

FEDERAL REGISTER

Vol. 89

Monday,

No. 231

December 2, 2024

Pages 95077–95716

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.govinfo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

Proclamation 10864 of November 22, 2024

The President

National Family Week, 2024

By the President of the United States of America

A Proclamation

My Dad taught me that family is the beginning, the middle, and the end. It is everything. During National Family Week, we celebrate the love shared by millions of American families, and we recommit to uplifting them, so that more families can build their American Dream together.

Since I came into office, I have been determined to give hardworking families a little more breathing room and a fair shot at achieving their dreams. That work began with building an economy that would strengthen our middle class. My American Rescue Plan kept millions of families afloat during the pandemic, ensuring they could stay in their homes and put food on their tables. It also delivered the largest-ever Child Tax Credit, which helped tens of millions of working families with the costs of raising children and cut child poverty nearly in half. My Bipartisan Infrastructure Law created jobs rebuilding our Nation's infrastructure—from strengthening our roads, bridges, and ports to removing lead pipes from our homes and expanding access to high-speed internet. My CHIPS and Science Act is revitalizing American manufacturing, and, throughout my Administration, we have created over 1.6 million manufacturing and construction jobs. And my Inflation Reduction Act made healthcare more affordable for families, saving millions of them an average of \$800 per year on their health insurance premiums. It will also cap the cost of out-of-pocket prescription drug costs at \$2,000 per year for seniors on Medicare, easing their cost of care. And through my PACT Act, we are helping veterans exposed to toxic materials get the benefits they and their families deserve. And today, incomes are up almost \$4,000, after adjusting for inflation, ensuring families have the breathing room they deserve.

My Administration has also been working to ensure families have the support they need to thrive while keeping them safe. I signed the Respect for Marriage Act, protecting the right to marriage for same-sex and interracial couples. I signed an Executive Order that directed the most comprehensive actions of any administration in history to make high-quality child care and long-term care more accessible and support caregivers. I took a slate of historic actions to prevent children from being placed into foster care and separated from their families without adequate justification. And I signed the most comprehensive gun reform bill in nearly three decades to end the scourge of gun violence ripping apart our families and deliver historic funding to address the youth mental health crisis.

During National Family Week, may we hold our loved ones close, both the family that have been there since the beginning and the family we have made along the way. And may we continue to fight for families—the heart and soul of our Nation.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 24 through November 30, 2024, as National Family Week. I invite States, communities, and individuals to join together in observing this week with appropriate ceremonies and activities to honor our Nation's families.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of November, in the year of our Lord two thousand twenty-four, and of the Independence of the United States of America the two hundred and forty-ninth.

A handwritten signature in black ink, appearing to read "Joe Biden", is written over a horizontal line.

Rules and Regulations

Federal Register

Vol. 89, No. 231

Monday, December 2, 2024

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Rural Housing Service

7 CFR Part 3550

[Docket No. RHS–24–SFH–0028]

Section 504 Direct Single Family Housing Home Repair Loans and Grants; Materials Pilot Program

AGENCY: Rural Housing Service, USDA.

ACTION: Notification of waiver.

SUMMARY: The Rural Housing Service (RHS or the Agency), a Rural Development agency of the United States Department of Agriculture (USDA), is issuing this document to implement a demonstration program, the Section 504 Direct Single Family Housing Loans and Grants pilot program. The Agency's intention is to evaluate the existing regulations and remove regulatory barriers to assist eligible applicants with improved ease of use for very low-income homeowners seeking to repair or rehabilitate their homes. This document briefly discusses the new waiver and provides contact information for additional details about the pilot program.

DATES: The effective date of the regulatory waiver is December 2, 2024. The duration of the pilot program is anticipated to continue until December 2, 2026, at which time the RHS may extend the pilot program (with or without modifications) or terminate it depending on the workload and resources needed to administer the program, feedback from the public, and the effectiveness of the program. If the pilot program is extended or terminated early, the RHS will notify the public via Notice publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Anthony Williams, Management and Program Analyst, Special Programs and Initiatives Branch, Single Family Housing Direct Loan Division, Rural

Development, U.S. Department of Agriculture, Email: anthonyl.williams@usda.gov; Phone: (202) 720–9649.

SUPPLEMENTARY INFORMATION:

Authority

Title V, Section 504 of the Housing Act of 1949, as amended; 42 U.S.C. 1474.

Background

The RHS offers a variety of programs to build or improve housing and essential community facilities in rural areas. The Agency offer loans, grants, and loan guarantees for single- and multifamily housing, child-care centers, fire and police stations, hospitals, libraries, nursing homes, schools, first responder vehicles and equipment, housing for farm laborers and much more. RHS also provides technical assistance loans and grants in partnership with non-profit organizations, Indian tribes, state and federal government agencies, and local communities.

The RHS Single Family Housing Direct Loans and Grants Program (SFHDLGP) Division implements the Section 504 loan/grant program under 7 CFR part 3550 with the objective to assist very low-income owner occupants of single-family homes in rural areas repair or rehabilitate their homes. Loan funds are available for repairs to improve or modernize a home, make it safer or more sanitary, or remove health and safety hazards. The eligibility requirements, as described in 7 CFR 3550.103, include that a homeowner (1) be unable to secure financial assistance at reasonable terms and conditions from a non-Agency source; (2) lack the personal resources to meet their needs; and (3) can demonstrate the ability to repay the Section 504 loan. For homeowners 62 years old and over at the time of application, grant funds are available to correct health or safety hazards, or remodel dwellings to make them accessible to a household member with a disability.

RHS may authorize limited demonstration (pilot) programs to test new approaches to offering housing under the statutory authority granted to the Secretary, as set forth in section 506(b) of the Housing Act of 1949 (42 U.S.C. 1476(b)). Additional demonstration program authority for regulations contained in 7 CFR part

3550 is provided at 7 CFR 3550.7. Any program requirements that are statutory will remain in effect.

Discussion of the New Section 504 Waiver

To align with current market payment requirements and further utilize program loan funding, RHS has determined to test and evaluate the regulatory requirements under the new pilot program for the Single-Family Housing Section 504 Home Repair Loan and Grant program under the pilot program authority provided at section 506(b) of the Housing Act of 1949 (42 U.S.C. 1476(b)).

The pilot program allows participants to use Section 504 loan or grant funds for the payment of construction materials prior to site delivery and without the need for the contractor to provide a surety bond. This component of the demonstration program will permit SFHDLGP to evaluate 7 CFR 1924.6(a)(12)(v)(C) which requires delivery of materials prior to payment and a surety bond. Under the demonstration program, payment in full may be made directly to the material supplier so the order can be placed or to the contractor upon receipt of paid invoice. Contractors expect up to fifty percent down prior to ordering materials or beginning work, and applicants struggle to find contractors that will work within the Agency's payment terms. This waiver is a step closer to meeting contractor expectations while still protecting applicants from fraudulent contractors that might take downpayment funds and never complete the job.

Eligibility Requirements

(1) Eligible participants—Eligible participants in the Section 504 Home Repair Loan and Grant program must abide by the regulatory requirements outlined in 7 CFR 3550. (2) Eligible States and Territories—The following twenty-five (25) States and U.S. Territories are selected based on program usage, involvement in the Rural Partners Network, and to provide wide geographic and historic production variation for the pilot program: Alabama, Alaska, American Samoa, Arizona, California, Florida, Georgia, Kansas, Kentucky, Minnesota, Mississippi, Montana, Nevada, North Carolina, North Dakota, Nebraska, New Mexico, New York, Puerto Rico, South

Dakota, Tennessee, Texas, Washington, West Virginia, and Wisconsin.

Paperwork Reduction Act

The regulatory waivers for this pilot program contain no new reporting or recordkeeping burdens under OMB control number 0575–0172 that would require approval under the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Non-Discrimination Statement

In accordance with Federal civil rights laws and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (e.g., Braille, large print, audiotope, American Sign Language) should contact the responsible Mission Area, agency, or staff office; or the 711 Relay Service.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, *USDA Program Discrimination Complaint Form*, which can be obtained online at <https://www.usda.gov/sites/default/files/documents/ad-3027.pdf> from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail*: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; or

(2) *Fax*: (833) 256–1665 or (202) 690–7442; or

(3) *Email*: program.intake@usda.gov
USDA is an equal opportunity provider, employer, and lender.

Joaquin Altoro

Administrator, Rural Housing Service.

BILLING CODE 3410–XV–P

CONSUMER FINANCIAL PROTECTION BUREAU

12 CFR Part 1026

Truth in Lending (Regulation Z) Annual Threshold Adjustments (Credit Cards, HOEPA, and Qualified Mortgages)

AGENCY: Consumer Financial Protection Bureau.

ACTION: Final rule; official interpretation.

SUMMARY: The Consumer Financial Protection Bureau (Bureau or CFPB) is issuing this final rule amending the regulation text and official interpretations for Regulation Z, which implements the Truth in Lending Act (TILA). The CFPB calculates the dollar amounts for provisions in Regulation Z annually; this final rule revises the amounts for provisions implementing TILA and its amendments, including the Home Ownership and Equity Protection Act of 1994 (HOEPA), and the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The CFPB adjusts these amounts based on the annual percentage change of the Consumer Price Index (CPI) effective June 1, 2024.

DATES: This final rule is effective January 1, 2025.

FOR FURTHER INFORMATION CONTACT:

George Karithanom, Regulatory Implementation & Guidance Program Analyst, Office of Regulations, at 202–435–7700 or at: <https://reginquiries.consumerfinance.gov/>. If you require this document in an alternative electronic format, please contact CFPB_Accessibility@cfpb.gov.

SUPPLEMENTARY INFORMATION: The CFPB is amending the regulation text and official interpretations for Regulation Z, which implements TILA, to update the dollar amounts of various thresholds that it must adjust annually to reflect the annual percentage change in the CPI as published by the Bureau of Labor Statistics (BLS). Specifically, for open-end consumer credit plans under TILA, the threshold that triggers requirements to disclose minimum interest charges will remain unchanged at \$1.00 in 2025.

For HOEPA loans, the adjusted total loan amount threshold for high-cost mortgages in 2025 will be \$26,968. The adjusted points-and-fees dollar trigger for high-cost mortgages in 2025 will be \$1,348. For qualified mortgages (QMs) under the General QM loan definition in § 1026.43(e)(2), the thresholds for the spread between the annual percentage rate (APR) and the average prime offer rate (APOR)¹ in 2025 will be: 2.25 or more percentage points for a first-lien covered transaction with a loan amount greater than or equal to \$134,841; 3.5 or more percentage points for a first-lien covered transaction with a loan amount greater than or equal to \$80,905 but less than \$134,841; 6.5 or more percentage points for a first-lien covered transaction with a loan amount less than \$80,905; 6.5 or more percentage points for a first-lien covered transaction secured by a manufactured home with a loan amount less than \$134,841; 3.5 or more percentage points for a subordinate-lien covered transaction with a loan amount greater than or equal to \$80,905; or 6.5 or more percentage points for a subordinate-lien covered transaction with a loan amount less than \$80,905. For all categories of QMs, the thresholds for total points and fees in 2025 will be 3 percent of the total loan amount for a loan greater than or equal to \$134,841; \$4,045 for a loan amount greater than or equal to \$80,905 but less than \$134,841; 5 percent of the total loan amount for a loan greater than or equal to \$26,968 but less than \$80,905; \$1,348 for a loan amount greater than or equal to \$16,855 but less than \$26,968; and 8 percent of the total loan amount for a loan amount less than \$16,855.²

¹ On April 20, 2023, the CFPB published a document announcing the availability of a revised version of its “Methodology for Determining Average Prime Offer Rates,” which describes the data and methodology used to calculate the average prime offer rate for purposes of Regulation C and Regulation Z. See 88 FR 24393. The methodology statement was revised to address the imminent unavailability of certain data the CFPB previously relied on to calculate average prime offer rates, as a result of a decision by Freddie Mac to make changes to its Primary Mortgage Market Survey® (PMMS). After evaluating potential sources, the CFPB determined that data from Intercontinental Exchange Mortgage Technology (ICE Mortgage Technology) is currently the most suitable option to replace PMMS. Beginning on April 24, 2023, the CFPB started using data provided by ICE Mortgage Technology and the revised methodology to calculate average prime offer rates.

² The QM categories in Regulation Z appear at 12 CFR 1026.43(e)(2), (e)(4), (e)(5), (e)(6), and (e)(7). Note that 12 CFR 1026.43(e)(6) applies only to covered transactions for which the application was received before April 1, 2016.

I. Background

A. Credit Card Annual Adjustments

Minimum Interest Charge Disclosure Thresholds

Sections 1026.6(b)(2)(iii) and 1026.60(b)(3) of Regulation Z implement sections 127(a)(3) and 127(c)(1)(A)(ii)(II) of TILA. Sections 1026.6(b)(2)(iii) and 1026.60(b)(3) require creditors to disclose any minimum interest charge exceeding \$1.00 that could be imposed during a billing cycle. These provisions also state that, for open-end consumer credit plans, the CFPB shall calculate the minimum interest charge thresholds annually using the CPI that was in effect on the preceding June 1; the CFPB uses the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) for this adjustment.³ If the cumulative change in the adjusted minimum value derived from applying the annual CPI-W level to the current amounts in §§ 1026.6(b)(2)(iii) and 1026.60(b)(3) has risen by a whole dollar, the CFPB will increase the minimum interest charge amounts set forth in the regulation by \$1.00. The CFPB bases its 2025 adjustment analysis on the CPI-W index in effect on June 1, 2024, as reported by BLS on May 15, 2024.⁴ As a result, the adjustment reflects the percentage change in the CPI-W from April 2023 to April 2024. The adjustment analysis accounts for a 3.4 percent increase in the CPI-W from April 2023 to April 2024. This increase in the CPI-W when applied to the current amounts in §§ 1026.6(b)(2)(iii) and 1026.60(b)(3) does not trigger an increase in the minimum interest charge threshold of at least \$1.00, and the CFPB, therefore, is not amending §§ 1026.6(b)(2)(iii) and 1026.60(b)(3).

B. HOEPA Annual Threshold Adjustments

Section 1026.32(a)(1)(ii) of Regulation Z implements section 1431 of the Dodd-Frank Act,⁵ which amended the HOEPA points-and-fees coverage test. Under § 1026.32(a)(1)(ii)(A) and (B), in assessing whether a transaction is a high-cost mortgage due to points and fees the creditor is charging, the applicable points-and-fees coverage test depends on whether the total loan

amount is for \$20,000 or more, or for less than \$20,000. Section 1026.32(a)(1)(ii) provides that the CFPB recalculate this threshold amount annually using the CPI index in effect on the preceding June 1; the CFPB uses the CPI-U for this adjustment.⁶ The CFPB bases the 2025 adjustment on the CPI-U index in effect on June 1, 2024, as reported by BLS on May 15, 2024. As a result, the adjustment reflects the percentage change in the CPI-U from April 2023 to April 2024, which is an increase of 3.4 percent. The adjustment to \$26,968 here reflects the 3.4 percent increase in the CPI-U index from April 2023 to April 2024 rounded to the nearest whole dollar amount for ease of compliance.⁷

Under § 1026.32(a)(1)(ii)(B), the HOEPA points-and-fees threshold is the lesser of 8 percent of the total loan amount or \$1,000. Section 1026.32(a)(1)(ii)(B) provides that the CFPB will recalculate the dollar amount threshold annually using the CPI index in effect on the preceding June 1; the CFPB uses the CPI-U for this adjustment. The CFPB bases the 2025 adjustment on the CPI-U index in effect on June 1, 2024, as reported by BLS on May 15, 2024. As a result, the adjustment reflects the percentage change in CPI-U from April 2023 to April 2024, which is an increase of 3.4 percent. The adjustment to \$1,348 here reflects the 3.4 percent increase in the CPI-U index from April 2022 to April 2023 rounded to the nearest whole dollar amount for ease of compliance.

C. QM Annual Threshold Adjustments

The CFPB's Regulation Z implements sections 1411 and 1412 of the Dodd-Frank Act, which generally require creditors to make a reasonable, good-faith determination of a consumer's ability to repay any consumer credit transaction secured by a dwelling and establishes certain protections from liability under this requirement for QMs.

On December 10, 2020, the CFPB issued a final rule amending the General QM loan definition in § 1026.43(e)(2).⁸

⁶ The CPI-U is based on all urban consumers and represents approximately 93 percent of the U.S. population.

⁷ Adjusted dollar amounts throughout this final rule are calculated by applying the relevant consumer price index to the previous year's unrounded dollar amount before rounding to the nearest whole dollar. Accordingly, applying the rounded consumer price index figures to the previous year's rounded dollar amounts may not add up to the total dollar amount shown.

⁸ 85 FR 86308 (Dec. 29, 2020). This final rule was initially effective on March 1, 2021, with a mandatory compliance date of July 1, 2021. On April 27, 2021, the CFPB issued a final rule

The final rule established pricing thresholds in § 1026.43(e)(2)(vi)(A) through (F) based on the spread of a loan's APR compared to the APOR for a comparable transaction as of the date the interest rate is set. To satisfy the General QM loan definition, a loan's APR must be below the applicable pricing threshold and must satisfy other requirements in § 1026.43(e)(2). Specifically, under § 1026.43(e)(2)(vi), a covered transaction is a QM if the APR does not exceed the APOR for a comparable transaction as of the date the interest rate is set by: 2.25 or more percentage points for a first-lien covered transaction with a loan amount greater than or equal to \$110,260 (indexed for inflation); 3.5 or more percentage points for a first-lien covered transaction with a loan amount greater than or equal to \$66,156 (indexed for inflation) but less than \$110,260 (indexed for inflation); 6.5 or more percentage points for a first-lien covered transaction with a loan amount less than \$66,156 (indexed for inflation); 6.5 or more percentage points for a first-lien covered transaction secured by a manufactured home with a loan amount less than \$110,260 (indexed for inflation); 3.5 or more percentage points for a subordinate-lien covered transaction with a loan amount greater than or equal to \$66,156 (indexed for inflation); or 6.5 or more percentage points for a subordinate-lien covered transaction with a loan amount less than \$66,156 (indexed for inflation).⁹ The rule states that the CFPB will adjust the loan amounts in § 1026.43(e)(2)(vi) annually on January 1 by the annual percentage change in the CPI-U that was in effect on the preceding June 1.¹⁰

Regulation Z also contains points and fees limits applicable to all categories of QMs. Under § 1026.43(e)(3)(i), a covered transaction is not a QM if the transaction's total points and fees exceed: 3 percent of the total loan amount for a loan amount greater than or equal to \$100,000 (indexed for inflation); \$3,000 (indexed for inflation) for a loan amount greater than or equal to \$60,000 (indexed for inflation) but less than \$100,000 (indexed for inflation); 5 percent of the total loan amount for loans greater than or equal to \$20,000 (indexed for inflation) but less than \$60,000 (indexed for inflation); \$1,000 (indexed for inflation) for a loan amount greater than or equal to \$12,500

effective June 30, 2021, which extended the mandatory compliance date of the final rule published on December 29, 2020, at 85 FR 86308, until October 1, 2022. 86 FR 22844 (Apr. 30, 2021).

⁹ The loan amounts in the regulatory text reflect the CPI-U in effect on June 1, 2020.

¹⁰ See comment 43(e)(2)(vi)-3.

³ The CPI-W is a subset of the Consumer Price Index for All Urban Consumers (CPI-U) index and represents approximately 30 percent of the U.S. population.

⁴ BLS publishes Consumer Price Indices monthly, usually in the middle of each calendar month. Thus, the CPI-W reported on May 15, 2024, was the most current as of June 1, 2024.

⁵ Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111-203, 124 Stat. 1376 (2010).

(indexed for inflation) but less than \$20,000 (indexed for inflation); or 8 percent of the total loan amount for loans less than \$12,500 (indexed for inflation). Section 1026.43(e)(3)(ii) provides that the CFPB will recalculate the limits and loan amounts in § 1026.43(e)(3)(i) annually for inflation using the CPI-U index in effect on the preceding June 1.

The CFPB bases the 2025 adjustment to the loan amounts applicable to the pricing thresholds for the General QM loan definition and the points and fees limits for all categories of QM on the CPI-U index in effect on June 1, 2024, as reported by BLS on May 15, 2024. As a result, the adjustment reflects the percentage change in CPI-U from April 2023 to April 2024, which is an increase of 3.4 percent. The 2025 adjustment¹¹ adopted here reflects a 3.4 percent increase in the CPI-U index for this period rounded to whole dollars for ease of compliance.

II. Adjustment and Commentary Revision

A. Credit Card Annual Adjustments Minimum Interest Charge Disclosure Thresholds—§§ 1026.6(b)(2)(iii) and 1026.60(b)(3)

The minimum interest charge amounts for §§ 1026.6(b)(2)(iii) and 1026.60(b)(3) will remain unchanged at \$1.00 for the year 2025. Accordingly, the CFPB is not amending these sections of Regulation Z.

B. HOEPA Annual Threshold Adjustment—Comments 32(a)(1)(ii)–1 and –3

Effective January 1, 2025, for purposes of determining under § 1026.32(a)(1)(ii)

¹¹ For 2025, a covered transaction is a qualified mortgage if the APR does not exceed the APOR for a comparable transaction as of the date the interest rate is set by: 2.25 or more percentage points for a first-lien covered transaction with a loan amount greater than or equal to \$134,841; 3.5 or more percentage points for a first-lien covered transaction with a loan amount greater than or equal to \$80,905 but less than \$134,841; 6.5 or more percentage points for a first-lien covered transaction with a loan amount less than \$80,905; 6.5 or more percentage points for a first-lien covered transaction secured by a manufactured home with a loan amount less than \$134,841; 3.5 or more percentage points for a subordinate-lien covered transaction with a loan amount greater than or equal to \$134,841; \$4,045 for a loan amount greater than or equal to \$80,905 but less than \$134,841; 5 percent of the total loan amount for loans greater than or equal to \$26,968 but less than \$80,905; \$1,348 for a loan amount greater than or equal to \$16,855 but less than \$26,968; or 8 percent of the total loan amount for loans less than \$16,855.

the points-and-fees coverage test under HOEPA to which a transaction is subject, the total loan amount threshold figure is \$26,968, and the adjusted points-and-fees dollar trigger under § 1026.32(a)(1)(ii)(B) is \$1,348. If the total loan amount for a transaction is \$26,968 or more, and the points-and-fees amount exceeds 5 percent of the total loan amount, the transaction is a high-cost mortgage. If the total loan amount for a transaction is less than \$26,968, and the points-and-fees amount exceeds the lesser of the adjusted points-and-fees dollar trigger of \$1,348 or 8 percent of the total loan amount, the transaction is a high-cost mortgage. The CFPB is amending comments 32(a)(1)(ii)–1 and –3, which list the adjustments for each year, to reflect for 2025 the new points-and-fees dollar trigger and the new loan amount dollar threshold, respectively.

C. Qualified Mortgages Annual Threshold Adjustments

Effective January 1, 2025, to satisfy § 1026.43(e)(2)(vi) under the General QM loan definition, the annual percentage rate may not exceed the average prime offer rate for a comparable transaction as of the date the interest rate is set by the following amounts: 2.25 or more percentage points for a first-lien covered transaction with a loan amount greater than or equal to \$134,841; 3.5 or more percentage points for a first-lien covered transaction with a loan amount greater than or equal to \$80,905 but less than \$134,841; 6.5 or more percentage points for a first-lien covered transaction with a loan amount less than \$80,905; 6.5 or more percentage points for a first-lien covered transaction secured by a manufactured home with a loan amount less than \$134,841; 3.5 or more percentage points for a subordinate-lien covered transaction with a loan amount greater than or equal to \$80,905; or 6.5 or more percentage points for a subordinate-lien covered transaction with a loan amount less than \$80,905. Accordingly, the CFPB is amending comment 43(e)(2)(vi)–3, which lists the adjustments for each year, to reflect the new dollar threshold amounts for § 1026.43(e)(2)(vi)(A) through (F).

Effective January 1, 2025, a covered transaction is not a qualified mortgage if, pursuant to § 1026.43(e)(3), the transaction's total points and fees exceed 3 percent of the total loan amount for a loan amount greater than or equal to \$134,841; \$4,045 for a loan amount greater than or equal to \$80,905 but less than \$134,841; 5 percent of the total loan amount for loans greater than or equal to \$26,968 but less than

\$80,905; \$1,348 for a loan amount greater than or equal to \$16,855 but less than \$26,968; or 8 percent of the total loan amount for loans less than \$16,855. The CFPB is amending comment 43(e)(3)(ii)–1, which lists the adjustments for each year, to reflect the new dollar threshold amounts for 2025.

III. Procedural Requirements

A. Administrative Procedure Act

The Administrative Procedure Act does not require notice and opportunity for public comment if an agency finds that notice and public comment are impracticable, unnecessary, or contrary to the public interest.¹² Pursuant to this final rule, the CFPB adds comments 32(a)(1)(ii)–1.ix, 32(a)(1)(ii)–3.ix, 43(e)(2)(vi)–3.ii, and 43(e)(3)(ii)–1.ix to update the exemption thresholds. The amendments in this final rule are technical and non-discretionary, as they merely apply the method previously established in Regulation Z for determining adjustments to the thresholds. For these reasons, the CFPB has determined that publishing a notice of proposed rulemaking and providing opportunity for public comment are unnecessary. The amendments, therefore, are adopted in final form.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) does not apply to a rulemaking where a general notice of proposed rulemaking is not required.¹³ As noted previously, the CFPB has determined that it is unnecessary to publish a general notice of proposed rulemaking for this final rule. Accordingly, the RFA's requirement relating to an initial and final regulatory flexibility analysis do not apply.

C. Paperwork Reduction Act

The information collections contained in Regulation Z which implements TILA are approved by OMB under Control number 3170–0015. The current approval for this control number expires on May 31st, 2026. In accordance with the Paperwork Reduction Act of 1995,¹⁴ the CFPB reviewed this final rule. The CFPB has determined that this rule does not create any new information collections or substantially revise any existing collections.

D. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the CFPB will submit a report containing this rule and other required information to the United

¹² 5 U.S.C. 553(b)(B).

¹³ 5 U.S.C. 603(a), 604(a).

¹⁴ 44 U.S.C. 3506; 5 CFR part 1320.

States Senate, the United States House of Representatives, and the Comptroller General of the United States prior to the rule taking effect. The Office of Information and Regulatory Affairs (OIRA) has designated this rule as not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 12 CFR Part 1026

Advertising, Banks, Banking, Consumer protection, Credit, Credit unions, Mortgages, National banks, Reporting and recordkeeping requirements, Savings associations, Truth-in-lending.

Authority and Issuance

For the reasons set forth in the preamble, the CFPB amends Regulation Z, 12 CFR part 1026, as set forth below:

PART 1026—TRUTH IN LENDING (REGULATION Z)

■ 1. The authority citation for part 1026 continues to read as follows:

Authority: 12 U.S.C. 2601, 2603–2605, 2607, 2609, 2617, 3353, 5511, 5512, 5532, 5581; 15 U.S.C. 1601 *et seq.*

■ 2. In Supplement I to Part 1026:

■ a. Under Section 1026.32—

Requirements for High-Cost Mortgages, revise *paragraph 32(a)(1)(ii)*; and

■ b. Under Section 1026.43—Minimum Standards for Transactions Secured by a Dwelling, revise *paragraphs 43(e)(2)(vi)* and *43(e)(3)(ii)*.

The revisions read as follows:

Supplement I to Part 1026—Official Interpretations

* * * * *

Section 1026.32—Requirements for High-Cost Mortgages

* * * * *

* * * * *

Paragraph 32(a)(1)(ii).

1. *Annual adjustment of \$1,000 amount.* The \$1,000 figure in § 1026.32(a)(1)(ii)(B) is adjusted annually on January 1 by the annual percentage change in the CPI that was in effect on the preceding June 1. The Bureau will publish adjustments after the June figures become available each year.

i. For 2015, \$1,020, reflecting a 2 percent increase in the CPI-U from June 2013 to June 2014, rounded to the nearest whole dollar.

ii. For 2016, \$1,017, reflecting a 0.2 percent decrease in the CPI-U from June 2014 to June 2015, rounded to the nearest whole dollar.

iii. For 2017, \$1,029, reflecting a 1.1 percent increase in the CPI-U from June 2015 to June 2016, rounded to the nearest whole dollar.

iv. For 2018, \$1,052, reflecting a 2.2 percent increase in the CPI-U from June 2016 to June 2017, rounded to the nearest whole dollar.

v. For 2019, \$1,077, reflecting a 2.5 percent increase in the CPI-U from June 2017 to June 2018, rounded to the nearest whole dollar.

vi. For 2020, \$1,099, reflecting a 2 percent increase in the CPI-U from June 2018 to June 2019, rounded to the nearest whole dollar.

vii. For 2021, \$1,103, reflecting a 0.3 percent increase in the CPI-U from June 2019 to June 2020, rounded to the nearest whole dollar.

viii. For 2022, \$1,148, reflecting a 4.2 percent increase in the CPI-U from June 2020 to June 2021, rounded to the nearest whole dollar.

ix. For 2023, \$1,243, reflecting an 8.3 percent increase in the CPI-U from June 2021 to June 2022, rounded to the nearest whole dollar.

x. For 2024, \$1,305, reflecting a 4.9 percent increase in the CPI-U from June 2022 to June 2023, rounded to the nearest whole dollar.

xi. For 2025, \$1,348, reflecting a 3.4 percent increase in the CPI-U from June 2023 to June 2024, rounded to the nearest whole dollar.

2. *Historical adjustment of \$400 amount.*

Prior to January 10, 2014, a mortgage loan was covered by § 1026.32 if the total points and fees payable by the consumer at or before loan consummation exceeded the greater of \$400 or 8 percent of the total loan amount. The \$400 figure was adjusted annually on January 1 by the annual percentage change in the CPI that was in effect on the preceding June 1, as follows:

i. For 1996, \$412, reflecting a 3 percent increase in the CPI-U from June 1994 to June 1995, rounded to the nearest whole dollar.

ii. For 1997, \$424, reflecting a 2.9 percent increase in the CPI-U from June 1995 to June 1996, rounded to the nearest whole dollar.

iii. For 1998, \$435, reflecting a 2.5 percent increase in the CPI-U from June 1996 to June 1997, rounded to the nearest whole dollar.

iv. For 1999, \$441, reflecting a 1.4 percent increase in the CPI-U from June 1997 to June 1998, rounded to the nearest whole dollar.

v. For 2000, \$451, reflecting a 2.3 percent increase in the CPI-U from June 1998 to June 1999, rounded to the nearest whole dollar.

vi. For 2001, \$465, reflecting a 3.1 percent increase in the CPI-U from June 1999 to June 2000, rounded to the nearest whole dollar.

vii. For 2002, \$480, reflecting a 3.27 percent increase in the CPI-U from June 2000 to June 2001, rounded to the nearest whole dollar.

viii. For 2003, \$488, reflecting a 1.64 percent increase in the CPI-U from June 2001 to June 2002, rounded to the nearest whole dollar.

ix. For 2004, \$499, reflecting a 2.22 percent increase in the CPI-U from June 2002 to June 2003, rounded to the nearest whole dollar.

x. For 2005, \$510, reflecting a 2.29 percent increase in the CPI-U from June 2003 to June 2004, rounded to the nearest whole dollar.

xi. For 2006, \$528, reflecting a 3.51 percent increase in the CPI-U from June 2004 to June 2005, rounded to the nearest whole dollar.

xii. For 2007, \$547, reflecting a 3.55 percent increase in the CPI-U from June 2005 to June 2006, rounded to the nearest whole dollar.

xiii. For 2008, \$561, reflecting a 2.56 percent increase in the CPI-U from June 2006

to June 2007, rounded to the nearest whole dollar.

xiv. For 2009, \$583, reflecting a 3.94 percent increase in the CPI-U from June 2007 to June 2008, rounded to the nearest whole dollar.

xv. For 2010, \$579, reflecting a 0.74 percent decrease in the CPI-U from June 2008 to June 2009, rounded to the nearest whole dollar.

xvi. For 2011, \$592, reflecting a 2.2 percent increase in the CPI-U from June 2009 to June 2010, rounded to the nearest whole dollar.

xvii. For 2012, \$611, reflecting a 3.2 percent increase in the CPI-U from June 2010 to June 2011, rounded to the nearest whole dollar.

xviii. For 2013, \$625, reflecting a 2.3 percent increase in the CPI-U from June 2011 to June 2012, rounded to the nearest whole dollar.

xix. For 2014, \$632, reflecting a 1.1 percent increase in the CPI-U from June 2012 to June 2013, rounded to the nearest whole dollar.

3. *Applicable threshold.* For purposes of § 1026.32(a)(1)(ii), a creditor must determine the applicable points and fees threshold based on the face amount of the note (or, in the case of an open-end credit plan, the credit limit for the plan when the account is opened). However, the creditor must apply the allowable points and fees percentage to the “total loan amount,” as defined in § 1026.32(b)(4). For closed-end credit transactions, the total loan amount may be different than the face amount of the note. The \$20,000 amount in § 1026.32(a)(1)(ii)(A) and (B) is adjusted annually on January 1 by the annual percentage change in the CPI that was in effect on the preceding June 1.

i. For 2015, \$20,391, reflecting a 2 percent increase in the CPI-U from June 2013 to June 2014, rounded to the nearest whole dollar.

ii. For 2016, \$20,350, reflecting a 0.2 percent decrease in the CPI-U from June 2014 to June 2015, rounded to the nearest whole dollar.

iii. For 2017, \$20,579, reflecting a 1.1 percent increase in the CPI-U from June 2015 to June 2016, rounded to the nearest whole dollar.

iv. For 2018, \$21,032, reflecting a 2.2 percent increase in the CPI-U from June 2016 to June 2017, rounded to the nearest whole dollar.

v. For 2019, \$21,549, reflecting a 2.5 percent increase in the CPI-U from June 2017 to June 2018, rounded to the nearest whole dollar.

vi. For 2020, \$21,980, reflecting a 2 percent increase in the CPI-U from June 2018 to June 2019, rounded to the nearest whole dollar.

vii. For 2021, \$22,052 reflecting a 0.3 percent increase in the CPI-U from June 2019 to June 2020, rounded to the nearest whole dollar.

viii. For 2022, \$22,969 reflecting a 4.2 percent increase in the CPI-U from June 2020 to June 2021, rounded to the nearest whole dollar.

ix. For 2023, \$24,866 reflecting an 8.3 percent increase in the CPI-U from June 2021 to June 2022, rounded to the nearest whole dollar.

x. For 2024, \$26,092, reflecting a 4.9 percent increase in the CPI-U from June 2022

to June 2023, rounded to the nearest whole dollar.

xi. For 2025, \$26,968, reflecting a 3.4 percent increase in the CPI-U from June 2023 to June 2024, rounded to the nearest whole dollar.

* * * *

Section 1026.43—Minimum Standards for Transactions Secured by a Dwelling

* * * *

Paragraph 43(e)(2)(vi).

1. *Determining the average prime offer rate for a comparable transaction as of the date the interest rate is set.* For guidance on determining the average prime offer rate for a comparable transaction as of the date the interest rate is set, see comments 43(b)(4)–1 through –3.

2. *Determination of applicable threshold.* A creditor must determine the applicable threshold by determining which category the loan falls into based on the face amount of the note (the “loan amount” as defined in § 1026.43(b)(5)). For example, for a first-lien covered transaction with a loan amount of \$75,000, the loan would fall into the tier for loans greater than or equal to \$66,156 (indexed for inflation) but less than \$110,260 (indexed for inflation), for which the applicable threshold is 3.5 or more percentage points.

3. *Annual adjustment for inflation.* The dollar amounts in § 1026.43(e)(2)(vi) will be adjusted annually on January 1 by the annual percentage change in the CPI-U that was in effect on the preceding June 1. The Bureau will publish adjustments after the June figures become available each year.

i. For 2022, reflecting a 4.2 percent increase in the CPI-U that was reported on the preceding June 1, to satisfy § 1026.43(e)(2)(vi), the annual percentage rate may not exceed the average prime offer rate for a comparable transaction as of the date the interest rate is set by the following amounts:

A. For a first-lien covered transaction with a loan amount greater than or equal to \$114,847, 2.25 or more percentage points;

B. For a first-lien covered transaction with a loan amount greater than or equal to \$68,908 but less than \$114,847, 3.5 or more percentage points;

C. For a first-lien covered transaction with a loan amount less than \$68,908, 6.5 or more percentage points;

D. For a first-lien covered transaction secured by a manufactured home with a loan amount less than \$114,847, 6.5 or more percentage points;

E. For a subordinate-lien covered transaction with a loan amount greater than or equal to \$68,908, 3.5 or more percentage points;

F. For a subordinate-lien covered transaction with a loan amount less than \$68,908, 6.5 or more percentage points.

ii. For 2023, reflecting an 8.3 percent increase in the CPI-U that was reported on the preceding June 1, to satisfy § 1026.43(e)(2)(vi), the annual percentage rate may not exceed the average prime offer rate for a comparable transaction as of the date the interest rate is set by the following amounts:

A. For a first-lien covered transaction with a loan amount greater than or equal to \$124,331, 2.25 or more percentage points;

B. For a first-lien covered transaction with a loan amount greater than or equal to \$74,599 but less than \$124,331, 3.5 or more percentage points;

C. For a first-lien covered transaction with a loan amount less than \$74,599, 6.5 or more percentage points;

D. For a first-lien covered transaction secured by a manufactured home with a loan amount less than \$124,331, 6.5 or more percentage points;

E. For a subordinate-lien covered transaction with a loan amount greater than or equal to \$74,599, 3.5 or more percentage points;

F. For a subordinate-lien covered transaction with a loan amount less than \$74,599, 6.5 or more percentage points.

iii. For 2024, reflecting a 4.9 percent increase in the CPI-U that was reported on the preceding June 1, to satisfy § 1026.43(e)(2)(vi), the annual percentage rate may not exceed the average prime offer rate for a comparable transaction as of the date the interest rate is set by the following amounts:

A. For a first-lien covered transaction with a loan amount greater than or equal to \$130,461, 2.25 or more percentage points;

B. For a first-lien covered transaction with a loan amount greater than or equal to \$78,277 but less than \$130,461, 3.5 or more percentage points;

C. For a first-lien covered transaction with a loan amount less than \$78,277, 6.5 or more percentage points;

D. For a first-lien covered transaction secured by a manufactured home with a loan amount less than \$130,461, 6.5 or more percentage points;

E. For a subordinate-lien covered transaction with a loan amount greater than or equal to \$78,277, 3.5 or more percentage points;

F. For a subordinate-lien covered transaction with a loan amount less than \$78,277, 6.5 or more percentage points.

iv. For 2025, reflecting a 3.4 percent increase in the CPI-U that was reported on the preceding June 1, to satisfy § 1026.43(e)(2)(vi), the annual percentage rate may not exceed the average prime offer rate for a comparable transaction as of the date the interest rate is set by the following amounts:

A. For a first-lien covered transaction with a loan amount greater than or equal to \$134,841, 2.25 or more percentage points;

B. For a first-lien covered transaction with a loan amount greater than or equal to \$80,905 but less than \$134,841, 3.5 or more percentage points;

C. For a first-lien covered transaction with a loan amount less than \$80,905, 6.5 or more percentage points;

D. For a first-lien covered transaction secured by a manufactured home with a loan amount less than \$134,841, 6.5 or more percentage points;

E. For a subordinate-lien covered transaction with a loan amount greater than or equal to \$80,905, 3.5 or more percentage points;

F. For a subordinate-lien covered transaction with a loan amount less than \$80,905, 6.5 or more percentage points.

4. *Determining the annual percentage rate for certain loans for which the interest rate may or will change.*

i. *In general.* The commentary to § 1026.17(c)(1) and other provisions in subpart C address how to determine the annual percentage rate disclosures for closed-end credit transactions. Provisions in § 1026.32(a)(3) address how to determine the annual percentage rate to determine coverage under § 1026.32(a)(1)(i). Section 1026.43(e)(2)(vi) requires, for the purposes of § 1026.43(e)(2)(vi), a different determination of the annual percentage rate for a qualified mortgage under § 1026.43(e)(2) for which the interest rate may or will change within the first five years after the date on which the first regular periodic payment will be due. An identical special rule for determining the annual percentage rate for such a loan also applies for purposes of § 1026.43(b)(4).

ii. *Loans for which the interest rate may or will change.* Section 1026.43(e)(2)(vi) includes a special rule for determining the annual percentage rate for a loan for which the interest rate may or will change within the first five years after the date on which the first regular periodic payment will be due. This rule applies to adjustable-rate mortgages that have a fixed-rate period of five years or less and to step-rate mortgages for which the interest rate changes within that five-year period.

iii. *Maximum interest rate during the first five years.* For a loan for which the interest rate may or will change within the first five years after the date on which the first regular periodic payment will be due, a creditor must treat the maximum interest rate that could apply at any time during that five-year period as the interest rate for the full term of the loan to determine the annual percentage rate for purposes of § 1026.43(e)(2)(vi), regardless of whether the maximum interest rate is reached at the first or subsequent adjustment during the five-year period. For additional instruction on how to determine the maximum interest rate during the first five years after the date on which the first regular periodic payment will be due, see comments 43(e)(iv)–3 and –4.

iv. *Treatment of the maximum interest rate in determining the annual percentage rate.* For a loan for which the interest rate may or will change within the first five years after the date on which the first regular periodic payment will be due, the creditor must determine the annual percentage rate for purposes of § 1026.43(e)(2)(vi) by treating the maximum interest rate that may apply within the first five years as the interest rate for the full term of the loan. For example, assume an adjustable-rate mortgage with a loan term of 30 years and an initial discounted rate of 5.0 percent that is fixed for the first three years. Assume that the maximum interest rate during the first five years after the date on which the first regular periodic payment will be due is 7.0 percent. Pursuant to § 1026.43(e)(2)(vi), the creditor must determine the annual percentage rate based on an interest rate of 7.0 percent applied for the full 30-year loan term.

5. *Meaning of a manufactured home.* For purposes of § 1026.43(e)(2)(vi)(D), manufactured home means any residential structure as defined under regulations of the U.S. Department of Housing and Urban Development (HUD) establishing manufactured home construction and safety standards (24 CFR 3280.2). Modular or other factory-built homes that do not meet the HUD code standards are not manufactured homes for purposes of § 1026.43(e)(2)(vi)(D).

6. *Scope of threshold for transactions secured by a manufactured home.* The threshold in § 1026.43(e)(2)(vi)(D) applies to first-lien covered transactions less than \$110,260 (indexed for inflation) that are secured by a manufactured home and land, or by a manufactured home only.

* * * * *

Paragraph 43(e)(3)(ii).

1. *Annual adjustment for inflation.* The dollar amounts, including the loan amounts, in § 1026.43(e)(3)(i) will be adjusted annually on January 1 by the annual percentage change in the CPI-U that was in effect on the preceding June 1. The Bureau will publish adjustments after the June figures become available each year.

i. For 2015, reflecting a 2 percent increase in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transactions total points and fees do not exceed;

A. For a loan amount greater than or equal to \$101,953: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$61,172 but less than \$101,953: \$3,059;

C. For a loan amount greater than or equal to \$20,391 but less than \$61,172: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$12,744 but less than \$20,391: \$1,020;

E. For a loan amount less than \$12,744: 8 percent of the total loan amount.

ii. For 2016, reflecting a 0.2 percent decrease in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transactions total points and fees do not exceed;

A. For a loan amount greater than or equal to \$101,749: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$61,050 but less than \$101,749: \$3,052;

C. For a loan amount greater than or equal to \$20,350 but less than \$61,050: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$12,719 but less than \$20,350: \$1,017;

E. For a loan amount less than \$12,719: 8 percent of the total loan amount.

iii. For 2017, reflecting a 1.1 percent increase in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transactions total points and fees do not exceed;

A. For a loan amount greater than or equal to \$102,894: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$61,737 but less than \$102,894: \$3,087;

C. For a loan amount greater than or equal to \$20,579 but less than \$61,737: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$12,862 but less than \$20,579: \$1,029;

E. For a loan amount less than \$12,862: 8 percent of the total loan amount.

iv. For 2018, reflecting a 2.2 percent increase in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transaction's total points and fees do not exceed;

A. For a loan amount greater than or equal to \$105,158: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$63,095 but less than \$105,158: \$3,155;

C. For a loan amount greater than or equal to \$21,032 but less than \$63,095: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$13,145 but less than \$21,032: \$1,052;

E. For a loan amount less than \$13,145: 8 percent of the total loan amount.

v. For 2019, reflecting a 2.5 percent increase in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transaction's total points and fees do not exceed;

A. For a loan amount greater than or equal to \$107,747: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$64,648 but less than \$107,747: \$3,232;

C. For a loan amount greater than or equal to \$21,549 but less than \$64,648: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$13,468 but less than \$21,549: \$1,077;

E. For a loan amount less than \$13,468: 8 percent of the total loan amount.

vi. For 2020, reflecting a 2 percent increase in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transaction's total points and fees do not exceed;

A. For a loan amount greater than or equal to \$109,898: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$65,939 but less than \$109,898: \$3,297;

C. For a loan amount greater than or equal to \$21,980 but less than \$65,939: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$13,737 but less than \$21,980: \$1,099;

E. For a loan amount less than \$13,737: 8 percent of the total loan amount.

vii. For 2021, reflecting a 0.3 percent increase in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transaction's total points and fees do not exceed;

A. For a loan amount greater than or equal to \$110,260: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$66,156 but less than \$110,260: \$3,308;

C. For a loan amount greater than or equal to \$22,052 but less than \$66,156: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$13,783 but less than \$22,052: \$1,103;

E. For a loan amount less than \$13,783: 8 percent of the total loan amount.

viii. For 2022, reflecting a 4.2 percent increase in the CPI-U that was reported on

the preceding June 1, a covered transaction is not a qualified mortgage unless the transaction's total points and fees do not exceed:

A. For a loan amount greater than or equal to \$114,847: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$68,908 but less than \$114,847: \$3,445;

C. For a loan amount greater than or equal to \$22,969 but less than \$68,908: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$14,356 but less than \$22,969: \$1,148;

E. For a loan amount less than \$14,356: 8 percent of the total loan amount.

ix. For 2023, reflecting an 8.3 percent increase in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transaction's total points and fees do not exceed:

A. For a loan amount greater than or equal to \$124,331: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$74,599 but less than \$124,331: \$3,730;

C. For a loan amount greater than or equal to \$24,866 but less than \$74,599: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$15,541 but less than \$24,866: \$1,243;

E. For a loan amount less than \$15,541: 8 percent of the total loan amount.

x. For 2024, reflecting a 4.9 percent increase in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transaction's total points and fees do not exceed:

A. For a loan amount greater than or equal to \$130,461: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$78,277 but less than \$130,461: \$3,914;

C. For a loan amount greater than or equal to \$26,092 but less than \$78,277: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$16,308 but less than \$26,092: \$1,305;

E. For a loan amount less than \$16,308: 8 percent of the total loan amount.

xi. For 2025, reflecting a 3.4 percent increase in the CPI-U that was reported on the preceding June 1, a covered transaction is not a qualified mortgage unless the transaction's total points and fees do not exceed:

A. For a loan amount greater than or equal to \$134,841: 3 percent of the total loan amount;

B. For a loan amount greater than or equal to \$80,905 but less than \$134,841: \$4,045;

C. For a loan amount greater than or equal to \$26,968 but less than \$80,905: 5 percent of the total loan amount;

D. For a loan amount greater than or equal to \$16,855 but less than \$26,968: \$1,348;

E. For a loan amount less than \$16,855: 8 percent of the total loan amount.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–1897; Project Identifier AD–2023–00774–T; Amendment 39–22882; AD 2024–23–03]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain The Boeing Company Model 737–300 and –400 series airplanes. This AD was prompted by a report that flight control rigging tolerances could result in spoiler deflection not reaching the minimal level required to engage the cruise thrust split monitor (MONFD) used by the autothrottle (A/T) system. This AD requires changing certain wire bundles, installing a new housing assembly, removing the mechanical aileron force limiter (MAFL), doing an inspection or records check to determine if certain flight control computers (FCCs) are installed, and performing applicable on-condition actions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 6, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 6, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2024–1897; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket

Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

For information on the availability of this material at the FAA, call 206–231–3195. It is also available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2024–1897.

FOR FURTHER INFORMATION CONTACT: Eric Igama, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; telephone 562–627–5388; email roderick.igama@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain The Boeing Company Model 737–300 and –400 series airplanes. The NPRM published in the *Federal Register* on July 29, 2024 (89 FR 60836). The NPRM was prompted by a report indicating that flight control rigging tolerances could result in spoiler deflection not reaching the minimal level required to engage the MONFD used by the A/T system. In the NPRM, the FAA proposed to require changing certain wire bundles, installing a new housing assembly, removing the mechanical aileron force limiter (MAFL), doing an inspection or records check to determine if certain flight control computers (FCCs) are installed, and performing applicable on-condition actions. The FAA is issuing this AD to address failure of the spoiler deflection to engage the MONFD, which could lead to significant throttle split, leading to asymmetric thrust and the subsequent lack of autothrottle disengagement, uncommanded roll, and consequent loss of control of the airplane and reduced ability of the flightcrew to maintain the safe flight and landing of the airplane.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from Aviation Partners Boeing. The following

presents the comment received on the NPRM and the FAA’s response.

Effect of Winglets on Accomplishment of the Proposed Actions

Aviation Partners Boeing stated that the installation of winglets per Supplemental Type Certificate (STC) ST01219SE does not affect compliance with the proposed actions.

The FAA agrees with the commenter that STC ST01219SE does not affect the accomplishment of the manufacturer’s service instructions. Therefore, the installation of STC ST01219SE does not affect the ability to accomplish the actions required by this AD. The FAA has not changed this AD in this regard.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin 737–22A1399 RB, dated April 13, 2023. This material specifies procedures for changing certain wire bundles, installing a new housing assembly, removing the MAFL, doing an inspection or records check to determine if certain FCCs are installed (FCCs that have an electronic aileron limiter (EAL) revision), and performing applicable on-condition actions. On-condition actions include installing new FCCs or re-installing kept FCCs (the installation includes doing specified tests and applicable corrective actions until the tests are passed).

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 110 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Wire bundle change, MAFL removal, housing assembly installation, and inspection/records review.	Up to 10 work-hours × \$85 per hour = up to \$850.	\$0	Up to \$850	Up to \$93,500.

The FAA estimates the following costs to do any on-condition actions that would be required based on the results

of the inspection/records review. The agency has no way of determining the

number of aircraft that might need these on-condition actions:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Installation of FCCs	2 work-hours × \$85 per hour = \$170	\$7,250	\$7,420

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024–23–03 The Boeing Company:
Amendment 39–22882; Docket No. FAA–2024–1897; Project Identifier AD–2023–00774–T.

(a) Effective Date

This airworthiness directive (AD) is effective January 6, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 737–300 and –400 series airplanes, certificated in any category, as identified in Boeing Alert Requirements Bulletin 737–22A1399 RB, dated April 13, 2023.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight controls.

(e) Unsafe Condition

This AD was prompted by a report that flight control rigging tolerances could result in spoiler deflection not reaching the minimal level required to engage the cruise thrust split monitor (MONFD) used by the

autothrottle (A/T) system. The FAA is issuing this AD to address failure of the spoiler deflection to engage the MONFD. The unsafe condition, if not addressed, could lead to significant throttle split, leading to asymmetric thrust and the subsequent lack of autothrottle disengagement, which could result in an uncommanded roll and consequent loss of control of the airplane, and reduced ability of the flightcrew to maintain the safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified by paragraph (h) of this AD: At the applicable times specified in the "Compliance" paragraph of Boeing Alert Requirements Bulletin 737–22A1399 RB, dated April 13, 2023, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin 737–22A1399 RB, dated April 13, 2023.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin 737–22A1399, dated April 13, 2023, which is referred to in Boeing Alert Requirements Bulletin 737–22A1399 RB, dated April 13, 2023.

(h) Exceptions to Requirements Bulletin Specifications

Where the Compliance Time columns of the table in the "Compliance" paragraph of Boeing Alert Requirements Bulletin 737–22A1399 RB, dated April 13, 2023, use the phrase "the original issue date of Requirements Bulletin 737–22A1399 RB," this AD requires using the effective date of this AD.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19,

send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j)(1) of this AD. Information may be emailed to: AMOC@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR-520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(j) Related Information

(1) For more information about this AD, contact Eric Igama, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: 562-627-5388; email: roderick.igama@faa.gov.

(2) Material identified in this AD that is not incorporated by reference is available at the address specified in paragraph (k)(3) of this AD.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Requirements Bulletin 737-22A1399 RB, dated April 13, 2023.

(ii) [Reserved]

(3) For the material identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110-SK57, Seal Beach, CA 90740-5600; telephone 562-797-1717; website myboeingfleet.com.

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on November 7, 2024.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2024-2014; Project Identifier MCAI-2024-00162-E; Amendment 39-22883; AD 2024-23-04]

RIN 2120-AA64

Airworthiness Directives; Rolls-Royce Deutschland Ltd & Co KG Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2023-21-08 for certain Rolls-Royce Deutschland Ltd & Co KG (RRD) Model Trent 1000 engines. AD 2023-21-08 required revisions to the airworthiness limitation section (ALS) of the operator's existing approved aircraft maintenance program (AMP). This AD was prompted by the manufacturer's revision of the time limits manual (TLM) to introduce new or more restrictive tasks, limitations, and associated thresholds and intervals for life-limited parts. This AD requires revisions to the ALS of the operator's existing approved AMP, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 6, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 6, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA-2024-2014; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

• For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADS@easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.

• You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. FOR FURTHER INFORMATION CONTACT:

Barbara Caufield, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (781) 238-7146; email: barbara.caufield@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2023-21-08, Amendment 39-22580 (88 FR 77889, November 14, 2023) (AD 2023-21-08). AD 2023-21-08 applied to certain RRD Model Trent 1000-A, Trent 1000-AE, Trent 1000-C, Trent 1000-CE, Trent 1000-D, Trent 1000-E, Trent 1000-G, and Trent 1000-H engines. AD 2023-21-08 required revisions to the ALS of the operator's existing approved AMP as specified in EASA AD 2022-0259, dated December 20, 2022. The FAA issued AD 2023-21-08 to prevent the failure of critical rotating parts.

The NPRM published in the **Federal Register** on August 9, 2024 (89 FR 65270). The NPRM was prompted by EASA AD 2024-0062, dated March 6, 2024 (EASA AD 2024-0062) (also referred to as the MCAI), issued by EASA, which is the Technical Agent for the Member States of the European Union. The MCAI states that the manufacturer published a revised TLM introducing new or more restrictive tasks and limitations. These new or more restrictive tasks and limitations include updating Direct Accumulation Counting data files.

In the NPRM, the FAA proposed to retain none of the requirements of AD 2023-21-08. The NPRM proposed to require revising the ALS of the operator's existing approved AMP, as specified in EASA AD 2024-0062. The FAA is issuing this AD to prevent the failure of rotating parts.

You may examine the MCAI in the AD docket at regulations.gov under Docket No. FAA-2024-2014.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from The Boeing Company, who supported the NPRM without change.

Conclusion

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comment received, and determined that air safety requires adopting the AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2024–0062, which specifies instructions for accomplishing the actions specified in the applicable TLM, including performing maintenance tasks, replacing life-limited parts, and revising the existing approved maintenance or inspection program, as applicable, by incorporating the limitations, tasks, and associated thresholds and intervals described in the TLM.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Differences Between This AD and the MCAI

Where EASA AD 2024–0062 specifies revising the approved AMP within 12 months after the effective date of EASA AD 2024–0062, this AD requires revising the ALS of the existing approved aircraft maintenance or inspection program, as applicable, within 30 days after the effective date of this AD.

Costs of Compliance

The FAA estimates that this AD affects 28 engines installed on airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Revise the ALS	1 work-hours × \$85 per hour = \$85	\$0	\$85	\$2,380

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by:
 - a. Removing Airworthiness Directive 2023–21–08, Amendment 39–22580 (88 FR 77889, November 14, 2023); and
 - b. Adding the following new airworthiness directive:

2024–23–04 Rolls-Royce Deutschland Ltd & Co KG: Amendment 39–22883; Docket No. FAA–2024–2014; Project Identifier MCAI–2024–00162–E.

(a) Effective Date

This airworthiness directive (AD) is effective January 6, 2025.

(b) Affected ADs

This AD replaces AD 2023–21–08, Amendment 39–22580 (88 FR 77889, November 14, 2023).

(c) Applicability

This AD applies to Rolls-Royce Deutschland Ltd & Co KG Model Trent 1000–A, Trent 1000–AE, Trent 1000–C, Trent 1000–CE, Trent 1000–D, Trent 1000–E, Trent 1000–G, and Trent 1000–H engines.

(d) Subject

Joint Aircraft System Component (JASC) Code 7200, Engine (Turbine/Turboprop).

(e) Unsafe Condition

This AD was prompted by the manufacturer revising the engine Time Limits Manual life limits of certain critical rotating parts. The FAA is issuing this AD to prevent the failure of critical rotating parts. The unsafe condition, if not addressed, could result in failure of critical rotating parts, which could result in failure of one or more engines, loss of thrust control, and loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: Perform all required actions within the compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2024–0062, dated March 6, 2024 (EASA AD 2024–0062).

(h) Exceptions to EASA AD 2024–0062

(1) Where EASA AD 2024–0062 refers to its effective date, this AD requires using the effective date of this AD.

(2) This AD does not require compliance with paragraphs (1), (2), (4), and (5) of EASA AD 2024–0062.

(3) Where paragraph (3) of EASA AD 2024–0062 specifies “Within 12 months after the effective date of this AD, revise the approved AMP,” for this AD, replace that text with “Within 30 days after the effective date of this AD, revise the airworthiness limitation section (ALS) of the existing approved engine maintenance or inspection program, as applicable.”

(4) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2024–0062 is on or before the applicable “limitations” and “associated thresholds” as incorporated by the requirements of paragraph (3) of EASA AD 2024–0062 or within 30 days after the effective date of this AD, whichever occurs later.

(5) This AD does not adopt the “Remarks” paragraph of EASA AD 2024–0062.

(i) Provisions for Alternative Actions and Intervals

No alternative actions and associated thresholds and intervals, including life limits, are allowed for compliance with paragraph (g) of this AD unless they are approved as specified in the provisions of the “Ref. Publications” section of EASA AD 2024–0062.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520 Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the Manager, AIR–520 Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k) of this AD and email to: AMOC@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Additional Information

For more information about this AD, contact Barbara Caufield, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (781) 238–7146; email: barbara.caufield@faa.gov.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2024–0062, dated March 6, 2024.

(ii) [Reserved]

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADS@easa.europa.eu; website: easa.europa.eu. You may find this

EASA AD on the EASA website at ad.easa.europa.eu.

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on November 12, 2024.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2023–24–06, Amendment 39–22623 (88 FR 89290, December 27, 2023) (AD 2023–24–06) for certain RRD Model Trent 1000–AE3, Trent 1000–CE3, Trent 1000–D3, Trent 1000–G3, Trent 1000–H3, Trent 1000–J3, Trent 1000–K3, Trent 1000–L3, Trent 1000–M3, Trent 1000–N3, Trent 1000–P3, Trent 1000–Q3, and Trent 1000–R3 engines. AD 2023–24–06 required revising the ALS of the operator’s existing approved engine maintenance or inspection program, as applicable, to incorporate new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts. The FAA issued AD 2023–24–06 to prevent the failure of critical rotating parts.

The NPRM published in the **Federal Register** on July 29, 2024 (89 FR 60841). The NPRM was prompted by EASA AD

2023–0195, dated November 9, 2023 (EASA AD 2023–0195) (also referred to as the MCAI), issued by EASA, which is the Technical Agent for the Member States of the European Union. The MCAI states that the manufacturer published a revised engine TLM introducing new or more restrictive tasks and limitations. These new or more restrictive tasks and limitations include updating declared lives of certain critical parts.

In the NPRM, the FAA proposed to retain none of the requirements of AD 2023–24–06. The NPRM proposed to require revising the ALS of the operator’s existing approved engine maintenance or inspection program, as specified in EASA AD 2023–0195. The FAA is issuing this AD to prevent the failure of rotating parts, which, if not addressed, could result in failure of one or more engines, loss of thrust control, and loss of the airplane.

You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2024–1899.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from The Boeing Company who supported the NPRM without change.

Conclusion

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comment received, and determined that air safety requires adopting the AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2023–0195, which specifies instructions for accomplishing the actions specified in the applicable TLM, including

performing maintenance tasks, replacing life-limited parts, and revising the existing approved maintenance or inspection program, as applicable, by incorporating the limitations, tasks, and associated thresholds and intervals described in the TLM.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Differences Between This AD and the MCAI

Where EASA AD 2023–0195 specifies revising the approved aircraft maintenance programme (AMP) within 12 months after the effective date of EASA AD 2023–0195, this AD requires revising the ALS of the existing approved aircraft maintenance or inspection program, as applicable, within 30 days after the effective date of this AD.

Costs of Compliance

The FAA estimates that this AD affects 2 engines installed on airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Revise the ALS	1 work-hours × \$85 per hour = \$85	\$0	\$85	\$170

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:
Authority: 49 U.S.C. 106(g), 40113, 44701.
- **\$ 39.13 [Amended]**
- 2. The FAA amends § 39.13 by:
 - a. Removing Airworthiness Directive 2023–24–06, Amendment 39–22623 (88 FR 89290, December 27, 2023); and
 - b. Adding the following new airworthiness directive:
2024–21–03 Rolls-Royce Deutschland Ltd & Co KG: Amendment 39–22870; Docket No. FAA–2024–1899; Project Identifier MCAI–2023–01169–E.

(a) Effective Date

This airworthiness directive (AD) is effective January 6, 2025.

(b) Affected ADs

This AD replaces AD 2023–24–06, Amendment 39–22623 (88 FR 89290, December 27, 2023).

(c) Applicability

This AD applies to Rolls-Royce Deutschland Ltd & Co KG Model Trent 1000–AE3, Trent 1000–CE3, Trent 1000–D3, Trent 1000–G3, Trent 1000–H3, Trent 1000–J3, Trent 1000–K3, Trent 1000–L3, Trent 1000–M3, Trent 1000–N3, Trent 1000–P3, Trent 1000–Q3, and Trent 1000–R3 engines.

(d) Subject

Joint Aircraft System Component (JASC) Code 7200, Engine (Turbine/Turboprop).

(e) Unsafe Condition

This AD was prompted by the manufacturer revising the engine time limits manual (TLM) required maintenance and inspections. The FAA is issuing this AD to prevent the failure of rotating parts. The unsafe condition, if not addressed, could result in failure of one or more engines, loss of thrust control, and loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: Perform all required actions within the compliance times specified in, and in accordance with, European Union Aviation Safety Agency AD 2023–0195, dated November 9, 2023 (EASA AD 2023–0195).

(h) Exceptions to EASA AD 2023–0195

(1) Where EASA AD 2023–0195 refers to its effective date, this AD requires using the effective date of this AD.

(2) This AD does not require compliance with paragraph (1), (2), (4), and (5) of EASA AD 2023–0195.

(3) Where paragraph (3) of EASA AD 2023–0195 specifies “Within 12 months after the effective date of this AD, revise the approved AMP,” replace that text with “Within 30 days after the effective date of this AD, revise the airworthiness limitation section (ALS) of the existing approved engine maintenance or inspection program, as applicable.”

(4) This AD does not adopt the “Remarks” paragraph of EASA AD 2023–0195.

(i) Provisions for Alternative Actions and Intervals

No alternative actions and associated thresholds and intervals, including life limits, are allowed for compliance with paragraph (g) of this AD unless they are approved as specified in the provisions of the “Ref. Publications” section of EASA AD 2023–0195.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520 Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector

or local Flight Standards District Office, as appropriate. If sending information directly to the Manager, AIR–520 Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k) of this AD and email to: AMOC@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Additional Information

For more information about this AD, contact Barbara Caufield, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (781) 238–7146; email: barbara.caufield@faa.gov.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2023–0195, dated November 9, 2023.

(ii) [Reserved]

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADs@easa.europa.eu; website: easa.europa.eu. You may find this EASA AD on the EASA website at ad.easa.europa.eu.

(4) You may view this material at FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on October 15, 2024.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA–2024–0463; Project Identifier AD–2023–00792–T; Amendment 39–22890; AD 2024–23–11]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain The Boeing Company Model 737–8, 737–9, and 737–8200 (737 MAX) airplanes. This AD was prompted by a report of a non-conforming installation of spoiler wire bundles that led to unintended spoiler motion, including one instance of a flight spoiler hardover. Further investigation identified the potential for a hardover of more than one flight spoiler on the same wing, which can exceed full lateral control capability leading to loss of control of the airplane. This AD requires a one-time inspection of the clearance between the spoiler control wire bundles and the adjacent structure, and applicable on-condition actions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 6, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 6, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA–2024–0463; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For Boeing material identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website myboeingfleet.com.

- You may view this material at the FAA, Airworthiness Products Section,

Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2024–0463.

FOR FURTHER INFORMATION CONTACT:

Michael Closson, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3973; email: *Michael.P.Closson@faa.gov*.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain The Boeing Company Model 737–8, 737–9, and 737–8200 airplanes. The NPRM published in the **Federal Register** on March 11, 2024 (89 FR 17346). The NPRM was prompted by a report of a non-conforming installation of flight spoiler control wire bundles that led to unintended spoiler motion, including one instance of flight spoiler hardover. Further investigation identified the potential for simultaneous time-limited hardovers of more than one flight spoiler on the same wing, which can exceed full lateral control capability leading to loss of control of the airplane. In the NPRM, the FAA proposed to require a one-time inspection of the clearance between the spoiler control wire bundles and the adjacent structure, and applicable on-condition actions. The FAA is issuing this AD to address the potential for improper clearance between the spoiler control wire bundles and the adjacent structure. Improper clearance can lead to damage to the wire bundle, causing unintentional spoiler motion and consequent loss of control of the airplane. A hardover of more than one flight spoiler on the same wing can exceed full lateral control capability leading to loss of control of the airplane.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from seven commenters: The Boeing Company, United Airlines, Air Line Pilots Association, International, and four individuals, who supported the NPRM without change.

The FAA received additional comments from three commenters: SunExpress Airlines, The Foundation for Aviation Safety, and an individual. The following summarizes the comments received on the NPRM and provides the FAA's responses.

Request for Immediately Adopted Rule (IAR)

The Foundation for Aviation Safety (the Foundation) requested ¹ that the FAA issue the AD as an immediately adopted rule (IAR) ² with a compliance time of 30 days instead of the proposed 36-month compliance time. The Foundation's rationale referenced the service history of this model, the FAA's use of what the Foundation described as an unvalidated assumption about wear rates, the presence of a potentially catastrophic single failure condition, and the required inspection is estimated to take nine hours ³ per airplane.

In addition, an individual requested the FAA require "immediate repair of the defects on the identified aircraft" due to recent Boeing failures.

The FAA does not agree with the request to issue the AD as an IAR, or to shorten the compliance time. After conducting a risk analysis, the FAA did not find it necessary to issue an IAR with a shorter compliance time, but determined that an NPRM, which allowed the opportunity for public comment, was appropriate.

As part of their argument for an IAR and shortened compliance time, the Foundation stated that the potential failure condition is the result of a single point of failure (the chafed wire to a spoiler actuator), which is incorrect. The NPRM was issued to address the potential catastrophic event of simultaneous time-limited ⁴ hardovers of more than one flight spoiler on the same wing, which would require two separate specific wires to short to ground almost simultaneously.

To support their argument for the IAR, the Foundation also questioned the FAA's assumptions regarding the use of unvalidated wire "wear rates" to support the compliance times in the NPRM. The FAA concurs that "wear rate" is highly dependent upon the specific installation and operational environment of the wire bundle in

question. However, the FAA did not use Boeing's "wear rate" in developing the risk analysis as suggested by the commenter. Instead, the FAA's analysis incorporated feedback from 737 MAX operators that had performed the inspections called out in Boeing Service Letter 737–SL–293–A, dated May 17, 2022, which indicated no findings of wire chafing in over 650 Model 737 MAX airplanes. This, combined with the FAA risk analysis, showed that an NPRM was appropriate.

Request for Credit for Prior Inspections

SunExpress Airlines requested that Boeing Service Letter 737–SL–27–293–B, dated May 23, 2022, serve as alternative method of compliance to paragraphs (g) and (h) of the proposed AD. The commenter asserted that the Work Instructions of Boeing Service Letter 737–SL–27–293–B fulfills the requirements stated in Boeing Alert Requirements Bulletin 737–27A1325 RB, dated July 14, 2023 (Alert RB 737–27A1325 RB).

The FAA agrees that accomplishing Boeing Service Letter 737–SL–27–293–B, dated May 23, 2022, provides some of the inspection and corrective action instructions called out in Alert RB 737–27A1325 RB. However, the FAA disagrees with giving credit for paragraphs (g) and (h) of this AD because the scope of the inspections in Boeing Service Letter 737–SL–27–293–B, dated May 23, 2022, does not include inspections for the outboard clamp locations and does not have certain of the defined clearance requirements of the Requirements Bulletin. Paragraph (i) of this AD allows the commenter to request an alternative method of compliance (AMOC) for the actions in the Service Letter that are duplicated in the Requirements Bulletin.

Request for Additional Guidance To Identify Affected Airplanes

An individual requested that the FAA issue additional guidance to assist in identifying other airplane models that may be subject to the same unsafe condition.

Such additional guidance is unnecessary. The FAA has worked with Boeing to identify the affected airplanes and those airplanes have been listed in Alert RB 737–27A1325 RB. The agency has also verified with Boeing that the actions and practices identified in Alert RB 737–27A1325 RB have been incorporated in Boeing's production processes at a specific airplane line number, ensuring this unsafe condition does not exist on airplanes delivered from that line number forward.

¹ The Foundation's comment on this AD was submitted directly to the FAA Administrator, but has been placed into the rulemaking docket.

² An "Immediately Adopted Rule" or "IAR" is an FAA term for a rule that is issued without first obtaining public comment, a.k.a a "Final Rule with request for Comments," based upon good cause.

³ Although the work-hours listed in the NPRM for the one-time inspection and on-condition actions amount to nine hours of work per airplane, no airplane would require all of the on-condition actions. Therefore, the actions required by this AD would take less than nine hours of work per airplane.

⁴ This type of flight spoiler failure will be detected within a short time window by a software monitor, which will then fully retract spoiler eliminating the hardover condition, thereby limiting the exposure window for concurrent failures.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin 737–27A1325 RB, dated July 14, 2023. This material specifies procedures for spoiler control wire bundles clearance measurement and applicable on-condition actions. On-condition actions include a detailed inspection of the spoiler control wire bundles and adjacent structure for chafing damage, repair of any spoiler control wire bundles and any structural

damage, and adjustment of the spoiler control wire bundles to ensure clearance requirements are met.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

Costs of Compliance

The FAA estimates that this AD affects 207 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Measurement of wire bundle clearance	1 work-hour × \$85 per hour = \$85	\$0	\$85	\$17,595

The FAA estimates the following costs to do any necessary repairs that

would be required based on the results of the inspection. The agency has no

way of determining the number of aircraft that might need these repairs:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Inspection	1 work-hour × \$85	\$0	\$85
Rework cable bundles without chafing damage to wires or airplane structure.	2 work-hours × \$85 per hour = \$170	0	170
Rework cable bundles with chafing damage to wires or airplane structure.	5 work-hours × \$85 per hour = \$425	0	425

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024–23–11 The Boeing Company: Amendment 39–22890; Docket No. FAA–2024–0463; Project Identifier AD–2023–00792–T.

(a) Effective Date

This airworthiness directive (AD) is effective January 6, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 737–8, 737–9, and 737–8200 airplanes, certificated in any category, as identified in Boeing Alert Requirements Bulletin 737–27A1325 RB, dated July 14, 2023.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight controls.

(e) Unsafe Condition

This AD was prompted by a report of a non-conforming installation of spoiler wire bundles that led to unintended spoiler motion, including one instance of a flight spoiler hardover. Further investigation identified the potential for a time-limited hardover of more than one flight spoiler on the same wing, which can exceed full lateral control capability leading to loss of control of the airplane. The FAA is issuing this AD to address improper clearance between the spoiler control wire bundles and the adjacent structure, which can lead to damage to the wire bundle, causing unintentional spoiler motion. The unsafe condition, if not addressed, could result in loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified by paragraph (h) of this AD: At the applicable times specified in the "Compliance" paragraph of Boeing Alert Requirements Bulletin 737-27A1325 RB, dated July 14, 2023, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin 737-27A1325 RB, dated July 14, 2023.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin 737-27A1325, dated July 14, 2023, which is referred to in Boeing Alert Requirements Bulletin 737-27A1325 RB, dated July 14, 2023.

(h) Exception to Service Information Specifications

Where the Compliance Time columns of the tables in the "Compliance" paragraph of Boeing Alert Requirements Bulletin 737-27A1325 RB, dated July 14, 2023, use the phrase "the original issue date of Requirements Bulletin 737-27A1325 RB," this AD requires using the effective date of this AD.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR-520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j)(1) of this AD. Information may be emailed to: AMOC@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company

Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR-520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(j) Related Information

(1) For more information about this AD, contact Michael Closson, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206-231-3973; email: Michael.P.Closson@faa.gov.

(2) Service information identified in this AD that is not incorporated by reference is available at the address specified in paragraph (k)(3) of this AD.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Requirements Bulletin 737-27A1325 RB, dated July 14, 2023.

(ii) [Reserved]

(3) For Boeing material identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminister Blvd., MC 110-SK57, Seal Beach, CA 90740-5600; telephone 562-797-1717; website myboeingfleet.com.

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on November 14, 2024.

John P. Piccola, Jr.,

Director, Integrated Certificate Management Division, Aircraft Certification Service.

RIN 2120-AA64

Airworthiness Directives; Bombardier, Inc., Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Bombardier, Inc., Model BD-700-1A10 and BD-700-1A11 airplanes. This AD was prompted by reports of missing or damaged inboard flap seal plate assemblies. This AD requires repetitive inspections for cracks of the attaching angles of the inboard flap seal plates and replacement. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 6, 2025.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of January 6, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2024-2015; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195. It is also available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2024-2015.

FOR FURTHER INFORMATION CONTACT:

Yaser Osman, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516-228-7300; email 9-avs-nyaco-cos@faa.gov.

SUPPLEMENTARY INFORMATION:**Background**

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Bombardier, Inc., Model BD-700-1A10 and BD-700-1A11 airplanes. The NPRM published in the

Federal Register on August 9, 2024 (89 FR 65264). The NPRM was prompted by AD CF–2023–42, dated June 19, 2023, issued by Transport Canada, which is the aviation authority for Canada (referred to after this as the MCAI). The MCAI states that there have been multiple reports in service of missing or damaged inboard flap seal plates. An investigation revealed a premature fatigue failure mode of the inboard flap seal plates. Left uncorrected, an inboard flap seal plate may partially or totally detach. Under certain flight conditions, a missing inboard flap seal plate could lead to excessive buffeting and vibration, and consequent damage to the airplane.

In the NPRM, the FAA proposed to require repetitive inspections for cracks of the attaching angles of the inboard flap seal plates and replacement. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2024–2015.

Discussion of Final Airworthiness Directive

Comments

The FAA received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Bombardier Service Bulletins 700–27–5509 and 700–27–6509, both Revision 01, both dated May 5, 2023. This material specifies procedures for repetitive detailed inspections for cracks of the attaching angles of the inboard flap seal plates and replacing the inboard flap seal plates if any crack is detected. This material also specifies procedures for replacing both existing inboard flap seal

plates with structurally more robust redesigned components. The replacement actions include a detailed visual inspection for damage (including signs of failure, cracking, and deformation) of the flap inboard closing ribs and trailing edges, an eddy current or liquid penetrant inspection for cracks running out of the flap inboard closing rib holes common to the outboard stiffener and angle, and repair for cracks and other damage. The replacement would eliminate the need for the repetitive detailed inspections. These documents are distinct since they apply to different airplane models.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 43 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
24 work-hours × \$85 per hour = \$2,040	\$37,919	\$39,959	\$1,718,237

The FAA has received no definitive data on which to base the cost estimates for the repairs specified in this AD.

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing

regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and

- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024–23–08 Bombardier, Inc.: Amendment 39–22887; Docket No. FAA–2024–2015; Project Identifier MCAI–2023–00769–T.

(a) Effective Date

This airworthiness directive (AD) is effective January 6, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Bombardier, Inc., Model BD–700–1A10 and BD–700–1A11 airplanes, certificated in any category, serial numbers 9861, 9872, 60001 through 60004 inclusive, 60006 through 60023 inclusive,

60025 through 60029 inclusive, 60031, 60033 through 60036 inclusive, 60038 through 60042 inclusive, 60044, 60046 through 60048 inclusive, 60050 through 60055 inclusive, 60058 through 60060 inclusive, 60062 through 60067 inclusive, 60069 through 60071 inclusive, 60073 through 60086 inclusive, and 60088 through 60101 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Unsafe Condition

This AD was prompted by reports of missing or damaged inboard flap seal plates. The FAA is issuing this AD to address the unsafe condition, which could result in the partial or total detachment of the flap seal plate. Under certain flight conditions, a

missing inboard flap seal plate could lead to excessive buffeting and vibration, and consequent damage to the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Detailed Inspection

At the applicable time specified in figure 1 to paragraph (g) of this AD, perform a detailed inspection for cracks of the attaching angles of the inboard flap seal plates, in accordance with Section 2.B. (Part A) of the Accomplishment Instructions of Bombardier Service Bulletin 700–27–5509 or 700–27–6509, both Revision 01, both dated May 5, 2023, as applicable, except do corrective actions as specified in paragraph (h) of this AD.

FIGURE 1 TO PARAGRAPH (g)—COMPLIANCE REQUIREMENTS

Total flight hours as of the effective date of this AD	Compliance time after the effective date of this AD
Less than or equal to 750	Within 250 flight hours.
More than 750	Within 100 flight hours.

(h) Corrective Actions for Inboard Flap Seal Plates

(1) If no crack is found during any inspection required by paragraph (g) of this AD, repeat the inspection thereafter at intervals not to exceed 250 flight hours, except as specified in paragraph (i) of this AD.

(2) If any crack is found during any inspection required by paragraph (g) of this AD, do the actions specified in paragraph (i) of this AD before further flight.

(i) Replacement of Inboard Flap Seal Plates

Unless already done as specified in paragraph (h)(2) of this AD: Within 12 months after the effective date of this AD, do the actions specified in paragraphs (i)(1) through (3) of this AD, in accordance with Section 2.C. (Part B) of the Accomplishment Instructions of Bombardier Service Bulletin 700–27–5509 or 700–27–6509, both Revision 01, both dated May 5, 2023, as applicable.

(1) Replace the inboard flap seal plates with redesigned plates.

(2) Do a detailed visual inspection for damage of the flap inboard closing ribs and trailing edges.

(3) Do an eddy current or liquid penetrant inspection for cracks running out of the flap inboard closing rib holes common to the outboard stiffener and angle.

(j) Repair for Flap Inboard Closing Ribs and Trailing Edges

If any crack or other damage is found during any inspection required by paragraph (i)(2) or (3) of this AD, repair before further flight using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or Bombardier, Inc.'s Transport Canada Design Approval Organization (DAO). If the method is approved by the DAO, the approval must include the DAO-authorized signature.

(k) Terminating Action for Repetitive Inspections

Accomplishment of the actions required by paragraph (i) of this AD terminates the requirements of paragraph (h)(1) of this AD.

(l) Credit for Previous Actions

This paragraph provides credit for actions required by this AD, if those actions were performed before the effective date of this AD using Bombardier Service Bulletin 700–27–5509 or 700–27–6509, both dated October 4, 2022.

(m) No Reporting Requirement

Although Bombardier Service Bulletins 700–27–5509 and 700–27–6509, both Revision 01, both dated May 5, 2023, specify to submit certain information to the manufacturer, this AD does not include that requirement.

(n) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (o)(1) of this AD. Information may be emailed to: AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must

be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or Bombardier, Inc.'s Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(o) Additional Information

(1) For more information about this AD, contact Yaser Osman, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email 9-avs-nyaco-cos@faa.gov.

(2) Material identified in this AD that is not incorporated by reference is available at the address specified in paragraph (p)(3) of this AD.

(p) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Bombardier Service Bulletin 700–27–5509, Revision 01, dated May 5, 2023.

(ii) Bombardier Service Bulletin 700–27–6509, Revision 01, dated May 5, 2023.

(3) For Bombardier material identified in this AD, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email ac.yul@aero.bombardier.com; website bombardier.com.

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records

Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on November 12, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Airbus Canada Limited Partnership (Type Certificate Previously Held by C Series Aircraft Limited Partnership (CSALP)) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes. This AD was prompted by reports that the pylon-to-wing area motive flow flexible fuel line assemblies may have been installed incorrectly. This AD requires inspecting the motive flow fuel line assemblies and performing corrective actions as specified in a Transport Canada AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 6, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 6, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA–2024–1474; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For Transport Canada material identified in this AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca; website at tc.canada.ca/en/aviation.

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at regulations.gov under Docket No. FAA–2024–1474.

FOR FURTHER INFORMATION CONTACT:

Joseph Catanzaro, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email joseph.catanzaro@faa.gov.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes. The NPRM published in the **Federal Register** on May 23, 2024 (89 FR 45610). The NPRM was prompted by AD CF–2023–64, dated September 18, 2023, issued by Transport Canada, which is the aviation authority for Canada (referred to after this as the MCAI). The MCAI states that reports have been received indicating that the pylon-to-wing area motive flow flexible fuel line assemblies may have been installed incorrectly, potentially resulting in a twist to the motive flow fuel line.

In the NPRM, the FAA proposed to require inspecting the motive flow fuel line assemblies and corrective actions, as specified in Transport Canada AD CF–2023–64. The FAA is issuing this AD to address a possible abrasion of the fuel line causing a fuel leak; if not addressed, the electrical harness connectors in the wing area could be a potential ignition source and pose a risk of fire.

You may examine the MCAI in the AD docket at regulations.gov under Docket No. FAA–2024–1474.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from Air Line Pilots Association, International (ALPA), who supported the NPRM without change.

The FAA received an additional comment from Delta Airlines. The following presents the comment received on the NPRM and the FAA's response to the comment.

Request for Change to Exceptions Paragraph

Delta requested revising paragraph (h)(3) by removing the word “flexible” and revising certain punctuation. Delta stated the term “flexible” is used only when referring to the flexible-hose assembly installed in the shroud assembly. Therefore, the flexible-hose assembly and the shroud assembly are subassemblies of the fuel motive-flow tube assembly.

The FAA agrees that the term “flexible” should be removed in reference to the entire motive flow fuel line assemblies since the service information referenced in Transport Canada AD CF–2023–64 requires replacement of the fuel motive-flow tube assembly if damage is found on either the flexible-hose assembly or the shroud assembly.

Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed AD CF–2023–64, dated September 18, 2023. This material specifies procedures for a general visual inspection of the left and right motive flow flexible fuel line assemblies for twisted or damaged fuel lines or damaged shrouds, and replacement of motive flow fuel line assemblies with twisted or damaged fuel lines or damaged shrouds.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 93 airplanes of U.S. registry. The

FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
7 work-hours × \$85 per hour = \$595	\$0	\$0	\$55,335

The FAA estimates the following costs to do any on-condition actions that would be required based on the results

of any required actions. The FAA has no way of determining the number of

aircraft that might need this on-condition action:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
1 work-hour × \$85 per hour = \$85	\$2,500	\$2,585

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024–23–05 Airbus Canada Limited Partnership (Type Certificate Previously Held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.): Amendment 39–22884; Docket No. FAA–2024–1474; Project Identifier MCAI–2023–01014–T.

(a) Effective Date

This airworthiness directive (AD) is effective January 6, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Canada Limited Partnership (Type Certificate previously held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.) Model BD–500–1A10 and BD–500–1A11 airplanes, certificated in any category, as identified in Transport Canada AD CF–2023–64, dated

September 18, 2023 (Transport Canada AD CF–2023–64).

(d) Subject

Air Transport Association (ATA) of America Code 28, Fuel.

(e) Unsafe Condition

This AD was prompted by reports that the pylon-to-wing area motive flow flexible fuel line assemblies may have been installed incorrectly. The FAA is issuing this AD to ensure the motive flow flexible fuel line assemblies are installed correctly. The unsafe condition, if not addressed, could result in abrasion of the fuel line and a possible fuel leak; as a result, the electrical harness connectors in the wing area could be a potential ignition source and pose a risk of fire.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, Transport Canada AD CF–2023–64.

(h) Exception to Transport Canada AD CF–2023–64

(1) Where Transport Canada AD CF–2023–64 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where Transport Canada AD CF–2023–64 refers to hours air time, this AD requires using flight hours.

(3) Where the Corrective Actions paragraph of Transport Canada AD CF–2023–64 specifies to "Inspect and, if necessary, replace the left and right motive flow fuel line assemblies," for this AD, replace that text with "Inspect and, as applicable, replace the left and right motive flow fuel line assemblies."

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (j) of this AD. Information may be emailed to: 9-AVS-NYACO-COS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or Airbus Canada Limited Partnership's Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(j) Additional Information

For more information about this AD, contact Joseph Catanzaro, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516-228-7300; email joseph.catanzaro@faa.gov.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Transport Canada AD CF-2023-64, dated September 18, 2023.

(ii) [Reserved]

(3) For Transport Canada AD CF-2023-64, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888-663-3639; email TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca. You may find this Transport Canada AD on the Transport Canada website tc.canada.ca/en/aviation.

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations, or email fr.inspection@nara.gov.

Issued on November 12, 2024.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA-2024-0183; Airspace Docket No. 23-AAL-67]

RIN 2120-AA66

Modification of Class E Airspace; Chenega Bay Airport, Chenega, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies the Class E airspace extending upward from 700 feet above the surface of the earth due to the Area Navigation (RNAV) (Global Positioning System [GPS])-A approach being re-oriented to the north at Chenega Bay Airport, Chenega, AK. Additionally, this action updates the administrative portion of the airport's Class E airspace legal description. These modifications support the safety and management of instrument flight rules (IFR) operations at the airport.

DATES: Effective date 0901 UTC, February 20, 2025. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the Notice of Proposed Rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year.

FAA Order JO 7400.11J, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

FOR FURTHER INFORMATION CONTACT: Nathan A. Chaffman, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S

216th Street, Des Moines, WA 98198; telephone (206) 231-3460.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies Class E airspace to support IFR operations at Chenega Bay Airport, Chenega, AK.

History

The FAA published a notice of proposed rulemaking for Docket No. FAA-2024-0183 in the **Federal Register** (89 FR 67915; August 22, 2024) proposing to modify Class E airspace at Chenega Bay Airport, Chenega, AK. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Incorporation by Reference

Class E5 airspace areas are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024, and effective September 15, 2024. FAA Order JO 7400.11J is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 by modifying the Class E airspace extending upward from 700 feet above the surface at Chenega Bay Airport, Chenega, AK.

The Class E airspace extending upward from 700 feet above the surface of the earth at the airport within a 2-mile radius is modified to only contain the arrival procedure to the final

approach fix (FAF), and to contain the departure procedure starting at JODRO—given that arrivals are visual flight rules (VFR) after the FAF, and departures are VFR until reaching JODRO.

In addition, the Chenega, AK, Class E airspace extending upward from 700 feet above the surface of the earth is extended to the north of the airport to contain arriving IFR operations below 1,500 feet above the surface until reaching the FAF.

Finally, the FAA is modifying the airport's associated legal description to update the city name within the text header from "Chenega Bay, AK" to "Chenega, AK."

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5–6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR part 71.1 of FAA Order JO 7400.11], Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AAL AK E5 Chenega, AK [Amended]

Chenega Bay Airport, AK
(Lat. 60°04'43" N, long. 147°59'41" W)

That airspace extending upward from 700 feet above the surface within an area bounded by a line beginning at lat. 60°11'28" N, long. 148°4'30" W; to lat. 60°18'43" N, long. 147°59'37" W; to lat. 60°18'23" N, long. 147°55'19" W; to lat. 60°14'30" N, long. 147°56'37" W; to lat. 60°5'57" N, long. 147°37'29" W; to lat. 60°3'26" N, long. 147°42'48" W; thence to the point of beginning.

National Oceanic and Atmospheric Administration

15 CFR Part 922

[Docket No. 240829–0230]

RIN 0648–BL31

Chumash Heritage National Marine Sanctuary

AGENCY: Office of National Marine Sanctuaries, National Ocean Service, National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Notification of effective date of final rule.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) is

providing notice that the final rule published on October 16, 2024, to designate Chumash Heritage National Marine Sanctuary (CHNMS), is effective on November 30, 2024.

DATES: The final rule to designate CHNMS, which was published in the **Federal Register** (89 FR 83554) on October 16, 2024, is effective November 30, 2024.

FOR FURTHER INFORMATION CONTACT:

Laura Ingulsrud, West Coast Regional Policy Analyst, 99 Pacific Street, Suite 100F, Monterey, CA 93940, 831–647–6450, laura.ingulsrud@noaa.gov.

SUPPLEMENTARY INFORMATION: Pursuant to Section 304(b) of the National Marine Sanctuaries Act (NMSA) (16 U.S.C. 1434(b)), NOAA published in the **Federal Register** notification of the designation of CHNMS and final regulations to implement the designation on October 16, 2024 (89 FR 83554). As required by the NMSA, the designation and regulations would become effective following the close of a review period of 45 days of continuous session of Congress beginning on the date of publication (16 U.S.C. 1434(b)(1)). The regulations are effective as of November 30, 2024.

Food and Drug Administration

21 CFR Parts 510, 520, 522, 524, and 558

[Docket No. FDA–2024–N–0002]

New Animal Drugs; Approval of New Animal Drug Applications; Withdrawal of Approval of New Animal Drug Applications; Change of Sponsor

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendments.

SUMMARY: The Food and Drug Administration (FDA or we) is amending the animal drug regulations to reflect application-related actions for new animal drug applications (NADAs) and abbreviated new animal drug applications (ANADAs) during July, August, and September 2024. The animal drug regulations are also being amended to improve their accuracy and readability.

DATES: This rule is effective December 2, 2024.

FOR FURTHER INFORMATION CONTACT: George K. Haibel, Center for Veterinary Medicine, Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 240-402-5689, George.Haibel@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Approvals

FDA is amending the animal drug regulations to reflect approval actions for NADAs and ANADAs during July, August, and September 2024, as listed in table 1. In addition, FDA is informing the public of the availability, where applicable, of documentation of environmental review required under the National Environmental Policy Act and, for actions requiring review of safety or effectiveness data, summaries of the basis of approval under the Freedom of Information Act. These documents, along with marketing exclusivity and patent information, may be obtained at Animal Drugs @FDA: <https://animaldrugsatfda.fda.gov/adafda/views/#/search>.

Date of approval	File No.	Sponsor (drug labeler code ¹)	Product name	Effect of the action	21 CFR section
July 2, 2024	200-788	Bimeda Animal Health Ltd. (061133)	MOXISOLV Injection (moxidectin)	Original approval as a generic copy of NADA 141-220.	522.1450

September 23, 2024 ...	200-776	Pharmgate Inc. (069254)	DERACIN (chlortetracycline), BOVATEC (lasalocid), and MGA (melengestrol acetate) Type C medicated feeds.	Original approval as a generic copy of NADA 141-531.	558.128

¹ See 21 CFR 510.600(c) for sponsor addresses.

II. Withdrawals of Approval

Med-Pharmex, Inc., 2727 Thompson Creek Rd., Pomona, CA 91767-1861

(drug labeler code 054925) requested that FDA withdraw approval of the two NADAs listed in table 2 because the products are no longer manufactured or marketed. As provided in the regulatory text of this document, the animal drug regulations are amended to reflect these actions.

Date of withdrawal of approval	File No.	Product name	21 CFR section
August 8, 2024	130-872	Nitrofurazone Anesthetic Dressing (nitrofurazone and butacaine sulfate)	524.1580c
Do	140-881	Nitrofurazone Soluble Dressing (nitrofurazone)	524.1580a

III. Change of Sponsor

Cephazone Pharma, LLC, 250 East Bonita Ave., Pomona, CA 91767 has informed FDA that it has transferred ownership of, and all rights and interest in, ANADA 200-420 for Ceftiofur Sodium Sterile Powder to Dechra Veterinary Products LLC, 7015 College Blvd., Suite 525, Overland Park, KS 66211. As provided in the regulatory

text, the animal drug regulations are amended to reflect this action.

IV. Technical Amendments

FDA is making the following amendments to improve the accuracy and readability of the animal drug regulations:

- 21 CFR 510.600(c) is amended to remove Cephazone Pharma, LLC and Provetica LLC from the lists of sponsors

of approved applications as these firms are no longer the sponsor of an approved application.

- 21 CFR 520.522 is amended to reflect a 2023 change of sponsorship for cyclosporine oral solution.
- 21 CFR 520.2090 is amended to revise the description of a tablet containing sarolaner, moxidectin, and pyrantel.

• 21 CFR 522.2470 is being amended to reflect previous approval of additional indications for use of tiletamine and zolazepam.

V. Legal Authority

This final rule is issued under section 512(i) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360b(i)). Although deemed a rule pursuant to the FD&C Act, this document does not meet the definition of “rule” in 5 U.S.C. 804(3)(A) because it is a “rule of particular applicability” and is not subject to the congressional review requirements in 5 U.S.C. 801–808. Likewise, this is not a rule subject to Executive Order 12866.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Parts 520, 522, and 524

Animal drugs.

21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 510, 520, 522, 524, and 558 are amended as follows:

PART 510—NEW ANIMAL DRUGS

■ 1. The authority citation for part 510 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 379e.

§ 510.600 [Amended]

■ 2. In § 510.600, in the table in paragraph (c)(1), remove the entries for “Cephazone Pharma, LLC” and “Provetica LLC”; and in the table in paragraph (c)(2), remove the entries for “068330” and “086097”.

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS

■ 3. The authority citation for part 520 continues to read as follows:

Authority: 21 U.S.C. 360b.

§ 520.304 [Amended]

■ 4. In § 520.304, in paragraph (b)(2), add in numerical order the text “086101”.

§ 520.522 [Amended]

■ 5. In § 520.522 in paragraph (b)(4), remove the text “086097” and add in its place the text “013744”.

■ 6. Add § 520.1136 to read as follows:

§ 520.1136 Ilunocitinib.

(a) *Specifications.* Each tablet contains 4.8, 6.4, 8.5, and 15 milligrams (mg) ilunocitinib.

(b) *Sponsor.* See No. 058198 in § 510.600(c) of this chapter.

(c) *Conditions of use—(1) Amount.* Administer orally 0.27 to 0.36 mg ilunocitinib/lb (0.6 to 0.8 mg ilunocitinib/kg) body weight, once daily, with or without food.

(2) *Indications for use.* For the control of pruritus associated with allergic dermatitis and control of atopic dermatitis in dogs at least 12 months of age.

(3) *Limitations.* Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§ 520.1372 [Redesignated as § 520.1375]

■ 7. Redesignate § 520.1372 as § 520.1375 and revise the section heading to read as follows:

§ 520.1375 Methimazole tablets.

* * * * *

■ 8. Add § 520.1376 to read as follows:

§ 520.1376 Methimazole solution.

(a) *Specifications.* Each milliliter of solution contains 5 milligrams (mg) methimazole.

(b) *Sponsor.* See No. 055529 in § 510.600(c) of this chapter.

(c) *Conditions of use in cats—(1) Amount.* Administer a starting dose of 2.5 mg every 12 hours. Following 3 weeks of treatment, the dose should be titrated to effect based on individual serum total T4 (TT4) levels and clinical response. Dose adjustments should be made in 2.5 mg increments with a maximum dosage of 20 mg per day divided, not to exceed 10 mg as a single dose.

(2) *Indications for use.* For the treatment of hyperthyroidism.

(3) *Limitations.* Federal law restricts this drug to use by or on the order of a licensed veterinarian.

■ 9. In § 520.2090, revise paragraph (a)(1) to read as follows:

§ 520.2090 Sarolaner, moxidectin, and pyrantel.

(a) * * *

(1) 3.0 milligrams (mg) sarolaner, 0.06 mg moxidectin, and 12.5 mg pyrantel (as pamoate salt);

* * * * *

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS

■ 10. The authority citation for part 522 continues to read as follows:

Authority: 21 U.S.C. 360b.

■ 11. In § 522.313c, revise paragraph (b) to read as follows:

§ 522.313c Ceftiofur sodium.

* * * * *

(b) *Sponsors.* See Nos. 017033 and 054771 in § 510.600(c) of this chapter.

* * * * *

■ 12. In § 522.1450, revise paragraph (b) to read as follows:

§ 522.1450 Moxidectin solution.

* * * * *

(b) *Sponsors.* See Nos. 055529, 058198, and 061133 in § 510.600(c) of this chapter.

* * * * *

■ 13. In § 522.2470, revise the section heading and paragraph (b) to read as follows:

§ 522.2470 Tiletamine and zolazepam.

* * * * *

(b) *Sponsors.* See Nos. 017033, 051311, and 054771 in § 510.600(c) of this chapter.

* * * * *

§ 522.2630 [Amended]

■ 14. In § 522.2630, in paragraphs (b)(1) and (2), add in numerical order the text “069043”.

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS

■ 15. The authority citation for part 524 continues to read as follows:

Authority: 21 U.S.C. 360b.

§ 524.1580a [Amended]

■ 16. Amend § 524.1580a in paragraph (b)(1) by removing the text “054925”.

§ 524.1580c [Removed]

■ 17. Remove § 524.1580c.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

■ 18. The authority citation for part 558 continues to read as follows:

Authority: 21 U.S.C. 354, 360b, 360ccc, 360ccc–1, 371.

■ 19. In § 558.128, revise paragraphs (e)(4)(ii), (vi), (viii), (xxviii), (xxxi), (xxxii), (xxxv), (xxxvi), (xxxix), (xli), (xlii), (li), (lii), (liv), (lvi), (lvii), (lix), and (lx) to read as follows:

§ 558.128 Chlortetracycline.

* * * * *

(e) * * *

(4) * * *

Chlortetracycline amount	Combination in grams/ton	Indications for use	Limitations	Sponsor
(ii) 5.83 to 14 g/ton to provide 70 mg/head/day.	Melengestrol acetate, 0.25 to 2 g/ton to provide 0.25 to 0.5 mg melengestrol acetate per head per day.	Growing beef heifers fed in confinement for slaughter (over 400 lb): For reduction of the incidence of liver abscesses, increased rate of weight gain, improved feed efficiency, and suppression of estrus (heat).	Melengestrol acetate Type C top-dress medicated feed must be top dressed or mixed at feeding with the Type C medicated feed containing 5.83 to 14 g/ton chlortetracycline. Chlortetracycline as provided by Nos. 054771 or 069254; melengestrol as provided by No. 054771 in § 510.600(c) of this chapter.	054771 069254
(vi) 33.33 to 50 g/ton to provide 0.5 mg/lb of body weight per day.	Melengestrol acetate, 0.5 to 2 g/ton to provide 0.5 mg melengestrol acetate per head per day.	Replacement beef heifers over 700 lb: For control of active infection of anaplasmosis caused by <i>Anaplasma marginale</i> susceptible to chlortetracycline and for suppression of estrus (heat).	Melengestrol acetate Type C top-dress medicated feed must be top dressed or mixed at feeding with the Type C medicated feed containing 33.33 to 50 g/ton chlortetracycline. Feeding a Type C top-dress medicated feed containing melengestrol acetate shall not exceed 24 days. Chlortetracycline as provided by Nos. 054771 or 069254; melengestrol as provided by No. 054771 in § 510.600(c) of this chapter.	054771 069254
(viii) 25 to 1,100 g/ton to provide 0.5 mg/lb of body weight daily.	Lasalocid, 30 to 600; melengestrol acetate, 0.5 to 2 g/ton to provide 0.5 mg/head/day melengestrol acetate.	Replacement beef heifers on pasture over 700 pounds: For control of active infection of anaplasmosis caused by <i>Anaplasma marginale</i> susceptible to chlortetracycline, increased rate of weight gain, and suppression of estrus (heat).	The melengestrol acetate Type C top-dress medicated feed must be top dressed onto or mixed at feeding with a Type C medicated feed containing 25 to 1,100 g/ton of chlortetracycline and 30 to 600 g/ton lasalocid to provide 0.5 mg chlortetracycline per lb body weight per day and not less than 60 mg or more than 300 mg lasalocid per head per day in at least 1 pound of feed. Do not exceed 24 days of feeding. See § 558.311(d) of this chapter. Chlortetracycline as provided by Nos. 054771 or 069254; lasalocid and melengestrol as provided by No. 054771 in § 510.600(c) of this chapter.	054771 069254
(xxviii) 500 to 4,000 g/ton to provide 10 mg/lb of body weight daily.	Lasalocid, 30 to 600; Melengestrol acetate, 0.5 to 2 g/ton to provide 0.5 mg/head/day melengestrol acetate.	Replacement dairy heifers on pasture less than 20 months of age and replacement beef heifers on pasture: For treatment of bacterial enteritis caused by <i>Escherichia coli</i> and bacterial pneumonia caused by <i>Pasteurella multocida</i> organisms susceptible to chlortetracycline, increased rate of weight gain, and suppression of estrus (heat).	The melengestrol acetate Type C top-dress medicated feed must be top dressed onto or mixed at feeding with a Type C medicated feed containing 500 to 4,000 g/ton of chlortetracycline and 30 to 600 g/ton lasalocid to provide 10 mg chlortetracycline per lb body weight per day and not less than 60 mg or more than 300 mg lasalocid per head per day in at least 1 pound of feed for not more than 5 days. After completing feeding of this combination, continue feeding a Type C top-dress medicated feed containing melengestrol acetate alone for a total time not exceeding 24 days of feeding. See § 558.311(d) of this chapter. Chlortetracycline as provided by Nos. 054771 or 069254, lasalocid and melengestrol as provided by No. 054771 in § 510.600(c) of this chapter.	054771 069254
(xxxi) 500 to 4,000 g/ton to provide 10 mg/lb of body weight daily.	Melengestrol acetate, 0.25 to 2 g/ton to provide 0.25 to 0.5 mg melengestrol acetate per head per day.	Growing beef heifers fed in confinement for slaughter: For the treatment of bacterial enteritis caused by <i>Escherichia coli</i> and bacterial pneumonia caused by <i>Pasteurella multocida</i> organisms susceptible to chlortetracycline, increased rate of weight gain, improved feed efficiency, and suppression of estrus (heat).	Melengestrol acetate Type C top-dress medicated feed must be top dressed onto or mixed at feeding with a Type C medicated feed containing 500 to 4,000 g/ton chlortetracycline for not more than 5 days. After completing feeding of this combination, continue feeding a Type C top-dress medicated feed containing melengestrol acetate alone. Chlortetracycline as provided by Nos. 054771 or 069254; melengestrol as provided by No. 054771 in § 510.600(c) of this chapter.	054771 069254

Chlortetracycline amount	Combination in grams/ton	Indications for use	Limitations	Sponsor
(xxxii) 500 to 4,000 g/ton to provide 10 mg/lb of body weight daily.	Melengestrol acetate, 0.5 to 2 g/ton to provide 0.5 mg melengestrol acetate per head per day.	Replacement dairy heifers less than 20 months of age and replacement beef heifers: For the treatment of bacterial enteritis caused by <i>Escherichia coli</i> and bacterial pneumonia caused by <i>Pasteurella multocida</i> organisms susceptible to chlortetracycline, and for suppression of estrus (heat).	Melengestrol acetate Type C top-dress medicated feed must be top dressed or mixed at feeding with a Type C medicated feed containing 500 to 4,000 g/ton chlortetracycline for not more than 5 days. After completing feeding of this combination, continue feeding a Type C top-dress medicated feed containing melengestrol acetate alone for a total time not exceeding 24 days. Use in dairy heifers less than 20 months of age may cause drug residues in milk and/or in calves born to these cows. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal. Chlortetracycline as provided by Nos. 054771 or 069254; melengestrol as provided by No. 054771 in § 510.600(c) of this chapter.	054771 069254
*	*	*	*	*
(xxxv) 4,000 to 20,000 g/ton to provide 10 mg/lb of body weight per day.	Melengestrol acetate, 0.25 to 2 g/ton to provide 0.25 to 0.5 mg melengestrol acetate per head per day.	Growing beef heifers fed in confinement for slaughter: For the treatment of bacterial enteritis caused by <i>Escherichia coli</i> and bacterial pneumonia caused by <i>Pasteurella multocida</i> organisms susceptible to chlortetracycline, and for increased rate of weight gain, improved feed efficiency, and suppression of estrus (heat).	Top dress 0.5 to 2 pounds of this medicated feed containing both drugs onto or mix at feeding with a non-medicated feed for not more than 5 days to provide 10 mg chlortetracycline per pound of body weight per day. After completing feeding of this combination, continue feeding a Type C top-dress medicated feed containing melengestrol acetate alone. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal. Chlortetracycline as provided by Nos. 054771 or 069254; melengestrol as provided by No. 054771 in § 510.600(c) of this chapter.	054771 069254
(xxxvi) 4,000 to 20,000 g/ton to provide 10 mg/lb of body weight per day.	Melengestrol acetate, 0.5 to 2 g/ton to provide 0.5 mg melengestrol acetate per head per day.	Replacement dairy heifers less than 20 months of age and replacement beef heifers: For the treatment of bacterial enteritis caused by <i>Escherichia coli</i> and bacterial pneumonia caused by <i>Pasteurella multocida</i> organisms susceptible to chlortetracycline, and for suppression of estrus (heat).	Top dress 0.5 to 2 pounds of this medicated feed containing both drugs onto or mix at feeding with a non-medicated feed for not more than 5 days to provide 10 mg chlortetracycline per pound of body weight per day. After completing feeding of this combination, continue feeding a Type C top-dress medicated feed containing melengestrol acetate alone for a total time not exceeding 24 days. Use in dairy heifers less than 20 months of age may cause drug residues in milk and/or in calves born to these cows. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal. Chlortetracycline as provided by Nos. 054771 or 069254; melengestrol as provided by No. 054771 in § 510.600(c) of this chapter.	054771 069254
*	*	*	*	*
(xxxix) 50 to 350 g/ton to provide 350 mg/head/day.	Melengestrol acetate, 0.5 to 2 g/ton to provide 0.5 mg melengestrol acetate per head per day.	Replacement beef heifers under 700 lb: For control of active infection of anaplasmosis caused by <i>Anaplasma marginale</i> susceptible to chlortetracycline and for suppression of estrus (heat).	Melengestrol acetate Type C top-dress medicated feed must be top dressed or mixed at feeding with the Type C medicated feed containing 50 to 350 g/ton chlortetracycline for up to 24 days of feeding. Chlortetracycline as provided by Nos. 054771 or 069254; melengestrol as provided by No. 054771 in § 510.600(c) of this chapter.	054771 069254

■ 20. In § 558.355:

- a. Revise paragraphs (b)(1) and (2);
 - b. Revise the headings for paragraphs (d)(9)(i) and (ii) and (d)(10)(i) and (ii);
 - c. Redesignate paragraph (f) as paragraph (e);
 - d. Revise newly redesignated paragraphs (e)(1)(i) and (ii), (e)(2)(i), and (e)(5);
 - e. Remove newly redesignated paragraph (e)(6); and
 - f. Redesignate newly redesignated paragraph (e)(7) as paragraph (e)(6).
- The revisions read as follows:

§ 558.355 Monensin.

26 CFR Part 1

[TD 10014]

RIN 1545-BL21

**Recourse Partnership Liabilities and
Related Party Rules**

AGENCY: Internal Revenue Service (IRS),
Treasury.

ACTION: Final rule.

SUMMARY: This document contains final
regulations relating to recourse
liabilities of a partnership and special
rules for related persons. These

regulations affect partnerships and their
partners.

DATES:

Effective date: These regulations are
effective on December 2, 2024.

Applicability dates: For dates of
applicability, see §§ 1.704-2(l)(1)(vi),
1.752-2(l)(4), and 1.752-5(a).

FOR FURTHER INFORMATION CONTACT:

Concerning these final regulations,
contact Caroline Hay of the Office of
Associate Chief Counsel (Passthroughs
and Special Industries), (202) 317-6850
(not a toll-free number).

SUPPLEMENTARY INFORMATION:

Authority

This document amends the Income
Tax Regulations (26 CFR part 1) under

section 752 of the Internal Revenue Code (Code) regarding a partner's share of a recourse partnership liability (final regulations).

The final regulations are issued under the express delegation of authority under section 7805(a) of the Code, which provides that “[t]he Secretary shall prescribe all needful rules and regulations for the enforcement of [the Code], including all rules and regulations as may be necessary by reason of any alteration of law in relation to internal revenue.”

Background

Section 752(a) provides, in general, that an increase in a partner's share of partnership liabilities (or an increase in a partner's individual liabilities by reason of the assumption by the partner of partnership liabilities) will be considered a contribution of money by the partner to the partnership. Conversely, section 752(b) provides that a decrease in a partner's share of partnership liabilities (or a decrease in a partner's individual liabilities by reason of the assumption by the partnership of the individual liabilities) will be considered a distribution of money to the partner by the partnership.

When determining a partner's share of partnership liabilities, the existing regulations under section 752 (existing §§ 1.752–1 through 1.752–3) distinguish between two categories of liabilities—recourse and nonrecourse. In general, a partnership liability is recourse to the extent that a partner or related person bears the economic risk of loss (EROL) as provided in existing § 1.752–2 and nonrecourse to the extent that no partner or related person bears the EROL under existing § 1.752–2. See existing § 1.752–1(a)(1) and (2). A partner bears the EROL for a partnership liability if the partner or related person: (1) has a payment obligation as provided in existing § 1.752–2(b) (except as provided in existing § 1.752–2(d)(2)); (2) is a lender to the partnership as provided in existing § 1.752–2(c) (except as provided in existing § 1.752–2(d)(1)); (3) guarantees payment of interest on a partnership nonrecourse liability as described in existing § 1.752–2(e); or (4) pledges property as security for a partnership liability as provided in existing § 1.752–2(h).

On December 16, 2013, the Department of the Treasury (Treasury Department) and the IRS published in the **Federal Register** (78 FR 76092) a notice of proposed rulemaking (REG–136984–12) that would amend the existing regulations under section 752 relating to a partner's share of a recourse partnership liability and the rules for

related persons (proposed regulations). The provisions of the proposed regulations are explained in greater detail in the preamble to the proposed regulations. The Treasury Department and the IRS received two comments responding to the proposed regulations. A public hearing on the proposed regulations was not requested or held.

The Treasury Department and the IRS are mindful that the proposed regulations were issued approximately eleven years ago. However, no intervening legislative changes regarding allocations of partnership liabilities have been made, no subsequent changes to regulatory rules concerning allocations of partnership liabilities address the issues in the proposed regulations, and the issues raised by the commenters continue to remain relevant. For these reasons, the Treasury Department and the IRS have determined that a new notice of proposed rulemaking or a further opportunity for public comment would be unlikely to generate different comments. Furthermore, issuing the same rules again as a notice of proposed rulemaking would unnecessarily delay further this rulemaking to the continued detriment of taxpayers desiring to apply these rules to allocate their partnership liabilities.

Accordingly, after full consideration of the comments received, these final regulations adopt the proposed regulations with certain modifications in response to the comments described in the Summary of Comments and Explanation of Revisions.

Summary of Comments and Explanation of Revisions

I. Overlapping Economic Risk of Loss

Under existing § 1.752–2(a), a partner's share of a recourse partnership liability equals the portion of that liability, if any, for which the partner or related person bears the EROL. The proposed regulations would have provided a proportionality rule to determine how partners share a partnership liability when multiple partners bear the EROL for the same liability (overlapping EROL). Under the proportionality rule, the EROL borne by a partner would be the amount of the partnership liability (or portion thereof) multiplied by a fraction obtained by dividing the amount of EROL borne by the partner by the sum of the EROL borne by all partners with respect to that liability.

One commenter suggested that the final regulations should not adopt the proportionality rule but should instead allocate liabilities among partners with

overlapping EROL in a manner analogous to the manner in which a nonrecourse liability is allocated under § 1.752–3. Specifically, the commenter suggested that such liabilities should be allocated in a manner consistent with the partner's interest in partnership profits. The commenter stated that this allocation approach more closely reflects the partners' economic arrangements and permits losses attributable to the liability to be allocated among the partners without any of the losses being suspended under section 704(d) of the Code.

Under the existing section 752 regulations, a recourse partnership liability is shared among partners that bear the EROL for the liability. Conversely, with a nonrecourse partnership liability, no partner bears economic risk with respect to the liability; therefore, the liability is generally allocated in accordance with a partner's share of partnership profits. Adopting a framework applicable to a nonrecourse partnership liability for purposes of determining how a recourse partnership liability should be shared under section 752 could cause the liability to be allocated disproportionately among those partners depending upon their profit-sharing ratios even though the partners bear the same amount of EROL for the liability. The proportionality rule provides a reasonable approach in addressing how a recourse partnership liability should be shared when partners have overlapping EROL. Therefore, the final regulations do not adopt the commenter's suggestion.

Another commenter requested clarification on the effect of local law and separate agreements between partners in determining whether partners have overlapping EROL. Under existing § 1.752–2(b)(3), all statutory and contractual obligations relating to a partnership liability are taken into account for purposes of determining a partner's EROL. Therefore, the proportionality rule applies to cases in which partners have overlapping EROL after taking into account all statutory and contractual obligations relating to the partnership liability. The final regulations illustrate in § 1.752–2(f)(9) that these obligations are considered in determining whether the partners have overlapping EROL.

II. Tiered Partnerships

Another overlapping EROL issue under section 752 relates to tiered partnerships. The proposed regulations would have provided guidance on how a lower-tier partnership (LTP) must allocate a liability in cases in which a

partner of an upper-tier partnership (UTP) is also a partner of the LTP and that partner bears the EROL with respect to the LTP's liability. Under the proposed regulations, the LTP would be required to allocate the liability directly to the partner.

One commenter, while acknowledging that the rule in the proposed regulations provides certainty and is administrable, expressed concerns that this rule could cause the partner in both the UTP and the LTP to recognize gain. The commenter recommended that the final regulations allow the LTP to allocate the liability in any reasonable manner between the partner and the UTP. The final regulations do not adopt this suggestion. The rule in the proposed regulations is the most administrable, especially in a case in which an LTP may not be aware that one of its partners is also a partner in a UTP that is removed from the LTP. Therefore, under the final regulations, an LTP must allocate the liability directly to the partner that bears the EROL with respect to the LTP's liability. Section § 1.752-2(i)(2) of the final regulations also clarifies how the tiered partnership rule applies in a case in which there is overlapping EROL among unrelated partners as provided in § 1.752-2(a)(2). Finally, the final regulations add an example to illustrate the application of the proportionality rule when there are tiered partnerships.

Another commenter suggested that a gap might exist between §§ 1.704-2 and 1.752-2 concerning partner nonrecourse deductions when a partner of a UTP (that is not also a partner of an LTP) bears the EROL for a liability of the LTP. Existing § 1.704-2(i) requires the partnership to allocate partner nonrecourse deductions to the partner that bears the EROL. Existing § 1.704-2(k)(5) treats an LTP's liability that is treated as a UTP's liability under § 1.752-4(a) also as a liability of the UTP for purpose of applying the rules under § 1.704-2(i). Under existing § 1.752-2(i), the LTP allocates its liability to the UTP when a partner of the UTP bears the EROL for the LTP's liability. The commenter asserted that, although existing § 1.752-2(i) requires the LTP to allocate the liability to the UTP, existing § 1.704-2 does not explicitly direct the LTP to allocate partner nonrecourse deductions attributable to that liability to the UTP. Thus, in the commenter's view, the existing rules do not treat the UTP as bearing the EROL for the LTP's liability for purposes of § 1.704-2(i). Contrary to this commenter's suggestion, existing §§ 1.704-2(i) and 1.704-2(k)(5) implicitly require an LTP to allocate

partner nonrecourse deductions attributable to a liability of the LTP to a UTP if a partner in the UTP bears the EROL for the LTP's liability. To eliminate any uncertainty, the final regulations add a sentence to § 1.704-2(k)(5) to clarify that a UTP is treated as bearing the EROL for an LTP's liability that is treated as the UTP's liability under § 1.752-4(a). Therefore, partner nonrecourse deductions attributable to the LTP's liability are allocated to the UTP under § 1.704-2(i).

III. General Issues of EROL

As previously stated, existing § 1.752-2(a) generally provides that a partner's share of a recourse partnership liability equals the portion of that liability, if any, for which the partner or related person bears the EROL. A partner bears the EROL for a partnership liability if the partner or related person has a payment obligation under § 1.752-2(b), is a lender as provided in § 1.752-2(c), guarantees payment of interest on a partnership nonrecourse liability as described in § 1.752-2(e), or pledges property as a security as provided in § 1.752-2(h). In describing when a partner bears the EROL for a partnership liability, the proposed regulations inadvertently failed to include situations under § 1.752-2(e) and (h). A commenter also suggested that references to § 1.752-2(c) relating to when a partner or related person is the lender take into account a de minimis rule under § 1.752-2(d)(1). Existing § 1.752-2(d)(1) provides that the general rule in § 1.752-2(c)(1) does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships and including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent or less, makes a loan to the partnership that constitutes qualified nonrecourse financing within the meaning of section 465(b)(6) (determined without regard to the type of activity financed). To incorporate the rules in § 1.752-2(d)(1), the commenter suggested that the final regulations broadly refer to § 1.752-2 when describing situations that give rise to EROL instead of listing specific applicable paragraphs in § 1.752-2.

The final regulations correct the oversight in the proposed regulations by listing in one section of the regulations all the situations under § 1.752-2 in which a person directly bears the EROL, including by taking into account the de minimis exceptions in § 1.752-2(d). A person directly bears the EROL if that

person, and not a related person, meets the requirements of the listed situations.

IV. Related Party Rules

A. Constructive Ownership Rules

Under existing § 1.752-4(b)(1), a person is related to a partner if the person and the partner bear a relationship to each other that is specified in section 267(b) or section 707(b)(1) of the Code, except that "80 percent or more" is substituted for "more than 50 percent" in each of those sections, a person's family is determined by excluding siblings, and section 267(e)(1) and (f)(1)(A) are disregarded. In determining whether a partner and a person bear a relationship to each other that is specified in section 267(b) or section 707(b)(1), the constructive stock ownership rules in section 267(c) apply. *See* sections 267(c) and 707(b)(3). The proposed regulations would disregard the constructive stock ownership rules under section 267(c)(1) in determining whether to treat stock of a corporation owned, directly or indirectly, by or for a partnership as owned proportionately by or for its partners if the corporation is a lender under § 1.752-2(c) or has a payment obligation with respect to a liability of its partnership owner. The preamble to the proposed regulations explained that a partner's EROL that is limited to the partner's equity investment in the partnership should be treated differently than the risk of loss beyond that investment.

Commenters agreed with the rationale underlying the proposed regulations and suggested that the final regulations disregard two other constructive ownership situations in determining relatedness under § 1.752-4(b)(1). First, commenters suggested that the final regulations also disregard section 267(c)(1) in determining whether to treat a UTP's direct or indirect interest in an LTP as owned proportionately by or for the UTP's partners if the LTP is a lender or has a payment obligation with respect to a liability of the UTP. Commenters expressed the view that in this situation, like the one described in the proposed regulations, a partner should not be treated as bearing the EROL for a partnership liability merely as a result of the UTP's investment in an LTP that has a payment obligation with respect to a liability of the UTP.

Second, commenters suggested that the final regulations disregard section 1563(e)(2) of the Code in determining relatedness under § 1.752-4(b)(1). For purposes of § 1.752-4(b)(1), a person is related to a partner if the two parties bear a relationship to each other as

described in section 267(b)(3). Under section 267(b)(3), a corporate partner and another corporation that are members of the same controlled group (as defined in section 267(f)) are treated as related for purposes of § 1.752–4(b)(1). Section 267(f) gives “controlled group” the same meaning as in section 1563(a). Under section 1563(a), a controlled group of corporations includes a parent-subsidiary controlled group and a brother-sister controlled group. Section 1563(e) provides attribution rules that apply in determining whether a corporation is a member of a parent-subsidiary controlled group or of a brother-sister controlled group. Specific to partnerships, section 1563(e)(2) provides that stock owned, directly or indirectly, by or for a partnership is considered as owned by any partner having an interest of 5 percent or more in either the capital or profits of the partnership in proportion to the partner’s interest in capital or profits, whichever is greater. Therefore, in applying the attribution rules under section 1563(e)(2), a corporate partner in a partnership could be treated as a member of a parent-subsidiary controlled group or of a brother-sister controlled group, and thus, related to a corporation in that group that is owned by the partnership. If the corporate subsidiary of the partnership has a payment obligation with respect to a liability of the partnership, the corporate partner is treated as bearing the EROL for that liability. Commenters recommended not treating the corporate partner as bearing the EROL merely as a result of applying the attribution rules under section 1563(e)(2) because the partner’s risk is limited to the investment in the partnership.

The final regulations adopt these suggestions. Thus, in determining relatedness under § 1.752–4(b)(1), the final regulations disregard: (1) section 267(c)(1) in determining whether a UTP’s interest in an LTP is owned proportionately by or for the UTP’s partners when an LTP directly bears the EROL for a liability of the UTP and (2) section 1563(e)(2) in determining whether a corporate partner in a partnership and a corporation owned by the partnership are members of the same controlled group when the corporation directly bears the EROL for a liability of the owner partnership. In both of these situations, a partner should not be treated as bearing the EROL when the partner’s risk is limited to the partner’s equity investment in the partnership.

B. Related Partner Exception to Related Party Rules

Under the proposed regulations, if a person who owns (directly or indirectly through one or more partnerships) an interest in a partnership is a lender or has a payment obligation with respect to a partnership liability, or portion thereof, then other persons owning interests directly or indirectly (through one or more partnerships) in that partnership would not be treated as related to that person for purposes of determining the EROL borne by each of them for the partnership liability, or portion thereof (related partner exception).

One commenter recommended that the final regulations clarify the meaning of the phrase “not treated as related” as used in proposed examples illustrating the related partner exception. The phrase “not treated as related” is intended to mean that, under § 1.752–4(b)(1), the partner and the other person are not treated as bearing a relationship to each other that is specified in section 267(b) or section 707(b)(1) (taking into account any applicable attribution rules). Accordingly, the phrase “not treated as related” should be broadly interpreted. For instance, in § 1.752–4(b)(5)(iii) of the final regulations, A wholly owns corporations X and Y. X and Y are members of Partnership, an entity treated as a partnership for Federal tax purposes. The partnership agreement provides that X and Y share equally in all items of income, gain, loss, deduction, and credit of Partnership. X owns 79 percent of Z, a corporation, and Y owns 21 percent of Z. Each of X and Z guarantees the entire amount of a liability of Partnership. Under this example, X and Y are not treated as related for purposes of determining the EROL borne by each of them for the partnership’s liability, and, because neither X nor Y owns an 80 percent or more interest in Z, X and Y are not treated as related to Z under § 1.752–4(b)(1). In other words, X and Y are not related to Z within the meaning of § 1.752–4(b)(1), which takes into account any applicable attribution rules.

Another commenter suggested that the related partner exception should apply only to turn off relatedness so that the direct EROL borne by one partner is not attributed to another partner. This commenter recommended that the rule should not turn off the relationship between a partner that directly bears the EROL for a partnership liability and another partner for purposes of determining whether those partners are related to a non-partner that also bears EROL for the partnership’s liability. If

the related partner exception did not apply in this situation, both partners would be treated as bearing the EROL for the partnership liability and share the liability under the proportionality rule.

The proposed regulations would implement the result in *IPO II v. Commissioner*, 122 T.C. 295 (2004), which applied the related partner exception to turn off the relationship between the partners and allocated the entirety of a partnership’s liability to the partner that directly bore the EROL for the partnership’s liability despite a non-partner related person also bearing the EROL. Therefore, the final regulations do not adopt this suggestion.

C. Person Related to Multiple Partners (Multiple Partner Rule)

The proposed regulations provide that if a person is a lender or has a payment obligation with respect to a partnership liability and is related to more than one partner, then those partners that are related to that person (related partners) share the liability equally. One commenter suggested that the multiple partner rule may be unnecessary and recommended that the final regulations only include the proportionality rule in proposed § 1.752–2(a) to address how to allocate EROL when there is overlapping EROL, including because multiple partners are related to a person with a payment obligation. The final regulations do not adopt this suggestion. The multiple partner rule is necessary because, without this rule, the partners might share EROL incorrectly. For example, corporations X, Y, and Z are partners in an entity treated as a partnership for Federal tax purposes. The partnership agreement provides that the partners share equally in all items of income, gain, loss, deduction, and credit of XYZ partnership. A, an individual, wholly owns X and Y. Z is an unrelated third party. Partnership borrows \$1,000 from a bank and A and Z both guarantee the entire amount of the liability. Without the multiple partner rule, each of X and Y has \$1,000 of EROL from A’s \$1,000 guarantee and Z has \$1,000 of EROL from its guarantee. Each would be allocated one-third of the liability under the proportionality rule. In contrast, by applying the multiple partner rule, each of X and Y has \$500 of EROL. When the proportionality rule is applied, X and Y are each allocated one-fourth of the liability and Z is allocated one-half of the liability. This is the correct result because there is one guarantee from A’s related group and one guarantee by Z.

The commenter also recommended that if the final regulations retain the

multiple partner rule, the final regulations allow the related partners to agree among themselves how to allocate the liability, provided that the allocation is consistently applied. The commenter explained that allowing related partners to choose among themselves who receives the allocation could prevent related partners from recognizing an uneconomic gain. To address the commenter's underlying concern, the final regulations under § 1.752-4(b)(3) treat related partners as bearing the EROL for a partnership liability in proportion to each related partner's interest in partnership profits.

V. Ordering Rule

The proposed regulations had different rules regarding allocations of partnership liabilities for related and unrelated parties. In particular, the proportionality rule in proposed § 1.752-2(a) addressed when partners have overlapping EROL, the related partner exception in proposed § 1.752-4(b)(2) described when partners with direct EROL are not treated as related to other partners, and the multiple partner rule in proposed § 1.752-4(b)(3) provided how EROL is shared when multiple partners are related to a person that is a lender or has a payment obligation. One commenter expressed confusion regarding how these rules interact and suggested that the final regulations include an ordering rule.

The final regulations adopt this suggestion. An ordering rule is warranted to clarify how the proportionality rule interacts with the multiple partner rule and how the multiple partner rule interacts with the related partner exception. Therefore, under § 1.752-4(e), the first step is to determine whether any partner (direct or indirect) directly bears the EROL for the partnership liability and apply the related partner exception in § 1.752-4(b)(2). After applying the related partner exception (if applicable), the next step is to determine the amount of EROL each partner is considered to bear under § 1.752-4(b)(3) when multiple partners are related to a person that directly bears the EROL for a partnership liability. The final step is to apply the proportionality rule in § 1.752-2(a)(2) to determine the amount of EROL that each partner is considered to bear when the amount of EROL that multiple partners bear exceed the amount of the partnership liability. The final regulations include an example to illustrate the ordering rule in § 1.752-4(e).

VI. Liquidating Distributions of Partnership Interests

The preamble to the proposed regulations requested comments concerning the proper treatment of liabilities when a UTP bears the EROL for an LTP's liability and distributes, in a liquidating distribution, its interest in the LTP to one of its partners, but the transferee partner does not bear the EROL. As a result of this transaction, the LTP's recourse liability became a nonrecourse liability for purposes of section 752. The preamble requested comments specifically on the timing of the liability reallocation relative to the transaction that caused the liability to change from recourse to nonrecourse.

The Treasury Department and the IRS received thoughtful comments regarding this issue in response to the request for comments and are continuing to consider whether additional guidance regarding the issue is warranted.

VII. Applicability Date

Under the proposed regulations the rules would apply to any liability incurred or assumed by a partnership on or after the date the regulations are published as final regulations in the **Federal Register**. Commenters suggested that the final regulations allow a taxpayer to apply the final regulations to all liabilities incurred or assumed by a partnership (even liabilities incurred or assumed before the date of publication of these regulations), with respect to all returns, including amended returns, filed after the date these regulations are published. The final regulations adopt this suggestion, but clarify that a partnership must apply these rules consistently to all of its partnership liabilities and may not pick and choose which rules apply to them. Allowing taxpayers to apply these regulations before the publication date will provide greater certainty for partnerships and their partners and allow uniform rules to apply to all partnership liabilities. As a result, these final regulations allow a partnership to apply the rules to all liabilities with respect to returns filed on or after December 2, 2024, provided the partnership consistently applies all the rules in these final regulations to those liabilities.

A commenter also suggested that the final regulations permit partnership liabilities that are modified or refinanced and payment obligations that are modified to continue to be subject to the provisions of the regulations in effect prior to the applicability date of the final regulations, but only to the extent of the amount and duration of the pre-modification (or refinancing)

liability or payment obligation. The commenter identified § 1.707-5(c) as a model for a special refinancing rule. The commenter noted that without such a rule, the applicability date in the proposed regulations might discourage partnerships from refinancing debts or subject partners to unexpected adverse results.

The final regulations adopt this suggestion. Accordingly, the final regulations do not apply to refinanced debts to the extent of the amount and duration of the pre-modification liability. Instead, the rules in the regulations as in effect prior to December 2, 2024, continue to apply to those liabilities. For example, assume a partnership borrowed \$1,000 on January 28, 2024, from Bank, and X, a person related to Partners A and B, guaranteed the entire amount of that liability. Further assume that this liability was refinanced after December 2, 2024 so that the liability is now \$2,000 and X continues to guarantee the entire amount of the liability. The rules in effect prior to December 2, 2024 would continue to apply to the \$1,000 of pre-modification liability and X's guarantee of the \$1,000 when determining which partner bears the EROL. The rules in effect after December 2, 2024 would apply to the remaining \$1,000.

Special Analyses

I. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520) (PRA) generally requires that a Federal agency obtain the approval of the Office of Management and Budget before collecting information from the public, whether such collection of information is mandatory, voluntary, or required to obtain or retain a benefit. These regulations do not impose a collection of information and, therefore, the PRA does not apply.

II. Regulatory Flexibility Act

The Treasury Department and the IRS have determined the rule will not have a significant economic impact on a substantial number of small entities. Although the rules affect small entities, data is not readily available about the number of taxpayers affected. Section 752 affects the allocation of partnership liabilities among partners in a partnership. The economic impact of these regulations is not likely to be significant, because the regulations will make it easier for taxpayers to comply with section 752. Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), the Secretary hereby certifies that these regulations will not have a

significant economic impact on a substantial number of small entities.

Pursuant to section 7805(f) of the Code, the proposed regulations that preceded these final regulations were submitted to the Chief Counsel for the Office of Advocacy of the Small Business Administration (SBA) for comment on its impact on small business. The Chief Counsel for the Office of Advocacy of the SBA did not provide any comments on the proposed regulations.

III. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a State, local, or Tribal government, in the aggregate, or by the private sector, of \$100 million in 1995 dollars, updated annually for inflation. This rule does not include any Federal mandate that may result in expenditures by State, local, or Tribal governments, or by the private sector in excess of that threshold.

IV. Executive Order 13132: Federalism

Executive Order 13132 (Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State and local governments, and is not required by statute, or preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. These final regulations do not have federalism implications and do not impose substantial direct compliance costs on state and local governments or preempt State law within the meaning of the Executive order.

V. Regulatory Planning and Review

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under Executive Order 12866 (June 9, 2023), tax regulatory actions issued by the IRS are not subject to the requirements of section 6 of Executive Order 12866, as amended. Therefore, a regulatory impact assessment is not required.

VI. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs has designated this rule as not a “major rule,” as defined by 5 U.S.C. 804(2).

Statement of Availability of IRS Documents

Guidance cited in this preamble is published in the Internal Revenue Bulletin and is available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at <https://www.irs.gov>.

Drafting Information

The principal author of these regulations is Caroline E. Hay, Office of the Associate Chief Counsel (Passthroughs and Special Industries). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.704–2 is amended by:

- 1. Adding a sentence after the first sentence of paragraph (k)(5).
- 2. Adding paragraph (l)(1)(vi).

The additions read as follows:

§1.704–2 Allocations attributable to nonrecourse liabilities.

* * * * *

(k) * * *

(5) * * * In addition, for purposes of applying paragraph (i) of this section, the upper-tier partnership is treated as bearing the economic risk of loss for the lower-tier partnership’s liabilities that are treated as the upper-tier partnership’s liabilities under § 1.752–4(a). * * *

(l) * * *

(1) * * *

(vi) The second sentence of paragraph (k)(5) of this section applies on or after December 2, 2024.

* * * * *

■ **Par. 3.** Section 1.752–0 is amended by:

- 1. In § 1.752–2:
 - i. Revising the entry (a); and
 - ii. Adding entries (a)(1) through (3) and (i)(1) through (3).
- 2. In § 1.752–4:
 - i. Revising the entry (b)(2);
 - ii. Removing the entries (b)(2)(i) through (iii);

■ iii. Redesignating the entries (b)(2)(iv), (b)(2)(iv)(A) and (B) as (b)(4), (b)(4)(i) and (ii), respectively;

■ iv. Removing the entry (b)(2)(iv)(C); and

■ v. Adding the entries (b)(3) and (5), (e), and (f).

The revisions and additions read as follows:

1.752–0 Table of contents.

* * * * *

§ 1.752–2 Partner’s share of recourse liabilities.

(a) Partner’s share of recourse liabilities.

(1) In general.

(2) Overlapping economic risk of loss.

(3) Direct economic risk of loss.

* * * * *

(i) * * *

(1) In general.

(2) Coordination with overlapping economic risk of loss.

(3) Example.

* * * * *

§ 1.752–4 Special rules.

* * * * *

(b) * * *

(2) Related partner exception.

(3) Person related to more than one partner.

* * * * *

(5) Examples.

* * * * *

(e) Ordering rule.

(f) Example.

* * * * *

■ **Par. 4.** Section 1.752–2 is amended by:

- 1. Revising paragraphs (a).
- 2. Revising the headings for paragraphs (f)(1) through (8).
- 3. Revising paragraphs (f)(9), and (i).
- 4. In the first sentence of paragraph (l)(1), removing the language “Paragraphs (a)” and adding the language “Paragraphs (a)(1)” in its place.
- 5. In the first sentence of paragraph (l)(3), removing the language “§ 1.752–2(a)” and adding “§ 1.752–2(a)(1)” in its place.
- 6. Adding paragraph (l)(4).

The revisions and addition read as follows:

§ 1.752–2 Partner’s share of recourse liabilities.

(a) *Partner’s share of recourse liabilities*—(1) *In general.* A partner’s share of recourse partnership liability equals the portion of that liability, if any, for which the partner or related person bears the economic risk of loss. The determination of the extent to which a partner bears the economic risk of loss for a partnership liability is made under the rules in paragraphs (b) through (k) of this section.

(2) *Overlapping economic risk of loss.* For purposes of determining a partner’s

share of a recourse partnership liability, the amount of the partnership liability is taken into account only once. If the aggregate amount of the economic risk of loss that all partners are determined to bear for a partnership liability (or portion thereof) under paragraph (a)(1) of this section (without regard to this paragraph (a)(2)) exceeds the amount of such liability (or portion thereof), then the economic risk of loss borne by each partner for such liability equals the amount determined by multiplying—

(i) The amount of such liability (or portion thereof) by

(ii) The fraction obtained by dividing the amount of the economic risk of loss that such partner is determined to bear for that liability (or portion thereof) under paragraph (a)(1) of this section, by the sum of such amounts for all partners.

(3) *Direct economic risk of loss.* For purposes of this section and § 1.752-4, a person directly bears the economic risk of loss for a partnership liability if that person has a payment obligation under paragraph (b) of this section (except as provided in paragraph (d)(2) of this section for certain partner guarantees), is a lender as provided in paragraph (c) of this section (except as provided in paragraph (d)(1) of this section for certain partner loans), guarantees payment of interest on a partnership nonrecourse liability as described in paragraph (e) of this section, or pledges property as a security as provided in paragraph (h) of this section.

* * * * *

(f) * * *

(1) *Example 1. Determining when a partner bears the economic risk of loss.* * * *

(2) *Example 2. Recourse liability; deficit restoration obligation.* * * *

(3) *Example 3. Guarantee by limited partner; partner deemed to satisfy obligation.* * * *

(4) *Example 4. Partner guarantee with right of subrogation.* * * *

(5) *Example 5. Bifurcation of partnership liability; guarantee of part of nonrecourse liability.* * * *

(6) *Example 6. Wrapped debt.* * * *

(7) *Example 7. Guarantee of interest by partner treated as part recourse and part nonrecourse.* * * *

(8) *Example 8. Continent obligation not recognized.* * * *

(9) *Example 9. Overlapping economic risk of loss.* (i) A and B are unrelated equal members of limited liability company, AB. AB is treated as a partnership for Federal tax purposes. AB borrows \$1,000 from Bank. A guarantees payment for the entire

amount of AB's \$1,000 liability and B guarantees payment of up to \$500 of the liability, if any amount of the full \$1,000 liability is not recovered by Bank. Under paragraph (b)(1) of this section, A bears \$1,000 of economic risk of loss for AB's liability and B bears \$500 of economic risk of loss for AB's liability. A and B have not entered into a loss-sharing agreement addressing their status as co-guarantors, and local law does not clearly establish responsibility as between them for the liability.

(ii) Because the aggregate amount of A's and B's economic risk of loss under paragraph (a)(1) of this section (\$1,500) exceeds the amount of AB's liability (\$1,000), the economic risk of loss borne by each of A and B is determined under paragraph (a)(2) of this section. Under paragraph (a)(2) of this section, A's economic risk of loss equals \$1,000 multiplied by \$1,000/\$1,500, or \$667, and B's economic risk of loss equals \$1,000 multiplied by \$500/\$1,500, or \$333.

* * * * *

(i) *Treatment of recourse liabilities in tiered partnerships—(1) In general.* If a partnership (upper-tier partnership) owns (directly or indirectly through one or more partnerships) an interest in another partnership (lower-tier partnership), the liabilities of the lower-tier partnership are allocated to the upper-tier partnership in an amount equal to the sum of the following—

(i) The amount of liabilities with respect to which the upper-tier partnership directly bears the economic risk of loss as described in paragraph (a)(3) of this section; and

(ii) The amount of any other liabilities with respect to which a partner of the upper-tier partnership bears the economic risk of loss, provided the partner is not also a partner in the lower-tier partnership.

(2) *Coordination with overlapping economic risk of loss.* A lower-tier partnership takes into account paragraph (a)(2) of this section prior to the application of this paragraph (i).

(3) *Example.* (i) A and B (which is unrelated to A) contribute \$810,000 and \$90,000 to UTP, a limited liability company treated as a partnership for Federal tax purposes, in exchange for a 90 percent and 10 percent interest in UTP, respectively. UTP contributes the \$900,000 to LTP, a partnership for Federal tax purposes, in exchange for a 90 percent interest in LTP and A contributes \$100,000 directly to LTP in exchange for a 10 percent interest in LTP. UTP and LTP both reported losses in their initial years that reduced the partners' bases in UTP and LTP to zero.

LTP borrows \$10 million. UTP and LTP both had no income in the year at issue. At the request of the lender, A and B both provide their personal guaranty for the entire amount of LTP's liability.

(ii) Under paragraph (b)(1) of this section, A has \$10 million of economic risk of loss for LTP's liability and B has \$10 million of economic risk of loss for LTP's liability. Under paragraph (i)(2) of this section, LTP takes into account paragraph (a)(2) of this section prior to determining the amount of liabilities allocated to UTP under paragraph (i)(1) of this section. Under paragraph (a)(2) of this section, A is considered to bear \$5 million ($(\$10 \text{ million}/\$20 \text{ million}) \times \$10 \text{ million}$) of economic risk of loss and B is considered to also bear \$5 million ($(\$10 \text{ million}/\$20 \text{ million}) \times \$10 \text{ million}$) of economic risk of loss for LTP's liability. Pursuant to paragraph (a)(1) of this section, LTP allocates \$5 million to A for A's direct interest in LTP's liability. Under paragraph (i)(1) of this section, LTP allocates \$5 million to UTP (\$5 million attributable to B's economic risk of loss for LTP's liability).

(iii) Pursuant to § 1.752-4(a), UTP treats its share of LTP's liability (\$5 million) as a liability of UTP. Because A bears the economic risk of loss for LTP's liability and is a partner in LTP, under paragraph (i)(1)(ii) of this section, UTP's share of LTP's liability (\$5 million) only includes the amount of LTP's liabilities with respect to which B bears the economic risk of loss. Therefore, under paragraph (a)(1) of this section, UTP allocates \$5 million of UTP's share of LTP's liability to B and none to A.

* * * * *

(l) * * *

(4) Paragraphs (a)(2) and (3), (f)(9), and (i) of this section apply to liabilities incurred or assumed by a partnership on or after December 2, 2024, other than liabilities incurred or assumed by a partnership pursuant to a written binding contract in effect prior to that date. To the extent that the proceeds of a partnership liability (refinancing debt) are allocable under the rules of § 1.163-8T to payments discharging all or part of any other liability (pre-modification liability) of that partnership, the refinancing debt will be treated as though it was incurred or assumed by the partnership prior to December 2, 2024, to the extent of the amount and duration of the pre-modification liability. A partnership may apply paragraphs (a)(2) and (3), (f)(9), and (i) of this section to all of its liabilities (including liabilities incurred or assumed by a partnership prior to December 2, 2024), for any return filed

on or after December 2, 2024 provided the partnership consistently applies all the rules in paragraphs (a)(2) and (3), (f)(9), and (i) of this section and § 1.752–4(b)(1)(iv) and (v), (b)(2) and (3), (b)(5)(i) through (iv), (e), and (f) to those liabilities.

■ **Par. 5.** Section 1.752–4 is amended by:

- 1. In paragraph (b)(1)(i), removing the language “sections;” and adding the language “sections.” in its place.
- 2. In paragraph (b)(1)(ii), removing the language “sisters; and” and adding the language “sisters.” in its place.
- 3. Adding paragraphs (b)(1)(iv) and (v).
- 4. Revising paragraph (b)(2).
- 5. Adding paragraphs (b)(3) through (5), (e), and (f).

The additions and revision read as follows:

§ 1.752–4 Special rules.

* * * * *

(b) * * *

(1) * * *

(iv) Disregard section 267(c)(1) in determining whether—

(A) Stock of a corporation owned, directly or indirectly, by or for a partnership is considered as being owned proportionately by or for its partners when the corporation directly bears the economic risk of loss as described in § 1.752–2(a)(3) for a liability of the partnership; and

(B) A capital interest or a profits interest in a partnership (lower-tier partnership) owned, directly or indirectly, by or for a partnership (upper-tier partnership) is considered as being owned proportionately by or for the upper-tier partnership’s partners when the lower-tier partnership directly bears the economic risk of loss as described in § 1.752–2(a)(3) for a liability of the upper-tier partnership.

(v) Disregard section 1563(e)(2) in determining whether a corporate partner and a corporation are members of the same controlled group (as defined in section 267(f)) under section 267(b)(3) when the corporation directly bears the economic risk of loss as described in § 1.752–2(a)(3) for a liability of the partnership.

(2) *Related partner exception.* Notwithstanding paragraph (b)(1) of this section (which defines related person), if a person who owns (directly or indirectly through one or more partnerships) an interest in a partnership directly bears the economic risk of loss as described in § 1.752–2(a)(3) for a partnership liability, or portion thereof, then other persons owning interests directly or indirectly (through one or more partnerships) in

that partnership are not treated as related to that person for purposes of determining the economic risk of loss borne by each of them for such partnership liability, or portion thereof. This paragraph (b)(2) does not apply when determining a partner’s interest under the de minimis rules in § 1.752–2(d) and (e).

(3) *Person related to more than one partner.* For purposes of determining a partner’s economic risk of loss for a partnership liability, or a portion thereof, when a person who directly bears the economic risk of loss as described in § 1.752–2(a)(3) for the partnership liability is related to more than one partner under paragraph (b)(1) of this section, each partner that is related to such person is considered to bear the economic risk of loss for the partnership liability, or portion thereof, in proportion to the partner’s interest in partnership profits.

(4) *Special rule where entity structured to avoid related person status—(i) In general.* If—

(A) A partnership liability is owed to or guaranteed by another entity that is a partnership, an S corporation, a C corporation, or a trust;

(B) A partner or related person owns (directly or indirectly) a 20 percent or more ownership interest in the other entity; and

(C) A principal purpose of having the other entity act as a lender or guarantor of the liability was to avoid the determination that the partner that owns the interest bears the economic risk of loss for federal income tax purposes for all or part of the liability; then the partner is treated as holding the other entity’s interest as a creditor or guarantor to the extent of the partner’s or related person’s ownership interest in the entity.

(ii) *Ownership interest.* For purposes of paragraph (b)(4)(i) of this section, a person’s ownership interest in—

(A) A partnership equals the partner’s highest percentage interest in any item of partnership loss or deduction for any taxable year;

(B) An S corporation equals the percentage of the outstanding stock in the S corporation owned by the shareholder;

(C) A C corporation equals the percentage of the fair market value of the issued and outstanding stock owned by the shareholder; and

(D) A trust equals the percentage of the actuarial interests owned by the beneficial owner of the trust.

(5) *Examples.* The following examples illustrate the principles of paragraph (b) of this section.

(i) *Example 1: Person related to more than one partner.* A, an individual, owns 100 percent of X, a corporation. X owns 100 percent of Y, a corporation. A owns a 40 percent capital and profits interest and X owns a 60 percent capital and profits interest in P, a limited liability company treated as a partnership for Federal tax purposes. P borrows \$1,000 from Bank. Y guarantees payment of the entire \$1,000 debt owed to Bank. A and X do not directly bear the economic risk of loss as described in § 1.752–2(a)(3) for the liability. Therefore, paragraph (b)(2) of this section does not apply for purposes of determining the economic risk of loss borne by A and X. Under paragraph (b)(1) of this section, Y is related to A and X. Therefore, under paragraph (b)(3) of this section, A bears the economic risk of loss of \$400 and X bears the economic risk of loss of \$600 for the \$1,000 liability.

(ii) *Example 2: Related partner exception.* A, an individual, owns 100 percent of two corporations, X and Y. A and Y are members of P, a limited liability company treated as a partnership for Federal tax purposes. P borrows \$1,000 from Bank. Each of A and X guarantees payment of the entire \$1,000 debt owed to Bank. A and Y are not treated as related to each other pursuant to paragraph (b)(2) of this section because A directly bears the economic risk of loss as described in § 1.752–2(a)(3) for the \$1,000 liability. Y is therefore not treated as related to X. Because A is the only partner that bears the economic risk of loss for P’s \$1,000 liability, A’s share of the liability is \$1,000 under § 1.752–2(a)(1).

(iii) *Example 3: Related partner exception.* A, an individual, owns 100 percent of two corporations, X and Y. X owns 79 percent of a corporation, Z, and Y owns the remaining 21 percent of Z. X and Y are members of P, a limited liability company treated as a partnership for Federal tax purposes. The partnership agreement provides that X and Y share equally in all items of income, gain, loss, deduction, and credit of P. P borrows \$2,000 from Bank. Each of X and Z guarantees payment of the entire \$2,000 debt owed to Bank. X directly bears the economic risk of loss as described in § 1.752–2(a)(3) for P’s \$2,000 liability; therefore, paragraph (b)(2) of this section applies and X and Y are not treated as related for purposes of determining the economic risk of loss borne by each of them for P’s \$2,000 liability. Because X and Y are not treated as related and neither owns an 80 percent or more interest in Z, neither X nor Y is treated as related to Z under paragraph (b)(1) of this section. Because

X bears the economic risk of loss for P's \$2,000 liability, X's share of the liability is \$2,000 under § 1.752-2(a)(1).

(iv) *Example 4: Related partner exception and person related to more than one partner.* Same facts as in paragraph (b)(5)(iii) of this section (*Example 3*), but X guarantees payment of up to \$1,200 of the debt owed to Bank if any amount of the full \$2,000 is not recovered by Bank and Z guarantees payment of \$2,000. Pursuant to paragraph (b)(2) of this section, X and Y are not treated as related to the extent of X's \$1,200 guarantee because X directly bears the economic risk of loss as described in § 1.752-2(a)(3) for \$1,200 of P's \$2,000 liability. X's share of the liability is \$1,200 under § 1.752-2(a)(1). In addition, because paragraph (b)(2) of this section does not apply to the remaining portion of the liability that X did not guarantee, X and Y are treated as related for purposes of the remaining \$800 of the liability pursuant to paragraph (b)(1) of this section. Therefore, Z is treated as related to X and Y under paragraph (b)(1) of this section. Pursuant to paragraph (b)(3) of this section, because X and Y each has a 50 percent interest in all items of income, gain, loss, deduction, and credit of P, X and Y each bear the economic risk of loss for \$400 of the remaining \$800 liability, and thus each has a \$400 share of the liability under § 1.752-2(a)(1). In sum, X's share of P's \$2,000 liability is \$1,600 (\$1,200 plus \$400) and Y's share of P's \$2,000 liability is \$400.

(v) *Example 5: Entity structured to avoid related person status.* A, B, and C form a general partnership, ABC. A, B, and C are equal partners, each contributing \$1,000 to the partnership. A and B want to loan money to ABC and have the loan treated as nonrecourse for purposes of section 752. A and B form partnership AB to which each contributes \$50,000. A and B share losses equally in partnership AB. Partnership AB loans partnership ABC \$100,000 on a nonrecourse basis secured by the property ABC buys with the loan. Under these facts and circumstances, A and B bear the economic risk of loss with respect to the partnership liability equally based on their percentage interest in losses of partnership AB.

* * * * *

(e) *Ordering rule.* In determining a partner's share of a recourse partnership liability, the rules in paragraph (b)(2) of this section, if applicable, apply before the rules in paragraph (b)(3) of this section. The rules in paragraph (b)(3) of

this section apply before the rules in § 1.752-2(a)(2).

(f) *Example.* The following example illustrates the application of paragraph (e) of this section.

(1) *Facts.* A, an individual, owns 100 percent of two corporations, X and Y. X, Y, and Z, a corporation, are members of P, a limited liability company treated as a partnership for Federal tax purposes. The partnership agreement provides that the partners share equally in all items of income, gain, loss, deduction, and credit of P. Z is not related to A, X, or Y. P borrows \$1,000 from Bank. Each of A, X, and Z guarantees payment for the entire amount of P's \$1,000 liability. Each of A, X, and Z has a payment obligation of \$1,000 under § 1.752-2(b) for P's \$1,000 liability.

(2) *Analysis.* (i) Under paragraph (e) of this section, first apply the rules under paragraph (b)(2) of this section, then apply the rules under paragraph (b)(3) of this section, and finally apply the rules under § 1.752-2(a)(2) to determine how to allocate P's \$1,000 liability among X, Y, and Z under § 1.752-2(a)(1). Under paragraph (b)(2) of this section, X and Y are not treated as related to each other with respect to X's payment obligation for the \$1,000 liability because X directly bears the economic risk of loss as described in § 1.752-2(a)(3). Therefore, X is treated as bearing \$1,000 of the economic risk of loss for P's liability.

(ii) Because the rules in paragraph (b)(2) of this section do not affect A's relationship to X and Y, X and Y are related to A under paragraph (b)(1) of this section. Because A is related to both X and Y, each of X and Y is considered to bear the economic risk of loss for P's liability in proportion to X's and Y's interest in P. Because they both have a one-third interest in all items of income, gain, loss, deduction, and credit of P, each of X and Y bears \$500 of economic risk of loss under paragraph (b)(3) of this section with respect to A's \$1,000 payment obligation for P's liability.

(iii) Z has a payment obligation with respect to the \$1,000 liability under § 1.752-2(b)(1) and thus, bears \$1,000 of the economic risk of loss for P's liability.

(iv) After applying paragraphs (b)(2) and (3) of this section, X is considered to bear \$1,500 of the economic risk of loss for P's liability and Y is considered to bear \$500 of the economic risk of loss for P's liability. Z is considered to bear \$1,000 of the economic risk of loss for P's liability. Because the aggregate amount of X's, Y's, and Z's economic risk of loss (\$3,000) exceeds the amount of P's liability (\$1,000), the economic risk of loss borne by X, Y, and Z is

determined under § 1.752-2(a)(2).

Under § 1.752-2(a)(2), X's economic risk of loss is \$500 $((\$1,500/\$3,000) \times \$1,000)$, Y's economic risk of loss is \$167 $((\$500/\$3,000) \times \$1,000)$, and Z's economic risk of loss is \$333 $((\$1,000/\$3,000) \times \$1,000)$. Therefore, under § 1.752-2(a)(1), X's share of P's liability is \$500, Y's share is \$167, and Z's share is \$333.

■ **Par. 6.** Section 1.752-5 is amended by:

■ 1. Revising the section heading.

■ 2. Adding three sentences after the first sentence in paragraph (a).

■ 3. In paragraph (a), removing the word "However" at the beginning of the fifth sentence and adding "In addition" in its place.

The revision and additions read as follows:

§ 1.752-5 Applicability dates and transition rules.

(a) * * * However, § 1.752-4(b)(1)(iv) and (v), (b)(2) and (3), (b)(5)(i) through (iv), (e), and (f) apply to any liability incurred or assumed by a partnership on or after December 2, 2024, other than a liability incurred or assumed by a partnership pursuant to a written binding contract in effect prior to that date. To the extent that the proceeds of a partnership liability (refinancing debt) are allocable under the rules of § 1.163-8T to payments discharging all or part of any other liability (pre-modification liability) of that partnership, the refinancing debt will be treated as though it was incurred or assumed by the partnership prior to December 2, 2024, to the extent of the amount and duration of the pre-modification liability. A partnership may apply § 1.752-4(b)(1)(iv) and (v), (b)(2) and (3), (b)(5)(i) through (iv), (e), and (f) to all of its liabilities (including liabilities incurred or assumed by a partnership prior to December 2, 2024), for any return filed on or after December 2, 2024 provided the partnership consistently applies all the rules in § 1.752-2(a)(2) and (3), (f)(9), and (i) and § 1.752-4(b)(1)(iv) and (v), (b)(2) and (3), (b)(5)(i) through (iv), (e), and (f) to those liabilities. * * *

BILLING CODE 4830-01-P

**ENVIRONMENTAL PROTECTION
AGENCY****40 CFR Part 52****[EPA–R08–OAR–2024–0389; FRL–12173–
02–R8]****Air Plan Partial Approval and Partial
Disapproval; Utah; Regional Haze
State Implementation Plan for the
Second Implementation Period; Air
Plan Disapproval; Utah; Prong 4
(Visibility) for the 2015 8-Hour Ozone
National Ambient Air Quality Standard****AGENCY:** Environmental Protection
Agency (EPA).**ACTION:** Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is partially approving and partially disapproving a regional haze state implementation plan (SIP) revision submitted by the State of Utah on August 2, 2022 (Utah's regional haze SIP submission), to address applicable requirements under the Clean Air Act (CAA) and the EPA's Regional Haze Rule (RHR) for the regional haze program's second implementation period. Additionally, the EPA is disapproving the visibility transport "Prong 4" portion of Utah's infrastructure SIP submission submitted on January 9, 2020, for the 2015 Ozone National Ambient Air Quality Standard (NAAQS). The EPA is taking these actions pursuant to the CAA.

DATES: This rule is effective on January 2, 2025.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R08–OAR–2024–0389. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Clayton Bean, Air and Radiation Division, EPA, Region 8, Mailcode 8ARD–IO, 1595 Wynkoop Street, Denver, Colorado 80202–1129, telephone number: (303) 312–6143, email address: bean.clayton@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document "we," "us," and "our" means the EPA.

- IV. Incorporation by Reference
- V. Statutory and Executive Order Reviews

I. What is being addressed in this document?

The EPA is partially approving and partially disapproving Utah's regional haze plan for the second implementation period. As required by section 169A of the CAA, the RHR calls for State and Federal agencies to work together to improve visibility in 156 national parks and wilderness areas, known as mandatory Class I Federal areas.¹ The rule requires the States, in coordination with the EPA, the National Park Service, the Fish and Wildlife Service, the Forest Service, and other interested parties, to develop and implement air quality protection plans to reduce the pollution that causes visibility impairment in mandatory Class I Federal areas. Visibility impairing pollutants include fine and coarse particulate matter (PM) (e.g., sulfates, nitrates, organic carbon, elemental carbon, and soil dust) and their precursors (e.g., sulfur dioxide (SO₂), oxides of nitrogen (NO_x), and, in some cases, volatile organic compounds (VOC) and ammonia (NH₃)). As discussed in further detail in our proposed rule, this document, and the accompanying Response to Comments (RTC) document, the EPA finds that Utah submitted a regional haze SIP that does not meet all of the statutory and regulatory requirements for the regional haze second implementation period.

Additionally, the EPA is disapproving a portion of Utah's January 9, 2020, infrastructure SIP submission for the 2015 ozone NAAQS that addresses interstate transport of visibility impairing pollutants. Utah submitted this SIP submission to address the applicable requirements of CAA section 110(a)(2) for the 2015 ozone NAAQS. We are disapproving the portion of the infrastructure SIP submission addressing interstate transport of visibility impairing pollutants for not meeting the requirements of CAA section 110(a)(2)(D)(i)(II) ("Prong 4").

The State's submissions, the proposed rule, and the RTC document can be found in the docket for this action.

**II. Summary of the Proposed Action,
Public Comments, and the EPA's
Rationale for Final Action**

Our notice of proposed rulemaking was published on August 19, 2024. 89 FR 67208. Our public comment period closed on September 18, 2024. During the public notice and comment period, we received more than 5,600 comments on our proposal. The full text of comments received is included in the publicly posted docket associated with this action at <https://www.regulations.gov>. Our RTC document, which is also included in the docket, provides full, detailed responses to all significant comments received and further explains the basis for our final action.

**A. Regional Haze Plan for the Second
Implementation Period**

On August 2, 2022, Utah submitted a revision to its SIP to address regional haze for the second implementation period, in accordance with the requirements of the CAA's regional haze program established by CAA sections 169A and 169B and 40 CFR 51.308.

On August 19, 2024, the EPA proposed to disapprove certain provisions of Utah's regional haze SIP submission.² Specifically, we proposed to disapprove the portions of Utah's regional haze SIP submission relating to 40 CFR 51.308(f)(2): long-term strategy; 40 CFR 51.308(f)(3): reasonable progress goals; and 40 CFR 51.308(i): Federal Land Manager (FLM) consultation. We also proposed to approve the portions of Utah's regional haze SIP submission relating to 40 CFR 51.308(f)(1): calculations of baseline, current, and natural visibility conditions, progress to date, and the uniform rate of progress; 40 CFR 51.308(f)(4): reasonably attributable visibility impairment; 40 CFR 51.308(f)(5) and 40 CFR 51.308(g): progress report requirements; and 40 CFR 51.308(f)(6): monitoring strategy and other implementation plan requirements. Consistent with section 110(k)(3) of the CAA, the EPA may partially approve portions of a submittal if those elements meet all applicable requirements and may disapprove the remainder so long as the elements are fully separable.

Our August 19, 2024, proposed rule provided background on the requirements of the CAA and RHR, a summary of Utah's regional haze SIP submittals and related EPA actions, and

¹ See 40 CFR part 81, subpart D.

² 89 FR 67208 (August 19, 2024).

the EPA's rationale for its proposed action. That background and rationale will not be restated in full here, although we briefly summarize the reasons for our partial disapproval of Utah's regional haze SIP submission in the paragraphs that follow.

In CAA section 169A(a)(1), Congress established the national goal of preventing any future and remedying any existing impairment of visibility in mandatory Class I Federal areas that results from manmade (anthropogenic) air pollution. The core component of a regional haze SIP submission for the second implementation period is a long-term strategy for making reasonable progress toward meeting that national goal. CAA section 169A(b)(2)(B), 40 CFR 51.308(f)(2). A state's long-term strategy must address regional haze in each Class I area within the state's borders and each Class I area outside the state that may be affected by emissions originating from within the state. It "must include the enforceable emissions limitations, compliance schedules, and other measures that are necessary to make reasonable progress, as determined pursuant to (f)(2)(i) through (iv)." 40 CFR 51.308(f)(2). The amount of progress that is "reasonable progress" is based on consideration of the four statutory factors in CAA section 169A(g)(1)—the costs of compliance, the time necessary for compliance, the energy and non-air quality environmental impacts of compliance, and the remaining useful life of any potentially affected sources³—in an evaluation of potential control measures for sources of visibility impairing pollutants, which is referred to as a "four-factor" analysis. In developing its long-term strategy, the state must document the technical basis, including modeling, monitoring, cost, engineering, and emissions information, on which it is relying to determine the measures that are necessary to make reasonable progress. 40 CFR 51.308(f)(2)(iii).

As detailed in section 3.A. of the RTC document, the CAA authorizes the EPA to substantively review states' SIP submissions for compliance with the statute and EPA's regulations to ensure progress towards the national visibility goal for Class I areas. Congress charged the EPA with exercising "federal oversight" over SIP submissions and "review[ing] all SIPs to ensure that the plans comply with the statute." *Oklahoma v. EPA*, 723 F.3d 1201, 1204 (10th Cir. 2013). The "EPA is left with more than the ministerial task of routinely approving SIP submissions." *North Dakota v. EPA*, 730 F.3d 750, 761

(8th Cir. 2013). Instead, the Agency's "review of a SIP extends not only to whether the state considered the necessary factors in its determination, but also to whether the determination is one that is reasonably moored to the CAA's provisions" and is "based on 'reasoned analysis.'" *Id.* at 761, 766 (citing *Alaska Dep't of Env't. Conservation v. EPA*, 540 U.S. 461 (2004)); see also *Wyoming v. EPA*, 78 F.4th 1171, 1180–81 (10th Cir. 2023) (noting that "the Act provides for substantive and careful EPA review" of SIP submissions and that "the EPA does not have to accept unreasonable analyses"). For the reasons stated in the proposed rule, this document, and in the RTC document, the EPA concludes that Utah's regional haze SIP submission does not meet all of the requirements of the CAA and RHR.

As detailed at length in our proposed rule and in the RTC document, we conclude that Utah's long-term strategy does not meet the requirements of CAA section 169A(b)(2) and 40 CFR 51.308(f)(2) on three independent grounds. Our first basis for disapproval of Utah's long-term strategy is the State's unreasonable rejection of NO_x emission reduction measures at the Hunter and Huntington power plants. Based on its evaluation of the four statutory factors, Utah concluded that installation of selective catalytic reduction (SCR) or other physical NO_x pollution controls is not necessary to achieve reasonable progress toward Congress's national visibility goal. Instead, Utah established plantwide mass-based NO_x emission limits, which cap the total amount of NO_x the Hunter and Huntington power plants can emit during a 12-month rolling period at levels that are similar to the status quo.⁴

Utah's determination that the plantwide mass-based NO_x emission limits for Hunter and Huntington are all that is necessary to make reasonable progress is not grounded in a reasoned evaluation of the four statutory factors or a defensible technical analysis. Utah's assessment of the costs of compliance, one of the four statutory factors, hinged on its finding that physical controls that cost more than

\$5,750/ton are not cost-effective for the plants; a determination that likely reductions in the future utilization of Hunter and Huntington would reduce the cost-effectiveness of SCR; and concern about various affordability considerations associated with the installation of SCR, including an unsubstantiated conclusion that a requirement to install SCR may cause the plants to close early. As detailed in the proposed rule and in the RTC document,⁵ Utah did not provide adequate support for its analysis of and conclusions regarding the costs of compliance. Therefore, we find that Utah did not justify its conclusion that the costs of compliance favored mass-based emission limits over SCR for the Hunter and Huntington power plants.

We also find that Utah's evaluation of the other three statutory factors (the time necessary for compliance, the energy and non-air quality environmental impacts of compliance, and the remaining useful life of any potentially affected anthropogenic source of visibility impairment) was unreasonable. Utah did not take into consideration the factual information supplied by the operator of the plants or the regulation governing how time necessary for compliance may be considered when concluding that the time necessary for compliance favored mass-based emission limits over SCR.⁶ For the energy and non-air quality impacts of SCR, Utah provided no analysis or documentation to support its assertion that because Hunter and Huntington are projected to assist in a transition toward intermittent renewable energy generation (e.g., wind and solar), a requirement to install SCR could lead to early plant closures and thereby negatively affect renewable energy deployment. In considering the plants' remaining useful lives, Utah did not adequately substantiate its concerns about early plant closures or its assessment that Hunter and Huntington would retire before the 30-year amortization period for SCR, further reducing SCR's cost-effectiveness. Utah also relied on the plants' projected retirement dates from the owner's resource plans, which frequently change and are not federally enforceable. For the reasons detailed in the proposed

⁴ 89 FR at 67234–37. Table 13 and figures 2–3 in the proposed rule show that both power plants' recent actual (2014–2021) NO_x emissions were, in many years, lower than the initial (2022), interim (2025), and/or final (2028) mass-based emission limits. Table 12 shows that the final (2028) mass-based emission limits, which are the most stringent, will result in a net increase in NO_x emissions of 8 tons per year from Hunter and Huntington combined, compared to the emissions projections based on an "on the books" (no additional controls) scenario for 2028 that Utah relied on in its SIP development.

