerce calculated estimated weighted-average dumping margins for CEDAL Durán S.A. (CEDAL Durán) and FISA Fundiciones Industriales S.A. (FISA) that are not zero, *de minimis,* or based entirely on facts otherwise available. Commerce calculated the all-others rate using a weighted average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged values for the merchandise under consideration.[7]

[2] *See Aluminum Extrusions from the People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations,* 88 FR 11814 (February 15, 2024).

[3] *See* Memorandum, ''Decision Memorandum for the Preliminary Affirmative Determination in the Less-Than-Fair-Value Investigation of Aluminum Extrusions from Ecuador,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See Antidumping Duties; Countervailing Duties, Final Rule,* 62 FR 27296, 27323 (May 19, 1997).

[5] *See Initiation Notice.*

[6] *See* Memorandum, ''Antidumping Duty Investigations and Countervailing Duty Investigations of Aluminum Extrusions from People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Türkiye, the United Arab Emirates, and the Socialist Republic of Vietnam: Preliminary Scope Decision Memorandum II,'' dated concurrently with this notice (Preliminary Scope Decision Memo II).

[7] *See* Memorandum, ''All-Others Rate Calculation,'' dated concurrently with this notice. With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents; (B) a simple average of the estimated weighted-average dumping margins calculated for the examined respondents; and (C) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged U.S. sales values for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. *See, e.g., Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part,* 75 FR 53661, 53662 (September 1, 2010), and accompanying Issues and Decision Memorandum at Comment 1. As complete publicly ranged sales data were available, Commerce based the all-others rate on the publicly ranged sales data of the mandatory respondents. For a complete analysis of the data, *see* the All-Others Rate Calculation Memorandum.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
CEDAL Durán S.A./Corporación Ecuatoriana de Aluminio S.A. CEDAL[8]	51.20
FISA Fundiciones Industriales S.A	17.23
All Others	22.52

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rates for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed in connection with this preliminary determination to interested parties within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination for CEDAL Durán and FISA.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the timeline of scope comments. After the submission of comments, Commerce will set a schedule for the submission of cases and rebuttal briefs limited to scope issues.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[9] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[10] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[11]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[12] Further, we request that interested parties limit their public, executive summary of each issue to no more than 450 words, not including citations. We intend to use the public, executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public, executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[13]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce will inform parties of the time and date for the hearing. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Between April 17 and 19, 2024, pursuant to 19 CFR 351.210(e), the petitioners,[14] CEDAL Durán, and FISA requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[15] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of

[8] Commerce preliminarily determines that CEDAL Duran and Corporación Ecuatoriana de Aluminio S.A. CEDAL are a single entity. *See* the Preliminary Decision Memorandum.

[9] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[10] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings*, 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[11] *See* 19 CFR 351.309(c)(2) and (d)(2).

[12] We use the term "issue" here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[13] *See APO and Service Final Rule.*

[14] The petitioners are U.S. Aluminum Extruders Coalition and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union.

[15] *See* Petitioners' Letter, "Request for Postponement of Final Determinations," dated April 17, 2024; *see also* CEDAL Durán's Letter, "CEDAL Request for Postponement of Final Determination," dated April 18, 2024; and FISA's Letter, "Request to Postpone the Deadline for Final Determination," dated April 19, 2024.

exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigations.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigations are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those

antidumping and countervailing duty orders that are in effect as of the date of publication of orders resulting from this investigation) are excluded from the scope of the investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigations.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm² and less than 906 mm², (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m2 and no greater than 30 g/m2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of these antidumping and countervailing duty

investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Aluminum Extrusions From Malaysia: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from Malaysia are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Paola Aleman Ordaz or Benjamin Blythe, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4031 or (202) 482–3457, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on October 31, 2023.[1] On February 15, 2024, Commerce postponed the

[1] *See Aluminum Extrusions from the People's Republic of China, Colombia, the Dominican Republic, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Initiation of Less-Than-Fair-Value Investigations,* 88 FR 74421 (October 31, 2023) (*Initiation Notice*).

preliminary determination in this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Malaysia. For a complete description of the scope of this investigation, see Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memo II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export price in accordance with sections 772(a) of the Act. Commerce calculated normal value in accordance with section 773 of the Act. Furthermore, pursuant to sections 776(a) and (b) of the Act, Commerce has preliminarily relied upon facts otherwise available, with adverse inferences, for EL Aluminium Billet (M) Sdn Bhd, Kosan Aluminum Extrusion SDN. BHD, and Winstar Group. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(A)(ii) and 735(c)(5)(A) of the Act provide that, in the preliminary determination, Commerce shall determine an estimated all-others rate for all other exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually examined, excluding any rates that are zero, *de minimis,* or determined entirely under section 776 of the Act.

Pursuant to section 735(c)(5)(B) of the Act, if the estimated weighted-average dumping margins established for all exporters and producers individually examined are zero, *de minimis,* or determined based entirely on facts otherwise available, Commerce may use any reasonable method to establish the estimated weighted-average dumping margin for all other producers and exporters.

Commerce has preliminarily determined that the estimated weighted-average dumping margins for Genesis Aluminium Industries Sdn. Bhd./Zenshin Industries Sdn. Bhd. and P.A. Extrusion (M) Sdn. Bhd. under section 776 of the Act are zero. Consequently, pursuant to section 735(c)(5)(B) of the Act, Commerce's normal practice under these circumstances has been to calculate the all-others rate as a simple average of the alleged dumping margin(s) from the petition.[7] For a full description of the methodology underlying Commerce's analysis, *see* the Preliminary Decision Memorandum.

Preliminary Determination

For this preliminary determination, Commerce calculated a zero estimated weighted-average dumping margin for each individually examined producer and or exporter of the subject merchandise. Consistent with section 733(b)(3) of the Act, Commerce preliminarily determines that these individually examined respondents with zero rates have not made sales of subject merchandise at LTFV.

P.A. Extrusion (M) Sdn. Bhd.[9]	0.00
EL Aluminium Billet (M) Sdn Bhd	*27.51
Kosan Aluminum Extrusion SDN. BHD	*27.51
Winstar Group	*27.51
All Others	26.70

* Rate based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents with above *de minimis* dumping margins that are listed in the table above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a company identified in the table above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise, except as explained below; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Because the estimated weighted-average dumping margins for Genesis Aluminium Industries Sdn. Bhd/Zenshin Industries Sdn. Bhd. and P.A. Extrusion (M) Sdn. Bhd. are zero, entries of subject merchandise produced and exported by these companies will not be subject to suspension of liquidation or cash deposit requirements. In such situations, Commerce applies the exclusion to the provisional measures to the producer/exporter combination that was examined in the investigation. Accordingly, Commerce is directing CBP not to suspend the liquidation of entries of subject merchandise that was exported by Genesis Aluminium Industries Sdn. Bhd/Zenshin Industries Sdn. Bhd. and produced by Genesis Aluminium Industries Sdn. Bhd/Zenshin Industries Sdn. Bhd. or subject merchandise that was exported by P.A. Extrusion (M) Sdn. Bhd. and produced by P.A. Extrusion (M) Sdn. Bhd. Entries of shipments of subject merchandise from these companies in any other producer/exporter combination, or by third parties that sourced subject merchandise from the excluded producer/exporter combination, are subject to the provisional measures at the all-others rate.

Should the final estimated weighted-average dumping margin be zero or *de minimis* for the producer/exporter combinations identified above, entries of shipments of subject merchandise from these producer/exporter combinations will be excluded from the potential antidumping duty order. Such exclusions are not applicable to merchandise exported to the United States by these respondents in any other producer/exporter combinations or by third parties that sourced subject merchandise from the excluded producer/exporter combinations.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose to parties to the proceeding the calculations and analysis it performed in this preliminary determination within five days of public announcement or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memo II for the deadlines for scope comments. After the submission of scope comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[10] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[11] Interested parties who submit case or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[12]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide, at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[13] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the executive summary of each issue.

Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[14]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant

[8] Commerce preliminarily determines that Genesis Aluminium Industries Sdn. Bhd. and Zenshin Industries Sdn. Bhd. should be collapsed and treated as a single entity. *See* the Preliminary Decision Memorandum.

[9] Although Commerce selected P.A. Resources Berhad (PARB) as a mandatory respondent, PARB reported that it is a holding company that is not involved in the production or exportation of the merchandise under investigation but that its subsidiary, P.A. Extrusion (M) Sdn. Bhd., produced the merchandise under investigation and sold that merchandise to the United States during the POI. Consequently, Commerce preliminarily determines that the estimated weighted-average dumping margin applies to P.A. Extrusion (M) Sdn. Bhd., the only producer and exporter of the merchandise under consideration owned by PARB. *See* the Preliminary Decision Memorandum.

[10] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[11] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings*, 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[12] *See* 19 CFR 351.309(c)(2) and (d)(2).

[13] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[14] *See APO and Service Final Rule*.

Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice in the **Federal Register**. Requests should contain (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On April 17 and 18, 2024, pursuant to 19 CFR 351.210(e), Genesis Aluminium Industries Sdn. Bhd. and P.A. Resources Berhad, respectively, requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[15] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this notice of preliminary determination in the **Federal Register**.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigations.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigations are large, multi-

[15] *See* Genesis Aluminium Industries Sdn. Bhd.'s Letter, ''Genesis Request to Postpone Final Determination,'' dated April 17, 2024; *see also* P.A. Resources Berhad's Letter, ''Request to Extend Final Determination,'' dated April 18, 2024.

finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of the order resulting from this investigation) are excluded from the scope of the investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigations.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5)

packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m^2 and no greater than 30 g/m^2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of the antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Appendix II—List of Topics Discussed in the Preliminary Decision Memorandum

I. Summary
II. Background
III. Period of Investigation
IV. Affiliation and Single Entity Treatment
V. Application of Facts Available with Adverse Inferences
VI. Discussion of the Methodology

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–533–920]

Aluminum Extrusions From India: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from India are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Deborah Cohen, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4521.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation in the **Federal Register** on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from India. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export prices in accordance with section 772(a) of the Act. Normal value is calculated in accordance with section 773 of the Act. Furthermore, pursuant to sections 776(a) and (b) of the Act, Commerce preliminarily relied upon facts otherwise available, with adverse inferences for Global Aluminium Private Limited (Global Aluminium). Additionally, nine potential exporters and/or producers of aluminum extrusions from India did not respond to Commerce's quantity and value questionnaire. Thus, pursuant to sections 776(a) and (b) of the Act, Commerce has preliminarily relied upon facts otherwise available, with adverse inferences for these nine companies. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(A)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, Commerce calculated an estimated weighted-average dumping margin for Maan Aluminium Limited (Maan) that is not zero, *de minimis,* or based entirely on facts otherwise available. Commerce has preliminarily determined the dumping margin for Global Aluminium under section 776 of the Act. Consequently, pursuant to section 735(c)(5)(B) of the Act, we calculated the all-others rate based on Maan's calculated rate.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
Global Aluminium Private Limited	* 39.05
Maan Aluminium Limited	3.44
Alom Extrusions Limited	3.44
Hindalco Industries	3.44
Aluka Extrusions Industries	* 39.05
Banco Aluminium, Ltd	* 39.05
Bhoruka Aluminium, Ltd	* 39.05
Century Extrusions, Ltd	* 39.05
Jindal Aluminium, Ltd	* 39.05
KMC Aluminium Pvt., Ltd	* 39.05
Mittal Extrusions	* 39.05
Sudal Industries, Ltd	* 39.05
Superfine Group of Industries	* 39.05

Exporter/producer	Estimated weighted-average dumping margin (percent)
All Others	3.44

* Rate based on Adverse Facts Available.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the timeline of scope comments. After the submission of comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[7] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[8] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[9]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide a public, executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[10] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public, executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public, executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[11]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date of the hearing.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2)(A) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination may be accompanies by a request for extension of provisional measures from a four-month period to a period of not more than six months in duration.[12]

On April 17 and 18, 2024, pursuant to 19 CFR 351.210(e), the petitioners[13] and Maan Aluminium each requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[14] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S.

[7] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[8] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[9] *See* 19 351.309(c)(2) and (d)(2).

[10] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[11] *See APO and Service Final Rule.*

[12] *See* 19 CRF 351.210(e)(2).

[13] The petitioners are U.S. Aluminum Extruders Coalition and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union.

[14] *See* Petitioners' Letter, ''Request for Postponement of Final Determinations,'' dated April 17, 2024; *see also* Maan's Letter, ''Maan Aluminium Limited's Request to Extend the Antidumping Duty Final Determination,'' dated April 18, 2024.

International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigation.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigation are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of orders resulting from this investigation) are excluded from the scope of this investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigation.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In

addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 $\mu\Omega$/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m^2 and no greater than 30 g/m^2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of the antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet

the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Aluminum Extrusions From Italy: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from Italy are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Eric Hawkins, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1988.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics

[3] *See* Memorandum, ''Decision Memorandum for the Preliminary Affirmative Determination in the Less Than Fair Value Investigation of Aluminum Extrusions from Italy,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Italy. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memo II.[6] Commerce is preliminarily modifying the scope language as it appeared in the Initiation Notice. *See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export prices in accordance with section 772(a) of the Act and constructed export prices in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. Furthermore, pursuant to sections 776(a) and (b) of the Act, Commerce preliminarily relied upon facts otherwise available, with adverse inferences for Alex S.p.A., Bodega G & C S.p.A., Estral S.p.A., Pasturi S.r.l., and PFA S.r.l.[7] For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that, in the preliminary determination, Commerce shall determine an estimated all-others rate for all other exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually examined, excluding any rates that are zero, *de minimis,* or determined entirely under section 776 of the Act.

In this investigation, Commerce calculated an estimated weighted-average dumping margin that is above *de minimis* for one of the mandatory respondents, Metra S.p.A/Metra Ragusa S.p.A./IMET S.p.A (collectively, Metra). Commerce preliminarily determines that the other mandatory respondent, Eural Gnutti S.p.A. (Eural), did not make sales of subject merchandise at LTFV. Accordingly, Commerce is assigning Metra's dumping margin to all other producers and exporters not individually examined.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Producer/exporter	Weighted-average dumping margin (percent)
Eural Gnutti S.p.A	0.00
Metra S.p.A./Metra Ragusa S.p.A./IMET S.p.A [8]	15.30
Alex S.p.A	* 41.67
Bodega G & C S.p.A	* 41.67
Estral S.p.A	* 41.67
Pasturi S.r.l	* 41.67
PFA S.r.l	* 41.67
All Others	15.30

* Rate based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce with direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a company identified in the table above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Because the estimated weighted-average dumping margin for Eural is zero, entries of shipments of subject merchandise produced and exported by this company will not be subject to suspension of liquidation or cash deposit requirements. In such situations, Commerce applies the exclusion from the provisional measures to the producer/exporter combination that was examined in the investigation. Accordingly, Commerce is directing CBP not to suspend liquidation of entries of subject merchandise produced and exported by Eural. Entries of shipments of subject merchandise from this company in any other producer/exporter combination, or by third parties that sourced subject merchandise from the excluded producer/exporter combination, are subject to the provisional measures at the all-others rate.

Should the final estimated weighted-average dumping margin be zero or *de minimis* for Eural, entries of shipments of subject merchandise produced and exported by Eural will be excluded from the potential antidumping duty order. Such exclusion is not applicable to merchandise exported to the United States by this respondent in any other producer/exporter combinations or by third parties that sourced subject merchandise from the excluded producer/exporter combination.

These suspension of liquidation instructions will remain in effect until further notice.

[6] *See* Memorandum, "Antidumping Duty Investigations and Countervailing Duty Investigations of Aluminum Extrusions from People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Preliminary Scope Decision Memorandum II," dated concurrently with this notice (Preliminary Scope Decision Memo II).

[7] *See* Preliminary Decision Memorandum.

[8] Commerce preliminarily determines that Metra S.p.A, Metra Ragusa S.p.A., and IMET S.p.A. are a single entity. *See* Preliminary Decision Memorandum.

Disclosure

Commerce intends to disclose to parties to the proceeding the calculations and analysis it performed in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memo II for the deadlines for scope comments. After the submission of comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[9] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[10] Interested parties who submit case or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[11]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their briefs that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[12] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue.

Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[13]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice in the **Federal Register**. Requests should contain (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period of not more than six months in duration.

On April 19, 2024, pursuant to 19 CFR 351.210(e), Eural and Metra requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[14] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination in the **Federal Register**.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy

[9] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[10] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings*, 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[11] *See* 19 351.309(c)(2) and (d)(2).

[12] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[13] *See APO and Service Final Rule.*

[14] *See* Eural's Letter, ''Request to Extend Final Determination,'' dated April 19, 2024; *see also* Metra's Letter, ''Request to Extend Final Determination,'' dated April 19, 2024.

with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigations.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigations are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A "part or subassembly" is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of the order resulting from this investigation) are excluded from the scope of the investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigations.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise

collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 $\mu\Omega$/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m^2 and no greater than 30 g/m^2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of the antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts

and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Multilayered Wood Flooring From the People's Republic of China: Final Results of Antidumping Duty Administrative Review and Final Determination of No Shipments; 2021–2022; Correction

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

ACTION: Notice; correction.

SUMMARY: The U.S. Department of Commerce (Commerce) published notice in the **Federal Register** of May 1, 2024 in which Commerce published the final results of the 2021–2022 administrative reviews of the antidumping duty (AD) order on multilayered wood flooring from the People's Republic of China (China). This notice contained an incomplete list of the companies determined to have no shipments of subject merchandise during the period of review (POR) December 1, 2021, through November 30, 2022.

FOR FURTHER INFORMATION CONTACT: Davyd Williams, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4338.

SUPPLEMENTARY INFORMATION:

Background

On May 1, 2024, Commerce published in the **Federal Register** the final results of the 2021–2022 administrative review of the AD order on multilayered wood flooring from China.[1] In Appendix II of this **Federal Register** notice, we listed the companies which had no shipments of subject merchandise during the POR. However, we failed to include two companies, Dongtai Fuan Universal Dynamics, LLC and Pinge Timber Manufacturing (Zhejiang) Co., Ltd., in the list of companies which had no shipments in Appendix II.

Correction

In the **Federal Register** of May 1, 2024, in FR Doc 2024–09316, on page 35058, in the second appendix, correct the list to include Dongtai Fuan Universal Dynamics, LLC and Pinge Timber Manufacturing (Zhejiang) Co., Ltd. The corrected No Shipments List in Appendix II is appended to this notice.

Notification to Interested Parties

This notice is issued and published in accordance with sections sections 751(a) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: May 2, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix II (Corrected)

No Shipments
Anhui Longhua Bamboo Product Co., Ltd.
Benxi Flooring Factory (General Partnership)
Dalian Shengyu Science And Technology Development Co., Ltd.
Dongtai Fuan Universal Dynamics, LLC

Certain Passenger Vehicle and Light Truck Tires From the People's Republic of China: Preliminary Results of Countervailing Duty Administrative Review and Rescission of Review, Part; 2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily finds that countervailable subsidies were provided to producers and exporters of certain passenger vehicles and light truck tires (PVLT) from the People's Republic of China (China) during the period of review (POR), January 1, 2022, through December 31, 2022. In addition, Commerce is rescinding this review, in part, with respect to 18 companies. Interested parties are invited to comment on these preliminary results.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Nicholas Czajkowski, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1395.

Background

On August 10, 2015, Commerce published in the **Federal Register** the countervailing duty (CVD) order on PVLTs from China.[1] On August 2, 2023, Commerce published in the **Federal Register** the notice of initiation of an administrative review of the *Order*.[2] On January 31, 2024, Commerce selected Jiangsu General Science Technology Co., Ltd. (General Science) and Winrun Tyre Co., Ltd. (Winrun) for individual examination as the mandatory respondents in this review. On February 2 and February 22, 2024, Commerce received letters of intent to not participate in the review by General Science[3] and Winrun,[4] respectively. We received no response from the Government of China to the Initial Questionnaire.[5] Because no other company subject to the review had reviewable entries or all review requests were rescinded for the remaining companies, Commerce did not select additional mandatory respondents.

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[6] A list of topics discussed in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Order

The merchandise covered by the *Order* is PVLTs from China. For a complete description of the scope of the *Order, see* the Preliminary Decision Memorandum.[7]

Methodology

Commerce is conducting this administrative review in accordance with section 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act). For each of the subsidy programs found to be countervailable, Commerce preliminarily determines that there is a subsidy (*i.e.,* a financial contribution by an ''authority'' that gives rise to a benefit to the recipient, and that the subsidy is specific).[8] For a full description of the methodology underlying our conclusions, including our reliance on adverse facts available (AFA) pursuant to section 776(a) and (b) of the Act, *see* the Preliminary Decision Memorandum.

Rescission of Administrative Review, in Part

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if the parties that requested a review withdraw the request within 90 days of the date of publication of the notice of initiation. Commerce received timely-filed withdrawal requests with respect to 16 companies, pursuant to 19 CFR 351.213(d)(1).[9] Because the withdrawal requests were timely filed, and no other parties requested a review of these companies, in accordance with 19 CFR 351.213(d)(1), Commerce is rescinding this review of the *Order* with respect to these 16 companies; *see* Appendix II.

Based on our analysis of U.S. Customs and Border Protection (CBP) data, we determine that the following two companies had no entries of subject merchandise during the POR: Shandong Qilun Rubber Co., Ltd. and Shandong Transtone Tyre Co., Ltd. On March 29, 2024, we notified interested parties of our intent to rescind the review for Shandong Qilun Rubber Co., Ltd. and Shandong Transtone Tyre Co., Ltd.[10] No parties commented on our intent to rescind.[11] Pursuant to 19 CFR 351.213(d)(3), we are rescinding the administrative review of these two companies. For additional information regarding this determination, *see* the Preliminary Decision Memorandum.

Preliminary Results of Review

Commerce preliminarily determines that the following net countervailable subsidy rates exist for the period January 1, 2022, through December 31, 2022:

Company	Subsidy rate (percent *ad valorem*)
Winrun Tyre Co., Ltd	* 125.50
Jiangsu General Science Technology Co., Ltd	* 125.50

* Rate is based on facts available with adverse inferences.

Cash Deposit Requirements

In accordance with section 751(a)(2)(C) of the Act, Commerce also intends upon publication of the final results, to instruct CBP to collect cash

[11] *Id.*

deposits of the estimated countervailing duties in the amounts calculated in the final results of this review for the respective companies listed above with regard to shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review. If the rate calculated in the final results is zero or *de minimis,* no cash deposit will be required on shipments of the subject merchandise entered or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review.

For all non-reviewed firms, CBP will continue to collect cash deposits of estimated countervailing duties at the all-others rate or the most recent company-specific rate applicable to the company, as appropriate. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Assessment Rates

In accordance with section 751(a)(2)(C) of the Act and 19 CFR 351.221(b)(4)(i), we preliminarily determined subsidy rates in the amounts shown above for the producers/exporters shown above. Upon completion of the administrative review, consistent with section 751(a)(1) of the Act and 19 CFR 351.212(b)(2), Commerce shall determine, and CBP shall assess, countervailing duties on all appropriate entries covered by this review.

For the companies for which this review is rescinded with these preliminary results, we will instruct CBP to assess countervailing duties on all appropriate entries at a rate equal to the cash deposit of estimated countervailing duties required at the time of entry, or withdrawal from warehouse, for consumption, during the period January 1, 2022, through December 31, 2022, in accordance with 19 CFR 351.212(c)(l)(i). For the companies remaining in the review, we intend to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Disclosure and Public Comment

Normally, Commerce discloses its calculations and analysis performed in connection with the preliminary results to interested parties within five days of its public announcement, or if there is no public announcement, within five days of the date of publication of this notice, in accordance with 19 CFR 351.224(b). However, because Commerce preliminarily applied total AFA in the calculation of the benefit for Winrun and General Science, and the AFA rates are based on rates calculated in prior segments of the proceeding, there are no calculations to disclose.

Pursuant to 19 CFR 351.309(c), interested parties may submit case briefs to Commerce no later than 30 days after the date of publication of these preliminary results of review.[12] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[13] Interested parties who submit case or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[14]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide a public executive summary of their brief that should be limited to five pages total, including footnotes. In this review, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[15] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final results in this administrative review. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[16] Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case briefs. An electronically-filed hearing request must be received successfully in its entirety by Commerce's electronic records system, ACCESS, by 5 p.m. Eastern Time within 30 days after the date of publication of this notice.

[12] *See* 19 CFR 351.309(c)(1)(ii).

[13] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[14] *See* 19 351.309(c)(2) and (d)(2).

[15] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[16] *See APO and Service Final Rule.*

Final Results of Review

Unless extended, we intend to issue the final results of this administrative review, which will include the results of our analysis of the issues raised in the case briefs, within 120 days of publication of these preliminary results in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(1).

Notification to Interested Parties

These preliminary results and notice are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213 and 351.221(b)(4).

Dated: April 30, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Aluminum Extrusions From the Socialist Republic of Vietnam: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from the Socialist Republic of Vietnam (Vietnam) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2023, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Rebecca Janz, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2972.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination in this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics discussed in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Vietnam. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export prices in accordance with section 772(a) of the Act and calculated constructed export prices in accordance with section 772(b) of the Act. Because Vietnam is a non-market economy (NME) country, within the meaning of section 771(18) of the Act, Commerce has calculated normal value in accordance with section 773(c) of the Act. In addition, pursuant to sections 776(a) and (b) of the Act, Commerce preliminarily relied upon facts otherwise available, with adverse inferences, to assign a dumping margin for the Vietnam-wide entity. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

Combination Rates

In the *Initiation Notice,*[7] Commerce stated that it would calculate producer/exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.[8]

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

---

[1] *See Aluminum Extrusions from the People's Republic of China, Colombia, the Dominican Republic, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Initiation of Less-Than-Fair-Value Investigations,* 88 FR 74421 (October 31, 2023) (*Initiation Notice*).

[2] *See Aluminum Extrusions from the People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations,* 89 FR 11814 (February 15, 2024).

[3] *See* Memorandum, ''Decision Memorandum for the Preliminary Affirmative Determination in the Less-Than-Fair-Value Investigation of Aluminum Extrusions from the Socialist Republic of Vietnam,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the weighted-average amount by which normal value exceeds U.S. price, as indicated in the table above as follows: (1) for the producer/exporter combinations listed in the table above, the cash deposit rate is equal to the estimated weighted-average dumping margin listed for that combination in the table; (2) for all combinations of Vietnamese producers/exporters of merchandise under consideration that have not established eligibility for their own separate rates, the cash deposit rate will be equal to the estimated weighted-average dumping margin established for the Vietnam-wide entity; and (3) for all third-country exporters of merchandise under consideration not listed in the table above, the cash deposit rate is the cash deposit rate applicable to the Vietnamese producer/exporter combination or Vietnam-wide entity that supplied that third-country exporter.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose to parties to the proceeding the calculations and analysis performed in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register** in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the deadlines of scope comments. After the submission of scope comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this investigation.[9] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[10] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of

[9] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

[10] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings*, 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

contents listing each issue; and (2) a table of authorities.[11]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide, at the beginning of their briefs, a public, executive summary for each issue raised in their briefs.[12] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue.

Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[13]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.[14]

On April 17, 2024, pursuant to 19 CFR 351.210(e), East Asia Aluminum Co., Ltd requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[15] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this notice of preliminary determination in the **Federal Register**.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigations.

The types of products that meet the definition of subject merchandise include but

[11] *See* 19 CFR 351.309(c)(2) and (d)(2).

[12] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[13] *See APO and Service Final Rule.*

[14] *See* 19 CFR 351.210(e)(2).

[15] *See* East Asia's Letter, ''East Asia's Final Determination Extension Request,'' dated April 17, 2024.

are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigations are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of the order resulting from this investigation) are excluded from the scope of the investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigations.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as

designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m2 and no greater than 30 g/m2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of the antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000;

8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Aluminum Extrusions From Taiwan: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from Taiwan are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 01, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Hermes Pinilla, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3477.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation in the **Federal Register** on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation nuntil May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Taiwan. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export prices in accordance with section 772(a) of the Act. Constructed export prices have been calculated in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. Furthermore, pursuant to sections 776(a) and (b) of the Act, Commerce preliminarily relied upon facts otherwise available, with adverse inferences for Cheng Hsin Aluminum Corp. (Cheng Hsin), Chiao Tai Aluminum Industry (Chiao Tai), Formosa Shinn Yoan Industrial Co., Ltd. (Formosa Shinn), and Yuan Sheng Aluminium Mfg. Corp. (Yuan Sheng).[7] For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in a preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any

[6] *See* Memorandum, ''Antidumping Duty Investigations and Countervailing Duty Investigations of Aluminum Extrusions from People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Turkey, the United Arab Emirates, and the Socialist Republic of Vietnam: Preliminary Scope Decision Memorandum II,'' dated concurrently with this notice (Preliminary Scope Decision Memorandum II).

[7] *See* Memorandum, ''Affiliation and Collapsing Memorandum for Yuan Sheng Aluminium Mfg. Corp,'' dated concurrently with this memorandum (Collapsing Memorandum).

zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act. Where the rates for individually investigated companies are all zero or *de minimis,* or determined entirely using facts otherwise available, section 735(c)(5)(B) of the Act instructs Commerce to rely on ''any reasonable method to establish the estimated all-others rate for exporters and producers not individually investigated, including averaging the estimated weighted-average dumping margins determined for exporters and producers individually investigated.''

In this investigation, Commerce has preliminarily determined the dumping margin for Yuan Sheng under section 776 of the Act and has calculated an estimated weighted-average dumping margin for Sow Shin of 0.00 percent.

We received timely Q&V questionnaire responses from the following companies in addition to the mandatory respondents, Shin Hsin Aluminum Co., Ltd. (Shin Hsin), E8 Green Energy Technology Co., Ltd. (Green Energy), Fusheng Precision Co., Ltd. (Fusheng), and M&M Hardware Corporation (M&M Hardware).[8] Shin Hsin, Green Energy, Fusheng, and M&M Hardware: (1) were not selected as mandatory respondents; (2) responded to our Q&V questionnaire in a timely manner; [9] and (3) were not otherwise collapsed with a mandatory respondent. Accordingly, these companies are subject to the all-others rate.

As such, we are preliminarily applying to the non-selected respondents, Shing Hsin Green Energy, Fusheng, and M&M Hardware, the all-others rate of 33.93 percent, which is the simple average of the zero percent dumping margin we preliminarily calculated for Sow Shin and the dumping margin we preliminarily assigned to Yuan Sheng, determined entirely under section 776 of the Act.[10]

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Weighted-average dumping margin (percent)
Sow Shin Aluminum Co., Ltd.; Xiashin International Co., Ltd.[11]	0.73 (*de minimis*).
Yuan Sheng Aluminium Mfg. Corp.; Great Well Aluminium Industrial Ltd.; Ye Fong Aluminum Industrial Ltd.[12]	67.86.*
Chiao Tai Aluminum Industry	67.86.*
Formosa Shinn Yoan Industrial Co., Ltd	67.86.*
Cheng Hsin Aluminum Corp.	67.86.*
All Others	33.93.

* Rates based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce with direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Because the estimated weighted-average dumping margin for Sow Shin is *de minimis,* entries of shipments of subject merchandise from Sow Shin will not be subject to suspension of liquidation or cash deposit requirements. In such situations, Commerce applies the exclusion to the provisional measures to the producer/exporter combination that was examined in the investigation. Accordingly, Commerce is directing CBP not to suspend liquidation of entries of subject merchandise from Sow Shin. Entries of shipments of subject merchandise from Sow Shin in any other producer/exporter combination, or by third parties that sourced subject merchandise from the excluded producer/exporter combination, are subject to the provisional measures at the all-others rate.

Should the final estimated weighted-average dumping margin be zero or *de minimis* for Sow Shin identified above, entries of shipments of subject merchandise produced and exported by Sow Shin will be excluded from the potential antidumping duty order. Such exclusions are not applicable to merchandise exported to the United States by these respondents in any other producer/exporter combinations or by third parties that sourced subject merchandise from the excluded producer/exporter combinations. These suspension of liquidation measures will remain in effect until further notice.

Disclosure

Commerce intends to disclose the calculations and analysis performed in connection with this preliminary determination to interested parties within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

[12] Commerce preliminarily determines that Yuan Sheng, Great Well Aluminium Industrial Ltd, and Ye Fong Aluminium Industrial Ltd are a single entity. *See* Preliminary Decision Memorandum.

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the timeline of scope comments. After the submission of comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[13] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[14] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[15]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[16] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[17]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination may be accompanies by a request for extension of provisional measures from a four-month period to a period of not more than six months in duration.[18]

On April 17, 2024, pursuant to 19 CFR 351.210(e), the mandatory respondent (*i.e.,* Sow Shin) and the petitioner requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[19] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports of aluminum extrusions from Taiwan are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy

[16] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[17] *See APO and Service Final Rule.*

[18] *See* 19 CRF 351.210(e)(2).

[19] *See* Sow Shin's Letter, ''Request for Extension of Final Determination,'' dated April 17, 2024; *see also* Petitioner's Letter, ''Request for Postponement of Final Determinations,'' dated April 17, 2024.

with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigations.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigations are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of the order resulting from this investigation) are excluded from the scope of the investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigations.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with

other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/− 0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/− 0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/− 0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m2 and no greater than 30 g/m2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of the antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and

subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Aluminum Extrusions From the Republic of Korea: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from the Republic of Korea (Korea) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Brittany Bauer or Christopher Maciuba, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3860 or (202) 482–0413, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination in this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are aluminum extrusions from Korea. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memo II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation*

Notice. See the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export prices in accordance with section 772(a) of the Act. Normal value is calculated in accordance with section 773 of the Act. Furthermore, pursuant to sections 776(a) and (b) of the Act, Commerce preliminarily relied upon facts otherwise available, with adverse inferences, to assign a dumping margin to: Bowon Light Metal Co., Ltd; Changwon Precision Extrusions; Dong Young Industrial Co., Ltd; Han Yeong Aluminum Industrial Co., Ltd; Kyung Hee Aluminum Co., Ltd; Namsun Aluminium Co., Ltd; Nam Sung Aluminum Co., Ltd; and Sung Hoon Aluminium Co., Ltd.[7] For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(A)(ii) and 735(c)(5)(A) of the Act provide that, in the preliminary determination, Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually examined, excluding any rates that are zero, *de minimis,* or determined entirely under section 776 of the Act.

In this investigation, Commerce calculated an estimated weighted-average dumping margin that is above *de minimis* for one of the mandatory respondents, Shin Yang Metal Industries Co., Ltd (SMI). Commerce preliminarily determines that the other mandatory respondent, ALMAC Co., Ltd/ALMAC Korea Co., Ltd./AR Aluminum Co., Ltd. (collectively, ALMAC), did not make sales of subject merchandise at LTFV. Accordingly, Commerce is assigning SMI's dumping margin to all other producers and exporters not individually examined.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
ALMAC Co., Ltd/ALMAC Korea Co., Ltd./AR Aluminum Co., Ltd[8]	0.00
Shin Yang Metal Industrial Co., Ltd	2.42
Bowon Light Metal Co., Ltd*	43.56
Changwon Precision Extrusions*	43.56
Dong Young Industrial Co., Ltd*	43.56
Han Yeong Aluminum Industrial Co., Ltd*	43.56
Kyung Hee Aluminum Co., Ltd*	43.56
Namsun Aluminium Co., Ltd*	43.56
Nam Sung Aluminum Co., Ltd*	43.56
Sung Hoon Aluminium Co., Ltd*	43.56
All Others	2.42

* Rate based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination, except if that rate is zero or *de minimis,* no cash deposit will be required; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Because the estimated weighted-average dumping margin for ALMAC is zero, entries of shipments of subject merchandise produced and exported by this company will not be subject to suspension of liquidation or cash deposit requirements. In such situations, Commerce applies the exclusion from the provisional measures to the producer/exporter combination that was examined in the investigation. Accordingly, Commerce is directing CBP not to suspend liquidation of entries of subject merchandise produced and exported by ALMAC. Entries of shipments of subject merchandise from this company in any other producer/exporter combination, or by third parties that sourced subject merchandise from the excluded producer/exporter combination, are subject to the provisional measures at the all-others rate.

Should the final estimated weighted-average dumping margin be zero or *de minimis* for ALMAC, entries of shipments of subject merchandise produced and exported by ALMAC will be excluded from the potential antidumping duty order. Such exclusion is not applicable to merchandise exported to the United States by this respondent in any other producer/exporter combinations or by third parties that sourced subject merchandise from the excluded producer/exporter combination.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memo II for the deadlines for scope comments. After the submission of scope comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[9] Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than five days after the date for filing case briefs.[10] Interested parties who submit

[7] *See* Preliminary Decision Memorandum.

[8] Commerce preliminarily determines that ALMAC Co., Ltd, ALMAC Korea, and AR Aluminum are affiliates and that the companies should be treated as a single entity. *See* Preliminary Decision Memorandum.

[9] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements) (*APO and Service Final Rule*).

[10] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in*

case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[11]

As provided under 19 CFR 351.309©(2) and (d)(2), in prior proceedings, we have encouraged interested parties to provide a public executive summary of their briefs that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public executive summary for each issue raised in their briefs.[12] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue.

Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[13]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice in the **Federal Register**. Requests should contain (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.[14]

On April 19 and 22, 2024, pursuant to 19 CFR 351.210(e), mandatory respondents ALMAC and SMI, respectively, requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[15] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination in the **Federal Register**.

U.S. International Trade Commission Notification

In accordance with section 773(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary decision of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports of subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.2025(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished, anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for

Antidumping and Countervailing Duty Proceedings, 88 FR 67069, 67077 (September 29, 2023).

[11] *See* 19 CFR 351.309(c)(2) and (d)(2).

[12] We use the term "issue" here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[13] *See APO and Service Final Rule.*

[14] *See* 19 CFR 351.410(e)(2).

[15] *See* ALMAC's Letter, "Request for Extension of Final Determination," dated April 19, 2024; *see also* SMI's Letter, "Request for Extension of Final Determination," dated April 22, 2024.

assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigations.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigations are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A ''part or subassembly'' is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of the order resulting from this investigation) are excluded from the scope of the investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigations.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body

equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm² and less than 906 mm², (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m² and no greater than 30 g/m², and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of the antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100;

7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Aluminum Extrusions From the United Arab Emirates: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum extrusions from the United Arab Emirates are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2022, through September 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Jinny Ahn (OSE), or John K. Drury (Gulfex), AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0339, and (202) 482–0195, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation in the **Federal Register** on October 31, 2023.[1] On February 15, 2024, Commerce postponed the preliminary determination of this investigation until May 1, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The product covered by this investigation are aluminum extrusions from the United Arab Emirates. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] in the *Initiation Notice,* Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum II.[6] Commerce is preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export prices in accordance with section 772(a) of the Act. Normal value is calculated in accordance with section 773 of the Act. Further, pursuant to sections 776(a) and (b) of the Act, Commerce has preliminarily relied upon facts otherwise available with adverse inferences (AFA) for Al Buraq Trading & Enterprises, Co.; Al Hamad Industrial Co., LLC; Al Jaber Aluminium Extrusions, LLC; Aluminum Products Co.; Arabian Extrusions Factory; Emirates Extrusion Factory, LLC; Taweelah Aluminium Extrusion Co.; and White Aluminum Extrusions, LLC. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

[6] *See* Memorandum, "Antidumping Duty Investigations and Countervailing Duty Investigations of Aluminum Extrusions from People's Republic of China, Colombia, Ecuador, India, Indonesia, Italy, the Republic of Korea, Malaysia, Mexico, Taiwan, Thailand, the Republic of Türkiye, the United Arab Emirates, and the Socialist Republic of Vietnam: Preliminary Scope Decision Memorandum II," dated concurrently with this notice (Preliminary Scope Decision Memorandum II).

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, Commerce calculated estimated weighted-average dumping margins for Gulf Extrusions LLC (Gulfex) and OSE Industries LLC (OSE) that are not zero, *de minimis,* or based entirely on facts otherwise available. Consequently, pursuant to section 735(c)(5)(A) of the Act, we calculated the all-others rate using a weighted average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged values for the merchandise under consideration.[7]

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Weighted-average dumping margin (percent)
OSE Industries LLC	9.17
Gulf Extrusions LLC/Automotive Precision Technology (APT)—Sole Proprietorship LLC[8]	9.13
Al Buraq Trading & Enterprises, Co	*42.29
Al Hamad Industrial Co., LLC	*42.29
Al Jaber Aluminium Extrusions, LLC	*42.29
Aluminum Products Co	*42.29
Arabian Extrusions Factory	*42.29
Emirates Extrusion Factory, LLC	*42.29
Taweelah Aluminium Extrusion Co	*42.29
White Aluminum Extrusions, LLC	*42.29
All-Others Rate	9.15

* Rates based AFA.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce with direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exported is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed in connection with this preliminary determination to interested parties within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

For scope-related comments, please refer to the Preliminary Scope Decision Memorandum II for the timeline of scope comments. After the submission of comments, Commerce will set a schedule for the submission of case and rebuttal briefs limited to scope issues.

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.[9] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case

[7] With two respondents under examination, Commerce normally calculates: (A) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents; (B) a simple average of the estimated weighted-average dumping margins calculated for the examined respondents; and (C) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged U.S. sales values for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. *See, e.g., Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part,* 75 FR 53661, 53662 (September 1, 2010), and accompanying Issues and Decisions Memorandum at Comment 1. As complete publicly ranged sales data were available, Commerce based the all-others rate on the publicly ranged sales data of the mandatory respondents. For a complete analysis of the data, *see* the All-Others Rate Calculation Memorandum.

[8] As explained in the Preliminary Decision Memorandum, based on the record information, Commerce preliminarily determines that Gulf Extrusions LLC and a non-selected respondent, Automotive Precision Technology LLC, are affiliated within the meaning of section 771(33)(F) of the Act and should be treated as a single entity pursuant to 19 CFR 351.401(f) for this preliminary determination. *See* Preliminary Decision Memorandum; *see also* Memorandum, ''Preliminary Collapsing Memorandum for Gulf Extrusions LLC and Automotive Precision Technology—Sole Proprietorship LLC,'' dated concurrently with this notice.

[9] *See* 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

briefs.[10] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[11]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[12] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[13]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date of the hearing.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination in the **Federal Register** if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination may be accompanied by a request for extension of provisional measures from a four-month period to a period of not more than six months in duration.[14]

On April 17 and April 22, 2024, pursuant to 19 CFR 351.210(e), Gulfex the petitioners,[15] and OSE,[16] respectively, requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months. . In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination in the **Federal Register**, pursuant to section 735(a)(2) of the Act.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports of aluminum extrusions from the United Arab Emirates are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The merchandise subject to this investigation are aluminum extrusions, regardless of form, finishing, or fabrication, whether assembled with other parts or unassembled, whether coated, painted, anodized, or thermally improved. Aluminum extrusions are shapes and forms, produced by an extrusion process, made from aluminum alloys having metallic elements corresponding to the alloy series designations published by the Aluminum Association commencing with the numbers 1, 3, and 6 (or proprietary equivalents or other certifying body equivalents). Specifically, subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 1 contain not less than 99 percent aluminum by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 3 contain manganese as the major alloying element, with manganese accounting for not more than 3.0 percent of total materials by weight. Subject aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 6 contain magnesium and silicon as the major alloying elements, with magnesium accounting for at least 0.1 percent but not more than 2.0 percent of total materials by weight, and silicon accounting for at least 0.1 percent but not more than 3.0 percent of total materials by weight. The scope also includes merchandise made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) that have a magnesium content accounting for up to but not more than 2.0 percent of total materials by weight.

The country of origin of the aluminum extrusion is determined by where the metal is extruded (*i.e.,* pressed through a die).

Aluminum extrusions are produced and imported in a wide variety of shapes and forms, including, but not limited to, hollow profiles, other solid profiles, pipes, tubes, bars, and rods. Aluminum extrusions that are drawn subsequent to extrusion (drawn aluminum) are also included in the scope.

Subject aluminum extrusions are produced and imported with a variety of coatings and surface treatments, and types of fabrication. The types of coatings and treatments applied to aluminum extrusions include, but are not limited to, extrusions that are mill finished (*i.e.,* without any coating or further finishing), brushed, buffed, polished,

[10] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

[11] *See* 19 351.309(c)(2) and (d)(2)

[12] We use the term "issue" here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[13] *See APO and Service Final Rule.*

[14] *See* 19 CRF 351.210(e)(2).

[15] *See* Gulfex's Letter, "Gulf Request to Postpone Final Determination," dated April 17, 2024; *see also* Petitioners' Letter, "Request for Postponement of Final Determinations," dated April 17, 2024.

[16] *See* OSE's Letter, "Request to Extend Final Determination," dated April 22, 2024.

anodized (including bright dip), liquid painted, electroplated, chromate converted, powder coated, sublimated, wrapped, and/or bead blasted. Subject aluminum extrusions may also be fabricated, *i.e.,* prepared for assembly, or thermally improved. Such operations would include, but are not limited to, extrusions that are cut-to-length, machined, drilled, punched, notched, bent, stretched, stretch-formed, hydroformed, knurled, swedged, mitered, chamfered, threaded, spun, etched, and engraved. Performing such operations in third countries does not otherwise remove the merchandise from the scope of the investigation.

The types of products that meet the definition of subject merchandise include but are not limited to, the aluminum extrusion portions of vehicle roof rails and sun/moon roof framing, solar panel racking rails and framing, tradeshow display fixtures and framing, parts for tents or clear span structures, fence posts, drapery rails or rods, electrical conduits, door thresholds, flooring trim, electric vehicle battery trays, heat sinks, signage or advertising poles, telescoping poles, or cleaning system components.

Aluminum extrusions may be heat sinks, which are fabricated aluminum extrusions that dissipate heat away from a heat source and may serve other functions, such as structural functions. Heat sinks come in a variety of sizes and shapes, including but not limited to a flat electronic heat sink, which is a solid aluminum extrusion with at least one flat side used to mount electronic or mechanical devices; a heat sink that is a housing for electronic controls or motors; lighting heat sinks, which dissipate heat away from LED devices; and process and exchange heat sinks, which are tube extrusions with fins or plates used to hold radiator tubing. Heat sinks are included in the scope, regardless of whether the design and production of the heat sinks are organized around meeting specified thermal performance requirements and regardless of whether they have been tested to comply with such requirements. For purposes of the investigations on aluminum extrusions from the People's Republic of China, only heat sinks designed and produced around meeting specified thermal performance requirements and tested to comply with such requirements are included in the scope. Excluded from the scope of the investigations are large, multi-finned extruded aluminum heat sinks designed to dissipate heat, meeting the following criteria: (1) an aspect ratio (defined as the ratio of the area of a void in an extrusion to the size of the smallest gap opening at the entrance of that void and calculated by dividing the void area by the square of the gap opening) greater than 15 to 1; or (2) the circumscribing circle diameter (defined as the diameter of the smallest circle that will entirely enclose the extrusion's cross-sectional profile) rounded up to the next half inch, exceeds 10 inches, and the weight-per-foot (defined as the theoretical weight of the profile as extruded prior to any machining that may remove material and calculated by multiplying the area of the profile in square inches by 1.2) exceeds 3.50 pounds per foot.

Merchandise that is comprised solely of aluminum extrusions or aluminum extrusions and fasteners, whether assembled at the time of importation or unassembled, is covered by the scope in its entirety.

The scope also includes aluminum extrusions contained in merchandise that is a part or subassembly of a larger whole, whether or not the merchandise also contains a component other than aluminum extrusions that is beyond a fastener. Such merchandise may be either assembled or unassembled at the time of importation. A "part or subassembly" is defined as a unit designed to be attached to, or incorporated with, one or more other units or components into a larger completed product. Only the aluminum extrusion portion of the merchandise described in this paragraph, whether assembled or unassembled, is subject merchandise included in the scope and subject to duties. Examples of merchandise that is a part or subassembly of a larger whole include, but are not limited to, window parts or subassemblies; door unit parts or subassemblies; shower and bath parts or subassemblies; solar panel mounting systems; fenestration system parts or subassemblies, such as curtain wall and window wall units and parts or subassemblies of storefronts; furniture parts or subassemblies; appliance parts or subassemblies, such as fin evaporator coils and systems for refrigerators; railing or deck system parts or subassemblies; fence system parts or subassemblies; motor vehicle parts or subassemblies, such as bumpers for motor vehicles; trailer parts or subassemblies, such as side walls, flooring, and roofings; electric vehicle charging station parts or subassemblies; or signage or advertising system parts or subassemblies. Parts or subassemblies described by this paragraph that are subject to duties in their entirety pursuant to existing antidumping and countervailing duty orders (defined as those antidumping and countervailing duty orders that are in effect as of the date of publication of orders resulting from this investigation) are excluded from the scope of this investigation. Any part or subassembly that otherwise meets the requirements of this scope and that is not covered by other antidumping and/or countervailing duty orders remains subject to the scope of the investigation.

The scope excludes aluminum extrusions contained in fully and permanently assembled merchandise, if the assembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the assembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the assembled merchandise must be ready for use as imported, without undergoing after importation any processing, fabrication, finishing, or assembly or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling).

The scope also excludes aluminum extrusions contained in unassembled merchandise if the unassembled merchandise is not a part or subassembly of a larger whole. To be excluded under this paragraph, the unassembled merchandise must also contain a component other than aluminum extrusions, beyond fasteners. In addition, to be excluded under this paragraph, the unassembled merchandise must be a packaged combination of parts that is ready to be assembled as imported, without undergoing after importation any processing, fabrication, or finishing or the addition of parts or material (with the exception of consumable parts or material or interchangeable media or tooling). To be excluded under this paragraph, the unassembled merchandise must be sold and enter as a discrete kit on one Customs entry form.

Examples of such excluded assembled and unassembled merchandise include windows with glass, door units with door panel and glass, motor vehicles, trailers, furniture, appliances, and solar panels and solar modules.

The scope also excludes merchandise containing multiple subassemblies of a larger whole with non-extruded aluminum components beyond fasteners. A subassembly that meets the definition of subject merchandise, including any product expressly identified as subject merchandise in this scope, can only be excluded if it is fully and permanently assembled with at least one other different subassembly, and where (1) at least one of the subassemblies, if entered individually, would not itself be subject to the scope; (2) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the actual weight of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations); and (3) the aluminum extrusions within the merchandise collectively account for 50 percent or less of the number of pieces of the combined multiple subassemblies (without including any non-extruded aluminum fasteners in the calculations).

The scope also includes aluminum extrusions that have been further processed in a third country, including, but not limited to, the finishing and fabrication processes described above, assembly, whether with other aluminum extrusion components or with non-aluminum extrusion components, or any other processing that would not otherwise remove the merchandise from the scope if performed in the country of manufacture of the in-scope product. Third country processing; finishing; and/or fabrication, including those processes described in the scope, does not alter the country of origin of the subject aluminum extrusions.

The following aluminum extrusion products are excluded: aluminum extrusions made from an aluminum alloy with an Aluminum Association series designations commencing with the number 2 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 1.5 percent copper by weight; aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 5 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent magnesium by weight; and

aluminum extrusions made from an aluminum alloy with an Aluminum Association series designation commencing with the number 7 (or proprietary equivalents or other certifying body equivalents) and containing in excess of 2.0 percent zinc by weight.

The scope also excludes aluminum alloy sheet or plates produced by means other than the extrusion process, such as aluminum products produced by a method of continuous casting or rolling. Cast aluminum products are also excluded. The scope also excludes unwrought aluminum in any form.

The scope also excludes collapsible tubular containers composed of metallic elements corresponding to alloy code 1080A as designated by the Aluminum Association (not including proprietary equivalents or other certifying body equivalents) where the tubular container (excluding the nozzle) meets each of the following dimensional characteristics: (1) length of 37 millimeters (mm) or 62 mm; (2) outer diameter of 11.0 mm or 12.7 mm; and (3) wall thickness not exceeding 0.13 mm.

Also excluded from the scope are extruded drawn solid profiles made from an aluminum alloy with the Aluminum Association series designation commencing with the number 1, 3, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) solid cross sectional area greater than 62.4 mm^2 and less than 906 mm^2, (2) minimum electrical conductivity of 58% of the international annealed copper standard (IACS) or maximum resistivity of 2.97 μΩ/cm, (3) a uniformly applied nonelectrically conductive temperature-resistant coating co-extruded over characteristic (1) of either polyamide, cross-linked polyethylene, or silicone rubber material which meets the following standards: (a) Vicat A temperature threshold of >140 degrees Celsius, (b) flammability requirements of UL 94V–0, and (c) a minimum coating thickness of 0.10 mm and maximum coating thickness of 2.0 mm, with a maximum thickness tolerance of +/−0.20 mm, (4) characteristic 3 may or may not be encapsulated with a ''Precision Drawn Tubing,'' wall thicknesses less than 1.2 mm, which is mechanically fixed in place, and (5) packaged in straight lengths, bent or formed and/or attached to hardware.

Also excluded from the scope are extruded tubing and drawn over a ID plug and through a OD die made from an aluminum alloy with the Aluminum Association series designation commencing with the number 3, 5, or 6 (or proprietary equivalents or other certifying body equivalents), including variants on individual alloying elements not to circumvent the other Aluminum Association series designations, which meet each of the following characteristics: (1) an outside mean diameter no greater than 30 mm with a tolerance less than or equal to +/−0.10 mm, (2) uniform wall thickness no greater than 2.7 mm with wall tolerances less than or equal to +/−0.1 mm, (3) may be coated with materials, including zinc, such that the coating material weight is no less than 3 g/m2 and no greater than 30 g/m2, and (4) packaged in continuous coils, straight lengths, bent or formed.

The scope also excludes fully and permanently assembled glass refrigerator shelves with decorative aluminum trim meeting the following characteristics: (1) aluminum trim meeting Aluminum Association series 6063–T5 designation that is anodized; (2) aluminum trim length of not more than 800 mm, and (3) aluminum trim width of not more than 40 mm. Such fully and permanently assembled glass refrigerator shelves include other components in addition to the aluminum trim, including, but not limited to, glass, steel, and plastic. Only fully and permanently assembled glass refrigerator shelves that require no further processing, fabrication, finishing, assembly, or the addition of any parts or material are excluded. Imports of glass refrigerator shelves are classified under HTSUS 8418.99.8050, which is being included for convenience.

Also excluded from the scope of this investigation is certain rectangular wire, imported in bulk rolls or precut strips and produced from continuously cast rolled aluminum wire rod, which is subsequently extruded to dimension to form rectangular wire with or without rounded edges. The product is made from aluminum alloy grade 1070 or 1370 (not including proprietary equivalents or other certifying body equivalents), with no recycled metal content allowed. The dimensions of the wire are 2.95 mm to 6.05 mm in width, and 0.65 mm to 1.25 mm in thickness. Imports of rectangular wire are provided for under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7605.19.0000, 7604.10.5000, or 7616.99.5190.

Also excluded from the scope of the antidumping and countervailing duty investigations on aluminum extrusions from the People's Republic of China are all products covered by the scope of the antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China. *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011); and *Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, Aluminum Extrusions from the People's Republic of China). Solely for the investigations on aluminum extrusions from the People's Republic of China, the following is an exhaustive list of products where the aluminum extrusion portions thereof meet the definition of subject merchandise. The language contained in the rest of the scope applies to this exhaustive list of products. Merchandise that is not included in the following list that meets the definition of subject merchandise in the 2011 antidumping and countervailing duty orders on Aluminum Extrusions from the People's Republic of China remains subject to the earlier orders. No other section of this scope language that provides examples of subject merchandise is exhaustive.

The aluminum extrusion portions of the following products are included in the scope of the investigations on aluminum extrusions from the People's Republic of China, whether assembled or unassembled: heat sinks as described above; cleaning system components like mops and poles; banner stands/back walls; fabric wall systems; drapery rails; side mount valve controls; water heater anodes; solar panel mounting systems; automotive heating and cooling system components; assembled motor cases with stators; louver assemblies; event décor; window wall units and parts; trade booths; micro channel heat exchangers; telescoping poles, pole handles, and pole attachments; flagpoles; wind sign frames; foreline hose assembly; electronics enclosures; parts and subassemblies for storefronts, including portal sets; light poles; air duct registers; outdoor sporting goods parts and subassemblies; glass refrigerator shelves; aluminum ramps; handicap ramp system parts and subassemblies; frames and parts for tents and clear span structures; parts and subassemblies for screen enclosures, patios, and sunrooms; parts and subassemblies for walkways and walkway covers; aluminum extrusions for Light Emitting Diode (LED) lights; parts and subassemblies for screen, storm, and patio doors; pontoon boat parts and subassemblies, including rub rails, flooring, decking, transom structures, canopy systems, seating; boat hulls, framing, ladders, and transom structures; parts and subassemblies for docks, piers, boat lifts and mounting; recreational and boat trailer parts and subassemblies, including subframes, crossmembers, and gates; solar tracker assemblies with gears; garage door framing systems; door threshold and sill assemblies; highway and bridge signs; bridge, street, and highway rails; scaffolding, including planks and struts; railing and support systems; parts and subassemblies for exercise equipment; weatherstripping; door bottom and sweeps; door seals; floor transitions and trims; parts and subassemblies for modular walls and office furniture; truck trailer parts and subassemblies; boat cover poles, outrigger poles, and rod holders; bleachers and benches; parts and subassemblies for elevators, lifts, and dumbwaiters; parts and subassemblies for mirror and framing systems; window treatments; parts and subassemblies for air foils and fans; bus and Recreational Vehicle (RV) window frames; sliding door rails; dock ladders; parts and subassemblies for RV frames and trailers; awning, canopy, and sunshade structures and their parts and subassemblies; marine motor mounts; linear lighting housings; and cluster mailbox systems.

Imports of the subject merchandise are primarily provided for under the following categories of the HTSUS: 7604.10.1000; 7604.10.3000; 7604.10.5000; 7604.21.0010; 7604.21.0090; 7604.29.1010; 7604.29.1090; 7604.29.3060; 7604.29.3090; 7604.29.5050; 7604.29.5090; 7608.10.0030; 7608.10.0090; 7608.20.0030; 7608.20.0090; 7609.00.0000; 7610.10.0010; 7610.10.0020; 7610.10.0030; 7610.90.0040; and 7610.90.0080.

Imports of the subject merchandise, including subject merchandise entered as parts of other products, may also be classifiable under the following additional HTSUS categories, as well as other HTSUS

categories: 6603.90.8100; 7606.12.3091; 7606.12.3096; 7615.10.2015; 7615.10.2025; 7615.10.3015; 7615.10.3025; 7615.10.5020; 7615.10.5040; 7615.10.7125; 7615.10.7130; 7615.10.7155; 7615.10.7180; 7615.10.9100; 7615.20.0000; 7616.10.9090; 7616.99.1000; 7616.99.5130; 7616.99.5140; 7616.99.5190; 8302.10.3000; 8302.10.6030; 8302.10.6060; 8302.10.6090; 8302.20.0000; 8302.30.3010; 8302.30.3060; 8302.41.3000; 8302.41.6015; 8302.41.6045; 8302.41.6050; 8302.41.6080; 8302.42.3010; 8302.42.3015; 8302.42.3065; 8302.49.6035; 8302.49.6045; 8302.49.6055; 8302.49.6085; 8302.50.0000; 8302.60.3000; 8302.60.9000; 8305.10.0050; 8306.30.0000; 8414.59.6590; 8415.90.8045; 8418.99.8005; 8418.99.8050; 8418.99.8060; 8419.50.5000; 8419.90.1000; 8422.90.0640; 8424.90.9080; 8473.30.2000; 8473.30.5100; 8479.89.9599; 8479.90.8500; 8479.90.9596; 8481.90.9060; 8481.90.9085; 8486.90.0000; 8487.90.0080; 8503.00.9520; 8508.70.0000; 8513.90.2000; 8515.90.2000; 8516.90.5000; 8516.90.8050; 8517.71.0000; 8517.79.0000; 8529.90.7300; 8529.90.9760; 8536.90.8585; 8538.10.0000; 8541.90.0000; 8543.90.8885; 8547.90.0020; 8547.90.0030; 8547.90.0040; 8708.10.3050; 8708.29.5160; 8708.80.6590; 8708.99.6890; 8807.30.0060; 9031.90.9195; 9401.99.9081; 9403.99.1040; 9403.99.9010; 9403.99.9015; 9403.99.9020; 9403.99.9040; 9403.99.9045; 9405.99.4020; 9506.11.4080; 9506.51.4000; 9506.51.6000; 9506.59.4040; 9506.70.2090; 9506.91.0010; 9506.91.0020; 9506.91.0030; 9506.99.0510; 9506.99.0520; 9506.99.0530; 9506.99.1500; 9506.99.2000; 9506.99.2580; 9506.99.2800; 9506.99.5500; 9506.99.6080; 9507.30.2000; 9507.30.4000; 9507.30.6000; 9507.30.8000; 9507.90.6000; and 9603.90.8050.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Common Alloy Aluminum Sheet From the People's Republic of China: Final Results of the First Expedited Sunset Review of the Countervailing Duty Order on Common Alloy Aluminum Sheet From the People's Republic of China

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that revocation of the countervailing duty (CVD) order on common alloy aluminum sheet (aluminum sheet) from the People's Republic of China (China) would likely lead to the continuation or recurrence of countervailable subsidies at the levels indicated in the ''Final Results of Sunset Review'' section of this notice.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Theodora Mattei, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4834.

SUPPLEMENTARY INFORMATION:

Background

On February 6, 2019, Commerce published in the **Federal Register** the CVD *Order.*[1] On January 2, 2024, Commerce published in the **Federal Register** the notice of initiation of the first five-year sunset review of the *Order* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).[2] On January 9, 2024, we received a timely notice of intent to participate in this sunset review from the Aluminum Association Common Alloy Aluminum Sheet Trade Enforcement Working Group and its individual members (Domestic Industry) within the deadline specified in 19 CFR 351.218(d)(1)(i).[3] The Domestic Industry claimed interested party status pursuant to 19 CFR 351.102(b)(29)(viii) and section 771(9)(E) of the Act.

On February 1, 2024, Commerce received an adequate substantive response from the Domestic Industry within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i).[4] Commerce received no substantive responses from any other interested parties, including the Government of China, nor was a hearing requested. On February 22, 2024, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from other interested parties.[5] As a result, in accordance with section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited *i.e.,* 120-day, sunset review of the Order.

Scope of the Order

The product covered by the scope of the *Order* is common alloy aluminum sheet from China. A complete description of the scope of the *Order* is contained in the Issues and Decision Memorandum.[6]

Analysis of Comments Received

A complete discussion of all issues raised in this sunset review, including the likelihood of the continuation or recurrence of subsidization in the event of revocation of the *Order* and the countervailable subsidy rates likely to prevail if the *Order* were to be revoked, is provided in the Issues and Decision Memorandum. A list of the topics discussed in the Issues and Decision Memorandum is included in the Appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), which is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Final Results of Sunset Review

Pursuant to sections 751(c)(1) and 752(b) of the Act, Commerce determines that revocation of the *Order* would likely lead to the continuation or recurrence of countervailable subsidies at the following rates:

[1] *See Common Alloy Aluminum Sheet from the People's Republic of China: Countervailing Duty Order,* 84 FR 2157 (February 6, 2019) (*Order*).

[2] *See Initiation of Five-Year (Sunset) Reviews,* 89 FR 66 (January 2, 2024).

[3] *See* Domestic Industry's Letter, ''Notice of Intent to Participate,'' dated January 9, 2024.

Company	Subsidy rate (percent *ad valorem*)
Yong Jie New Material Co., Ltd	57.00
Henan Mingtai Industrial Co., Ltd./Zhengzhou Mingtai Industry Co	48.46
All Others	52.73

Administrative Protective Order

This notice serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results of expedited sunset review and this notice in accordance with sections 751(c), 752(b), and 777(i)(1) of the Act, and 19 CFR 351.218.

Dated: May 1, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Common Alloy Aluminum Sheet From the People's Republic of China: Final Results of the Expedited First Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of this expedited sunset review, the U.S. Department of Commerce (Commerce) finds that revocation of the antidumping (AD) duty order on certain common alloy aluminum sheet (CAAS) from the People's Republic of China (China) would be likely to lead to continuation or recurrence of dumping at the levels indicated in the ''Final Results of Sunset Review'' section of this notice.

DATES: Applicable May 7, 2024.

FOR FURTHER INFORMATION CONTACT: Erin Kearney, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; (202) 482–0167.

SUPPLEMENTARY INFORMATION:

Background

On January 2, 2024, Commerce published the notice of initiation of the first sunset review of the *Order,*[1] pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).[2] On January 9, 2024, Commerce received a notice of intent to participate in the sunset review from the Aluminum Association Common Alloy Aluminum Sheet Trade Enforcement Working Group and its individual members (collectively, the domestic interested parties),[3] within the deadline specified in 19 CFR 351.218(d)(1)(i).[4] The domestic interested parties claimed interested party status under section 771(9)(E) of the Act as a trade or business association, a majority of whose members manufacture, produce, or wholesale the domestic like product in the United States. The domestic interested parties stated that its members are interested parties under section 771(9)(C) of the Act as U.S. manufacturers, producers, or wholesalers of the domestic like product.[5]

On February 1, 2024, the domestic interested parties filed an adequate substantive response within the deadline specified in 19 CFR 351.218(d)(3)(i).[6] Commerce did not receive a substantive response from any respondent interested party. As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited (120-day) sunset review of the *Order.*

Scope of the Order

The merchandise covered by this *Order* is common alloy aluminum sheet from China. For a complete description of the scope of the *Order, see* the Issues and Decision Memorandum.[7]

Analysis of Comments Received

A complete discussion of all issues raised in this sunset review, including the likelihood of continuation or recurrence of dumping in the event of revocation of the *Order* and the magnitude of the margin of dumping likely to prevail if the *Order* was to be revoked, is provided in the Issues and Decision Memorandum.[8] A list of the topics discussed in the Issues and Decision Memorandum is attached as an appendix to this notice. The Issues and

[1] *See Common Alloy Aluminum Sheet from the People's Republic of China: Antidumping Duty Order,* 84 FR 2813 (February 8, 2019) (*Order).*

[2] *See Initiation of Five-Year (Sunset) Reviews,* 89 FR 66 (January 2, 2023) (*Initiation Notice*).

[3] The individual members of Aluminum Association Common Alloy Aluminum Sheet Trade Enforcement Working Group are: Arconic Corporation; Commonwealth Rolled Products, Inc.; Constellium Rolled Products Ravenswood, LLC; Jupiter Aluminum Corporation; JW Aluminum Company; Novelis Corporation; and Texarkana Aluminum, Inc.

[4] *See* Domestic Interested Parties' Letter, ''Domestic Interested Parties' Notice of Intent To Participate,'' dated January 9, 2024.

[5] *Id.*

[6] *See* Domestic Interested Parties' Letter, ''Domestic Interested Parties' Substantive Response,'' dated February 1, 2024 (Substantive Response).

[7] *See* Memorandum, ''Decision Memorandum for the Final Results of the Expedited First Sunset Review of the Antidumping Duty Order on Common Alloy Aluminum Sheet from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[8] *Id.*

Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Services System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Final Results of Sunset Review

Pursuant to sections 751(c)(1) and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the *Order* would be likely to lead to the continuation or recurrence of dumping, and that the magnitude of the dumping margin likely to prevail would be weighted-average margins of up to 59.72 percent.

Notification Regarding Administrative Protective Order

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these expedited final results of sunset review and notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act.

Dated: April 30, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

[Docket Number: 240430–0122]

Request for Comments on Draft Documents Responsive to NIST's Assignments Under Executive Order 14110 (Sections 4.1, 4.5, and 11)

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The National Institute of Standards and Technology (NIST) requests comments on four draft documents responsive to NIST assignment under Executive Order 14110 on Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence (AI) issued on October 30, 2023 (E.O. 14110): NIST AI 600–1, Artificial Intelligence Risk Management Framework: Generative Artificial Intelligence Profile; NIST SP 800–218A, Secure Software Development Practices for Generative AI and Dual-Use Foundation Models; NIST AI 100–5, A Plan for Global Engagement on AI Standards; and NIST AI 100–4, Reducing Risks Posed by Synthetic Content: An Overview of Technical Approaches to Digital Content Transparency.

DATES: Comments containing information in response to this notice must be received on or before June 2, 2024 at 11:59 p.m. Eastern Time. Submissions received after that date may not be considered.

ADDRESSES: The drafts of NIST AI 600–1, NIST AI 100–5, and NIST AI 100–4 are available for review and comment on the NIST Artificial Intelligence Resource Center website at *https://airc.nist.gov* and at *www.regulations.gov* under docket number NIST–2024–0001. The draft of NIST SP 800–218A is available for review and comment on the NIST Computer Security Resource Center *https://csrc.nist.gov* and at *www.regulations.gov* under docket number NIS–2024–0001.

Comments may be submitted by either of the following methods:

By email:

- Comments on NIST AI 600–1 may be sent electronically to *NIST-AI-600-1@nist.gov* with ''NIST AI 600–1, Artificial Intelligence Risk Management Framework: Generative Artificial Intelligence Profile'' in the subject line. Comments on NIST AI 100–5 may be sent electronically to *NIST-AI-100-5@nist.gov* with ''NIST AI 100–5, A Plan for Global Engagement on AI Standards'' in the subject line. Comments on NIST SP 800–218A may be sent electronically to *SSDF@nist.gov* with ''NIST SP 800–218A, Secure Software Development Practices for Generative AI and Dual-Use Foundation Models'' in the subject line. Comments on NIST AI 100–4 may be sent electronically to *NIST-AI-100-4@nist.gov* with ''NIST AI 100–4, Reducing Risks Posed by Synthetic Content: An Overview of Technical Approaches to Digital Content Transparency''. Electronic submissions may be sent as an attachment in any of the following unlocked formats: HTML; ASCII; Word; RTF; or PDF.

Submitted via *www.regulations.gov:*

- To submit electronic public comments via the Federal eRulemaking Portal.

1. Go to *www.regulations.gov* and enter NIST–2024–0001 in the search field,
2. Click the ''Comment Now!'' icon, complete the required fields, including the relevant NIST document number and title in the subject field, and
3. Enter or attach your comments.

- Written comments may also be submitted by mail to Information Technology Laboratory, ATTN: AI E.O. Document Comments, National Institute of Standards and Technology, 100 Bureau Drive, Mail Stop 8900, Gaithersburg, MD 20899–8900.

Comments containing references, studies, research, and other empirical data that are not widely published should include copies of the referenced materials. All submissions, including attachments and other supporting materials, will become part of the public record and subject to public disclosure.

NIST will not accept comments accompanied by a request that part or all of the material be treated confidentially because of its business proprietary nature or for any other reason. Therefore, do not submit confidential business information or otherwise sensitive, protected, or personal information, such as account numbers, Social Security numbers, or names of other individuals.

All relevant comments received by the deadline will be posted at *https://www.regulations.gov* under docket number NIST–2024–0001 and at *https://www.nist.gov/artificial-intelligence/executive-order-safe-secure-and-trustworthy-artificial-intelligence.* Attachments and other supporting materials may become part of the public record and may be subject to public disclosure.

FOR FURTHER INFORMATION CONTACT: For questions about this request for comments contact: *ai-inquiries@nist.gov*

or Rachel Trello, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8900, Gaithersburg, MD 20899, (202) 570–3978. Direct media inquiries to NIST's Office of Public Affairs at (301) 975–2762. Users of telecommunication devices for the deaf, or a text telephone, may call the Federal Relay Service toll free at 1–800–877–8339. Accessible Format: NIST will make the request for comments available in alternate formats, such as Braille or large print, upon request by persons with disabilities.

SUPPLEMENTARY INFORMATION: NIST requests comments on four draft NIST documents that have been developed in response to NIST assignments under Executive Order 14110 on Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence (AI) (E.O. 14110), issued on October 30, 2023 (88 FR 75191). The four draft documents are: NIST AI 600–1, Artificial Intelligence Risk Management Framework: Generative Artificial Intelligence Profile; NIST SP 800–218A, Secure Software Development Practices for Generative AI and Dual-Use Foundation Models; NIST AI 100–5, A Plan for Global Engagement on AI Standards; and NIST AI 100–4, Reducing Risks Posed by Synthetic Content: An Overview of Technical Approaches to Digital Content Transparency.

The drafts of NIST AI 600–1, NIST AI 100–5, and NIST AI 100–4 were informed by responses to a Request for Information (RFI) that was published in the **Federal Register** on December 21, 2023 (88 FR 88368), in which NIST requested information to assist in carrying out several of its responsibilities under E.O. 14110. The comments and information received in response to that RFI are available at *https://www.nist.gov/artificial-intelligence/executive-order-safe-secure-and-trustworthy-artificial-intelligence/comments* and at *https://www.regulations.gov* under docket number NIST–2023–0009. The draft of NIST SP 800–218A was informed by a virtual workshop that was held on January 17, 2024 (*https://www.nist.gov/news-events/events/nist-secure-software-development-framework-generative-ai-and-dual-use-foundation*).

The drafts of NIST AI 600–1, NIST AI 100–5, and NIST AI 100–4 are available for review and comment on the NIST Artificial Intelligence Resource Center website at *https://airc.nist.gov* and at *www.regulations.gov.* The draft of NIST SP 800–218A is available for review and comment on the NIST Computer Security Resource Center *https://csrc.nist.gov* and at *www.regulations.gov.*

Authority: Executive Order 14110 of Oct. 30, 2023; 15 U.S.C. 272.

Alicia Chambers,

NIST Executive Secretariat.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Request for Nominations for Members To Serve on National Institute of Standards and Technology and National Technical Information Service Federal Advisory Committees

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice.

SUMMARY: The National Institute of Standards and Technology (NIST or Institute) and the National Technical Information Service (NTIS) invites and requests nomination of individuals for appointment to eleven existing Federal Advisory Committees (Committees): Advisory Committee on Earthquake Hazards Reduction; Board of Overseers of the Malcolm Baldrige National Quality Award; Industrial Advisory Committee; Information Security and Privacy Advisory Board; Internet of Things Advisory Board; Judges Panel of the Malcolm Baldrige National Quality Award; Manufacturing Extension Partnership Advisory Board; National Artificial Intelligence Advisory Committee; National Construction Safety Team Advisory Committee; National Technical Information Service Advisory Board; and Visiting Committee on Advanced Technology. NIST and NTIS will consider nominations received in response to this notice for appointment to the Committees, in addition to nominations already received. Registered Federal lobbyists may not serve on NIST or NTIS Federal Advisory Committees in an individual capacity.

DATES: Nominations for all Committees will be accepted on an ongoing basis and will be considered as and when vacancies arise.

ADDRESSES: See below.

SUPPLEMENTARY INFORMATION:

Advisory Committee on Earthquake Hazards Reduction (ACEHR)

Address: Please submit nominations to Tina Faecke via email at *tina.faecke@nist.gov.* Nominations may also be mailed to Tina Faecke, Designated Federal Officer, National Earthquake Hazards Reduction Program, NIST, 100 Bureau Drive, Mail Stop 8615, Gaithersburg, MD 20899–8615. Additional information regarding the ACEHR, including its charter and current members may be found on its electronic home page at *https://nehrp.gov/committees/index.htm.*

Contact Information: John ''Jay'' Harris, Acting Director, National Earthquake Hazards Reduction Program, NIST, 100 Bureau Drive, Mail Stop 8615, Gaithersburg, MD 20899–8615, telephone 301–975–6538 or via email at *john.harris@nist.gov.*

Committee Information

The Advisory Committee on Earthquake Hazards Reduction (Committee) was established in accordance with the National Earthquake Hazards Reduction Program Reauthorization Act of 2004, Public Law 108–360 (42 U.S.C. 7704(a)(5)) and the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

Objectives and Duties

1. The Committee will act in the public interest to assess trends and developments in the science and engineering of earthquake hazards reduction; effectiveness of the National Earthquake Hazards Reduction Program (Program) in carrying out the activities under section (a)(2) of the Earthquake Hazards Reduction Act of 1977, as amended (42 U.S.C. 7704(a)(2)); the need to revise the Program; and the management, coordination, implementation, and activities of the Program.

2. The Committee will function solely as an advisory body, in accordance with the provisions of the Federal Advisory Committee Act.

3. The Committee shall report to the Director of NIST.

4. The Committee shall report to the Director of NIST at least once every two years on its findings of the assessments and its recommendations for ways to improve the Program. In developing recommendations, the Committee shall consider the recommendations of the United States Geological Survey (USGS) Scientific Earthquake Studies Advisory Committee (SESAC).

Membership

1. The Committee shall consist of not fewer than 11, nor more than 17 members. Members shall reflect the wide diversity of technical disciplines, competencies, and communities involved in earthquake hazards reduction. Members shall be selected on the basis of established records of distinguished service in their professional community and their knowledge of issues affecting the National Earthquake Hazards Reduction Program.

2. The Director of NIST shall appoint the members of the Committee. Members shall be selected on a clear, standardized basis, in accordance with applicable Department of Commerce guidance.

3. The term of office of each member of the Committee shall be three years, except that vacancy appointments shall be for the remainder of the unexpired term of the vacancy and that members shall have staggered terms such that the Committee will have approximately one-third new or reappointed members each year.

Miscellaneous

1. Members of the Committee shall not be compensated for their services, but may, upon request, be allowed travel and per diem expenses in accordance with 5 U.S.C. 5701 *et seq.,* while attending meetings of the Committee or subcommittees thereof, or while otherwise performing duties at the request of the Chairperson, while away from their homes or regular places of business.

2. Members of the Committee shall serve as Special Government Employees (SGEs) and will be subject to the ethics standards applicable to SGEs and are required to file an annual Executive Branch Confidential Financial Disclosure Report.

3. The Committee members shall meet face-to-face at least once per year. Additional meetings may be called whenever requested by the NIST Director; such meetings may be in the form of telephone conference calls and/or videoconferences.

4. Committee meetings are open to the public.

Nomination Information

1. Members will be drawn from industry and other communities having an interest in the Program, such as, but not limited to, research and academic institutions, industry standards development organizations, state and local government, and financial communities, who are qualified to provide advice on earthquake hazards reduction and represent all related scientific, architectural, and engineering disciplines.

2. Any person who has completed two consecutive full terms of service on the Committee shall be ineligible for appointment for a third term during the two-year period following the expiration of the second term.

3. Nominees should have established records of distinguished service. The field of expertise that the candidate represents should be specified in the nomination letter. A summary of the candidate's qualifications should be included with the nomination, including (where applicable) current or former service on federal advisory boards and Federal employment.

4. The Department of Commerce is committed to equal opportunity in the workplace and seeks a broad based and diverse Committee membership.

Board of Overseers of the Malcolm Baldrige National Quality Award

Address: Please submit nominations to Robert Fangmeyer, Director, Baldrige Performance Excellence Program, NIST, 100 Bureau Drive, Mail Stop 1020, Gaithersburg, MD 20899–1020. Nominations may also be submitted via email to *Robert.Fangmeyer@nist.gov.* Additional information regarding the Committee, including its charter, current membership list, and executive summary, may be found at *http://www.nist.gov/baldrige/community/overseers.cfm.*

Contact Information: Robyn Decker, Designated Federal Officer, Baldrige Performance Excellence Program, NIST, 100 Bureau Drive, Mail Stop 1020, Gaithersburg, MD 20899–1020; telephone 301–975–2361 or via email at *Robyn.Decker@nist.gov.*

Committee Information

The Board of Overseers of the Malcolm Baldrige National Quality Award (Board) was established in accordance with 15 U.S.C. 3711a(d)(2)(B), pursuant the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

Objectives and Duties

1. The Board shall review the work of the private sector contractor(s), which assists the Director of NIST in administering the Malcolm Baldrige National Quality Award (Award). The Board will make such suggestions for the improvement of the Award process as it deems necessary.

2. The Board shall make an annual report on the results of Award activities to the Director of NIST, along with its recommendations for the improvement of the Award process.

3. The Board will function solely as an advisory committee under the

Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

4. The Board will report to the Director of NIST.

Membership

1. The Board will consist of at least five and approximately 12 members selected on a clear, standardized basis, in accordance with applicable Department of Commerce guidance, and for their preeminence in the field of organizational performance excellence. There will be a balanced representation from U.S. service, manufacturing, nonprofit, education, and health care industries. The Board will include members familiar with the quality, performance improvement operations, and competitiveness issues of manufacturing companies, service companies, nonprofits, health care providers, and educational institutions.

2. Board members will be appointed by the Secretary of Commerce for three-year terms and will serve at the discretion of the Secretary. All terms will commence on March 1 and end on the last day of February of the appropriate years.

Miscellaneous

1. Members of the Board shall serve without compensation, but may, upon request, be reimbursed travel expenses, including per diem, as authorized by 5 U.S.C. 5701 *et seq.*

2. The Board will meet at least annually, but usually two times a year. Additional meetings may be called as deemed necessary by the NIST Director.

3. Board meetings are open to the public. Board members do not have access to classified or proprietary information in connection with their Board duties.

Nomination Information

1. Nominations are sought from the private and public sector as described above.

2. Nominees should have established records of distinguished service and shall be familiar with the quality improvement operations and competitiveness issues of manufacturing companies, service companies, educational institutions, health care providers, and nonprofit organizations. The relevant expertise of the candidate should be specified in the nomination letter. A summary of the candidate's qualifications should be included with the nomination, including (where applicable) current or former service on Federal advisory boards and Federal employment. Besides participation at meetings, it is desired that members be able to devote the equivalent of seven days between meetings to either developing or researching topics of potential interest, and so forth, in furtherance of their Board duties.

3. The Department of Commerce is committed to equal opportunity in the workplace and seeks a broad-based and diverse Board membership.

Industrial Advisory Committee

Address: Please submit nominations to Benjamin Davis, Designated Federal Officer, National Institute of Standards and Technology, 100 Bureau Drive, MS 8615, Gaithersburg, MD 20899. Nominations may also be submitted via email to *IACNOM@chips.gov.* Additional information regarding the Committee, including its charter, current membership list, and executive summary, may be found at *https://www.nist.gov/chips/industrial-advisory-committee.*

Contact Information: Benjamin Davis, Designated Federal Officer, National Institute of Standards and Technology, 100 Bureau Drive, MS 8615, Gaithersburg, MD 20899. Nominations may also be submitted via email to *IACNOM@Chips.gov.*

Committee Information

The Secretary of Commerce (Secretary), in consultation with the Secretary of Defense, the Secretary of Energy, and the Secretary of Homeland Security, established the Industrial Advisory Committee (the Committee) in accordance with the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.,* and the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (Act), Public Law 116–283, section 9906(b). The Committee shall assess and provide guidance to the Secretary, through the National Institute for Standards and Technology (NIST), on matters relating to microelectronics research, development, manufacturing, and policy.

Objectives and Duties

1. The Committee shall act in the public interest to provide advice to the Secretary of Commerce through the National Institute of Standards and Technology (NIST) on matters relating to microelectronics research, development, manufacturing, and policy.

2. The Committee will function solely as an advisory body, in accordance with the provisions of FACA. The Committee shall assess and provide guidance to the Secretary of Commerce, through NIST, on—

a. science and technology needs of the nation's domestic microelectronics industry;

b. the extent to which the strategy developed under section 9906(a)(3) of the Act is helping maintain United States leadership in microelectronics manufacturing;

c. assessment of the research and development programs and activities authorized under section 9906 of the Act; and

d. opportunities for new public-private partnerships to advance microelectronics research, development, and domestic manufacturing.

The Committee shall not participate in selecting recipients of Federal financial assistance.

Membership

Members of the Committee shall be appointed by the Secretary of Commerce. The Committee shall be composed of not fewer than 12 members who are qualified to provide advice to the United States Government on matters relating to microelectronics research, development, manufacturing, and policy. The membership shall be fairly balanced among representatives of the semiconductor industry, representatives of Federal laboratories and academia, and other members. Members of the Committee shall serve as representative members or as regular government employee (RGE) members.

Miscellaneous

1. The Committee members serve three-year terms and may serve two consecutive terms at the discretion of the Secretary, except that vacancy appointments shall be for the remainder of the unexpired term of the vacancy and that members shall have staggered terms such that the Committee will have approximately one-third new or reappointed members each year. Members who are not able to fulfill the duties and responsibilities of the Committee will have their membership terminated. A member who has served two consecutive full terms is ineligible to serve a third term for a period of one year following the expiration of the second term. Vacancies are filled as soon as highly qualified candidates in needed areas are identified and available to serve.

2. The Secretary of Commerce shall appoint the Committee Chair and Vice-Chair from among the Committee membership. The tenures of the Chair and Vice-Chair shall be two years and can be modified at the discretion of the Secretary. The Vice-Chair shall perform the duties of the Chair in his or her absence. In case a vacancy occurs in the position of the Chair or Vice-Chair, the Secretary shall select a member to fill such a vacancy; the Vice-Chair will

succeed the Chair in the interim until the Secretary's appointment of a member to fill the Chair's vacancy.

3. Committee members will be reimbursed for travel and per diem as it pertains to official business of the Committee in accordance with 5 U.S.C. 5701 *et seq.* Committee members will serve without compensation, except that Federal Government employees who are members of the Committee shall remain covered by their compensation system pursuant to 41 CFR 102–3.130(h).

4. Members shall not reference or otherwise utilize their membership on the Committee in connection with public statements made in their personal capacities without a disclaimer that the views expressed are their own and do not represent the views of the Committee, NIST, or the Department of Commerce.

5. NIST, when necessary and consistent with the Committee's mission and Departmental policies and procedures, may establish subcommittees, task forces, and working groups, drawn in whole or in part from the Committee, pursuant to the provisions of FACA, the FACA implementing regulations, and applicable Departmental guidance. The Department of Commerce requires that each subcommittee include at least one member of the Committee. Subcommittees must report back to the Committee and must not provide advice or work products directly to NIST or the Secretary, and any recommendations based on their work will be deliberated and adopted by the Committee prior to dissemination.

Nomination Information

NIST uses a nomination process to identify candidates for the Committee. Nominations are requested through annual announcements in the **Federal Register** and through solicitations to NIST, the Department of Commerce, the Department of Defense, the Department of Energy, the Department of Homeland Security, the National Academies, professional societies, business associations, labor associations, and other appropriate organizations and individuals in order to ensure a diverse pool of applicants. Candidates may be nominated by their peers or may self-nominate. NIST requests that the nomination includes a resume or biographical sketch that specifically identifies the qualifications of the individual being nominated. Qualifications considered may include, among others: scientific and technical knowledge in selected areas and professional experience. The Director of NIST recommends one or more candidates for further review to fill vacancies on the Committee on the basis of the qualifications, the sectors the candidates may represent and the existing representation on the Committee, and the other balance factors. This further review is to ensure compliance with Federal governance requirements, including compliance with the Committee's charter and membership balance plan. The Secretary of Commerce makes the final decision for appointment to the Committee.

