New Network Future State Nomenclature Mapping

Under Phase 1 of the Postal Service network future state, the Postal Service is revising the DMM to provide site mapping nomenclature for facilities (e.g., NDC/RPDC). Phase 1 will not include site mapping in the Quick Service Guides (QSGs) or revisions to destination entry pricing nomenclature or labeling lists.

In some cases where there is overlapping of nomenclature in the DMM for market dominant and competitive products (e.g., DMM 204.3.0), the site mapping nomenclature is included in the New Mailing Standards for Domestic Mailing Services Products **Federal Register** notice (89 FR 27330–27353).

Resources

The Postal Service provides additional resources to assist customers with this price change for competitive products. These tools include price lists, downloadable price files, and **Federal Register** Notices, which may be found on the Postal Explorer® website at <http://pe.usps.com>.

The Postal Service adopts the described changes to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the *Code of Federal Regulations*. We will publish an appropriate amendment to 39 CFR part 111 to reflect these changes.

8.11 Bundle Reallocation To Protect SCF/LPC/RPDC Pallet for Periodicals Flats and Irregular Parcels and USPS Marketing Mail Flats on Pallets

8.11.1 Basic Standards

[Revise the text of 8.11.1 to read as follows:]

Bundle reallocation to protect the SCF//LPC (letters, flats)/RPDC (parcels) pallet is an optional preparation method (if performed, bundle reallocation must be done for the entire mailing job); only PAVE-certified presort software may be used to create pallets under the standards in 8.11.2 through 8.11.4. Presort software determines if mail for an SCF/LPC (letters, flats)/RPDC (parcels) service area would fall beyond the SCF/LPC (letters, flats)/RPDC (parcels) level if all finer level pallets are prepared. Reallocation is performed only when there is mail for the SCF/LPC (letters, flats)/RPDC (parcels) service area that would fall beyond the SCF/LPC (letters, flats)/RPDC (parcels) pallet level (e.g., to an ADC or NDC/RPDC pallet). The amount of mail required to bring the mail that would fall beyond the SCF/LPC (letters, flats)/RPDC (parcels) level back to an SCF/LPC (letters, flats)/RPDC (parcels) level is the minimum volume that will be reallocated.

8.11.2 General Rules

Reallocation rules are as follows:

[Revise the second and last sentence of item a to read as follows:]

a. * * * Reallocate only complete bundles and only the minimum number

of bundles necessary to create an SCF/LPC (letters, flats)/RPDC (parcels) pallet meeting the minimum pallet weight. Based on the weight of individual pieces within a bundle and bundling parameters, the weight of mail that is reallocated may be slightly more than the minimum volume required to create an SCF/LPC (letters, flats)/RPDC (parcels) pallet.

[Revise the last sentence of item b to read as follows:]

b. * * * If it is not possible to reallocate some mail from a 3-digit pallet first, then attempt to eliminate a 3-digit pallet and reallocate all mail from that pallet to create an SCF/LPC (letters, flats)/RPDC (parcels) pallet; if mail cannot be reallocated from a 3-digit pallet, then attempt to reallocate some mail from any 5-digit level pallet.

[Revise the text of item c to read as follows:]

c. The reallocation process may result in the elimination of a 3-digit pallet to create an SCF/LPC (letters, flats)/RPDC (parcels) pallet, but a 5-digit level pallet may not be eliminated to create an SCF/LPC (letters, flats)/RPDC (parcels) pallet.

[Revise the first sentence of item d to read as follows:]

d. When reallocating mail to create an SCF/LPC (letters, flats)/RPDC (parcels) pallet, reallocate mail from only one more finely sorted pallet. * * *

* * * * *

8.11.3 Reallocation of Bundles if Optional 3-Digit Pallets Are Prepared

Reallocation rules are as follows:

[Revise the first and last sentence of item a to read as follows:]

a. Attempt to identify a 3-digit pallet of adequate weight that can support reallocation of one or more bundles to bring the mail that has fallen through the SCF/LPC (letters, flats)/RPDC (parcels) level back to the SCF/LPC level without eliminating the pallet. * * *

* * * If a 3-digit pallet of adequate weight is available, create an SCF/LPC (letters, flats)/RPDC (parcels) pallet by combining the reallocated mail from the 3-digit pallet with the mail that would fall beyond the SCF/LPC pallet level.