⁵ 89 FR at 67240–43; RTC document, section 5.C.iv.

⁶ 40 CFR 51.308(f)(2)(i) provides that if a state concludes that a control measure cannot reasonably be installed and become operational until after the end of the implementation period, the state may not consider this fact in determining whether the measure is necessary to make reasonable progress.

³ CAA section 169A(g)(1); 40 CFR 51.308(f)(2)(i).

rule and in the RTC document,⁷ we find that Utah unreasonably concluded that the remaining three statutory factors support its determination that plantwide mass-based emission limits for the Hunter and Huntington power plants, instead of SCR, are all that is necessary to make reasonable progress toward the national visibility goal.

Furthermore, the specific parameters of the mass-based emission limits that Utah established do not reflect reasoned analysis. In rejecting SCR, Utah relied on its unsupported conclusion that future utilization of Hunter and Huntington was likely to decrease, thereby eroding the cost-effectiveness of SCR.⁸ However, Utah then set the mass-based emission limits at levels premised on *increased* plant utilization, without acknowledging or reconciling the conflict in its treatment of plant utilization within its SIP submission.⁹ Nor did Utah adequately support its determination that mass-based emission limits that apply over the course of a 12-month rolling period, as opposed to a shorter time period such as monthly or seasonally, are sufficient to make reasonable progress.¹⁰ For all of these reasons, and as further detailed in our proposed rule and RTC document,¹¹ we are disapproving Utah's long-term strategy because the State did not reasonably evaluate the NO_x emission reduction measures for Hunter and Huntington that are necessary to make reasonable progress toward Congress's national visibility goal. See CAA section 169A(g)(1); 40 CFR 51.308(f)(2).

Our second basis for disapproval of Utah's long-term strategy is the State's unjustified decision not to evaluate whether emission reduction measures at CCI Paradox Lisbon Natural Gas Plant are necessary for reasonable progress. Utah relied on inaccurately calculated 2020 emissions data and an incorrect determination that anomalously high SO₂ emissions in 2014 and 2015 had caused the facility to exceed Utah's Q/d threshold¹² for requiring four-factor

analysis. In its comments on the proposed rule, Utah conceded that it had erroneously calculated the facility's Q/d value based on incorrect 2020 emissions data and noted its intention to submit a SIP revision or SIP supplement to address this issue. Because this deficiency has not been rectified, and as further detailed in our proposed rule and in the RTC document,¹³ we are disapproving Utah's long-term strategy because the State did not consider the emission reduction measures at CCI Paradox Lisbon Natural Gas Plant that are necessary to make reasonable progress toward the national visibility goal, as required by CAA section 169A(g)(1) and 40 CFR 51.308(f)(2).

Our third basis for disapproval of Utah's long-term strategy is the State's unreasonable rejection of SO₂ emission reduction measures at Sunnyside Cogeneration and its incorporation of unsupported emission limits for that facility into its SIP. As explained in our proposed rule and in the RTC document, Utah unreasonably rejected dry scrubbing (also known as dry sorbent injection), a technically feasible SO₂ control, without providing adequate technical documentation.¹⁴ After rejecting dry scrubbing, Utah determined that the facility's existing emission limits are necessary to achieve reasonable progress and incorporated those emission limits into its SIP.¹⁵ However, the SIP incorporates two separate emission limits for both NO_x and SO₂: one that applies during normal boiler operation and a higher limit that applies during startup, shutdown, and malfunction (SSM) events. Utah did not include a definition of the term "normal boiler operations" and did not provide any documentation of the frequency of normal boiler operations versus SSM events. Utah also did not explain how often the facility operates at the higher SSM emission limits and did not provide adequate technical documentation addressing how those higher limits relate to the State's obligation to make reasonable progress. In sum, due to Utah's unreasonable rejection of SO₂ emission reduction measures and its inclusion of unsupported emission limits for Sunnyside Cogeneration into its SIP, we cannot conclude that the State's long-term strategy includes all the measures necessary to make reasonable progress.

Our proposed rule identified a fourth basis for disapproval of Utah's long-term strategy: Utah's improper inclusion of automatic exemptions for SSM events in the emission restrictions for Intermountain power plant.¹⁶ After careful consideration of comments, we are not relying on this issue as a basis for our disapproval of Utah's long-term strategy in our final rule. Section 5.F.i. of the RTC document sets forth our rationale and contains our full responses to the comments we received regarding the SSM provisions for Intermountain power plant.

Finally, in addition to disapproving the State's long-term strategy, we are disapproving Utah's reasonable progress goals under 40 CFR 51.308(f)(3) and its consultation with FLMs under 40 CFR 51.308(i). As detailed in our proposed rule and in the RTC document,¹⁷ compliance with these requirements is dependent on compliance with the long-term strategy provisions in 40 CFR 51.308(f)(2).

B. Prong 4 (Visibility) of the 2015 Ozone NAAQS Infrastructure SIP

On January 9, 2020, Utah submitted its infrastructure SIP for the 2015 ozone NAAQS to address the applicable requirements of CAA section 110(a)(2). Subsequently, on August 19, 2024, the EPA proposed to disapprove the portion of Utah's January 9, 2020, infrastructure SIP submission for the 2015 ozone NAAQS that addressed interference with visibility protection ("Prong 4").¹⁸ Our public comment period closed on September 18, 2024.

Our August 19, 2024, proposed rule provided background on the requirements of CAA section 110(a)(2) for the 2015 ozone NAAQS, a summary of the portion of Utah's infrastructure SIP submittal being acted on and related EPA actions, and the EPA's rationale for its proposed action. That background and rationale will not be restated here. For the reasons stated in the proposed rule¹⁹ and in section 12 of the accompanying RTC document, the EPA concludes that the Prong 4 portion of Utah's January 9, 2020, infrastructure SIP submission does not meet the requirements of CAA section 110(a)(2)(D)(i)(II).

III. Final Action

For the reasons stated in the proposed rule, in the RTC document, and in this document, we are partially approving

⁷ 89 FR at 67244; RTC document, sections 5.C.iv-v.

⁸ All else equal, lower plant utilization results in physical controls such as SCR becoming relatively less cost-effective, because the cost per ton of emissions reduced increases as plant utilization decreases.

⁹ 89 FR at 67241–43; RTC document, section 5.C.iv.b.

¹⁰ 89 FR at 67244; RTC document, section 5.C.vi.

¹¹ 89 FR at 67240–44; RTC document, section 5.C.

¹² Q/d values represent the ratio of an individual source's annual emissions of visibility-impairing emission precursors (NO_x, SO₂, and PM₁₀) in combined tons ("Q") divided by the distance in kilometers ("d") between the source and a Class I area. The larger the Q/d value, the greater the source's expected effect on visibility impairment in that Class I area.

¹³ 89 FR at 67245–48; RTC document, sections 4.B., 11.

¹⁹ 89 FR at 67253–54.

and partially disapproving Utah's regional haze SIP submission.²⁰

We are disapproving the following components of Utah's regional haze SIP submission relating to CAA section 169A:

- Long-term strategy (40 CFR 51.308(f)(2));
- Reasonable progress goals (40 CFR 51.308(f)(3)); and
- FLM consultation (40 CFR 51.308(i)).

We are approving the following components of Utah's regional haze SIP submission relating to CAA section 169A:

- Calculations of baseline, current, and natural visibility conditions, progress to date, and uniform rate of progress (40 CFR 51.308(f)(1));
- Reasonably attributable visibility impairment (40 CFR 51.308(f)(4));
- Progress report requirements (40 CFR 51.308(f)(5) and 40 CFR 51.308(g)); and
- Monitoring strategy and other implementation plan requirements (40 CFR 51.308(f)(6)).

Additionally, as a consequence of our partial disapproval of Utah's regional haze SIP submission for the second implementation period, the EPA is disapproving the Prong 4 portion of Utah's January 9, 2020, infrastructure SIP for the 2015 ozone NAAQS, pursuant to CAA section 110(a)(2)(D)(i)(II).

IV. Incorporation by Reference

In this document, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of R307–110–28, excluding long-term strategy, reasonable progress goals, and FLM consultation. The EPA has made, and will continue to make, this material generally available through <https://www.regulations.gov> and at the EPA Region 8 Office (please contact the person identified in the **FOR FURTHER**

INFORMATION CONTACT section of this preamble for more information). Therefore, this material has been approved by the EPA for inclusion in Utah's SIP, has been incorporated by reference by the EPA into that plan, is fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.²¹

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action partially approves and partially disapproves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address “disproportionately high and adverse human health or environmental effects” of their actions on communities with environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. Executive Order 14096 (Revitalizing Our Nation's Commitment to Environmental Justice for All, 88 FR 25251, April 26, 2023) builds on and supplements E.O. 12898 and defines EJ as, among other things, the just treatment and meaningful involvement of all people, regardless of income, race, color, national origin, or Tribal affiliation, or disability in agency decision-making and other Federal activities that affect human health and the environment.

Utah evaluated EJ considerations as part of its SIP submittal even though the CAA and applicable implementing regulations neither prohibit nor require an evaluation. A summary of Utah's EJ considerations is contained in section VIII. of the proposed rule. The EPA also performed an EJ analysis, as described in the proposed rule. Both Utah's and the EPA's analyses were done for the purpose of providing additional context and information about this rulemaking to the public, not as a basis of the action. The EPA is taking action under the CAA on bases independent of Utah's evaluation of EJ. In addition, there is no information in the record upon which this decision is based that is inconsistent with the stated goal of E.O. 12898 of achieving EJ for people of color, low-income populations, and Indigenous peoples.

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 31, 2025. Filing a

²⁰ Based on Utah's specific titles in the regional haze SIP submission, we are disapproving: (1) Section IX.H.21: General Requirements: Control measures for Area and Point Sources, Emission Limits and Operating Practices, Regional Haze Requirements; (2) Section IX.H.23. Source Specific Emission Limitations Regional Haze Requirements, Reasonable Progress Controls; and (3) R307–110–17. General Requirements: State Implementation Plan, Section IX, Control Measures for Area and Point Sources, Part H, Emission Limits. Additionally, based on Utah's specific titles in the regional haze SIP submission, and identified by the bullet list below, we are partially approving and partially disapproving: (1) Section XX.A: Regional Haze Second Implementation Period; and (2) R307–110–28. General Requirements: State Implementation Plan, Regional Haze.

²¹ 62 FR 27968 (May 22, 1997).

petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R08–OAR–2023–0489; FRL–12135–02–R8]

Air Plan Partial Approval and Partial Disapproval; Wyoming; Regional Haze Plan for the Second Implementation Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is partially approving and partially disapproving a regional haze state implementation plan (SIP) revision submitted by the State of Wyoming on August 10, 2022 (Wyoming’s 2022 SIP submission), to address applicable requirements under the Clean Air Act (CAA) and the EPA’s Regional Haze Rule (RHR) for the regional haze program’s second implementation period. The EPA is taking this action pursuant to the CAA.

DATES: This rule is effective on January 2, 2025.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R08–OAR–2023–0489. All

documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, *e.g.*, Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

I. What is being addressed in this document?

The EPA is partially approving and partially disapproving Wyoming’s regional haze plan for the second implementation period. As required by section 169A of the CAA, the RHR calls for State and Federal agencies to work together to improve visibility in 156 national parks and wilderness areas, known as mandatory Class I Federal areas.¹ The rule requires the States, in coordination with the EPA, the National Park Service, the Fish and Wildlife Service, the Forest Service, and other interested parties, to develop and implement air quality protection plans to reduce the pollution that causes visibility impairment in mandatory Class I Federal areas. Visibility impairing pollutants include fine and coarse particulate matter (PM) (*e.g.*, sulfates, nitrates, organic carbon, elemental carbon, and soil dust) and their precursors (*e.g.*, sulfur dioxide (SO₂), oxides of nitrogen (NO_x), and, in some cases, volatile organic compounds (VOC) and ammonia (NH₃)). As discussed in further detail in our proposed rule, this document, and the accompanying Response to Comments (RTC) document, the EPA finds that Wyoming submitted a regional haze SIP that does not meet all of the regional haze requirements for the second implementation period. The State’s submission, the proposed rule, and the RTC document can be found in the docket for this action.

II. Summary of the Proposed Action, Public Comments, and the EPA’s Rationale for Final Action

On August 10, 2022, Wyoming submitted a revision to its SIP to address regional haze for the second implementation period, in accordance with the requirements of the CAA’s regional haze program established by

CAA sections 169A and 169B and 40 CFR 51.308.

On August 1, 2024, the EPA proposed to disapprove certain provisions of Wyoming’s 2022 SIP submission.² Specifically, we proposed to disapprove the portions of Wyoming’s 2022 SIP submission relating to 40 CFR 51.308(f)(2): long-term strategy; 40 CFR 51.308(f)(3): reasonable progress goals; and 40 CFR 51.308(i): Federal Land Manager (FLM) consultation. We also proposed to approve the portions of Wyoming’s 2022 SIP submission relating to 40 CFR 51.308(f)(1): calculations of baseline, current, and natural visibility conditions, progress to date, and the uniform rate of progress; 40 CFR 51.308(f)(4): reasonably attributable visibility impairment; 40 CFR 51.308(f)(5) and 40 CFR 51.308(g): progress report requirements; and 40 CFR 51.308(f)(6): monitoring strategy and other implementation plan requirements. Consistent with section 110(k)(3) of the CAA, the EPA may partially approve portions of a submittal if those elements meet all applicable requirements and may disapprove the remainder so long as the elements are fully separable.

Our August 1, 2024 proposed rule provided background on the requirements of the CAA and RHR, a summary of Wyoming’s regional haze SIP submittals and related EPA actions, and the EPA’s rationale for its proposed action. That background and rationale will not be restated in full here, although we briefly summarize the reasons for our partial disapproval of Wyoming’s 2022 SIP submission in the paragraphs that follow.

Our public comment period closed on September 3, 2024. During the public notice and comment period, we received more than 6,000 comments on our proposal. The full text of the comments received are included in the publicly posted docket associated with this action at <https://www.regulations.gov>. Our RTC document, which is also included in the docket, provides full, detailed responses to all significant comments received and further explains the basis for our final action.

In CAA section 169A(a)(1), Congress established the national goal of preventing any future and remedying any existing impairment of visibility in mandatory Class I Federal areas that results from manmade (anthropogenic) air pollution. The core component of a regional haze SIP submission for the second implementation period is a long-term strategy for making reasonable

progress toward meeting that national goal. CAA section 169A(b)(2)(B), 40 CFR 51.308(f)(2). A state’s long-term strategy must address regional haze in each Class I area within the state’s borders and each Class I area outside the state that may be affected by emissions originating from within the state. It “must include the enforceable emissions limitations, compliance schedules, and other measures that are necessary to make reasonable progress, as determined pursuant to (f)(2)(i) through (iv).” 40 CFR 51.308(f)(2). The amount of progress that is “reasonable progress” is based on consideration of the four statutory factors in CAA section 169A(g)(1)—the costs of compliance, the time necessary for compliance, the energy and non-air quality environmental impacts of compliance, and the remaining useful life of any potentially affected sources³—in an evaluation of potential control measures for sources of visibility impairing pollutants, which is referred to as a “four-factor” analysis. In developing its long-term strategy, the state must document the technical basis, including modeling, monitoring, cost, engineering, and emissions information, on which it is relying to determine the measures that are necessary to make reasonable progress. 40 CFR 51.308(f)(2)(iii). Wyoming did not include any emission control measures, new or existing, in its long-term strategy for the regional haze second implementation period.

As explained in section 3.A. of the RTC document, the CAA authorizes the EPA to substantively review states’ SIP submissions for compliance with the statute and RHR to ensure progress towards the national visibility goal for Class I areas. Congress charged the EPA with exercising “federal oversight” over SIP submissions and “review[ing] all SIPs to ensure that the plans comply with the statute.” *Oklahoma v. EPA*, 723 F.3d 1201, 1204 (10th Cir. 2013). The “EPA is left with more than the ministerial task of routinely approving SIP submissions.” *North Dakota v. EPA*, 730 F.3d 750, 761 (8th Cir. 2013). Instead, the Agency’s “review of a SIP extends not only to whether the state considered the necessary factors in its determination, but also to whether the determination is one that is reasonably moored to the CAA’s provisions” and is “based on ‘reasoned analysis.’” *Id.* at 761, 766 (citing *Alaska Dep’t of Env’t. Conservation v. EPA*, 540 U.S. 461 (2004)); *see also Wyoming v. EPA*, 78 F.4th 1171, 1180–81 (10th Cir. 2023) (noting that “the Act provides for substantive and careful EPA review” of

¹ See 40 CFR part 81, subpart D.

² 89 FR 63030 (August 1, 2024).

³ CAA section 169A(g)(1); 40 CFR 51.308(f)(2)(i).

SIP submissions and that “the EPA does not have to accept unreasonable analyses”). For the reasons stated in the proposed rule, this document, and in the RTC document, the EPA determines that Wyoming’s 2022 SIP submission does not meet all of the requirements of the CAA and RHR.

As detailed at length in our proposed rule and in the RTC document, we conclude that Wyoming’s long-term strategy does not meet the requirements of CAA section 169A(b)(2) and 40 CFR 51.308(f)(2) on four independent grounds. First, Wyoming failed to

consider the four statutory factors for the sources and associated units and pollutants listed in table 1, despite determining that these sources may contribute to visibility impairment at Class I areas. In some instances, Wyoming provided no justification for the lack of four-factor analysis. In others, Wyoming improperly relied on planned but unenforceable source retirements or on the presence of existing emission control measures at a source, without providing adequate technical documentation of the

effectiveness of those existing controls or a sufficient indication that additional controls would not be cost-effective or reasonable. For the reasons detailed in our proposed rule and in the RTC document,⁴ the State’s reasoning does not justify its decision not to conduct four-factor analyses for these sources, as required under CAA section 169A(g)(1) and 40 CFR 51.308(f)(2). Therefore, we cannot conclude that Wyoming’s long-term strategy includes all the measures that are necessary to make reasonable progress.

TABLE 1—SOURCES, UNITS, AND ASSOCIATED POLLUTANTS THAT MAY AFFECT VISIBILITY AT CLASS I AREAS WHERE NO FOUR-FACTOR ANALYSIS WAS PERFORMED

Source	Unit(s)	Associated pollutant(s)
Jim Bridger (<i>PacifiCorp</i>)	1, 2	NO _x , SO ₂ , PM.
Jim Bridger (<i>PacifiCorp</i>)	3, 4	SO ₂ , PM.
Naughton (<i>PacifiCorp</i>)	1, 2	NO _x , SO ₂ , PM.
Naughton (<i>PacifiCorp</i>)	3	NO _x , PM.
Dave Johnston (<i>PacifiCorp</i>)	1, 2	NO _x , SO ₂ , PM.
Dave Johnston (<i>PacifiCorp</i>)	4	PM.
Wyodak (<i>PacifiCorp</i>)	1	NO _x , SO ₂ , PM.
Laramie River Station (<i>Basin Electric</i>)	1–3	PM.
Laramie Portland Cement (<i>Mountain Cement Company</i>)	Kilns 1, 2	SO ₂ .
Elk Basin Gas Plant (<i>Contango Resources, Inc.</i>)	Engines (9) and incinerator	PM.
Elk Basin Gas Plant (<i>Contango Resources, Inc.</i>)	Engines (9)	SO ₂ .
Elk Basin Gas Plant (<i>Contango Resources, Inc.</i>)	Incinerator	NO _x .

Although we stated in our proposed rule that Wyoming failed to justify the lack of a four-factor analysis of NO_x and PM emission control measures for Lost Cabin Gas Plant, we are not carrying that finding forward into our final rule. Based on our consideration of a comment we received and on our further review of Wyoming’s 2022 SIP submission, we conclude that because the State’s Q/d analysis⁵ shows that the possible impact of the facility’s NO_x and PM emissions on visibility at Class I areas is very small, Wyoming reasonably elected to conduct a four-factor analysis only for SO₂ control measures for this facility, and not for NO_x and PM control measures.

Therefore, the lack of a four-factor analysis of NO_x and PM emissions controls for Lost Cabin Gas Plant is not a reason for our disapproval of the State’s long-term strategy.⁶

Second, Wyoming relied on unsupported rationales and failed to document the technical basis (including cost, engineering, and emissions information)⁷ of its decision not to include any emission control measures in its long-term strategy for the sources listed in table 2. In evaluating the cost of potential control measures for some of these sources, Wyoming used unsubstantiated cost inputs, relied on unjustifiably low estimates of control technology efficiencies, and miscalculated the level of achievable

emission reductions. These methodological errors undercut the technical support for Wyoming’s cost analyses and the State’s resulting determinations that control measures for these sources would not be cost-effective. In other instances, the State provided no reasoning, technical data, or cost information to support its conclusions. For the reasons detailed in our proposed rule and in the RTC document,⁸ these methodological errors and unsupported technical bases, considered collectively, prevent the EPA from determining that the State’s long-term strategy is adequate to make reasonable progress toward meeting the national visibility goal.

TABLE 2—SOURCES, UNITS, AND ASSOCIATED POLLUTANTS WHERE THE STATE FAILED TO DOCUMENT THE TECHNICAL BASIS OF ITS DETERMINATIONS OF THE EMISSION REDUCTION MEASURES NECESSARY TO MAKE REASONABLE PROGRESS

Source	Unit(s)	Associated pollutant(s)
Dave Johnston (<i>PacifiCorp</i>)	4	SO ₂ .
Laramie Portland Cement (<i>Mountain Cement Company</i>)	Kilns 1, 2	NO _x .

⁴ 89 FR at 63056–62; RTC document, sections 7, 8, 14.

⁵ Q/d values represent the ratio of an individual source’s annual emissions of visibility-impairing emission precursors (NO_x, SO₂, and PM₁₀) in combined tons (“Q”) divided by the distance in

kilometers (“d”) between the source and a Class I area. The larger the Q/d value, the greater the source’s expected effect on visibility impairment in that Class I area.

⁶ Section 8.K. of the RTC document contains our full response to the comment we received on this issue.

⁷ See 40 CFR 51.308(f)(2)(iii).

⁸ 89 FR at 63062–65; RTC document, sections 3.C., 7, 8.

TABLE 2—SOURCES, UNITS, AND ASSOCIATED POLLUTANTS WHERE THE STATE FAILED TO DOCUMENT THE TECHNICAL BASIS OF ITS DETERMINATIONS OF THE EMISSION REDUCTION MEASURES NECESSARY TO MAKE REASONABLE PROGRESS—Continued

Source	Unit(s)	Associated pollutant(s)
Green River Works (<i>TATA Chemicals</i>)	Calciner 1, Calciner 2	NO _x , PM.
Elk Basin Gas Plant (<i>Contango Resources, Inc.</i>)	Engines (9)	NO _x .
Elk Basin Gas Plant (<i>Contango Resources, Inc.</i>)	Incinerator	SO ₂ .
Lost Cabin Gas Plant (<i>Burlington Resources</i>)	Trains 2, 3	SO ₂ .

Third, Wyoming unreasonably rejected emission control measures for Elk Basin Gas Plant and Cheyenne Fertilizer Facility (listed in table 3). Wyoming made no determination that these control measures were not cost-effective (based on the cost per ton of emissions reduced);⁹ nor did it explain why these measures were otherwise unwarranted under the four statutory factors.¹⁰ The cost-effectiveness values of these control measures are below the level that the EPA and the states generally found to be reasonable in the first implementation period, even without adjusting for inflation. Instead of justifying its rejection of these control measures based on the four statutory factors, Wyoming cited declining emission trends, its belief that these sources will not increase their emissions during the second implementation

period, and the presence of existing control technologies at the facilities (which the State notably did not determine to be effective for purposes of making reasonable progress).¹¹ As we explained in the context of the 2017 Regional Haze Rule revisions, “a state that elects to consider an additional factor . . . must consider it in a reasonable way that does not undermine or nullify the role of the four statutory factors in determining what controls are necessary to make reasonable progress.”¹² Wyoming improperly relied on these other considerations to reject controls that its four-factor analyses showed to be cost-effective and otherwise reasonable.

Within its 2022 SIP submission, Wyoming conceded that based on the four-factor analyses it conducted for Elk Basin Gas Plant and Cheyenne Fertilizer Facility, these sources may warrant

further analysis of the measures necessary to make reasonable progress.¹³ Wyoming stated it would submit more detailed analyses in the context of its regional haze second implementation progress report due in 2025. However, nothing in the CAA or RHR allows states to avoid their obligation to determine the measures necessary to make reasonable progress through consideration of the four statutory factors by delaying decision-making to a future date.¹⁴ For these reasons, and as further detailed in our proposed rule and in the RTC document,¹⁵ we find that Wyoming’s long-term strategy does not include the measures necessary to make reasonable progress because Wyoming unreasonably rejected control measures for Elk Basin Gas Plant and Cheyenne Fertilizer Facility.

TABLE 3—SOURCES, UNITS, AND ASSOCIATED POLLUTANTS AND EMISSION CONTROL TECHNOLOGY WHERE THE STATE UNREASONABLY REJECTED EMISSION REDUCTION MEASURES

Source	Unit(s)	Associated pollutant(s)	Emission control technology
Elk Basin Gas Plant (<i>Contango Resources, Inc.</i>)	Engines (9)	NO _x	Low emission combustion.
Cheyenne Fertilizer Facility (<i>Dyno Nobel, Inc.</i>)	ENG004, ENG005 (engines)	NO _x	Low emission combustion.
Cheyenne Fertilizer Facility (<i>Dyno Nobel, Inc.</i>)	CTW001, CTW003 (cooling towers)	PM	Upgraded Mist Eliminators.

⁹ For the Cheyenne Fertilizer Facility, as with Elk Basin Gas Plant, Wyoming did not determine that the cost/ton values of the NO_x and PM measures it evaluated were unreasonable. However, Wyoming concluded that the capital costs of installing PM controls (upgraded mist eliminators) on two cooling towers were not justified given what the State determined—without explanation—to be the “minute” amount of PM reductions at stake. Wyoming 2022 SIP submission at 191. We do not find this justification to be sufficient in light of the mist eliminators’ cost-effectiveness values (*i.e.*, cost per ton of emissions reduced), which align with the cost/ton values that were generally found to be reasonable during the first implementation period. See 89 FR at 63065 & n.158. Nor did Wyoming explain why the reduction in PM emissions that could be achieved by upgraded mist eliminators was not necessary to make reasonable progress. As we explained in the 2019 Guidance, capital costs considered in isolation may not provide complete information about the potential reasonableness of a control measure. 2019 Guidance at 39. Indeed, Wyoming itself conceded that “[b]ased on this four-factor analysis, this facility may warrant further analysis of emission controls to reach reasonable progress.” Wyoming 2022 SIP submission at 191.

¹⁰ For Elk Basin Gas Plant, Wyoming did not explicitly determine, based on its four-factor analysis, that NO_x controls are not necessary to make reasonable progress. Wyoming 2022 SIP submission at 172 (“Considering the four factors above, as well as emission trends and permit conditions, this facility may warrant further analysis of emission controls to reach reasonable progress.”). For NO_x and PM controls at the Cheyenne Fertilizer Facility, Wyoming asserted that “[o]verall, considering the four factors discussed above, the Division does not believe that additional emissions control technology on the Cooper Engines . . . or Cooling Towers is necessary to make reasonable progress at this time.” Wyoming 2022 SIP submission at 191. However, aside from pointing to the capital costs of PM control measures, Wyoming did not explain *how* it reached that conclusion.

¹¹ Wyoming 2022 SIP submission at 171–72, 191. Wyoming also noted that the engines at the Cheyenne Fertilizer Facility are natural gas-fired. *Id.* at 191. However, Wyoming did not explain how combustion of natural gas mitigates the need for NO_x emissions reductions measures or why low-emission combustion (the control technology for

these engines that the State evaluated through four-factor analysis) is not necessary to make reasonable progress. As detailed in sections 7.B. and 8.A.ii. of the RTC document, combustion of natural gas does not itself render a source effectively controlled for NO_x emissions.

¹² EPA, Responses to Comments on Protection of Visibility: Amendments to Requirements for State Plans; Proposed Rule, December 2016, at 186 (available in the docket for this action).

¹³ Wyoming 2022 SIP submission at 172, 191.

¹⁴ *Cf. NRDC v. EPA*, 22 F.3d 1125, 1134 (D.C. Cir. 1994) (noting that SIPs must “contain[] something more than a mere promise to take appropriate but unidentified measures in the future”). In addition, because progress reports due in 2025 will not take the form of SIP revisions that must be approved or disapproved by the EPA, it is not clear how Wyoming could evaluate and potentially impose federally enforceable emission reduction measures at these sources through that process. See generally 40 CFR 51.308(g).

¹⁵ 89 FR at 63065; RTC document, sections 5, 8.I., 8.L.

Fourth, as explained in our proposed rule and in the RTC document,¹⁶ the overarching justifications that Wyoming provided for not including any emission control measures in its long-term strategy are either not adequately supported or lack foundation in the CAA and RHR. Following its evaluation and rejection of emission control measures for individual sources, Wyoming explained its overall reasoning for not including any measures in its long-term strategy to make reasonable progress for the regional haze second implementation period.¹⁷ The State asserted that such measures could impose economic hardships on sources, negatively affect rural communities, force energy producers out of the market, harm ratepayers, and cause grid instability. However, the State's reliance on these purported economic impacts does not reflect reasoned analysis because Wyoming provided no analyses, data, or other evidence to support its generalized and unsubstantiated assertions. Similarly, Wyoming provided no support for its declaration that requiring additional controls would not lead to visibility improvements at Class I areas. Finally, Wyoming pointed to contributions to visibility impairment from sources outside its control; past and projected emission reductions resulting from other regulatory programs; and that the State's Class I areas are below the adjusted uniform rate of progress (a tracking metric to help states assess the amount of progress they are making towards the national visibility goal over time in each Class I area). As further explained in our proposed rule and in the RTC document, Wyoming's consideration of those factors was not reasonably moored to the statute and regulations.

In addition to disapproving the State's long-term strategy, we are disapproving Wyoming's reasonable progress goals under 40 CFR 51.308(f)(3) and its consultation with Federal Land Managers under 40 CFR 51.308(i). As detailed in our proposed rule and in the RTC document,¹⁸ compliance with these requirements is dependent on compliance with the long-term strategy provisions in 40 CFR 51.308(f)(2).

III. Final Action

For the reasons stated in the proposed rule, in the RTC document, and in this document, we are partially approving and partially disapproving Wyoming's 2022 SIP submission.

We are disapproving the following components of Wyoming's 2022 SIP submission relating to CAA section 169A:

- Long-term strategy (40 CFR 51.308(f)(2));
- Reasonable progress goals (40 CFR 51.308(f)(3)); and
- FLM consultation (40 CFR 51.308(i)).

We are approving the following components of Wyoming's 2022 SIP submission relating to CAA section 169A:

- Calculations of baseline, current, and natural visibility conditions, progress to date, and uniform rate of progress (40 CFR 51.308(f)(1));
- Reasonably attributable visibility impairment (40 CFR 51.308(f)(4));
- Progress report requirements (40 CFR 51.308(f)(5) and 40 CFR 51.308(g)); and
- Monitoring strategy and other implementation plan requirements (40 CFR 51.308(f)(6)).

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action partially approves and partially disapproves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described

in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address "disproportionately high and adverse human health or environmental effects" of their actions on communities with environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. Executive Order 14096 (Revitalizing Our Nation's Commitment to Environmental Justice for All, 88 FR 25251, April 26, 2023) builds on and supplements E.O. 12898 and defines EJ as, among other things, the just treatment and meaningful involvement of all people, regardless of income, race, color, national origin, or Tribal affiliation, or disability in agency decision-making and other Federal activities that affect human health and the environment.

The State did not evaluate EJ considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA performed an EJ analysis, as is described in the proposed action 89 FR 63030 (August 1, 2024) in the section titled, "Environmental Justice." The analysis was done for the purpose of providing additional context and information about this rulemaking to the public, not as a basis of the action. In addition, there is no information in the record upon which this decision is based inconsistent with the stated goal

¹⁶ 89 FR at 63065–67; RTC document, sections 3.B., 3.G., 4, and 9.

¹⁷ Wyoming 2022 SIP submission, Chapter 13: Decisions on What Control Measures are Necessary to Make Reasonable Progress.

¹⁸ 89 FR at 63067–68; RTC document, sections 3.B., 10 (reasonable progress goals). 89 FR at 63069–70; RTC document, sections 3.E., 11 (FLM consultation).

of E.O. 12898/14096 of achieving EJ for communities with EJ concerns.

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 31, 2025. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and

shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

[EPA–R08–OAR–2023–0495; FRL–12052–02–R8]

Air Plan Partial Approval and Partial Disapproval; North Dakota; Regional Haze State Implementation Plan for the Second Implementation Period

AGENCY: Environmental Protection Agency (EPA).
ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is partially approving and partially disapproving a regional haze state implementation plan (SIP) revision submitted by the State of North Dakota on August 11, 2022 (North Dakota’s 2022 SIP submission) to address applicable requirements under the Clean Air Act (CAA) and the EPA’s Regional Haze Rule (RHR) for the regional haze program’s second

implementation period. The EPA is taking this action pursuant to the CAA.

DATES: This rule is effective January 2, 2025.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R08–OAR–2023–0495. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Joe Stein, Air and Radiation Division, EPA, Region 8, Mailcode 8ARD–IO, 1595 Wynkoop Street, Denver, Colorado 80202–1129, telephone number: (303) 312–7078, email address: stein.joseph@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document “we,” “us,” and “our” means the EPA.

Table of Contents

- I. What is being addressed in this document?
- II. Summary of the Proposed Action, Public Comments, and the EPA’s Reasons for Final Action
- III. Final Action
- IV. Statutory and Executive Order Reviews

I. What is being addressed in this document?

The EPA is partially approving and partially disapproving North Dakota’s regional haze plan for the second planning period.¹ As required by section 169A of the CAA, the RHR calls for State and Federal agencies to work together to improve visibility in 156 national parks and wilderness areas, known as mandatory Class I Federal areas.² The rule requires the States, in coordination with the EPA, the National Park Service, the Fish and Wildlife Service, the Forest Service, and other interested parties, to develop and

¹ The EPA uses the terms “implementation period” and “planning period” interchangeably.
² See 40 CFR part 81, subpart D.

implement air quality protection plans to reduce the pollution that causes visibility impairment in mandatory Class I Federal areas. Visibility impairing pollutants include fine and coarse particulate matter (PM) (e.g., sulfates, nitrates, organic carbon, elemental carbon, and soil dust) and their precursors (e.g., sulfur dioxide (SO₂), oxides of nitrogen (NO_x), and, in some cases, volatile organic compounds (VOC) and ammonia (NH₃)). As discussed in further detail in our proposed rule, in this document, and in the accompanying Response to Comments (RTC) document, the EPA finds that North Dakota submitted a regional haze SIP that does not meet all the statutory and regulatory requirements for the regional haze second planning period. The State's submission, the proposed rule, and the RTC document can be found in the docket for this action.

II. Summary of the Proposed Action, Public Comments, and the EPA's Reasons for Final Action

On August 11, 2022, North Dakota submitted a revision to its SIP to address regional haze for the second implementation period, in accordance with the requirements of the CAA's regional haze program established by CAA sections 169A and 169B and 40 CFR 51.308.

On July 10, 2024, the EPA proposed to disapprove certain provisions of North Dakota's 2022 SIP submission.³ Specifically, we proposed to disapprove the portions of North Dakota's 2022 SIP submission relating to 40 CFR 51.308(f)(2): long-term strategy; 40 CFR 51.308(f)(3): reasonable progress goals; and 40 CFR 51.308(i): Federal Land Manager (FLM) consultation. We also proposed to approve the portions of North Dakota's 2022 SIP submission relating to 40 CFR 51.308(f)(1): calculations of baseline, current, and natural visibility conditions, progress to date, and the uniform rate of progress (URP); 40 CFR 51.308(f)(4): reasonably attributable visibility impairment; 40 CFR 51.308(f)(5) and 40 CFR 51.308(g): progress report requirements; and 40 CFR 51.308(f)(6): monitoring strategy and other implementation plan requirements. Consistent with section 110(k)(3) of the CAA, the EPA may partially approve portions of a submittal if those elements meet all applicable requirements and may disapprove the remainder so long as the elements are fully separable. Our public comment period closed on August 9, 2024. Our July 10, 2024, proposed rule provided

background on the requirements of the CAA and RHR, a summary of North Dakota's regional haze SIP submittals and related EPA actions, and the EPA's rationale for its proposed action. That background and rationale will not be restated in full here, although we briefly summarize the reasons for our partial disapproval of North Dakota's 2022 SIP submission in the paragraphs that follow.

In CAA section 169A(a)(1), Congress established the national goal of preventing any future and remedying any existing impairment of visibility in mandatory Class I Federal areas that results from manmade (anthropogenic) air pollution. The core component of a regional haze SIP submission for the second implementation period is a long-term strategy for making reasonable progress toward meeting that national goal. CAA section 169A(b)(2)(B), 40 CFR 51.308(f)(2). A state's long-term strategy must address regional haze in each Class I area within the state's borders and each Class I area outside the state that may be affected by emissions originating from within the state. It "must include the enforceable emissions limitations, compliance schedules, and other measures that are necessary to make reasonable progress, as determined pursuant to (f)(2)(i) through (iv)." 40 CFR 51.308(f)(2). The amount of progress that is "reasonable progress" is based on applying the four statutory factors in CAA section 169A(g)(1)—the costs of compliance, the time necessary for compliance, the energy and non-air quality environmental impacts of compliance, and the remaining useful life of any potentially affected sources⁴—in an evaluation of potential control measures for sources of visibility impairing pollutants, which is referred to as a "four-factor" analysis. In developing its long-term strategy, the state must document the technical basis, including modeling, monitoring, cost, engineering, and emissions information, on which it is relying to determine the measures that are necessary to make reasonable progress. 40 CFR 51.308(f)(2)(iii).

As detailed in section 3.A. of the RTC document, the CAA authorizes the EPA to substantively review states' SIP submissions for compliance with the statute and EPA's regulations to ensure progress towards the national visibility goal for Class I areas. Congress charged the EPA with exercising "federal oversight" over SIP submissions and "review[ing] all SIPs to ensure that the plans comply with the statute." *Oklahoma v. EPA*, 723 F.3d 1201, 1204

(10th Cir. 2013); *see also id.* at 1207–08 (citing CAA Sections 110(l), 110(a)(2)(j), and 169A(b)(2)). The "EPA is left with more than the ministerial task of routinely approving SIP submissions." *North Dakota v. EPA*, 730 F.3d 750, 761 (8th Cir. 2013). Instead, the Agency's "review of a SIP extends not only to whether the state considered the necessary factors in its determination, but also to whether the determination is one that is reasonably moored to the CAA's provisions" and is "based on 'reasoned analysis.'" *Id.* at 761, 766 (citing *Alaska Dep't of Env't. Conservation v. EPA*, 540 U.S. 461 (2004)); *see also Wyoming v. EPA*, 78 F.4th 1171, 1180–81 (10th Cir. 2023) (noting that "the Act provides for substantive and careful EPA review" of SIP submissions and that "the EPA does not have to accept unreasonable analyses"). For the reasons stated in the proposed rule, this document, and in the RTC document, the EPA concludes that North Dakota's 2022 SIP submission does not meet all the requirements of the CAA and RHR.

As detailed at length in our proposed rule and in the RTC document, we conclude that North Dakota's long-term strategy does not meet the requirements of CAA section 169A(b)(2) and 40 CFR 51.308(f)(2) on two independent grounds. First, North Dakota relied on the URP status of in-state Class I areas and a visibility improvement threshold that is inconsistent with the purpose of the CAA's visibility program to unreasonably reject feasible and reasonably inexpensive controls it evaluated under the four statutory factors at Coyote Station and Antelope Valley. Second, North Dakota failed to consider the four statutory factors for NO_x at Coal Creek and unreasonably rejected feasible and reasonably inexpensive controls it evaluated under the four statutory factors at Coal Creek and Leland Olds. Likewise, North Dakota did not meet the requirements of 40 CFR 51.308(f)(3) because the deficiencies in its long-term strategy prevented the State from developing adequate reasonable progress goals (RPGs). Additionally, we are disapproving North Dakota's FLM consultation under 40 CFR 51.308(i) because compliance with that requirement is dependent on fulfilling the substantive requirements of 40 CFR 51.308(f)(2) (long-term strategy).

During the public notice and comment period, we received 31 comments on our proposal. The full text of comments received is included in the publicly posted docket associated with this action at <https://www.regulations.gov>. Our RTC

³ 89 FR 56693 (July 10, 2024).

⁴ CAA section 169A(g)(1); 40 CFR 51.308(f)(2)(i).

document, which is also included in the docket associated with this action, provides detailed responses to all significant comments received.⁵ Our RTC document is organized by topic. Therefore, if additional information is desired concerning how we addressed a particular comment, the reader should refer to the appropriate section in the RTC document.

We received several comments on our proposed disapproval of North Dakota's long-term strategy on the basis that North Dakota unreasonably considered visibility benefits to reject technically feasible and reasonably inexpensive controls based on an unreasonable interpretation of CAA 169A to select its visibility improvement threshold that essentially nullified the CAA 169A(g)(1) statutory factors. Below, we provide a summary and response to this issue including North Dakota's interpretation that a change of RPG of 1.0 deciview (dv) visibility improvement (a change in visibility impairment visible to the naked eye) is needed to necessitate additional controls to make "reasonable progress." This is inconsistent with the plain language and Congress' explicitly stated national purpose of the CAA's visibility provisions.

In North Dakota's SIP, North Dakota determined that because its visibility improvement analysis showed no "significant" change in visibility after installation of potential controls, it would not be reasonable to require any additional controls to make reasonable progress for Coyote Station and Antelope Valley. We proposed disapproval due to North Dakota's reliance on visibility considerations to reject cost-effect controls at Coyote Station and Antelope Valley. Commenters concluded that this meant the EPA was either prohibiting the State from considering visibility in the four-factor analysis or that we ignored North Dakota's visibility analysis. This is incorrect. The CAA's cooperative federalism framework imposes on EPA a substantive role in determining if a SIP is approvable. See our RTC section 3.A Cooperative Federalism and State Discretion for a detailed explanation. In particular, any approvable regional haze SIP must be consistent with Congress' explicit statutory declaration of the "national goal" for "the prevention of any future, and the remedying of any existing, impairment of visibility in mandatory Class I Federal areas which impairment results from manmade air pollution." Additionally, in determining reasonable progress, states must

"consider the costs of compliance, the time necessary for compliance, and the energy and nonair quality environmental impacts of compliance, and the remaining useful life of any existing source subject to such requirements."⁶

The EPA has acknowledged that a state may reasonably consider factors beyond the explicit four CAA section 169A(g)(1) factors, such as visibility, when assessing sources or source categories. In a response to comment on the 2017 RHR, EPA noted that a state that elects to consider an additional factor, such as visibility, must do so in a reasonable way that does not undermine or nullify the role of the four statutory factors.⁷

As this response to comment indicates, the consideration of any non-statutory factor, including visibility, must be reasonable. See, e.g., *North Dakota*, 730 F.3d at 766 ("EPA's review of a SIP extends not only to whether the state considered the necessary factors in its determination, but also to whether the determination is one that is reasonably moored to the CAA's provisions."). The reasonableness of a state's visibility consideration in the four-factor analysis turns on whether the determination is reasonably moored to the CAA visibility provisions and how the state explained and supported its determination in the record.

Here, we find that North Dakota's consideration of visibility in its four-factor analysis is unreasonable and inconsistent with the CAA and the RHR. Specifically, North Dakota rejected technically feasible and reasonably inexpensive controls at Coyote Station and Antelope Valley based on its unreasonable visibility improvement threshold in considering visibility as part of the four-factor analysis.⁸ In its SIP, North Dakota determined that no additional controls are required for Coyote Station and Antelope Valley due to "insignificant" visibility improvement when looking at the change in the RPG for a Class I area (Lostwood and Theodore Roosevelt) from the addition of potential controls. This determination was based on an interpretation that CAA section 169A requires a change in RPG of 1.0 dv improvement from the addition of controls at a single Class I area before that control is required to make "reasonable progress." However, this

interpretation is unreasonable and inconsistent with the CAA.

Congress mandated the national goal of remedying of existing and preventing future visibility impairment air pollution from anthropogenic sources.⁹ In *American Corn Growers Ass'n v. EPA*, 291 F.3d 1 (D.C. Cir. 2002), the D.C. Circuit stated that "[t]he statutory goal enunciated in § 169A(a)(1) is quite clear: 'the prevention of any future, and the remedying of any existing, impairment of visibility.' . . . [Therefore, agency] regulations that aim to remedy any existing impairment of visibility and prevent any future impairment—as the statute commands—will of necessity aim to achieve a state of natural visibility. There is no material inconsistency between the statutory and regulatory goals, for the latter merely elucidates the former." *Id.* at 10. Therefore, as outlined throughout our proposal and this final document, the EPA is within its authority to disapprove North Dakota's long-term strategy for not including the necessary measures. Specifically, North Dakota's consideration of visibility requiring a change in RPG of 1.0 dv improvement at a single Class I area to necessitate the imposition of additional controls under reasonable progress effectively undermines and nullifies the Congressionally mandated national goal and the reasonable progress four-factor analysis requirements enumerated in CAA sections 169A(a)(1) and (g)(1). There are 56,025 anthropogenic industrial sources (electric generating units (EGU), oil and gas, and other industrial point (non-EGU) sources) in the United States that contribute to Lostwood, which is the closest Class I area to the sources evaluated by North Dakota.¹⁰ North Dakota rejected feasible and reasonably inexpensive (\$400/ton–\$1,800/ton) controls at Coyote Station and Antelope Valley under two control scenarios due to asserted non-visible and therefore ostensibly "insignificant" visibility improvement (less than 1.0 dv change in RPG visibility improvement) at a Class I area for the second planning period. However, North Dakota's analysis showed that both potential control scenarios were feasible and reasonably inexpensive and resulted in either a 10% or 25% greater visibility improvement than existing on-the-books controls for this planning period at Lostwood.

In particular, North Dakota's visibility improvement analysis projected visibility improvement from existing

⁶ CAA section 169A(a)(1), (g)(1).

⁷ EPA, Response to Comments on Protection of Visibility: Amendments to Requirements for State Plans; Proposed Rule, December 2016, at 186 (available in the docket for this action).

⁸ 40 CFR 51.308(f)(2)(i).

⁹ CAA section 169A(a)(1).

¹⁰ Censara AOI spreadsheet titled "Appendix C-1_AOI2016EI-tool.xlsx."

⁵ Some commenter tables and figures are excluded from this document.

controls in North Dakota to be 0.4 dv at Lostwood for this 10-year planning period. North Dakota considered two modeling runs to assess visibility impact of controls: Potential Additional Control Scenario 1 (“PAC1:” Replacement of the SO₂ absorber at \$1,800/ton and installation of SNCR for NO_x at \$1,700/ton at Coyote Station as well as increasing the stoichiometric ratio on existing FGD for SO₂ emission reductions at \$700/ton at Antelope Valley) and Potential Additional Control Scenario 2 (“PAC2:” FGD modification for SO₂ emission reductions (\$400/ton) at Coyote Station). Based on North Dakota’s analysis, PAC1 showed an additional 0.1 dv visibility improvement at Lostwood, with control costs ranging from \$700/ton–\$1,700/ton, resulting in a projected 25% visibility improvement at Lostwood for this planning period. Under PAC2, North Dakota’s SIP showed an additional 0.04 dv projected visibility improvement at \$400/ton, which would result in a projected 10% visibility improvement at Lostwood for this planning period. North Dakota rejected both control scenarios due to their lack of “significant” visibility improvement or change in RPG.

In response to comments on our 2017 RHR, we reemphasized that achieving reasonable progress will depend upon obtaining aggregate reductions from possibly thousands of sources, and thus, rejecting a control measure because its effect on the RPG is subjectively assessed as “not meaningful” when that control is identified as feasible and relatively inexpensive under the four statutory factors would be inappropriate. We stated:

The commenter’s second suggestion, that states should be able to reject “costly” control measures if the RPG for the most impaired days is not “meaningfully” different than current visibility conditions, is counterintuitive and at odds with the purpose of the visibility program. In this situation, the state should take a second look to see whether more effective controls or additional measures are available and reasonable. Whether the state takes this second look or not, it may not abandon the controls it has already determined are reasonable based on the four factors. Regional haze is visibility impairment that is caused by the emission of air pollutants from numerous sources located over a wide geographic area. At any given Class I area, hundreds or even thousands of individual sources may contribute to regional haze. Thus, it would not be appropriate for a state to reject a control measure (or measures) because its effect on the RPG is subjectively assessed as not

“meaningful.” Also, for Class I areas where visibility conditions are considerably worse than natural conditions because of continuing anthropogenic impairment from numerous sources, the logarithmic nature of the deciview index makes the effect of a control measure on the value of the RPG less than its effect would be if visibility conditions at the Class I area were better. Thus, if a state could reject a control measure based on its individual effect on the RPG, the state would be more likely to reject those measures that are necessary to make reasonable progress at the dirtiest Class I areas, which would thwart Congress’ national goal (82 FR 3078, 3093; Jan. 10, 2017).

North Dakota’s approach in considering visibility under the four-factor analysis effectively undermines and nullifies Congressional intent, since there is no scenario for this or subsequent planning periods under which controls to improve visibility would ever be required under the CAA visibility program, no matter how low the cost since no one source impairs visibility at a single Class I area (*e.g.* Lostwood and Theodore Roosevelt National Park) above 1.0 dv. This conflicts with the CAA’s stated national visibility goal of elimination of impairment from manmade sources and thus, North Dakota’s consideration of visibility is improper. Specifically, North Dakota’s determination to reject feasible and reasonably inexpensive controls at Coyote Station and Antelope Valley was improper. North Dakota’s own analysis shows significant visibility improvement from additional controls at Coyote Station and Antelope Valley compared against the visibility improvement from all sources that contribute to visibility impairment at Lostwood and/or Theodore Roosevelt National Park during this planning period.

To explore this point further, the EPA included in the docket to this action a Technical Appendix, which examines, using Western Regional Air Partnership (WRAP) data, the total anthropogenic nitrate and sulfate visibility-impairment impacts on North Dakota Class I areas from the EGU sector in North Dakota. As shown in the Technical Appendix, North Dakota’s EGU sources contribute ~22% (a significant portion) of the total anthropogenic impairment (nitrate and sulfate combined) on most-impaired days from all sources in the United States at Lostwood Wilderness Area. When compared to natural conditions,

this translates to 0.92 dv.¹¹ North Dakota’s EGU sources contribute ~14% (a significant portion) of the total anthropogenic impairment (nitrate and sulfate combined) from all sources in the United States at Theodore Roosevelt National Park. When compared to natural conditions, this translates to 0.26 dv.¹² These numbers demonstrate the unreasonableness of North Dakota’s position that controls must produce a perceptible impact to a Class I area RPG, or larger than 1.0 dv, to be necessary for reasonable progress. The EPA acknowledges the significant impact of the North Dakota EGU sector on visibility impairment at Lostwood Wilderness Area¹³ and Theodore Roosevelt National Park,¹⁴ despite these impacts amounting to less than a 1.0 dv impact on the RPG at each Class I area. Thus, North Dakota’s threshold for determining whether visibility improvement on a Class I area RPG necessitates new controls plainly serves to nullify the result of a four-factor analysis, especially given the low cost of controls rejected at Antelope Valley and Coyote Station.

Furthermore, as we have noted previously, regional haze is caused by hundreds or thousands of individual sources and very few remaining sources (or even none of them) will individually have impacts as large as a threshold that might be considered a “perceptible” or “meaningful” impact. However, these sources still contribute to visibility impairment and have a meaningful impact in the aggregate.¹⁵ Under the CAA and the RHR, each state that impacts a Class I area must consider the four statutory factors to determine whether additional measures are necessary for reasonable progress. Based on the WRAP data evaluated in the proposed rule, in the Technical Appendix, and in the RTC document, North Dakota has significant impacts on both in-state and out-of-state Class I areas,¹⁶ which is one of the bases to consider additional measures. In its analysis of additional measures, North Dakota showed that, compared to

¹¹ See the EPA’s Technical Appendix in the docket associated with this action.

¹² *Id.*

¹³ North Dakota’s EGU sources contribute ~22% (a significant portion) of the total anthropogenic impairment (nitrate and sulfate combined) on most-impaired days from all sources in the United States at Lostwood Wilderness Area. See Technical Appendix.

¹⁴ North Dakota’s EGU sources contribute ~14% (a significant portion) of the total anthropogenic impairment (nitrate and sulfate combined) from all sources in the United States at Theodore Roosevelt National Park. See Technical Appendix.

¹⁵ 82 FR at 3093 (January 10, 2017).

¹⁶ 89 FR 56693, 56707–09 (July 10, 2024).

natural conditions, the controls rejected at Antelope Valley and Coyote Station would result in a 0.29 dv reduction at Lostwood Wilderness Area,¹⁷ the highest-impacted Class I area from ND sources. Comparing this to the total impairment resulting from North Dakota EGUs at Lostwood Wilderness Area, the controls North Dakota rejected at Antelope Valley and Coyote Station would result in a ~32% reduction in visibility impairment from North Dakota's EGU sector.¹⁸ Given that North Dakota is by far the largest contributor to impairment at Lostwood Wilderness Area,¹⁹ the EPA finds the reduction in visibility impairment associated with these controls to be significant. In its analysis of additional measures, North Dakota also showed that, compared to natural conditions, the feasible and reasonably inexpensive controls rejected at Antelope Valley and Coyote Station would result in a 0.17 dv reduction in impairment at Theodore Roosevelt National Park.²⁰ Comparing this to the total impairment resulting from North Dakota EGUs at Theodore Roosevelt National Park, the controls North Dakota rejected at Antelope Valley and Coyote Station would result in a ~65% reduction in visibility impairment from North Dakota's EGU sector.²¹ Given that North Dakota is by far the largest contributor to impairment at Theodore Roosevelt National Park,²² the EPA finds that the reduction in visibility impairment associated with installation of these controls would be significant.

In addition, North Dakota's consideration of visibility included various technical flaws that individually, as well as collectively, underrepresented the actual visibility improvement that might be achieved from the addition of controls at Coyote Station and Antelope Valley. As more fully explained in the RTC document, these technical flaws²³ result in an

overall underestimate of the potential visibility improvement that could be achieved by the imposition of controls selected through the consideration of the four reasonable progress factors set forth in CAA section 169A(g)(1) on which North Dakota based its determination. If those errors are corrected, the imposition of controls under either scenario at Coyote Station and/or Antelope Valley would be greater than the anticipated 10–25% visibility improvement from existing controls.

As described in this preamble and in the RTC document, North Dakota's consideration of visibility, namely, its selection and application of a 1.0 dv visibility improvement threshold to reject feasible and reasonably inexpensive controls for reasonable progress at Antelope Valley and Coyote Station, undermines and nullifies the results of the four-factor analyses performed by North Dakota. This is unreasonable and inconsistent with the CAA and the RHR. Thus, EPA is required to disapprove North Dakota's long-term strategy, as well as the associated reasonable progress goals and FLM consultation.

III. Final Action

For the reasons stated in the proposed rule, in the RTC document, and in this document, we are partially approving and partially disapproving North Dakota's 2022 SIP submission.

We are disapproving the following components of North Dakota's 2022 SIP submission relating to CAA section 169A:

- Long-term strategy (40 CFR 51.308(f)(2));
- Reasonable progress goals (40 CFR 51.308(f)(3)); and
- FLM consultation (40 CFR 51.308(i)).

We are approving the following components of North Dakota's 2022 SIP submission relating to CAA section 169A:

- Calculations of baseline, current, and natural visibility conditions, progress to date, and uniform rate of progress (40 CFR 51.308(f)(1));
- Reasonably attributable visibility impairment (40 CFR 51.308(f)(4));
- Progress report requirements (40 CFR 51.308(f)(5) and 40 CFR 51.308(g)); and
- Monitoring strategy and other implementation plan requirements (40 CFR 51.308(f)(6)).

Class I areas when controls at Antelope Valley and Coyote Station also benefit those Class I areas identified by North Dakota under CAA 169A(b)(2).

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action partially approves and partially disapproves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629,

¹⁷ North Dakota's 2022 SIP Submission, appendix D.5–23.

¹⁸ $0.29/0.92 = \sim 0.32$ or a 32% reduction in impairment.

¹⁹ See the EPA's Technical Appendix in the docket associated with this action.

²⁰ North Dakota's 2022 SIP Submission, appendix D.5–23.

²¹ $0.17/0.26 = \sim 0.65$ or a 65% reduction in impairment.

²² See the EPA's Technical Appendix in the docket associated with this action.

²³ As detailed in the RTC document, the technical flaws in North Dakota's visibility improvement analysis included the comparison to a dirty background rather than natural conditions (North Dakota then provided updated numbers comparing to natural conditions in response to comment on the draft plan) and using the 20% most-impaired days rather than all days to assess impacts from individual sources. In addition, North Dakota did not consider the visibility benefits to out-of-state

Feb. 16, 1994) directs Federal agencies to identify and address “disproportionately high and adverse human health or environmental effects” of their actions on communities with environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. Executive Order 14096 (Revitalizing Our Nation’s Commitment to Environmental Justice for All, 88 FR 25251, April 26, 2023) builds on and supplements E.O. 12898 and defines EJ as, among other things, the just treatment and meaningful involvement of all people, regardless of income, race, color, national origin, or Tribal affiliation, or disability in agency decision-making and other Federal activities that affect human health and the environment.

The State did not evaluate EJ considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA performed an EJ analysis, as is described in the proposed action 89 FR 56693 (July 10, 2024) in the section titled, “Environmental Justice.” The analysis was done for the purpose of providing additional context and information about this rulemaking to the public, not as a basis of the action. In

addition, there is no information in the record upon which this decision is based inconsistent with the stated goal of E.O. 12898/14096 of achieving EJ for communities with EJ concerns.

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 31, 2025. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2023–0368; FRL–12393–01–OCSPJ]

Fatty acids, C_{16–18} and C₁₈-unsatd., esters With polyethylene glycol mono-Me ether in Pesticide Formulations; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of fatty acids, C_{16–18} and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether (CAS Reg. No. 518299–31–5) when used as an inert ingredient (surfactant and related adjuvant of surfactant) on growing crops and raw agricultural commodities pre- and post-harvest limited to 25% by weight in pesticide formulations. Spring Regulatory

Sciences on behalf of Sasol Chemicals (USA) LLC submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA) requesting establishment of an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether, when used in accordance with the terms of this exemption.

DATES: This regulation is effective December 2, 2024. Objections and requests for hearings must be received on or before January 31, 2025 and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA-HQ-OPP-2023-0368, is available at <https://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460-0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP docket is (202) 566-1744. Please review the visitor instructions and additional information about the docket available at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Charles Smith, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; main telephone number: (202) 566-1030; email address: RDfRNNotices@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).

- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the **Federal Register** Office's e-CFR site at <https://www.ecfr.gov/current/title-40/chapter-I/subchapter-E/part-180?toc=1>.

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2023-0368 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before January 31, 2025. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA-HQ-OPP-2023-0368, by one of the following methods:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

- **Mail:** OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001.

- **Hand Delivery:** To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <https://www.epa.gov/dockets/where-send-comments-epa-dockets#express>.

Additional instructions on commenting or visiting the docket, along with more information about

dockets generally, is available at <https://www.epa.gov/dockets>.

II. Petition for Exemption

In the **Federal Register** of September 19, 2023 (88 FR 64398, FRL-10579-08), EPA issued a document pursuant to FFDCA section 408, 21 U.S.C. 346a, announcing the filing of a pesticide petition (PP IN-11755) by Spring Regulatory Sciences (6620 Cypresswood Dr., Suite 250, Spring, TX 77379) on behalf of Sasol Chemicals (USA) LLC (12120 Wickchester Lane, Houston, TX 77224). The petition requested that 40 CFR 180.910 be amended by establishing an exemption from the requirement of a tolerance for residues of fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether (CAS Reg. No. 518299-31-5) when used as an inert ingredient (surfactant and related adjuvant of surfactant) in pesticide formulations applied to growing crops or raw agricultural commodities pre- and post-harvest limited to 25% by weight in pesticide formulations. That document referenced a summary of the petition prepared by Spring Regulatory Sciences on behalf of Sasol Chemicals (USA) LLC, the petitioner, which is available in the docket at <https://www.regulations.gov>. There were no comments received in response to the notice of filing.

III. Inert Ingredient Definition

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125 and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active. Generally, EPA has exempted inert ingredients from the requirement of a tolerance based on the low toxicity of the individual inert ingredients.

IV. Aggregate Risk Assessment and Determination of Safety

Section 408(c)(2)(A)(i) of FFDCA allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA

determines that the tolerance is “safe.” Section 408(c)(2)(A)(ii) of FFDCA defines “safe” to mean that “there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.” This includes exposure through drinking water and in residential settings but does not include occupational exposure. FFDCA section 408(c)(2)(B) directs EPA to take into account the considerations in section 408(b)(2)(C) and (D) when making a safety determination for an exemption from the requirement of a tolerance. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to “ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue . . .” Section 408(b)(2)(D) lists other factors for EPA consideration when making safety determinations, including the validity, completeness, and reliability of available data, nature of toxic effects, available information concerning the cumulative effects of the pesticide chemical and other substances with a common mechanism of toxicity, and available information concerning aggregate exposure levels to the pesticide chemical and other related substances.

EPA establishes exemptions from the requirement of a tolerance only in those cases where it can be clearly demonstrated that the risks from aggregate exposure to pesticide chemical residues under reasonably foreseeable circumstances will pose no harm to human health. In order to determine the risks from aggregate exposure to pesticide inert ingredients, the Agency considers the toxicity of the inert in conjunction with possible exposure to residues of the inert ingredient through food, drinking water, and through other exposures that occur as a result of pesticide use in residential settings. If EPA is able to determine that a finite tolerance is not necessary to ensure that there is a reasonable certainty that no harm will result from aggregate exposure to the inert ingredient, an exemption from the requirement of a tolerance may be established.

Consistent with FFDCA section 408(c)(2)(A), and the factors specified in FFDCA section 408(c)(2)(B), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has

sufficient data to assess the hazards of and to make a determination on aggregate exposure for fatty acids, C_{16–18} and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether, including exposure resulting from the exemption established by this action. EPA’s assessment of exposures and risks associated with fatty acids, C_{16–18} and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered their validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the adverse effects caused by fatty acids, C_{16–18} and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies are discussed in this unit.

The toxicological database of fatty acids, C_{16–18} and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether is supported by data regarding methyl laurate and alcohol ethoxylates (C₁₂AE₇, C₁₃AE₃, C₁₄AE₃, C₁₄AE₇, C₁₄AE₁₂, C₁₅AE₃ and C₁₅AE₇). EPA has determined that it is appropriate to bridge methyl laurate and the aforementioned alcohol ethoxylates data to assess fatty acids, C_{16–18} and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether based on similarities in the functional groups/structure, composition, and physical/chemical properties.

Fatty acids, C_{16–18} and C₁₈-unsatd., esters with polyethylene glycol mono-Me exhibits low levels of acute toxicity via the oral, dermal, and inhalation routes of exposure. It is not a skin irritant or a skin sensitizer, but it is minimally irritating to the eyes. Reduced body weight starting at 250 mg/kg/day was observed in the combined reproduction and developmental toxicity test, 2-generation reproduction toxicity, and chronic/carcinogenicity studies. Increased offspring susceptibility was observed in the two-generation reproduction toxicity study in rats. Reduced body weight in pups was observed at 250 mg/kg/day in the absence of maternal toxicity. However, the concern for offspring susceptibility is low because the established chronic

reference dose (cRfD, 1.6 mg/kg/day) will be protective of offspring effects observed at 250 mg/kg/day. No effects on reproductive parameters, neurotoxicity or immunotoxicity were observed in the available studies. Concern for carcinogenicity is low, based on no evidence of tumors or cancer in chronic/carcinogenicity studies and negative results in mutagenicity studies.

B. Toxicological Points of Departure/ Levels of Concern

Once a pesticide’s toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see <https://www.epa.gov/pesticide-science-and-assessing-pesticide-risks/overview-risk-assessment-pesticide-program>.

An acute dietary endpoint was not selected because no effect attributable to a single dose was identified in the database. Co-critical chronic/carcinogenicity studies in rats were selected for the chronic dietary exposure scenario as well as short- and intermediate-term incidental oral, dermal and inhalation exposure scenarios. The NOAEL of 160 mg/kg/day and LOAEL of 250 mg/kg/day, based on decreased body weight, are selected for risk assessment. The studies are appropriate for the duration of exposure, protective of all subchronic effects, protective of the general population, and are protective of the most sensitive lifestage (children). The standard inter- and intra-species

uncertainty factors of 10x are applied (total uncertainty factor = 100x). A dermal absorption factor of 20% is applied. The default factor of 100% is applied for the inhalation absorption rate.

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether, EPA considered exposure under the proposed exemption from the requirement of a tolerance. There are no known non-pesticidal dietary exposures for fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether. EPA assessed dietary exposures from fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether in food as follows:

In conducting the dietary exposure assessment using the Dietary Exposure Evaluation Model DEEM—FCIDTM, Version 4.02, EPA used food consumption information from the U.S. Department of Agriculture's (USDA's) 2005–2010 National Health and Nutrition Examination Survey, What We Eat in America (NHANES/WWEIA). As to residue levels in food, no residue data were submitted for fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether. In the absence of specific residue data, EPA has developed an approach which uses surrogate information to derive upper bound exposure estimates for the subject inert ingredient. Upper bound exposure estimates are based on the highest tolerance for a given commodity from a list of high use insecticides, herbicides, and fungicides. A complete description of the general approach taken to assess inert ingredient risks in the absence of residue data is contained in the memorandum titled "Update to D361707: Dietary Exposure and Risk Assessments for the Inerts." (12/21/2021) and can be found at <https://www.regulations.gov> in docket ID number EPA-HQ-OPP-2018-0090.

In the dietary exposure assessments, the Agency assumed that the residue level of the inert ingredient would be no higher than the highest tolerance for a given commodity. Implicit in this assumption is that there would be similar rates of degradation (if any) between the active and inert ingredient and that the concentration of inert ingredient in the scenarios leading to these highest levels of tolerances would be no higher than the concentration of the active ingredient.

The Agency believes the assumptions used to estimate dietary exposures lead

to an extremely conservative assessment of dietary risk due to a series of compounded conservatisms. First, assuming that the level of residue for an inert ingredient is equal to the level of residue for the active ingredient will overstate exposure. The concentrations of active ingredient in agricultural products are generally at least 50 percent of the product and often can be much higher. Further, pesticide products rarely have a single inert ingredient; rather there is generally a combination of different inert ingredients used which additionally reduces the concentration of any single inert ingredient in the pesticide product in relation to that of the active ingredient. In the case of fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether, EPA made a specific adjustment to the dietary exposure assessment to account for the use limitations of the amount of fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether that may be in pesticide formulations (limited to no more than 25%) present at the maximum limitation rather than at equal quantities with the active ingredient.

For the purpose of the screening level dietary risk assessment, a conservative drinking water concentration value of 100 parts per billion (ppb) based on screening level modeling was used to assess the contribution to drinking water for the chronic dietary risk assessments for fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether.

2. *From non-dietary exposure.* The term "residential exposure" is used in this document to refer to non-occupational, non-dietary exposure (e.g., textiles (clothing and diapers), carpets, swimming pools, and hard surface disinfection on walls, floors, tables).

Fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether may be used as an inert ingredient in pesticide products that are registered for specific uses that may result in residential exposure, such as pesticides used in and around the home. Therefore, screening level residential handler and post-application risk assessments have been performed for common residential exposure scenarios, using assumptions detailed in the 2012 Residential SOPs (available at <https://www.epa.gov/pesticide-science-and-assessing-pesticide-risks/standard-operating-procedures-residential-pesticide>).

3. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA

requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider "available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity."

EPA has not found fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether to share a common mechanism of toxicity with any other substances, and fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance exemption, therefore, EPA has assumed that fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether does not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's website at <https://www.epa.gov/pesticide-science-and-assessing-pesticide-risks/cumulative-assessment-risk-pesticides>.

D. Additional Safety Factor for the Protection of Infants and Children

Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the Food Quality Protection Act (FQPA) safety factor. In applying this provision, EPA either retains the default value of 10X, or uses a different additional safety factor when reliable data available to EPA support the choice of a different factor.

Based on the evaluation of available toxicity studies, there is low concern for pre- and postnatal susceptibility from exposure to fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether. The FQPA safety factor has been reduced to 1X because: (1) the toxicity database is adequate to characterize potential pre- and postnatal risk; (2) the established PoD (160 mg/kg/day) will be protective of the body weight decrease in offspring seen at 250 mg/kg/day in the 2-generation reproduction toxicity study in rats; (3) no evidence of neurotoxicity was

observed in the database; and (4) the assumptions for the exposure assessment are conservative and unlikely to underestimate risk.

E. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

1. *Acute risk.* An acute aggregate risk assessment takes into account acute exposure estimates from dietary consumption of food and drinking water. No adverse effect resulting from a single oral exposure was identified and no acute dietary endpoint was selected. Therefore, fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether is not expected to pose an acute risk.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that chronic exposure to fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether from food and water will utilize approximately 8.9% and 32.3% of the cPAD for the U.S. population and children 1–2 years old (the most highly exposed populations).

3. *Short- and intermediate term risks.* Short- and intermediate term aggregate exposures take into account short- and intermediate-term residential exposures plus chronic exposures to food and water (considered to be a background exposure level).

Fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether may be used as an inert ingredient in pesticide products that are registered for uses that could result in short-term residential exposure, and the Agency has determined that it is appropriate to aggregate chronic exposure through food and water with short-term residential exposures to fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether.

Using the exposure assumptions described in this unit for short- and intermediate-term exposures, EPA has concluded the combined short- and intermediate-term food, water, and residential exposures result in an aggregate margin of exposure (MOE) of

268 for adults. Adult residential exposure combines high end dermal and inhalation handler exposure from aerosol spray/trigger pump with a high-end post application dermal exposure from contact with treated lawns. The combined short- and intermediate-term aggregated food, water, and residential pesticide exposures result in an aggregate MOE of 127 for children. Children's residential exposure includes total exposures associated with contact with treated lawns (dermal and hand-to-mouth exposures). Because EPA's level of concern for fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether is an MOE of 100 or below, these MOEs are not of concern.

V. Other Considerations

Analytical Enforcement Methodology

An analytical method is not required for enforcement purposes since the Agency is not establishing a numerical tolerance for residues of fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether in or on any food commodities. EPA is establishing a limitation on the amount of fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether that may be used in pesticide formulations applied pre- and post-harvest. This limitation will be enforced through the pesticide registration process under the Federal Insecticide, Fungicide, and Rodenticide Act ("FIFRA"), 7 U.S.C. 136 *et seq.* EPA will not register any pesticide formulation for food use that exceeds 25% fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether in the final pesticide formulations to be applied pre- and post-harvest.

VI. Conclusions

Therefore, an exemption from the requirement of a tolerance is established for residues of fatty acids, C₁₆₋₁₈ and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether (CAS Reg. No. 518299–31–5) when used as an inert ingredient (surfactant and related adjuvant of surfactant) in pesticide formulations applied to growing crops and raw agricultural commodities after harvest under 40 CFR 180.910, limited to a maximum concentration of 25% in a pesticide formulation.

VII. Statutory and Executive Order Reviews

This action establishes an exemption from the requirement of a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types

of actions from review under Executive Order 12866, titled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, titled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, titled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, titled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the exemption in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, titled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, titled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology

Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VIII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure,

Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: November 21, 2024.

Charles Smith,
Director, Registration Division, Office of Pesticide Programs.

Therefore, for the reasons stated in the preamble, the EPA amends 40 CFR chapter I as follows:

PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.910, amend Table 1 to 180.910 by adding, in alphabetical order, the entry “Fatty acids, C_{16–18} and C₁₈-unsatd., esters with polyethylene glycol mono-Me ether” to read as follows:

§ 180.910 Inert ingredients used pre- and post-harvest; exemptions from the requirement of a tolerance.

* * * * *

TABLE 1 TO 180.910

Inert ingredients	Limits	Uses
Fatty acids, C _{16–18} and C ₁₈ -unsatd., esters with polyethylene glycol mono-Me ether (CAS Reg. No. 518299–31–5).	25% by weight	Surfactant and related adjuvant of surfactant.

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

42 CFR Part 93

45 CFR Parts 46 and 73

Final Scientific Integrity Policy; Withdrawal

AGENCY: Office of the Assistant Secretary for Planning and Evaluation, Office of the Secretary, HHS.
ACTION: Withdrawal.

SUMMARY: The Department of Health and Human Services (HHS) is withdrawing the **Federal Register** document published at 89 FR 92830. The HHS Scientific Integrity Policy remains in effect.

DATES: As of December 2, 2024, the document published at 89 FR 92830, on November 25, 2024, is withdrawn.

FOR FURTHER INFORMATION CONTACT: Karen Wehner, Ph.D., Scientific Integrity Officer, Office of Science and Data Policy, Office of the Assistant Secretary for Planning and Evaluation, Office of the Secretary, HHS at 240–453–8435 or scientificintegrity@hhs.gov.

SUPPLEMENTARY INFORMATION: Scientific integrity plays a vital role in the mission of HHS. Ensuring integrity in science throughout the Department allows HHS

to foster and produce high-quality science, communicate effectively with the public, and base critical policy decisions on trustworthy and rigorous scientific findings. HHS has adopted a Department-wide scientific integrity policy to further strengthen scientific integrity and evidence-based policymaking throughout the Department.

The Scientific Integrity Policy of the U.S. Department of Health and Human Services (Policy) was approved on September 16, 2024. The finalized Policy was announced to the HHS community and posted on the HHS scientific integrity website, at <https://www.hhs.gov/programs/research/scientificintegrity/index.html>, on September 30, 2024.

The document that published on Monday November 25, 2024, at 89 FR 92830 is being withdrawn. The Policy itself remains in effect and the public may continue to access the policy on the HHS website, at <https://www.hhs.gov/sites/default/files/hhs-scientific-integrity-policy.pdf>.

HHS would like to clarify that the Policy does not modify, implement, or change the Rules referenced in the CFR citations section, *i.e.*, 42 CFR part 93 and 45 CFR parts 46 and 73; and is not intended to be guidance about implementing those Rules. HHS also notes that the Policy is an internal HHS policy and only applies to HHS employees and other covered individuals as indicated in the Policy.

The effective date of the Policy remains October 16, 2024.

Dated: November 25, 2024.

Katherine N. Bent,
Associate Deputy Assistant Secretary, Office of Science and Data Policy, Office of the Assistant Secretary for Planning and Evaluation, Department of Health and Human Services.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[GN Docket No. 23–65, IB Docket No. 22–271, FCC 24–28; FR ID 264974]

Single Network Future: Supplemental Coverage From Space; Space Innovation

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: In this document, the Federal Communications Commission (Commission) announces that the Office of Management and Budget (OMB) has approved, for a period of three years, information collections associated with certain rules adopted in the 2024 Single Network Future: Supplemental Coverage from Space; Space Innovation Report and Order and Further Notice of

Proposed Rulemaking (Report and Order), FCC 24–28. The Commission also announces the effective date for these rules.

DATES: The amendments to 47 CFR 1.9047(d)(2), published at 89 FR 34148 on April 30, 2024, are effective on December 5, 2024.

FOR FURTHER INFORMATION CONTACT: For further information, please contact Christine Parola, Attorney Advisor, Mobility Division, Wireless Telecommunications Bureau at (202) 418–7851 or Christine.Parola@fcc.gov. For additional information concerning the Paperwork Reduction Act information collection requirements, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION: This document announces that OMB approved, for a period of three years, the information collection requirements in 47 CFR 1.9047(d)(2) on October 30, 2024.

To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice).

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received OMB approval on October 30, 2024, for the information collection requirements contained in the Commission's rules at 47 CFR 1.9047(d)(2) under OMB control number 3060–1058.

Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060–1058.

OMB Approval Date: October 30, 2024.

OMB Expiration Date: October 31, 2027.

Title: FCC Application or Notification for Spectrum Leasing Arrangement or Private Commons Arrangement: WTB and PSHS Bureaus.

Form Number: FCC Form 608.

Respondents: Individual and households; Businesses or other for-profit entities; State, local, or tribal government, and Not for profit institutions.

Number of Respondents: 1,697 respondents; 1,697 responses.

Estimated Time per Response: 0.05 hours–3 hours.

Frequency of Response:

Recordkeeping requirement, third party disclosure requirement, on occasion reporting requirement, one-time reporting requirement and periodic reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 1, 4(i), 157, 301, 303, 307, 308, 309, and 310 of the Communications Act of 1934, as amended.

Total Annual Burden: 2,878 hours.

Total Annual Cost: \$1,763,375.

Needs and Uses: FCC Form 608 is a multi-purpose form. It is used to provide notification or request approval for any spectrum leasing arrangement (“Lease”) entered into between an existing licensee in certain Wireless and/or Public Safety Radio Services and a spectrum lessee. This form also is required to notify or request approval for any spectrum subleasing arrangement (“Sublease”). The data collected on the form is used by the FCC to determine whether the public interest would be served by the Lease or Sublease. The form is also used to provide notification for any Private Commons Arrangement entered into between a licensee, lessee, or sublessee and a class of third-party users (as defined in section 1.9080 of the Commission's Rules).

The Commission is revising this form to collect information in order to confirm that satellite service operators and terrestrial service providers who seek to enter lease agreements in order to offer supplemental coverage from space (SCS) do so in compliance with the rules that govern SCS operations. On March 15, 2024, the Commission released the Report and Order, which adds new § 1.9047(d)(2) to the Commission's rules requiring the spectrum lessee or sublessee seeking to engage in spectrum leasing under this section to provide certain information within the Commission Form 608 when seeking a leasing agreement to provide SCS. Applicants will file Form 608 into the Commission's Universal Licensing System (ULS) database.

The Commission anticipates that SCS will enable consumers in areas not covered by terrestrial networks to be

connected using their existing devices via satellite-based communications. SCS is a crucial component of the Commission's vision for a “single network future,” in which satellite and terrestrial networks work seamlessly together to provide coverage that neither network can achieve on its own. In order to ensure that prospective SCS operators will be able to comply with the applicable rules, that the public interest will be served by granting their applications, and that harmful interference will be avoided to the greatest extent possible thereafter, the Commission seeks to collect the following information from prospective SCS spectrum lessees.

The Commission has adopted new requirements in its part 1 rules that obligate lessees to provide the following on FCC Form 608: a certification that they are entering a leasing agreement in order to provide SCS; a description of the type of permitted arrangement the parties will enter (*e.g.*, is there a single terrestrial licensee or multiple terrestrial licensees that together hold the required licenses); and, if there are multiple terrestrial licensees, a further description of the leasing arrangement and explanation of how those licensees together hold all of the relevant licenses in a particular geographically independent area (GIA). Entities completing FCC Form 608 for the purposes of providing SCS must also indicate that the application is for SCS by checking a box on Form 608.

This information collection is designed to allow Commission staff to carry out its statutory duties to regulate satellite communications in the public interest; namely, to ensure that prospective providers of SCS will operate in compliance with the applicable regulatory framework. This process utilizes an existing Commission form, which will remove confusion by employing the procedures that are already in place. The modifications for Form 608 covered herein will enable the Commission to more accurately track filings related to the provision of SCS, a critical component of application review given the interplay between part 1 lease filings and part 25 license applications inherent in the SCS framework. This is especially crucial where multiple entities together hold all co-channel licenses in a particular band throughout a geographically independent area (GIA) and wish to deploy a leasing agreement with a satellite operator to provide SCS. Such arrangements are only permitted in the circumstances described in § 1.9047(d)(1)(ii)(A) through (B); specifically, the Commission must be

able to confirm that the multiple licensees in fact cover the entirety of the GIA in question and that, when reviewing related part 25 license applications, the entire area of the proposed service is covered by the associated leases. This collection will thereby enable the Commission to monitor and enforce the entry criteria that SCS providers must satisfy, and which are designed to minimize the possibility of harmful interference. Finally, the collection will play a critical role in the Commission's effort to review and track leasing arrangements that will result in entities providing SCS.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

[FR Doc. 2024-28172 Filed 11-29-24; 8:45 am]

BILLING CODE 6712-01-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 231221-0314; RTID 0648-XE492]

Fisheries of the Northeastern United States; Atlantic Bluefish Fishery; Quota Transfer From Massachusetts to North Carolina

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS announces that the Commonwealth of Massachusetts is transferring a portion of their 2024 commercial bluefish quota to the State of North Carolina. This quota adjustment is necessary to comply with the Atlantic Bluefish Fishery Management Plan (FMP) quota transfer provisions. This announcement informs the public of the revised 2024 commercial bluefish quotas for Massachusetts and North Carolina.

DATES: Effective November 29, 2024, through December 31, 2024.

FOR FURTHER INFORMATION CONTACT:

Matthew Rigdon, Fishery Management Specialist, (978) 281-9336.

SUPPLEMENTARY INFORMATION:

Regulations governing the Atlantic bluefish fishery are found in 50 CFR 648.160 through 648.167. These regulations require annual specification of a commercial quota that is apportioned among the coastal states from Maine through Florida. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.162, and the final 2024 allocations were published on January 2, 2024 (89 FR 34).

The final rule implementing amendment 1 to the FMP, as published in the **Federal Register** on July 26, 2000 (65 FR 45844), provided a mechanism for transferring bluefish commercial quota from one state to another. Two or more states, under mutual agreement and with the concurrence of the NMFS Greater Atlantic Regional Administrator, can request approval to transfer or combine bluefish commercial quota

under § 648.162(e). The Regional Administrator is required to consider three criteria in the evaluation of requests for quota transfers or combinations: (1) the transfers would not preclude the overall annual quota from being fully harvested; (2) the transfers address an unforeseen variation or contingency in the fishery; and (3) the transfers are consistent with the objectives of the FMP and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The Regional Administrator has determined these criteria have been met for the transfers approved in this notification.

Massachusetts is transferring 65,000 lb (29,484 kg) to North Carolina through mutual agreement of the states. This transfer was requested to ensure North Carolina would not exceed its 2024 state quota. The revised bluefish quotas for 2024 are: Massachusetts, 155,862 lb (70,698 kg) and North Carolina, 1,030,996 lb (467,652 kg).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR 648.162(e)(1)(i) through (iii), which was issued pursuant to section 304(b), and is exempted from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 26, 2024.

Karen H. Abrams,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

Proposed Rules

Federal Register

Vol. 89, No. 231

Monday, December 2, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2024-2544; Project Identifier MCAI-2024-00569-E]

RIN 2120-AA64

Airworthiness Directives; Rolls-Royce Deutschland Ltd & Co KG Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2024-06-06, which applies to all Rolls-Royce Deutschland Ltd & Co KG (RRD) Model Trent7000-72 and Trent7000-72C engines. AD 2024-06-06 requires revising the airworthiness limitations section (ALS) of the operator's existing approved engine maintenance or inspection program, as applicable, to incorporate new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts. Since the FAA issued AD 2024-06-06, the manufacturer has revised the engine time limits manual (TLM) to introduce new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts, which prompted this AD. This proposed AD would require revising the ALS of the existing approved engine maintenance or inspection program, as applicable, to incorporate new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this NPRM by January 16, 2025.

ADDRESSES: You may send comments, using the procedures found in 14 CFR

11.43 and 11.45, by any of the following methods:

- **Federal eRulemaking Portal:** Go to [regulations.gov](https://www.regulations.gov). Follow the instructions for submitting comments.

- **Fax:** (202) 493-2251.

- **Mail:** U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery:** Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2024-2544; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI) any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For EASA material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADS@easa.europa.eu; website: easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.

- You may view this material at the FAA, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222-5110.

FOR FURTHER INFORMATION CONTACT:

Barbara Caufield, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (781) 238-7146; email: barbara.caufield@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include "Docket No. FAA-2024-2544; Project Identifier MCAI-2024-00569-E" at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider

all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](https://www.regulations.gov), including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as "PROPIN." The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Barbara Caufield, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2024-06-06, Amendment 39-22711 (89 FR 26755, April 16, 2024) (AD 2024-06-06), for all RRD Model Trent7000-72 and Trent7000-72C engines. AD 2024-06-06 was prompted by MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued EASA AD 2022-0248, dated December 14, 2022 (EASA AD 2022-0248), to address the manufacturer revising the engine TLM life limits to introduce new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts.

AD 2024-06-06 requires revising the ALS of the operator's existing approved

engine maintenance or inspection program, as applicable, to incorporate new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts. The FAA issued AD 2024–06–06 to prevent failure of critical rotating parts, which, if not addressed, could result in failure of one or more engines, loss of thrust control, and loss of the airplane.

Actions Since AD 2024–06–06 was Issued

Since the FAA issued AD 2024–06–06, EASA has superseded EASA AD 2022–0248 and issued EASA AD 2024–0041, dated February 9, 2024 (EASA AD 2024–0041) (also referred to as the MCAI). The MCAI states that the manufacturer published a revised engine TLM to introduce new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts.

You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2024–2544.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2024–0041, which specifies revising the ALS of the existing approved engine maintenance or inspection program, as applicable, to incorporate new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA’s Determination

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain none of the requirements of AD 2024–0041. This proposed AD would require accomplishing the actions specified in the MCAI, described previously, except as discussed under “Differences Between this Proposed AD and the MCAI ” and identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA’s ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has since coordinated with other manufacturers and CAAs to use this process. As a result, the FAA proposes to incorporate by reference EASA AD 2024–0041 in the FAA final rule. This proposed AD would, therefore, require compliance with

EASA AD 2024–0041 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in the EASA AD does not mean that operators need comply only with that section. For example, where the AD requirement refers to “all required actions within the compliance times,” compliance with this AD requirement is not limited to the section titled “Required Action(s) and Compliance Time(s)” in EASA AD 2024–0041. Service information required by the EASA AD for compliance will be available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2024–2544 after the FAA final rule is published.

Differences Between This Proposed AD and the MCAI

Where paragraph (3) of EASA AD 2024–0041 specifies revising the approved Aircraft Maintenance Programme within 12 months after the effective date of EASA AD 2022–0248, this proposed AD would require revising the ALS of the existing approved engine maintenance or inspection program, as applicable, within 30 days after the effective date of this AD.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 54 engines installed on airplanes of U.S. registry.

The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Revise the ALS	1 work-hour × \$85 per hour = \$85	\$0	\$85	\$4,590

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing

regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or

on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2024–06–06, Amendment 39–22711 (89 FR 26755, April 16, 2024); and

■ b. Adding the following new airworthiness directive:

Rolls-Royce Deutschland Ltd & Co KG:
Docket No. FAA–2024–2544; Project Identifier MCAI–2024–00569–E.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 16, 2025.

(b) Affected ADs

This AD replaces AD 2024–06–06, Amendment 39–22711 (89 FR 26755, April 16, 2024).

(c) Applicability

This AD applies to Rolls-Royce Deutschland Ltd & Co KG Model Trent7000–72 and Trent7000–72C engines.

(d) Subject

Joint Aircraft System Component (JASC) Code 7200, Engine (Turbine/Turboprop).

(e) Unsafe Condition

This AD was prompted by the manufacturer revising the engine time limits manual to introduce new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts. The FAA is issuing this AD to prevent failure of critical rotating parts. The unsafe condition, if not addressed, could result in failure of one or more engines, loss of thrust control, and loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: Perform all required actions within the compliance times specified in, and in accordance with, European Union Aviation Safety Agency AD 2024–0041, dated February 9, 2024 (EASA AD 2024–0041).

(h) Exceptions to EASA AD 2024–0041

(1) Where EASA AD 2024–0041 defines the AMP as the approved Aircraft Maintenance Programme containing the tasks on the basis of which the scheduled maintenance is conducted to ensure the continuing airworthiness of each operated engine, this AD defines the AMP as the aircraft maintenance program containing the tasks on the basis of which the scheduled maintenance is conducted to ensure the continuing airworthiness of each operated airplane.

(2) Where EASA AD 2024–0041 refers to its effective date, this AD requires using the effective date of this AD.

(3) This AD does not require compliance with paragraphs (1), (2), (4), and (5) of EASA AD 2024–0041.

(4) Where paragraph (3) of EASA AD 2024–0041 specifies “Within 12 months after the effective date of this AD, revise the approved AMP,” replace that text with “Within 30 days after the effective date of this AD, revise the airworthiness limitation section (ALS) of the existing approved engine maintenance or inspection program, as applicable.”

(5) This AD does not adopt the Remarks paragraph of EASA AD 2024–0041.

(i) Provisions for Alternative Actions and Intervals

After performing the actions required by paragraph (g) of this AD, no alternative actions and associated thresholds and intervals, including life limits, are allowed unless they are approved as specified in the provisions of the “Ref. Publications” section of EASA AD 2024–0041.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520 Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the AIR–520 Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k) of this AD and email to: AMOC@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Additional Information

For more information about this AD, contact Barbara Caufield, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (781) 238–7146; email: barbara.caufield@faa.gov.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2024–0041, dated February 9, 2024.

(ii) [Reserved]

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: ADs@easa.europa.eu; website: easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.

(4) You may view this material at FAA, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locations or email fr.inspection@nara.gov.

Issued on November 22, 2024.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA–2024–2511; Airspace Docket No. 24–ASW–21]

RIN 2120–AA66

Amendment of Class E Airspace; Austin, TX; Establishment of Class E Airspace; Austin, Lago Vista, and Lakeway, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend the Class E airspace at Austin, TX, and establish Class E airspace at Austin, Lago Vista, and Lakeway, TX. The FAA is proposing this action as the result of biennial airspace reviews. This action will bring the airspace into compliance with FAA orders and support instrument flight rule (IFR) procedures and operations.

DATES: Comments must be received on or before January 16, 2025.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–2511 and Airspace Docket No. 24–ASW–21 using any of the following methods:

* *Federal eRulemaking Portal:* Go to www.regulations.gov and follow the online instruction for sending your comments electronically.

* *Mail*: Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier*: Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax*: Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at www.regulations.gov at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11J, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Jeffrey Claypool, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5711.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace designated as an extension to the Class C surface area at Austin-Bergstrom International Airport, Austin, TX; amend the Class E airspace extending upward from 700 feet above the surface at Austin-Bergstrom International Airport and

Austin Executive Airport, Austin, TX; and establish Class E airspace extending upward from 700 feet above the surface at Lago Vista TX/Rusty Allen Airport, Lago Vista, TX, and Lakeway Airpark, Lakeway, TX, to bring the airspace into compliance with FAA orders and support IFR operations at these airports.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to www.regulations.gov as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at www.dot.gov/privacy.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at www.regulations.gov. Recently published rulemaking documents can also be accessed through the FAA's web page at www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of

operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraphs 6003 and 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024, and effective September 15, 2024. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by:

Establishing Class E airspace extending upward from the surface designated as an extension to a Class C surface area within 2.2 miles each side of the 359° bearing from the Austin-Bergstrom INTL: RWY 18R–LOC extending from the 5-mile radius to 7.1 miles north of the Austin-Bergstrom INTL: RWY 18R–LOC; and within 2 miles each side of the 359° bearing from the Austin-Bergstrom International Airport, Austin, TX, extending from the 5-mile radius of Austin-Bergstrom International Airport to 6 miles north of the Austin-Bergstrom International Airport;

Modifying the Class E airspace extending upward from 700 feet above the surface at Austin, TX, by removing the point of origin reference and the associated airspace as it is no longer required; removing Lakeway Airpark and the Lago-Vista Rusty Allen Airport and the associated airspace as the airspace will no longer adjoin the Austin, TX, Class E airspace and separate Class E airspace is being established for these airports; adding within a 7.5-mile radius of the Austin-Bergstrom International Airport; adding within 4 miles either side of the 179° bearing from the Austin-Bergstrom INTL: RWY 36R–GS extending from the 7.5-mile radius of Austin-Bergstrom International Airport to 7.7 miles south of the Austin-Bergstrom INTL: RWY 36R–GS; within a 6.6-mile (increased from a 6.3-mile) radius of the Austin

Executive Airport, Austin, TX; within 2 miles each side of the 131° bearing from Austin Executive Airport extending from the 6.6-mile (previously 6.3-mile) radius of Austin Executive Airport to 11.2 (decreased from 11.3) miles southeast of the Austin Executive Airport; and within 2 miles each side of the 311° bearing from the Austin Executive Airport extending from the 6.6-mile (previously 6.3-mile) radius of Austin Executive Airport to 10.9 (increased from 10.5) miles northwest of the Austin Executive Airport; Establishing Class E airspace extending upward from 700 feet above the surface within a 7-mile radius of Lago Vista TX/Rusty Allen Airport, Lago Vista, TX;

And establishing Class E airspace extending upward from 700 feet above the surface within a 6.8-mile radius of Lakeway Airport, Lakeway, TX.

This action is the result of biennial airspace reviews and to bring the airspace into compliance with FAA orders and support IFR operations at these airports.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 6003 Class E Airspace Areas Designated as an Extension.

BILLING CODE 4910–13–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General

42 CFR Parts 1000 and 1001

RIN 0936–AA12

Health Care Programs: Fraud and Abuse; Revisions to the Office of Inspector General's Exclusion Authorities

AGENCY: Office of Inspector General (OIG), Department of Health and Human Services (HHS).

ACTION: Proposed rule.

SUMMARY: This proposed rule proposes to amend the regulations relating to exclusion authorities under the authority of the Office of Inspector General (OIG) of the Department of Health and Human Services (HHS or the Department). The proposed rule would codify changes made by the Medicaid Services Investment and Accountability Act of 2019 (MSIAA), that added exclusion authorities related to misclassification and false information about outpatient drugs. The proposed rule would also update and clarify OIG's procedures for excluding individuals and entities from participation in the Federal health care programs, including the factors that will be considered in determining the length of exclusions, the provisions governing notices of exclusions, and certain provisions related to reinstatement into the programs.

DATES: To ensure consideration, public comments must be received no later than 5 p.m. eastern time on January 31, 2025.

ADDRESSES: In commenting, please refer to file code OIG–2401–P. Because of staff and resource limitations, we cannot accept comments by fax transmission. You may submit comments in one of two ways (no duplicates, please):

1. *Electronically.* You may submit comments electronically at <https://www.regulations.gov>. Follow the “Submit a comment” instructions and refer to file code OIG–2401–P.

2. *By regular, express, or overnight mail.* You may send written comments to the following address: OIG, Regulatory Affairs, HHS, Attention: OIG–2401–P, Room 5267, Cohen Building, 330 Independence Avenue SW, Washington, DC 20201. Please allow sufficient time for mailed comments to be received before the close of the comment period.

For information on viewing public comments, please see the **SUPPLEMENTARY INFORMATION** section.

Docket: Go to the Federal eRulemaking Portal at <https://www.regulations.gov> for access to the rulemaking docket, including any background documents and the plain-language summary of the proposed rule of not more than 100 words in length required by the Providing Accountability Through Transparency Act of 2023.

FOR FURTHER INFORMATION CONTACT: David Fuchs, Deputy Branch Chief, Office of Counsel to the Inspector General, at (202) 763–4750.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period as soon as possible after they have been received on the following website: <https://www.regulations.gov>.

I. Executive Summary

A. Purpose and Need for Regulatory Action

MSIAA expanded OIG’s exclusion authority to protect the Federal health care programs from fraud and abuse by allowing OIG to exclude certain individuals and entities that knowingly misclassify a covered outpatient drug, knowingly fail to correct such misclassification, or knowingly provide false information related to drug pricing,

drug product information, or data related to drug pricing or drug product information. OIG proposes to update its regulations to codify the changes made by MSIAA in the regulations. At the same time, OIG proposes to amend other sections of the exclusion regulations to ensure consistency with statutory authority, decrease administrative burdens, enhance transparency, and improve the efficiency and effectiveness of government. The proposed amendments include factors that will be considered in determining the lengths of exclusions, the processes governing notices of exclusions, and certain provisions related to reinstatement into the programs, as well as clarifying changes and updates to the regulations.

B. Legal Authority

The legal authority for this regulatory action is found in: 42 U.S.C. 1302; 1320a–7; 1395u(j); 1395u(k); 1395y(e); and 1395hh.

II. Summary of Major Provisions

We propose changes to the exclusion regulations at 42 CFR parts 1000 and 1001 to codify an authority under MSIAA, update processes, and make clarifying and technical changes to existing regulations. Specifically, section 6(d) of MSIAA amended section 1128(b) of the Social Security Act (the Act) to add an exclusion authority for certain conduct related to the misclassification of outpatient drugs, and knowingly providing false information related to drug pricing, drug product information, or data related to drug pricing or drug product information.

We propose clarifying changes to aggravating and mitigating factors that are used to determine periods of exclusion under section 1128 of the Act. We propose to simplify the mitigating factor relating to cooperation and to consolidate certain aggravating factors relating to other criminal, civil, and administrative sanctions into a single factor. We propose to modify the exclusion authority under section 1128(b)(12) of the Act, for failure to grant immediate access, to eliminate a requirement for OIG or a State Medicaid Fraud Control Unit (MFCU) to demonstrate that the requested material is about to be altered or destroyed in order to obtain access to the material at the time the request is made. We propose to modify OIG’s obligations with respect to beneficiaries’ access to physician services in imposing exclusions under section 1128(b)(14) of the Act in accordance with the Act. We propose to modify the regulatory language to align the regulations with

certain, current OIG practices for exclusions imposed under sections 1128(a) and (b) of the Act and for waivers. We propose certain changes to the definitions to remove duplication. We propose to modify the circumstances under which early reinstatement is available for individuals and entities excluded under section 1128(b)(4) of the Act to permit individuals who lost their health care licenses for reasons related to patient abuse and neglect to apply for early reinstatement in limited circumstances.

III. Costs and Benefits

There are no significant costs associated with the proposed regulatory revisions that would impose any mandates on State, local, or Tribal governments or the private sector.

IV. Background

A. Exclusion Authority

The exclusion authorities found in section 1128 of the Act are intended to protect the Federal health care programs and their beneficiaries from untrustworthy individuals and entities whose behavior has demonstrated that those individuals and entities pose a risk to program beneficiaries or to the integrity of these programs. These authorities encompass both mandatory exclusions (section 1128(a) of the Act) and permissive exclusions (section 1128(b) of the Act). The Secretary’s authority under section 1128 of the Act has been delegated to OIG. *See* 53 FR 12993 (Apr. 20, 1988).

The mandatory exclusion authorities require OIG to exclude from program participation any individual or entity convicted of an offense that is: related to items or services delivered under Medicare and Medicaid; related to patient abuse or neglect; or a felony related to health care delivery, governmental health care programs, or controlled substances. Mandatory exclusions must be imposed for a minimum 5-year period. The permissive authorities do not require the imposition of an exclusion and may either be: (1) “derivative” exclusions that are based on actions previously taken by a court, other law enforcement, or regulatory agencies; or (2) “non-derivative” exclusions that are based on OIG-initiated determinations of misconduct, *e.g.*, poor quality care or submission of false claims for Medicare or Medicaid payment. With certain exceptions, there are no specified minimum periods of exclusion under these permissive authorities.

Over the years, several statutory and regulatory provisions have amended or

further clarified OIG's exclusion authorities. For example, the Health Insurance Portability and Accountability Act of 1996 (HIPAA) expanded OIG's authorities to add several exclusion authorities (sections 1128(a)(3), (a)(4), and (b)(15)) and increase minimum or benchmark periods of exclusion for certain permissive exclusions. The Balanced Budget Act (BBA) of 1997 further amended OIG's exclusion authorities by: (1) extending the scope of an OIG exclusion beyond Medicare and State health care programs to all Federal health care programs; (2) establishing permanent exclusions for persons convicted of three or more health care-related crimes and 10-year exclusions for persons convicted of two health care-related crimes; and (3) expanding the scope of exclusions under section 1128(b)(8) of the Act.

The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) amended OIG's authority to waive mandatory exclusions. In 2010, the Patient Protection and Affordable Care Act, Public Law 111-148, 124 Stat. 119 (2010), as amended by the Health Care and Education Reconciliation Act of 2010, Public Law 111-152, 124 Stat. 1029 (2010) (ACA), broadened OIG's waiver authority to permit the administrator of a Federal health care program to request a waiver if the administrator determines that exclusion would impose a hardship on beneficiaries of that program. In addition, the ACA expanded OIG's exclusion authority in several ways, including by establishing a new permissive exclusion authority under section 1128(b)(16) of the Act. On January 17, 2017, OIG published a final rule addressing new and revised exclusion authorities in accordance with the ACA and the MMA, as well as technical, policy, and clarifying changes to 42 CFR parts 1000, 1001, 1002, and 1006.

B. Changes Made by MSIAA

MSIAA expanded OIG's authority to exclude certain individuals and entities from participation in the Federal health care programs under section 1128 of the Act. Section 6(d) of MSIAA established a new permissive exclusion authority applicable to any manufacturer, or officer, director, agent, or managing employee of such manufacturer, that knowingly misclassifies a covered outpatient drug, knowingly fails to correct such misclassification, or knowingly provides false information related to drug pricing, drug product information, or data related to drug pricing or drug product information.

The proposed rule would codify this statutory authority within the existing regulatory framework and address how OIG will set the length of exclusions imposed under that authority.

C. Proposed Policy Changes and Clarifying Changes

The proposed rule would revise the section governing exclusions under section 1128(b)(14) of the Act based on an individual's default on a health education loan or scholarship obligation. The section currently requires OIG to take into account access of beneficiaries to physician services for which payment may be made under Medicare, Medicaid, or other Federal health care programs in determining whether to impose an exclusion. We propose to align the regulation with section 1128(b)(14) of the Act by limiting OIG's obligations under this section to take into account access of beneficiaries to only Medicare and Medicaid physician services. By aligning the regulation with the statutory authority and removing the requirement for OIG to take into account beneficiary access to physician services under Federal health care programs other than Medicare and Medicaid, we hope to allow for more efficient imposition of exclusions under this section.

We propose clarifying changes to aggravating and mitigating factors that are used to determine periods of exclusion under section 1128 of the Act. We propose to simplify the mitigating factor relating to cooperation and to combine certain overlapping factors relating to prior civil, criminal, and administrative sanctions into a single factor. We propose to revise the regulation that permits OIG to exclude individuals and entities who fail to grant OIG or a State MFCU immediate access to certain records, to eliminate the requirement that OIG or a MFCU demonstrate that the requested materials are about to be altered or destroyed in order to obtain access to the materials at the time the request is made, instead of within 24 hours of the request. We propose to make technical changes to the regulations governing exclusions under section 1128 of the Act and for waivers. We propose to modify the circumstances under which early reinstatement is available for individuals and entities excluded under section 1128(b)(4) of the Act.

The proposed rule would also modify the sections governing notice to the public and other agencies regarding exclusions, notice regarding approval of reinstatement requests, and notice regarding denial of reinstatement

requests. These proposed changes would modernize notice to the public and other agencies and more clearly outline OIG's process for appeals of denials of reinstatement requests.

Finally, the proposed rule would also include clarifying changes and updates to the exclusion regulations, including plain language changes to definitions, phrasing, and verbiage ensuring higher readability and comprehension for the public. Additionally, the proposed rule proposes to modernize pronoun references.

V. Provisions of the Proposed Rule

A. Changes to Part 1000 (Definitions)

We propose to move the definitions of "agent," "indirect ownership interest," "ownership interest," and "patient" from § 1001.2 to § 1000.10 (General definitions), because these terms are used not only in part 1001 but also in other parts of subchapter B. We propose to modify "indirect ownership interest" to correct certain language. The current language states that "'Indirect ownership interest' includes an ownership interest through any other entities that ultimately have an ownership interest in the entity in issue." We propose to modify this language to clarify that the indirect ownership interest could be in one entity or through multiple entities. We also propose a technical edit changing "in issue" to "at issue." We propose to modify the definition of "ownership interest" to correct certain language. The current language states that an ownership interest includes any interest in any mortgage, deed, trust or note, or other obligation secured in whole or in part by the assets of the entity. We propose to replace the phrase "deed, trust or note, or other obligation" with "deed of trust, note, or other obligation." The reference to "deed of trust" appears in the definition of "ownership or control interest" at § 1001.2 and in section 1124 of the Act, and we believe that "deed, trust or note" was a typographical error in the regulatory definition because a "deed of trust" is an obligation similar to a mortgage or note.

We also propose to modify the definition of "patient" to change the reference to "Medicare, Medicaid and any other Federal health care program" to "any Federal health care program" because "Federal health care program" is a statutorily defined term that includes (and is broader than) Medicare and State health care programs. See 42 U.S.C. 1320a-7b(f). Section 1320a-7b(f) of U.S. Code title 42 and § 1000.10 define "Federal health care program" as

“(1) any plan or program that provides health benefits, whether directly, through insurance, or otherwise, which is funded directly, in whole or in part, by the United States Government (other than the health insurance program under chapter 89 of title 5); or (2) any State health care program, as defined as defined in section 1128(h).”

Lastly, we propose to add a regulatory definition of “knowingly” to § 1000.10 because the term is used in the new exclusion authority added by MSIAA. We propose the same definition of “knowingly” that appears in § 1003.110, applicable to OIG’s civil monetary penalty authorities in section 1128A of the Social Security Act (Act). By adding the definition to § 1000.10, the definition will apply to the regulations interpreting both the exclusion statute (section 1128 of the Act) and the OIG’s civil monetary penalty authorities (section 1128A of the Act). The proposed language is as follows: “*Knowingly* means that a person, with respect to an act, has actual knowledge of the act, acts in deliberate ignorance of the act, or acts in reckless disregard of the act, and no proof of specific intent to defraud is required.” The definition mirrors the definition used in the False Claims Act, and is the most widely used knowledge standard for civil health care fraud.

B. Changes to Part 1001

References to Medicare, Medicaid, and State Health Care Programs. Title, Sections 1001.1, 1001.2, 1001.101, 1001.102, 1001.201, 1001.301, 1001.401, 1001.701, 1001.1301, 1001.1401, 1001.1901, 1001.3002, 1001.3005

We propose to change the title of part 1001 from “Medicare and State health care programs” to “The Federal health care programs” because the statutory basis for many of the OIG authorities in part 1001 derives from section 1128 of the Act, which references “Federal health care program,” a defined term that includes (and is broader than) Medicare and State health care programs, as described above. Similarly, we propose removing references to Medicare and Medicaid in variations of the phrase “Medicare, Medicaid and all other Federal health care programs” throughout part 1001, because the statutorily defined term “Federal health care program” encompasses Medicare and Medicaid. We are proposing to remove the references to Medicare and Medicaid in the following sections: 1001.1(a), 1001.101(b), 1001.401(c)(2)(ii), 1001.701(d)(2)(iv), 1001.1301(b)(2)(iii), 1001.1401(b)(1), 1001.1401(b)(4); 1001.1901(a),

1001.1901(b)(1), 1001.1901(c)(3), and 1001.1901(c)(5)(i), 1001.3002(b)(3), and 1001.3005(a). We also propose corresponding technical changes to the phrases in those sections to account for the removal of the references to Medicare and Medicaid. Neither the removal of the references to Medicare and Medicaid, nor the technical conforming changes, are meant to change the meaning of the phrases to which the changes are made. Finally, we propose to modernize the pronouns throughout part 1001 and make corresponding grammatical edits.

Section 1001.2 Definitions

We propose deleting the definition of “Controlled substance” from 1001.2 because the relevant regulations at §§ 1001.101(d) and 1001.401 already indicate that the term “controlled substance” is being used as defined in Federal or State law, so the definition of “Controlled substance” in § 1001.2 is unnecessary. We also propose to move certain definitions from § 1001.2 to § 1000.10 and modify them as described above.

Section 1001.101 Basis for Liability

In § 1001.101(c) and (d), we propose to remove the date limitation of August 21, 1996. The date limitation was included because when HIPAA amended section 1128 of the Act to add new exclusion authorities in sections 1128(a)(3) and (a)(4) of the Act, it specified that only convictions after August 21, 1996 (the date of HIPAA’s enactment) would be subject to the exclusion authorities in those subsections. We are proposing to delete the date limitation in the corresponding regulatory authorities in § 1001.101(c) and (d) because it is now obsolete. We believe that this change will not impact any future exclusions because virtually all criminal offenses before August 21, 1996, are now time-barred from prosecution.

Section 1001.101(c)(2) states “with respect to any act or omission in a health care program (other than Medicare and a State health care program). . . .” We propose to make a technical change from the word “and” to the word “or” in the parenthetical for grammatical accuracy. Similar language appears in § 1001.201(a)(1)(ii). We propose the same technical change for that section for grammatical accuracy.

Aggravating Factors

When OIG imposes an exclusion under section 1128(a), the minimum period of the exclusion is required by statute to be at least 5 years. However, under the regulations the length of an

exclusion may be extended beyond the 5-year minimum period if certain aggravating factors, as defined in the regulations, are present. OIG exclusions under certain permissive authorities in section 1128(b) are for a period of 3 years but may be lengthened if certain aggravating factors (again, as defined in the regulations) are present. This section discusses proposed changes to these aggravating factors.

Financial Loss

The financial loss aggravating factor at § 1001.102(b)(1) currently reads as follows: “The acts resulting in the conviction, or similar acts, caused, or were intended to cause, a financial loss to a government agency or program or to one or more other entities of \$50,000 or more. (The entire amount of financial loss to such government agencies or programs or to other entities, including any amounts resulting from similar acts not adjudicated, will be considered regardless of whether full or partial restitution has been made).” A similar aggravating factor appears in §§ 1001.201 and 1001.301. We believe that the language of this factor should be consistent in each place it appears to avoid any question about whether court decisions interpreting it under one section should apply to its application under other sections. Therefore, we propose two technical changes to § 1001.102(b)(1) to match the language of this factor as it appears in §§ 1001.201(b)(2)(i) and 1001.301(b)(2)(viii): to move the phrase “of \$50,000 or more” to after “a financial loss,” and to delete the phrase in the parenthetical “to such government agencies or programs or to other agencies” because it is duplicative of language outside the parenthetical. In §§ 1001.201(b)(2)(i) and 1001.301(b)(2)(viii), we propose to delete the phrase “or had a significant financial impact on program beneficiaries or other individuals” because we propose adding this concept to a separate aggravating factor at §§ 1001.201(b)(2)(iii) and 1001.301(b)(2)(ii) as described in the next paragraph.

Impact on Beneficiaries and Other Individuals

Section 1001.102(b)(3), applicable to mandatory exclusions, includes as an aggravating factor whether the acts that resulted in the conviction, or similar acts, had a significant adverse physical, mental, or financial impact on one or more program beneficiaries or other individuals. A similar aggravating factor applies to certain permissive exclusions under §§ 1001.201 and 1001.301, but

those sections do not reference “financial” impact. In §§ 1001.201(b)(2)(iii) and 1001.301(b)(2)(ii), we propose to add “or financial” to the aggravating factor relating to impact on program beneficiaries and other individuals. We believe it is appropriate to consider all impacts on beneficiaries under the same aggravating factor. This change would make this aggravating factor consistent with a similar factor applicable to mandatory exclusions under § 1001.102(b)(3) and would move the analysis of financial impact on beneficiaries from the aggravating factor relating to financial loss (discussed above) to the aggravating factor relating to impact on beneficiaries.

In § 1001.301(b)(2)(ii), the aggravating factor is applied to convictions related to obstruction of an investigation or audit under section 1128(b)(2) of the Act. We are proposing language changes to this factor because we believe it is important to apply similar factors consistently in all applicable exclusions. Consistent language ensures that judicial interpretations of certain language will be applicable wherever the language appears, and that the public can reasonably expect OIG to apply the factors consistently. Therefore, we propose to replace the words “interference or obstruction” with “acts that resulted in the conviction.” When referring to the conduct leading to a conviction, other sections of the regulation use the word “acts,” and interference or obstruction are the “acts” at issue in the exclusion authority related to convictions for obstruction.

For the same reason, in § 1001.401(c)(2)(ii), which applies this aggravating factor to misdemeanor convictions relating to controlled substances, we propose to reorder the words “mental, physical or financial impact” to “physical, mental, or financial impact” for consistency with the language as it appears in this factor in other sections of the regulation. Neither of these modifications are intended to change the substance of this aggravating factor in either § 1001.301 or § 1001.401; instead, these changes are intended to simplify the regulations by using consistent language across various sections where the same meaning is intended.

Convictions Involving Patient Abuse and Neglect

Section 1001.102(b) includes the following as an aggravating factor: “In convictions involving patient abuse or neglect, the action that resulted in the conviction was premeditated, was part

of a continuing pattern of behavior, or consisted of non-consensual sexual acts.” See § 1001.102(b)(4). We propose a technical change to change “action” to “acts” for consistency with § 1001.102(b)(1) through (3). We propose additional conforming and technical changes to § 1001.102(b)(4) to account for the grammatical change from “action” to “acts” so that the new language would read as follows: “In convictions involving patient abuse or neglect, the acts that resulted in the conviction were premeditated, were part of a continuing pattern of behavior, or consisted of non-consensual sexual acts.” These changes to § 1001.102(b)(4) are not meant to change the meaning of the phrases to which the changes are made.

Criminal, Civil, and Administrative Sanctions

We propose to modify the aggravating factors relating to criminal, civil, and administrative sanctions. For mandatory exclusions, the regulations contain four separate factors that can be overlapping: “The convicted individual or entity has a prior criminal, civil or administrative sanction record” (§ 1001.102(b)(6)); “The individual or entity has previously been convicted of a criminal offense involving the same or similar circumstances” (§ 1001.102(b)(7)); “The individual or entity has been convicted of other offenses besides those that formed the basis for the exclusion” (§ 1001.102(b)(8)); and “The individual or entity has been the subject of any other adverse action by any Federal, State or local government agency or board if the adverse action is based on the same set of circumstances that serves as the basis for the imposition of the exclusion” (§ 1001.102(b)(9)). We propose to modify these factors to clarify how OIG would consider other civil, criminal, or administrative actions involving the excluded person for purposes of setting the period of exclusion.

First, we propose to modify § 1001.102(b)(6) to replace the phrase “a prior” with “other documented instances” and replace “sanction record” with “wrongdoing.” The proposed revised language would read as follows: “The individual or entity has other documented instances of criminal, civil, or administrative wrongdoing.” This proposed language is intended to encompass any documented instances of other criminal, civil, or administrative wrongdoing, including convictions that occurred before, at the same time as, or after the conviction forming the basis for exclusion. OIG may place greater emphasis on this

aggravating factor in determining the appropriate period of exclusion if multiple documented instances exist (e.g., an individual or entity has a prior conviction, the individual or entity was found liable under the False Claims Act, or a licensing authority imposed a sanction on the individual’s or entity’s license to provide health care).

Second, we propose to remove § 1001.102(b)(7) and (8) because they are duplicative of proposed § 1001.102(b)(6). Both a previous conviction of a criminal offense involving the same or similar circumstances (§ 1001.102(b)(7)) and a conviction for other offenses besides those that formed the basis for the exclusion (§ 1001.102(b)(8)) would be included in the proposed aggravating factor for other documented instances of criminal, civil, or administrative wrongdoing in § 1001.102(b)(6).

Third, we propose to remove the aggravating factor relating to “any other adverse action” in § 1001.102(b)(9) because it would be unnecessary with the new proposed language in § 1001.102(b)(6). Adverse actions by Federal, State, or local government agencies and boards would be included in other documented instances of administrative wrongdoing under proposed § 1001.102(b)(6).

For permissive exclusions, the regulations contain three separate aggravating factors relating to civil, criminal, and administrative sanctions that can be overlapping: (1) “Whether the individual or entity has a documented history of criminal, civil, or administrative wrongdoing;” (2) “Whether the individual or entity has been convicted of other offenses besides those that formed the basis for the exclusion;” and (3) “Whether the individual or entity has been the subject of any other adverse action by any Federal, State, or local government agency or board if the adverse action is based on the same set of circumstances that serves as the basis for the imposition of the exclusion.” See, e.g., § 1001.201(b)(2)(v) through (vii). One or more of these three aggravating factors, with some language variations (as addressed below) also appear in §§ 1001.301, 1001.401, 1001.701, 1001.801, 1001.901, 1001.951, 1001.1101, 1001.1201, 1001.1301, 1001.1552, 1001.1601, and 1001.1701. We intend the proposed changes described below to clarify how OIG would consider other civil, criminal, and administrative sanctions involving an excluded person for purposes of setting the length of exclusion.

First, we propose to modify §§ 1001.201(b)(2)(v), 1001.301(b)(2)(v),

1001.401(c)(2)(iv), 1001.701(d)(2)(iii), 1001.801(c)(2)(iv), 1001.901(b)(3), 1001.951(b)(1)(iii), 1001.1101(b)(3), 1001.1201(b)(4), 1001.1301(b)(2)(iv), 1001.1401(b)(5), 1001.1552(d)(3), 1001.1601(b)(1)(iv), and 1001.1701(c)(1)(v) to make the first of the three aggravating factors referenced above consistent in each section, as “The individual or entity has other documented instances of criminal, civil, or administrative wrongdoing.” The proposed language is intended to encompass any documented instances of other criminal, civil, or administrative wrongdoing, including convictions that occurred before, at the same time as, or after the conviction forming the basis for exclusion. OIG may place greater emphasis on this aggravating factor in determining the appropriate period of exclusion if multiple documented instances exist (e.g., an individual or entity has a prior conviction, the individual or entity was previously found liable under the False Claims Act, or a licensing authority imposed a sanction on the individual’s or the entity’s license to provide health care).

Several of the permissive exclusion authority sections (§§ 1001.901, 1001.951, 1001.1101, 1001.1201, 1001.1301, 1001.1401, 1001.1601, and 1001.1701) include a parenthetical stating that “the lack of any prior record is to be considered neutral.” In these sections, we propose to replace “lack” with “absence” to increase readability and “prior record” with “such instances” for consistency within the factor. In § 1001.1401(b)(5), the proposed language would use “hospital” instead of “individual or entity,” as that section applies to hospitals only. In §§ 1001.1601(b)(1)(iv) and 1001.1701(c)(1)(v), the proposed language would use “physician” instead of “individual or entity,” as those sections apply to physicians only. The change from “lack” to “absence” is not meant to change the meaning of the phrase to which the change is made. Lastly, in §§ 1001.201(b)(2)(v), 1001.301(b)(2)(v), 1001.401(c)(2)(iv), 1001.701(d)(2)(iii), and 1001.801(c)(2)(iv), the proposed language would remove the word “whether” at the beginning of this factor, as the word is extraneous. This technical change is not meant to change the meaning of the phrases to which the changes are made. In § 1001.801(c)(2)(iv), which currently reads, “Whether the individual or entity has a documented history of criminal, civil or administrative wrongdoing,” we propose to remove the words “Whether

the individual or” because this authority only applies to entities.

Second, we propose to remove the second aggravating factor discussed above (whether the individual or entity has been convicted of other offenses besides those that formed the basis for the exclusion) found in §§ 1001.201(b)(2)(vi), 1001.301(b)(2)(vi), and 1001.401(c)(2)(v) as duplicative of the proposed aggravating factor in §§ 1001.201(b)(2)(v), 1001.301(b)(2)(v), and 1001.401(c)(2)(iv), described in the preceding paragraph. A conviction for other offenses besides those that formed the basis for the exclusion would be included in the proposed aggravating factor for other documented instances of criminal, civil, or administrative wrongdoing.

We also propose to remove the aggravating factor relating to “any other adverse action” in §§ 1001.201(b)(2)(vii), 1001.301(b)(2)(vii), 1001.401(c)(2)(vi), 1001.701(d)(2)(v), 1001.801(c)(2)(v), 1001.901(b)(4), and 1001.951(b)(iv) because it would be unnecessary. Adverse actions by Federal, State, or local government agencies and boards would be included in other documented instances of administrative wrongdoing under the proposed changes to §§ 1001.201(b)(2)(v), 1001.301(b)(2)(v), 1001.401(c)(2)(iv), 1001.701(d)(2)(iii), 1001.801(c)(2)(iv), 1001.901(b)(3), 1001.951(b)(1)(iii), 1001.1101(b)(3), 1001.1201(b)(4), 1001.1301(b)(2)(iv), 1001.1552(d)(3), 1001.1601(b)(1)(iv), and 1001.1701(c)(1)(v). We propose technical changes renumbering § 1001.901(b)(5) to § 1001.901(b)(4) and technical changes to the other sections to account for the deletions described above.

Effect on Civil and Administrative Investigations

The exclusion authority in section 1128(b)(2) of the Act and in § 1001.301, in part, allows OIG to exclude for convictions for obstruction of or interference with investigations related to the use of funds received from the Federal health care programs. We propose to remove the aggravating factors at § 1001.301(b)(2)(i) (the interference or obstruction caused the expenditure of significant additional time and resources) and § 1001.301(b)(2)(iii) (the interference or obstruction also affected a civil or administrative investigation). We propose removing § 1001.301(b)(2)(i) because in our experience the subjectivity of the language makes it challenging to apply consistently. We propose removing § 1001.301(b)(2)(iii) because it is OIG’s position that this

exclusion authority already includes administrative and civil investigations in the scope of the term “investigations.” We are concerned that including a separate aggravating factor at § 1001.301(b)(2)(iii) where the interference or obstruction affected a civil or administrative investigation could be misconstrued as suggesting that the exclusion authority does not include civil and administrative investigations. Also, the application of this factor in matters where the obstruction or interference occurred in a civil or administrative investigation would be duplicative of the statutory basis for exclusions under section 1128(b)(2) of the Act. To avoid confusion, we propose to remove this aggravating factor. Lastly, we propose to renumber the aggravating factors consistent with the proposed changes described above.

Nature of Violations, Length of Scheme, and Impact on Beneficiaries

We propose to modify the aggravating factor at § 1001.701(d)(2)(i) for exclusions related to excessive claims or furnishing of unnecessary or substandard care. The aggravating factor currently reads “the violations were serious in nature, and occurred over a period of one year or more.” We propose to replace the phrase “violations were serious in nature, and” with “conduct.” The severity of the conduct is considered under the impact on beneficiaries aggravating factor at § 1001.701(d)(2)(ii) (“the violations had a significant adverse physical, mental or financial impact on program beneficiaries or other individuals”) and does not also need to be separately considered under the length of scheme factor at § 1001.701(d)(2)(i). We also propose to modify the aggravating factor at § 1001.701(d)(2)(ii), by replacing the word “violations” with “conduct.”

Finally, we propose to modify the aggravating factor at § 1001.701(d)(2)(iv), which currently reads, “The violation resulted in financial loss to Medicare, Medicaid, or any other Federal health care program of \$15,000 or more” to change “violation” to “conduct,” to increase the amount of financial loss from \$15,000 to \$50,000, and to change “Medicare, Medicaid, or any other Federal health care program” to “any Federal health care program” as described above.

The use of the word “conduct” in this section reflects that § 1001.701 contemplates behavior that may not be easily characterized as a set of identifiable violations or acts, such as the provision of health care that, over time or in one instance, may be of a

quality that fails to meet professionally recognized standards of health care. Also, the change in the financial loss amount makes this section consistent with §§ 1001.102(b)(1), 1001.201(b)(2)(i), and 1001.301(b)(2)(viii) (proposed to become § 1001.301(b)(2)(i)) and reflects that the passage of time and inflation have increased the average amount of financial loss to the Federal health care programs in fraud schemes.

Serious Adverse Effect

We propose technical changes to § 1001.801(c)(2)(iii), for exclusions relating to the failure of health maintenance organizations to furnish medically necessary care. For § 1001.801(c)(2)(iii), which currently reads, “The entity’s failure to provide a necessary item or service that had or could have had a serious adverse effect,” we propose to remove “that” after “service” as an unnecessary word that causes the language to be confusing and grammatically incorrect (and therefore difficult to apply). The revised language would read: “The entity’s failure to provide a necessary item or service had or could have had a serious adverse effect.”

Mitigating Factors

When OIG is determining the length of exclusion for a mandatory exclusion with a minimum exclusion period of 5 years, if any of the aggravating factors described in the regulations are present and result in a period of exclusion longer than 5 years, OIG may consider the mitigating factors specified in the regulations as a basis for reducing the period of exclusion to no less than 5 years. For exclusions imposed under the permissive authorities with a baseline period of 3 years (§§ 1001.201, 1001.301, and 1001.401) the presence of any of the mitigating factors specified in the regulations may provide a basis for shortening the period of exclusion. Proposed changes to some of these mitigating factors are described below.

We propose to remove §§ 1001.102(c)(1) and 1001.201(b)(3)(i), which are mitigating factors for situations in which a person was convicted of three or fewer misdemeanors and caused less than \$5,000 of loss. First, in our experience, this factor is very rarely present in mandatory exclusion cases that present aggravating factors warranting an exclusion period longer than the minimum period of 5 years. Second, we question whether it is appropriate to shorten an exclusion for conduct involving patient harm, a criminal scheme that extended beyond 1 year, an

individual or entity with a record of additional sanctions, or conduct that warranted incarceration, simply because the person was convicted of three or fewer misdemeanors. Third, in the case of permissive exclusions under § 1001.201 we believe this factor should be considered by OIG in determining whether a permissive exclusion should be imposed, but not whether to reduce the length of exclusion.

Reduced Culpability

Sections 1001.102(c)(2), 1001.201(b)(3)(ii), and 1001.301(b)(3)(i) describe a mitigating factor that considers whether the record in the criminal proceedings, including sentencing documents, demonstrates that the court determined that the individual had a mental, emotional, or physical condition before or during the commission of the offense that reduced the individual’s culpability.

We propose to revise §§ 1001.102(c)(2), 1001.201(b)(3)(ii), and 1001.301(b)(3)(i) to remove the phrase “including sentencing documents” because those documents are clearly part of the record in the criminal proceedings. We also propose to delete the phrase “mental, emotional or physical” prior to “condition” to allow OIG to consider any condition that a court determines to have reduced an individual’s culpability. We also propose to renumber the remaining paragraphs accordingly.

Addition of Mitigating Factor to § 1001.401

In § 1001.401(c)(3), we propose to add a mitigating factor relating to whether a court determined that the excluded individual had a condition that reduced their culpability for the underlying criminal offense. Section 1001.401 permits OIG to exclude individuals or entities convicted of misdemeanors related to controlled substances, while § 1001.101(d) mandates OIG exclude individuals and entities for felonies related to controlled substances. The mandatory authority permits consideration of a mitigating factor relating to whether a court determined that the excluded individual had a condition that reduced their culpability for the underlying criminal offense (currently § 1001.102(c)(2)). We propose adding the same factor to § 1001.401 because we believe it is appropriate to consider the same mitigating circumstances under the permissive authority and the mandatory authority.

Cooperation

Sections 1001.102(c)(3), 1001.201(b)(3)(iii), 1001.301(b)(3)(ii),

and 1001.401(c)(3) include a mitigating factor that reads as follows: “The individual’s or entity’s cooperation with Federal or State officials resulted in— (A) Others being convicted or excluded from Medicare, Medicaid, and all other Federal health care programs, (B) Additional cases being investigated or reports being issued by the appropriate law enforcement agency identifying program vulnerabilities or weaknesses, or (C) The imposition of a civil money penalty against others.” We propose to revise §§ 1001.102(c)(3), 1001.201(b)(3)(iii), 1001.301(b)(3)(ii), and 1001.401(c)(3) to allow the mitigating factor of cooperation to be demonstrated based on the record in the criminal proceedings or a written statement by a government official that demonstrates that the individual’s or entity’s cooperation resulted in other individuals or entities being excluded, indicted, or otherwise charged, convicted, or investigated. Under the proposed language, the application of the cooperation mitigating factor would be based on documentation provided by an official involved in the underlying criminal proceedings rather than OIG’s later independent assessment of the criminal proceedings. In OIG’s experience, it is not always possible to obtain court records relating to cooperation because they may be sealed or otherwise unavailable at the time the exclusion is processed. In addition, the proposed language would broaden the first criteria for cooperation (*i.e.*, the cooperation resulted in others being convicted or excluded) to include circumstances in which others have been indicted or otherwise charged or investigated. In OIG’s experience, subjects have not relied on reports being issued by law enforcement agencies identifying program vulnerabilities or weaknesses, or civil monetary penalties being imposed against other individuals or entities as a basis to demonstrate cooperation, so we are proposing to remove those criteria.

Alternative Sources of Health Care Items and Services Mitigating Factor

We propose to delete §§ 1001.201(b)(3)(iv) and 1001.301(b)(3)(iii), a mitigating factor applicable to exclusions related to misdemeanor convictions for health care fraud and convictions for obstruction. The factor allows OIG to consider whether alternative sources of the type of health care items or services furnished by the individual or entity are not available. We propose to remove this factor from these two sections because we believe this factor should be considered by OIG in determining

whether a permissive exclusion should be imposed and whether a waiver is appropriate but does not relate to the length of exclusion. Therefore, we propose removing this mitigating factor.

Few Violations Over a Short Period of Time Mitigating Factor

We propose to modify § 1001.701(d)(3), which currently reads: “Only the following factor may be considered mitigating and a basis for reducing the period of exclusion: Whether there were few violations and they occurred over a short period of time,” to read as follows: “Only the following factor may be considered mitigating and a basis for reducing the period of exclusion: Whether there were few occurrences of the conduct, and the conduct occurred over a short period of time.” This change makes this section consistent with the changes from “violations” to “conduct” in § 1001.701(d)(2) discussed above.

Other Changes to § 1001.102 (Length of Exclusion)

Section 1001.102(d) describes the requirement, added by HIPAA, that OIG impose exclusions for at least 10 years or permanently in certain situations involving multiple criminal convictions. We propose to modify § 1001.102(d) to remove the reference to August 5, 1997, in the flush language, as unnecessary because virtually all criminal offenses before August 5, 1997, are now time-barred from prosecution.

We propose a technical modification to § 1001.102(d)(1) and (2) to replace “effected” with “imposed” for consistency with § 1001.102(a), which references exclusions being imposed. The revision is not intended to change the meaning of § 1001.102(d)(1) and (2). In § 1001.102(d)(1), we propose to revise the parenthetical language (which allows OIG to lengthen exclusions beyond 10 years if aggravating and mitigating factors are present) to remove the reference to mitigating factors because only aggravating factors can be used to impose a period of more than 10 years.

Section 1001.401 Conviction Relating to Controlled Substances

We propose removing § 1001.401(b), which states “the definition of controlled substance will be the definition that applies to the law forming the basis for the conviction,” because it is unnecessary. This definition is already incorporated into § 1001.401(a) by the phrase “as defined under Federal or State law.” In other words, the definition of controlled substance will be based on the Federal

or State law under which the individual or entity is convicted. We also propose corresponding technical changes renumbering § 1001.401(c) to § 1001.401(b).

Section 1001.501 Exclusions Based on the Loss or Suspension of a Health Care License

We propose removing the aggravating factors outlined in § 1001.501(b)(2), which permit OIG to lengthen periods of exclusion based on the loss of the individual’s or entity’s health care license, and the mitigating factors outlined in § 1001.501(b)(3), which could be considered by OIG if aggravating factors are applied. Because exclusions under section 1128(b)(4) of the Act are derivative of a licensing board action, OIG generally imposes exclusions under this section for the same period of time as that of the licensing board’s action. As a result, an individual is generally eligible for reinstatement once they regain the health care license on which the exclusion is based. Our proposed removal of these aggravating and mitigating factors would make the regulations consistent with OIG’s general practice of imposing exclusions under this section that are the same length as the licensing board actions. We propose corresponding technical changes by renumbering § 1001.501(b)(4) to § 1001.501(b)(2) and modifying the flush language at § 1001.501(b)(1) to remove language referring to § 1001.501(b)(2).

We are also proposing adding the word “surrendered” to § 1001.501(b)(1) so that this section addresses all the bases upon which an exclusion may be imposed under this section, which includes when an individual’s or entity’s license is revoked, suspended, surrendered, or otherwise lost. See section 1128(b)(4)(B) of the Act.

We also propose changes to § 1001.501(c). In 2017, OIG published a Final Rule implementing a process that allows individuals and entities excluded under section 1128(b)(4) of the Act to request reinstatement before regaining the license that was lost and on which the exclusion is based (referred to as “early reinstatement”) under two sets of circumstances. 82 FR 4100, 4105 (Jan. 12, 2017). We propose modifications to both sets of circumstances.

First, under § 1001.501(c)(1), an individual or entity excluded under § 1001.501 can apply for reinstatement if, after fully and accurately disclosing the circumstances surrounding the original license action that formed the basis for the exclusion, the individual or

entity obtained a health care license in another State or a different health care license in the same State, or was allowed to retain a health care license in another State or a different health care license in the same State. We discuss proposed changes to this section below.

Second, under § 1001.501(c)(2), a person excluded under this section could request early reinstatement if they did not have a valid license to provide health care of any kind, based on OIG’s consideration of several factors outlined in the regulation. One of these factors is the length of time the person has been excluded. The regulation states that OIG will apply a presumption against early reinstatement if the individual or entity has been excluded for less than 3 years and, if the revocation or suspension on which the exclusion was based was for a set period of longer than 3 years, the presumption against reinstatement would be coterminous with the period set by the licensing board.

We propose modifying § 1001.501(c)(2)(i) to state that, rather than applying a presumption against early reinstatement for persons who are excluded less than 3 years, OIG will not consider a request for early reinstatement submitted by an individual or entity if such individual or entity has been excluded for less than 3 years. We think this change is appropriate because the statute provides a 3-year baseline period in certain other permissive exclusion authorities (§§ 1001.201, 1001.301, and 1001.401). The proposal would further modify the language in the second clause of the second sentence of § 1001.501(c)(2)(i). This clause of § 1001.501(c)(2)(i) states that if the action on which the exclusion is based is for a set period longer than 3 years, OIG will apply a presumption against early reinstatement “coterminous with the period set by the licensing board.” We propose to modify this language to state that when the action underlying the exclusion is for a set period longer than 3 years, OIG will not consider a request for early reinstatement at any time before the expiration of the period set by the licensing board. We believe this change is appropriate because the period of exclusion should be at least as long as the period of the underlying action.

At § 1001.501(c)(3), the early reinstatement regulation includes a bar to early reinstatement for individuals excluded under this section whose license revocation or suspension was for reasons related to patient abuse or neglect. We propose to modify this prohibition. In OIG’s experience, the bar has the unintended consequence of

creating a permanent period of exclusion for certain individuals and entities who have been excluded under § 1001.501 due to a license revocation or suspension related to patient abuse or neglect, unless that individual or entity has regained the original license. This *de facto* permanent bar to reinstatement creates an imbalance between mandatory and permissive exclusion because individuals and entities that have been convicted of an offense related to the neglect or abuse of a patient and excluded under section 1128(a)(2) of the Act are eligible to apply for reinstatement at the end of their period of exclusion, which may be the statutory minimum period of 5 years. OIG recognizes that the loss of a professional license for issues related to patient abuse or neglect is significant and the circumstances of the loss of such license in those instances should be taken into consideration in determining whether early reinstatement should be granted. Therefore, we propose to modify § 1001.501(c)(1)(i) and (ii) such that, in reviewing requests for early reinstatement, OIG will consider the circumstances that formed the basis for the exclusion, including whether such circumstances were related to patient abuse or neglect. In addition, we propose to modify this section to require that, in the case of a license revocation or suspension for reasons related to patient abuse or neglect, OIG will not consider a request for early reinstatement until the individual or entity has been excluded for at least 5 years for parity with those excluded for the statutory minimum period of 5 years for a conviction related to the neglect or abuse of a patient.

We also propose several clarifying changes throughout § 1001.501(c). These changes are not intended to change the meaning of § 1001.501 but are intended to make the language clearer based upon our experience implementing this section since 2017. We propose to add references to “entity” every time the word “individual” is used in § 1001.501 to clarify that, consistent with section 1128(b)(4) of the Act, entities as well as individuals are subject to exclusion under this section. In § 1001.501(c)(1)(iii), we propose replacing “Evidence that” with “Documentation from” to clarify that OIG expects documentation from the second licensing authority and not evidence from a proceeding with that authority. We also propose adding “indicating that it” after “second licensing authority” to clarify that the documentation must indicate that the

licensing authority knew of the circumstances surrounding the action that formed the basis for the exclusion. In § 1001.501(c)(1)(iv), we propose removing “satisfactorily” and adding “to OIG’s satisfaction” after “has demonstrated” to clarify that whether the individual or entity has resolved any underlying problem is in the opinion of OIG and not the excluded party. We propose a nearly identical change in § 1001.501(c)(2)(iii) for the same reason.

Section 1001.601 Exclusion or Suspension Under a Federal or State Health Care Program

We propose a technical change to § 1001.601(a)(1)(ii) to offset the phrase “for reasons bearing on the individual’s or entity’s professional competence, professional performance or financial integrity,” as it applies to both circumstances under § 1001.601(a)(1). As currently written, the phrase could be read to modify only § 1001.601(a)(1)(ii), referring to actions by State health care programs, but the statute clearly requires that this clause apply to all exclusions under section 1128(b)(5) of the Act.

We propose revising § 1001.601(a)(2) by replacing the phrase “is intended to cover” with “means” to clarify that “otherwise sanctioned” is limited to the definition provided (and does not include anything else). We also propose adding the phrase “or otherwise sanctioned” to § 1001.601(b)(1) for consistency with § 1001.601(a)(1) and section 1128(b)(5) of the Act, and changing the word “from” to “by” for grammatical accuracy.

We propose removing the aggravating and mitigating factors outlined in § 1001.601(b)(2) and (3), which permit OIG to lengthen periods of exclusion based on an individual’s or entity’s exclusion, suspension, or other sanction by a Federal or State health care program, so that all exclusions under this section would be coterminous with the period of time that the individual or entity is excluded, suspended, or otherwise sanctioned by the applicable Federal or State health care program. Because exclusions under section 1128(b)(5) of the Act are derivative of a Federal or State health care program action, OIG generally imposes exclusions under this section for the same period of time as the agency’s action. As a result, individuals and entities are generally eligible to apply for reinstatement once the individual or entity is allowed to resume participation in the Federal or State health care program under which the individual or entity was previously suspended, excluded, or sanctioned. Our proposed

removal of these aggravating and mitigating factors would make the regulations consistent with OIG’s general practice under this section and clarifies our intention. Due to the removal of § 1001.601(b)(2) and (3), we propose a technical change renumbering § 1001.601(b)(4) to § 1001.601(b)(2).

Section 1001.901 False or Improper Claims

In § 1001.901(b), we propose to change “will” to “may” to reflect OIG’s discretion to consider only the factors that are appropriate according to the facts and circumstances of each case and to reflect that not every factor will be present in every case.

Section 1001.951 Fraud and Kickbacks and Other Prohibited Activities

We propose several changes to § 1001.951 to align the factors with those found in the proposed revisions to § 1001.901. These two sections should align because both authorities are based on section 1128(b)(7) of the Act and require OIG to affirmatively prove fraud, kickbacks, or other prohibited activities. Because neither authority is derivative of other actions taken by adjudicative bodies, aligning the factors for determining length of exclusions under § 1001.951 with the factors under § 1001.901 would create parity and provide OIG discretion to consider relevant facts and circumstances under both authorities that are not derivative of the actions of other courts or adjudicative bodies, as is appropriate for derivative exclusions.

Specifically, to align §§ 1001.951 and 1001.901, we are proposing a series of revisions and technical changes, which collectively will result in both authorities having the same factors for determining length of exclusion, as follows. We propose to remove the numbering for § 1001.951(b)(1) to make it flush language and to revise the language to mirror the proposed language in proposed § 1001.901(b) by changing “will” to “may.” We propose to modify the numbering of the factors to change the factor at § 1001.951(b)(1)(i) to § 1001.951(b)(1) and to modify the language to mirror § 1001.901(b)(1). The proposed language would read: “The nature and circumstances surrounding the actions that are the basis for liability, including the period of time over which the acts occurred, the number of acts, whether there is evidence of a pattern and the amount claimed.”

We propose to delete the factor at § 1001.951(b)(1)(ii), which is not a factor in § 1001.901(b). We propose to add a factor at new § 1001.951(b)(2), “the

degree of culpability,” which appears at § 1001.901(b)(2). We propose to change the numbering of § 1001.951(b)(1)(iii) (related to other documented instances of wrongdoing) to § 1001.951(b)(3) and modify its language consistent with proposed § 1001.901(b)(3) and the other places this language appears in part 1001 as described above. We propose to add new § 1001.951(b)(4), “Other matters as justice may require,” consistent with the proposed § 1001.901(b)(4). We further propose to remove the factors at § 1001.951(b)(1)(iv) and (v) and remove the mitigating factors at § 1001.951(b)(2) to align § 1001.951 with § 1001.901. Removal of mitigating factors under this section is appropriate because the factors proposed for § 1001.951 allow OIG to consider all the relevant facts and circumstances, aggravating and mitigating, in setting lengths of exclusion under this section.

Section 1001.1301 Failure To Grant Immediate Access

This section provides OIG with the authority to exclude individuals and entities that fail to grant immediate access to, among others, OIG or a State MFCU. Section 1001.1301(a)(2) currently defines a “failure to grant immediate access” for purposes of paragraphs (a)(1)(i) and (ii) of this section (applying to requests for immediate access by the Secretary or a State survey agency) as “the failure to grant access at the time of a reasonable request or to provide a compelling reason why access may not be granted.” The regulation does not explain what circumstance would constitute “a compelling reason.”

We propose to revise the definition of “failure to grant immediate access” in § 1001.1301(a)(2) to specify what would constitute “a compelling reason,” namely, that the requested material does not exist or is not at the location where the request is presented. The proposed language is consistent with OIG’s general practice in evaluating immediate access requests.

Section 1001.1301(a)(3) provides a separate definition of “failure to grant immediate access” for purposes of paragraphs (a)(1)(iii) and (iv) of the section (applying to requests for immediate access by OIG and State MFCUs) as “(i) The failure to produce or make available for inspection and copying the requested material upon reasonable request, or to provide a compelling reason why they cannot be produced, within 24 hours of such request, except when the OIG or State Medicaid Fraud Control Unit (MFCU) reasonably believes that the requested

material is about to be altered or destroyed, or (ii) When the OIG or MFCU has reason to believe that the requested material is about to be altered or destroyed, the failure to provide access to the requested material at the time the request is made.” We propose to revise this section so that the definition of “failure to grant immediate access” for purposes of § 1001.1301(a)(1)(iii) and (iv) is consistent with the proposed definition of “failure to grant immediate access” for purposes of § 1001.1301(a)(1)(i) and (ii). The impact of this change would be that all immediate access requests will require production of materials at the time the request is made unless the records do not exist or are in a different location and would eliminate the analysis of whether records are about to be altered or destroyed. We believe this change is appropriate because it is consistent with the common meaning of “immediate” as requiring something instantly or without delay, and it removes the burden from the requesting agency to determine whether records may be altered or destroyed in the intervening 24 hours, which may be impossible to know.

Section 1001.1501 Default of Health Education Loan or Scholarship Obligations

Section 1128(b)(14) of the Act, which authorizes OIG to exclude individuals who default on repayments of health education loan or scholarship obligations, or the obligations of any loan repayment program, requires OIG to take into account “access of beneficiaries to physician services for which payment may be made under title XVIII or XIX.”¹ Section 1001.1501(a)(3) of the regulations expands this requirement to access to physicians’ services for which payment may be made under Medicare, Medicaid, or other Federal health care programs, expanding OIG’s obligations beyond Medicare and Medicaid. As a result, we propose modifying § 1001.1501(a)(3) to limit the requirement in this section to the Medicare and Medicaid programs, consistent with section 1128(b)(14) of

¹ Section 1128(b)(14) has been used by OIG to exclude borrowers that have defaulted on loans from the Health Education Assistance Loan (HEAL) Program. The HEAL program is a program of Federal insurance of educational loans that were made to graduate students in the fields of medicine, osteopathic medicine, dentistry, veterinary medicine, optometry, podiatric medicine, pharmacy, public health, chiropractic, health administration, and clinical psychology. See 34 CFR 681.1. Authorization to fund new HEAL loans expired September 30, 1998. 82 FR 53374 (Nov. 15, 2017). A list of borrowers currently in default can be found at 86 FR 54950 (Oct. 5, 2021).

the Act. We propose a technical modification to § 1001.1501(a)(3) to replace “physicians’ services” with “physician services” for consistency with section 1128(b)(14) of the Act. The revision is not intended to change the meaning of § 1001.1501(a)(3).

Next, § 1001.1501(b) indicates that an individual excluded under this section will remain excluded until OIG receives notice that the individual has cured the payment default that provided the basis for the exclusion, at which time OIG notifies the individual that the individual is eligible to apply for reinstatement. However, it has been OIG’s longstanding practice to allow individuals excluded under this section to participate in the Federal health care programs prior to their health education loan or scholarship obligation being completely repaid if such individual has entered into a repayment agreement with the administrator of the health education loan, scholarship, or loan repayment program following an initial payment default. We propose modifying § 1001.1501(b) so that an individual who has entered into such repayment agreements would be eligible to obtain a “stay” of their exclusion for as long as the individual remains in compliance with the terms of the agreement. While this “stay” is in place, the individual would be eligible to participate in the Federal health care programs. However, if OIG receives notice from the administrator of the health education loan, scholarship, or loan repayment program that the individual is no longer in compliance with the repayment agreement, the “stay” would be lifted and the exclusion would be given full effect. This proposed change would make the regulations consistent with OIG’s current practice.

Section 1001.1551 Exclusion of Individuals With Ownership or Control Interest in Sanctioned Entities

We propose modifying § 1001.1551(b)(2) to change “Medicare, Medicaid and all other Federal health care programs” to “Medicare or a State health care program” and to remove the phrase “terminated or” for consistency with the language of section 1128(b)(15), which does not reference all Federal health care programs or use the word “terminated.”

We also propose modifying § 1001.1551(c)(1) to clarify that the length of the individual’s term of exclusion will be the same as that of the sanctioned entity, regardless of whether the individual terminates their relationship with the sanctioned entity after they have been excluded. For example, if Entity A is excluded by OIG

for a period of 5 years and Person A (who has an ownership interest in Entity A) is excluded by OIG under section 1128(b)(15) of the Act 6 months later, the term of Person A's exclusion will be for 5 years, starting from the effective date of Person A's exclusion. Also, Person A will remain excluded for the entire 5-year term even if Person A divests their ownership interest in Entity A at any point during the 5-year term of Person A's exclusion. It would be inequitable for an individual with knowledge of the conduct that resulted in an entity being excluded by OIG and who had an ownership interest in the entity at the time the conduct occurred to be able to avoid exclusion by divesting their interest after the entity's term of exclusion is imposed.

Section 1001.1553 Establishment of a New Permissive Exclusion Authority

Section 6(d) of MSIAA granted a new permissive exclusion authority to the Secretary under Section 1128(b) of the Act. Under the newly enacted section 1128(b)(17) of the Act, the Secretary may exclude any manufacturer or an officer, director, agent, or managing employee of such manufacturer that knowingly misclassifies a covered outpatient drug under an agreement under section 1927 of the Act, knowingly fails to correct such misclassification, or knowingly provides false information related to drug pricing, drug product information, or data related to drug pricing or drug product information. Accordingly, we propose adding a new § 1001.1553 entitled "Knowingly misclassifying covered outpatient drugs." Under this proposal, OIG would have the authority to exclude any manufacturer (as defined in section 1927 of the Act) or an officer, director, agent, or managing employee of such manufacturer that knowingly misclassifies a covered outpatient drug, knowingly fails to correct such misclassification, or knowingly provides false information to HHS related to drug pricing, drug product information, or data related to drug pricing or drug product information. This exclusion authority applies to covered outpatient drugs supplied by manufacturers under agreements under section 1927 of the Act in effect on or after April 18, 2019. The definitions proposed for § 1000.10 would apply to the terms "agent," "managing employee," and "knowingly."

Under this proposal, we would determine the length of exclusion based on five factors consistent with OIG's other non-derivative exclusion authorities in §§ 1001.901 and 1001.951: the nature and circumstances

surrounding the actions that are the basis for liability, including the period of time over which the acts occurred, the number of acts, whether there is evidence of a pattern, and the amount claimed; the degree of culpability; whether the entity has other documented instances of criminal, civil, or administrative wrongdoing; or other matters as justice may require. Because this authority requires OIG to prove that the manufacturer knowingly misclassified a drug or made false statements and is not derivative of actions taken by other adjudicative bodies, we believe it is appropriate to apply the same factors to this authority that apply to §§ 1001.901 and 1001.951, which are also non-derivative authorities.

Section 1001.1801 Waivers of Exclusions

We propose deleting the cross-reference to the statutory definition of Federal health care program in § 1001.1801(a) as unnecessary because the term "Federal health care program" is defined in § 1000.10. We also propose revising § 1001.1801(d), which currently states that "if the basis for the waiver ceases to exist, the waiver will be rescinded, and the individual or entity will be excluded for the period remaining on the exclusion, measured from the time the exclusion would have been imposed if the waiver had not been granted," to state: "If the basis for the waiver ceases to exist, the waiver will be rescinded." The existing reference to "the time the exclusion would have been imposed if the waiver had not been granted" implies that the waiver stops the exclusion from being imposed; however, exclusions typically are imposed prior to a waiver being put in place. We do not intend for the proposal to change the current meaning of the original provision, which is: If the basis for a waiver ceases to exist, the waiver will be rescinded, and the existing exclusion will then be in effect.

Section 1001.1901 Scope and Effect of Exclusion

At the end of § 1001.1901(a), we propose to correct a cross-reference to the definition of "Federal health care programs" from § 1001.2 to § 1000.10 because the definition does not appear in § 1001.2. We also propose inserting the phrase "Federal health care" prior to the word "program" and "programs" in § 1001.1901(b)(2) and (4), respectively, for clarity. Finally, we propose deleting the parenthetical in § 1001.1901(c)(3)(iii) because it refers to an exemption that was limited to the period between October 2, 1998, and

October 4, 1999, and therefore is no longer applicable. None of the proposed changes to § 1001.1901 are intended to change the meaning of the provisions of that section.

Section 1001.2001 Notice of Intent To Exclude

Under the current regulatory text in this section, OIG is only required to issue a notice of intent to exclude with respect to mandatory exclusions under section 1128(a) of the Act if the proposed period of exclusion is for longer than 5 years. We propose modifying § 1001.2001(a) to provide that OIG will issue a notice of intent to exclude for all mandatory and permissive exclusions, of any length, that are proposed under subpart B or C of part 1001. The notice of intent to exclude affords individuals and entities the opportunity to provide OIG with information related to the proposed exclusion before it goes into effect and, in our experience, the process allows OIG to impose exclusions after considering as much relevant information as possible. We therefore believe it should apply to all exclusions under subparts B and C of part 1001.

We also propose modifying this section to indicate that a notice of intent to exclude will be deemed to have been received 7 days after the date of the notice (instead of 5 days, as currently specified), based on changes in service standards and expected delivery times for First-Class Mail.

Sections 1001.2004 Through 1001.2006 Notice to State Agencies, State Licensing Agencies, and Others Regarding Exclusion

We propose to clarify that the notice to State Medicaid program agencies, State licensing authorities, and others required by §§ 1001.2004, 1001.2005, and 1001.2006 is made by OIG, not by HHS. In § 1001.2005(a), we propose to remove the words "from participation" and the parenthetical "(or directed to be excluded)," and to reword the sentence so that this section now reads as follows: "OIG will promptly notify the appropriate State(s) or local agencies or authorities having responsibility for the licensing or certification of an excluded individual or entity of the facts and circumstances of the exclusion." These changes are not intended to change the meaning of this section.

Section 1001.2006 currently provides that OIG will give notice of an exclusion and the effective date to the public, beneficiaries, and as appropriate to various agencies and entities specified in the regulation including: (1) any entity in which the excluded individual

is known to be serving as an employee, administrator, or operator, or in which the individual is serving in any other capacity and is receiving payment for providing services; (2) medical societies and other professional organizations; and (3) other Federal agencies or organizations, as appropriate. However, many of these notifications are not required by the statute and it is impractical for OIG to provide individual notice of each exclusion imposed by OIG to all the entities listed in § 1001.2006. Furthermore, OIG has made exclusion information available online since at least 1999. As a result, we propose to modify § 1001.2006(a) by stating that OIG will give notice of exclusions to the public, beneficiaries, and others via monthly online updates to the List of Excluded Individuals/Entities (commonly referred to as “the LEIE”), which reflects OIG’s longstanding practice.

Section 1001.2007 Appeal of Exclusions

We propose a few technical changes in § 1001.2007. First, in § 1001.2007(a)(1)(i) we propose to change the word “sanction” to “exclusion” for consistency with other parts of this section and because the only relevant actions under this section are exclusions. Second, we propose to replace the word “should” with “shall” in § 1001.2007(a)(3) to reflect that certain information must be included in the request for a hearing. For example, § 1005.2(d) requires a request for a hearing to contain certain information, and § 1005.2(e)(4) requires dismissal of a hearing request that fails to raise any issues which may be properly addressed in a hearing. Third, in § 1001.2007(b), we propose to add “the” before “notice of exclusion” and delete “such” before “a hearing.” Finally, in § 1001.2007(d) we propose to change “Government” to “government.” These changes are not intended to change the meaning of this section.

Sections 1001.3001 Through 1001.3002 Timing and Method of Request and Basis for Reinstatement

We propose making changes to §§ 1001.3001(a)(1) and 1001.3002(b)(5) to replace references to “program provider number” with “Federal health care program provider number” for clarity.

Section 1001.3003 Approval of Request for Reinstatement

We propose changes to § 1001.3003 to track the statutory language in section 1128(g) of the Act, which requires that notice of reinstatement be provided to

each appropriate State agency administering or supervising the administration of each State health care program and requires notice to the Attorney General in the case of exclusions under section 1128(a) of the Act to which section 304(a)(95) of the Controlled Substances Act may apply. We also are proposing to revise this section to state that OIG will notify the public and others through posting of reinstatement information on OIG’s website. We are proposing to limit the direct notice requirements for reinstatements to reduce the burden on OIG and to reflect OIG’s longstanding practice of providing general notice of all reinstatements through the posting of a monthly reinstatement file on OIG’s public website. Lastly, we are proposing to modify § 1001.3003(b) to clarify that a reinstatement by OIG does not require any other Federal health care program to reinstate such individual or entity into that program if the program has taken an action against the individual or entity under its own authority. This proposal is intended to clarify the language of this section and is not intended to change the substance of the provision. The current language, which states that a reinstatement by OIG has no effect if a Federal health care program has imposed a longer period of exclusion under its own authorities, is imprecise and confusing because a reinstatement by OIG has effect independent of the actions of individual Federal health care programs.

Section 1001.3004 Denial of Request for Reinstatement

We propose several changes to § 1001.3004 to better reflect OIG’s current processes regarding denial of reinstatement appeal requests and to clarify for the public the process by which an individual or entity may appeal the denial of their request for reinstatement. We propose to modify § 1001.3004(a) to reflect a three-step process when a request for reinstatement is denied. First, OIG would send a written notice to the individual or entity notifying them that their request for reinstatement has been denied and the basis for the denial. Second, the individual or entity would then have 30 days from the date of the notice of the reinstatement denial to submit a written request to appeal the denial. Third, once the individual or entity has submitted a written appeal request, the individual would have 30 days from the date of the written request for appeal to submit: (1) any written argument or additional evidence the individual or entity has regarding the basis for the denial of reinstatement

identified in the denial notice, or (2) a written request to present oral argument or any additional evidence to an OIG official. The proposed language would provide requesters with an additional 30 days to submit the documentary evidence or the request for oral argument allowed under § 1001.3004(a).

We also propose to clarify § 1001.3004(b) to indicate that OIG will only issue a decision regarding a reinstatement denial if a written argument or additional evidence are submitted to OIG or any oral argument or additional evidence are presented to an OIG official. The current language may incorrectly suggest that a decision might be issued at the end of the 30-day appeal period even if no written or oral argument and additional evidence are submitted or presented regarding the denial of the request for reinstatement.

Section 1001.3005 Withdrawal of Exclusion for Reversed or Vacated Decisions

We propose a technical change to clarify § 1001.3005(b) by deleting the words “CMS and other” before Federal health care programs (because the Centers for Medicare & Medicaid Services (CMS) is not itself a Federal health care program but the agency that administers Medicare and Medicaid). Finally, we propose to change the word “exclusion” to “action” in § 1001.3004(d) to reflect the fact that all other Federal health care programs do not use the term “exclusion.”

VI. Regulatory Impact Statement

We have examined the impacts of this rulemaking as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), Executive Order 14094 entitled “Modernizing Regulatory Review” (April 6, 2023), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), and Executive Order 13132 on Federalism (August 4, 1999).

Executive Order Nos. 12866, 13563, and 14094

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and

equity). The Executive Order 14094 entitled “Modernizing Regulatory Review” (hereinafter, the Modernizing E.O.) amends section 3(f)(1) of Executive Order 12866 (Regulatory Planning and Review). A Regulatory Impact Analysis (RIA) must be prepared for significant rules with significant effects (\$200 million or more in any 1 year).

Based on our estimates, OMB’s Office of Information and Regulatory Affairs (OIRA) has determined this rulemaking is not significant per section 3(f)(1) as measured by the \$200 million or more in any given year. This is not a major rule as defined at 5 U.S.C. 804(2); it is not economically significant because it does not reach that economic threshold 1 year.

This proposed rule is designed to propose implementation of one, new statutory provision consisting of a new exclusion authority. It is also designed to clarify existing regulatory requirements. The vast majority of providers and the Federal health care programs would be minimally, if at all, impacted by these proposed revisions.

The proposed changes to the exclusion regulations would have little economic impact. On average per year, OIG excludes approximately 3,000 individuals and entities, defends 100 appeals of exclusions, and hears 2 reinstatement denial appeals. Historically, one waiver of exclusion has been requested and granted in any given year. Thus, we believe that any aggregate economic effect of the proposed modifications would be minimal and the likely aggregate economic effect of these proposed modifications to the regulations would be significantly less than the monetary thresholds under Executive Order 12866, as amended by Executive Order 14094, and 5 U.S.C. 804(2).

Regulatory Flexibility Act

The RFA and the Small Business Regulatory Enforcement and Fairness Act of 1996, which amended the RFA, require agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and government agencies. Providers are considered small entities by having revenues of less than \$8.0 million to \$41.5 million in any 1 year. For purposes of the RFA, most physicians and suppliers are considered small entities.

The aggregate economic impact of the exclusion provisions on small entities would be minimal. The rulemaking directly impacts small entities that may be excluded by clarifying how OIG determines exclusion lengths, waivers,

reinstatement, and affirmative exclusion. It also codifies exclusion authorities added to section 1128 of the Act by MSIAA, adding clarity for members of the health care community regarding the scope of OIG’s actions. Because the rulemaking adds transparency to OIG’s process and implements exclusion authorities designed to protect the Federal health care programs and their beneficiaries from untrustworthy individuals and entities, we believe any resulting impact will be positive for the health care community. In summary, this notice of proposed rulemaking will not have a significant impact on the operations of a substantial number of small providers and a regulatory flexibility analysis is not required for this rulemaking.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (UMRA) generally requires that each agency conduct a cost-benefit analysis, identify and consider a reasonable number of regulatory alternatives, and select the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule before promulgating any proposed or final rule that includes a Federal mandate that may result in expenditures of more than \$100 million (adjusted for inflation) in at least one year by State, local, and Tribal governments, or by the private sector. Each agency must also seek input from State, local, and Tribal governments. The current threshold after adjustment for inflation using the Implicit Price Deflator for the Gross Domestic Product is \$183 million, reported in 2023 dollars. This proposed rule, if finalized, would not result in an unfunded mandate in any year that meets or exceeds this amount.

Executive Order 13132

Executive Order 13132, Federalism, establishes certain requirements that an agency must meet when it promulgates a rule that imposes substantial direct requirements or costs on State and local governments, preempts State law, or otherwise has federalism implications. In reviewing this rulemaking under the threshold criteria of Executive Order 13132, we have determined that this proposed rule would not significantly affect the rights, roles, or responsibilities of State or local governments.

VII. Paperwork Reduction Act

These proposed changes impose no new information collection and recordkeeping requirements. Consequently, it need not be reviewed

by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995.

List of Subjects in 42 CFR Parts 1000 and 1001

Administrative practice and procedure, Fraud, Grant programs—health, Health facilities, Health professions, Maternal and child health, Medicaid, Medicare.

For the reasons stated in the preamble, OIG proposes to amend 42 CFR parts 1000 and 1001 as set forth below:

PART 1000—INTRODUCTION; GENERAL DEFINITIONS

- 1. The authority citation to part 1000 continues to read as follows:

Authority: 42 U.S.C. 1320 and 1395hh.

- 2. Revise and republish § 1000.10 to read as follows:

§ 1000.10 General definitions.

In this chapter, unless the context indicates otherwise—

Act means the Social Security Act, and titles referred to are titles of that Act.

Administrator means the Administrator, Centers for Medicare & Medicaid Services (CMS), formerly the Health Care Financing Administration (HCFA).

Agent means any person who has express or implied authority to obligate or act on behalf of an entity.

ALJ means an Administrative Law Judge.

Beneficiary means any individual eligible to have benefits paid to the beneficiary, or on the beneficiary’s behalf, under Medicare or any State health care program.

CFR stands for Code of Federal Regulations.

CMS stands for Centers for Medicare & Medicaid Services, formerly the Health Care Financing Administration (HCFA).

Department means the Department of Health and Human Services (HHS), formerly the Department of Health, Education, and Welfare.

Directly, as used in the definition of “furnished” in this section, means the provision or supply of items and services by individuals or entities (including items and services provided or supplied by them but manufactured, ordered, or prescribed by another individual or entity) who request or receive payment from Medicare, Medicaid, or other Federal health care programs.

ESRD stands for end-stage renal disease.

Exclusion means that items and services furnished, ordered, or prescribed by a specified individual or entity will not be reimbursed under Medicare, Medicaid, or any other Federal health care programs until the individual or entity is reinstated by OIG.

Federal health care program means any plan or program that provides health benefits, whether directly, through insurance, or otherwise, which is funded directly, in whole or in part, by the United States Government (other than the Federal Employees Health Benefits Program), or any State health care program as defined in this section.

FR stands for **Federal Register**.

Furnished refers to items or services provided or supplied, directly or indirectly, by any individual or entity.

HHS stands for the Department of Health and Human Services.

HHA stands for home health agency.

HMO stands for health maintenance organization.

ICF stands for intermediate care facility.

Indirect ownership interest includes an ownership interest through any other entity or entities that ultimately have an ownership interest in the entity at issue. (For example, an individual has a 10-percent ownership interest in the entity at issue if they have a 20-percent ownership interest in a corporation that wholly owns a subsidiary that is a 50-percent owner of the entity at issue.)

Indirectly, as used in the definition of “furnished” in this section, means the provision or supply of items and services manufactured, distributed, supplied, or otherwise provided by individuals or entities that do not directly request or receive payment from Medicare, Medicaid, or other Federal health care programs, but that provide items and services to providers, practitioners, or suppliers who request or receive payment from these programs for such items or services.

Inspector General means the Inspector General for the Department of Health and Human Services.

Knowingly means that a person, with respect to an act, has actual knowledge of the act, acts in deliberate ignorance of the act, or acts in reckless disregard of the act, and no proof of specific intent to defraud is required.

Managing employee means an individual (including a general manager, business manager, administrator, or director) who exercises operational or managerial control over the entity or part thereof or directly or indirectly conducts the day-to-day operations of the entity or part thereof.

Medicaid means medical assistance provided under a State plan approved under Title XIX of the Act.

Medicare means the health insurance program for the aged and disabled under Title XVIII of the Act.

OIG means the Office of Inspector General within HHS.

Ownership interest means an interest in:

- (1) The capital, the stock, or the profits of the entity; or
- (2) Any mortgage, deed of trust, note, or other obligation secured in whole or in part by the property or assets of the entity.

Patient means any individual who is receiving health care items or services, including any item or service provided to meet their physical, mental, or emotional needs or well-being (including a resident receiving care in a facility as described in part 483 of this chapter), whether or not reimbursed under any Federal health care program and regardless of the location in which such item or service is provided.

QIO means a quality improvement organization as that term is used in section 1152 of the Act (42 U.S.C. 1320c–1) and its implementing regulations.

Secretary means the Secretary of the Department or the Secretary’s designees.

SNF stands for skilled nursing facility.

Social Security benefits means monthly cash benefits payable under section 202 or 223 of the Act.

SSA stands for Social Security Administration.

State includes the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

State health care program means:

- (1) A State plan approved under title XIX of the Act (Medicaid);
- (2) Any program receiving funds under title V of the Act or from an allotment to a State under such title (Maternal and Child Health Services Block Grant program);
- (3) Any program receiving funds under subtitle A of title XX of the Act or from any allotment to a State under such subtitle (Block Grants to States for Social Services); or
- (4) A State child health plan approved under title XXI (Children’s Health Insurance Program).

United States means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands.

U.S.C. stands for United States Code.

