SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC received a license renewal application (LRA) from Powertech (USA) Inc., dated March 4, 2024, (ADAMS Package Accession No. ML24081A108) requesting renewal of Source and Byproduct Materials License No. SUA–1600. This license authorizes Powertech (USA) Inc. to operate the Dewey-Burdock Project, which is a uranium recovery facility that has not been constructed. The Dewey-Burdock Project is located in Fall River and Custer Counties, South Dakota. Powertech (USA) Inc. submitted the application, pursuant to part 2 and part 40 of title 10 of the *Code of Federal Regulations* (10 CFR).

The NRC's staff has determined that Powertech (USA) Inc. has submitted sufficient information to enable the staff to undertake a review of the application, and that the application is, therefore, acceptable for docketing. The current docket number, 40–9075, for license SUA–1600, will be retained. The determination to accept the LRA for docketing does not constitute a determination that a renewed license should be issued and does not preclude the NRC staff from requesting additional information as the review proceeds.

Before issuance of the requested renewed license, the NRC will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules
