

(TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P-7473-013. Comments emailed to Commission staff are not part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Authorized Project Facilities:* The project works include: (1) a 228-foot-long, 17-foot-high concrete dam; (2) a 790-acre reservoir; (3) a 220-foot-long power canal; (4) a 4-foot-diameter, 140-foot-long steel penstock; (5) a powerhouse with a capacity of 120 kilowatts; (6) a transmission line; and (7) appurtenant facilities. Except for operating emergencies beyond the exemptee's control and for short periods upon mutual agreement with the Maine Department of Environmental Protection and the Gilman Pond Lake Association (Lake Association), the exemptee is required to maintain water levels in accordance with the May 29, 1987 agreement with the Lake Association.

m. *Description of Proceeding:* The exemptee is in violation of Standard Article 1 of the exemption, issued on June 17, 1987 (*North New Portland Energy Corporation*, 39 FERC ¶ 62,365), codified in the Commission's regulations at 18 CFR 4.106. Article 1 provides, among other things, that the Commission reserves the right to revoke an exemption if any term or condition of the exemption is violated. The project has not operated since 2008 despite Commission staff's attempts to work with the exemptee to restore project operation.

The exemptee's failure to operate and maintain the project as authorized by its exemption is a violation of Standard Article 1. Following communications beginning in May 2020 between Commission staff and the exemptee regarding restoration of project

operation, the exemptee filed a letter on July 25, 2022 stating it planned to surrender the exemption and would not be making substantial repairs or restoring generation. On November 4, 2022, based on the exemptee's intent to surrender the project, Commission staff issued a letter indicating the exemptee should file a surrender application and requested a schedule for the application and documentation providing evidence of any progress towards developing the application. On November 3, 2023, Commission staff issued a letter requesting the exemptee file a surrender application. Sufficient time has passed and the exemptee has failed to file a surrender application or evidence of progress in developing one.

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.