Information Security and Privacy Advisory Board (ISPAB)

Address: Please submit nominations to Jeffrey Brewer, NIST, 100 Bureau Drive, Mail Stop 8930, Gaithersburg, MD 20899–8930. Nominations may also be submitted via email at *Jeffrey.Brewer@nist.gov,* Attn: ISPAB Nominations. Additional information regarding the ISPAB, including its charter and current membership list, may be found on its electronic home page at *http://csrc.nist.gov/groups/SMA/ispab/index.html.*

Contact Information: Jeffrey Brewer, ISPAB Designated Federal Officer (DFO), NIST, 100 Bureau Drive, Mail Stop 8930, Gaithersburg, MD 20899–8930; telephone 301–975–2489; or via email at *Jeffrey.Brewer@nist.gov.*

Committee Information

The ISPAB (Committee or Board) was originally chartered as the Computer System Security and Privacy Advisory Board by the Department of Commerce pursuant to the Computer Security Act of 1987 (Pub. L. 100–235). The E-Government Act of 2002 (Pub. L. 107–347, title III), amended section 21 of the National Institute of Standards and Technology Act (15 U.S.C. 278g-4), including changing the Committee's name, and the charter was amended accordingly.

Objectives and Duties

1. The Board will identify emerging managerial, technical, administrative, and physical safeguard issues relative to information security and privacy.

2. The Board will advise NIST, the Secretary of Homeland Security, and the Director of the Office of Management and Budget (OMB) on information security and privacy issues pertaining to Federal Government information systems, including through review of proposed standards and guidelines developed by NIST.

3. The Board shall report to the Director of NIST.

4. The Board reports annually to the Secretary of Commerce, the Secretary of Homeland Security, the Director of OMB, the Director of the National Security Agency, and the appropriate committees of the Congress.

5. The Board will function solely as an advisory body, in accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

Membership

1. The Director of NIST will appoint the Chairperson and the members of the ISPAB, and members serve at the discretion of the NIST Director. Members will be selected on a clear, standardized basis, in accordance with applicable Department of Commerce guidance.

2. The ISPAB will consist of a total of 12 members and a Chairperson, for a total of 13.

- The Board will include four members from outside the Federal Government who are eminent in the information technology industry, at least one of whom is representative of small or medium sized companies in such industries.
- The Board will include four members from outside the Federal Government who are eminent in the fields of information technology, or related disciplines, but who are not employed by or representative of a producer of information technology.
- The Board will include four members from the Federal Government who have information system management experience, including experience in information security and privacy, at least one of whom shall be from the National Security Agency.

Miscellaneous

1. Members of the Board, other than full-time employees of the Federal government, will not be compensated for their services, but will, upon request, be allowed travel expenses pursuant to 5 U.S.C. 5701 *et seq.,* while otherwise performing duties at the request of the Board Chairperson, while away from their homes or a regular place of business.

2. Meetings of the ISPAB are usually two to three days in duration and are usually held quarterly. ISPAB meetings are open to the public, including the press. Members do not have access to classified or proprietary information in connection with their ISPAB duties.

Nomination Information

1. Nominations are being accepted in all three categories described above.

2. Nominees should have specific experience related to information security or privacy issues, particularly as they pertain to Federal information

technology. Letters of nomination should include the category of membership for which the candidate is applying and a summary of the candidate's qualifications for that specific category. Also include (where applicable) current or former service on Federal advisory boards and any Federal employment. Each nomination letter should state that the person agrees to the nomination, acknowledges the responsibilities of serving on the ISPAB, and that they will actively participate in good faith in the tasks of the ISPAB.

3. Besides participation at meetings, it is desired that members be able to devote a minimum of two days between meetings to developing draft issue papers, researching topics of potential interest, and so forth in furtherance of their ISPAB duties.

4. Selection of ISPAB members will not be limited to individuals who are nominated. Nominations that are received and meet the requirements will be kept on file to be reviewed as ISPAB vacancies occur.

5. The Department of Commerce is committed to equal opportunity in the workplace and seeks a broad-based and diverse ISPAB membership.

Internet of Things Advisory Board

Address: Please submit nominations to Barbara Cuthill, Designated Federal Officer, National Institute of Standards and Technology, 100 Bureau Drive, MS 2000, Gaithersburg, MD 20899. Nominations may also be submitted via email to *barbara.cuthill@nist.gov.*

Contact Information: Alison Kahn, Electronics Engineer, National Institute of Standards and Technology, 100 Bureau Drive, MS 2000, Gaithersburg, MD 20899. Her email is *alison.kahn@nist.gov.* Additional information regarding the Committee, including its charter, current membership list, and executive summary, may be found at *https://www.nist.gov/itl/applied-cybersecurity/nist-cybersecurity-iot-program/internet-things-advisory-board.*

Committee Information

The Secretary of Commerce (Secretary) established the Internet of Things Advisory Board (IoTAB) in accordance with the requirements of 9204(b)(5) of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (Pub. L. 116–283), and in accordance with the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.* The IoTAB shall provide advice to the Internet of Things Federal Working Group (IoTFWG) on matters related to the Internet of Things as specified below. The IoTAB shall submit to the IoTFWG a report that includes any findings or recommendations related to the specific scope below.

Objectives and Duties

The Board shall advise the Internet of Things Federal Working Group convened by the Secretary pursuant to section 9204(b)(1) of the Act on matters related to the Federal Working Group's activities, as specified below.

The Board shall advise the Federal Working Group with respect to—

a. the identification of any Federal regulations, statutes, grant practices, programs, budgetary or jurisdictional challenges, and other sector-specific policies that are inhibiting, or could inhibit, the development of the Internet of Things;

b. situations in which the use of the Internet of Things is likely to deliver significant and scalable economic and societal benefits to the United States, including benefits from or to—

i. smart traffic and transit technologies;

ii. augmented logistics and supply chains;

iii. sustainable infrastructure;

iv. precision agriculture;

v. environmental monitoring;

vi. public safety; and

vii. health care;

c. whether adequate spectrum is available to support the growing Internet of Things and what legal or regulatory barriers may exist to providing any spectrum needed in the future;

d. policies, programs, or multi-stakeholder activities that—

i. promote or are related to the privacy of individuals who use or are affected by the Internet of Things;

ii. may enhance the security of the Internet of Things, including the security of critical infrastructure;

iii. may protect users of the Internet of Things; and

iv. may encourage coordination among Federal agencies with jurisdiction over the Internet of Things;

e. the opportunities and challenges associated with the use of Internet of Things technology by small businesses; and

f. any international proceeding, international negotiation, or other international matter affecting the Internet of Things to which the United States is or should be a party.

The Board shall submit to the Internet of Things Federal Working Group a report that includes any of its findings or recommendations. The report will be administratively delivered to the Internet of Things Federal Working Group through the Director of the National Institute of Standards and Technology (NIST).

The Board shall set its own agenda in carrying out its duties. The Federal Working Group may suggest topics or items for the Board to study, and the Board shall take those suggestions into consideration in carrying out its duties.

The Board will function solely as an advisory body, in accordance with the provisions of FACA.

Membership

Members of the Board shall be appointed by the Secretary. The Board shall consist of 16 members representing a wide range of stakeholders outside of the Federal Government with expertise relating to the Internet of Things, including: (i) information and communications technology manufacturers, suppliers, service providers, and vendors; (ii) subject matter experts representing industrial sectors other than the technology sector that can benefit from the Internet of Things, including the transportation, energy, agriculture, and health care sectors; (iii) small, medium, and large businesses; (iv) think tanks and academia; (v) nonprofit organizations and consumer groups; (vi) security experts; (vii) rural stakeholders; and (viii) other stakeholders with relevant expertise, as determined by the Secretary.

The Board members shall serve terms of two years (unless the Board terminates earlier). Vacancies are filled as soon as highly qualified candidates in a needed area of stakeholder interest are identified and available to serve. Members of the Board shall serve as representative members. Full-time or permanent part-time Federal officers or employees will not be appointed to the Board. Members must be citizens of the United States of America.

Members of the Board shall not be compensated for their services. Members of the Board, while attending meetings of the Board away from their homes or regular place of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for individuals intermittently serving in the Government without pay.

Members shall not reference or otherwise utilize their membership on the Board in connection with public statements made in their personal capacities without a disclaimer that the views expressed are their own and do not represent the views of the Board, the Federal Working Group, NIST, or the Department of Commerce.

The Secretary will appoint the Board's Chair from among the approved members in accordance with policies and procedures and, in doing so, shall determine the term of service for the Board's Chair.

Miscellaneous

Meetings will be conducted at least twice each year.

Nomination Information

NIST uses a nomination process to identify candidates for the Board. Nominations are requested through an announcement in the **Federal Register** and through solicitations through the Federal Working Group, NIST, the Department of Commerce, other Federal agencies, and organizations representing relevant businesses, consumers, communities, and economic sectors in order to ensure a robust and diverse pool of applicants. Candidates may be nominated by their peers or may self-nominate. NIST requests that the nomination includes a resume for the individual that specifically identifies the stakeholder interest of the individual being nominated. Qualifications considered may include, among others: education, professional experience, and scientific and technical expertise in selected areas. The Director of the Information Technology Laboratory (ITL) recommends candidates for further review to fill vacancies on the Board in the areas of needed stakeholder interest and on the basis of the qualifications, the sectors the candidates may represent and the existing representation on the Board, and other balance factors. The Director of ITL recommends nominees to the Director of NIST, who reviews the recommendation for submission to the Secretary of Commerce. Candidates for the Board are then reviewed by and appointed by the Secretary of Commerce.

The Board members shall serve terms of two years (unless the Board terminates earlier). Vacancies are filled as soon as highly qualified candidates in a needed area of stakeholder interest are identified and available to serve.

The Department of Commerce seeks a broad-based and diverse IoTAB membership.

Judges Panel of the Malcolm Baldrige National Quality Award

Address: Please submit nominations to Robert Fangmeyer, Director, Baldrige Performance Excellence Program, NIST, 100 Bureau Drive Mail Stop 1020, Gaithersburg, MD 20899–1020. Nominations may also be submitted via email *Robert.Fangmeyer@nist.gov.* Additional information regarding the Committee, including its charter, current membership list, and executive summary, may be found at *https://www.nist.gov/baldrige/how-baldrige-works/baldrige-community/judges-panel.*

Contact Information: Robyn Decker, Designated Federal Officer, Baldrige Performance Excellence Program, NIST, 100 Bureau Drive, Mail Stop 1020, Gaithersburg, MD 20899–1020; telephone 301–975–2361 or via email at *Robyn.Decker@nist.gov.*

Committee Information

The Judges Panel of the Malcolm Baldrige National Quality Award (Panel) was established in accordance with 15 U.S.C. 3711a(d)(1) and the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

Objectives and Duties

1. The Panel will ensure the integrity of the Malcolm Baldrige National Quality Award (Award) selection process. Based on a review of results of examiners' scoring of written applications, Panel members will vote on which applicants' merit site visits by examiners to verify the accuracy of quality improvements claimed by applicants. The Panel will also review results and findings from site visits, and recommend Award recipients.

2. The Panel will ensure that individual judges will not participate in the review of applicants as to which they have any real or perceived conflict of interest.

3. The Panel will function solely as an advisory body, and will comply with the provisions of the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

4. The Panel will report to the Director of NIST.

Membership

1. The Panel will consist of no less than 9, and not more than 12, members selected on a clear, standardized basis, in accordance with applicable Department of Commerce guidance. There will be a balanced representation from U.S. service, manufacturing, nonprofit, education, and health care industries. The Panel will include members familiar with the quality improvement operations and competitiveness issues of manufacturing companies, service companies, nonprofits, health care providers, and educational institutions.

2. Panel members will be appointed by the Secretary of Commerce for three-year terms and will serve at the discretion of the Secretary. All terms will commence on March 1 and end on the last day of February of the appropriate year.

3. Members who are not Federal employees will serve as Special Government Employees (SGEs) and will be subject to the ethical standards applicable to SGEs.

Miscellaneous

1. Members of the Panel shall serve without compensation, but may, upon request, be reimbursed travel expenses, including per diem, as authorized by 5 U.S.C. 5701 *et seq.*

2. The Panel will meet three times per year. Additional meetings may be called as deemed necessary by the NIST Director or by the Chairperson. Meetings are usually one to four days in duration. In addition, each Judge must attend an annual three-day Examiner training course.

3. When approved by the Department of Commerce Chief Financial Officer and Assistant Secretary for Administration, Panel meetings are closed or partially closed to the public.

Nomination Information

1. Nominations are sought from all U.S. service and manufacturing industries, education, health care, and nonprofits as described above.

2. Nominees should have established records of distinguished service and shall be familiar with the quality improvement operations and competitiveness issues of manufacturing companies, service companies, health care providers, educational institutions, and nonprofit organizations. The category (field of eminence) for which the candidate is qualified should be specified in the nomination letter. A summary of the candidate's qualifications should be included with the nomination, including (where applicable) current or former service on Federal advisory boards and Federal employment. Besides participation at meetings, it is desired that members be either developing or researching topics of potential interest, reading Baldrige applications, and so forth, in furtherance of their Panel duties.

3. The Department of Commerce is committed to equal opportunity in the workplace and seeks a broad-based and diverse Panel membership.

Manufacturing Extension Partnership (MEP) Advisory Board

Address: Please submit nominations to Beverly R. Bobb, NIST, 100 Bureau Drive, Mail Stop 4800, Gaithersburg, MD 20899–4800. Nominations may also be submitted via email at *Beverly.Bobb@nist.gov.* Additional information regarding MEP, including its charter,

may be found on its electronic home page at *http://www.nist.gov/mep/advisory-board.cfm.*

Contact Information: Beverly R. Bobb, Designated Federal Officer, NIST, 100 Bureau Drive, Mail Stop 4800, Gaithersburg, MD 20899–4800; telephone 301–975–5917, or via email at *Beverly.Bobb@nist.gov.*

Committee Information

The MEP Advisory Board (Board) is authorized under section 501 of the American Innovation and Competitiveness Act (Pub. L. 114–329); codified at 15 U.S.C. 278k(m), as amended, in accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

Objectives and Duties

1. The Board will provide advice on MEP activities, plans, and policies.
2. The Board will assess the soundness of MEP plans and strategies.
3. The Board will assess current performance against MEP program plans.
4. The Board will function solely in an advisory capacity, and in accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*
5. The Board shall transmit through the Director of NIST an annual report to the Secretary of Commerce for transmittal to Congress not later than 30 days after the submission to Congress of the President's annual budget request each year. The report shall address the status of the MEP program.

Membership

1. The Board shall consist of not fewer than 10 members, appointed by the Director of NIST and broadly representative of stakeholders. At least 2 members shall be employed by or on an advisory board for a MEP Center, at least 5 members shall be from U.S. small businesses in the manufacturing sector, and at least 1 member shall represent a community college. No member shall be an employee of the Federal Government.
2. The Director of NIST shall appoint the members of the Board. Members shall be selected on a clear, standardized basis, in accordance with applicable Department of Commerce guidance. Board members serve at the discretion of the Director of NIST.
3. The term of office of each member of the Board shall be three years, except that vacancy appointments shall be for the remainder of the unexpired term of the vacancy. Any person who has completed two consecutive full terms of service on the Board shall thereafter be ineligible for appointment during the one-year period following the expiration of the second term.

Miscellaneous

1. Members of the Board will not be compensated for their services but will, upon request, be allowed travel and per diem expenses as authorized by 5 U.S.C. 5701 *et seq.,* while attending meetings of the Board or subcommittees thereof, or while otherwise performing duties at the request of the Chair, while away from their homes or regular places of business.
2. The Board will meet at least biannually. Additional meetings may be called by the Director of NIST or the Designated Federal Officer (DFO).
3. Committee meetings are open to the public.

Nomination Information

1. Nominations are being accepted in all categories described above.
2. Nominees should have specific experience related to manufacturing and industrial extension services. Letters of nomination should include the category of membership for which the candidate is applying and a summary of the candidate's qualifications for that specific category.
3. Nominations that are received and meet the requirements will be kept on file to be reviewed as Board vacancies occur.
4. The Department of Commerce is committed to equal opportunity in the workplace and seeks a broad-based and diverse MEP Advisory Board membership.

National Artificial Intelligence Advisory Committee (NAIAC)

Address: Please submit nominations to Cheryl Gendron, Designated Federal Officer, National Institute of Standards and Technology, 100 Bureau Drive, MS 1000, Gaithersburg, MD 20899. Nominations may also be submitted via email to *Cheryl.Gendron@nist.gov.*

Contact Information: Elham Tabassi, NIST Chief AI Advisor, Information Technology Laboratory, National Institute of Standards and Technology, 100 Bureau Drive, MS 8940, Gaithersburg, MD 20899, 301–975–5292. Her email is *elham.tabassi@nist.gov.*

Committee Information

The Secretary of Commerce established the National Artificial Intelligence Advisory Committee (the NAIAC or the Committee) pursuant to section 5104 of the National Artificial Intelligence Initiative Act of 2020 (Pub. L. 116–283), hereinafter referred to as the Act, and the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

The Committee shall provide advice to the President and the National Artificial Intelligence Initiative Office on matters related to the National Artificial Intelligence Initiative (Initiative). The purposes of the Initiative are: (1) ensuring continued United States leadership in artificial intelligence research and development; (2) leading the world in the development and use of trustworthy artificial intelligence systems in the public and private sectors; (3) preparing the present and future United States workforce for the integration of artificial intelligence systems across all sectors of the economy and society; and (4) coordinating ongoing artificial intelligence research, development, and demonstration activities among the civilian agencies, the Department of Defense, and the Intelligence Community to ensure that each informs the work of the others.

Objectives and Duties

The Committee shall advise the President and the Initiative Office on matters related to the Initiative, including recommendations related to:

a. The current state of United States competitiveness and leadership in artificial intelligence, including the scope and scale of United States investments in artificial intelligence research and development in the international context;

b. The progress made in implementing the Initiative, including a review of the degree to which the Initiative has achieved the goals according to the metrics established by the Interagency Committee under section 5103(d)(2) of the Act;

c. The state of the science around artificial intelligence, including progress toward artificial general intelligence;

d. Issues related to artificial intelligence and the United States workforce, including matters relating to the potential for using artificial intelligence for workforce training, the possible consequences of technological displacement, and supporting workforce training opportunities for occupations that lead to economic self-sufficiency for individuals with barriers to employment and historically underrepresented populations, including minorities, Indians (as defined in 25 U.S.C. 5304), low-income populations, and persons with disabilities;

e. How to leverage the resources of the Initiative to streamline and enhance operations in various areas of government operations, including health care, cybersecurity, infrastructure, and disaster recovery;

f. The need to update the Initiative;

g. The balance of activities and funding across the Initiative;

h. Whether the strategic plan developed or updated by the Interagency Committee established under section 5103(d)(2) of the Act is helping to maintain United States leadership in artificial intelligence;

i. The management, coordination, and activities of the Initiative;

j. Whether ethical, legal, safety, security, and other appropriate societal issues are adequately addressed by the Initiative;

k. Opportunities for international cooperation with strategic allies on artificial intelligence research activities, standards development, and the compatibility of international regulations;

l. Accountability and legal rights, including matters relating to oversight of artificial intelligence systems using regulatory and nonregulatory approaches, the responsibility for any violations of existing laws by an artificial intelligence system, and ways to balance advancing innovation while protecting individual rights; and

m. How artificial intelligence can enhance opportunities for diverse geographic regions of the United States, including urban, Tribal, and rural communities.

In addition, pursuant to section 5104(e) of the Act, the Committee's Chairperson shall establish a subcommittee that shall provide advice to the President, through the Committee, on matters related to the development of AI relating to law enforcement, including advice on the following:

A. Bias, including whether the use of facial recognition by government authorities, including law enforcement agencies, is taking into account ethical considerations and addressing whether such use should be subject to additional oversight, controls, and limitations.

B. Security of data, including law enforcement's access to data and the security parameters for that data.

C. Adoptability, including methods to allow the United States Government and industry to take advantage of artificial intelligence systems for security or law enforcement purposes while at the same time ensuring the potential abuse of such technologies is sufficiently mitigated.

D. Legal standards, including those designed to ensure the use of artificial intelligence systems are consistent with the privacy rights, civil rights and civil liberties, and disability rights issues raised by the use of these technologies.

Membership

Members of the Committee shall be appointed by the Secretary of Commerce. The Committee shall consist of not less than 9 members, who represent broad and interdisciplinary expertise and perspectives, including from academic institutions, companies across diverse sectors, nonprofit and civil society entities, including civil rights and disability rights organizations, and Federal laboratories, who represent geographic diversity, and who are qualified to provide advice and information on science and technology research, development, ethics, standards, education, technology transfer, commercial application, security, and economic competitiveness related to artificial intelligence.

In selecting the members of the Committee, the Secretary of Commerce shall seek and give consideration to recommendations from Congress, industry, nonprofit organizations, the scientific community (including the National Academies of Sciences, Engineering, and Medicine, scientific professional societies, and academic institutions), the defense and law enforcement communities, and other appropriate organizations.

Miscellaneous

Meetings will be conducted at least twice each year.

1. Generally, Committee meetings are open to the public.

2. Meetings may be held in-person in selected locations across the country and/or virtually.

Nomination Information

1. Nominations are sought from all fields, sectors, and perspectives described above.

2. Nominees should represent broad and interdisciplinary expertise and perspectives, including from academic institutions, companies across diverse sectors, nonprofit and civil society entities, including civil rights and disability rights organizations, and Federal laboratories, who represent geographic diversity, and who are qualified to provide advice and information on science and technology research, development, ethics, standards, education, technology transfer, commercial application, security, and economic competitiveness related to artificial intelligence. A resume or C.V. should be sent that includes a summary of the candidate's qualifications with a nomination letter, including (where applicable) current or former service on Federal advisory boards and Federal employment. The field of eminence for which the candidate is qualified should be specified in the nomination letter. In addition, each nomination letter should state whether the candidate seeks to serve on the Committee, the Subcommittee, or both; and that the candidate acknowledges the responsibilities of serving and will actively participate in good faith in the tasks of the Committee or Subcommittee, as appropriate. Third-party nomination letters should state that the candidate agrees to the nomination.

3. The Department of Commerce seeks a broad-based and diverse Committee and subcommittee membership.

National Construction Safety Team (NCST) Advisory Committee

Address: Please submit nominations to Tina Faecke, Designated Federal Officer, NIST, 100 Bureau Drive, Mail Stop 8615, Gaithersburg, MD 20899–8615 or via email at *Tina.Faecke@nist.gov.* Additional information regarding the NCST Advisory Committee, including its charter, may be found on its electronic home page at *https://www.nist.gov/el/disaster-resilience/disaster-and-failure-studies/national-construction-safety-team-ncst/advisory.*

Contact Information: Tanya Brown-Giammanco, Director, Disaster and Failure Studies Program, NIST, 100 Bureau Drive, Mail Stop 8615, Gaithersburg, MD 20899–8615, telephone 301–975–2822; or via email at *Tanya.Brown-Giammanco@nist.gov.*

Committee Information

The NCST Advisory Committee (Committee) was established in accordance with the National Construction Safety Team Act, Public Law 107–231, and the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

Objectives and Duties

1. The Committee shall advise the Director of NIST on carrying out the National Construction Safety Team Act (Act), review the procedures developed under section 2(c)(1) of the Act, and review the reports issued under section 8 of the Act.

2. The Committee functions solely as an advisory body, in accordance with the provisions of the Federal Advisory Committee Act.

3. The Committee shall report to the Director of NIST.

4. On January 1 of each year, the Committee shall transmit to the Committee on Science, Space, and Technology of the House of Representatives and to the Committee

on Commerce, Science, and Transportation of the Senate a report that includes: (1) an evaluation of National Construction Safety Team (Team) activities, along with recommendations to improve the operation and effectiveness of Teams, and (2) an assessment of the implementation of the recommendations of Teams and of the Committee.

Membership

1. The Committee shall consist of no less than 4 and no more than 12 members. Members shall reflect the wide diversity of technical disciplines and competencies involved in the National Construction Safety Teams investigations. Members shall be selected on the basis of established records of distinguished service in their professional community and their knowledge of issues affecting the National Construction Safety Teams.

2. The Director of NIST shall appoint the members of the Committee, and they will be selected on a clear, standardized basis, in accordance with applicable Department of Commerce guidance.

Miscellaneous

1. Members of the Committee shall not be compensated for their services but may, upon request, be allowed travel and per diem expenses in accordance with 5 U.S.C. 5703.

2. Members of the Committee shall serve as Special Government Employees (SGEs), will be subject to the ethics standards applicable to SGEs, and are required to file an annual Executive Branch Confidential Financial Disclosure Report.

3. The Committee shall meet at least once per year. Additional meetings may be called whenever requested by the NIST Director or the Designated Federal Officer (DFO); such meetings may be in the form of telephone conference calls and/or videoconferences.

Nomination Information

1. Nominations are sought from industry and other communities having an interest in the National Construction Safety Teams investigations.

2. Nominees should have established records of distinguished service. The field of expertise that the candidate represents should be specified in the nomination letter. Nominations for a particular field should come from organizations or individuals within that field. A summary of the candidate's qualifications should be included with the nomination, including (where applicable) current or former service on Federal advisory boards and Federal employment.

3. The Department of Commerce is committed to equal opportunity in the workplace and seeks a broad-based and diverse Committee membership.

National Technical Information Service Advisory Board (NTIS)

Address: Please submit nominations to the Designated Federal Officer, NTIS, via email at *FACA@ntis.gov.* Additional information regarding the NTIS, including its charter, current membership list, and past reports may be found on its electronic homepage at *https://www.ntis.gov/about/advisorybd/index.xhtml.*

Contact Information: Steven Holland, Designated Federal Officer, NTIS, via email at *Steven.Holland@ntis.gov* and phone at (703) 605–6076.

Committee Information

The National Technical Information Service Advisory Board (NTIS Advisory Board or Advisory Board) was established in accordance with section 3704b(c) of title 15 of the United States Code, and the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

Objectives and Duties

1. The Advisory Board shall review and make recommendations to improve NTIS programs, operations, and general policies in support of NTIS' mission to advance Federal data priorities, promote economic growth, and enable operational excellence by providing innovative data services to Federal agencies through joint venture partnerships with the private sector.

2. The Advisory Board shall act in the public interest to:

a. Provide advice on the optima data services business and operating model to best implement NTIS' joint venture authority.

b. Provide advice on the means, including infrastructure and process improvements, to make Federal data easier to find, access, analyze, and combine.

c. Assess progress in evolving NTIS programs toward a focus on Federal data priorities.

d. Assess the use of merit-based criteria and processes to plan, conduct, and oversee programs and projects, including the selection of joint venture partners.

e. Assess policies in connection with fees and charges for NTIS services in order for the agency to operate on a substantially self-sustaining basis, as required by law.

f. Assess organizational capabilities required to carry out NTIS's mission, including capabilities in data science and for operational management of its project portfolio.

3. The Committee will function solely as an advisory body, in accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

4. The Committee shall report to the Secretary of Commerce and to the Under Secretary of Commerce for Standards and Technology through the Director of NTIS.

Membership

a. The NTIS Advisory Board shall be composed of a Chairperson appointed by the Secretary and four other members appointed by the Secretary. In the event of a vacancy in the Chairperson position, the NTIS Director may designate a member to serve as acting Chairperson until a Chairperson is appointed by the Secretary.

b. Members shall be selected solely on the basis of established records of distinguished service and objectivity; shall have recognized expertise in data collection, compilation, analysis, use, and dissemination, as well as data science, information technology, cybersecurity, and privacy. Members will be selected from the business, academic, non- profit, and state and local government communities. Reasonable efforts will be made to ensure members represent the entire spectrum of Federal data interests including demographic, economic, trade, health, scientific, patent, environmental, geospatial, cybersecurity, and transactional data. No Federal Government employee shall serve as a member of the Board.

c. The term of office of each member of the Board shall be three years, except that vacancy appointments shall be for the remainder of the unexpired term of the vacancy. All appointments shall automatically terminate if the charter is terminated or not renewed. All members serve at the pleasure of the Secretary.

d. Any person who has completed two consecutive full terms of service on the Board shall be ineligible for appointment for a third term during the one-year period following the expiration of the second term.

e. Members shall serve as Special Government Employees (SGEs) and will be subject to all ethical standards and rules applicable to SGEs.

2. Members shall not reference or otherwise utilize their membership on the Board in connection with public statements made in their personal capacities without a disclaimer that the views expressed are their own and do not represent the views of the Advisory Board, the National Technical

Information Service, or the Department of Commerce.

3. Subcommittees: NTIS may establish such subcommittees of its members as may be necessary, pursuant to the provisions of FACA, the FACA implementing regulations, and applicable Department of Commerce guidance. Subcommittees will report to the NTIS Advisory Board and may not provide advice or work products directly to the Department of Commerce or NTIS.

Miscellaneous

1. The Board shall meet at the call of the Secretary or the Secretary's designee, but not less often than once every six months.

2. Generally, Committee meetings are open to the public.

Nomination Information

1. Nominations are sought from all fields described above.

2. Nominees should have established records of distinguished service and shall be eminent in fields. The category (field of eminence) for which the candidate is qualified should be specified in the nomination letter. A summary of the candidate's qualifications should be included with the nomination, including (where applicable) current or former service on Federal advisory boards and Federal employment.

3. The Department of Commerce is committed to equal opportunity in the workplace and seeks a broad-based and diverse NTIS membership.

Visiting Committee on Advanced Technology (VCAT)

Address: Please submit nominations to Stephanie Shaw, Designated Federal Officer, VCAT, NIST, 100 Bureau Drive, Mail Stop 1060, Gaithersburg, MD 20899–1060. Nominations may also be submitted via email at *Stephanie.Shaw@nist.gov.* Additional information regarding the VCAT, including its charter, current membership list, and past reports may be found on its electronic homepage at *http://www.nist.gov/director/vcat/.*

Contact Information: Stephanie Shaw, Designated Federal Officer, VCAT, NIST, 100 Bureau Drive, Mail Stop 1060, Gaithersburg, MD 20899–1060, via email at *Stephanie.Shaw@nist.gov* or telephone: 301–975–2667.

Committee Information

The VCAT (Committee) was established in accordance with 15 U.S.C. 278 and the Federal Advisory Committee Act, 5 U.S.C. 1001 *et seq.*

Objectives and Duties

1. The Committee shall review and make recommendations regarding general policy for NIST, its organization, its budget, and its programs, within the framework of applicable national policies as set forth by the President and the Congress. 15 U.S.C. 278(a).

2. The Committee shall provide an annual report, through the Director of NIST, to the Secretary of Commerce for submission to the Congress not later than 30 days after the submittal to Congress of the President's annual budget request in each year. Such report shall deal essentially, though not necessarily exclusively, with policy issues or matters which affect NIST, or with which the Committee in its official role as the private sector policy adviser of NIST is concerned. Each such report shall identify areas of research and research techniques of the Institute of potential importance to the long-term competitiveness of United States industry, in which the Institute possesses special competence, which could be used to assist United States enterprises and Untied States industrial joint research and development ventures. 15 U.S.C. 278(h)(1). The Committee shall submit, through the Director of NIST, to the Secretary and the Congress such additional reports on specific policy matters as it deems appropriate. 15 U.S.C. 278(h)(2).

3. The Committee will function solely as an advisory body, in accordance with the provisions of the Federal Advisory Committee Act, as amended, 5 U.S.C. app.

4. The Committee shall report to the Director of NIST.

Membership

1. The Director of NIST shall appoint the members of the Committee. Members shall be selected on a clear, standardized basis, in accordance with applicable Department of Commerce guidance. 15 U.S.C. 278(a). Members shall be selected solely on the basis of established records of distinguished service; shall provide representation of a cross-section of traditional and emerging United States industries; and shall be eminent in fields such as business, research, new product development, engineering, labor, education, management consulting, environment, and international relations. No employee of the Federal Government shall serve as a member of the Committee. 15 U.S.C. 278(b).

2. Members of the Committee shall serve as Special Government Employees (SGEs) and will be subject to the ethics standards applicable to SGEs.

3. The Committee shall consist of not fewer than nine members appointed by the Director of NIST, a majority of whom shall be from United States industry. 15 U.S.C. 278(a). The term of office of each member of the Committee shall be three years, except that vacancy appointments shall be for the remainder of the unexpired term of the vacancy. 15 U.S.C. 278(c)(1). Members shall serve at the discretion of the Director of NIST.

4. Any person who has completed two consecutive full terms of service on the Committee shall be ineligible for appointment for a third term during the one-year period following the expiration of the second term. 15 U.S.C. 278(c)(1).

5. Pursuant to 15 U.S.C. 278(f), the Committee chairperson and vice chairperson shall be elected by the members of the Committee at each annual meeting occurring in an even-numbered year. The vice chairperson shall perform the duties of the chairperson in his or her absence. In case a vacancy occurs in the position of the chairperson or vice chairperson, the Committee shall elect a member to fill such vacancy.

6. Members of the Committee will not be compensated for their services, but will, upon request, be allowed travel expenses in accordance with 5 U.S.C. 5701 *et seq.,* while attending meetings of the Committee or of its subcommittees, or while otherwise performing duties at the request of the chairperson, while away from their homes or a regular place of business.

7. Pursuant to 15 U.S.C. 278(g), the Committee may, with the concurrence of a majority of its members, permit the appointment of a staff consisting of not more than four professional staff members and such clerical staff members as may be necessary. Such staff members shall be appointed by the Director after consultation with the chairperson of the Committee and assigned at the direction of the Committee.

8. Subcommittees: Pursuant to 15 U.S.C. 278(e), the Committee shall have an executive committee, and may delegate to it such powers and functions of the Committee as it deems appropriate. The Committee and/or the Director of NIST may establish such other subcommittees, task forces, and working groups consisting of members from the parent Committee as may be necessary, subject to the provisions of FACA, the FACA implementing regulations, and applicable Department of Commerce guidance. Subcommittees must report back to the Committee and any recommendations based on their work will be deliberated and agreed

upon by the Committee prior to dissemination to NIST.

Miscellaneous

1. Meetings of the VCAT usually take place at the NIST headquarters in Gaithersburg, Maryland. The Committee will meet at least twice each year at the call of the chairperson or whenever one-third of the members so request in writing. The Committee shall not act in the absence of a quorum, which shall consist of a majority of the members of the Committee not having a conflict of interest in the matter being considered by the Committee. 15 U.S.C. 278(d).

2. Generally, Committee meetings are open to the public.

Nomination Information

1. Nominations are sought from all fields described above.

2. Nominees should have established records of distinguished service and shall be eminent in fields such as business, research, new product development, engineering, labor, education, management consulting, environment and international relations. The category (field of eminence) for which the candidate is qualified should be specified in the nomination letter. A summary of the candidate's qualifications should be included with the nomination, including (where applicable) current or former service on Federal advisory boards and Federal employment. In addition, each nomination letter should state that the candidate agrees to the nomination, acknowledges the responsibilities of serving on the VCAT, and will actively participate in good faith in the tasks of the VCAT.

3. The Department of Commerce is committed to equal opportunity in the workplace and seeks a broad-based and diverse VCAT membership.

Alicia Chambers,

NIST Executive Secretariat.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD893]

Applications for Membership to the American Fisheries Advisory Committee

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce

ACTION: Notice; request for applications.

SUMMARY: Applications are being sought for appointment by the Secretary of Commerce (Secretary) for 9 membership positions to serve on the 22-member American Fisheries Advisory Committee (AFAC or Committee). Individuals selected to serve on the Committee will serve a term of three years, unless otherwise stipulated.

DATES: Applications must have an email date stamp on or before June 20, 2024.

ADDRESSES: Applications should be submitted by email to: *nmfs.afac.nominations@noaa.gov,* or by mail to: Clifford Cosgrove, American Fisheries Advisory Committee Designated Staff Member, NMFS Office of Management and Budget, 1315 East-West Highway, Rm. #14456, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Cliff Cosgrove, American Fisheries Advisory Committee Designated Staff Member, NMFS Office of Management and Budget, by email, at *nmfs.afac.nominations@noaa.gov;* or by phone at (301) 427–8736. Please visit the Saltonstall-Kennedy (S–K) Research and Development Program web page at: *https://www.fisheries.noaa.gov/national/funding-financial-services/saltonstall-kennedy-research-and-development-program,* or contact Cliff Cosgrove, American Fisheries Advisory Committee Designated Staff Member, NMFS Office of Management and Budget, by email, at: *nmfs.afac.nominations@noaa.gov.*

SUPPLEMENTARY INFORMATION: The AFAC Committee was created from Public Law (Pub. L. 117–121) signed on May 12, 2022. The Committee meets no more than 3 times annually and membership is comprised of 22 individuals appointed by the Secretary with the following geographic representation:

Region 1 consisting of Alaska, Hawaii, the Commonwealth of the Northern Mariana Islands, and the Territories of Guam and American Samoa;

Region 2 consisting of Maine, New Hampshire, Massachusetts, Rhode Island, and Connecticut;

Region 3 consisting of Texas, Alabama, Louisiana, Mississippi, Florida, Arkansas, Puerto Rico, and the Territory of the Virgin Islands of the United States;

Region 4 consisting of California, Washington, Oregon, and Idaho;

Region 5 consisting of New Jersey, New York, Delaware, Maryland, Virginia, North Carolina, South Carolina, and Georgia; and

Region 6 consisting of Michigan, Minnesota, Wisconsin, Illinois, Indiana, Ohio, and Pennsylvania.

Membership for each region will be composed of highly qualified, diverse individuals with experience in one or more of the following areas of expertise, and in as many seafood species as possible: seafood harvesting or processing; recreational or commercial fishing; growing seafood; fisheries science; and/or food distribution, marketing, retail, or food service.

Four at-large members shall also be appointed by the Secretary as follows: one individual with experience in food distribution, marketing, retail, or food service; one individual with experience in the recreational fishing industry supply chain, such as fishers, manufacturers, retailers, and distributors; one individual with experience in the commercial fishing industry supply chain, such as fishers, manufacturers, retailers, and distributors; and one individual who is an employee of NMFS with expertise in fisheries research.

AFAC is responsible for making recommendations to the Secretary for financial assistance awards under the S–K Grant Competition under the Department of Commerce. AFAC will also make recommendations to the Secretary to assist in the development of the annual Notice of Funding Opportunities (NOFO) for submission to the S–K Grant Competition. This may include identifying the needs of the fishing communities (program priorities), establishing individual award funding limits, specifying the application review criteria and selection processes, and other sections of the NOFO as appropriate and allowable. Applicants for these nine membership positions must have demonstrable experience listed below in as many seafood species as possible from the specific AFAC fisheries regions as follows:

- Region 1, one individual with experience in the Fisheries Science Community or Relevant Fishery Management Council;
- Region 2, one individual with experience as a Recreational or Commercial Fisher and/or Experience Growing Seafood;
- Region 3, two positions, one individual with experience as a Recreational or Commercial Fisher and/or Experience Growing Seafood and one individual with experience as a Seafood Harvester or Processor;
- Region 4, two positions, one individual with experience in the Fisheries Science Community or Relevant Fishery Management Council, one individual with experience as a Recreational or Commercial Fisher and/or Experience Growing Seafood;

• Region 5, one individual with experience as a Recreational or Commercial Fisher and/or Experience Growing Seafood;

• Region 6, one individual with experience as a Seafood Harvester or Processor; At-Large Region, one individual with experience in Food Distribution, Marketing, Retail, or Food Service.

Members must be able to fulfill the time commitments required for up to two annual in-person meetings and one virtual meeting. The in person meetings rotate between regions and last up to four business days, subject to the time needs of each meeting. The virtual meeting is one business day for approximately four to six hours.

Committee membership is voluntary and, except for reimbursable travel and related expenses per federal travel regulations, service is without compensation.

Each nominee must submit a cover letter and a resume/curriculum vitae (CV) in PDF format. The cover letter shall include a brief statement as to their interest in serving on the Committee and their qualifications. The resume/CV shall detail the applicant's contact information (address, telephone number, email address) and specific qualifications/experience/expertise as referenced in Public Law 117–121. Any applicants selected for Committee membership shall be required to complete a conflict of interest form. The first Committee meeting of members selected from this notice will be September 17 through September 20, 2024.

Applications must be submitted by email to *nmfs.afac.nominations@noaa.gov,* and must be received or email date stamped by June 20, to be considered. The full text of Public Law 117–121 and other relevant documents can be viewed on the Saltonstall-Kennedy web page at the following link: *https://www.fisheries.noaa.gov/national/funding-financial-services/saltonstall-kennedy-research-and-development-program*

Dated: April 30, 2024.

Daniel A. Namur,

Acting Director, Office of Management and Budget, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Applications and Reports for Registration as an Agent or Tanner

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on January 24, 2024, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration, Commerce.

Title: Applications and Reports for Registration as an Agent or Tanner.

OMB Control Number: 0648–0179.

Form Number(s): None.

Type of Request: Regular submission, extension of a current information collection.

Number of Respondents: 25.

Average Hours per Response: 2 hours for an application and 2 hours for a report.

Total Annual Burden Hours: 50 hours.

Needs and Uses: This is a request for extension of an approved information collection. The Marine Mammal Protection Act (MMPA) (16 U.S.C. 1361 *et seq.*) mandates the protection and conservation of marine mammals and makes the taking, killing or serious injury of marine mammals, except under permit or exemption, a violation of the Act. An exemption is provided for Alaskan natives to take marine mammals if the taking is for subsistence or for creating and selling authentic native articles of handicraft and clothing. Possession of marine mammals and marine mammal parts by other than Alaskan natives is therefore prohibited (exception, 50 CFR 216.26: beach found non-Endangered Species Act (ESA) teeth or bones that have been registered with NOAA's National Marine Fisheries Service (NMFS)). As native handicrafts are allowed by the MMPA to enter interstate commerce, an exemption is also needed to allow non-natives to handle the skins or other marine mammal produce, whether to tan the pinniped hide or to act as an agent for the native to sell his handicraft products. The information is necessary for law enforcement purposes to ensure that only Alaska Indians, Aleuts, or Eskimos are submitting marine mammal hides or parts for tanning.

The information required by 50 CFR 216.23 is of two types. Applications: Information is required to identify the applicant as a tanner/agent in order to preclude prosecution under the MMPA and to determine that he/she has an acceptable record keeping program to accurately account for those marine mammal products received. This information serves as a deterrent for those individuals who might use this registration program for entering prohibited marine mammal products into interstate commerce. Reports: Information is also needed annually to evaluate the agent/tanner's activities during the year, and his/her procedures for bookkeeping and yearly inventory to assure NMFS, the Marine Mammal Commission, and the general public that prohibited marine mammal products were not being transshipped through registered agents.

The reporting requirements are: report in writing to the Assistant Administrator for Fisheries, NMFS, any changes in the facts stated in Registrant's applications for this Certificate of Registration within 30 days of such change; maintain current records of each transaction authorized stating the marine mammals or marine mammal parts or products involved, from whom received, any processing accomplished, to whom returned, and the date of each such transaction. These records shall be kept separate and apart from other records maintained in the ordinary course of business and shall be retrained for not less than three years; and annually, during the month of January, send certified copies of such records (annual report) to the Assistant Administrator for Fisheries.

Affected Public: Business or other for-profit organizations; state, local or tribal governments.

Frequency: Annually and on occasion.

Respondent's Obligation: Mandatory.

Legal Authority: U.S. Code: 16 U.S.C. 1361; Marine Mammal Protection Act.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0179.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Socio-Economic Survey of Hired Captains and Crew in New England, Mid-Atlantic, South Atlantic, and Gulf of Mexico Commercial Fisheries

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before July 8, 2024.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at *NOAA.PRA@noaa.gov.* Please reference OMB Control Number 0648–0636 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Dr. Matthew J. Cutler, Social Scientist, NOAA/Northeast Fisheries Science Center, 166 Water St., Woods Hole, MA 02543, (508–495–4731), *matthew.cutler@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension to an approved collection. This collection is currently approved for implementation in the New England, Mid-Atlantic, South Atlantic and Gulf of Mexico regions by NOAA National Marine Fisheries Service, Northeast Fisheries Science Center's Social Sciences Branch (NEFSC–SSB) and Southeast Fisheries Science Center Social Science Research Group (SEFSC–SSRG). The NEFSC and SEFSC seek to conduct surveys to provide for the ongoing collection of social and economic data related to the fishing industries in those states. The purpose of this survey is to assess and track over time the social and economic conditions of commercial fishing crews and hired captains for which little is known. This survey will provide data on social and economic impacts for this population and the changes in fisheries because of regulatory changes. Data to be collected include demographic information on crew, individual and community well-being, fishing practices, job satisfaction, job opportunities, and attitudes toward fisheries management.

The National Environmental Policy Act (NEPA) and Magnuson-Stevens Conservation and Management Act (MSA) both contain requirements for considering the social and economic impacts of fishery management decisions. There is a need to understand how such fishery management policies and programs will affect the social and economic characteristics of those involved in the commercial fishing industry. To help meet these requirements of NEPA and MSA, the NEFSC and SEFSC will collect data on an ongoing basis to track how socio-economic characteristics of fisheries are changing over time and the impact of fishery management policies and programs implemented in New England, Mid-Atlantic, South Atlantic and Gulf of Mexico regions.

II. Method of Collection

This information will be collected through in-person intercept interviews.

III. Data

OMB Control Number: 0648–0636.

Form Number(s): None.

Type of Review: Regular submission [extension of a current information collection].

Affected Public: Individuals, households; business or other for-profit organizations.

Estimated Number of Respondents: 924.

Estimated Time Per Response: 15 minutes.

Estimated Total Annual Burden Hours: 231 hours.

Estimated Total Annual Cost to Public: $0.

Respondent's Obligation: Voluntary.

Legal Authority: MSA and NEPA.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

[FR Doc. 2024–09881 Filed 5–6–24; 8:45 am]

BILLING CODE 3510–22–P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Agency Information Collection Activities; Comment Request; Grantee and Sponsor Portal

AGENCY: The Corporation for National and Community Service.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Corporation for National and Community Service (operating as AmeriCorps) is proposing a new information collection.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by July 8, 2024.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) Electronically through *www.regulations.gov* (preferred method).

(2) By mail sent to: AmeriCorps, Attention Emily Poore, 250 E Street SW, Washington, DC 20525.

(3) By hand delivery or by courier to the AmeriCorps mailroom at the mail address given in paragraph (2) above, between 9 a.m. and 4 p.m. Eastern Time, Monday through Friday, except Federal holidays.

Comments submitted in response to this notice may be made available to the public through *regulations.gov.* For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comment that may be made available to the public, notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT: Emily Poore, (202) 355–2190, or by email at *epoore@americorps.gov.*

SUPPLEMENTARY INFORMATION:

Title of Collection: Grantee and Sponsor Portal (GSP).

OMB Control Number: 3045–NEW.

Type of Review: New.

Respondents/Affected Public: Businesses and organizations.

Total Estimated Number of Annual Responses: 6,000.

Total Estimated Number of Annual Burden Hours: 240,000 hours.

Abstract: This new information collection is for AmeriCorps' new Grantee and Sponsor Portal (GSP), which entities will use to apply for any AmeriCorps program resources and recipients of any AmeriCorps award will use to report on their grants or projects. The GSP will ultimately replace the eGrants system AmeriCorps currently uses.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. All written comments will be available for public inspection on *regulations.gov.*

Fernando Laguarda,

General Counsel.

BILLING CODE 6050–28–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2024–SCC–0005]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Joint Consolidation Loan Separation Application

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a new information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before June 6, 2024.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, (202) 377–4018.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Joint Consolidation Loan Separation Application.

OMB Control Number: 1845–NEW.

Type of Review: New ICR.

Respondents/Affected Public: Individuals or Households; Private Sector.

Total Estimated Number of Annual Responses: 74,000.

Total Estimated Number of Annual Burden Hours: 24,051.

Abstract: This is a new collection. The Joint Consolidation Loan Separation Act (JCLSA), amended the Higher Education Act of 1965, as amended (HEA) to allow joint consolidation co-borrowers to apply to separate an existing joint Direct Consolidation Loan or Federal Consolidation Loan into individual Direct Consolidation Loans. The HEA, as amended by the JCLSA, requires joint consolidation loan borrowers to apply to the U.S. Department of Education if they wish to separate an existing joint consolidation loan into one or more individual Direct Consolidation Loans. The JCLSA allows for either joint application or separate application. Under the joint application option, each joint consolidation loan co-borrower applies for an individual Direct Consolidation Loan. Unless the co-borrowers agree on an alternate amount specified in a divorce decree, court order, or settlement agreement, each co-borrowers new individual Direct Consolidation Loan will be made for an amount equal to the co-borrowers' portion of the remaining outstanding balance of the joint consolidation loan. Under the separate application option, a co-borrower who certifies that they have experienced an act of domestic violence or economic abuse from the other co-borrower, or that they are unable to reasonably reach or access the loan information of the other co-borrower, may apply separately for a new individual Direct Consolidation Loan, without regard to whether or when the other co-borrower applies. In this circumstance, the applying co-borrowers new Direct Consolidation Loan will be made for an amount equal to that individual's portion of the joint consolidation loan, determined as described above for the joint application option.

Dated: May 1, 2024.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2024–SCC–0068]

Agency Information Collection Activities; Comment Request; Subminimum Wage to Competitive Integrated Employment (SWTCIE) Program Evaluation

AGENCY: Office of Special Education and Rehabilitative Services (OSERS), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a new information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before July 8, 2024.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2024–SCC–0068. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, the Department will temporarily accept comments at *ICDocketMgr@ed.gov*. Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. Please note that comments submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Manager of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W203, Washington, DC 20202–8240.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Diandrea Bailey, 202–987–0126.

SUPPLEMENTARY INFORMATION: The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Subminimum Wage to Competitive Integrated Employment (SWTCIE) Program Evaluation.

OMB Control Number: 1820–NEW.

Type of Review: A new ICR.

Respondents/Affected Public: Individuals and households.

Total Estimated Number of Annual Responses: 4,866.

Total Estimated Number of Annual Burden Hours: 2,005.

Abstract: The U.S. Department of Education's Rehabilitation Services Administration (RSA) requests clearance for new data collection activities to support the evaluation of the Disability Innovation Fund (DIF) Subminimum Wage to Competitive Integrated Employment (SWTCIE) program. The aim of this project is to increase transitions to competitive integrated employment (CIE) among people working in subminimum wage employment (SWE)—or considering doing so—through innovative activities to build systemwide alternatives to subminimum wage employment. Advocacy, policy, and practice have evolved in recent decades toward a shift to CIE, as reflected in the Workforce Innovation and Opportunity Act and in the Consolidated Appropriations Act of 2021, which provides funding for the DIF SWITCIE program awarded in fiscal year 2022. This request covers primary data collection activities, including survey data, administrative data, site visits, and focus groups.

RSA's Training and Services Program Division (TSPD) contracted with Mathematica to assist RSA in evaluating the Federal fiscal year (FFY) 2022 DIF program. In September 2022, the RSA

awarded five-year grants for the DIF (Assistance Listing Number 84.421D). The grants provide 14 State vocational rehabilitation (VR) agencies with funding to implement SWTCIE Innovative Model Demonstration projects to decrease SWE and increase CIE among people with disabilities currently employed in or contemplating SWE. To achieve this purpose, the projects will create innovative models for dissemination and replication to (1) identify strategies for addressing barriers associated with accessing CIE, (2) provide integrated services that support CIE, (3) support integration into the community through CIE, (4) identify and coordinate wraparound services for project participants who obtain CIE, (5) develop and disseminate evidence-based practices, and (6) provide entities holding section 14(c) certificates (which allows them to pay below the minimum wage for workers with disabilities that impair their productivity) with readily accessible transformative business models for adoption.

Dated: May 2, 2024.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Electricity Advisory Committee

AGENCY: Department of Energy, Office of Electricity.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Electricity Advisory Committee (EAC). The Federal Advisory Committee Act (FACA) requires that public notice of these meetings be announced in the **Federal Register**.

DATES: Wednesday, June 5, 2024; 1 p.m.–5:35 p.m. EDT; Thursday, June 6, 2024; 8:30 a.m.–12:30 p.m. EDT.

ADDRESSES: The National Rural Electric Cooperative Association Conference Center, 4301 Wilson Blvd., Arlington, VA 22203. Members of the public are encouraged to participate virtually, however, limited physical space is available for members of the public to attend onsite. To register to attend either in-person or virtually, please visit the meeting website: *https://www.energy.gov/oe/electricity-advisory-committee-june-2024-meeting.* Please note, you must register for each day you would like to attend.

FOR FURTHER INFORMATION CONTACT: Ms. Jayne Faith, Designated Federal Officer, Office of Electricity, U.S. Department of Energy, Washington, DC 20585; Telephone: (202) 586–2983 or Email: *Jayne.Faith@hq.doe.gov.*

SUPPLEMENTARY INFORMATION:

Purpose of the Committee: The EAC was established in accordance with the provisions of FACA, as amended, to provide advice to the U.S. Department of Energy (DOE) in implementing the Energy Policy Act of 2005, executing certain sections of the Energy Independence and Security Act of 2007, and modernizing the nation's electricity delivery infrastructure. The EAC is composed of individuals of diverse backgrounds selected for their technical expertise and experience, established records of distinguished professional service, and their knowledge of issues that pertain to the electric sector.

Tentative Agenda

June 5, 2024

12:45 p.m.–1:00 p.m. WebEx Attendee Sign-On
1:00 p.m.–1:15 p.m. Welcome, Introductions, Developments since February Meeting
1:15 p.m.–1:30 p.m. Introductory Remarks from the Office of Electricity
1:30 p.m.–3:30 p.m. Discussion on Secure Data Portal
3:30 p.m.–3:45 p.m. Break
3:45 p.m.–4:30 p.m. Presentation on the 2024 Solar Eclipse
4:30 p.m.–5:00 p.m. EAC Discussion on the Institute of Electrical and Electronics Engineers Standards
5:00 p.m.–5:30 p.m. EAC Presentation and Vote on Gas-Electric Recommendations

12:00 p.m.–12:15 p.m. Public Comments
12:15 p.m.–12:30 p.m. Wrap-up and Adjourn June 2024 Meeting of the EAC

The meeting agenda and times may change to accommodate EAC business. For EAC agenda updates, see the EAC website at: *https://www.energy.gov/oe/electricity-advisory-committee-june-2024-meeting.*

Public Participation: The EAC welcomes the attendance of the public at its meetings. Individuals who wish to offer public comments at the EAC meeting may do so on June 6, 2024, but must register in advance by 9 a.m. EDT on June 6, 2024, by sending a written request identified by ''Electricity Advisory Committee June 2024 Meeting,'' to Ms. Jayne Faith at *Jayne.Faith@hq.doe.gov.* Approximately 15 minutes will be reserved for public comments. Time allotted per speaker will depend on the number who wish to speak but is not expected to exceed three minutes. Anyone who is not able to attend the meeting, or for whom the allotted public comments time is insufficient to address pertinent issues with the EAC, is invited to send a written statement identified by ''Electricity Advisory Committee June 2024 Meeting,'' to Ms. Jayne Faith at *Jayne.Faith@hq.doe.gov.*

Minutes: Minutes will be posted on the EAC web page at *https://www.energy.gov/oe/electricity-advisory-committee-june-2024-meeting.* They can also be obtained by contacting Ms. Jayne Faith at the email address or telephone number listed in **FOR FURTHER INFORMATION CONTACT** section.

Signing Authority: This document of the Department of Energy was signed on May 1, 2024, by Alyssa Petit, Acting Deputy Committee Management Officer, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on May 1, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

DEPARTMENT OF ENERGY

[Docket No. 23–34–LNG]

Gulfstream LNG Development, LLC; Amendment to Application for Long-Term Authorization To Export Liquefied Natural Gas to Non-Free Trade Agreement Nations

AGENCY: Office of Fossil Energy and Carbon Management, Department of Energy.

ACTION: Notice of amended application.

SUMMARY: The Office of Fossil Energy and Carbon Management (FECM) of the Department of Energy (DOE) gives notice (Notice) of receipt of an Amendment to Application (Amendment) filed by GULFSTREAM LNG DEVELOPMENT, LLC (Gulfstream LNG) on March 22, 2024, and corrected on April 4, 2024. Gulfstream LNG is amending its pending Application requesting authorization to export liquefied natural gas (LNG) filed on March 10, 2023, to change the site of its proposed LNG export project in Plaquemines Parish, Louisiana. No other part of the pending Application is affected. Gulfstream LNG filed the Amendment under the Natural Gas Act (NGA).

DATES: Protests, motions to intervene, or notices of intervention, as applicable, requests for additional procedures, and written comments are to be filed electronically as detailed in the Public Comment Procedures section no later than 4:30 p.m., Eastern time, June 6, 2024.

ADDRESSES:

Electronic Filing by email (Strongly encouraged): fergas@hq.doe.gov.

Postal Mail, Hand Delivery, or Private Delivery Services (e.g., FedEx, UPS, etc.): U.S. Department of Energy (FE–34), Office of Regulation, Analysis, and Engagement, Office of Fossil Energy and Carbon Management, Forrestal Building, Room 3E–056, 1000 Independence Avenue SW, Washington, DC 20585.

Due to potential delays in DOE's receipt and processing of mail sent through the U.S. Postal Service, we encourage respondents to submit filings electronically to ensure timely receipt.

FOR FURTHER INFORMATION CONTACT:

Jennifer Wade or Peri Ulrey, U.S. Department of Energy (FE–34), Office of Regulation, Analysis, and Engagement, Office of Resource Sustainability, Office of Fossil Energy and Carbon Management, Forrestal Building, Room 3E–042, 1000 Independence Avenue SW, Washington, DC 20585, (202) 586–4749 or (202) 586–7893, *jennifer.wade@hq.doe.gov* or *peri.ulrey@hq.doe.gov*

Cassandra Bernstein, U.S. Department of Energy (GC–76), Office of the Assistant General Counsel for Energy Delivery and Resilience, Forrestal Building, Room 6D–033, 1000 Independence Avenue SW, Washington, DC 20585, (202) 586–4798, *cassandra.bernstein@hq.doe.gov*

SUPPLEMENTARY INFORMATION: On March 10, 2023, Gulfstream LNG filed an Application requesting long-term, multi-contract authorization to export domestically produced LNG in a volume equivalent to 237.5 billion cubic feet per year (Bcf/yr) of natural gas from the proposed Gulfstream LNG Project (Project), a LNG export project to be located in Plaquemines Parish, Louisiana. In the portion of the Application relevant here, Gulfstream LNG is seeking to export this LNG to any country with which the United States does not have a free trade agreement (FTA) requiring national treatment for trade in natural gas, and with which trade is not prohibited by United States law or policy (non-FTA countries), under section 3(a) of the NGA.[1] In the Application, Gulfstream LNG proposed to construct and locate the Project ''on an approximately 500-acre parcel of land south of the town of Belle Chasse, Plaquemines Parish, Louisiana.'' [2]

In the Amendment to the Application, Gulfstream LNG indicates that it was necessary to change the site for the Project. The new site ''is on an approximate 418-acre parcel of land located south of the town of Belle Chasse, Plaquemines Parish, Louisiana, just three miles downstream on the same side of [the] river from the original site.'' [3] Gulfstream LNG states that it has executed a Ground Lease for the new Project site with the owner of the site, Magnolia Terminal, LLC, which is attached to the Amendment as Exhibit A. Gulfstream LNG further states that the new site does not necessitate any other changes to the Project, and therefore ''this Amendment does not affect any other part of Gulfstream LNG's original Application.'' [4] On April 4, 2024, Gulfstream LNG submitted a revised Exhibit B to the Amendment showing the map and site plan for the Project.

Additional details can be found in the Amendment, posted on the DOE website at *https://www.energy.gov/sites/default/files/2024-03/Gulfstream LNGAmendmentApplication.pdf.*

DOE Evaluation

In reviewing Gulfstream LNG's Amendment to its pending Application, DOE will consider any issues required by law or policy under NGA section 3(a), DOE's regulations, and any documents deemed appropriate. Parties that may oppose this Amendment should comment in their responses on any issues relevant to the Amendment.

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.,* requires DOE to give appropriate consideration to the environmental effects of its proposed decisions. No final decision will be issued in this proceeding until DOE has met its environmental responsibilities.

Public Comment Procedures

In response to this Notice, any person may file a protest, comments, or a motion to intervene or notice of intervention, as applicable, addressing the Amendment. Interested parties will be provided 30 days from the date of publication of this Notice in which to submit comments, protests, motions to intervene, or notices of intervention. The public previously was given an opportunity to intervene in, protest, and comment on Gulfstream LNG's Application in Docket No. 23–34–LNG.[5] Therefore, DOE will not consider comments or protests that do not bear directly on the proposed site change described in the Amendment.

Any person wishing to become a party to this proceeding evaluating Gulfstream LNG's Amendment must file a motion to intervene or notice of intervention. The filing of comments or a protest with respect to the Amendment will not serve to make the commenter or protestant a party to this proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the Amendment. All protests, comments, motions to intervene, or notices of intervention must meet the

[1] 15 U.S.C. 717b(a). On June 26, 2023, in DOE/FECM Order No. 5014, DOE granted the portion of the Application requesting authorization to export LNG to FTA countries under section 3(c) of the NGA, 15 U.S.C. 717b(c). That authorization is not subject to this Notice.

[2] GULFSTREAM LNG DEVELOPMENT, LLC; Application for Long-Term Authorization to Export Liquefied Natural Gas to Non-Free Trade Agreement Nations; Notice of Application, 88 FR 23023 (Apr. 14, 2023).

[3] GULFSTREAM LNG DEVELOPMENT, LLC, Amendment to Application for Long-Term Authorization to Export Liquefied Natural Gas to Free Trade Agreement and Non-Free Trade Agreement Nations, Docket No. 23–34–LNG, at 2 (Mar. 22, 2024).

[5] *See supra* note 2.

requirements specified by the regulations in 10 CFR part 590, including the service requirements.

Filings may be submitted using one of the following methods:

(1) Submitting the filing electronically at *fergas@hq.doe.gov;*

(2) Mailing the filing to the Office of Regulation, Analysis, and Engagement at the address listed in the **ADDRESSES** section; or

(3) Hand delivering the filing to the Office of Regulation, Analysis, and Engagement at the address listed in the **ADDRESSES** section.

For administrative efficiency, DOE prefers filings to be filed electronically. All filings must include a reference to ''Docket No. 23–34–LNG'' or ''Gulfstream LNG Amendment'' in the title line.

For electronic submissions: Please include all related documents and attachments (*e.g.,* exhibits) in the original email correspondence. Please do not include any active hyperlinks or password protection in any of the documents or attachments related to the filing. All electronic filings submitted to DOE must follow these guidelines to ensure that all documents are filed in a timely manner.

The Amendment, and any filed protests, motions to intervene, notices of intervention, and comments will be available electronically on the DOE website at *www.energy.gov/fecm/regulation.*

A decisional record on the Amendment will be developed through responses to this Notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final Order may be issued based on the official record, including the Amendment and responses filed by parties pursuant to this Notice, in accordance with 10 CFR 590.316.

Signed in Washington, DC, on May 2, 2024.

Amy Sweeney,

Director, Office of Regulation, Analysis, and Engagement, Office of Resource Sustainability.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Attendance at the Southwest Power Pool, Inc. Regional State Committee Meeting, Quarterly Joint Stakeholder Meeting, and Members' Committee/Board of Directors' Meetings

The Federal Energy Regulatory Commission (Commission) hereby gives notice that Commissioners and members of their staff may attend the meetings of the Southwest Power Pool, Inc., Regional State Committee (RSC), Quarterly Joint Stakeholder Meeting, Special Meeting of Members and Members' Committee/Board of Directors (Board), as noted below. Their attendance is part of the Commission's ongoing outreach efforts.

The meetings will be held at the Hyatt Regency Aurora-Denver Conference Center, 13200 East 14th Place, Aurora, CO 80111. All meetings are Mountain Time.

SPP RSC and Quarterly Joint Stakeholder Meeting

May 6, 2024 (1:00 p.m.–5:00 p.m.)

Special Meeting of Members and Members' Committee/Board Meeting

May 7, 2024 (8:00 a.m.–3:00 p.m.)

The discussions may address matters at issue in the following proceedings:

Docket No. EL22–59, *Tenaska Clear Creek Wind, LLC* v. *Southwest Power Pool, Inc. et al.*
Docket No. EL22–65, *Southwest Power Pool, Inc.*
Docket No. EL22–89, *Cage Ranch Solar I, LLC and Cage Ranch Solar II, LLC* v. *Southwest Power Pool, Inc.*
Docket No. EL24–3, *Missouri River Energy Services* v. *Southwest Power Pool, Inc.*
Docket No. EL24–61, *Montana-Dakota Utilities Company* v. *Midcontinent Independent System Operator, Inc. and Southwest Power Pool, Inc.*

Accession Number: 20240430–5143.
Comment Date: 5 p.m. ET 5/13/24.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RD24–1–000]

Commission Information Collection Activities (FERC–725S and FERC 725A); Comment Request; Revision & Extension

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of information collection revision and extension and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting

public comment on the requirements and burden of the information collection FERC–725S—*Mandatory Reliability Standards: Emergency Preparedness and Operations (EOP) Reliability Standards* and FERC–725A—*Mandatory Reliability Standards for the Bulk-Power System.* No comments were received in response to the 60-day notice published on February 22, 2024.

DATES: Comments on the collection of information are due June 6, 2024.

ADDRESSES: Send written comments on FERC–725S and/or FERC–725A (identified by Docket No. RD24–1–000) to the Office of Management and Budget (OMB) through *www.reginfo.gov/public/do/PRAMain,* Attention: Federal Energy Regulatory Commission Desk Officer. Please identify the OMB Control Number 1902–0270 (Mandatory Reliability Standards: Emergency Preparedness and Operations [EOP] Reliability Standards) or OMB Control Number 1902–0244 (Mandatory Reliability Standards for the Bulk-Power System) in the subject line. Your comments should be sent within 30 days of publication of this notice in the **Federal Register**.

Please submit copies of your comments (identified by Docket No. RD24–1–000, FERC–725S, and/or FERC–725A) to the Commission as noted below. Electronic filing through *https://www.ferc.gov* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery:
  - *Mail via U.S. Postal Service only, addressed to:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.
  - *Hand (including courier) delivery to:* Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Please reference the specific collection number(s) (FERC–725A and/or FERC–725S) and/or title(s) (Mandatory Reliability Standards: Emergency Preparedness and Operations [EOP]) Reliability Standards) or (Mandatory Reliability Standards for the Bulk-Power System) in your comments.

Instructions: OMB submissions must be formatted and filed in accordance with submission guidelines at: *www.reginfo.gov/public/do/PRAMain.* Using the search function under the ''Currently Under Review field,'' select ''Federal Energy Regulatory Commission,'' click ''submit,'' and select ''comment'' to the right of the subject collection. FERC submissions must be formatted and filed in accordance with submission guidelines at: *https://www.ferc.gov/ferc-online/overview.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *https://www.ferc.gov/ferc-online/overview.*

FOR FURTHER INFORMATION CONTACT: Jean Sonneman may be reached by email at *DataClearance@FERC.gov,* telephone at (202) 502–6362.

SUPPLEMENTARY INFORMATION:

Title: FERC–725S (Mandatory Reliability Standards: Emergency Preparedness and Operations (EOP) Reliability Standards)); FERC–725A (Mandatory Reliability Standards for the Bulk-Power System).

OMB Control No.: 1902–0270 & 1902–0244.

Type of Request: Revision and Extension to Existing Collections of Information in FERC–725S and FERC–725A.

Abstract: On February 15, 2024, the Commission published an order in Docket No. RD24–1–000 that approved Extreme Cold Weather Reliability Standards EOP–011–4 and TOP–002–5, which were submitted by the North American Electric Corporation (NERC).[1] The order included a 60-day notice in the **Federal Register** and received no comments or protests. The order modifies the FERC 725S and FERC 725A Information Collections and both information collections are currently OMB approved.

The EOP Reliability Standards are currently located in the FERC–725S (OMB Control No. 1902–0270) collection. The collection is currently approved by OMB and contains Reliability Standards EOP–010–1, EOP–011–2, EOP–004–4, EOP–005–3, EOP–006–3, EOP–008–2, and EOP–012–1. There is one Reliability Standard that is being updated within the FERC–725S due to the revisions in Docket No. RD24–1–000: Reliability Standard EOP–011–4. The currently approved Reliability Standard is EOP–011–3, which is being replaced by Reliability Standard EOP–011–4 (table 1).

The TOP Reliability Standards are currently located in FERC–725A (OMB Control No. 1902–0270) collection. This collection is currently approved by OMB and contains Reliability Standards TOP–001–4, TOP–002–4, TOP–003–4, FAC–008–5, FAC003–2, and ''Mandatory Reliability Standards'' recordkeeping and reporting. There are six information collections within the FERC–725A that will remain unchanged from the revisions in Docket No. RD24–1–000. These six collections include the Reliability Standards: TOP–001–4, TOP–003–4, FAC–008–5, FAC–003–2, and ''Mandatory Reliability Standards'' recordkeeping and reporting. There is one Reliability Standard being updated within the FERC–725A due to revisions in Docket No. RD24–1–000: Reliability Standard TOP–002–4, which is being replaced by Reliability Standard TOP–002–5 (table 2).

Types of Respondents: Balancing Authority (BA), Transmission Operations (TOP), Reliability Coordinators (RC), UFLS-Only Distribution Providers (DP), Distribution Providers (DP), and Transmission Owners (TO).

Estimate of Annual Burden:[2] The Commission based its paperwork burden estimates on the NERC compliance registry as of December 15, 2023. The Commission estimates the total annual burden and cost for this information collection in the tables below.

[1] 88 FR 76201.

[2] ''Burden'' is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR1320.3.

TABLE 1—PROPOSED CHANGES TO FERC 725S DUE TO MODIFICATIONS IN DOCKET NO. RD24–1–000

Reliability standard & requirement	Type[3] and number of entity (1)	Number of annual responses per entity (2)	Total number of responses (1) * (2) = (3)	Average number of burden hours per response[4] (4)	Total burden hours (3) * (4) = (5)
FERC–725S—Proposed estimates due to RD24–1 for EOP–011–4					
One Time Estimate—Years 1 and 2 in EOP–011–4					
EOP–011–4	165 (TOP)	1	165	40 hrs. $3,031.60	6,600 hrs. $500,214.00.
EOP–011–4	98 (BA)	1	98	20 hrs. $1,515.80	1,960 hrs. $148,548.40.
EOP–011–4	12 (RC)	1	12	20 hrs. $1,515.80	240 hrs. $18,189.60.
EOP–011–4	72 (UFLS-Only DP)	1	72	40 hrs. $3,031.60	2,880 hrs. $218,275.20.
EOP–011–4	300 (DP)	1	300	40 hrs. $3,031.60	12,000 hrs. $909,480.00.
EOP–011–4	324 (TO)	1	324	40 hrs. $3,031.60	12,960 hrs. $982,238.40.
Sub-Total of EOP–011–4 (One time)			971		36,640 hrs. $2,776,945.60.
Annualized One-Time Costs (average cost per year is calculated by the sub-total divided by 3).			323.67 (rounded)		12,213 hrs. (rounded) $925,623.27.
Ongoing Estimate—Year 3 ongoing EOP–011–4					
EOP–011–4	165(TOP)	1	165	20 hrs. $1,515.80	3,300 hrs. $250,107.00.
EOP–011–4	98 (BA)	1	98	4 hrs. $303.16	392 hrs. $29,709.68.
EOP–011–4	12 (RC)	1	12	4 hrs. $303.16	48 hrs. $3,637.92.
EOP–011–4	72 (UFLS-Only DP)	1	72	10 hrs. $757.90	720 hrs. $54,568.80.
EOP–011–4	300 (DP)	1	300	10 hrs. $757.90	3,000 hrs. $227,370.00.

TABLE 2—PROPOSED CHANGES TO FERC 725A DUE TO MODIFICATIONS IN DOCKET NO. RD24–1–000

Requirement change	Type[5] and number of respondents (1)	Annual number of annual responses per respondent (2)	Total number of responses (1) * (2) = (3)	Average burden & cost per response[6] (4)	Total annual burden hours & total annual cost (3) * (4) = (5)
FERC–725A—Proposed estimates due to RD24–1					
One Time Estimate—Years 1 and 2 in TOP–002–5					
TOP–002–5	98 (BA)	1	98	40 hrs. $3,031.60	3,920 hrs. $297,096.80.
Ongoing Estimate—Year 3 ongoing TOP–002–5					
TOP–002–5	98 (BA)	1	98	20 hrs. $1,515.80	1,960 hrs. $148,548.40.
Sub-Total of One-Time estimate for years 1 and 2.			98	40 hrs. $3,031.60	3,920 hrs. $297,096.80
Sub-Total for Ongoing estimate of year 3 and beyond.			98	20 hrs. $1,515.80	1,960 hrs. $148,548.40.
Annualized one-time Total burden for years 1 and 2 (one-time sub-total divided by 3).			32.67 (rounded)	13.33 hrs. (rounded) $1,010.28.	1,306.67 hrs. $99,032.52 (rounded).
Annualized ongoing total burden for years 3 and beyond (ongoing sub-total divided by 3).			32.67 (rounded)	6.67 hrs. $505.52 (rounded)	653.33 hrs. $49,515.88 (rounded).
Annualized Total Burden Estimate of TOP–002–5.			65.34	20 hrs. $1,515.80	1,960 hrs. 148,548.40.

[3] TOP = Transmission Operator, BA = Balancing Authority, RC = Reliability Coordinator, UFLS-Only DP = Underfrequency Load Shed-Only Distribution Provider, DP = Distribution Provider, and TO = Transmission Owner.

[4] The estimated hourly cost (salary plus benefits) is a combination based on the Bureau of Labor Statistics (BLS), as of 2023, for 75% of the average of an Electrical Engineer (17–2071) – $77.29,

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Debbie-Anne A. Reese,

Acting Secretary.

[Project No. 1889–085, Project No. 2485–071]

FirstLight MA Hydro LLC; Northfield Mountain LLC; Notice of Reasonable Period of Time for Water Quality Certification Application

On April 22, 2024, the Massachusetts Department of Environmental Protection (Massachusetts DEP) filed with the Federal Energy Regulatory Commission (Commission) notice that it received complete requests for Clean Water Act section 401(a)(1) water quality certifications from FirstLight MA Hydro LLC and Northfield Mountain LLC in conjunction with the above captioned projects, on April 22, 2024. Pursuant to section 5.23(b) of the Commission's regulations,[1] we hereby notify Massachusetts DEP of the following:

Date of Receipt of the Certification Request: April 22, 2024.

Reasonable Period of Time to Act on the Certification Request: One year, April 22, 2025.

If Massachusetts DEP fails or refuses to act on the water quality certification requests on or before the above date, then the certifying authority is deemed waived pursuant to section 401(a)(1) of the Clean Water Act, 33 U.S.C. 1341(a)(1).

Dated: April 30, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2307–086]

Alaska Electric Light & Power Company; Notice of Application for Non-Capacity Amendment of License Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Non-Capacity Amendment of License.

b. *Project No:* 2307–086.

c. *Date Filed:* October 13, 2023, and supplemented on April 26, 2024.

d. *Applicant:* Alaska Electric Light & Power Company (licensee).

e. *Name of Project:* Annex Creek and Salmon Creek Hydroelectric Project.

f. *Location:* The project is located on Annex and Salmon Creeks in the City and Borough of Juneau, Alaska. The project occupies Federal land within the Tongass National Forest, administered by the U.S. Forest Service.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Bryan Farrell, Vice President, Director of Generation, Alaska Electric Light & Power Company, 5601 Tonsgard Court, Juneau, AK, 99801; telephone: (907) 463–6387.

i. *FERC Contact:* Marybeth Gay, (202) 502–6125, *Marybeth.gay@ferc.gov.*

j. *Cooperating agencies:* With this notice, the Commission is inviting Federal, State, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item k below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. *Deadline for filing comments, motions to intervene, and protests:* May 30, 2024.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P–2307–086. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request:* The licensee proposes to replace the upper Salmon Creek penstock, which runs from the valvehouse to the abandoned upper powerhouse. The licensee states that the penstock, which is over 100 years old, must be replaced to ensure safe and reliable operation of the project for the reminder of the project license. As proposed, the licensee would replace the entire upper penstock with modern welded steel pipe that meets modern engineering and construction standards. Additionally, the licensee states that

penstock bridges over Salmon Creek that have not been recently rebuilt would be replaced with new bridges to support the new penstock.

m. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: April 30, 2024.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 5698–022]

Triton Power Company; Notice of Continuation of Relicense Proceeding

On December 31, 2020, Triton Power Company (Triton), licensee for the Chateaugay High Falls Hydroelectric Project No. 5698 (project), filed a notice of intent (NOI) to file an application for a new license for the project pursuant to section 15(b)(1) of the Federal Power Act (FPA).[1] On February 26, 2021, Commission staff issued public notice of the NOI and approved the use of the traditional licensing process to develop the license application.

Pursuant to section 15(c)(1) of the FPA [2] and section 16.9 of the Commission's regulations,[3] an existing licensee must file an application for a new license at least 24 months prior to the expiration of the current license. The current license for the project expires on December 31, 2025,[4] so the deadline for filing an application for a new license was December 31, 2023. Triton did not file an application for a new license by the filing deadline.

After Triton failed to file a timely license application, on January 12, 2024, the Commission issued a notice soliciting applications from potential applicants other than the existing licensee, pursuant to sections 16.24(a)(2) and 16.25(a) of the Commission's regulations.[5] Notices of intent to file an application for a new license were due by April 11, 2024. No potential applicants other than the existing licensee filed a notice of intent for the project.

In comments filed on January 31, 2024, Triton states that it was not able to file a timely license application due to a number of extenuating circumstances, but it intends to file a license application as soon as possible.[6] On April 26, 2024, Triton filed another letter stating that it intends to resume the relicensing process and file a license application for the project.

Because no other potential applicant filed a notice of intent to file an application for the project in response to the January 12 notice, we are waiving sections 16.24(a)(2) and 16.25(a) of the

[1] 16 U.S.C. 808(b)(1).

[2] 16 U.S.C. 808(c)(1).

[3] 18 CFR 16.9 (2023).

[4] *Triton Power Company,* 34 FERC ¶ 61,055 (1986).

[5] 18 CFR 16.24(a), 16.25(a) (2023).

[6] We consider Triton's January 31, 2024 letter to be a notice of intent under section 16.25(a).

Commission's regulations that bar an existing licensee that missed the two-year application filing deadline from filing an application.[7] An application for a new license for the project may be filed within 18 months of Triton's January 31 filing (*i.e.,* by July 31, 2025).[8] Failure to file an application by July 31, 2025, may result in Triton being directed to file a schedule for filing a surrender application pursuant to section 16.25(c)(2) of the Commission's regulations.

Questions concerning this notice should be directed to Arash Barsari at (202) 502–6207 or email at *Arash.JalaliBarsari@ferc.gov.*

Dated: April 30, 2024.

Great River Hydro, LLC; Notice of Reasonable Period of Time for Water Quality Certification Application

On April 19, 2024, the Vermont Agency of Natural Resources (Vermont ANR) filed with the Federal Energy Regulatory Commission (Commission) notice that it received complete requests for Clean Water Act section 401(a)(1) water quality certifications from Great River Hydro, LLC in conjunction with the above captioned projects, on April 18, 2024. Pursuant to section 5.23(b) of the Commission's regulations,[1] we hereby notify Vermont ANR of the following:

Date of Receipt of the Certification Request: April 18, 2024.

Reasonable Period of Time to Act on the Certification Request: One year, April 18, 2025.

If Vermont ANR fails or refuses to act on the water quality certification requests on or before the above date, then the certifying authority is deemed waived pursuant to section 401(a)(1) of the Clean Water Act, 33 U.S.C. 1341(a)(1).

Dated: April 30, 2024.

[Project No. 2307–086]

Alaska Electric Light & Power Company; Notice of Intent To Prepare an Environmental Assessment

On October 13, 2023, and supplemented on April 26, 2024, Alaska Electric Light & Power Company (licensee) filed an application for a non-capacity amendment for the Annex Creek and Salmon Creek Hydroelectric Project No. 2307. The project is located on Annex and Salmon Creeks in the City and Borough of Juneau, Alaska. The project occupies federal land within the Tongass National Forest, administered by the U.S. Forest Service.

The licensee proposes to replace the upper Salmon Creek penstock, which

[1] 18 CFR 5.23(b).

runs from the valvehouse to the abandoned upper powerhouse. The licensee states that the penstock, which is over 100 years old, must be replaced to ensure safe and reliable operation of the project for the remainder of the project license. As proposed, the licensee would replace the entire upper penstock with modern welded steel pipe that meets modern engineering and construction standards. Additionally, the licensee states that penstock bridges over Salmon Creek that have not been recently rebuilt would be replaced with new bridges to support the new penstock. A Notice of Application for Non-Capacity Amendment of License Accepted for Filing, Soliciting Comments, Motions to Intervene, and Protests was issued on April 30, 2024.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the project. The planned schedule for the completion of the EA is October 2024.[1] Revisions to the schedule may be made as appropriate. The EA will be issued and made available for review by all interested parties. All comments filed on the EA will be reviewed by staff and considered in the Commission's final decision on the proceeding.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members, and others to access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Any questions regarding this notice may be directed to Marybeth Gay at (202) 502–6125 or *Marybeth.gay@ferc.gov.*

Dated: April 30, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

Federal Energy Regulatory Commission

[Docket No. CP24–239–000]

ANR Pipeline Company; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on April 26, 2024, ANR Pipeline Company (ANR), 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, filed in the above referenced docket, a prior notice request pursuant to sections 157.205 and 157.216 of the Commission's regulations under the Natural Gas Act (NGA), and ANR's blanket certificate issued in Docket No. CP82–480–000, for authorization to abandon one injection/withdrawal well located in its Loreed Storage Field in Osceola County, Michigan (Loreed PN 8868 Well Abandonment Project). The project will allow ANR to limit integrity risk in alignment with the U.S. Department of Transportation's Pipeline and Hazardous Materials Safety Administration's Storage Final Rule. ANR estimates the cost for the project to be $265,000, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the

Public Reference Room at *public.referenceroom@ferc.gov.*

Any questions concerning this request should be directed to David A. Alonzo, Manager of Project Authorizations, ANR Pipeline Company, 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, at (832) 320–5477, or *david_alonzo@tcenergy.com.*

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5:00 p.m. Eastern Time on July 1, 2024. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,[1] any person [2] or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,[3] and must be submitted by the protest deadline, which is July 1, 2024. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure [4] and the regulations under the NGA [5] by the intervention deadline for the project, which is July 1, 2024. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/resources/guides/how-to/intervene.asp.*

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before July 1, 2024. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP24–239–000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov)* under the link to Documents and Filings. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Protest'', ''Intervention'', or ''Comment on a Filing''; or [6]

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP24–239–000.

To file via USPS: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426

To file via any other method: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Protests and motions to intervene must be served on the applicant either by mail or email (with a link to the document) at: David A. Alonzo, Manager of Project Authorizations, ANR Pipeline Company, 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, or *david_alonzo@tcenergy.com.* Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link

[1] 18 CFR 157.205.

[2] Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

[3] 18 CFR 157.205(e).

[4] 18 CFR 385.214.

[5] 18 CFR 157.10.

[6] Additionally, you may file your comments electronically by using the eComment feature, which is located on the Commission's website at *www.ferc.gov* under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project.

as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2024–0093; FRL–11877–01–OCSPP]

Notice of Receipt of Requests to Voluntarily Cancel Certain Pesticide Registrations and/or Amend Registrations To Terminate Certain Uses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is issuing a notice of receipt of requests by the registrants to voluntarily cancel their registrations of certain products and/or to amend their product registrations to terminate one or more uses. EPA intends to grant these requests at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the request, or unless the registrants withdraw its requests. If these requests are granted, any sale, distribution, or use of products listed in this notice will be permitted after the registrations have been cancelled and/or uses terminated only if such sale, distribution, or use is consistent with the terms as described in the final order.

DATES: Comments must be received on or before June 6, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2024–0093, through the *Federal eRulemaking Portal* at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Christopher Green, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–2707; email address: *green.christopher@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *https://www.epa.gov/dockets.*

II. What action is the Agency taking?

This notice announces receipt by EPA of requests from registrants to cancel certain and/or terminate certain pesticide product registrations. The affected products and the registrants making the requests are identified in Tables 1–3 of this unit.

Unless a request is withdrawn by the registrant or if the Agency determines that there are substantive comments that warrant further review of this request, EPA intends to issue an order canceling and/or amending the affected registrations.

TABLE 1—PRODUCT REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION

Registration No.	Company No.	Product name	Active ingredients
4–473	4	Bonide Garden Dust	Basic copper sulfate (008101/1344–73–6)—(5%), Pyrethrins (069001/8003–34–7)—(.03%), Sulfur (077501/7704–34–9)—(25%).
4–474	4	Bonide Vegetable-Floral Dust	Basic copper sulfate (008101/1344–73–6)—(13.72%), Carbaryl (056801/63–25–2)—(1.25%).
100–1441	100	Bravo Top	Chlorothalonil (081901/1897–45–6)—(40%), Difenoconazole (128847/119446–68–3)—(4%).
228–423	228	DQD Selective Herbicide	2,4–D, dimethylamine salt (030019/2008–39–1)—(25.4%), Dicamba (029801/1918–00–9)—(2.64%), Quinclorac (128974/84087–01–4)—(7.91%).
228–594	228	Quincept Herbicide Ready to Use	2,4–D, dimethylamine salt (030019/2008–39–1)—(.331%), Dicamba (029801/1918–00–9)—(.034%), Quinclorac (128974/84087–01–4)—(.206%).
228–703	228	Quincept LT Herbicide Ready-to-Use	2,4–D (030001/94–75–7)—(.331%), Dicamba (029801/1918–00–9)—(.034%), Quinclorac (128974/84087–01–4)—(.137%).

TABLE 1—PRODUCT REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION—Continued

Registration No.	Company No.	Product name	Active ingredients
228–704	228	Quincept LT Herbicide Premium Lawn Weed Killer Concentrate.	2,4–D (030001/94–75–7)—(6.557%), Dicamba (029801/1918–00–9)—(.681%), Quinclorac (128974/84087–01–4)—(2.724%).
228–705	228	NUP–09066 Herbicide	2,4–D (030001/94–75–7)—(13.2%), Dicamba (029801/1918–00–9)—(1.38%), Quinclorac (128974/84087–01–4)—(5.5%).

III. What is the Agency's authority for taking this action?

Section 6(f)(1) of FIFRA (7 U.S.C. 136d(f)(1)) provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**.

Section 6(f)(1)(B) of FIFRA (7 U.S.C. 136d(f)(1)(B)) requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, FIFRA section 6(f)(1)(C) (7 U.S.C. 136d(f)(1)(C)) requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or
2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The registrants have requested that EPA waive the 180-day comment period. Accordingly, EPA will provide a 30-day comment period on the proposed requests.

IV. Procedures for Withdrawal of Requests

Registrants who choose to withdraw a request for product cancellation or use termination should submit the withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. If the products(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

V. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of the action. If the requests for voluntary cancellation and/or amendments to terminate uses are granted, the Agency intends to publish the cancellation order in the **Federal Register**.

In any order issued in response to these requests for cancellation of product registrations and/or for amendments to terminate uses, EPA proposes to include the following provisions for the treatment of any existing stocks of the products listed in Tables 1 and 2 of Unit II.

For: 352–938

For 352–98, Corteva, the registrant of the product subject to this cancellation order, did not request that EPA allow the continued sale, distribution, or use of existing stocks of this product. Additionally, Corteva confirmed that they ceased selling this product in 2021. Thus, all sale, distribution, and use of existing stocks of this product is prohibited, except for the sale or distribution of this product for export consistent with FIFRA section 17 (7 U.S.C. 136o) and for proper disposal.

For all other voluntary product cancellations, registrants will be permitted to sell and distribute existing stocks of voluntarily canceled products for 1 year after the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. Thereafter, registrants will be prohibited from selling or distributing the products identified in Table 1 of Unit II, except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Once EPA has approved product labels reflecting the requested amendments to terminate uses, registrants will be permitted to sell or distribute products under the previously approved labeling for a period of 18 months after the date of **Federal Register** publication of the cancellation order, unless other restrictions have been imposed. Thereafter, registrants will be prohibited from selling or distributing the products whose labels include the terminated uses identified in Table 2 of Unit II, except for export consistent with FIFRA section 17 or for proper disposal.

Persons other than the registrant may sell, distribute, or use existing stocks of canceled products and/or products whose labels include the terminated uses until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the canceled products and/or terminated uses.

Authority: 7 U.S.C. 136 *et seq.*

Dated: April 30, 2024.

Charles Smith,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2024–0093; FRL–11876–01–OCSPP]

Notice of Receipt of Requests To Voluntarily Cancel Certain Pesticide Registrations and/or Amend Registrations To Terminate Certain Uses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is issuing a notice of receipt of requests by the registrants to voluntarily cancel their registrations of certain products and/or to amend their product registrations to terminate one or more uses. EPA intends to grant these requests at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the request, or unless the registrants withdraw its requests. If these requests are granted, any sale,

distribution, or use of products listed in this notice will be permitted after the registrations have been cancelled and/or uses terminated only if such sale, distribution, or use is consistent with the terms as described in the final order.

DATES: Comments must be received on or before November 4, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2024–0093, through the *Federal eRulemaking Portal* at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Christopher Green, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–2707; email address: *green.christopher@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *https://www.epa.gov/dockets.*

II. What action is the Agency taking?

This notice announces receipt by EPA of requests from registrants to cancel certain and/or terminate certain uses of pesticide product registrations. The affected products and the registrants making the requests are identified in tables 1–3 of this unit.

Unless a request is withdrawn by the registrant or if the Agency determines that there are substantive comments that warrant further review of this request, EPA intends to issue an order canceling and/or amending the affected registrations.

TABLE 1—PRODUCT REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION

Registration No.	Company No.	Product name	Active ingredients
44446–67	44446	Concept Hospital Disinfectant Deodorant	4-tert-Amylphenol (064101/80–46–6)—(.05%), Ethanol (001501/64–17–5)—(53%), o-Phenylphenol (NO INERT USE) (064103/90–43–7)—(.2%).
85588–13	85588	AgSurf MSM Herbicide	Metsulfuron (122010/74223–64–6)—(60%).

TABLE 2—PRODUCT REGISTRATIONS WITH PENDING REQUESTS FOR AMENDMENT

Registration No.	Company No.	Product name	Active ingredient	Uses to be terminated
53883–197	53883	Lambda 0.5% Concentrate	lambda-Cyhalothrin (128897/91465–08–6)—(.5%).	Lawn & turf use in residential settings.

Table 3 of this unit includes the name and addresses of record for the registrants of the products listed in table 1 and table 2 of this unit, in sequence by EPA company number. This number corresponds to the first part of the EPA registration numbers of the products listed in table 1 and table 2 of this unit.

TABLE 3—REGISTRANTS REQUESTING VOLUNTARY CANCELLATION AND/OR AMENDMENTS

EPA company No.	Company name and address
44446	QuestSpecialty Corporation, P.O. Box: 624, Brenham, TX 77834.
53883	Control Solutions, Inc., 5903 Genoa Red Bluff Road, Pasadena, TX 77507.
85588	AgSurf Corporation, 9805 Statesville Road, Suite 6309, Charlotte, NC 28269.

III. What is the Agency's authority for taking this action?

Section 6(f)(1) of FIFRA (7 U.S.C. 136d(f)(1)) provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**.

Section 6(f)(1)(B) of FIFRA (7 U.S.C. 136d(f)(1)(B)) requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, FIFRA section

6(f)(1)(C) (7 U.S.C. 136d(f)(1)(C)) requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or

2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The registrants have not requested that EPA waive the 180-day comment period. Accordingly, EPA will provide a 180-day comment period on the proposed requests.

IV. Procedures for Withdrawal of Requests

Registrants who choose to withdraw a request for product cancellation or use termination should submit the withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. If the products(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

V. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of the action. If the requests for voluntary cancellation and/or amendments to terminate uses are granted, the Agency intends to publish the cancellation order in the **Federal Register**.

In any order issued in response to these requests for cancellation of a product registration and/or for an amendment to terminate uses, EPA proposes to include the following provisions for the treatment of any existing stocks of the products listed in tables 1 and 2 of unit II.

For: 85588–13

For *85588–13,* AgSurf Corporation, the registrant of the product subject to this cancellation notice, requests an existing stocks provision allowing the continued sale and distribution of the affected product until 18 months after the cancellation is published in the **Federal Register**.

For all other voluntary product cancellations, registrants will be permitted to sell and distribute existing stocks of voluntarily canceled products for 1 year after the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. Thereafter, registrants will be prohibited from selling or distributing the products identified in table 1 of unit II, except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Once EPA has approved product labels reflecting the requested amendments to terminate uses, registrants will be permitted to sell or distribute products under the previously approved labeling for a period of 18 months after the date of **Federal Register** publication of the cancellation order, unless other restrictions have been imposed. Thereafter, registrants will be prohibited from selling or distributing the products whose labels include the terminated uses identified in table 2 of unit II, except for export consistent with FIFRA section 17 or for proper disposal.

Persons other than the registrant may sell, distribute, or use existing stocks of canceled products and/or products whose labels include the terminated uses until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the canceled products and/or terminated uses.

Authority: 7 U.S.C. 136 *et seq.*

Dated: April 30, 2024.

Charles Smith,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–P

EXPORT-IMPORT BANK

[Public Notice: 2024–6010]

Agency Information Collection Activities: Submission to the Office of Management and Budget for Review and Approval; Comment Request; Export-Import Bank Report of Premiums Payable for Exporters Only

AGENCY: Export-Import Bank of the United States.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Export-Import Bank of the United States (EXIM), pursuant to the Export-Import Bank Act of 1945, as amended, facilitates the finance of the export of U.S. goods and services. As part of its continuing effort to reduce paperwork and respondent burden, EXIM invites the general public and other Federal Agencies to comment on the proposed information collection, as required by the paperwork Reduction Act of 1995.

DATES: Comments must be received on or before July 8, 2024 to be assured of consideration.

ADDRESSES: Comments may be submitted electronically on *WWW.REGULATIONS.GOV* (EIB 92–29), by email to Cristina Conti *Conti@exim.gov,* or by mail to Cristina Conti, Export-Import Bank of the United States, 811 Vermont Ave. NW, Washington, DC 20571.

FOR FURTHER INFORMATION CONTACT: To request additional information please contact Cristina Conti, *Cristina.conti@exim.gov,* 202–565–3804.

SUPPLEMENTARY INFORMATION: The ''Report of Premiums Payable for Exporters Only'' form is used by exporters to report and pay premiums on insured shipments to various foreign buyers under the terms of the policy and to certify that premiums have been correctly computed and remitted. Individual transactions that an exporter may have with the same foreign borrower can be sub-totaled and entered as a single line item for the specific month provided the length of payment term is identical. The use of sub-totals reduces the administrative burden on the exporter. The 'Report of Premiums Payable for Exporters Only' is used by the Bank to determine the eligibility of the shipment(s) and to calculate the premium due to Ex-Im Bank for its support of the shipment(s) under its insurance program.

No changes are being made to the form in use.

The application tool can be reviewed at *https://img.exim.gov/s3fs-public/forms/eib92-29.pdf.*

Title and Form Number: EIB 92–29 Export-Import Bank Report of Premiums Payable for Exporters Only.

OMB Number: 3048–0017.

Type of Review: Regular.

Need and Use: The ''Report of Premiums Payable for Exporters Only'' form is used by exporters to report and pay premiums on insured shipments to various foreign buyers under the terms of the policy and to certify that premiums have been correctly computed and remitted. The collection provides EXIM staff with the information necessary to monitor the borrower's payments for exported goods covered under its short and medium-term export credit insurance policies. It also alerts EXIM staff of defaults, so they can manage the portfolio in an informed manner.

Affected Public: This form affects entities involved in the export of U.S. goods and services.

Annual Number of Respondents: 2,000.

Estimated Time per Respondent: 15 minutes.

Annual Burden Hours: 6,000 hours.

Frequency of Reporting or Use: Monthly.

Dated: May 1, 2024.

Kalesha Malloy,

IT Specialist.

BILLING CODE 6690–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1151; FR ID 217642]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.'' The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before June 6, 2024.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Nicole Ongele at (202) 418–2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–1151.

Title: Sections 1.1411, 1.1412, 1.1415, and 1.1416 Pole Attachment Access and Dispute Resolution Requirements.

Form Number: FCC Form 5653.

Type of Review: Revision of a currently-approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 1,380 respondents; 165,009 responses.

Estimated Time per Response: 0.25—5 hours.

Frequency of Response: On-occasion reporting requirement, recordkeeping requirement, and third-party disclosure requirement.

Obligation to Respond: Mandatory or required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 224.

Total Annual Burden: 120,980 hours.

Total Annual Cost: $1,800.

Needs and Uses: The Commission is requesting Office of Management and Budget (OMB) approval for a revision to a currently approved information collection. In *Accelerating Wireline Broadband Deployment by Removing Barriers to Infrastructure Investment,* WC Docket No. 17–84, Fourth Report and Order, FCC 23–109 (rel. December 15, 2023) (Order), the Commission adopted rules that implement the pole attachment requirements in section 224 of the Communications Act of 1934, as amended. The Order substantially revised 47 CFR 1.1411, redesignated existing 47 CFR 1.1415 as 47 CFR 1.1416, and added a new 47 CFR 1.1415.

Section 1.1411. In the Order, the Commission adopted regulations requiring utilities to share information about their poles with prospective telecommunications and cable attachers. The Commission created this requirement to help improve the attachment process and potentially reduce disputes, thus facilitating broadband deployment. Specifically, the Order requires utilities to provide to potential attachers, upon request, the information contained in their most recent cyclical pole inspection reports, or any intervening, periodic reports created before the next cyclical inspection, for the poles covered by a submitted attachment application, including whether any of the affected poles have been ''red tagged'' by the utility for replacement and the scheduled replacement date or timeframe (if any). For the purposes of this new transparency requirement, a cyclical pole inspection report is any report that a utility creates in the normal course of its business that sets forth the results of the routine inspection of its poles during the utility's normal pole inspection cycle, while a periodic pole inspection report is any report that a utility creates in the normal course of its business that sets forth the results of the inspection of any of its poles outside the utility's normal pole inspection cycle.

When asking for information about the status of a utility's poles for a

planned buildout, the attacher must submit its information request no earlier than contemporaneously with an attachment application. The utility will have ten business days to respond to the request. Where an attacher amends its application based on the information it receives from the utility, the utility will have the option to restart the 45-day period for responding to the application on the merits and conducting the required make-ready survey. Regardless of whether the utility elects to restart the 45-day response period, any additional survey costs necessitated by the amended application, such as a second survey after a survey for the original application has been completed, will be borne by the new attacher consistent with the new attacher's obligation to pay for make-ready costs associated with its application.

The Commission also required utilities to retain copies, in whatever form they were created, of any such cyclical or periodic pole inspection reports they conduct in the normal course of business, until such time as the utility completes a superseding cyclical pole inspection report covering the poles included in the attachment application. The Commission reiterated that utilities are required to provide only the information they already possess and track in the normal course of conducting pole inspections at the time of the attacher's request for data. The Commission did not require utilities to collect or create new information for the purpose of responding to such requests or to provide all information they may possess on the affected poles outside their pole inspection reports. The Commission found that adopting this limited requirement achieves a balance between a potential attacher's need for more information about the poles that it plans to use as part of a broadband buildout and the utility's interest in minimizing the burden of mandatory disclosures.

Section 1.1415. To expedite the resolution of pole attachment disputes that impede or delay active broadband deployment projects, the Commission established the Rapid Broadband Assessment Team (RBAT), which will consist of one or more staff from the Commission's Enforcement Bureau and one or more staff from the Commission's Wireline Competition Bureau. The Commission created the RBAT in an effort to make the Commission's pole attachment dispute resolution process more responsive and adaptable with the goal of facilitating broadband deployment. The Order charged the RBAT with expediting the resolution of such disputes by swiftly engaging key stakeholders, gathering relevant information, distilling issues in dispute, and recommending to the parties, where appropriate, an abbreviated mediation process, placement of a complaint (or portion of a complaint) on the Commission's Accelerated Docket based on consideration of specified criteria, and/or any other action that the RBAT determines will help the parties resolve their dispute.

To request RBAT review and assessment of a dispute that a party to the dispute contends is impeding or delaying deployment of broadband facilities, the party must first notify the Chief of the Enforcement Bureau's Market Disputes Resolution Division (MDRD) of the request by phone and in writing. The MDRD Chief will direct the party to FCC Form 5653—Request for RBAT Review and Assessment—on the MDRD website and to instructions for completing and electronically transmitting the form to the RBAT. The form will elicit information relevant to the scope and nature of the dispute, and to whether the dispute is appropriate for expedited mediation and/or placement on the Accelerated Docket. The information submitted by a party on the FCC Form 5653 will assist the RBAT in efficiently reviewing and assessing the party's dispute and in providing guidance on the most effective means of resolving it. The RBAT also may request that one or both parties provide the RBAT with documentation or other information relevant to the dispute. After reviewing the parties' submissions, the RBAT will provide guidance and advice to the parties on the most effective means of resolving their dispute, including staff-supervised mediation, use of the Accelerated Docket, and/or other action.

Should the RBAT recommend staff-supervised mediation, it shall be conducted pursuant to 47 CFR 1.737, the requirements of which may be modified or waived as appropriate in this context or as needed in light of the facts or circumstances of a particular case. In the event that the parties are unable to settle their dispute, and a prospective complainant seeks placement of its complaint on the Accelerated Docket, the RBAT will decide whether the complaint or a portion of the complaint is suitable for inclusion on the Accelerated Docket based on a totality of the factors listed in 47 CFR 1.1415(e).

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1162; FR ID 218294]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before June 6, 2024.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on

the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, and (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–1162.

Title: Closed Captioning of Video Programming Delivered Using internet Protocol, and Apparatus Closed Caption Requirements.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Individuals or Household, Businesses or other for-profit, Not-for-profit institutions, State, local, or tribal government, Federal Government.

Number of Respondents and Responses: 1,172 respondents; 3,341 responses.

Estimated Time per Response: 0.084–10 hours.

Frequency of Response: One time and on occasion reporting requirements; Recordkeeping requirement; Third party disclosure requirement.

Obligation to Respond: Mandatory; Required to obtain or retain benefits. The statutory authority for this collection is contained in the Twenty-First Century Communications and Video Accessibility Act of 2010, Public Law 111–260, 124 Stat. 2751, and sections 4(i), 4(j), 303, 330(b), 713, and 716 of the Communications Act of 1934, as amended (the Act), 47 U.S.C. 154(i), 154(j), 303, 330(b), 613, and 617.

Total Annual Burden: 9,197 hours.

Total Annual Cost: $95,700.

Needs and Uses: The Twenty-First Century Communications and Video Accessibility Act of 2010 (CVAA) directed the Commission to revise its regulations to mandate closed captioning on video programming delivered via internet Protocol (IP) that was published or exhibited on television with captions after the effective date of the regulations. Accordingly, the Commission requires video programming owners (VPOs) to send program files to video programming distributors and providers (hereinafter VPDs) with required captions, and it requires VPDs to enable the rendering or pass through of all required captions to the end user. The CVAA also directed the Commission to revise its regulations to mandate that all apparatus designed to receive, play back, or record video programming be equipped with built-in closed caption decoder circuitry or capability designed to display closed-captioned video programming, except that apparatus that use a picture screen that is 13 inches or smaller and recording devices must comply only if doing so is achievable. These rules are codified at 47 CFR 79.4 and 79.100–79.104.

The information collection requirements consist of:

(a) Mechanism for information about video programming subject to the IP closed captioning requirements.

Pursuant to 47 CFR 79.4(c)(1)(ii) and (c)(2)(ii) of the Commission's rules, VPOs and VPDs must agree upon a mechanism to make information available to VPDs about video programming that becomes subject to the requirements of 47 CFR 79.4 on an ongoing basis. VPDs must make a good faith effort to identify video programming that must be captioned when delivered using IP using the agreed upon mechanism.

For example, VPOs and VPDs may agree on a mechanism whereby the VPOs provide captions or certifications that captions are not required, and update those certifications and provide captions when captions later become required. A VPD may rely in good faith on a certification by a VPO that the programming need not be captioned if: (1) the certification includes a clear and concise explanation of why captions are not required; and (2) the VPD is able to produce the certification to the Commission in the event of a complaint. VPOs may provide certifications for specific programming or a more general certification, for example, for all programming covered by a particular contract.

VPDs may seek Commission determinations that other proposed mechanisms provide adequate information for them to rely on in good faith by filing an informal request and providing sufficient information for the Commission to make such determinations.

(b) Contact information for the receipt and handling of written closed captioning complaints.

Pursuant to 47 CFR 79.4(c)(2)(iii), VPDs must make their contact information available to end users for the receipt and handling of written IP closed captioning complaints. The required contact information includes the name of a person with primary responsibility for IP captioning issues and who can ensure compliance with these rules, as well as the person's title or office, telephone number, fax number, postal mailing address, and email address. VPDs must keep this information current and update it within 10 business days of any change. The Commission expects that such contact information will be prominently displayed in a way that it is accessible to all end users. A general notice on the VPD's website with such contact information, if provided, must be provided in a location that is conspicuous to viewers.

(c) Petitions for exemption based on economic burden.

Pursuant to 47 CFR 79.4(d), a VPO or VPD may petition the Commission for a full or partial exemption from the closed captioning requirements for IP-delivered video programming based upon a showing that they would be economically burdensome. Petitions for exemption must be supported with sufficient evidence to demonstrate economic burden (significant difficulty or expense). The Commission will consider four specific factors when determining economic burden and any other factors the petitioner deems relevant, along with any available alternatives that might constitute a

reasonable substitute for the closed captioning requirements. The Commission will evaluate economic burden with regard to the individual outlet. Petitions and subsequent pleadings must be filed electronically.

The Commission will place such petitions on public notice. Comments or oppositions to the petition may be filed electronically within 30 days after release of the public notice of the petition, and must include a certification that the petitioner was served with a copy. The petitioner may reply to any comments or oppositions filed within 20 days after the close of the period for filing comments or oppositions, and replies must include a certification that the commenting or opposing party was served with a copy. Upon a finding of good cause, the Commission may lengthen or shorten any comment period and waive or establish other procedural requirements. Petitions and responsive pleadings must include a detailed, full showing, supported by affidavit, of any facts or considerations relied on.

(d) Complaints alleging violations of the closed captioning rules for IP-delivered video programming.

Pursuant to 47 CFR 79.4(e), a written complaint alleging a violation of the closed captioning rules for IP-delivered video programming may be filed with the Commission or with the VPD responsible for enabling the rendering or pass through of the closed captions for the video programming. Complaints must be filed within 60 days after the date the complainant experienced a problem with captioning. Complaints should (but are not required to) include certain information.

If the complaint is filed first with the VPD, the VPD must respond in writing to the complainant within 30 days after receipt of a closed captioning complaint. If a VPD fails to respond timely, or the response does not satisfy the consumer, the complainant may re-file the complaint with the Commission within 30 days after the time allotted for the VPD to respond. If a consumer re-files the complaint with the Commission (after filing with the VPD) and the complaint satisfies the requirements, the Commission will forward the complaint to the named VPD, as well as to any other VPD and/or VPO that Commission staff determines may be involved, who then must respond in writing to the Commission and the complainant within 30 days after receipt of the complaint from the Commission.

If the complaint is filed first with the Commission and the complaint satisfies the requirements, the Commission will forward the complaint to the named VPD and/or VPO, and to any other VPD and/or VPO that Commission staff determine may be involved, who must respond in writing to the Commission and the complainant within 30 days after receipt of the complaint from the Commission. In response to a complaint, a VPD and/or VPO must provide the Commission with sufficient records and documentation. The Commission will review all relevant information provided by the complainant and the subject VPDs and/or VPOs, as well as any additional information the Commission deems relevant from its files or public sources. The Commission may request additional information from any relevant entities when, in the estimation of Commission staff, such information is needed to investigate the complaint or adjudicate potential violation(s) of Commission rules. When the Commission requests additional information, parties to which such requests are addressed must provide the requested information in the manner and within the time period the Commission specifies.

(e) Requests for Commission determination of technical feasibility of apparatus closed caption requirements.

Pursuant to 47 CFR 79.103(a), as of January 1, 2014, all digital apparatus designed to receive or play back video programming that uses a picture screen of any size must be equipped with built-in closed caption decoder circuitry or capability designed to display closed-captioned video programming, if technically feasible. If new apparatus or classes of apparatus for viewing video programming emerge on which it would not be technically feasible to include closed captioning, parties may raise that argument as a defense to a complaint or, alternatively, file a request under 47 CFR 1.41 for a Commission determination of technical feasibility before manufacturing or importing the product.

(f) Requests for Commission determination of achievability of apparatus closed caption requirements.

Pursuant to 47 CFR 79.103(a), as of January 1, 2014, all digital apparatus designed to receive or play back video programming that use a picture screen less than 13 inches in size must be equipped with built-in closed caption decoder circuitry or capability designed to display closed-captioned video programming, only if doing so is achievable. In addition, pursuant to 47 CFR 79.104(a), as of January 1, 2014, all apparatus designed to record video programming must enable the rendering or the pass through of closed captions such that viewers are able to activate and de-activate the closed captions as the video programming is played back, only if doing so is achievable.

Manufacturers of such apparatus may petition the Commission, pursuant to 47 CFR 1.41, for a full or partial exemption from the closed captioning requirements before manufacturing or importing the apparatus or may assert as a response to a complaint that these requirements, in full or in part, are not achievable. Pursuant to 47 CFR 79.103(b)(3), such a petition or response must be supported with sufficient evidence to demonstrate that compliance is not achievable (meaning with reasonable effort or expense) and the Commission will consider four specific factors when making such determinations.

(g) Petitions for purpose-based waivers of apparatus closed caption requirements.

Manufacturers seeking certainty prior to the sale of a device may petition the Commission, pursuant to 47 CFR 79.103(b)(4), for a full or partial waiver of the closed captioning requirements based on one of the following provisions:

(i) The apparatus is primarily designed for activities other than receiving or playing back video programming transmitted simultaneously with sound; or

(ii) The apparatus is designed for multiple purposes, capable of receiving or playing back video programming transmitted simultaneously with sound but whose essential utility is derived from other purposes.

(h) Complaints alleging violations of the apparatus closed caption requirements.

Consumers may file written complaints alleging violations of the Commission's rules, 47 CFR 79.101–79.104, requiring apparatus designed to receive, play back, or record video programming to be equipped with built-in closed caption decoder circuitry or capability designed to display closed captions. A written complaint filed with the Commission must be transmitted to the Consumer and Governmental Affairs Bureau through the Commission's online informal complaint filing system, U.S. Mail, overnight delivery, or facsimile. Such complaints should include certain information about the complainant and the alleged violation. The Commission may forward such complaints to the named manufacturer or provider, as well as to any other entity that Commission staff determines may be involved, and may request additional information from any relevant parties when, in the estimation of Commission staff, such information is needed to investigate the complaint or

adjudicate potential violations of Commission rules.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

[OMB No. 3064–0082; –0084]

Agency Information Collection Activities: Proposed Collection Renewal; Comment Request

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: The FDIC, as part of its obligations under the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to take this opportunity to comment on the renewal of the existing information collections described below (OMB Control No. 3064–0082; –0084).

DATES: Comments must be submitted on or before July 8, 2024.

ADDRESSES: Interested parties are invited to submit written comments to the FDIC by any of the following methods:

- *Agency Website: https://www.fdic.gov/resources/regulations/federal-register-publications/.*
- *Email: comments@fdic.gov.* Include the name and number of the collection in the subject line of the message.
- *Mail:* Manny Cabeza (202–898–3767), Regulatory Counsel, MB–3128, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.
- *Hand Delivery:* Comments may be hand-delivered to the guard station at the rear of the 17th Street NW building (located on F Street NW), on business days between 7:00 a.m. and 5:00 p.m.

All comments should refer to the relevant OMB control number. A copy of the comments may also be submitted to the OMB desk officer for the FDIC: Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Manny Cabeza, Regulatory Counsel, 202–898–3767, *mcabeza@fdic.gov,* MB–3128, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

Proposal to renew the following currently approved collection of information:

1. *Title:* Recordkeeping, Disclosure and Reporting Requirements in Connection with Regulation Z.

OMB Number: 3064–0082.

Form Number: None.

Affected Public: FDIC-Supervised Institutions.

Burden Estimate:

TABLE 1—SUMMARY OF ESTIMATED ANNUAL IMPLEMENTATION BURDEN

[OMB No. 3064–0082]

Information collection (IC) (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (HH:MM)	Annual burden (hours)
Open-End Credit Products: • Not Home-Secured Open-End Credit Plans ○ Credit and Charge Card Provisions					
Timely Settlement of Estate Debts Written Policies and Procedures, 12 CFR 1026.11(c)(1) (Mandatory).	Recordkeeping (On Occasion)	8	1	08:00	64
Ability to Pay Written Policies and Procedures, 12 CFR 1026.51(a)(ii) (Mandatory).	Recordkeeping (On Occasion)	8	1	08:00	64
Mortgage Products (Open and Closed-End): • Valuation Independence ○ Mandatory Reporting					
Implementation of Policies and Procedures, 12 CFR 1026.42(g) (Mandatory).	Recordkeeping (On Occasion)	8	1	20:00	160
Total Annual Implementation Burden (Hours).					288

Source: FDIC.

Note: The estimated annual IC time burden is the product, rounded to the nearest hour, of the estimated annual number of responses and the estimated time per response for a given IC. The estimated annual number of responses is the product, rounded to the nearest whole number, of the estimated annual number of respondents and the estimated annual number of responses per respondent. This methodology ensures the estimated annual burdens in the table are consistent with the values recorded in OMB's consolidated information system.

Total Annual Ongoing Burden (Hours).					1,959,488

Source: FDIC.

Note: The estimated annual IC time burden is the product, rounded to the nearest hour, of the estimated annual number of responses and the estimated time per response for a given IC. The estimated annual number of responses is the product, rounded to the nearest whole number, of the estimated annual number of respondents and the estimated annual number of responses per respondent. This methodology ensures the estimated annual burdens in the table are consistent with the values recorded in OMB's consolidated information system.

General Description of Collection: Consumer Financial Protection Bureau (CFPB) Regulation Z—12 CFR 1026 implements the Truth in Lending Act (15 U.S.C. 1601, *et seq.*) and certain provisions of the Real Estate Settlement Procedures Act (12 U.S.C. 2601 *et seq.*). This regulation prescribes uniform methods for computing the cost of credit, the disclosure of credit terms and costs, the resolution of errors and imposes various other recordkeeping, reporting and disclosure requirements. The FDIC has enforcement authority on the requirements of the CFPB's Regulation over the financial institutions it supervises. This information collection captures the recordkeeping, reporting, and disclosure burdens of Regulation Z on FDIC-supervised institutions. To arrive at the estimated annual burden the FDIC assessed the number of potential respondents to the information collection by identifying the number of FDIC-supervised institutions who reported activity that would be within the scope of the information collection requirements according to data from the most recent Call Report. Additionally, the FDIC estimated the frequency of responses to the recordkeeping, reporting, or disclosure requirements by assessing the dollar volume of activity that would be within the scope of the information collection. In some instances, the FDIC used information provided by other sources to estimate the magnitude and scope of activity attributable to FDIC-supervised institutions when more immediate information sources did not exist.

The estimated annual burden, in hours, is the product of the estimated number of respondents per year, estimated number of responses per respondent per year, and estimated hours per response, as summarized in Table 1 for the implementation burden and in Table 2 for the ongoing burden, below. The total estimated annual burden for this Information Collection Request (ICR) is 1,959,766 hours (288 hours estimated implementation burden, plus 1,959,488 hours estimated ongoing burden), which is a decrease of 71,838 hours from the 2021 estimate. As the estimated time per response remained the same from the 2021 ICR, the change in the total estimated annual burden hours is attributable to the decrease in the estimated number of respondents in Table 2.

2. *Title:* Account Based Disclosures in Connection with Consumer Financial Protection Bureau Regulations E and DD and Federal Reserve Regulation CC.

[OMB No. 3064–0084]

Information collection (IC) (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (HH:MM)	Annual burden (hours)
40. Reg CC Consumer Burden—Expedited recredit claim notice, 12 CFR 229.54(a) and 12 CFR 229.54(b)(2) (Mandatory).	Reporting (On Occasion)	2,936	8	00:15	5,872
Total Annual Burden (Hours):					546,946

Source: FDIC.
Note: The estimated annual IC time burden is the product, rounded to the nearest hour, of the estimated annual number of responses and the estimated time per response for a given IC. The estimated annual number of responses is the product, rounded to the nearest whole number, of the estimated annual number of respondents and the estimated annual number of responses per respondent. This methodology ensures the estimated annual burdens in the table are consistent with the values recorded in OMB's consolidated information system.

General Description of Collection: Regulations E & DD (Consumer Financial Protection Bureau's Regulations) and Regulation CC (the Federal Reserve's Regulation) ensure adequate disclosures regarding accounts, including electronic fund transfer services, availability of funds, and fees and annual percentage yield for deposit accounts. Generally, the Regulation E disclosures are designed to ensure consumers receive adequate disclosure of basic terms, costs, and rights relating to electronic fund transfer (EFT) services provided to them so that they can make informed decisions. Institutions offering EFT services must disclose to consumers certain information, including: Initial and updated EFT terms, transaction information, the consumer's potential liability for unauthorized transfers, and error resolution rights and procedures. Like Regulation E, Regulation CC contains consumer protection disclosure requirements. Specifically, Regulation CC requires depository institutions to make funds deposited in transaction accounts available within specified time periods, disclose their availability policies to customers, and begin accruing interest on such deposits promptly. The disclosures are intended to alert customers that their ability to use deposited funds may be delayed, prevent unintentional (and costly) overdrafts, and allow customers to compare the policies of different institutions before deciding at which institution to deposit funds. Depository institutions must also provide an awareness disclosure regarding substitute checks. The regulation also requires notice to the depositary bank and to a customer of nonpayment of a check. Regulation DD also has similar consumer protection disclosure requirements that are intended to assist consumers in comparing deposit accounts offered by institutions, principally through the disclosure of fees, the annual percentage yield, and other account terms. Regulation DD requires depository institutions to disclose yields, fees, and other terms concerning deposit accounts to consumers at account opening, upon request, and when changes in terms occur.

Depository institutions that provide periodic statements are required to include information about fees imposed, interest earned, and the annual percentage yield (APY) earned during those statement periods. It also contains rules about advertising deposit accounts. This Information Collection Request (ICR) is being revised as a result of the addition of five (5) new information collection requirements contained in CFPB's Regulation E, Subpart B. The estimated annual burden, in hours, is the product of the estimated number of respondents per year, estimated number of responses per respondent per year, and estimated hours per response, as summarized in the Table above. The total estimated annual burden for this ICR is 546,946 hours, which is a decrease of 45,875 hours from our estimate in the 2021 memo (592,821 hours). This decrease can be explained largely by a decline in the number of FDIC-supervised IDIs from December 31, 2020 (the period used in the previous OMB renewal) to December 31, 2023. This decrease is attenuated by the inclusion of five ICs pertaining to recordkeeping and disclosure requirements associated with remittance transfers in Subpart B of CFPB Regulation E.

The estimated annual burden and change in burden, broken down by each Regulation (E, DD, and CC), is as follows:

Regulation	2021 Total annual burden (hours)	2024 Total annual burden (hours)	Change (hours)
CFPB Regulation E	28,950	38,297	+ 9,347
CFPB Regulation DD	223,594	201,688	−21,906
FRB Regulation CC	340,277	306,961	−33,316
Total Annual Burden	592,821	546,946	−45,875

Request for Comment

Comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the

use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Federal Deposit Insurance Corporation.

BILLING CODE P

GENERAL SERVICES ADMINISTRATION

[Notice-MG–2024–01; Docket No.2024–0002; Sequence No.19]

Office of Federal High-Performance Green Buildings; Green Building Advisory Committee; Notification of Upcoming Public Meetings

AGENCY: Office of Government-wide Policy, General Services Administration (GSA).

ACTION: Meeting notice.

SUMMARY: In accordance with the requirements of the Federal Advisory Committee Act, this notice provides the agenda for a series of web-based meetings of the Green Building Advisory Committee's, (the Committee), Federal Buy Clean Implications Task Group (the Task Group).

The meetings are open to the public to observe; online attendees are required to register in advance to attend as instructed below.

DATES: The Committee's Federal Buy Clean Act Implications Task Group will hold a series of web-based meetings on alternate Thursdays from May 23, 2024, through February 27, 2025, from 3:00 p.m. to 4:00 p.m., Eastern Time (ET).

FOR FURTHER INFORMATION CONTACT: Mr. Michael Bloom, Designated Federal Officer, Office of Federal High-Performance Green Buildings, Office of Government-wide Policy, GSA, 1800 F Street NW, (Mail-code: MG), Washington, DC 20405, at *gbac@gsa.gov* or 312–805–6799. Additional information about the Committee, including meeting materials and agendas, will be made available on-line at *https://www.gsa.gov/gbac.*

SUPPLEMENTARY INFORMATION:

Procedures for Attendance and Public Comment

To register to observe any or all of these meetings, please send the following information via email to *gbac@gsa.gov:* your first and last name, organization and email address and whether you would like to provide public comment.

Requests to observe the full series of Task Group meetings must be received by 5:00 p.m. ET, on Tuesday, May 21, 2024. After that time, requests to observe ongoing Task Group meetings must be received by 5:00 p.m. ET on the Tuesday before the meeting in question. Since Task Group meetings are conducted as a series, it will be most useful to observe all or most of them from the start.

For all online meetings, web meeting attendance information will be provided following registration. Time will be provided at all meetings for public comment wherever possible.

GSA will be unable to provide technical assistance to any listener experiencing technical difficulties. Testing access to the web meeting site before the calls is recommended. To request an accommodation, such as closed captioning, or to ask about accessibility, please contact Mr. Bloom at *gbac@gsa.gov* at least five business days prior to the meeting to give GSA as much time as possible to process the request.

Background

The Administrator of GSA established the Committee on June 20, 2011 (**Federal Register**/Vol. 76, No. 118) pursuant to Section 494 of the Energy Independence and Security Act of 2007 (EISA, 42 U.S.C. 17123). Under this authority, the Committee provides independent policy advice and recommendations to GSA to advance federal building innovations in planning, design, and operations to reduce costs, enable agency missions, enhance human health and performance, and minimize environmental impacts.

Federal Buy Clean Implications Task Group

The Federal Buy Clean Implications Task Group will continue the Committee's work on the topic of Building Decarbonization by assessing the impact of the Federal Buy Clean Initiative within the broader scope of the Inflation Reduction Act, focusing on its influence on procurement practices and material selection in Federal Buildings.

The purpose of these web-based meetings is for the Task Group to develop consensus recommendations for submission to the full Committee. The Committee will, in turn, deliberate on the Task Group recommendations and decide whether to proceed with formal advice to GSA based upon them.

Brian Gilligan,

Acting Federal Director, Office of Federal High-Performance Green Buildings, General Services Administration.

BILLING CODE 6820–14–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–24–0943; Docket No. CDC–2024–0033]

Proposed Data Collections Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies to take this opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Data Collection for the Residential Care Community and Adult Day Services Center Components of the National Post-Acute and Long-Term Care Study. The purpose is to collect data for the residential care community and adult day services center components for the 2024 wave of the National Post-Acute and Long-Term Care Study.

DATES: Written comments must be received on or before July 8, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0033 by either of the following methods:

• *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.

• *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all public comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

Data Collection for the Residential Care Community and Adult Day Service Center Components of the National Post-acute and Long-term Care Study (OMB Control No. 0920–0943 Exp. 7/31/2025)—Revision—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Section 306 of the Public Health Service (PHS) Act (42 U.S.C. 242k), as amended, authorizes that the Secretary of Health and Human Services (DHHS), acting through NCHS, shall collect statistics on health resources . . . [and] utilization of health care, including extended care facilities, and other institutions. NCHS seeks approval to collect data for the residential care community (RCC) and adult day services center (ADSC) components of the 7th National Post-Acute and Long-Term Care Study (NPALS). A two-year clearance is requested.

Details on the complete study design include the following. The NPALS is designed to: (1) broaden NCHS' ongoing coverage of paid, regulated long-term care (LTC) providers; (2) present alongside existing administrative data on LTC providers and service users (*i.e.,* Centers for Medicare and Medicaid Services (CMS) data on inpatient rehabilitation facilities and patients, long-term care hospitals and patients, nursing homes and residents, home health agencies and patients, and hospices and patients); (3) update data more frequently on LTC providers and service users for which nationally representative administrative data do not exist; and (4) enable comparisons across LTC sectors and timely monitoring of supply and use of these sectors over time.

Data will be collected from two types of LTC providers in the 50 states and the District of Columbia: 11,600 RCCs and 5,500 ADSCs. Data were collected in 2012, 2014, 2016, 2018, 2020, and 2022. The data to be collected in 2024 include the basic characteristics, services, staffing, and practices of RCCs and ADSCs, and aggregate-level distributions of the demographics, selected health conditions and health care utilization, physical functioning, and cognitive functioning of RCC residents and ADSC participants. Expected users of data from this collection effort include, but are not limited to CDC; other Department of Health and Human Services (DHHS) agencies, such as the Office of the Assistant Secretary for Planning and Evaluation, The Administration for Community Living, and the Agency for Healthcare Research and Quality; associations, such as LeadingAge, National Center for Assisted Living, American Seniors Housing Association, Argentum, and National Adult Day Services Association; universities; foundations; and other private sector organizations such as the Alzheimer's Association and the AARP Public Policy Institute.

Expected burden from data collection for eligible cases is 30 minutes per respondent. An estimated 5% of RCC and ADSC respondents will have an additional five minutes of burden to complete a data retrieval call. We calculated the burden based on a 100% response rate. CDC requests OMB

approval for an estimated 4,311 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
RCC Director/Designated Staff Member.	RCC Questionnaire	5,800	1	30/60	2,900
ADSC Director/Designated Staff Member.	ADSC Questionnaire	2,750	1	30/60	1,375
RCC/ADSC Director/Designated Staff Member.	Data retrieval call	428	1	5/60	36
Total					4,311

Jeffrey M. Zirger,

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–24–0212; Docket No. CDC–2024–0035]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled the National Hospital Care Survey (NHCS). The goal of the project is to assess patient care in hospital-based settings and to describe patterns of health care delivery and utilization in the United States.

DATES: CDC must receive written comments on or before July 8, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0035 by any of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

National Hospital Care Survey (NHCS) (OMB Control No. 0920–0212, Exp. 12/31/2024)—Revision—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Section 306 of the Public Health Service (PHS) Act (42 U.S.C. 242k), as amended, authorizes that the Secretary of Health and Human Services (DHHS), acting through NCHS, shall collect statistics on the extent and nature of illness and disability of the population of the United States. This three-year clearance request for National Hospital Care Survey (NHCS) includes the collection of all inpatient and ambulatory Uniform Bill–04 (UB–04) claims data or electronic health record (EHR) data as well as the collection of hospital-level information via a questionnaire from a sample of 608 hospitals.

The National Ambulatory Medical Care Survey (NAMCS) was conducted intermittently from 1973 through 1985,

and annually since 1989. The survey is conducted under authority of Section 306 of the Public Health Service Act (42 U.S.C. 242k). The National Hospital Discharge Survey (NHDS) (OMB No. 0920–0212, Exp. Date 01/31/2019), conducted continuously between 1965 and 2010, was the Nation's principal source of data on inpatient utilization of short-stay, non-institutional, non-Federal hospitals, and was the principal source of nationally representative estimates on the characteristics of inpatients including lengths of stay, diagnoses, surgical and non-surgical procedures, and patterns of use of care in hospitals in various regions of the country. In 2011, NHDS was granted approval by OMB to expand its content and to change its name to the National Hospital Care Survey (NHCS).

In May 2011, recruitment of sampled hospitals for the NHCS began. Hospitals in the NHCS are asked to provide data on all inpatients from their UB–04 administrative claims, or EHRs. Hospital-level characteristics and information about telemedicine usage in the healthcare setting are collected through an Annual Hospital Interview. NHCS will continue to provide the same national health-care statistics on hospitals that NHDS provided. Additionally, NHCS collects more information at the hospital level (*e.g.,* volume of care provided by the hospital), which allow for analyses on the effect of hospital characteristics on the quality of care provided. NHCS data collected from UB–04 administrative claims and EHRs include all inpatient discharges, not just a sample. The confidential collection of personally identifiable information (PII) allows NCHS to link episodes of care provided to the same patient in the ED and/or OPD and as an inpatient, as well as link patients to the National Death Index (NDI) to measure post-discharge mortality, and Medicare and Medicaid data to leverage comorbidities. The availability of patient identifiers also makes analysis on hospital readmissions possible. This comprehensive collection of data makes future opportunities for surveillance possible, including analyzing trends and incidence of opioid misuse, acute myocardial infarction, heart failure and stroke, as well as trends and point prevalence of health care acquired infections and antimicrobial use.

Beginning in 2013, in addition to inpatient hospital data, hospitals participating in NHCS were asked to provide data on the utilization of health care services in their ambulatory settings (*e.g.,* EDs and OPDs). Due to low response rates and a high level of missing data, OPD data were not collected in the last approval period (2022, 2023 and 2024). Collection of OPD may resume in future years.

Data collected through NHCS are essential for evaluating the health status of the population, for the planning of programs and policy to improve health care delivery systems of the Nation, for studying morbidity trends, and for research activities in the health field.

Changes to the data collection survey include the removal of COVID–19 questions from the Annual Hospital Interview (AHI). The burden hours have been reduced due to a decrease in the sample size. The new total annualized burden is 5,826 hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Respondents	Form name	Number of respondents	Number of responses per respondent	Avg. burden per response (in hours)	Total burden (in hours)
Hospital DHIM or DHIT	Initial Hospital Intake Questionnaire	123	1	1	123
Hospital CEO/CFO	Recruitment Survey Presentation	30	1	1	30
Hospital DHIM or DHIT	Prepare and transmit UB–04 or State File for Inpatient and Ambulatory (monthly).	356	12	1	4,272
Hospital DHIM or DHIT	Prepare and transmit EHR for Inpatient and Ambulatory (quarterly).	200	4	1	800
Hospital CEO/CFO	Annual Hospital Interview	601	1	1	601
Total					5,826

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60-Day–24–24FA; Docket No. CDC–2024–0032]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on an information collection project titled Human-Centered Design Effort on Bringing Guidelines to the Digital Age. This information collection will allow CDC to understand pain points in developing solutions that help develop and implement guidelines that leverage technology to improve patient care.

DATES: CDC must receive written comments on or before July 8, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0032 by either of the following methods:

• *Federal eRulemaking Portal: www.regulations.gov*. Follow the instructions for submitting comments.

• *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov*.

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov*.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Human-Centered Design Effort on Bringing Guidelines to the Digital Age—Existing Collection in Use Without an OMB Control Number—Office of Public Health Data, Surveillance, and Technology (OPHDST), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Given the increased demand to improve clinical guideline development and implementation, a new approach that began with an initiative on Adapting Clinical Guidelines for the Digital Age has been expanded by Guidelines International Network (GIN) North America to implement a future state of guideline development and implementation that leverages advancements in technology. To identify pain points in the process, CDC plans to engage individuals from multiple perspectives in guideline development and implementation in discussion. CDC requests approval for an Existing Collection in Use Without an OMB Control Number for a data collection titled Human-Centered Design Effort on Bringing Guidelines to the Digital Age.

CDC will use semi-structured interviews to collect data for this study. The interviews will explore insights about guideline development and implementation as well as pain points in this process. Data will be used to inform the structure of a human-centered design workshop where participants use the pain points identified as starting points for designing solutions. Burden estimates include the time for respondents to be participate in semi-structured interviews. CDC requests OMB approval for an estimated 33 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form Name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Clinicians	Clinician Conversation Guide	5	1	1	5
EHR Vendors	EHR Vendor Conversation Guide	2	1	1	2

Centers for Disease Control and Prevention

[60Day–24–1355; Docket No. CDC–2024–0022]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Evaluation of the Division of Overdose Prevention Technical Assistance Center. This data collection allows CDC to collect information from partner organizations regarding feedback on their experiences receiving technical assistance.

DATES: CDC must receive written comments on or before July 8, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0022 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Evaluation of the Division of Overdose Prevention Technical Assistance Center (OMB Control No., 0920–1355, Exp. 11/30/202)—Revision—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC) is submitting a Revision request for the currently approved Evaluating the Overdose Data to Action TA Hub (OMB Control No. 0920–1355, Exp. Date 11/30/2024) for three years. CDC requests a three-year OMB approval to support the evaluation of technical assistance (TA) provided for the Overdose Data to Action (OD2A) in States (S) and OD2A: Limiting Overdose through Collaborative Actions in Localities (LOCAL) programs. OD2A–S and OD2A: LOCAL are cooperative agreements funded in 2023 to focus on comprehensive and interdisciplinary opioid overdose prevention efforts in 49 state health departments, 39 localities, Puerto Rico, and Washington, DC. Each program consists of two required components—a surveillance component and a prevention component. OD2A recipients implement a combination of activities across nine state strategies and eight local strategies within these components in order to gain access to high quality, complete, and timelier data on opioid prescribing and overdoses and to use those data to inform prevention and response efforts in their jurisdictions.

In the previously approved iteration of this data collection, the information collected surrounding OD2A (version 1.0) recipient feedback on their experiences receiving TA proved invaluable in the process of improving TA delivery and overall providing more useful TA. The feedback provided in the original data collection instruments was also used to improve the TA Strategy of the updated iterations of OD2A (including OD2A–S and OD2A: LOCAL) and their recipients. With the information that was collected in the previously approved ICR, CDC can more effectively deliver TA to an almost-doubled recipient group across two programs instead of one and ensure that continuous improvement in TA is occurring. Further information gathering through the two new instruments proposed in this ICR (the Implementation Feedback Form and the Focus Group script), will even more acutely enhance TA perspectives and needs to effectively and responsibly utilize the DOP TA Center resource.

Training and technical assistance (TA) is essential to building knowledge and strengthening the capacity of recipients to implement and evaluate OD2A program strategies. CDC will develop and deploy a TA hub (hereafter referred to as the DOP TA Center) to deliver comprehensive technical assistance and training to support the successful implementation and evaluation of surveillance and prevention activities. The DOP TA Center is designed to enhance the efficiency, coordination, and

effectiveness of TA efforts by streamlining and centralizing the provision of overdose surveillance and prevention TA. TA to OD2A recipients is divided into four different levels with multiple modes of TA delivery and involves a wide range of TA providers including CDC staff, internal and external subject matter experts (SMEs) and program partners as well as Tanaq and ICF staff. The four TA levels below are used to direct the process for engaging stakeholders to support program recipients and triage appropriate resources to support their needs.

CDC requests OMB approval for an estimated 388 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
OD2A (OD2A in States and OD2A: LOCAL) Recipients.	Individual TA Feedback Form	618	2	5/60	103
	Universal TA Feedback Form	617	2	5/60	103
	Implementation Feedback Survey	18	1	15/60	4.5
	Annual Technical Assistance Survey	162	1	10/60	27
	Email invitation for Annual	900		2/60	30
	Focus Group Session Script	100	1	1	100
	Focus Groups Email invitation	600	1	2/60	20
Total					388

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–24–24FI; Docket No. CDC–2024–0036]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Comprehensive Evaluations of the Division for Heart Disease and Stroke Prevention Programs (WISEWOMAN, National CVH Program, Innovative CVH Program). The purpose of the data collection is to evaluate the implementation of evidence-based strategies within these programs, measure their impact on cardiovascular disease (CVD) prevention and management, and to identify strategies that are most effective in reaching populations disproportionately affected by CVD.

DATES: CDC must receive written comments on or before July 8, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0036 by either of the following methods:

• *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.

• *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

Comprehensive Evaluations of the Division for Heart Disease and Stroke Prevention Programs (WISEWOMAN, National CVH Program, Innovative CVH Program)—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC) Division for Heart Disease and Stroke Prevention (DHDSP) are submitting this new three-year information collection request (ICR) for an evaluation of three recently launched cooperative agreements: Well-Integrated Screening of Women Across the Nation (WISEWOMAN), The National Cardiovascular Health Program (The National CVH Program), and The Innovative Cardiovascular Health Program (The Innovative CVH Program).

The WISEWOMAN program supports the early detection and treatment of hypertension in low-income, uninsured, and underinsured participants, ages 35–64. The National CVH Program implements evidence-based strategies to manage CVD in populations impacted by the high prevalence of CVD, exacerbated by health inequities and disparities, emphasizing hypertension and high cholesterol control among adults aged 18–85. The Innovative CVH Program focuses on implementing innovative evidence-based strategies to assess and address the health disparities and inequities in communities at highest risk (defined as census tracts with a crude hypertension prevalence of 53% or higher), where there is a particular need for equity-focused health system interventions to prevent, detect, control, and manage hypertension and high cholesterol. These three programs build upon CDC's previous work to identify promising CVD prevention and management practices and fund various organizations, including State and County governments, American Indian or Alaska Native tribal governments, non-government organizations, institutions of higher education, to implement evidence-based strategies in their jurisdictions. Since the programs are a substantial investment of federal funds, comprehensive evaluations are important to demonstrate the types of interventions being implemented and what is being accomplished using these funds.

The comprehensive evaluation of these programs includes process and outcome evaluations, and a cross-program analysis to assess the unique contributions of each program towards evidence-based strategies, health equity advancement, and health system transformation over the five program years. The evaluation aims to describe the implementation of the programs, assess the extent to which short-term, intermediate, and long-term outcomes have been met, and estimate the costs involved in implementing the programs. The comprehensive evaluation is designed to complement the evaluations already being conducted by program recipients. The data collection focuses on obtaining qualitative and cost information at the organizational and community levels about strategy implementation, facilitators and barriers, and other contextual information that affects program implementation and participant outcomes. Data collection activities of the comprehensive evaluation include qualitative interviews for evaluability assessments, exploratory assessments, and cost data collected for a cost study. During the qualitative data collection, semi-structured interviews will be conducted with recipients, their partnering sites, and Learning Collaborative members, providing a multifaceted view of the program's implementation and outcomes. Cost data will be used to estimate the implementation costs and value of resources invested by program recipients and their partners. Cost data will be collected through a spreadsheet-based cost inventory tool, key informant interviews, and document reviews. There are no costs to respondents except their time. Data collection tools are crafted to ensure relevance and capture essential information needed to evaluate the effectiveness and impact of the program strategies, while minimizing respondent burden.

The findings from the data collection will provide tailored, action-oriented, and timely recommendations for program improvement throughout the program period. Findings will foster documentation and sharing of lessons learned, contribute to the evidence base, and support replication and scaling of promising program strategies. Without collection of evaluative data, CDC will not be able to capture critical information needed to continuously improve programmatic efforts and clearly demonstrate the responsible use of federal funds.

CDC requests OMB approval for an estimated 2,054 annual burden hours. There is no cost to respondents other than their time to participate.

Estimated Annualized Burden Hours:

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Recipients	Evaluability Assessment Nomination Form_NCHP_ICHP.	72	1	0.5	36

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-24-24EZ; Docket No. CDC–2024–0031]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Assessing Sexual and Gender Minority (SGM) Occupational Well-Being from The PRIDE Study. This project aims to describe the SGM workforce population, their health and well-being experiences,

and their work-related health and well-being determinants and outcomes.

DATES: CDC must receive written comments on or before July 8, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0031 by either of the following methods:

• *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.

• *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Assessing Sexual and Gender Minority Occupational Well-Being from The PRIDE Study—New—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Persons who are lesbian, gay, bisexual, transgender, queer, intersex, or another sexual orientation/gender identity (LGBTQIA+), also known as sexual and gender minority (SGM) persons, comprise a notable and rapidly growing percentage of the U.S. working population. Yet they are often overlooked in terms of health research and policies offering health assurances and safety protections at work. Currently, there is no national dataset or data system that provides detailed health experiences and well-being information on SGM workers. The Population Research in Identity and Disparities for Equality (PRIDE) Study is a national SGM community health survey conducted by The University of California, San Francisco (UCSF) and Stanford University and the first national, longitudinal cohort study of comprehensive SGM physical, mental, and social health that studies how being LGBTQIA+ influences health. The proposed project will enable The PRIDE Study to collect, for the first time, information on the health and well-being experiences of SGM workers, and for NIOSH to use these findings to characterize the U.S. SGM workforce, their health experiences, and factors potentially associated with their work-related health outcomes. Primary data will be collected from The PRIDE Study's ongoing participant cohort, using a survey to collect information through The PRIDE Study's online digital survey platform. The survey will be a modified version of NIOSH's Worker Well-Being Questionnaire (WellBQ) to include work and health experience information specific to SGM workers. Results will be used to establish descriptive baseline health information on U.S. SGM workers, describe factors that may be associated with SGM worker health and well-being outcomes, and improve the capabilities of The PRIDE Study, a population health assessment tool, to better assess the work-related health experiences of the SGM workforce.

CDC requests OMB approval for an estimated 1,015 annual burden hours. There are no costs to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
PRIDE Study participants	Sexual and Gender Minority Occupational Well-Being Questionnaire.	3,044	1	20/60	1,015
Total					1,015

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on January 23, 2024 to obtain comments from the public and affected agencies. CDC received two comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery (OMB Control No. 0920–1071, Exp. 5/31/2024)—Revision—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Executive Order 12862 directs federal agencies to provide service to the public that matches or exceeds the best service available in the private sector. In order to work continuously to ensure that our programs are effective and meet our customers' needs, the National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC) (hereafter the ''Agency'') seeks to obtain OMB approval of a Generic Clearance to collect qualitative feedback on our service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study.

This collection of information is necessary to enable the Agency to garner customer and stakeholder feedback in an efficient, timely manner, in accordance with our commitment to improving service delivery. The information collected from our customers and stakeholders will help ensure that users have an effective, efficient, and satisfying experience with the Agency's programs. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

This Revision includes a request to increase the burden allotment from the previously approved 3,850 hours to 5,000 hours. CDC's use of this Generic has continued to increase since 2015. Increasing the burden would help the Agency continue to garner customer and stakeholder feedback to improve service delivery. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of collection	Number of respondents	Annual frequency per response	Hours per response	Total hours
Online Surveys	3800	1	30/60	1900
Focus Groups	800	1	2	1600
In-person Surveys	1000	1	30/60	500
Usability testing	1500	1	30/60	750
Customer comment cards	1000	1	15/60	250

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Public Health Ethics and Regulations, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for Office of Management and Budget Review; Proposed Information Collection Activity; Generic Clearance for Financial Reports Used for ACF Non-Discretionary Grant Programs (Office of Management and Budget #: 0970–0510)

AGENCY: Office of Planning, Research, and Evaluation, Administration for Children and Families, U.S. Department of Health and Human Services.

AGENCY: Administration for Children and Families, Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Administration for Children and Families (ACF) proposes to extend approval of the existing overarching generic clearance for Financial Reports used for ACF Non-discretionary Grant Programs (OMB #0970–0510) as well as all information collections currently approved under the overarching generic. There are no changes to the proposed types of information collection or uses of data as described in the overarching generic. The title of the collection has been updated from *ACF Mandatory Grant Programs* to *ACF Non-Discretionary Grant Programs.* This request also includes updates to three of the collections approved under this generic (GenICs): the Child Care and Development Fund (CCDF) ACF–696 Financial Report for States and Territories, the CCDF ACF–696T Financial Report for Tribal Grantees, and the Child Support Services Program Financial Reporting Forms (OCSS–34 and OCSS–396). Finally, burden estimates for the next 3 years have been adjusted based on use to date.

DATES: *Comments due June 6, 2024.* OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. You can also obtain copies of the proposed collection of information by emailing *OPREinfocollection@acf.hhs.gov.* Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: ACF programs require detailed financial information from their grantees that allows ACF to monitor various specialized cost categories within each program, to closely manage program activities, and to have sufficient financial information to enable periodic thorough and detailed audits.

The information included on the standard Federal Financial Report Form (SF–425; OMB #4040–0014) provides only minimal, bare-bones, non-program specific financial information insufficient for these purposes. This generic clearance allows ACF programs to efficiently develop and receive approval for financial reports that are tailored to specific funding recipients and the associated needs of the program. This umbrella generic is a mechanism that is available to all ACF non-discretionary grant programs to obtain OMB approval of financial forms. Currently only a small number of ACF's non-discretionary grant program financial forms are covered under this umbrella; it does *not* cover all ACF non-discretionary grant program financial forms.

Program offices use the information collected under this generic information collection to:

- Monitor program operations and prepare technical assistance and guidance as needed.
- Assess the effect of program changes and make informed decisions.
- Assist in the computation of the grant awards issued to each program's grantees.
- Assist in the computation of the Child Support Services program's annual incentive payments.
- Determine that child support collections are being properly distributed (Child Support Services Program only).
- Ensure funding recipients are meeting funding requirements established by Congress.
- Produce annual financial and statistical reports as may be required by Congress and respond to periodic detailed inquiries from Congress.

ACF may require an information collection approved under this generic from funding recipients to obtain or retain benefits.

Prior to a new form being submitted for review under this umbrella generic, ACF will publish a notice in the **Federal Register** announcing the agency's intention to request an OMB review of the form and providing a 14-day period for public comment on that specific request. ACF will review any comments received and address them as appropriate. ACF will provide a copy of any comments received and will provide a description of how comments were considered in the submission form, along with the request package for the individual collection. ACF will then follow standard OMB requirements for a generic information collection and submit a generic information collection request for each individual data collection activity under this generic clearance. Each request will include the individual form(s) and instructions, a summary of any comments received, and a short overview of the proposed purpose and use of the data collected. ACF requests OMB to review requests within 10 days of submission.

This request includes the extension of multiple GenICs and requests updates to three of these GenICs through this revision process.

- *CCDF ACF–696 Financial Report for States and Territories:* ACF proposes minor updates to the ACF–696 form that include the removal of ''CCDX2'' which is a subaccount code not used by ACF; the removal of Column F for ''Discretionary Disaster Relief Funds Construction and Major Renovation Grant Document Number CCDY'' which is a program not funded by ACF; the removal of line 9(a) ''was the state or territory unable to obligate at least 50% of the CCDF stabilization grants by December 11, 2021?'' because this question relates to a subaccount for a program set to close by 9/30/2024; and the removal of the reallotted funds selection for COVID supplemental funds since the deadline to request reallotted funds for these subaccount awards is in the past. The instructions for this form were updated to account for the described changes, to clarify existing instructions, and to update language to reflect current Office of Child Care and Office of Grants Management policies and program instruction to recipients.
- *CCDF ACF–696T Financial Report for Tribal Grantees:* ACF proposes minor updates to the ACF–696 form that include the removal of ''CCDX2'' which is a subaccount code not used by ACF;

the removal of Column F for ''Discretionary Disaster Relief Funds Construction and Major Renovation Grant Document Number CCDY'' which is a program not funded by ACF; the renaming of line 13a ''total federal unliquidated'' to ''total federal obligations (not yet liquidated) (excluding construction/major renovation'' to clarify what amount should be reported on this line; the addition of line 13b. ''total federal obligations Into yet liquidated) for construction/major renovation'' to distinguish between CCDF activities and activities for the construction or major renovation of CCDF projects; the removal of line 14(a) ''was the tribal lead agency unable to obligate at least 50% of the CCDF stabilization grants by December 11, 2021? '' because this question relates to a subaccount for a program set to close by 9/30/2024; and the removal of the reallotted funds selection for COVID supplemental funds since the deadline to request reallotted funds for these subaccount awards is in the past. The instructions for this form were updated to account for the described changes, to clarify existing instructions, and to update language to reflect current Office of Child Care and Office of Grants Management policies and program instruction to recipients.

- *Child Support Services Program Financial Reporting Forms (OCSS–34 and OCSS–396):* The title of these forms was updated to reflect the change in name of the program office from the Office of Child Support Enforcement to the Office of Child Support Services. References to the name within the forms and instructions were also updated.

Respondents: ACF-funded non-discretionary grant programs.

Annual Burden Estimates

Find currently approved information collections here: *https://www.reginfo.gov/public/do/PRAICList?ref_nbr=202308-0970-008.* The request to OMB will include an extension request for the following approved collections.

Burden Estimates—Ongoing Requests

Study	Number of respondents	Number of responses per respondent	Average burden hours per response	Annual burden hours
Child Care and Development Fund (CCDF) ACF–696 Financial Report for States and Territories	56	4	5	1,344
Child Care and Development Fund (CCDF) ACF–696T Financial Report for Tribal Grantees	221	1	7	1,547
Child Support Services Program Financial Reporting Forms (OCSS–34 and OCSS–396)	168	4	14	9,408
Form CB–496: Title IV–E Programs Quarterly Financial Report	67	4	25	6,700
Refugee Cash and Medical Assistance Federal Financial Report (ORR–2) Supplemental Data Collection	66	1	1.67	110
Refugee Support Services Federal Financial Report (SF–425) Supplemental Data Collection	53	4	4	848
Totals:	768	Avg: 2.7	Avg: 8.9	19,957

Burden Estimates—New Requests

Based on use of this generic, we have revised burden estimates for the next 3 years.

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Burden hours
Non-discretionary Grant Financial Reports	700	4	12	33,600

Mary C. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184–88–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Statement of Organization, Functions, and Delegations of Authority

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration's (FDA), Center for Devices and Radiological Health's (CDRH), Office of Communication and Education (OCE) has modified their organizational structure. The new organizational structure was approved by the Secretary of Health and Human Services on December 21, 2023, and it became effective on January 22, 2024.

FOR FURTHER INFORMATION CONTACT: Yashika Rahaman, Director, Office of Planning, Evaluation and Risk Management, Office of Finance, Budget, Acquisitions and Planning, Food and Drug Administration, 4041 Powder Mill Rd., Beltsville, MD 20705–4304, 301–796–3843.

I. Introduction

Part D, Chapter D–B, (Food and Drug Administration), the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (35 FR 3685, February 25, 1970, 60 FR 56606, November 9, 1995, 64 FR 36361, July 6, 1999, 72 FR 50112, August 30, 2007, 74 FR 41713, August 18, 2009, 76 FR 45270, July 28, 2011, and 84 FR 22854, May 20, 2019) is amended to reflect the reorganization of the CDRH OCE.

The reorganization retitled OCE as the Office of Communication, Information Disclosure, Training, and Education (OCITE); abolished the Digital Communication Media Staff; established the Office of Communication and Content Development (OCCD) and the Office of Training and Education (OTE) within OCITE, established the Division of Digital Communication and Marketing (DDCM) within OCCD, and realigned the existing divisions to the new offices.

DCCE. ORGANIZATION. CDRH's OCITE is headed by the Director, and includes the following:

Office of Communication, Information Disclosure, Training, and Education (DCCE)

Program Management Operations Staff (DCCE1)

Office of Communication and Content Development (DCCEE)

Division of Communication (DCCEEA)

Division of Information Disclosure (DCCEEB)

Division of Digital Communication and Marketing (DCCEEC)

Office of Training and Education (DCCEF)

Division of Employee Training and Development (DCCEFA)

Division of Industry and Consumer Education (DCCEFB)

II. Delegations of Authority

Pending further delegation, directives, or orders by the Commissioner of Food and Drugs, all delegations and redelegations of authority made to officials and employees of affected organizational components will continue in them or their successors pending further redelegations, provided they are consistent with this reorganization.

III. Electronic Access

This reorganization is reflected in FDA's Staff Manual Guide (SMG). Persons interested in seeing the complete SMG can find it on FDA's website at: *https://www.fda.gov/AboutFDA/ReportsManualsForms/StaffManualGuides/default.htm.*

(Authority: 44 U.S.C. 3101).

Xavier Becerra,

Secretary, Department of Health and Human Services.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Statement of Organization, Functions, and Delegations of Authority

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration's (FDA), Center for Devices and Radiological Health's (CDRH), Office of Product Evaluation and Quality (OPEQ) has modified their organizational structure. The new organizational structure was approved by the Secretary of Health and Human Services on December 21, 2023, and it became effective on January 22, 2024.

FOR FURTHER INFORMATION CONTACT: Yashika Rahaman, Director, Office of Planning, Evaluation and Risk Management, Office of Finance, Budget, Acquisitions and Planning, Food and Drug Administration, 4041 Powder Mill Rd., Beltsville, MD 20705–4304, 301–796–3843.

I. Introduction

Part D, Chapter D–B, (Food and Drug Administration), the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (35 FR 3685, February 25, 1970, 60 FR 56606, November 9, 1995, 64 FR 36361, July 6, 1999, 72 FR 50112, August 30, 2007, 74 FR 41713, August 18, 2009, 76 FR 45270, July 28, 2011, and 84 FR 22854, May 20, 2019) is amended to reflect the reorganization of the CDRH OCE.

The reorganization of OPEQ impacted the OPEQ's Office of Clinical Evidence and Analysis (OCEA) and the OPEQ's Office of Health Technology IV (OHT IV). OCEA established the Division of Clinical Evidence and Analysis IV and the Division of Clinical Evidence and Analysis V. OHT IV established the Division of Health Technology IV C.

DCCFB. ORGANIZATION. CDRH's OPEQ OCEA is headed by the Director, and includes the following:

Office of Clinical Evidence and Analysis (DCCFB)

Division of Clinical Evidence and Analysis I (DCCFBA)

Division of Clinical Evidence and Analysis II (DCCFBB)

Division of Clinical Evidence and Analysis III (DCCFBC)

Division of Clinical Evidence and Analysis IV (DCCFBD)

Division of Clinical Evidence and Analysis V (DCCFBE)

DCCFF. ORGANIZATION. CDRH's OPEQ OHT IV is headed by the Director, and includes the following:

Office of Health Technology IV (DCCFF)

Division of Health Technology IV A (DCCFFA)

Division of Health Technology IV B (DCCFFB)

Division of Health Technology IV C (DCCFFC)

II. Delegations of Authority

Pending further delegation, directives, or orders by the Commissioner of Food and Drugs, all delegations and redelegations of authority made to officials and employees of affected organizational components will continue in them or their successors pending further redelegations, provided they are consistent with this reorganization.

III. Electronic Access

This reorganization is reflected in FDA's Staff Manual Guide (SMG). Persons interested in seeing the complete SMG can find it on FDA's website at: *https://www.fda.gov/AboutFDA/ReportsManualsForms/StaffManualGuides/default.htm.*

Food and Drug Administration

[Docket No. FDA–2024–N–1917]

Fresenius Kabi USA, LLC, et. al.; Withdrawal of Approval of 12 Abbreviated New Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is withdrawing approval of 12 abbreviated new drug applications (ANDAs) from multiple applicants. The applicants notified the Agency in writing that the drug products were no longer marketed and requested that the approval of the applications be withdrawn.

DATES: Approval is withdrawn as of June 6, 2024.

FOR FURTHER INFORMATION CONTACT: Martha Nguyen, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New

Hampshire Ave., Bldg. 75, Rm. 1676, Silver Spring, MD 20993–0002, 240–402–6980, *Martha.Nguyen@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: The applicants listed in the table have informed FDA that these drug products are no longer marketed and have requested that FDA withdraw approval of the applications under the process described in § 314.150(c) (21 CFR 314.150(c)). The applicants have also, by their requests, waived their opportunity for a hearing. Withdrawal of approval of an application or abbreviated application under § 314.150(c) is without prejudice to refiling.

Application No.	Drug	Applicant
ANDA 040379	Fluorouracil Injectable, 50 milligrams (mg)/milliliter (mL)	Fresenius Kabi USA, LLC, Three Corporate Dr., Lake Zurich, IL 60047.
ANDA 062901	Ampicillin Sodium; Sulbactam Sodium Injectable, Equivalent to (EQ) 2 grams (gm) base/vial; EQ 1 gm base/vial, and EQ 1 gm base/vial; EQ 500 mg base/vial.	Pfizer Inc., 66 Hudson Blvd East, New York, NY 10001.
ANDA 071981	Droperidol Injectable, 2.5 mg/mL	Hospira Inc., 275 North Field Dr., Bldg. H1–3S, Lake Forest, IL 60045.
ANDA 202546	Ribavirin Tablets, 200 mg, 400 mg, 500 mg, and 600 mg	RegCon Solutions, LLC, U.S. Agent for Beximco Pharmaceuticals USA Inc., 10525 Vista Sorrento Parkway, Suite 100, San Diego, CA 92121.
ANDA 203544	Sodium Fluoride F–18 Injectable, 10–200 millicurie (mCi)/mL	SOFIE Co. dba SOFIE, 21000 Atlantic Blvd., Suite 730, Dulles, VA 20166.
ANDA 203773	Dexmedetomidine Hydrochloride (HCl) Injectable, EQ 200 microgram (mcg) base/2 mL (EQ 100 mcg base/mL).	American Regent, Inc., 5 Ramsey Rd., Shirley, NY 11967.
ANDA 203884	Amiodarone HCl Injectable, 50 mg/mL	Hospira Inc.
ANDA 204315	Sodium Fluoride F–18 Injectable, 10–200 mCi/mL	B&H Consulting Services, Inc., U.S. Agent for Shertech Laboratories, LLC, 50 Division St., Suite 206, Somerville, NJ 08876.
ANDA 204366	Ammonia N 13 Injectable, 3.75–260 mCi/mL	Do.
ANDA 204854	Meropenem for Injection, 500 mg/vial and 1 gm/vial	Freyr Inc., U.S. Agent for Daewoong Pharmaceutical Co., Ltd., 150 College Rd. West, Suite 102, Princeton, NJ 08540.
ANDA 206710	Paricalcitol Capsules, 1 mcg, 2 mcg, and 4 mcg	Alvogen PB Research and Development LLC, U.S. Agent for Lotus Pharmaceutical Co., Ltd. Nantou Plant, 44 Whippany Rd., Suite 300, Morristown, NJ 07960.
ANDA 208695	Bosentan Tablets, 62.5 mg, and 125 mg	Hikma Pharmaceuticals USA Inc., 1809 Wilson Rd., Columbus, OH 43228.

Therefore, approval of the applications listed in the table, and all amendments and supplements thereto, is hereby withdrawn as of June 6, 2024. Approval of each entire application is withdrawn, including any strengths and dosage forms inadvertently missing from the table. Introduction or delivery for introduction into interstate commerce of products listed in the table without an approved new drug application or ANDA violates sections 505(a) and 301(d) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(a) and 331(d)). Drug products that are listed in the table that are in inventory on June 6, 2024 may continue to be dispensed until the inventories have been depleted or the drug products have reached their expiration dates or otherwise become violative, whichever occurs first.

Dated: May 2, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

Food and Drug Administration

[Docket No. FDA–2023–N–3827]

Adam Paul Runsdorf: Final Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing an order under the Federal Food, Drug, and Cosmetic Act (FD&C Act) permanently debarring Adam Paul Runsdorf from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Mr. Runsdorf was convicted of a felony under Federal law for conduct that relates to the regulation of a drug product under the FD&C Act. Mr. Runsdorf was given notice of the proposed debarment and an opportunity to request a hearing within the timeframe prescribed by regulation. As of February 25, 2024 (30 days after receipt of the notice), Mr. Runsdorf has not responded. Mr. Runsdorf's failure to respond and request a hearing constitutes a waiver of Mr. Runsdorf's right to a hearing concerning this matter.

DATES: This order is applicable May 7, 2024.

ADDRESSES: Any application by Mr. Runsdorf for special termination of debarment under section 306(d)(4) of the FD&C Act (21 U.S.C. 335a(d)(4)) may be submitted at any time as follows:

Electronic Submissions

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. An application submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your application will be made public, you are solely responsible for ensuring that your application does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such

as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your application, that information will be posted on *https://www.regulations.gov.*

- If you want to submit an application with confidential information that you do not wish to be made available to the public, submit the application as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For a written/paper application submitted to the Dockets Management Staff, FDA will post your application, as well as any attachments, except for information submitted, marked, and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All applications must include the Docket No. FDA–2023–N–3827. Received applications will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit an application with confidential information that you do not wish to be made publicly available, submit your application only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of your application. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852 between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500. Publicly available submissions may be seen in the docket.

FOR FURTHER INFORMATION CONTACT: Jaime Espinosa, Division of Compliance and Enforcement, Office of Policy, Compliance, and Enforcement, Office of Regulatory Affairs, Food and Drug Administration, 240–402–8743, *debarments@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 306(a)(2)(B) of the FD&C Act requires debarment of an individual from providing services in any capacity to a person that has an approved or pending drug product application if FDA finds that the individual has been convicted of a felony under Federal law for conduct relating to the regulation of any drug product under the FD&C Act. On July 27, 2023, Adam Paul Runsdorf was convicted as defined in section 306(l)(1) of the FD&C Act, in the U.S. District Court for the Eastern District of Texas-Beaumont Division, when the court entered judgment against him, after his plea of guilty, to Conspiracy to Traffick in Drugs with Counterfeit Mark in violation of 18 U.S.C. 371, 18 U.S.C. 2320(a)(4) and Trafficking in Drugs with Counterfeit Mark in violation of 18 U.S.C. 2320(a)(4), 18 U.S.C. 2320(b)(3)(A). The underlying facts supporting the conviction are as follows:

As contained in the Third Superseding Indictment, and as contained in Factual Basis and Stipulation memorandum, between approximately April 2014 and February 2021, Mr. Runsdorf conspired to distribute counterfeit cough syrup. Specifically, Mr. Runsdorf owned a group of pharmaceutical companies including Woodfield Pharmaceutical LLC, a contract manufacturing company, and Woodfield Distribution LLC, a third-party logistics company (collectively, ''Woodfield''). On April 25, 2014, Mr. Runsdorf acquired Pernix Manufacturing LLC (Pernix). Pernix had, in January 2014, entered into an agreement with Byron A. Marshall and his Drug Trafficking Organization (DTO) to copy and manufacture cough syrup according to the directions of Marshall and his associates.

Marshall was not licensed or authorized to distribute cough syrup and any background check of the personal information provided by Marshall to Pernix or later Woodfield would have revealed that he was not a licensed physician. Initially, Marshall sought to copy Actavis Prometh VC with Codeine (Actavis). Actavis is a purple, peach-mint flavor prescription cough syrup that was in demand as a street drug. Marshall and his associates wanted to mass produce and traffic a counterfeit version of Actavis that contained Promethazine, but not Codeine. On April 24, 2014, Actavis Holdco US discontinued production of the Actavis product due to its widespread abuse by recreational drug users. A Pernix product-development scientist worked with Marshall and his associates to re-create the Actavis product without Codeine and Promethazine in order to re-create the syrup base, which is a necessary component of cough syrup. Marshall and his associates would add Promethazine to the counterfeit substance prior to bottling and distribution in order to create the drug. Marshall and his DTO also obtained counterfeited commercial-grade pharmaceutical labels designed to look exactly like the genuine labels for the prescription cough syrup from another supplier. Later in the conspiracy, Marshall and his DTO asked Woodfield employees to reformulate other cough syrup to use in their drug trafficking scheme to include Hi-Tech Promethazine Hydrocholoride and Codeine Phosphate Oral Solution and Wockhardt Promethazine Syrup Plain.

As Pernix was scaling-up production of the syrup base for Marshall and his DTO in April 2014, Mr. Runsdorf acquired Pernix. Mr. Runsdorf retained Pernix employees but made changes to management staff who oversaw and were responsible for producing the syrup base for the Marshall DTO, to which they knew the Marshall DTO was adding active ingredients. During the conspiracy, Marshall communicated directly with Mr. Runsdorf regarding production of the counterfeit cough syrup. At Mr. Runsdorf's request, Marshall paid Woodfield in cash only, and Woodfield employees mailed the cash directly to him.

Mr. Runsdorf knew his company was producing thousands of gallons of the counterfeit cough syrup to be distributed to drug traffickers in Texas and other States. Woodfield's production of syrup base for Marshall and his DTO bypassed the protocols for safety and quality testing. Initially, there were no batch records to document the

production of the syrup as required. Woodfield provided the syrup to Marshall and his DTO without any corresponding documentation that identified the ingredients of the syrup; practices that continued until February 2019 when Woodfield started creating paper records for some of the cough syrup batches Woodfield made for the DTO. From 2014 through February 2021, the conspiracy between the Marshall DTO produced and distributed, or attempted to produce and distribute, approximately 65,920 gallons of counterfeit cough syrup. The total amount of cash paid by Marshall and his DTO to Mr. Runsdorf was approximately at least $3 million.

As a result of this conviction, FDA sent Mr. Runsdorf, by certified mail, on January 23, 2024, a notice proposing to permanently debar him from providing services in any capacity to a person that has an approved or pending drug product application. The proposal was based on a finding, under section 306(a)(2)(B), that Mr. Runsdorf was convicted of two felonies under Federal law for conduct relating to the regulation of a drug product under the FD&C Act. The proposal informed Mr. Runsdorf of the proposed debarment and offered him an opportunity to request a hearing, providing him 30 days from the date of receipt of the letter in which to file the request, and advised him that failure to request a hearing constituted a waiver of the opportunity for a hearing and of any contentions concerning this action. Mr. Runsdorf received the proposal and notice of opportunity for a hearing on January 26, 2024. Mr. Runsdorf failed to request a hearing within the timeframe prescribed by regulation and has, therefore, waived his opportunity for a hearing and waived any contentions concerning his debarment (21 CFR part 12).

II. Findings and Order

Therefore, the Assistant Commissioner, Office of Human and Animal Food Operations, under section 306(a)(2)(B) of the FD&C Act, under authority delegated to the Assistant Commissioner, finds that Mr. Runsdorf has been convicted of a felony under Federal law for conduct relating to the regulation of a drug product under the FD&C Act.

As a result of the foregoing finding, Mr. Runsdorf is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application, effective (see **DATES**) (see sections 306(a)(2)(B) and 306(c)(2)(A)(ii) of the FD&C Act). Any person with an approved or pending drug product application who knowingly employs or retains as a consultant or contractor, or otherwise uses in any capacity the services of Mr. Runsdorf during his debarment, will be subject to civil money penalties (section 307(a)(6) of the FD&C Act (21 U.S.C. 335b(a)(6))). If Mr. Runsdorf provides services in any capacity to a person with an approved or pending drug product application during his period of debarment, he will be subject to civil money penalties (section 307(a)(7) of the FD&C Act). In addition, FDA will not accept or review any abbreviated new drug application from Mr. Runsdorf during his period of debarment, other than in connection with an audit under section 306 of the FD&C Act (section 306(c)(1)(B) of the FD&C Act). Note that, for purposes of sections 306 and 307 of the FD&C Act, a ''drug product'' is defined as a ''drug subject to regulation under section 505, 512, or 802 of this FD&C Act [(21 U.S.C. 355, 360b, or 382)] or under section 351 of the Public Health Service Act [(42 U.S.C. 262)]'' (section 201(dd) of the FD&C Act (21 U.S.C. 321(dd))).

Dated: May 2, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–D–1032]

Risk Evaluation and Mitigation Strategy Logic Model: A Framework to Link Program Design With Assessment; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''REMS Logic Model: A Framework to Link Program Design With Assessment.'' The guidance describes FDA's risk evaluation and mitigation strategy (REMS) logic model. The REMS logic model is a framework that FDA recommends, which provides applicants with a systematic, structured approach to the design, implementation, and evaluation of a REMS. The aim of applying the REMS logic model is to develop clear goals, objectives, and strategies that align with the intended outcomes and to help applicants of new drug applications (NDAs), biologics license applications (BLAs), and abbreviated new drug applications (ANDAs) incorporate REMS assessment planning into the design of a REMS. The principles in this guidance apply to designing a REMS, developing a REMS assessment, and modifying a REMS.

DATES: Submit either electronic or written comments on the draft guidance by August 5, 2024 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–D–1032 for ''REMS Logic Model:

A Framework to Link Program Design With Assessment.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002; or the Office of Communication, Outreach, and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Gita Toyserkani, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 1106, Silver Spring, MD, 20993–0002, 301–796–1783, or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''REMS Logic Model: A Framework to Link Program Design With Assessment.'' Section 505–1 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355–1) establishes FDA's REMS authority. A REMS is a required risk management strategy that can include one or more elements to ensure that the benefits of a drug outweigh its risks (see section 505–1(a) of the FD&C Act). A REMS can include a Medication Guide, a patient package insert, a communication plan, and certain packaging and safe disposal technologies for a drug that poses a serious risk of abuse or overdose. FDA also may require certain elements to assure safe use as part of the REMS for drugs or biological products (see section 505–1(f) of the FD&C Act).

A REMS, like other public health programs, involves a set of activities or interventions to achieve an intended outcome. Program evaluation is a systematic method of collecting, analyzing, and using data to examine the effectiveness and efficiency of those programs and to inform continuous program improvement. Several theories, frameworks, and logic models have been used to guide both program design and evaluation. In particular, logic models describe in detail how a program or intervention operationally works to achieve benefits and captures the logical flow and linkages that exist within the program or intervention and its proximal and distal outcomes. Leveraging this type of systematic approach is a critical aspect to the success and effectiveness of programs.

In 2013, FDA received feedback from the Office of the Inspector General (available at *https://oig.hhs.gov/oei/reports/OEI-04-11-00510.asp*) on the overall effectiveness of REMS. To address the feedback, FDA convened a public meeting on REMS standardization (78 FR 30313, May 22, 2013) (meeting materials available at *https://www.fda.gov/industry/prescription-drug-user-fee-amendments/background-materials-rems-standardization-and-evalution-public-meeting).* FDA sought stakeholder input on using a commonly cited framework for program planning and evaluation. FDA also encouraged applicants to consider using healthcare program assessment frameworks to assess REMS (see the draft guidance for industry entitled ''REMS Assessment: Planning and Reporting'' (available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/rems-assessment-planning-and-reporting*). FDA continued to explore and research the application of theories, frameworks, and models to develop a systematic approach to REMS design, implementation, and evaluation. Existing healthcare program evaluation frameworks, together with stakeholder feedback and FDA's research, informed the development of FDA's REMS logic model.

This draft guidance describes FDA's REMS logic model, which uses common logic model principles adapted for use in a REMS and makes explicit the scientific evidence, assumptions, and underlying logic that support the program and the various processes behind it. The REMS logic model provides applicants [1] with a recommended systematic, structured approach to design, implement, and evaluate a REMS. The REMS logic model delineates the relationship between the goal, objectives, strategies, and intended outcomes. The logic model includes the three phases of a REMS life cycle: design, implement, and evaluate. Each phase is further separated into two or more steps. Application of the REMS logic model begins with the design phase (situation context, program goal). The next phase is the implement phase (inputs, activities, outputs). The last phase is the evaluate phase (outcome, impact). The REMS logic model, although described in sequential steps, is an iterative process that involves moving back and forth or toggling between steps and phases to address uncertainties,

[1] For the purposes of the ''REMS Logic Model: A Framework to Link Program Design With Assessment'' guidance, the term *applicant* refers to sponsors of investigational new drug applications and applicants of NDAs, BLAs, and ANDAs.

validating assumptions, incorporating new information, and refining the program.

This draft guidance is being issued to fulfill the performance goals (available at *https://www.fda.gov/industry/prescription-drug-user-fee-amendments/pdufa-vii-fiscal-years-2023-2027*) under the sixth reauthorization of the Prescription Drug User Fee Act (PDUFA VII). This REMS logic model guidance is the first in a series of planned guidances for industry and FDA staff to optimize REMS design and improve the way a REMS is assessed.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''REMS Logic Model: A Framework to Link Program Design With Assessment.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in 21 CFR part 312 for the submission of investigational new drug applications have been approved under OMB control number 0910–0014. The collections of information in 21 CFR part 314 for the submission of new drug applications and abbreviated new drug applications have been approved under OMB control number 0910–0001. The collections of information in 21 CFR part 601 for the submission of biologics license applications have been approved under OMB control number 0910–0338. The collections of information in 21 CFR part 208 pertaining to Medication Guides for prescription drug and biological products have been approved under OMB control number 0910–0393. The collections of information in 21 CFR 201.56 and 201.57 for the content and format requirements for labeling of drugs and biologics have been approved under OMB control number 0910–0572. The collections of information in 21 CFR part 316 regarding orphan drug product development are approved under OMB control number 0910–0167. The collections of information pertaining to Prescription Drug User Fee Program have been approved under OMB control number 0910–0297.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at *https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs, https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances, https://www.fda.gov/regulatory-information/search-fda-guidance-documents,* or *https://www.regulations.gov.*

Dated: May 2, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request; Information Collection Request Title: Rural Communities Opioid Response Program Performance Measures

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects of the Paperwork Reduction Act of 1995, HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this ICR should be received no later than July 8, 2024.

ADDRESSES: Submit your comments to *paperwork@hrsa.gov* or mail the HRSA Information Collection Clearance Officer, Room 14N39, 5600 Fishers Lane, Rockville, Maryland 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email *paperwork@hrsa.gov* or call Joella Roland, the HRSA Information Collection Clearance Officer, at (301) 443–3983.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the ICR title for reference.