[Revise the text of item b to read as follows:]

b. If no single 3-digit pallet within the SCF/LPC (letters, flats)/RPDC (parcels) service area contains an adequate volume of mail to allow reallocation of a portion of the mail on a pallet as described in the previous step, then eliminate one 3-digit pallet and reallocate all of the mail to create an SCF/LPC (letters, flats)/RPDC (parcels) pallet by combining it with the mail that would fall beyond the SCF/LPC (letters, flats)/RPDC (parcels) pallet level. As a

result, the software will not prepare one 3-digit pallet for the SCF service area if it is detrimental to the SCF/LPC (letters, flats)/RPDC (parcels) pallet.

[Revise the text of item c to read as follows:]

c. If preparation is under 8.0 and there are no 3-digit pallets, attempt to identify a 5-digit level pallet of adequate weight to support reallocation of one or more bundles to bring the mail that would fall beyond the SCF/LPC (letters, flats)/RPDC (parcels) pallet level back to the SCF/LPC (letters, flats)/RPDC (parcels) level. If preparation is under 10.0, 12.0, or 13.0 and there are no 3-digit pallets, attempt to identify a 5-digit level pallet of adequate weight to support reallocation of one or more bundles to bring the mail that would fall beyond the SCF/LPC (letters, flats)/RPDC (parcels) pallet level back to the SCF/LPC (letters, flats)/RPDC (parcels) level. A sufficient volume of mail must remain on the applicable pallet after reallocation to meet the pallet weight minimum established by the mailer in compliance with applicable standards. If a 5-digit level pallet of adequate weight is available, create an SCF/LPC (letters, flats)/RPDC (parcels) pallet by combining the reallocated bundles with the mail that would fall beyond the SCF/LPC (letters, flats)/RPDC (parcels) pallet level.

[Revise the text of item d to read as follows:]

d. If no single 5-digit level pallet within the SCF/LPC (letters, flats)/RPDC (parcels) service area contains an adequate volume of mail to allow reallocating a portion of the mail on a pallet as described in 8.11.3c, then no bundles will be reallocated and an SCF/LPC (letters, flats)/RPDC (parcels) pallet will not be prepared. Mail that falls beyond the SCF/LPC (letters, flats)/RPDC (parcels) pallet level must be placed on the next appropriate pallet (ADC/RPDC, ASF/RPDC, NDC/RPDC or MNDC/RPDC) or in the next appropriate sack (irregular parcels) or flat tray.

8.11.4 Reallocation of Bundles if Optional 3-Digit Pallets Are Not Prepared

Reallocation rules are as follows:

[Revise the first and last sentence of item a to read as follows:]

a. Attempt to identify a 5-digit level pallet of adequate weight to support reallocation of one or more bundles to bring the mail that would fall beyond the SCF/LPC (letters, flats)/RPDC (parcels) pallet level back to the SCF/LPC (letters, flats)/RPDC (parcels) level.
* * * * * If a 5-digit level pallet of adequate weight is available, create an SCF/LPC (letters, flats)/RPDC (parcels)

pallet by combining the reallocated bundles with the mail that would fall beyond the SCF/LPC (letters, flats)/RPDC (parcels) pallet level.

[Revise the text of item b to read as follows:]

b. If no single 5-digit level pallet within the SCF/LPC (letters, flats)/RPDC (parcels) service area contains an adequate volume of mail to allow reallocating a portion of the mail on a pallet as described in 8.11.4a, then no bundles will be reallocated and an SCF/LPC (letters, flats)/RPDC (parcels) pallet will not be prepared. Mail that falls beyond the SCF/LPC (letters, flats)/RPDC (parcels) pallet level must be placed on the next appropriate pallet (ADC/RPDC, ASF/RPDC, NDC/RPDC, or MNDC/RPDC) or in the next appropriate sack (irregular parcels) or flat tray.

8.12 Bundle Reallocation To Protect ADC/RPDC Pallet for Periodicals Flats and Irregular Parcels on Pallets

8.12.1 Basic Standards

[Revise the text of 8.12.1 to read as follows:]

Bundle reallocation to protect the ADC/RPDC pallet is an optional preparation method authorized for mailers using PAVE-certified presort software and may be used to create pallets under the standards in 8.12.2 and 8.12.3. Presort software determines if mail for an ADC/RPDC service area falls beyond the ADC/RPDC level if all finer level pallets are prepared. Reallocation is performed only when there is mail for the ADC/RPDC service area that falls beyond the ADC/RPDC pallet level (e.g., to sacks or flat trays). Reallocate only the minimum number of bundles necessary to create an ADC/RPDC pallet at the minimum required weight.

8.12.2 General Rules

Reallocation rules are as follows:

[Revise the second and last sentence of item a to read as follows:]

a. * * * Reallocate only complete bundles and only the minimum number of bundles necessary to create an ADC/RPDC pallet meeting the minimum pallet weight. Based on the weight of individual pieces within a bundle and bundling parameters, the weight of mail that is reallocated may be slightly more than the minimum volume required to create an ADC/RPDC pallet.

[Revise text of item b to read as follows:]

b. Reallocate only bundles of an SCF/LPC (letters, flats)/RPDC (parcels) pallet

from the same city and state as the ADC/RPDC (L005, Column B). This may be accomplished by reallocating a portion of the bundles from an SCF/LPC (letters, flats)/RPDC (parcels) pallet or reallocating all mail from the SCF/LPC (letters, flats)/RPDC (parcels) pallet. Bundles may be reallocated from a protected SCF/LPC (letters, flats)/RPDC (parcels) (PSCF/LPC (letters, flats)/RPDC (parcels)) pallet prepared under 8.11.

8.13 Bundle Reallocation To Protect NDC/RPDC Pallet for USPS Marketing Mail Flats on Pallets

8.13.1 Basic Standards

[Revise the text of 8.13.1 to read as follows:]

Bundle reallocation to protect the NDC/RPDC pallet level is an optional preparation method (if performed, bundle reallocation must be done for the complete mailing job); only PAVE-certified presort software may be used to create pallets under the standards in 8.13.2 through 8.13.4. The software will determine if mail for a NDC/RPDC service area would fall beyond the NDC/RPDC level when ASF/RPDC pallets are prepared. Reallocation is performed only when there is mail for the NDC/RPDC service area that would fall beyond the NDC/RPDC pallet level as a result of an ASF/RPDC pallet being prepared. The amount required to bring the mail back to the NDC/RPDC level is the minimum volume that would be reallocated from an ASF/RPDC pallet, when possible. The following “parent” NDCs/RPDCs can be protected with bundle reallocation by using mail from the ASF/RPDC “child” pallets indicated in Exhibit 8.13.1.

[Revise the heading of Exhibit 8.13.1 to read as follows:]

8.13.2 General Rules

In general, when reallocating:

[Revise the second and last sentence of item a to read as follows:]

a. * * * Reallocate only complete bundles and only the minimum number of bundles necessary to create a NDC/RPDC pallet that meets the minimum pallet weight. Based on the weight of individual pieces within a bundle and bundling parameters, the weight of mail that is reallocated may be slightly more than the minimum volume required to create a NDC/RPDC pallet.