PART 1001—PROGRAM INTEGRITY—THE FEDERAL HEALTH CARE PROGRAMS

■ 3. The authority citation to part 1001 continues to read as follows:

Authority: 42 U.S.C. 1302; 1320a–7; 1320a–7b; 1395u(j); 1395u(k); 1395w–104(e)(6); 1395y(d); 1395y(e); 1395cc(b)(2)(D), (E), and (F); 1395hh; 1842(j)(1)(D)(iv), 1842(k)(1), and sec. 2455, Pub. L. 103–355, 108 Stat. 3327 (31 U.S.C. 6101 note).

■ 4. Revise the heading to part 1001 as set forth above.

■ 5. Revise and republish subpart A, consisting of §§ 1001.1 and 1001.2 to read as follows:

Subpart A—General Provisions

§ 1001.1 Scope and purpose.

(a) The regulations in this part specify certain bases upon which individuals and entities may, or in some cases must, be excluded from participation in all Federal health care programs. They also state the effect of exclusion, the factors that will be considered in determining the length of any exclusion, the provisions governing notices of exclusions, and the process by which an excluded individual or entity may seek reinstatement into the programs.

(b) The regulations in this part are applicable to and binding on the Office of Inspector General (OIG) in imposing and proposing exclusions, as well as to Administrative Law Judges (ALJs), the Departmental Appeals Board, and Federal courts in reviewing the imposition of exclusions by OIG (and, where applicable, in imposing exclusions proposed by OIG).

§ 1001.2 Definitions.

For purposes of this part:

Convicted means that—

(1) A judgment of conviction has been entered against an individual or entity by a Federal, State, or local court, regardless of whether:

(i) There is a post-trial motion or an appeal pending; or

(ii) The judgment of conviction or other record relating to the criminal conduct has been expunged or otherwise removed;

(2) A Federal, State, or local court has made a finding of guilt against an individual or entity;

(3) A Federal, State, or local court has accepted a plea of guilty or nolo contendere by an individual or entity; or

(4) An individual or entity has entered into participation in a first offender, deferred adjudication, or other program or arrangement where judgment of conviction has been withheld.

HHS means Department of Health and Human Services.

Immediate family member means a person's husband or wife; natural or adoptive parent; child or sibling; stepparent, stepchild, stepbrother, or stepsister; father-, mother-, daughter-, son-, brother-, or sister-in-law; grandparent or grandchild; or spouse of a grandparent or grandchild.

Incarceration means imprisonment or any type of confinement with or without supervised release, including, but not limited to, community confinement, house arrest, and home detention.

Member of household means, with respect to a person, any individual with whom the person is sharing a common abode as part of a single-family unit, including domestic employees and others who live together as a family unit. A roomer or boarder is not considered a member of a household.

Ownership or control interest means, with respect to an entity, a person who:

(1) Has a direct or an indirect ownership interest (or any combination thereof) of 5 percent or more in the entity;

(2) Is the owner of a whole or part interest in any mortgage, deed of trust, note, or other obligation secured (in whole or in part) by the entity or any of the property assets thereof, if such interest is equal to or exceeds 5 percent of the total property and assets of the entity;

(3) Is an officer or a director of the entity;

(4) Is a partner in the entity if the entity is organized as a partnership;

(5) Is an agent of the entity; or

(6) Is a managing employee of the entity.

Professionally recognized standards of health care are statewide or national standards of care, whether in writing or not, that professional peers of the individual or entity whose provision of care is an issue, recognize as applying to those peers practicing or providing care within a State. When the Department has declared a treatment modality not to be safe and effective, practitioners who employ such a treatment modality will be deemed not to meet professionally recognized standards of health care. This definition will not be construed to mean that all other treatments meet professionally recognized standards.

Sole community physician means a physician who is the only physician who provides primary care services to Federal or State health care program beneficiaries within a defined service area.

Sole source of essential specialized services in the community means that an individual or entity—

(1) Is the only practitioner, supplier, or provider furnishing specialized services in an area designated by the Health Resources Services

Administration as a health professional shortage area for that medical specialty, as listed in 42 CFR part 5, appendices B through F;

(2) Is a sole community hospital, as defined in § 412.92 of this title; or

(3) Is the only source of specialized services in a reasonably defined service area where services by a non-specialist could not be substituted for the source without jeopardizing the health or safety of beneficiaries.

State Medicaid Fraud Control Unit means a unit certified by the Secretary as meeting the criteria of 42 U.S.C. 1396b(q) and § 1002.305 of this chapter. ■ 6. Revise and republish subpart B, consisting of §§ 1001.101 and 1001.102, to read as follows:

Subpart B—Mandatory Exclusions

§ 1001.101 Basis for liability.

OIG will exclude any individual or entity that—

(a) Has been convicted of a criminal offense related to the delivery of an item or service under Medicare or a State health care program, including the performance of management or administrative services relating to the delivery of items or services under any such program;

(b) Has been convicted, under Federal or State law, of a criminal offense related to the neglect or abuse of a patient, in connection with the delivery of a health care item or service, including any offense that OIG concludes entailed, or resulted in, neglect or abuse of patients (the delivery of a health care item or service includes the provision of any item or service to an individual to meet the individual's physical, mental, or emotional needs or well-being, whether or not reimbursed under a Federal health care program);

(c) Has been convicted, under Federal or State law, of a felony relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct—

(1) In connection with the delivery of a health care item or service, including the performance of management or administrative services relating to the delivery of such items or services; or

(2) With respect to any act or omission in a health care program (other than Medicare or a State health care program) operated or financed in whole or in part by any Federal, State, or local government agency; or

(d) Has been convicted, under Federal or State law, of a felony relating to the unlawful manufacture, distribution, prescription, or dispensing of a controlled substance, as defined under Federal or State law. This applies to any individual or entity that—

(1) Is, or has ever been, a health care practitioner, provider, or supplier, or furnished or furnishes items or services;

(2) Holds, or has held, a direct or an indirect ownership or control interest in an entity that furnished or furnishes items or services or is, or has ever been, an officer, director, agent, or managing employee of such an entity; or

(3) Is, or has ever been, employed in any capacity in the health care industry.

§ 1001.102 Length of exclusion.

(a) No exclusion imposed in accordance with § 1001.101 will be for less than 5 years.

(b) Any of the following factors may be considered to be aggravating and a basis for lengthening the period of exclusion—

(1) The acts resulting in the conviction, or similar acts, caused, or were intended to cause, a financial loss of \$50,000 or more to a government agency or program or to one or more other entities. (The entire amount of financial loss, including any amounts resulting from similar acts not adjudicated, will be considered regardless of whether full or partial restitution has been made.);

(2) The acts that resulted in the conviction, or similar acts, were committed over a period of 1 year or more;

(3) The acts that resulted in the conviction, or similar acts, had a significant adverse physical, mental, or financial impact on one or more program beneficiaries or other individuals;

(4) In convictions involving patient abuse or neglect, the acts that resulted in the conviction were premeditated, part of a continuing pattern of behavior, or consisted of non-consensual sexual acts;

(5) The sentence imposed by the court included incarceration; or

(6) The convicted individual or entity has other documented instances of criminal, civil, or administrative wrongdoing.

(c) Only if any of the aggravating factors set forth in paragraph (b) of this section justifies an exclusion longer than 5 years, may mitigating factors be considered as a basis for reducing the period of exclusion to no less than 5 years. Only the following factors may be considered mitigating—

(1) The record in the criminal proceedings demonstrates that the court

determined that the individual had a condition before or during the commission of the offense that reduced the individual's culpability; or

(2) The record in the criminal proceedings or a written statement by a government official demonstrates that the individual's or entity's cooperation with Federal or State officials resulted in other individuals or entities being excluded, indicted, or otherwise charged, convicted, or investigated.

(d) In the case of an exclusion under this subpart, an exclusion will be—

(1) For not less than 10 years if the individual has been convicted on one previous occasion of one or more offenses for which an exclusion may be imposed under section 1128(a) of the Act. (The aggravating factors in paragraph (b) of this section can be used to impose a period of time in excess of the 10-year minimum.); or

(2) Permanent if the individual has been convicted on two or more previous occasions of one or more offenses for which an exclusion may be imposed under section 1128(a) of the Act.

Subpart C—Permissive Exclusions

■ 7. Revise and republish §§ 1001.201 through 1001.951 to read as follows:

Sec.

1001.201 Conviction relating to program or health care fraud.

1001.301 Conviction relating to obstruction of an investigation or audit.

1001.401 Conviction relating to controlled substances.

1001.501 License revocation or suspension.

1001.601 Exclusion or suspension under a Federal or State health care program.

1001.701 Excessive claims or furnishing of unnecessary or substandard items and services.

1001.801 Failure of HMOs and CMPs to furnish medically necessary items and services.

1001.901 False or improper claims.

1001.951 Fraud and kickbacks and other prohibited activities.

* * * * *

§ 1001.201 Conviction relating to program or health care fraud.

(a) *Circumstance for exclusion.* OIG may exclude an individual or entity convicted under Federal or State law of—

(1) A misdemeanor relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct—

(i) In connection with the delivery of any health care item or service, including the performance of management or administrative services relating to the delivery of such items or services; or

(ii) With respect to any act or omission in a health care program, other than Medicare or a State health care program, operated or financed in whole or in part by any Federal, State, or local government agency; or

(2) Fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct with respect to any act or omission in a program, other than a health care program, operated or financed in whole or in part by any Federal, State, or local government agency.

(b) *Length of exclusion.* (1) An exclusion imposed in accordance with this section will be for a period of 3 years unless aggravating or mitigating factors listed in paragraphs (b)(2) and (3) of this section form a basis for lengthening or shortening that period.

(2) Any of the following factors may be considered to be aggravating and a basis for lengthening the period of exclusion—

(i) The acts resulting in the conviction, or similar acts, caused or reasonably could have been expected to cause a financial loss of \$50,000 or more to a government agency or program or to one or more other entities. (The entire amount of financial loss will be considered, including any amounts resulting from similar acts not adjudicated, regardless of whether full or partial restitution has been made.);

(ii) The acts that resulted in the conviction, or similar acts, were committed over a period of 1 year or more;

(iii) The acts that resulted in the conviction, or similar acts, had a significant adverse physical, mental, or financial impact on one or more program beneficiaries or other individuals;

(iv) The sentence imposed by the court included incarceration; or

(v) The individual or entity has other documented instances of criminal, civil, or administrative wrongdoing.

(3) Only the following factors may be considered as mitigating and a basis for reducing the period of exclusion—

(i) The record in the criminal proceedings demonstrates that the court determined that the individual had a condition, before or during the commission of the offense, that reduced the individual's culpability; or

(ii) The record in the criminal proceedings or a written statement by a government official demonstrates that the individual's or entity's cooperation with Federal or State officials resulted in other individuals or entities being excluded, indicted, or otherwise charged, convicted, or investigated.

§ 1001.301 Conviction relating to obstruction of an investigation or audit.

(a) *Circumstance for exclusion.* OIG may exclude an individual or entity that has been convicted, under Federal or State law, in connection with the interference with or obstruction of any investigation or audit related to—

(1) Any offense described in

§ 1001.101 or § 1001.201; or

(2) The use of funds received, directly or indirectly, from any Federal health care program.

(b) *Length of exclusion.* (1) An exclusion imposed in accordance with this section will be for a period of 3 years, unless aggravating or mitigating factors listed in paragraphs (b)(2) and (3) of this section form the basis for lengthening or shortening that period.

(2) Any of the following factors may be considered to be aggravating and a basis for lengthening the period of exclusion—

(i) The acts resulting in the conviction, or similar acts, caused, or reasonably could have been expected to cause a financial loss of \$50,000 or more to a government agency or program or to one or more other entities. (The entire amount of financial loss will be considered, including any amounts resulting from similar acts not adjudicated, regardless of whether full or partial restitution has been made.);

(ii) The acts that resulted in the conviction had a significant adverse physical, mental, or financial impact on one or more program beneficiaries or other individuals;

(iii) The sentence imposed by the court included incarceration;

(iv) The individual or entity has other documented instances of criminal, civil, or administrative wrongdoing.

(3) Only the following factors may be considered as mitigating and a basis for reducing the period of exclusion—

(i) The record of the criminal proceedings demonstrates that the court determined that the individual had a condition, before or during the commission of the offense, that reduced the individual's culpability; or

(ii) The record in the criminal proceedings or a written statement by a government official demonstrates that the individual's or entity's cooperation with Federal or State officials resulted in other individuals or entities being excluded, indicted, or otherwise charged, convicted, or investigated.

§ 1001.401 Conviction relating to controlled substances.

(a) *Circumstance for exclusion.* OIG may exclude an individual or entity convicted under Federal or State law of a misdemeanor relating to the unlawful

manufacture, distribution, prescription, or dispensing of a controlled substance, as defined under Federal or State law. This section applies to any individual or entity that—

(1) Is, or has ever been, a health care practitioner, provider, or supplier, or furnished or furnishes items or services;

(2) Holds, or held, a direct or indirect ownership or control interest in an entity that furnished or furnishes items or services or is or has ever been an officer, director, agent, or managing employee of such an entity; or

(3) Is, or has ever been, employed in any capacity in the health care industry.

(b) *Length of exclusion.* (1) An exclusion imposed in accordance with this section will be for a period of 3 years, unless aggravating or mitigating factors listed in paragraphs (c)(2) and (3) of this section form a basis for lengthening or shortening that period.

(2) Any of the following factors may be considered to be aggravating and to be a basis for lengthening the period of exclusion—

(i) The acts that resulted in the conviction or similar acts were committed over a period of 1 year or more;

(ii) The acts that resulted in the conviction or similar acts had a significant adverse physical, mental, or financial impact on program beneficiaries or other individuals or a Federal health care program;

(iii) The sentence imposed by the court included incarceration; or

(iv) The individual or entity has other documented instances of criminal, civil, or administrative wrongdoing.

(3) Only the following factors may be considered to be mitigating and to be a basis for shortening the period of exclusion—

(i) The record of the criminal proceedings demonstrates that the court determined that the individual had a condition, before or during the commission of the offense, that reduced the individual's culpability; or

(ii) The record in the criminal proceedings or a written statement by a government official demonstrates that the individual's or entity's cooperation with Federal or State officials resulted in other individuals or entities being excluded, indicted, or otherwise charged, convicted, or investigated.

§ 1001.501 License revocation or suspension.

(a) *Circumstance for exclusion.* OIG may exclude an individual or entity that has—

(1) Had a license to provide health care revoked or suspended by any State licensing authority, or has otherwise

lost such a license (including the right to apply for or renew such a license), for reasons bearing on the individual's or entity's professional competence, professional performance, or financial integrity; or

(2) Has surrendered such a license while a formal disciplinary proceeding concerning the individual's or entity's professional competence, professional performance, or financial integrity was pending before a State licensing authority.

(b) *Length of exclusion.* (1) An exclusion imposed in accordance with this section will not be for a period of time less than the period during which an individual's or entity's license is revoked, suspended, or otherwise not in effect as a result of, or in connection with, a State licensing agency action.

(2) When an individual or entity has been excluded under this section, OIG will consider a request for reinstatement in accordance with § 1001.3001 if:

(i) The individual or entity obtains the license in the State where the license was originally revoked, suspended, surrendered, or otherwise lost; or

(ii) The individual meets the conditions for early reinstatement set forth in paragraph (c) of this section.

(c) *Consideration of early reinstatement.* (1) If an individual or entity that is excluded in accordance with this section fully and accurately discloses the circumstances surrounding the action that formed the basis for the exclusion to a licensing authority of a different State or to a different licensing authority in the same State and that licensing authority grants the individual or entity a new health care license or has decided to take no adverse action as to a currently held health care license, OIG will consider a request for early reinstatement. OIG will consider the following factors in determining whether a request for early reinstatement under this paragraph (c)(1) will be granted:

(i) The circumstances that formed the basis for the exclusion, including whether the circumstances were related to patient abuse or neglect;

(ii) Whether the second licensing authority is in a State that is not the individual's or entity's primary place of practice;

(iii) Documentation from the second licensing authority indicating that it was aware of the circumstances surrounding the action that formed the basis for the exclusion;

(iv) Whether the individual or entity has demonstrated that the individual or entity has satisfactorily resolved any underlying problem that caused or

contributed to the basis for the initial licensing action;

(v) The benefits to the Federal health care programs and program beneficiaries of early reinstatement;

(vi) The risks to the Federal health care programs and program beneficiaries of early reinstatement;

(vii) Any additional or pending license actions in any State;

(viii) Any ongoing investigations involving the individual or entity; and

(ix) All the factors set forth in § 1001.3002(b).

(2) If an exclusion has been imposed under this section and the individual or entity does not have a valid health care license of any kind in any State, that individual or entity may request OIG to consider whether the individual or entity may be eligible for early reinstatement. OIG will consider the following factors in determining whether a request for early reinstatement under this paragraph (c)(2) will be granted:

(i) The length of time the individual or entity has been excluded. OIG will not consider a request for early reinstatement under paragraph (c)(2) of this section if the individual or entity has been excluded for less than 3 years; however, if the action on which the exclusion is based was for a set period longer than 3 years, OIG will not consider a request for early reinstatement at any time prior to the expiration of the period set by the licensing board;

(ii) The circumstances that formed the basis for the exclusion, including whether the circumstances were related to patient abuse or neglect;

(iii) Whether the individual or entity has demonstrated that the individual or entity has satisfactorily resolved any underlying problem that caused or contributed to the basis for the initial licensing action;

(iv) The benefits to the Federal health care programs and program beneficiaries of early reinstatement;

(v) The risks to the Federal health care programs and program beneficiaries of early reinstatement;

(vi) Any additional or pending license actions in any State;

(vii) Any ongoing investigations involving the individual or entity; and

(viii) All the factors set forth in § 1001.3002(b).

(3) Notwithstanding paragraphs (c)(1) and (2) of this section, if an individual's or entity's license revocation or suspension was for reasons related to patient abuse or neglect, OIG will not consider an application for early reinstatement if the individual or entity has been excluded for less than 5 years.

(4) Except for § 1001.3002(a)(1)(i), all provisions of subpart F (§§ 1001.3001 through 1001.3005) apply to early reinstatements under this section.

§ 1001.601 Exclusion or suspension under a Federal or State health care program.

(a) *Circumstance for exclusion.* (1) OIG may exclude an individual or entity suspended or excluded from participation, or otherwise sanctioned, under—

(i) Any Federal program involving the provision of health care; or

(ii) A State health care program, for reasons bearing on the individual's or entity's professional competence, professional performance, or financial integrity.

(2) The term “or otherwise sanctioned” in paragraph (a)(1) of this section means all actions that limit the ability of a person to participate in the program at issue regardless of what such an action is called, and includes situations where an individual or entity voluntarily withdraws from a program to avoid a formal sanction.

(b) *Length of exclusion.* (1) An exclusion imposed in accordance with this section will not be for a period of time less than the period during which the individual or entity is excluded or suspended, or otherwise sanctioned, from a Federal or State health care program.

(2) If the individual or entity is eligible to apply for reinstatement in accordance with § 1001.3001, and the sole reason why the State or Federal health care program denied reinstatement to that program is the existing exclusion imposed by OIG as a result of the original State or Federal health care program action, OIG will consider a request for reinstatement.

§ 1001.701 Excessive claims or furnishing of unnecessary or substandard items and services.

(a) *Circumstance for exclusion.* OIG may exclude an individual or entity that has—

(1) Submitted, or caused to be submitted, bills or requests for payments under Medicare or any of the State health care programs containing charges or costs for items or services furnished that are substantially in excess of such individual's or entity's usual charges or costs for such items or services; or

(2) Furnished, or caused to be furnished, to patients (whether or not covered by Medicare or any of the State health care programs) any items or services substantially in excess of the patient's needs, or of a quality that fails to meet professionally recognized standards of health care.

(b) *Sources.* OIG's determination under paragraph (a)(2) of this section—that the items or services furnished were excessive or of unacceptable quality—will be made on the basis of information, including sanction reports, from the following sources:

(1) The QIO for the area served by the individual or entity;

(2) State or local licensing or certification authorities;

(3) Fiscal agents or contractors, or private insurance companies;

(4) State or local professional societies; or

(5) Any other sources deemed appropriate by OIG.

(c) *Exceptions.* An individual or entity will not be excluded for—

(1) Submitting, or causing to be submitted, bills or requests for payment that contain charges or costs substantially in excess of usual charges or costs when such charges or costs are due to unusual circumstances or medical complications requiring additional time, effort, expense or other good cause; or

(2) Furnishing, or causing to be furnished, items or services in excess of the needs of patients, when the items or services were ordered by a physician or other authorized individual, and the individual or entity furnishing the items or services was not in a position to determine medical necessity or to refuse to comply with the order of the physician or other authorized individual.

(d) *Length of exclusion.* (1) An exclusion imposed in accordance with this section will be for a period of 3 years, unless aggravating or mitigating factors set forth in paragraphs (d)(2) and (3) of this section form a basis for lengthening or shortening the period. In no case may the period be shorter than 1 year for any exclusion taken in accordance with paragraph (a)(2) of this section.

(2) Any of the following factors may be considered aggravating and a basis for lengthening the period of exclusion—

(i) The conduct occurred over a period of 1 year or more;

(ii) The conduct had a significant adverse physical, mental, or financial impact on program beneficiaries or other individuals;

(iii) The individual or entity has other documented instances of criminal, civil, or administrative wrongdoing; or

(iv) The conduct resulted in financial loss to any Federal health care program of \$50,000 or more.

(3) Only the following factor may be considered mitigating and a basis for reducing the period of exclusion:

Whether there were few occurrences of the conduct, and the conduct occurred over a short period of time.

§ 1001.801 Failure of HMOs and CMPs to furnish medically necessary items and services.

(a) *Circumstances for exclusion.* OIG may exclude an entity—

(1) That is a—

(i) Health maintenance organization (HMO), as defined in section 1903(m) of the Act, providing items or services under a State Medicaid Plan;

(ii) Primary care case management system providing services, in accordance with a waiver approved under section 1915(b)(1) of the Act; or

(iii) HMO or competitive medical plan (CMP) providing items or services in accordance with a risk-sharing contract under section 1876 of the Act;

(2) That has failed substantially to provide medically necessary items and services that are required under a plan, waiver or contract described in paragraph (a)(1) of this section to be provided to individuals covered by such plan, waiver or contract; and

(3) Where such failure has adversely affected or has a substantial likelihood of adversely affecting covered individuals.

(b) *Sources.* OIG's determination under paragraph (a)(2) of this section—that the medically necessary items and services required under law or contract were not provided—will be made on the basis of information, including sanction reports, from the following sources:

(1) The QIO or other quality assurance organization under contract with a State Medicaid plan for the area served by the HMO or competitive medical plan;

(2) State or local licensing or certification authorities;

(3) Fiscal agents or contractors, or private insurance companies;

(4) State or local professional societies;

(5) CMS's HMO compliance office; or

(6) Any other sources deemed appropriate by OIG.

(c) *Length of exclusion.* (1) An exclusion imposed in accordance with this section will be for a period of 3 years, unless aggravating or mitigating factors set forth in paragraphs (c)(2) and (3) of this section form a basis for lengthening or shortening the period.

(2) Any of the following factors may be considered aggravating and a basis for lengthening the period of exclusion—

(i) The entity failed to provide a large number or a variety of items or services;

(ii) The failures occurred over a lengthy period of time;

(iii) The entity's failure to provide a necessary item or service had or could have had a serious adverse effect; or

(iv) The entity has other documented instances of criminal, civil, or administrative wrongdoing.

(3) Only the following factors may be considered as mitigating and a basis for reducing the period of exclusion—

(i) There were few violations and they occurred over a short period of time; or

(ii) The entity took corrective action upon learning of impermissible activities by an employee or contractor.

§ 1001.901 False or improper claims.

(a) *Circumstance for exclusion.* OIG may exclude any individual or entity that it determines has committed an act described in section 1128A of the Act. The imposition of a civil money penalty or assessment is not a prerequisite for an exclusion under this section.

(b) *Length of exclusion.* In determining the length of an exclusion imposed in accordance with this section, OIG will consider the following factors—

(1) The nature and circumstances surrounding the actions that are the basis for liability, including the period of time over which the acts occurred, the number of acts, whether there is evidence of a pattern, and the amount claimed;

(2) The degree of culpability;

(3) Whether the individual or entity has other documented instances of criminal, civil, or administrative wrongdoing (the absence of any such instances is to be considered neutral); or

(4) Other matters as justice may require.

(c) *Limitations.* OIG may not impose an exclusion under this section more than 10 years after the date when an act which is described in section 1128A of the Act occurred.

§ 1001.951 Fraud and kickbacks and other prohibited activities.

(a) *Circumstance for exclusion.* (1) Except as provided for in paragraph (a)(2)(ii) of this section, OIG may exclude any individual or entity that it determines has committed an act described in section 1128B(b) of the Act.

(2) With respect to acts described in section 1128B of the Act, OIG—

(i) May exclude any individual or entity that it determines has knowingly and willfully solicited, received, offered or paid any remuneration in the manner and for the purposes described therein, irrespective of whether the individual or entity may be able to prove that the remuneration was also intended for some other purpose; and

(ii) Will not exclude any individual or entity if that individual or entity can

prove that the remuneration that is the subject of the exclusion is exempted from serving as the basis for an exclusion.

(b) *Length of exclusion.* In determining the length of an exclusion imposed in accordance with this section, OIG may consider the following factors—

(1) The nature and circumstances surrounding the actions that are the basis for liability, including the period of time over which the acts occurred, the number of acts, whether there is evidence of a pattern and the amount claimed;

(2) The degree of culpability;

(3) Whether the individual or entity has other documented instances of criminal, civil, or administrative wrongdoing (the absence of any such instances is to be considered neutral); or

(4) Other matters as justice may require.

(c) *Limitations.* OIG may not impose an exclusion under this section more than 10 years after the date when an act which is described in section 1128B(b) of the Act occurred.

■ 8. Revise and republish §§ 1001.1101 through 1001.1552 to read as follows:

Sec.

*	*	*	*	*
1001.1101	Failure to disclose certain information.			
1001.1201	Failure to provide payment information.			
1001.1301	Failure to grant immediate access.			
1001.1401	Violations of Prospective Payment System corrective action.			
1001.1501	Default of health education loan or scholarship obligations.			
1001.1551	Exclusion of individuals with ownership or control interest in sanctioned entities.			
1001.1552	Making false statements or misrepresentation of material facts.			

§ 1001.1101 Failure to disclose certain information.

(a) *Circumstance for exclusion.* OIG may exclude any entity that did not fully and accurately, or completely, make disclosures as required by section 1124, 1124A or 1126 of the Act, and by part 455, subpart B and part 420, subpart C of this title.

(b) *Length of exclusion.* The following factors will be considered in determining the length of an exclusion under this section—

(1) The number of instances where full and accurate, or complete, disclosure was not made;

(2) The significance of the undisclosed information;

(3) Whether the individual or entity has other documented instances of criminal, civil, or administrative

wrongdoing (the absence of such instances is to be considered neutral);

(4) Any other facts that bear on the nature or seriousness of the conduct; and

(5) The extent to which the entity knew that the disclosures made were not full or accurate.

§ 1001.1201 Failure to provide payment information.

(a) *Circumstance for exclusion.* OIG may exclude any individual or entity that furnishes, orders, refers for furnishing, or certifies the need for items or services for which payment may be made under Medicare or any of the State health care programs and that—

(1) Fails to provide such information as is necessary to determine whether such payments are or were due and the amounts thereof; or

(2) Has refused to permit such examination and duplication of its records as may be necessary to verify such information.

(b) *Length of exclusion.* The following factors will be considered in determining the length of an exclusion under this section—

(1) The number of instances where information was not provided;

(2) The circumstances under which such information was not provided;

(3) The amount of the payments at issue; and

(4) Whether the individual or entity has other documented instances of criminal, civil, or administrative wrongdoing (the absence of such instances is to be considered neutral).

§ 1001.1301 Failure to grant immediate access.

(a) *Circumstance for exclusion.* (1) OIG may exclude any individual or entity that fails to grant immediate access upon reasonable request to—

(i) The Secretary, a State survey agency or other authorized entity for the purpose of determining, in accordance with section 1864(a) of the Act, whether—

(A) An institution is a hospital or skilled nursing facility;

(B) An agency is a home health agency;

(C) An agency is a hospice program;

(D) A facility is a rural health clinic as defined in section 1861(aa)(2) of the Act, or a comprehensive outpatient rehabilitation facility as defined in section 1861(cc)(2) of the Act;

(E) A laboratory is meeting the requirements of section 1861(s) (15) and (16) of the Act, and section 353(f) of the Public Health Service Act;

(F) A clinic, rehabilitation agency or public health agency is meeting the

requirements of section 1861(p)(4) (A) or (B) of the Act;

(G) An ambulatory surgical center is meeting the standards specified under section 1832(a)(2)(F)(i) of the Act;

(H) A portable x ray unit is meeting the requirements of section 1861(s)(3) of the Act;

(I) A screening mammography service is meeting the requirements of section 1834(c)(3) of the Act;

(J) An end-stage renal disease facility is meeting the requirements of section 1881(b) of the Act;

(K) A physical therapist in independent practice is meeting the requirements of section 1861(p) of the Act;

(L) An occupational therapist in independent practice is meeting the requirements of section 1861(g) of the Act;

(M) An organ procurement organization meets the requirements of section 1138(b) of the Act; or

(N) A rural primary care hospital meets the requirements of section 1820(i)(2) of the Act;

(ii) The Secretary, a State survey agency or other authorized entity to perform the reviews and surveys required under State plans in accordance with sections 1902(a)(26) (relating to inpatient mental hospital services), 1902(a)(31) (relating to intermediate care facilities for individuals with intellectual disabilities), 1919(g) (relating to nursing facilities), 1929(i) (relating to providers of home and community care and community care settings), 1902(a)(33), and 1903(g) of the Act;

(iii) OIG for reviewing records, documents, and other material or data in any medium (including electronically stored information and any tangible thing) necessary to OIG's statutory functions; or

(iv) A State Medicaid fraud control unit (MFCU) for the purpose of conducting its activities.

(2) For purposes of paragraphs (a)(1)(i) and (ii) of this section—

(i) *Failure to grant immediate access* means the failure to grant access at the time of a reasonable request unless the requested material does not exist or is not at the location where the request is presented.

(ii) *Reasonable request* means a written request made by a properly identified agent of the Secretary, of a State survey agency, or of another authorized entity, during hours that the facility, agency or institution is open for business.

(iii) The request will include a statement of the authority for the request, the rights of the entity in

responding to the request, the definitions of *reasonable request* and *failure to grant immediate access*, and the penalties for failure to comply, including when the exclusion will take effect.

(3) For purposes of paragraphs (a)(1)(iii) and (iv) of this section—

(i) *Failure to grant immediate access* means the failure to produce or make available for inspection and copying the requested material at the time of a reasonable request unless the requested material does not exist or is not at the location where the request is presented.

(ii) *Reasonable request* means a written request, signed by a designated representative of OIG or a MFCU and made by a properly identified agent of OIG or a MFCU during reasonable business hours, where there is information to suggest that the person has violated statutory or regulatory requirements under titles V, XI, XVIII, XIX, or XX of the Act.

(iii) The request will include a statement of the authority for the request, the person's rights in responding to the request, the definitions of *reasonable request* and *failure to grant immediate access*, and the effective date, length, and scope and effect of the exclusion that would be imposed for failure to comply with the request, and the earliest date that a request for reinstatement would be considered.

(4) Nothing in this section shall in any way limit access otherwise authorized under State or Federal law.

(b) *Length of exclusion.* (1) An exclusion of an individual under this section may be for a period equal to the sum of:

(i) The length of the period during which the immediate access was not granted; and

(ii) An additional period of up to 90 days.

(2) The exclusion of an entity may be for a longer period than the period in which immediate access was not granted based on consideration of the following factors—

(i) The impact of the failure to grant the requested immediate access on Medicare or any of the State health care programs, beneficiaries, or the public;

(ii) The circumstances under which such access was refused;

(iii) The impact of the exclusion on any Federal health care program, beneficiaries, or the public; and

(iv) Whether the entity has other documented instances of criminal, civil, or administrative wrongdoing (the absence of any such instances is to be considered neutral).

(3) For purposes of paragraphs (b)(1) and (2) of this section, the length of the period in which immediate access was not granted will be measured from the time the request is made, or from the time by which access was required to be granted, whichever is later.

(c) The exclusion will be effective as of the date immediate access was not granted.

§ 1001.1401 Violations of Prospective Payment System corrective action.

(a) *Circumstance for exclusion.* OIG may exclude any hospital that CMS determines has failed substantially to comply with a corrective action plan required by CMS under section 1886(f)(2)(B) of the Act.

(b) *Length of exclusion.* The following factors will be considered in determining the length of exclusion under this section—

(1) The impact of the hospital's failure to comply on any Federal health care program, program beneficiaries, or other individuals;

(2) The circumstances under which the failure occurred;

(3) The nature of the failure to comply;

(4) The impact of the exclusion on any Federal health care program, beneficiaries, or the public; and

(5) Whether the hospital has other documented instances of criminal, civil, or administrative wrongdoing (the absence of any such instances is to be considered neutral).

§ 1001.1501 Default of health education loan or scholarship obligations.

(a) *Circumstance for exclusion.* (1) Except as provided in paragraph (a)(4) of this section, OIG may exclude any individual that the administrator of the health education loan, scholarship, or loan repayment program determines is in default on repayments of scholarship obligations or loans, or the obligations of any loan repayment program, in connection with health professions education made or secured in whole or in part by the Secretary.

(2) Before imposing an exclusion in accordance with paragraph (a)(1) of this section, OIG must determine that the administrator of the health education loan, scholarship, or loan repayment program has taken all reasonable administrative steps to secure repayment of the loans or obligations. When an individual has been offered a Medicare offset arrangement as required by section 1892 of the Act, OIG will find that all reasonable steps have been taken.

(3) OIG will take into account access of beneficiaries to physician services for

which payment may be made under the Medicare and Medicaid programs in determining whether to impose an exclusion.

(4) OIG will not exclude a physician who is the sole community physician or the sole source of essential specialized services in a community if a State requests that the physician not be excluded.

(b) *Length of exclusion.* The individual will be excluded until the administrator of the health education loan, scholarship, or loan repayment program notifies OIG that the individual has entered into an agreement with the administrator of the health education loan, scholarship, or loan repayment program to cure the default or that there is no longer an outstanding debt. If the administrator of the health education loan, scholarship, or loan repayment program notifies OIG that the individual has entered into an agreement to cure the default, the individual may be eligible for a stay of the effect of exclusion by OIG for as long as the individual remains in compliance with the terms of the agreement. If the administrator of the health education loan, scholarship, or loan repayment program notifies OIG that there is no longer an outstanding debt, OIG will inform the individual of the individual's right to apply for reinstatement.

§ 1001.1551 Exclusion of individuals with ownership or control interest in sanctioned entities.

(a) *Circumstance for exclusion.* OIG may exclude any individual who—

(1) Has a direct or indirect ownership or control interest in a sanctioned entity, and who knows or should know (as defined in section 1128A(i)(6) of the Act) of the action constituting the basis for the conviction or exclusion set forth in paragraph (b) of this section; or

(2) Is an officer or managing employee (as defined in section 1126(b) of the Act) of such an entity.

(b) For purposes of paragraph (a) of this section, the term “sanctioned entity” means an entity that—

(1) Has been convicted of any offense described in §§ 1001.101 through 1001.401; or

(2) Has been excluded from participation in Medicare or a State health care program.

(c) *Length of exclusion.* (1) If the entity has been excluded, the length of the individual's exclusion will be for the same length as that of the sanctioned entity, regardless of whether the individual terminates the relationship with the sanctioned entity.

(2) If the entity was not excluded, the length of the individual's exclusion will

be determined by considering the factors that would have been considered if the entity had been excluded.

(3) An individual excluded under this section may apply for reinstatement in accordance with the procedures set forth in § 1001.3001.

§ 1001.1552 Making false statements or misrepresentation of material facts.

(a) *Circumstance for exclusion.* OIG may exclude any individual or entity that it determines has knowingly made or caused to be made any false statement, omission, or misrepresentation of a material fact in any application, agreement, bid, or contract to participate or enroll as a provider of services or supplier under a Federal health care program, including Medicare Advantage organizations under Part C of Medicare, prescription drug plan sponsors under Part D of Medicare, Medicaid managed care organizations, and entities that apply to participate as providers of services or suppliers in such managed care organizations and such plans.

(b) *Definition of “material.”* For purposes of this section, the term “material” means having a natural tendency to influence or be capable of influencing the decision to approve or deny the request to participate or enroll as a provider of services or supplier under a Federal health care program.

(c) *Sources.* OIG's determination under paragraph (a) of this section will be made on the basis of information from the following sources:

- (1) CMS;
- (2) Medicaid State agencies;
- (3) Fiscal agents or contractors or private insurance companies;
- (4) Law enforcement agencies;
- (5) State or local licensing or certification authorities;
- (6) State or local professional societies; or
- (7) Any other sources deemed appropriate by OIG.

(d) *Length of exclusion.* In determining the length of an exclusion imposed in accordance with this section, OIG will consider the following factors:

- (1) The nature and circumstances surrounding the false statement;
- (2) Whether and to what extent payments were requested or received from the Federal health care program under the application, agreement, bid, or contract on which the false statement, omission, or misrepresentation was made; and
- (3) Whether the individual or entity has other documented instances of criminal, civil, or administrative wrongdoing (the absence of any such instances is to be considered neutral).

■ 9. Add § 1001.1553 to read as follows:

§ 1001.1553 Knowingly misclassifying covered outpatient drugs.

(a) *Circumstance for exclusion.* OIG may exclude any manufacturer (as defined in section 1927 of the Act), or officer, director, agent, or managing employee of such manufacturer that:

(1) Knowingly misclassifies a covered outpatient drug;

(2) Knowingly fails to correct such misclassification; or

(3) Knowingly provides false information related to drug pricing, drug product information, or data related to drug pricing or drug product information.

(b) This section applies to covered outpatient drugs supplied by manufacturers under agreements under section 1927 of the Act in effect on or after April 18, 2019.

(c) *Length of exclusion.* The following factors will be considered in determining the length of an exclusion under this section:

(1) The nature and circumstances surrounding the actions that are the basis for liability, including the period of time over which the acts occurred, the number of acts, and whether there is evidence of a pattern;

(2) The degree of culpability;

(3) Whether the entity has other documented instances of criminal, civil, or administrative wrongdoing (the absence of any such instances is to be considered neutral); or

(4) Other matters as justice may require.

■ 10. Revise and republish §§ 1001.1601 and 1001.1701 to read as follows:

§ 1001.1601 Violations of the limitations on physician charges.

(a) *Circumstance for exclusion.* (1) OIG may exclude a physician whom it determines—

(i) Is a non-participating physician under section 1842(j) of the Act;

(ii) Furnished services to a beneficiary;

(iii) Knowingly and willfully billed—

(A) On a repeated basis for such services actual charges in excess of the maximum allowable actual charge determined in accordance with section 1842(j)(1)(C) of the Act for the period January 1, 1987 through December 31, 1990; or

(B) Individuals enrolled under part B of title XVIII of the Act during the statutory freeze for actual charges in excess of such physician's actual charges determined in accordance with section 1842(j)(1)(A) of the Act for the period July 1, 1984, to December 31, 1986; and

(iv) Is not the sole community physician or sole source of essential specialized services in the community.

(2) OIG will take into account access of beneficiaries to physicians' services for which Medicare payment may be made in determining whether to impose an exclusion.

(b) *Length of exclusion.* (1) In determining the length of an exclusion in accordance with this section, OIG will consider the following factors—

(i) The number of services for which the physician billed in excess of the maximum allowable charges;

(ii) The number of beneficiaries for whom services were billed in excess of the maximum allowable charges;

(iii) The amount of the charges that were in excess of the maximum allowable charges; and

(iv) Whether the physician has other documented instances of criminal, civil, or administrative wrongdoing (the absence of any such instances is to be considered neutral).

(2) The period of exclusion may not exceed 5 years.

§ 1001.1701 Billing for services of assistant at surgery during cataract operations.

(a) *Circumstance for exclusion.* OIG may exclude a physician whom it determines—

(1) Has knowingly and willfully presented or caused to be presented a claim, or billed an individual enrolled under Part B of the Medicare program (or the individual's representative) for:

(i) Services of an assistant at surgery during a cataract operation; or

(ii) Charges that include a charge for an assistant at surgery during a cataract operation;

(2) Has not obtained prior approval for the use of such assistant from the appropriate Utilization and Quality Control Quality Improvement Organization (QIO) or Medicare carrier; and

(3) Is not the sole community physician or sole source of essential specialized services in the community.

(b) *Access to services.* OIG will take into account access of beneficiaries to physicians' services for which Medicare payment may be made in determining whether to impose an exclusion.

(c) *Length of exclusion.* (1) In determining the length of an exclusion in accordance with this section, OIG will consider the following factors—

(i) The number of instances for which claims were submitted or beneficiaries were billed for unapproved use of assistants during cataract operations;

(ii) The amount of the claims or bills presented;

(iii) The circumstances under which the claims or bills were made, including whether the services were medically necessary;

(iv) Whether approval for the use of an assistant was requested from the QIO or carrier; and

(v) Whether the physician has other documented instances of criminal, civil, or administrative wrongdoing (the absence of any such instances is to be considered neutral).

(2) The period of exclusion may not exceed 5 years.

Subpart D—Waivers and Effect of Exclusion

■ 11. Revise and republish §§ 1001.1801 and 1001.1901 to read as follows:

§ 1001.1801 Waivers of exclusions.

(a) OIG has the authority to grant or deny a request from the administrator of a Federal health care program that an exclusion from that program be waived with respect to an individual or entity, except that no waiver may be granted with respect to an exclusion under § 1001.101(b). The request must be in writing and from an individual directly responsible for administering the Federal health care program.

(b) With respect to exclusions under § 1001.101(a), (c), or (d), a request from a Federal health care program for a waiver of the exclusion will be considered only if the Federal health care program administrator determines that—

(1) The individual or entity is the sole community physician or the sole source of essential specialized services in a community; and

(2) The exclusion would impose a hardship on beneficiaries (as defined in section 1128A(i)(5) of the Act) of that program.

(c) With respect to exclusions imposed under subpart C of this part, a request for waiver will only be granted if OIG determines that imposition of the exclusion would not be in the public interest.

(d) If the basis for the waiver ceases to exist, the waiver will be rescinded.

(e) In the event a waiver is granted, it is applicable only to the program(s) for which waiver is requested.

(f) The decision to grant, deny, or rescind a request for a waiver is not subject to administrative or judicial review.

§ 1001.1901 Scope and effect of exclusion.

(a) *Scope of exclusion.* Exclusions of individuals and entities under this title will be from all Federal health care programs, as defined in § 1000.10 of this chapter.

(b) *Effect of exclusion on excluded individuals and entities.* (1) Unless and until an individual or entity is reinstated into the Federal health care programs in accordance with subpart F of this part, no payment will be made by any Federal health care program for any item or service furnished, on or after the effective date specified in the notice—

(i) By an excluded individual or entity; or

(ii) At the medical direction or on the prescription of a physician or an authorized individual who is excluded when the person furnishing such item or service knew, or had reason to know, of the exclusion.

(2) This section applies regardless of whether an individual or entity has obtained a Federal health care program provider number or equivalent, either as an individual or as a member of a group, prior to being reinstated.

(3) An excluded individual or entity may not take assignment of an enrollee's claim on or after the effective date of exclusion.

(4) An excluded individual or entity that submits, or causes to be submitted, claims for items or services furnished during the exclusion period is subject to civil money penalty liability under section 1128A(a)(1)(D) of the Act and criminal liability under section 1128B(a)(3) of the Act and other provisions. In addition, submitting claims, or causing claims to be submitted or payments to be made, for items or services furnished, ordered, or prescribed, including administrative and management services or salary, may serve as the basis for denying reinstatement to the Federal health care programs.

(c) *Exceptions to paragraph (b)(1) of this section.* (1) If an enrollee of Part B of Medicare submits an otherwise payable claim for items or services furnished by an excluded individual or entity, or under the medical direction or on the prescription of an excluded physician or other authorized individual after the effective date of exclusion, CMS will pay the first claim submitted by the enrollee and immediately notify the enrollee of the exclusion.

(2) CMS will not pay an enrollee for items or services furnished by an excluded individual or entity, or under the medical direction or on the prescription of an excluded physician or other authorized individual more than 15 days after the date on the notice to the enrollee, or after the effective date of the exclusion, whichever is later.

(3) Unless the Secretary determines that the health and safety of

beneficiaries receiving services under any Federal health care program warrants the exclusion taking effect earlier, payment may be made under such program for up to 30 days after the effective date of the exclusion for—

- (i) Inpatient institutional services furnished to an individual who was admitted to an excluded institution before the date of the exclusion;
- (ii) Home health services and hospice care furnished to an individual under a plan of care established before the effective date of the exclusion; and
- (iii) Any health care items that are ordered by a practitioner, provider, or supplier from an excluded manufacturer before the effective date of the exclusion and delivered within 30 days of the effective date of such exclusion.

(4) CMS will not pay any claims submitted by, or for items or services ordered or prescribed by, an excluded provider for dates of service 15 days or more after the notice of the provider's exclusion was mailed to the supplier.

(5)(i) Notwithstanding the other provisions of this section, payment may be made under any Federal health care program for certain emergency items or services furnished by an excluded individual or entity, or at the medical direction or on the prescription of an excluded physician or other authorized individual during the period of exclusion. To be payable, a claim for such emergency items or services must be accompanied by a sworn statement of the person furnishing the items or services specifying the nature of the emergency and why the items or services could not have been furnished by an individual or entity eligible to furnish or order such items or services.

(ii) Notwithstanding paragraph (c)(5)(i) of this section, no claim for emergency items or services will be payable if such items or services were provided by an excluded individual who, through an employment, contractual or any other arrangement, routinely provides emergency health care items or services.

Subpart E—Notice and Appeals

■ 12. Revise and republish § 1001.2001 to read as follows:

§ 1001.2001 Notice of intent to exclude.

(a) Except as provided in paragraph (c) of this section, if OIG proposes to exclude an individual or entity in accordance with subpart B or C of this part, it will send written notice of its intent, the basis for the proposed exclusion, and the potential effect of an exclusion. Within 30 days of receipt of notice, which will be deemed to be 7

days after the date on the notice, the individual or entity may submit documentary evidence and written argument concerning whether the exclusion is warranted and any related issues.

(b) If OIG intends to exclude an individual or entity under the provisions of § 1001.701, § 1001.801, or § 1001.1552, in conjunction with the submission of documentary evidence and written argument, an individual or entity may request an opportunity to present oral argument to an OIG official.

(c) *Exception.* If OIG intends to exclude an individual or entity under the provisions of § 1001.901, § 1001.951, § 1001.1301, § 1001.1401, § 1001.1601, or § 1001.1701, paragraph (a) of this section will not apply.

(d) If an entity has a provider agreement under section 1866 of the Act, and OIG proposes to terminate that agreement in accordance with section 1866(b)(2)(C) of the Act, the notice provided for in paragraph (a) of this section will so state.

■ 13. Revise and republish § 1001.2004 through 1001.2007 to read as follows:

*	*	*	*	*
1001.2004	Notice to State agencies.			
1001.2005	Notice to State licensing agencies.			
1001.2006	Notice to others regarding exclusion.			
1001.2007	Appeal of exclusions.			

§ 1001.2004 Notice to State agencies.

OIG will promptly notify each appropriate State agency administering or supervising the administration of each State health care program of:

- (a) The facts and circumstances of each exclusion; and
- (b) The period for which the State agency is being directed to exclude the individual or entity.

§ 1001.2005 Notice to State licensing agencies.

(a) OIG will promptly notify the appropriate State(s) or local agencies or authorities having responsibility for the licensing or certification of an excluded individual or entity of the facts and circumstances of the exclusion.

(b) OIG will request that appropriate investigations be made and sanctions invoked in accordance with applicable State law and policy, and will request that the State or local agency or authority keep the Secretary and OIG fully and currently informed with respect to any actions taken in response to the request.

§ 1001.2006 Notice to others regarding exclusion.

(a) OIG will give notice of the exclusion and the effective date to the public and others via online publication of the List of Excluded Individuals/Entities (commonly referred to as “the LEIE”).

(b) In the case of an exclusion under § 1001.101, if section 304(a)(5) of the Controlled Substances Act (21 U.S.C. 824(a)(5)) applies, OIG will give notice to the Attorney General of the United States of the facts and circumstances of the exclusion and the length of the exclusion.

§ 1001.2007 Appeal of exclusions.

(a)(1) Except as provided in § 1001.2003, an individual or entity excluded under this part may file a request for a hearing before an ALJ only on the issues of whether:

- (i) The basis for the imposition of the exclusion exists; and
- (ii) The length of exclusion is unreasonable.

(2) When OIG imposes an exclusion under subpart B of this part for a period of 5 years, paragraph (a)(1)(ii) of this section will not apply.

(3) The request for a hearing shall contain the information set forth in § 1005.2(d) of this chapter.

(b) The excluded individual or entity has 60 days from the receipt of notice of exclusion provided for in § 1001.2002 to file a request for a hearing.

(c) The standard of proof at a hearing is preponderance of the evidence.

(d) When the exclusion is based on the existence of a criminal conviction or a civil judgment imposing liability by a Federal, State, or local court, a determination by another government agency, or any other prior determination where the facts were adjudicated and a final decision was made, the basis for the underlying conviction, civil judgment, or determination is not reviewable and the individual or entity may not collaterally attack it either on substantive or procedural grounds in this appeal.

(e) The procedures in part 1005 of this chapter will apply to the appeal.

■ 14. Revise and republish subpart F to read as follows:

Subpart F—Reinstatement Into the Programs

Sec.	
1001.3001	Timing and method of request for reinstatement.
1001.3002	Basis for reinstatement.
1001.3003	Approval of request for reinstatement.
1001.3004	Denial of request for reinstatement.

1001.3005 Withdrawal of exclusion for reversed or vacated decisions.

Subpart F—Reinstatement Into the Programs

§ 1001.3001 Timing and method of request for reinstatement.

(a)(1) Except as provided in paragraph (a)(2) of this section or in § 1001.501(b)(2), § 1001.501(c), or § 1001.601(b)(2), an excluded individual or entity (other than those excluded in accordance with §§ 1001.1001 and 1001.1501) may submit a written request for reinstatement to OIG only after the date specified in the notice of exclusion. Obtaining a Federal health care program provider number or equivalent does not reinstate eligibility.

(2) An entity excluded under § 1001.1001 may apply for reinstatement prior to the date specified in the notice of exclusion by submitting a written request for reinstatement that includes documentation demonstrating that the standards set forth in § 1001.3002(c) have been met.

(b) Upon receipt of a written request, OIG will require the requestor to furnish specific information and authorization to obtain information from private health insurers, peer review bodies, probation officers, professional associates, investigative agencies, and such others as may be necessary to determine whether reinstatement should be granted.

(c) Failure to furnish the required information or authorization will result in the continuation of the exclusion.

(d) If a period of exclusion is reduced on appeal (regardless of whether further appeal is pending), the individual or entity may request reinstatement once the reduced exclusion period expires.

§ 1001.3002 Basis for reinstatement.

(a) OIG will authorize reinstatement if it determines that—

(1) The period of exclusion has expired;

(2) There are reasonable assurances that the types of actions that formed the basis for the original exclusion have not recurred and will not recur; and

(3) There is no additional basis under sections 1128(a) or (b) or 1128A of the Act for continuation of the exclusion.

(b) In making the reinstatement determination described in paragraph (a) of this section, OIG will consider—

(1) Conduct of the individual or entity occurring prior to the date of the notice of exclusion, if not known to OIG at the time of the exclusion;

(2) Conduct of the individual or entity after the date of the notice of exclusion;

(3) Whether all fines and all debts due and owing (including overpayments) to

any Federal, State, or local government that relate to any Federal health care program have been paid or satisfactory arrangements have been made to fulfill obligations;

(4) Whether CMS has determined that the individual or entity complies with, or has made satisfactory arrangements to fulfill, all the applicable conditions of participation or supplier conditions for coverage under the statutes and regulations;

(5) Whether the individual or entity has, during the period of exclusion, submitted claims, or caused claims to be submitted or payment to be made by any Federal health care program, for items or services the excluded party furnished, ordered, or prescribed, including health care administrative services. This section applies regardless of whether an individual or entity has obtained a Federal health care program provider number or equivalent, either as an individual or as a member of a group, prior to being reinstated; and

(c) If OIG determines that the criteria in paragraphs (a)(2) and (3) of this section have been met, an entity excluded in accordance with § 1001.1001 will be reinstated upon a determination by OIG that the individual whose conviction, exclusion, or civil money penalty was the basis for the entity's exclusion—

(1) Has properly reduced the individual's ownership or control interest in the entity below 5 percent;

(2) Is no longer an officer, director, agent, or managing employee of the entity; or

(3) Has been reinstated in accordance with paragraph (a) of this section or § 1001.3005.

(d) Reinstatement will not be effective until OIG grants the request and provides notice under § 1001.3003(a). Reinstatement will be effective as provided in the notice.

(e) A determination with respect to reinstatement is not appealable or reviewable except as provided in § 1001.3004.

(f) An ALJ may not require reinstatement of an individual or entity in accordance with this chapter.

§ 1001.3003 Approval of request for reinstatement.

(a) If OIG grants a request for reinstatement, OIG will—

(1) Give written notice to the excluded individual or entity specifying the date of reinstatement;

(2) Notify each appropriate State agency administering or supervising the administration of each State health care program (and, in the case of an exclusion effected pursuant to

§ 1001.101 and to which 21 U.S.C. 824(a)(5) may apply, the Attorney General) of the date of the individual's or entity's reinstatement; and

(3) Notify the public and others through posting of reinstatement information on OIG's website.

(b) An action taken by OIG under this section will not require a Federal health care program to reinstate the individual or entity if such program has imposed an action under its own authority.

§ 1001.3004 Denial of request for reinstatement.

(a) If a request for reinstatement is denied, OIG will give written notice to the requesting individual or entity that the request for reinstatement has been denied and the basis for the denial. Within 30 days of the date on the notice, the excluded individual or entity may submit a written request to appeal the denial of the individual's or entity's reinstatement. The individual or entity will have 30 days from the date of the written request to appeal to submit:

(1) Any written argument or additional evidence the individual or entity has regarding the basis for the denial of reinstatement; or

(2) A written request to present oral argument or any additional evidence to an OIG official regarding the basis for the denial of reinstatement.

(b) After evaluating any written argument or additional evidence submitted by the excluded individual or entity or any oral argument and additional evidence presented to an OIG official, OIG will send written notice either confirming the denial and indicating that a subsequent request for reinstatement will not be considered until at least 1 year after the date of denial, or approving the request consistent with the procedures set forth in § 1001.3003(a).

(c) The decision to deny reinstatement will not be subject to administrative or judicial review.

§ 1001.3005 Withdrawal of exclusion for reversed or vacated decisions.

(a) An exclusion will be withdrawn and an individual or entity will be reinstated into all Federal health care programs retroactive to the effective date of the exclusion when such exclusion is based on—

(1) A conviction that is reversed or vacated on appeal;

(2) An action by another agency, such as a State agency or licensing board, that is reversed or vacated on appeal; or

(3) An OIG exclusion action that is reversed or vacated at any stage of an individual's or entity's administrative appeal process.

(b) If an individual or entity is reinstated in accordance with paragraph (a) of this section, the Federal health care programs will make payment for services covered under such programs that were furnished or performed during the period of exclusion.

(c) OIG will give notice of a reinstatement under this section in accordance with § 1001.3003(a).

(d) An action taken by OIG under this section will not require a Federal health care program to reinstate the individual or entity if such program has imposed an exclusion under its own authority.

(e) If an action which results in the retroactive reinstatement of an individual or entity is subsequently overturned, OIG may reimpose the exclusion for the initial period of time,

less the period of time that was served prior to the reinstatement of the individual or entity.

Xavier Becerra,

Secretary.

Federal Register

Vol. 89, No. 231

Monday, December 2, 2024

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Doc. No. AMS–FTPP–24–0063]

Notice of Request for Extension of a Currently Approved Information Collection

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), this notice announces the Agricultural Marketing Service's (AMS) intention to request approval, from the Office of Management and Budget, for an extension of and revision to the currently approved information collection in support of the reporting and recordkeeping requirements under the Packers and Stockyards Act of 1921, as amended and supplemented (P&S Act). This approval is required under the PRA.

DATES: Comments on this notice must be received by January 31, 2025 to be assured of consideration

ADDRESSES: Interested persons are invited to submit comments concerning this notice online using the electronic process available at <https://www.regulations.gov>. Comments may also be submitted to Brett Offutt, Chief Legal Officer/Policy Advisor, Packers and Stockyards Division, Rm. 2507, 1400 Independence Ave. SW, Washington, DC 20250–3601. All comments should reference docket number AMS–FTPP–24–0063 and note the date and page number of this issue of the **Federal Register**. All comments submitted in response to this notice, including any personal information provided, will be posted without change at <https://www.regulations.gov> and become a matter of public record.

FOR FURTHER INFORMATION CONTACT:

Contact Amy R. Blechinger, Acting Enforcement Branch Chief, Packers and Stockyards Division, USDA AMS Fair Trade Practices Program, 1400 Independence Ave. SW, Washington, DC 20250; Phone: (202) 720–5877, or Email: amy.r.blechinger@usda.gov.

SUPPLEMENTARY INFORMATION:

Title: Regulations and Related Reporting and Recording Requirements—Packers and Stockyards Division

OMB Number: 0581–0308.

Expiration Date of Approval: January 31, 2025.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: The P&S Act and the regulations issued under the P&S Act authorize the collection of information for the purpose of enforcing the P&S Act and regulations and for conducting studies requested by Congress. Through the forms in this information collection, the Fair Trade Practices Program (FTPP), Packers and Stockyards Division (PSD) gathers information that keeps PSD current on the ownership and operations of regulated entities which permit PSD oversight of the regulated entities. For example, PSD gathers information regarding the number of head of livestock purchased and the cost of the livestock to determine if the entity is adequately bonded to protect the livestock sellers. The information regarding the amount of livestock purchased is also consolidated for public reporting in PSD's annual report. Other financial information is gathered to determine if the regulated entities are operating while solvent as required by the P&S Act. This information collection is necessary for PSD to monitor and examine financial, competitive, and trade practices in the livestock, meat packing and poultry industries. The purpose of this notice is to solicit comments from the public concerning PSD's information collection.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 1.73 hours per response.

Respondents: Livestock auction markets, livestock dealers, packer buyers, meat packers, and live poultry dealers.

Estimated Number of Respondents: 14,129.

Estimated Total Annual Responses: Less than 1.8 hours.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden hours on Respondents: 49,339.

Comments: Comments are invited on:

(1) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (2) the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

[FR Doc. 2024–28211 Filed 11–29–24; 8:45 am]

BILLING CODE P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic,

mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by January 2, 2025 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food and Nutrition Service

Title: Food Delivery Portal (FDP) Data Collection.

OMB Control Number: 0584–0401.

Summary of Collection: This is a revision of a currently approved information collection that was formerly titled “The Integrity Profile (TIP) Data Collection.” Under the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) program regulations at 7 CFR 246.12(j)(5), WIC State agencies administering the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) are required by 7 CFR 246.12(j)(5) to submit to FNS an annual summary of the results of their vendor monitoring efforts in order to provide Congress, senior FNS officials, as well as the public, assurance that every reasonable effort is being made to ensure integrity in the WIC Program. The number of WIC State agencies in fiscal year 2023 is 89. This includes 50 geographic State agencies, 33 State agencies operated by Indian Tribal Organizations, the District of Columbia, Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands. All WIC State agencies use the web-based system called Food Delivery Portal (FDP).

FDP is a robust data collection system which aligns with current security protocols and compliance guidance, supports data storage and web components, ensures cost effectiveness, allows for data-driven decision-making, has enhanced FNS reporting

capabilities, reduces grantee burden through automated calculations and consolidated reporting, and adds data validation features to reduce reporting errors.

Need and Use of the Information:

This is a mandatory collection, and the respondents are WIC State agencies. FNS uses the data for Federal oversight of the WIC Program and to ensure compliance with WIC Program regulations. Specifically, FNS uses the data in FDP to ensure that WIC State agencies are providing appropriate vendor training, consistently monitoring vendors for compliance with Program rules, conducting the required ratio of compliance investigations, and are applying the correct sanctions for any patterns of violations identified. FNS works with State agencies to address any discrepancies or anomalies in the data. Final WIC State agency data is aggregated by FNS at the national level, to generate nationwide reports and trend analysis. Additionally, FNS uses this data to provide information on WIC State agency vendor management and vendor compliance to stakeholders, including Congress, USDA’s Office of the Inspector General (OIG), outside auditors, researchers, and the public.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 356.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 3,576.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

[FR Doc. 2024–28095 Filed 11–29–24; 8:45 am]

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Tribal Advisory Committee

AGENCY: Office of Tribal Relations, U.S. Department of Agriculture.

ACTION: Notice of public, hybrid meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Department of Agriculture (USDA) and the Federal Advisory Committee Act (FACA), the Office of Tribal Relations is announcing a meeting of the Tribal Advisory Committee. The Committee is authorized under the Agriculture Improvement Act of 2018 (the 2018 Farm Bill) and operates in compliance with the Federal Advisory Committee Act. The purpose of the Committee is to provide advice and guidance to USDA

on matters related to Tribal and Indian affairs.

DATES: In person meetings with virtual webinar and call-in options will take place at the Palm’s Casino Resort on Tuesday, December 10th, 2024, from 1 p.m. to approximately 5 p.m. Pacific standard time (PST) in Room Madison C/D and Wednesday, December 11th, 2024, from 9 a.m. to approximately 5 p.m. in the Kaos room. This venue is located at 4321 W Flamingo Rd., Las Vegas, NV 89103. Meeting room updates will be posted on <https://www.usda.gov/tribalrelations/advisory-committee>.

ADDRESSES:

Webinar Participation Information: Registration to attend this meeting, including to provide oral public comments, is available at https://www.zoomgov.com/webinar/register/WN_3wk0eEvGSduYZUL767g0hg.

Public Comments: The public may file written comments to the Tribal Advisory Committee by Thursday, December 5, 2024, via email at Tribal.Relations@usda.gov. Additional comments will be included in the public record.

Members of the public are invited to join the Tribal Advisory Committee meeting to listen to deliberations each day and will be invited to give oral comments to the Committee from 1:15 p.m. to 2:45 p.m. PST on Tuesday, December 10th. Members of the public who request to give oral comments to the Committee must arrive by 1:00 p.m. and will be given no more than five (5) minutes to provide their comment.

FOR FURTHER INFORMATION CONTACT:

General information about the Committee can be found at <https://www.usda.gov/tribalrelations/advisory-committee>. Josiah Griffin, Designated Federal Officer, by phone at 202–205–2249 or via email at Josiah.Griffin@usda.gov. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: This meeting will be the fourth convening of the Tribal Advisory Committee. An agenda and more information for this meeting will be available at <https://www.usda.gov/tribalrelations/advisory-committee>.

The Secretary established the Committee pursuant to section 12303 of the Agriculture Improvement Act of 2018 (7 U.S.C. 6921(b)). The Committee is managed in accordance with the provisions of the Federal Advisory Committee Act, as amended, 5 U.S.C.

10. Under the law, the Secretary of Agriculture appointed three members, and the Chair and Ranking Members of the House Committee on Agriculture and the Senate Committees on Indian Affairs and Agriculture, Nutrition, and Forestry appointed the remaining eight members. In addition to providing recommendations to the Secretary, the Tribal Advisory Committee is required to submit report(s) to the three Congressional Committees listed above.

Availability of Materials for the Meeting: All written public comments will be compiled into a binder and will be made available for review at the meeting. Duplicate comments from multiple individuals will appear as one comment, with a notation that multiple copies of the comment were received. Please visit <https://www.usda.gov/tribalrelations/advisory-committee> to learn more about the agenda for or reports resulting from this meeting.

Be advised that anyone calling into the Zoom teleconference system or participating in-person that is interested in providing public comment will be asked to provide their name, title, and Tribal or organizational affiliations. Callers may expect to incur charges for calls they initiate over wireless lines, and the USDA will not refund any incurred charges.

The USDA prohibits discrimination in all its programs and activities based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotope, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

Equal opportunity practices, in accordance with USDA policies, will be followed in all membership appointments to the Committee. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by the Department, membership shall include, to the extent practicable,

individuals with demonstrated ability to represent the many communities, identities, races, ethnicities, backgrounds, abilities, cultures, and beliefs of the American people, including underserved communities. USDA is an equal opportunity provider, employer, and lender.

Dated: November 22, 2024.

Cikena Reid,

USDA Committee Management Officer.

BILLING CODE 3410-AG-P

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

Rural Housing Service

Rural Business-Cooperative Service

[Docket No. RUS-24-AGENCY-0035]

Notice of Adoption of Department of Energy Categorical Exclusions Under the National Environmental Policy Act

AGENCY: Rural Utilities Service, Rural Housing Service and Rural Business-Cooperative Service, Rural Development, USDA.

ACTION: Notice.

SUMMARY: Rural Development (RD), a mission area within the United States Department of Agriculture (USDA) announces its adoption of seven Categorical Exclusions (CEs) from the United States Department of Energy (DOE) under the National Environmental Policy Act (NEPA) to use in RD programs and funding opportunities. This notice describes the categories of proposed actions for which RD intends to use the DOE CEs and describes the consultation between the agencies.

DATES: This action is effective upon publication.

FOR FURTHER INFORMATION CONTACT:

Alan Hachey, Environmental Protection Specialist, Environmental and Historic Preservation Division, Rural Utilities Service, 1400 Independence Avenue SW, Mail Stop 1548, Room 4004, Phone: (202) 205-5381; Email: alan.hachey@usda.gov.

SUPPLEMENTARY INFORMATION:

Background

RD's mission is to increase economic opportunity and improve the quality of life for all rural Americans. This mission is met by providing loans, grants, loan guarantees, and technical assistance through a multitude of programs aimed at creating and

improving infrastructure, businesses, and housing throughout rural America. RD is divided into three agencies, the Rural Utilities Service, Rural Business-Cooperative Service, and Rural Housing Service, each with unique programs that play an important role in helping RD reach its goals.

RD's programs must comply with NEPA, 42 U.S.C. 4321-4347, which requires Federal agencies to consider the environmental effects of their proposed actions in their decision-making processes and inform and engage the public in those processes. Congress enacted NEPA to establish a national policy for the environment, provide for the establishment of the Council on Environmental Quality (CEQ), and for other purposes as detailed on [NEPA.gov](https://www.ceq.doe.gov) ([ceq.doe.gov](https://www.ceq.doe.gov)). CEQ issued regulations implementing NEPA, 40 CFR parts 1500 through 1508 (CEQ regulations).

To comply with NEPA, agencies determine the appropriate level of review of any major Federal action—an environmental impact statement (EIS), environmental assessment (EA), or CE. It is the agency's responsibility, in accordance with NEPA and the CEQ regulations, to prepare documentation that supports their level of review.

Section 109 of NEPA, enacted as part of the Fiscal Responsibility Act of 2023, allows a Federal agency to adopt and use another agency's CEs for a category of proposed agency actions (42 U.S.C. 4336c). To use another agency's CEs under section 109, the adopting agency must identify the relevant CEs listed in another agency's ("establishing agency") NEPA procedures that cover the adopting agency's category of proposed actions or related actions; consult with the establishing agency to ensure that the proposed adoption of the CE to a category of actions is appropriate; identify to the public the CE that the adopting agency plans to use for its proposed actions; and document adoption of the CE (40 CFR 1501.4(e)(2024)). This notice documents RD's adoption of seven DOE CEs under Section 109 of NEPA for future use in RD programs and funding opportunities.

II. Identification of the Categorical Exclusions and Additional Conditions for Application

RD provides loans, grants and technical assistance to build critical infrastructure like electric, broadband, water systems, and hospitals. The programs expand access to electric, telecommunications, and transportation infrastructure, and support business growth, healthcare, education, housing, and other community essentials.

RD has identified the following CEs for adoption, which are listed in DOE's NEPA procedures as CEs B4.1, B4.4, B4.8, B4.13, B4.14, B5.1, and B5.16 of 10 CFR part 1021, subpart D, Appendix B. The final rule establishing or revising CEs B4.13, B4.14, and B5.16 was published by DOE on April 30, 2024 (89 FR 34074–01). The DOE text of each CE has been included in quotations following each identified CE. RD intends to apply these CEs to projects undertaken directly by RD, requiring an approval by RD, or financed in whole or in part through Federal funds made available by RD programs.

RD will review each action and require the preparation of an environmental review document to ensure the following: (1) Consistency with the DOE's NEPA procedures at 10 CFR 1021 Subpart D, Appendix B which require an evaluation of "integral elements" to confirm the proposal will have no significant impacts on the resources identified in DOE environmental procedures; (2) Compliance with RD's NEPA procedures at 7 CFR 1970.52 which address extraordinary circumstances; and (3) Confirmation that the action has not been segmented as required by DOE's NEPA procedures at 10 CFR 1021.410(b)(3). The evaluation of integral elements and segmentation is further described in this section. The evaluation of extraordinary circumstances is further described in Section III.

B4.1 Contracts, Policies, and Marketing and Allocation Plans for Electric Power

"Establishment and implementation of contracts, policies, and marketing and allocation plans related to electric power acquisition that involve only the use of the existing transmission system and existing generation resources operating within their normal operating limits."

RD intends to apply this CE in a manner consistent with DOE's application—to the same types of actions (e.g., the implementation of or amendments to Power Purchase Agreements (PPAs) entered into by DOE). An example of a project type where this CE could be applied by RD includes, but is not limited to, the implementation of PPAs proposed for funding through the Empowering Rural America Program (NewERA) Program.

B4.4 Power Marketing Services and Activities

"Power marketing services and power management activities (including, but not limited to, storage, load shaping and

balancing, seasonal exchanges, and other similar activities), provided that the operations of generating projects would remain within normal operating limits. (See B4.14 of this appendix for energy storage systems.)"

RD intends to apply this CE in a manner consistent with DOE's application—to the same types of actions (e.g., advanced metering infrastructure, distribution automation, energy storage systems, load control). An example of a project type where this CE could be applied by RD includes, but is not limited to, the funding of grid modernization infrastructure through the Electric Infrastructure Loan & Loan Guarantee, NewERA, or Powering Affordable Clean Energy (PACE) Programs to integrate renewable energy generation projects.

B4.8 Electricity Transmission Agreements

"New electricity transmission agreements, and modifications to existing transmission arrangements, to use a transmission facility of one system to transfer power of and for another system, provided that no new generation projects would be involved and no physical changes in the transmission system would be made beyond the previously disturbed or developed facility area."

RD intends to apply this CE in a manner consistent with DOE's application—to the same types of actions. (e.g., new electricity transmission agreements or modifications to existing agreements). An example of a project type where this CE could be applied by RD includes, but is not limited to, modifications to existing agreements that enable the transmission of power from renewable energy projects proposed for funding through the Electric Infrastructure Loan & Loan Guarantee, NewERA, or PACE Programs.

B4.13 Upgrading and Rebuilding Existing Powerlines and Related Provisions

"Upgrading or rebuilding existing electric powerlines, which may involve relocations of small segments of the powerlines within an existing powerline right-of-way or within otherwise previously disturbed or developed lands (as discussed at 10 CFR 1021.410(g)(1)). Upgrading or rebuilding existing electric powerlines also may involve widening an existing powerline right-of-way to meet current electrical standards if the widening remains within previously disturbed or developed lands and only extends into a small area beyond such lands as needed to comply with

applicable electrical standards. Covered actions would be in accordance with applicable requirements, including the integral elements listed at the start of appendix B of this part; and would incorporate appropriate design and construction standards, control technologies, and best management practices. This categorical exclusion does not apply to underwater powerlines. As used in this categorical exclusion, "small" has the meaning discussed at 10 CFR 1021.410(g)(2)."

The terms "small" and "small-scale" are defined in 10 CFR 1021.410(g)(2), and RD agrees to apply the adopted CEs in a manner consistent with DOE's definitions.

RD intends to apply this CE in a manner consistent with DOE's application—to the same types of actions (upgrading or rebuilding powerlines located in existing rights of way or within otherwise previously disturbed or developed lands). An example of a project type where this CE could be applied by RD includes, but is not limited to, the upgrading or rebuilding of an existing overhead or underground powerline relocating within an existing utility or transportation right-of-way or within otherwise previously disturbed or developed lands proposed for funding through the Electric Infrastructure Loan & Loan Guarantee Program. RD would not apply this CE to underwater powerline projects.

B4.14 Construction and Operation of Electrochemical-Battery or Flywheel Energy Storage Systems

"Construction, operation, upgrade, or decommissioning of an electrochemical-battery or flywheel energy storage system within a previously disturbed or developed area or within a small (as discussed at 10 CFR 1021.410(g)(2)) area contiguous to a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as land use and zoning requirements) in the proposed project area and the integral elements listed at the start of appendix B of this part, and would incorporate appropriate safety standards (including the current National Fire Protection Association 855, Standard for the Installation of Stationary Energy Storage Systems), design and construction standards, control technologies, and best management practices."

RD does not have an existing CE that addresses certain energy storage systems. Adoption of this CE would benefit RD by covering applications with these types of energy storage systems. RD intends to apply this CE in

a manner consistent with DOE's application—to the same types of actions (energy storage systems located within a previously disturbed or developed area or within a small area contiguous to a previously disturbed or developed area). An example of a project type where this CE could be applied by RD includes, but is not limited to, the construction of battery energy storage systems within or adjacent to existing substation sites funded through the Electric Infrastructure Loan & Loan Guarantee, NewERA or PACE Programs.

B5.1 Actions To Conserve Energy or Water

“(a) Actions to conserve energy or water, demonstrate potential energy or water conservation, and promote energy efficiency that would not have the potential to cause significant changes in the indoor or outdoor concentrations of potentially harmful substances. These actions may involve financial and technical assistance to individuals (such as builders, owners, consultants, manufacturers, and designers), organizations (such as utilities), and governments (such as state, local, and tribal). Covered actions include, but are not limited to weatherization (such as insulation and replacing windows and doors); programmed lowering of thermostat settings; placement of timers on hot water heaters; installation or replacement of energy efficient lighting, low-flow plumbing fixtures (such as faucets, toilets, and showerheads), heating, ventilation, and air conditioning systems, and appliances; installation of drip-irrigation systems; improvements in generator efficiency and appliance efficiency ratings; efficiency improvements for vehicles and transportation (such as fleet changeout); transportation management systems (such as traffic signal control systems, car navigation, speed cameras, and automatic plate number recognition); development of energy-efficient manufacturing, industrial, or building practices; and small-scale energy efficiency and conservation research and development and small-scale pilot projects. Covered actions include building renovations or new structures, provided that they occur in a previously disturbed or developed area. Covered actions could involve commercial, residential, agricultural, academic, institutional, or industrial sectors. Covered actions do not include rulemakings, standard-settings, or proposed DOE legislation, except for those actions listed in B5.1(b) of this appendix.

(b) Covered actions include rulemakings that establish energy conservation standards for consumer products and industrial equipment, provided that the actions would not: (1) Have the potential to cause a significant change in manufacturing infrastructure (such as construction of new manufacturing plants with considerable associated ground disturbance); (2) involve significant unresolved conflicts concerning alternative uses of available resources (such as rare or limited raw materials); (3) have the potential to result in a significant increase in the disposal of materials posing significant risks to human health and the environment (such as RCRA hazardous wastes); or (4) have the potential to cause a significant increase in energy consumption in a state or region.”

RD intends to apply this CE in a manner consistent with DOE's application—to the same types of actions. (e.g., providing financial assistance to organizations such as utility cooperatives). An example of a project type where this CE could be applied by RD to similar project types such as energy efficiency proposals that are funded through the Rural Energy for America (REAP) Program.

B5.16 Solar Photovoltaic (PV) Systems and Related Provisions

“The installation, modification, operation, or decommissioning of commercially available solar photovoltaic systems: (1) Located on a building or other structure (such as rooftop, parking lot or facility, or mounted to signage, lighting, gates, or fences); or (2) Located within a previously disturbed or developed area. (b) Covered actions would be in accordance with applicable requirements (such as land use and zoning requirements) in the proposed project area and the integral elements listed at the start of appendix B of this part and would be consistent with applicable plans for the management of wildlife and habitat, including plans to maintain habitat connectivity, and incorporate appropriate control technologies and best management practices.”

RD intends to apply this CE in a manner consistent with DOE's application—to the same types of actions (solar photovoltaic systems located in previously disturbed or developed areas). An example of a project type where this CE could be applied by RD includes, but is not limited to, the construction of a ground mount solar photovoltaic system within a previously disturbed or developed area being funded through the

Infrastructure Loan & Loan Guarantee, NewERA, or PACE Programs. Adoption of this CE by RD would provide significant flexibility to approve solar photovoltaic projects without a predetermined size limit for projects proposed in previously disturbed or developed areas so long as applicable conditions are met. In its environmental review, RD will document how the application of this CE would be consistent with applicable plans for the management of wildlife and habitat, including plans to maintain habitat connectivity, and incorporate appropriate control technologies and best management practices.

Additional conditions applicable to DOE's CEs: DOE defines “Previously disturbed or developed area” as “land that has been changed such that its functioning ecological processes have been and remain altered by human activity,” and further clarifies that “[t]he phrase encompasses areas that have been transformed from natural cover to non-native species or a managed state, including, but not limited to, utility and electric power transmission corridors and rights-of-way, and other areas where active utilities and currently used roads are readily available.” 10 CFR 1021.410(g)(1). DOE's definition of “Previously disturbed or developed area” is substantially the same as the definition RD uses. RD defines “[p]reviously disturbed or developed area” as “land that has been changed such that its functioning ecological processes have been and remain altered by human activity,” which “encompasses areas that have been transformed from natural cover to non-native species or a managed state, including, but not limited to, utility and electric power transmission corridors and rights-of-way, and other areas where active utilities and currently used roads are readily available.” 7 CFR 1970.6(a).

The DOE CEs include additional conditions referred to as integral elements (10 CFR part 1021 subpart D, Appendix B). In order to apply the CEs, the action must be one that would not:

(1) Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of USDA or Executive Orders;

(2) Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;

(3) Disturb hazardous substances, pollutants, contaminants, or Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)—excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;

(4) Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, state, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to:

(i) Property (such as sites, buildings, structures, and objects) of historic, archeological, or architectural significance designated by a Federal, state, or local government, federally recognized Indian tribe, or Native Hawaiian organization, or property determined to be eligible for listing on the National Register of Historic Places;

(ii) Federally listed threatened or endangered species or their habitat (including critical habitat) or Federally-proposed or candidate species or their habitat (Endangered Species Act); state-listed or state-proposed endangered or threatened species or their habitat; Federally-protected marine mammals and Essential Fish Habitat (Marine Mammal Protection Act; Magnuson-Stevens Fishery Conservation and Management Act); and otherwise Federally-protected species (such as the Bald and Golden Eagle Protection Act or the Migratory Bird Treaty Act);

(iii) Floodplains and wetlands;

(iv) Areas having a special designation such as Federally- and state-designated wilderness areas, national parks, national monuments, national natural landmarks, wild and scenic rivers, state and Federal wildlife refuges, scenic areas (such as National Scenic and Historic Trails or National Scenic Areas), and marine sanctuaries;

(v) Prime or unique farmland, or other farmland of statewide or local importance, as defined at 7 CFR 658.2(a), “Farmland Protection Policy Act: Definitions,” or its successor;

(vi) Special sources of water (such as sole-source aquifers, wellhead

protection areas, and other water sources that are vital in a region); and

(vii) Tundra, coral reefs, or rain forests; or

(5) Involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those of the Department of Agriculture, the Environmental Protection Agency, and the National Institutes of Health.

The CEs being adopted will be used to determine whether each proposal, individually or cumulatively, will have a significant effect on the human environment. RD will ensure in its review of each action that: it has not been segmented as required by DOE regulations at 10 CFR 1021.410(b)(3); it has been reviewed for integral elements; and that RD is applying the appropriate level of environmental review to the action as required by the CEQ regulations at 40 CFR 1501.3.

III. Consideration of Extraordinary Circumstances

RD’s implementing procedures for extraordinary circumstances at 7 CFR 1970.52 will be used when evaluating projects where the adopted CEs will be applied because both agencies define extraordinary circumstances very closely (see 10 CFR 1021.410(b)(2)). RD procedures for extraordinary circumstances also direct the agency to consider “characteristics of the geographic area affected by the proposal,” and include a list of specific “[s]ignificant adverse environmental effects that the Agency considers to be extraordinary circumstances.” Because RD’s definition of extraordinary circumstances includes DOE’s definition in its entirety, but also includes additional details that address considerations relevant to RD’s programs, RD will rely on the language found in RD’s implementing procedures. RD’s regulations include the same factors as DOE’s regulations, and DOE also requires an evaluation for the integral elements defined in 10 CFR part 1021 Subpart D, Appendix B.

IV. Consultation With DOE and Determination of Appropriateness

RD and DOE consulted on the appropriateness of RD’s adoption of the CEs in February, April, October, and November of 2024. RD and DOE’s consultation included a review of DOE’s experience developing and applying the

CEs, the types of actions for which RD plans to utilize the CEs, and consideration of extraordinary circumstances. These RD actions are similar to the type of projects that DOE undertakes or funds and therefore the effects of RD projects will be similar to the effects of DOE projects, which are not significant, absent the existence of extraordinary circumstances that could involve potentially significant effects. Therefore, RD has determined that its proposed use of the CEs as described in this notice would be appropriate.

V. Notice to the Public and Documentation of Adoption

This notice serves to identify to the public and document RD’s adoption of DOE’s CEs, per 40 CFR 1501.4(e)(3) for contracts, policies, and marketing and allocation plans for electric power; power marketing services and activities; electricity transmission agreements; upgrading and rebuilding of existing powerlines, construction and operation of electrochemical-battery or flywheel energy storage systems; actions to conserve energy or water; and solar photovoltaic systems. The notice identifies the types of actions to which RD will apply the CEs, as well as the considerations that RD will use in determining whether an action is within the scope of the CEs.

Issued under authority delegated in 7 CFR 2.17.

Basil I. Gooden,

Under Secretary for Rural Development, U.S. Department of Agriculture.

BILLING CODE 3410–XY–P

INTERNATIONAL BROADCASTING ADVISORY BOARD

Sunshine Act Meetings

TIME AND DATE: December 11, 2024; 9:00 a.m.–12:30 p.m. Local Time.

PLACE: On December 11, 2024, the Board will meet at: Radio Free Europe/ Radio Liberty Headquarters, Vinohradská 159a, 100 00 Prague 10.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: The International Broadcasting Advisory Board (Board) will conduct a meeting closed to the public at the date and time listed above. Board Members (membership includes Chair Kenneth Jarin, Luis Botello, Jamie Fly, Michelle Giuda, Kathleen Matthews, Under Secretary Lee Satterfield (Secretary of State’s Representative)), Chief Executive Officer of the U.S. Agency for Global

Media (USAGM), the USAGM General Counsel and Acting Board Secretary to the Board, the Secretariat to the Board, and recording secretaries will attend the closed meeting. Certain USAGM staff members who may be called on to brief or support the Board also may attend.