Information Collection Request Title: Rural Communities Opioid Response Program (RCORP) Performance Measures, OMB No. 0906–0044—Revision

Abstract: HRSA administers RCORP, which is authorized by section 711(b)(5) of the Social Security Act (42 U.S.C. 912(b)(5)) and is a multi-initiative program that aims to: (1) support treatment for and prevention of substance use disorder (SUD), including opioid use disorder (OUD); and (2) reduce morbidity and mortality associated with SUD, including OUD, by improving access to and delivering prevention, treatment, and recovery support services to high-risk rural communities. To support this purpose, RCORP grant initiatives include:

- RCORP—Implementation grants fund established networks and consortia to deliver SUD/OUD prevention, treatment, and recovery activities in high-risk rural communities.
- RCORP—Psychostimulant Support grants aim to strengthen and expand access to prevention, treatment, and recovery services for individuals in rural areas who misuse psychostimulants, to enhance their ability to access treatment and move toward recovery.
- RCORP—Medication Assisted Treatment Access grants aim to establish new access points in rural facilities where none currently exist.
- RCORP—Behavioral Health Care support grants aim to expand access to and quality of behavioral health care services at the individual-, provider-, and community-levels.
- RCORP Overdose Response recipients address immediate needs in rural areas through improving access to, capacity for, and sustainability of prevention, treatment, and recovery services for SUD.
- RCORP Child and Adolescent Behavioral Health grants aim to establish and expand sustainable behavioral health care services for children and adolescents aged 5–17 years who live in rural communities.
- RCORP-Neonatal Abstinence Syndrome grants aim to reduce the incidence and impact of Neonatal Abstinence Syndrome in rural communities by improving systems of care, family supports, and social determinants of health.
- Note that additional grant initiatives may be added pending fiscal year 2025 and future fiscal year appropriations.

HRSA currently collects information about RCORP grants using approved

performance measures. HRSA developed separate performance measures for RCORP's new Overdose Response, Behavioral Health, and Neonatal Abstinence Syndrome grants and seeks OMB approval for the new performance measures.

Need and Proposed Use of the Information: Due to the growth in the number of grant initiatives included within RCORP, as well as emerging SUD and other behavioral health trends in rural communities, HRSA is submitting a revised ICR that includes measures for RCORP's new Overdose Response, Child and Adolescent Behavioral Health, and Neonatal Abstinence Syndrome grants.

For this program, performance measures were developed to provide data on each RCORP initiative and to enable HRSA to provide aggregate program data required by Congress under the Government Performance and Results Act of 1993. These measures cover the principal topic areas of interest to HRSA's Federal Office of Rural Health Policy, including: (a) provision of, and referral to, rural behavioral health care services, including SUD prevention, treatment and recovery support services; (b) behavioral health care, including SUD prevention, treatment, and recovery, process and outcomes; (c) education of health care providers and community members; (d) emerging trends in rural behavioral health care needs and areas of concern; and (e) consortium strength and sustainability. All measures will speak to the progress on meeting the set goals of the Federal Office of Rural Health Policy.

Likely Respondents: The respondents will be the recipients of the RCORP grants.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
RCORP—Implementation	290	2	580	1.24	719.20
RCORP—Psychostimulant Support	15	1	15	1.30	19.50
RCORP—Medication Assisted Treatment Access	11	1	11	1.95	21.45
RCORP—Behavioral Health Care Support	58	1	58	2.02	117.16
Rural Communities Opioid Response—Overdose Response (NEW)	47	3	141	0.56	78.96
RCORP—Child and Adolescent Behavioral Health (NEW)	9	2	18	0.48	8.64
RCORP—Neonatal Abstinence Syndrome (NEW)	41	4	164	2.31	378.84
Total	471		987		1,343.75

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Heart, Lung, and Blood Institute; Notice of Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Heart, Lung, and Blood Initial Review Group; NHLBI Mentored Clinical and Basic Science Study Section.

Date: June 27–28, 2024.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: The Bethesdan Hotel, Tapestry Collection by Hilton, 8120 Wisconsin Ave, Bethesda, MD 20814 (Hybrid Meeting).

Contact Person: Manoj Kumar Valiyaveettil, Ph.D., Scientific Review Officer, Office of Scientific Review/DERA, National Heart, Lung, and Blood Institute, National Institutes of Health, 6705 Rockledge Drive, Room 208–R, Bethesda, MD 20817, (301) 402–1616, *manoj.valiyaveettil@nih.gov.*

BILLING CODE 4140–01–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R7–ES–2024–0016; FXES111607MRG01–245–FF07CAMM00]

Marine Mammals; Incidental Take During Specified Activities; Proposed Incidental Harassment Authorization for the Southeast Alaska Stock of Northern Sea Otters in Sitka, Alaska

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of application; proposed incidental harassment authorization; draft environmental assessment; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, in response to a request under the Marine Mammal Protection Act of 1972, as amended, from the City and Borough of Sitka, Alaska, propose to authorize nonlethal, incidental take by harassment of small numbers of Southeast Alaska stock of northern sea otters (*Enhydra lutris kenyoni*) between July 1, 2024, and July 1, 2025. The applicant requested this authorization for take by harassment that may result from activities associated with construction of a seaplane base in Sitka Channel, Sitka, Alaska. We estimate that this project may result in the nonlethal, incidental take by harassment of up to 36 sea otters from the Southeast Alaska stock. This proposed authorization, if finalized, will be for up to 36 takes of sea otters by Level B harassment only. No take by injury or mortality is requested, expected, or proposed to be authorized.

DATES: Comments on this proposed incidental harassment authorization and the accompanying draft environmental assessment must be received by June 6, 2024.

ADDRESSES: *Document availability:* You may view this proposed incidental harassment authorization, the application package, supporting information, draft environmental assessment, and the list of references cited herein at *https://www.regulations.gov* under Docket No. FWS–R7–ES–2024–0016, or you may request these documents from the person listed under **FOR FURTHER INFORMATION CONTACT.**

Comment submission: You may submit comments on the proposed authorization by one of the following methods:

• *Electronic submission:* Federal eRulemaking Portal at: *https://www.regulations.gov.* Follow the instructions for submitting comments to Docket No. FWS–R7–ES–2024–0016.

• *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS–R7–ES–2024–0016, Policy and Regulations Branch, U.S. Fish and Wildlife Service, MS: PRB (JAO/3W), 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We will post all comments at *https://www.regulations.gov.* You may request that we withhold personal identifying information from public review; however, we cannot guarantee that we will be able to do so. See **REQUEST FOR PUBLIC COMMENTS** for more information.

FOR FURTHER INFORMATION CONTACT: Charles Hamilton, U.S. Fish and Wildlife Service, 1011 East Tudor Road, MS–341, Anchorage, AK 99503; by email at *r7mmmregulatory@fws.gov,* or by telephone at (907) 786–3800. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Background

Section 101(a)(5)(D) of the Marine Mammal Protection Act of 1972 (MMPA; 16 U.S.C. 1361 *et seq.*) authorizes the Secretary of the Interior (Secretary) to allow, upon request, the incidental, but not intentional, taking by harassment of small numbers of marine mammals in response to requests by U.S. citizens (as defined in title 50 of the Code of Federal Regulations (CFR) in part 18, at 50 CFR 18.27(c)) engaged in a specified activity (other than commercial fishing) in a specified geographic region during a period of not more than 1 year. The Secretary has delegated authority for implementation of the MMPA to the U.S. Fish and Wildlife Service (FWS, or we). The FWS shall allow this incidental taking for a period of up to 1 year if we find that such taking:

(1) will affect only small numbers of individuals of the species or stock;

(2) will have no more than a negligible impact on the species or stock; and

(3) will not have an unmitigable adverse impact on the availability of the species or stock for taking for subsistence use by Alaska Natives.

If the requisite findings are made, we issue an authorization that sets forth the following, where applicable:

(1) permissible methods of taking;

(2) means of effecting the least practicable adverse impact on the species or stock and its habitat and the availability of the species or stock for subsistence uses; and

(3) requirements for monitoring and reporting of such taking by harassment, including, in certain circumstances, requirements for the independent peer review of proposed monitoring plans or other research proposals.

The term ''take'' means to harass, hunt, capture, or kill, or to attempt to harass, hunt, capture, or kill any marine mammal. ''Harassment'' for activities other than military readiness activities or scientific research conducted by or on behalf of the Federal Government means any act of pursuit, torment, or annoyance which (a) has the potential to injure a marine mammal or marine mammal stock in the wild (the MMPA defines this as ''Level A harassment''), or (b) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (the MMPA defines this as ''Level B harassment'').

The terms ''negligible impact'' and ''unmitigable adverse impact'' are defined in 50 CFR 18.27 (*i.e.,* regulations governing small takes of marine mammals incidental to specified activities) as follows: ''Negligible impact'' is an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival. ''Unmitigable adverse impact'' means an impact resulting from the specified activity: (1) that is likely to reduce the availability of the species to a level insufficient for a harvest to meet subsistence needs by (i) causing the marine mammals to abandon or avoid hunting areas, (ii) directly displacing subsistence users, or (iii) placing physical barriers between the marine mammals and the subsistence hunters; and (2) that cannot be sufficiently mitigated by other measures to increase the availability of marine mammals to allow subsistence needs to be met.

The term ''small numbers'' is also defined in 50 CFR 18.27. However, we do not rely on that definition here as it conflates ''small numbers'' with ''negligible impacts.'' We recognize ''small numbers'' and ''negligible impacts'' as two separate and distinct considerations when reviewing requests for incidental harassment authorizations (IHA) under the MMPA (see *Natural Res. Def. Council, Inc.* v. *Evans,* 232 F. Supp. 2d 1003, 1025 (N.D. Cal. 2003)). Instead, for our small numbers determination, we estimate the likely number of takes of marine mammals and evaluate if that take is small relative to the size of the species or stock.

The term ''least practicable adverse impact'' is not defined in the MMPA or its enacting regulations. For this IHA, we ensure the least practicable adverse impact by requiring mitigation measures that are effective in reducing the impact of project activities, but they are not so restrictive as to make project activities unduly burdensome or impossible to undertake and complete.

If the requisite findings are made, we shall issue an IHA, which may set forth the following, where applicable: (i) permissible methods of taking; (ii) other means of effecting the least practicable impact on the species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stock for taking for subsistence uses by coastal-dwelling Alaska Natives (if applicable); and (iii) requirements for monitoring and reporting take by harassment.

Summary of Request

On August 18, 2023, the City and Borough of Sitka (hereafter ''CBS'' or ''the applicant'') submitted a request to the FWS for the nonlethal, incidental harassment of a small number of northern sea otters (*Enhydra lutris kenyoni*) (hereafter, ''sea otters'' or ''otters'' unless another species is specified) from the Southeast Alaska stock. The CBS expects that incidental take of sea otters by harassment may occur during the construction of a new seaplane base in Sitka Channel, Sitka, Alaska for the period July 2024 through July 2025. The FWS requested additional information on September 10, 2023, and October 27, 2023. We received revised requests on October 13, 2023, and November 16, 2023. The FWS deemed the November 16, 2023, request adequate and complete (hereafter referred to as the ''Request'').

Description of Specified Activities and Specified Geographic Region

The specified activity (''the project'') involves the construction of a new seaplane base by the CBS on the shore of Japonski Island in Sitka, Alaska. Construction will include creation of an upland approach, storage area and

parking, a seaplane ramp float, a drive-down float, a pedestrian and vehicle transfer bridge, and an approach dock. Building these components of the new seaplane base will require pile driving, blasting, excavation, and deposition of fill material.

Twelve 16-inch galvanized steel piles will be temporarily installed as templates to guide permanent piles using a vibratory hammer for both installation and removal, and an impact hammer for installation only. Ten permanent 16-inch-diameter galvanized steel piles and 16 permanent 24-inch galvanized steel piles will be driven using a vibratory hammer, socketed using down-the-hole drilling equipment, and driven with an impact hammer. These piles will support the approach dock, pedestrian and vehicle transfer bridge, drive-down float, and seaplane ramp float.

The upland project area will be developed through blasting and excavation. Over a period of 62 days, approximately 7,263 cubic meters (m^3) (9,500 cubic yards (yd^3)) above the high tide line will be blasted, and an additional 4,530 cm (5,925 yd^3) of rock, gravel, and sediment will be excavated. Materials will be stored in an upland location to dry, then used to fill both above and below the high tide line to develop the areas needed for a bridge abutment, approach, vehicle turnaround, parking, basic amenities, curb, and vehicle driveway. Up to 26,492 m^3 (34,650 yd^3) of fill will be placed over a period of 87 days using an excavator and dozer, and then compacted using a vibratory soil compactor. Only 275 m^3 (360 yd^3) of fill material will be placed in marine waters.

A material barge, construction barge, and skiff will be used to transport materials, equipment, and personnel to the project location. The materials barge will originate in Seattle, Washington, travelling at an average of 6 knots, and be used on location as a staging area during construction, tied to existing harbor structures. The construction barge will originate in coastal Alaska, travelling at an average of 6 knots, and will be used on location to support construction, and will be secured in place by four mooring anchors. The skiff will be used to transport personnel less than 91 meters (m) (300 feet (ft)) to the barge work platform multiple times a day at a speed no higher than 5 knots. Additionally, standard barges, tugboats, and other equipment may be used to place and position piles on the substrate.

Project activities would begin as early as July 2024 and be completed by July 2025. During this time, piling driving activities are expected to occur for 46 hours over a period of 31 days with 18 days of activity. Vibratory pile driving would occur for approximately 8.4 hours, impact pile driving would occur for approximately 3.1 hours, and down-the-hole drilling would occur for approximately 34 hours. Fill in marine waters would occur over a period of 11 hours and fill in intertidal waters would occur over a period of 641 hours.

Additional project details may be reviewed in the application materials available as described under **ADDRESSES** or may also be requested as described under **FOR FURTHER INFORMATION CONTACT**.

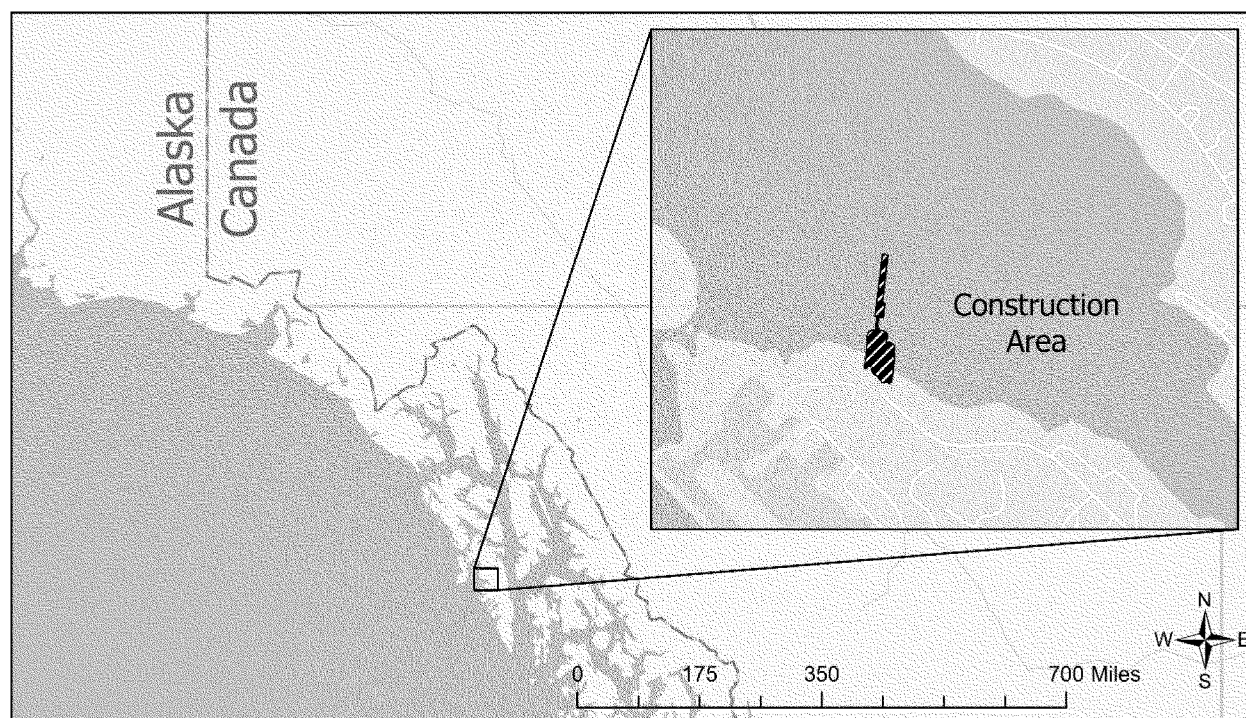

Figure 1—Specified geographic region of City and Borough of Sitka request for incidental harassment authorization for sea otters in 2024-2025 under the Marine Mammal Protection Act.

Description of Marine Mammals in the Specified Geographic Region

The northern sea otter is the only marine mammal under the FWS's jurisdiction that normally occupies the Northeast Pacific Ocean. Sea otters in Alaska are represented by three stocks: the Southwest Alaska stock, the Southcentral Alaska stock, and the Southeast Alaska stock. Those in the Northeast Pacific Ocean belong to the Southeast Alaska stock. Detailed information about the biology of the Southeast Alaska stock can be found in the most recent stock assessment report (88 FR 53510, August 8, 2023), available at: *https://www.fws.gov/project/marine-mammal-stock-assessment-reports.*

Sea otters may be distributed anywhere within the specific geographic region other than upland areas; however, they generally occur in shallow water near the shoreline. They are most commonly observed within the 40-meter (m) (131-foot (ft)) depth contour (88 FR 53510, August 8, 2023), although they can be found in areas with deeper water. Ocean depth is generally correlated with distance to shore, and sea otters typically remain within 1 to 2 kilometers (km) (0.62 to 1.24 miles (mi)) of shore (Riedman and Estes 1990). They tend to be found closer to shore during storms, but they venture farther out during good weather and calm seas (Lensink 1962; Kenyon 1969). In the 14 aerial surveys conducted from 1995 to 2012 in Southeast Alaska, 95 percent of otters were found in areas shallower than 40 m (131 ft) (Tinker et al. 2019). Areas important to mating for the Southeast Alaska stock include marine coastal regions containing adequate food resources within the 40-m (131-ft) depth contour.

The 1995–2012 survey data were combined with results from recent aerial surveys conducted in Glacier Bay National Park and incorporated into a spatiotemporal model of ecological diffusion using a Bayesian hierarchical framework as described in Eisaguirre et al. (2021) (88 FR 53510, August 8, 2023). This model was used to develop the most recent estimate of 27,285 otters in the Southeast Alaska stock and generated otter abundance estimates at a resolution of 1000 m by 1000 m. Abundance values within the project area ranged from 0.065 to 0.65 otters per square kilometer (km^2) (0.39 square miles (mi^2)).

The documented home range sizes and movement patterns of sea otters illustrate the types of movements that could be seen among otters responding to the proposed activities. Sea otters are nonmigratory and generally do not disperse over long distances (Garshelis and Garshelis 1984). They usually remain within a few kilometers of their established feeding grounds (Kenyon 1981). Breeding males stay for all or part of the year in a breeding territory covering up to 1 km (0.62 mi) of coastline while adult females have home ranges of approximately 8 to 16 km (5 to 10 mi), which may include one or more male territories. Juveniles move greater distances between resting and foraging areas (Lensink 1962; Kenyon 1969; Riedman and Estes 1990; Estes and Tinker 1996). Although sea otters generally remain local to an area, they are capable of long-distance travel. Otters in Alaska have shown daily movement distances greater than 3 km (1.9 mi) at speeds up to 5.5 km per hour (km/hr) (3.4 mi per hour (mi/h)) (Garshelis and Garshelis 1984).

Potential Impacts of the Specified Activities on Marine Mammals

Effects of Noise on Sea Otters

The project has the potential to result in take of sea otters by Level B harassment from noise. Here, we characterize ''noise'' as sound released into the environment from human activities that exceeds ambient levels or interferes with normal sound production or reception by sea otters. The terms ''acoustic disturbance'' or ''acoustic harassment'' are disturbances or harassment events resulting from noise exposure. Potential effects of noise exposure are likely to depend on the distance of the sea otter from the sound source, the level and intensity of sound the sea otter receives, background noise levels, noise frequency, noise duration, and whether the noise is pulsed or continuous. The actual noise level perceived by individual sea otters will also depend on whether the sea otter is above or below water and atmospheric and environmental conditions. Temporary disturbance of sea otters or localized displacement reactions are the most likely effects to occur from noise exposure. No lethal take is anticipated, nor was it requested by the applicant. Therefore, none will be authorized.

Sea Otter Hearing

Seaplane base construction activities will fall within the hearing range of sea otters. Controlled sound exposure trials on southern sea otters (*Enhydra lutris nereis*) indicate that sea otters can hear frequencies between 125 hertz (Hz) and 38 kilohertz (kHz), with best sensitivity between 1.2 and 27 kHz (Ghoul and Reichmuth 2014). Aerial and underwater audiograms for a captive adult male southern sea otter in the presence of ambient noise suggest the sea otter's hearing was less sensitive to high-frequency (greater than 22 kHz) and low-frequency (less than 2 kHz) sound than terrestrial mustelids, but was similar to that of a California sea lion (*Zalophus californianus*). However, the sea otter was still able to hear low-frequency sounds, and the detection thresholds for sounds between 0.125 and 1 kHz were between 116 and 101 decibels (dB), respectively. Dominant frequencies of southern sea otter vocalizations are between 3 and 8 kHz, with some energy extending above 60 kHz (McShane et al. 1995; Ghoul and Reichmuth 2012).

Exposure to high levels of sound may cause changes in behavior, masking of communications, temporary or permanent changes in hearing sensitivity, discomfort, and injury to marine mammals. Unlike other marine mammals, sea otters do not rely on sound to orient themselves, locate prey, or communicate under water; therefore, masking of communications by anthropogenic sound is less of a concern than for other marine mammals. However, sea otters, especially mothers and pups, do use sound for communication in air (McShane et al. 1995), and sea otters may monitor underwater sound to avoid predators (Davis et al. 1987).

Exposure Thresholds

Noise exposure criteria for identifying underwater noise levels capable of causing Level A harassment (injury) to marine mammal species, including sea otters, have been established using the same methods as those used by National Marine Fisheries Service (NMFS) (Southall et al. 2019). These criteria are based on estimated levels of sound exposure capable of causing a permanent shift in hearing sensitivity (*i.e.,* a permanent threshold shift [PTS]) (NMFS 2018). PTS occurs when noise exposure causes permanent damage to hair cells within the inner ear system (Ketten 2012).

Sound exposure thresholds incorporate two metrics of exposure: the peak level of instantaneous exposure likely to cause PTS and the cumulative sound exposure level during a 24-hour period (SEL_{CUM}). They also include weighting adjustments for the sensitivity of different species to varying frequencies. PTS-based injury criteria were developed from theoretical extrapolation of observations of temporary threshold shifts (TTS) detected in lab settings during sound exposure trials. The TTS is a noise-induced threshold shift in hearing sensitivity that fully recovers over time (Finneran 2015). Southall and colleagues (2019) predict that PTS for sea otters, which are included in the ''other marine carnivores'' category, will occur at 232 dB peak or 203 dB cumulative sound exposure (SEL_{CUM}) for impulsive underwater sound, and at 219 dB SEL_{CUM} for nonimpulsive (continuous) underwater sound.

Thresholds based on TTS have been used as a proxy for Level B harassment (70 FR 1871, January 11, 2005; 71 FR 3260, January 20, 2006; 73 FR 41318, July 18, 2008). Southall et al. (2007) derived TTS thresholds for pinnipeds based on 212 dB peak and 171 dB SEL_{CUM}. Exposures resulting in TTS in

pinnipeds were found to range from 152 to 174 dB (183 to 206 dB SEL) (Kastak et al. 2005), with a persistent TTS, if not a PTS, after 60 seconds of 184 dB SEL (Kastak et al. 2008). Kastelein et al. (2012) found small but statistically significant TTSs at approximately 170 dB SEL (136 dB, 60 minutes [min]) and 178 dB SEL (148 dB, 15 min). Based on these findings, Southall et al. (2019) developed TTS thresholds for sea otters, which are included in the ''other marine carnivores'' category, of 188 dB SEL_{CUM} for impulsive sounds and 199 dB SEL_{CUM} for nonimpulsive sounds.

The NMFS (2018) criteria do not identify sound level thresholds for avoidance of Level B harassment. For pinnipeds under their jurisdiction (seals and sea lions), the NMFS has adopted a 160-dB threshold for Level B harassment from exposure to impulsive noise and a 120-dB threshold for continuous noise (81 FR 51693, August 4, 2016; NMFS 2022). These thresholds were developed from observations of mysticete (baleen) whales responding to airgun operations (Malme et al. 1983a, b; Richardson et al. 1986, 1995) and from equating Level B harassment with noise levels capable of causing TTS in lab settings. Southall et al. (2007, 2019) assessed behavioral response studies and found considerable variability among pinnipeds. The authors determined that exposures between approximately 90 to 140 dB generally do not appear to induce strong behavioral responses from pinnipeds in water. However, they found behavioral effects, including avoidance, become more likely in the range between 120 to 160 dB, and most marine mammals showed some, albeit variable, responses to sound between 140 to 180 dB. Wood et al. (2012) adapted the approach identified in Southall et al. (2007) to develop a probabilistic scale for marine mammal taxa at which 10 percent, 50 percent, and 90 percent of individuals exposed are assumed to produce a behavioral response. For many marine mammals, including pinnipeds, these response rates were set at sound pressure levels of 140, 160, and 180 dB, respectively.

We have evaluated these thresholds and determined that a Level B harassment threshold of 120 dB for nonimpulsive noise is not applicable to sea otters. The 120-dB threshold is based on studies in which gray whales (*Eschrichtius robustus*) were exposed to experimental playbacks of industrial noise (Malme et al. 1983a, b). During these playback studies, southern sea otter responses to industrial noise were also monitored (Riedman 1983, 1984). Gray whales exhibited avoidance to industrial noise at the 120-dB threshold; however, there was no evidence of disturbance reactions or avoidance in southern sea otters. Thus, given the different range of frequencies to which sea otters and gray whales are sensitive, the NMFS 120-dB threshold based on gray whale behavior is not appropriate for predicting sea otter behavioral responses, particularly for low-frequency sound.

Based on the best available scientific information about sea otters, and closely related marine mammals when sea otter data are limited, the FWS has set 160 dB of received underwater sound as a threshold for Level B take by disturbance for sea otters for this IHA. Exposure to unmitigated in-water noise levels between 125 Hz and 38 kHz that are greater than 160 dB—for both impulsive and nonimpulsive sound sources—will be considered by the FWS as Level B harassment. Thresholds for potentially injurious Level A take will be 232-dB peak or 203-dB SEL for impulsive sounds and 219-dB SEL for continuous sounds (table 1).

TABLE 1—TEMPORARY THRESHOLD SHIFT (TTS) AND PERMANENT THRESHOLD SHIFT (PTS) THRESHOLDS ESTABLISHED BY SOUTHALL ET AL. (2019) THROUGH MODELING AND EXTRAPOLATION FOR ''OTHER MARINE CARNIVORES,'' WHICH INCLUDES SEA OTTERS

	TTS			PTS		
	Nonimpulsive	Impulsive		Nonimpulsive	Impulsive	
	SEL_{CUM}	SEL_{CUM}	Peak SPL	SEL_{CUM}	SEL_{CUM}	Peak SPL
Air	157	146	170	177	161	176
Water	199	188	226	219	203	232

Note: Values are weighted for other marine carnivores' hearing thresholds and given in cumulative sound exposure level (SEL_{CUM} dB re 20 micropascal (µPa) in air and SELCUM dB re 1 µPa in water) for impulsive and nonimpulsive sounds, and unweighted peak sound pressure level in air (dB re 20µPa) and water (dB 1µPa) (impulsive sounds only).

Airborne Sounds

The NMFS (2018) guidance neither addresses thresholds for preventing injury or disturbance from airborne noise, nor provides thresholds for avoidance of Level B harassment. Southall et al. (2007) suggested thresholds for PTS and TTS for sea lions exposed to non-pulsed airborne noise of 172.5 and 159 dB re (20 µPa)2-s SEL. Conveyance of underwater noise into the air is of little concern since the effects of pressure release and interference at the water's surface reduce underwater noise transmission into the air. For activities that create both in-air and underwater sounds, we will estimate take based on parameters for underwater noise transmission. This estimation will also account for exposures to sea otters at the surface, as sound energy travels more efficiently through water than through air.

Evidence From Sea Otter Studies

Sea otters may be more resistant to the effects of sound disturbance and human activities than other marine mammals. For example, southern sea otters were observed to not change their presence, density, or behavior in response to underwater sounds from industrial noise recordings at 110 dB and a frequency range of 50 Hz to 20 kHz, even at the closest distance of 0.5 nautical miles (<1 km or 0.6 mi) (Riedman 1983). Southern sea otters did not respond noticeably to noise from a single 1,638 cubic centimeter (cm^3) (100 cubic inch (in^3)) airgun, and no sea otter disturbance reactions were evident when a 67,006 cm^3 (4,089 in^3) airgun array was as close as 0.9 km (0.6 mi) to sea otters (Riedman 1983, 1984). However, southern sea otters displayed slight reactions to airborne engine noise (Riedman 1983). Northern sea otters were observed to exhibit a limited response to a variety of airborne and underwater sounds, including a warble tone, sea otter pup calls, killer whale (*Orcinus orca*) calls (which are predators to sea otters), air horns, and an underwater noise harassment system designed to drive marine mammals away from crude oil spills (Davis et al.

1988). These sounds elicited reactions from northern sea otters, including startle responses and movement away from noise sources. However, these reactions were only observed when northern sea otters were within 100–200 m (328–656 ft) of noise sources. Further, northern sea otters appeared to become habituated to the noises within 2 hours or, at most, 3–4 days (Davis et al. 1988).

Noise exposure may be influenced by the amount of time sea otters spend at the water's surface. Noise at the water's surface can be attenuated by turbulence from wind and waves more quickly compared to within deeper water, reducing potential noise exposure (Greene and Richardson 1988, Richardson et al. 1995). Additionally, turbulence at the water's surface limits the transference of sound from water to air. A sea otter with its head above water will be exposed to only a small fraction of the sound energy traveling through the water beneath it. The average amount of time that sea otters spend above the water each day while resting and grooming varies between males and females and across seasons (Esslinger et al. 2014, Zellmer et al. 2021). For example, female sea otters foraged for an average of 8.78 hours per day compared to male sea otters, which foraged for an average of 7.85 hours per day during the summer months (Esslinger et al. 2014). Male and female sea otters spend an average of 63 to 67 percent of their day at the surface resting and grooming during the summer months (Esslinger et al. 2014). Few studies have evaluated foraging times during the winter months. Garshelis et al. (1986) found that foraging times increased from 5.1 hours per day to 16.6 hours per day in the winter; however, Gelatt et al. (2002) did not find a significant difference in seasonal foraging times. It is likely that seasonal variation is determined by seasonal differences in energetic demand and the quality and availability of prey sources (Esslinger et al. 2014). These findings suggest that the large portion of the day sea otters spend at the surface may help limit sea otters' exposure during noise-generating operations.

Sea otter sensitivity to industrial activities may be influenced by the overall level of human activity within the sea otter population's range. In locations that lack frequent human activity, sea otters appear to have a lower threshold for disturbance. Sea otters in Alaska exhibited escape behaviors in response to the presence and approach of vessels (Udevitz et al. 1995). Behaviors included diving or actively swimming away from a vessel, sea otters on haulouts entering the water, and groups of sea otters disbanding and swimming in multiple directions (Udevitz et al. 1995). Alaskan sea otters were observed to avoid areas with heavy boat traffic and return to these areas during seasons with less vessel traffic (Garshelis and Garshelis 1984). In Cook Inlet, sea otters drifting on a tide trajectory that would have taken them within 500 m (0.3 mi) of an active offshore drilling rig were observed to swim in order to avoid a close approach of the drilling rig despite near-ambient noise levels (BlueCrest 2013). Sea otter responses to disturbance can result in energetic costs, which increases the amount of prey required by sea otters (Barrett 2019). This increased prey consumption may impact sea otter prey availability and cause sea otters to spend more time foraging and less time resting (Barrett 2019).

Individual sea otters in Sitka will likely show a range of responses to noise from pile driving activities. Some sea otters will likely show startle responses, change direction of travel, dive, or prematurely surface. Sea otters reacting to survey activities may divert time and attention from biologically important behaviors, such as feeding and nursing pups. Some sea otters may abandon the project area and return when the disturbance has ceased. Based on the observed movement patterns of sea otters (Lensink 1962; Kenyon 1969, 1981; Garshelis and Garshelis 1984; Riedman and Estes 1990; Tinker and Estes 1996), we expect some individuals will respond to pile driving activities by dispersing to nearby areas of suitable habitat; however, other sea otters, especially territorial adult males, will not be displaced.

Vessel Activities

Vessel collisions with marine mammals can result in death or serious injury. Wounds resulting from vessel strike may include massive trauma, hemorrhaging, broken bones, or propeller lacerations (Knowlton and Kraus 2001). An individual may be harmed by a vessel if the vessel runs over the animal at the surface, the animal hits the bottom of a vessel while the animal is surfacing, or the animal is cut by a vessel's propeller. Mortality associated with vessel strike has been determined based on recovery of carcasses with lacerations indicative of propeller injuries (Wild and Ames 1974; Morejohn et al. 1975). Vessel strike has been documented as a cause of death across all three stocks of northern sea otters in Alaska. In a review of sea otter mortality that occurred during a 10-year period (2002–12), 10 individuals out of 483 with an identifiable cause of death were determined to die due to trauma from a boat strike (Burek-Huntington et al. 2021). These events occurred in across central and southeast Alaska, with fatalities occurring in the specified geographic region of Sitka. In many boat strike cases, trauma was determined to be the ultimate cause of death; however, there was a contributing factor, such as disease or biotoxin exposure, which incapacitated the sea otter and made it more vulnerable to vessel strike (88 FR 53510, August 8, 2023).

Vessel speed influences the likelihood of vessel strikes involving sea otters. The probability of death or serious injury to a marine mammal increases as vessel speed increases (Laist et al. 2001; Vanderlaan and Taggart 2007). Sea otters spend a considerable portion of their time at the water's surface (Esslinger et al. 2014), and are typically visually aware of approaching vessels and can move away if a vessel is not traveling too quickly. The CBS has committed to speeds of 6 knots for their materials and construction barges and 5 knots for their personnel skiffs. These speeds are slow enough to allow nearby sea otters to move away from vessels if needed, and significantly reduce the risk of potential boat strike.

Sea otters exhibit behavioral flexibility in response to vessels, and their responses may be influenced by the intensity and duration of the vessel's activity. For example, sea otter populations in Alaska were observed to avoid areas with heavy vessel traffic but return to those same areas during seasons with less vessel traffic (Garshelis and Garshelis 1984). Sea otters have also shown signs of disturbance or escape behaviors in response to the presence and approach of survey vessels, including: sea otters diving and/or actively swimming away from a vessel; sea otters on haulouts entering the water; and groups of sea otters disbanding and swimming in multiple different directions (Udevitz et al. 1995).

Additionally, sea otter responses to vessels may be influenced by the sea otter's previous experience with vessels. Sea otters in different study locations in California were found to exhibit markedly different responses to kayakers, suggesting a different level of tolerance between the groups (Gunvalson 2011). Benham (2006) found evidence that the sea otters exposed to high levels of recreational activity may have become more tolerant than individuals in less-disturbed areas. Sea otters off the California coast showed only mild interest in vessels passing

within hundreds of meters and appeared to have habituated to vessel traffic (Riedman 1983, Curland 1997). The project area is within an active harbor used year-round by commercial and recreational vessels and is immediately adjacent to the flight path of aircraft landing at Sitka Rocky Gutierrez Airport. As such, it is probable that sea otters in the area have been frequently exposed to boating and aircraft activity and would not regard the project's vessel activities as novel stimuli.

Consequences of Disturbance

The reactions of wildlife to disturbance can range from short-term behavioral changes to long-term impacts that affect survival and reproduction. When disturbed by noise, animals may respond behaviorally (*e.g.,* escape response) or physiologically (*e.g.,* increased heart rate, hormonal response) (Harms et al. 1997, Tempel and Gutierrez 2003). The energy expense and associated physiological effects could ultimately lead to reduced survival and reproduction (Gill and Sutherland 2000, Frid and Dill 2002). For example, South American sea lions (*Otaria byronia*) visited by tourists exhibited an increase in the state of alertness and a decrease in maternal attendance and resting time on land, thereby potentially reducing population size (Pavez et al. 2015). In another example, killer whales that lost feeding opportunities due to vessel traffic faced a substantial (18 percent) estimated decrease in energy intake (Williams et al. 2002). Such disturbance effects can have population-level consequences. Increased disturbance rates have been associated with a decline in bottlenose dolphin (*Tursiops* spp.) abundance (Bejder et al. 2006, Lusseau et al. 2006).

These examples illustrate direct effects on survival and reproductive success, but disturbances can also have indirect effects. Response to noise disturbance is considered a nonlethal stimulus that is similar to an antipredator response (Frid and Dill 2002). Sea otters are susceptible to predation, particularly from killer whales and eagles, and have a well-developed antipredator response to perceived threats. For example, the presence of a harbor seal (*Phoca vitulina*) did not appear to disturb sea otters, but they demonstrated a fear response in the presence of a California sea lion by actively looking above and beneath the water (Limbaugh 1961).

Although an increase in vigilance or a flight response is nonlethal, a tradeoff occurs between risk avoidance and energy conservation. An animal's reactions to noise disturbance may cause stress and direct an animal's energy away from fitness-enhancing activities such as feeding and mating (Frid and Dill 2002, Goudie and Jones 2004). For example, southern sea otters in areas with heavy recreational boat traffic demonstrated changes in behavioral time budgeting, showing decreased time resting and changes in haulout patterns and distribution (Benham et al. 2006, Maldini et al. 2012). Chronic stress can also lead to weakened reflexes, lowered learning responses (Welch and Welch 1970, van Polanen Petel et al. 2006), compromised immune function, decreased body weight, and abnormal thyroid function (Seyle 1979).

Changes in behavior resulting from anthropogenic disturbance can include increased agonistic interactions between individuals or temporary or permanent abandonment of an area (Barton et al. 1998). The extent of previous exposure to humans (Holcomb et al. 2009), the type of disturbance (Andersen et al. 2012), and the age or sex of the individuals (Shaughnessy et al. 2008, Holcomb et al. 2009) may influence the type and extent of response.

Effects on Sea Otter Habitat and Prey

Physical and biological features of habitat essential to the conservation of sea otters include the benthic invertebrates (*e.g.,* red sea urchins (*Mesocentrotus franciscanus*), blue mussels (*Mytilus* spp.), butter clams (*Saxidomus giganteus*), etc.) eaten by sea otters, shallow rocky areas, and kelp (*e.g.,* bull kelp (*Nereocystis luetkeana*) and dragon kelp (*Eualaria fistulosa*)) beds that provide cover from predators. Important sea otter habitat in the project area includes coastal areas within the 40-m (131-ft) depth contour where high densities of sea otters have been detected.

Construction activities, such as pile driving and fill placement, may generate in-water noise at levels which can temporarily displace sea otters from important habitat and impact sea otter prey species. The primary prey species for sea otters are sea urchins, abalone, clams, mussels, crabs, and squid (Tinker and Estes 1996). When preferential prey are scarce, sea otters will also eat kelp, slow-moving benthic fishes, sea cucumbers, egg cases of rays, turban snails (*Tegula* spp.), octopuses (*e.g., Octopus* spp.), barnacles (*Balanus* spp.), sea stars (*e.g., Pycnopodia helianthoides*), scallops (*e.g., Patinopecten caurinus*), rock oysters (*Saccostrea* spp.), worms (*e.g., Eudistylia* spp.), and chitons (*e.g., Mopalia* spp.) (Riedman and Estes 1990; Davis and Bodkin 2021). Several studies have addressed the effects of noise on invertebrates (Tidau and Briffa 2016; Carroll et al. 2017). Behavioral changes, such as an increase in lobster (*Homanus americanus*) feeding levels (Payne et al. 2007), an increase in avoidance behavior by wild-caught captive reef squid (*Sepioteuthis australis*) (Fewtrell and McCauley 2012), and deeper digging by razor clams (*Sinonovacula constricta*) (Peng et al. 2016) have been observed following experimental exposures to sound. Physical changes have also been observed in response to increased sound levels, including changes in serum biochemistry and hepatopancreatic cells in lobsters (Payne et al. 2007) and long-term damage to the statocysts required for hearing in several cephalopod species (André et al. 2011; Solé et al. 2013, 2019). De Soto et al. (2013) found impaired embryonic development in scallop (*Pecten novaezelandiae*) larvae when exposed to 160 dB. Christian et al. (2004) noted a reduction in the speed of egg development of bottom-dwelling crabs following exposure to noise; however, the sound level (221 dB at 2 m (6.6 ft)) was far higher than the proposed project activities will produce. Industrial noise can also impact larval settlement by masking the natural acoustic settlement cues for crustaceans and fish (Pine et al. 2012, Simpson et al. 2016, Tidau and Briffa 2016).

While these studies provide evidence of deleterious effects to invertebrates as a result of increased sound levels, Carroll et al. (2017) caution that there is a wide disparity between results obtained in field and laboratory settings. In experimental settings, changes were observed only when animals were housed in enclosed tanks and many were exposed to prolonged bouts of continuous, pure tones. We would not expect similar results in open marine conditions. It is unlikely that noises generated by project activities will have any lasting effect on sea otter prey given the short-term duration of sounds produced by each component of the proposed work.

Noise-generating activities that interact with the seabed can produce vibrations, resulting in the disturbance of sediment and increased turbidity in the water. Although turbidity is likely to have little impact on sea otters and prey species (Todd et al. 2015), there may be some impacts from vibrations and increased sedimentation. For example, mussels (*Mytilus edulis*) exhibited changes in valve gape and oxygen demand, and hermit crabs (*Pagurus bernhardus*) exhibited limited behavioral changes in response to

vibrations caused by pile driving (Roberts et al. 2016). Increased sedimentation is likely to reduce sea otter visibility, which may result in reduced foraging efficiency and a potential shift to less-preferred prey species. These outcomes may cause sea otters to spend more energy on foraging or processing the prey items; however, the impacts of a change in energy expenditure are not likely to be seen at the population level (Newsome et al. 2015). Additionally, the benthic invertebrates may be impacted by increased sedimentation, resulting in higher abundances of opportunistic species that recover quickly from industrial activities that increase sedimentation (Kotta et al. 2009). The impacts of increased turbidity at the project site will be temporary. Conversely, placement of fill below the high tide line and construction of a new upland peninsula will result in the permanent removal of 1.3 acres of sea otter habitat. However, sea otter habitat is abundant throughout the Sitka area, and loss of a small amount of habitat is unlikely to apply density-dependent pressure on the population, as it is estimated to be well below carrying capacity (estimated K=47 percent (Tinker et al. 2019).

Potential Impacts on Subsistence Uses

The proposed specified activities will occur near marine subsistence harvest areas used by Alaska Native Peoples from Sitka and the surrounding areas. Subsistence harvest of sea otters in the Sitka subregion has been consistent over time. Between 1988 and 2015, it is estimated that 12,546 sea otters were harvested in southeast Alaska. Of these harvests, 2,744, or roughly 22 percent, occurred in the Sitka subregion.

The proposed project is immediately adjacent to Sitka Airport and the Sitka harbor. Active subsistence harvest does not typically occur in these heavily used areas. Construction activities will not preclude access to hunting areas or interfere in any way with individuals wishing to hunt. In September 2018, the Alaska Harbor Seal Commission, the Alaska Sea Otter and Steller Sea Lion Commission, and the Sitka Tribe of Alaska were contacted by CBS to discuss a project in Sitka Channel and request comments. The Commissions and Sitka Tribe of Alaska did not express concerns with the project impacting the harvest of marine mammals. However, the Sitka Tribe of Alaska did request that no pile driving be conducted from March 15 to May 31 to protect herring, and the CBS will honor the request. If any conflicts are identified in the future, the CBS will develop a plan of cooperation (POC) specifying the particular steps necessary to minimize any effects the project may have on subsistence harvest.

Mitigation Measures

If an IHA for the project is issued, it must specify means for effecting the least practicable adverse impact on sea otters and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance and the availability of sea otters for subsistence uses by coastal-dwelling Alaska Natives.

In evaluating what mitigation measures are appropriate to ensure the least practicable adverse impact on species or stocks and their habitat, as well as subsistence uses, we considered the manner and degree to which the successful implementation of the measures are expected to achieve this goal. We considered the nature of the potential adverse impact being mitigated (likelihood, scope, range), the likelihood that the measures will be effective if implemented, and the likelihood of effective implementation. We also considered the practicability of the measures for applicant implementation (*e.g.,* cost, impact on operations).

To reduce the potential for disturbance from acoustic stimuli associated with the activities, the applicants have proposed mitigation measures including the following:

- Development of a marine mammal monitoring and mitigation plan;
- Establishment of shutdown and monitoring zones;
- Monitoring by designated protected species observers (PSOs);
- Clearance of the site before startup;
- Limiting in-water activity to daylight hours;
- Use of silt curtains to prevent sedimentation and turbidity during down-the-hold drilling;
- Adherence to soft-start procedures; and
- Shutdown procedures.

These measures are further specified under Proposed Authorization, part *B. Avoidance and Minimization.* The FWS has not identified any additional (*i.e.,* not already incorporated into the CBS's request) mitigation or monitoring measures that are practicable and would further reduce potential impacts to sea otters and their habitat.

Estimated Take

Definitions of Incidental Take Under the Marine Mammal Protection Act

Below we provide definitions of three potential types of take of sea otters. The FWS does not anticipate and is not authorizing lethal take or Level A harassment as a part of this proposed IHA; however, the definitions of these take types are provided for context and background.

Lethal Take—Human activity may result in biologically significant impacts to sea otters. In the most serious interactions human actions can result in the mortality of sea otters.

Level A Harassment—Human activity may result in the injury of sea otters. Level A harassment for nonmilitary readiness activities is defined as any act of pursuit, torment, or annoyance that has the potential to injure a marine mammal or marine mammal stock in the wild. The specified action is not anticipated to result in Level A harassment due to exposure of sea otters to noise capable of causing PTS.

Level B Harassment—The applicant requested authorization for only take by Level B harassment, and the FWS is proposing to authorize only take by Level B harassment for this IHA. Level B harassment for nonmilitary readiness activities means any act of pursuit, torment, or annoyance that has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behaviors or activities, including, but not limited to, migration, breathing, nursing, feeding, or sheltering. Human-caused changes in behavior that disrupt biologically significant behaviors or activities for the affected animal indicate take by Level B harassment under the MMPA.

The FWS has identified the following sea otter behaviors as indicating possible Level B harassment:

- Swimming away at a fast pace on belly (*i.e.,* porpoising);
- Repeatedly raising the head vertically above the water to get a better view (spyhopping) while apparently agitated or while swimming away;
- In the case of a pup, repeatedly spyhopping while hiding behind and holding onto its mother's head;
- Abandoning prey or feeding area;
- Ceasing to nurse and/or rest (applies to dependent pups);
- Ceasing to rest (applies to independent animals);
- Ceasing to use movement corridors;
- Ceasing mating behaviors;
- Shifting/jostling/agitation in a raft so that the raft disperses;
- Sudden diving of an entire raft; or
- Flushing animals off a haulout.

This list is not meant to encompass all possible behaviors; other behavioral responses may also be indicative of Level B harassment. Relatively minor changes in behavior such as the animal raising its head or temporarily changing

its direction of travel are not likely to disrupt biologically important behavioral patterns, and the FWS does not view such minor changes in behavior as indicative of a take by Level B harassment. It is also important to note that eliciting behavioral responses that equate to take by Level B harassment repeatedly may result in Level A harassment. For example, while a single flushing event would likely indicate Level B harassment, repeatedly flushing sea otters from a haulout may constitute Level A harassment.

Calculating Take

The FWS does not anticipate, nor do we propose to authorize, the Level A or Level B harassment of sea otters as a result of vessel operations or placement of fill in the waterway. Vessels will be operated in areas with year-round boat traffic at conservatively slow speeds, significantly reducing the probability of sea otter harassment. Deposition of fill material is not anticipated to generate appreciable underwater noise (Dickerson et al. 2001, Nedwell and Howell 2004). Finally, otters are not anticipated to be physically injured due to fill deposition due to the use of protected species observers and shutdown zones.

We assumed all animals exposed to underwater sound levels from pile driving operations that meet the acoustic exposure criteria shown in table 1 will experience, at a minimum, take by Level B harassment due to exposure to underwater noise. Spatially explicit zones of ensonification were established around the proposed construction location to estimate the number of otters that may be exposed to these sound levels.

The project can be divided into three major components: down-the-hole drilling, vibratory hammering, and pile-driving using an impact hammer. Each of these components will generate a different type of in-water noise. Vibratory hammering will produce nonimpulsive or continuous noise, impact driving will produce impulsive noise, and down-the-hole drilling is considered to produce both impulsive and continuous noise (NMFS 2020).

The level of sound anticipated from each project component was established using recorded data from pile-driving in Friday Harbor, Washington, Bangor Naval Base, Washington, and Trinidad Bay, California (a proxy for vibratory hammering; NAVFAC 2015); Rodeo, California (a proxy for impact hammering of 24-inch piles; Caltrans 2020); Anderson, California (a proxy for impact hammering of 16-inch piles; Caltrans 2020); Tenakee Springs, Alaska (a proxy for down-the-hole drilling of 16-inch and 24-inch piles; Heyvaert and Reyff 2021); and Biorka Island, Alaska (a proxy for down-the-hole drilling of 24-inch piles; Guan and Miner 2020). The NMFS Technical Guidance and User Spreadsheet (NMFS 2018, 2020) was used to determine the distance at which sound levels would attenuate to Level A harassment thresholds, and we used the NMFS Multi-species pile driving calculator to determine the distance at which sound levels would attenuate to Level B harassment thresholds (table 2). The weighting factor adjustment included in the NMFS User Spreadsheet accounts for sound created in portions of an organism's hearing range where they have less sensitivity. We used the weighting factor adjustment for otariid pinnipeds (2), as they are the closest available physiological and anatomical proxy for sea otters. Both tools incorporate a transmission loss coefficient, which accounts for the reduction in sound level outward from a sound source. We used the NMFS-recommended transmission loss coefficient of 15 for coastal pile-driving activities to indicate simple spread (NMFS 2020).

TABLE 2—SUMMARY BY PROJECT COMPONENT OF SOUND LEVEL, TIMING OF SOUND PRODUCTION, DISTANCE FROM SOUND SOURCE TO BELOW LEVEL B HARASSMENT THRESHOLDS, DAYS OF IMPACT, OTTERS IN LEVEL B HARASSMENT ENSONIFICATION AREA, AND TOTAL OTTERS EXPECTED TO BE HARASSED THROUGH BEHAVIORAL DISTURBANCE

Sound source	Down-the-hole drilling (16-inch steel piles)	Down-the-hole drilling (24-inch steel piles)	Vibratory hammering (16 and 24-inch steel piles)	Impact hammer (16-inch steel piles)	Impact hammer (24-inch steel piles)
Sound level at 10 meters:					
dB RMS	167	173	161	185	190
dB SEL	146	159		175	177
dB peak	172	184		200	203
Literature reference	Heyvaert and Reyff 2021 (dB RMS); Guan and Miner 2020 (dB SEL and dB peak).	Heyvaert and Reyff 2021.	NAVFAC 2015	Caltrans 2020	Caltrans 2020
Timing per pile	60 minutes/pile	90 minutes/pile	10 minutes/pile	5 minutes/pile	5 minutes/pile
Strikes per pile	36,000 strikes/pile	54,000 strikes/pile.		175 strikes/pile	175 strikes/pile
Maximum piles per day	2	2	6	4	4
Maximum number of days	5	8	9	6	4
Distance to below Level A harassment threshold in meters.	2.3	22.2	0.3	9	12.2
Distance to below Level B harassment threshold in meters.	30	75	20	465	1,000
Estimated sea otter density in affected area	0.85	0.85	0.85	0.85	0.85
Potential sea otters affected by sound	0*	2	0*	2	2
Days of activity	5	8	9	6	4
Potential harassment events	0	16	0	12	8

* The project shutdown zone extends 30 meters from the sound source. Therefore, we do not anticipate sea otters to experience Level B harassment as a result of down-the-hole drilling of 16-inch steel piles or vibratory hammering of 16-inch or 24-inch steel piles.

Note: Sound levels for all sources are unweighted and given in dB re 1 μPa. Nonimpulsive sounds are in the form of mean maximum root mean square (RMS) sound pressure level (SPL) as it is more conservative than cumulative sound exposure level (SEL) or peak SPL for these activities. Impulsive sound sources are in the form of SEL for a single strike (s-s).

Recent estimates of the number of sea otters in the project area are less than one otter per square kilometer. Tinker et al. (2019) estimated an average of 0.85 otters/km² in the sub-region that includes the project area (N05). Similarly, fine-scale ecological diffusion models have estimated 0.062 otters/km² inside the harbor breakwater and 0.65 otters/km² outside the harbor breakwater Eisaguirre et al. (2023). Given these values, we assume up to

one otter per square kilometer may be in the area during construction activities. However, the project is within an area that may provide refuge for mom-pup pairs. Northern sea otters enter estrus immediately following pup loss or weaning (Monson et al. 2000) and may have pups year-round. Thus, when estimating the number of potential Level B harassment events, we account for the possibility of the otter having a dependent pup by assuming two otters per square kilometer during project activities.

To determine the number of sea otters that may experience in-water sound greater than 160 dB, we calculated the area of potential impact for each project activity (*i.e.,* down-the-hole drilling and impact hammering) that would generate noise >160 dB beyond the project's 30-meter shutdown zone. Impact areas were drawn and their area calculated in ArcPro 3.1.4 using geospatial files of the project location, adjacent coastline, and the harbor breakwater to account for sound attenuation by land shadows (figure 2). These impact areas were multiplied by the number of otters/km^2 and rounded to account for the possibility of a mom-pup pair (table 1).

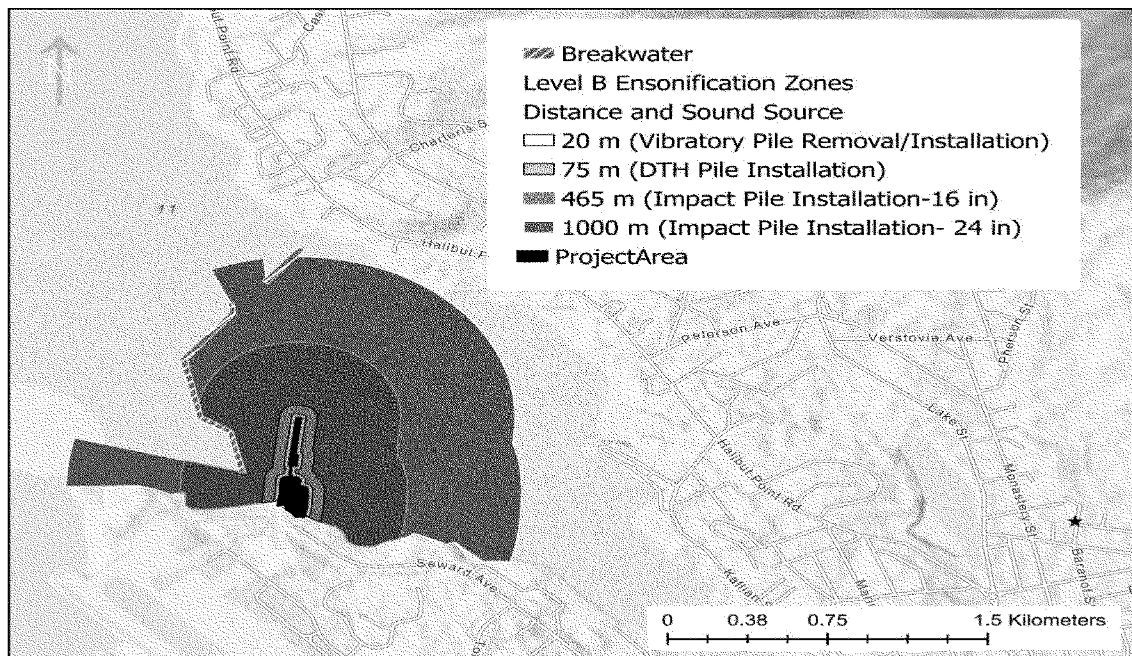

Figure 2 – Project area, source locations, and Level B harassment ensonification zones for each project component.

Although sea otters are non-migratory, they typically move amongst focal areas within their home ranges to rest and forage (Garshelis and Garshelis 1984, Laidre et al. 2009). It is possible that given the density of sea otters in the region, the large variability in individual home range sizes, and the potential for up to daily movement in and out of foraging or resting areas, that a different mom-pup pair could be found within the ensonification zone each day of the project. Thus, the FWS conservatively assumes that the 36 estimated harassment events may impact up to 36 different sea otters. However, should an individual or mom-pup pair remain in the impact area more than one day, and therefore experience Level B harassment more than once, we do not anticipate repeated exposure events to lead to harassment greater than Level B. No Level A harassment (*i.e.,* injury) is anticipated or proposed to be authorized. While in-water noise will be at a level capable of causing PTS from up to 22.2 m from the source location (during down-the-hole drilling of 24-inch piles), operations will be shut down should any marine mammal come within 30 m of project activities.

Critical Assumptions

We estimate 36 takes of 36 sea otters by Level B harassment will occur due to the proposed specified activities. To conduct this analysis and estimate the potential amount of Level B harassment, several critical assumptions were made.

Otter density was calculated using a state-space model created by Tinker et al. (2019) and a Bayesian hierarchical model created by Eisaguirre et al. (2021), which includes assumptions that can be found in the original publications. The northern sea otter southeast stock Stock Assessment Report (88 FR 53510, August 8, 2023) also elaborates on the inclusion of Glacier Bay National Park aerial surveys into the most recent iteration of the Eisaguirre et al. (2021) Bayesian hierarchical model.

Sound level estimates for construction activities were generated using sound source verification from recent pile-driving activities in several locations in California, Washington, and Alaska. Environmental conditions in these locations, including water depth, substrate, and ambient sound levels are similar to those in the project location but not identical. Further, estimation of ensonification zones were based on sound attenuation models using a simple spreading loss model. These factors may lead to actual sound values differing slightly from those estimated here.

Finally, the pile-driving activities described here will also create in-air noise. Because sea otters spend over half of their day with their heads above water (Esslinger et al. 2014), they will be exposed to increases in in-air noise from

construction equipment. However, we have calculated Level B harassment with the assumption that an individual may be harassed only one time per 24-hour period, and underwater sound levels will be more disturbing and extend farther than in-air noise. Thus, while sea otters may be disturbed by noise both in air and underwater, we have relied on the more conservative underwater estimates.

Determinations and Findings

Sea otters exposed to project-produced sounds are likely to respond with temporary behavioral modification or displacement. Project activities could temporarily interrupt the feeding, resting, and movement of sea otters. Because activities will occur during a limited amount of time and in a localized region, the impacts associated with the project are likewise temporary and localized. The anticipated effects are primarily short-term behavioral reactions and displacement of sea otters near active operations.

Sea otters that encounter the specified activity may exert more energy than they would otherwise due to temporary cessation of feeding, increased vigilance, and retreat from the project area. We expect that affected sea otters will tolerate this exertion without measurable effects on health or reproduction. Most of the anticipated takes will be due to short-term Level B harassment in the form of TTS, startling reactions, or temporary displacement. Chronic exposure to sound levels that cause TTS may lead to PTS (which would constitute Level A harassment). While more research into the relationship between chronic noise exposure and PTS is needed (Finneran 2015), it is likely that the transition from temporary effects to permanent cellular damage occurs over a longer time period than the proposed project activities (Southall et al. 2019). With the adoption of the mitigation measures proposed in the request and required by this proposed IHA, estimated take was reduced.

Small Numbers

For our small numbers determination, we consider whether the estimated number of sea otters to be subjected to incidental take is small relative to the population size of the species or stock. We estimate the CBS's specified activities in the specified geographic region will take no more than 36 takes of sea otters by Level B harassment during the 1-year period of this proposed IHA (see *Calculating Take*). Take of 36 animals is 0.13 percent of the best available estimate of the current Southeast Alaska stock size of 27,285 animals ($(36 \div 27{,}285) \times 100 \approx 0.13$), and represents a ''small number'' of sea otters of that stock.

Negligible Impact

We propose a finding that any incidental take by Level B harassment resulting from the specified activities cannot be reasonably expected to, and is not reasonably likely to, adversely affect the Southeast Alaska stock of northern sea otters through effects on annual rates of recruitment or survival and will, therefore, have no more than a negligible impact on the stock. In making this finding, we considered the best available scientific information, including the biological and behavioral characteristics of the species, the most recent information on species distribution and abundance within the area of the specified activities, the current and expected future status of the stock (including existing and foreseeable human and natural stressors), the potential sources of disturbance caused by the project, and the potential responses of marine mammals to this disturbance. In addition, we reviewed applicant-provided materials, information in our files and datasets, published reference materials, and species experts.

Sea otters are likely to respond to planned activities with temporary behavioral modification or temporary displacement. These reactions are not anticipated to have consequences for the long-term health, reproduction, or survival of affected animals. Most animals will respond to disturbance by moving away from the source, which may cause temporary interruption of foraging, resting, or other natural behaviors. Affected animals are expected to resume normal behaviors soon after exposure, with no lasting consequences. Sea otters may move in and out of the project area during pile driving activities, leading to as many as 36 individuals experiencing one day of exposure. However, it is possible that an individual or a mom-pup pair may enter the ensonification area more than once during the project. At most, if the same mom-pup pair enters the ensonification area every day pile driving occurs, the mom-pup pair would experience Level B harassment for 18 days. However, injuries (*i.e.,* Level A harassment or PTS) due to chronic sound exposure are estimated to occur over a longer time scale (Southall et al. 2019). The greatest area that will experience noise greater than Level B thresholds due to pile driving is small (less than 0.7 km^2), and an animal that may be disturbed could escape the noise by moving to nearby quiet areas. Further, sea otters spend over half of their time above the surface during the summer months (Esslinger et al. 2014), and likely no more than 70 percent of their time foraging during winter months (Gelatt et al. 2002); thus, their ears will not be exposed to continuous noise, and the amount of time it may take for permanent injury is considerably longer than that of mammals primarily under water. Some animals may exhibit some of the stronger responses typical of Level B harassment, such as fleeing, interruption of feeding, or flushing from a haulout. These responses could have temporary biological impacts for affected individuals, but are not anticipated to result in measurable changes in survival or reproduction.

The total number of animals affected and severity of impact are not sufficient to change the current population dynamics at the stock scale. Although the specified activities may result in approximately 36 incidental takes of up to 36 sea otters from the Southeast Alaska stock, we do not expect this level of harassment to affect annual rates of recruitment or survival or result in adverse effects on the stock.

Our proposed finding of negligible impact applies to incidental take associated with the specified activities as mitigated by the avoidance and minimization measures identified in the City and Borough of Sitka's mitigation and monitoring plan. These mitigation measures are designed to minimize interactions with and impacts to sea otters. These measures and the monitoring and reporting procedures are required for the validity of our finding and are a necessary component of the proposed IHA. For these reasons, we propose a finding that the specified project will have a negligible impact on the Southeast Alaska stock of northern sea otters.

Least Practicable Adverse Impacts

To reduce the potential for disturbance from their specified activities, the CBS will implement mitigation measures as described in Mitigation Measures and further specified under Proposed Authorization, part *B. Avoidance and Minimization.* We find that the mitigation measures required by this proposed IHA will affect the least practicable adverse impacts on the stock from any incidental take likely to occur in association with the specified activities. In making this finding, we considered the biological characteristics of sea otters, the nature of the specified activities, the potential effects of the activities on sea otters, the documented

impacts of similar activities on sea otters, and alternative mitigation measures.

We evaluated the manner and degree to which the successful implementation of the measures are expected to ensure the least practicable adverse impact on species or stocks and their habitat, as well as subsistence uses. We considered the nature of the potential adverse impact being mitigated (likelihood, scope, range), the likelihood that the measures will be effective if implemented, and the likelihood of effective implementation. We also considered the practicability of the measures for applicant implementation (*e.g.,* cost, impact on operations). We assessed whether any additional practicable requirements could be implemented to further reduce effects and did not identify any.

During the IHA application process, the FWS coordinated closely with the applicant to discuss potential mitigation measures and their practicability. A comprehensive list of these measures can be found in the supplemental information for this proposed IHA. One notable measure considered by both the FWS and CBS but deemed to be impracticable was the use of bubble curtains during pile driving. The CBS has stated the small-diameter piles used in this project will be placed closely together, and this close placement will not allow enough space to deploy bubble curtains, sound mitigation screens, or nets to dampen sound.

Following the discussion of potential mitigation measures with the applicant, the FWS has not identified any additional (*i.e.,* not already incorporated into the applicant's request) mitigation or monitoring measures that are practicable and would further reduce potential impacts to sea otters and their habitat.

Impact on Subsistence Use

We propose a finding that the CBS's anticipated harassment will not have an unmitigable adverse impact on the availability of the Southeast Alaska stock of northern sea otters for taking for subsistence uses. In making this finding, we considered the timing and location of the proposed activities and the timing and location of subsistence harvest activities in the area of the proposed project. We also considered the applicant's consultation with subsistence communities, proposed measures for avoiding impacts to subsistence harvest, and commitment to development of a POC, should any concerns be identified.

Required Determinations

National Environmental Policy Act (NEPA)

We have prepared a draft environmental assessment in accordance with the NEPA (42 U.S.C. 4321 *et seq.).* We have preliminarily concluded that authorizing the nonlethal, incidental, unintentional take by Level B harassment of up to 36 northern sea otters from the Southeast Alaska stock during the specified activities would not significantly affect the quality of the human environment and, thus, preparation of an environmental impact statement for this incidental harassment authorization is not required by section 102(2) of NEPA or its implementing regulations. We are accepting comments on the draft environmental assessment as specified above in **DATES** and **ADDRESSES**.

Endangered Species Act

Under the Endangered Species Act (ESA) (16 U.S.C. 1536(a)(2)), all Federal agencies are required to ensure the actions they authorize are not likely to jeopardize the continued existence of any threatened or endangered species or result in destruction or adverse modification of critical habitat. The specified activities would occur entirely within the range of the Southeast Alaska stock of northern sea otters, which is not listed as threatened or endangered under the ESA.

The authorization of incidental take of sea otters and the measures included in the proposed IHA would not affect other listed species or designated critical habitat.

Government-to-Government Consultation

It is our responsibility to communicate and work directly on a Government-to-Government basis with federally recognized Alaska Native Tribes and organizations in developing programs for healthy ecosystems. We seek their full and meaningful participation in evaluating and addressing conservation concerns for protected species. It is our goal to remain sensitive to Alaska Native culture, and to make information available to Alaska Natives. Our efforts are guided by the following policies and directives:

(1) *The Native American Policy of the Service* (January 20, 2016);

(2) *The Alaska Native Relations Policy* (currently in draft form);

(3) *Executive Order 13175* (January 9, 2000);

(4) *Department of the Interior Secretarial Orders 3206* (June 5, 1997), *3225* (January 19, 2001), *3317* (December 1, 2011), and *3342* (October 21, 2016);

(5) *The Alaska Government-to-Government Policy* (a departmental memorandum issued January 18, 2001); and

(6) the Department of the Interior's policies on consultation with Alaska Native Tribes and organizations.

We have evaluated possible effects of the specified activities on federally recognized Alaska Native Tribes and organizations. Through the IHA process identified in the MMPA, the applicant has presented a communication process, culminating in a POC if needed, with the Native organizations and communities most likely to be affected by their work. The FWS does not anticipate impacts to Alaska Native Tribes or Alaska Native Claims Settlement Act corporations and does not anticipate requesting consultation; however, we invite continued discussion, either about the project and its impacts or about our coordination and information exchange throughout the IHA/POC process.

Paperwork Reduction Act

This rule does not contain any new collection of information that require approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). OMB has previously approved the information collection requirements associated with IHAs and assigned OMB Control Number 1018–0194 (expires 08/31/2026). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Proposed Authorization

We propose to authorize the nonlethal, incidental take by Level B harassment of 36 Southeast Alaska stock northern sea otters. Authorized take will be limited to disruption of behavioral patterns that may be caused by construction of a seaplane base, and support activities conducted by the City and Borough of Sitka in the Sitka Channel, Sitka, Alaska, between July 1, 2024 and July 1, 2025. We do not anticipate or propose to authorize any lethal take or Level A harassment.

A. General Conditions for This IHA

(1) Activities must be conducted in the manner described in the revised Request dated November 16, 2023, for an IHA and in accordance with all applicable conditions and mitigations measures. The taking of sea otters whenever the required conditions,

mitigation, monitoring, and reporting measures are not fully implemented as required by the IHA is prohibited. Failure to follow the measures specified both in the Request and within this proposed authorization may result in the modification, suspension, or revocation of the IHA.

(2) If project activities cause unauthorized take (*i.e.,* take of more than 36 Southeast Alaska stock northern sea otters, a form of take other than Level B harassment, or take of one or more sea otters through methods not described in the IHA), the City and Borough of Sitka must take the following actions:

(i) cease its activities immediately (or reduce activities to the minimum level necessary to maintain safety);

(ii) report the details of the incident to the FWS within 48 hours; and

(iii) suspend further activities until the FWS has reviewed the circumstances and determined whether additional mitigation measures are necessary to avoid further unauthorized taking.

(3) All operations managers, vehicle operators, and vessel operators must receive a copy of this IHA and maintain access to it for reference at all times during project work. These personnel must understand, be fully aware of, and be capable of implementing the conditions of the IHA at all times during project work.

(4) This IHA will apply to activities associated with the specified project as described in this document and in the City and Borough of Sitka's Request. Changes to the specified project without prior authorization may invalidate the IHA.

(5) The City and Borough of Sitka's Request is approved and fully incorporated into this IHA unless exceptions are specifically noted herein. The Request includes:

(i) The City and Borough of Sitka's original request for an IHA, dated August 18, 2023;

(ii) Revised requests, dated October 13, 2023, and November 16, 2023; and

(iii) Geospatial files of the project location and ensonification areas.

(6) Operators will allow FWS personnel or the FWS's designated representative to visit project work sites to monitor for impacts to sea otters and subsistence uses of sea otters at any time throughout project activities so long as it is safe to do so. ''Operators'' are all personnel operating under the City and Borough of Sitka's authority, including all contractors and subcontractors.

B. Avoidance and Minimization

(7) Construction activities must be conducted using equipment that generates the lowest practicable levels of underwater sound within the range of frequencies audible to sea otters.

(8) During all pile-installation activities, regardless of predicted sound levels, a physical interaction shutdown zone of 30 m (98 ft) must be enforced. If a sea otter enters the shutdown zone, in-water activities must be delayed until either the animal has been visually observed outside the shutdown zone, or 30 minutes have elapsed since the last observation time without redetection of the animal.

(9) If the impact driver has been idled for more than 30 minutes, an initial set of 3 strikes from the impact driver must be delivered at reduced energy, followed by a 1-minute waiting period, and then two subsequent 3-strike sets before full-powered proofing strikes.

(10) In-water activity must be conducted in daylight. If environmental conditions prevent visual detection of sea otters within the shutdown zone, in-water activities must be stopped until visibility is regained.

C. Mitigation Measures for Vessel Operators

Vessel operators must take every precaution to avoid harassment of sea otters when a vessel is operating near these animals. The applicant must carry out the following measures:

(11) Vessels must remain at least 500 m (0.3 mi) from rafts of 10 or more sea otters, unless safety is a factor. Vessels must reduce speed and maintain a distance of 100 m (328 ft) from all sea otters, unless safety is a factor.

(12) Vessels must not be operated in such a way as to separate members of a group of sea otters from other members of the group, and must avoid alongshore travel in shallow water (<20 m (66 ft)) whenever practicable.

(13) When weather conditions require, such as when visibility drops, vessels must adjust speed accordingly to avoid the likelihood of injury to sea otters.

(14) Vessel operators must be provided written guidance for avoiding collisions and minimizing disturbances to sea otters. Guidance will include measures identified in paragraphs (C)(11) through (13) of this section.

D. Monitoring

(15) Operators shall work with protected species observers (PSO) to apply mitigation measures and shall recognize the authority of PSOs up to and including stopping work, except where doing so poses a significant safety risk to personnel.

(16) Duties of the PSOs include watching for and identifying sea otters, recording observation details, documenting presence in any applicable monitoring zone, identifying and documenting potential harassment, and working with operators to implement all appropriate mitigation measures.

(17) A sufficient number of PSOs will be available to meet the following criteria: 100 percent monitoring of exclusion zones during all daytime periods of underwater noise-generating work; a maximum of 4 consecutive hours on watch per PSO; a maximum of approximately 12 hours on watch per day per PSO.

(18) All PSOs will complete a training course designed to familiarize individuals with monitoring and data collection procedures. A field crew leader with prior experience as a sea otter observer will supervise the PSO team. Initially, new or inexperienced PSOs will be paired with experienced PSOs so that the quality of marine mammal observations and data recording is kept consistent. Resumes for candidate PSOs will be made available for the FWS to review.

(19) Observers will be provided with reticule binoculars (7×50 or better), big-eye binoculars or spotting scopes (30×), inclinometers, and range finders. Field guides, instructional handbooks, maps, and a contact list will also be made available.

(20) Observers will collect data using the following procedures:

(i) All data will be recorded onto a field form or database.

(ii) Global positioning system data, sea state, wind force, and weather will be collected at the beginning and end of a monitoring period, every hour in between, at the change of an observer, and upon sightings of sea otters.

(iii) Observation records of sea otters will include date; time; the observer's locations, heading, and speed (if moving); weather; visibility; number of animals; group size and composition (adults/juveniles); and the location of the animals (or distance and direction from the observer).

(iv) Observation records will also include initial behaviors of the sea otters, descriptions of project activities and underwater sound levels being generated, the position of sea otters relative to applicable monitoring and mitigation zones, any mitigation measures applied, and any apparent reactions to the project activities before and after mitigation.

(v) For all sea otters in or near a mitigation zone, observers will record

the distance from the sound source to the sea otter upon initial observation, the duration of the encounter, and the distance at last observation in order to monitor cumulative sound exposures.

(vi) Observers will note any instances of animals lingering close to or traveling with vessels for prolonged periods of time.

(21) Monitoring of the shutdown zone must continue for 30 minutes following completion of pile installation.

E. Measures To Reduce Impacts to Subsistence Users

(22) Prior to conducting the work, the City and Borough of Sitka will take the following steps to reduce potential effects on subsistence harvest of sea otters:

(i) Avoid work in areas of known sea otter subsistence harvest;

(ii) Discuss the planned activities with subsistence stakeholders including Southeast Alaska villages and traditional councils;

(iii) Identify and work to resolve concerns of stakeholders regarding the project's effects on subsistence hunting of sea otters; and

(iv) If any concerns remain, develop a POC in consultation with the FWS and subsistence stakeholders to address these concerns.

F. Reporting Requirements

(23) The City and Borough of Sitka must notify the FWS at least 48 hours prior to commencement of activities.

(24) Reports will be submitted to the FWS's MMM weekly during project activities. The reports will summarize project work and monitoring efforts.

(25) A final report will be submitted to the FWS's MMM within 90 days after completion of work or expiration of the IHA. It will summarize all monitoring efforts and observations, describe all project activities, and discuss any additional work yet to be done. Factors influencing visibility and detectability of marine mammals (*e.g.,* sea state, number of observers, fog, and glare) will be discussed. The report will describe changes in sea otter behavior resulting from project activities and any specific behaviors of interest. Sea otter observation records will be provided in the form of electronic database or spreadsheet files. The report will assess any effects the City and Borough of Sitka's operations may have had on the availability of sea otters for subsistence harvest and if applicable, evaluate the effectiveness of the POC for preventing impacts to subsistence users of sea otters.

(26) Injured, dead, or distressed sea otters that are not associated with project activities (*e.g.,* animals found outside the project area, previously wounded animals, or carcasses with moderate to advanced decomposition or scavenger damage) must be reported to the FWS within 24 hours of discovery. Photographs, video, location information, or any other available documentation shall be provided to the FWS.

(27) All reports shall be submitted by email to *fw7_mmm_reports@fws.gov.*

(28) The City and Borough of Sitka must notify the FWS upon project completion or end of the work season.

Request for Public Comments

If you wish to comment on this proposed authorization, the associated draft environmental assessment, or both documents, you may submit your comments by either of the methods described in **ADDRESSES**. Please identify if you are commenting on the proposed authorization, draft environmental assessment, or both, make your comments as specific as possible, confine them to issues pertinent to the proposed authorization, and explain the reason for any changes you recommend. Where possible, your comments should reference the specific section or paragraph that you are addressing. The FWS will consider all comments that are received before the close of the comment period (see **DATES**). The FWS does not anticipate extending the public comment period beyond the 30 days required under section 101(a)(5)(D)(iii) of the MMPA.

Comments, including names and street addresses of respondents, will become part of the administrative record for this proposal. Before including your address, telephone number, email address, or other personal identifying information in your comment, be advised that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comments to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so.

Peter Fasbender,

Assistant Regional Director for Fisheries and Ecological Services, Alaska Region.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R7–ES–2024–0003; FXES111607MRG01–245–FF07CAMM00]

Marine Mammals; Letters of Authorization To Take Pacific Walruses, Polar Bears, and Northern Sea Otters in Alaska, in 2023

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of issuance.

SUMMARY: In accordance with the Marine Mammal Protection Act of 1972, as amended, the U.S. Fish and Wildlife Service (Service) issues letters of authorization (LOA) for the nonlethal take of polar bears and Pacific walruses incidental to oil and gas industry exploration, development, and production activities in the Beaufort Sea and the adjacent northern coast of Alaska. The Service also issues LOAs for the nonlethal take of northern sea otters incidental to pile driving and marine construction activities in the Gulf of Alaska. This notice announces the LOAs issued in calendar year 2023. The LOAs stipulate conditions and methods that minimize impacts to polar bears, Pacific walruses, and northern sea otters from these activities.

ADDRESSES:

Accessing documents: You may view the letters of authorization at *https://www.regulations.gov* under Docket No. FWS–R7–ES–2024–0003. Alternatively, you may request these documents from the person listed under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT: Charles Hamilton, U.S. Fish and Wildlife Service, 1011 East Tudor Road MS–341, Anchorage, AK 99503, by email at *R7mmmregulatory@fws.gov* or by telephone at (907) 786–3800. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: On August 5, 2021, the U.S. Fish and Wildlife Service (Service) published in the **Federal Register** a final rule (86 FR 42982) establishing regulations that allow us to authorize the nonlethal, incidental, unintentional take of small numbers of polar bears (*Ursus maritimus*) and Pacific walruses

(*Odobenus rosmarus divergens*) during year-round oil and gas industry exploration, development, and production activities in the Beaufort Sea and adjacent northern coast of Alaska. These incidental take regulations are located in subpart J in part 18 of title 50 of the Code of Federal Regulations (CFR) and are effective through August 5, 2026. The rule prescribed a process under which we issue letters of authorization (LOA) to applicants conducting activities as described under the provisions of the regulations.

Each LOA stipulates conditions or methods that are specific to the activity and location. Holders of the LOAs must use methods and conduct activities in a manner that minimizes to the greatest extent practicable adverse impacts on Pacific walruses and polar bears and their habitat, and on the availability of these marine mammals for subsistence purposes. No intentional take or lethal incidental take is authorized under these regulations.

In accordance with section 101(a)(5)(A) of the Marine Mammal Protection Act (16 U.S.C. 1361 *et seq.*) and our regulations at 50 CFR part 18, subpart J, in 2023, we issued LOAs to the companies in the Beaufort Sea and adjacent northern coast of Alaska shown in table 1.

TABLE 1—LETTERS OF AUTHORIZATION ISSUED FOR OIL AND GAS DEVELOPMENT ACTIVITIES IN THE BEAUFORT SEA, ALASKA, IN 2023

Company	Project	LOA #
Eni U.S. Operating Company Inc	Oil and gas drilling and production within the Nikaitchuq and Oooguruk Units on Alaska's North Slope.	23–01.
ASRC Consulting and Environmental Services.	Well drilling and production test facility construction and operation for a methane hydrate project on the Kuparuk State 7–11–12 gravel pad within the Prudhoe Bay Unit on the North Slope of Alaska.	23–02.
Alyeska Pipeline Service Company	Operation and maintenance of the Trans Alaska Pipeline System, which extends from Pump Station 1 in the Prudhoe Bay Oilfield to the Valdez Marine Terminal.	23–03.
Oil Search Alaska, LLC	Oil and gas exploration and development within and adjacent to the Pikka Unit area and oil and gas exploration on Oil Search Alaska operated leaseholds on Alaska's North Slope.	23–04.
Hilcorp Alaska, LLC	Year-round oil and gas exploration, production, development, and support activities in the Milne Point, Duck Island (Endicott), Northstar Island, Prudhoe Bay, and Point Thomson operation areas located in the Beaufort Sea incidental take regulations area of the North Slope of Alaska.	23–05.
Hilcorp Alaska, LLC	An amendment request dated November 2, 2023, for 23–INC–05 to include three additional pad expansions, two additional road expansions, repair of the Northstar bench, and construction and use of an ice road from Niakuk to Endicott's main drilling island in the Mine Point, Duck Island (Endicott), and Northstar Island operational areas. Original LOA (23–INC–05) for year-round oil and gas exploration, production, development, and support activities in the Milne Point, Duck Island (Endicott), Northstar Island, Prudhoe Bay, and Point Thomson operation areas located in the Beaufort Sea incidental take regulations area of the North Slope of Alaska.	23–05 [Amended in Dec. 2023 from July 2023].
Hilcorp Alaska, LLC	A letter from the Service dated December 19, 2023, outlining additional monitoring and mitigation measures to reduce disturbance of a putative den identified through aerial infrared surveys and located within the 1-mile buffer zone of operations and infrastructure.	23–05 [Amended in Dec. 2023 from July 2023].
Conoco Philips Alaska Inc	Incidental take of polar bears during oil and gas activities associated with the Willow Development (Project) work in 2023–2024. Represents an extension of Willow LOA 22–INC–10, which expires August 6, 2023.	23–06.
Conoco Philips Alaska Inc	Renewal request of 22–INC–09: Incidental take of polar bears and Pacific walrus that may occur during ConocoPhillips Alaska Inc.'s field-wide operations in the Kuparuk River, Western North Slope, Colville River, Greater Moose's Tooth, and Bear Tooth Units on the North Slope of Alaska.	23–07.
Glacier Oil and Gas	Incidental harassment of polar bears and Pacific walrus that may occur during Glacier Oil and Gas Corporation's oil production, facilities and pipeline maintenance, workovers of existing wells, and construction and maintenance of ice roads associated with the Badami oilfield near Mikkelsen Bay in the North Slope.	23–08.
Conoco Philips Alaska Inc	Incidental take of polar bears that may occur during CPAI's Ptarmigan Seismic Survey in the Greater Mooses Tooth, Bear Tooth, and non-unitized land on the North Slope of Alaska.	23–09.
ASRC Consulting and Environmental Services.	Incidental take of polar bears associated with Lagniappe drilling program activities, including ice road and ice pad construction, ice road transportation, well drilling, and aircraft-supported cleanup for an oil and gas exploration well drilling project. Drilling located south of the Badami Unit.	23–10.
Oil Search Alaska, LLC	Amendment submitted on Jan. 18, 2023, to LOA 22–INC–04. Amendment pertains to the incidental take of polar bears that may occur during activities associated with oil and gas exploration and development within and adjacent to the Pikka Unit area and oil and gas exploration on OSA-operated leaseholds on Alaska's North Slope. Amendment allows for additional tundra travel to survey a pipeline route between Oliktok Point and the Kuparuk area and the construction of a 10-acre gravel pad alongside the NDA gravel road.	22–04 [Amended in 2023 from 2022].

On April 19, 2023, the Service published in the **Federal Register** a final rule (88 FR 24115) establishing regulations that allow us to authorize the nonlethal, incidental, unintentional take of small numbers of northern sea otters (*Enhydra lutris kenyoni*) during marine construction and pile-driving activities in coastal waters surrounding eight United States Coast Guard (USCG) facilities in the Gulf of Alaska. These incidental take regulations are located in subpart L in part 18 of title 50 of the Code of Federal Regulations (CFR) and are effective through May 19, 2028. The rule prescribed a process under which we issue LOAs to the USCG Guard conducting activities as described under the provisions of the regulations.

Each LOA stipulates conditions or methods that are specific to the activity and location. Holders of the LOAs must use methods and conduct activities in a manner that minimizes to the greatest extent practicable adverse impacts on northern sea otters and their habitat, and on the availability of northern sea otters for subsistence purposes. No intentional take or lethal incidental take is authorized under these regulations.

In accordance with section 101(a)(5)(A) of the Marine Mammal Protection Act (16 U.S.C. 1361 *et seq.*) and our regulations at 50 CFR part 18, subpart L, in 2023, we issued two LOAs to the USCG for their activities in the Gulf of Alaska shown in table 2.

TABLE 2—LETTERS OF AUTHORIZATION ISSUED TO THE U.S. COAST GUARD (USCG) FOR MARINE CONSTRUCTION AND PILE-DRIVING ACTIVITIES IN THE GULF OF ALASKA

Company	Project	LOA #
USCG	Incidental take of small numbers of northern sea otters that may occur during activities associated with pile driving and marine construction activities in Cordova, Alaska.	23–CG–01
USCG	Incidental take of small numbers of northern sea otters that may occur during activities associated with improvements to the small boat fueling tank facility at USCG Station Valdez, Alaska.	23–CG–02

Authority: We issue this notice under the authority of the Marine Mammal Protection Act (16 U.S.C. 1361 *et seq.*).

Peter Fasbender,

Assistant Regional Director, Fisheries and Ecological Services, Alaska Region.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_OR_FRN_MO4500178813]

Second Call for Nominations for the San Juan Islands National Monument Advisory Committee

AGENCY: Bureau of Land Management, Interior.

ACTION: Second call for nominations to San Juan Islands National Monument Advisory Committee.

SUMMARY: The purpose of this notice is to request public nominations for the Bureau of Land Management's (BLM) San Juan Islands National Monument Advisory Committee (MAC). The Council provides advice and recommendations to the BLM on land use planning and management of the public land resources located within the BLM's San Juan Islands National Monument, located in the Spokane District.

DATES: All nominations must be received no later than June 21, 2024.

