Abstract: The Department of the
Interior (DOI) manages an estimated 75
million museum objects and over 92
thousand linear feet of archives in trust
for the American public. This diverse
collection consists of archaeological
artifacts, archives, biological specimens,
ethnographic objects, fine arts,
geological specimens, historic objects,
and paleontological specimens owned
and managed by DOI bureaus and
offices (bureaus). Although the majority
of DOI museum collections are housed
in DOI bureau facilities, at least 10
percent are located at more than 1,000
non-Federal repositories, primarily state
and tribal institutions, museums, and
university departments. Most of DOI
museum collections housed in non-
Federal repositories resulted from
projects on Federal lands, and include
objects from the disciplines of
archaeology, biology, geology, and
paleontology, as well as associated
project documentation (archives or
associated records). This information
collection request is directed to these
non-Federal repositories that house DOI
museum collections.

DOI museum collections cared for in
non-Federal repositories are established
as Federal property under Federal law.
Permits and other agreements for the
collection of artifacts and specimens
from public lands managed by DOI
further affirm Federal ownership.
Federal regulations and DOI policy
require that all permittees (authorized
individuals) conducting research or
performing compliance activities on
DOI-managed lands must ensure that
any retained museum objects and
archives collected or generated during a
project are: (1) accessioned and
cataloged according to DOI standards in
the Interior Collection Management
System (ICMS), its successor the
Museum Collection Management
System (MCMS), or another collection
management system from which the