The USAGM General Counsel and Board Secretary has certified that, in his opinion, exemptions set forth in the Government in the Sunshine Act, in particular 5 U.S.C. 552b(c)(2), (6), and (9)(B), permit closure of this meeting.

The entirety of the Board's membership approved the closing of this meeting.

The purpose for closing the meeting is so that the IBAB may decide on hiring certain entity heads. The closed meeting also will focus on discussing the development of internal rules and practices to govern Board processes and functions. This includes developing processes or rules relating to IBAB, USAGM, and the USAGM entities. Publicizing these deliberations would frustrate the implementation of the very items they will be proposing. [This related to (2), (6) and (9).]

In the event that the time, date, or location of this meeting changes, IBAB will post an announcement of the change, along with the new time, date, and/or place of the meeting on its website at <https://www.ibab.gov>.

Although a separate federal entity, USAGM prepared this notice and will continue to support the Board in accordance with 22 U.S.C. 6205(g).

CONTACT PERSON FOR MORE INFORMATION: Persons interested in obtaining more information should contact USAGM's Executive Director Oanh Tran at (202) 920-2583.

Authority: 5 U.S.C. 552b, 22 U.S.C. 6205(e)(3)(C).

Dated: November 27, 2024.

Meredith L. Meads,

Executive Assistant, USAGM.

BILLING CODE 8610-01-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 2171]

Reorganization of Foreign-Trade Zone 123 Under Alternative Site Framework; Denver, Colorado

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones (FTZ) Act provides for “. . . the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes,” and authorizes the Board to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs and Border Protection ports of entry;

Whereas, the Board adopted the alternative site framework (ASF) (15 CFR 400.2(c)) as an option for the establishment or reorganization of zones;

Whereas, the World Trade Center Denver, grantee of Foreign-Trade Zone 123, submitted an application to the Board (FTZ Docket B-16-2024, docketed April 18, 2024) for authority to reorganize under the ASF with a service area of Adams, Arapahoe, Broomfield, Denver, Douglas, Elbert, and Morgan Counties and a portion of Larimer and Weld Counties, Colorado, in and adjacent to the Denver Customs and Border Protection port of entry, FTZ 123's existing Sites 3 and 4 would be categorized as magnet sites, and existing Site 7 would be categorized as a usage-driven site;

Whereas, notice inviting public comment was given in the **Federal Register** (89 FR 31132-31133, April 24, 2024) and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiners' report, and finds that the requirements of the FTZ Act and the Board's regulations are satisfied;

Now, therefore, the Board hereby orders:

The application to reorganize FTZ 123 under the ASF is approved, subject to the FTZ Act and the Board's regulations, including section 400.13, to the Board's standard 2,000-acre activation limit for the zone, to an ASF sunset provision for magnet sites that would terminate authority for Sites 3 and 4 if not activated within five years from the month of approval, and to an ASF sunset provision for usage-driven sites that would terminate authority for Site 7 if no foreign-status merchandise is admitted for a *bona fide* customs purpose within three years from the month of approval.

Dated: November 25, 2024.

Dawn Shackleford,

Executive Director of Trade Agreements Policy & Negotiations, Alternate Chairman, Foreign-Trade Zones Board.

International Trade Administration

[C-570-091]

Certain Steel Wheels 12 to 16.5 Inches in Diameter From the People's Republic of China: Final Results of the Expedited First Sunset Review of the Countervailing Duty Order; 2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that revocation of the countervailing duty (CVD) order on certain steel wheels 12 to 16.5 inches in diameter (steel wheels) from the People's Republic of China (China) would be likely to lead to continuation or recurrence of countervailable subsidies at the levels indicated in the “Final Results of the Sunset Review” section of this notice.

DATES: Applicable December 2, 2024.

FOR FURTHER INFORMATION CONTACT: Peter Zukowski, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-0189.

SUPPLEMENTARY INFORMATION:

Background

On September 3, 2019, Commerce published the *Order* on steel wheels from China.¹ On August 1, 2024, Commerce published the notice of initiation of the first sunset review of the *Order*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).² On August 16, 2024, Commerce received a notice of intent to participate from Dexstar Wheel Division of Americana Development Inc. (the domestic interested party), within the deadline specified in 19 CFR 351.218(d)(1)(i).³ The domestic interested party claimed interested party status under section 771(9)(C) of the Act as a U.S. producer engaged in the production of steel wheels in the United States.

On August 30, 2024, Commerce received an adequate substantive response from the domestic interested party within the 30-day deadline

¹ See *Certain Steel Trailer Wheels 12 to 16.5 Inches from the People's Republic of China: Antidumping Duty and Countervailing Duty Orders*, 84 FR 45952 (September 3, 2019) (*Order*).

² See *Initiation of Five-Year (Sunset) Reviews*, 89 FR 62717 (August 1, 2024).

³ See Domestic Interested Party's Letter, “Petitioner's Notice of Intent to Participate in the First Five-Year Review,” dated August 16, 2024.

specified in 19 CFR 351.218(d)(3)(i).⁴ Commerce did not receive a substantive response from any government or respondent interested party to this proceeding. On September 24, 2024, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from any respondent interested party.⁵ As a result, Commerce conducted an expedited (120-day) sunset review of the *Order*, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(B)(2) and (C)(2).

Scope of the Order

The merchandise covered by this *Order* is certain on-the-road steel wheels, discs, and rims for tubeless tires with a nominal wheel diameter of 12 inches to 16.5 inches, regardless of width. For a complete description of the scope of the *Order*, see the Issues and Decision Memorandum.⁶

Analysis of Comments Received

A complete discussion of all issues raised in this sunset review, including the likelihood of continuation or recurrence of subsidization in the event of revocation of the *Order* and the countervailable subsidy rates likely to prevail if the *Order* were to be revoked, is provided in the Issues and Decision Memorandum. A list of the topics discussed in the Issues and Decision Memorandum is attached as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), which is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Final Results of Sunset Review

Pursuant to sections 751(c) and 752(b) of the Act, we determine that revocation of the *Order* would be likely to lead to continuation or recurrence of countervailable subsidies at the

following net countervailable subsidy rates:

Producers/exporters	Subsidy rate (percent <i>ad valorem</i>)
Xingmin Intelligent Transportation Systems (Group) ⁷	386.45
Zhejiang Jingsu Company Limited ⁸	388.31
All Others	387.38

Administrative Protective Order (APO)

This notice serves as the only reminder to parties subject to an APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

Commerce is issuing and publishing these final results and this notice in accordance with sections 751(c), 752(b), and 777(i)(1) of the Act, and 19 CFR 351.218.

Dated: November 25, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Appendix

List of Topics Discussed in the Issues and Decision Memorandum

- I. Summary
- II. Background
- III. Scope of the *Order*
- IV. History of the *Order*
- V. Legal Framework
- VI. Discussion of the Issues
 1. Likelihood of Continuation or Recurrence of a Countervailable Subsidy Likely to Prevail
 2. Net Countervailable Subsidy Rates
 3. Nature of the Subsidies
- VII. Final Results of Sunset Review

⁷ Commerce assigned Xingmin Intelligent Transportation Systems (Group)'s rate to each of the entities for which it provided an initial questionnaire response in the investigation: Sino-Tex (Longkou) Wheel Manufacturers Inc.; Tangshan Xingmin Wheel Co., Ltd.; and Xianning Xingmin Wheel Co., Ltd.

⁸ Commerce assigned Zhejiang Jingu Company Limited's rate to each of the entities named as cross-owned in its affiliation questionnaire response in the investigation: Shanghai Yata Industry Company Limited; Shangdong Jingu Auto Parts Co., Ltd.; An'Gang Jingu (Hangzhou) Metal Materials Co., Ltd.; Zhejiang Wheel World Co., Ltd.; and Hangzhou Jingu New Energy Development Co. Ltd. Zhejiang Jingu's rate has also been assigned to Zhejiang Jingu Automobile Components, which was the prior name of Zhejiang Jingu.

[A–570–108]

Ceramic Tile from the People's Republic of China: Rescission of Antidumping Duty Administrative Review; 2023–2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is rescinding the administrative review of the antidumping duty (AD) order on ceramic tile from the People's Republic of China (China) for the period of review (POR) June 1, 2023, through May 31, 2024.

DATES: Applicable December 2, 2024.

FOR FURTHER INFORMATION CONTACT:

Mark Flessner, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6312.

SUPPLEMENTARY INFORMATION:

Background

On June 1, 2020, Commerce published in the **Federal Register** the AD order on ceramic tile from China.¹ On June 3, 2024, Commerce published in the **Federal Register** a notice of opportunity to request an administrative review of the *Order*.² On June 28, 2024, Commerce received a timely request from interested party importer Akua BPAC, LLC (Akua), in accordance with 19 CFR 351.213(b)(1), to conduct an administrative review of the *Order* for two companies, Cayenne Corporation Ltd. (Cayenne), and Foshan Qiangshengda Building Material Co. Ltd. (Foshan Qiangshengda).³

On July 29, 2024, Commerce published in the **Federal Register** a notice of initiation of administrative review with respect to imports of

¹ See *Ceramic Tile from the People's Republic of China: Antidumping Duty Order*, 85 FR 33089 (June 1, 2020) (the *Order*); see also *Ceramic Tile from the People's Republic of China: Notice of Correction to the Antidumping Duty Order*, 85 FR 35905 (June 12, 2020).

² See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation: Opportunity to Request Administrative Review and Join Annual Inquiry Service List*, 89 FR 47518 (June 3, 2024).

³ See Akua's Letter, "Request for Administrative Review," dated June 28, 2024.

⁴ See Domestic Interested Party's Letter, "Petitioner's Substantive Response to the Notice of Initiation," dated August 30, 2024.

⁵ See Memorandum, "Sunset Reviews Initiated on August 1, 2024," dated September 24, 2024.

⁶ See Memorandum, "Issues and Decision Memorandum for the Final Results of the Expedited First Sunset Review of the Countervailing Duty Order on Certain Steel Wheels 12 to 16.5 Inches in Diameter from the People's Republic of China; 2024," dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

ceramic tile manufactured or exported by Cayenne and Foshan Qiangshengda, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.221(c)(1)(i).⁴ On August 5, 2024, we placed on the record U.S. Customs and Border Protection (CBP) data for entries of ceramic tile from China during the POR, showing no reviewable POR entries, and invited interested parties to comment.⁵ On August 12, 2024, the Coalition for Fair Trade in Ceramic Tile (petitioner) submitted comments to Commerce regarding the CBP data, requesting that Commerce rescind the administrative review.⁶

Additionally, on August 20, 2024, Commerce notified all interested parties of its intent to rescind this administrative review in full because there were no reviewable, suspended entries of subject merchandise by the company listed in the *Initiation Notice* during the POR and invited interested parties to comment.⁷ On August 27, 2024, the petitioner submitted comments to Commerce regarding the intent to rescind the instant review, again requesting that Commerce rescind the review.⁸

Rescission of Review

Pursuant to 19 CFR 351.213(d)(3), it is Commerce's practice to rescind an administrative review of an AD order when there are no reviewable entries of subject merchandise during the POR for which liquidation is suspended.⁹ Normally, upon completion of an administrative review, the suspended entries are liquidated at the AD assessment rate calculated for the review period.¹⁰ Therefore, for an administrative review to be conducted, there must be a reviewable, suspended entry that Commerce can instruct CBP

to liquidate at the AD assessment rate calculated for the review period.¹¹ As noted above, there were no entries of subject merchandise for the companies listed in the *Initiation Notice* during the POR. Accordingly, in the absence of suspended entries of subject merchandise during the POR, we are hereby rescinding this administrative review, in its entirety, in accordance with 19 CFR 351.213(d)(3).

Assessment

Commerce will instruct CBP to assess antidumping duties on all appropriate entries. Antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of this rescission notice in the **Federal Register**.

Notification Regarding Administrative Protective Order

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation subject to sanction.

Notification to Interested Parties

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(d)(4).

Dated: November 25, 2024.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–201–844]

Steel Concrete Reinforcing Bar From Mexico: Preliminary Results and Rescission, in Part, of Antidumping Duty Administrative Review; 2022–2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily finds that Deacero S.A.P.I. de C.V. (Deacero) and I.N.G.E.T.E.K.N.O.S. Estructurales, S.A. de C.V. (Ingetek) (collectively, Deacero Group); and TA 2000 S.A. de C.V. (TA 2000) sold steel concrete reinforcing bar (rebar) from Mexico at less than normal value during the period of review (POR), November 1, 2022, through October 31, 2023. Additionally, Commerce is rescinding this administrative review with respect to certain companies. We invite interested parties to comment on these preliminary results.

DATES: Applicable December 2, 2024.

FOR FURTHER INFORMATION CONTACT: Kyle Clahane or T.J. Worthington, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5449 or (202) 482–4567, respectively.

SUPPLEMENTARY INFORMATION:

Background

On November 6, 2014, Commerce published in the **Federal Register** the antidumping duty (AD) order on rebar from Mexico.¹ On November 2, 2023, we published in the **Federal Register** a notice of opportunity to request an administrative review of the Order.² On December 29, 2023, pursuant to section

⁴ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 89 FR 60871 (July 29, 2024) (*Initiation Notice*).

Supp. 3d 1328, 1335–36 (CIT 2019), at 12 (referring to section 751(a) of the Act, the CIT held: “While the statute does not explicitly require that an entry be suspended as a prerequisite for establishing entitlement to a review, it does explicitly state the determined rate will be used as the liquidation rate for the reviewed entries. This result can only obtain if the liquidation of entries has been suspended. . . .”; see also *Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Final Results of Antidumping Duty Administrative Review and Final Determination of No Shipments; 2018–2019*, 86 FR 36102, and accompanying Issues and Decision Memorandum at Comment 4; and *Solid Fertilizer Grade Ammonium Nitrate From the Russian Federation: Notice of Rescission of Antidumping Duty Administrative Review*, 77 FR 65532 (October 29, 2012) (noting that “for an administrative review to be conducted, there must be a reviewable, suspended entry to be liquidated at the newly calculated assessment rate”).

¹ See *Steel Concrete Reinforcing Bar from Mexico: Antidumping Duty Order*, 79 FR 65925 (November 6, 2014) (Order).

² See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation: Opportunity to Request Administrative Review and Join Annual Inquiry Service List*, 88 FR 75270 (November 2, 2023).

751(a)(1) of the Tariff Act of 1930, as amended (the Act), Commerce initiated an administrative review of the *Order* covering eleven companies.³ On July 22, 2024, Commerce tolled certain deadlines in this administrative proceeding by seven days.⁴ On July 29, 2024, Commerce extended the deadline for the preliminary results until November 22, 2024.⁵

For a complete description of the events that followed the initiation of this review, see the Preliminary Decision Memorandum.⁶ A list of topics discussed in the Preliminary Decision Memorandum is attached as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Scope of the Order

The product covered by this *Order* is rebar from Mexico. For a full description of the scope of the *Order*, see the Preliminary Decision Memorandum.

Rescission of Review, In Part

As noted above, we initiated this review with respect to 11 companies.⁷

³ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 88 FR 90168 (December 29, 2023) (*Initiation Notice*).

⁴ See Memorandum, "Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings," dated July 22, 2024.

⁵ See Memorandum, "Extension of Deadline for Preliminary Results of Antidumping Duty Administrative Review," dated July 29, 2024.

⁶ See Memorandum, "Decision Memorandum for the Preliminary Results of the Administrative Review of the Antidumping Duty Order: Steel Concrete Reinforcing Bar from Mexico; 2022–2023," dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

⁷ See *Initiation Notice*, 88 FR at 90170–90171. Commerce previously found Deacero and Ingetek to be affiliated, and we continue to treat them as a single entity. See *Steel Concrete Reinforcing Bar from Mexico: Final Results of Antidumping Duty Administrative Review; 2020–2021*, 88 FR 37849 (June 9, 2023) (*Rebar from Mexico AR 2020–2021 Final*), and accompanying Issues and Decision Memorandum (IDM) at Comment 3. Therefore, they were listed together in the *Initiation Notice*. Separately, Commerce has previously collapsed Grupo Simec S.A.B. de C.V.; Aceros Especiales Simec Tlaxcala, S.A. de C.V.; Fundiciones de Acero Estructurales, S.A. de C.V.; Grupo Chant, S.A.P.I. de C.V.; Operadora de Perfiles Sigosa, S.A. de C.V.; Orge S.A. de C.V.; Perfiles Comerciales Sigosa, S.A. de C.V.; Siderurgicos Noroeste, S.A. de C.V.; Simec Internacional 6 S.A. de C.V.; Simec Internacional 7, S.A. de C.V.; and Simec Internacional, S.A. de C.V.

During the course of the review, we selected two mandatory respondents, which included three of the named companies.⁸ As a consequence, there are eight companies upon which a review was requested and which were not selected for individual examination.

Commerce received a timely withdrawal request within 90 days of the date of publication of the *Initiation Notice* with respect to Gerdau Corsa S.A.P.I. de C.V. (Gerdau Corsa).⁹ No other party requested a review of this company. As a result, Commerce is rescinding this review, in part, with respect to Gerdau Corsa in accordance with 19 CFR 351.213(d)(1).¹⁰

In addition, pursuant to 19 CFR 351.213(d)(3), Commerce will rescind an administrative review when there are no reviewable suspended entries. Based on our analysis of U.S. Customs and Border Protection (CBP) information, eight companies listed in the *Initiation Notice* had no entries of subject merchandise during the POR, including one of which had all its requests for review timely withdrawn (*i.e.*, Gerdau Corsa) and seven that remain subject to a review request. On March 26, 2024, we notified parties of our intent to rescind this administrative review with respect to the companies that had no reviewable suspended entries during the POR.¹¹ No party to the proceeding provided comments on our Intent to Rescind Memorandum. As a result, we are rescinding this review, in part, with respect to the remaining seven companies which had no entries in the POR.¹² Accordingly, the companies that

into the single entity "Grupo Simec." Therefore, they were listed together in the *Initiation Notice*. See *Rebar from Mexico AR 2020–2021 Final IDM* at Comment 3; see also *Steel Concrete Reinforcing Bar from Mexico: Preliminary Results of Antidumping Duty Administrative Review; 2016–2017*, 83 FR 63622 (December 11, 2018), and accompanying memorandum, "Affiliation and Collapsing Memorandum for the Grupo Simec," dated December 3, 2018, unchanged in *Steel Concrete Reinforcing Bar from Mexico: Final Results of Antidumping Duty Administrative Review; 2016–2017*, 84 FR 35599 (July 24, 2019).

⁸ See Memorandum, "Respondent Selection," dated March 1, 2024. As discussed below in the "Preliminary Successor-in-Interest Determination" section below, Commerce has preliminarily determined that TA 2000 is the successor-in-interest to Talleres y Aceros S.A. de C.V. (TYASA).

⁹ See Gerdau Corsa's Letter, "Withdrawal of Request for Administrative Review," dated January 25, 2024.

¹⁰ See Appendix II.

¹¹ See Memorandum, "Notice of Intent to Rescind Review, In Part," dated March 26, 2024 (Intent to Rescind Memorandum).

¹² See Appendix II. As explained above, in accordance with 19 CFR 351.213(d)(1), Commerce is also rescinding this review, in part, with respect to Gerdau Corsa based on receiving a timely withdrawal request.

remain subject to the instant review are Deacero Group and TA 2000.

Preliminary Successor-in-Interest Determination

Commerce initiated this administrative review with respect to eleven companies, including TA 2000 and TYASA.¹³ TA 2000 reported that the company was formerly named TYASA, and continues to market and sell merchandise under the TYASA brand name.¹⁴ We requested additional information, which TA 2000 submitted in response to a supplemental questionnaire.¹⁵ We have analyzed record information regarding changes in TYASA's management, manufacturing facilities, customers, and suppliers, and preliminarily determine that TA 2000 is the successor-in-interest to TYASA. Accordingly, we have treated TYASA and TA 2000 as the same company in our analysis in this review. See the Preliminary Decision Memorandum for further information. Should our preliminary successor-in-interest determination remain unchanged in the final results of review, we will instruct CBP to apply the assessment rates that we calculated for TA 2000 to POR entries of subject merchandise from both TA 2000 and TYASA.

Methodology

Commerce is conducting this review in accordance with section 751(a)(1)(B) of the Act. Export price was calculated in accordance with section 772 of the Act. Normal value was calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our conclusions, see the Preliminary Decision Memorandum.

Preliminary Results of Review

As a result of this review, we preliminarily determine the following estimated weighted-average dumping margins exist for the period November 1, 2022, through October 31, 2023:

Producer/exporter	Weighted-average dumping margin (percent)
Deacero S.A.P.I. de C.V./ I.N.G.E.T.E.K.N.O.S. Estructurales S.A.	8.88
TA 2000 S.A. de C.V. ¹⁶	22.27

¹³ See *Initiation Notice*, 88 FR at 90171.

¹⁴ See Preliminary Decision Memorandum (citing TA 2000's Letter, "Section A Response," dated April 25, 2024, at 1).

¹⁵ See Preliminary Decision Memorandum (citing Commerce's Letter, "Supplemental Questionnaire for TA 2000," dated August 21, 2024, and TA 2000's Letter, "Supplemental Response," dated September 23, 2024).

Disclosure and Public Comment

Commerce intends to disclose the calculations performed in connection with these preliminary results to interested parties within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).¹⁷

Interested parties may submit case briefs no later than 30 days after the date of publication of this notice.¹⁸ Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than five days after the date for filing case briefs.¹⁹ Interested parties who submit case or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and, (2) a table of authorities.²⁰

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their briefs that should be limited to five pages total, including footnotes. In this review, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.²¹ Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final results in this administrative review. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).²²

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, using Enforcement and Compliance's ACCESS system within 30

days of publication of this notice. Requests should contain (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. Issues raised in the hearing will be limited to those raised in the case and rebuttal briefs. If a request for a hearing is made, we will inform parties of the scheduled date and location for the hearing at a time to be determined.²³ Parties should confirm by telephone the date, time, and location of the hearing no fewer than two days before the scheduled date. Parties are reminded that all briefs and hearing requests must be filed electronically using ACCESS and received successfully in their entirety by 5:00 p.m. Eastern Time on the due date.

Unless the deadline is extended pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2), Commerce will issue the final results of this administrative review, including the results of our analysis of the issues raised by the parties in their case briefs, not later than 120 days after the date of publication of this notice, pursuant to section 751(a)(3)(A) of the Act.

Assessment Rates

Upon issuance of the final results, Commerce shall determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this review. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by this review and for future deposits of estimated duties, where applicable.²⁴ Commerce intends to issue assessment instructions to CBP no earlier than 41 days after the date of publication of the final results of this review in the **Federal Register**, in accordance with 19 CFR 356.8(a).

If the respective weighted-average dumping margins are above *de minimis* (i.e., 0.50 percent) in the final results of this review, we will calculate importer-specific *ad valorem* AD assessment rates based on the ratio of the total amount of dumping calculated for the importer's examined sales to the total entered value of those same sales in accordance with 19 CFR 351.212(b)(1).²⁵ If the respondent has not reported entered values, we will calculate a per-unit

assessment rate for each importer by dividing the total amount of dumping calculated for the examined sales made to that importer by the total quantity associated with those sales. We will instruct CBP to assess antidumping duties on all appropriate entries covered by this review when the importer-specific assessment rate calculated in the final results of this review is above *de minimis* (i.e., 0.50 percent). Where either the respondent's weighted-average dumping margin is zero or *de minimis*, or an importer-specific assessment rate is zero or *de minimis*, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

In accordance with Commerce's "automatic assessment" practice, for entries of subject merchandise during the POR produced by the respondents for which they did not know that the merchandise was destined for the United States, we will instruct CBP to liquidate entries not reviewed at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

For the companies for which the administrative review is rescinded, antidumping duties shall be assessed at a rate equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the notice of the final results of the administrative review for all shipments of rebar from Mexico entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results, as provided by section 751(a)(2) of the Act: (1) the cash deposit rate for each company listed above will be equal to the dumping margins established in the final results of this review, except if the ultimate rate is *de minimis* within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rates will be zero; (2) for merchandise exported by producers or exporters not covered in this administrative review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which the producer or exporter participated; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation but the producer is, then the cash deposit rate will be the rate

¹⁶ As discussed in further detail in the Preliminary Decision Memorandum, we preliminarily determine that TA 2000 is the successor-in-interest to Talleres y Aceros S.A. de C.V.

¹⁷ See 19 CFR 351.224(b).

¹⁸ See 19 CFR 351.309(c)(1)(ii).

¹⁹ See 19 CFR 351.309(d); see also *Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings*, 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Procedures*).

²⁰ See 19 CFR 351.309(c)(2) and (d)(2).

²¹ We use the term "issue" here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

²² See *APO and Service Procedures*.

²³ See 19 CFR 351.310.

²⁴ See section 751(a)(2)(C) of the Act.

²⁵ In these preliminary results, Commerce applied the assessment rate calculation method adopted in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Proceedings; Final Modification*, 77 FR 8101 (February 14, 2012).

established for the most recently completed segment of the proceeding for the producer of the merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 20.58 percent, the all-others rate established in the AD investigation.²⁶ These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act, 19 CFR 351.213(h)(2) and 351.221(b)(4).

Dated: November 22, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

[A–570–090]

Certain Steel Wheels 12 to 16.5 Inches in Diameter From the People's Republic of China: Final Results of the Expedited First Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of this expedited sunset review, the U.S. Department of Commerce (Commerce) finds that revocation of the antidumping duty (AD) order on certain steel wheels 12 to 16.5 inches in diameter (steel wheels) from the People's Republic of China (China) would be likely to lead to continuation or recurrence of dumping at the levels indicated in the “Final Results of Sunset Review” section of this notice.

DATES: Applicable December 2, 2024.

FOR FURTHER INFORMATION CONTACT: Kate Fracke, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3299.

SUPPLEMENTARY INFORMATION:

Background

On September 3, 2019, Commerce published the AD order on steel wheels from China.¹ On August 1, 2024, Commerce published the notice of initiation of the first sunset review of the *Order*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).²

On August 16, 2024, Commerce received a notice of intent to participate in this review from the Dexstar Wheel Division of Americana Development (Dexstar) within the deadline specified in 19 CFR 351.218(d)(1)(i).³ Dexstar claimed interested party status under section 771(9)(c) of the Act and 19 CFR

351.102(b)(17) as a producer of a domestic like product in the United States.⁴ On August 30, 2024, Commerce received an adequate substantive response from Dexstar.⁵ We received no substantive responses from any other interested parties, nor was a hearing requested.

On September 24, 2024, Commerce notified the U.S. International Trade Commission (ITC) that it did not receive an adequate substantive response from respondent interested parties.⁶ As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited (120-day) sunset review of the *Order*.

Scope of the Order

The scope of the *Order* covers certain steel trailer wheels with a nominal wheel diameter of 12 to 16.5 inches, regardless of width. For a full description of the scope, *see* the Issues and Decision Memorandum.⁷

Analysis of Comments Received

A complete discussion of all issues raised in this sunset review is contained in the accompanying Issues and Decision Memorandum.⁸ A list of topics discussed in the Issues and Decision Memorandum is included as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://access.trade.gov/public/FRNoticesListLayout.aspx>.

Final Results of Sunset Review

Pursuant to sections 751(c)(1), and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the *Order* would be likely to lead to the continuation or recurrence of dumping and that the magnitude of the dumping

likely to prevail would be margins up to 44.35 percent.⁹

Administrative Protective Order (APO)

This notice serves as the only reminder to interested parties subject to an APO of their responsibility concerning the return/destruction or conversion to judicial protective order of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act, and 19 CFR 351.218.

Dated: November 25, 2024.

Glycine From India: Final Results of the Countervailing Duty Administrative Review; 2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.
SUMMARY: The U.S. Department of Commerce (Commerce) determines that countervailable subsidies were provided to Kumar Industries, India (Kumar), a producer and exporter of glycine from India during the period of review (POR) January 1, 2022, through December 31, 2022.

DATES: Applicable December 2, 2024.
FOR FURTHER INFORMATION CONTACT: Scarlet Jaldin or Amber Hodak AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4275 or (202) 482–8034, respectively.

SUPPLEMENTARY INFORMATION:
Background

On July 5, 2024, Commerce published the *Preliminary Results* of this administrative review.¹ On July 22, 2024, Commerce tolled certain deadlines in this administrative proceeding by seven days.² On November 12, 2024, Commerce extended the deadline for these final results to November 19, 2024.³ On November 18, 2024, Commerce further extended the deadline for these final results by an additional three days, to November 22, 2024.⁴ We received timely filed case and rebuttal briefs from Deer Park Glycine, LLC (the petitioner) and Kumar.⁵ For a complete description of the events that occurred since the *Preliminary Results*, see the Issues and Decision Memorandum.⁶

Scope of the Order⁷
The merchandise covered by the Order is glycine from India. For a complete description of the scope of the Order, see the Issues and Decision Memorandum.⁸

Analysis of Comments Received
All issues raised in the parties’ briefs are addressed in the Issues and Decision Memorandum. A list of the issues

addressed is attached as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Changes Since the Preliminary Results

Based on the arguments raised and a review of the record and all supporting documentation, we made certain changes to the *Preliminary Results*. For a full description of these revisions, see the Issues and Decision Memorandum.

Methodology
Commerce conducted this administrative review in accordance with section 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act). For each of the subsidy programs found to be countervailable, Commerce finds that there is a subsidy, *i.e.*, a financial contribution by an “authority” that gives rise to a benefit to the recipient, and that the subsidy is specific.⁹ For a full description of the methodology underlying our conclusions, including any determination that relied upon the use of adverse facts available pursuant to section 776(a) and (b) of the Act, see the accompanying Issues and Decision Memorandum.

Final Results of Review
Commerce determines that the following countervailable subsidy rate exists for the period January 1, 2022, through December 31, 2022:¹⁰

Company	Subsidy rate (percent <i>ad valorem</i>)
Kumar Industries, India; Advance Chemical Corporation; Rexusize Rasayan Industries; Reliance Corporation	6.03

Disclosure
Commerce intends to disclose its calculations and analysis performed to

⁹ See sections 771(5)(B) and (D) of the Act regarding financial contribution; see also section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.
¹⁰ As discussed in the *Preliminary Results* and Issues and Decision Memorandum, Commerce has found the following companies to be cross-owned with Kumar Industries, India: Advance Chemical Corporation, Rexusize Rasayan Industries, and Reliance Corporation.

⁹ *Id.*

interested parties for these final results within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of the notice of final results in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to sections 751(a)(1) and (a)(2)(C) of the act and 19 CFR 351.212(b)(2), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, countervailing duties on all appropriate entries for the above-listed companies at the applicable *ad valorem* assessment rates. Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for statutory injunction has expired (*i.e.*, within 90 days of publication).

Cash Deposit Requirements

In accordance with section 751(a)(1) of the Act, Commerce intends to instruct CBP to collect cash deposits of estimated countervailing duties for each of the companies listed above on shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. For all non-reviewed firms, we will instruct CBP to continue to collect cash deposits of estimated countervailing duties at the all-others rate or the most recent company-specific rate applicable to the company, as appropriate. These cash deposit instructions, effective upon publication of these final results, shall remain in effect until further notice.

Administrative Protective Order

This notice also serves as a final reminder to parties subject to an

administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

Commerce is issuing the final results and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: November 22, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Five-Year (Sunset) Reviews

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In accordance with the Tariff Act of 1930, as amended (the Act), the U.S. Department of Commerce (Commerce) is automatically initiating the five-year reviews (Sunset Reviews) of the antidumping and countervailing duty (AD/CVD) order(s) and suspended investigation(s) listed below. The U.S. International Trade Commission (ITC) is publishing concurrently with this notice its notice of *Institution of Five-Year Reviews* which covers the same order(s) and suspended investigation(s).

DATES: Applicable December 2, 2024.

FOR FURTHER INFORMATION CONTACT:

Commerce official identified in the *Initiation of Review* section below at AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230. For information from the ITC, contact Mary Messer, Office of Investigations, U.S. International Trade Commission at (202) 205–3193.

SUPPLEMENTARY INFORMATION:

Background

Commerce's procedures for the conduct of Sunset Reviews are set forth in its *Procedures for Conducting Five-Year (Sunset) Reviews of Antidumping and Countervailing Duty Orders*, 63 FR 13516 (March 20, 1998) and 70 FR 62061 (October 28, 2005). Guidance on methodological or analytical issues relevant to Commerce's conduct of Sunset Reviews is set forth in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Duty Proceedings; Final Modification*, 77 FR 8101 (February 14, 2012).

Initiation of Review

In accordance with section 751(c) of the Act and 19 CFR 351.218(c), we are initiating the Sunset Reviews of the following antidumping and countervailing duty order(s) and suspended investigation(s):

DOC case No.	ITC case No.	Country	Product	Commerce contact

Filing Information

As a courtesy, we are making information related to sunset proceedings, including copies of the

pertinent statute and Commerce's regulations, Commerce's schedule for Sunset Reviews, a listing of past revocations and continuations, and current service lists, available to the

public on Commerce's website at the following address: <https://enforcement.trade.gov/sunset/>. All submissions in these Sunset Reviews must be filed in accordance with Commerce's

regulations regarding format, translation, and service of documents. These rules, including electronic filing requirements via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), can be found at 19 CFR 351.303.

In accordance with section 782(b) of the Act, any party submitting factual information in an AD/CVD proceeding must certify to the accuracy and completeness of that information. Parties must use the certification formats provided in 19 CFR 351.303(g). Commerce intends to reject factual submissions if the submitting party does not comply with applicable revised certification requirements.

Letters of Appearance and Administrative Protective Orders

Pursuant to 19 CFR 351.103(d), Commerce will maintain and make available a public service list for these proceedings. Parties wishing to participate in any of these five-year reviews must file letters of appearance as discussed at 19 CFR 351.103(d). To facilitate the timely preparation of the public service list, it is requested that those seeking recognition as interested parties to a proceeding submit an entry of appearance within 10 days of the publication of the Notice of Initiation. Because deadlines in Sunset Reviews can be very short, we urge interested parties who want access to proprietary information under administrative protective order (APO) to file an APO application immediately following publication in the **Federal Register** of this notice of initiation. Commerce's regulations on submission of proprietary information and eligibility to receive access to business proprietary information under APO can be found at 19 CFR 351.304–306. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.¹

Information Required From Interested Parties

Domestic interested parties, as defined in sections 771(9)(C), (D), (E), (F), and (G) of the Act and 19 CFR 351.102(b), wishing to participate in a Sunset Review must respond not later than 15 days after the date of publication in the **Federal Register** of this notice of initiation by filing a notice of intent to participate. The required

contents of the notice of intent to participate are set forth at 19 CFR 351.218(d)(1)(ii). In accordance with Commerce's regulations, if we do not receive a notice of intent to participate from at least one domestic interested party by the 15-day deadline, Commerce will automatically revoke the order without further review.²

If we receive an order-specific notice of intent to participate from a domestic interested party, Commerce's regulations provide that *all parties* wishing to participate in a Sunset Review must file complete substantive responses not later than 30 days after the date of publication in the **Federal Register** of this notice of initiation. The required contents of a substantive response, on an order-specific basis, are set forth at 19 CFR 351.218(d)(3). Note that certain information requirements differ for respondent and domestic parties. Also, note that Commerce's information requirements are distinct from the ITC's information requirements. Consult Commerce's regulations for information regarding Commerce's conduct of Sunset Reviews. Consult Commerce's regulations at 19 CFR part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at Commerce.

Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).³ An electronically filed document must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Time on the day on which it is due.

In prior proceedings we have encouraged interested parties to provide an executive summary of their comments, including footnotes. In these sunset reviews, we request that interested parties provide at the beginning of their comments, an executive summary for each issue raised in their comments. Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the decision memorandum that will accompany the notice to be published in the **Federal Register**. Finally, we request that interested parties include footnotes

for relevant citations in the public executive summary of each issue.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218(c).

Dated: November 26, 2024.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Ceramic Tile From India: Preliminary Negative Determination of Sales at Less Than Fair Value and Postponement of Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that ceramic tile from India is not being, or is not likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2023, through March 31, 2024. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable December 2, 2024.

FOR FURTHER INFORMATION CONTACT: Fred Baker or Theodora Mattei, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2924 or (202) 482–4834, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on May 16, 2024.¹ On July 22, 2024, Commerce tolled certain deadlines in this administrative proceeding by seven days.² On September 19, 2024, Commerce postponed the preliminary

¹ See *Ceramic Tile from India: Initiation of Less-Than-Fair-Value Investigation*, 89 FR 42836 (May 16, 2024) (Initiation Notice).

² See Memorandum, “Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings,” dated July 22, 2024.

¹ See *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID–19*, 85 FR 41363 (July 10, 2020).

² See 19 CFR 351.218(d)(1)(iii).

³ See *Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings; Final Rule*, 88 FR 67069 (September 29, 2023).

determination of this investigation until November 22, 2024.³

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.⁴ A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Scope of the Investigation

The product covered by this investigation is ceramic tile from India. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,⁵ in the *Initiation Notice*, Commerce set aside a period of time for parties to raise issues regarding product coverage (*i.e.*, scope).⁶ Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice*, as well as additional language proposed by Commerce. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum.⁷ Commerce is not modifying the scope language as it appeared in the *Initiation Notice*. In the Preliminary Scope Decision Memorandum, Commerce established deadlines for parties to submit scope case and rebuttal briefs as

well as a deadline to request a hearing on issues raised in the scope briefs.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export price in accordance with section 772(a) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Determination

For the period April 1, 2023, through March 31, 2024, Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Weighted-average dumping margin (percent)
Antiqua Minerals/Antiqua Ceramic Pvt. Ltd./Shivam Enterprise/Antiek Vitri-fied LLP/Antique Non Woven Pvt. Ltd. (collectively, Antiqua Group) ⁸	0.00
Win-Tel Ceramic Pvt.Ltd./Theos Tiles LLP (collectively Win-Tel Group) ⁹	0.00

Consistent with section 733(b)(3) of the Act, Commerce disregards de minimis rates. Accordingly, Commerce preliminarily determines that Antiqua Group and Win-Tel Group, the two individually examined respondents, have not made sales of subject merchandise at LTFV.

Consistent with section 733(d) of the Act, Commerce has not calculated an estimated weighted-average dumping margin for all other producers and exporters because it has not made an affirmative preliminary determination of sales at LTFV.

Suspension of Liquidation

Because Commerce has made a negative preliminary determination of sales at LTFV with regard to subject merchandise, Commerce will not direct U.S. Customs and Border Protection to suspend liquidation or to require a cash deposit of estimated antidumping duties for entries of ceramic tile from India.

Disclosure

Commerce intends to disclose its calculations and analysis performed in

connection with this preliminary determination to interested parties within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Consistent with 19 CFR 351.224(e), Commerce will analyze and, if appropriate, correct any timely allegations of significant ministerial errors by amending the preliminary determination. However, consistent with 19 CFR 351.224(d), Commerce will not consider incomplete allegations that do not address the significance standard under 19 CFR 351.224(g) following the preliminary determination. Instead, Commerce will address such allegations in the final determination together with issues raised in the case briefs or other written comments.

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination for Antiqua Group and Win-Tel Group.

Public Comment

Case briefs or other written comments on non-scope issues may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation.¹⁰ Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.¹¹ Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.¹²

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.¹³ Further, we request that

³ See *Ceramic Tile from India: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigation*, 89 FR 76794 (September 19, 2024).

⁴ See Memorandum, "Decision Memorandum for the Preliminary Affirmative Determination in the Less-Than-Fair-Value Investigation of Ceramic Tile from India," dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

⁵ See *Antidumping Duties; Countervailing Duties, Final Rule*, 62 FR 27296, 27323 (May 19, 1997).

⁶ See *Initiation Notice*.

⁷ See Memorandum, "Antidumping Duty Investigation and Countervailing Duty Investigation of Ceramic Tile from India: Preliminary Scope Decision Memorandum," dated concurrently with this notice (Preliminary Scope Decision Memorandum).

⁸ Commerce preliminarily determines that Antiqua Minerals, Antiqua Ceramic Pvt. Ltd., Shivam Enterprise, Antiek Vitri-fied LLP, and Antique Non Woven Pvt. Ltd., are a single entity. See Preliminary Decision Memorandum.

⁹ Commerce preliminarily determines that Win-Tel Ceramics Pvt. Ltd. and Theos Tiles LLP are a single entity. See Preliminary Decision Memorandum.

¹⁰ See 19 CFR 351.309(c)(1)(i); *see also* 19 CFR 351.303 (for general filing requirements).

¹¹ See 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings*, 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

¹² See 19 CFR 351.309(c)(2) and (d)(2).

¹³ We use the term "issue" here to describe an argument that Commerce would normally address

interested parties limit their public, executive summary of each issue to no more than 450 words, not including citations. We intend to use the public, executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the public, executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).¹⁴

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce will inform parties of the time and date for the hearing.

Postponement of Final Determination

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination in the **Federal Register** if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner.

On November 1, 2024, pursuant to 19 CFR 351.210(e), the petitioner¹⁵ requested that Commerce postpone the final determination.¹⁶ In accordance with section 735(a)(2)(B) of the Act and 19 CFR 351.210(b)(2)(i), because: (1) the preliminary determination is negative; (2) the petitioner has requested the postponement of the final determination; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination.

in a comment of the Issues and Decision Memorandum.

¹⁴ See *APO and Service Final Rule*.

¹⁵ The petitioner is the Coalition for Fair Trade in Ceramic Tile.

¹⁶ See Petitioners' Letter, "Request for Postponement of {Commerce}'s Final Determinations," dated November 1, 2024.

Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine 75 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: November 22, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is ceramic flooring tile, wall tile, paving tile, hearth tile, porcelain tile, mosaic tile, flags, decorative tile, finishing tile, and the like (hereinafter ceramic tile). Ceramic tiles are articles containing a mixture of minerals including clay (generally hydrous silicates of alumina or magnesium) that are fired so the raw materials are fused to produce a tile that is less than 3.2 cm in thickness, exclusive of decorative features. All ceramic tile is subject to the scope regardless of end use, surface area, and weight, regardless of whether the tile is glazed or unglazed, regardless of the water absorption coefficient by weight, regardless of the extent of vitrification, and regardless of whether or not the tile is on a backing. Subject merchandise includes ceramic tile "slabs" or "panels" (tiles that are larger than 1 meter² (11 ft²)).

Subject merchandise includes ceramic tile that undergoes minor processing in a third country prior to importation into the United States. Similarly, subject merchandise includes ceramic tile produced that undergoes minor processing after importation into the United States. Such minor processing includes, but is not limited to, one or more of the following: beveling, cutting, trimming, staining, painting, polishing, finishing, additional firing, affixing a decorative surface to the tile, or any other processing that would otherwise not remove the merchandise from the scope of the investigation if performed in the country of manufacture of the in-scope product.

Subject merchandise is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under the following subheadings of heading 6907: 6907.21.1005, 6907.21.1011, 6907.21.1051, 6907.21.2000,

6907.21.3000, 6907.21.4000, 6907.21.9011, 6907.21.9051, 6907.22.1005, 6907.22.1011, 6907.22.1051, 6907.22.2000, 6907.22.3000, 6907.22.4000, 6907.22.9011, 6907.22.9051, 6907.23.1005, 6907.23.1011, 6907.23.1051, 6907.23.2000, 6907.23.3000, 6907.23.4000, 6907.23.9011, 6907.23.9051, 6907.30.1011, 6907.30.1051, 6907.30.2000, 6907.30.3000, 6907.30.4000, 6907.30.9011, 6907.30.9051, 6907.40.1005, 6907.40.1011, 6907.40.1051, 6907.40.2000, 6907.40.3000, 6907.40.4000, 6907.40.9011, and 6907.40.9051. Subject merchandise may also enter under subheadings of headings 6913, 6914, and 6905: 6913.90.2000, 6914.10.8000, 6914.90.8000, 6905.10.0000, and 6905.90.0050. The HTSUS subheadings are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

National Oceanic and Atmospheric Administration

[RTID 0648–XE486]

Fishing Capacity Reduction Program for the Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of fee rate adjustment.

SUMMARY: NMFS issues this notice to decrease the fee rate to 2.25 percent for the Pacific Coast Groundfish fee-share fishery to repay the \$28,428,718.88 Groundfish sub-loan of the \$35,662,471 reduction loan that financed the Pacific Coast Groundfish fishing capacity reduction program.

DATES: The fee rate decrease for the Pacific Coast Groundfish fishery will begin on landings starting on January 1, 2025. The first due date for fee payments with the decreased rate will be February 14, 2025.

ADDRESSES: Send questions about this notice to William Fritz, Financial Assistance Specialist, Financial Services Division, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910–3282.

FOR FURTHER INFORMATION CONTACT:
William Fritz, (301) 427-8078.

SUPPLEMENTARY INFORMATION:

I. Background

Sections 312(b) through (e) of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1861a (b) through (e)) generally authorizes fishing capacity reduction programs. In particular, section 312(d) authorizes industry fee systems for repaying reduction loans that finance reduction programs. Subpart L of 50 CFR part 600 is the framework rule generally implementing section 312(b) through (e). Sections 1111 and 1112 of the Merchant Marine Act, 1936 (46 App. U.S.C. 1279f and 1279g) generally authorizes reduction loans.

Enacted on February 20, 2003, section 212 of division B, title II, of Public Law 108-7 (section 212) specifically authorizes a fishing capacity reduction program for that portion of the limited entry trawl fishery under the Pacific Coast Groundfish Fishery Management Plan whose permits, excluding those registered to whiting catcher-processors, are endorsed for trawl gear operation (reduction fishery).

The reduction program's objective was to reduce the number of vessels and permits endorsed for the operation of groundfish trawl gear. The program also involved corollary fishing capacity reduction in the California, Oregon, and Washington fisheries for Dungeness crab and pink shrimp and the sub-loans for these State fisheries have all been repaid.

NMFS proposed the implementing notice on May 28, 2003 (68 FR 31653) and published the final notice on July 18, 2003 (68 FR 42613). NMFS allocated a \$28,428,719 reduction loan to the groundfish fishery. The allocation became a reduction loan repayable by fees from the groundfish fishery.

NMFS published in the **Federal Register** on July 13, 2005 (70 FR 40225), the final rule to implement the industry fee system for repaying the program's reduction loan. The regulations implementing the program are located at 50 CFR part 600 subpart M. On August 8, 2005, NMFS published in the **Federal Register** (70 FR 45695) a notice of the fee effective date and established September 8, 2005 as the effective date when fee collection and loan repayment began.

II. Purpose

The purpose of this notice is to adjust, in accordance with the framework rule's § 600.1013(b), the fee rate for the groundfish fishery. Section 600.1013(b) directs NMFS to recalculate the fee rate

that will be reasonably necessary to ensure reduction loan repayment within the specified 30-year term. NMFS has determined that the current fee rate of 3.5 percent for the groundfish fishery is projected to collect more than the annual amortization amount needed for 2025. Therefore, NMFS is decreasing the fee rate to 2.25 percent for all landings beginning January 1, 2025.

Fish buyers may continue to disburse collected fee deposits to NMFS by using <https://www.pay.gov> or by mailing payments to our lockbox. Our lockbox's address is: "NMFS Pacific Coast Groundfish Buyback Loan, P.O. Box 979008, St. Louis, MO 63197-9000. Fish buyers must include the fee collection report with the fee payment. Fish buyers using <https://www.pay.gov> will find an electronic fee collection report form. Fish buyers not using <https://www.pay.gov> may also access the NMFS website for a copy of the fee collection report at: <https://www.fisheries.noaa.gov/national/funding-and-financial-services/pacific-coast-groundfish-buyback>.

III. Notice

The new 2.25 percent fee rate for the groundfish fishery will begin for all landings starting January 1, 2025. From and after this date, all groundfish program fish sellers paying fees shall begin paying groundfish program fees at the revised rate. The first due date for fee payments with the decreased rate will be February 14, 2025.

Fee collection and submission shall follow previously established methods in § 600.1013 of the framework rule and in the final fee rule published in the **Federal Register** on July 13, 2005 (70 FR 40225).

Authority: The authority for this action is Pub. L. 107 206, Pub. L. 108 7, 16 U.S.C. 1861a (b) through (e), and 50 CFR 600.1000 *et seq.*

Dated: November 22, 2024.

Brian T. Pawlak,

Chief Financial Officer/Chief Administrative Officer, Director, Office of Management and Budget, NOAA Fisheries.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648-XE485]

Fishing Capacity Reduction Program for the Longline Catcher Processor Subsector of the Bering Sea and Aleutian Islands Non-Pollock Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of fee rate adjustment.

SUMMARY: NMFS issues this notice to inform the public that there will be a decrease of the fee rate required to repay the reduction loan financing the non-pollock groundfish fishing capacity reduction program. Effective January 1, 2025, NMFS is decreasing the Loan A fee rate to \$0.016 per pound to ensure timely repayment of the loan. The fee rate for Loan B will remain unchanged at \$0.001 per pound. The decreased fee rate is due to a recalculation based on the required amortization target and projected non-pollock groundfish Total Allowable Catch (TAC) for 2025, as well as a temporary adjustment related to 2024 Season B.

DATES: The non-pollock groundfish program fee rate decrease will begin with landings on January 1, 2025. The first due date for fee payments with the decreased rate will be February 15, 2025.

ADDRESSES: Send questions about this notice to William Fritz, Financial Assistance Specialist, Financial Services Division, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910-3282.

FOR FURTHER INFORMATION CONTACT:
William Fritz, (301) 427-8078.

SUPPLEMENTARY INFORMATION:

Background

Sections 312(b)–(e) of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1861 *et seq.*) generally authorizes fishing capacity reduction programs. In particular, section 312(d) authorizes industry fee systems for repaying reduction loans which finance reduction program costs. Subpart L of 50 CFR part 600 is the framework rule generally implementing section 312(b)–(e). Sections 1111 and 1112 of the Merchant Marine Act, 1936 (46 App. U.S.C. 1279f and 1279g) generally authorize reduction loans.

Enacted on December 8, 2004, section 219, Title II, of FY 2005 Appropriations

Act, Public Law 104–447 (Act) authorizes a fishing capacity reduction program implementing capacity reduction plans submitted to NMFS by catcher processor subsectors of the Bering Sea and Aleutian Islands (BSAI) non-pollock groundfish fishery (reduction fishery) as set forth in the Act.

The longline catcher processor subsector (Longline Subsector) is among the catcher processor subsectors eligible to submit to NMFS a capacity reduction plan under the terms of the Act. The longline subsector non-pollock groundfish reduction program's objective was to reduce the number of vessels and permits endorsed for longline subsector of the non-pollock groundfish fishery. All post-reduction fish landings from the reduction fishery are subject to the longline subsector non-pollock groundfish program's fee.

NMFS proposed the implementing notice on August 11, 2006 (71 FR 46364), and published the final notice on September 29, 2006 (71 FR 57696). NMFS allocated the \$35,000,000 reduction loan (A Loan) to the reduction fishery and this loan is repayable by fees from the fishery.

On September 24, 2007, NMFS published in the **Federal Register** (72 FR 54219), the final rule to implement the industry fee system for repaying the non-pollock groundfish program's reduction loan and established October 24, 2007, as the effective date when fee collection and loan repayment began. The regulations implementing the program are located at § 600.1012.

NMFS published a final rule to implement a second \$2,700,000 reduction loan (B Loan) for this fishery in the **Federal Register** on September 24, 2012 (77 FR 58775). The loan was disbursed December 18, 2012 with fee collection of \$0.001 per pound to begin January 1, 2013. This fee is in addition to the A Loan fee.

Purpose

The purpose of this notice is to adjust the fee rate for the reduction fishery in accordance with the framework rule's § 600.1013(b). Section 600.1013(b) directs NMFS to recalculate the fee rate that will be reasonably necessary to ensure reduction loan repayment within the specified 30 year term.

NMFS has determined for the reduction fishery that the current fee rate of Loan A, \$0.020 per pound, is more than that needed to service the loan in 2025. Therefore, NMFS is decreasing the Loan A fee rate to \$0.016 per pound. NMFS has determined \$0.017 per pound is sufficient to ensure timely loan repayment, with an

additional temporary \$0.001 per pound adjustment related to the 2024 Season B rate having been set at \$0.020 per pound rather than \$0.019 per pound. The fee rate for Loan B will remain \$0.001 per pound.

Subsector members may continue to use *Pay.gov* to disburse collected fee deposits at: <https://www.pay.gov/paygov/>.

Please visit the NMFS website for additional information at: <https://www.fisheries.noaa.gov/national/funding-and-financial-services/longline-catcher-processor-subsector-bering-sea-and-aleutian-islands-non-pollock>.

Notice

The new fee rate for the non-pollock groundfish fishery will begin on January 1, 2025.

From and after this date, all subsector members paying fees on the non-pollock groundfish fishery shall begin paying non-pollock groundfish fishery program fees at the revised rate.

Fee collection and submission shall follow previously established methods in § 600.1013 of the framework rule and in the final fee rule published in the **Federal Register** on September 24, 2007 (72 FR 54219).

Authority: 16 U.S.C. 1861 *et seq.*; Pub. L. 108–447.

Dated: November 26, 2024.

Brian T. Pawlak,

Chief Financial Officer/Chief Administrative Officer, Director, Office of Management and Budget, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE341]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Maryland Offshore Wind Project Offshore of Maryland

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of Letter of Authorization.

SUMMARY: In accordance with the Marine Mammal Protection Act (MMPA) as amended, and implementing regulations, notification is hereby given that a Letter of Authorization (LOA) has been issued to US Wind, Inc. (US Wind), for the taking of marine

mammals incidental to the construction of the Maryland Offshore Wind Project (hereafter known as the “Project”).

DATES: The LOA is effective from January 1, 2025 through December 31, 2029.

ADDRESSES: The LOA and supporting documentation are available online at: <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act>. In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Jessica Taylor, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the “take” of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made, regulations are promulgated (when applicable), and public notice and an opportunity for public comment are provided.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). If such findings are made, NMFS must prescribe the permissible methods of taking; “other means of effecting the least practicable adverse impact” on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stocks for taking for certain subsistence uses (referred to as “mitigation”); and requirements pertaining to the monitoring and reporting of such takings. The MMPA defines “take” to mean harass, hunt, capture, or kill, or attempt to harass, hunt, capture, or kill any marine mammal (16 U.S.C. 1362(13); 50 CFR 216.103). Level A harassment is defined as any act of pursuit, torment, or annoyance which has the potential to injure a marine mammal or marine mammal stock in the wild (16 U.S.C. 1362(18); 50 CFR 216.3). Level A harassment is defined as any act of

pursuit, torment, or annoyance which has the potential to injure a marine mammal or marine mammal stock in the wild (16 U.S.C. 1362(18); 50 CFR 216.3). Level B harassment is defined as any act of pursuit, torment, or annoyance which has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (16 U.S.C. 1362(18); 50 CFR 216.3). Section 101(a)(5)(A) of the MMPA and the implementing regulations at 50 CFR part 216, subpart I authorize NMFS to propose and, if appropriate, promulgate regulations and issue associated LOA(s). NMFS promulgated regulations on October 23, 2024 (89 FR 84676) for the taking of marine mammals incidental to the construction of the Maryland Offshore Wind Project offshore of Maryland. The LOA authorizes US Wind, and those persons it authorizes or funds to conduct activities on its behalf, to take marine mammals incidental to specified activities during the construction of the Project and requires them to implement mitigation, monitoring, and reporting requirements.

Summary of Request

On October 23, 2024, NMFS promulgated a final rule (89 FR 84674) responding to a request from US Wind for authorization to take marine mammals (19 species comprising 20 stocks) by Level B harassment (all 20 stocks) and by Level A harassment (5 stocks of the 20 stocks) incidental to construction activities occurring in Federal and State waters off of Maryland, specifically within and around the Bureau of Ocean Energy Management (BOEM) Commercial Lease of Submerged Lands for Renewable Energy Development on the Outer Continental Shelf (OCS) Lease Area OCS-A 0490 (collectively, "Lease Area") and along two export cable routes to sea-to-shore transition points (collectively referred to as the "Project Area"), over the course of 5 years (January 1, 2025 through December 31, 2029). The final rule included the following specified activities: the installation of up to 114 wind turbine generators (WTGs) on monopile foundations using impact pile driving; the installation of 4 offshore substations (OSSs) on jacket foundations consisting of post-piled pin piles using impact pile driving; the installation of one meteorological tower (Met Tower) on pin piles using impact pile driving; installation and subsequent removal of gravity cells to connect the offshore export cables to onshore facilities

within Delaware Seashore State Park; high-resolution geophysical (HRG) marine site characterization surveys using active acoustic sources; fishery and ecological monitoring surveys; the placement of scour protection; the installation of the export cable routes from OSSs to shore-based converter stations and inter-array cables between turbines by trenching, laying, and burial activities; vessel transit within the specified geographical region to transport crew, supplies, and materials; and WTG operation.

Marine mammals exposed to elevated noise levels during foundation impact pile driving may be taken by Level A harassment, and marine mammals exposed to elevated noise levels during impact pile driving and HRG site characterization surveys may be taken by Level B harassment. No mortality or serious injury of any marine mammal is anticipated or authorized. The number of takes, by species, authorized may be found in table 1 in the LOA, which is available at <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act>.

Authorization

In accordance with the final rule (89 FR 84674, October 23, 2024; see 50 CFR 217.306), NMFS has issued a LOA to US Wind authorizing the take, by harassment, of marine mammals incidental to specified activities within the specified geographical region. As previously stated, no mortality or serious injury of any marine mammal species is anticipated or authorized. The incidental takes authorized herein are the same as those analyzed and authorized in the final rule (89 FR 84674, October 23, 2024). Takes of marine mammals will be minimized through the following planned mitigation and monitoring measures, as applicable for each specified activity: (1) implementation of seasonal pile driving work restrictions; (2) use of multiple NMFS-approved Protected Species Observers (PSOs) to visually observe for marine mammals (with any detection within specifically designated zones triggering a delay or shutdown, as applicable); (3) use of NMFS-approved passive acoustic monitoring (PAM) operators to acoustically detect marine mammals, with a focus on detecting baleen whales (with any detection within designated zones triggering a delay or shutdown, as applicable); (4) implementation of clearance and shutdown zones; (5) use of soft-start upon commencement of impact pile driving and ramp-up of acoustic sources during HRG surveys; (6) use of noise

attenuation technology during foundation pile driving; (7) use of situational awareness monitoring for marine mammal presence; (8) use of sound field verification monitoring; (9) use of PAM within the vessel transit corridor for Project vessels to travel over 10 knots (11.5 miles per hour); and (10) implementation of several vessel strike avoidance measures to avoid vessel strikes, including but not limited to, vessel separation zones between marine mammals and project vessels. Additionally, NMFS may modify the LOA's mitigation, monitoring, or reporting measures, based on new information. US Wind is also required to submit reports, as specified in the final rule.

Based on the findings discussed in the preamble of the final rule, NMFS has determined that the take authorized in the LOA is of small numbers, will have a negligible impact on marine mammal stocks, will not have an unmitigable adverse impact on the availability of the affected marine mammal stock for subsistence uses, and the mitigation measures provide a means of affecting the least practicable adverse impact on the affected stocks and their habitat.

Dated: November 26, 2024.

Kimberly Damon-Randall,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Draft Revised Management Plan for the Narragansett Bay National Estuarine Research Reserve

AGENCY: Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Request for comments.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) is soliciting comments from the public regarding a proposed revision of the management plan for the Narragansett Bay National Estuarine Research Reserve (NBNERR). A management plan provides a framework to guide a reserve's programs, track progress toward meeting its goals, and identify potential opportunities or changes in direction. It is also used to guide programmatic evaluations. Management plan revisions are required at least every

five years. This draft, revised management plan is intended to replace the NBNERR management plan approved in 2010.

DATES: Comments must be received at the appropriate address (see **ADDRESSES**) on or before January 2, 2025.

ADDRESSES: The draft revised management plan can be downloaded or viewed at: http://nbnerr.org/wp-content/uploads/2024/08/NBNERR-ManagementPlan_DRAFT-PublicComment.pdf. It is also available by sending a written request to the point of contact identified below (see **FOR FURTHER INFORMATION CONTACT**).

You may submit comments by email to claudia.mazur@noaa.gov. Include "Comments on draft Narragansett Bay National Estuarine Research Reserve Management Plan" in the subject line of the message. NOAA will accept anonymous comments; however, the written comments NOAA receives are considered part of the public record, and the entirety of the comment, including the name of the commenter, email address, attachments, and other supporting materials, will be publicly accessible. Sensitive, personally identifiable information, such as account numbers and Social Security numbers, should not be included. Comments that are not related to the management plan for NBNERR, or that contain profanity, vulgarity, threats, or other inappropriate language, will not be considered.

FOR FURTHER INFORMATION CONTACT:

Claudia Mazur, claudia.mazur@noaa.gov, or Betsy Nicholson, betsy.nicholson@noaa.gov, (617-894-0197) of NOAA's Office for Coastal Management.

SUPPLEMENTARY INFORMATION: Pursuant to 15 CFR 921.33(c), Rhode Island must revise the management plan for NBNERR at least every five years. If approved by NOAA, the revised management plan will replace the plan previously approved in 2010.

Management plans outline a reserve's strategic goals and objectives; administrative structure; programs for conducting research and monitoring, education, and training; resource protection, restoration, and manipulation plans; public access and visitor use plans; consideration for future land acquisition; and facility development to support reserve operations. In particular, this draft revised plan for NBNERR provides information on new staff positions and new staff hired, and describes the reserve's updated position within the Rhode Island Department of Environmental Management.

Since the last management plan, NBNERR has secured a land acquisition and expanded its boundary.

Additionally, the updated plan describes strategic goals and objectives and identifies topic areas where additional planning will be conducted to identify and develop new goals and objectives over the next five years. The revised management plan, once approved, would serve as the guiding document for the reserve for the next five years.

NOAA's Office for Coastal Management analyzes the environmental impacts of the proposed approval of this management plan in accordance with the National Environmental Policy Act of 1969 (NEPA), as amended, 42 U.S.C. 4321 *et seq.*, and the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (40 CFR 1500-1508 (2022)). The public is invited to comment on the draft revised management plan. NOAA will take these comments into consideration when deciding whether to approve the revised management plan in whole or in part.

Authority: 16 U.S.C. 1451 *et seq.*; 15 CFR 921.33.

Keelin S. Kuipers,

Deputy Director, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510-08-P

DEPARTMENT OF EDUCATION

[Docket No.: ED-2024-SCC-0111]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Carl D. Perkins Career and Technical Education Act State Plan Guide

AGENCY: Office of Career, Technical, and Adult Education (OCTAE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before January 2, 2025.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of

publication of this notice. Click on this link www.reginfo.gov/public/do/PRAMain to access the site. Find this information collection request (ICR) by selecting "Department of Education" under "Currently Under Review," then check the "Only Show ICR for Public Comment" checkbox. Reginfo.gov provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the "View Information Collection (IC) List" link. Supporting statements and other supporting documentation may be found by clicking on the "View Supporting Statement and Other Documents" link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Braden Goetz, (202) 245-7405.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Carl D. Perkins Career and Technical Education Act State Plan Guide.

OMB Control Number: 1830-0029.

Type of Review: Revision of a currently approved ICR.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 54.

Total Estimated Number of Annual Burden Hours: 1,026.

Abstract: This information collection is used by the Department to request State Plans and annual revisions under the Carl D. Perkins Career and Technical Education Act of 2006. We are proposing to revise the ICR to provide data specifications for the numerators and denominators used to calculate the law's performance indicators so that they are measured in a manner that is consistent with the statute, reduce the collection of potentially duplicative information, give States more time to report education and employment outcomes to improve the accuracy and completeness of these data, and to

improve the consistency of performance data reported by States.

Dated: November 26, 2024.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

[FR Doc. 2024–28204 Filed 11–29–24; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Record of Decision for the Long-Term Management and Storage of Elemental Mercury and Designation of a Long-Term Management and Storage Facility

AGENCY: Office of Environmental Management, U.S. Department of Energy.

ACTION: Record of decision and facility designation.

SUMMARY: The U.S. Department of Energy (DOE) is issuing this Record of Decision (ROD) for the long-term management and storage of elemental mercury to meet the purpose and need for agency action, which is to fulfill DOE's statutory responsibility for long-term management and storage of elemental mercury generated within the United States as required by the *Mercury Export Ban Act of 2008* and the *Frank R. Lautenberg Chemical Safety for the 21st Century Act* (together referred to herein as MEBA).

ADDRESSES: For copies of this ROD/MEBA Designation or the Mercury Storage SEIS–II, please contact Timothy Herald at U.S. Department of Energy, Office of Environmental Management, Office of Waste and Materials Management (EM–4.2), 1000 Independence Avenue SW, Washington, DC, 20585 or via email, Timothy.Herald@em.doe.gov. Electronic files can be accessed at <https://www.energy.gov/nepa/listings/records-decision-rod>.

FOR FURTHER INFORMATION CONTACT: For further information on the management and storage of elemental mercury, please contact Timothy Herald at Timothy.Herald@em.doe.gov or visit <https://www.energy.gov/em/long-term-management-and-storage-elemental-mercury>; by telephone: 240–243–8753. For general information on the Office of Environmental Management's *National Environmental Policy Act of 1969* (NEPA) process, please contact Bill Ostrum, NEPA Compliance Officer for the Office of Environmental Management, via email William.Ostrum@hq.doe.gov.

SUPPLEMENTARY INFORMATION: This ROD is issued for the *Long-Term Management and Storage of Elemental Mercury Supplemental Environmental Impact Statement* (DOE/EIS–0423–S2) (Mercury Storage SEIS–II), which evaluates the storage of up to 7,000 metric tons (7,700 tons) of elemental mercury in one or more existing facilities at alternative locations including a government facility at the Hawthorne Army Depot near Hawthorne, Nevada, and seven commercial candidate locations: Waste Control Specialists, LLC (WCS) near Andrews, Texas; Bethlehem Apparatus Company in Bethlehem, Pennsylvania; Perma-Fix Diversified Scientific Services, Inc., in Kingston, Tennessee; Veolia Environmental Services in Gum Springs, Arkansas; and Clean Harbors Environmental Services, with three alternative facilities in Pecatonica, Illinois; Greenbrier, Tennessee; and Tooele, Utah. This ROD announces DOE's decision to select WCS from its preferred alternative of selecting one or more of the existing commercial facilities evaluated in the SEIS–II. DOE is also issuing this document to designate a facility of the DOE for the long-term management and storage of elemental mercury generated within the United States in accordance with MEBA. In addition to the analysis in the Mercury Storage SEIS–II, DOE based its MEBA facility designation decision on a combination of factors including schedule, permitting, policy and technical considerations, as well as cost information (including information gained during an independent and competitive procurement process). DOE designates WCS as that facility in accordance with MEBA.

A. Background

The *Mercury Export Ban Act of 2008* (Pub. L. 110–414) and the 2016 *Frank R. Lautenberg Chemical Safety for the 21st Century Act* (Pub. L. 114–182) (together referred to herein as MEBA), address, among other things, the export and long-term management and storage of elemental mercury. MEBA prohibits the export of elemental mercury from the United States (U.S.) (with certain essential use exemptions). MEBA also directs the Secretary of the U.S. Department of Energy (DOE) to designate a facility or facilities of DOE for the long-term management and storage of elemental mercury generated within the U.S. (42 U.S.C. 6939f(a)(1)). MEBA further provides the Secretary of Energy with the authority to establish such terms, conditions, and procedures as are necessary to carry out this long-term management and storage function

(42 U.S.C. 6939f(f)). Consistent with these statutory provisions, and based on longstanding authorities and practice, DOE construes the term “facility of DOE” to include a facility leased from a commercial entity or another Federal agency over which DOE provides an appropriate level of responsibility and control.¹

The primary sources of elemental mercury in the United States include mercury generated as a byproduct of the gold-mining process and mercury reclaimed from recycling and waste-recovery activities. In addition, the DOE National Nuclear Security Administration (NNSA) stores at the Oak Ridge Reservation in Tennessee approximately 1,200 metric tons (1,300 tons) of elemental mercury that was acquired in support of NNSA's mission. As identified in the Mercury Storage SEIS–II, this NNSA elemental mercury is included in the SEIS–II (for analytical purposes), even though it is currently designated as a commodity and not waste.

In 2011, DOE prepared the *Final Long-Term Management and Storage of Elemental Mercury Supplemental Environmental Impact Statement* (DOE/EIS–0423) (2011 Mercury Storage EIS) to evaluate seven candidate locations for a facility for management and storage of elemental mercury, as well as a No-Action Alternative. The locations included use of existing facilities, new facility construction, or both. The candidate locations evaluated in 2011 were the DOE Grand Junction Disposal site near Grand Junction, Colorado (new construction); DOE Hanford Site near Richland, Washington (new construction); Hawthorne Army Depot (HWAD) near Hawthorne, Nevada (modification of existing facilities); DOE Idaho National Laboratory near Idaho Falls, Idaho (new construction and modification of an existing facility); Kansas City Plant in Kansas City, Missouri (existing facility); DOE Savannah River Site near Aiken, South Carolina (new construction); and the Waste Control Specialists LLC (WCS) site near Andrews, Texas (new construction and an existing facility).

In 2013, DOE prepared the *Final Long-Term Management and Storage of Elemental Mercury Supplemental Environmental Impact Statement* (DOE/EIS–0423–S1) (2013 Mercury Storage SEIS) to evaluate three additional alternative locations, all in the vicinity of the Waste Isolation Pilot Plant near

¹ DOE has further analyzed the meaning of “facility or facilities of the [DOE]” in a memo entitled *The Meaning of “Facility or Facilities of the Department of Energy”* in the Mercury Export Ban Act of 2008, in the Administrative Record.

Carlsbad, New Mexico (all new construction). The 2013 Mercury Storage SEIS also updated some of the relevant analyses for alternatives presented in the 2011 Mercury Storage EIS.

For the 2011 Mercury Storage EIS and the 2013 Mercury Storage SEIS, DOE estimated that up to approximately 10,000 metric tons (11,000 tons) of elemental mercury would need to be managed and stored at the DOE-designated facility during a 40-year period assumed for analysis purposes. In the 2011 Mercury Storage EIS and the 2013 Mercury Storage SEIS, DOE identified WCS as the preferred alternative.

On December 6, 2019, DOE issued a Record of Decision (ROD) to document its designation of the WCS site near Andrews, Texas, for the management and storage of up to 6,800 metric tons (7,480 tons) of elemental mercury in leased portions of existing buildings at the WCS site (84 FR 66890). The ROD was supported by DOE's *Supplement Analysis of the Final Long-Term Management and Storage of Elemental Mercury Environmental Impact Statement* (DOE/EIS-0423-SA-1), which evaluated changes in environmental conditions at WCS that had occurred since the initial analyses were completed in 2011 and 2013 and determined that the long-term management and storage of up to 6,800 metric tons of elemental mercury in existing buildings at the WCS site would not constitute a substantial change from the proposal evaluated in the 2011 Mercury Storage EIS and updated in the 2013 Mercury Storage SEIS. On December 23, 2019, DOE published a rule adding 10 CFR part 955, which established the fee for long-term management and storage of elemental mercury (84 FR 70402) (Fee Rule).

Two domestic generators of elemental mercury subsequently filed complaints in U.S. District Court challenging, among other things, the validity of the Fee Rule and the designation of WCS (*Coeur Rochester, Inc. v. Brouillette et al.*, Case No. 1:19-cv-03860-RJL [D.D.C. filed December 31, 2019] and *Nevada Gold Mines LLC v. Brouillette et al.*, Case No. 1:20-cv-00141-RJL [D.D.C. filed January 17, 2020]). As part of a settlement agreement, DOE withdrew the designation of WCS in an amended ROD on October 6, 2020 (85 FR 63105) and subsequently removed Part 955 (89 FR 33203).

On May 24, 2021, DOE issued a Notice of Intent in the **Federal Register** (86 FR 27838) notifying the public of DOE's intent to prepare a second *Long-*

Term Management and Storage of Elemental Mercury Supplemental Environmental Impact Statement (DOE/EIS-0423-S2) (Mercury Storage SEIS-II).

On July 8, 2022, DOE published a Notice of Availability (NOA) in the **Federal Register** (87 FR 40830) of the Draft Mercury Storage SEIS-II, inviting public comment during the 45-day public comment period and announcing two virtual public hearings. The U.S. Environmental Protection Agency (EPA) published an NOA in the **Federal Register** on the same day, which officially began the 45-day comment period on the Draft Mercury Storage SEIS-II (87 FR 40838). In response to a request from the public, DOE extended the public comment period on the Draft Mercury Storage SEIS-II and issued a **Federal Register** notice on August 12, 2022 (87 FR 49817), announcing a 15-day extension. The public comment period ended on September 6, 2022.

The Draft Mercury Storage SEIS-II evaluated the management and storage of up to 7,000 metric tons (7,700 tons) of elemental mercury in one or more permitted, existing facilities at alternative locations including HWAD, a government facility near Hawthorne, Nevada, and seven commercial candidate locations: WCS; Bethlehem Apparatus Company in Bethlehem, Pennsylvania; Perma-Fix Diversified Scientific Services, Inc., in Kingston, Tennessee; Veolia Environmental Services in Gum Springs, Arkansas; and Clean Harbors Environmental Services, with three alternative facilities in Pecatonica, Illinois; Greenbrier, Tennessee; and Tooele, Utah. In the Draft Mercury Storage SEIS-II, DOE identified its preferred alternative to select one or more of the existing commercial facilities for long-term management and storage of elemental mercury.

On February 9, 2024, EPA published in the **Federal Register** an NOA for the Final Mercury Storage SEIS-II (89 FR 9147). The Final Mercury Storage SEIS-II addressed comments received on the Draft Mercury Storage SEIS-II. Consistent with the Draft Mercury Storage SEIS-II, DOE identified its preferred alternative to select one or more of the existing commercial facilities for future designation as the long-term elemental mercury management and storage facility.

In parallel with the NEPA process, DOE conducted a competitive procurement action to identify a company that could provide (1) leased space for the long-term management and storage of elemental mercury generated in the United States and (2) the

associated services necessary for the long-term management and storage of elemental mercury. Information gained during the procurement action has informed the MEBA designation of the long-term elemental mercury management and storage facility.

B. Purpose and Need for Agency Action

MEBA prohibits the export of elemental mercury from the United States (subject to certain essential use exemptions) and, as of October 14, 2008, prohibits a Federal agency from conveying, selling, or distributing to any other Federal agency, any state or local government agency, or any private individual or entity any elemental mercury under the control or jurisdiction of the Federal agency (with certain limited exceptions).

Section 5 of MEBA (42 U.S.C. 6939f(a)(1)) directs the Secretary of Energy to designate a facility or facilities of the DOE for the purpose of long-term management and storage of elemental mercury generated within the United States. In the Mercury Storage SEIS-II (Section 2.1.2), DOE estimated the storage capacity needed for the 40-year period used for analysis to be up to 7,000 metric tons (7,700 tons) of elemental mercury. Because the statutory milestone date for the designated facility to become operational (January 1, 2019, see 42 U.S.C. 6939f(a)(2)) has passed, DOE also identified a need to designate a facility and begin accepting elemental mercury as soon as practicable.

C. Proposed Action

As identified in the Mercury Storage SEIS-II, DOE proposed to designate one or more facilities for the long-term management and storage of elemental mercury in accordance with MEBA.

D. Alternatives

As described in Section 2.8 of the Mercury Storage SEIS-II, DOE considered but dismissed the following from detailed analysis:

- Storage-related alternatives and certain transportation methods eliminated in the 2011 Mercury Storage SEIS,
- Treatment and disposal options,
- Commercial facilities described in Section 2.2 of the Mercury Storage SEIS-II,
- Sites within the DOE complex that met its objective criteria for consideration as a reasonable alternative, but as described in Section 2.2.4 of the Mercury Storage SEIS-II, no reasonable alternatives were identified, and
- Construction of a new facility.

While previously addressed in the 2011 EIS and 2013 SEIS, new facility construction was an alternative that was considered but dismissed from further analysis in the Mercury Storage SEIS–II based on intervening developments. The primary reasons that new construction was not considered to be a reasonable alternative in the SEIS–II include:

(1) Construction of a new facility generally would not meet the purpose and need for agency action because schedule delays associated with new construction would further exacerbate the missed statutory deadline for the DOE-designated management and storage facility to be operational by January 1, 2019. When compared to using existing facilities, DOE estimates that construction of a new facility would add at least five years to the time needed for the facility to be ready for the long-term management and storage of elemental mercury, delaying DOE's receipt of elemental mercury even further beyond the deadline prescribed by Congress and subjecting DOE to additional financial liabilities under 42 U.S.C. 6939f(b)(1)(B)(iv), and

(2) In 2020, a petition was filed with EPA for a site-specific Determination of Equivalent Treatment that would convert elemental mercury to a stabilized mercury compound for land disposal at a permitted disposal facility in Beatty, Nevada. If approved, this approach could offer a permanent disposal solution for elemental mercury in the U.S. EPA's review of the petition was ongoing during preparation of the Mercury Storage SEIS–II and no decision on the petition has been issued. However, DOE believes there is a realistic possibility that an approved treatment and disposal method for elemental mercury will be available within 10 years. If such a treatment and disposal method were to become available, it would likely decrease both the length of time the designated MEBA facility would need to store elemental mercury and the quantity of mercury to be stored there at any given time. Use of an existing facility allows for greater managerial flexibility to accommodate a shorter storage duration and associated lower projected inventory of elemental mercury.

In addition to the No-Action Alternative, the Mercury Storage SEIS–II identified and evaluated the potential environmental impacts associated with implementation of the Proposed Action in existing facilities at the following reasonable alternative locations:

- Hawthorne Army Depot in Hawthorne, Nevada;
- WCS in Andrews County, Texas;

- Bethlehem Apparatus in Bethlehem, Pennsylvania;
- Perma-Fix Diversified Scientific Services, Inc., in Kingston, Tennessee;
- Veolia Environmental Services in Gum Springs, Arkansas; and
- Clean Harbors Environmental Services (facilities in Pecatonica, Illinois; Greenbrier, Tennessee; and Tooele, Utah).

In 2022, DOE issued a Request for Proposals which initiated a competitive procurement process soliciting bids from commercial facilities for long-term management and storage of elemental mercury.² DOE received two proposals. One of the proposals was subsequently withdrawn by the submitting entity. While DOE, in the Mercury Storage SEIS–II, analyzed all of the existing facilities listed above, after the solicitation, there were only two viable action alternatives—one commercial option—WCS and one non-commercial option—HWAD.

Section E describes, generally, the potential environmental impacts of all of the action alternatives. As reflected in the Mercury Storage SEIS–II, the impacts for the facilities are generally comparable. Where differences are notable, these are noted in Section E. Section E also includes additional information for WCS, as the selected alternative, to provide further comparative context.

E. Potential Environmental Impacts

As noted in the Mercury Storage SEIS–II, quantitative evaluation of potential environmental consequences under the No-Action Alternative would be highly speculative. The SEIS–II qualitatively evaluates the potential environmental consequences of the various options that are available to entities under the No-Action Alternative (e.g., continued accumulation, storage at a permitted facility, or treatment and disposal in Canada). It is possible that some land, or land with more- or less-sensitive resources than those analyzed under the action alternatives, could be affected. Environmental consequences to land use and ownership, visual, geology, soils, ecological, and cultural and paleontological resource areas are dependent on the affected environment disturbed and amount of land disturbance that might occur. Potential environmental consequences to water resources would depend on the specific location and proximity to surface waterbodies and groundwater aquifers

and the current use of these water resources. If elemental mercury were transported to a RCRA-permitted storage facility or to a treatment facility, the potential transportation-related consequences would not be markedly different than those predicted for the action alternatives.

Under the No-Action Alternative, the management and storage of elemental mercury may or may not be conducted in accordance with RCRA regulations. For example, long-term accumulation at ore processor sites has not necessarily been permitted for long-term storage. As such, there could be a heightened risk of facility accidents and inconsistent management and storage of elemental mercury containers. This could lead to potentially greater environmental consequences associated with air quality, occupational and public health and safety, and ecological resources. In contrast, if much of the excess elemental mercury remained at the generating facilities and was not transferred to a DOE long-term storage facility, it is reasonable to expect that environmental consequences associated with transportation would be somewhat less than those predicted to occur under the action alternatives. Although, these transportation consequences would eventually be realized if the accumulated elemental mercury were eventually shipped offsite for storage, treatment, or disposal. If elemental mercury was transported to a RCRA-permitted treatment facility and then on to Canada for land disposal, transportation impacts would be similar to those predicted under the action alternatives. There would be no environmental consequences under the No-Action Alternative related to DOE storage at any of the candidate sites because a DOE elemental mercury storage facility(ies) would not be operated.

For the Proposed Action, the Mercury Storage SEIS–II evaluated the use of existing facilities at each of the alternative site locations for long-term management and storage of elemental mercury. In addition to operations of the facilities for long-term management and storage of elemental mercury, the analysis also included the assessment of potential impacts from the transportation of the elemental mercury from its origin sites to the long-term management and storage locations via truck. The analysis of potential environmental impacts included an evaluation of the following environmental resource areas: land use and ownership, and visual resources; geology and soils; water resources; air quality and noise; ecological resources;

² Elemental Mercury Long-Term Management and Storage Request for Proposal 89303320REM000081 (March 24, 2022), as amended (Request for Proposal).

cultural resources; site infrastructure; waste management; occupational and public health and safety; ecological risk; socioeconomic; and environmental justice.

Land use and ownership, and visual resources. No impacts on land use or visual resources would be expected for any of the alternative sites. If DOE were to designate an action alternative(s), it would obtain a leasehold interest or other form of property interest in that facility and would ensure that any such interest would afford DOE an appropriate level of responsibility and control over the facility. Such responsibility and control would include exercising the authority necessary to ensure that the facility is managed and operated in compliance with MEBA and other applicable legal requirements and through contractual provisions.

Additional time would be required to implement the HWAD alternative because of preparatory activities that would be required, including modifications or upgrades of multiple buildings, real estate transactions, and regulatory permitting that would not be required for the existing, permitted commercial facilities. DOE estimates the time required to complete the activities to allow receipt of elemental mercury at HWAD for long-term management and storage would be at least five years from the date that DOE designated HWAD for such use. Whereas, WCS would be capable of expeditiously accepting elemental mercury for long-term management and storage.

Geology, soils, and geologic hazards. Except for the HWAD site, no impacts to geology and soils are expected because no new construction or soil disturbance would be required. At HWAD, external modifications would require trenching for installation of needed utilities and other systems and services, resulting in negligible-to-minor impacts to previously disturbed, surrounding soils. This would also include the upgrade or addition of access roads to the modified buildings at HWAD. The area surrounding HWAD is one of high seismic activity. As discussed in the 2011 Mercury Storage EIS, while the Hawthorne, Nevada, area has historically experienced numerous earthquakes and significant ground shaking, no depot facilities have suffered damage due to earthquakes over the 60-plus years of operations. Updated USGS earthquake hazard data recharacterize the PGA at HWAD as 0.62 g (USGS 2021b). This is the upper end of the range for the sites evaluated in the Mercury Storage SEIS-II (0.05–0.62 g). There would be no new construction at

the WCS site and no additional impacts to geology and soils. The seismicity of the WCS region is on the lower end of the range of the alternative sites evaluated in the Mercury Storage SEIS-II.

Water resources. Storage of elemental mercury at any of the alternative sites would increase water use for sanitary purposes by up to 16,000 gallons per year. The increased water use would directly correlate to the number of additional personnel required during operations. No impacts to groundwater or surface water would be expected. None of the alternative sites are located within a designated 100-year regulated floodplain. The use of structural controls at the WCS Container Storage Building, such as concrete sealed floors and containment berms inside the building, would prevent release of mercury outside of the building and thus protect surface water and groundwater from potential impacts.

Air quality and noise. Impacts to air quality at each alternative site would be negligible. The transportation of elemental mercury from existing storage sites and generators over a 40-year period would release relatively small quantities of air pollutants and greenhouse gases (GHGs). The Mercury Storage SEIS-II also evaluated the social cost associated with these GHG emissions. An average of 13 truck trips per year would be required to transport the 7,000 metric tons of elemental mercury to a storage location(s). Total GHG emissions in carbon dioxide equivalent for the 40-year analysis period would be between 592 tons and 4,312 tons dependent on the facility location and whether or not pre-storage treatment³ is undertaken. The GHGs associated with WCS would be between 1,161 tons and 3,477 tons. Noise created by mercury storage operations, including transportation, would be indiscernible from existing noise levels.

Ecological resources. No impacts on terrestrial resources, aquatic resources, wetlands, and threatened or endangered and other protected species would be expected for any of the alternative sites because of the use of existing buildings, which would require minimal-to-no external modifications. Because no external modifications would be expected at WCS, there would be no impacts to terrestrial, aquatic, or threatened or endangered species.

³ The Mercury Storage SEIS-II evaluates transportation related impacts if elemental mercury is transported for pre-storage treatment and then transported to the designated management and storage facility, as well as impacts if the elemental mercury is only transported to the designated facility.

Cultural resources. Except for HWAD, there are no known prehistoric or historic cultural resources at any of the alternative site locations, and any potential unknown sites would not be impacted since elemental mercury storage would occur within existing structures with no new construction or surface disturbance planned. At HWAD, the Group 110 design storehouses that are proposed for elemental mercury storage are historic architectural properties that are part of a larger historic district, as are many of the structures at HWAD. None of the Group 110 structures would be impacted under the Proposed Action other than by proposed building modifications. These modifications would be coordinated with the Nevada State Historic Preservation Office (SHPO). If HWAD were considered for designation, DOE would further consult with the Nevada SHPO on the proposed storage building modifications to determine the potential impacts on those structures eligible for listing on the *National Register of Historic Places* and potential mitigation measures, as appropriate. The consultation process would need to be completed prior to construction activities involving the facilities at HWAD.⁴ Therefore, the key activities related to cultural resources that would need to be completed prior to any construction activities at HWAD would include: (1) designation of HWAD for long-term management and storage of elemental mercury, (2) detailed design of all modifications to specific HWAD buildings and infrastructure, and (3) closure of the consultation process with the Nevada SHPO. Because WCS would use an existing, permitted building and not require any external modifications, there would be no impacts to cultural resources.

Site infrastructure. The frequency of elemental mercury shipments is projected to be small (average of 13 per year) compared with baseline truck traffic; therefore, existing road systems would be adequate for supporting the transfer of elemental mercury. All of the alternative sites have sufficient utility capacity to support elemental mercury storage. Because most of the sites are existing, permitted, operating facilities, the incremental increase in utility requirements would be small. At HWAD, additional utility services would have to be extended to the designated storage buildings, as needed, including electricity, heating, water, and

⁴ The consultation process under Section 106 of the *National Historic Preservation Act* can be found at: <https://www.ecfr.gov/current/title-36/chapter-VIII/part-800/subpart-B>.

communications even though the service capacity on site is sufficient. Additionally, access roads would have to be upgraded and/or constructed, as appropriate. The average of approximately 13 shipments per year of elemental mercury would represent an increase of about 0.5 percent to current shipments to the WCS site and there would be no appreciable increase in utility use at WCS.

Waste management. The operation of an elemental mercury storage facility would be expected to generate a quantity of hazardous waste that is commensurate with the amount of elemental mercury stored at the facility. The estimate of hazardous waste generation was based on the analysis in the 2011 Mercury Storage EIS, which assumed some degree of repackaging of potential leaking containers as well as a larger amount (10,000 MT) of elemental mercury. This is an extremely conservative estimate and is bounding for any of the alternative sites because the elemental mercury containers would not be routinely opened at the storage facility, leaking containers are expected to be a rare event, and the projected maximum storage capacity is now 7,000 MT. Assuming a capacity of 7,000 metric tons of elemental mercury, the Mercury Storage SEIS-II conservatively estimated that up to 637, 55-gallon drums of hazardous waste could be generated over the 40-year analytical period (about 16, 55-gallon drums per year). Approximately 16,000 gallons of sanitary wastewater would be expected to be generated per year from elemental mercury management and storage operations. Considering that WCS likely would not increase staff to support this effort, there would be no, or limited, increase in sanitary wastewater impacts for the Proposed Action.

Occupational and public health and safety. The Mercury Storage SEIS-II presented potential impacts for normal operations, facility accidents, and transportation. Normal operations would involve the receipt and long-term management and storage of elemental mercury. Exposures could arise during normal operating conditions from small amounts of mercury vapor accumulating in the storage areas. The estimated consequences to involved workers, noninvolved workers, or members of the public are anticipated to be negligible. Facility accidents could include elemental mercury spills inside or outside the storage building. The SEIS-II concluded that the potential risks (considering accident probability and potential consequences) to workers and the offsite public would range between negligible and low for these spills. The

highest potential consequences would be associated with the beyond-design-basis earthquake that, theoretically, could cause a total building collapse. In this extremely unlikely event, members of the public around the Bethlehem Apparatus and Clean Harbors Greenbrier sites could be within 330 feet of the storage buildings and could be exposed to potentially lethal concentrations. However, the probability of a beyond-design-basis earthquake in these areas is extremely unlikely, as the peak ground acceleration (g) for Bethlehem, Pennsylvania, and Greenbrier, Tennessee, is only 0.10 g and 0.14 g, respectively, indicating areas of relatively low seismic activity. Additionally, these members of the public likely would evacuate from the area immediately, resulting in a reduction of the potential severity level to the low range. Residents and other members of the public at other alternative sites would be farther away from the facilities and not subject to the higher potential consequences of a beyond-design-basis earthquake. As mentioned above for geology and soils, the seismicity of the region around WCS is even lower (0.08 g) and a beyond-design-basis earthquake that resulted in the collapse of the Container Storage Building is even more unlikely. Additionally, the closest public access to the WCS site is about 0.62 miles and accident risks to members of the public would be negligible-to-low.

For transportation health and safety, the transportation risks under all alternative sites are a function of the number of miles driven and the nature of the accident (fire or no fire). The various potential accident scenarios evaluated in the Mercury Storage SEIS-II would result in risks that range from negligible to low. Transportation of 7,000 MT of elemental mercury over 40 years to WCS would require about 627,000 miles of truck shipments. Compared to other alternatives, this is near the middle of the range (315,118 to 1,079,301 miles).

Ecological risks. Consequences, and hence risks, would be negligible to all ecological receptors except if there were a fire that accompanied an accident. Without fire, the primary risk is inhalation of mercury vapor, which is an insignificant pathway for exposure to ecological receptors. Some ecological receptors (e.g., sediment-dwelling biota, soil invertebrates, American robin, river otter, and plants) could have low risks under some specific accident scenarios with a fire. Under a very specific scenario involving a fire, coincident with rain, sediment-dwelling biota

could be subject to moderate risks. These risks are a function of the total shipment miles and therefore, the ecological risks from transportation of elemental mercury to WCS would be mid-range for all alternatives evaluated in the Mercury Storage SEIS-II.

Socioeconomics. There would be negligible impacts on socioeconomic conditions, including overall employment population trends, available housing, and other community services in the regions of influence associated with all alternative sites, including WCS.

Environmental justice. While there may be individual minority or low-income families living relatively near some of the alternative site locations, the sites are (or would be, in the case of HWAD) permitted by their respective states under RCRA for the storage of hazardous waste. The Proposed Action would not increase the human health risk beyond that approved as part of the RCRA permitting process. Implementing the Proposed Action would result in negligible offsite human health and ecological risks from mercury emissions during normal operations and most accidents. Potentially high mercury concentrations could occur in the event of a beyond-design-basis earthquake for some sites (Bethlehem Apparatus and Clean Harbors Greenbrier). Considering the probability of such an event, the potential risks associated with this extremely unlikely scenario are considered low. Implementing the Proposed Action at WCS would result in negligible offsite human health and ecological risks to both individuals and communities from mercury emissions during normal operations and accidents. Therefore, there would be no disproportionate and adverse effects on communities with environmental justice concerns under the Proposed Action at WCS.

Cumulative impacts. Considering the negligible-to-low potential impacts of the Proposed Action, the potential contribution of the Proposed Action to the cumulative impacts to the region of each alternative site was shown to be negligible, including WCS. Cumulative impacts for the WCS Region of Influence, including potential interim storage of up to 40,000 MTUs (metric tons of uranium) of commercial spent nuclear fuel, were determined to be either small or moderate for the following resource areas: land use, geology and soils, groundwater, air quality, noise, and visual resources.

F. Environmentally Preferable Alternative

Under the Proposed Action, the potential impacts of continuing to operate the existing, permitted, commercial storage facilities would be similar regardless of the location. Transportation of mercury to any of the existing facilities would be comparable, resulting in negligible-to-low human health risks from transportation accidents. Greenhouse gas emissions from transportation of mercury would be relatively low for all of the alternatives. However, the emissions are lower for HWAD than most of the commercial alternatives, if no pre-storage treatment is assumed. If there were pre-storage treatment, then the emissions for HWAD are larger than most of the commercial alternatives. For HWAD, required modifications to the Group 110 design storehouses and the new or upgraded infrastructure at the site would result in higher potential impacts than at existing, permitted, commercial storage facilities. These modifications would also require consultation with the Nevada SHPO prior to any construction actions because the proposed buildings are potentially eligible for listing on the *National Register of Historic Places*. Therefore, management and storage of elemental mercury at an existing, permitted, commercial storage facility would be the environmentally preferable alternative.

Under the No-Action Alternative, DOE would not consolidate, manage, and store elemental mercury. However, the No-Action Alternative could include transportation to and from various locations, as described in Section 4.2.9.4 of the Mercury Storage SEIS–II, and therefore would not be significantly different than the transportation impacts under the action alternatives. Under the No-Action Alternative, mercury could be stored indefinitely at multiple non-DOE locations (some of which are currently not permitted); therefore, an impact of the No-Action Alternative, other than DOE being non-compliant with Federal statutes, would be widely dispersed storage of mercury in uncertain conditions. Taking this into consideration, the No-Action Alternative would not be the environmentally preferable alternative.

G. Comments Received on the Final Mercury Storage SEIS–II

During the development of the Final SEIS–II, DOE considered the alternatives, information, analyses, and objections submitted by Federal, State,

Tribal, and local governments and public commenters.

DOE received comment letters from Coeur and from the Environmental Protection Agency after publishing the Final Mercury Storage SEIS–II. DOE considered these comments in preparation of this ROD.

H. NEPA Decision

This NEPA decision is consistent with the preferred alternative, which is to designate one or more of the existing commercial facilities evaluated in the Final Mercury Storage SEIS–II. As identified in Section E, Potential Environmental Impacts, the impacts presented in the Mercury Storage SEIS–II for the WCS site were the same or lower than most of the other existing, permitted, commercial storage facility sites analyzed in the SEIS–II. The environmental impacts are generally expected to be less than those at the HWAD site, and designation of the WCS site is expected to allow for the long-term management and storage of elemental mercury years earlier than if HWAD were utilized. The No Action Alternative would not fulfill DOE's statutory obligations.

Based on consideration of the analysis in the Mercury Storage SEIS–II as well as other considerations detailed below in Section J, DOE has decided to select WCS for designation as the facility for long-term management and storage of elemental mercury. The additional basis for the MEBA designation decision is included in Section J, below.

I. Mitigation

The Mercury Storage SEIS–II determined that potential environmental impacts associated with DOE's long-term management and storage of 7,000 metric tons (7,700 tons) of elemental mercury would generally be negligible-to-low and that the storage and management of elemental mercury would be subject to regulatory oversight by permitting agencies, including compliance with RCRA. Many features of WCS are designed to meet applicable permitting standards or to otherwise avoid harm to the environment. The WCS storage facility is located on a 13,500-acre tract of private land with no human residents within 3.4 miles. SEIS–II (Sections 3.3.1.1, 3.3.11). The facility design includes concrete sealed floors with a reinforced concrete foundation, and bermed container storage areas that provide protection from the external environment and isolation from other storage areas in the event of a leaking source. SEIS–II (Sections 4.4.3.1, 2.3.2). WCS also features numerous safety and accident

response systems, including a fire suppression system, an exhaust-fan-ventilated storage area, a mercury vapor monitor, and a full emergency response organization that includes capabilities for radiological, hazardous materials, fire, and medical incidents. SEIS–II (Sections 2.3.2; 3.3.9.2). Based upon the limited potential for adverse environmental impacts identified in the SEIS–II, the robust design and accident response features of WCS, terms and conditions of the proposed contract (see Section J), and applicable regulatory and statutory requirements, the selected alternative incorporates all practicable means to avoid or minimize environmental harm.

J. Designation Decision Under MEBA

As explained in more detail above, the alternatives analyzed in detail in the SEIS–II included an existing Federal facility (HWAD) and commercial facilities at various locations (WCS; Bethlehem Apparatus; Perma-Fix Diversified Scientific Services; Veolia Environmental Services; and Clean Harbors Environmental Services).

During the NEPA process, DOE also considered and dismissed numerous other alternatives. The alternative of constructing a new facility was dismissed from detailed analysis in the SEIS–II because it would add at least five years to the timeline for DOE's designated MEBA facility to become operational and ready to receive elemental mercury, when compared to the designation of an existing, permitted facility. New construction would also introduce uncertainty in the timeline for having a fully operational MEBA facility, as schedule delays in the construction and/or RCRA permitting process or other issues outside DOE's control might prevent a newly constructed facility from becoming operational for significantly more than five years. A newly constructed facility would therefore not meet DOE's need to begin accepting elemental mercury as soon as practicable. DOE also considered the possibility of repurposing an existing facility on DOE property. However, DOE was unable to identify any such facility that met certain minimum criteria for future use as the designated MEBA facility.⁵

⁵ These criteria included that the facility: must not create a significant conflict with any existing DOE site mission and not interfere with future mission compatibility; must be suitable for mercury storage with the capability and flexibility for operational expansion, if necessary; must be capable of complying with RCRA permitting requirements, including siting requirements; must have supporting infrastructure and a capability or potential capability for flooring that would support mercury loadings; must be compatible with local

In parallel with the most recent NEPA evaluation, DOE conducted an independent and competitive procurement process to evaluate a contractor(s) that could provide DOE both a leasehold interest in, and the services associated with, a long-term elemental mercury management and storage facility (LTEMFSF) meeting DOE specifications and subject to DOE's technical direction. As part of that process, a Request for Information/Sources Sought notice was published on October 14, 2020, a synopsis was posted September 21, 2021, and the Request for Proposals (RFP) was issued March 24, 2022. Two timely proposals were received by the due date of June 1, 2022. One of the proposals was later withdrawn, but through this procurement process, DOE identified one commercial facility that responded to the RFP. DOE evaluated its response and determined that it met the lowest evaluated price and met or exceeded the acceptability standards for non-cost factors in accordance with 48 CFR 15.101–2. The facility was WCS. The owners of the other facilities analyzed as commercial alternatives in the SEIS–II did not compete in the procurement process.

DOE hereby designates as the LTEMFSF pursuant to MEBA, WCS in Andrews County, Texas. In addition to the reasons discussed previously under Section H, NEPA Decision, the decision to designate WCS as the LTEMFSF is based on the following considerations.

First, of the alternatives evaluated, the designation of WCS allows for the most expeditious and certain timeline for DOE to have an LTEMFSF operational and ready to accept elemental mercury, consistent with MEBA's fundamental objective of providing a safe option for storing domestic elemental mercury at a facility or facilities of the DOE. Congress initially charged DOE to designate a LTEMFSF that would be operational by January 1, 2013, and later extended that deadline to January 1, 2019. Public Law 110–414, 122 Stat. 4344 (Oct. 14, 2008); Public Law 114–182, 130 Stat. 478 (June 22, 2016). Although those milestone dates have passed, Congress has not extended the date by which the LTEMFSF must be operational. DOE therefore identified a need to designate an LTEMFSF facility and begin accepting elemental mercury as soon as practicable. WCS is an established, existing, permitted waste facility

capable of expeditiously accepting elemental mercury for long-term management and storage. In contrast, selecting HWAD, a facility that requires significant modifications and development processes, time-consuming real estate transactions, and a waste permit, or constructing a new facility, would both (1) extend the timeline for having an operational storage facility, and (2) create additional uncertainty in that timeline. In a best-case scenario, selecting HWAD or constructing a new facility would likely result in elemental mercury continuing to be stored for at least five years longer in widely dispersed storage locations in uncertain conditions instead of in a DOE-controlled LTEMFSF.

Furthermore, issues outside DOE's control could arise during the planning, budgeting, construction, and/or permitting processes that prevent HWAD or a new facility from becoming fully operational for much longer than five years. For example, due to statutory prohibitions on the use of Department of Defense (“DoD”) installations for the storage of toxic or hazardous materials not owned by the DoD, 10 U.S.C. 2692, the relevant portion of HWAD would likely need to be purchased by or otherwise transferred to DOE before non-DoD elemental mercury could be stored at the facility. An acquisition or administrative transfer process would require actions by multiple Federal agencies, including the Department of the Army and the General Services Administration, and the timing and decision making of those agencies is outside DOE's control. The additional time required to build a new facility or modify an existing facility like HWAD would cause DOE to fall significantly further behind the statutory deadline for a DOE-designated LTEMFSF to be operational. MEBA imposed financial consequences on DOE for missing the January 1, 2019, deadline, such that the longer it takes for DOE to have an operational LTEMFSF, the greater the amount of private mercury storage costs that are borne by DOE, and indirectly, by the United States.⁶ Selecting WCS as the designated LTEMFSF brings DOE into compliance with MEBA's directives as soon as practicable, avoids introducing

uncertainty in the timeline for when the LTEMFSF will become operational and capable of accepting elemental mercury, and minimizes DOE's financial responsibility for the ongoing storage of elemental mercury by generators pending the availability of the LTEMFSF.

Second, leasing space for management and storage at WCS provides DOE managerial flexibility to adjust to evolving circumstances as it conducts its management and storage obligations pursuant to MEBA. Based on currently available information, DOE believes there is a realistic possibility that an approved treatment and disposal method for elemental mercury in the United States will be available within 10 years. An approved treatment and disposal method would likely decrease both the length of time the designated MEBA facility would need to store elemental mercury and the quantity of elemental mercury to be stored. Given the uncertainty in how long the LTEMFSF will be needed, designating WCS enables DOE to evaluate the impact of any forthcoming treatment and disposal option or other statutory or regulatory changes that may affect the expected storage duration or capacity, without making the larger commitments of capital and administrative resources necessary to purchase, construct, or significantly modify a federally owned facility.

Additionally, because there is a realistic possibility that a treatment and disposal method for domestic elemental mercury will be available within 10 years, and because it will take at least 5 years after designation for HWAD or a newly constructed facility to be ready to receive elemental mercury, investing resources to modify or construct a facility that may only be used for 5 years is not cost effective or a prudent investment of resources. DOE has prepared a relative cost comparison workbook based on a 2007 EPA report that demonstrates that, in the short-term (e.g., about 10 years), management and storage of elemental mercury at an existing, permitted, commercial facility like WCS is likely to be less expensive than any of the previously evaluated alternatives requiring capital improvements (DOE-New, DOE-Existing/Retrofit, and Hawthorne/Retrofit). Other factors not reflected in DOE's cost comparison workbook also weigh in favor of selecting WCS. The workbook does not include administrative burdens associated with a federally funded project and DOE's acquisition of real property, which would likely be required to establish an LTEMFSF at HWAD (see 10 U.S.C. 2692) or for construction of a new facility.

and regional land use plans if used for mercury storage, and new construction would be feasible, as may be required; must be accessible to major transportation routes; and must have sufficient information on hand to adequately characterize the site. SEIS–II (Section 2.2.4).

⁶ Because the LTEMFSF was not operational by January 1, 2019, MEBA compels DOE to subtract the costs to mercury generators of temporarily accumulating certain elemental mercury after that date from DOE's future fee assessments to those generators. 42 U.S.C. 6939f(b)(1)(B)(iv). The more time that passes after January 1, 2019, and before the LTEMFSF is operational and accepts custody of elemental mercury, the greater the amount DOE will need to subtract from its future fee assessments to mercury generators, resulting in correspondingly greater costs to the United States.

Selecting WCS avoids these costs to DOE and other Federal agencies. The cost comparison workbook also does not reflect the fact that MEBA, as amended, makes DOE indirectly financially responsible for the costs of storing certain elemental mercury accumulated by mercury generators after January 1, 2019, by requiring DOE to subtract these costs from its future MEBA fee assessments to these generators. 42 U.S.C. 6939f(b)(1)(B)(iv). These indirect costs to DOE, in the form of foregone future fee assessments, increase the longer it takes DOE's designated LTEMFSF to become operational. Selecting an existing, permitted facility like WCS minimizes these costs.

Third, DOE's selection of WCS as the Secretary's designated LTEMFSF satisfies the requirement of MEBA that "the Secretary of Energy shall designate a facility or facilities of the Department of Energy for the purpose of long-term management and storage of elemental mercury generated within the United States." MEBA section 5(a)(1) (42 U.S.C. 6939f(a)(1)). MEBA does not define the phrase, "facility or facilities of the Department of Energy[.]" but it does state that "[t]he Secretary is authorized to establish such terms, conditions, and procedures as are necessary to carry out this section." DOE construes the phrase "facility or facilities of the Department of Energy" to include a facility leased from a commercial entity or another Federal agency, over which DOE provides an appropriate level of responsibility and control. This construction is consistent with MEBA's plain language and DOE's operational history. Certain comments on the Draft SEIS-II asserted that "facility or facilities of the Department of Energy" could only mean one or more facilities owned by DOE or owned and operated by DOE. However, MEBA does not expressly require the designated facility to be owned by DOE or even by the U.S. government. Similarly, MEBA does not mandate that DOE employees operate the designated facility and does not prohibit DOE from using qualified contractors in connection with the facility. The phrase "facility or facilities of the Department of Energy" encompasses facilities leased by DOE and subject to an appropriate level of DOE responsibility and control. This structure provides DOE flexibility to select a facility that best serves the various requirements and purposes of MEBA and the fiscal and mission responsibilities of DOE, regardless of ownership.

DOE has determined that the lease and contract with WCS, developed through DOE's competitive procurement

process, will provide DOE a leasehold interest in WCS property and an appropriate level of responsibility and control over the property such that it will become a "facility or facilities of the Department of Energy" within the meaning of MEBA Section 5(a)(1). By entering into the lease and contract DOE can ensure that the LTEMFSF is managed and operated in compliance with MEBA and other applicable legal requirements, including those addressing the protection of human health and the environment. For example, as set forth in the RFP, among other control measures, DOE will ensure that the designated facility: (1) complies with all applicable local, state, and Federal regulations including all applicable RCRA requirements; (2) employs a fully enclosed, weather-protected structure that complies with all applicable building, fire, and life safety codes and standards; (3) meets RCRA and Department of Transportation-compliant performance measures covering, among other things, receiving, handling, container storage, and security; (4) satisfies applicable local, state, and Federal regulatory requirements for recordkeeping and reporting; and (5) submits operating records, inventories, and other reports to DOE for periodic review. In addition to contractually imposed oversight, the arrangement between DOE and WCS will involve DOE entering into a lease agreement covering the premises where the operations will occur. The lease will require, among other things, the premises to be used exclusively for DOE elemental mercury management and storage, consistent with contract provisions governing operations at the premises, and will grant DOE access to the premises.⁷ Awarding the contract to WCS will formally conclude DOE's independent and competitive procurement process, which was conducted in compliance with applicable Federal Acquisition Regulations.⁸

Therefore, DOE has selected WCS for designation as the LTEMFSF under MEBA. As identified in Section E, Potential Environmental Impacts, the impacts presented in the Mercury Storage SEIS-II for the WCS site were comparable to the other action alternatives. This MEBA decision is consistent with the preferred alternative in the Final Mercury Storage SEIS-II and the NEPA decision in this ROD.

⁷ Request for Proposals, Section J.5.

⁸ The selection of WCS is also consistent with the Federal Government's general policy of using commercial services and capabilities when they are sufficient to meet the mission needs. See, e.g. FAR Part 12.

Although this document satisfies DOE's obligation to designate a facility or facilities of the DOE for the purpose of long-term management and storage of elemental mercury generated within the United States, MEBA Section 5(b) (42 U.S.C. 6939f(b)) also requires DOE to assess and collect a fee at the time that elemental mercury is delivered to the designated facility. As explained in responses to comments on the Draft SEIS-II, after publication of this document, DOE intends to focus on issuing a rule to establish the fee. At this time, however, DOE remains unable to accept elemental mercury from generators at a facility of the Department of Energy for long-term management and storage. DOE acknowledges that the temporary storage provisions of MEBA Section 5(g)(2) (42 U.S.C. 6939f(g)(2)) remain in effect until DOE is able to accept elemental mercury shipments at the designated facility or facilities, which will generally require applying DOE's future fee rule to assess a fee pursuant to MEBA Section 5(b).

Signing Authority

This document of the Department of Energy was signed on November 21, 2024, by Candice Trummell, Senior Advisor for Environmental Management, pursuant to delegated authority from the Secretary of Energy. The document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on November 22, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Privacy Act of 1974; System of Records

AGENCY: U.S. Department of Energy.

ACTION: Notice of a modified system of records.

SUMMARY: As required by the Privacy Act of 1974 and the Office of

Management and Budget (OMB) Circulars A–108 and A–130, the Department of Energy (DOE or the Department) is publishing notice of a modification to an existing Privacy Act System of Records. DOE proposes to amend System of Records DOE–26 Official Travel Records. This System of Records Notice (SORN) is being modified to align with new formatting requirements, published by OMB, and to ensure appropriate Privacy Act coverage of business processes and Privacy Act information.

DATES: This modified SORN will become applicable following the end of the public comment period on January 2, 2025 unless comments are received that result in a contrary determination.

ADDRESSES: Written comments should be sent to Ken Hunt, Chief Privacy Officer, U.S. Department of Energy, 1000 Independence Avenue SW, Rm. 8H–085, Washington, DC 20585, by facsimile at (202) 586–8151, or by email at privacy@hq.doe.gov.

FOR FURTHER INFORMATION CONTACT: Ken Hunt, Chief Privacy Officer, U.S. Department of Energy, 1000 Independence Avenue SW, Rm. 8H–085, Washington, DC 20585, by facsimile at (202) 586–8151, by email at privacy@hq.doe.gov, or by telephone (240) 686–9485.

SUPPLEMENTARY INFORMATION: On January 9, 2009, DOE published a Compilation of its Privacy Act Systems of Records, which included System of Records DOE–26 Official Travel Records. This notice proposes amendments to the system locations section of that system of records by removing the following system locations where DOE–26 is no longer applicable: Office of Science, Chicago and Oak Ridge Offices, Alaska Power Administration, National Energy Technology Laboratory (Pittsburgh Office), Naval Petroleum and Oil Shale Reserves in Colorado, Utah, and Wyoming, Naval Petroleum Reserves in California, and the National Nuclear Security Administration (NNSA) Nevada Site Office. This notice updates addresses for the following sites: NNSA John A. Gordon Albuquerque Complex, Office of River Protection, and the Southwestern Power Administration. In the “Routine Uses” section, this modified notice deletes a previous routine use concerning efforts responding to a suspected or confirmed loss of confidentiality of information as it appears in DOE’s compilation of its Privacy Act systems of records (January 9, 2009) and replaces it with one to assist DOE with responding to a suspected or confirmed breach of its

records of Personally Identifiable Information (PII), modeled with language from OMB’s Memorandum M–17–12, “Preparing for and Responding to a Breach of Personally Identifiable Information” (January 3, 2017). Further, this notice adds one new routine use to ensure that DOE may assist another agency or entity in responding to the other agency’s or entity’s confirmed or suspected breach of PII, as appropriate, as aligned with OMB’s Memorandum M–17–12. To “Categories of Individuals Covered by the System,” this notice now includes individuals who travel or relocate “as part of their official duties.” To the “Categories of Records in the System,” this notice now includes age, passport information, known traveler number or other official identifying number, travel sponsor, or host information.” “Record Source Categories” now includes “travel and financial systems” and “human resource systems.” This notice now includes a routine use that allows the Department to disclose information “to protect national security and the security of activities, information, installations, property, or individuals.” This new routine use is listed as number seven. “Policies and Practices for Retrieval of Records” now include the possibility that records may be retrieved using a “unique identifier, such as employee ID.” An administrative change required by the FOIA Improvement Act of 2016 extends the length of time a requestor is permitted to file an appeal under the Privacy Act from 30 to 90 days. Both the “System Locations” and “Administrative, Technical and Physical Safeguards” sections have been modified to reflect the Department’s usage of cloud-based services for records storage. Language throughout the SORN has been updated to align with applicable Federal privacy laws, policies, procedures, and best practices.

SYSTEM NAME AND NUMBER:

DOE–26 Official Travel Records.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Systems leveraging this SORN may exist in multiple locations. All systems storing records in a cloud-based server are required to use government-approved cloud services and follow National Institute of Standards and Technology (NIST) security and privacy standards for access and data retention. Records maintained in a government-approved cloud server are accessed

through secure data centers in the continental United States.

U.S. Department of Energy, Headquarters, 1000 Independence Avenue SW, Washington, DC 20585.

U.S. Department of Energy, Bonneville Power Administration, P.O. Box 3621, Portland, OR 97208.

U.S. Department of Energy, Environmental Management Consolidated Business Center (EMCBC), 550 Main Street, Rm. 7–010, Cincinnati, OH 45202.

U.S. Department of Energy, Idaho Operations Office, 1955 Fremont Avenue, Idaho Falls, ID 83415.

U.S. Department of Energy, NNSA Naval Reactors Field Office, Pittsburgh Naval Reactors, P.O. Box 109, West Mifflin, PA 15122–0109.

U.S. Department of Energy, NNSA Naval Reactors Field Office, Schenectady Naval Reactors, P.O. Box 1069, Schenectady, NY 12301.

U.S. Department of Energy, John A. Gordon Albuquerque Complex, 24600 20th Street SE, Albuquerque, NM 87116.

U.S. Department of Energy, Hanford Field Office, P.O. Box 550, Richland, WA 99352.

U.S. Department of Energy, Savannah River Operations Office, P.O. Box A, Aiken, SC 29801.

U.S. Department of Energy, Southeastern Power Administration, 1166 Athens Tech Road, Elberton, GA 30635–6711.

U.S. Department of Energy, Southwestern Power Administration, One West Third Street, Suite 1500, Tulsa, OK 74103.

U.S. Department of Energy, Strategic Petroleum Reserve Project Management Office, 900 Commerce Road East, New Orleans, LA 70123.

U.S. Department of Energy, Western Area Power Administration, P.O. Box 281213, Lakewood, CO 80228–8213.

SYSTEM MANAGER(S):

Headquarters: Chief Financial Officer, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585.

Field Offices: The field Chief Financial Officers of the “System Locations” listed above are the system managers for their respective portions of this system.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 7101 *et seq.*; 50 U.S.C. 2401 *et seq.*; 5 U.S.C. 301; 5 U.S.C. chapter 57; Policy and Procedures Manual for Guidance of Federal Agencies, titles 3 and 4; Federal Travel Regulation; Federal Property Management Regulations 101–41; Department of Energy Order 550.1, current version.

PURPOSE(S) OF THE SYSTEM:

Records in this system are maintained and used by DOE to document official domestic and foreign travel and relocation expenditures and to support reimbursement of allowable expenses.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who travel or relocate as part of their official duties or at the expense of DOE, including NNSA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, weight, age, address, telephone number, passport information, known traveler number or other official identifying number, travel sponsor, host information, authorization number, travel itinerary, mode, and purpose of travel, advance amount, expenses claimed, amounts reimbursed, charge card account numbers, residential sales records, and receipts.

RECORD SOURCE CATEGORIES:

Individual travelers, supervisors, government travel offices, travel and financial systems, human resource systems, and finance office standard references.

ROUTINE USES OF RECORDS IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

1. A record from this system may be disclosed as a routine use to the U.S. Treasury for payment of a claim.

2. A record from this system may be disclosed as a routine use to the U.S. General Accounting Office for audit and verification of accuracy and legality of disbursements.

3. A record from this system may be disclosed as a routine use to the Internal Revenue Service for notification regarding taxable reimbursements.

4. A record from this system may be disclosed as a routine use to the General Services Administration for audit of transportation services.

5. A record from this system may be disclosed as a routine use to DOE contractors in performance of their contracts, and their officers and employees who have a need for the record in the performance of their duties. Those provided information under this routine use are subject to the same limitations applicable to Department officers and employees under the Privacy Act.

6. A record from this system may be disclosed as a routine use to the appropriate local, tribal, state, or Federal agency when records, alone or in conjunction with other information, indicate a violation or potential violation of law whether civil, criminal, or regulatory in nature, and whether

arising by general statute or particular program pursuant thereto.

7. A record from this system may be disclosed as a routine use to the appropriate local, tribal, state, or Federal agency to protect national security and the security of activities, information, installations, property, or individuals.

8. A record from this system may be disclosed as a routine use to a member of Congress submitting a request involving a constituent when the constituent has requested assistance from the member concerning the subject matter of the record. The member of Congress must provide a copy of the constituent's signed request for assistance.

9. A record from this system may be disclosed as a routine use to appropriate agencies, entities, and persons when (1) the Department suspects or has confirmed that there has been a breach of the system of records; (2) the Department has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, DOE (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Department's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

10. A record from this system may be disclosed as a routine use to another Federal agency or Federal entity, when the Department determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records may be stored as paper records or electronic media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved by name or other unique identifier, such as employee ID, or travel authorization number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Retention and disposition of these records is in accordance with the National Archives and Records Administration-approved records disposition schedule with a retention of 6 years.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Electronic records may be secured and maintained on a cloud-based software server and operating system that resides in Federal Risk and Authorization Management Program (FedRAMP) and Federal Information Security Modernization Act (FISMA) hosting environment. Data located in the cloud-based server is firewalled and encrypted at rest and in transit. The security mechanisms for handling data at rest and in transit are in accordance with DOE encryption standards. Records are protected from unauthorized access through the following appropriate safeguards:

- *Administrative:* Access to all records is limited to lawful government purposes only, with access to electronic records based on role and either two-factor authentication or password protection. The system requires passwords to be complex and to be changed frequently. Users accessing system records undergo frequent training in Privacy Act and information security requirements. Security and privacy controls are reviewed on an ongoing basis.

- *Technical:* Computerized records systems are safeguarded on Departmental networks configured for role-based access based on job responsibilities and organizational affiliation. Privacy and security controls are in place for this system and are updated in accordance with applicable requirements as determined by NIST and DOE directives and guidance.

- *Physical:* Computer servers on which electronic records are stored are located in secured Department facilities, which are protected by security guards, identification badges, and cameras. Paper copies of all records are locked in file cabinets, file rooms, or offices and are under the control of authorized personnel. Access to these facilities is granted only to authorized personnel and each person granted access to the system must be an individual authorized to use or administer the system.

RECORD ACCESS PROCEDURES:

The Department follows the procedures outlined in title 10 CFR 1008.4. Valid identification of the

individual making the request is required before information will be processed, given, access granted, or a correction considered, to ensure that information is processed, given, corrected, or records disclosed or corrected only at the request of the proper person.

CONTESTING RECORD PROCEDURES:

Any individual may submit a request to the System Manager and request a copy of any records relating to them. In accordance with 10 CFR 1008.11, any individual may appeal the denial of a request made by him or her for information about or for access to or correction or amendment of records. An appeal shall be filed within 90 calendar days after receipt of the denial. When an appeal is filed by mail, the postmark is conclusive as to timeliness. The appeal shall be in writing and must be signed by the individual. The words "PRIVACY ACT APPEAL" should appear in capital letters on the envelope and the letter. Appeals of denials relating to records maintained in government-wide System of Records reported by Office of Personnel Management (OPM), shall be filed, as appropriate, with the Assistant Director for Agency Compliance and Evaluation, OPM, 1900 E Street NW, Washington, DC 20415. All other appeals relating to DOE records shall be directed to the Director, Office of Hearings and Appeals (OHA), 1000 Independence Ave. SW, Washington, DC 20585.

NOTIFICATION PROCEDURES:

In accordance with the DOE regulation implementing the Privacy Act, 10 CFR part 1008, a request by an individual to determine if a system of records contains information about themselves should be directed to the U.S. Department of Energy, Headquarters, Privacy Act Officer. The request should include the requester's complete name and the time period for which records are sought.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

This SORN was last published in the **Federal Register**, 74 FR 1026–1028, on January 9, 2009.

Signing Authority

This document of the Department of Energy was signed on Nov 27, 2024, by Ann Dunkin, Senior Agency Official for Privacy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in

compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on November 26, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG25–43–000.

Applicants: Wild Plains Wind Project, LLC.

Description: Wild Plains Wind Project, LLC submits Notice of Self-Certification of Exempt Wholesale Generator Status.

Filed Date: 11/21/24.

Accession Number: 20241121–5203.

Comment Date: 5 p.m. ET 12/12/24.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER22–2467–001.

Applicants: ISO New England Inc., Eversource Energy Service Company (as agent), New England Power Company, Vermont Electric Power Company, Inc.

Description: Compliance filing: Eversource Energy Service Company (as agent) submits tariff filing per 35: Filing Providing Order No. 881 Implementation Details to be effective N/A.

Filed Date: 11/22/24.

Accession Number: 20241122–5048.

Comment Date: 5 p.m. ET 12/13/24.

Docket Numbers: ER22–2468–001.

Applicants: ISO New England Inc., New England Power Company, Vermont Electric Power Company, Inc., Eversource Energy Service Company (as agent).

Description: Compliance filing: ISO New England Inc. submits tariff filing per 35: Filing Providing Order No. 881 Implementation Details to be effective N/A.

Filed Date: 11/22/24.

Accession Number: 20241122–5049.

Comment Date: 5 p.m. ET 12/13/24.

Docket Numbers: ER24–2033–001.

Applicants: GridLiance High Plains LLC.

Description: Compliance filing: GHP Order 2023 Further Compliance Filing to be effective 9/1/2024.

Filed Date: 11/22/24.

Accession Number: 20241122–5047.

Comment Date: 5 p.m. ET 12/13/24.

Docket Numbers: ER24–2899–002.

Applicants: PJM Interconnection, L.L.C.

Description: Tariff Amendment: Amendment of ER25–2699–001 re: Amendment of GIA SA No. 7337; AF2–238 to be effective 7/29/2024.

Filed Date: 11/22/24.

Accession Number: 20241122–5040.

Comment Date: 5 p.m. ET 12/13/24.

Docket Numbers: ER25–509–000.

Applicants: FirstLight Power Management LLC.

Description: 205(d) Rate Filing: Normal filing 2024 to be effective 1/20/2025.

Filed Date: 11/21/24.

Accession Number: 20241121–5208.

Comment Date: 5 p.m. ET 12/12/24.

Docket Numbers: ER25–510–000.

Applicants: ISO New England Inc., New England Power Company.

Description: 205(d) Rate Filing: ISO New England Inc. submits tariff filing per 35.13(a)(2)(iii): New England Power d/b/a National Grid 2024 PBOP Refund to be effective 1/21/2025.

Filed Date: 11/22/24.

Accession Number: 20241122–5007.

Comment Date: 5 p.m. ET 12/13/24.

Docket Numbers: ER25–511–000.

Applicants: PJM Interconnection, L.L.C.

Description: 205(d) Rate Filing: Original GIA Service Agreement No. 7406; Project Identifier No. AG1–301 to be effective 10/23/2024.

Filed Date: 11/22/24.

Accession Number: 20241122–5046.

Comment Date: 5 p.m. ET 12/13/24.

Docket Numbers: ER25–512–000.

Applicants: Midcontinent Independent System Operator, Inc., Ameren Illinois Company.

Description: 205(d) Rate Filing: Midcontinent Independent System Operator, Inc. submits tariff filing per 35.13(a)(2)(iii): 2024–11–22_SA 4403 Ameren IL-Cumberland Road North Solar E&P (J1744) to be effective 11/23/2024.

The filings are accessible in the
 Commission's eLibrary system ([https://
 elibrary.ferc.gov/idmws/search/
 fercgensearch.asp](https://elibrary.ferc.gov/idmws/search/fercgensearch.asp)) by querying the
 docket number.

Any person desiring to intervene, to
 protest, or to answer a complaint in any
 of the above proceedings must file in
 accordance with Rules 211, 214, or 206
 of the Commission's Regulations (18
 CFR 385.211, 385.214, or 385.206) on or
 before 5:00 p.m. Eastern time on the
 specified comment date. Protests may be
 considered, but intervention is
 necessary to become a party to the
 proceeding.

eFiling is encouraged. More detailed
 information relating to filing
 requirements, interventions, protests,
 service, and qualifying facilities filings
 can be found at: [https://www.ferc.gov/
 docs-filing/efiling/filing-req.pdf](https://www.ferc.gov/docs-filing/efiling/filing-req.pdf). For
 other information, call (866) 208–3676
 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public
 Participation (OPP) supports meaningful
 public engagement and participation in
 Commission proceedings. OPP can help
 members of the public, including
 landowners, environmental justice
 communities, Tribal members and
 others, access publicly available
 information and navigate Commission
 processes. For public inquiries and
 assistance with making filings such as
 interventions, comments, or requests for
 rehearing, the public is encouraged to
 contact OPP at (202) 502–6595 or [OPP@
 ferc.gov](mailto:OPP@ferc.gov).

Dated: November 22, 2024.

Debbie-Anne A. Reese,
Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17–486–001]

National Fuel Gas Supply Corporation; Notice of Request for Extension of Time

Take notice that on November 19,
 2024, National Fuel Gas Supply
 Corporation (National Fuel) requested
 that the Commission grant an extension
 of time, until December 1, 2025, to test
 Well 7451 located within the Beech Hill
 Storage Field buffer boundary (Project)
 located in Allegany and Steuben
 Counties, New York as authorized in the
 January 26, 2018 Commission Order
 (Order).¹ The Order required National
 Fuel to complete well testing of Well
 7451 within three years of the date of
 the Order. The Commission
 subsequently granted two extensions of
 time; the current deadline for
 completing the well testing is December
 1, 2024.²

Currently, National Fuel has
 completed withdrawals from Well 7451
 and does not intend to undertake further
 withdrawals from the well. National
 Fuel states that it needs additional time
 to complete its assessment of data
 gathered from well testing which
 includes analyses of associated
 modeling and other data gathered over
 the testing period. National Fuel
 requests an extension of time to
 December 1, 2025, to complete its
 assessment and finalize an application
 filing.

This notice establishes a 15-calendar
 day intervention and comment period
 deadline. Any person wishing to
 comment on National Fuel's request for
 an extension of time may do so. No
 reply comments or answers will be
 considered. If you wish to obtain legal
 status by becoming a party to the
 proceedings for this request, you
 should, on or before the comment date
 stated below, file a motion to intervene
 in accordance with the requirements of
 the Commission's Rules of Practice and
 Procedure (18 CFR 385.214 or 385.211)
 and the Regulations under the Natural
 Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the
 Commission itself generally acts on
 requests for extensions of time to
 complete construction for NGA facilities
 when such requests are contested before
 order issuance. For those extension

¹ National Fuel Gas Supply Corporation, 162
 FERC ¶ 62,063 (2018).

² National Fuel Gas Supply Corporation, Docket
 No. CP17–486–000, Letter Order Granting
 Extension, (December 18, 2023).

requests that are contested,³ the Commission will aim to issue an order acting on the request within 45 days.⁴ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁵ The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).⁶ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁷ The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<https://www.ferc.gov>). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

The Commission strongly encourages electronic filings of comments in lieu of paper using the "eFile" link at <https://www.ferc.gov>.

³ Contested proceedings are those where an intervenor disputes any material issue of the filing. 18 CFR 385.2201(c)(1).

⁴ *Algonquin Gas Transmission, LLC*, 170 FERC ¶ 61,144, at P 40 (2020).

⁵ *Id.* at P 40.

⁶ Similarly, the Commission will not re-litigate the issuance of an NGA section 3 authorization, including whether a proposed project is not inconsistent with the public interest and whether the Commission's environmental analysis for the permit order complied with NEPA.

⁷ *Algonquin Gas Transmission, LLC*, 170 FERC ¶ 61,144, at P 40 (2020).

www.ferc.gov. In lieu of electronic filing, you may submit a paper copy which must reference the Project docket number.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Comment Date: 5:00 p.m. Eastern Time on December 9, 2024.

Dated: November 22, 2024.

Debbie-Anne A. Reese,
Secretary.

Privacy Act of 1974; System of Records

AGENCY: Federal Energy Regulatory Commission (FERC), Department of Energy (DOE).

ACTION: Notice of a modified system of records.

SUMMARY: In accordance with the Privacy Act of 1974, all agencies are required to publish in the **Federal Register** a notice of their systems of records. Notice is hereby given that the Federal Energy Regulatory Commission (FERC) is publishing a notice of modifications to an existing FERC

system of records titled "Federal Personnel and Payroll Records (FERC-57)" previously titled "Federal Personnel and Payroll System (FPPS)."

DATES: Comments on this modified system of records must be received no later than 30 days after date of publication in the **Federal Register**. If no public comment is received during the period allowed for comment or unless otherwise published in the **Federal Register** by FERC, the modified system of records will become effective a minimum of 30 days after date of publication in the **Federal Register**. If FERC receives public comments, FERC shall review the comments to determine whether any changes to the notice are necessary.

ADDRESSES: Comments should be submitted in writing to Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 or electronically to privacy@ferc.gov. Comments should indicate that they are submitted in response to "Federal Personnel and Payroll Records (FERC-57)".

FOR FURTHER INFORMATION CONTACT: Mittal Desai, Chief Information Officer & Senior Agency Official for Privacy, Office of the Executive Director, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, privacy@ferc.gov, (202) 502-6832.

SUPPLEMENTARY INFORMATION: In accordance with the Privacy Act of 1974, and to comply with the Office of Management and Budget (OMB) Memorandum M-17-12, "Preparing for and Responding to a Breach of Personally Identifiable Information," January 3, 2017, this notice has twelve (12) new routine uses (routine uses 1-12), including two routine uses that will permit FERC to disclose information as necessary in response to an actual or suspected breach that pertains to a breach of its own records or to assist another agency in its efforts to respond to a breach that was previously published separately at 87 FR 35543 (June 10, 2022).

The following sections have been updated to reflect changes made since the publication of the last notice in the **Federal Register**: dates; addresses; for further contact information; system name and number; system location; purpose of the system; categories of individuals covered by the system; categories of records in the system; record source categories; routine uses of records maintained in the system, including categories of users and the purpose of such; policies and practices for storage of records; policies and

practices for retrieval of records; policies and practices for retention and disposal of records; administrative, technical, physical safeguards; records access procedures; contesting records procedures; notification procedures; and history.

SYSTEM NAME AND NUMBER:

Federal Personnel and Payroll Records (FERC-57).

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Interior Business Center, U.S. Department of the Interior, One Denver Federal Center, Bldg. 48, Denver, CO 80225.

Human Resources Division, Office of the Executive Director, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

SYSTEM MANAGER(S):

Director, Human Resources Division, Office of the Executive Director, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502-6852.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 2951, 5 U.S.C. 5101 *et seq.*

PURPOSE(S) OF THE SYSTEM:

The main purpose of the system is to provide personnel and payroll support and workforce management including: salary and benefits payment; and time, attendance, leave, other absences tracking and reporting. The system is used to create and generate the full life cycle of personnel transactions including, but not limited to, personnel actions, vacancy announcements, candidate processing and interviews, new hire tracking, specialized pay, garnishments, and appointment programs.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The following categories of individuals are covered by the system: current and former employees and their beneficiaries; and candidates for employment.

CATEGORIES OF RECORDS IN THE SYSTEM:

The categories of records in the system are: name; citizenship; gender; date of birth; marital status; other names; social security number (SSN); legal status; place of birth; security clearance; financial information; disability information; education information; race/ethnicity; driver's license; personal cellphone number; personal email address; home telephone

number; child or dependent information; employment information; military status/service; mailing/home address; taxpayer identification number (TIN); bank account information such as routing and account numbers; beneficiary information such as name, date of birth, address, telephone number, SSN, and relationship; family member and dependents information; professional licensing and credentials; family relationships; age; involuntary debt (garnishments or child support payments); court order information; back pay information; user ID; time and attendance data; leave time information; Employee Common Identifier (ECI); pay rate; grade; length of service; and deductions.

RECORD SOURCE CATEGORIES:

Records are obtained from FERC employees, supervisors, timekeepers, previous employers, the Internal Revenue Service and State tax agencies, the Department of the Treasury, other Federal agencies, courts, State child support agencies, employing agency accounting offices, and third-party benefit providers.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, information maintained in this system may be disclosed to authorized entities outside FERC for purposes determined to be relevant and necessary as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

1. To appropriate agencies, entities, and persons when (1) FERC suspects or has confirmed that there has been a breach of the system of records; (2) FERC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the Commission (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Commission's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.
2. To another Federal agency or Federal entity, when FERC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or

entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

3. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

4. To the Equal Employment Opportunity Commission (EEOC) when requested in connection with investigations of alleged or possible discriminatory practices, examination of Federal affirmative employment programs, or other functions of the Commission as authorized by law or regulation.

5. To the Federal Labor Relations Authority or its General Counsel when requested in connection with investigations of allegations of unfair labor practices or matters before the Federal Service Impasses Panel.

6. To disclose information to another Federal agency, to a court, or a party in litigation before a court or in an administrative proceeding being conducted by a Federal agency, when the Government is a party to the judicial or administrative proceeding. In those cases where the Government is not a party to the proceeding, records may be disclosed if a subpoena has been signed by a judge.

7. To the Department of Justice (DOJ) for its use in providing legal advice to FERC or in representing FERC in a proceeding before a court, adjudicative body, or other administrative body, where the use of such information by the DOJ is deemed by FERC to be relevant and necessary to the advice or proceeding, and such proceeding names as a party in interest: (a) FERC; (b) any employee of FERC in his or her official capacity; (c) any employee of FERC in his or her individual capacity where DOJ has agreed to represent the employee; or (d) the United States, where FERC determines that litigation is likely to affect FERC or any of its components.

8. To non-Federal Personnel, such as contractors, agents, or other authorized individuals performing work on a contract, service, cooperative agreement, job, or other activity on behalf of FERC or Federal Government and who have a need to access the information in the performance of their duties or activities.

9. To the National Archives and Records Administration in records management inspections and its role as Archivist.

10. To the Merit Systems Protection Board or the Board's Office of the Special Counsel, when relevant information is requested in connection

with appeals, special studies of the civil service and other merit systems, review of OPM rules and regulations, and investigations of alleged or possible prohibited personnel practices.

11. To appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, if the information may be relevant to a potential violation of civil or criminal law, rule, regulation, order.

12. To appropriate agencies, entities, and person(s) that are a party to a dispute, when FERC determines that information from this system of records is reasonably necessary for the recipient to assist with the resolution of the dispute; the name, address, telephone number, email address, and affiliation; of the agency, entity, and/or person(s) seeking and/or participating in dispute resolution services, where appropriate.

13. To consumer reporting agencies as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Act of 1966 (31 U.S.C. 3701(a)(3)).

14. To the Commission's parent agency, the Department of Energy (DOE) for reporting purposes; as well as individuals, entities, and agencies identified in:

(a) Payroll, Attendance, Retirement, and Leave Records—Interior, DOI-85.

(b) Interior Personnel Records—Interior, DOI-79.

(c) General Personnel Records—OPM, OPM/GOVT-1.

POLICIES AND PRACTICES FOR THE STORAGE OF RECORDS:

Records are stored in paper and electronic form. All FERC employees and contractors with authorized access have undergone a thorough background security investigation. Paper records are stored in a lockable file cabinet. Data access is restricted to agency personnel or contractors whose responsibilities require access. Access to electronic records is controlled by the organization's Single Sign-On and Multi-Factor Authentication Solution. Role based access is used to restrict electronic data access and the organization employs the principle of least privilege, allowing only authorized users with access (or processes acting on behalf of users) necessary to accomplish assigned tasks in accordance with organizational missions and business functions.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records may be retrieved by employee identification such as name, SSN, and ECI.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are retained in accordance with the applicable National Archives and Records Administration Schedules, with the following applicable General Records Schedules:

(1.) General Records Schedule (GRS) 2.2: Employee Management Records, Item 030, DAA-GRS-2017-0007-0003. Temporary. Destroy when 2 years old or 2 years after award is approved or disapproved, whichever is later, but longer retention is authorized if required for business use.

(2.) General Records Schedule (GRS) 2.2: Employee Management Records, Item 040, DAA-GRS-2017-0007-0004. Temporary. Destroy when survivor or retirement claims are adjudicated or when records are 129 years old, whichever is sooner, but longer retention is authorized if required for business use.

(3.) General Records Schedule (GRS) 2.2: Employee Management Records, Item 041, DAA-GRS-2017-0007-0005. Temporary. Destroy when superseded or obsolete, or upon separation or transfer of employee, whichever is earlier.

(4.) General Records Schedule (GRS) 2.4: Employee Compensation and Benefits Records, Item 050, DAA-GRS-2018-0002-0005. Temporary. Destroy 7 years after case is closed or final settlement on appeal, as appropriate, but longer retention is authorized if required for business use.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Authorized users complete the Rules of Behavior for HR Access, which provides guidance on the user's roles and responsibilities. Security controls used to protect personal sensitive data are commensurate with those required for an information system rated moderate for confidentiality, integrity, and availability, as prescribed in NIST Special Publication, 800-53, "Recommended Security Controls for Federal Information Systems," Revision 5. FERC personnel are required to complete annual agency Information Security and Privacy training. FERC personnel are instructed to lock their computers when they leave their desks. Electronic records are restricted to authorized users with appropriate security privileges, including the use of 2-factor PIV Card authentication. Web-based connections are VPN encrypted sessions between FERC and DOI. Access to electronic records is controlled by the organization's Single Sign-On and Multi-Factor Authentication Solution. The database is maintained behind a firewall. These records are maintained

in controlled access areas. Identification cards are verified to ensure that only authorized personnel can access the records.

RECORD ACCESS PROCEDURES:

Individuals requesting access to the contents of records must submit a request through the Freedom of Information Act (FOIA) office. The FOIA website is located at: <https://www.ferc.gov/foia>. Requests may be submitted through the following portal: <https://www.ferc.gov/enforcement-legal/foia/electronic-foia-privacy-act-request-form>. Written requests for access to records should be directed to: Director, Office of External Affairs, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

CONTESTING RECORD PROCEDURES:

See Records Access procedures.

NOTIFICATION PROCEDURES:

Generalized notice is provided by the publication of this notice. For specific notice, see Records Access Procedure, above.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

74 FR 57308 (November 5, 2009).

Dated: November 22, 2024.

Debbie-Anne A. Reese,

Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****Combined Notice of Filings**

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: PR25-19-000.

Applicants: Arcadia Gas Storage, LLC.

Description: 284.123 Rate Filing;

Arcadia SOC—Revised Contact Information to be effective 12/23/2024.

Filed Date: 11/22/24.

Accession Number: 20241122-5098.

Comment Date: 5 p.m. ET 12/13/24.

Docket Numbers: PR25-20-000.

Applicants: Louisville Gas and Electric Company.

Description: 284.123(g) Rate Filing; Operating Statement Rate Change Revised Exhibit A to be effective 11/1/2024.

Filed Date: 11/22/24.

Accession Number: 20241122-5118.

Comment Date: 5 p.m. ET 12/13/24.

284.123(g) Protest: 5 p.m. ET 1/21/25.

Docket Numbers: RP25-202-000.

Applicants: Florida Gas Transmission Company, LLC.

Description: 4(d) Rate Filing: Interim Fuel Adjustment on 11-22-24 to be effective 12/1/2024.

Filed Date: 11/22/24.

Accession Number: 20241122-5002.

Comment Date: 5 p.m. ET 12/4/24.

Docket Numbers: RP25-203-000.

Applicants: Southern Natural Gas Company, L.L.C.

Description: 4(d) Rate Filing: SNG SCRM Filing 2024 to be effective 1/1/2025.

Filed Date: 11/22/24.

Accession Number: 20241122-5042.

Comment Date: 5 p.m. ET 12/4/24.

Docket Numbers: RP25-204-000.

Applicants: Southern Star Central Gas Pipeline, Inc.

Description: Compliance filing: Annual Cash-Out Activity Report 2024 to be effective N/A.

Filed Date: 11/22/24.

Accession Number: 20241122-5059.

Comment Date: 5 p.m. ET 12/4/24.

Docket Numbers: RP25-205-000.

Applicants: Midship Pipeline Company, LLC.

Description: 4(d) Rate Filing: Midship Pipeline Company Fuel Filing to be effective 1/1/2025.

Filed Date: 11/22/24.

Accession Number: 20241122-5078.

Comment Date: 5 p.m. ET 12/4/24.

Docket Numbers: RP25-206-000.

Applicants: Florida Gas Transmission Company, LLC.

Description: 4(d) Rate Filing: New Service Agreements—City of Lakeland to be effective 12/1/2024.

Filed Date: 11/22/24.

Accession Number: 20241122-5101.

Comment Date: 5 p.m. ET 12/4/24.

Docket Numbers: RP25-207-000.

Applicants: Florida Gas Transmission Company, LLC.

Description: 4(d) Rate Filing: Update Non-Conforming List—City of Lakeland to be effective 12/1/2024.

Filed Date: 11/22/24.

Accession Number: 20241122-5102.

Comment Date: 5 p.m. ET 12/4/24.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

Filings in Existing Proceedings

Docket Numbers: RP19–73–010.

Applicants: El Paso Natural Gas Company, L.L.C.

Description: Compliance filing: Motion to Place 2025 Settlement Rates Into Effect to be effective 1/1/2025.

Filed Date: 11/21/24.

Accession Number: 20241121–5204

Comment Date: 5 p.m. ET 12/3/24.

Docket Numbers: RP23–1099–005.

Applicants: Gas Transmission Northwest LLC.

Description: Compliance filing: Phase I Settlement Rate Implementation to be effective 4/1/2024.

Filed Date: 11/21/24.

Accession Number: 20241121–5182.

Comment Date: 5 p.m. ET 12/3/24.

Docket Numbers: RP23–1099–006.

Applicants: Gas Transmission Northwest LLC.

Description: Compliance filing: GTN Rate Case Tariff Records Implementation to be effective 11/21/2024.

Filed Date: 11/21/24.

Accession Number: 20241121–5187.

Comment Date: 5 p.m. ET 12/3/24.

Any person desiring to protest in any the above proceedings must file in accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern time on the specified comment date.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at <https://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. Other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov*.

Dated: November 22, 2024.

Debbie-Anne A. Reese,
Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–12404–02–OA]

Animal Agriculture and Water Quality Subcommittee (AAWQ), Subcommittee of the Farm, Ranch, and Rural Communities Committee (FRRCC) Notice of Public Meeting; Extension of Public Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting; extension of public comment period.

SUMMARY: This notice is to extend the deadline for attendees to submit their public comments. Pursuant to the Federal Advisory Committee Act (FACA), notice is hereby given that the next meeting of the Animal Agriculture and Water Quality Subcommittee, a subcommittee of the Farm, Ranch, and Rural Communities Advisory Committee (FRRCC) will be held virtually on December 6, 2024. The goal of the AAWQ subcommittee is to provide recommendations that will inform the Agency's decisions regarding how to improve the implementation of the Clean Water Act (CWA) National Pollutant Discharge Elimination System (NPDES) Concentrated Animal Feeding Operation (CAFO) permitting program.

DATES: The public meeting of the AAWQ will be held virtually only on Friday, December 6, 2024, from approximately 8:30 a.m. to 5:30 p.m. (EST). The public comment period for the notice published November 22, 2024 at 89 FR 92681 is extended to Thursday December 5, 2024, at 12 p.m. (EST) to AAWQ@epa.gov.

ADDRESSES: The meeting will take place virtually only. To register to attend virtually and receive information on how to listen to the meeting and to provide comments, please visit: www.epa.gov/faca/frcc-0. Virtual attendance will be via Zoom. The link to register for the meeting can be found on the FRRCC web page, www.epa.gov/faca/frcc-0. To provide public comments, attendees must submit request by Thursday, December 5, 2024, at 12 p.m. NOON (EST) to the AAWQ@epa.gov.

FOR FURTHER INFORMATION CONTACT: Dr. Venus Welch-White, Designated Federal Officer (DFO), at AAWQ@epa.gov or telephone. (202) 564–0595. General information regarding the FRRCC and AAWQ can be found on the EPA website at: www.epa.gov/faca/frcc.

SUPPLEMENTARY INFORMATION: Meetings of the AAWQ are open to the public. An agenda will be posted on AAWQ's

website at <https://www.epa.gov/faca/frcc-0>. Due to unforeseen administrative circumstances, EPA is announcing this meeting with less than 15 calendar days' notice.

Access and Accommodation:

Requests for accessibility and/or accommodations for individuals with disabilities should be directed to AAWQ@epa.gov. The deadline to make these request is Tuesday, December 3, 2024 at 11:59 p.m. (EST).

Venus Welch-White,

Acting Deputy Director, EPA Office of Agriculture and Rural Affairs.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–12387–01–R2]

Public Water System Supervision Program Revision for New York; Notice of Approval and Opportunity for Public Comment and Public Hearing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Public notice is hereby given that the state of New York has revised its approved Public Water System Supervision Program. New York has adopted drinking water regulations for the Revised Total Coliform Rule. The EPA has determined that New York's revised regulations meet all minimum Federal requirements, and that they are no less stringent than the corresponding Federal regulations. Therefore, the EPA has decided to tentatively approve the State program revisions. All interested parties may request a public hearing or submit comments.

DATES: Comments or request for public hearing must be received on or before January 2, 2025.

ADDRESSES: Comments or a request for a public hearing must be submitted to the Regional Administrator, U.S. Environmental Protection Agency, Region 2, 290 Broadway, FL 24, New York, NY 10007. All documents relating to this determination are available for inspection between the hours of 8 a.m. and 3 p.m., Monday through Friday, at the following offices: U.S. Environmental Protection Agency, Region 2, Water Division, 290 Broadway, FL 24, New York, NY 10007–1823; and New York State Department of Health, Bureau of Water Supply Protection, Empire State Plaza-Corning Tower, Room 1110, Albany, New York 12237.

FOR FURTHER INFORMATION CONTACT: Dorina Aliu, Water Division, Drinking Water and Groundwater Protection Section, Environmental Protection Agency, Region 2, 290 Broadway, FL 24, New York, NY 10007-1823; telephone number: (929) 930-0689; email address: Aliu.Dorina@epa.gov.

SUPPLEMENTARY INFORMATION: All interested parties are invited to submit written comments on this determination and may request a hearing. All comments will be considered, and if necessary, EPA will issue a response. Frivolous or insubstantial requests for a hearing will be denied by the Regional Administrator. If a substantial request for a public hearing is made by January 2, 2025, a public hearing will be held. A request for public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing; (2) a brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing; and (3) the signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

Authority: Section 1413 of the Safe Drinking Water Act, as amended (1996), and 40 CFR part 142 of the National Primary Drinking Water Regulations.

Lisa P. Garcia,

Regional Administrator, Region 2.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OGC-2024-0251; FRL-12440-01-OGC]

Proposed Settlement Agreement, Federal Insecticide, Rodenticide, and Fungicide Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement and request for public comment.

SUMMARY: Consistent with *Consent Decrees and Settlement Agreements to Resolve Environmental Claims Against the Agency* (March 18, 2022), EPA is giving notice of and seeking comment on a proposed settlement agreement for *In re Center for Biological Diversity*, No. 21-1270 (D.C. Circuit) and *Center for Biological Diversity v. Environmental*

Protection Agency, No. 23-1329 (D.C. Circuit). Defendant-Intervenors—who represent the registrants for products contain cyantraniliprole—do not oppose this proposed settlement agreement.

DATES: Comments are due by January 2, 2025.

ADDRESSES: Please submit your comments online at <https://www.regulations.gov>. Follow the online instructions for submitting comments.

Instructions: All comments should include the Docket ID (EPA-HQ-OGC-2024-0251) for this action. Submitted comments will be posted without change to <https://www.regulations.gov>, including any personal information provided. For detailed instructions on commenting, see the “Public Comment on the Proposed Settlement Agreement” heading of the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Jori Reilly-Diakun (Pesticides and Toxic Substances Law Office, Office of General Counsel, U.S. Environmental Protection Agency), (202) 564-9567, reillydiakun.jori@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining a Copy of the Proposed Stipulated Settlement Agreement

The official public docket for this action contains a copy of the proposed settlement agreement. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OEI Docket is (202) 566-1752.

The electronic version of the public docket for this action also contains a copy of the proposed settlement agreement. The electronic version of the public docket is available at <https://www.regulations.gov/docket/EPA-HQ-OGC-2024-0251>.

II. Background on the Proposed Settlement Agreement

This proposed settlement agreement follows petitions for review in the United States Court of Appeals for the District of Columbia (D.C. Circuit) of EPA's decisions granting pesticide registrations and amendments to those registrations under the Federal Insecticide, Rodenticide, and Fungicide Act (FIFRA) for products containing the active ingredient cyantraniliprole.

On June 30, 2017, the D.C. Circuit addressed the initial petition for review and remanded the registration decisions to EPA without vacatur for EPA to address its obligations under the Endangered Species Act (ESA). *Center for Biological Diversity v. Environmental Protection Agency*, 861 F.3d 174 (D.C. Cir. 2017). In 2021, Petitioners filed a writ of mandamus with the D.C. Circuit, seeking to compel action by EPA in accordance with the Court's 2017 order. On November 22, 2022, the D.C. Circuit held that EPA had unreasonably delayed in complying with its 2017 order and ordered EPA to complete effects determinations for cyantraniliprole and replace its previous registration orders with orders consistent with the ESA by September 2023. *In re Center for Biological Diversity*, 53 F.4th 665 (D.C. Cir. 2022).

In September 2023, EPA completed its final biological evaluation for cyantraniliprole and initiated ESA section 7 consultation with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service, before granting registrants' requests to amend the registrations for products containing cyantraniliprole. *See* EPA-HQ-OPP-2011-0668. EPA filed a Notice of Completion with the D.C. Circuit in *In re Center for Biological Diversity* on October 4, 2023. Petitioners filed a new petition for review challenging EPA's September 2023 registration amendments. *Center for Biological Diversity v. Environmental Protection Agency*, No. 23-1329 (D.C. Circuit).

This proposed settlement agreement would resolve any remaining claims against EPA in these cases. In the proposed settlement, EPA would agree to implement any final Biological Opinion for cyantraniliprole no later than 12 months from the date that each Service issues a final Biological Opinion or the deadline set by each Service for implementing its final Biological Opinion—whichever is earlier—with several options for extension, if appropriate.

III. Public Comment on the Proposed Settlement Agreement

EPA will accept written comments on the proposed settlement until January 2, 2025 from anyone who is not a named party to the litigation in question. EPA or the U.S. Department of Justice (DOJ) may decide to withdraw consent to enter the proposed settlement agreement if the comments indicate that such consent is inappropriate. However, the terms of the proposed settlement agreement will be affirmed unless EPA or DOJ so decide based on the comments.

Please submit your comments, identified by Docket ID No. EPA-HQ-OGC-2024-0251, through <https://www.regulations.gov>. Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received to its public docket. Do not submit any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (e.g., audio, video) must be accompanied by a written comment. EPA will consider the written comment to be the official comment, and it should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (e.g., on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/submitting-epa-dockets>. For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the <https://www.regulations.gov> website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an "anonymous access" system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be

marked "late." EPA is not required to consider these late comments.

Dated: November 25, 2024.

Randolph L. Hill,

Associate General Counsel.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-0999; FR ID 264781]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before January 31, 2025. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this Notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email: PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418-2918.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0999.

Title: Hearing Loss Compatible Wireless Handsets Section 20.19 and Hearing Aid Compatibility Act.

Form Numbers: FCC Form 655 and FCC Form 855.

Type of Review: Revision to the currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 934 respondents; 934 responses.

Estimated Time per Response: 13.92 hours per response (average).

Frequency of Response: On occasion and annual reporting requirements, recordkeeping requirements, and third-party disclosure requirements.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i), 157, 160, 201, 202, 214, 301, 303, 308, 309(j), 310 and 610 of the Communications Act of 1934, as amended.

Total Annual Burden: 12,998 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission is requesting that the Office of Management and Budget (OMB) approve a revision to the Commission's currently approved information collection for OMB Control No. 3060-0999. This information collection relates to the Commission's Hearing Loss Compatible Wireless Handsets rules at section 20.19 of the Commission's rules. This revision is necessary to implement the final rules that the Commission adopted on October 17, 2024, in a Report and Order, WT Docket No. 23-388, FCC 24-112, that the Commission released on October 18, 2024. This Report and Order revised the heading of section 20.19 of the Commission's rules from "Hearing aid-compatible mobile handsets" to "Hearing loss compatible wireless handsets." In addition, the revisions that the Commission adopted to section 20.19(b)(3)(iii), (f), (h), and (i)(4)-(5) constitute new or modified information collections subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. These rules will become effective following OMB's completion of its review of these revised rules. Once OMB completes its review of these revisions, the Commission will publish a document in the **Federal**

Register announcing the effective date of section 20.19(b)(3)(iii), (f), (h), and (i)(4)–(5).

The final rules that the Commission adopted require all wireless handset models to be hearing aid compatible. These revised rules ensure that consumers with hearing loss will have equal access to the same handset models as consumers without hearing loss. In order to ensure compliance with this 100% hearing aid compatibility requirement, the Commission adopted revised labeling, website posting, and certification requirements along with removing outdated and unnecessary information collection requirements. The removal of these outdated information collection requirements significantly reduces regulatory burden and cost for handset manufacturers and service providers.

The revised hearing aid compatibility rules include a requirement that a certain number of handset models that handset manufacturers and service providers offer for sale or use in the United States meet Bluetooth coupling requirements. This Bluetooth coupling requirement will benefit consumers by ensuring more universal connectivity between handset models and hearing aids, including over-the-counter hearing aids, and reduces the issue of certain handset models only being able to pair with certain hearing aids. In order to ensure compliance with this new Bluetooth coupling requirement, the Commission adopted a requirement that handset manufacturers submit a sworn declaration attesting to the handset model's compliance with these new Bluetooth coupling requirements. This certification requirement is contained in section 20.19(b)(3)(iii) and requires handset manufacturers to provide: (1) the specific Bluetooth coupling standard included in each handset model; (2) that the relevant handset model has been tested to ensure compliance with the designated Bluetooth coupling standard; and (3) after the transition to a non-proprietary Bluetooth requirement, that the included Bluetooth coupling technology is consistent with the Bluetooth functionality requirements. The Commission adopted this attestation requirement based on the recommendation of handset manufacturers who stated that adopting an attestation requirement is consistent with the Commission's equipment certification process.

In the Report and Order, the Commission revised its external printed package labeling requirements for handset models as well as requirements related to what information must be included within a handset model's

packaging either in the form of a printed insert or a printed handset manual. The Commission is requiring that a handset model's external printed package label indicate whether the handset model includes Bluetooth coupling capabilities or telecoil coupling capabilities or both, and in the case of Bluetooth coupling which Bluetooth technology the handset model incorporates. The Commission is also requiring handset manufacturers and service providers to include information on the hearing aid compatibility settings of handset models and how consumers can turn these settings on and off. As part of these revisions, the Commission eliminated outdated labeling requirements which were no longer necessary and that might cause consumer confusion if retained. By eliminating these outdated requirements, the Commission reduced regulatory burden and cost to handset manufacturers and service providers. The revised labeling requirements are in section 20.19(f)(1) and (2) of the Commission's rules and these revised requirements ensure that consumers have the information that they need to make informed handset model purchasing decisions.

In addition to these revised labeling rules, the Commission determined to allow handset manufacturers and service providers to use digital labeling technology as an alternative to including a printed insert or printed handset manual in a handset model's packaging. Handset manufacturers and service providers choosing this option must maintain publicly accessible websites where consumers can find the required hearing aid compatibility information, and they must provide consumers with a Quick-Response (QR) code and the related website address where the required hearing aid compatibility information can be found. The Commission decided to allow the use of digital labeling technology at the request of handset manufacturers and service providers who argued that the use of digital labeling would reduce regulatory burden and cost for them. The use of digital labeling will also ensure that consumers have access to the most up-to-date handset model information. The Commission's new digital labeling rules are at section 20.19(f)(3) of the Commission's rules.

Along these same lines, the Commission revised its website posting requirements that apply to handset manufacturers and service providers who maintain publicly accessible websites. These companies must indicate on their publicly accessible websites which handset models that they offer for sale or use in the United

States meet telecoil certification requirements and which meet Bluetooth coupling requirements. In addition, these companies must list a handset model's conversational gain if the handset model was certified as hearing aid-compatible using a standard that includes volume control requirements. The Commission also adopted point-of-contact requirements that require handset manufacturers and service providers to list contact information that consumers can use to ask knowledgeable company employees compatibility questions that they might have concerning the handset models that these companies offer for sale or use in the United States. Part of these revisions also included eliminating out-of-date website posting and record retention requirements that no longer served a useful purpose. The elimination of these outdated information collection requirements reduce regulatory burden and cost for handset manufacturers and service providers. The revised website posting requirements are at section 20.19(h) of the Commission's rules.

Finally, the Commission revised its annual certification requirements for handset manufacturers and service providers. After the 100% hearing aid compatibility transition period ends for handset manufacturers, these companies will no longer file FCC Form 655. Instead, handset manufacturers will start filing FCC Form 855 and service providers will continue to file this form. FCC Form 855 is a streamlined certification form that does not require the detail handset model information that FCC Form 655 collects. This change will significantly reduce regulatory burden and cost for handset manufacturers. In addition, the Commission is updating FCC Form 855 to ensure it collects only relevant information consistent with the Commission's 100% hearing aid compatibility requirement. These updates include removing outdated questions and streamlining the information that the form collects. The revised annual certification requirements are at section 20.19 (i)(4) and (5) of the Commission's rules.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION**[OMB 3060–1070; FR ID 264729]****Information Collection Being Reviewed by the Federal Communications Commission****AGENCY:** Federal Communications Commission.**ACTION:** Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before January 31, 2025. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email: PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, and as required by the PRA, 44 U.S.C. 3501–3520, the FCC

invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

OMB Control Number: 3060–1070.

Title: Allocation and Service Rules for the 71–76 GHz, 81–86 GHz, and 92–95 GHz Bands.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities; not-for-profit institutions; and State, local, or Tribal Government.

Number of Respondents: 1,177 respondents; 19,604 responses.

Estimated Time per Response: 5.25 hours to 8 hours.

Frequency of Response: On occasion reporting requirement, recordkeeping requirement, and third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained 47 U.S.C. 151, 154(i), 302a, 303(c), 303(f), and 303(r) of the Communications Act of 1934, as amended.

Total Annual Burden: 14,347 hours.

Total Annual Cost: \$200,000.

Needs and Uses: The Commission is revising this information collection and would like to obtain the full three-year approval from OMB. The Commission adopted a new *Report and Order*, FCC 24–16, in WT Docket No. 20–133 entitled “Modernizing and Expanding Access to the 70/80/90 GHz Bands” (“*Report and Order*”). The *Report and Order* was subsequently released on January 26, 2024, and published in the **Federal Register** on April 29, 2024. Relevant to Control No. 3060–1070, the *Report and Order* adopted the following Commission rules: section 101.63(b); section 101.1523(a) and (e); and section 101.1528(a)(11), (b)(10), and (d). There are program changes to the reporting, recordkeeping and/or third-party disclosure requirements and the

Commission estimates an increase in nationwide licensees. The recordkeeping, reporting, and third party disclosure requirements will be used by the Commission to verify licensee compliance with the Commission rules and regulations, and to ensure that licensees continue to fulfill their statutory responsibilities in accordance with the Communications Act of 1934. The Commission's rules promote the private sector development and use of 71–76 GHz, 81–86 GHz, and 92–95 GHz bands (70/80/90 GHz bands). Such information has been used in the past and will continue to be used to minimize interference, verify that applicants are legally and technically qualified to hold license, and to determine compliance with Commission rules.

OMB Control Number: 3060–1034.

Title: Digital Audio Broadcasting Systems and their Impact on the Terrestrial Radio Broadcast Service; Form 2100, Schedule 335–FM—FM Digital Notification; Form 2100, Schedule 335–AM—AM Digital Notification.

Form Number: Form 2100, Schedule 335–FM.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 215 respondents; 215 responses.

Estimated Hours per Response: 1 hour–8 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 345 hours.

Total Annual Cost: \$128,250.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in sections 154(i), 303, 310, and 553 of the Communications Act of 1934, as amended.

Needs and Uses: On September 24, 2024, the Commission adopted the First Report and Order in the *Modifying Rules for FM Terrestrial Digital Audio Broadcasting System*, MB Docket No. 22–405, FCC 24–105 (*FM Digital First R&O*) proceeding, to allow digital FM station operation with asymmetric power on the digital sidebands. This asymmetric sideband operation will allow digital FM stations to operate with different power levels on the upper and lower digital sidebands, as a way to facilitate greater digital FM radio coverage without interfering with adjacent-channel FM stations, upon notification to the Commission on FCC Form 2100, Schedule 335–FM. Prior to adoption of the *FM Digital First R&O*, an FM digital station that wished to employ asymmetric sideband operation had to apply for an experimental authorization and renew that authorization annually. Initiating such operation by notification rather than experimental authorization will be simpler and less expensive to the licensee, and thus less burdensome. Additionally, eliminating the requirement of annual experimental authorization will remove a regulatory barrier and incentivize more digital FM stations to adopt such operations. This submission is therefore being made to OMB for approval of new or modified Information Collection requirements stemming from the *FM Digital First R&O*.

The changes as adopted in the *FM Digital First R&O* require modifications to Schedule 335–FM and rule sections 73.404 and 73.406. Specifically, the *FM Digital First R&O* permits digital FM stations to use asymmetric sideband operation by notifying the Commission using Schedule 335–FM, and modifies that schedule by including fields to report the digital ERP being transmitted on each digital sideband, as well as the total digital ERP. Therefore, Schedule 335–FM is being amended to provide fields for the notifying station to indicate the digital ERP transmitted on each digital sideband, as well as the total digital ERP.

The Commission also made an administrative change to the procedures used by FM station licensees seeking to increase digital power above –14 dBc. Those requests, previously submitted by “informal request,” will now be submitted using Schedule 335–FM. After the effective date of the rules adopted in the *First Digital R&O*, digital FM stations must use Schedule 335–FM to request an increase in total digital ERP above –14 dBc, using Table 1 to § 73.404(f), and will also report certain digital power decreases on Schedule 335–FM. In sum, after the effective date of the *FM Digital First R&O*, a digital FM station will report the following actions (or request authority in the case of an increase of total digital ERP above –14 dBc) by submitting Schedule 335–FM: the initiation of hybrid digital operation; the initiation of asymmetric sideband operation at any power level, as well as the discontinuance of asymmetric sideband operation; an increase of total digital ERP above –14 dBc; or a decrease in total digital ERP from a level above –14 dBc to a level at or below –14 dBc. As required with the current informal request process, a station choosing to operate with total digital ERP between –14 dBc and –10 dBc must attach an exhibit demonstrating that the proposed FM digital ERP is permitted for each digital sideband, using Table 1 to § 73.404(f). This exhibit will now be an attachment to the Schedule 335–FM submission. As is the case with the current informal request process, a digital FM station choosing to operate with total digital ERP above –14 dBc may initiate such operation upon approval from the Commission.

Schedule 335–FM is amended as follows:

a. To include a question for the notifying station to report when asymmetric sideband operations commenced.

b. To provide fields for the notifying station to indicate the digital ERP transmitted on each digital sideband, as well as the total digital ERP.

c. To include a question for the notifying station to report that it has discontinued digital broadcasts and/or asymmetric sideband operations, and provide the date of the discontinuance.

d. To include a question for the notifying station to report that the total digital ERP (listed in a previous item of the schedule) is greater than –14 dBc. A station choosing to operate with total digital ERP between –14 dBc and –10 dBc must attach an exhibit demonstrating that the proposed FM digital ERP is permitted for each digital sideband, using Table 1 in § 73.404(f).

e. To include a question for the notifying station to report a decrease in the total digital ERP to -14 dBc or below, and provide the date on which such decreased digital ERP operations commenced.

Moreover, to implement the new or modified information collection requirements contained in the *FM Digital First R&O*, sections 73.404(e) and (f) of the rules are revised to allow digital FM stations to use asymmetric power on the digital sidebands and to use the “Maximum permissible FM digital ERP per-sideband” Table to comport with the current limits on FM digital ERP. Additionally, the newly adopted digital FM notification requirements are added to rule section 73.406 in new paragraphs (d)(5) and (d)(6) as follows:

§ 73.406 Notification

(d)(5) Any digital FM station taking any of the following actions must notify the Commission of such action on Form 2100, Schedule 335–FM:

(i) Upon initiation of hybrid digital operation;

(ii) Upon initiation of asymmetric sideband operation at any power level. For FM stations employing asymmetric sideband operation as defined in § 73.402(i), the notification must include a certification that the proposed digital sideband power on each sideband conforms to the Maximum Permissible FM Digital ERP set forth in Table 1 to § 73.404(f), and that the total digital sideband power will not exceed the total power if the digital sideband operation were symmetric. The notifying station may commence asymmetric sideband operation upon filing Form 2100, Schedule 335–FM, and may continue such operation unless notified by the Commission that such operation is not rule-compliant;

(iii) Discontinuing asymmetric sideband operation and reverting to symmetric sideband operation. The digital FM station must file Form 2100, Schedule 335–FM within 30 days of discontinuing asymmetric sideband operation; or

(iv) Decreasing total digital Effective Radiated Power from a level above -14 dBc to a level at or below -14 dBc. The digital FM station must file Form 2100, Schedule 335–FM within 30 days of decreasing power.