ADDRESSES: Nominations and completed applications should be sent to the BLM office listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

FOR FURTHER INFORMATION CONTACT: Travis Edwards BLM Spokane District Office, 1103 N Fancher, Spokane Valley, WA 99212; telephone: (509) 536–1297; or email: *tedwards@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Federal Land Policy and Management Act (FLPMA) directs the Secretary of the Interior to involve the public in planning and issues related to management of lands administered by the BLM. Section 309 of FLPMA, as amended (43 U.S.C. 1739), directs the Secretary to establish 10- to 15-member citizen-based advisory committees that are consistent with the Federal Advisory Committee Act (FACA). As required by FACA, MAC membership must be balanced and representative of the various interests concerned with the management of the public lands. The BLM's regulations governing resource advisory councils are found at 43 CFR 1784.

The MAC includes thirteen representative members to be appointed by the Secretary of the Interior as follows:

(a) One member representing archeological, cultural, and heritage interests;

(b) One member representing wildlife and ecological interests;

(c) One member representing the interests of a nonprofit organization whose mission is conservation and/or management of natural resources, land, or water;

(d) One member representing natural resource management or natural sciences interests;

(e) One member representing recreation and tourism interests;

(f) One member representing local youth, education, and interpretation interests;

(g) Two members that have significant cultural or historic connections to, and knowledge about, the landscape, archeological sites, or cultural sites connected to the Monument;

(h) One member who holds State, county, or local elected office;

(i) One member representing conservation and/or management of natural resources, land, or water interests;

(j) One member representing local interests that is a resident of Lopez Island; and

(k) One member of the public-at-large.

Members will be appointed to the MAC to serve three-year staggered terms.

Nominating Potential Members: Nominations should include a resume providing an adequate description of the nominee's qualifications, including information that would enable the Department of the Interior to make an

informed decision regarding the membership requirements of the MAC and permit the Department to contact a potential member. Nominees are strongly encouraged to include supporting letters from employers, associations, professional organizations, and/or other organizations that indicate support by a meaningful constituency for the nominee. Please indicate any BLM permits, leases, or licenses that you hold personally or are held by your employer.

Members of the MAC serve without compensation. However, while away from their homes or regular places of business, members engaged in MAC business may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by 5 U.S.C. 5703, in the same manner as persons employed intermittently in Federal Government service.

Simultaneous with this notice, the BLM will issue a press releases providing additional information for submitting nominations.

Before including any address, phone number, email address, or other personal identifying information in the application, nominees should be aware this information may be made publicly available at any time. While the nominee may ask to withhold the personal identifying information from public review, the BLM cannot guarantee that it will be able to do so.

Authority: 43 CFR 1784.4–1.

Stephen Small,

District Manager, Spokane District.

[FR Doc. 2024–09950 Filed 5–6–24; 8:45 am]

BILLING CODE 4331–24–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2024–0027]

Notice of Availability of a Final Environmental Assessment for Additional Site Assessment Activities on Beacon Wind, LLC's Renewable Energy Lease OCS–A 0520

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Ocean Energy Management (BOEM) announces the availability of a final environmental assessment (EA) and its finding that additional site assessment activities in Lease Area OCS–A 0520 offshore Massachusetts will not significantly impact the environment. Beacon Wind, LLC (Beacon Wind), the leaseholder, requested to conduct the additional activities in the lease area, which were not analyzed in the initial EA titled "Commercial Wind Lease Issuance and Site Assessment Activities on the Atlantic Outer Continental Shelf Offshore Massachusetts" (2014 EA). This final EA analyzed the potential environmental impacts of the proposed additional site assessment activities. Those activities comprise 35 deployments and removals of a single suction bucket foundation at 26 locations within the lease area to gather engineering information to inform Beacon Wind's foundation design for wind turbines and offshore substations. This EA will inform BOEM's decision whether to approve Beacon Wind's site assessment plan (SAP) amendment for suction bucket foundation testing.

FOR FURTHER INFORMATION CONTACT: Laura Lee Wolfson, BOEM Office of Renewable Energy Programs, 45600 Woodland Road, Sterling, Virginia 20166, (703) 787–1433 or *lauralee.wolfson@boem.gov.*

SUPPLEMENTARY INFORMATION:

Proposed Action: The final EA analyzes the proposed action alternative, which is approving the additional site assessment activities proposed in the Beacon Wind SAP amendment to the lease area. The EA considers the reasonably foreseeable environmental consequences associated with the deployment and recovery of suction bucket foundations to further assess the site conditions and gather information to support the engineering design of wind turbine and offshore substation foundations that would potentially be installed within the lease area for the proposed Beacon Wind project. BOEM prepared an EA for this proposed action in order to assist the agency's planning and decision-making (40 CFR 1501.5(b)).

Alternatives: In addition to the proposed action, BOEM considered the no action alternative. Under the no action alternative, BOEM would not approve the SAP amendment, and the additional site assessment activities for foundation testing would not occur within the Beacon Wind lease area OCS–A 0520. BOEM's preferred alternative is the proposed action.

Finding of no significant Impact: After carefully considering alternatives described and analyzed in the final EA and comments from the public and cooperating and consulting agencies on the draft EA, BOEM finds that approval of the SAP amendment for suction bucket foundation testing within the Beacon Wind lease area would have no significant impact on the environment.

Availability of the final EA and finding: This EA, its finding, and associated information are available on BOEM's website at: *https://www.boem.gov/renewable-energy/state-activities/beacon-wind.*

Authority: 42 U.S.C. 4231 *et seq.* (NEPA, as amended) and 40 CFR 1506.6.

Walter Cruickshank,

Deputy Director, Bureau of Ocean Energy Management.

[FR Doc. 2024–09844 Filed 5–6–24; 8:45 am]

BILLING CODE 4340–98–P

DEPARTMENT OF JUSTICE

[OMB Number 1122–0013]

Agency Information Collection Activities; Extension of Previously Approved eCollection eComments Requested; Semi-Annual Progress Report for Grantees From the Rural Domestic Violence, Dating Violence, Sexual Assault, Stalking, and Child Abuse Enforcement Assistance Program

AGENCY: Office on Violence Against Women, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Office on Violence Against Women, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until June 6, 2024.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Catherine Poston, Office on Violence Against Women, at 202–514–5430 or *Catherine.poston@usdoj.gov.*

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register** on March 26, 2024 allowing a 60-day comment period.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and/or

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1122–0013. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a previously approved collection.

2. *Title of the Form/Collection:* Semi-Annual Progress Report for Grantees from the Rural Domestic Violence, Dating Violence, Sexual Assault, Stalking, and Child Abuse Enforcement Assistance Program.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:*

Form Number: 1122–0013. U.S. Department of Justice, Office on Violence Against Women.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Affected Public: The affected public includes the approximately 165 grantees of the Rural Domestic Violence, Dating Violence, Sexual Assault, and Stalking and Child Abuse Enforcement Assistance Program (Rural Program). Grantees include States, Indian tribes, local governments, and nonprofit, public or private entities, including tribal nonprofit organizations.

Abstract; Authorized by 34 U.S.C. 12341, the Rural Program supports efforts to enhance the safety of rural victims of domestic violence, dating violence, sexual assault, and stalking and supports projects uniquely designed to address and prevent these crimes in rural areas.

5. *Obligation to Respond:* The obligation to respond is required to obtain/retain a benefit.

6. *Total Estimated Number of Respondents:* Approximately 165 grantees of the Rural Program.

Estimated Time per Respondent: 1 hour. The semi-annual progress report is divided into sections that pertain to the different types of activities in which grantees may engage. A Rural Program grantee will only be required to complete the sections of the form that pertain to its own specific activities.

7. *Frequency:* Semi-annually.

8. *Total Estimated Annual Time Burden:* 330 hours.

9. *Total Estimated Annual Other Costs Burden:* The annualized costs to the Federal Government resulting from the OVW staff review of the progress reports submitted by grantees are estimated to be $18,480.

Activity	Number of respondents	Frequency	Total annual responses	Time per response	Total annual burden (hours)
Survey	165	Semi-annually	2	1 hour	330
Unduplicated Totals	165	Semi-annually			330

If additional information is required, contact: John R. Carlson, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC 20530.

Dated: May 2, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2024–09908 Filed 5–6–24; 8:45 am]

BILLING CODE 4410–FX–P

DEPARTMENT OF JUSTICE

[OMB Number 1110–0039]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension of a Currently Approved Collection; FBI Bioterrorism Preparedness Act Entity/ Individual Information

AGENCY: Federal Bureau of Investigation, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Federal Bureau of Investigation (FBI), Criminal Justice Information Services (CJIS) Division, Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until July 8, 2024.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Timothy R. Wiles, National Instant Criminal Background Check System Section (NICS), NICS External Service Unit, Federal Bureau of Investigation, CJIS Division, 1000 Custer Hollow Road, Clarksburg, West Virginia 26306; *nicsliaison@fbi.gov,* (304) 625–2000.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should

address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Abstract: On June 13, 2002, the President of the United States signed the Public Health and Bioterrorism Preparedness and Response Act of 2002, (Bioterrorism Act), Public Law 107–188 into effect. Under this Act, the Secretaries of the United States Department of Agriculture (USDA) and Health and Human Services (HHS), in consultation with the Attorney General, are responsible for establishing appropriate safeguards and security requirements to prevent access to select agents and toxins for use in domestic or international terrorism or for any other criminal purpose.

On January 30, 2003, the U.S. Attorney General directed the FBI to conduct the Bioterrorism Security Risk Assessments (SRAs) under sections 201, 212 and 221 of the Public Health Security and Bioterrorism Act, Public Law 107–188, 166 Stat. 594 (2002). On March 25, 2003, FBI Director Mueller directed the Criminal Justice Information Services (CJIS) Division to promptly conduct the Bioterrorism SRAs. Under this delegation, the FBI receives biometric and biographic information submitted by individuals requesting access to select agents and toxins; utilizes criminal, immigration, national security and other electronic databases that are available to the Federal Government to conduct SRAs of such individuals; and consult with appropriate officials of the HHS and the USDA to determine whether certain individuals should be disqualified from possessing, using or transferring select agents and toxins.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.
2. *The Title of the Form/Collection:* Federal Bureau of Investigation Bioterrorism Preparedness Act: Entity/ Individual Information.
3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form is FD–961. The applicable component within the Criminal Justice Information Services Division, Department of Justice (DOJ), Federal Bureau of Investigation (FBI).
4. *Affected public who will be asked or required to respond, as well as the obligation to respond:*

Primary: Those individuals applying for access to biological select agents and toxins. This collection is needed for the FBI to conduct security risk assessments (SRAs)required by the Bioterrorism Act and to determine whether applicants should be denied access to or granted limited access to specific agents and toxins. That information is then used by the FBI in consultations with appropriate officials of the Department of Health and Human Services (HHS) and the Department of Agriculture (USDA) as to whether certain individuals specified in the provisions should be denied access to or granted limited access to specific agents.

Obligation to respond: Individuals voluntarily provide the requested/ collected information; however, providing such information is required in order to obtain approval for access to select agents and toxins. (Sections 201, 212 and 221 of the Public Health Security and Bioterrorism Act, Public Law 107–188, 166 Statute 594 (2002).

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* There are approximately 3,007 (FY 2023) respondents at 1 hour 30 minutes for the FD–961 form.
6. *An estimate of the total annual burden (in hours) associated with the collection:* The total annual burden hours for this collection is estimated to be 4,510.5 burden hours (3,007 × 90min/ 60 = 4,510.5)
7. *An estimate of the total annual cost burden associated with the collection, if applicable:* Respondents will incur the estimated cost of $3.07 for postage fees to submit the FD–961 form and two completed fingerprint cards. It is estimated that the cost to the applicant to submit a photograph that meets criteria specified in the instruction pages based on national averages would be $15 at the post office. It is estimated that each applicant would travel approximately 3 miles one way and 6 miles round trip to a business to obtain their photo. This distance is estimated to take an amount of five minutes each way for a total of 10 minutes round trip. Also, to determine the travel cost to the respondent, the Department of Justice (DOJ) is factoring in the General Services Administration (GSA) reimbursement rate of $0.67 mile for privately owned automobiles (POA) use as of January 1, 2024. Therefore, the cost to the respondent to travel this distance is estimated to be $4.02.

3,007 (number of respondents) × (6 (miles) × $0.67 (amount per mile)) = $12,088.14
3,007 (number of respondents × $3.07 (postage) = $9,231.49
3,007 (number of respondents × $15.00 (picture at USPS) = $45,105

The total annual cost incurred by the FY2023 respondents is ($12,088.14 + $9,231.49 + $45,105) = $66,424.63 or $66,424.63/3,007 ($22.09 per person.)

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency	Total annual responses	Time per response (min)	Total annual burden (hours)
Complete form and travel time for photo for respondent	3,007	1/annually	3,007	90	4,510.5
Unduplicated Totals	3,007	1/annually	3,007	90	4,510.5

BILLING CODE 4410–02–P

DEPARTMENT OF JUSTICE

[OMB Number 1122–0018]

Agency Information Collection Activities; Extension of Previously Approved eCollection eComments Requested; Semi-Annual Progress Report for the Grantees From the Grants to Indian Tribal Governments Program

AGENCY: Office on Violence Against Women, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Office on Violence Against Women, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until June 6, 2024.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Catherine Poston, Office on Violence Against Women, at 202–514–5430 or *Catherine.poston@usdoj.gov.*

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register** on March 26, 2024 allowing a 60-day comment period.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and/or

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1122–0018. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a previously approved collection.

2. *Title of the Form/Collection:* Semi-Annual Progress Report for the Grantees from the Grants to Indian Tribal Governments Program.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form Number: 1122–0018. U.S. Department of Justice, Office on Violence Against Women.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Affected Public—The affected public includes the approximately 85 grantees of the Grants to Indian Tribal Governments Program (Tribal Governments Program), a grant program authorized by the Violence Against Women Act, as amended. This discretionary grant program is designed to enhance the ability of tribes to respond to violent crimes against Indian women, enhance victim safety, and develop education and prevention strategies.

Abstract: Authorized by 34 U.S.C. 10452, the Tribal Governments Program is designed to enhance the ability of tribal governments and authorized designees of tribal governments to respond to domestic violence, dating violence, sexual assault, sex trafficking, and stalking in their communities, enhance victim safety and hold offenders accountable, and develop education and prevention strategies.

5. *Obligation to Respond:* The obligation to respond is required to obtain/retain a benefit.

6. *Total Estimated Number of Respondents:* Approximately 85 grantees of the Tribal Governments Program.

Estimated Time per Respondent: 1 hour. The semi-annual progress report is divided into sections that pertain to the different types of activities in which grantees may engage. A Tribal Governments Program grantee will only be required to complete the sections of the form that pertain to its own specific activities.

7. *Frequency:* Semi-annually.

8. *Total Estimated Annual Time Burden:* 170 hours.

9. *Total Estimated Annual Other Costs Burden:* The annualized costs to the Federal Government resulting from the OVW staff review of the progress reports submitted by grantees are estimated to be $9520.

Activity	Number of respondents	Frequency	Total annual responses	Time per response (hour)	Total annual burden (hours)
Survey	85	Semi-annually	2	1	170
Unduplicated Totals	85	Semi-annually			170

If additional information is required, contact: John R. Carlson, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218 Washington, DC 20530.

Dated: May 2, 2024.

NATIONAL SCIENCE FOUNDATION

Proposal Review; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces its intent to hold proposal review meetings throughout the year. The purpose of these meetings is to provide advice and recommendations concerning proposals submitted to the NSF for financial support. The agenda for each of these meetings is to review and evaluate proposals as part of the selection process for awards. The review and evaluation may also include assessment of the progress of awarded proposals. The majority of these meetings will take place at NSF, 2415 Eisenhower Avenue, Alexandria, VA 22314.

These meetings will be closed to the public. The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act. NSF will continue to review the agenda and merits of each meeting for overall compliance of the Federal Advisory Committee Act.

These closed proposal review meetings will not be announced on an individual basis in the **Federal Register**. NSF intends to publish a notice similar to this on a quarterly basis. For an advance listing of the closed proposal review meetings that include the names of the proposal review panel and the time, date, place, and any information on changes, corrections, or cancellations, please visit the NSF website: *https://new.nsf.gov/events/proposal-review-panels.* This information may also be requested by telephoning, 703/292–8687.

Dated: May 1, 2024.

Crystal Robinson,

Committee Management Officer.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2024–0070]

Application for Amendments to Facility Operating Licenses and Involving Proposed No Significant Hazards Consideration Determination and Containing Sensitive Unclassified Non-Safeguards Information and Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information

AGENCY: Nuclear Regulatory Commission.

ACTION: License amendment request; notice of opportunity to comment, request a hearing, and petition for leave to intervene; order imposing procedures.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) received and is considering approval of one amendment request. The amendment request is for Limerick Generating Station, Units 1 and 2. For the amendment request, the NRC proposes to determine that it involves no significant hazards consideration (NSHC). Because the amendment request contains sensitive unclassified non-safeguards information (SUNSI), an order imposes procedures to obtain access to SUNSI for contention preparation by persons who file a hearing request or petition for leave to intervene.

DATES: Comments must be filed by June 6, 2024. A request for a hearing or petitions for leave to intervene must be filed by July 8, 2024. Any potential party as defined in section 2.4 of title 10 of the *Code of Federal Regulations* (10 CFR) who believes access to SUNSI is necessary to respond to this notice must request document access by May 17, 2024.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0070. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Shirley Rohrer, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–5411; email: *Shirley.Rohrer@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2024–0070, facility name, unit number(s), docket number(s), application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0070.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS)

is provided the first time that it is mentioned in this document.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2024–0070, facility name, unit number(s), docket number(s), application date, and subject, in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Pursuant to Section 189a.(1)–(2) of the Atomic Energy Act of 1954, as amended (the Act), the NRC is publishing this notice. The Act requires the Commission to publish notice of any amendments issued or proposed to be issued and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves NSHC, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This notice includes a notice of an amendment containing SUNSI.

III. Notice of Consideration of Issuance of an Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment request involves NSHC. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for the amendment request is shown as follows.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of 60 days after the date of publication of this notice. The Commission may issue the license amendment before expiration of the 60-day period provided that its final determination is that the amendment involves no significant hazards consideration. In addition, the Commission may issue the amendment prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility. If the Commission takes action on the amendment prior to the expiration of either the comment period or the notice period, it will publish a notice of issuance in the **Federal Register**. If the Commission makes a final no significant hazards consideration determination for the amendment, any hearing on the amendment will take place after issuance. The Commission expects that the need to take this action will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by any of these actions may file a request for a hearing and petition for leave to intervene (petition) with respect to that action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

Petitions must be filed no later than 60 days from the date of publication of this notice in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration, which will serve to establish when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h) no later than 60 days from the date of publication of this notice. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

For information about filing a petition and about participation by a person not a party under 10 CFR 2.315, see ADAMS Accession No. ML20340A053 (*https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML20340A053*) and on the NRC's public website at *https://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing.html#participate.*

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as further discussed, is granted. Detailed guidance on electronic submissions is located in the ''Guidance for Electronic Submissions to the NRC'' (ADAMS Accession No. ML13031A056) and on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html.*

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *Hearing.Docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals/getting-started.html.* After a digital ID certificate is obtained and a docket created, the participant must submit adjudicatory documents in Portable Document Format. Guidance on submissions is available on the NRC's public website at *https://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. ET on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., ET, Monday through Friday, except Federal holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as previously described, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

The following table provides the plant name, docket numbers, date of application, ADAMS accession number, and location in the application of the licensee's proposed NSHC determination. For further details with respect to this license amendment application, see the application for amendment, publicly available portions of which are available for public inspection in ADAMS. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

Constellation Energy Generation, LLC; Limerick Generating Station, Units 1 and 2; Montgomery County, PA

Docket No(s)	50–352, 50–353.
Application Date	September 26, 2022.
ADAMS Accession No	September 26, 2022 (non-public, withheld under 10 CFR 2.390); as supplemented by letters dated June 26, 2023, (ML23177A224); September 12, 2023, (ML23255A095); November 21, 2023, (ML23325A206); January 26, 2024, (ML24026A296).
Location in Application of NSHC	Pages 24–28 of Attachment 1 of the supplement dated September 12, 2023.

Brief Description of Amendment(s)	The proposed amendments would change both the design and technical specifications to permit the use of a new single digital instrumentation and controls system to replace analog instrumentation of reactor protection system, analog nuclear steam supply shutoff system, emergency core cooling system, reactor core isolation cooling system, and end-of-cycle recirculation pump trip at Limerick. In addition, the proposed amendments would change the classification of the redundant reactivity control system from safety-related to nonsafety-related, eliminate the automatic redundant reactivity control system feedwater runback function, eliminate the automatic isolation function for the turbine enclosure main steam line tunnel, eliminate several surveillance requirements, and allow the use of automated operator aids (or automated controls) from main control room.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Jason Zorn, Associate General Counsel, Constellation Energy Generation, 101 Constitution Ave. NW, Suite 400 East, Washington, DC 20001.
NRC Project Manager, Telephone Number	Michael L. Marshall, Jr., 301–415–2871.

Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information for Contention Preparation

Constellation Energy Generating, LLC

Limerick Generating Station, Units 1 and 2, Montgomery County, PA

A. This Order contains instructions regarding how potential parties to this proceeding may request access to documents containing Sensitive Unclassified Non-Safeguards Information (SUNSI).

B. Within 10 days after publication of this notice of hearing or opportunity for hearing, any potential party who believes access to SUNSI is necessary to respond to this notice may request access to SUNSI. A ''potential party'' is any person who intends to participate as a party by demonstrating standing and filing an admissible contention under 10 CFR 2.309. Requests for access to SUNSI submitted later than 10 days after publication of this notice will not be considered absent a showing of good cause for the late filing, addressing why the request could not have been filed earlier.

C. The requestor shall submit a letter requesting permission to access SUNSI to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, and provide a copy to the Deputy General Counsel for Licensing, Hearings, and Enforcement, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. The expedited delivery or courier mail address for both offices is: U.S. Nuclear Regulatory Commission, 11555 Rockville Pike, Rockville, Maryland 20852. The email addresses for the Office of the Secretary and the Office of the General Counsel are *Hearing.Docket@nrc.gov* and *RidsOgcMailCenter.Resource@nrc.gov*, respectively.[1] The request must include the following information:

(1) A description of the licensing action with a citation to this **Federal Register** notice;

(2) The name and address of the potential party and a description of the potential party's particularized interest that could be harmed by the action identified in C.(1); and

(3) The identity of the individual or entity requesting access to SUNSI and the requestor's basis for the need for the information in order to meaningfully participate in this adjudicatory proceeding. In particular, the request must explain why publicly available versions of the information requested would not be sufficient to provide the basis and specificity for a proffered contention.

D. Based on an evaluation of the information submitted under paragraph C, the NRC staff will determine within 10 days of receipt of the request whether:

(1) There is a reasonable basis to believe the petitioner is likely to establish standing to participate in this NRC proceeding; and

(2) The requestor has established a legitimate need for access to SUNSI.

E. If the NRC staff determines that the requestor satisfies both D.(1) and D.(2), the NRC staff will notify the requestor in writing that access to SUNSI has been granted. The written notification will contain instructions on how the requestor may obtain copies of the requested documents, and any other conditions that may apply to access to those documents. These conditions may include, but are not limited to, the signing of a Non-Disclosure Agreement or Affidavit, or Protective Order[2] setting forth terms and conditions to prevent the unauthorized or inadvertent disclosure of SUNSI by each individual who will be granted access to SUNSI.

F. Filing of Contentions. Any contentions in these proceedings that are based upon the information received as a result of the request made for SUNSI must be filed by the requestor no later than 25 days after receipt of (or access to) that information. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or opportunity for hearing), the petitioner may file its SUNSI contentions by that later deadline.

G. Review of Denials of Access.

(1) If the request for access to SUNSI is denied by the NRC staff after a determination on standing and requisite need, the NRC staff shall immediately notify the requestor in writing, briefly stating the reason or reasons for the denial.

(2) The requestor may challenge the NRC staff's adverse determination by filing a challenge within 5 days of receipt of that determination with: (a) the presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if this individual is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a); or (c) if another officer has been designated to rule on information access issues, with that officer.

(3) Further appeals of decisions under this paragraph must be made pursuant to 10 CFR 2.311.

H. Review of Grants of Access. A party other than the requestor may challenge an NRC staff determination granting access to SUNSI whose release would harm that party's interest

[1] While a request for hearing or petition to intervene in this proceeding must comply with the filing requirements of the NRC's ''E-Filing Rule,'' the initial request to access SUNSI under these procedures should be submitted as described in this paragraph.

[2] Any motion for Protective Order or draft Non-Disclosure Affidavit or Agreement for SUNSI must be filed with the presiding officer or the Chief Administrative Judge if the presiding officer has not yet been designated, within 30 days of the deadline for the receipt of the written access request.

independent of the proceeding. Such a challenge must be filed within 5 days of the notification by the NRC staff of its grant of access and must be filed with: (a) the presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if this individual is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a); or (c) if another officer has been designated to rule on information access issues, with that officer.

If challenges to the NRC staff determinations are filed, these procedures give way to the normal process for litigating disputes concerning access to information. The availability of interlocutory review by the Commission of orders ruling on such NRC staff determinations (whether granting or denying access) is governed by 10 CFR 2.311.[3]

I. The Commission expects that the NRC staff and presiding officers (and any other reviewing officers) will consider and resolve requests for access to SUNSI, and motions for protective orders, in a timely fashion in order to minimize any unnecessary delays in identifying those petitioners who have standing and who have propounded contentions meeting the specificity and basis requirements in 10 CFR part 2. The attachment to this Order summarizes the general target schedule for processing and resolving requests under these procedures.

It is so ordered.

Dated: April 15, 2024.

For the Nuclear Regulatory Commission.

Carrie Safford,

Secretary of the Commission.

ATTACHMENT 1—General Target Schedule for Processing and Resolving Requests for Access to Sensitive Unclassified Non-Safeguards Information in This Proceeding

Day	Event/activity
0	Publication of **Federal Register** notice of hearing or opportunity for hearing, including order with instructions for access requests.
10	Deadline for submitting requests for access to Sensitive Unclassified Non-Safeguards Information (SUNSI) with information: (i) supporting the standing of a potential party identified by name and address; and (ii) describing the need for the information in order for the potential party to participate meaningfully in an adjudicatory proceeding.
60	Deadline for submitting petition for intervention containing: (i) demonstration of standing; and (ii) all contentions whose formulation does not require access to SUNSI (+25 Answers to petition for intervention; +7 petitioner/requestor reply).
20	U.S. Nuclear Regulatory Commission (NRC) staff informs the requestor of the staff's determination whether the request for access provides a reasonable basis to believe standing can be established and shows need for SUNSI. (NRC staff also informs any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information.) If NRC staff makes the finding of need for SUNSI and likelihood of standing, NRC staff begins document processing (preparation of redactions or review of redacted documents).
25	If NRC staff finds no "need" or no likelihood of standing, the deadline for petitioner/requestor to file a motion seeking a ruling to reverse the NRC staff's denial of access; NRC staff files copy of access determination with the presiding officer (or Chief Administrative Judge or other designated officer, as appropriate). If NRC staff finds "need" for SUNSI, the deadline for any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information to file a motion seeking a ruling to reverse the NRC staff's grant of access.
30	Deadline for NRC staff reply to motions to reverse NRC staff determination(s).
40	(Receipt +30) If NRC staff finds standing and need for SUNSI, deadline for NRC staff to complete information processing and file motion for Protective Order and draft Non-Disclosure Agreement or Affidavit. Deadline for applicant/licensee to file Non-Disclosure Agreement or Affidavit for SUNSI.
A	If access granted: issuance of presiding officer or other designated officer decision on motion for protective order for access to sensitive information (including schedule for providing access and submission of contentions) or decision reversing a final adverse determination by the NRC staff.
A + 3	Deadline for filing executed Non-Disclosure Agreements or Affidavits. Access provided to SUNSI consistent with decision issuing the protective order.
A + 28	Deadline for submission of contentions whose development depends upon access to SUNSI. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or notice of opportunity for hearing), the petitioner may file its SUNSI contentions by that later deadline.
A + 53	(Contention receipt +25) Answers to contentions whose development depends upon access to SUNSI.
A + 60	(Answer receipt +7) Petitioner/Intervenor reply to answers.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–29 and 72–31; NRC–2024–0067]

Yankee Atomic Electric Company; Yankee Atomic Power Station; Exemption

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued an exemption in response to the May 4, 2023, request from Yankee Atomic Electric Company (YAEC), for the Yankee Nuclear Power Station (YNPS or Yankee Rowe) located in Rowe, Massachusetts. The exemption permits YAEC to make withdrawals from a separate account within YAEC's overall nuclear decommissioning trust (NDT), on an annual basis, for spent nuclear fuel (SNF) and Greater than Class C

[3] Requestors should note that the filing requirements of the NRC's E-Filing Rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562; August 3, 2012, 78 FR 34247, June 7, 2013) apply to appeals of NRC staff determinations (because they must be served on a presiding officer or the Commission, as applicable), but not to the initial SUNSI request submitted to the NRC staff under these procedures.

(GTCC) waste management and non-radiological site restoration without prior notification to the NRC.

DATE: The exemption was issued on April 11, 2024.

ADDRESSES: Please refer to Docket ID NRC–2024–0067 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0067. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Tilda Liu, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 404–997–4730, email: *Tilda.Liu@nrc.gov.*

SUPPLEMENTARY INFORMATION: By letter dated May 4, 2023 (ADAMS Accession No. ML23157A101), YAEC submitted a request to the NRC for an exemption from paragraphs 50.82(a)(8)(i)(A) and 50.75(h)(2) of title 10 of the *Code of Federal Regulations* (10 CFR) for the YNPS Independent Spent Fuel Storage Installation [1] (ISFSI).

YAEC has established a separate (segregated) account within its over-arching NDT, entitled ''ISFSI Radiological Decom,'' that identifies the funds for radiological decommissioning of the ISFSI apart from the larger balance of funds in the NDT allocated for ongoing management of SNF and GTCC waste and for non-radiological site restoration activities. Although 10 CFR 50.82 applies to the segregated account, it does not apply to the overall NDT.

The exemption from 10 CFR 50.82(a)(8)(i)(A) and 50.75(h)(2) allows YAEC to make withdrawals from the segregated account, on an annual basis, for SNF and GTCC waste management and non-radiological site restoration without prior notification to the NRC. More specifically, with this exemption, YAEC can annually transfer funds exceeding 110 percent of the inflation-adjusted Decommissioning Cost Estimate, described in 10 CFR 50.75, from the segregated account to its overarching NDT and use those funds for SNF and GTCC waste management and non-radiological site restoration.

Based on the review, the NRC determined that, pursuant to 10 CFR 50.12(a), the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, the NRC determined that special circumstances are present. Therefore, the NRC granted YAEC an exemption from the requirements of 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(2) to permit YAEC to make withdrawals from the segregated account, on an annual basis, for SNF and GTCC waste management and non-radiological site restoration without prior notification to the NRC. All other relevant requirements shall be met. On April 11, 2024, the NRC issued an exemption for YAEC (ADAMS Package Accession No. ML23298A052). The NRC staff also prepared an environmental assessment and finding of no significant impact regarding the proposed exemption request, published in the **Federal Register** on April 9, 2024 (89 FR 24877), and concluded that the proposed exemption would not have a significant impact on the quality of the human environment.

Dated: May 2, 2024.

For the Nuclear Regulatory Commission.

Yoira Diaz-Sanabria,

Chief, Storage and Transportation Licensing Branch, Division of Fuel Management, Office of Nuclear Material Safety and Safeguards.

[FR Doc. 2024–09910 Filed 5–6–24; 8:45 am]

BILLING CODE 7590–01–P

[1] As discussed in this document, the Yankee Rowe ISFSI sits on the former site of Yankee Rowe, which YAEC finished decommissioning in 2007. Although only the Yankee Rowe ISFSI remains on the site, YAEC's 10 CFR part 50 license, Facility Operating License No. DPR–3, remains in effect. Because YAEC requested an exemption from the requirements of 10 CFR part 50, this would be an exemption for YAEC's 10 CFR part 50 license rather than for YAEC's 10 CFR part 72 general license. Therefore, although YAEC's submission requested an exemption for the Yankee Rowe ISFSI, the NRC staff will consider it a request for an exemption for YNPS.

NUCLEAR REGULATORY COMMISSION

[NRC–2023–0169]

Information Collection: Fitness for Duty Programs

AGENCY: Nuclear Regulatory Commission.

ACTION: Renewal of existing information collection; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment on the renewal of Office of Management and Budget (OMB) approval for an existing collection of information. The information collection is entitled, ''Fitness for Duty Programs.''

DATES: Submit comments by July 8, 2024. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0169. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the ''For Further Information Contact'' section of this document.
- *Mail comments to:* David Cullison, Office of the Chief Information Officer, Mail Stop: T–6 A10M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2023–0169 when contacting the NRC about the availability of information for this action. Y ou may obtain publicly available information related to this action by any of the following methods:

• *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0169. A copy of the collection of information and related instructions may be obtained without charge by accessing Docket ID NRC–2023–0169 on this website.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.

• *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

• *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2023–0169, in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized as follows.

1. *The title of the information collection:* 10 CFR part 26, ''Fitness for Duty Programs.''

2. *OMB approval number:* 3150–0146.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* NRC Form 890, ''Single Positive Test Form''; NRC Form 891, ''Annual Reporting Form for Drug and Alcohol Tests''; and NRC Form 892, ''Annual Fatigue Reporting Form.''

5. *How often the collection is required or requested:* Annually and on occasion. The NRC receives reports on an annual basis that detail the Fitness for Duty (FFD) Program performance. The NRC also receives, on occasion, reports associated with FFD policy violations or programmatic failures. Depending on the type of violation or programmatic failure, the report would be made within 24 hours of the event occurrence, or within 30 days of completing an investigation into a programmatic failure.

6. *Who will be required or asked to respond:* Nuclear power reactor licensees licensed under 10 CFR part 50, ''Domestic Licensing of Production and Utilization Facilities'' and 10 CFR part 52, ''Licenses, Certifications, and Approvals for Nuclear Power Plants'' (except those who have permanently ceased operations and have verified that fuel has been permanently removed from the reactor); all holders of nuclear power plant construction permits and early site permits with a limited work authorization and applicants for nuclear power plant construction permits that have a limited work authorization under the provisions of 10 CFR part 50; all holders of a combined license for a nuclear power plant issued under 10 CFR part 52 and applicants for a combined license that have a limited work authorization; all licensees who are authorized to possess, use, or transport formula quantities of strategic special nuclear material (SSNM) under the provisions of 10 CFR part 70, ''Domestic Licensing of Special Nuclear Material''; all holders of a certificate of compliance of an approved compliance plan issued under 10 CFR part 76 ''Certification of Gaseous Diffusion Plants,'' if the holder engages in activities involving formula quantities of SSNM; and all contractor/vendors (C/Vs) who implement FFD programs or program elements to the extent that the licensees and other entities listed in this paragraph rely on those C/V FFD programs or program elements to comply with 10 CFR part 26.

7. *The estimated number of annual responses:* 324,646 responses (254 reporting responses + 49 recordkeepers + 324,343 third-party disclosure responses).

8. *The estimated number of annual respondents:* 64,392 respondents (28 drug and alcohol testing programs + 21 fatigue management programs + 64,343 third party respondents).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 540,050 (5,301 hours reporting + 169,746 hours recordkeeping + 365,003 hours third-party disclosure)

10. *Abstract:* The NRC regulations in 10 CFR part 26 prescribe requirements to establish, implement, and maintain FFD programs at affected licensees and other entities. The objectives of these requirements are to provide reasonable assurance that persons subject to the rule are trustworthy, reliable, and not under the influence of any substance, legal or illegal, or mentally or physically impaired from any cause, which in any way could adversely affect their ability to safely and competently perform their duties. These requirements also provide reasonable assurance that the effects of fatigue and degraded alertness on individual's abilities to safely and competently perform their duties are managed commensurate with maintaining public health and safety. The information collections required by 10 CFR part 26 are necessary to properly manage FFD programs and to enable effective and efficient regulatory oversight of affected licensees and other entities. These licensees and other entities must perform certain tasks, maintain records, and submit reports to comply with 10 CFR part 26 drug and alcohol and fatigue management

requirements. These records and reports are necessary to enable regulatory inspection and evaluation of a licensee's or other entity's compliance with NRC regulations, FFD performance, and significant FFD-related events to help maintain public health and safety, promote the common defense and security, and protect the environment.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.
2. Is the estimate of the burden of the information collection accurate? Please explain your answer.
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

IV. Availability of Documents

The documents identified in the following table are available to interested persons through ADAMS.

Document description	ADAMS accession No.
Draft Supporting Statement ..	ML24012A205
Burden Spreadsheet	ML24012A206
NRC Form 890, "Single Positive Test Form"	ML22321A221
NRC Form 891, "Annual Reporting Form for Drug and Alcohol Tests"	ML22321A193
NRC Form 892, "Annual Fatigue Reporting Form"	ML22013B250

Dated: May 2, 2024.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–237 and 50–249; NRC–2024–0080]

Constellation Energy Generation, LLC.; Dresden Nuclear Power Station, Units 2 and 3; Subsequent License Renewal Application

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; receipt.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has received an application for the renewal of Facility Operating License Nos. DPR–19 and DPR–25, which authorizes Constellation Energy Generation, LLC (CEG, the applicant) to operate Dresden Nuclear Power Station (Dresden), Units 2 and 3. The renewed licenses would authorize the applicant to operate Dresden, Units 2 and 3, for an additional 20 years beyond the period specified in the current licenses. The current operating license for Dresden, Unit 2, expires December 22, 2029. The current operating license for Dresden, Unit 3, expires January 12, 2031.

DATES: The subsequent license renewal application referenced in this document is available on May 7, 2024.

ADDRESSES: Please refer to Docket ID NRC–2024–0080 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

• *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0080. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov*. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

• *Public Library:* A copy of the subsequent license renewal application for Dresden, Units 2 and 3, can be accessed at the following public libraries: Morris Area Public Library, 604 Liberty St., Morris, IL 60450, and Coal City Public Library District, 85 N Garfield St., Coal City, IL 60416.

• *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mark Yoo, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–8583; email: *Mark.Yoo@nrc.gov*.

SUPPLEMENTARY INFORMATION: The NRC has received an application from CEG, dated April 17, 2024 (ADAMS Package Accession No. ML24108A007) filed pursuant to section 103 of the Atomic Energy Act of 1954, as amended, and part 54 of title 10 of the *Code of Federal Regulations,* ''Requirements for Renewal of Operating Licenses for Nuclear Power Plants,'' to renew the operating licenses for Dresden, Units 2 and 3. Renewal of the licenses would authorize the applicant to operate the facility for an additional 20-year period beyond the period specified in the current operating licenses. The current operating license for Dresden, Unit 2, expires December 22, 2029. The current operating license for Dresden, Unit 3, expires January 12, 2031. Dresden, Units 2 and 3, are boiling water reactors located near Morris, Illinois. The acceptability of the tendered application for docketing, and other matters, including an opportunity to request a hearing, will be the subject of subsequent **Federal Register** notices.

A copy of the subsequent license renewal application for Dresden, Units 2 and 3, is also available to local residents near the site at the following public libraries: Morris Area Public Library, 604 Liberty St., Morris, IL 60450, and Coal City Public Library District, 85 N Garfield St., Coal City, IL 60416.

Dated: May 2, 2024.

For the Nuclear Regulatory Commission.

Lauren Gibson,

Chief, License Renewal Project Branch, Division of New and Renewed Licenses, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes: Meeting Notice

AGENCY: U.S. Nuclear Regulatory Commission

ACTION: Notice of meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) will convene a meeting of the Advisory Committee on

the Medical Uses of Isotopes (ACMUI) on June 5, 2024 to discuss the ACMUI's draft subcommittee report on the NRC's draft interim staff guidance for the implementation of training and experience requirements in the NRC's regulations, ''Medical Use of Byproduct Material.'' Meeting information, including a copy of the agenda and handouts, will be available on the ACMUI's Meetings and Related Documents web page at *https://www.nrc.gov/reading-rm/doc-collections/acmui/meetings/2024.html* or by emailing Ms. L. Armstead at the contact information below.

DATES: June 5, 2024, from 1:00 p.m. to 3:00 p.m. Eastern Time.

ADDRESSES: This is a virtual meeting.

Date	Webinar information (Microsoft teams)
June 5, 2024 ...	Link: *https://teams.microsoft.com/l/meetup-join/19%3ameeting_NjllNmZkODktZTg3My00MDU0LTk4NzMtNjRhNmJlYmRmNGY1%40thread.v2/0?context=%7b%22Tid%22%3a%22e8d01475-c3b5-436a-a065-5def4c64f52e%22%2c%22Oid%22%3a%22304f46bf-32c2-4e0f-912c-878db895e74a%22%7d*. *Meeting ID:* 242 726 987 987. Passcode: pWAXN2. *Call in number (audio only):* +301–576–2978, United States, Silver Spring. Phone Conference ID: 652 827 577#.

Public Participation: The meeting will be held using Microsoft Teams. Any member of the public who wishes to participate in the meeting via Microsoft Teams or via phone can use the information provided above or should contact Ms. L. Armstead. Members of the public should also monitor the NRC's Public Meeting Schedule at *https://www.nrc.gov/pmns/mtg* for any meeting updates.

FOR FURTHER INFORMATION CONTACT: Ms. L. Armstead, email: *lxa5@nrc.gov,* telephone: 301–415–1650.

Conduct of the Meeting

The ACMUI Vice Chair, Mr. Richard Green will preside over the meeting. Mr. Green will conduct the meeting in a manner that will facilitate the orderly conduct of business. The following procedures apply to public participation in the meeting:

1. Persons who wish to provide a written statement should submit an electronic copy to Ms. L. Armstead using the contact information listed above. All submittals must be received by the close of business on May 30, 2024, and must only pertain to the topics on the agenda.

2. Questions and comments from members of the public will be permitted during the meeting, at the discretion of the ACMUI Vice Chair.

3. The draft transcript and meeting summary will be available on ACMUI's website *https://www.nrc.gov/reading-rm/doc-collections/acmui/meetings/2024.html* on or about July 19, 2024.

4. Persons who require special services, such as those for the hearing impaired, should notify Ms. L. Armstead of their planned participation.

This meeting will be held in accordance with the Atomic Energy Act of 1954, as amended (primarily Section 161a); the Federal Advisory Committee Act (5 U.S.C. App); and the Commission's regulations in Title 10 of the *Code of Federal Regulations,* part 7.

Dated at Rockville, Maryland this 2nd day of May, 2024.

For the U.S. Nuclear Regulatory Commission.

Russell E. Chazell,

Federal Advisory Committee Management Officer.

BILLING CODE 7590–01–P

POSTAL SERVICE

Privacy Act; System of Records

AGENCY: Postal Service™

ACTION: Notice of a modified system of records.

SUMMARY: The United States Postal Service® (USPS®) is proposing to revise one General Privacy Act Systems of Records (SOR). These updates are being made to support an effort to improve postal tool management and equipment support.

DATES: These revisions will become effective without further notice on June 6, 2024, unless comments received on or before that date result in a contrary determination.

ADDRESSES: Comments may be submitted via email to the Privacy and Records Management Office, United States Postal Service Headquarters (*uspsprivacyfedregnotice@usps.gov*). Arrangements to view copies of any written comments received, to facilitate public inspection, will be made upon request.

FOR FURTHER INFORMATION CONTACT: Janine Castorina, Chief Privacy and Records Management Officer, Privacy and Records Management Office, *uspsprivacyfedregnotice@usps.gov* and by phone at 202–268–2000.

SUPPLEMENTARY INFORMATION:

I. Background

USPS seeks to implement a series of products to improve postal operations related to tool management and equipment support using Radio Frequency Identification (RFID) technology. USPS will utilize a suite of products, including an automated tool control application, industrial vending machines, RFID scanner tunnels, and electronically controlled lockers. These products will use RFID badge scans to track usage and provide access to tools. The system generates reports for restocking and analysis, and live dashboards are available to managers for customization. The aim of these systems is to enhance accountability and tool management, ensuring control of existing tools and adding cost-savings through enhanced tracking of equipment. This system will further promote efficiency, as not only with USPS be able to track its workroom and tool assets but anticipate when perishable resources are running low and take appropriate action.

II. Rationale for Changes to USPS Privacy Act Systems of Records

To further its efforts, this SOR will be revised as follows:

New purposes added: 17–20.

Modified Categories of Records: 1 and 2.

New category of records: 15. Tool Management Analytics and Transactional Records.

New Policy for Retrieval of Records: 8.

New Policy for Retention of Records: 9.

III. Description of the Modified System of Records

Pursuant to 5 U.S.C. 552a (e)(11), interested persons are invited to submit written data, views, or arguments on this proposal. A report of the proposed

revisions has been sent to Congress and to the Office of Management and Budget for their evaluations. The Postal Service does not expect these amended systems of records to have any adverse effect on individual privacy rights.

The notice for modifications to USPS SOR 500.000, Property Management Records is provided below in its entirety:

SYSTEM NAME AND NUMBER:

USPS 500.000, Property Management Records

SECURITY CLASSIFICATION:

None

SYSTEM LOCATION:

All USPS facilities and contractor sites.

SYSTEM MANAGER(S):

For records of accountable property, carpool membership, and use of USPS parking facilities:

Vice President, Facilities, United States Postal Service, 475 L'Enfant Plaza SW, Washington, DC 20260.

For records of building access and Postal Inspector computer access authorizations: Chief Postal Inspector, Inspection Service, United States Postal Service, 475 L'Enfant Plaza SW, Washington, DC 20260.

For other records of computer access authorizations: Chief Information Officer and Executive Vice President, United States Postal Service, 475 L'Enfant Plaza SW, Washington, DC 20260.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 401.

PURPOSE(S) OF THE SYSTEM:

1. To ensure personal and building safety and security by controlling access to USPS facilities.
2. To ensure accountability for property issued to persons.
3. To assign computer logon IDs; to identify USPS computer users to resolve their computer access problems by telephone; and to monitor and audit the use of USPS information resources as necessary to ensure compliance with USPS regulations.
4. To enable access to the USPS meeting and video web conferencing applications.
5. To enhance your online meeting experience by utilizing enhanced features and functionality, including voluntary polling to gather responses from attendees to generate reports or the interactive chat feature.
6. To facilitate team collaboration and communication through information sharing and cross-functional participation.
7. To allow users to communicate through web-based applications.
8. To facilitate and support cybersecurity investigations of detected or reported information security incidents.
9. To share your personal image via your device camera during meetings and web conferences, if you voluntarily choose to turn the camera on, enabling virtual face-to-face conversations.
10. To authenticate user identity for the purpose of accessing USPS information systems.
11. To provide parking and carpooling services to individuals who use USPS parking facilities.
12. To provide pre-registration for guest access to online meetings and web conferences.
13. To provide visibility on unmeasured workroom floor activities.
14. To enhance visibility into work hours used by product type, standard work management, and overtime status.
15. To improve scheduling efficiency through visibility into the use of workroom floor assets and activities.
16. To generate clock ring data based on employee workroom floor activities, assignments and/or duties.
17. To enhance tool management, security, and efficiency for Mail Processing Equipment mechanics and technicians.
18. To provide analytic, surveillance, and reporting support for tool management services.
19. To enhance tool management accountability through reports and alerts.
20. To provide managers with visibility into employee tool management and use and provide remediation capabilities and enable personnel recourse related to improper tool management.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

1. Individuals who are granted regular access to USPS facilities through the issuance of a building access badge, or who are assigned accountable property.
2. Individuals with authorized access to USPS computers and information resources, including USPS employees, contractors, and other individuals; Individuals participating in web-based meetings, video conferences, collaboration, and communication applications.
3. Individuals who are members of carpools with USPS employees or otherwise regularly use USPS parking facilities.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. *Building and property access information:* Records related to issuance of building and property access authorization and badges, including name, Social Security Number, Employee Identification Number, date of birth, photograph, postal assignment information, work contact information, finance number(s), duty location, and pay location, Advanced Computing Environment (ACE) ID, email address.
2. *Property issuance information:* Records related to issuance of accountable USPS property, equipment, and controlled documents, including name, Social Security Number, equipment description, equipment serial numbers, and issuance date, Mail Processing Equipment (MPE) Machine Numbers, Mail Processing Equipment (MPE) Machine Work Order Numbers, and Locker User PIN.
3. *Computer access authorization information:* Records related to computer users, including logon ID, Social Security Number, Employee Identification Number, or other assigned identifier, employment status information or contractor status information, and extent of access granted.
4. *Participant session data from web-based meetings and web conferences:* Participant Name, Participant's Webcam-Generated Image (Including Presenters), Recorded Participant Audio, Video, And Shared Meeting Screen Content, Chat Interaction, Polling Questions And Associated Responses, Participant Join Time And Leave Time, Meeting Duration, Participant Location, Participant Media Hardware Information, Participant Job Information, Participant Stated Locale, Participant Connection Type, Participant Data Center, Participant Device Type, Participant Domain, Participant Full Data Center, Participant Hard Disk ID, Participant ID, Participant IP Address, Participant Join Time, Participant Camera Name, Participant MAC Address, Participant Microphone Name, Participant Network Type, Participant PC Name, Participant Role, Participant Share Settings, Participant Speaker Name, Participant Status, Participant User ID, Participant User Name, Participant Zoom, Participant SIP URL, Participant Leave Reason, Participant AS Input, Participant AS Output, Participant Audio Input, Participant Audio Output, Participant CPU Usage, Participant Video Input, Participant Video Output, Participant Quality, Participant Sharing Details, Participant Recording Details.
5. *Web-Based Meeting And Web Conference Application Data:* In-Meeting Messages, Meeting Transcriptions, Written Feedback Responses, Invitation Tails, Meeting

Name, Chat Name, Meeting Agenda, Meeting Host, Meeting Department, Meeting Duration, Meeting Email, Meeting End Time, Meeting Media Settings, Meeting ID, Meeting Participants, Meeting Participants In Room, Meeting Start Time, Meeting Topic, Meeting Tracking Fields, Meeting User Type, Meeting UU ID, Meeting Audio Quality, Meeting Video Quality, Meeting Screen Share Quality, Meeting Duration, 8. *Web-Based Meeting And Web Conference Administration Data:* Account Administrator Name, Account Contact Information Account ID, Account Billing Information, Account Plan Information, Conference Room Account type, Conference Room calendar name, conference room camera name, conference room device IP address, conference room email address, conference room health, conference room ID, conference room issues, conference room last start time, conference room microphone name, conference room name, conference room speaker name, conference room status, Conference Room live meeting, Conference Room past meetings, conference room activation code, conference room support email, conference room support phone, conference room passcode, conference room settings, conference room location description, conference room location name, User Sign In And Sign Out Times, Group admin name, Group admin email, group admin ID, group member email, group member first name, group member last name, group member ID, group member type, chat group ID, chat group name, chat croup total members, chat group, Files sent through chat, GIPHYs sent through chat, groups sent through chat, p2p sent through chat, text sent through chat, total sent through chat, audio sent through chat, code snippet sent through chat, Operation Log action, operation log category type, operation log operation detail, operation log user, operation log time, Role member department, role member email, role member first name, role member ID, role member type, client feedback detail email, client feedback detail meeting ID, client feedback detail participant name, client feedback detail time,

9. *Web-Based Meeting And Web Conference Telemetry Data:* Event Time, Client Type, Event Location, Event, Subevent, UUID, Client Version, UserID, Client OS, Meeting ID.

10. *Persistent Message Application Telemetry Data:* User Email, Group Chat, Message Type, In Meeting Message, Status, Do Not Disturb Time, Notification Setting, Show Group On Contact List, File Type, File Location, Link URL, Keywords, GIF Keywords, Emoji Code, Audio Setting, Video Setting, Is E2E Enabled, Message ID, IP Address.

11. *Communication Data:* Deleted Persistent Message Sender, Deleted Persistent Message Time, Deleted Persistent Message ID, Deleted Persistent Message Text, Deleted Persistent Message Main Message ID, Deleted Persistent Message Main Message Timestamp, Deleted Persistent Message File Name, Deleted Persistent Message File Size, Edited Persistent Message Sender, Edited Persistent Message Time, Edited Persistent Message ID, Edited Persistent Message Text, Edited Persistent Message Main Message ID, Edited Persistent Message Main Message Timestamp, Edited Persistent Message File Name, Edited Persistent Message File Size, Persistent Message Sender, Persistent Message Time, Persistent Message ID, Persistent Message Main Message ID, Persistent Message Main Message Timestamp, Persistent Message File, Persistent Message File Size, Persistent Message Images Exchanged, Persistent Message Files Exchanged, Persistent Message Videos Exchanged, Persistent Message Channel Title, Persistent Message Whiteboard Annotations, Persistent Message Text, Deleted Message Sender, Deleted Message Time, Deleted Message ID, Deleted Message Text, Deleted Message Main Message ID, Deleted Message Main Message Timestamp, Deleted Message File Name, Deleted Message File Size, Edited Message Sender, Edited Message Time, Edited Message ID, Edited Message Text, Edited Message Main Message ID, Edited Message Main Message Timestamp, Edited Message File Name, Edited Message File Size, Message Sender, Message Time, Message ID, Message Main Message ID, Message Main Message Timestamp, Message File, Message File Size, Message Text.

12. *Identity verification information:* Question, answer, and email address.

13. *Carpool and parking information:* Records related to membership in carpools with USPS employees or about individuals who otherwise regularly use USPS parking facilities, including name, space number, principal's and others' license numbers, home address, and contact information.

14. *Workroom Floor Access and Activity Information:* Records related to issuance of building access badges supporting time keeping functions, including name, Bluetooth Device ID, Employee Identification Number, postal assignment information, workroom floor activities, assignments and/or duties, work contact information, finance number(s), duty location, clock ring data, and pay location.

15. *Tool Management Analytics and Transactional Records:* Tools Checked Out/In With Time Stamps And Employee Info, Other Database Updates With Time Stamps And Employee Info, Parts Checked Out With Time Stamps, Work Order Info And Employee Info, Parts Restocked With Time Stamps And Employee Info, Locker Open Events With Time Stamps And Badge Info, Locker Open Events Marked As Open Via PIN With Supervisor Assistance (When End User Badge Is Not Available), Locker Assignments And Changes With Time Stamps And Employee Info PIN Reset Events With Time Stamps And Manager's USPS.Gov Email Address.

RECORD SOURCE CATEGORIES:

Employees; contractors; subject individuals; and other systems of records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Standard routine uses 1. through 9. apply.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Automated database, computer storage media, and paper.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

1. Records about building access and issuance of accountable property are retrieved by name, Social Security Number, or Employee Identification Number.

2. Records about authorized access to computer and information resources are retrieved by name, logon ID, Employee Identification Number, or other unique identifier of the individual.

3. Report and tracking data created during web-based meetings and video conferences that pertain to individual participants, content shared, conference codes and other relevant session data and historical device usage data are retrieved by meeting ID, host name or host email address.

4. Records pertaining to web-based collaboration and communication applications are retrieved by organizer name and other associated personal identifiers.

5. Media recordings created during web-based meetings and video conferences are retrieved by meeting ID, host name or host email address.

6. Records of carpools and parking facilities are retrieved by name, ZIP Code, space number, or parking license number.

7. Records pertaining to workhour data derived from RFID and Bluetooth technologies are retrieved by name, Employee Identification Number, and Bluetooth Device ID.

8. Records pertaining to transactional data are retrievable by name, EIN, and ACE ID.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

1. Building access and accountable property records are retained until termination of access or accountability.

2. Records of computer access privileges are retained 1 year after all authorizations are cancelled.

3. Report and tracking data created during web-based meeting and video conferences, such as other relevant session data and historical device usage data, are retained for twenty-four months.

4. Records pertaining to web-based collaboration and communication applications are retained for twenty-four months.

5. Web-based meeting or video session recordings are retained for twenty-four months.

6. Records of carpool membership and use of USPS parking facilities are retained 6 years.

7. Records existing on paper are destroyed by burning, pulping, or shredding. Records existing on computer storage media are destroyed according to the applicable USPS media sanitization practice.

8. Records pertaining to workhour data derived from RFID and Bluetooth technologies may be retained up to 90 days.

9. Records pertaining to transactional data are retained for two years.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Paper records, computers, and computer storage media are located in controlled-access areas under supervision of program personnel. Access to these areas is limited to authorized personnel, who must be identified with a badge.

Access to records is limited to individuals whose official duties require such access. Contractors and licensees are subject to contract controls and unannounced on-site audits and inspections. Computers are protected by mechanical locks, card key systems, or other physical access control methods. The use of computer systems is regulated with installed security software, computer logon identifications, and operating system controls including access controls, terminal and transaction logging, and file management software.

RECORD ACCESS PROCEDURES:

Requests for access must be made in accordance with the Notification Procedure above and USPS Privacy Act regulations regarding access to records and verification of identity under 39 CFR 266.5.

CONTESTING RECORD PROCEDURES

See Notification Procedure and Record Access Procedures above.

NOTIFICATION PROCEDURES:

Inquiries for records about building access, accountable property, carpool membership, and use of USPS parking facilities must be addressed to the facility head. Inquiries about computer access authorization records must be directed to the Manager, Corporate Information Security, 475 L'Enfant Plaza SW, Suite 2141, Washington, DC 20260. For Inspection Service computer access records, inquiries must be submitted to the Inspector in Charge, Information Technology Division, 2111 Wilson Blvd., Suite 500, Arlington, VA 22201. Inquiries must include full name, Social Security Number or Employee Identification Number, and period of employment or residency at the location.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None

[FR Doc. 2024–09889 Filed 5–6–24; 8:45 am]

BILLING CODE 7710–12–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–563, OMB Control No. 3235–0649]

Proposed Collection; Comment Request; Extension: Rule 17g–5

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rule 17g–5 (17 CFR 240.17g–5) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act''). The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rule 17g–5(a)(3) and (e) contain collection of information requirements.[1] Specifically, Rule 17g–5(a)(3) prohibits a person within a nationally recognized statistical rating organization (''NRSRO'') from having a conflict of interest relating to the issuance or maintenance of a credit rating for a security or money market instrument issued by an asset pool or as part of any asset-backed securities transaction that was paid for by the issuer, sponsor, or underwriter of the security or money market instrument unless certain information and representations relating to the security are disclosed or furnished.

Currently, there are 6 credit rating agencies registered as NRSROs in the issuer of asset-backed securities category of credit ratings, and it is estimated based on recent issuance data that there are approximately 1,480 new asset-backed securities transactions per year that implicate Rule 17g–5(a)(3). Based on staff experience, the

[1] *See* 17 CFR 240.17g–5(a)(3) and (e).

Commission estimates that the total annual hour burden to comply with Rule 17g–5(a)(3) will be 61,899 hours. The Commission further estimates that this annual hour burden will result in a total annual cost of $14,126,168. This cost is attributable to costs that may be incurred by NRSROs and arrangers of asset-backed securities posting information on a password-protected website, as required by Rule 17g–5, and preparing and procuring representations to determine whether an exemption under the rule applies, as well as costs incurred by NRSROs preparing certifications required under the rule to gain access to websites maintained by other NRSROs or arrangers of asset-backed securities.

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by July 8, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Please direct your written comments to: Dave Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F St NE, Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov*.

Dated: May 1, 2024.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–563, OMB Control No. 3235–0693]

Proposed Collection; Comment Request; Extension: Rules 17g–8 and 17g–9

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rules 17g–8 and 17g–9 (17 CFR 240.17g–8 and 17 CFR 240.17g–9) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rules 17g–8 and 17g–9 set forth collection of information requirements. Specifically, Rule 17g–8 requires nationally recognized statistical rating organizations (''NRSROs'') to establish, maintain, enforce, and document policies and procedures that are reasonably designed to achieve the objectives articulated in the rule. Generally, these policies and procedures pertain to (i) the procedures and methodologies NRSROs use to determine credit ratings, and (ii) the symbols, numbers, or scores NRSROs use to denote credit ratings.[1] Rule 17g–8 also requires that the policies and procedures an NRSRO is required to establish, maintain, and enforce pursuant to Section 15E(h)(4)(A) of the Securities Exchange Act of 1934 must, at a minimum, include policies and procedures reasonably designed to achieve the objectives articulated in the rule.[2] Rule 17g–9 requires each NRSRO to establish, maintain, enforce, and document standards of training, experience, and competence for the individuals it employs to participate in the determination of credit ratings that are reasonably designed to achieve the objective that the NRSRO produces accurate credit ratings.[3]

Currently, there are 10 credit rating agencies registered as NRSROs with the Commission. The Commission estimates that the total annual hour burden for NRSROs to comply with Rule 17g–8 and Rule 17g–9 is 1,450 hours and 34,658 hours, respectively. The Commission further estimates that these annual hour burdens will result in a total annual cost with respect to Rule 17g–8 of $539,400 and with respect to Rule 17g–9 of $12,951,746. These costs are attributable to costs NRSROs may incur in completing updates and other activities relating to the policies and procedures adopted pursuant to Rule 17g–8 and the standards adopted pursuant to Rule 17g–9, and in conducting the periodic testing of credit analysts pursuant to standards adopted under Rule 17g–9.

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by July 8, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Please direct your written comments to: Dave Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F St NE, Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov*.

Dated: May 1, 2024.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100046; File No. SR–FINRA–2024–007]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing of a Proposed Rule Change To Adopt the FINRA Rule 6500 Series (Securities Lending and Transparency Engine (SLATE™))

May 1, 2024.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on May 1, 2024, the Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

and III below, which Items have been prepared by FINRA. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing, as required by Securities Exchange Act Rule 10c–1a, to adopt the new FINRA Rule 6500 Series (Securities Lending and Transparency Engine (SLATE™)) to (1) require reporting of securities loans; and (2) provide for the public dissemination of loan information.

The text of the proposed rule change is available on FINRA's website at *http://www.finra.org,* at the principal office of FINRA and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

(i) Background

On October 13, 2023, the Commission adopted new SEA Rule 10c–1a [3] to require any "covered person" [4] who agrees to a "covered securities loan" [5] to provide specified information to a Registered National Securities Association ("RNSA").[6] The RNSA is then required to make publicly available information regarding reported securities loans, as described in SEA Rule 10c–1a.[7] In its Adopting Release, the Commission stated that SEA Rule 10c–1a would increase transparency in the securities lending market, resulting in a reduction of the information disadvantage faced by end borrowers and beneficial owners, improved price discovery, increased competition among providers of securities lending analytics services, reduced costs associated with tracking market conditions for broker-dealers and lending programs, and improved decision-making by investors, beneficial owners and other market participants.[8] The Commission stated its belief that the rule would likely reduce the borrowing costs of some securities, improving price discovery, liquidity, and capital formation in the underlying security markets, and would benefit investors by increasing the ability of regulators to surveil, study, and provide oversight of both the securities lending market and individual market participants.[9]

Covered Person Reporting Requirements

SEA Rule 10c–1a prescribes the items of information that covered persons must report to an RNSA regarding a covered securities loan. These reportable data elements include both non-confidential items of information that would be publicly disseminated (*i.e.,* the items of information specified in SEA Rule 10c–1a(c)(1) through (12)) as well as confidential items of information that would not be publicly disseminated (*i.e.,* the items of information specified in SEA Rule 10c–1a(e)(1) through (3)).

Specifically, SEA Rule 10c–1a(c) requires covered persons to report the following non-confidential items of information to an RNSA, if applicable, by the end of the day [10] on which the covered securities loan is effected:

(1) The legal name of the security issuer, and the Legal Entity Identifier ("LEI") of the issuer, if the issuer has a non-lapsed LEI;

(2) The ticker symbol, International Securities Identification Number ("ISIN"), Committee on Uniform Securities Identification Procedures ("CUSIP"), or Financial Instrument Global Identifier ("FIGI") of the security, or other security identifier;

(3) The date the covered securities loan was effected;

(4) The time the covered securities loan was effected;

(5) The name of the platform or venue where the covered securities loan was effected;

(6) The amount, such as size, volume, or both, of the reportable securities loaned;

(7) The type of collateral used to secure the covered securities loan;

(8) For a covered securities loan collateralized by cash, the rebate rate or any other fee or charges;

(9) For a covered securities loan not collateralized by cash, the securities lending fee or rate, or any other fee or charges;

(10) The percentage of collateral to value of reportable securities loaned required to secure such covered securities loan;

(11) The termination date of the covered securities loan; and

(12) Whether the borrower is a broker or dealer, a customer (if the person lending securities is a broker or dealer), a clearing agency, a bank, a custodian, or other person.

With respect to the confidential items of information, SEA Rule 10c–1a(e) requires covered persons to report the following items of information to an RNSA, if applicable, by the end of the day on which the covered securities loan is effected:

(1) If known, the legal name of each party to the covered securities loan, other than the customer from whom a broker or dealer borrows fully paid or excess margin securities pursuant to Rule 15c3–3(b)(3) of the Exchange Act, Central Registration Depository ("CRD") or Investment Adviser Registration Depository ("IARD") Number, market

---

[3] *See* 17 CFR 240.10c–1a ("SEA Rule 10c–1a"); Securities Exchange Act Release No. 98737 (October 13, 2023), 88 FR 75644 (November 3, 2023) (Reporting of Securities Loans) ("Adopting Release").

[4] SEA Rule 10c–1a(j)(1) defines a "covered person" as (i) any person that agrees to a covered securities loan on behalf of a lender ("intermediary") other than a clearing agency when providing only the functions of a central counterparty pursuant to Rule 17Ad–22(a)(2) of the Exchange Act or a central securities depository pursuant to Rule 17Ad–22(a)(3) of the Exchange Act; or (ii) any person that agrees to a covered securities loan as a lender when an intermediary is not used unless paragraph (j)(1)(iii) of this section applies; or (iii) a broker or dealer when borrowing fully paid or excess margin securities pursuant to Rule 15c3–3(b)(3) of the Exchange Act.

[5] SEA Rule 10c–1a(j)(2) defines a "covered securities loan" as a transaction in which any person on behalf of itself or one or more other persons, lends a reportable security to another person, with exclusions for a position at a clearing agency that results from central counterparty services pursuant to Rule 17Ad–22(a)(2) of the Exchange Act or central securities depository services pursuant to Rule 17Ad–22(a)(3) of the Exchange Act and the use of margin securities, as defined in Rule 15c3–3(a)(4) of the Exchange Act, by a broker or dealer. "Reportable security" is defined in SEA Rule 10c–1a(j)(3) as any security or class of an issuer's securities for which information is reported or required to be reported to the consolidated audit trail as required by § 242.613 of the Exchange Act and the CAT NMS Plan ("CAT"), the Financial Industry Regulatory Authority's Trade Reporting and Compliance Engine ("TRACE"), or the Municipal Securities Rulemaking Board's Real-Time Transaction Reporting System ("RTRS"), or any reporting system that replaces one of these systems.

[6] SEA Rule 10c–1a(j)(5) defines an RNSA as an association of brokers and dealers that is registered as a national securities association pursuant to 15 U.S.C. 78*o*–3 of the Exchange Act. FINRA currently is the only RNSA.

[7] *See* SEA Rule 10c–1a(g).

[8] *See* Adopting Release, 88 FR 75644, 75692.

[9] *See* Adopting Release, 88 FR 75644, 75692–93.

[10] SEA Rule 10c–1a permits the RNSA to define "end of the day" for the purposes of the rule. *See* Adopting Release, 88 FR 75644, 75648 n.72.

participant identification (''MPID''), and the LEI of each party to the covered securities loan, and whether such person is the lender, the borrower, or an intermediary between the lender and the borrower;

(2) If the person lending securities is a broker or dealer and the borrower is its customer, whether the security is loaned from a broker's or dealer's securities inventory to a customer of such broker or dealer; and

(3) If known, whether the covered securities loan is being used to close out a fail to deliver pursuant to Rule 204 of Regulation SHO or to close out a fail to deliver outside of Regulation SHO.

SEA Rule 10c–1a also requires covered persons to report specified modifications to covered securities loans. Specifically, if a loan modification occurs after the non-confidential data elements for the covered securities loan were reported to an RNSA pursuant to SEA Rule 10c–1a(c), and results in a change to any of the non-confidential data elements previously provided to an RNSA, SEA Rule 10c–1a(d)(1) requires a covered person to provide to the RNSA: (1) the date and time of the modification; (2) the specific modification and the specific non-confidential data element being modified; and (3) the unique identifier assigned by the RNSA to the original covered securities loan. With respect to a modification to a covered securities loan for which reporting under SEA Rule 10c–1a was not required on the date the loan was agreed to or last modified that results in a change to any of the non-confidential data elements required to be provided to an RNSA under SEA Rule 10c–1a(c), SEA Rule 10c–1a(d)(2) requires that the covered person report all of the non-confidential data elements to the RNSA as of the date of the modification, as well as the date and time of the modification.

RNSA Publication of Data

SEA Rule 10c–1a(g) (RNSA publication of data) sets forth the requirements applicable to an RNSA regarding securities loan data publication. Specifically, SEA Rule 10c–1a(g)(1) provides that, following receipt of the non-confidential data elements discussed above, as soon as practicable, and not later than the morning of the business day after the covered securities loan is effected, the RNSA must assign a unique identifier to the covered securities loan, and make publicly available for each covered securities loan effected on the previous business day: (1) the unique identifier assigned by the RNSA; (2) the non-confidential data elements required to be reported pursuant to SEA Rule 10c–1a(c), other than the loan amount; and (3) the security identifier under SEA Rule 10c–1a(c)(1) or 10c–1a(c)(2) that the RNSA determines is appropriate to identify the security (*e.g.,* the security's ticker symbol or CUSIP identifier).

SEA Rule 10c–1a(g)(2) provides that, following receipt of the non-confidential data elements reported pursuant to SEA Rule 10c–1a(c), on the twentieth business day after the covered securities loan is effected, the RNSA must make publicly available the loan amount reported to the RNSA pursuant to SEA Rule 10c–1a(c)(6) along with the applicable loan and security identifying information.

With respect to modifications to covered securities loans previously reported to the RNSA, SEA Rule 10c–1a(g)(3)(i) provides that, following the receipt of information regarding a modification (pursuant to SEA Rule 10c–1a(d)), the RNSA must assign a unique identifier to the covered securities loan (if one has not already been assigned), and as soon as practicable, and not later than the morning of the business day after the covered securities loan is modified, make publicly available information pertaining to any modification to the non-confidential data elements required to be reported pursuant to SEA Rule 10c–1a(c), other than the loan amount. With respect to covered securities loans for which reporting was not required on the date the loan was agreed to or last modified (*i.e.,* a loan for which non-confidential data elements are reported to an RNSA pursuant to paragraph (d)(2) of SEA Rule 10c–1a), the RNSA must make publicly available all of the non-confidential data elements required to be reported pursuant to SEA Rule 10c–1a(c), other than the loan amount.[11]

With respect to loan amounts, SEA Rule 10c–1a(g)(3)(ii) provides that, on the twentieth business day after the covered securities loan is modified, the RNSA must make publicly available the loan amount reported to the RNSA pursuant to SEA Rule 10c–1a(c)(6) along with the applicable loan and security identifying information.

The RNSA is required to keep confidential and not disseminate the confidential data elements reported pursuant to SEA Rule 10c–1a(e).[12]

In addition, SEA Rule 10c–1a(g)(5) provides that, following the receipt of information reported pursuant to SEA Rule 10c–1a(c) when a covered securities loan is effected, or reported pursuant to SEA Rule 10c–1a(d) when a covered securities loan is modified, the RNSA must, as soon as practicable and not later than the morning of the business day after a covered securities loan is effected or modified, make publicly available, on a daily basis, information pertaining to the aggregate loan transaction activity and distribution of loan rates for each reportable security and the security identifier(s) that an RNSA determines is appropriate to identify the security (*e.g.,* the security's ticker symbol or CUSIP identifier).

Reporting Agents

SEA Rule 10c–1a(a)(2) permits a covered person to rely on a reporting agent to fulfill its reporting obligations under Rule 10c–1a. In order to use a reporting agent to fulfill its SEA Rule 10c–1a information reporting obligations, a covered person must: (1) enter into a written agreement with the reporting agent, and (2) provide the reporting agent with timely access to the required SEA Rule 10c–1a information.[13] A reporting agent that assumes the reporting obligation on behalf of a covered person (pursuant to paragraph (a)(2)) is then required to provide the SEA Rule 10c–1a information to an RNSA, in the format and manner required by the applicable rule(s) of such RNSA (and within the time periods specified in SEA Rule 10c–1a(c) through (e)).[14] A reporting agent is also required to enter into a written agreement with an RNSA that permits the reporting agent to provide SEA Rule 10c–1a information to an RNSA on behalf of a covered person[15] and to provide an RNSA with a list naming each covered person on whose behalf the reporting agent is providing SEA Rule 10c–1a information (and provide an RNSA with any updates to the list of such persons by the end of the day such list changes).[16]

RNSA Rules, Fees and Data Retention Requirements

SEA Rule 10c–1a(f) requires an RNSA to implement rules regarding the format and manner of its collection of information described in paragraphs 10c–1a(c) through 10c–1a(e) and make publicly available such information in

[11] *See* SEA Rule 10c–1a(g)(3) and (3)(i).

[12] *See* SEA Rule 10c–1a(g)(4). In addition to keeping the information confidential, an RNSA is required to establish, maintain, and enforce reasonably designed written policies and procedures to maintain the security and confidentiality of the confidential information. *See* SEA Rule 10c–1a(h)(4).

[13] *See* SEA Rule 10c–1a(a)(2).

[14] *See* SEA Rule 10c–1a(b)(1).

[15] *See* SEA Rule 10c–1a(b)(3).

[16] *See* SEA Rule 10c–1a(b)(4).

accordance with rules promulgated by the RNSA pursuant to section 19(b) of the Exchange Act and Rule 19b–4 thereunder; SEA Rule 10c–1a(i) also permits an RNSA to establish and collect reasonable fees pursuant to rules established under section 19(b) of the Exchange Act and Rule 19b–4 thereunder.[17] SEA Rule 10c–1a(h) imposes data retention and availability requirements on an RNSA related to its collection of SEA Rule 10c–1a information. Specifically, an RNSA must retain the information collected pursuant to paragraphs (c) through (e) of SEA Rule 10c–1a in a convenient and usable standard electronic data format that is machine readable and text searchable without any manual intervention for a period of five years [18] and make the non-confidential information collected pursuant to paragraphs (c) and (d) of SEA Rule 10c–1a available to the public (in the same manner it is maintained) on an RNSA's website or similar means of electronic distribution, without use restrictions, for a period of at least five years.[19] An RNSA must also make the information collected pursuant to paragraphs (b)(4) and (c) through (e) of SEA Rule 10c–1a available to the Commission; or other persons as the Commission may designate by order upon a demonstrated regulatory need.[20] With respect to the confidential information collected by an RNSA pursuant to paragraph (e) of SEA Rule 10c–1a, paragraph (h)(4) requires an RNSA to establish, maintain, and enforce reasonably designed written policies and procedures to maintain the security and confidentiality of such confidential information.

(ii) Proposed Rule Change

Consistent with SEA Rule 10c–1a, FINRA is proposing to adopt the new FINRA Rule 6500 Series (Securities Lending and Transparency Engine (SLATE)) [21] to establish reporting requirements for covered securities loans and to provide for the dissemination of individual and aggregate covered securities loan information and loan rate statistics.[22] Among other things, these proposed rules would define key terms for the reporting of covered securities loans and specify the reporting requirements with respect to both initial covered securities loans and loan modifications, including prescribing required modifiers and indicators. FINRA intends to file separately a proposed rule change to establish covered securities loan reporting fees and securities loan data products and associated fees.

Reporting Initial Covered Securities Loans

Proposed Rule 6530(a) would govern the reporting requirements applicable to Covered Persons for reporting Initial Covered Securities Loans.[23] Proposed Rule 6510(e) would define ''Initial Covered Securities Loan'' as a new Covered Securities Loan not previously reported to SLATE. The definitions of ''Covered Person'' and ''Covered Securities Loan'' for the purposes of this proposed rule change would be the same as set forth in SEA Rule 10c–1a.[24] Initial Covered Securities Loans would be required to be reported within the time periods outlined in proposed Rule 6530(a)(1) (When and How Initial Covered Securities Loans Are Reported). Specifically, for Initial Covered Securities Loans effected on a business day at or after 12:00:00 a.m. Eastern Time (''ET'') through 7:45:00 p.m. ET, the required information must be reported the same day before 8:00:00 p.m. ET.[25] For Initial Covered Securities Loans effected on a business day after 7:45:00 p.m. ET, the required information must be reported no later than the next business day (T+1) before 8:00:00 p.m. ET; [26] and Initial Covered Securities Loans effected on a Saturday, a Sunday, a federal or religious holiday or other day on which SLATE is not open at any time during that day (determined using Eastern Time) must be reported the next business day (T+1) before 8:00:00 p.m. ET.[27]

Proposed Rule 6530(a)(2) (Loan Information To Be Reported) would specify the items of information that must be reported to FINRA. Specifically, proposed Rule 6530(a)(2)(A) through (N) would require that Initial Covered Securities Loan reports must contain the below non-confidential data elements:

(1) The legal name of the security issuer and the LEI of the issuer (if the issuer has a non-lapsed LEI);

(2) Security symbol, CUSIP, ISIN, or FIGI, if any;

(3) The date the Covered Securities Loan was effected;

(4) The time the Covered Securities Loan was effected;

(5) The expected settlement date of the Covered Securities Loan;

(6) The platform or venue where the Covered Securities Loan was effected; [28]

(7) The amount of the Reportable Securities loaned; [29]

(8) The type of collateral used to secure the Covered Securities Loan;

(9) For a Covered Securities Loan collateralized by cash, the rebate rate;

(10) For a Covered Securities Loan not collateralized by cash, the securities lending fee;

(11) Any other fees or charges; [30]

(12) The percentage of collateral to value of Reportable Securities loaned required to secure such Covered Securities Loan;

(13) For a Covered Securities Loan with a specified term, the termination date of the Covered Securities Loan; [31] and

[17] *See* SEA Rule 10c–1a(f) and (i). FINRA does not have regulatory authority over Covered Persons or Reporting Agents that are non-FINRA members. As FINRA does today, FINRA would refer to the SEC potential violations of the federal securities laws and rules by non-members, including failures to comply with SEA Rule 10c–1a and FINRA rules adopted pursuant to SEA Rule 10c–1a (*e.g.,* potential SLATE reporting violations or failures to pay when due any SLATE reporting fees).

[18] *See* SEA Rule 10c–1a(h)(1).

[19] *See* SEA Rule 10c–1a(h)(3).

[20] *See* SEA Rule 10c–1a(h)(2).

[21] SLATE is the automated system developed by FINRA that, among other things, will accommodate reporting and dissemination of loan reports where applicable in covered securities loans. *See* proposed Rule 6510(g).

[22] FINRA may validate and reject submissions to SLATE that FINRA believes are noncompliant or otherwise inconsistent with SEA Rule 10c–1a or with the form and manner specified by FINRA for the data (as provided in FINRA rules, guidance, and technical documents and specifications), and may exclude any such information from disseminated SLATE data. FINRA may also block or reject any activity to the extent such activity puts the normal functioning of the SLATE system at risk.

[23] As discussed above, a Covered Person may engage a Reporting Agent to comply with the reporting obligations on its behalf, consistent with the conditions of SEC Rule 10c–1a. *See* proposed Rule 6510(k) (defining ''Reporting Agent''); *see also infra* n.60.

[24] *See* proposed Rule 6510(k) (among other things, defining ''Covered Person'' and ''Covered Securities Loan'' by reference to SEA Rule 10c–1a, which defines ''covered person'' and ''covered securities loan'' in paragraphs (j)(1) and (2), respectively); *see also supra* notes 4–5.

[25] *See* proposed Rule 6530(a)(1)(A).

[26] *See* proposed Rule 6530(a)(1)(B).

[27] *See* proposed Rule 6530(a)(1)(C).

[28] FINRA will make available a list of platforms/venues and their associated identifiers for reporting purposes. If a loan occurs on a platform/venue not yet included on the FINRA list, the Covered Person must enter the name of the platform/venue in the SLATE report.

[29] Proposed Rule 6530(a)(3) specifies that when reporting the loan amount pursuant to 6530(a)(2)(G), for a Covered Securities Loan of a security reportable to CAT, a Covered Person must report the number of shares loaned. For a Covered Securities Loan of a security reportable to TRACE or the MSRB's RTRS, a Covered Person must report the total par value of the securities loaned.

[30] When reporting a rebate rate or lending fee pursuant to proposed Rule 6530(a)(2)(I) or (J), respectively, a Covered Person must report the rebate rate or lending fee as a percentage, and separately report the dollar cost of any other fees or charges.

[31] This field would remain blank if reporting a Covered Securities Loan without a specified term (*i.e.,* an open-ended loan). However, upon the termination of an open-ended loan, as is the case with a term loan, a Covered Person would be required to submit a Loan Modification appending the terminated loan indicator pursuant to proposed Rule 6530(c)(4). *See infra* n.48 and accompanying text.

(14) Whether the borrower is a Broker [32] or Dealer,[33] a customer (if the person lending securities is a Broker or Dealer), a Clearing Agency,[34] a Bank,[35] a Custodian,[36] or other person.

Consistent with SEA Rule 10c–1a(e), proposed Rule 6530(a)(2)(O) through (U) would also require that Initial Covered Securities Loan reports contain the below confidential data elements:

(1) If known, the legal name of each party to the Covered Securities Loan (other than the customer from whom a Broker or Dealer borrows fully paid or excess margin securities pursuant to SEA Rule 15c3–3(b)(3));

(2) If known, the CRD Number or IARD Number of each party to the Covered Securities Loan, if applicable;

(3) If known, the MPID of each party to the Covered Securities Loan;

(4) If known, the LEI of each party to the Covered Securities Loan;

(5) If known, whether each party to the Covered Securities Loan is the lender, the borrower, or an intermediary between the lender and the borrower;

(6) If the person lending securities is a Broker or Dealer and the borrower is its customer, whether the security is loaned from the Broker's or Dealer's securities inventory to the customer of such Broker or Dealer; and

(7) If known, whether the Covered Securities Loan is being used to close out a fail to deliver pursuant to Rule 204 of SEC Regulation SHO or to close out a fail to deliver outside of Regulation SHO.

Additionally, proposed Rule 6530(a)(2)(V) through (Y) would require a Covered Person to report:

(1) Whether the Covered Person is the lender, borrower or intermediary;

(2) The unique internal identifier assigned to the Covered Securities Loan by the Covered Person responsible for reporting the loan to SLATE;

(3) If the Covered Securities Loan is an allocation of an omnibus loan effected pursuant to an agency lending agreement, the unique internal identifier for the associated omnibus loan assigned by the Covered Person responsible for reporting the Covered Securities Loan to SLATE; [37] and

(4) Such modifiers and indicators as required by either the Rule 6500 Series or the SLATE Participant specification.

FINRA intends to use the information required by proposed Rule 6530(a)(2)(V) (requiring Covered Persons to identify whether the Covered Person is the lender, borrower or intermediary), proposed Rule 6530(a)(2)(W) (requiring Covered Persons to report the unique internal identifier it has assigned for the loan), and proposed Rule 6530(a)(2)(X) (requiring, for a loan that is an allocation of an omnibus loan, that Covered Persons report the unique internal identifier it has assigned for the associated omnibus loan) for data validation and regulatory purposes. For example, the Covered Person party type (*i.e.,* lender, borrower or intermediary) would provide necessary information regarding the identity of the Covered Person under the Rule, including in instances where a party other than the Covered Person submits the report to SLATE. The Covered Person's internal identifier for the loan would allow for the identification of a Covered Securities Loan in the audit trail prior to the assignment of a loan identifier by FINRA. For example, the internal identifier assigned by a Covered Person would be used to associate an Initial Covered Securities Loan with a Loan Modification submitted on the same day, prior to the assignment of a loan identifier by FINRA. The Covered Person's unique internal omnibus loan identifier would be used to identify allocations and reallocations of Covered Securities Loans that are associated with an omnibus-level loan arranged by an agent lender. Obtaining this identifier would allow FINRA, for example, to provide the public with more granular insight into the day's loan activity in its disseminated data.[38] FINRA believes that requiring Covered Persons to report unique internal identifiers—in whatever alphanumeric format preferred by the firm—strikes an appropriate balance by ensuring that FINRA receives important information for use in identifying and linking associated reports without requiring firms to assign an identifier using a prescribed format or convention.

The modifiers and indicators—set forth in proposed Rule 6530(c) (Modifiers and Indicators)—apply to specific scenarios where additional

[32] Proposed Rule 6510(j) would define ''Broker'' by reference to Exchange Act section 3(a). Exchange Act section 3(a)(4)(A) defines a ''broker'' as any person engaged in the business of effecting transactions in securities for the account of others, with exceptions for certain bank activities specified in Exchange Act section 3(a)(4)(B).

[33] Proposed Rule 6510(j) would define ''Dealer'' by reference to Exchange Act section 3(a). Exchange Act section 3(a)(5)(A) defines a ''dealer'' as any person engaged in the business of buying and selling securities (not including security-based swaps, other than security-based swaps with or for persons that are not eligible contract participants) for such person's own account through a broker or otherwise, with exceptions for persons not engaged in the business of dealing (Exchange Act section 3(a)(5)(B)) and for certain bank activities specified in Exchange Act section 3(a)(5)(C).

[34] Proposed Rule 6510(j) would define ''Clearing Agency'' by reference to Exchange Act section 3(a). Exchange Act section 3(a)(23)(A) defines a ''clearing agency'' as any person who acts as an intermediary in making payments or deliveries or both in connection with transactions in securities or who provides facilities for comparison of data respecting the terms of settlement of securities transactions, to reduce the number of settlements of securities transactions, or for the allocation of securities settlement responsibilities. Such term also means any person, such as a securities depository, who (i) acts as a custodian of securities in connection with a system for the central handling of securities whereby all securities of a particular class or series of any issuer deposited within the system are treated as fungible and may be transferred, loaned, or pledged by bookkeeping entry without physical delivery of securities certificates, or (ii) otherwise permits or facilitates the settlement of securities transactions or the hypothecation or lending of securities without physical delivery of securities certificates. Exchange Act section 3(a)(23)(B) provides exceptions to the definition of a ''clearing agency.''

[35] Proposed Rule 6510(j) would define ''Bank'' by reference to Exchange Act section 3(a). Exchange Act section 3(a)(6) defines a ''bank'' as (A) a banking institution organized under the laws of the United States or a Federal savings association, as defined in section 1462(5)of title 12, (B) a member bank of the Federal Reserve System, (C) any other banking institution or savings association, as defined in section 1462(4)of title 12, whether incorporated or not, doing business under the laws of any State or of the United States, a substantial portion of the business of which consists of receiving deposits or exercising fiduciary powers similar to those permitted to national banks under the authority of the Comptroller of the Currency pursuant to section 92a of title 12, and which is supervised and examined by State or Federal authority having supervision over banks or savings associations, and which is not operated for the purpose of evading the provisions of this chapter, and (D) a receiver, conservator, or other liquidating agent of any institution or firm included in clauses (A), (B), or (C).

[36] Proposed Rule 6510(c) would define ''Custodian'' by reference to Exchange Act section 3(a)(4)(B)(viii) as a broker or bank that is providing safekeeping or custody services as described in Exchange Act section 3(a)(4)(B)(viii)(I)(aa) or (bb) in connection with the Covered Securities Loan.

[37] Individual participants in agency lending programs generally authorize an agent lender, pursuant to agency lending agreements, to lend their securities on their behalf. As discussed in the Adopting Release, reporting obligations under SEA Rule 10c–1a can depend on how a pool or lending program is structured (*e.g.,* whether the pool or lending program itself or the individual underlying participants are the party or parties identified as the lender for the loan). *See generally* Adopting Release, 88 FR 75644, 75664. If the Initial Covered Securities Loan is an allocation of an omnibus loan effected pursuant to an agency lending agreement, proposed Rule 6530(a)(2)(W) and (X) would require that the SLATE report include both the Covered Person's unique internal identifier for the Covered Securities Loan (*i.e.,* the report of the allocation) and the Covered Person's unique internal identifier for the associated omnibus loan.

[38] As required by SEA Rule 10c–1a(g)(5), FINRA would make publicly available, on a daily basis, information pertaining to the aggregate loan transaction activity for each Reportable Security based on the prior business day's activity. The omnibus loan identifier would allow FINRA to identify allocations of an omnibus loan arranged by an agent lender and determine when an Initial Covered Securities Loan reported to SLATE is actually a reallocation of some portion of a preexisting omnibus loan. This would allow FINRA to filter the amounts of any such loan reallocations from the aggregate loan volumes that FINRA proposes to disseminate for each Reportable Security on a given day, as specified in proposed FINRA Rule 6540(c)(1).

detail is appropriate to clarify the information required to be reported pursuant to proposed Rule 6530(a)(2) and (b)(2).[39] FINRA intends to use these modifiers and indicators to provide regulators and the public with important information regarding the reported securities loan. Specifically, proposed Rule 6530(c)(1) (Exclusive Arrangement) would require a Covered Person to append an indicator to identify a loan made pursuant to an exclusive arrangement with the borrower or intermediary. An exclusive arrangement is one in which a borrower or intermediary has exclusive access to a lender's portfolio. Because exclusive access to a lender's portfolio can impact the loan rate,[40] the exclusive loan indicator would help to identify loans whose rates may not reflect current market rates.

Proposed Rule 6530(c)(2) (Loan to Affiliate) would require a Covered Person to append an indicator to identify a loan made to an Affiliate of the lender or intermediary. For purposes of this provision, ''Affiliate'' would be defined as ''an entity that controls, is controlled by or is under common control with a Covered Person.'' [41] Because an affiliate relationship between the borrower and lender or intermediary can impact borrowing costs,[42] the affiliate loan indicator would likewise help to identify loans whose rates may not reflect current market rates.[43]

Proposed Rule 6530(c)(3) (Unsettled Loan) would require a Covered Person to append an indicator to identify an Initial Covered Securities Loan or modification to the amount of Reportable Securities loaned that did not settle by the close of SLATE System Hours [44] on the expected settlement date reported to SLATE.[45] Loans may be agreed upon but ultimately not settle for a variety of reasons (*e.g.,* the lender is unable to deliver the securities; the loan fails due to mismatched instructions).[46] The unsettled loan indicator would provide clarity that the amount of Reportable Securities loaned reported to SLATE was not transferred to the borrower, which may provide useful insight into the day's loan activity.[47]

Proposed Rule 6530(c)(4) (Terminated Loan) would require a Covered Person to indicate when a Covered Securities Loan has been terminated. The terminated loan indicator would therefore be required to be appended on reports of: (1) an Initial Covered Securities Loan that did not and will not settle; and (2) Loan Modifications reporting the termination of a Covered Securities Loan (whether an open-ended or a term loan).[48]

Proposed Rule 6530(c)(5) (Rate or Fee Adjustment) would require a Covered Person to report the appropriate modifier if a loan rebate rate or lending fee accounts for: (1) a billing adjustment or correction to amounts previously rebated or charged; or (2) the value of a distribution or other economic benefit associated with the Reportable Security, *e.g.,* a corporate action. Similarly, proposed Rule 6530(c)(6) (Basket Loan) would require a Covered Person to report the appropriate modifier if a loan rebate rate or lending fee reflects a rate or fee involving a basket of at least 10 unique Reportable Securities for a single agreed rate or fee for the entire basket. In each of these scenarios, the modifier would help to identify loans where the rate or fee may not reflect the current market. In addition to enhancing the disseminated data and its value to market participants, FINRA plans to use these modifiers for data validation (*e.g.,* in instances where FINRA's data validation logic identifies the reported rate as potentially erroneous).

Reporting Securities Loan Modifications

Proposed Rule 6530(b) would govern the reporting requirements applicable to Covered Persons for reporting Loan Modifications.[49] Proposed Rule 6510(f) would define ''Loan Modification'' as a change to any ''Data Element'' with respect to a Covered Securities Loan (irrespective of whether such Covered Securities Loan was previously reported to SLATE), where ''Data Element'' refers to the required non-confidential data elements and modifiers reported pursuant to proposed Rule 6530(a)(2).[50] Proposed Rule 6530(b)(1) (When and How Loan Modifications Are Reported) would require that Loan Modifications be reported within the same timeframes applicable to the reporting of Initial Covered Securities Loans. Specifically, for Loan Modifications effected on a business day at or after 12:00:00 a.m. ET through 7:45:00 p.m. ET, the required information must be reported the same day before 8:00:00 p.m. ET.[51] For Loan Modifications effected on a business day after 7:45:00 p.m. ET, the required information must be reported no later than the next business day (T+1) before 8:00:00 p.m. ET; [52] and Loan Modifications effected on a Saturday, a Sunday, a federal or religious holiday or other day on which SLATE is not open at any time during that day (determined using Eastern Time) must be reported the next business day (T+1) before 8:00:00 p.m. ET.[53]

Proposed Rule 6530(b)(2) (Loan Modifications—Information To Be Reported) would specify the items of information that must be reported to FINRA. Specifically, proposed Rule 6530(b)(2)(A) through (I) would require that each Loan Modification report contain the information below:

[39] SEA Rule 10c–1a prescribes generally the loan information that parties must report to FINRA (*i.e.,* the data elements listed in SEA Rule 10c–1a(c), loan modifications identified in SEA Rule 10c-1a(d), and confidential data elements listed in SEA Rule 10c–1a(e)), and requires that FINRA establish rules regarding the format and manner of its collection of such information. *See* SEA Rule 10c–1a(f); *see also* Adopting Release, 88 FR 75644, 75667 n.365 (explaining that the Commission is not specifying the details as to the format of the required data, the manner in which rates would be presented, or other detailed information requested, to give an RNSA the discretion to structure its systems and processes as it sees fit and propose rules accordingly, provided they are consistent with the final rule as adopted as well as other requirements of the Exchange Act applicable to an RNSA).

[40] *See* Adopting Release, 88 FR 75644, 75695 n.732.

[41] *See* proposed Rule 6710(a). For the purposes of the definition of ''Affiliate,'' ''control,'' along with any derivative thereof, means legal, beneficial, or equitable ownership, directly or indirectly, of 25 percent or more of the capital stock (or other ownership interest, if not a corporation) of any entity ordinarily having voting rights. *See* proposed Rule 6510(a). The term ''common control'' means the same natural person or entity controls two or more entities. *See* proposed Rule 6510(a).

[42] *See* Adopting Release, 88 FR 75644, 75661 n.278 and accompanying text.

[43] *See* Adopting Release, 88 FR 75644, 75661 n.279 (stating that ''[t]o reduce any potential confusion and misinterpretation of the data, an RNSA could determine to, if it is able, develop methodologies to separate or identify [affiliate] loans'').

[44] Proposed Rule 6510(i) would define ''SLATE System Hours'' as ''the hours SLATE is open, which are 6:00:00 a.m. Eastern Time through 7:59:59 p.m. Eastern Time on a business day, unless otherwise announced by FINRA.''

[45] The unsettled loan indicator would generally not be applicable to Loan Modifications involving a decrease to the loan amount due to the return of securities to the lender. *See infra* n.54.

[46] To the extent an Initial Covered Securities Loan or Loan Modification that was originally reported with the unsettled loan indicator subsequently settled, a Covered Person would be required to report a Loan Modification to remove the unsettled loan indicator to reflect that the previously reported Initial Covered Securities Loan or Loan Modification had settled.

[47] FINRA expects to use the unsettled loan indicator to filter the aggregate data that it would disseminate pursuant to SEA Rule 10c–1a(g)(5), and the indicator would be publicly disseminated with the loan-level data that FINRA would disseminate pursuant to SEA Rule 10c–1a(g)(1) through (3).

[48] *See* proposed Rule 6530(c)(4).

[49] As discussed above, a Covered Person may engage a Reporting Agent to comply with the reporting obligations on its behalf, consistent with the conditions of SEC Rule 10c–1a. *See* proposed Rule 6510(k) (defining ''Reporting Agent''); *see also infra* n.60.

[50] *See* proposed Rule 6510(d).

[51] *See* proposed Rule 6530(b)(1)(A).

[52] *See* proposed Rule 6530(b)(1)(B).

[53] *See* proposed Rule 6530(b)(1)(C).

(1) The unique identifier assigned by FINRA to the Initial Covered Securities Loan, or, if a unique identifier has not yet been assigned by FINRA, the unique internal identifier assigned to the Covered Securities Loan by the Covered Person responsible for reporting the loan to SLATE;

(2) If the Covered Securities Loan is an allocation of an omnibus loan effected pursuant to an agency lending agreement, the unique internal identifier for the associated omnibus loan assigned by the Covered Person responsible for reporting the Covered Securities Loan to SLATE;

(3) The MPID of the Covered Person;

(4) The date of the Loan Modification;

(5) The time of the Loan Modification;

(6) The expected settlement date for modifications to the loan amount (if the expected settlement date is a date other than the date of the Loan Modification), or the effective date for all other Loan Modifications (if the effective date is a date other than the date of the Loan Modification); [54]

(7) Whether the Covered Person is the lender, borrower or intermediary;

(8) The modified Data Elements for a Loan Modification to a Covered Securities Loan previously reported to SLATE or all Data Elements for a Loan Modification to a Covered Securities Loan that was not previously required to be reported to SLATE; [55] and

(9) Such modifiers and indicators as required by either the Rule 6500 Series or the SLATE Participant specification.

Proposed Rule 6530.01 (Intraday Loan Modifications) addresses a Covered Person's reporting obligations when multiple Loan Modifications occur on a given day. Specifically, if a Covered Securities Loan (whether or not previously reported to SLATE) is modified multiple times throughout the day, a Covered Person must report each Loan Modification that occurs on a given day as set forth in proposed Rule 6530(b). For example, if Lender A and Borrower X agree at 10:00 a.m. ET to modify the rebate rate for a previously reported Covered Securities Loan from 0.15 percent to 0.20 percent, and then decide at 3:00 p.m. ET to modify the rate to 0.30 percent, the Covered Person must report two Loan Modifications pursuant to proposed Rule 6530(b)(2): one with a Loan Modification time of 10:00 a.m. ET reflecting the change in the rebate rate to 0.20 percent and a second with a Loan Modification time of 3:00 p.m. ET to reflect the change in the rebate rate to 0.30 percent. Because, in this example, the Covered Securities Loan was previously reported to SLATE, the Loan Modification reports must also include the unique identifier assigned by FINRA to the loan.

If, however, the Covered Securities Loan was not previously required to be reported (*e.g.,* because the Initial Covered Securities Loan occurred prior to the effectiveness of the FINRA rule), the Covered Person must still report two Loan Modifications. However, the Loan Modification report reflecting the 10:00 a.m. ET change in the rebate rate to 0.20 percent must also include all of the other Data Elements required by proposed Rule 6530(a)(2) (*i.e.,* the non-confidential data elements) as well as the internal identifier assigned to the Covered Securities Loan by the Covered Person, and, if the Covered Securities Loan is an allocation of an omnibus loan effected pursuant to an agency lending agreement, the unique internal identifier for the associated omnibus loan assigned by the Covered Person responsible for reporting the Covered Securities Loan to SLATE. The second Loan Modification report reflecting the 3:00 p.m. ET change would not be required to include all of the other Data Elements required by proposed Rule 6530(a)(2); however, unless a unique identifier has been assigned to the loan by FINRA, the second Loan Modification report must include the internal identifier assigned to the Covered Securities Loan by the Covered Person, and, if the Covered Securities Loan is an allocation of an omnibus loan effected pursuant to an agency lending agreement, the unique internal identifier for the associated omnibus loan assigned by the Covered Person responsible for reporting the Covered Securities Loan to SLATE.[56]

A Loan Modification report is also required where a Covered Securities Loan is modified on the day upon which it was effected, even if the modification occurred prior to the submission of the Initial Covered Securities Loan report to SLATE. Thus, for example, Lender A and Borrower X agree to an Initial Covered Securities Loan at 10:00 a.m. ET with terms that include a rebate rate of 0.15 percent. At 3:00 p.m. ET that same day, before the Initial Covered Securities Loan was reported to SLATE, Lender A and Borrower X agree to change the previously agreed upon rebate rate from 0.15 to 0.20 percent. Under the proposed rule, the Initial Covered Securities Loan must be reported reflecting all of the Data Elements and Confidential Data Elements [57] required pursuant to proposed Rule 6530(a)(2), including the date and time the loan was effected of 10:00 a.m. ET as well as the original rebate rate of 0.15 percent. In addition to reporting the Initial Covered Securities Loan, the Covered Person also must separately report the Loan Modification reflecting the modification date and time of 3:00 p.m. ET, the new rate of 0.20 percent, and the internal identifier assigned to the Covered Securities Loan by the Covered Person, and, if the Covered Securities Loan is an allocation of an omnibus loan effected pursuant to an agency lending agreement, the unique internal identifier for the associated omnibus loan assigned by the Covered Person responsible for reporting the Covered Securities Loan to SLATE.

As discussed in the Adopting Release, a change to any party to a Covered Securities Loan would constitute the termination of the prior Covered Securities Loan and the initiation of a new loan under proposed Rule 6530.[58] Therefore, Covered Persons must submit two reports to SLATE: (1) a termination report with respect to the prior loan; and (2) an Initial Covered Securities Loan report reflecting all of the Data Elements and Confidential Data Elements required by proposed Rule 6530(a)(2) with respect to the new loan. Thus, proposed Rule 6530.02 (Changes to the Parties of a Covered Securities Loan) provides that, with respect to a previously reported Covered Securities Loan, following the addition or removal of a party required to be identified pursuant to Rule 6530(a)(2)(O) a Covered Person must: (a) report the termination of the previously reported Covered Securities Loan as a Loan Modification pursuant to Rule 6530(b) that reflects the date and time the party

[54] Covered Persons must report a decrease to the loan amount resulting from a return of securities only once the securities have been delivered because returns are not considered ''effected'' until the securities are actually returned. However, Covered Persons must report all other Loan Modifications on the date that the Loan Modification was agreed upon and, in such instances, must report the effective date (pursuant to proposed Rule 6530(b)(2)(F)) unless the effective date is the same as the Loan Modification date (reported pursuant to 6530(b)(2)(D)).

[55] As defined by proposed Rule 6510(d), ''Data Element'' includes any item of information that a Covered Person must report under SEA Rule 10c–1a(c) and proposed Rule 6530(a)(2)(A) through (N) and such modifiers and indicators required by proposed Rule 6530(a)(2)(Y). Accordingly, a modification to a Covered Securities Loan that would require the addition or removal of a modifier or indicator required to be reported pursuant to proposed Rule 6530(a)(2)(Y) would require a Covered Person to report a Loan Modification as set forth in proposed Rule 6530(b).

[56] *See* proposed Rule 6530(b)(2)(A) and (B).

[57] As defined by proposed Rule 6510(b), ''Confidential Data Element'' includes any item of information that a Covered Person must report under SEA Rule 10c–1a(e) and FINRA Rule 6530(a)(2)(O) through (X).

[58] *See* 88 FR 75644, 75664.

was added or removed and select the terminated loan indicator; and (b) report an Initial Covered Securities Loan pursuant to Rule 6530(a) that reflects the new parties to the loan, if known (other than the customer from whom a Broker or Dealer borrows fully paid or excess margin securities pursuant to SEA Rule 15c3–3(b)(3)).

Compliance With Reporting Obligations

Similar to requirements that exist with respect to reporting obligations under other FINRA rules, FINRA is proposing to adopt proposed Rule 6530(d) (Compliance with Reporting Obligations) to implement provisions regarding Covered Persons' ongoing reporting obligations and the use of third parties in meeting SEA Rule 10c–1a and FINRA 6500 Rule Series obligations.[59] Specifically, proposed Rule 6530(d)(1) provides that Covered Persons (other than Covered Persons that engage a Reporting Agent)[60] have an ongoing obligation to report Initial Covered Securities Loans and Loan Modifications to FINRA timely, accurately, and completely. In addition, a Covered Person may employ an agent for the purpose of submitting loan information to SLATE; however, unless the Covered Person has retained a Reporting Agent as permitted under SEA Rule 10c–1a, the primary responsibility for the timely, accurate, and complete reporting of loan information to SLATE remains the non-delegable duty of the Covered Person with the reporting obligation. Also, similar to requirements that exist with respect to reporting obligations under other FINRA rules, proposed Rule 6530(d)(2) provides that a member's pattern or practice of late reporting without exceptional circumstances may be considered conduct inconsistent with high standards of commercial honor and just and equitable principles of trade, in violation of FINRA Rule 2010.[61]

FINRA also is proposing to adopt a provision to specify that, even where a member employs a Reporting Agent consistent with SEA Rule 10c–1a(a)(2), the member must nonetheless take reasonable steps to ensure that the Reporting Agent is in fact complying with the securities lending reporting requirements of SEA Rule 10c–1a and proposed FINRA Rule 6530 on its behalf.[62] As discussed above, SEA Rule 10c–1a(a)(2) specifies the applicable requirements that permit a Covered Person to rely on a Reporting Agent to fulfill its reporting obligations under the rule. These requirements include that the Covered Person must enter into a written agreement with a Reporting Agent that agrees to report the requisite information to FINRA on behalf of such Covered Person in accordance with the requirements of SEA Rule 10c–1a(b);[63] and provides the Reporting Agent with timely access to the SEA Rule 10c–1a information.[64] In connection with these provisions, proposed Rule 6530(d)(3) would provide that a member relying on a Reporting Agent has an obligation under FINRA Rule 3110 (Supervision) to take reasonable steps to ensure that the Reporting Agent is complying with SEA Rule 10c–1a and FINRA Rule 6530 on its behalf. In executing this obligation, FINRA would expect, for example, that the member review the Covered Securities Loan reporting data made available to it by the Reporting Agent or through FINRA's system to evaluate the accuracy and timeliness of the Covered Securities Loan reports submitted on its behalf by the Reporting Agent.

Finally, proposed Rule 6530(d)(4) would provide that, if a Covered Person makes a good faith determination that it has a reporting obligation under SEA Rule 10c–1a and this Rule 6500 Series, the Covered Person or Reporting Agent, as applicable, must report the Covered Securities Loan as provided in proposed Rule 6530. If the Reportable Security is not entered into the SLATE system, proposed Rule 6530(d)(4) would also require the Covered Person or Reporting Agent, as applicable, to promptly notify and provide FINRA Operations, in the form and manner required by FINRA, the information specified in Rule 6530(a)(2)(A) and (B), along with such other information as FINRA deems necessary to enter the Reportable Security for reporting through SLATE. This requirement would enable FINRA to set the security up in its systems and facilitate reporting of the Covered Securities Loan to SLATE, as required by SEA Rule 10c–1a and proposed Rule 6530.

Participation in SLATE

Proposed Rule 6520 (Participation in SLATE) would establish the requirements applicable to Covered Persons and Reporting Agents with respect to participation in SLATE. Rule 6510(h) would define a ''SLATE Participant'' as ''any person that reports securities loan information to SLATE, directly or indirectly.'' ''SLATE Participant'' therefore would include both persons who connect to SLATE directly to report Covered Securities Loan information, including Reporting Agents, as well as any Covered Person who has engaged a Reporting Agent or other agent.

Paragraph (1) of proposed Rule 6520(a) (Mandatory Participation) would provide that participation in SLATE is mandatory for purposes of reporting Covered Securities Loans. Such mandatory participation would obligate a Covered Person to submit Covered Securities Loan information to SLATE in conformity with the SEA Rule 10c–1a and the FINRA Rule 6500 Series. Proposed Rule 6520(a)(2) would provide that participation in SLATE would be conditioned on the SLATE Participant's initial and continuing compliance with specified requirements. Specifically, SLATE Participants must: (i) obtain an MPID for reporting Covered Securities Loans to SLATE;[65] (ii) execute and comply with the SLATE Participant application agreement and all applicable rules and operating procedures of FINRA[66] and the SEC;[67] and (iii) maintain the physical security of the equipment located on the premises of the SLATE Participant to prevent unauthorized entry of information into SLATE.[68] Proposed Rule 6520(a)(3) would provide that SLATE Participants would be obligated to inform FINRA of non-compliance with, or changes to, any of these mandatory participation requirements.

Proposed Rule 6520(b) (Reporting Agents) would set forth the participation requirements specific to Reporting Agents.[69] Consistent with SEA Rule 10c–1a(b)(4), proposed Rule 6520(b) would require a SLATE Participant acting as a Reporting Agent to provide FINRA with a list naming each Covered Person on whose behalf the Reporting Agent is providing information to SLATE and any changes to the list of such persons by the end of the day on which any such change occurs, in the form and manner specified by FINRA.

Finally, proposed Rule 6520(c) (SLATE Participant Obligations) would

[59] *See e.g.,* Rule 6380A(h); Rule 6622(h); Rule 6730(a)(6).

[60] Proposed Rule 6510(k) would define ''Reporting Agent'' by reference to SEA Rule 10c–1a, which defines ''reporting agent'' in paragraph (j)(4) as a broker, dealer, or registered clearing agency that enters into a written agreement with a covered person under paragraph (a)(2) of SEA Rule 10c–1a.

[61] *See e.g.,* Rule 6380A(a)(4); Rule 6622(a)(4); Rule 6623; Rule 6730(f).

[62] *See* proposed Rule 6530(d)(3).

[63] *See* SEA Rule 10c–1a(a)(2)(i).

[64] *See* SEA Rule 10c–1a(a)(2)(ii).

[65] *See* proposed Rule 6520(a)(2)(A).

[66] For example, the proposed Rule 6500 Series and, if a member, member conduct rules.

[67] *See* proposed Rule 6520(a)(2)(B).

[68] *See* proposed Rule 6520(a)(2)(C).

[69] *See supra* n.60 (noting proposed Rule 6510(k) would define ''Reporting Agent'' by reference to SEA Rule 10c–1a).

provide that, upon execution and receipt by FINRA of the SLATE Participant application agreement, a SLATE Participant may commence input of Covered Securities Loan reports into SLATE. Proposed Rule 6520(c) would also require that a SLATE Participant must report Covered Securities Loan information using its MPID, and would provide that a SLATE Participant may access SLATE via a FINRA-approved facility during SLATE System Hours.

Dissemination of Loan Information

As required by SEA Rule 10c–1a(g), proposed Rule 6540 (Dissemination of Loan Information) would provide for the public dissemination of securities loan data reported to SLATE and information pertaining to the aggregate loan transaction activity and distribution of loan rates for each Reportable Security. The publicly available data would include: (1) next day (T+1) loan-level data dissemination for Initial Covered Securities Loans and Loan Modifications (except for the loan amount); (2) T+20 dissemination of the loan amount for Initial Covered Securities Loans and Loan Modifications; and (3) daily loan statistics (*i.e.,* aggregate loan activity and distribution of loan rates).

T+1 Loan-Level Data Dissemination

Under proposed Rule 6540(a) (Next Day Dissemination), for each Initial Covered Securities Loan and Loan Modification reported to SLATE on a given business day, no later than the morning of the next business day, FINRA would make publicly available: (1) the unique identifier assigned by FINRA to the Covered Securities Loan; (2) the security identifier(s) specified in Rule 6530(a)(2)(A) or (B) that FINRA determines is appropriate to disseminate; and (3) the requisite Data Elements.

With respect to each Initial Covered Securities Loan reported to SLATE, proposed Rule 6540(a)(3)(A) would specify that FINRA make publicly available no later than the morning of the next business day all other reported Data Elements, except the amount of Reportable Securities loaned (reported pursuant to Rule 6530(a)(2)(G)) and any modifier or indicator required by either the Rule 6500 Series or the SLATE Participant specification that FINRA determines shall not be publicly disseminated. Thus, for example, if a Covered Person reports an Initial Covered Securities Loan to SLATE on a Tuesday before 8:00:00 p.m. ET, on Wednesday morning, assuming Wednesday is a business day, FINRA would disseminate the unique identifier assigned by FINRA to the loan, the security identifier, and all other reported Data Elements, except the loan amount and any modifier or indicator required by either the Rule 6500 Series or the SLATE Participant specification that FINRA determines shall not be publicly disseminated.

With respect to each Loan Modification to a Covered Securities Loan reported to SLATE on the same or a prior business day, proposed Rule 6540(a)(3)(B) would specify that FINRA make publicly available no later than the morning of the next business day the modified Data Elements reported to SLATE, except the amount of Reportable Securities loaned and any modifier or indicator required by either the Rule 6500 Series or the SLATE Participant specification that FINRA determines shall not be publicly disseminated. For example, if a Covered Person reports a Loan Modification to SLATE on a Tuesday before 8:00:00 p.m. ET increasing the previously reported loan amount from 500 shares to 700 shares and decreasing the previously reported rebate rate from 0.25 percent to 0.15 percent, on Wednesday morning, assuming Wednesday is a business day, FINRA would disseminate the unique identifier assigned by FINRA to the loan, the security identifier, and the modified rebate rate, *i.e.,* 0.15 percent, but would not disseminate the modified loan amount, which would be subject to delayed dissemination (until 20 business days after the date of the modification to the loan amount) under proposed Rule 6540(b), as discussed below.

Finally, in the case of a Loan Modification to a Covered Securities Loan that was not previously required to be reported to SLATE (*e.g.,* because the Initial Covered Securities Loan occurred prior to the effectiveness of the Rule 6500 Series), proposed Rule 6540(a)(3)(C) would specify that FINRA make publicly available the unique loan identifier assigned by FINRA to the loan, the security identifier, and all other reported Data Elements, except the amount of Reportable Securities loaned and any modifier or indicator required by either the Rule 6500 Series or the SLATE Participant specification that FINRA determines shall not be publicly disseminated.

T+20 Loan Amount Dissemination

Pursuant to Rule 6540(b) (Delayed Dissemination), for each Initial Covered Securities Loan and Loan Modification reported to SLATE, 20 business days after the date on which the Initial Covered Securities Loan was effected or the loan amount was modified, FINRA would make publicly available: (1) the unique identifier assigned by FINRA to the Covered Securities Loan, (2) the security identifier(s) specified in Rule 6530(a)(2)(A) or (B) that FINRA determines is appropriate to disseminate, and (3) the amount of Reportable Securities loaned reported to SLATE. For Initial Covered Securities Loans, the 20-day delay period would begin the day after the Covered Securities Loan is effected (even in the case of late reports). For example, where a Covered Securities Loan is effected on a Monday, the 1st of the month[70] and is reported to SLATE before 8:00:00 p.m. ET that day, the 20-business day period would start to run on the 2nd, and FINRA would disseminate the amount of securities loaned reported to SLATE on the 29th day of the month (20 business days later), along with the unique loan identifier assigned by FINRA and the security identifier. Where a Covered Securities Loan is effected at 10:00 p.m. ET on the 1st of the month and is reported to FINRA the next business day as required by Rule 6530(a)(1)(B), the 20-business day period would still start to run the 2nd of the month (*i.e.,* the next business day after the loan was effected) and FINRA would disseminate the amount of securities loaned reported to SLATE on the 29th day of the month. In either scenario above, if a modification to the loan amount is effected and reported to SLATE prior to the end of the 20-business day delay period, *i.e.,* prior to the 29th of the month, the modified loan amount would be disseminated 20 business days after such Loan Modification is effected.

Daily Loan Statistics

In addition to T+1 loan-level data disseminated pursuant to proposed Rule 6540(a), FINRA would disseminate statistics regarding Covered Securities Loans reported to FINRA, including aggregate loan activity and distribution of loan rebate rates and lending fees.[71]

Aggregate Loan Transaction Activity

Pursuant to paragraph (1) of proposed Rule 6540(c) (Aggregate Loan Transaction Activity), for each Reportable Security for which an Initial Covered Securities Loan or Loan Modification is reported to SLATE on a given business day, FINRA would disseminate, no later than the morning

[70] For purposes of this example, the month is a 30-day month where each weekday is a business day.

[71] *See* proposed Rule 6540(c).

of the next business day, aggregated loan activity in the Reportable Security[72] (along with the security identifier specified in Rule 6530(a)(2)(A) or (B) that FINRA determines is appropriate to identify the relevant Reportable Security).[73] The aggregated data would include, for each Reportable Security, under proposed Rule 6540(c)(1)(A), the aggregate volume of securities (both in total and broken down by collateral type) subject to an Initial Covered Securities Loan or modification to the amount of Reportable Securities loaned reported on the prior business day, and, under proposed Rule 6540(c)(1)(B), the aggregate volume of securities (both in total and broken down by collateral type) subject to a rebate rate or fee modification reported on the prior business day. FINRA believes that these data would provide the public with useful information concerning the daily lending activity in Reportable Securities, including insight into how this activity is distributed across collateral types.[74]

Pursuant to Rule 6540(c)(1)(C), FINRA would also disseminate the aggregate volume of securities subject to an Initial Covered Securities Loan or modification to the amount of Reportable Securities loaned subject to a term loan (*i.e.,* a loan with a specified term) and subject to an open loan (*i.e.,* a loan without a specified term) reported on the prior business day.[75] FINRA believes that these data would provide the public with useful information concerning the nature of current lending activity.[76] Pursuant to Rule 6540(c)(1)(D), FINRA would also disseminate the aggregate volume of securities subject to an Initial Covered Securities Loan or modification to the amount of Reportable Securities loaned broken down by borrower type (as specified in proposed Rule 6530(a)(2)(N)) on the prior business day.[77] These data may provide market participants with information regarding the degree to which loan activity is retail or wholesale, which, in combination with the other aggregate data may provide insight into short selling sentiment.[78]

Pursuant to proposed Rule 6540(c)(1)(E), FINRA would disseminate the aggregate number of Initial Covered Securities Loans and terminated Covered Securities Loans (both in total and broken down by collateral type) reported on the prior business day. FINRA believes that these data would provide the public with useful information concerning current lending activity.

Loan Rate Distributions

Pursuant to paragraph (2) of proposed Rule 6540(c) (Loan Rate Distribution Data), for each Reportable Security for which an Initial Covered Securities Loan or Loan Modification is reported to SLATE on a business day, FINRA would also disseminate, not later than the morning of the next business day, the security identifier (specified in Rule 6530(a)(2)(A) or (B)) that FINRA determines is appropriate to identify the relevant Reportable Security and information pertaining to the distribution of loan rebate rates or lending fees, as applicable,[79] including: the highest rebate rate, lowest rebate rate, and volume weighted average of the rebate rates reported to SLATE for Initial Covered Securities Loans collateralized by cash and, separately, for Loan Modifications collateralized by cash (where the Loan Modification involved a change to the rebate rate). FINRA would also disseminate the highest lending fee, lowest lending fee, and volume weighted average of the lending fees reported for Initial Covered Securities Loans not collateralized by cash and, separately, for Loan Modifications not collateralized by cash (where the Loan Modification involved a change to the lending fee). These rate distribution metrics would provide market participants with both an overall view of the range of daily loan pricing for each Reportable Security, as well as insight into the relationship between loan rates/fees and loan amounts.

Proposed Rule 6540(d) (Loan Transaction Information Not Disseminated) would specify the information reported to FINRA that would not be disseminated. As prescribed by SEA Rule 10c–1a(g)(4), proposed Rule 6540(d)(1) provides that the Confidential Data Elements reported to FINRA would not be disseminated. In addition, proposed Rule 6540(d)(2) would provide that FINRA may determine not to publicly disseminate any modifier or indicator required by either the Rule 6500 Series or the SLATE Participant specification. FINRA may determine not to disseminate a modifier or indicator where the use of such information is intended for regulatory purposes only or its public disclosure may otherwise be inappropriate (*e.g.,* where it may result in information leakage).

Finally, as proposed in Rule 6540.02 (Means of Data Dissemination), FINRA would make the data pursuant to proposed Rule 6540(a) through (c) available on FINRA's website free of charge for personal, non-commercial purposes only. For other uses, FINRA would publish or distribute SLATE data for fees that have been filed with the SEC pursuant to Rule 19b–4 under the Exchange Act.[80]

Other Provisions

Consistent with FINRA's rules governing other reporting facilities that it operates, proposed Rule 6550 (Emergency Authority) would provide that, as market conditions may warrant, FINRA, in consultation with the SEC, may suspend the reporting or dissemination of certain Covered Securities Loans, or the reporting of certain Data Elements or Confidential Data Elements or the dissemination of certain Data Elements for such period of time as FINRA deems necessary.[81]

The Commission's release adopting SEA Rule 10c–1a specified the

[72] In addition to the items of information specified in proposed paragraphs (A) through (E) of proposed Rule 6540(c)(1), FINRA may, in its discretion, publish or distribute additional metrics regarding aggregate transaction activity free of charge. *See infra* n.73 defining "aggregate loan activity." *See also* Adopting Release, 88 FR 75644, 75684.

[73] In its Adopting Release, the Commission stated that the term "aggregate transaction activity" refers to information pertaining to the absolute value of transactions such that net position changes should not be discernable in the data, and is intended to help ensure that only aggregate information about net positions changes, rather than individualized information, is provided to the public. *See* Adopting Release, 88 FR 75644, 75684.

[74] See proposed Rule 6540 Supplementary Material .01 (De Minimis Loan Transaction Activity), which would provide that FINRA may omit from the aggregate loan activity volume information for Reportable Securities for which there were three or fewer types of Initial Covered Securities Loan and Loan Modification events reported to SLATE in total on the prior business day. For example, if a single Covered Securities Loan was subject to 10 Loan Modifications reported to SLATE on a given day, FINRA would omit from the daily loan statistics volume information for that Reportable Security because these events occurred in a single Covered Securities Loan.

[75] *See supra* n.73.

[76] FINRA understands that most securities loans are open-ended, allowing the security on loan to be recalled by the lender. *See* Adopting Release, 88 FR 75644, 75673.

[77] *See supra* n.73.

[78] *See* Adopting Release, 88 FR 75644, 75725 n.1050.

[79] In addition to the items of information specified in proposed paragraphs (A) and (B) of proposed Rule 6540(c)(2), FINRA may, in its discretion, publish or distribute additional metrics regarding loan rebate rates and lending fees free of charge.

[80] FINRA intends separately to file a proposed rule change to establish SLATE reporting fees and fees for fee-liable data products. Interested parties may subscribe to these fee-liable data products. Professionals would not be permitted to access the SLATE data made available free of change on FINRA's website, which is provided for personal, non-commercial purposes only.

[81] *See* Rule 6770.

applicable compliance dates.[82] If the Commission approves the proposed rule change, unless an extension is provided pursuant to Commission order, the implementation date of the proposed FINRA rules establishing the reporting requirements will be January 2, 2026; and the implementation date of the proposed FINRA rules establishing the dissemination requirements will be April 2, 2026. If the SEC extends the compliance dates for SEA Rule 10c–1a's reporting or dissemination requirements, FINRA's proposed rules addressing securities loan reporting and data dissemination would become effective consistent with the SEC's extended timeframe for reporting and data dissemination, respectively.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of section 15A(b)(6) of the Act, which require that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market, and, in general, to protect investors and the public interest and, among other things, must not be designed to permit unfair discrimination between customers, issuers, brokers or dealers.[83] FINRA also believes that the proposed rule change is consistent with SEA Rule 10c–1a, which requires FINRA to implement rules regarding the format and manner of its collection of the securities loan information described in SEA Rule 10c–1a(c) through (e) and for making publicly available such information in accordance with rules promulgated pursuant to section 19(b) of the Exchange Act and Rule 19b–4 under the Exchange Act.[84]

The proposed Rule 6500 Series is designed to improve transparency and efficiency in the securities lending market, consistent with section 15(A)(b)(6) of the Act, SEA Rule 10c–1a, and section 984 of the Dodd-Frank Act.[85] The proposed rule change would do so by facilitating the collection of specified securities loan information from Covered Persons and Reporting Agents, which include non-FINRA members,[86] and providing access to such information to market participants, the public, and regulators. As such, these proposed changes are intended to facilitate the objectives of the Commission and Congress by providing ''borrowers and lenders with better tools to assess the terms of their securities loans and enhance the ability of regulators to oversee the securities lending market,'' and ''result in the public availability of new information for investors and other market participants to consider in the mix of information about the securities lending market and the securities markets generally to better inform their decisions,'' which FINRA believes is consistent with section 15A(b)(6) of the Act, SEA Rule 10c–1a, and section 984 of the Dodd-Frank Act.[87]

FINRA's proposed Rule 6500 Series would also facilitate the availability to regulators of information that may be used to aid in assessing market events—''[f]or example, January 2021 information on market participants' securities lending activity would have provided FINRA and Commission staff a more timely and comprehensive view of who was entering into new loans and who was no longer borrowing securities. This would have facilitated a deeper understanding of how the events were or were not impacting market participants. Such analyses can help determine if further regulatory intervention in markets is warranted and can inform the nature of any intervention.'' [88]

SEA Rule 10c–1a also expressly permits FINRA to establish rules regarding the format and manner of its collection of securities loan information. To that end, FINRA's proposed rule change would require that Covered Persons report, in addition to the specific data elements prescribed in SEA Rule 10c–1a, specified loan identifiers [89] and specified indicators and modifiers,[90] as applicable. As noted above, these additional items would provide regulators and the public with important information regarding reported securities loans. For example, because an affiliate relationship between the borrower and lender (or intermediary) can impact borrowing costs, the affiliate loan indicator, proposed in Rule 6530(c)(2), would help to identify loans whose rates may not reflect current market rates, to the benefit of market participants, the public, and regulators. Similarly, because FINRA would disseminate aggregate loan activity each day, the unsettled loan indicator, proposed in Rule 6530(c)(3), would allow FINRA to filter unsettled loans, which is intended to provide the public with more granular insight into the day's loan activity.[91] FINRA believes that the securities loan reporting and data dissemination requirements proposed in the Rule 6500 Series, including the proposed identifiers and indicators and modifiers, are designed to promote greater transparency in the securities lending market, consistent with the objectives of section 15A(b)(6) of the Act, SEA Rule 10c–1a, and section 984 of the Dodd-Frank Act.[92]

As noted above, SEA Rule 10c–1a(g) also mandates that FINRA publicly disseminate specified securities loan data reported to SLATE, along with information pertaining to the aggregate loan activity and distribution of loan rates for each Reportable Security. To that end, pursuant to proposed Rule 6540, FINRA would make SLATE data available on FINRA's website free of charge for personal, non-commercial purposes only. FINRA believes that making securities loan information available free of charge for personal,

[82] *See* Adopting Release, 88 FR 75644, 75691.

[83] 15 U.S.C. 78*o*–3(b)(6).

[84] *See* SEA Rule 10c–1a(f); *see also* Adopting Release, 88 FR 75644, 75648.

[85] As noted above, SEA Rule 10c–1a requires FINRA, as the sole RNSA, to propose rules consistent with the Commission's mandate. *See* SEA Rule 10c–1–a(f). section 984(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (''Dodd-Frank Act'') added section 10(c)(1) to the Exchange Act to provide the Commission with authority over securities lending. *See* 15 U.S.C. 78j(c)(1). Section 984(b) of the Dodd-Frank Act mandates that the Commission increase the transparency of information available to brokers, dealers, and investors with respect to the loan or borrowing of securities. *See* Public Law 111–203, 124 Stat. 1376 (2010). *See also* 15 U.S.C. 78*o*–3(b)(6).

[86] As defined in SEA Rule 10c–1a(j), ''Covered Persons'' and ''Reporting Agents'' may include non–FINRA members.

[87] *See* Adopting Release, 88 FR 75644, 75648. *See also* 15 U.S.C. 78*o*–3(b)(6); SEA Rule 10c–1a; and 15 U.S.C. 78j(c)(1).

[88] *See* Adopting Release, 88 FR 75644, 75717.

[89] Covered Persons would be required to report to SLATE: (1) the unique internal identifier assigned to the Covered Securities Loan by the Covered Person responsible for reporting the Covered Securities Loan to SLATE; and (2) if the Covered Securities Loan is an allocation of an omnibus loan effected pursuant to an agency lending agreement, the unique internal identifier for the associated omnibus loan. *See* proposed Rules 6530(a)(2)(W)–(X) and (b)(2)(A)–(B).

[90] Covered Persons would be required to append the following modifiers and indicators, as applicable, to all SLATE reports to identify: (1) a loan pursuant to an exclusive arrangement; (2) a loan to an affiliate; (3) a loan that did not settle on the expected settlement date; (4) a loan that has been terminated; (5) a loan with a rebate rate or lending fee adjustment (*e.g.,* to account for a billing correction or the value of a distribution); and (6) a loan that is part of a basket of securities loaned for single agreed rate or fee. *See* proposed Rules 6530(c)(1)–(6).

[91] *See supra* n.47.

[92] *See* 15 U.S.C. 78*o*–3(b)(6); SEA Rule 10c–1a; and 15 U.S.C. 78j(c)(1).

non-commercial purposes would promote transparency and reduce information asymmetries in the securities lending market for retail investors. For other uses, FINRA would offer SLATE data products at a fee that would be filed with the SEC pursuant to Rule 19b–4 under the Exchange Act.[93] FINRA believes that this approach is both reasonable and consistent with existing FINRA rules governing other transparency regimes, *e.g.,* TRACE.[94] Therefore, FINRA believes that proposed FINRA Rule 6540 is designed to protect investors and the public interest and would not unfairly discriminate between customers, issuers, brokers, or dealers.[95]

Finally, the proposed rule change would include provisions designed to facilitate the timeliness, accuracy and completeness of the information reported to SLATE and provide additional clarity to members regarding their obligations under FINRA rules—consistent with section 15A(b)(6) of the Act, SEA Rule 10c–1a, and section 984 of the Dodd-Frank Act.[96] Specifically, while the proposed Rule 6500 Series generally applies to Covered Persons and, where engaged, Reporting Agents,[97] the language of proposed Rules 6530(d)(2) and (d)(3), is limited to the conduct of members. Specifically, proposed Rule 6530(d)(2) would provide that ''[a] member's pattern or practice of late reporting without exceptional circumstances may be considered conduct inconsistent with high standards of commercial honor and just and equitable principles of trade, in violation of FINRA Rule 2010.'' In addition, proposed Rule 6530(d)(3) would provide that ''[a] member relying on a Reporting Agent to report Covered Securities Loan information to SLATE has an obligation under FINRA Rule 3110 to take reasonable steps to ensure that the Reporting Agent is complying with SEA Rule 10c–1a and FINRA Rule 6530 on its behalf.'' While these requirements are not explicitly provided for in SEA Rule 10c–1a, they embody standards that FINRA applies to its members generally in the conduct of their affairs—Rule 3110 (Supervision) and Rule 2010 (Standards of Commercial Honor and Principles of Trade) are foundational provisions applicable to members.[98] FINRA has previously provided similar clarification regarding how these rules apply in the context of other reporting regimes, such as in the fixed income and equity trade reporting rules.[99] A member's obligation to report timely, accurately and completely and to take reasonable steps to ensure that it supervises agents retained in connection with its reporting obligations also applies in the securities lending context. As such, proposed FINRA Rules 6530(d)(2) and (d)(3) are consistent with the objectives of section 15A(b)(6) of the Act, SEA Rule 10c–1a, and section 984 of the Dodd-Frank Act and would not unfairly discriminate between customers, issuers, brokers, or dealers.[100]

B. Self-Regulatory Organization's Statement on Burden on Competition

As stated in the Commission's Adopting Release, SEA Rule 10c–1a, which the proposed rule change is designed to implement, is expected to reduce information asymmetries and to ''increase competition between broker-dealers and between lending programs.'' [101] The Commission also stated in its Adopting Release that ''the increased ability for broker-dealers to monitor conditions in the lending market may encourage new broker-dealers to enter the market, further increasing competition for broker-dealer services.'' [102] Thus, FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In addition, FINRA notes that the proposed rule change would treat all similarly situated members equally, and the provisions that also address non-member obligations pursuant to SEA Rule 10c–1a likewise apply equally to similarly situated Covered Persons, Reporting Agents, and SLATE Participants, as applicable.

Economic Impact Assessment

Based on the regulatory need discussed above and summarized below, FINRA has undertaken an economic impact assessment, as set forth below, to analyze the potential economic impacts of the proposed rule change, including potential costs, benefits, and distributional and competitive effects, relative to the current baseline.

Regulatory Need

On October 13, 2023, the SEC adopted SEA Rule 10c–1a, requiring Covered Persons to report Covered Securities Loan information to an RNSA, and the RNSA to make publicly available specified information regarding those reported securities loans. In its Adopting Release, the SEC stated, among other things, that SEA Rule 10c–1a was designed to increase the transparency and efficiency of the securities lending market.[103]

As required by SEA Rule 10c–1a(f), FINRA, currently the only RNSA, is proposing to establish rules specifying the format and manner of its collection of information on Covered Securities Loans. As required by SEA Rule 10c–1a(g), FINRA also is proposing rules to make Covered Securities Loan information publicly available. Below FINRA discusses the potential economic impacts of FINRA's proposed changes specifying the format and manner of reporting for Covered Securities Loans and the dissemination of aggregate transaction activity and distribution of loan rates for each Reportable Security.

Economic Baseline

In the Commission's Adopting Release, the SEC outlined the baseline and considered the economic effects of Rule 10c–1a and how its costs and benefits impacted the economic baseline.[104]

In its Adopting Release, the Commission noted that various types of entities participating in the securities lending market will be impacted by SEA Rule 10c–1a, including those that may need to enter into contracts and develop recording and reporting systems to comply with the rule.[105] Table 1 shows

[93] Consistent with SEA Rule 10c–1a(i) and the Commission Adopting Release, FINRA intends separately to file a proposed rule change establishing fees for SLATE data products, and interested parties may subscribe to these fee-liable data products. *See* Adopting Release 88 FR 75644, 75687. *See also* proposed Rule 6540.02 (''Nothing in this Rule shall prohibit FINRA from also publishing or distributing SLATE data at a charge for fees that have been filed with the SEC pursuant to Rule 19b–4 under the Exchange Act.'').

[94] *See generally,* FINRA Rule 7730.

[95] *See* 15 U.S.C. 78*o*–3(b)(6).

[96] *See* Adopting Release, 88 FR 75644, 75648. *See also* 15 U.S.C. 78*o*–3(b)(6); SEA Rule 10c–1a; and 15 U.S.C. 78j(c)(1).

[97] The defined terms ''Covered Person'' and ''Reporting Agent'' include FINRA members and non-members. The defined term ''SLATE Participant'' would include both Covered Persons and Reporting Agents. *See* proposed Rule 6510.

[98] FINRA Rule 2010 provides that ''[a] member, in the conduct of its business, shall observe high standards of commercial honor and just and equitable principles of trade.'' FINRA Rule 3110 requires, *inter alia,* that FINRA members establish and maintain an effective supervisory system, which includes overseeing, supervising, and monitoring the activities or functions performed by third-party vendors, that is reasonably designed to achieve compliance with applicable securities laws and regulations and with applicable FINRA rules. *See also Regulatory Notice* 21–29 (August 2021).

[99] *See e.g.,* FINRA Rule 6380A(a)(4); Rule 6622(a)(4); Rule 6623; Rule 6730(f).

[100] *See* 15 U.S.C. 78*o*–3(b)(6); SEA Rule 10c–1a; and 15 U.S.C. 78j(c)(1).

[101] *See* Adopting Release, 88 FR 75644, 75723.

[102] *See* Adopting Release, 88 FR 75644, 75723.

[103] *See* Adopting Release, 88 FR 75644.

[104] *See* Adopting Release, 88 FR 75644, 75692, 75694–75723.

[105] *See* Adopting Release, 88 FR 75644, 75717.

the estimated number of entities that will be affected by SEA Rule 10c–1a and the breakdown by type according to the estimates provided by the SEC.[106] In the Adopting Release, the SEC estimated that a total of 609 Covered Persons and Reporting Agents would be affected by SEA Rule 10c–1a, of which 503 were Covered Persons and 106 were Reporting Agents.[107]

TABLE 1—ESTIMATED NUMBER OF COVERED PERSONS AND REPORTING AGENTS AFFECTED BY SEA RULE 10c–1a

Providing Covered Persons	255
—Persons that effect a covered securities loan as the lender when an intermediary is not used	217
—Broker-dealers borrowing fully paid or excess margin securities	34
—Broker-dealer intermediaries	4
Non-Providing Covered Persons	248
—Persons that effect a covered securities loan as the lender when an intermediary is not used	217
—Non-broker-dealer intermediaries	31
Reporting Agents	106
—Broker-dealers	97
—Clearing agencies	9
Total	609

Economic Impacts

In the Adopting Release, the SEC discussed its consideration of the economic effects of SEA Rule 10c–1a.[108] Below, FINRA considers the potential costs, benefits, and competitive impact of FINRA's proposal specifying the format and manner of reporting for Covered Securities Loans not explicitly prescribed in SEA Rule 10c–1a. On balance, FINRA believes the costs are appropriate in light of the anticipated benefits to the SLATE reporting, transparency, and regulatory framework.

Reporting of Information to FINRA

Expected Settlement Date. The proposed rule change requires information regarding the expected settlement date for an Initial Covered Securities Loan or a modification to the loan amount. This information would enhance the quality of the audit trail available to regulators for surveillance. Covered Persons may incur a cost to track and report this information.

Covered Person Party Type. The proposed rule change requires SLATE Participants to report whether the Covered Person is the lender, borrower, or intermediary. This information would improve the utility of the data for regulatory purposes, as it will provide necessary information regarding the identity of the Covered Person, including in instances where a party other than the Covered Person submits a loan report to SLATE. Covered Persons may incur a cost to track and report this information.

Loan Identifiers. For Initial Covered Securities Loans, the Covered Person responsible for reporting the loan would be required to report a unique internal identifier assigned by the Covered Person for the loan. For Loan Modifications, the Covered Person would be required to report a unique identifier assigned by FINRA to the Initial Covered Securities Loan, or if FINRA has not yet assigned an identifier, the Covered Person must provide a unique internal identifier assigned by the Covered Person for the loan. The internal identifier requirement would allow linkage of loan reports where a FINRA identifier has not yet been assigned and improve the completeness of audit trail data available to regulators. For Covered Securities Loans that are allocations of omnibus loans, the Covered Person would also be required to report a unique internal identifier assigned by the Covered Person for the associated omnibus loan. The ability to link allocations that are components of an omnibus loan would improve the completeness of the audit trail and allow FINRA to provide additional granularity in the loan activity statistics disseminated to the public. FINRA would include only the FINRA-assigned identifier when disseminating loan transaction data; FINRA will not publicly disseminate the unique internal identifier or unique omnibus loan identifier reported by Covered Persons. FINRA understands that some Covered Persons already create and maintain unique loan identifiers, which should mitigate the cost associated with the requirement to report this information to FINRA.[109]

Modifiers/Indicators. The proposed rule change would require the reporting of six modifiers and indicators; specifically: (1) Covered Securities Loans with affiliates; (2) loans associated with exclusive arrangements; (3) loans with rate or fee adjustments; (4) basket loans; (5) unsettled loans; and (6) terminated loans. As discussed above, the pricing of some Covered Securities Loans may not be indicative of the current market rates available in the securities lending market. Covered Persons would incur costs for establishing processes to identify when the required modifiers must be appended and reporting such modifiers to SLATE. FINRA believes that these proposed modifiers and indicators would provide context to market participants when assessing pricing and other loan terms, helping to facilitate the usefulness of the publicly disseminated data. These proposed modifiers and indicators also would increase the usefulness of the audit trail data available to regulators as well as provide mechanisms for validating the accuracy of the reported data.

Timing of End-of-Day Reporting. As discussed above, the proposed rule change would require that Covered Securities Loans effected on a business day at or after 12:00:00 a.m. ET through 7:45:00 p.m. ET be reported to SLATE before 8:00:00 p.m. ET on the same day. FINRA believes that this reporting timeframe is reasonable because most Covered Securities Loans entered into on a given business day would have settled before 8:00:00 p.m. ET, which would provide time for Covered Persons to review the reportable information to facilitate accurate and complete reporting. In addition, FINRA understands that 8:00:00 p.m. ET is generally consistent with the reporting deadline used by commercial vendors to which some Covered Persons currently voluntarily submit securities lending information. A similar reporting deadline may help mitigate costs for Covered Persons that may leverage

[106] *See* Adopting Release, 88 FR 75644, 75718.

[107] *See* Adopting Release, 88 FR 75644, 75717.

[108] *See* Adopting Release, 88 FR 75644, 75706–24.

[109] *See* Adopting Release, 88 FR 75644, 75685.

existing systems or that submit securities loan information to commercial vendors.

Furthermore, permitting the reporting of Initial Covered Securities Loans and Loan Modifications effected on a business day after 7:45:00 p.m. ET by no later than next business day (T+1) before 8:00:00 p.m. ET will provide Covered Persons with time to review the reportable information for end-of-day loans to facilitate accurate and complete reporting. FINRA believes that the proposed reporting timeframes strike an appropriate balance between providing Covered Persons with sufficient time to review and report the day's loan activity and providing FINRA with the time necessary to process the reported information for next-day dissemination.

SLATE Participation Obligations. The proposed rule change would require each Covered Person or Reporting Agent to comply with SLATE participation obligations, including execution and compliance with the SLATE Participant application agreement. The SLATE participation requirements would help ensure that Covered Persons and Reporting Agents understand their obligations with regard to SLATE participation, including requiring SLATE Participants to obtain an MPID if they do not currently have one, and use it when reporting Covered Securities Loans to SLATE. The MPID requirement would provide information that would make it more efficient for FINRA to validate SLATE reports, contact firms as necessary, and troubleshoot SLATE Participant-specific technical issues. The Covered Person and Reporting Agent would incur upfront administrative costs in terms of time and effort required to enter into the SLATE Participant application agreement and costs to comply with the SLATE participation requirements on an ongoing basis. For example, Covered Persons and Reporting Agents that do not currently have an MPID for SLATE use must complete an MPID request form and incur a cost to incorporate the SLATE Participants' and counterparties' MPIDs into their systems.

Dissemination of Aggregated Loan Activity

SEA Rule 10c–1a(g)(5) generally requires that FINRA make publicly available information pertaining to the aggregate loan transaction activity and the distribution of loan rates on a daily basis. FINRA has proposed specific aggregation buckets, as described in detail above. The dissemination of these data, which would be compiled from the Data Elements required to be reported to SLATE pursuant to SEA Rule 10c–1a and proposed Rule 6530, does not impact the reporting requirements applicable to Covered Persons and, therefore, does not contribute to the direct costs of reporting for Covered Persons. Further, as FINRA would make these data available on its website free of charge for personal, non-commercial use, the dissemination of this information will similarly not contribute to any direct costs for such use.

Among other things, FINRA proposes to disseminate the aggregate volume of securities (both in total and by collateral type) subject to an Initial Covered Securities Loan or modification to the amount of Reportable Securities loaned reported on the prior business day, which would provide varied perspectives on the loan activity for the Reportable Security, including over time. FINRA also proposes to disseminate the aggregate volume of securities (both in total and by collateral type) subject to a rebate rate or fee modification reported on the prior business day, to provide insight into the frequency of rate changes for a Reportable Security. FINRA similarly proposes to disseminate the aggregate volume of securities subject to an Initial Covered Securities Loan or modification to the amount of Reportable Securities loaned with a specified term and, separately, without a specified term, reported on the prior business day, as well as the aggregate volume of securities subject to an Initial Covered Securities Loan or modification to the amount of Reportable Securities loaned to one or more borrower types specified in Rule 6530(a)(2)(N) reported on the prior business day. These categorizations would permit analysis of volume differences between loans that do not have a defined end date and those that have a defined term date, and volume differences between the wholesale versus end-customer market.

De Minimis Loan Transaction Activity. To address concerns regarding potential information leakage, FINRA proposes to omit from the daily loan statistics volume information for Reportable Securities for which there are three or fewer types of Initial Covered Securities Loans and Loan Modifications reported to SLATE in total on a given day. However, the proposed *de minimis* threshold may be viewed by some as reducing the transparency value of the disseminated information. FINRA believes the threshold of three or fewer Initial Covered Securities Loans and Loan Modifications appropriately balances these considerations.

Alternatives Considered

In specifying the format and manner of reporting for Covered Securities Loans and the dissemination of aggregate transaction activity and distribution of loan rates for Reportable Securities, FINRA considered various alternatives and the potential costs and benefits of those alternatives. On balance, FINRA believes the requirements in the proposed rule are appropriate in light of the anticipated benefits to the SLATE reporting, transparency, and regulatory framework.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–FINRA–2024–007 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2024–007. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use

only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–FINRA–2024–007 and should be submitted on or before May 28, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[110]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–563, OMB Control No. 3235–0656]

Proposed Collection; Comment Request; Extension: Rule 17g–7

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rule 17g–7 (17 CFR 240.17g–7) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rule 17g–7 requires each nationally recognized statistical rating organization (''NRSROs'') to publish certain items, including a form containing specified information, when taking a rating action with respect to a credit rating[1] and to disclose rating histories for free on an easily accessible portion of its corporate internet website.[2] There are currently 10 NRSROs registered with the Commission, and it is estimated that NRSROs will take collectively approximately 1,908,530 rating actions per year.

Based on staff experience, the Commission estimates that the total annual hour burden to comply with Rule 17g–7 will be 641,673 hours. The Commission further estimates that this annual hour burden will result in a total annual cost of $238,688,856, reflecting the cost of preparing the form required to be published by Rule 17g–7 and standardizing and tailoring certain required disclosures, as well as the cost of maintaining a database of rating histories to comply with Rule 17g–7.

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by July 8, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Please direct your written comments to: Dave Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F St. NE, Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov*.

Dated: May 1, 2024.

Sherry R. Haywood,

Assistant Secretary.

TENNESSEE VALLEY AUTHORITY

Sunshine Act Meetings

TIME AND DATE: 9:00 a.m. CT on May 9, 2024.

PLACE: Lipscomb University's George Shinn Event Center, Nashville, Tennessee.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Meeting No. 24–02

The TVA Board of Directors will hold a public meeting on May 9, at the

George Shinn Event Center, 3906 Belmont Boulevard, Nashville, Tennessee.

The meeting will be called to order at 9:00 a.m. CT to consider the agenda items listed below. TVA management will answer questions from the news media following the Board meeting.

On May 8, at the George Shinn Event Center, the public may comment on any agenda item or subject at a board-hosted public listening session which begins at 2:00 p.m. CT and will last until 4:00 p.m. Preregistration is required to address the Board.

Agenda

1. Approval of minutes of the February 14, 2024 Board Meeting
2. Governance Items
3. Report of the Operations and Nuclear Oversight Committee
4. Report of the Finance, Rates, and Portfolio Committee
   A. FY24 Strategic Initiatives Funding
5. Report of the People and Governance Committee
   A. Executive Compensation Review
6. Report of the External Stakeholders and Regulation Committee
7. Report of the Audit, Risk, and Cybersecurity Committee
8. Information Item
   A. Committee Assignments
9. Report from President and CEO

CONTACT PERSON FOR MORE INFORMATION: For more information: Please call TVA Media Relations at (865) 632–6000, Knoxville, Tennessee. Anyone who wishes to comment on any of the agenda in writing may send their comments to: TVA Board of Directors, Board Agenda Comments, 400 West Summit Hill Drive, Knoxville, Tennessee 37902.

Dated: May 2, 2024.

Edward C. Meade,

Agency Liaison.

[FR Doc. 2024–10066 Filed 5–3–24; 4:15 pm]

BILLING CODE 8120–08–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Rescinding the Notice of Intent To Prepare an Environmental Impact Statement: Shelby County, Tennessee

AGENCY: Federal Highway Administration (FHWA), Department of Transportation.

ACTION: Notice.

SUMMARY: The FHWA is issuing this notice to advise the public that it is rescinding its Notice of Intent (NOI) and will not be preparing an Environmental Impact Statement (EIS) for a proposed highway project in Shelby County, Tennessee. A NOI to prepare an EIS was published in the **Federal Register** on February 9, 2009.

FOR FURTHER INFORMATION CONTACT: For FHWA: Gilberto De León, P.E.; Acting Division Administrator; Federal Highway Administration; Tennessee Division Office; 404 BNA Drive, Building 200, Suite 508, Nashville, TN 37217; Telephone: 615–426–3214; email: *gilberto.deleon@dot.gov.* The FHWA Tennessee Division Office's normal business hours are 7:30 a.m. to 4:00 p.m. (Central Time), Monday through Friday. For TDOT: Sharon Schutz, P.E.; Environmental Division Director; Tennessee Department of Transportation; James K. Polk Building, Suite 900, 505 Deaderick Street, Nashville, TN 37243; Telephone: 615–350–4208; email: *sharon.schutz@tn.gov.* The TDOT Environmental Division's normal business hours are 8 a.m. to 5 p.m. (Central Time), Monday through Friday.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Tennessee Department of Transportation (TDOT), initiated an EIS with a NOI published in the **Federal Register** on February 9, 2009, at 74 FR 6203. The project would have improved North Second Street and North Third Street to form a one-way pair from I–40 to Chelsea Avenue and would have constructed a four-lane two-way roadway from Chelsea Avenue to the intersection of U.S. 51 and Whitney Avenue north of downtown Memphis. The TDOT has determined continued preparation of the EIS for the North Second Street Improvements (Project) is no longer feasible. The primary reason for this determination is the financial impact of the costs required to fund the remaining phases of the project. Therefore, the preparation of the EIS is being terminated.

Gilberto De León,

Acting Division Administrator, Nashville, Tennessee.

BILLING CODE 4910–RY–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2023–0181]

Agency Information Collection Activities; Renewal of an Approved Information Collection Request: Motor Carrier Records Change Form

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for review and approval. The information collected is required by the Office of Registration to process name changes, address changes, and reinstatements of operating authority for motor carriers, freight forwarders, and brokers. On December 14, 2023, FMCSA published a notice in the **Federal Register** with a 60-day comment period to announce its intention to submit this ICR to OMB for renewal. FMCSA received no comments in response to the published notice.

DATES: Comments on this notice must be received on or before June 6, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be submitted within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Mr. Jeffrey Secrist, Office of Registration, Chief, Registration Division, DOT, FMCSA, West Building 6th Floor, 1200 New Jersey Avenue SE, Washington, DC 20590; (202) 385–2367; *jeff.secrist@dot.gov.*

SUPPLEMENTARY INFORMATION:

Title: Motor Carrier Records Change Form.

OMB Control Number: 2126–0060.

Type of Request: Renewal of a currently approved ICR.

Respondents: For-hire motor carriers, brokers, and freight forwarders.

Estimated Number of Respondents: 64,673.

Estimated Time per Response: 15 minutes per response.

Expiration Date: July 31, 2024.

Frequency of Response: On occasion.

Estimated Total Annual Burden: 16,168.

Background

FMCSA registers for-hire motor carriers under 49 U.S.C. 13902, surface freight forwarders under 49 U.S.C. 13903, and property brokers under 49 U.S.C. 13904. Each registration is effective from the date specified under 49 U.S.C. 13905(c). ''Procedures for changing the name or business form of a motor carrier, freight forwarder, or property broker,'' (49 CFR 365.413T) states that motor carriers, forwarders, and brokers must submit the required information to FMCSA's Office of Registration requesting the change. Paragraph (f) of § 360.3T mentions fees that FMCSA collects for ''petition for reinstatement of revoked operating authority,'' but does not provide any specifics for the content that petition should take.

Motor carriers, freight forwarders, and property brokers are required to use Form MCSA–5889 to request a name or address change and to request reinstatement of a revoked operating authority. Respondents can submit the form online through the Licensing and Insurance (L&I) website, by fax, or by mail. According to data collected between 2020 and 2022, annually, approximately 1 percent of forms are submitted by mail; 7 percent are submitted by fax; and 92 percent are submitted online. The information collected is then entered in the L&I database by FMCSA staff.

Form MCSA–5889 enables FMCSA to maintain up-to-date records so that the Agency can recognize the entity in question in case of enforcement actions or other procedures required to ensure that the carrier is willing and able to provide for-hire transportation services, and so that entities whose operating authority has been revoked can resume operation if they are not otherwise blocked from doing so. This multi-purpose form, filed by registrants on a voluntary, as-needed basis, simplifies the process of gathering the information needed to process the entities' requests in a timely manner, with the least amount of effort for all parties involved.

The form prompts users to report the following data points (whichever are relevant to their records change request):

1. Requestor's fax number, email address, and applicant's oath.
2. Entity's legal/doing business as names, USDOT number, docket MC/MX/FX number, current street address, and phone number(s).
3. Affiliations with FMCSA-licensed entities.
4. Requested changes to the entity's address.
5. Requested changes to the entity's name and/or ownership, management, or control.
6. Type(s) of operating authority the entity wishes to reinstate.
7. Credit card information (name, number, expiration date, address, date) if filing a name change or reinstatement.

Changes From Previous Estimates

The currently approved version of this ICR estimated the average annual burden to be 6,781 annual burden hours, with 27,122 total annual respondents. For this renewal the estimated average annual burden is 16,168, with 64,673 total average annual respondents. The annual burden hour increase of 9,387 is due to the increase in the average number of annual respondents.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information.

Issued under the authority of 49 CFR 1.87.

Thomas P. Keane,

Associate Administrator, Office of Research and Registration.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2023–0179]

Agency Information Collection Activities; Renewal of an Approved Information Collection: Licensing Applications for Motor Carrier Operating Authority

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) requesting a renewal of an approved information collection for review and approval. This ICR applies to: Existing registrants (*i.e.,* entities that already have a USDOT number and/or operating authority) that are subject to FMCSA's licensing, registration, and certification regulations that wish to apply for additional authorities; and Mexico-domiciled carriers that wish to operate beyond the U.S. municipalities on the U.S.-Mexico border and their commercial zones. Existing registrants seeking additional authorities must use forms OP–1, OP–1(P), OP–1(FF), and OP–1(NNA), to apply for such authority. Mexico-domiciled carriers seeking the authority described above must apply for such authority using Form OP–1(MX).

DATES: Comments on this notice must be received on or before June 6, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Mr. Jeffrey Secrist, Office of Registration, Chief, Registration Division, DOT, FMCSA, West Building 6th Floor, 1200 New Jersey Avenue SE, Washington, DC 20590; (202) 385–2367; *jeff.secrist@dot.gov.*

SUPPLEMENTARY INFORMATION: No comments were received from the 60-day **Federal Register** publication on December 14, 2023 at 88 FR 86722.

Title: Licensing Applications for Motor Carrier Operating Authority.

OMB Control Number: 2126–0016.

Type of Request: Renewal of a currently approved ICR.

Respondents: Carrier compliance officer or equivalent from motor carriers, motor passenger carriers, freight forwarders, brokers, and certain Mexico-domiciled motor carriers subject to FMCSA's licensing, registration, and certification regulations.

Estimated Number of Respondents: 159,312.

Estimated Time per Response: 2 hours for forms OP–1, OP–1(P), and OP–1(FF); 4 hours for forms OP–1(MX) and OP–1(NNA).

Expiration Date: May 31, 2024.

Frequency of Response: Other (as needed).

Estimated Total Annual Burden: 318,656.

Background

FMCSA registers for-hire motor carriers of regulated commodities and of passengers under 49 U.S.C. 13902(a); surface freight forwarders under 49 U.S.C. 13903; property brokers under 49 U.S.C. 13904; and certain Mexico domiciled motor carriers under 49 U.S.C. 13902(c). These motor carriers may conduct transportation services in the United States only if they are registered with FMCSA. Each registration is effective from the date specified and remains in effect for such period as the Secretary of Transportation (Secretary) determines by regulations.

Prior to 2015, all entities seeking authority (both first-time applicants and registered entities seeking additional authorities) were required to apply for such authority using the OP–1 series of forms, including OP–1, OP–1(P), OP–1(FF), OP–1(NNA), and OP–1(MX) (for Mexico-domiciled carriers only).

The final rule titled ''Unified Registration System,'' (78 FR 52608) dated August 23, 2013, implemented statutory provisions for an online registration system for entities that are subject to FMCSA's licensing, registration, and certification regulations. The Unified Registration System (URS) streamlines the registration process and serves as a clearinghouse and repository of information on motor carriers, brokers, freight forwarders, intermodal equipment providers, hazardous materials safety permit applicants, and cargo tank facilities required to register with FMCSA. When developing URS, FMCSA planned that the OP–1 series of forms—except for OP–1(MX)—would ultimately be folded into one overarching electronic application (MCSA–1) which would be used by all motor carriers seeking authority.

FMCSA began a phased rollout of URS in 2015. The first phase, which went into effect on December 12, 2015, impacted only first-time applicants seeking an FMCSA-issued registration. FMCSA had planned subsequent rollout phases for existing registrants; however, there were substantial delays, and subsequent phases have not been rolled out to date.

On January 17, 2017, FMCSA issued a final rule titled ''Unified Registration System; Suspension of Effectiveness,'' which indefinitely suspended URS effective dates for existing registrants only (82 FR 5292). Pursuant to this final rule, FMCSA is still accepting forms OP–1, OP–1(P), OP–1(FF), and OP–1(NNA) for existing registrants wishing to apply for additional authorities. Separately, FMCSA requires Form OP–1(MX) for new and existing Mexico-domiciled motor carriers that wish to operate beyond the U.S. municipalities on the U.S.-Mexico border and their commercial zones. Information collected through URS, utilizing the MCSA–1, does not include registration form OP–1(MX), which continues to remain a paper form outside URS.

Forms in the OP–1 series request information to identify the applicant, the nature and scope of its proposed operations, a narrative description of the applicant's safety policies and procedures, and information regarding the drivers and vehicles it plans to use in U.S. operations. The OP–1 series also requests information on the applicant's familiarity with relevant safety requirements, the applicant's willingness to comply with those requirements during its operations, and the applicant's willingness to meet any specific statutory and regulatory requirements applicable to its proposed operations. Information collected through these forms aids FMCSA in determining the type of operation a company may run, the cargo it may carry, and the resulting level of insurance coverage the applicant will be required to obtain and maintain to continue its operating authority.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information.

Issued under the authority of 49 CFR 1.87.

Thomas P. Keane,

Associate Administrator, Office of Research and Registration.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2023–0096]

Petition for Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on November 13, 2023, Union Pacific Railroad Company (UPRR) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 231 (Railroad Safety Appliance Standards). FRA assigned the petition Docket Number FRA–2023–0096.

Specifically, UPRR requested a waiver from 49 CFR 231.27(h), *Uncoupling levers,* to disable the uncoupling levers on prototype rail tie cars used solely in ''Rail Train'' service, which is UPRR's non-revenue service to maintain its rail network. UPRR seeks to disable the uncoupling levers when moving both loaded and empty cars. The cars would be used solely for delivering rail ties to maintenance-of-way (MoW) employees through the UPRR network, and they are equipped with additional air and electrical train lines that risk damage if the cars become inadvertently uncoupled. In support of its request, UPRR states that the ''prototype cars reduce risk for MoW personnel by eliminating the current risks associated with machine unloading of ties from gondola cars.''

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at *https://www.regulations.gov.* Follow the online instructions for submitting comments.

Communications received by July 8, 2024 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

Anyone can search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), the U.S. Department of Transportation (DOT) solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the

commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See also *https://www.regulations.gov/privacy-notice* for the privacy notice of *regulations.gov*.

Issued in Washington, DC.

John Karl Alexy,

Associate Administrator for Railroad Safety Chief Safety Officer.

BILLING CODE 4910–06–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 8976

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Internal Revenue Service (IRS), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on information collections, as required by the Paperwork Reduction Act of 1995. The IRS is soliciting comments concerning, Notice of Intent to Operate.

DATES: Written comments should be received on or before July 8, 2024, to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to *pra.comments@irs.gov.* Include ''OMB Number 1545–2268–Notice of Intent to Operate Under Section 501(c)(4)'' in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this collection should be directed to Martha R. Brinson, at (202) 317–5753, or at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or through the internet at *Martha.R.Brinson@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: Notice of Intent to Operate Under Section 501(c)(4).

OMB Number: 1545–2268.

Form Number: 8976.

Abstract: The Protecting Americans from Tax Hikes Act of 2015 (the PATH Act) section 506 to the Internal Revenue Code (Code) requires an organization described in section 501(c)(4), no later than 60 days after the organization is established, to notify the Secretary that it is operating as a section 501(c)(4) organization (the notification). Section 506(b) provides that the notification must include: (1) The name, address, and taxpayer identification number of the organization; (2) the date on which, and the State under the laws of which, the organization was organized; and (3) a statement of the purpose of the organization.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 2,500.

Estimated Time per Respondent: 45 minutes.

Estimated Total Annual Burden Hours: 1,875.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments will be of public record. Comments are invited on: (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: April 30, 2024.

Martha R. Brinson,

Tax Analyst.

BILLING CODE 4830–01–P

U.S.-CHINA ECONOMIC AND SECURITY REVIEW COMMISSION

Notice of Open Public Hearing

AGENCY: U.S.-China Economic and Security Review Commission.

ACTION: Notice of open public hearing.

SUMMARY: Notice is hereby given of the following hearing of the U.S.-China Economic and Security Review Commission. The Commission is mandated by Congress to investigate, assess, and report to Congress annually on ''the national security implications of the economic relationship between the United States and the People's Republic of China.'' Pursuant to this mandate, the Commission will hold a public hearing in Washington, DC on May 23, 2024 on ''Key Economic Strategies for Leveling the U.S.-China Playing Field: Trade, Investment, and Technology.''

DATES: The hearing is scheduled for Thursday, May 23, 2024 at 9 a.m.

ADDRESSES: Members of the public will be able to attend in person at a location TBD or view a live webcast via the Commission's website at *www.uscc.gov. Visit the Commission's website for updates to the hearing location or possible changes to the hearing schedule. Reservations are not required to view the hearing online or in person.*

FOR FURTHER INFORMATION CONTACT: Any member of the public seeking further information concerning the hearing should contact Jameson Cunningham, 444 North Capitol Street NW, Suite 602, Washington, DC 20001; telephone: 202–624–1496, or via email at *jcunningham@uscc.gov. Reservations are not required to attend the hearing.*

ADA Accessibility: For questions about the accessibility of the event or to request an accommodation, please contact Jameson Cunningham via email at *jcunningham@uscc.gov.* Requests for an accommodation should be made as soon as possible, and at least five business days prior to the event.

SUPPLEMENTARY INFORMATION:

Background: This is the fifth public hearing the Commission will hold during its 2024 reporting cycle. The hearing will initially assess U.S. trade strategies to address China's nonmarket practices. Next, the hearing will review U.S. measures to limit the flow of key technologies to China and assess the United States' export control mechanisms. Then, the hearing will consider the design of U.S. outbound investment restrictions, the relevant review processes, and their role in strategic competition with China. Finally, the hearing will assess the

United States approach to coordinating its economic strategy with key trade partners in the Indo-Pacific, Europe, and Latin America and the Caribbean.

The hearing will be co-chaired by Commissioner Leland Miller and Commissioner Michael Wessel. Any interested party may file a written statement by May 23, 2024 by transmitting it to the contact above. A portion of the hearing will include a question and answer period between the Commissioners and the witnesses.

Authority: Congress created the U.S.-China Economic and Security Review Commission in 2000 in the National Defense Authorization Act (Pub. L. 106–398), as amended by Division P of the Consolidated Appropriations Resolution, 2003 (Pub. L. 108–7), as amended by Public Law 109–108 (November 22, 2005), as amended by Public Law 113–291 (December 19, 2014).

Dated: May 2, 2024.

Christopher Fioravante,

Director of Operations and Administration, U.S.-China Economic and Security Review Commission.

[FR Doc. 2024–09911 Filed 5–6–24; 8:45 am]

BILLING CODE 1137–00–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0270]

Agency Information Collection Activity: Financial Counseling Statement

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 8, 2024.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0270'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20420, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0270'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 38 U.S.C. 3732.

Title: Financial Counseling Statement, VA Form 26–8844.

OMB Control Number: 2900–0270.

Type of Review: Extension of a currently approved collection.

Abstract: VA Form 26–8844 provides for recording comprehensive financial information concerning the borrower's net income, total expenditures, net worth, suggested areas for which expenses can be reduced or income increased, the arrangement of a family budget and recommendations for the terms of any repayment agreement on the defaulted loan.

Affected Public: Individuals and households.

Estimated Annual Burden: 3,750 hours.

Estimated Average Burden per Respondent: 45 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 5,000 per year.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

[Docket No. FR–6092–F–03]

RIN 2577–AD06

Housing Opportunity Through Modernization Act of 2016—Housing Choice Voucher (HCV) and Project-Based Voucher Implementation; Additional Streamlining Changes

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Final rule.

SUMMARY: This final rule amends HUD's regulations to implement changes to the Housing Choice Voucher (HCV) tenant-based program and the Project-Based Voucher (PBV) program made by the Housing Opportunity Through Modernization Act of 2016 (HOTMA). HOTMA made several amendments to the HCV and PBV programs, including establishing a statutory definition of public housing agency (PHA)-owned housing, and amending several elements of both programs. In response to public comments, HUD has also included additional regulatory changes in this final rule that are intended to reduce the burden on public housing agencies, by either modifying requirements or simplifying and clarifying existing regulatory language.

DATES:

Effective date: June 6, 2024, except the following sections, which are delayed indefinitely: instruction 69, § 982.451(c); instruction 98, § 983.154(g) and (h); instruction 100, § 983.157; and instruction 103, § 983.204(e).

For more information, *see* **SUPPLEMENTARY INFORMATION.**

Compliance dates: Compliance with this rule is required no later than June 6, 2024, except for the following requirements:

1. *90 days after effective date.* PHAs are not required to comply with changes to the requirements in the following sections until September 4, 2024: 24 CFR 982.301; 24 CFR 982.503; 24 CFR 982.625–641; 24 CFR 983.58(b); 24 CFR 983.252; 24 CFR 983.260; and 24 CFR 985.3.

2. *180 days after effective date.* PHAs are not required to comply with the new requirements in the following section until December 3, 2024: 24 CFR 982.505.

3. *One year after the effective date.* Several sections in this final rule require PHAs to update their Administrative Plans. PHAs are not required to update their Administrative Plans in compliance with these new requirements until June 6, 2025. Additionally, PHAs are not required to comply with the new requirements in the following sections until June 6, 2025: 24 CFR 983.57; 24 CFR 983.155(b); 24 CFR 983.251(e); and 24 CFR 983.262.

FOR FURTHER INFORMATION CONTACT: Ryan Jones, Director, Housing Voucher Management and Operations Division, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20011; telephone number 202–708–1112 (this is not a toll-free number); email *HOTMAVoucher@hud.gov.* HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as from individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

SUPPLEMENTARY INFORMATION:

I. Background

The HOTMA Statute

On July 29, 2016, HOTMA was signed into law (Pub. L. 114–201, 130 Stat. 782). HOTMA makes numerous significant changes to statutes that govern HUD programs, including section 8 of the United States Housing Act of 1937 (1937 Act) (42 U.S.C. 1437f).

The Proposed Rule

On October 8, 2020, HUD issued a proposed rule [1] to codify the HOTMA provisions that HUD implemented through the HOTMA Implementation Notices [2] in the **Federal Register**. The proposed rule also sought to make changes to regulatory provisions unrelated to HOTMA to eliminate obsolete regulatory provisions and reduce the burden on public housing agencies, by either modifying requirements or simplifying and clarifying existing regulatory language. The proposed rule sought to codify the following HOTMA provisions:

- *Section 101:* In accordance with HOTMA section 101(a)(1), the proposed rule included a provision regarding non-life-threatening deficiencies and an alternative inspections requirement in HOTMA section 101(a)(1) at §§ 982.405, 982.406, and 983.103. The proposed rule also proposed to revise the definition of life-threatening deficiencies at § 982.401. Additionally, the proposed rule sought to include regulations to enforce Housing Quality Standards (HQS) in section 101(a)(3) at §§ 982.404 and 983.208.
- *Section 105:* In accordance with HOTMA section 105, the proposed rule sought to modify and align the definition of ''PHA-owned unit'' with HOTMA's revised definition of the term at §§ 982.4 and 983.3.
- *Section 106:* In alignment with HOTMA sections 106(a)(2) and 106(a)(3), the proposed rule proposed to include regulations on PBV program cap, PBV units not subject to project cap or program cap, and PBV project cap in §§ 983.6, 983.54, and 983.59.
- *Section 106:* Additionally, to conform to the changes in HOTMA section 106(a)(4), the proposed rule included regulations on entering into a PBV Housing Assistance Payments (HAP) contract for rehabilitated and newly constructed housing projects without an agreement to enter into HAP contract at § 983.154. The proposed rule sought to codify regulations surrounding PBV additional contract conditions and tenant-based assistance for families at termination/expiration without renewal of PBV HAP contract; PBV priority of assistance contracts; PBV adding units to HAP contract without competition; and PBV initial term of HAP contract and extension of term, in sections 106(a)(4) and 106(a)(5) throughout Part 983. The proposed rule sought to codify regulations that allow for rent adjustments using an operating cost adjustment factor (OCAF) in HOTMA section 106(a)(6) at § 983.302.
- *Section 106:* Further, to conform to the changes in HOTMA sections 106(a)(7) through (a)(9), the proposed rule sought to codify HOTMA's changes to PBV preference for voluntary services in section 106(a)(7) at § 983.251 and owner-maintained waiting lists in section 106(a)(7) at § 983.251. The proposed rule also sought to codify changes to environmental requirements for existing housing in section 106(a)(8) at § 983.56 and attaching PBVs to projects where the PHA has an ownership interest in section 106(a)(9) at § 983.51.

The proposed rule also sought to implement the following HOTMA HCV provision:

- *Section 112:* In accordance with HOTMA section 112, the proposed rule proposed to include the manufactured

[1] Housing Opportunity Through Modernization Act of 2016-Housing Choice Voucher (HCV) and Project-Based Voucher Implementation; Additional Streamlining Changes, 85 FR 63664 (Oct. 8, 2020).

[2] *See* 81 FR 73030 (Oct. 24, 2016); 82 FR 5458 (Jan. 18, 2017); 82 FR 32461 (Jul. 14, 2017); additional guidance was provided in Notices PIH 2017–18, PIH 2017–20, and PIH 2017–21.

home space rent calculation in section 112 at § 982.623, and to address the PHA option to make housing assistance payments directly to families instead of an owner for manufactured home space rentals in a proposed change to § 982.623.

HUD also proposed changes that were not statutorily required, to better clarify or revise existing regulatory requirements, including changing the current requirements to refine the Davis-Bacon wage requirements and inserting references to obligations under Section 504 of the Rehabilitation Act of 1973 (Section 504) and the Americans with Disabilities Act (ADA). Through these changes, HUD sought to improve the administration of the program, simplify program rules, and reduce administrative burden and cost. For additional information, please see the proposed rule.[3]

HUD received 44 comments on the proposed rule, which were considered and are discussed in Section IV of this preamble. Additional details about the proposed changes may be found in the ''Housing Opportunity Through Modernization Act of 2016-Housing Choice Voucher (HCV) and Project-Based Voucher Implementation; Additional Streamlining Changes'' proposed rule at 85 FR 63664 (Oct. 8, 2020).

The NSPIRE Rulemaking

On May 11, 2023, after the proposed rule was published, HUD published the ''Economic Growth Regulatory Relief and Consumer Protection Act: Implementation of National Standards for the Physical Inspection of Real Estate (NSPIRE) final rulemaking (''the NSPIRE final rule'').[4] The NSPIRE final rule established a new approach to defining and assessing housing quality by consolidating and modernizing inspection standards for public housing, multifamily housing, Community Planning and Development programs, and the HCV and PBV programs. Several of the changes made in this final rule from the proposed rule are designed to incorporate or be consistent with the NSPIRE final rule, and some additional changes are made to build upon changes made by the NSPIRE final rule.

II. The Final Rule

After considering the public comments received on the October 8, 2020, proposed rule, and after further review, HUD makes the following changes at this final rule stage. Where a section has been relocated either from the prior regulations or from what HUD proposed, the section numbers shown in the headings of this preamble refer to the regulation sections as they appear in this final rule.

Notes concerning application of this rulemaking to projects underway.

HUD wishes to clarify that no change in this rulemaking requires a PHA, or any other party, to repeat a stage in the selection or development process which has already been completed for a PBV project prior to the compliance date of this rulemaking. If, for instance, a PHA has selected a site under the prior site selection standards before the effective date of this rulemaking, the PHA is not required to complete a new selection. Similarly, an Agreement to enter into HAP contract signed before the effective date of this rulemaking does not need to be amended to incorporate changes to this rulemaking.

Additionally, if parties wish to amend an existing Agreement to enter into HAP contract to take advantage of changes made by this rulemaking, such as the changes made to include a description of broadband infrastructure work in the Agreement, nothing in this rulemaking prevents such an amendment after the rule is in effect. However, HUD notes that if a project is under an Agreement to enter into HAP contract as of the effective date of this rule, parties cannot nullify the Agreement to enter into HAP contract to proceed without an Agreement as will be otherwise allowed under this rule when § 983.154(f) and (g) take effect.

§ 888.113 Fair Market Rents for Existing Housing: Methodology

In response to public comments, HUD revises § 888.113 to increase flexibility for PHAs. This final rule will provide PHAs the option in the HCV program to use Small Area Fair Market Rents (SAFMRs) in a non-metropolitan area with notification to their local HUD field office, which provides PHAs operating in non-metropolitan counties the same opportunity to establish payment standards that better align with rents that vary significantly between zip code areas within the non-metropolitan counties. In paragraph (a) this final rule modifies the requirement under § 888.113 that the FMR calculation exclude newly built units. HUD no longer publishes separate FMRs for newly constructed rental units; therefore, the FMRs calculated under § 888.113 should be reflective of the entire rental market. This final rule also clarifies existing practice in paragraph (c)(3) that where a PHA that elects to use SAFMRs may exercise this option in one metropolitan area or non-metropolitan county, and is not required to exercise this option in other metropolitan areas or non-metropolitan counties. This final rule changes paragraph (c)(3) which will allow PHAs to notify HUD when opting-in to use SAFMRs, rather than require HUD's approval.