[Revise the text of items b and c to read as follows:]

b. Use Exhibit 8.13.1 to reallocate bundles from the ASF/RPDC pallet to create a NDC/RPDC pallet. The ASF/RPDC pallet may be eliminated to protect the NDC/RPDC pallet.

c. Reallocate mail only from one ASF/RPDC pallet. Bundle reallocation is to be used only between the "parent" NDC/RPDC and the "child" ASF/RPDC. Mail from finer levels of pallets (e.g., SCF/LPC (letters, flats)/RPDC (parcels) pallets) may not be reallocated.

* * * * *

[Revise the heading and text of 8.13.3 to read as follows:]

8.13.3 Reallocation of Bundles From ASF/RPDC Pallets

When reallocating bundles from ASF/RPDC pallets:

a. Use Exhibit 8.13.1 to identify an ASF/RPDC pallet of adequate weight that can support reallocation of one or more bundles to bring the mail that has fallen through the NDC/RPDC level back to the NDC/RPDC level without eliminating the ASF/RPDC pallet. A sufficient amount of mail must remain on the ASF/RPDC pallet after reallocation to meet the minimum ASF/RPDC pallet weight. If an ASF/RPDC pallet of adequate weight is available, then create a NDC/RPDC pallet by combining the reallocated mail from the ASF/RPDC pallet with the mail that would fall beyond the NDC/RPDC pallet level.

b. If no single ASF/RPDC pallet within the NDC/RPDC service area contains an adequate volume of mail to allow reallocation of the portion of the mail on a pallet as described in 8.13.3a, then eliminate one ASF/RPDC pallet and reallocate all of the mail to create a NDC/RPDC pallet.

[Revise the heading and text of 8.14.3 to read as follows:]

8.14.3 NDC/RPDC and Mixed NDC/RPDC Pallets

Bundles placed on NDC/RPDC pallets must be machinable on NDC/RPDC parcel sorting equipment. Line 2 on pallet labels must reflect the processing category of the pieces. A NDC/RPDC or mixed NDC/RPDC (trays and sacks only) pallet may include pieces that are eligible for the DNDC price and others that are ineligible.

8.14.5 Securing Trays

[Revise the text of 8.14.5 to read as follows:]

Trays must be sleeved and strapped under 235.3.0 for First-Class Mail letters, 245.3.0 for USPS Marketing Mail letters, 235.3.0 for First-Class Mail flats, 245.3.0 for USPS Marketing Mail flats, 265.3.0 for Bound Printed Matter flats, or 275.3.0 for Media Mail flats and Library Mail flats, *except that* strapping is not required for any letter tray placed on a 5-digit, 3-digit, or SCF/LPC pallet secured with stretchwrap. In addition, if the processing and distribution manager gives a written waiver, strapping is not required for any letter tray that originates and destines in the same SCF/LPC (mail processing plant) service area.

8.18 Parcel Select DSCF Prices—Parcels on Pallets

8.18.1 Basic Preparation, Parcels on Pallets

Unless prepared under 8.18.2, or in sacks, mail must be prepared for the DSCF price as follows:

[Revise the text of items a and b to read as follows:]

a. *General.* Parcels for each SCF/RPDC area must be sorted to 5-digit scheme, 5-digit, SCF/RPDC (machinable parcels only), or 3-digit (nonmachinable) destinations on pallets. For purposes of this section, the term "pallets" includes preparation of parcels directly on pallets and in pallet boxes on pallets. Except

when prepared under 8.18.2, each 5-digit scheme, 5-digit, SCF/RPDC, and 3-digit pallet must meet a minimum volume requirement under one of the criteria in 8.18.1. Machinable and nonmachinable pieces may be combined on the same pallet or in the same overflow sack when sorted to 5-digit scheme or 5-digit destinations. In a single mailing mailers may prepare some pallets under the minimum volume requirement in 8.18.1b1 and some pallets under the minimum volume requirement in 8.18.1b2. A mailing entered at a destination SCF/RPDC facility containing pallets prepared under 8.18.1 also may include mail that is sacked for the DSCF price. Double-stacking is permitted if the requirements of 8.3 are met.

b. *Minimum volume.* The minimum volume per 5-digit scheme, 5-digit, SCF/RPDC, and 3-digit pallet can be met in one of the following ways:

1. Pieces may be placed on 5-digit scheme, 5-digit, SCF/RPDC, and 3-digit pallets, each containing at least 50 pieces and 250 pounds.

