This information collection addresses the requirement that certain carriers with high-cost reporting obligations file information about the locations to which they have deployed broadband service meeting applicable public interest requirements (location information). The HUBB, a web-based portal, is used to accept this information. The Commission and the Universal Service Administrative Company (USAC) will use this information to monitor the deployment progress of reporting carriers, to verify the reporting carriers' claims of service at the reported locations, and to conform broadband deployment data between the HUBB and BDC. Such activities help the Commission ensure that support is being used as intended.

In addition, because data filed in the HUBB is publicly accessible, the reporting helps ensure public accountability and transparency.

This information collection further addresses the Commission's efforts to develop and establish a uniform national dataset of locations where broadband could be deployed and upon which new coverage data could be overlaid using a single methodology to harmonize fixed broadband reporting nationwide with granular location data as part of the BDC and required by the Broadband Deployment Accuracy and Technology Availability Act, Public Law 116–130, 134 Stat. 228 (2020) (Broadband DATA Act). In furtherance of its obligations, the Commission established the Broadband Serviceable Location Fabric (Fabric), which consists of a single, nationwide fabric that will contain geocoded information for all locations where a broadband connection can be installed in the United States and territories (Broadband Serviceable Location or BSL). Each BSL contained in the Fabric is provided a unique identification number. The HUBB portal will be updated in order to have support recipients include the unique Fabric identification number when reporting or revising high-cost broadband deployment location data. Including the BSL Fabric Identification Number in HUBB reporting will improve the accuracy and reliability of the broadband data used to monitor progress and ensure accountability with Commission programs. All BSL Fabric Identification Numbers are associated with the latitude, longitude, address, and number of units at the location. Accordingly, reporting the BSL Fabric Identification Number associated with a location encompasses the latitude, longitude, address, and number of units at the location.

This information collection addresses the location reporting and related certification requirements of high-cost support recipients electing to receive support through the Enhanced A–CAM program, *see generally Enhanced A–CAM Order*, and other programs. On October 30, 2023, the Wireline Competition Bureau (WCB) authorized 368 rate-of-return carriers to receive Enhanced A–CAM support in various states. Of this number, 100 electing carriers had been receiving cost-based CAF BLS support in 118 unique study areas, and 216 electing carriers had been receiving model-based support (A–CAM). The interim and final deployment milestones required for the Enhanced A–CAM program will supersede the existing interim and final deployment milestones for the carriers

participating in eligible programs. However, Enhanced A–CAM carriers were required to still report in the HUBB their deployments for calendar year 2023 prior to the start of the support term for Enhanced A–CAM program (January 1, 2024) to ensure carriers continue in good faith to deploy broadband pursuant to existing commitments.

Carriers receiving high-cost support to serve locations are subject to specific public interest obligations related to speed, usage, latency, and price as well as certain deployment milestones. Specifically, the Commission imposed defined deployment obligations and associated HUBB reporting requirements (annual location reporting and build-out certifications) for all fixed support recipients as well as annual reporting and certification requirements for Uniendo a Puerto Rico Fund and Connect USVI Fund Stage 2 mobile support recipients.

We therefore propose to revise this information collection. Finally, we propose to modify the burdens associated with existing and new reporting requirements to account for additional carriers that will be subject to these requirements.

Federal Communications Commission.