This final rule revises paragraph (h) to align with the change to paragraph (c)(3) described above and to improve readability. Paragraph (h) is also revised to include a cross-reference to separate requirements regarding applicability of exception payment standards based on Small Area FMRs to PBV projects, to more clearly signal that Small Area FMRs may impact PBVs both as described in paragraph (h) and where HUD approves use of exception payment standards. This final rule also revises paragraph (h)(1) to clarify that the PHA and owner may mutually agree to apply the SAFMR to a PBV project where the project was selected before ''either or both'' the SAFMR designation and the PHA administrative policy. The intent of this provision, as explained in the preamble to the Small Area FMR final rule (81 FR 80567, published November 16, 2016), was to permit a PHA that had established an Administrative Plan policy to apply Small Area FMRs to all future PBV projects to also establish a policy permitting the PHA to apply the Small Area FMRs to current PBV projects, provided the owner was willing to mutually agree to do so. This approach was intended to offer ''maximum flexibility'' to the PHA for varied circumstances. However, the prior language the use of ''both'' inadvertently created confusion with respect to projects selected between the two events (the Small Area FMR designation and the PHA administrative policy extending Small Area FMRs to future PBV projects). Consequently, HUD is making a technical correction to paragraph (h)(1) to clarify that if the PHA is applying the Small Area FMRs to future PBV projects, the PHA may also establish a policy to extend the use of Small Area FMRs to current PBV projects, including those projects selected after the Small Area FMR designation but prior to the effective date of the PHA administrative policy, if the owner is willing to do so.

This final rule also makes minor revisions to paragraphs (h)(1) and (h)(2). First, the final rule includes ''county-wide FMRs,'' for consistency with other changes in the regulation that allow voluntary use of SAFMRs in non-

[3] 85 FR 63664 (Oct. 8, 2020), *https://www.federalregister.gov/documents/2020/10/08/2020-21400/housing-opportunity-through-modernization-act-of-2016-housing-choice-voucher-hcv-and-project-based.*

[4] See 88 FR 30442.

metropolitan areas and to avoid any implication that the PBV Small Area FMR flexibilities in paragraph (h) would not be available in non-metropolitan counties where HUD publishes SAFMRs. Second, this final rule changes ''designation'' to ''designation/implementation'' to improve clarity; this is not a substantive change, but rather it reflects that the applicable date for a PHA that chooses to implement Small Area FMRs under paragraph (c)(3) of this section would more appropriately be termed the date of ''implementation.'' This final rule also clarifies the effective date of a rent increase due to Small Area FMR. The proposed rule left unchanged a provision stating that the effective date of a rent increase would occur on the ''first annual anniversary'' of the HAP contract, but this final rule replaces ''first annual anniversary'' with ''next annual anniversary'' to clarify that the effective date of a rent increase occurs on the next annual anniversary after the agreement, even if that is not the first anniversary of the project.

Finally, this final rule revises paragraph (i)(2) to reflect the renumbering of § 982.503(e) to (f). This final rule also revises paragraph (i)(3) to reflect the phase-out of success rate payment standards in 982.503(f).

§ 903.3 What is the purpose of this subpart?

This final rule clarifies HUD's intent regarding applicability of part 903 to the project-based voucher program. Previously, § 903.4(a)(2)(i) defined tenant-based assistance to broadly mean assistance provided under section 8(o) of the 1937 Act, which included project-based assistance under section 8(o)(13). When § 903.12 was amended to make express reference to project-based assistance under section 8(o)(13), an unintended consequence was confusion regarding whether the term ''tenant-based assistance'' should still be interpreted to include project-based assistance under section 8(o)(13). In § 903.3(b)(2), the term ''project-based'' is added to the reference of participants who benefit from PHA plans as a source to locate basic PHA policies, rules and requirements concerning the PHA's operations, programs and services.

§ 903.4 What are the public housing agency plans?

This final rule revises and defines both tenant-based assistance and project-based assistance under 903.4(a)(2)(i) to address confusion regarding whether the existing regulatory language also covers project-based assistance under section 8(o)(13). HUD now also makes specific reference to tenant-based assistance, project-based assistance, and/or tenant and project-based assistance throughout part 903 to bring clearer meaning to each provision.

§ 903.6 What information must a PHA provide in the 5-Year Plan?

HUD adds paragraph (c) to § 903.6 to clarify that when a PHA intends to select one or more projects for project-based assistance without competition, the PHA must first include a statement of this intent in its 5-Year Plan to put the public on notice. The proposed rule referenced this requirement in 983.51(c)(1) but only generically referenced the PHA Plan.

§ 903.7 What information must a PHA provide in the Annual Plan?

This final rule clarifies the requirements for PHAs that provide project-based assistance under section 8(o)(13) with respect to what information a PHA must provide in the Annual Plan. HUD now makes specific references to project-based assistance in paragraphs (a)(1), (c), (d), (e)(4), (f), and (l)(1)(iii) and (2). HUD also inserts a new paragraph (r) which contains text that was previously located in § 903.12, as HUD determined that the project-based assistance statement requirement in that section was not appropriately located.

Finally, in the **Federal Register** notice published on January 18, 2017 (82 FR 5458), HUD stated, ''The HOTMA amendments permit a PHA to establish a preference based on who qualifies for voluntary services, including disability-related services, offered in conjunction with the assisted units.'' HUD further provided ''The revised statute permits such a preference to be established if it is consistent with the PHA Plan. As part of the PHA Plan review process, the Office of Fair Housing and Equal Opportunity, in consultation with the Office of General Counsel, will review each proposed preference for consistency with fair housing and civil rights requirements. As part of this process, HUD may request the PHA or owner provide any additional documentation necessary to determine consistency with the PHA Plan and all applicable Federal fair housing and civil rights requirements.'' In this final rule, HUD clarifies that the Office of Fair Housing and Equal Opportunity, in consultation with the Office of General Counsel, may review proposed preferences as part of the PHA Plan review process. Approval of a PHA Plan does not constitute compliance with federal fair housing and civil rights requirements. As stated in the comment discussion of § 983.251, adoption of such preferences cannot conflict with Section 504 or other federal civil rights requirements. Further explanation of these issues is located in that discussion and in HUD's January 2017 notice.

§ 903.11 Are certain PHAs eligible to submit a streamlined Annual Plan?

HUD makes a minor revision to § 903.11(c)(1) and (3) to include the requirement that a PHA must identify its participation in the project-based assistance program in the streamlined Annual Plan consistent with the changes to § 903.7 made by this final rule.

HUD is also revising paragraphs (a)(3) and (c)(3). These paragraphs allow PHAs to submit a streamlined Annual Plan if they do not own or operate public housing. This final rule clarifies that PHAs that participate in the project-based assistance program are still eligible to submit a streamlined Annual Plan.

§ 903.12 What are the streamlined Annual Plan requirements for small PHAs?

In this final rule, HUD moves the PBV requirements previously located in § 903.12 to § 903.7 as described above. HUD makes a minor revision to § 903.12 to include the requirement that in the streamlined Annual Plan for Small PHAs, a PHA must identify its participation in the PBV program consistent with the changes to § 903.7 made by this final rule. HUD also makes express reference to project-based assistance in paragraph (b).

§ 903.13 What is a Resident Advisory Board and what is its role in development of the Annual Plan?

This final rule clarifies in § 903.13(b)(1) and (3) the requirements that Resident Advisory Board composition provides for reasonable representation of families receiving project-based assistance, in addition to families receiving tenant-based assistance.

§ 903.15 What is the relationship of the public housing agency plans to the Consolidated Plan and a PHA's Fair Housing requirements?

This final rule clarifies in paragraph (c) that all admission and occupancy policies for section 8 project-based housing programs, in addition to public housing and section 8 tenant-based must comply with Fair Housing Act requirements and other civil rights laws and regulations and with a PHA's plans to affirmatively further fair housing.

§ 982.4 Definitions

In this final rule, HUD has revised the organizational structure of the cross-references for clarity and consistency with cross references in other sections. In addition, this final rule makes the following changes to definitions:

HUD adds the definition of ''building,'' to clarify that a building is a structure with a roof and walls that contains one or more dwelling units.

HUD adds the definitions of ''foster adult'' and ''foster child'' to the HCV program to clarify that foster adult and foster child are members of the household, but not members of a family. These definitions are identical to the definitions added by the Housing Opportunity Through Modernization Act of 2016: Implementation of Sections 102, 103, and 104 final rule.[5]

HUD revises the definition of ''housing quality standards'' to make a technical correction to the existing definition and eliminate confusion regarding the use of the alternative inspection option. Under the statute, the term ''housing quality standards'' (HQS) refers to the standards prescribed by HUD under section 8(o)(8)(B)(i) or variations approved by HUD under section 8(o)(8)(B)(ii) of the United States Housing Act of 1937. While the alternative inspection option at § 982.406 allows a PHA to comply with the initial and regular inspection requirements by relying on an alternative inspection (*i.e.,* an inspection conducted for another housing program), that does not mean the standards of the alternative inspection become the applicable HQS for the HCV program. For example, assume a PHA places a unit under a HAP contract by using the alternative inspection option for initial inspections under § 982.406(e). Under that option, the PHA may place a unit under HAP contract on the basis that the unit passed an alternative inspection for a different housing program if certain conditions are met prior to conducting its own inspection. However, the PHA must still conduct its own HQS inspection within 30 days of receiving the Request for Tenancy Approval (RFTA) and may not make housing assistance payments to the owner until the PHA has inspected the unit. The PHA conducts its inspection of the unit based on the HQS established by HUD for the HCV program, not the housing standards that were applicable under the alternative inspection. Likewise, any interim inspection conducted by the PHA for a unit under HAP contract is to determine that the unit meets the HQS established by HUD for the HCV program, regardless of whether the PHA is relying on an alternative inspection of another housing program (that may have different standards) for regular inspections. For these same reasons, HUD is also revising the definition of HQS for the PBV program at § 983.3 and making conforming changes to §§ 982.401, 982.605(a), 982.609(a), 982.614(a), 982.618(b), 982.621, and 983.101(a) in this final rule.

HUD revises the definition of ''independent entity'' from the definition in the proposed rule to clarify when the unit of general local government meets the definition of an independent entity and more clearly explain the requirements and prohibited connections for a HUD-approved entity.

HUD revises the proposed definition of ''Request for Tenancy Approval (RFTA)'' to make clear that the RFTA may be submitted not just by the family, but also on behalf of a family.

HUD revises the definition of ''Small Area Fair Market Rents'' from the proposed rule to remove language suggesting that the definition only applies to areas meeting the definition at § 888.113(d)(2). HUD removed this reference because the SAFMRs in part 982 are not meant to be limited to the mandatory Small Area FMR metropolitan areas, and as such the ''Small Area Fair Market Rents'' definition deleted the citation to § 888.113(d)(2), which only covers mandatory metropolitan areas designated as Small Area FMR areas.

HUD revises the definition of ''tenant-paid utilities'' by stating that utilities and services may include those required by HUD through **Federal Register** notice with opportunity for comment.

§ 982.54 Administrative Plan

This final rule revises the requirements for the PHA Administrative Plan. Specifically, this final rule requires PHAs at § 982.54(d)(22) to specify in the Administrative Plan the PHA's policy for withholding HAP for units that do not meet HQS. This final rule also requires at § 982.54(d)(4)(iv) that the PHA Administrative Plan include the PHA's policy concerning residency for foster children and adults and requires at § 982.54(d)(23) that the PHA's Administrative Plan include the PHA's policy on assisting families with relocating and finding a new unit. This final rule also modifies § 982.54(d)(4)(iii) to include §§ 982.552, 982.554, and 982.55 as regulations that PHAs must follow in establishing their standards for denying admission or terminating assistance based on criminal activity or alcohol abuse and which must be included in their Administrative Plan. HUD's directives and guidance on a PHA's use of criminal activity as an admission screening factor are contained in PIH Notice 2015–19, *Guidance for Public Housing Agencies (PHAs) and Owners of Federally-Assisted Housing on Excluding the Use of Arrest Records in Housing Decisions.* Through this notice and other issuances, such as the 2016 Office of General Counsel's Guidance on the Application of Fair Housing Act Standards to the Use of Criminal Records by Providers of Housing and Real Estate-Related Transactions, HUD has required PHAs to adopt admission policies that do not intentionally discriminate against members of a protected class or otherwise have an unjustified discriminatory effect on members of a protected class, even when the PHA has no intent to discriminate. HUD urges PHAs to achieve a sensible and effective balance between allowing individuals with a criminal record to access HUD-subsidized housing and ensuring the safety of all residents of such housing.

Consistent with the NSPIRE final rule, HUD modifies § 982.54(d)(21)(i) to require the PHA to include in its Administrative Plan any life-threatening deficiencies adopted by the PHA. Under the proposed rule, the PHA's Administrative Plan had to include the specific life-threatening conditions that would be identified through the PHA's inspections, including the HUD required life-threatening conditions and any life-threatening deficiencies adopted by the PHA prior to January 18, 2017. Since the deficiencies that HUD requires must be considered life-threatening are mandatory and not a matter of PHA administrative policy, requiring the PHA to list the HUD-required life-threatening deficiencies in the Administrative Plan is unnecessary and burdensome. In addition, singling out life-threatening deficiencies adopted by the PHA prior to January 18, 2017, which was related to how HUD initially implemented the non-life-threatening initial inspection option in the HOTMA Implementation **Federal Register** notice (82 FR 5458, published January 18, 2017), may create confusion. The revised text in this final rule clarifies that the Administrative Plan must include a list of any PHA designated life-threatening deficiencies that, in addition to all HUD-required life-threatening deficiencies, will be applied

[5] See ''Housing Opportunity Through Modernization Act of 2016: Implementation of Sections 102, 103, and 104'' final rule at 88 FR 9600 (Feb. 14, 2023).

by the PHA, regardless of date that the PHA designated the deficiency as life-threatening.

§ 982.301 Information When Family Is Selected

This final rule makes changes to the information provided to a family when they are selected. For transparency and to ensure equal access, this section specifies that PHAs must provide information in a way that ensures meaningful access to individuals with limited English proficiency. Additionally, the final rule expands upon the requirement in the proposed rule to provide information on reasonable accommodation policies and procedures in the information packet, by also requiring that the packet specifically address an increase in the payment standard as a reasonable accommodation. The final rule also includes a requirement that reasonable accommodations must also be covered in the oral briefing. In this section, this final rule removes all references to the welfare to work program, since it no longer exists. Finally, this rule reorganizes paragraph (a) so that paragraph (a)(1) represents a list of what must be provided in an oral briefing, moving some content from paragraphs (a)(2) and (3); this reorganization does not change the requirements of paragraph (a) in any way.

§ 982.305 PHA Approval of Assisted Tenancy

This final rule reorganizes § 982.305(b) of the proposed rule by relocating paragraph (b)(2)(iii) of the proposed rule to a new paragraph (b)(3) and moving the previous paragraph (b)(3) to a new paragraph (b)(4). For clarity and simplicity, this final rule removes the requirement that the PHA determine that the unit is covered by the alternative inspection and simplifies this provision to state that an alternative inspection is allowed and alternatively cross references what the PHA is subject to and the alternative inspection option at § 982.406. In addition, this final rule does not make the proposed non-substantive change to paragraph (c)(3).

§ 982.352 Eligible Housing

This final rule changes proposed § 982.352(b)(1)(v)(A)(*3*) by removing the exception of applicability of § 982.405(e), acknowledging that sometimes independent entities schedule inspections, and in those cases, they must consider complaints and any other information brought to their attention.

§ 982.401 Housing Quality Standards

NSPIRE includes the new standards for setting HQS at § 5.703 for all HUD programs including the standards for life-threatening and non-life-threatening conditions and the amount of time required to correct such deficiencies. Other than a conforming change related to the revised definition of HQS discussed previously in the description of the changes to § 982.4, this final rule makes no change to the section as codified in the NSPIRE rule (88 FR 30442 (May 11, 2023)).

§ 982.404 Maintenance: Owner and Family Responsibility; PHA Remedies

HUD makes several clarifying revisions to this section, which includes changes to certain terminology such as changing ''fails to comply'' to ''has HQS deficiencies'' and consistently changing ''defect'' to ''deficiency.'' These clarifying changes also make it clear that a unit is ''not in compliance with HQS'' when it has deficiencies that are not remedied within the appropriate timeframe. This final rule also revises paragraph (a)(2) to provide clarifying changes from the proposed rule text that ensure the paragraph is clear that it does not provide a different requirement from the remainder of the section, and amends paragraph (a)(4) to align with the HOTMA statutory text. HUD provides in paragraph (b)(4) that, in the case of a family being responsible for HQS deficiency repairs, the family need not itself make the repairs but rather is responsible for taking all steps permissible under the lease and State and local law to ensure the deficiency is corrected. This is in response to commenters who pointed out that in some cases the lease or local law may prevent the family from undertaking the repairs itself.

The proposed rule used varying terminology to explain HQS inspections throughout parts 982 and 983. To promote clarity, this final rule replaces the varied terminology to explain HQS inspections and consistently uses the inspection terms outlined in § 982.405. This rule specifically names each type of inspection that exists within its respective section and specifies when actions or provisions apply to specific inspections. As such, this final rule also removes references to ''regular inspection'' since it was undefined in the proposed rule, and this final rule clarifies that § 982.404(d) applies to every inspection type other than initial inspections. This final rule also adds the requirement at paragraph (d)(1) that a PHA's Administrative Plan contains the conditions for withholding HAP from an owner for such deficiencies, to align with § 982.54.

In paragraph (d)(2)(i), this final rule clarifies that the abatement requirement includes amounts that had previously been withheld. To better protect families from homelessness, in paragraph (d)(2)(ii), HUD outlines the timeframe in which a PHA must issue a family its voucher to include at least 30 days prior to the termination of the HAP contract. In paragraph (d)(3), this final rule specifies that the family has discretion to terminate their lease and that the termination will occur either immediately or when the family vacates the unit, whichever is earlier. This final rule also includes the requirement that PHAs promptly issue the family a voucher to move. In paragraph (e)(3), HUD expands what is included in costs associated with relocating to include temporary housing costs. The final rule further provides that if the PHA uses the withheld and abated assistance payments to assist with the family's relocation costs, the PHA must provide security deposit assistance to the family as necessary, and that PHAs must assist families with disabilities in locating available accessible units in accordance with 24 CFR 8.28(a)(3).

Lastly, in paragraph (f), HUD provides that the revised § 982.404 applies to HAP contracts that are executed on or after the effective date of this final rule, as well as HAP contracts renewed after the rule's effective date.

§ 982.405 PHA Initial and Periodic Unit Inspection

HUD has made technical organizational changes to § 982.405 by dividing paragraphs and changing the headers to consistently use identifiable names for each inspection type. New paragraph (d) splits up the proposed paragraph (g) to specifically outline the types of interim inspections to include life-threatening, non-life-threatening, and extraordinary circumstances.

§ 982.406 Use of Alternative Inspections

HUD revises § 982.406 primarily to address issues with respect to compatibility between parts 982 and 983. Paragraph (a) now applies only to HCV, part 982 as HUD moved generally applicable language at proposed paragraph (a)(2) to paragraph (d) and removed the language at proposed paragraph (a)(3) applicable only to PBV. HUD also revises paragraph (c)(2)(ii) to align with the renumbering in § 982.405. This final rule revises paragraph (d) regarding use of alternative inspections to apply to both HCV and PBV, by removing specific citations to § 982.405.

These changes continue to require that any alternative inspection standard be identified in the PHA Administrative Plan for both HCV and PBV.

§ 982.451 Housing Assistance Payments Contract

In this final rule, the text from paragraph (c)(1)(i) has been moved under paragraph (c)(1), resulting in a renumbering of paragraphs (c)(1)(i)(A)–(E) from the proposed rule to (c)(1)(i)–(v) in the final rule. Paragraph (c)(1) now expressly states the requirement that the separate legal entity must execute the HAP contract with the PHA if it chooses the option of establishing a separate legal entity to serve as the owner. HUD deletes paragraph (c)(1)(ii) of the proposed rule and moves the text of proposed (c)(2)(i) under paragraph (c)(2) in the final rule. This final rule also revises paragraph (c)(2)(i) to clarify that the PHA-owned certification obligates the PHA, as the owner, to all of the requirements of the HAP contract. This revision prevents confusion with other regulations that reference HAP contracts, but not the PHA-owned certification. Finally, other minor changes were made in paragraph (c) to align with corresponding requirements in § 983.204(e).

§ 982.503 Payment Standard Areas, Schedule, and Amounts

HUD makes clarifying edits to paragraph (a)(1) to reflect HUD's practice of setting SAFMRs for ZIP codes outside designated SAFMRs. HUD also revises paragraph (d)(1) to explain the areas in which an exception payment standard may be established. In addition, in response to public comment, HUD revises paragraph (d)(2) to allow PHAs to set SAFMR-based exception payment standards above 110 percent of the FMR for non-metropolitan counties, just as they are currently permitted to do for metropolitan areas. This ensures parity between metropolitan and non-metro PHAs and provides non-metropolitan PHAs with the ability to establish exception payment standards that better reflect actual market conditions based on HUD's SAFMR determinations. In paragraph (d)(2), this final rule also allows PHAs that qualify for exception payment standards above 110 percent of the applicable FMR to set exception payment standards up to the same percentage of the SAFMR for the applicable ZIP code. HUD also divides proposed paragraph (d)(3) into paragraphs (d)(3) and (4) and moves proposed paragraph (d)(4) to (d)(5). In order to provide PHAs more flexibility to respond to rapidly changing rental markets, paragraph (d)(3) now provides set situations in which HUD will allow PHAs the discretion to establish an exception payment standard amount between 110 percent and 120 percent of applicable FMR upon notification to HUD that the PHA meets a specified criterion instead of requiring prior HUD approval. The PHA must meet one of three criteria: (i) Fewer than 75 percent of the families to whom the PHA issued tenant-based rental vouchers during the most recent 12-month period for which there is success rate data available have become participants in the voucher program; (ii) More than 40 percent of families with tenant-based rental assistance administered by the agency pay more than 30 percent of adjusted income as the family share; or (iii) Such other criteria as the Secretary establishes by notice. This change will allow PHAs to more quickly respond to changing rental market conditions, which will help them better manage program utilization, success rates, and rent burdens. New paragraph (d)(4) outlines how the PHA must request approval from HUD to establish payment standards above 110 percent of the applicable FMR except as provided in paragraphs (d)(2), (d)(3), and (d)(5). This new paragraph consolidates requirements related to exception payment standards for PHAs in designated SAFMR areas and for PHAs subject to the metropolitan area or non-metropolitan county FMRs. It also establishes criteria for designated SAFMR PHAs to request an exception payment standard over 110 percent of the SAFMR, which the current regulation previously stated would be provided in a separate **Federal Register** notice. Further, HUD revises paragraph (d)(4) to explain the application of the exception payment standard to the entire fair market rent area and the use of rental market data, specifically allowing the use of local rental market data. HUD provides clarifying changes to relocated paragraph (d)(5), which now specifies existing policy that PHAs may establish an exception payment standard of up to 120 percent of the applicable FMR without prior notification to HUD if they are seeking a reasonable accommodation for a person with a disability.

HUD also amends paragraph (e) by establishing a modified standard for approving payment standards below the basic range which will require a projection of rent burden based on the lower payment standard, rather than measuring rent burden based on current program participants prior to that reduction. The standard does allow HUD to approve a payment standard below the basic range to help prevent termination of assistance in the case of a PHA budget shortfall. In this final rule, HUD does not adopt the proposed rule modification to paragraph (e) and removes the PHA's option to go below the basic payment standard range for Small Area FMR ZIP code areas without HUD approval. In addition, HUD amends paragraph (f) to eliminate the option to establish success rate payment standards. HUD determined that the new flexibility provided in the rule to set payment standards up to 120 percent of the FMR makes this option unnecessary. In paragraph (h), this final rule specifies that HUD will monitor rent burdens only of families assisted with tenant-based rental assistance, because PBV tenants are unlikely to have rent burdens above 30 percent.

§ 982.505 How To Calculate Housing Assistance Payment

In this final rule, HUD revises paragraph (c)(3)(iv) to eliminate the option in the proposed rule for PHAs to adopt different policies related to applying decreases in payment standards in different geographic areas out of concern that this could result in discriminatory policies. Additionally, in response to public comment, HUD revises paragraph (c)(4)(ii) to require PHAs to apply payment standard increases at the family's next regular reexamination or the next interim recertification (in addition to the other events listed) and adds paragraph (c)(5) to give PHAs the flexibility to adopt policies to apply increases in the payment standard earlier than required. HUD also revised paragraph (c)(6), which was previously paragraph (c)(5), to clarify that while the new family unit size must be used in the recalculation by the first regular reexamination following the change, it may be used immediately.

§ 982.517 Utility Allowance Schedule

In response to public comments HUD is not going forward with the proposed § 982.517(a)(2), which would have required PHAs to provide the utility allowance schedule to HUD only when HUD requests it, and instead maintains the current requirement that the PHA provide HUD with the utility allowance schedule regardless of whether HUD requests it, and to only require the PHA to provide information or procedures used in preparation of the schedule when HUD requests it. HUD also revises paragraph (b)(1)(i) to allow for the possibility of an expansion of utility allowances in the future through a **Federal Register** notice. Additionally, in

paragraph (b)(1)(ii), this final rule expands the category of utilities and services to include applicable surcharges. In paragraph (b)(1)(iv), HUD removed wireless internet from the list of non-essential utility costs so that HUD could consider such inclusion of wireless internet as essential in a **Federal Register** notice under paragraph (b)(1)(i).

In paragraph (b)(2)(ii), HUD expands the utility allowance standards to include criteria for applying utility allowance to retrofitted units. The revised paragraph (b)(2)(ii) clarifies that while the entire building must meet Leadership in Energy and Environmental Design (LEED) or Energy Star standards, in the future HUD may provide by notice, when an energy-efficient utility allowance (EEUA) may be used for retrofitted units even if the entire building does not meet the standard. The revisions notes that there are only two design standards that can be used for energy-efficient utility allowance (EEUA) to prevent EEUAs from being applied broadly. HUD also moves paragraph (b)(2)(iv) to paragraph (b)(2)(v) and adds a new paragraph (b)(2)(iv) to state that the PHA must use the project-specific utility allowance schedule for tenant-based participants in projects that have an approved project-specific utility allowance under § 983.301(f)(4). This requirement was previously in § 983.301(f)(4) of the proposed rule and § 983.301(f)(2)(ii) of the previous regulatory text but has been moved from part 983. The Administrative Plan requirements to include PHAs state their policy for utility allowance payments are consistent with § 982.54.

§ 982.552 PHA Denial or Termination of Assistance for Family

This final rule makes a conforming change to remove § 982.552(c)(1)(viii), which denies housing assistance for a family's failure to comply with the FSS contract of participation, to align with a statutory amendment to the Family Self-Sufficiency (FSS) program authorizing language and the program's regulations, which amended 24 CFR 984.303(b)(5) through a final rule effective on June 16, 2022 (87 FR 30020). This change is in accordance with the Economic Growth, Regulatory Relief, and Consumer Protection Act (''the Economic Growth Act'') (Pub. L. 115–174) [6] which states that, ''Housing assistance may not be terminated as a consequence of either successful completion of the contract of participation or failure to complete such contract.''

§§ 982.605; 982.609; 982.614; 982.618; 982.621

The final rule makes a conforming change to §§ 982.605; 982.609; 982.614; 982.618; and 982.621 to align the text with the revised definition of HQS discussed previously in the description of the changes to § 982.4.

§ 983.2 When the Tenant-Based Voucher Rule (24 CFR Part 982) Applies

HUD revises § 983.2(c) to outline the specific part 982 provisions that do not apply to PBV assistance and revises paragraphs (c)(1) and (2) to specify that the HAP contract retention provisions at § 983.158(e)(2) do not apply to PBV assistance. HUD also clarifies in paragraph (c)(5) which provisions of part 982, subpart I do not apply to PBV assistance and in paragraph (c)(7)(i) which provisions of § 982.503 do not apply.

§ 982.641 Homeownership Option: Applicability of Other Requirements

The final rule amends paragraph (d) to clarify that § 982.406 (Use of alternative inspections), along with § 982.405 (PHA unit inspection) as the CFR previously provided, does not apply to the homeownership option. Because no HAP or downpayment assistance may be paid until the PHA inspects a family's homeownership unit and determines it passes HQS (see 24 CFR 982.631(a)), §§ 982.405 and 982.406 describing inspection requirements particular to rental assistance are incompatible with the homeownership option. HUD notes that this is not a substantive change.

§ 983.3 PBV Definitions

In response to public comment about the utility of establishing SAFMRs in some non-metropolitan counties, this final rule revises the definition of ''area where vouchers are difficult to use'' to include areas where 90 percent of the SAFMR exceeds 110 percent of FMR not just for metropolitan areas, but also for non-metropolitan counties. HUD determines that, when used in a non-metropolitan context, the difference between the SAFMR and FMR remains an easily identifiable and consistent data point for determining if an area is one in which vouchers are difficult to use.

This final rule also revises the definition of an ''area where vouchers are difficult to use'' to include a census tract with a poverty rate of 20 percent or less. This is not a substantive change, but rather a reorganization of the rule text for streamlining. In the proposed rule, § 983.54(b), regarding the project cap (income-mixing requirement), contained two separate categories of projects that were subject to a higher project cap: these categories were projects ''located in a census tract with a poverty rate of 20 percent or less'' and projects ''located in an area where vouchers are difficult to use.'' Similarly, § 983.6(d), regarding the program cap (percentage limitation), included both units ''located in a census tract with a poverty rate of 20 percent or less'' and units ''located in an area where vouchers are difficult to use'' as two separate categories of units eligible for an increased cap. For both the program cap and project cap, there was no difference between the requirements applicable to the two categories of projects and units. To simplify §§ 983.54(b) and 983.6(d), HUD examined whether the 1937 Act permitted the PBV regulatory definitions to consider a project or unit ''located in a census tract with a poverty rate of 20 percent or less'' to be a type of project or unit ''located in an area where vouchers are difficult to use.'' In the case of the program cap, section 8(o)(13)(B)(ii) of the 1937 Act provides for a specific 10 percent authority category for areas where vouchers are difficult to use ''as specified in subparagraph (D)(ii)(II),'' which is the subparagraph applying an exception to the project cap for areas where vouchers are difficult to use and for census tracts with a poverty rate of 20 percent or less. As a result, HUD determines that the authority for an exception to the program cap for census tracts with a poverty rate of 20 percent or less derives from the program cap exception for areas where vouchers are difficult to use, and therefore it would be more appropriate to include census tracts with a poverty rate of 20 percent or less within the definition of ''areas where vouchers are difficult to use.'' While the project cap exceptions for census tracts with a poverty rate of 20 percent or less and areas where vouchers are difficult to use are both mandated by section 8(o)(13)(D)(ii)(II) of the 1937 Act, given that the exception is identical for each category HUD determines the streamlining benefit makes placing census tracts with a poverty rate of 20 percent or less in the definition of ''areas where vouchers are difficult to use'' appropriate for purposes of codification of the project cap categories in the CFR.

Also, in response to public comment, HUD in this final rule changes the term ''comparable rental assistance'' to

[6] See The Economic Growth, Regulatory Relief, and Consumer Protection Act (''the Economic Growth Act'') (Pub. L. 115–174).

''comparable tenant-based rental assistance,'' amends the definition consistent with section 8(o)(13)(E) of the 1937 Act, and outlines the minimum requirements for assistance to qualify as comparable tenant-based rental assistance. HUD also finds that the proposed definition of ''development activity,'' in referring to both rehabilitation and new construction done for the project to receive PBV assistance and for other work occurring later during the term of the PBV HAP contract, produced significant confusion. As a result, HUD removes work occurring later during the term of the HAP contract from the proposed definition of ''development activity'' in this final rule and instead covers this work under a definition of ''substantial improvement.'' HUD revises the content of the term ''substantial improvement'' for additional clarity. This final rule also revises the definition of ''excepted units'' to clarify that excepted units exclusively serve certain families in accordance with § 983.54(c)(2) and to distinguish its definition from ''excluded units,'' which is a newly added definition that excludes units that meet certain requirements from the program and project cap.

As suggested by commenters, HUD revises the definition of ''existing housing'' to mean housing that meets or substantially complies with HQS, which housing is distinct from housing that will soon undergo development activity. ''Substantial compliance'' in this definition provides specific limitations to ensure the deficiencies in the project require minor work that can reasonably be completed within a 30-day period of time. These revisions reflect the need to better distinguish rehabilitated housing from existing housing so PHAs can comply with the distinct program requirements applicable to each housing type while also recognizing that HQS corrections may take a longer time than the period noted in the proposed rule. HUD changes the relevant time period in which existing housing is not expected to undergo or need substantial improvement from five years to two years after the HAP contract effective date in response to public comment. HUD also revises the definitions of ''newly constructed housing'' and ''rehabilitated housing'' by establishing a standard determined on a project-basis, rather than the prior unit-basis which was in the proposed rule, consistent with prior HUD guidance that a project can only be one type overall, and therefore specifying between the two types on a per-unit basis was impractical. HUD further amends the definition of ''rehabilitated housing'' to more directly note the difference between such projects and ''existing housing.'' HUD also clarifies the definition of ''independent entity'' to specify how it relates to the PBV program and revises the definition of ''waiting list admission'' to include owner-maintained waiting lists.

This final rule added to the definition of ''project'' to more clearly describe the discretion PHAs already have to modify the definition of project in their Administrative Plans. This final rule adds a definition of ''tenant rent'' as applicable to the PBV program. This final rule also adds the definitions for building, gross rent, manufactured home, PHA Plan, program receipts, total tenant payment, utility allowance, and utility reimbursement to clarify that these terms apply to the PBV program.

This final rule removes the term ''eligible'' from the definition of ''in-place family,'' and instead discusses the eligibility of an in-place family in § 983.251. HUD also changes ''proposal selection date'' to ''proposal or project selection date'' to align with changes made to § 983.51 (described below).

This final rule makes a conforming change to align the PBV program definition of ''housing quality standards'' with the revised HCV program definition discussed previously in the description of the changes to § 982.4.

In addition, this final rule removes the definition of ''project-based certificate (PBC) program'' because it is no longer in existence. Finally, this final rule removes the definition of ''request for release of funds and certification'' and moves the relevant information that was contained in the proposed rule to a more appropriate location, § 983.56.

§ 983.4 Cross-Reference to Other Federal Requirements

HUD proposed to revise HUD's labor standards cross-reference regarding applicability of regulations implementing the Davis-Bacon Act, but HUD at this final rule removes this change. As explained in the summary of changes to § 983.153, HUD requires Davis-Bacon compliance regardless of whether an Agreement (referring to an Agreement to enter into a HAP contract) is used in this final rule so the change to this section is no longer necessary. HUD notes that under section 12(a) of the 1937 Act, the labor standards provisions cross-referenced in § 983.4 only apply where there is an agreement for section 8 use before construction or rehabilitation is commenced. As discussed in reference to the changes to § 983.153, the PHA's pre-construction offer and owner's acceptance of PBV assistance to be provided once the units are constructed or rehabilitated constitutes an agreement triggering Davis-Bacon requirements on projects with 9 or more assisted units, in accordance with section 12(a) of the 1937 Act, regardless of whether an Agreement is used.

Finally, as a technical matter, HUD has revised § 983.4 to remove the reference to the definitions in 24 CFR part 5, subpart D. Because HUD has revised § 982.4(a)(2) to properly incorporate the relevant definitions in 24 CFR part 5, subpart D, and because § 983.4 incorporates 982.4, this incorporation is not necessary.

§ 983.5 Description of the PBV Program

HUD makes a minor revision to the proposed § 983.5(a)(1) to include the citation to the consolidated annual contributions contract (ACC). This final rule also revises paragraph (a)(3) to better describe the options available for development of newly constructed and rehabilitated housing, including adding reference to the option added in this final rule to § 983.157 (which is described in greater detail below). HUD revises paragraph (c) to require PHAs to provide notice to HUD when the PHA executes, amends,[7] or extends a HAP contract, to align with system development already in progress,[8] and makes changes to align with the language in § 983.10, to require the PHA to address all PBV related matters over which the PHA has policymaking discretion.

§ 983.6 Maximum Amount of PBV Assistance (Percentage Limitation)

This final rule revises paragraphs (a) and (e) to explain how to calculate the maximum number of PBV units to prevent the possibility of the PHA miscalculating the cap and project-basing more units than it should. This change reflects that the cap is 20 percent *as adjusted,* and not a flat 20 percent of all Annual Contributions Contract (ACC) units because the PHA must remove excluded units when calculating the cap. This final rule also corrects the date in paragraph (a)(2), and in paragraph (a)(3) expands the conditions under which the PHA may not add units to PBV HAP contracts to include

[7] Amendments in this context refers to changes such as those that add or substitute contract units, rather than substantive revisions to contractual text. The general requirement per 24 CFR 982.162 to use HUD-prescribed forms, including PBV HAP contracts, without modification remains in place.

[8] *See* 84 FR 70986 (Dec. 26, 2019); 85 FR 60249 (Sep. 24, 2020); 88 FR 28594 (May 4, 2023).

paragraph (e). In paragraph (b), HUD clarifies that the PBV assistance percentage limitation applies to all PBV units which the PHA has selected, and that selection takes place from the time of the proposal or project selection date.

This final rule also revises language in paragraph (d)(1)(iii) to require that the Administrative Plan describe the availability of supportive services in alignment with the language in § 983.10. HUD amends paragraph (d)(1)(iv) to remove the separate exception category for census tracts with a poverty rate of 20 percent or less, given the revised definition of an ''area where vouchers are difficult to use'' now includes a census tract with a poverty rate of 20 percent or less, as explained further in the discussion of § 983.3 above, and moves the proposed paragraph (d)(1)(v) to (d)(1)(iv). HUD adds a new exception in response to public comment to paragraph (d)(1)(v) for units that replace, on a different site, the units removed from the housing types listed in § 983.59(b)(1)–(2) (see discussion of comments received regarding § 983.59). HUD revises paragraph (d)(2) to increase the program cap and project cap for PBV units to include the Fostering Stable Housing Opportunity (FSHO) authority enacted in section 103 of division Q of the Consolidated Appropriations Act, 2021 (Pub. L. 116–260, 134 Stat. 1182).[9] Pursuant to section 103(c)(1) of FSHO, the percentage limitation (*i.e.,* the program cap) now includes units that are exclusively made available to eligible youth receiving FUP/FYI assistance under the 10 percent increased cap. This final rule adds a new paragraph (d)(3) to clarify requirements to fill units under certain 10 percent increased cap categories with the appropriate families.

This final rule also revises paragraph (e) by explaining that units previously subject to federally required rent restrictions or that received long-term rental assistance from HUD are removed for purposes of calculating the percentages under paragraphs (a) and (d) of this section.

This final rule also revises paragraph (1)(ii) by adding ''space service'' to the definition of ''veteran'' to accurately include types of service encompassed within the current statutory definition of ''veteran'' found in the Department of Veterans Affairs governing statutes (*i.e.,* 38 U.S.C. 101(2)). By adding ''space service,'' it will ensure that no type of service for a veteran or veteran family goes unaccounted for.

[9] *See* 87 FR 3570 (Jan. 24, 2022).

§ 983.10 PBV Provisions in the Administrative Plan

HUD revises the structure of § 983.10 to outline the areas in which PHAs have policymaking discretion specific to the PBV program and requires these policies be included in the PHA Administrative plan. The PHAs' policymaking discretion is noted throughout part 983 consistent with this section. Section 983.10 includes a brief description of the provisions that must be in the Administrative Plan for a PHA that operates a PBV program and a citation in each provision to the regulation that provides complete details about the requirement. However, HUD notes that the policies listed in § 983.10 are the minimum that the PHA must include in its Administrative Plan. There are additional areas, beyond those listed in § 983.10, where a PHA may properly exercise policy-making discretion consistent with language in other sections in this part. In cases where a PHA exercises this discretion, these additional policies must be included in the PHA's Administrative Plan.

§ 983.11 Project-Based Certificate (PBC) Program

In the proposed rule, HUD proposed to move § 983.10, dealing with Project-Based Certificates (PBC), to § 983.11. However, the PBC program was replaced by the PBV program in 2001 and no units remain in the PBC program.[10] Therefore, in this final rule, references to the PBC program have instead been removed. The currently codified § 983.10, dealing with PBC, is instead being removed entirely. Because the previous § 983.10 is not being moved to § 983.11, the proposed § 983.12 is, in this final rule, moved up to § 983.11. Section 983.12 of this final rule is new to this final rule and discussed further below.

§ 983.11 Prohibition of Excess Public Assistance

In response to public comments, HUD revises paragraph (d)(2) dealing with subsidy layering review. Instead of requiring Subsidy Layering Review (SLR) any time new funding of any amount or percentage is added to the project during the term of the HAP contract, HUD will specify when a new SLR is required via a **Federal Register** notice, consistent with current practice. HUD concluded that finalizing paragraph (d)(2) as proposed would be administratively burdensome.

[10] Units under a PBC Agreement executed by the PHA and Owner prior to January 16, 2001, remained in the PBC program. The maximum term for PBCs under standard-form PBC HAP contracts was an aggregate 15 years (generally, three 5-year terms). Therefore, no more valid PBC HAP contracts should exist. Upon expiration of a PBC HAP contract, a PHA and Owner could agree to renew the PBC contract as a PBV contract, consistent with section 6904 of the Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007, Public Law 110–28, and the now repealed 24 CFR 983.310(b)(1)(ii).

§ 983.12 Project Record Retention

This final rule adds a new § 983.12 to cover program accounts and records for the PBV program (§ 982.158 continues to apply to records applicable to both the tenant-based and project-based programs, except as now specified in § 983.2). While these documents should already be maintained for compliance with HUD's regulations, this section provides a specific list of documents, location, and time period for retention of the PBV HAP contract and any PBV-specific documents (*e.g.,* Agreement to enter into HAP contract (Agreement), completion documents, SLR, environmental review, selection materials), including records demonstrating the independent entity's review of a PHA-owned project selection. This section includes retention provisions for records newly required under new PBV program components of this final rule.

§ 983.51 Proposal and Project Selection Procedures

This final rule amends § 983.51 throughout to clarify the distinction between competitive selection of proposals versus noncompetitive selection of projects since selection without competition does not entail solicitation or selection of competing proposals. As recommended by commenters, this final rule revises paragraph (a) by allowing entities that have site control to submit PBV proposals. HUD intends to provide further guidance on what HUD considers to be ''site control'' through PIH notice.

Paragraph (a) also specifies that an owner may submit PBV proposals to cover multiple projects where each consists of a single-family building. Consistent with § 983.10, HUD clarifies the requirement that the PHA Administrative Plan must describe the procedures for submission and selection of PBV proposals under the methods of competitive selection in paragraph (b) and selection of projects under an exception to competitive selection under paragraph (c), including under what circumstances the PHA will use the selection methods described in paragraphs (b) and (c).

HUD amends paragraph (b)(1) to address the methods the PHA must use for competitive selection of PBV

proposals. This change clarifies that the PHA request for proposal (RFP) selection method can be a part of another competition or run simultaneously with another competition. This change also addresses public concerns about the inability or difficulty of awarding PBVs to projects that also compete and receive other funds, specifically development dollars through Low-Income Housing Tax Credits (LIHTC), Housing Trust Fund (HTF), and HOME investment partnerships program. HUD also makes clarifying changes to paragraph (b)(2) to remove the language concerning LIHTC and HOME to avoid confusion because, in practice, LIHTC and HOME almost always require the PBVs to be awarded prior to receiving applications.

HUD clarifies in paragraph (c) that prior to a PHA selecting one or more projects for PBV assistance without competition, the PHA must notify the public of its intent to do so in its 5-Year Plan. HUD also reorganizes paragraph (c)(1) in the proposed rule by moving applicable requirements to new paragraphs (c)(1)(i)–(ii). Further, in response to public comments, HUD adds clarifying language to paragraphs (c)(1) and (c)(2) to better align with the statutory language in section 8(o)(13)(N) of the 1937 Act as amended by HOTMA, including a clarification under (c)(1)(i) and a new paragraph at (c)(2)(iv) regarding the number of units permitted to be replaced.

This final rule also adds a new paragraph (c)(3), which provides increased flexibility for PHAs to noncompetitively select a project comprised of PHA-owned units. HOTMA expressly allows PHAs to attach PBVs to projects in which the PHA has an ownership interest without following a competitive process in cases where the PHA is engaged in an initiative to improve, develop, or replace a public housing property or site. HUD implemented this provision in 2017. Based on HUD's experience with these noncompetitive selections and after careful consideration, HUD believes that it is advisable to extend the exception to PHA-owned units in general. The main benefit of this final rule change is to strengthen the PHA's ability to preserve and expand affordable housing by increasing the viable options and paths available to the PHA through strategies such as acquisition followed by rehabilitation. HUD further adds paragraph (c)(4) to streamline the process of project-basing units when a family chooses to relinquish their enhanced voucher for PBV assistance. The new paragraph extends the types of housing that can be selected without going through a competition. HUD also notes that PIH Notice 2013–27 provides essential background on the voluntary relinquishment of enhanced voucher assistance (and regular housing choice voucher assistance) in exchange for PBV assistance.

HUD clarifies paragraph (e)(2)(i) to state that all contract units must fully or substantially comply with HQS on the proposal or project selection date. HUD also restructures and amends paragraph (f) of the proposed rule to add new paragraphs (1) through (5) to address the separate notice requirements depending upon whether a proposal is selected competitively, or a project is selected without competition and to provide a cross-reference to applicable language that must be in the notice for certain projects. Finally, HUD clarifies in paragraph (h) that under no circumstances may a HAP contract be effective for any of the subsidized housing types set forth in § 983.53(a).

§ 983.52 Prohibition of Assistance for Ineligible Units

HUD clarifies the meaning of paragraphs (a), (a)(3), (b), and (d) by replacing the term ''attach'' with clearer statements of the prohibited actions for the listed units, to align with the changes to § 983.53 described below. This final rule creates an exception to the total prohibition in the original PBV rule on project-basing for manufactured homes under paragraph (a)(5) where both the manufactured home is permanently attached to the ground and the owner owns both the manufactured home and the land. Allowing PBVs for manufactured homes will likely decrease the cost to build, allow PBVs to be in areas where traditional building would be difficult, and avoid requiring changes to construction plans solely for the purpose of compliance.

Paragraph (c) provides that a PHA may attach assistance to an occupied unit only if the occupant is eligible. HUD amends paragraph (c) to specify what ''eligible'' means in this context, and to clarify when eligibility is determined. Eligibility of the family is determined in accordance with § 982.201 prior to attaching assistance to the unit (*i.e.,* executing a HAP contract or amending a HAP contract by adding or substituting a unit). For the unit to be eligible, the unit must be appropriate for the size of the family and the tenant's total tenant payment (TTP) must be lower than the gross rent. These changes in paragraph (c) ensure PHAs are aware of existing requirements, including that the family's TTP cannot be so high as to eliminate the need for assistance (commonly calling being ''zero-HAP'') at admission.

HUD updates the exceptions applicable to paragraph (d), adding that the requirements are not applicable if the PHA is undertaking rehabilitation after HAP contract execution per § 983.157 of this final rule. Also, because an Agreement may be executed prior to its effective date, HUD revises paragraph (d) to be clear that the construction or rehabilitation is prohibited prior to the Agreement's effective date rather than the execution date. HUD also modifies paragraph (d) to allow PHAs to approve exceptions, in recognition that there may be circumstances in which the prohibition is inappropriate.

§ 983.53 Prohibition of Assistance for Units in Subsidized Housing

For better readability, in this final rule, HUD restructures the list of subsidized housing that is prevented from receiving PBV assistance. In paragraph (a), HUD replaces the introductory text with ''A HAP contract may not be effective and no PBV assistance may be provided for any of the following:'' for several reasons. First, HUD determines that PBV program requirements should not prevent execution of an Agreement for the listed subsidized housing types, as this reduces administrative flexibility even though no HAP is paid when an Agreement is executed. HUD notes that this is a change from the prior regulatory requirement and use of this flexibility will be subject to any requirements of the relevant non-PBV subsidy program. Second, because a HAP contract must be executed prior to the effective date of the contract (when HAPs may begin), there was no need to separately specify that the HAPs cannot be made for the subsidized housing types. Finally, HUD believes the wording changes improve readability. This final rule also removes proposed rule paragraphs (e) and (j) concerning rental assistance payments (RAP) and rent supplement projects (Rent Supp) because the Rent Supp and RAP programs have ended. However, unlike the Rent Supp program, there were some RAP projects remaining less than five years prior to the effective date of this final rule. Consequently, units in a few former RAP projects may still qualify for a limited period of time as excepted units from the program cap and project cap under the requirements at § 983.59. Please see the related discussion in the description of § 983.59 below regarding the reference to units in former RAP projects in that section.

§ 983.54 Cap on Number of PBV Units in Each Project (Income-Mixing Requirement)

In this final rule, HUD clarifies in § 983.54(a) that a PHA cannot select a proposal where the project cap is not being met, in addition to the prohibition on entering the Agreement or HAP contract. HUD amends paragraph (b) to remove the separate exception categories, given the revision of the definition of an ''area where vouchers are difficult to use'' to include a census tract with a poverty rate of 20 percent or less, as explained previously in the discussion of § 983.3 above. HUD further clarifies in paragraph (c) that exception categories in a project may be combined; expands the exception categories to include eligible youth using Family Unification Program (FUP) assistance in paragraph (c)(2)(ii); and provides that supportive services must be made available in a reasonable period of time not to exceed 120 calendar days in paragraph (c)(2)(iii). Additionally, in paragraph (c)(2)(iii), which was paragraph (c)(2)(ii) in the proposed rule, this final rule does not include a requirement that a PHA offering FSS must not solely rely on FSS to meet the exception to the project cap. HUD revises paragraph (c)(3) to specify that units covered by a PBV HAP contract under § 983.59 will not count towards the project cap and that these units are removed to ensure accuracy when calculating the percentages of dwelling units. In paragraph (d), HUD updates and expands provisions applicable to HAP contracts already in effect to include HAP contracts in effect prior to December 27, 2020, when the FUP exception became available.

§ 983.55 Site Selection Standards

HUD revises paragraph (b)(3) to include the site selection standards that were formerly found in § 982.401(l) and were removed in the NSPIRE final rule (88 FR 30442 (May 11, 2023)). HUD also takes this opportunity to amend the standards to add a specific reference to contamination, which is particularly important to the health of occupants, and to add a qualification that the serious adverse environmental conditions at issue are those that could affect the health or safety of the project occupants. As recommended by commenters, use of these standards provides an important protection for families, especially in cases in which an environmental review is not performed. HUD also revises paragraph (e)(7) to remove a typo concerning ''new construction,'' which appears in the current regulations and the proposed rule.

§ 983.56 Environmental Review

In the proposed rule, HUD proposed to revise the environmental review requirements for existing housing in accordance with section 106(a)(8) of HOTMA to exempt existing housing from further environmental review if an existing housing project has ever undergone an earlier environmental review pursuant to receiving any form of Federal assistance. In other words, if a project that meets the definition of ''existing housing'' as defined in the PBV regulations for program purposes has not previously undergone a Federal environmental review because it did not receive Federal assistance, then the project would not be exempt from an environmental review.

In endeavoring to give full effect to the words of section 8(o)(13)(M)(ii) of the 1937 Act, HUD recognizes the statute provides only a partial exemption to environmental reviews. Specifically, the applicability of the provision is limited to ''existing projects.'' Environmental reviews continue to be applicable to PBV rehabilitation and new construction projects. The limited scope of the proposed exemption from environmental reviews reflects Congress's continuing emphasis on the importance of Federal assistance being used in an environmentally sound manner.

Upon consideration of comments, HUD revises paragraph (a)(2) to better balance the words of the amended section 8(o)(13)(M)(ii) of the 1937 Act with Congress's continued environmental emphasis by excusing existing housing from undertaking an environmental review before entering into a HAP contract, except where a Federal environmental review is required by law or regulation relating to funding other than PBV housing assistance payments. This paragraph (a)(2) applies to projects selected using the site selection standards applicable upon the effective date of this final rule. In paragraph (a)(2), HUD changes the characterization of the exception for existing housing so as not to imply that the project has been determined to be ''exempt'' pursuant to an environmental review.

HUD makes minor technical revisions throughout the section, such as to consistently use the phrasing of paragraph (a) of the proposed rule that environmental reviews apply to ''activities'' (see responses to comment on § 983.56 for further discussion of technical changes). HUD amends the description of the ''responsible entity'' in paragraph (b) to explain more clearly which unit of general local government serves as the responsible entity. HUD also removes the final sentence of paragraph (b) of the proposed rule, as it was duplicative of text that appeared later in the regulation. HUD also removes the proposed rule's reference in paragraph (d) to amending a HAP contract, to conform to changes described below relating to § 983.207. Further, HUD clarifies in (d)(2) that HUD will approve the Request for Release of Funds and Certification by issuing a Letter to Proceed or form HUD–7015.16 when a responsible entity must complete an environmental review. In paragraph (e), HUD clarifies that the reference to the prohibited activities refers only to the listed actions by the PHA, the owner, or its contractors, rather than the actions by described in paragraphs (d)(1)–(3) that are taken by the responsible entity or HUD. Lastly, HUD revises paragraph (f) to require PHAs to document mitigating measures in accordance with part 50 or 58 of title 24, as applicable, and to complete or require the owner to carry out such measures and conditions.

§ 983.57 PHA-Owned Units

This final rule makes an edit to paragraph (b) to remove superfluous words. HUD also revises paragraph (b)(1) to clarify that the independent entity calculates the amount of reasonable rent and any rent adjustments by an OCAF, due to confusion the wording in the proposed rule raised given that HUD determines the OCAF. In response to comments received, HUD removes paragraph (b)(2) from the proposed rule, which results in a renumbering of paragraphs (b)(3) and (b)(4) to paragraphs (b)(2) and (b)(3) in this final rule. HUD also revises redesignated paragraph (b)(3) to clarify that the independent entity is responsible for not only reviewing the work completion certification, but also determining if the units are compliant with § 983.156. This final rule also makes this change to align redesignated paragraph (b)(3) with corresponding § 983.212 (which was § 983.157 in the proposed rule), per changes to § 983.212 described below. This final rule adds paragraph (b)(4) to expand the independent entity functions to include determining whether to approve substantial improvement to units under a HAP contract, since PHAs are required to perform this function for substantial improvement on units under a HAP contract for non-PHA-owned units.

Finally, HUD reorganizes and slightly modifies the language at paragraph (c) to

achieve consistency with a similar provision at 982.352(b)(1)(v)(B) regarding compensation of independent entities.

§ 983.58 PHA Determination Prior to Selection

In this final rule, HUD revises proposed § 983.58 for clarity purposes, to avoid any misinterpretation that budget authority is intertwined with the program cap. HUD also adds a new paragraph (b) to require that PHAs analyze the impact of having a high percentage of vouchers committed as PBVs. The PHA should consider the needs of the community, including families on the waiting list and eligible PBV families that wish to move under § 983.261. The analysis performed by the PHA must be available as part of the public record.

§ 983.59 Units Excepted From Program Cap and Project Cap

HUD clarifies in paragraph (b) that excluded units must fall into one of the outlined categories provided that the units are removed from all categories by the time of execution of the Agreement or HAP contract. This clarification aligns with the statutory language stating, ''units previously subject to federally required rent restrictions or receiving another type of long-term subsidy'' and means that the units must no longer be subject to the rent restriction or receiving subsidy.

This final rule removes paragraph (b)(1)(v), because the Rent Supplement Program ended more than five years ago and no longer exists. HUD notes that the Rental Assistance Program (RAP) (section 236(f)(2) of National Housing Act of 1965) also expired, but, unlike the Rent Supplement Program, the RAP expired at the end of 2019, less than 5 years ago. Because paragraph (b) of § 983.59 allows project-basing of units that were removed from the listed programs up to 5 years prior to the request for proposals (RFP) or the proposal or project selection date, RAP units may still be eligible for project-basing under paragraph (b).

HUD has amended § 983.59(b)(2) and included two additional types of units in the list of units ''previously subject to federally required rent restrictions'' that were not included in the list of excepted units implemented under the HOTMA Implementation Notices[11] in the **Federal Register**: (1) units financed with Low-Income Housing Tax Credits (26 U.S.C. 42) and (2) units subsidized with Section 515 Rural Rental Housing Loans (42 U.S.C. 1485). The final rule also amends § 983.59(b)(2) to provide that the list of excepted units ''previously subject to federally required rent restrictions'' shall also include any other program subsequently identified by HUD through a **Federal Register** notice that is subject to public comment.

Further, to provide regulatory streamlining, this final rule removes proposed rule paragraph (c) which provided that other excluded units include both HUD's Rental Assistance Demonstration (RAD) program and HUD VASH set-aside vouchers from the PBV program and project caps (these programs continue to be governed by the applicable notices and waivers therein). Instead, HUD redesignates proposed rule paragraph (d) as paragraph (c), which discusses replacement units. In redesignated paragraph (c), HUD clarifies that replacement units can be built on the original project site, instead of the ''public housing development.'' This clarification removes the limitation of ''public housing development'' and expands the qualification of an original project site to include all of the formerly assisted or restricted projects covered by this section. In new paragraph (e), this final rule clarifies that the 10 percent exception under § 983.6 and the project cap exception under § 983.54(c)(2) are inapplicable to units excluded under this section.

§ 983.101 Housing Quality Standards

This final rule makes a conforming change to align paragraph (a) with the revised PBV program definition of HQS at § 983.3.

§ 983.103 Inspecting Units

HUD revises § 983.103(a) to clarify that the regulatory inspection provisions of paragraph (c) of this section apply only when the pre-selection inspection determines the project meets the definition of existing housing.

HUD amends paragraph (b) to specify the times at which an initial inspection is required for newly constructed or rehabilitated housing or for units that underwent substantial improvement prior to being added to the HAP contract. The times at which an initial inspection is required, and the specific units which are to be inspected, depend on whether the work was development activity or substantial improvement, and, in the case of rehabilitation, whether the development activity occurs before or after HAP contract execution. HUD believes separating the requirements in this final rule will improve readability. HUD also revises paragraph (c)(1) to better explain the Administrative Plan provisions that are applicable.

Paragraph (c)(2)(ii) of the proposed rule provided that the PHA must give a notice to families offered a unit with non-life-threatening deficiencies that explains, among other things, that the owner's failure to correct the deficiencies within the cure period will result in removal of the unit from the HAP contract. This final rule revises paragraph (c)(2)(ii) to also require the PHA to provide a similar notice to families offered units without deficiencies, if some units in the project have non-life-threatening deficiencies and the PHA's Administrative Plan provides that the PHA will terminate the entire PBV HAP contract if the owner fails to correct the deficiencies within the cure period.

In paragraph (c)(2)(iv), HUD revises the regulatory language to be clear that PHAs must release the withheld payment to the owner once the deficiencies are corrected within the cure period, as required by section 8(o)(8)(G)(ii) the 1937 Act. This statutory requirement provides that the PHA must resume assistance payments and must cover the withheld period if the owner made the repairs before the cure period ends. This change to align the regulations with the statute is also reflected in paragraphs (c)(3)(vii), (c)(4)(iv), and (c)(4)(v).

This final rule also modifies paragraph (c)(2)(v) (which was mistakenly labeled as paragraph (c)(2)(iv) in the proposed rule) by requiring PHAs to provide any affected family tenant-based assistance when the PHA terminates the PBV HAP contract or removes the unit from the HAP contract due to the owner's failure to correct deficiencies. The provision of tenant-based assistance in this circumstance is required by section 8(o)(13)(F)(iv) of the 1937 Act and was inadvertently omitted from the proposed rule's description of the process. This final rule makes the same modification to paragraphs (c)(3)(viii) and (c)(4)(vi).

HUD revises paragraphs (c)(3) and (c)(4) to align with changes in § 982.406 that apply to PBV. This final rule subjects the PHA's adoption of an alternative inspection option to the procedures and requirements outlined in § 982.406(b), (c), (d), and (g). The changes in paragraph (c)(3)(v) provide clarifying changes to existing established policy. To ensure that the PHA is transparent to families that are referred to and provided a unit with non-life-threatening deficiencies, this final rule revises paragraph (c)(4)(i) to require that PHAs provide these families

[11] *See* 81 FR 73030 (Oct. 24, 2016); 82 FR 5458 (Jan. 18, 2017); 82 FR 32461 (Jul. 14, 2017).

a list of those deficiencies and inform them of the option to decline the unit without losing their place on the PBV waiting list.

In paragraph (c)(4)(v), HUD clarifies that PHAs make retroactive payments upon correction of deficiencies beginning at the later of the effective date of the HAP contract or the PBV lease effective dates. This final rule revises paragraph (c)(4)(v) and (c)(4)(vi) explaining the PHA's requirements when the owner fails to make repairs within the applicable time periods. For the safety of the family, this final rule adds a requirement to paragraph (c)(4)(v) that explicitly prohibits PHAs from referring families from the PBV waiting list to occupy units with life-threatening deficiencies. In alignment with § 983.10, paragraph (c)(4)(vi)(B) clarifies that the PHA's Administrative Plan must specify whether the PHA will remove only a unit with deficiencies from the HAP contract for the owner's failure to correct the deficiencies, as opposed to terminating the entire HAP contract (only the latter, terminating the contract, had been included in paragraph (c)(4)(vi)(B) of the proposed rule).

This final rule also amends paragraph (e) concerning periodic inspections, to provide that the alternative inspection option is available for periodic inspections and to specify which provisions of § 982.406 apply. HUD makes changes to paragraph (e) to specify how to comply with the sampling requirement in the event that fewer than 20 percent of contract units are available for occupancy in accordance with development activity occurring under § 983.157. HUD also makes changes to align with the NSPIRE final rule (88 FR 30442 (May 11, 2023)) in paragraph (e), which incorporates the requirement that small rural PHAs inspect random sample units at least once every three years. This final rule makes changes to paragraph (f), which specifies the PHAs' timing and inspection requirements for life-threatening deficiencies, non-life-threatening deficiencies, and extraordinary circumstances, to align with § 982.405, which covers PHA inspections. The changes in paragraph (i) are a change in terminology to avoid conflict with the term ''mixed finance'' as used in public housing projects.

§ 983.152 Nature of Development Activity

This final rule revises § 983.152(a)(2) to remove discussion of substantial improvement to add previously unassisted units and instead provide reference to the development activity applicable to a rehabilitated project undergoing work after HAP contract execution per § 983.157 of this final rule. As discussed in the description of changes to § 983.3 above, HUD determines that ''development activity'' should be clearly distinguished from ''substantial improvement.'' As a result, HUD removes the corresponding reference to activities now classified as ''substantial improvement'' in (a)(2) and deletes paragraph (b)(2), moving pertinent requirements applicable to substantial improvement to add or substitute units to § 983.207(d) of this final rule. The new language of paragraph (a)(2) is added to clearly describe the nature of the development activity under § 983.157, which is completed following HAP contract execution instead of beforehand. HUD also updates paragraph (b) to appropriately reference the new requirements applicable to § 983.157.

§ 983.153 Development Requirements

This final rule makes several minor revisions to citations in § 983.153 for consistency with the changes to § 983.152 described above. Also, this final rule makes a minor clarifying revision to the first sentence in paragraph (b)(2), by requiring subsidy layering review before a PHA attaches assistance to a project, instead of subsidy layering review occurring before a PHA commits to provide assistance to a project. This clarifying change is to prevent any possible ambiguity about whether the subsidy layering review is required before the proposal or project selection date; in other words, HUD makes clear that the rule only requires that the subsidy layering review occur no later than execution of an Agreement or HAP contract.

This final rule requires in § 983.153(b)(4) that the owner disclose changes to the information provided for the subsidy layering review, to ensure that the change(s) may be reviewed and that it does not result in excessive public assistance to the project.

This final rule revises paragraph (c) of the proposed rule to require Davis-Bacon compliance regardless of whether an Agreement is used. The PBV program is subject to statutory labor standards provisions in section 12(a) of the 1937 Act. Section 12(a) of the 1937 Act requires the applicability of Davis-Bacon prevailing wages to the development of low-income housing projects containing nine or more section 8-assisted units, where there is an agreement for section 8 use before construction or rehabilitation is commenced. In reconsidering both HUD's current position and the alternative suggested in the proposed rule with respect to the meaning of ''agreement'' in section 12(a), HUD has determined that an ''agreement'' under section 12(a) encompasses more than the PBV Agreement (*i.e.,* Form HUD–52531) and includes the agreement that consists of the PHA's project selection and resulting offer of assistance to the owner, and the acceptance of PBV assistance by the owner. HUD also recognizes the importance of Davis-Bacon prevailing wage requirements to the workers in the community where the owner has sought a commitment of PBVs in advance of development, as commenters suggested. Consequently, HUD will require the notice of proposal selection to require payment of Davis-Bacon prevailing wages for development of newly constructed or rehabilitated projects containing nine or more section 8-assisted units regardless of whether the PHA and owner will be using an Agreement. This final rule also makes a slight modification to paragraph (c)(1) to correct the citation in paragraph (c)(1). HUD also consolidates paragraphs (c)(2) and (c)(3) of the proposed rule into a single paragraph (c)(2), to better reflect that the labor requirements at issue apply in the case of development involving nine or more contract units. This final rule adds a citation to § 983.51(f) in paragraph (c)(3) (which had been paragraph (c)(4) in the proposed rule) and makes paragraph (c)(3) consistent with § 983.51(f), which discusses a PHA's written notice of proposal selection.

This final rule revises the development requirements that apply to PBV development activity by removing the reference that section 3 of the HUD Act of 1968 [12] applies (proposed rule paragraph (d)), since section 3 no longer applies to PBV per the final rule on Enhancing and Streamlining the Implementation of Section 3 Requirements for Creating Economic Opportunities for Low- and Very Low-Income Persons and Eligible Businesses (85 FR 61524 (Sep. 29, 2020)). As a result of this removal, this final rule also redesignates proposed rule paragraphs (e) through (g) as final rule paragraphs (d) through (g). Additional citation corrections occur in redesignated paragraphs (d), (e), and (f). Further, consistent with § 983.51(k), this final rule expands paragraph (g) to include in the list of participants ineligible to participate in Federal programs and activities those who are debarred, suspended subject to a limited denial of participation, or otherwise excluded

[12] 12 U.S.C. 1701u.

under 2 CFR part 2424. Finally, HUD adds a cross-reference § 982.161 to paragraph (g)(2) of this final rule, to clarify the existing requirement of the conflict of interest provision.

§ 983.154 Development Agreement

This final rule amends paragraph (a) to clarify project-basing of single-family scattered sites. As commenters suggested, paragraph (a) allows one Agreement to cover multiple projects that each consist of a single-family building. Finally, this final rule makes minor amendments to paragraph (a) to remove reference to § 983.152, consistent with changes to that section as described above, and to add reference to the new paragraph (g).

This final rule specifies in paragraph (b) that paragraph (f), concerning PHA discretion to execute an Agreement after construction or rehabilitation in compliance with § 983.153, is an exception for the timing of the Agreement. HUD also adds clarification that the Agreement must be executed on the same day as or in advance of its effective date.

This final rule inserts a new paragraph (c) to specify that the PHA and owner may agree to amend the Agreement per paragraph (e). In paragraph (d), this final rule clarifies that paragraphs (f) and (g) provide exceptions to the prohibition on entering into an Agreement if development activity has commenced. HUD also makes additional changes in paragraph (d) to clarify the timing of the Agreement that correspond to the change to paragraph (b) described above. This final rule revises paragraph (e) to expand the content of the agreement to include a description of any rehabilitation work agreed to, a deadline for the completion of work, and any additional design, architecture or quality requirements placed on the owner by the PHA. The addition of a deadline for completion of work addresses the oversight in the proposed rule wherein § 983.155(a) of the existing regulation was removed rather than relocated.

This final rule clarifies in paragraph (f) when the PHA may execute an Agreement later than the timing provided in paragraph (b) and corrects the applicability of requirements in the case of a project that is noncompetitively selected. The changes in paragraph (f) also provide PHAs with discretion to not use an Agreement or execute an Agreement after construction or rehabilitation for development activity in compliance with the requirements under § 983.153. Paragraph (f) also requires that the PHA explain the circumstances under which the PHA will enter a PBV HAP contract without first entering into an Agreement and the circumstances the PHA will enter into an Agreement after construction or rehabilitation in the Administrative Plan. This paragraph also requires that the PHA comply with the new requirement at § 983.153(c)(3) and confirm owner compliance with the owner's requirements under § 983.153. Finally, this final rule makes a minor amendment to paragraph (f) to remove reference to § 983.152, consistent with changes to that section as described above.

This final rule adds paragraph (g) to explain the exception to the requirement to enter into an Agreement established in § 983.157. Paragraph (g) also explains the relationship between the Agreement and the HAP contract in the event that some work occurs under an Agreement before the PHA exercises the option at § 983.157.

Lastly, this final rule adds paragraph (h) explaining the PHA's options when the units are PHA-owned with no separate legal entity to serve as the owner. A PHA cannot execute an Agreement with itself. In the proposed rule, HUD stated that a PHA-owned agreement certification is not needed as an alternative to an Agreement because projects may now be developed without an Agreement. Upon further review, HUD determined that there may be situations in which development without an Agreement is not feasible, such as when a lender requires use of an Agreement or equivalent commitment prior to development. Therefore, this final rule provides that unless a PHA is exercising its discretion not to use an Agreement, the PHA will need to follow a process similar to the process adopted in this final rule for executing the HAP contract or an equivalent certification (see § 983.204). For consistency with § 983.204 of this final rule, HUD provides that PHAs have the option to either establish a separate legal entity to execute the Agreement or use a PHA-owned agreement certification in this final § 983.154(h).

§ 983.155 Completion of Work

In tandem with requiring the owner to submit evidence and certify to the PHA that development activity or substantial improvement is completed, this final rule adds that a PHA must review the owner's completion evidence and determine whether development activity or substantial improvement was completed. This final rule also adds a new paragraph (b) for consistency throughout part 983 and to specifically address completion of work for PHA-owned units. Paragraph (b) provides in the case of a PHA-owned unit, the PHA must submit that evidence to the independent entity and the review is the responsibility of the independent entity. Finally, HUD clarifies that the form and manner of the submission and certification is specified in the PHA's Administrative Plan.

§ 983.156 PHA Acceptance of Completed Units

This final rule makes a minor revision to paragraph (a) to clarify that the PHA inspection is to determine whether the units comply with HQS and additional PHA requirements. HUD revises paragraph (b) to provide specific instruction with regard to completion of units, depending on whether the units are completed prior to HAP contract execution, following HAP contract execution, or in order to be added to the HAP contract. These changes to paragraph (b) accommodate changes to §§ 983.152 and 983.157, as discussed further in the description of changes to those sections. In response to public comments, this final rule adds a new paragraph (c) to provide that HAP contracts for projects that are not subject to § 983.157 may be executed in stages, as units in a newly constructed or rehabilitated project are completed. This final rule also adds paragraph (d) for consistency throughout part 983, to separate PHA-owned units from other units. Under new paragraph (d), this final rule requires that independent entities inspect units and determine whether those units are HQS-compliant.

§ 983.157 Rehabilitated Housing: Option for Development Activity After HAP Contract Execution

In the proposed rule, HUD proposed to include provisions on substantial improvements (previously termed ''development activity,'' as explained in the discussion of § 983.3 above) to units under a HAP contract in § 983.157. However, HUD determines that such provisions are inappropriate under subpart D of part 983 (Requirements for Rehabilitated and Newly Constructed Units), as placing the provision there produced confusion about the distinction between development activity for newly constructed and rehabilitated projects and work to improve units well after a HAP contract is in effect (which could be performed in any type of project). Therefore, in this final rule, the provisions proposed to be in § 983.157 have been moved to § 983.212 and are discussed in that section below. Section § 983.157, as codified in this final rule, instead is new

to this final rule and discussed further here.

This final rule adds the new provisions of § 983.157 in response to public comment. Commenters described situations in which development activity would be undertaken in rehabilitated projects that are already occupied and may meet HQS. HUD determined that occupants of such projects, if they qualify for PBV assistance, would benefit from receipt of assistance as soon as possible. Accordingly, and in addition to the options already available to the PHA under current regulations and in this final rule, § 983.157 of this final rule provides that the PHA may allow an owner of a rehabilitated housing project to conduct some or all of the development activity during the term of the HAP contract. Under this option, the PHA and owner place all proposed PBV units under the HAP contract before the owner completes development activity, subject to the limitations established in § 983.157 of this final rule. During the period of development activity, the PHA makes assistance payments to the owner for the contract units that are occupied and meet HQS. HUD determines this option is permissible in accordance with section 106(a)(4) of HOTMA.

Section 983.157 of this final rule provides for the PHA to exercise its discretion to use this option in accordance with the PHA's Administrative Plan. It establishes conditions that must be met to use this option and a contract framework, which applies a contract rider during the development period. Section 983.157 of this final rule also establishes requirements applicable to the occupancy of units during the rehabilitation period, completing the rehabilitation, and PHA-owned units. Under this option, the owner agrees to develop the contract units to comply with HQS, and the PHA agrees that, upon timely completion of such development activity in accordance with the terms of the rider, the rider will terminate and the HAP contract will remain in effect. HUD makes conforming changes throughout part 983 to accommodate this option (discussed further in the review of general technical changes below). The final rule clarifies that existing households be given an absolute selection preference to return to the project when a household needed to vacate for development activity. HUD notes that the leasing of units in a PBV project must comply with federal fair housing and related requirements, including ensuring that any designated accessible units are occupied by households who need the accessibility features, and that emergency transfers under VAWA are provided.

§ 983.202 Purpose of HAP Contract

In response to public comments, HUD revises paragraph (a) to better clarify the existing flexibility that allows PHAs and owners to place multiple projects that each consist of a single-family building under one HAP contract.

§ 983.203 HAP Contract Information

HUD in this final rule revises § 983.203(h) to require that the HAP contract include units that are restricted to certain occupants via the project cap or program cap. The purpose of the change is in hopes of minimizing the possibility of PHAs losing track of what units must be set aside by ensuring that the HAP contract clearly specifies units that are restricted to certain occupants by virtue of the project cap *or program cap*. The changes in this section are consistent with the Fostering Stable Housing Opportunities (FSHO) notice,[13] which notes that the increased program cap applies only if a family eligible for that 10 percent authority resides in the unit—this means PHAs need to keep track of the units that are under the increased program cap that must be set aside for occupancy by qualifying families (as was already required for the project cap).

§ 983.204 Execution of HAP Contract or PHA-Owned Certification

This final rule amends § 983.204(b) and (c) to clarify that HAP contracts must be promptly executed and effective as described. This final rule also amends paragraph (c) to specify requirements applicable to projects undergoing development activity after HAP contract execution, as described further above in the discussion of changes to § 983.157. This final rule inserts a new paragraph (d) to clarify that the effective date of a PBV HAP contract must be on or after the execution date of the PBV HAP contract. HUD also amends and reorganizes paragraph (e), which was paragraph (d) in the proposed rule, to align with corresponding requirements in § 982.451(c). Redesignated paragraph (e)(1) now expressly states the requirement that the separate legal entity must execute the HAP contract with the PHA, and HUD deletes paragraph (d)(1)(ii) from the proposed rule. HUD has revised paragraph (e)(2)(i) of this final rule to clarify that the PHA-owned Certification obligates the PHA, as owner, to all of the requirements of the HAP contract. This revision prevents ambiguity with other regulations that reference HAP contracts but not the PHA certifications.

§ 983.205 Term of HAP Contract

HUD amends the extension of term provision in § 983.205(b) to clarify the process for HAP contract term extensions and, while it retained the maximum extension term of 20 years that was in the proposed rule, provides a mechanism to execute multiple extensions concurrently as supported by commenters. Also, HUD removes the proposed paragraph (c) concerning independent entity oversight of the contract term and extensions for PHA-owned units, in response to public comments.

§ 983.206 Contract Termination or Expiration and Statutory Notice Requirements

HUD makes changes in this final rule to clarify the process for when a PHA manages the issuance of tenant-based vouchers to tenants at PBV contract termination, and related issues. Specifically, for § 983.206(a)(3), this final rule expands the definition of the term ''termination'' to include termination of the HAP contract by agreement of PHA and owner. As a necessary precondition of the statutory right to remain, in paragraph (b), this final rule also adds provisions specifying that the right to remain in a unit depends on the unit continuing to be used for rental housing and clarifies procedures for voucher issuance. As suggested by public comments, HUD provides additional clarification in paragraph (b) to specify that the PHA must issue vouchers, provide a timeframe for issuance, and require units to be removed from the contract if the family moves. HUD also moved the language in proposed paragraphs (b)(4) and (b)(5) into paragraph (b) to cover all families that are issued a voucher as the result of a PBV contract termination or expiration. This final rule made this change because the language in paragraphs (b)(4) and (b)(5) are applicable regardless of whether the family uses the voucher in the same project or in other housing.

After consideration of public comments, this final rule revises paragraph (b)(4) (proposed paragraph (b)(6)) to expand upon the exceptions in which an owner may refuse to initially lease and to limit ''other good cause'' to tenant misconduct and where the owner uses the unit for a non-residential purpose or renovates the unit. However, HUD provides a process by which families must be permitted to remain in

[13] *See* 87 FR 3570 (Jan. 24, 2022).

or return to the project, if possible, when a renovation occurs, to best fulfill the PBV statutory requirement allowing the family to remain, as provided by HOTMA section 106(a)(4). This final rule also changes paragraph (c) to clarify that expiring funding increments, which are a normal part of PHA operations, do not constitute insufficient funding. Paragraph (c)(2) includes a change specifying the respective section and paragraph that applies for HAP contract breaches involving failure to comply with HQS and other contract breaches. Lastly, this final rule adds paragraph (e), which provides the PHA and owner the discretion to terminate and how the owner and PHA can terminate their HAP contract.

§ 983.207 HAP Contract Amendments (To Add or Substitute Contract Units)

This final rule clarifies in paragraph (a) that substituted units may be vacant or, subject to paragraph (c), occupied. The final rule also removes the phrase ''and subject to all PBV requirements'' from paragraph (a) since the phrase is unnecessary and created confusion as to what requirements were at issue. HUD notes that this textual change is made for clarity only, and substitutions under paragraph (a) remain subject to all PBV requirements. HUD also clarifies the HQS and reasonable rent requirements to affirm that the unit must meet HQS and the rent must be reasonable in order to substitute the unit. Finally, the final rule includes in paragraph (a) a cross-reference to the requirements regarding units undergoing repairs or renovation before substitution (paragraph (d) in this final rule) and units that are newly built (paragraph (e) in this final rule).

HUD adds a requirement in paragraph (b), which provides that prior to adding a unit, the PHA must inspect the unit to determine that it complies with HQS, and the PHA must determine the reasonable rent for the unit. These additional requirements correspond to the same requirements that apply when substituting a unit. This final rule removes from paragraph (b)(1), which covers excluded and excepted units to the program or project cap, the citation to § 983.6, which discusses the percentage limitation for PBV units and discusses the types of units that will count toward the program cap.

HUD also revises paragraph (b)(3), moving the content of the proposed paragraph (b)(3) to a new paragraph (d) and including in paragraph (b)(3) only a cross-reference to paragraph (d). Paragraph (d) also contains significantly different text than that which appeared in proposed paragraph (b)(3). In accordance with the change to the definition of ''development activity'' described above in the discussion of changes to §§ 983.3 and 983.152, HUD replaces reference to ''development activity'' with reference to ''substantial improvement.'' Because projects containing units needing substantial improvement within the first two years must be categorized as rehabilitated housing (per discussion of changes to § 983.3 above), this final rule establishes that units may not undergo substantial improvement to be added to the project during this timeframe, barring extraordinary circumstances. For units that will undergo substantial improvement, HUD adds explanation of applicable requirements within paragraph (d), rather than referencing § 983.152 as proposed.

HUD similarly revises paragraph (b)(4) by moving the content of the proposed paragraph (b)(4) to a new paragraph (e) and instead including in paragraph (b)(4) only a cross-reference to paragraph (e). Paragraph (e) of this final rule also contains additional criteria beyond those that appeared in paragraph (b)(4) of the proposed rule. This final rule adds, in paragraph (e)(2), an amendment to the proposed requirement to address instances in which contract units are completed in stages. Further, the rule adds, in paragraph (e)(3), that a unit can be added to a HAP contract under certain situations in which part of the building is reconfigured into additional units. This latter addition expands the type of units that may be added to a HAP contract.

To clarify the requirements for adding units that are occupied, this final rule adds paragraph (b)(5), which cross-references the requirements regarding occupied units found in paragraph (c) of this final rule. This final rule moves paragraph (c) of the proposed rule to paragraph (g) and adds new paragraph (c) to address the requirements for substituting or adding occupied units and provide PHAs with the flexibility to place occupied units on the HAP contract.

In alignment with the requirements under § 983.10, HUD adds paragraph (f) requiring that PHAs describe in their Administrative Plan under what circumstances they will add or substitute contract units.

Finally, this final rule adds a new paragraph (h) explaining that HUD may establish procedures via **Federal Register** notice for a PHA and owner to merge two or more HAP contracts or bifurcate a single HAP contract. Allowing merger would facilitate administrative efficiency, to avoid a PHA having to repeat the same administrative actions for multiple contracts with the owner of a single project. It also follows from the HOTMA provision allowing units to be added to a contract at any time. Under the prior policy, HUD is aware that there may be projects for which the PHA and owner were unable to add units to a HAP contract due to the three-year limitation and therefore selected the project again for a separate HAP contract. This change would enable the contracts to be aligned going forward. Allowing bifurcation would provide administrative relief in other scenarios, such as if there is cause to establish separate ownership or management of two or more portions of a project.

§ 983.208 Condition of Contract Units

HUD revises § 983.208(a)(3) to require that the PHA specify conditions under which it will require additional housing quality requirements in its Administrative Plan consistent with § 983.10. To ensure that housing is decent, safe, and sanitary, this final rule requires in paragraph (b)(1) that the PHA take enforcement action against owners who fail to maintain a dwelling unit in accordance with HQS. HUD revises paragraph (b)(2) to align with § 982.404, and to remove the unclear phrasing ''considered to be.'' This final rule also specifies in paragraph (b)(2)(i) that ''other inspector'' is a person who is authorized by the State or local government. The proposed rule cross-referenced to §§ 982.401(a)(5) and 982.401(o) to cover the timeframes for units in noncompliance with HQS; however, in this final rule HUD outlines the timeframes for noncompliant units in paragraphs (b)(2)(iii)(A) and (B) in place of the cross-references. HUD clarifies in paragraph (b)(3) that the HAP is not withheld or abated in cases where the PHA waives the owner's responsibility for repairs, and revises the paragraph to better align with HOTMA in terms of when the waiver may be applied, namely for an HQS deficiency that the PHA determines is caused by the tenant, any member of the household, or any guest or other person under the tenant's control, other than damage resulting from ordinary use. HUD adds paragraphs (b)(4) and (5) to provide flexibility for PHAs to conduct substantial improvement in the case of an HQS deficiency caused by an extraordinary circumstance or to conduct development activity after HAP contract execution, respectively, and requires that the PHA withhold or abate HAP and remove or terminate HAP as long as the contract unit with deficiencies is occupied by an assisted family.

HUD also inserts a new paragraph (c) addressing family obligation. The addition of paragraph (c) reflects the contents of § 982.404, as § 982.404 is no longer applicable to PBVs in accordance with § 983.2 of this final rule. The changes in paragraph (c) outline how a family may be held responsible for a breach of the HQS, the family's required actions to cure the deficiency if the HQS breach is life-threatening, and the actions that the PHA must take in case of a breach of the HQS.

In revised paragraph (d), proposed paragraph (c), HUD replaces the use of the undefined term ''regular inspections'' with the specific inspections referred to, consistent with changes throughout this final rule. Consistent with § 983.10, revised paragraph (d) also requires that the PHA specify the conditions under which it will withhold HAP and abate HAP or terminate the contract for units other than the unit with HQS deficiencies in its Administrative Plan. Revised paragraph (d) also outlines the PHA's remedies when HQS deficiencies are identified in an inspection, excluding pre-selection, initial, or turnover inspections. In accordance with the 1937 Act as amended by HOTMA, this final rule revises paragraph (f) discussing the applicability of § 983.208 to HAP contracts. Per the statute, HUD determines that paragraph (f) applies to any dwelling unit for which a HAP contract is entered into or renewed after the effective date of this final rule, with ''renew'' under the statute meaning the earlier of agreement to extend or effective date of extension in the case of PBV.

§ 983.210 Owner Certification

To clarify the meaning of the certification in paragraph (a), given that compliance with HQS can include complying with requirements under part 983 to take specific actions in certain circumstances in which units do not fully meet HQS, HUD amends paragraph (a) to specify that the owner's compliance with HQS is subject to the requirements of part 983. To prevent a possible conflict with §§ 983.157 and 983.212, which allow the family to be temporarily housed while development activity or substantial improvement occurs, this final rule revises § 983.210(d) to specifically provide §§ 983.157(g)(6)(ii) and 983.212(a)(3)(ii) as an exception to the requirement that the unit be the family's only residence.

§ 983.211 Removal of Unit From HAP Contract

HUD moves from § 983.211(c) to paragraph (b) the requirement that reinstatement or substitution must be permissible under § 983.207. For clarification, HUD revises this requirement to reference § 983.207(a) and (b) specifically. This final rule also adds clarifying changes to paragraph (c) to require that the anniversary and expiration dates match all other units under the HAP contract. This clarification prevents the PHA and owner from matching the dates on the HAP contract for all other units with the dates for the reinstated or substituted units.

§ 983.212 Substantial Improvement to Units Under a HAP Contract

In this final rule, HUD moves the proposed § 983.157 to § 983.212 (as discussed further in the description of changes to § 983.157). HUD revises this section to address commenters' concerns over the timing of substantial improvement under a HAP contract. Specifically, HUD is breaking paragraph (a) into its components and revises paragraph (a) to outline the conditions under which the PHA may approve substantial improvement. The changes in paragraph (a)(1) set a reasonable expectation that the condition of housing placed under a PBV HAP contract should not need substantial improvement within the first two years of the HAP contract, barring the extraordinary circumstances subject to the exception in paragraph (a)(1)(i). To prevent tenants from being permanently displaced, paragraph (a)(1)(i) allows the PHA to approve the owner to undergo substantial improvement after a natural disaster or other ''extraordinary circumstances'' on a previously compliant unit and clarifies that ''extraordinary circumstances'' are unforeseen events that are not the fault of the owner. In paragraph (a)(1)(ii), HUD changes the relevant time period from five years to two years in response to public comment. Under paragraph (a)(2), HUD expands the description of the expected HQS deficiencies that must be reported to include the items at § 5.703(a)(2): components within the primary and secondary means of egress, common areas, and systems equipment. Further, HUD clarifies in paragraph (a)(2) the substantial improvement at issue must not include demolition and new construction of replacement units.

The changes in paragraph (a)(3) allow HUD to provide families with greater protection against being moved from the unit or project unnecessarily and against being required to remain in unsafe conditions. For paragraph (a)(3), this final rule adds several subsections to instruct the PHA and owner on what to do when families occupy units that will not comply with HQS during the substantial improvement. Paragraph (a)(3) also clarifies under what circumstances the family has to entirely vacate a unit during substantial improvement, which would only be when both in-place substantial improvement and temporary relocation cannot be achieved. HUD, in this final rule, explains whether families remain PBV participants or tenants under lease during re-housing and provides sufficient procedural information for a PHA and owner to carry out the moves. Paragraph (a)(3)(iii)(A) adds a requirement that a family that must be re-housed be offered an available vacant contract unit if there is one. In the case that the PHA issues the family a tenant-based voucher, paragraph (a)(3)(iii)(B) provides that the PHA must, either through voucher issuance based on family eligibility and willingness to request a voucher pursuant to § 983.261 or through removal of the unit from the HAP contract, issue the family its voucher to move. Finally, paragraph (a)(3)(iii)(C) requires that families that vacate the project be offered an opportunity to return. HUD notes that the leasing of units in a PBV project must comply with federal fair housing and related requirements, including ensuring that any designated accessible units are occupied by households who need the accessibility features, and that emergency transfers under VAWA are provided.

HUD clarifies that HAP and vacancy payments must be abated once the unit has any HQS deficiency during substantial improvement under paragraph (a)(4). This final rule adds paragraph (a)(5) to specify that vacant units are the units that may be temporarily removed from the contract and that failure to complete the substantial improvement as approved is a cause for a breach subject to § 983.206(c)(2). Paragraph (a)(5) also requires that the contract specify the terms of the PHA approval, to facilitate the PHA options for breach if the owner fails to comply.

This final rule amends the proposed paragraphs (b) and does not finalize the proposed paragraph (c) to conform to changes made across part 983 to separately characterize ''development activity'' and ''substantial improvement'' and remove descriptions of requirements applicable to substantial improvement from subpart D of part 983. Accordingly, paragraph (b) describes requirements that apply to substantial improvement. This final rule also adds a new paragraph (c) to require that for PHA-owned units an independent entity must make the

determinations otherwise made by the PHA in this section, to avoid a conflict.

§ 983.251 How Participants Are Selected

In this final rule, HUD clarifies in paragraph (a)(2) that the PHA determination of eligibility for a particular family must use information received and verified by the PHA. This is not a change to existing requirements, but the addition is necessary to ensure there is no confusion as a result of the explicit reference in § 983.2 that § 982.201(e) is inapplicable to the PBV program. This final rule also revises paragraphs (a)(2) and (b)(2) to clarify an existing requirement that the family cannot be zero-HAP at admission to the unit, and clarifies under paragraph (b)(1) that the eligibility of an in-place family is determined prior to attaching assistance to the unit (*i.e.,* executing a HAP contract or amending a HAP contract by adding or substituting units), not at the time the project or unit is initially selected to receive PBV assistance. This final rule clarifies paragraph (b)(3)(ii) regarding when an owner chooses to terminate or not to renew the tenant-based lease to remove language that may have implied the tenant-based voucher rules on termination or non-renewal function differently in the case of a unit proposed to be project-based. Consistent with § 983.10, this final rule also made changes to require that the PHA identify in the Administrative Plan details about how it structures the waiting list for the PBV program throughout paragraph (c). HUD also revises paragraph (c)(7)(x) for consistency and comprehensiveness with respect to the Department's nondiscrimination and equal opportunity regulations. Additionally, for organizational reasons, HUD relocates the requirement for PHAs to have some mechanism for referring to accessible PBV units a family that includes a person with a mobility or sensory impairment from § 983.252(c)(2) to § 983.251(c)(9).

To prevent the tenant from being subject to an impermissible requirement to accept services involuntarily, this final rule revises paragraph (d)(2) to state that the PHA must not require families to show they participate in their own equivalent services if they decline voluntary services. Consistent with § 983.10, in added paragraph (e)(2)(iii), HUD requires the PHA define ''good cause'' in the Administrative Plan, which, at a minimum, must include HQS deficiencies; a unit that is inaccessible or otherwise does not meet the disability-related needs of a household member with disabilities; circumstances beyond the family's control; and health or safety risk due to being a victim of domestic violence, dating violence, sexual assault, or stalking covered by 24 CFR part 5, subpart L. To benefit the tenants and based on public comments, HUD determines that PHAs cannot remove families from the waiting list when they reject units for any reason but must allow families to reject units for ''good cause'' without losing their place on the waiting list. This protects families from being penalized when a unit is not truly available to the family because the unit does not meet the family's needs.

§ 983.252 PHA Information for Accepted Family

HUD restructures proposed § 983.252(a), and moves the requirements previously at paragraph (c)(1) to paragraph (a)(2) so that the requirements that PHAs take appropriate steps to ensure effective communication in accordance with 24 CFR 8.6 and 28 CFR part 35, subpart E, and provide information on the reasonable accommodation process, applies for all families, and not only where the family head or spouse is a person with a disability. HUD further revises proposed § 983.252 to add the requirement that the PHA include in the family information packet information about the family's right to move in a new paragraph (b)(5). HUD has also moved the requirement at paragraph (c)(2) regarding accessible PBV units to § 983.251(c)(9), as discussed in the previous section. HUD also adds a new paragraph (c) to clarify the requirement that the PHA and family sign the statement of family responsibility. In accordance with Title VI of the Civil Rights Act of 1964 and HUD's implementing regulation at 24 CFR part 1, this final rule clarifies in redesignated paragraph (e) that it is a requirement that PHAs take reasonable steps to ensure meaningful access by persons with limited English proficiency. PHA's may reference HUD's *Final Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons* (72 FR 2732) for additional information about how to ensure meaningful access to persons with limited English proficiency.

§ 983.254 Vacancies

HUD aligns § 983.254(a)(1) with the new requirements of § 983.157, as described in the discussion of changes to that section. HUD also makes minor changes to paragraphs (a)(1)(i) and (ii) of this section to specify that PHAs should make every reasonable effort to make eligibility determinations and refer sufficient numbers of families to owners within thirty days.

§ 983.255 Tenant Screening

For consistency purposes and to align this section with § 983.10, HUD revises § 983.255(a)(2) and (c)(4) to require that the PHA's tenant screening policies are in accordance with the policies in the PHA's Administrative Plan.

§ 983.257 Owner Termination of Tenancy and Eviction

This final rule revises § 983.257 to add that the owner may terminate the tenancy in accordance with §§ 983.157(g)(6)(iii) and 983.212(a)(3)(iii).

§ 983.260 Overcrowded, Under-Occupied, and Accessible Units

After considering public comments, HUD creates additional flexibilities as requested, while ensuring units do not continue to remain overcrowded, underoccupied, or, in the case of accessible units, occupied by families that do not require accessibility features. Accordingly, in paragraph (a)(2)(ii), HUD provides PHAs with 60 days (an additional 30 days) to make an offer of continued housing assistance once a determination has been made that a family is occupying a wrong-size unit, or a unit with accessibility features that the family does not require and the unit is needed by a family that requires the accessibility features. HUD also reorganizes paragraph (b) and adds paragraphs (b)(2) to provide that the PHA must remove the wrong-size or accessible unit from the HAP contract to make voucher assistance available to issue the family a tenant-based voucher if continued housing assistance under paragraph (b)(1) is unavailable. HUD determined this policy change was necessary to ensure the family living in a wrong-size or accessible unit would be able to obtain voucher assistance when no options under paragraph (b)(1) were available.

HUD revises paragraphs (c)(2)(i) and (ii) to clarify the requirements when the PHA's offer of assistance is project-based. HUD also adds paragraph (c)(2)(iii) to address the requirements when the PHA's offer of assistance is other comparable tenant-based rental assistance. In response to requests for additional flexibility, HUD creates under (c)(2)(i) and (c)(2)(iii) an opportunity for a family to request and a PHA to grant one extension not to exceed 90 days in circumstances where a family either declines project-based assistance or accepts or declines other

comparable tenant-based assistance in order to accommodate a family's efforts to locate affordable, safe, and geographically proximate replacement housing.

Finally, HUD adds paragraph (d) to state that if units are removed under this section they can be reinstated later. This final rule also revises paragraph (b)(1)(iv) to align with the revised definition for the term ''comparable tenant-based rental assistance'' in § 983.3.

§ 983.261 Family Right To Move

In response to public comments, HUD at this final rule reorganizes, adds headings to, and revises § 983.261. Paragraph (a) is revised to clarify that the family may terminate its lease at any time after one year of PBV assistance. To ensure PHAs properly manage voucher turnover, paragraph (b) requires that if the search term of a family that requested to move expires, the PHA must first issue a voucher to the next eligible family before issuing another voucher to the family that requested to move. This final rule moves the discussion in paragraphs (c)(1) and (2) of the rights of a family or a member of a family who has been the victim of domestic violence, dating violence, sexual assault, and stalking under the PBV program, to new paragraphs (e) through (g), and expands on these provisions. Paragraph (d) clarifies that if the family terminates its lease before one year of PBV assistance, the family relinquishes the opportunity for continued tenant-based assistance under this right to move section. Lastly, consistent with § 983.10, this final rule requires PHAs to have a policy on the family's right to move in the Administrative Plan in paragraph (b) and (c).

§ 983.262 Occupancy of Units Under the Increased Program Cap and Project Cap Excepted Units

This final rule makes overall changes to § 983.262, to align the PBV rules with the Fostering Stable Housing Opportunities (FSHO) notice,[14] and to specify the occupancy requirements under the 10 percent cap. Additionally, for ease of reading, this final rule moves and revises paragraph (f) to paragraph (b)(4) and distinguishes paragraphs (c) and (d), the requirements for excepted units and units under an increased program cap. This final rule makes clarifying changes to paragraph (b) by explaining the requirements applicable to both excepted units and units under an increased program cap. For clarity, this final rule amends paragraph (b)(4)(ii) to provide PHAs with discretion on whether to reinstate a unit from the PBV HAP contract. The changes in paragraph (c) explain the requirements solely for units under the increased program cap, which includes homeless family, veteran family, supportive housing for persons with disabilities or elderly persons, and units for Family Unification Program (FUP) youth. This final rule requires at paragraph (c)(3)(ii) that PHAs include policies on supportive housing for persons with disabilities or elderly persons in their Administrative Plan requirement in alignment with § 983.10. Revised paragraph (d) outlines the requirements solely for project cap excepted units.

Paragraph (e) of this final rule specifically outlines the requirements for units for FUP youth under the increased program cap and project cap exceptions. This revision is made for better readability and to distinguish FUP youth requirements from other categories of excepted units and units under an increased program cap.

§ 983.301 Determining the Rent to Owner

This final rule revises paragraphs (b)(1) and (c)(2)(i) to align with § 983.10. This final rule changes (f)(3) to align with the changes made to the exception payment standard regulation in § 982.503. Paragraph (f)(3) is also amended to clarify the criteria for whether an exception payment standard applies. Finally, HUD amends paragraph (f)(3) to clarify the purpose for which an exception payment standard applies to PBV projects, which is as a factor for determining rent to owner under paragraph (a)(2) or a factor for determining if the unit is a qualifying tax credit unit for purposes of setting the rent to owner under paragraph (c), as applicable.

HUD revises paragraph (f)(4) to provide HUD with the flexibility to develop a process to approve project-specific utility allowances. This final rule also adds paragraph (f)(5) to state that the PHA must use the applicable utility allowance schedule for the purpose of determining rent to owner and does not use a higher utility allowance from a reasonable accommodation for a person with a disability. This clarifies the existing requirement that a higher utility allowance as a reasonable accommodation is applied only to the particular family's tenant rent (or utility reimbursement) (see 24 CFR 983.353), rather than being used to determine the amount of the rent to owner per 24 CFR 983.301(b)(1) or (c)(2)(i). This final rule removes the proposed rule requirement in paragraph (g) that independent entities determine project-specific utility allowance, with the purpose that HUD will ensure sufficient oversight through the **Federal Register** process to approve project-specific utility allowances.

§ 983.302 Redetermination of Rent to Owner

This final rule revises paragraph (a)(2) to state that the PHA Administrative Plan must specify any advance notice the owner must give the PHA to request a redetermination of rent and the form of such request. This final rule revises paragraph (b)(2) to remove the term ''maximum rent,'' which was undefined, and state specifically how to calculate the maximum adjustment by OCAF. Further, this final rule moves information that was in paragraph (b)(2) in the proposed rule to new paragraphs (b)(3), (b)(4), and (b)(5) with simplified language for readability. HUD amends paragraph (b)(6) to conform to applicable HQS provisions of §§ 983.157 and 983.212.

HUD also clarifies when the rent to owner must be decreased in the case of adjustment by OCAF in revised paragraph (c)(1), to include when there is a decrease in the fair market rent, tax credit rent, or reasonable rent, as applicable, that requires a decrease to the rent to owner. In response to public comments on the proposed changes to rent floors, HUD determined that PHAs should have discretion whether to elect at any time, within the HAP contract, to not reduce rents below the initial rent to owner, as reflected in revised paragraph (c)(2). This revision reflects HUD's opinion that PHAs are in the best position to balance local considerations in making such a determination. To accomplish this change, HUD removed from paragraph (c)(2) the limitation on establishing a rent floor, to account for circumstances where the rent floor may need to be established after rents have fallen beneath the initial rent to owner.

§ 983.303 Reasonable Rent

HUD amends paragraph (b) to add two new situations in which rent reasonableness must be redetermined, which are when a unit is added to the contract and when development activity is completed and accepted for a unit subject to the new option in § 983.157 of this final rule (described in greater detail in the discussion of § 983.157 above). This final rule adds paragraph (c)(3) to explain how to calculate rent reasonableness, which must be based on actual and documentable conditions

[14] *See* 87 FR 3570 (Jan. 24, 2022).

and not prospective information. HUD also deletes in paragraph (f)(2) the phrase ''where the project is located,'' as this language modified ''the HUD field office'' which has been removed.

§ 983.352 Vacancy Payment

This final rule aligns this section with § 983.10 by clarifying that the Administrative Plan must contain the PHA policy on the conditions which it will provide for vacancy payments in a HAP contract, the duration and amount of any vacancy payments it will make to an owner, and the required form and manner of requests for vacancy payments.

§ 983.353 Tenant Rent; Payment to Owner

This final rule revises paragraph (d)(2) to align it with § 983.10, requiring that the PHA describe its policies on paying the utility reimbursement in the Administrative Plan.

§ 985.3 Indicators, HUD Verification Methods and Ratings

This final rule revises paragraphs (i)(1), (i)(3)(i), and (i)(3)(ii) to align them with § 982.503. Further, this final rule clarifies paragraph (l)(1) to state that the initial unit inspection indicator includes both initial and turnover inspections for the PBV program. The purpose of this revision is to capture every time a family moves in and not just capture when a family moves in before the HAP contract. This final rule also revises the citation in paragraph (m)(1) from § 982.405(a) to §§ 982.405 and 983.103(e) to reflect changes made to those sections in this final rule.

This final rule also revises paragraph (c)(3)(i)(A) to reflect changes made to self-certification of assets under 88 FR 9600 (Feb. 14, 2023), which implemented HOTMA sections 102, 103, and 104. A revision has been made to the introductory text of this regulation to reflect that the Federal award expenditure threshold is established by 2 CFR subpart F and has changed from $300,000 to $750,000. The revision reflects the regulatory citation for audit thresholds to ensure that § 985.3 is always aligned with Federal audit requirements.

This final rule revises paragraph (p)(1) and (3)(i)(B) to reflect the renumbering of § 982.503(e) to (f).

General Technical Changes

Throughout parts 5, 50, 92, 93, 982 and 983, HUD moved, corrected, and removed outdated citations and revised headers for clarity purposes. This final rule also revises terminology throughout this final rule, including replacing all references to ''biennial inspection'' with ''periodic inspection;'' ''tenant selection plan'' with ''owner waiting list;'' and ''defects'' with ''deficiencies.'' This final rule also replaces references to ''tenant's rent'' with ''total tenant payment'' and replaces references to ''rent to owner'' with ''gross rent.'' This final rule removes all references to the Project-based certification (PBC) program as it is no longer in existence. HUD also redesignated paragraphs for readability in §§ 982.54, 982.406, 983.53, 983.54, 983.59, 983.153, 983.204, 983.207, 983.211, 983.252 and 983.260. In addition, HUD moved the definition of the term ''Request for Release of Funds and Certification'' from § 983.3 to § 983.56(d)(2). HUD also amended §§ 985.1 and 985.3 to incorporate the PBV program in SEMAP and to align with regulatory changes in § 982.503 which permits additional flexibilities for PHAs inspections and the NSPIRE final rule.

HUD also makes changes throughout this final rule to correspond with the changes described above adding an option to complete rehabilitation after HAP contract execution in § 983.157, moving proposed § 983.157 to § 983.212 of this final rule, and changing the term ''development activity'' to ''substantial improvement'' for a portion of the work described as ''development activity'' in the proposed rule. HUD adds cross-references to § 983.157 in this final rule, and brief descriptions of conforming changes, in appropriate sections of part 983. Also, HUD removes citations to § 983.157 that appeared in the proposed rule or changes them to instead reference § 983.212 throughout this final rule. HUD changes ''development activity'' to ''substantial improvement'' where appropriate throughout this final rule. Finally, HUD removes references to activities that constitute substantial improvements from subpart D of part 983 of this final rule where appropriate and, accordingly, removes references to provisions of subpart D from §§ 983.207 and 983.212 where appropriate.

HUD is also revising the definition of ''household'' at 24 CFR 5.100, consistent with HUD's rule implementing HOTMA at 88 FR 9600 (Feb. 14, 2023), to include foster children and foster adults. This is a technical change consistent with the definitions of ''foster children'' and ''foster adults'' present in 24 CFR 5.100. For more information, see HUD's discussion of foster children and adults at 88 FR 9600, 9602 (Feb. 14, 2023).

Finally, some technical changes throughout the proposed rule were either made by the NSPIRE final rule or rendered moot by the NSPIRE final rule. For example, HUD proposed to amend § 985.1 to update a reference to ''project-based component (PBC).'' This change was made in NSPIRE, and therefore not made here.

IV. Effective and Compliance Dates

Effective Dates

Almost all changes in this final rule are effective thirty days after the publication of this rule. However, HUD is delaying the effective date for §§ 982.451(c), 983.154(h), 983,154(g), 983,157, and 983.204(e) while HUD completes and publishes the PHA-owned certification form and HAP contract rider that are necessary for PHAs to implement these changes. HUD will publish a subsequent publication establishing an effective date for these changes, once the form and rider are ready for use.

Compliance Dates

Compliance with this final rule is required once the rule becomes effective, with some exceptions.

Many changes require updates to PHAs' Administrative Plans. HUD recommends that PHAs update their Administrative Plans at their earliest convenience. However, to aid in providing a smooth transition, PHAs are not required to update their Administrative Plans in response to this rule until 365 days after the effective date of this rule. HUD notes that PHAs wishing to take advantage of many of the changes in this rule are required to update their Administrative Plan to incorporate those changes.

Other sections have delayed compliance dates to provide PHAs with adequate time to update their forms, procedures, and any other written materials that reflect new requirements in accordance with this rule, and to provide HUD with time to provide additional resources advising PHAs. Also of note, §§ 983.57 and 983.155(b) will require some PHAs to either amend their independent entity contracts or select a new independent entity, and HUD is therefore giving PHAs one year from the effective date to make those changes.

V. Public Comments

HUD received 44 public comments from a wide range of commenters: individuals; PHAs; public housing and tenant interest groups; and legal services organizations. The public comments and responses to the substantive comments are found below.

1. Definitions (§ 982.4)

Definition of Request for Tenancy Approval (RFTA)

One commenter stated that the definition of RFTA seems to imply a requirement that the RFTA be submitted by the voucher holder and suggested the definition be amended to clarify that either the family, or the owner on behalf of the family, may submit the form.

HUD Response: In this final rule, HUD has amended the definition of RFTA to clarify that the form can be submitted by the family, or on behalf of the family to the PHA.

Definition of Tenant-Paid Utility

A commenter suggested that HUD include the definition of ''utility'' currently found in guidance to the regulation because the definition is a critical part of the program.

HUD Response: The definition of tenant-paid utility has been added to the definitions section at § 982.4 and this definition is now also referenced in the project-based voucher definition of tenant-paid utility at § 983.3. The new definition in § 982.4 clarifies that tenant-paid utilities are those services and utilities that are not included in the rent. HUD modified the definition from the proposed rule to remove the definition of which utilities may be considered as tenant-paid utilities since this is covered in § 982.517.

Definition of PHA-Owned Units

Commenters supported the proposed definition of a PHA-owned unit, which matches the statutory definition offered by HOTMA. These commenters stated this was clear and did not need expansion and supported tracking the statutory definition and conforming definitions across HCV and PBV regulations, notices, and guidance.

A commenter recommended that for a unit to be PHA-owned that HUD not rely on a bright-line, percentage of ownership test to determine control when a PHA owns more than 50 percent of the managing member or general partner, and HUD should not find a unit to be PHA-owned when a PHA controls less than 50 percent of a managing member or general partner interest. Another commenter supported excluding units in buildings owned by entities in which either a PHA is in the ownership structure, and/or the entity is subject to a ground lease by a PHA. A commenter recommended the definition of ''owned by a public housing agency'' should allow the statutory text to stand on its own, so that only units located in a project ''owned by the PHA, by an entity wholly controlled by the PHA, or by a limited liability company (''LLC'') or limited partnership (''LP'') where the PHA holds a controlling interest'' will be considered ''owned by a public housing agency.'' The same commenter opined that should HUD wish to clarify the control and other factors it will evaluate when determining whether a unit will be considered PHA-owned, HUD can do so through notice or other non-binding guidance. This commenter further stated that the definition of ''controlling interest'' conflates control and ownership contrary to Congressional intent, explaining that percentage of ownership does not guarantee control over the owner entity and that HUD should confirm whether the PHA exercises functional day-to-day control over the owner entity.

HUD Response: HUD appreciates there are many different preferences regarding the level of ownership or control that rises to the level of PHA-owned. In the interest of consistency, HUD agrees with the commenters that supported a definition that follows the statutory definition, and therefore declines to accept the suggestions that HUD avoid a bright-line test or exclude units in buildings owned by entities in which either a PHA is in the ownership structure, and/or the entity is subject to a ground lease by a PHA. Additionally, HUD believes that providing a distinction in the regulation of what constitutes a controlling interest is important to clarify the nuances in the statutory definition of PHA-owned units, and thus does not accept the suggestion that any clarifications beyond the statute should only be made through non-binding guidance. HUD disagrees that its definition of the term controlling interest is contrary to Congressional intent. The common definition of ''controlling interest'' recognizes a majority ownership interest that serves as the basis for control; HUD's definition reflects the most basic and recognized meaning of the term. Therefore, this final rule maintains the proposed rule language without change.

Definition of Independent Entity

A commenter supported the modified definition of independent entity in the proposed rule because it would provide relief to PHAs and maintain a level of scrutiny and prevent the appearance of self-dealing. Another commenter doubted whether there is any circumstance under which a PHA and an independent entity should be connected financially, in the interest of complete fairness and impartiality under which an independent entity should be making decisions.

One commenter suggested that the proposed rule would increase the shortage of vendors for PHAs, especially located in smaller areas, if every vendor were disqualified based on prior contracts with the PHA for services performed on non-PHA-owned units. The commenter viewed HUD's current procedures in tandem with the PHAs' inability to exercise control over the independent entity, as sufficient to ensure independence.

The same commenter recommended that HUD revise the definition of independent entity because it is unclear what it means for an independent entity to ''be connected to'' a PHA, and the definition would prohibit a PHA from using a company it already contracts with as an independent entity. Another commenter stated the phrase ''or in any other manner that could cause the PHA to improperly influence the independent entity'' is vague and subjective, potentially leading to confusion, disputes, and conflict, and should be deleted.

For clarity, a commenter suggested HUD revise the definition as follows: ''HUD-approved independent entities and PHAs cannot have a legal, financial (except regarding compensation for services performed for the PHA), or other connection that could cause either party to be improperly influenced by the other.'' The same commenter suggested that this final rule specify the meaning of ''connected to'' because the current meaning could prohibit a PHA from using an independent entity it currently contracts with, even when these vendor contracts are procured at arm's length.

Another commenter suggested HUD allow PHAs that may have an allowable financial relationship with an independent entity to continue to use that independent entity if there is no chance that the PHA will ''improperly influence'' the independent entity.

HUD Response: HUD appreciates the comments related to the challenges of identifying independent entities in rural areas, as well as the need to ensure impartiality. HUD revises the proposed definition in an attempt to balance these competing interests and ensure that HUD-approved independent entities are impartial and autonomous. HUD believes it is important to provide a regulatory definition of the term independent entity, and thus declines the request that the definition is consistent with current requirements, which provide that the PHA cannot perform any function that would present a clear conflict (*e.g.,* conducting inspections and rent setting) for units it owns. In this final rule, HUD explains when the unit of general local

government meets the definition of an independent entity without requiring HUD approval. HUD believes keeping this option in this final rule will reduce administrative burden and reporting requirements. While HUD disagrees that there are financial connections where there is no chance that the PHA will ''improperly influence'' the independent entity, HUD further clarifies that for HUD-approved independent entities, a financial connection would not include compensation for services performed for PHA-owned units. HUD believes it is necessary to maintain language regarding impartiality of HUD-approved independent entities, which defines the types of relationships (*e.g.,* financial connections) that could interfere with the entity's exercise of independent judgment in carrying out responsibilities with respect to PHA-owned units.

2. Administrative Plan (§ 982.54)

Objections Generally

A commenter stated that HUD should not add items to the Administrative Plan that are not necessary for the daily and core operations of the PHA. Another comment stated that several of the proposed additions would require frequent and burdensome changes for otherwise insignificant policy changes.

HUD Response: HUD disagrees that the requirements should not be added to the regulations. HOTMA offers significant flexibilities and HUD proposes to offer additional flexibilities to PHAs to establish discretionary policies through this rule. Therefore, it is critical that discretionary policies be applied consistently and that such policies are clearly and transparently published for the benefit of participant families, owners, and the general public.

Inclusion of Tenant Selection Plan (TSP)

Another commenter suggested that the requirement that a TSP be included in the Administrative Plan must be mentioned in § 982.54.

HUD Response: In finalizing the rule, HUD replaced all references of the ''tenant selection plan'' with ''owner waiting list policy.''

Question 2: Where could HUD provide greater discretion to PHAs to support their efforts to operate their programs effectively?

A commenter stated that all PHAs should be allowed to be Moving to Work (MTW) agencies to decrease regulatory burdens and provide additional discretion for PHAs to control their local market. This commenter also recommended that PHAs that have Affordable Housing Accreditation Board (AHAB) accreditation and are high performing under SEMAP and PHAS should be rewarded with more discretion because they have shown their ability to properly operate their programs.

HUD Response: HUD appreciates the comments requesting that PHAs should be afforded additional discretion to reduce regulatory burdens and notes that HOTMA and HUD, in its implementation, has made significant modifications and clarifications intended to reduce the burden on PHAs where possible. HUD does not have the statutory authority to allow all PHAs to be MTW agencies as suggested by the commenter.

3. Information When Family Is Selected (§ 982.301)

Disability-Related Obligations in the Oral Briefing

Commenters supported HUD's requirements wherein PHAs must provide families that include an individual with a disability a list of accessible units known to the PHA and assistance in locating an accessible unit. PHAs are already required to provide this information in the information packet, and as required in compliance with HUD's Section 504 requirements. One commenter suggested that PHAs be required to collaborate with local organizations that can provide housing search assistance to tenants with specific accommodation needs. Another commenter suggested that HUD require PHAs to keep track of whether tenants currently in accessible units require the accessible design features and use a lease addendum stating that the family may be required to move if they do not require the accessible design features. The same commenter suggested that HUD provide guidance to PHAs to proactively identify ways to make units accessible, including through new construction or other substantial rehabilitation.

HUD Response: The HCV program allows families to choose any eligible unit in the rental market. In the tenant-based voucher context, an HCV family leaving a rental unit due to not needing its features does not mean that unit is then leased to another HCV family. In other contexts, such as public housing and project-based voucher housing, the owner or manager may require the applicant to agree to move to a non-accessible unit and may incorporate this agreement into the lease, in accordance with HUD's Section 504 regulations. HUD appreciates the comments and recommendations to provide guidance to PHAs on ways to proactively identify units that meet a household's disability-related needs and ways to make units accessible and will consider these ideas in future guidance.

Exception Payment Standards

A commenter stated that HUD should include written and oral briefings on exception payment standards as a reasonable accommodation, and not solely include subsidy standards as required by regulations. The commenter suggested that PHAs be required to inform families of the availability of an exception payment standard, and particularly for when a more expensive new construction unit is needed as an accommodation for a family member's disability. Alternatively, another commenter suggested that the regulation should not detail that there is a reasonable accommodation possible for subsidy standards because reasonable accommodations are available for all PHA policies.

HUD Response: HUD agrees with the commenters that PHAs must make reasonable accommodations in rules, policies, practices, services, and procedures to ensure persons with a disability have equal opportunity to participate fully in all the PHA's programs, privileges, benefits, and services. Therefore, the voucher briefing must include information on the PHA's reasonable accommodation policies and procedures. In addition, the PHA may not know or have reason to know if the family or families attending the oral briefing includes a person with disabilities. Similarly, a family member who is not disabled may subsequently become disabled, so it is important that all families receive information on the reasonable accommodation process. Consequently, HUD is revising § 982.301(a)(3) to require that information on the reasonable accommodation process is provided at all oral briefings and not limited only to briefings where the PHA knows that a family in attendance includes a person with disabilities. While HUD does not require in this final rule that the reasonable accommodation exception payment standards must be covered in the oral briefing, HUD is requiring that an explanation of reasonable accommodation exception payment standards must be included in the briefing packet. HUD believes providing written guidance in the information packet will better address the commenter's concerns as the family will have access to guidance on this subject throughout their housing search.

Briefing Method

A commenter recommended that the regulation for the briefing packet should outline the most critical information for families when they are provided their initial voucher, because excessive amounts of information can be overwhelming for families. The commenter also recommended that PHAs should have the discretion to determine which method of communication, including oral, print, and electronic communications, is proper for the briefing packet, and the regulation should explicitly state that the briefing can be provided in a manner that is not oral, according to the PHA's discretion, while acknowledging that accessibility and interaction between staff and families are required.

Another commenter recommended referencing § 982.301(a), the right to meaningful language access for families whose members are limited English proficient, and how to request and access meaningful language assistance from the PHA. The commenter further stated that in § 982.301(b)(10), HUD should reference how tenants can request language assistance, whether via written translation of documents or oral interpretation, for the PHA; HUD should require that the PHA identify staff members who will coordinate the PHA's language access policies; and the tenant briefing should include translation and oral interpretation for individuals who are limited English proficient in § 982.301(c).

HUD Response: HUD regulations require that the briefing packet contain specific information that is important for families when they are provided with their initial voucher. HUD does not agree that the briefing packet should categorize which pieces of information are more important than others, as all information is required and important for voucher families. HUD does not agree that the regulation should allow for other types of briefings and believes requiring an oral briefing ensures that all families fully understand how the program works and have the opportunity to ask questions and discuss information presented. HUD notes that new paragraph (c) in § 982.310 already addresses providing information for persons with limited English proficiency. HUD has also addressed access to translation in PIH Notice 2020–32 which provides for alternative briefing methods, as well as how to ensure meaningful access for limited English proficient speakers and believes no additional changes to § 982.301 are warranted.

4. Approval of Assisted Tenancy (§ 982.305)

60-Day HAP Contract Execution in § 982.305(c)(4)

A commenter disagreed with HUD's proposal to require a 60-day period to execute a HAP contract and a lease term and noted that requiring PHAs to get permission from HUD to execute a HAP contract in cases exceeding the 60-day period is unnecessary because it is not in the interest of the parties to unnecessarily delay the process. As an alternative, the commenter suggested increasing the contract execution time from 60 days to 90 days to eliminate the need for any additional action from the PHA or HUD and require PHAs to notify HUD when the PHA goes beyond the 60 days, so that HUD can track the prevalence of the extensions requests and re-examine this policy in the future while avoiding administratively burdening PHAs and landlords.

Another commenter did not support a maximum 60-day timeframe between lease effective date and the date of HAP contract execution. The commenter opined that many HCVs are lease-in-place vouchers in rent stabilized units, so PHAs cannot request that the owner sign a new lease at the start of the subsidy without violating local rent laws.

HUD Response: HUD appreciates the comments and clarifies that the requirement to execute a HAP contract no later than 60 days from the beginning of a lease term is already a requirement under current regulations at § 982.305(c)(4) and not newly proposed. HUD also understands the concerns of commenters around extenuating circumstances and believes that the proposed change to allow a PHA to request an extension of HUD sufficiently addresses those concerns. Therefore, HUD will finalize § 982.305(c)(4) as proposed.

5. Eligible Housing (§ 982.352)—Independent Entity Functions and Compensation

Questions 5 and 6: Functions, Other Than Those Identified in the Proposed Rule, That an Independent Entity Should Perform in the Case of PHA-Owned Units

Functions of Independent Entities

Commenters opposed adding duties to independent entities. One commenter stated the functions identified in the proposed rule are the same as the current regulation, and that no other functions should be authorized to an independent entity. Another commenter stated that HUD should not require independent entities to perform other functions beyond those proposed because doing so would increase the costs as well as decrease funding availability for other program functions. One commenter stated that the independent entity requirements should be re-examined so that PHAs are not burdened by the oversight of such entities, and that PHAs should be entrusted to carry out the activities, such as ensuring compliance with selection process, inspections and rent setting—just as PHAs are under the public housing program. The commenter suggested having the PHAs carry out these duties with proper documentation and subject to review through the required annual independent audit.

Another commenter disapproved of HUD requiring an independent entity to conduct duties that the PHA can do itself, such as approve contract renewals, conduct inspections, and conduct rent reasonableness tests. The commenter further emphasized the burden of using independent entities for activities, such as performing inspections because there is a shortage of vendors trained in UPCS–V protocol, and many PHAs conduct rent reasonableness tests through third-party software, making the need for independent entities obsolete. The commenter recommended that HUD require an independent entity to conduct inspections only for special inspections or compliance to lessen the PHA's burden. While another commenter noted that HUD's proposed list of activities to be performed by an independent entity is too long, suggesting HUD reconsider the requirement that an independent entity receive evidence that the PHA is following regulations during the development activity or rehabilitation. This commenter noted that there are already several layers of review at local and Federal levels, and that, in the case of mixed-finance, HUD may have already reviewed the transaction.

A commenter further suggested that independent entities not be required to review awards of Low-Income Housing Tax Credits (LIHTC) or HOME Investment Partnership Program (HOME) funds, as well as PHA-owned project selections and stated that HUD should defer to the PHA to determine when revitalization of a former public housing site is needed. Additionally, the commenter objected to the requirement that independent entities (rather than PHAs) must determine any rent adjustments by an OCAF as part of their rent calculation responsibilities for any PHA-owned units.

HUD Response: HUD agrees that no additional duties need to be added to the independent entity functions but for the addition of one function under § 983.57 requiring the independent entity to approve substantial improvement on units under a HAP contract in accordance with § 983.212 (see the discussion of § 983.57 later in this preamble). HUD has consistently maintained that PHAs cannot appropriately perform any function that would present a clear conflict for units they own. 42 U.S.C. 1437f(o)(11) reflects this view by requiring that the unit of general local government or a HUD-approved independent entity perform inspections and rent determinations. In addition, while the PHA is generally responsible for selecting PBV projects in accordance with § 983.51, including developing the procedures for submission and selection of PBV proposals, HUD believes that, to ensure fairness and impartiality, it is necessary for an independent entity or the HUD field office to review the selection process the PHA undertook and determine that the PHA-owned units were appropriately selected based on the selection procedures specified in the PHA Administrative Plan. Finally, as previously noted, PHAs are statutorily prohibited from determining rents for PHA-owned units; calculating the amount of the reasonable rent and any rent adjustments by an OCAF are integral parts of the process. Accordingly, HUD maintains the requirement that the independent entity must calculate any rent adjustments by an OCAF for PHA-owned units.

Independent Entity Compensation

A commenter suggested that HUD expressly permit a PHA to seek reimbursement of independent entity expenses from project owners as operating costs.

HUD Response: Independent entity functions are not a project owner's responsibility. Tasks performed by the independent entity are administrative functions that the PHA would otherwise be performing if the units did not meet the definition of PHA-owned. PHAs may therefore compensate the independent entity from PHA administrative fees (including fees credited to the administrative fee reserve).

Support for PHAs Keeping Documents

Commenters supported PHAs keeping rent reasonableness and inspection documents and providing copies to the field office only upon request. A commenter noted that this is not required for non-PHA-owned units, and the field offices lack capacity to review these reports.

HUD Response: HUD retains the language proposed at § 982.352(b)(1)(v)(A) requiring rent reasonableness and HQS information be communicated to the family and PHA, but not submitted to HUD unless upon request. HUD agrees that this framework balances HUD's interest in proper oversight and PHAs' administrative burden.

6. Establishment of Life-Threatening Conditions (§ 982.401(o))

Some commenters approved of the list of Life-Threatening Conditions (LTCs). Other commenters suggested that the list should include other items such as mold, due to its harmful impact on individuals with respiratory and immune deficiencies; non-functioning locks; roaches; asbestos; radon; rat infestations; non-functioning heating or hot water systems; properties determined uninhabitable by a city agency; inability of heating system to maintain a minimum of 55 degrees Fahrenheit during cold season; utilities not in service; an absence of a functioning toilet; and missing exterior doors or windows. Another commenter stated that a missing lightbulb should not be an LTC.

One commenter suggested condensing and summarizing the list, as a high level of detail could lead to errors in inspections when multiple criteria must be met to be considered an LTC. Another commenter supported HOTMA's streamlining changes but stated that it is unwarranted to find minor HQS violations as a safety hazard or a reason to terminate HAP assistance. A separate commenter recommended that HUD immediately update the HQS inspector checklists to accurately reflect LTCs. Another commenter recommended that HUD only require the list for initial inspection and not for regularly scheduled annual or biennial inspections.

One commenter stated that HUD should clarify that a unit without a carbon monoxide (CO) detector should not be considered an LTC if there is no CO source in the unit. Another commenter urged HUD not to add CO detectors to HQS through HOTMA and instead ensure consistency across HUD programs by implementing statutory CO requirements through standalone rulemaking. One commenter suggested that voucher applicants and those moving with continued assistance should receive notice of proximity to a Superfund site or contaminated sites on the National Priorities List (NPL) at application, lease signing, and at recertification. This commenter also recommended that HUD expand its Memorandum of Understanding (MOU) with the EPA, which is currently limited to Project-Based Rental Assistance (PBRA) and public housing, to all forms of HUD assistance, and suggested HUD and EPA map all assisted projects and their proximity to sites on the NPL.

Commenters also suggested that PHAs should be allowed to add other conditions into their Administrative Plan. A commenter suggested that HUD allow PHAs to continue using their own pre-existing definitions as a replacement for HUD's NLT definitions. A commenter urged HUD not to require PHAs to adopt the NLT provisions as a prerequisite for adopting alternate inspections. One commenter stated that HUD should only require PHAs to outline deviations from the definition of "life-threatening conditions" in the Administrative Plan instead of repeating HUD's regulations. Another commenter suggested HUD waive the on-site inspection requirement when PHAs use alternative procedures to correct NLT deficiencies.

One commenter suggested that HUD undertake a thorough and public examination with significant stakeholder outreach and participation before changing to the proposed list of LTCs, which is based on UPCS–V and imposes a higher standard than is currently required.

Commenters opposed the expansion and addition of new HQS fail items being categorized as life-threatening because it would limit the PHAs' ability to consider local conditions and hinder applicants from quickly accessing their units.

HUD Response: HUD has decided not to finalize the revisions in the proposed rule to § 982.401 through the HOTMA final rule. All comments made through this HOTMA rulemaking process were taken into consideration in the drafting of the NSPIRE Standards Notice. Commenters had another opportunity to provide feedback through that notice, published to the **Federal Register** (87 FR 36426) on June 17, 2022. All current LTCs are defined in the final NSPIRE Standards Notice (88 FR 40832) published June 22, 2023. All future updates to the LTC list will also be subject to notice and comment in the **Federal Register**.

7. Enforcement of HQS (§§ 982.404, 983.208)

Usage Suggestions for Abated Funds

Commenters suggested various usages for abated funds, such as security

deposits, portion of rent, costs for families moving due to the termination, application fees, and other mandatory expenses.

A commenter suggested relocation assistance for affected tenants should be mandatory, using funds from the abated PBV HAP or TPVs. Commenters also stated that the proposed rule is unclear as to whether the security deposits and moving costs are the only eligible expenses or if the PHA can determine additional expenses and suggested that the PHAs should determine what comprises eligible assistance expenses and refer to the URA cost schedule for moving costs.

HUD Response: HUD appreciates these comments on the use of TPVs and abated funds. With respect to TPVs, these vouchers are not provided in connection with PBV contract terminations or abatement of assistance. In addition, HUD cannot mandate the use of abated funds for relocation assistance to families. The statute does not require the PHA to use abated funds for relocation assistance; instead, it provides the PHA with discretion to use funds for this purpose. Specifically, section 8(G)(vii)(III) of the 1937 Act states: ''The [PHA] may provide assistance to the family in finding a new residence, including use of up to two months of any assistance amounts withheld or abated . . . for costs directly associated with relocation of the family to a new residence, which shall include security deposits as necessary and may include reimbursements for reasonable moving expenses incurred by the household, as established by the Secretary.''

Consistent with the statutory language, and in response to the comments regarding the eligible expenses that may be covered, HUD has provided additional language regarding the permitted uses of abated funds for relocating tenants. Specifically, HUD has added that PHAs may assist families in finding a new unit, including using up to two months of the withheld and abated assistance payments for costs directly associated with relocating to a new unit, including security deposits, temporary housing costs, or other reasonable moving costs as determined by the PHA based on their locality. HUD has further clarified that if the PHA is using withheld or abated assistance payments to assist with the family's relocation costs, the PHA must provide security deposit assistance as necessary, as required by the statute.

Protection of Tenants

Many commenters suggested going further to protect tenants from evictions and subsidy terminations in the event their unit fails an HQS inspection. Commenters warned that the proposed rule would allow PHAs to abate and terminate an entire HAP contract if a single unit fails HQS and tenants may face higher rent under HCV rules or face an owner that evicts them despite the regulatory language.

Commenters stated that withholding HAP during the cure period for HQS violations may create an incentive to evict tenants. Commenters recommended HUD require that tenants cannot be held liable for amounts of HAP withheld or abated, such abatement is not grounds for eviction, and tenants cannot be held liable for their own portion of the rent during abatement. A commenter noted that, in some cases, the PHA withholds HAP for HQS violations that are not an immediate threat to health and safety and do not warrant a tenant to withhold rent under State law and HUD should clearly state that when the PHA is relieved of paying back rent, the tenant is as well, despite any State law discrepancies regardless of State law unless the State law provides stronger tenant protections. A commenter further expressed that when HAP is abated, the tenants should be notified.

Commenters recommended that HUD explicitly state that if a PHA terminates a PBV HAP contract based on a breach of conditions requirements, any of the units that continue to meet or have been brought into compliance with HQS requirements should be allowed to continue under the program. Another commenter recommended that HUD should specify in § 982.404(d)(2)(ii) that the family's assistance may only be terminated in accordance with § 982.555 if a family fails to move within the allotted time. A commenter also suggested that HUD clarify § 982.404(e)(1) to include that a PHA may extend the 90 days for families as needed based on individual circumstances, without HUD approval, and state that for relocation protections, public housing includes properties either pre- or post-conversion under RAD, section 18, or other provision of law, not to include section 9 public housing.

One commenter requested further clarity on whether the requirement for families to be provided at least 90 days to find a new unit after the HAP contract is terminated, refers to 90 calendar days or 90 ''tolled'' days of voucher time, which is required under the Family Move regulations.

A commenter also stated that a PHA must provide a preference to families who relocated due to HQS deficiencies. This commenter sought clarification from HUD on whether the preference for the public housing waiting list would take precedence over other existing public housing preferences. Another commenter stated that HUD's proposed language in § 982.404(e)(2) does not consider that PHAs need to manage limited vacancies to best serve the residents already within the public housing program, or for the many applicants on that program's waiting list. This commenter recommended that HUD modify the proposed language within § 982.404(e)(2) to clarify that HCV family participants transfer into public housing units shall not take preference over the PHA's needs for a Section 504, VAWA, or other emergency need.

One commenter stated that HUD providing a public housing preference for families affected by HCV abatements unable to find a new voucher unit would potentially lead to decreased mobility for HCV participants. The commenter suggested that it would be advantageous to allow payments up to 120 percent of fair market rents for such families, which would enable them to access higher rental markets within the spectrum of ZIP codes served by the PHA. This commenter agreed with the HOTMA language, permitting the PHA to use up to two months of the assistance payments that were withheld or abated under the family's terminated HAP contract for cost directly associated with the relocation of the family because these provisions would provide greater mobility to HCV families.

HUD Response: The language giving PHAs the option to withhold HAP during the cure period is required under HOTMA. In response to the comment regarding procedures under § 982.555, HUD cannot override State and local law regarding enforcement of the lease agreement. HUD has further clarified that tenants relocated due to an HQS deficiency must be given a selection preference by the PHA for public housing, where applicable. HUD has clarified that the PHA must issue the family a voucher to move at least 30 days prior to termination of the HAP contract.

HUD has clarified that the requirement for families to be provided at least 90 days to find a new unit after the HAP contract is terminated, refers to 90 calendar days.

HUD appreciates the suggestion to allow payment standards up to 120 percent of FMR. This change is not necessary as PHAs may currently apply for 120 percent fair market rents and/or SAFMRs under 982.503, which provides for expanded access to rental markets

for all families. FMRs are established for entire geographies, and not on a case-by-case basis, except in the case of a reasonable accommodation exception payment standard (RA EPS) for people with disabilities.

HUD appreciates the recommendation that HCV participant transfers should not take preference over Section 504, VAWA, or other emergency transfers. HUD agrees and finds that 24 CFR 982.404(e)(2) as drafted in this final rule is sufficient and notes that Section 504 transfers must occur under the requirements of 24 CFR part 8, including 8.28, and VAWA emergency transfers must occur in accordance with HUD's VAWA regulations at 24 CFR part 5, subpart L, and program regulations.

Withholding HAP Harms Landlords

A commenter warned that withholding HAP during the 30-day correction period would hurt smaller landlords and potentially discourage them from future participation.

HUD Response: This language cannot be changed because the option for PHAs to withhold HAP during the cure period is required under HOTMA.

Mandatory Termination

A commenter opposed requiring a mandatory termination after 180 days of abatement because it would be an administrative burden and decrease availability of subsidized housing. Another commenter suggested clarification on whether the plural ''HAP contracts'' at § 982.404(a)(2) reflects other contracts for units besides noncompliant contracts would be terminated due to the HQS noncompliance of one unit. Another commenter suggested that the 180-day proposed timeline for termination is a reasonable balance of interests, as required by statute.

HUD Response: HUD has maintained the language around mandatory termination because HUD finds it necessary given the importance of assisted families' housing meeting quality standards. The 180 days maximum is consistent with § 982.455.

HUD has updated § 982.404(a)(2) to read that if the owner fails to maintain the dwelling unit in accordance with HQS, the PHA must take enforcement action in accordance with this section.

Include Renewed Contracts or HAP Contracts Entered Into After the Rule Implementation

A commenter stated that HUD should expand this rule to include renewed HAP contracts or HAP contracts that are entered into after the rule's implementation.

HUD Response: This final rule applies to both new HAP contracts and HAP contracts renewed after this rule is implemented.

90-Day Voucher Terms

One commenter supported the 90-day voucher terms for contracts cancelled due to abatement.

HUD Response: HUD appreciates the supportive comment.

PHA Discretion To Waive and Reimburse

A commenter also recommended clarifying in § 982.404(a)(4) that the PHA has discretion to waive the requirement making the owner responsible for correcting deficiencies where the damage is not from ordinary use, and that the waiver is not just the requirement to be responsible for the deficiency, but the applicability of the entire subparagraph including abatement and withholding provisions. This commenter also urged HUD to clarify that PHAs have the discretionary authority to reimburse the property owner either for a portion or all HAP amounts withheld, which the commenter stated is clearly provided within HOTMA.

HUD Response: HUD has clarified in this final rule that the PHA must identify in its Administrative Plan both the conditions and amounts for withholding HAP. This also includes the conditions and amounts of payments made for the period HAP was withheld.

Monitoring

One commenter suggested that HUD monitor how many PHAs reimburse funds and review their reimbursement policies.

HUD Response: HUD appreciates this suggestion and will consider this outside of this rulemaking.

Tenant-Caused Damage

Commenters addressed whether the tenant or PHA should be responsible for repairs to unit damages. One commenter suggested that HUD provide an exception for § 982.404(a)(4) to address damages that have been caused by domestic abusers and obligate PHAs to require the owner to make the repairs in instances of domestic abuse. This commenter also suggested not using incidents of abuse as a means to terminate a survivor's tenancy and to allow the PHA and owner to take all legal action against the abuser for the damage.

Another commenter found the regulations to be confusing and potentially in conflict with State laws and local practice because in many states tenants are prohibited from carrying out their own repairs. The commenter suggested that for HUD to shift responsibility to the tenant to make the repairs, then HUD should place a higher burden on the landlord. The commenter additionally recommended that, if the landlord charges the tenants for repairs to tenant-caused damage, HUD should require a reasonable repayment plan and that the PHA must continue to pay the HAP during the term of the repayment agreement, so long as the tenant continues to abide by the terms of the lease. This commenter suggested the repayment plan allow landlords to charge an initial fee, which must not exceed 40 percent of the tenant's income, and then impose a reasonable period for the tenant to pay the remainder to the landlord, with longer repayment periods for tenants facing financial hardship. This commenter also recommended PHAs should terminate a HAP contract due to tenant-caused damages only after remedies, consistent with State landlord-tenant laws, have been exhausted and HUD should encourage maintaining units as part of the low-income housing stock.

Another commenter recommended that HUD revise § 982.404(a)(4) and (b)(2) as well as the procedure in the case of tenant-caused damages, consistent with HOTMA section 101(a)(3). Another commenter suggested waiving HQS deficiencies caused by tenants from the landlord's responsibility.

HUD Response: HUD appreciates the comments around tenant-caused damage to the unit. HUD has revised § 982.404(b)(2) and § 983.208(c)(2) to clarify that in cases of tenant-caused deficiencies, the tenant is not necessarily required to physically correct the deficiencies themselves. Rather, the tenant is responsible for ensuring that the deficiencies are corrected by taking all steps permissible under the lease and State and local law, which might include paying the owner for the costs of the necessary repairs. HUD has not gone further to require a PHA to establish a specific repayment plan. HUD has further revised § 982.404 at paragraph (a)(4) and § 983.208 at paragraph (b)(3) to better align with HOTMA section 101(a)(3) in terms of when the PHA may waive the landlord responsibility for HQS deficiencies that have been determined to have been caused by the tenant, any member of the household, or any guest or other person

under the tenant's control, other than damage resulting from ordinary use.

HUD has chosen not to add specific language around tenant damages caused by domestic abusers in this section. However, all VAWA housing protections under 24 CFR part 5, subpart L apply. HUD appreciates the commentor's suggestion but has not added a regulatory requirement for a repayment plan for owner correction of tenant-caused deficiencies. HUD is concerned that imposing additional restrictions on the owner in terms of how and when the owner can recover amounts owed under the lease will discourage owner participation in the HCV program. Nothing in the final rule would prevent the owner from choosing to offer a repayment plan to the family. However, the manner in which the owner may collect amounts owed under the lease for tenant-caused damages should continue to rest with the owner, subject to the terms of the owner's lease.

Remote Visual Inspections

Another commenter stated that Remote Visual Inspections (RVI) should not be used to verify a HQS deficiency correction where there is a life-threatening condition on the property. The commenter suggested HUD should require PHAs to conduct in-person inspections prior to a family moving into a unit that failed HQS for health and safety reasons. This commenter expressed that PHAs should be required to independently check for lead hazards in any Housing Choice Voucher (HCV) home and warned that the proxy to test for lead-based paint after watching a short video is insufficient. This commenter recommended a select use of RVI to reduce administrative burdens for PHAs and increase the speed at which voucher tenants can lease-up, without impacting the family's health.

HUD Response: HUD appreciates this comment but is not addressing the use of RVI in this rule.

8. PHA Initial Unit Inspection (§ 982.405)

Question 4. Are HUD's proposed deadlines by which the PHA must both inspect the unit and notify the owner if the reported deficiency is confirmed reasonable?

Commenters found HUD's proposed deadline reasonable because the adoption of the Non-Life-Threatening (NLT) process is optional. A commenter suggested that HUD include additional time in case a resident does not want to move and requests a ''final appeal,'' or courtesy inspection to remain in the unit if the deficiency is now remedied. Another commenter stated that HUD's proposal to allow flexibility in the rule for inspections and notification of deficiencies is adequate, and that the 30-day extension for inspections will permit adequate time for PHAs and owners to schedule the inspection and discuss deficiencies. One commenter stated that 24 hours for a PHA to notify the owner of any life-threatening deficiency is reasonable, but the commenter also suggested extending the timeline to inspect a unit and notify the landlord for emergency items to two days.

Commenters supported HUD maintaining the current timelines for inspections and repairs due to PHAs' discretion over whether to undertake the LTC/NLT process. One commenter offered 15 days to repair, and another commenter suggested PHAs have absolute discretion to establish their own timelines. Another commenter opposed the 30-day repair requirement because PHAs would be required to define what constitutes ''receipt of written notice'' in their Administrative Plan, which can present a challenge for PHAs that do not use email. A commenter recommended modifying § 983.103(c)(2) to specify that the 30-day inspection period applies if a PHA adopts the NLT exception to inspections.

Another commenter stated that HUD should extend the timeline for emergency inspections from 48 to 72 hours. This commenter further suggested that PHAs should be required to adopt HUD's NLT definition only if they implement the NLT inspection option. One commenter suggested that HUD clarify that the 24-hour correction period for LTCs should only apply when the family is in the unit, and that if the HAP is not being paid while the family is waiting for the landlord to correct a deficiency, the family is also not responsible for making the HAP payment. Another commenter stated that HUD is unnecessarily requiring NLT repairs to be made within 30 days of the owner receiving written notice of the defects, and that it is unclear whether requiring PHAs to proactively waive an owner's responsibility to correct defects will be conducted on a policy level or whether it will be conducted on a case-by-case basis, ultimately requiring notification.

HUD Response: HUD appreciates the multiple comments about the timeframes for unit inspections and believes the timeframes in the proposed rule were reasonable. HUD notes that the requirements under NLT are distinct from other inspection types and HUD believes that it is reasonable for NLT repairs be made within 30 days, given that application of the NLT provision is voluntary, and, under the NLT provision, the unit has never been in compliance with HQS.

HUD has clarified that, in the case of tenant-caused deficiencies, the owner is responsible until such time as it has been determined that the tenant is responsible in a particular case.

9. Housing Assistance Payments Contract (§§ 982.451, 983.204)

PHA-Owned Unit Certification Option

Commenters supported the proposal to not require the creation of a separate legal entity, which commenters stated would add costs and complexity and negatively impact PHAs participating in RAD and section 18 conversions. One commenter stated that HUD should not allow a PHA to permit certifications instead of HAP contracts, explaining that such permission would create ambiguity in other regulations that reference HAP contracts but not certifications, hurting those that rely on those regulations to enforce and protect the rights of tenants.

Another commenter suggested adding a statement that phasing groups of contract units into the HAP contract is acceptable in § 983.204(a). This commenter recommended adding, ''or phases thereof'' after ''HAP contract,'' for § 983.204(c).

HUD Response: HUD appreciates the support to not require the creation of a separate legal entity. Concerning PHA-owned certifications, in order to eliminate ambiguity of cross-references in other regulations, HUD has revised the language of §§ 982.451(c)(2), 983.204(e)(2) to clarify that the PHA-owned certification serves as the equivalent of the HAP contract as it relates to the obligations of the PHA as owner and that, where the PHA has elected to use the PHA-owned certification, all references to the HAP contract throughout parts 982 and 983 shall be interpreted to be references to the PHA-owned certification.

Further, HUD determined the explanation of how to implement staged completion of contract units would be more appropriate in § 983.156. Therefore, HUD has added a paragraph addressing the commenter's concern to § 983.156 and has cross-referenced § 983.156 in § 983.204(c).

PBV HAP Contract Effective Date

Another commenter stated that HUD should not establish a required maximum 60-day timeframe between the lease effective date and the HAP contract execution date, since complex

development and financing timetables may make the timeframe too short. Instead, the commenter recommended a 120-day period before a HAP contract is required to be prospective for PBV projects.

HUD Response: The commenter seems to conflate the rules between the tenant-based and project-based voucher programs, as evidenced by submitting the above comment under the heading of § 982.305. The long-standing requirement in the PBV program is that the effective date of a PBV HAP contract must be on or after the execution date of the PBV HAP contract, and the HAP contract must be effective before the effective date of the first lease covering a contract unit occupied by an assisted family. HUD has clarified this requirement at § 983.204(d).

10.A. Payment Standard Schedules and Basic Range Amounts (§ 982.503(b) and (c))

One commenter suggested that HUD revise § 982.503(c)(3) to refer to 90 days instead of three months for consistency.

HUD Response: This is current regulatory language, and no change was proposed in the rule. HUD, therefore, makes no changes in this final rule.

10.B. Exception Payment Standards (§ 982.503(d))

Greater Flexibility To Reduce Administrative Burden (Question 7)

Several commenters stated that HUD should provide greater flexibility to PHAs to establish exception payment standards without HUD approval to reduce PHAs' administrative burden and allow more rapid responses to changing rental markets. Another commenter stated that HUD should grant PHAs this flexibility if the PHA has the budget authority to support the increased payment standard as demonstrated by HUD's Two-Year Tool, which calculates the PHA leasing potential considering current Voucher Management System (VMS) data, HUD-held reserves (HHR), and Budget Authority (BA). This commenter remarked that HUD's Payment Standard Tool can also be used to establish exception payment standards.

One commenter expressed that HUD should allow exception payment standards for individual projects rather than require PHAs to apply exception payment standards to every project in the same ZIP code.

HUD Response: HUD appreciates the comments about the need for greater flexibility in establishing exception payment standards. In response to these comments, HUD will allow PHAs to go up to 120 percent of the published fair market rent upon notification to HUD so long as the PHA meets the required thresholds as set forth in 24 CFR 982.503(d)(3). HUD disagrees with the comment that PHAs should be allowed to establish different payment standards for individual projects rather than the same payment standard for the applicable geographic area. 42 U.S.C. 1437(f)(o)(13)(H) requires that rents established under PBV HAP contracts must not exceed 110 percent of the applicable FMR, or any exception payment standard approved by the Secretary for the HCV program. Accordingly, there is no statutory authority to establish exception payment standards for individual PBV projects. HUD will continue to require PHAs to adopt one payment standard for an applicable geographic area.

Allow Higher Payment Standards

Commenters generally urged HUD to allow for higher payment standards. Commenters stated that higher standards would allow PHAs to expand geographic choices, allow families to stay in gentrifying neighborhoods, and make the SAFMR exception payment tool more cost-effective to expand housing opportunities in low-poverty areas. A commenter reasoned that in cases where the PHA chooses not to seek HUD approval, families would benefit from a higher SAFMR, which would ensure the prudence of policy because rents would remain subject to reasonableness.

Another commenter suggested that increased payment standards up to 120 percent of the SAFMR should apply for ZIP codes with SAFMRs that exceed the regional FMR. One commenter stated that PHAs should have discretion to set exception payment standards up to 150 percent of SAFMR. Commenters also supported HUD's proposed policy at § 982.503(d)(4) and (e)(1) allowing PHAs to choose to set payment standards up to 110 percent of the SAFMR without HUD approval, and asked HUD to clarify this allowance by explicitly stating it in § 982.503(d)(2). The commenters stated many PHAs are unaware of the flexibility the policy described in § 982.503(d)(2) provides them.

Commenters stated that HUD's proposal in § 982.503(d)(2) to require the lowest SAFMR in an area with more than one FMR constrains PHA authority and HUD should instead allow PHAs to utilize the highest FMR. As an alternative, a commenter recommended that HUD implement a threshold that is not dependent on the FMR and instead use a threshold that is reflective of the risk of excessively high payment standards. Another commenter stated that HUD should rely on its own ZIP code grouping guidance, which allows PHAs to set payment standards for a group of ZIP codes as long as the payment standard is 90 to 110 percent of the SAFMR of each ZIP code in the group. This commenter also stated that SAFMRs are burdensome and undesirable for PHAs to determine payment standards, and as an alternative, PHAs should be allowed to provide data to HUD and have the local field office approve the payment standards based on actual current market data. The commenter noted that there is no reason to change the ability of owners to request increases below 110 percent of the FMR or the reasonable rent.

A commenter supported payment standard increases as providing stability to families and landlords but urged HUD to ensure that rent increases occur at a reasonable rate and not forced with an abrupt increase.

HUD Response: HUD agrees with the numerous public comments in support of allowing higher payment standards. This final rule allows PHAs to set payment standards up to 120 percent of the FMR upon notification to HUD that the PHA meets certain criteria. Since the publishing of the proposed rule, HUD has also seen the success of PIH Notice 2022–09, and successor notices, which provided a streamlined regulatory waiver process for PHAs to establish payment standards from 111 to 120 percent of the FMR. Given this, HUD decided that added flexibility to set payment standards up to 120 percent of FMR is sufficient and notes that there are other avenues for PHAs to request to establish payment standards at higher levels.

HUD notes that § 982.503(d)(2) does explicitly allow PHAs that are not in designated SAFMR areas or have not opted voluntarily to adopt SAFMRs to establish exception payment standards up to 110 percent of SAFMR without HUD approval. Additionally, HUD will allow PHAs to opt-in to the SAFMR by notification to HUD, rather than requiring HUD approval by modifying § 888.113(c)(3).

HUD does not agree that requiring the lowest SAFMR in an exception area that crosses one or more FMR boundaries constrains PHA authority. Each ZIP code, regardless of whether it crosses one or more FMR boundaries has one established SAFMR amount. Therefore, a PHA adopting ZIP code-based SAFMRs will only have one SAFMR to choose from, which is how many PHAs establish exception payment standards

using the SAFMR under this provision. However, in some cases, PHAs group ZIP code-based SAFMRs into one FMR area to reduce administrative burden. In the case of grouping, the basic range of all of the selected ZIP codes is still applicable. Therefore, in lieu of establishing a unique payment standard for each ZIP code area, a PHA may use this flexibility to establish payment standards for ''grouped'' ZIP code areas, provided the payment standard in effect for each grouped ZIP code area is within the basic range of the SAFMR for each ZIP code area in the group. As a result, HUD finds that the policy is reasonable and will continue with this final rule as proposed. HUD also notes that § 982.503(d)(4) allows PHAs the opportunity to provide rental market data to HUD to support their request for exception payment standards.

Consolidation of Exception Payment Standard Requirements

A commenter supported consolidating exceptions to payment standards in a single location.

HUD Response: HUD appreciates this comment and in this final rule HUD consolidates exception payment standard regulations in § 982.503(d).

Rental Market Data

Several commenters opposed HUD requiring PHAs to submit rent comparability studies or require certification of the rental market data in exchange for higher payment standards. A commenter stated that HUD does not indicate that PHAs are providing insufficient rental data in requests for an exception payment standard. Commenters also noted that HUD requiring data for exception payment standards to be prepared through a market study or by a certified appraiser is administratively and financially burdensome for PHAs. One commenter proposed that HUD establish a procedure to extend payment standards in rapidly changing, low-vacancy, and high-cost rental markets, seeing as there are existing mechanisms to request exception payment standards within the HCV program. Other commenters proposed that HUD accept data from various sources including local market studies from the PHA or other local entities that use data from a reputable or verifiable source, online surveys of the local renter community, PHAs that use a third-party vendor to conduct rent reasonableness for rental market data, rental market studies prepared by institutions of higher education, industry data, or the rent reasonableness evaluations.

A commenter proposed that HUD expand access to data on low-vacancy areas by unit size and exclude public housing developments from calculating FMR/SAFMR because a concentration of low rent units in large public housing developments are in exception payment standard areas. The commenter further stated that when there are differentials with the ACS data, HUD should allow PHAs to provide local data if the data is available.

Another commenter encouraged HUD to establish clear rental data standards for the exception payment standards that require HUD's approval to decrease the administrative burden so that PHAs can obtain justified exceptions, while simultaneously providing reasonable assurance that the higher standard is needed to cover market rents in the area.

Another commenter stated that the exception payment standard assessment HUD requires for a PHA should be easily accessible to under-resourced PHAs and that HUD should provide funding grants to PHAs that will conduct a study for purposes of applying for an EPS. The commenter also stated that HUD should require PHAs to make their assessments of rental market data and rent comparability data publicly available, because this would improve advocates' and residents' understanding of the PHA's assessment of the rental market, as well as create transparency and an opportunity to challenge FMR policies that do not further fair housing goals. One commenter recommended that HUD set the data requirements by notice for easier adjustment based on lessons learned and when new types of data become available.

HUD Response: HUD appreciates the comments and intends to issue a PIH notice with further clarification regarding data that must be submitted in support of an exception payment standard request. However, under this final rule at § 982.503, PHAs no longer must submit supporting data for exception payment standard requests between 110 and 120 percent of the FMR if they notify HUD that they meet certain criteria. Additionally, data submitted for exception payment standards greater than 120 percent usually relies on American Community Survey and Census data, and therefore is available to the public already.

Responses to Question 8 (Maximum Cap)

Several commenters objected to HUD's maximum cap on exception payment standard amounts due to differences in high-cost markets and requested PHA flexibility. A commenter stated that limits on exception payment standards should be data driven. Another commenter recommended that HUD ensure that PHAs are setting payment standards to affirmatively further fair housing and reduce voucher concentration in high poverty communities, considering that some studies have shown that most SAFMR PHAs set higher payment standards in low-opportunity communities and lower payment standards in higher-opportunity communities. The commenter further suggested that HUD require PHAs to submit rent comparability studies and payment standard schedules to HUD, so that HUD can easily review them and compile them in a national database. According to the commenter, the database would easily allow voucher holders to explore their options regarding portability moves and would help HUD and advocates ensure that payment standards comply with the applicable requirements.

A commenter stated an additional level of scrutiny is reasonable for PBVs, because requiring approval for an exception payment standard above 120 percent of FMR for project-basing vouchers could prevent abuse and make development deals financially acceptable and profitable for developers. A commenter stated that HUD should allow exception payment standards, even if they are high, if there is data showing that the higher standard is needed to cover typical market rents in an exception area. The commenter expressed that instituting a cap preventing PHAs from establishing exception payment standards would risk excluding voucher holders from areas of the metropolitan area, therefore reinforcing economic and racial segregation. In the alternative, the commenter suggested that if HUD establishes a cap, it should be set high enough to ensure that voucher holders have access to a substantial variety of low-poverty and high-opportunity areas, including areas where their own racial or ethnic group does not predominate. This commenter also recommended that HUD adjust the proposed rule to accommodate the use of SAFMRs for non-metropolitan ZIP codes and publish SAFMRs for those ZIP codes whenever sufficient data is available. The commenter stated that HUD should apply the same standard to SAFMRs in non-metro areas as it does in metro areas as well as establish SAFMRs in ZIP codes where there are sufficient data and defaulting to a county-based FMR in ZIP codes where there are not. The commenter added that HUD should

explicitly state in § 982.503(d)(4) that PHAs may not require families to pay more than 30 percent of their income for rent as a condition for receiving an exception payment standard for a reasonable accommodation. The commenter further noted that the need for exception payment standards could be reduced by ensuring that FMRs reflect actual market rents, particularly in areas where rents are rapidly rising.

A commenter encouraged HUD to implement methods for PHAs to increase payment standards where appropriate, such as requiring payment standards in areas with significant disparity between voucher concentration in impoverished neighborhoods and affordable unit distribution or financial incentives. The commenter found upper limits on exception payment standards as unnecessary and stated that PHAs should have maximum flexibility to seek higher standards, as there are already natural ''limits'' on requesting excessive rents. In conclusion, the commenter objected to using the success rate payment standards for metro areas with very low vacancy rates, while requiring other metro areas to use the SAFMR flexibilities.

HUD Response: After considering these comments on HUD's questions about instituting a maximum cap on exception payment standard amounts, HUD will not institute a maximum cap. HUD recognizes the need to set payment standards that are responsive to the rent conditions in multiple areas. This final rule also allows voluntary use of SAFMRs in non-metropolitan ZIP codes for which HUD publishes SAFMRs, in order to provide PHA serving those area greater flexibility to set payment standards that reflect local market conditions. While HUD appreciates the comments on additional flexibilities, HUD is not making broader changes to exception payment standards in this final rule, other than those discussed above.

Reasonable Accommodation (§ 982.503(d)(4))

A commenter recommended that HUD clarify that ''FMR boundaries'' refers to the ZIP code boundary and not the metropolitan boundary. This commenter further emphasized that HUD must revise the payment standard regulations as well as revise or rescind inconsistent PIH notices, to clearly state that tenants who request a reasonable accommodation for an increase in the payment standard are not required to pay 40 percent of their income in rent to see the benefits of the accommodation. The commenter mentioned that the fair housing laws allow individuals with disabilities to request higher payment standards as a reasonable accommodation if there is a disability-related need for a particular unit (for example, it has accessibility features or is located in proximity to services/supports which will be lost if the client has to relocate); however, the commenter noted that HUD should add to § 982.503(d)(4) because HUD has not fully implemented the third sentence of the HOTMA-revised section 8(o)(1)(D), which prohibits HUD from establishing additional requirements regarding the amount of adjusted income paid by a family receiving a reasonable accommodation.

HUD Response: Tenants who request exception payment standards as reasonable accommodations are not required to pay 40 percent of their income in order to benefit from the accommodation, so no change to this rule is needed in order to achieve that result. HUD will issue guidance clarifying this point.

10.C. Payment Standard Below the Basic Range (§ 982.503(e))

A commenter suggested proactive requirements, such as HUD establishing limits for when PHAs can set payment standards below the basic range (below 90 percent of the applicable FMR) because PHAs have financial incentives to set lower payment standards, regardless of adverse effects on families. The commenter also recommended that HUD require PHAs seeking approval for payment standards below the basic range to provide rent data showing that the requested standard would be adequate to cover rents and utilities for at least 40 percent of units in each ZIP code and show that no more than 40 percent of current voucher holders would be required to pay more than 30 percent of their income for rent. The commenter stated that HUD should eliminate the success rate payment standard option because the SAFMR-based payment standard flexibility could effectively accomplish more.

A commenter opposed HUD's changes to how it will assess requests for payment standards below the basic range. The commenter expressed that the proposed language threatens the affordability characteristic of the voucher program because the proposed language sets low assessment standards, does not require PHAs to meet rent burden or market rents criteria, and removes the current prohibition on payment standards below the basic range at agencies where more than 40 percent of voucher families pay gross rents above 30 percent of their adjusted income. The commenter encouraged HUD to require PHAs seeking approval for a payment standard below the basic range to implement a policy that holds families harmless where the reduction in payment standard causes an increase in the family's rent. The commenter stated that requiring PHAs to hold families harmless would allow PHAs to incentivize new or moving voucher families to consider lower poverty communities, while not penalizing families who decide to remain in their current home.

Another commenter objected to HUD's proposal to provide PHAs with discretion to determine lower payment standards without HUD approval because PHAs cut corners or costs which end up falling on the participant. The commenter remarked that lower payment standards tend to cause tenants to pay higher rents they cannot afford, and to prevent this HUD should ensure tenants will be held harmless should the family remain in the unit for a reasonable period until the family can relocate to a new affordable unit.

HUD Response: HUD appreciates the comments and will continue to require the PHA to request approval to establish a payment standard lower than the basic range. This final rule states that unless necessary to prevent terminations, HUD will not approve payment standards below the basic range if the payment standard would cause the family share to exceed 30 percent of adjusted income for more that 40 percent of families with tenant-based vouchers.

Responses to Question 9 (§ 982.503(h))

a. Is 40 percent a reasonable ''significant percentage of families,'' or should the trigger be raised to a higher percentage of families (for example, the HUD review would be triggered if 50 percent of families pay more than 30 percent of AMI as the family share)?

Commenters stated that 40 percent is a reasonable ''significant percentage of families.'' Some commenters stated that a higher percentage would create a burden on families before an assessment is completed. One commenter stated that HUD should not increase the threshold for the share of families paying more than 30 percent of their income, as there are already more than 40 percent of voucher families paying more than 30 percent, and that HUD should lower the threshold below 40 percent. Another commenter stated that available data shows that HUD's monitoring has not lowered the cost-burden on households below 40 percent, which the commenter stated is a high definition of ''significant.'' This

commenter proposed that HUD require PHAs to raise their payment standard and reduce minimum rents when more than 40 percent of families pay more than 30 percent of their adjusted income or when success rates fall below a certain percentage, so that they must set payment standards that avoid rent burdens and allow voucher families to lease-up.

HUD Response: HUD appreciates the comments and maintains the current regulation measurement of 40 percent being a ''significant percentage of families'' as reasonable.

Make Data Public

Commenters recommended that HUD make the data and evaluations used to determine rent burdened percentages public with the opportunity for public comment, which would allow voucher holders and other public members to know how the PHA is doing.

HUD Response: Data on rent burden is already public in HUD's two-year tool and the payment standard tool, which can be accessed at HUD's HCV Utilization page at *https://www.hud.gov/program_offices/public_indian_housing/programs/hcv/Tools.*

Include Rent Burdens in SEMAP

Commenters suggested that HUD incorporate rent burdens into SEMAP. A commenter recommended doing this by adding an indicator measuring compliance with the 40 percent standard. Another commenter recommended adding two new indicators measuring the portion of assisted families that are rent burdened and the percentage of voucher families who are not able to lease up within search periods.

HUD Response: HUD appreciates the comments, but changes to SEMAP are beyond of the scope of this rulemaking.

b. If HUD were to replace 40 percent with a higher percentage of families, as described above, should HUD also establish an additional threshold that would trigger a review even though the number of families paying more than 30 percent of AMI had not reached the significant percentage?

Commenters objected to HUD's proposal to establish an additional threshold that would trigger a review, even though the number of families paying more than 30 percent of AMI had not reached the significant percentage. One commenter stated that HUD's proposed standards are arbitrary because PHAs sufficiently conduct internal tracking to monitor rent burden and suggested that if HUD implements a rent burden standard, then PHAs should be exempt if they show that they are trying to address the rent burden issue by using SAFMRs or high opportunity payment standards or if they have an adequate success rate for voucher holders. Another commenter noted that it is unnecessary for HUD to add additional metrics for determining whether HUD should review a PHA's payment standards. One commenter suggested that the trigger for HUD's review should be when 50 percent of the families pay more than 30 percent AMI as the family share of the rent. The commenter explained that families may stay in a unit and pay more than 30 percent of income in tight rental markets where locating a new unit may be financially and administratively burdensome. This commenter suggested consistently defining ''significant percentage'' in all section 8 programs, defining ''significant percentage'' in regulation to prohibit PHAs from altering the definition, and providing additional information on what a PHA must do if the threshold is met.

HUD Response: As explained above, HUD appreciates the comments and maintains the current regulation measurement of 40 percent being a ''significant percentage of families'' as reasonable. HUD received multiple comments in opposition to changing the threshold of families paying more than 30 percent of their income as a trigger for review of a PHA's payment standard schedule. Therefore, HUD will continue its current practice of reviewing a PHA's payment standard schedule when HUD finds that 40 percent or more of families occupying units of a particular size pay more than 30 percent of their adjusted monthly income as the family share.

Responses to Question 10 Regarding Success Rate Payment Standards (§ 982.503(f))

Many commenters supported retaining success rate payment standards. One commenter objected to HUD tying additional payment standard functions to SAFMRs due to the lack of adoption of SAFMRs. Another commenter explained that the utility of the success rate payment standard is essentially eliminated if PHAs are given the option of setting exception payment standards at up to 120 percent of FMR without HUD approval, and stated that moving to and from the 40th to 50th percentile of rent has an almost identical impact on the resulting payment standard. This commenter supported retaining the success rate payment standard if HUD approval will still be required for exception payment standards above 110 percent of FMR. One commenter opposed retaining success rate payment standards. The commenter stated that the standards, set at the 50th percentile of the metro FMR, were ineffective at the stated goal of increasing housing opportunity for voucher families. Additionally, the commenter noted that the SAFMR final rule eliminated the regulations that governed the establishment of FMRs using 50th percentile rents, and HUD is currently phasing out its use of success rate payment standards. Another commenter stated that HUD should eliminate the success rate payment standard option because the SAFMR-based payment standard flexibility could effectively accomplish more.

HUD Response: Because this final rule increases flexibility for PHAs to set exception payment standards up to 120 percent of the FMR, HUD has determined that it is unnecessary to also retain success rate payment standards. This final rule eliminates the ability for PHAs to receive new success rate payment standards but allows them to continue to use previously approved success rate payment standard amounts.

11. How To Calculate Housing Assistance Payment (§ 982.505)

A commenter stated that HUD must ensure that participants are provided due process and a reasonable opportunity to decide whether the family can afford to remain in the subsidized unit if HUD increases payment standards after the initial HAP contract. The commenter offered the following suggestions if HUD increases payment standards: (1) allow the tenant 60 days after the increase request to decide or request moving papers; (2) phase in the rent increase over time or require that the PHA make up the difference to the higher standard; or (3) mirror the timeframe in § 505(c)(3) for increases and decreases. The commenter stated the proposed rule fails to adequately address arising problems when PHAs create payment standards that trap residents in low-opportunity, high poverty, and high crime areas, when families may need higher exception rents to access better schools, employment, or other resources for self-sufficiency. As a remedy, the commenter recommended that HUD map where families can live within the PHA's payment standards. One commenter recommended that HUD remove § 982.505(c)(4)(iii) to streamline the rent change process and prevent confusion among families that expect changes during the recertification process and not outside of the recertification process.

HUD Response: HUD appreciates the comments received on when to apply

increases in the payment standards to the family. This final rule, at § 982.505, requires PHAs to apply increases in payment standards no later than the earliest of (1) the effective date of an increase in the gross rent will result in an increase in the family's share, (2) the family's first regular or interim reexamination, or (3) one year following the effective date of the increase in the payment standard amount. This approach provides participating families the benefit of these increases more consistently and helps ensure that their portion of the rent remains affordable. This final rule also allows PHAs to adopt a policy, at their option, to apply an increase in the payment standard before these events occur. HUD will not remove paragraph (c)(4)(iii) because this provision eliminates the potential lag time between an increase in the rent to owner brought about by an increase in the payment standard and the increase in the assistance payment made on behalf of the family as a result of the increase in the payment standard.

Timeline

One commenter supported HUD's revisions on when to apply a reduction in the payment standard because the changes will promote fairness and consistency in the voucher program. Another commenter opposed the two-year adjustment timeline as an administrative burden for PHAs and believed it would provide no tangible benefit for families over a shorter timeline. This commenter stated that the current timeline of the second recertification already ensures adequate preparation for families and is when all contact with the family is planned from the PHA's perspective.

HUD Response: HUD appreciates the range of comments. HUD in this final rule will continue with requiring PHAs to give families two full years from the date of the application of the payment standard decrease to ensure all families have the same period of time to adjust to the decrease in the payment standard.

Payment Standard Timeline

A commenter supported requiring application of payment standard increases on the effective date of a gross rent increase instead of waiting until the next annual recertification or one year after the increase. The commenter recommended that HUD add a requirement to § 982.505(c)(4) that PHAs immediately address payment standard increases during the HAP contract term and before the effective date of the new payment standard, to protect tenants in rapidly rising rent markets.

HUD Response: HUD appreciates the comments and this final rule creates additional required times for when a payment standard must be increased in § 982.505(c)(4). HUD finds that these additional requirements sufficiently balance ensuring participants receive the benefit of payment standards and PHA administrative burden in applying increases in the payment standards.

Payment Standard Update Burden

A commenter opposed HUD's proposal at paragraph (c)(4) of § 982.505 (How to calculate HAP), adding two new points at which the family's payment standard may be increased, as unnecessarily burdensome and expressed concern regarding whether the number of transactions that would trigger the payment standard calculation to determine if an "increase in the family share" occurred will greatly outnumber the times the higher payment standard would be applied under the rule and expressed an appreciation for data supporting the proposed rule.

HUD Response: HUD appreciates these concerns. When paragraphs (c)(4) and new paragraph (c)(5) are read in conjunction, HUD believes the burden on PHAs of this change is relatively small and outweighed by the benefit to the family.

Specifically, the requirement that this commenter is concerned about, is as follows: when there is an increase in the payment standard, and when there is an increase in the gross rent, and the increase in gross rent would increase the family share, then the PHA must apply the increased payment standard, to reduce the burden on the family.

This requirement is limited to situations where the gross rent increase would increase the family share is intended to decrease the burden on the PHA, not increase it. If a PHA would prefer not to make this calculation, the PHA may apply the new payment standard every time there is a gross rent increase, or indeed as soon as they want to, regardless of whether the gross rent increase changes the family share calculation, per paragraph (c)(5).

12.A. Utility Allowance (UA) Schedule (§ 982.517)

Commenters suggested HUD allow PHAs to provide a UA for wireless internet to expand opportunity. A commenter noted that there is no statutory or regulatory prohibition on it and PHAs can use their own budgetary judgement to decide if they can afford to provide a UA for internet. Another commenter proposed that HUD consider broad ways to support assisted households during and after the pandemic. One commenter suggested that HCV UAs should include fees charged, as well as reflect the actual rates charged by the major utilities serving the units and the rate plans used by most tenants. This commenter also recommended that HUD not consider low-income discounts, unless there is universal access and verified tenant participation. To ensure transparency, the commenter also stated that supporting documentation for the calculation for the PHA's UA schedules for both HCV and PBV programs should be available to tenants' rights advocates, without resorting to cumbersome and vague FOIA and State public records acts. The commenter recommended that HUD's review should be retained and strengthened, to ensure compliance with the regulatory standards and consistency among UAs in similar climatic regions and markets, rather than ending the requirement for PHA submission of the schedule. Another commenter suggested that HUD continue to require PHAs to submit their UA schedules to HUD, which would provide a system of checks and balances and much needed oversight.

HUD Response: HUD is currently reviewing ways to support internet access for the families it serves in all assisted housing programs and how to best complement subsidies provided through the Affordable Connectivity Program (ACP) and Lifeline administered by the Federal Communications Commission (FCC). HUD is working to raise awareness among PHAs so they can help families enroll in the ACP and Lifeline programs. In addition to supporting the FCC programs, HUD is reviewing its assisted housing program policies across the department to align policies and support broadband. At this time, HUD is not providing in this final rule that PHAs may use UA schedules for internet; however, HUD has removed the language that explicitly prohibits wireless internet. In place of language prohibiting wireless internet, HUD added language providing that HUD may add utilities required to pass HQS by **Federal Register** notice allowing for public comment.

The language in § 982.517(b)(1) states that "the utility allowance schedule must be determined based on the typical cost of utilities and services paid by energy-conservative households that occupy housing of similar size and type in the same locality." The typical cost of utilities and services includes surcharges charged by the utility company. Many PHAs separate the surcharge out on the UA schedule. For

example, a family may have natural gas for their heating, cooking, and water heating and the natural gas company charges a monthly surcharge for this utility. A rate-based utility allowance is provided on the schedule for each of these utilities and the PHA also provides the family with an allowance for the surcharge if they have one or more natural gas-powered utilities in their home. While this is not a change in policy and HUD believes this is already the common practice at PHAs, HUD recognizes that it would be helpful for the regulation to be clearer. HUD is adding ''applicable surcharges'' to the list of utilities and services on the utility allowance schedule in § 982.517(b)(2)(ii).

PHAs develop their area-wide utility allowance schedules, both the regular schedule described in § 982.517(b)(v)(2)(i) and the new option for an energy-efficient schedule provided in § 982.517(b)(v)(2)(ii), based on the cost of utilities and services paid by energy-conservative households that occupy housing of similar size and type in the same locality. Household income or discounts provided to certain households are not a factor in the development of the utility allowance schedule.

HUD understands the concerns expressed by commenters encouraging HUD to continue collecting utility allowance schedules from PHAs. While the proposed language would have allowed submission to HUD only upon request for utility allowance schedules from PHAs, HUD agrees with commenters that proactive submission of utility allowance schedules will help with oversight. HUD has reverted § 982.517(a)(2) in this final rule to the existing codified language which requires submission of these schedules to HUD.

12.B. Area-Wide Energy-Efficient Utility Allowance Schedule (§ 982.517(b)(2)(ii))

Commenters stated that HUD should authorize PHAs to use energy-efficient utility allowance (EEUA) schedules. Another commenter stated that PHAs should have the option to implement alternative utility allowance schedules though they may be burdensome to implement. One commenter suggested that HUD should not require entire buildings to achieve energy saving design certifications for an individual unit to qualify for an EEUA. Further, the commenter stated that due to the time and cost, many property owners may elect to only install energy-efficient appliances and other design standard upgrades, and if so, property owners should not be penalized for their inability to achieve energy savings design certifications for entire buildings especially where the property owners can demonstrate that the EEUA schedule would best encourage conservation and the efficient use of HAP funds based on historic utility consumption data.

Other commenters stated that EEUA schedules should be voluntary because they require annual updates and are costly, and, as a result, they are better suited to PBV where the owner can be required to commission an annual update to keep using the schedule, or PHAs could make their decision based on their market areas and funding. Another commenter stated that utility allowance options would present a high possibility for error and could open PHAs up to charges of discrimination because it would be hard to identify units where alternate utility allowances could be used. A commenter suggested that HUD use the HUD Utility Schedule Model (HUSM) for all project types to minimize project-specific utility's administrative burden as well as permit PHAs the ability to decide their HUSM approach to determine UAs and be required to publish this in their Administrative Plan.