2. Pieces may be placed on 5-digit scheme, 5-digit, SCF/RPDC, and 3-digit pallets, each having a minimum height of 36 inches of mail (excluding the height of the pallet) (see 8.5.4).

[Revise the introductory text of item c to read as follows:]

c. *Overflow.* After a pallet(s) is filled to a 5-digit scheme, 5-digit, SCF/RPDC, or 3-digit destination, any remaining pieces that do not meet the minimum pallet requirements may be prepared in one or both of the following ways:

[Revise the first sentence of item c1 to read as follows:]

1. Placed in 5-digit scheme, 5-digit, SCF/RPDC, or 3-digit overflow sacks (no minimum number of pieces per sack) that are labeled in accordance with the 5-digit scheme, 5-digit, SCF/RPDC, or 3-digit sacking requirements for the DSCF price in 255.4.2. * * *

[Revise the first sentence of item c2 to read as follows:]

2. Placed on a 5-digit scheme, 5-digit, SCF/RPDC, or 3-digit pallet labeled under 8.18.1 that does not meet the minimums for the DSCF price. * * *

8.18.2 Alternate Preparation, Parcels on Pallets

DSCF price mailings not prepared under 8.18.1 may be prepared as follows:

[Revise the first sentence of item a to read as follows:]

a. *General.* All DSCF price mail in the mailing must be sorted to 5-digit scheme, 5-digit, SCF/RPDC (machinable parcels only), or 3-digit (nonmachinable) destinations under 8.18.2 (i.e., mail prepared under 8.18.1 and mail sacked under 255.4.2 must not be included in a mailing prepared under 8.18.2). * * *

[Revise the text of item b to read as follows:]

b. *Minimum volume.* To qualify for the DSCF price, no pallet may contain fewer than 35 pieces and 200 pounds, and for the entire mailing the average number of DSCF price pieces per 5-digit scheme, 5-digit, SCF/RPDC, or 3-digit destination must be at least 50.

[Revise the text of item c to read as follows:]

c. *Overflow.* After pallets are filled to a 5-digit scheme, 5-digit, SCF/RPDC, or 3-digit destination, any remaining pieces that do not meet the minimum pallet requirements may be prepared in one or both of the following ways:

[Revise the first sentence of item c1 to read as follows:]

1. Placed in 5-digit scheme, 5-digit, SCF/RPDC, or 3-digit overflow sacks (no minimum number of pieces per sack) that are labeled in accordance with the DSCF/DRPDC sacking requirements in 255.4.2. * * *

[Revise the first and fourth sentences of item h to read as follows:]

h. *Documentation.* A list of each 5-digit scheme, 5-digit, SCF/RPDC, and 3-digit pallet in the mailing that qualifies for the DSCF price must be submitted. * * * * *

For each pallet, the listing must show: the pallet identification number, the applicable 5-digit scheme, 5-digit, SCF/RPDC, or 3-digit destination of the pallet, the total weight of pieces on the pallet, the total number of pieces on the pallet, and the running total of pieces (i.e., the number equal to the number of pieces for that pallet plus the sum of the pieces on all pallets listed before it). * * *

8.19 Parcel Select DSCF Prices—Sacks on Pallets

[Revise the first and second sentence in the introductory text of 8.19 to read as follows:]

Mailers who prepared DSCF price mail in 5-digit scheme or 5-digit sacks under 255.4.2 may place 5-digit sacks for the same SCF/RPDC area on an SCF/RPDC pallet (including a pallet box on

a pallet). Mailers who prepare overflow from pallets under 8.18.1 or 8.18.2 may place 5-digit scheme or 5-digit sacks for the same SCF/RPDC area on an SCF/RPDC pallet (including a pallet box on a pallet). * * *