(6) Any digital FM station seeking authority to increase total digital Effective Radiated Power above -14 dBc must submit Form 2100, Schedule 335–FM. The submission must include a certification that the proposed FM digital Effective Radiated Power is permitted, using the table set forth in

Table 1 to § 73.404(f). Certifications must be based on the most restrictive analog field strength of the proponent at any nearby first-adjacent channel station’s 60 dBμ contour. The station choosing to operate with total digital ERP above -14 dBc may initiate such operation upon approval from the Commission.

Federal Communications Commission.

BILLING CODE 6712–01–P

FEDERAL MARITIME COMMISSION

[DOCKET NO. 24–28]

Baylink Shipping Inc., Complainant v. ZIM Integrated Shipping Services, Ltd., Respondent; Notice of Filing of Complaint and Assignment

Served: November 25, 2024.

Notice is given that a complaint has been filed with the Federal Maritime Commission (the “Commission”) by Baylink Shipping Inc. (the “Complainant”) against ZIM Integrated Shipping Services, Ltd. (the “Respondent”). Complainant states that the Commission has subject-matter jurisdiction over the complaint pursuant to the Shipping Act of 1984, as amended, 46 U.S.C. 40101 *et seq.* and personal jurisdiction over Respondent as a common carrier, as defined in 46 U.S.C. 40102(7).

Complainant is a corporation organized and existing under the laws of the State of New York with its principal place of business in Floral Park, New York.

Complainant identifies Respondent as a global ocean carrier with a United States office located in Norfolk, Virginia.

Complainant alleges that Respondent violated 46 U.S.C. 41102(c); 41104(a)(14), (a)(15), and (d)(2); and 46 CFR 545.4 and 545.5. Complainant alleges these violations arose from the release of a container to a party other than the named consignee in the bill of lading, the assessment of detention charges on this container, and other acts and omissions of Respondent.

An answer to the complaint must be filed with the Commission within 25 days after the date of service.

The full text of the complaint can be found in the Commission’s electronic Reading Room at <https://www2.fmc.gov/readingroom/proceeding/24-28/>. This proceeding has been assigned to the Office of Administrative Law Judges. The initial decision of the presiding

judge shall be issued by November 25, 2025, and the final decision of the Commission shall be issued by June 8, 2026.

David Eng,

Secretary.

BILLING CODE 6730–02–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board’s Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board’s Freedom of Information Office at <https://www.federalreserve.gov/foia/request.htm>. Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than December 17, 2024.

A. Federal Reserve Bank of Kansas City (Jeffrey Imgarten, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198–0001. Comments can also be sent electronically to KCApplicationComments@kc.frb.org:

1. *William F. Dugan, Waterloo, Nebraska, individually, and as trustee of*

the Flatirons Bank Employee Stock Ownership Plan and Trust, both of Boulder, Colorado; to acquire voting shares of FBHC Holding Company, and thereby indirectly acquire voting shares of Flatirons Bank, both of Boulder, Colorado.

2. *The Glenn R. Hamilton Trust dated November 20, 1998, and Glenn Hamilton, trustee, both of Butler, Missouri*; to join the Hamilton Family Control Group, a group acting in concert, to retain voting shares of Community First Bancshares, Inc., and thereby indirectly acquire voting shares of Community First Bank, both of Butler, Missouri. In addition, Marsha Hamilton, Butler, Missouri, to retain voting shares and join the Hamilton Family Control Group.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Associate Secretary of the Board.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Solicitation of Nominations for Appointment to the Safety and Occupational Health Study Section

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Centers for Disease Control and Prevention (CDC), within the Department of Health and Human Services (HHS), is seeking nominations for membership on the Safety and Occupational Health Study Section (SOHSS). SOHSS consists of 20 experts in fields associated with occupational medicine and nursing, industrial hygiene, occupational safety and engineering, toxicology, chemistry, safety and health education, ergonomics, epidemiology, economic science, psychology, pulmonary pathology/physiology, and social science.

DATES: Nominations for membership on SOHSS must be received no later than January 31, 2025. Packages received after this time will not be considered for the current membership cycle.

ADDRESSES: All nominations should be mailed to Dr. Michael Goldcamp, 1095

Willowdale Road, Morgantown, West Virginia 26505 or emailed to MGoldcamp@cdc.gov.

FOR FURTHER INFORMATION CONTACT: Michael Goldcamp, Ph.D., Scientific Review Officer, Office of Extramural Programs, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, 1095 Willowdale Road, Morgantown, West Virginia 26505. Telephone: (304) 285-5951; Email: MGoldcamp@cdc.gov.

SUPPLEMENTARY INFORMATION: Nominations are sought for individuals who have the expertise and qualifications necessary to contribute to the accomplishment of the objectives of the Safety and Occupational Health Study Section (SOHSS). Nominees will be selected based on expertise in the fields of occupational medicine and nursing, industrial hygiene, occupational safety and engineering, toxicology, chemistry, safety and health education, ergonomics, epidemiology, economic science, psychology, pulmonary pathology/physiology, and social science. Members may be invited to serve up to four-year terms. Selection of members is based on candidates' qualifications to contribute to the accomplishment of SOHSS objectives (<https://www.cdc.gov/faca/committees/sohss.html>).

Department of Health and Human Services (HHS) policy stipulates that committee membership be balanced in terms of points of view represented and the committee's function. Appointments shall be made without discrimination on the basis of age, race, ethnicity, gender, sexual orientation, gender identity, HIV status, disability, and cultural, religious, or socioeconomic status. Nominees must be U.S. citizens and cannot be full-time employees of the U.S. Government. Current participation on Federal workgroups or prior experience serving on a Federal advisory committee does not disqualify a candidate; however, HHS policy is to avoid excessive individual service on advisory committees and multiple committee memberships. Committee members are Special Government Employees, requiring the filing of financial disclosure reports at the beginning of and annually during their terms. The Centers for Disease Control and Prevention (CDC) reviews potential candidates for SOHSS membership each year and provides a slate of nominees for consideration to the Secretary of HHS for final selection. HHS notifies selected candidates of their appointment near the start of the term in October 2025, or as soon as the HHS selection process is completed. Note

that the need for different expertise varies from year to year and a candidate who is not selected in one year may be reconsidered in a subsequent year.

Candidates should submit the following items:

- Current curriculum vitae, including complete contact information (telephone numbers, mailing address, email address).

- At least one letter of recommendation from person(s) not employed by HHS. Candidates may submit letter(s) from current HHS employees if they wish, but at least one letter must be submitted by a person not employed by an HHS agency (e.g., CDC, National Institutes of Health, Food and Drug Administration).

Nominations may be submitted by the candidate or by the person/organization recommending the candidate.

The Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

Notice of Closed Meeting

Pursuant to 5 U.S.C. 1009(d), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended, and the Determination of the Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, pursuant to Public Law 92-463. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which

would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP)—CE25–027, Evaluate STEADI-based Fall Prevention in Assisted Living Facilities.

Dates: March 4–5, 2025.

Times: 10 a.m.–5 p.m., EST.

Place: Web Conference.

Agenda: To review and evaluate grant applications.

For Further Information Contact: Aisha L. Wilkes, M.P.H., Scientific Review Officer, National Center for Injury Prevention and Control, Centers for Disease Control and Prevention, 4770 Buford Highway NE, Mailstop S106–9, Atlanta, Georgia 30341. Telephone: (404) 639–6473; Email: AWilkes@cdc.gov.

The Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–6094–N]

RIN 0938–ZB85

Medicare, Medicaid, and Children's Health Insurance Programs; Provider Enrollment Application Fee Amount for Calendar Year 2025

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: This notice announces a \$730.00 calendar year (CY) 2025 application fee for institutional providers that are initially enrolling in the Medicare or Medicaid program or the Children's Health Insurance Program (CHIP); revalidating their Medicare, Medicaid, or CHIP enrollment; or adding a new Medicare practice location. This fee is required with any enrollment application

submitted on or after January 1, 2025, and on or before December 31, 2025.

DATES: The application fee announced in this notice is effective on January 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Frank Whelan, (410) 786–1302.

SUPPLEMENTARY INFORMATION:

I. Background

In the February 2, 2011 **Federal Register** (76 FR 5862), we published a final rule with comment period titled “Medicare, Medicaid, and Children's Health Insurance Programs; Additional Screening Requirements, Application Fees, Temporary Enrollment Moratoria, Payment Suspensions and Compliance Plans for Providers and Suppliers.” This rule finalized, among other things, provisions related to the submission of application fees as part of the Medicare, Medicaid, and CHIP provider enrollment processes.

As provided in section 1866(j)(2)(C)(i) of the Social Security Act (the Act) and in 42 CFR 424.514, “institutional providers” that are initially enrolling in the Medicare or Medicaid programs or CHIP, revalidating their enrollment, or adding a new Medicare practice location are required to submit a fee with their enrollment application. An “institutional provider” for purposes of Medicare is defined at § 424.502 as “any provider or supplier that submits a paper Medicare enrollment application using the CMS–855A, CMS–855B (not including physician and non-physician practitioner organizations), CMS–855S, or associated internet-based PECOS enrollment application.” As we explained in the February 2, 2011 final rule (76 FR 5914), in addition to the providers and suppliers subject to the application fee under Medicare, Medicaid-only and CHIP-only institutional providers would include nursing facilities, intermediate care facilities for persons with intellectual disabilities (ICF/IID), and psychiatric residential treatment facilities; they may also include other institutional provider types designated by a State in accordance with their approved State plan.

As indicated in § 424.514 and § 455.460, the application fee is not required for either of the following:

- A Medicare physician or non-physician practitioner submitting a CMS–855I.
- A prospective or revalidating Medicaid or CHIP provider—
 - ++ Who is an individual physician or non-physician practitioner; or
 - ++ That is enrolled as an institutional provider in Title XVIII of the Act or

another State's title XIX or XXI plan and has paid the application fee to a Medicare contractor or another State.

II. Provisions of the Notice

Section 1866(j)(2)(C)(i)(I) of the Act established a \$500 application fee for institutional providers in CY 2010. Consistent with section 1866(j)(2)(C)(i)(II) of the Act, § 424.514(d)(2) states that for CY 2011 and subsequent years, the preceding year's fee will be adjusted by the percentage change in the consumer price index (CPI) for all urban consumers (all items; United States city average, CPI-U) for the 12-month period ending on June 30 of the previous year. Consequently, each year since 2011 we have published in the **Federal Register** an announcement of the application fee amount for the forthcoming CY based on this formula. Most recently, in the November 7, 2023 **Federal Register** (88 FR 76754), we published a notice announcing a fee amount for the period of January 1, 2024 through December 31, 2024 of \$709.00. The \$709.00 fee amount for CY 2024 was used to calculate the fee amount for 2025 as specified in § 424.514(d)(2).

According to Bureau of Labor Statistics (BLS) data, the CPI-U increase for the period of July 1, 2023 through June 30, 2024 was 3.0 percent. (See https://www.bls.gov/news.release/archives/cpi_07112024.htm.) As required by § 424.514(d)(2), the preceding year's fee of \$709 will be adjusted by 3.0 percent. This results in a CY 2025 application fee amount of \$730.27 ($\$709 \times 1.03$). As we must round this to the nearest whole dollar amount, the resultant application fee amount for CY 2025 is \$730.

III. Collection of Information Requirements

This document does not impose information collection requirements (that is, reporting, recordkeeping, or third-party disclosure requirements). Accordingly, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995. However, it does reference previously approved information collections. The CMS-855A, CMS-855B, CMS-855I, and CMS-855S applications are approved under, respectively, OMB control numbers 0938-0685, 0938-1377, 0938-1355, and 0938-1056.

IV. Regulatory Impact Statement

A. Overall Impact

We have examined the impacts of this notice as required by Executive Order

12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), Executive Order 14094 titled "Modernizing Regulatory Review" (April 6, 2023), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96-354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104-4), Executive Order 13132 on Federalism (August 4, 1999), and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). The Executive Order 14094 titled "Modernizing Regulatory Review" amends section 3(f)(1) of Executive Order 12866 (Regulatory Planning and Review). The amended section 3(f) of Executive Order 12866 defines a "significant regulatory action" as an action that is likely to result in a rule (notice) that may: (1) have an annual effect on the economy of \$200 million or more in any 1 year, (adjusted every 3 years by the Administrator of OMB's Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise legal or policy issues for which centralized review would meaningfully further the President's priorities or the principles set forth in this Executive order, as specifically authorized in a timely manner by OIRA in each case.

A regulatory impact analysis (RIA) must be prepared for notices with significant regulatory action/s and/or with significant effects as per section 3(f)(1) of Executive Order 12866 (\$200 million or more in any 1 year). Based on our estimates, OIRA has determined that this rulemaking is not significant per section 3(f)(1) as measured by the \$200 million or more in any 1 year.

As explained in this section of the notice, we estimate that the total cost of

the increase in the application fee will not exceed \$200 million. Therefore, this notice does not reach the \$200 million economic threshold and is not considered a significant notice.

B. Cost

The costs associated with this notice involve the increase in the application fee amount that certain providers and suppliers must pay in CY 2025. The CY 2025 cost estimates are as follows:

1. Medicare

Based on CMS data, we estimate that in CY 2025 approximately—

- 13,151 newly enrolling institutional providers will be subject to and pay an application fee; and
- 37,224 revalidating institutional providers will be subject to and pay an application fee.

Using a figure of 50,375 (13,151 newly enrolling + 37,224 revalidating) institutional providers, we estimate an increase in the cost of the Medicare application fee requirement in CY 2025 of \$1,057,875 (or $50,375 \times \$21$ (or \$730 minus \$709)) from our CY 2024 projections.

2. Medicaid and CHIP

Based on CMS and State statistics, we estimate that approximately 30,000 (9,000 newly enrolling + 21,000 revalidating) Medicaid and CHIP institutional providers will be subject to an application fee in CY 2025. Using this figure, we project an increase in the cost of the Medicaid and CHIP application fee requirement in CY 2025 of \$630,000 (or $30,000 \times \$21$ (or \$730 minus \$709)) from our CY 2024 projections.

3. Total

Based on the foregoing, we estimate the total increase in the cost of the application fee requirement for Medicare, Medicaid, and CHIP providers and suppliers in CY 2025 to be \$1,687,875 ($\$1,057,875 + \$630,000$) from our CY 2024 projections.

We do not anticipate any negative impact on equity from the increase in the application fee amount, which we calculated in accordance with the requirements specified in statute and regulation. Prior application fee increases have had no such discernable effect, and we reiterate that the fee requirement does not apply to individual physicians and non-physician practitioners completing the CMS-855I, who represent the overwhelming preponderance of the more than 2 million Medicare-enrolled providers and suppliers.

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of less than \$9 million to \$47 million in any 1 year. Individuals and States are not included in the definition of a small entity. As we stated in the RIA for the February 2, 2011 final rule (76 FR 5952), we do not believe that the application fee will have a significant impact on small entities.

In addition, section 1102(b) of the Act requires us to prepare an RIA if a rule (notice) may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a metropolitan statistical area and has fewer than 100 beds. We are not preparing an analysis for section 1102(b) of the Act, because the Secretary has certified that this notice will not have a significant impact on the operations of a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of \$100 million in 1995 dollars, updated annually for inflation. In 2024, that threshold is approximately \$183 million. This notice would not impose a mandate that will result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of more than \$183 million in any 1 year.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) (in this case a notice) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has federalism implications. Since this notice does not impose substantial direct costs on State or local governments, the requirements of Executive Order 13132 are not applicable.

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.

The Administrator of the Centers for Medicare & Medicaid Services (CMS), Chiquita Brooks-LaSure, having reviewed and approved this document,

authorizes Chyana Woodyard, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Chyana Woodyard,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10371]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 31, 2025.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for "Comment or Submission" or "More Search Options"

to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: _____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing>.

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10371 State-based Exchange, SBE, SBE Budget Template, SBE Enrollment Metrics, Open Enrollment

Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collections

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* State-based Exchange, SBE, SBE Budget Template, SBE Enrollment Metrics, Open Enrollment; *Use:* The Patient Protection

and Affordable Care Act, Public Law 111–148, enacted on March 23, 2010, and the Health Care and Education Reconciliation Act, Public Law 111–152, enacted on March 30, 2010 collectively, “Affordable Care Act”, expanded access to health insurance for individuals and employees of small businesses through the establishment of new Affordable Insurance Exchanges (Exchanges), including the Small Business Health Options Program (SHOP). Beginning January 1, 2014, the Exchanges became operational. The Exchanges enhance competition in the health insurance market, expand access to affordable health insurance for millions of Americans, and provide consumers with a place to easily compare and shop for health insurance coverage.

States can choose to establish and operate a State-based Exchange (SBE) or a State-based Exchange on the Federal Platform (SBE–FP). States electing to operate as an SBE–FP rely on the Federal Healthcare.gov platform to carry out eligibility and enrollment functions. For states that do not elect to operate either an SBE or SBE–FP, the Secretary of the U.S. Department of Health and Human Services (HHS) will establish and operate a Federally-facilitated Exchange (FFE) in those states. *Form Number:* CMS–10371 (OMB control number: 0938–1119; *Frequency:* Occasionally; *Affected Public:* State, Local or Tribal Government; *Number of Respondents:* 23; *Total Annual Responses:* 343; *Total Annual Hours:* 7,317. (For policy questions regarding this collection contact Tiffany Y. Animashaun at Tiffany.Animashaun@cms.hhs.gov).

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Low Income Home Energy Assistance Program (LIHEAP) Performance Data Form (Office of Management and Budget #0970–0449)

AGENCY: Office of Community Services, Administration for Children and Families, U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Administration for Children and Families (ACF) Office of Community Services (OCS) within the U.S. Department of Health and Human Services (HHS) is requesting an extension without change to the current version of the Low Income Home Energy Assistance Program (LIHEAP) Performance Measures (Office of Management and Budget (OMB) #0970–0449) for use through June 30, 2025, and for approval of a revised version to use beginning July 1, 2025.

DATES: *Comments due* January 31, 2025. In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above.

ADDRESSES: You can obtain copies of the proposed collection of information and submit comments by emailing infocollection@acf.hhs.gov. Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: OCS administers LIHEAP at the Federal level. The *LIHEAP Performance Data Form* (LPDF) is an annual report in response to section 2610(b) of the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8629(b)(2)) (LIHEAP statute), which requires the Secretary of HHS to submit, no later than June 30 of each Federal fiscal year, a report to Congress on LIHEAP for the prior Federal fiscal year. The completeness, accuracy, consistency, and timeliness of responses to data collections are needed for HHS to do the following:

- Provide reliable and complete fiscal and household data to Congress in the Department’s *LIHEAP Report to Congress* for the Federal fiscal year; and
- Respond to questions from the Congress, Department, OMB, White House, and other interested parties in a timely manner; and
- Report LIHEAP performance results as part of the Administration’s annual Congressional Justification.

In response to the 2010 Government Accountability Office (GAO) report, *Low Income Home Energy Assistance Program—Greater Fraud Prevention Controls are Needed* (GAO–10–621), and in consideration of the recommendations issued by the LIHEAP Performance Measures Implementation Work Group, OCS required the collection and reporting of these performance measures by State LIHEAP grant recipients, including the District of Columbia. The original LPDF was approved by OMB in November 2014

and has been in use since. The LPDF provides for the collection of data on State grant recipients’ sources and uses of LIHEAP funds, including average benefit amounts, as well as data for the following performance measures:

1. The benefit targeting index for high burden households receiving LIHEAP fuel assistance;
2. The burden reduction targeting index for high burden households receiving LIHEAP fuel assistance;
3. The number of households where LIHEAP prevented a potential home energy crisis; and
4. The number of households where LIHEAP benefits restored home energy.

All State LIHEAP grant recipients, including the District of Columbia, are required to complete the LPDF on an annual basis through ACF’s web-based data collection and reporting system, the Online Data Collection, which is available at the GrantSolutions homepage (<https://home.grantsolutions.gov/home>). The reporting requirements will be described through the LIHEAP Forms and Funding Applications page (<https://www.acf.hhs.gov/ocs/form/liheap-forms-and-funding-applications>) of ACF’s website.

This request will (1) continue approval to collect information using the currently approved version of the LPDF through June 30, 2025; and (2) incorporate changes to the LPDF designed to collect performance data on the impacts of supplemental Federal LIHEAP funds and to improve form fields and language. The changes proposed would go into effect in July 2025 and consist of (1) changing the name of Module 1 of the form from “Grantee Survey” to “Grant Recipient Survey”; (2) adding an item for reporting carryover of Residential Energy Assistance Challenge (REACH) funds to the following FY; (3) adding an item for reporting non-administrative information technology enhancements; (4) removing maximum income cutoffs from funding uses; (5) replacement of sources and uses of Coronavirus Aid, Relief, and Economic Security Act (CARES Act) funds and American Rescue Plan Act of 2021 (ARPA) funds with the Infrastructure Investment and Jobs Act (IIJA) funds; and (6) minor wording and structural changes.

Module 1 Grant Recipient Survey

Module 1 of the LPDF will continue to require the following data from each State for the Federal fiscal year:

- Grant recipient information.
- Sources and uses of LIHEAP funds, by funding type.

- Average LIHEAP household benefits, by funding type.

Modules 2, 2A, and 2B Required LIHEAP Performance Measures

Modules 2, 2A, and 2B of the LPDF will continue to require the following data from each State for the Federal fiscal year:

- Grant recipient information;
- Energy burden targeting;
- Restoration of home energy service; and
- Prevention of loss of home energy.

Modules 2, 2A, and 2B require reporting on households that received benefits from, respectively, non-

supplemental funds, CARES Act funds, and ARPA funds.

Module 3 LIHEAP Performance Measures (Optional Reporting)

Module 3 of the LIHEAP LPDF will continue to voluntarily collect the following additional information from each interested grant recipient for the Federal fiscal year:

- Average annual energy usage;
- Unduplicated number of households using supplemental heating fuel and air conditioning;
- Unduplicated number of households that had restoration of home energy service, and

- Unduplicated number of households that had prevention of loss of home energy.

LIHEAP grant recipients will be able to compare their own results to the results for other States, as well as to regional and national results, through the Data Warehouse of the LIHEAP Performance Management website as they manage their programs.

Respondents

State governments, including the District of Columbia; the largest five electricity and natural gas vendors by State; the largest ten fuel oil and propane vendors by State; and State sub-grant recipients.

ANNUAL BURDEN ESTIMATES

LIHEAP performance data form	Total number of respondents	Annual number of responses per respondent	Average burden hours per response	Annual burden hours
State Grant Recipients—Module I	51	1	30	1,530
State Grant Recipients—Modules II and III	51	1	158.6	8,088.6
Sub-Grant Recipients (in States with sub-grant recipient managed systems)—Modules II and III	100	1	6.3	630
Energy Vendors (largest 5 electric, 5 natural gas, 10 fuel oil, and 10 propane vendors per State-average)—Modules II and III	1,530	1	8.5	13,005

Estimated Total Annual Burden Hours: 23,253.6.

Comments

The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Authority: 42 U.S.C. 8629(b); 42 U.S.C. 8624(b); 42 U.S.C. 8623(c).

Mary C. Jones,
ACF/OPRE Certifying Officer.

BILLING CODE 4184-80-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2024-N-1636]

Issuance of Priority Review Voucher; Rare Pediatric Disease Product; KEBILIDI (eladocagene exuparvovec-tneq)

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the issuance of a priority review voucher to the sponsor of a rare pediatric disease product application. The Federal Food, Drug, and Cosmetic Act (FD&C Act) authorizes FDA to award priority review vouchers to sponsors of approved rare pediatric disease product applications that meet certain criteria. FDA is required to publish notice of the award of the priority review voucher. FDA has determined that KEBILIDI (eladocagene exuparvovec-tneq), approved on November 13, 2024, manufactured by PTC Therapeutics Inc., meets the criteria for a priority review voucher.

FOR FURTHER INFORMATION CONTACT: Myrna Hanna, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New

Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911.

SUPPLEMENTARY INFORMATION: FDA is announcing the issuance of a priority review voucher to the sponsor of an approved rare pediatric disease product application. Under section 529 of the FD&C Act (21 U.S.C. 360ff), FDA will award priority review vouchers to sponsors of approved rare pediatric disease product applications that meet certain criteria. FDA has determined that KEBILIDI (eladocagene exuparvovec-tneq), manufactured by PTC Therapeutics Inc., meets the criteria for a priority review voucher. KEBILIDI (eladocagene exuparvovec-tneq) is indicated for treatment of adult and pediatric patients with aromatic L-amino acid decarboxylase deficiency.

For further information about the Rare Pediatric Disease Priority Review Voucher Program and for a link to the full text of section 529 of the FD&C Act, go to <https://www.fda.gov/industry/developing-products-rare-diseases-conditions/rare-pediatric-disease-rpd-designation-and-voucher-programs>. For further information about KEBILIDI (eladocagene exuparvovec-tneq), go to the Center for Biologics Evaluation and Research's Approved Cellular and Gene Therapy Products website at <https://www.fda.gov/vaccines-blood-biologics/>

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–5253]

Anesthetic and Analgesic Drug Products Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments— Biologics License Application 761393 for Condoliase Injection

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming public advisory committee meeting of the Anesthetic and Analgesic Drug Products Advisory Committee (the Committee). The general function of the Committee is to provide advice and recommendations to FDA on regulatory issues. The meeting will be open to the public. FDA is establishing a docket for public comment on this document.

DATES: The meeting will be held on January 10, 2025, from 9 a.m. to 4:30 p.m. Eastern Time.

ADDRESSES: The public may attend the meeting at the FDA White Oak Campus, 10903 New Hampshire Ave., Bldg. 31 Conference Center, the Great Room (Rm. 1503), Silver Spring, MD 20993–0002. The public will also have the option to participate, and the advisory committee meeting will be heard, viewed, captioned, and recorded through an online teleconferencing and/or video conferencing platform.

Answers to commonly asked questions about FDA advisory committee meetings, including information regarding special accommodations due to a disability, visitor parking, and transportation may be accessed at: <https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm>.

FDA is establishing a docket for public comment on this meeting. The docket number is FDA–2024–N–5253. The docket will close on January 9, 2025. Please note that late, untimely filed comments will not be considered.

The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 9, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Comments received on or before December 26, 2024, will be provided to the Committee. Comments received after that date will be taken into consideration by FDA. In the event that the meeting is canceled, FDA will continue to evaluate any relevant applications or information, and consider any comments submitted to the docket, as appropriate.

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2024–N–5253 for “Anesthetic and Analgesic Drug Products Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments—Biologics License Application (BLA) 761393 for Condoliase Injection.” Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” FDA will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify the information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: LaToya Bonner, Center for Drug Evaluation and Research, Food and

Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993-0002, 301-796-2855, email: AADPAC@fda.hhs.gov, or FDA Advisory Committee Information Line, 1-800-741-8138 (301-443-0572 in the Washington, DC area). A notice in the **Federal Register** about last-minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check FDA's website at <https://www.fda.gov/AdvisoryCommittees/default.htm> and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before the meeting.

SUPPLEMENTARY INFORMATION:

Agenda: The meeting presentations will be heard, viewed, captioned, and recorded through an online teleconferencing and/or video conferencing platform. The Committee will discuss BLA 761393, condoliase injection submitted by Seikagaku Corp., for the proposed indication of the treatment of radicular leg pain associated with lumbar disc herniation in adults.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available on FDA's website at the time of the advisory committee meeting. Background material and the link to the online teleconference and/or video conference meeting will be available at the location of the advisory committee meeting and at <https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link. The online presentation of materials will include slide presentations with audio and video components to allow the presentation of materials in a manner that most closely resembles an in-person advisory committee meeting.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the Committee. All electronic and written submissions to the Docket (see **ADDRESSES**) on or before December 26, 2024, will be provided to the Committee. Oral presentations from the public will be scheduled between approximately 1:15 p.m. and 2:15 p.m. Eastern Time. Those individuals

interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, whether they would like to present online or in-person, and an indication of the approximate time requested to make their presentation on or before December 17, 2024. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. Similarly, room for interested persons to participate in-person may be limited. If the number of registrants requesting to speak in-person during the open public hearing is greater than can be reasonably accommodated in the venue for the in-person portion of the advisory committee meeting, FDA may conduct a lottery to determine the speakers who will be invited to participate in-person. The contact person will notify interested persons regarding their request to speak by December 18, 2024. Persons attending FDA's advisory committee meetings are advised that FDA is not responsible for providing access to electrical outlets.

For press inquiries, please contact the Office of Media Affairs at fdaoma@fda.hhs.gov or 301-796-4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact LaToya Bonner (see **FOR FURTHER INFORMATION CONTACT**) at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at <https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm> for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. 1001 *et seq.*). This meeting notice also serves as notice that, pursuant to 21 CFR 10.19, the requirements in 21 CFR 14.22(b), (f), and (g) relating to the location of advisory committee meetings are hereby waived to allow for this meeting to take place using an online meeting platform in conjunction with the physical meeting room (see location). This waiver is in the interest of allowing greater transparency and

opportunities for public participation, in addition to convenience for advisory committee members, speakers, and guest speakers. The conditions for issuance of a waiver under 21 CFR 10.19 are met.

Dated: November 25, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2024-N-4085]

Advancing Smoking Cessation: Food and Drug Administration and National Institutes of Health Priorities; Public Meeting; Request for Comments; Reopening of Public Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public meeting; reopening of public comment period.

SUMMARY: The Food and Drug Administration (FDA or Agency) published in the **Federal Register** of September 23, 2024, a notice of public meeting scheduled for October 21, 2024, and solicited comments from interested parties. FDA requested that all electronic and written comments be submitted by November 21, 2024. FDA is reopening the public comment period until December 20, 2024, in response to feedback received from interested parties. This action will allow for interested parties additional time to review the meeting transcript and recording to prepare information and comments.

DATES: The comment period for the notice of public meeting published on September 23, 2024, (89 FR 77521) is reopened. Either electronic or written comments must be received on or before December 20, 2024.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of December 20, 2024. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2024-N-4085 for "Advancing Smoking Cessation: Food and Drug Administration and National Institutes of Health Priorities." Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two

copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Laura Chilaka, Center for Tobacco Products, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993, 877-287-1373, TobaccoCessation@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: On September 23, 2024, FDA published in the **Federal Register** a notice announcing a public meeting entitled "Advancing Smoking Cessation: Food and Drug Administration and National Institutes of Health Priorities." Jointly convened by FDA and the National Institutes of Health, this public meeting addressed the need for novel smoking cessation products to help individuals of all ages, including underserved and vulnerable populations, stop smoking.

Interested persons were originally given until November 21, 2024, to submit comments on the public meeting.

FDA has received requests for additional time in submitting comments. Due to the significant

interest in the topic and to allow interested parties time to review the meeting transcript and recording, FDA has reopened the comment period until December 20, 2024.

Dated: November 25, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Recharter for the National Advisory Council on Nurse Education and Practice

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: In accordance with the Federal Advisory Committee Act, HHS is hereby giving notice that the National Advisory Council on Nurse Education and Practice (NACNEP or Council) is rechartered.

DATES: The effective date of the recharter is November 30, 2024.

FOR FURTHER INFORMATION CONTACT: Justin Bala-Hampton, Bureau of Health Workforce, HRSA, 5600 Fishers Lane, Rockville, Maryland 20857; 301-443-2765 or BHWNAACNEP@hrsa.gov.

SUPPLEMENTARY INFORMATION: NACNEP provides advice and recommendations to the Secretary of HHS and Congress on policy matters and the preparation of general regulations concerning activities under title VIII of the Public Health Service Act, including the range of issues relating to the nurse workforce, education, and practice improvement. NACNEP also prepares and submits an annual report to the Secretary of HHS and Congress describing its activities, including NACNEP's findings and recommendations concerning activities under title VIII, as required by the Public Health Service Act. The recharter of NACNEP was approved on October 31, 2024. The filing date for the NACNEP recharter is November 30, 2024. The recharter of NACNEP gives authorization for the Council to operate until November 30, 2026.

A copy of the NACNEP charter is available on the NACNEP website at <https://www.hrsa.gov/advisorycommittees/nursing/about.html>. A copy of the charter can also be obtained by accessing the FACA database that is

maintained by the Committee Management Secretariat under the General Services Administration. The website address for the FACA database is <https://www.facadatabase.gov/>.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Meeting of the Advisory Committee on Infant and Maternal Mortality

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice announces that the Advisory Committee on Infant and Maternal Mortality (ACIMM or Committee) has scheduled a public meeting. Information about ACIMM and the agenda for this meeting can be found on the ACIMM website at <https://www.hrsa.gov/advisory-committees/infant-mortality/index.html>.

DATES: January 7, 2025, from 12:00 p.m. to 5:00 p.m. Eastern Time and January 8, 2025, from 12:00 p.m. to 5:00 p.m. Eastern Time.

ADDRESSES: This meeting will be held by webinar. *The webinar link and log-in information will be available at the ACIMM website before the meeting:* <https://www.hrsa.gov/advisory-committees/infant-mortality/index.html>.

FOR FURTHER INFORMATION CONTACT:

Vanessa Lee, MPH, Designated Federal Official, Maternal and Child Health Bureau, HRSA, 5600 Fishers Lane, Rockville, Maryland, 20857; 301-443-0543; or SACIM@hrsa.gov.

SUPPLEMENTARY INFORMATION: ACIMM is authorized by section 222 of the Public Health Service Act (42 U.S.C. 217a), as amended. The Committee is governed by provisions of the Federal Advisory Committee Act (5 U.S.C. Chapter 10), as amended.

ACIMM advises the Secretary of Health and Human Services on department activities, partnerships, policies, and programs directed at reducing infant mortality, maternal mortality, and severe maternal morbidity and improving the health status of infants and women before, during, and after pregnancy. The

Committee provides advice on how to coordinate federal, state, local, tribal, and territorial governmental efforts designed to improve infant mortality; related adverse birth outcomes; and maternal health; as well as influence similar efforts in the private and voluntary sectors. The Committee provides guidance and recommendations on the policies, programs, and resources required to address the disparities and inequities in infant mortality; related adverse birth outcomes and maternal health outcomes, including maternal mortality and severe maternal morbidity. With its focus on underlying causes of the disparities and inequities seen in birth outcomes for women and infants, the Committee advises the Secretary of Health and Human Services on the health, social, economic, and environmental factors contributing to the inequities and proposes structural, policy, and/or systems level changes.

The agenda for the January 7–8, 2025, meeting is being finalized and may include the following topics: federal updates; Committee operations updates; discussion of draft recommendations for the Secretary on achieving optimal maternal health and overall birth outcomes for underserved populations, including Black/African-American families; and a vote on whether to send the draft recommendations forward. Agenda items are subject to change as priorities dictate. Refer to the ACIMM website listed above for any updated information concerning the meeting.

Members of the public will have the opportunity to provide written or oral comments. Public participants may submit written statements in advance of the scheduled meeting by emailing SACIM@hrsa.gov. Oral comments will be presented in the order they are requested and may be limited as time allows. Requests to submit a written statement or make oral comments to ACIMM should be sent to Vanessa Lee, Designated Federal Official, using the email address above, at least 3 business days prior to the meeting.

Individuals who plan to attend and need special assistance or another reasonable accommodation should notify Vanessa Lee at the contact information listed above at least 10 business days prior to the meeting.

Maria G. Button,

Director, Executive Secretariat.

[FR Doc. 2024-28155 Filed 11-29-24; 8:45 am]

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meeting of the Advisory Committee on Minority Health

AGENCY: Office of Minority Health, Office of the Secretary, U.S. Department of Health and Human Services.

ACTION: Notice of meeting.

SUMMARY: As stipulated by the Federal Advisory Committee Act, the U.S. Department of Health and Human Services (HHS) is hereby giving notice that the Advisory Committee on Minority Health (ACMH) will hold a meeting conducted as a webcast on December 16, 2024. This virtual meeting will be open to the public. Registration is required for the public to attend the meeting, provide comment, and/or distribute material(s) to ACMH members.

DATES: The virtual ACMH meeting will be held on December 16, 2024, from 2 p.m. to 3:30 p.m. eastern standard time (EST). If the Committee completes its work before 3:30 p.m. EST, the meeting will adjourn early.

ADDRESSES: The meeting will be held virtually and will be accessible by webcast. Instructions regarding webcast access and providing written public comments will be given after meeting registration occurs.

Any individual who wishes to participate in the virtual meeting should register using the Zoom registration link provided below by 5 p.m. EST on December 12, 2024. Instructions regarding participating in the call and providing written or verbal public comments will be provided after meeting registration occurs. Information about the meeting will be posted on the HHS Office of Minority Health (OMH) website: www.minorityhealth.hhs.gov. Information about ACMH activities can be found on the OMH website under the heading *About OMH, Committees and Working Groups*.

FOR FURTHER INFORMATION CONTACT:

Violet Woo, Designated Federal Officer, Advisory Committee on Minority Health, OMH, HHS, Tower Building, 1101 Wootton Parkway, Suite 100, Rockville, Maryland 20852. Phone: 240-453-6816; email: OMH-ACMH@hhs.gov.

SUPPLEMENTARY INFORMATION: In accordance with Public Law 105-392, the ACMH was established to provide advice to the Deputy Assistant Secretary for Minority Health on the development of goals and program activities related to OMH's duties.

The topics to be discussed during the virtual meeting include finalizing: (1)

meeting notes of the November 14–15, 2024 ACMH open meeting; and (2) recommendations on the implementation of the updated Office of Management and Budget (OMB) Federal race and ethnicity data collection standards (SPD 15) that is focused on opportunities for engagement with racial, ethnic, and Tribal community level organizations to support increased awareness of OMB SPD 15 and their intended goals within their communities. The final recommendations will be given to the Deputy Assistant Secretary for Minority Health to inform efforts related to engagement with racial, ethnic, and Tribal community level organizations to support increased awareness of OMB SPD 15 and their intended goals within their communities.

Any individual who wishes to attend the meeting must register via the Zoom registration link, https://www.zoomgov.com/webinar/register/WN_iZGnp8BWRQORITiqVcThzA, by 5 p.m. EST on December 12, 2024. Each registrant should provide their name, affiliation, phone number, email address, if they plan to provide either written or verbal comment, and whether they have requests for special accommodations, including sign language interpretation. After registering, registrants will receive an automated email response with the meeting connection link. The meeting connection link is unique to each registrant and should not be shared.

Members of the public will have an opportunity to provide comments at the meeting. Individuals should indicate during registration whether they intend to provide written or verbal comment. Public comments will be limited to two minutes per speaker during the time allotted. Individuals of the public may also submit and distribute electronic or printed statements or material(s) related to this meeting's topic. Written statements or material(s) should be double-spaced with one-inch margins and not exceed two pages in length. Any content beyond the two-page limit will not be presented to the Committee. Registered members of the public who plan to submit electronic and distribute electronic or printed public statements or material(s) related to the meeting's topic should email the material to OMH-ACMH@hhs.gov at least two (2) business days prior to the meeting.

Violet Woo,

Designated Federal Officer, Advisory Committee on Minority Health.

BILLING CODE 4150–29–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of an Exclusive Patent License: Vaccine Augmented Tumor Infiltrating Lymphocytes for the Treatment of Cancer

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Cancer Institute, an institute of the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an Exclusive Patent License to practice the inventions embodied in the Patents and Patent Applications listed in the Supplementary Information section of this Notice to Iovance Biotherapeutics, Inc. (“Iovance”), headquartered in San Carlos, CA.

DATES: Only written comments and/or applications for a license which are received by the National Cancer Institute’s Technology Transfer Center on or before December 17, 2024 will be considered.

ADDRESSES: Requests for copies of the patent applications, inquiries, and comments relating to the contemplated Exclusive Patent License should be directed to: Andrew Burke, Ph.D., Senior Technology Transfer Manager, NCI Technology Transfer Center, Telephone: (240)–276–5484; Email: andy.burke@nih.gov.

SUPPLEMENTARY INFORMATION:

Intellectual Property

1. United States Provisional Patent Application No. 63/295,762 filed December 31, 2021, entitled “T Cell Therapy with Vaccination as a Combination Immunotherapy Against Cancer” [HHS Reference No. E–046–2022–0–US–01];
2. International Patent Application No. PCT/US2022/082579 filed December 29, 2022, entitled “T Cell Therapy with Vaccination as a Combination Immunotherapy Against Cancer” [HHS Reference No. E–046–2022–0–PCT–02];
3. Australian Patent Application No. 2022425620 filed June 25, 2024, entitled “T Cell Therapy with Vaccination as a Combination Immunotherapy Against Cancer” [HHS Reference No. E–046–2022–0–AU–01];
4. Canadian Patent Application No. 3241588 filed June 18, 2024, entitled “T Cell Therapy with Vaccination as a Combination Immunotherapy Against Cancer” [HHS Reference No. E–046–2022–0–CA–01];

5. Chinese Patent Application No. 202280092973.5 filed August 30, 2024, entitled “T Cell Therapy with Vaccination as a Combination Immunotherapy Against Cancer” [HHS Reference No. E–046–2022–0–CN–01];

6. European Patent Application No. 22854399.7 filed June 25, 2024, entitled “T Cell Therapy with Vaccination as a Combination Immunotherapy Against Cancer” [HHS Reference No. E–046–2022–0–EP–01];

7. Japanese Patent Application No. 2024–539628 filed June 28, 2024, entitled “T Cell Therapy with Vaccination as a Combination Immunotherapy Against Cancer” [HHS Reference No. E–046–2022–0–JP–01]; and

8. United States Patent Application No. 18/720,347 filed June 14, 2024, entitled “T Cell Therapy with Vaccination as a Combination Immunotherapy Against Cancer” [HHS Reference No. E–046–2022–0–US–02].

The patent rights in these inventions have been assigned and/or exclusively licensed to the Government of the United States of America.

The prospective exclusive license territory may be “worldwide”, and the field of use may be limited to the following:

“Development, manufacture and commercialization of combination immunotherapies for the treatment of cancer in humans, comprising at least the following elements:

1. An autologous tumor infiltrating lymphocyte (TIL) T cell product; and
2. A neoantigen cancer vaccine.”

The E–046–2022 patent family is primarily directed to a combination immunotherapy comprising a population of antigen-specific immune cells (e.g., T cells) and a vaccine targeting the same antigen(s). In oncology, many adoptive cell therapies rely on antigen-specific T cells isolated from the patient in need of treatment. However, these cells often exist in a terminally differentiated and exhausted state and are unable to mount a robust immune response following reinfusion. Recent evidence suggests that administration of a vaccine in parallel with the T cell product can ameliorate this performance defect when the vaccine targets antigen(s) recognized by the T cells. This two-part approach may enhance treatment efficacy.

It is noted that the exclusive field of use which may be granted to Iovance applies to only certain autologous T cell products and vaccination strategies and does not include, for example, any non-TIL-based applications. Accordingly, the scope of rights which may be conveyed under the proposed license

covers a portion of the possible applications of E-046-2022.

This Notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published Notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information from these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

Dated: November 25, 2024.

Richard U. Rodriguez,

Associate Director, Technology Transfer Center, National Cancer Institute.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Current List of HHS-Certified Laboratories and Instrumented Initial Testing Facilities Which Meet Minimum Standards To Engage in Urine and Oral Fluid Drug Testing for Federal Agencies

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (HHS) notifies Federal agencies of the laboratories and Instrumented Initial Testing Facilities (IITFs) currently certified to meet the standards of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines) using Urine and the laboratories currently certified to meet the standards of the Mandatory Guidelines using Oral Fluid.

FOR FURTHER INFORMATION CONTACT:

Anastasia Flanagan, Division of Workplace Programs, SAMHSA/CSAP,

5600 Fishers Lane, Room 16N06B, Rockville, Maryland 20857; 240-276-2600 (voice); *Anastasia.Flanagan@samhsa.hhs.gov* (email).

SUPPLEMENTARY INFORMATION: The Department of Health and Human Services (HHS) publishes a notice listing all HHS-certified laboratories and Instrumented Initial Testing Facilities (IITFs) in the **Federal Register** during the first week of each month, in accordance with section 9.19 of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines) using Urine and section 9.17 of the Mandatory Guidelines using Oral Fluid. If any laboratory or IITF certification is suspended or revoked, the laboratory or IITF will be omitted from subsequent lists until such time as it is restored to full certification under the Mandatory Guidelines.

If any laboratory or IITF has withdrawn from the HHS National Laboratory Certification Program (NLCP) during the past month, it will be listed at the end and will be omitted from the monthly listing thereafter.

This notice is also available on the internet at <https://www.samhsa.gov/workplace/drug-testing-resources/certified-lab-list>.

HHS separately notifies Federal agencies of the laboratories and IITFs currently certified to meet the standards of the Mandatory Guidelines using Urine and of the laboratories currently certified to meet the standards of the Mandatory Guidelines using Oral Fluid.

The Mandatory Guidelines using Urine were first published in the **Federal Register** on April 11, 1988 (53 FR 11970), and subsequently revised in the **Federal Register** on June 9, 1994 (59 FR 29908); September 30, 1997 (62 FR 51118); April 13, 2004 (69 FR 19644); November 25, 2008 (73 FR 71858); December 10, 2008 (73 FR 75122); April 30, 2010 (75 FR 22809); January 23, 2017 (82 FR 7920); and on October 12, 2023 (88 FR 70768).

The Mandatory Guidelines using Oral Fluid were first published in the **Federal Register** on October 25, 2019 (84 FR 57554) with an effective date of January 1, 2020, and subsequently revised in the **Federal Register** on October 12, 2023 (88 FR 70814).

The Mandatory Guidelines were initially developed in accordance with Executive Order 12564 and section 503 of Public Law 100-71 and allowed urine drug testing only. The Mandatory Guidelines using Urine have since been revised, and new Mandatory Guidelines allowing for oral fluid drug testing have been published. The Mandatory

Guidelines require strict standards that laboratories and IITFs must meet in order to conduct drug and specimen validity tests on specimens for Federal agencies. HHS does not allow IITFs to conduct oral fluid testing.

To become certified, an applicant laboratory or IITF must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification, a laboratory or IITF must participate in a quarterly performance testing program plus undergo periodic, on-site inspections.

Laboratories and IITFs in the applicant stage of certification are not to be considered as meeting the minimum requirements described in the HHS Mandatory Guidelines using Urine and/or Oral Fluid. An HHS-certified laboratory or IITF must have its letter of certification from HHS/SAMHSA (formerly: HHS/NIDA), which attests that the test facility has met minimum standards. HHS does not allow IITFs to conduct oral fluid testing.

HHS-Certified Laboratories Approved to Conduct Oral Fluid Drug Testing

In accordance with the Mandatory Guidelines using Oral Fluid effective October 10, 2023 (88 FR 70814), the following HHS-certified laboratories meet the minimum standards to conduct drug and specimen validity tests on oral fluid specimens:

At this time, there are no laboratories certified to conduct drug and specimen validity tests on oral fluid specimens.

HHS-Certified Instrumented Initial Testing Facilities Approved To Conduct Urine Drug Testing

In accordance with the Mandatory Guidelines using Urine effective February 1, 2024 (88 FR 70768), the following HHS-certified IITFs meet the minimum standards to conduct drug and specimen validity tests on urine specimens:

Dynacare *, 6628 50th Street NW, Edmonton, AB Canada T6B 2N7, 780-784-1190, (Formerly: Gamma-Dynacare Medical Laboratories).

HHS-Certified Laboratories Approved to Conduct Urine Drug Testing

In accordance with the Mandatory Guidelines using Urine effective February 1, 2024 (88 FR 70768), the following HHS-certified laboratories meet the minimum standards to conduct drug and specimen validity tests on urine specimens:

Alere Toxicology Services, 1111 Newton St., Gretna, LA 70053, 504-361-8989/800-433-3823. (Formerly: Kroll Laboratory Specialists, Inc., Laboratory Specialists, Inc.)

Alere Toxicology Services, 450 Southlake Blvd., Richmond, VA 23236, 804-378-9130. (Formerly: Kroll Laboratory Specialists, Inc., Scientific Testing Laboratories, Inc.; Kroll Scientific Testing Laboratories, Inc.)

Clinical Reference Laboratory, Inc., 8433 Quivira Road, Lenexa, KS 66215-2802, 800-445-6917.

Desert Tox, LLC, 5425 E Bell Rd., Suite 125, Scottsdale, AZ 85254, 602-457-5411/623-748-5045.

DrugScan, Inc., 200 Precision Road, Suite 200, Horsham, PA 19044, 800-235-4890.

Dynacare *, 245 Pall Mall Street, London, ONT, Canada N6A 1P4, 519-679-1630. (Formerly: Gamma-Dynacare Medical Laboratories)

ElSohly Laboratories, Inc., 5 Industrial Park Drive, Oxford, MS 38655, 662-236-2609.

LabOne, Inc. d/b/a Quest Diagnostics, 10101 Renner Blvd., Lenexa, KS 66219, 913-888-3927/800-873-8845. (Formerly: Quest Diagnostics Incorporated; LabOne, Inc.; Center for Laboratory Services, a Division of LabOne, Inc.)

Laboratory Corporation of America, 1225 NE 2nd Ave., Portland, OR 97232, 503-413-5295/800-950-5295. (Formerly: Legacy Laboratory Services Toxicology MetroLab)

Laboratory Corporation of America Holdings, 7207 N Gessner Road, Houston, TX 77040, 713-856-8288/800-800-2387.

Laboratory Corporation of America Holdings, 69 First Ave., Raritan, NJ 08869, 908-526-2400/800-437-4986. (Formerly: Roche Biomedical Laboratories, Inc.)

Laboratory Corporation of America Holdings, 1904 TW Alexander Drive, Research Triangle Park, NC 27709, 919-572-6900/800-833-3984. (Formerly: LabCorp Occupational Testing Services, Inc., CompuChem Laboratories, Inc.)

CompuChem Laboratories, Inc., A Subsidiary of Roche Biomedical Laboratory; Roche CompuChem Laboratories, Inc., A Member of the Roche Group), Laboratory Corporation of America Holdings, 1120 Main Street, Southaven, MS 38671, 866-827-8042/800-233-6339. (Formerly: LabCorp Occupational Testing Services, Inc.; MedExpress/National Laboratory Center)

MedTox Laboratories, Inc., 402 W County Road D, St. Paul, MN 55112, 651-636-7466/800-832-3244.

Minneapolis Veterans Affairs Medical Center, Forensic Toxicology Laboratory, 1 Veterans Drive, Minneapolis, MN 55417, 612-725-

2088. Testing for Veterans Affairs (VA) Employees Only.

Omega Laboratories, Inc.*, 2150 Dunwin Drive, Unit 1 & 2, Mississauga, ON, Canada L5L 5M8, 289-919-3188.

Pacific Toxicology Laboratories, 9348 DeSoto Ave., Chatsworth, CA 91311, 800-328-6942. (Formerly: Centinela Hospital Airport Toxicology Laboratory)

Phamatech, Inc., 15175 Innovation Drive, San Diego, CA 92128, 888-635-5840.

US Army Forensic Toxicology Drug Testing Laboratory, 2490 Wilson St., Fort George G. Meade, MD 20755-5235, 301-677-7085. Testing for Department of Defense (DoD) Employees Only

* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories continued under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory as meeting the minimum standards of the current Mandatory Guidelines published in the **Federal Register**. After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in the NLCP certification maintenance program. DOT established this process in July 1996 (61 FR 37015) to allow foreign laboratories to participate in the DOT drug testing program.

Anastasia D. Flanagan,

Public Health Advisor, Division of Workplace Programs.

BILLING CODE 4160-20-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276-0361.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: 988 Suicide & Crisis Lifeline and Crisis Services Program Evaluation—New Package

The Substance Abuse and Mental Health Services Administration (SAMHSA) 988 & Behavioral Health Crisis Coordinating Office (BHCCO)) is requesting clearance for the new data collection associated with the evaluation of the SAMHSA 988 Suicide and Crisis Lifeline and Crisis Services Program Evaluation (988 Suicide and Crisis Lifeline Evaluation). The collection of this information is critical to successfully oversee operational response and quality of service through the 988 Suicide and Crisis Lifeline to ensure connections to care for individuals in suicidal crisis or emotional distress contacting in for 988 phone, chat, and text support for connecting local, state/territory, and national outcomes and monitoring contractual obligations for current and future 988 Suicide and Crisis Lifeline grant programs. Much of the information is already embedded in the current 988 Suicide and Crisis Lifeline

network administrator grants, the 988 state and territory grant program, or the 988 Tribal Response grant program.

In 2020, Congress designated the three-digit number, 9–8–8 for the Suicide and Crisis Lifeline, and the Suicide and Crisis Lifeline transitioned to the 3-digit number in July 2022. As a part of the federal government's commitment to addressing the mental health and opioid crises in America, unprecedented Federal resources have been invested to expand crisis centers in support of 988. Since its launch in July 2022, the 988 Suicide & Crisis Lifeline has answered over 9.6 million contacts (SAMHSA, 2024). Progress recognized in 2023 continues in all areas including crisis line features, crisis center supports, and funding. In FY2024, the Biden-Harris administration appropriated nearly \$500 million in new funding opportunities for the 988 Lifeline Administrator and other grantees on State territorial, Tribal and center levels, as part of the commitment to strengthen crisis care nationally. In section 1103(a)(2)(B) of the Consolidated Appropriations Act, 2023 (Pub. L. 117–328), Congress called for enhanced program evaluation, including performance measures to assess program response and improve readiness and performance of the service, including review of each contact to ensure timely connection of service and quality provision in line with evidence-based care. To meet the standards and requirements set forth in the statute, ongoing communication of key outcomes within this OMB request must be received and reviewed to ensure connection and quality of care through the 988 Suicide and Crisis Lifeline.

The information collected will be used by SAMHSA to conduct an evaluation of the 988 Suicide & Crisis Lifeline and Crisis Services, to ensure individuals in suicidal, mental health and/or substance use crisis can contact 988 Suicide and Crisis Lifeline and are connected to crisis centers providing evidence-based care and are able to receive critical resource referral and linkage, including opportunities for mobile crisis support, crisis receiving and stabilizing facilities, peer respite centers and withdrawal management services. The purpose of the 988 Lifeline and Crisis Services Program Evaluation is to assess the implementation and expansion of the 988 Lifeline in the U.S. The evaluation will provide SAMHSA, grantees, and other interested parties with the information needed to strengthen the Behavioral Health Crisis Services Continuum (BHSCS) for all

people in crisis. The evaluation utilizes multiple studies to conduct the evaluation of the 988 Lifeline and Crisis Services across a 5-year period. The 988 Lifeline and Crisis Services Program Evaluation includes three levels: system-level, client-level, and impact. Embedded within each of the three evaluation levels are inquiries into behavioral health equity to investigate disparities in utilization of 988 Lifeline and BHSCS services and outcomes.

The System-level Evaluation examines the characteristics, collaborations, and structures of the crisis services infrastructure within states, territories, and Tribal jurisdictions that support improved client outcomes. The Systems-level Evaluation includes two studies: the System Composition and Collaboration Study and the System-Level Service Utilization Study. The System Composition and Collaboration Study examines the structure of the 988 Lifeline and the BHSCS at the national, state, territory, and Tribal levels, and the extent to which crisis service agencies work together. The System-level Service Utilization Study investigates whether the 988 Lifeline and BHSCS are successful in creating a behavioral-health-system-first response to crisis events and the resulting reduction in use of non-behavioral health crisis services (e.g., 911, law enforcement, emergency medical services).

The Client-level Evaluation provides critical information about the ways in which the 988 Lifeline and crisis services fulfill their mission to connect those in crisis with the services and supports needed to reduce crisis risk and improve overall behavioral health outcomes. The Client-level Evaluation consists of two studies: The Client-level Service Utilization and Outcome Study and the Client-level Risk Reduction Study. The Client-Level Service Utilization and Outcome Study explores the effectiveness of 988 Lifeline and BHSCSs in linking individuals to referral services following their contact with the crisis system and assesses the relationship between engagement with crisis services and behavioral health outcomes. The Client-Level Risk Reduction Study assesses the efficacy of 988 Lifeline and BHSCS contacts on immediate reductions in risks of suicide, violence toward others, and overdose.

The Impact Evaluation informs SAMHSA's efforts to continue to build the evidence base for suicide prevention and crisis programming. Specifically,

this evaluation will examine the impact of 988 Lifeline and BHSCS on suicide and overdose morbidity and mortality. A quasi-experimental interrupted time series (ITS) design using extant, secondary data sources (e.g., CDC mortality data, Medicaid claims data, data from Healthcare Cost and Utilization Project (HCUP), data from the NSDUH, and SAMHSA's Performance and Accountability Reporting System [SPARS] data) gathered across multiple years to establish longitudinal state-level trends before and after major milestones in the implementation of the 988 Lifeline and BHSCS.

The 988 Lifeline and Crisis Services Program Evaluation engages with the following SAMHSA grant-funded programs that make up the core of the crisis care continuum: 988 State/Territory; 988 Tribal nations; Community Crisis Response Program (CCRP); Crisis Center Follow-Up (CCFU); 988 Administrator; and Certified Community Behavioral Health Clinics (CCBHCs). Additional grant programs which are relevant to the BHSCS, such as the Mental Health Services Block Grant (MHBG), State Opioid Response (SOR), Tribal Opioid Response (TOR), Substance Use Prevention, Treatment and Recovery Services Block Grant (SUPTRS BG), will be included in portions of the evaluation as relevant. In addition, crisis-providing organizations that are not SAMHSA grantees, especially mobile crisis programs, crisis stabilization units, and CCBHCs will also be engaged to participate in the evaluation.

Ultimately, the purpose of the SAMHSA 988 Suicide & Crisis Lifeline and Crisis Services Program is to build the program's knowledge base of effectiveness by thoroughly describing the implementation, outcomes, and impact of a program meant to reduce deaths by suicide.

The total annualized burden is an estimated 16,724 respondents for the 988 Lifeline and Crisis Services Program Evaluation instruments, with a combined hourly estimate to be 8,006.10 hours. Burden estimates are based on the data collection requirements and the number of respondents. The estimated response burden to collect this information associated with the 988 Lifeline and Crisis Services Program Evaluation is as follows annualized over the requested 3-year clearance period is presented below:

TOTAL ANNUALIZED BURDEN HOURS AND COSTS
[Across the 3-year clearance period]

Type of respondent	Instrument	Number of respondents per year	Responses per respondent	Total number of responses	Burden per response (hours)	Annual burden (hours)	Hourly wage rate (\$)	Total annualized cost (\$)

BILLING CODE 4162-20-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Immigration and Customs Enforcement

[OMB Control Number 1653-0042]

Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection; Obligor Change of Address

AGENCY: U.S. Immigration and Customs Enforcement, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995 the Department of Homeland Security (DHS), U.S. Immigration and Customs Enforcement (ICE) will submit the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance. This information collection was previously published in the **Federal Register** on September 18, 2024, allowing for a 60-day comment period. ICE received one unrelated comment. The purpose of this notice is to allow an additional 30 days for public comments. The burden was updated from the 60-day notice due to adjustments in the Agency estimates.

DATES: Comments are encouraged and will be accepted until January 2, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of the publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: For specific question related to collection activities, please contact Carl Albritton, ERO, (202-497-6755), carl.a.albritton@ice.dhs.gov, U.S. Immigration and Customs Enforcement.

SUPPLEMENTARY INFORMATION: Comments

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Obligor Change of Address.

(3) *Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection:* I-333, U.S. Immigration and Customs Enforcement.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: State, Local, or Tribal Government. The data collected for this information collection is used by ICE to ensure accuracy in correspondents between ICE and the Obligor. The form serves the purpose of standardizing obligor notification of any changes in their address and will facilitate communications with the Obligor.

(5) *An estimate of the total number of responses and the amount of time estimated for an average respondent to respond:* ICE estimates a total of 5,282 responses at 15 minutes (.25 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 1,321 annual burden hours.

Dated: November 25, 2024.

Scott Elmore,

ICE PRA Clearance Officer, U.S. Immigration and Customs Enforcement, Department of Homeland Security.

BILLING CODE 9111-28-P

DEPARTMENT OF HOMELAND SECURITY

Transportation Security Administration

[Docket No. TSA-2011-0008]

Aviation Security Advisory Committee; Public Meeting; Correction

AGENCY: Transportation Security Administration, DHS.

ACTION: Committee management; notice of open Federal advisory committee meeting; correction.

SUMMARY: This document makes a correction to a notice published in the **Federal Register** on November 22, 2024, which included an incorrect date for an upcoming public meeting of the

Aviation Security Advisory Committee (ASAC). TSA erroneously stated that the meeting would be held on Thursday, December 11, 2024. TSA is revising the date to Wednesday, December 11, 2024.

DATES: Applicable December 2, 2024.

FOR FURTHER INFORMATION CONTACT:

Tamika McCree Elhilali, Aviation Security Advisory Committee, Designated Federal Officer, U.S. Department of Homeland Security, Transportation Security Administration, 6595 Springfield Center Drive, (TSA-28), Springfield, Virginia 20598, ASAC@tsa.dhs.gov, 571-227-2632.

SUPPLEMENTARY INFORMATION: On November 22, 2024 (89 FR 92699), TSA published a notice which involves a public meeting of the ASAC. In the first sentence after the **DATES** section, TSA erroneously stated that the meeting would take place on Thursday, December 11, 2024. TSA is revising the date to read Wednesday, December 11, 2024. Accordingly, the sentence has been revised to correct the date of the meeting.

Correction

In the **Federal Register** of November 22, 2024, in FR Doc. 2024-27441, on page 92700, in the first column, line 17, correct the **DATES** discussion paragraph to read:

The meeting will take place on Wednesday, December 11, 2024. The meeting will begin at 10:00 a.m. and adjourn at 1:00 p.m., Eastern Standard Time (EST). As listed in the Public Participation section below, requests to attend the meeting, to address the ASAC, and/or for accommodations because of a disability, must be received by November 29, 2024.

Dated November 25, 2024.

Eddie D. Mayenschein,

Assistant Administrator, Policy, Plans, and Engagement.

BILLING CODE 9110-05-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_CO_FRN_MO4500182533]

Notice of Northwest Resource Advisory Council Schedule of Public Meetings, Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meetings.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976 and the Federal Advisory

Committee Act of 1972, the U.S. Department of the Interior, Bureau of Land Management (BLM) Colorado's Northwest Resource Advisory Council (RAC) will hold the following public meetings in 2025.

DATES: The RAC will hold a meeting on February 6, 2025, from 8 a.m. to 4 p.m. mountain time (MT). The RAC will participate in a field tour on May 6, 2025, from 10 a.m. to 3 p.m. MT, and hold a meeting on May 7, 2025, from 8 a.m. to 4 p.m. MT. The RAC will participate in a field tour on August 19, 2025, from 10 a.m. to 3 p.m. MT, and hold a meeting on August 20, 2025, from 8 a.m. to 4 p.m. MT. All meetings and field tours are open to the public and a virtual participation option will be available on the Zoom platform for the business meetings.

ADDRESSES: The February 6, 2025, meeting will be held at the BLM White River Field Office, 220 E. Market St., Meeker, CO 81641.

The May 6, 2025, meeting will consist of a field tour, and the May 7, 2025, meeting will be held at the Grand Junction Field Office, 2815 H Road, Grand Junction, CO 81506.

The August 19, 2025, meeting will consist of a field tour, and the August 20, 2025 meeting will be held at the Little Snake Field Office, 455 Emerson Street, Craig CO 81625.

Virtual registration information, field tour details, and final agendas will be posted online 30 days in advance of the meeting dates at <https://www.blm.gov/get-involved/resource-advisory-council/near-you/colorado/northwest-rac>.

FOR FURTHER INFORMATION CONTACT:

Heather Marsh, 2815 H Road, Grand Junction, CO 81506; telephone: 970-244-3000; email: BLM_CO_NWRAC@blm.gov.

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: Through the BLM, the 15-member RAC advises the Secretary of the Interior on the planning and management of the public land resources located within the Northwest District, which includes the Kremmling, Little Snake, and White River Field Offices; and the Upper Colorado River District, which includes the Grand Junction and Colorado River Valley Field Offices along with the

Dominguez-Escalante and McInnis Canyons National Conservation Areas.

Agenda items for the February 6, 2025, meeting include a discussion of the North Sandhills Recreation Area business plan, carbon sequestration, methane capture, and field manager updates. The RAC will participate in a field tour on May 6, 2025, to sites located within the Grand Junction Field Office. Agenda items for the May 7, 2025, meeting include a discussion of shooting sports, a Solar Programmatic Environmental Impact Statement update, and field manager updates. The RAC will participate in a field tour on August 19, 2025, to the Sand Wash Basin area. Agenda items for the August 20, 2025, meeting include a discussion of fuels projects, Gateway South Reclamation, a TransWest Express Transmission Project update, and field manager updates. A public comment period will be offered at the business meetings. The public may present written comments at least two weeks in advance of the meetings to the contact listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice. Please include "RAC Comment" in your submission. All comments received will be provided to the RAC.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Members of the public are welcome to attend field tours but must provide their own transportation and meals. Individuals who plan to attend must RSVP to at least two weeks in advance of the field tours to the contact listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Requests for Accommodations: Please make requests in advance for sign language interpreter services, assistive listening devices, language translation services, or other reasonable accommodations. We ask that you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice at least 14 business days prior to the meeting to give the Department of the Interior sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis.

Meeting minutes will be maintained in the Upper Colorado River District Office and will be available for public

inspection and reproduction during regular business hours within 90 days following the meeting. Previous minutes and agendas are also available on the RAC's web page.

(Authority: 43 CFR 1784.4-2)

Douglas J. Vilsack,

BLM Colorado State Director.

BILLING CODE 4331-16-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-612-613 and 731-TA-1429-1430 (Review)]

Polyester Textured Yarn From China and India; Notice of Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 ("the Act"), as amended, to determine whether revocation of the antidumping and countervailing duty orders on polyester textured yarn from China and India would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted December 2, 2024. To be assured of consideration, the deadline for responses is January 2, 2025. Comments on the adequacy of responses may be filed with the Commission by February 12, 2025.

FOR FURTHER INFORMATION CONTACT: Camille Bryan (202-205-2811), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On January 10, 2020, the Department of Commerce

("Commerce") issued antidumping and countervailing duty orders on imports of polyester textured yarn from China and India (85 FR 1298 and 1301). The Commission is conducting reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are China and India.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determinations, the Commission defined a single *Domestic Like Product* consisting of all polyester textured yarn, coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations, the Commission defined the *Domestic Industry* as all U.S. producers of polyester textured yarn, except for one firm that was excluded as a related party. Certain Commissioners defined the *Domestic Industry* differently.

(5) The *Order Date* is the date that the antidumping and countervailing duty orders under review became effective. In these reviews, the *Order Date* is January 10, 2020.

(6) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign

manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties

authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is on or before 5:15 p.m. on January 2, 2025. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is on or before 5:15 p.m. on February 12, 2025. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of § 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings. Also, in accordance with § 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget ("OMB") number is not displayed; the OMB number is 3117 0016/USITC No. 24–5–627, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information to Be Provided in Response to this Notice of Institution: If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject Merchandise* from more than one *Subject Country*; or produce *Subject Merchandise* in more than one *Subject Country*, you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country*. As used below, the term "firm" includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at https://usitc.gov/reports/response_noi_worksheet, where one can download and complete the "NOI worksheet" Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product*, a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise*, a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping and countervailing duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in § 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product*. Identify any known related parties and the nature of the relationship as defined in § 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries since the *Order Date*.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product*, provide the

following information on your firm's operations on that product during calendar year 2023, except as noted (report quantity data in pounds and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in pounds and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or

countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country*; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country*.

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country*, provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in pounds and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* since the *Order Date*, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the

ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in each *Subject Country*, and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of Title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: November 25, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-1369]

Certain Icemaking Machines and Components Thereof; Notice of a Commission Determination To Review a Final Initial Determination Finding a Violation of Section 337; Request for Written Submissions on the Issues Under Review and on Remedy, the Public Interest, and Bonding; Extension of the Target Date

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission ("Commission") has determined to review a final initial determination ("ID") of the chief administrative law judge ("CALJ"), finding a violation of section 337 in this investigation. The Commission requests written submissions from the parties on the issues under review and submissions from the parties, interested government agencies, and other interested persons on the issues of remedy, the public interest, and bonding, under the schedule set forth below. The Commission has also determined to extend the target date for

completion of this investigation to February 13, 2025.

FOR FURTHER INFORMATION CONTACT:

Benjamin S. Richards, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 708-5453. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email EDIS3Help@usitc.gov. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal, telephone (202) 205-1810.

SUPPLEMENTARY INFORMATION: On August 16, 2023, the Commission instituted this investigation based on a complaint filed by Hoshizaki America, Inc. of Peachtree City, Georgia ("Hoshizaki"). 88 FR 55721-22 (Aug. 16, 2023). The complaint alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, based upon the importation into the United States, the sale for importation, or the sale within the United States after importation of certain icemaking machines and components thereof by reason of the infringement of one or more of claims 1-3, 6-8, and 11-20 of U.S. Patent No. 10,107,538 ("the '538 patent"); claims 1-4, 10-13, and 16 of U.S. Patent No. 10,113,785 ("the '785 patent"); and claims 1, 2, 5-9, and 11-14 of U.S. Patent No. 10,458,692 ("the '692 patent"). *Id.* at 5572. The Commission's notice of investigation named as respondents Blue Air FSE LLC of Gardena, California; and Bluenix Co., Ltd. of Gyeonggi-do, Republic of Korea (collectively, "Bluenix"). The Office of Unfair Import Investigations was also named as a party in this investigation, but ceased participating on October 13, 2023. *Id.*; see also EDIS Doc. ID 805894.

The CALJ issued IDs terminating the following claims from the investigation at Hoshizaki's request: claims 2, 8, 11-18, and 20 of the '538 patent; claims 2-4, 11-13, and 16 of the '785 patent; and claims 2, 6-8, and 11-14 of the '692 patent. Order No. 9 (Dec. 19, 2023), *unreviewed*, Comm'n Notice, EDIS Doc. ID 811832 (Jan. 11, 2024); Order No. 15 (Apr. 8, 2024), *unreviewed*, Comm'n Notice, EDIS Doc. ID 819782 (Apr. 26, 2024).

On April 25, 2024, the CALJ issued an ID granting Hoshizaki's unopposed motion for summary determination that

Hoshizaki satisfied the domestic industry requirement. Order No. 16 (Apr. 25, 2024). The Commission reviewed and then affirmed that ID. Comm'n Notice, EDIS Doc. ID 822414 (May 29, 2024).

The CALJ conducted an evidentiary hearing from May 6, 2024, through May 10, 2024.

On August 30, 2024, the CALJ issued his final ID on violation. That ID found that a violation of section 337 had occurred in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain icemaking machines and components thereof that infringe certain claims of the '538, '785, and '692 patents. On September 16, 2024, Bluenix filed a petition for review of the ID, and Hoshizaki filed a contingent petition for review of the ID. On September 23, 2024, Bluenix filed a response to Hoshizaki's contingent petition for review. On September 24, 2024, Hoshizaki filed a response to Bluenix's petition for review.

Having reviewed the record of the investigation, including the final ID, the parties' submissions to the CALJ, the evidentiary record, and the parties' petitions for review and responses thereto, the Commission has determined to review the ID in part. Specifically, the Commission has determined to review the ID's infringement findings for the '785 and '692 patents.

In connection with its review, the Commission requests responses to the following questions. The parties are requested to brief their positions with reference to the applicable law and the existing evidentiary record.

(1) For the '785 and '692 patents, please address whether the "function" of the "inner flat portion" limitation for purposes of the doctrine of equivalents analysis should include the overall function of making ice or be more narrowly defined to just the separation of active and passive cavities. As a legal matter, should the doctrine of equivalents analysis focus on the specific function of the claim limitation or the overall function of the claimed invention? See *AquaTex Indus., Inc. v. Techniche Sols.*, 479 F.3d 1320, 1326-27 (Fed. Cir. 2007) (finding error where the identified function of promoting evaporation was for the filler layer as a whole rather than the specific function of the "fiberfill batting material" limitation). As a factual matter, please address what role, if any, the inner flat portions play with respect to the formation and harvesting of ice in the claimed invention. See, e.g., '785 patent at 5:23-27 ("The degree to which ice extends over the inner flat portions 30

and the adjacent second protrusions 38 is determined, at least in part, by the length of time that water is applied to the front and rear plates 14, 16 during the ice forming cycle.”).

(2) Please address whether the difference between an inner flat portion (as claimed) and a slightly curved inner portion (as found in the accused products) will affect the “way” in which ice is formed (*i.e.*, by preventing the formation of “boundary layers,” or due to less surface area of contact between the plates and the water that forms ice during the cooling and harvesting cycles, or due to the shape of the surrounding tubing coil). *See* RRB at 18–20.

(3) Please address the “result” that should be considered for purposes of the doctrine of equivalents analysis, *e.g.*, the efficiency of the icemaking process or the quantity or quality of ice produced from the icemaking machine. Please address whether the difference between an inner flat portion (as claimed) and a slightly curved inner portion (as found in the accused products) will affect that result.

(4) Assuming that the icemaking function should be considered in determining equivalency, please address the expert testimony and other supporting evidence for or against your positions in response to the questions above (and in particular why the final ID found Dr. Tanbour’s testimony to be more credible than Bluenix’s expert). *See* ID at 72 n.20.

(5) Please address any evidence of record indicating what constitutes “slightly curved inner portions” in the accused products as characterized in the ID. ID at 69. Will the degree of curvature of the inner portion make a difference in an assessment of whether an accused product is equivalent to the claimed “inner flat portion”?

(6) For purposes of applying the function-way-result test for equivalence, if you contend that that function of the claimed “inner flat portions” is something other than “separat[ing] active and passive cavities, which are, in turn, interspersed so as to define ice forming sites,” ID at 70, indicate whether and where you raised that contention in the post-hearing briefing before the CALJ. Similarly, indicate whether and where you raised that contention in your petition for review of the ID. If you did not contend before the CALJ or in a petition for review that the function of the “inner flat portions” is something other than the function identified in the ID, explain why that contention has or has not now been forfeited, waived, or abandoned.

(7) Do you contend that the asserted claims of the ’785 and ’692 patents are limited to evaporators comprising oval-shaped refrigerant conduits? If so, explain where that limitation appears in the ’785 and ’692 patents.

(8) Do you contend that the asserted claims of the ’785 and ’692 patents limit the surface area of the claimed “inner flat portions” to a particular size or range of sizes? If so, explain where that limitation appears in the ’785 and ’692 patents.

(9) Do you contend that the asserted claims of the ’785 and ’692 patents are limited to evaporators that meet a certain efficiency threshold? If so, explain where that limitation appears in the ’785 and ’692 patents.

(10) Do you contend that the evaporators claimed in the asserted claims of the ’785 and ’692 patents are limited to the dimensions shown in figure 2 of those patents? If so, explain why your contention is not in conflict with *Hockerson-Halberstadt, Inc. v. Avia Grp. Int’l, Inc.*, 222 F.3d 951, 956 (Fed. Cir. 2000) (“[I]t is well established that patent drawings do not define the precise proportions of the elements and may not be relied on to show particular sizes if the specification is completely silent on the issue.”).

(11) In testifying regarding a lack of equivalence between the claimed “inner flat portions” of the ’785 and ’692 patents and the accused structures in the accused products, *see* tr. 521:2–526:13, did Bluenix’s expert witness treat the dimensions shown in figure 2 of the ’785 and ’692 patents as limiting?

The parties are invited to brief only the discrete issues requested above. The parties are not to brief other issues on review, which are adequately presented in the parties’ existing filings.

In connection with the final disposition of this investigation, the statute authorizes issuance of, *inter alia*, (1) an exclusion order that could result in the exclusion of the subject articles from entry into the United States; and/or (2) cease and desist orders that could result in the respondents being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, *see Certain Devices for*

Connecting Computers via Telephone Lines, Inv. No. 337–TA–360, USITC Pub. No. 2843, Comm’n Op. at 7–10 (Dec. 1994).

The statute requires the Commission to consider the effects of that remedy upon the public interest. The public interest factors the Commission will consider include the effect that an exclusion order and/or cease and desist orders would have on: (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve, disapprove, or take no action on the Commission’s determination. *See* Presidential Memorandum of July 21, 2005, 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

Written Submissions: The parties to the investigation are requested to file written submissions on the issues identified in this notice. Parties to the investigation, interested government agencies, and any other interested parties are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Such submissions should address the recommended determination by the CALJ on remedy and bonding.

In its initial submission, Complainant is also requested to identify the remedy sought and to submit proposed remedial orders for the Commission’s consideration. Complainant is further requested to state the dates that the Asserted Patents expire, to provide the HTSUS subheadings under which the accused products are imported, and to supply the identification information for all known importers of the products at issue in this investigation. The initial written submissions and proposed remedial orders must be filed no later than close of business on December 9, 2024. Reply submissions must be filed no later than the close of business on December 16, 2024. No further

submissions on these issues will be permitted unless otherwise ordered by the Commission. Opening submissions are limited to 75 pages. Reply submissions are limited to 60 pages. No further submissions on any of these issues will be permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. The Commission's paper filing requirements in 19 CFR 210.4(f) are currently waived. 85 FR 15798 (Mar. 19, 2020). Submissions should refer to the investigation number (Inv. No. 337-TA-1369) in a prominent place on the cover page and/or the first page. (See Handbook for Electronic Filing Procedures, https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf). Persons with questions regarding filing should contact the Secretary, (202) 205-2000.

Any person desiring to submit a document to the Commission in confidence must request confidential treatment by marking each document with a header indicating that the document contains confidential information. This marking will be deemed to satisfy the request procedure set forth in Rules 201.6(b) and 210.5(e)(2) (19 CFR 201.6(b) & 210.5(e)(2)). Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. Any non-party wishing to submit comments containing confidential information must serve those comments on the parties to the investigation pursuant to the applicable Administrative Protective Order. A redacted non-confidential version of the document must also be filed with the Commission and served on any parties to the investigation within two business days of any confidential filing. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements. All nonconfidential written

submissions will be available for public inspection on EDIS.

The Commission has also determined to extend the target date for completion of this investigation to February 13, 2025.

The Commission vote for this determination took place on November 25, 2024.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: November 25, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-750 and 731-TA-1728 (Preliminary)]

Sol Gel Alumina-Based Ceramic Abrasive Grains From China; Notice of Institution of Antidumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing duty investigation Nos. 701-TA-750 and 731-TA-1728 (Preliminary) pursuant to the Tariff Act of 1930 ("the Act") to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of sol gel alumina-based ceramic abrasive grains from China, provided for in subheading 2818.10.20 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Government of China. Unless the Department of Commerce ("Commerce") extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by January 9, 2025.

The Commission's views must be transmitted to Commerce within five business days thereafter, or by January 16, 2025.

DATES: November 25, 2024.

FOR FURTHER INFORMATION CONTACT:

Keysha Martinez ((202) 205-2136), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to petitions filed on November 25, 2024, by Saint-Gobain Ceramics & Plastics, Inc., Malvern, Pennsylvania.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons (other than petitioners) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the

Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Office of Investigations will hold a staff conference in connection with the preliminary phase of these investigations beginning at 9:30 a.m. on Monday, December 16, 2024. Requests to appear at the conference should be emailed to preliminaryconferences@usitc.gov (DO NOT FILE ON EDIS) on or before Thursday, December 12, 2024. Please provide an email address for each conference participant in the email. Information on conference procedures, format, and participation, including guidance for requests to appear as a witness via videoconference, will be available on the Commission's Public Calendar (Calendar (USITC) | United States International Trade Commission). A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before 5:15 p.m. on December 19, 2024, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than 4:00 p.m. on December 13, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,

elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Issued: November 25, 2024.

Lisa Barton,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–610 and 731–TA–1425 and 1427 (Review)]

Refillable Stainless Steel Kegs From China and Mexico; Notice of Termination of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission instituted the subject five-year reviews on September 3, 2024 to determine whether revocation of the countervailing duty

order on refillable stainless steel kegs from China and the antidumping duty orders on refillable stainless steel kegs from China and Mexico would be likely to lead to continuation or recurrence of material injury. On November 21, 2024, the Department of Commerce published a notice in the **Federal Register** that it was revoking the order on Mexico effective October 10, 2024, and the orders on China effective December 16, 2024, because no domestic interested party filed a timely notice of intent to participate. Accordingly, the subject reviews are terminated.

DATES: October 10, 2024 and December 16, 2024.

FOR FURTHER INFORMATION CONTACT:

Alexis Yim (202–708–1446), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

Authority: These reviews are being terminated under authority of title VII of the Tariff Act of 1930 and pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)). This notice is published pursuant to section 207.69 of the Commission's rules (19 CFR 207.69).

By order of the Commission.

Issued: November 25, 2024.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Antitrust Division

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Z-Wave Alliance, Inc.

Notice is hereby given that, on October 4, 2024, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (the “Act”), Z-Wave Alliance, Inc. (the “Joint Venture”) filed written notifications simultaneously

with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Specifically, Wesco International/ General Lock, Pittsburgh, PA; Natur-IT Kft, Budapest, HUNGARY; DECH-X Aps, Roennede, DENMARK; Sercomm Corporation, Taipei City, TAIWAN; Gentex Corporation, Zeeland, MI; TechniSat Digital GmbH, Daun, GERMANY; Sustainable Architecture LLC, Westminster, CO; Protek Security Systems, Warwick, RI; Philio Technology Corporation, New Taipei City, TAIWAN; Joshua Gogo (Keyano College), Fort McMurray, CANADA; and EUROtronic Technology GmbH, Steinau, GERMANY have joined as parties to the venture.

Also, Golden Mark (HK) Limited, Tsim Sha Tsui, Kowloon, HONG KONG; Lexi Devices, Inc., Oslo, NORWAY; and ComfortClick d.o.o., Ljubljana, SLOVENIA have withdrawn as parties to the venture.

Also, the following each joined as parties to the venture on the corresponding date indicated, were inadvertently not included in the applicable notice filings, and have withdrawn as parties to the venture: Net Vision Communications, LLC, Singapore, SINGAPORE (7-14-2022); Solutions for IoT LLC, Mendham, NJ (1-1-2023); Exegin Technologies Limited, Port Coguitlam, CANADA (5-6-2023); and FPT Software, Hanoi City, VIETNAM (7-20-23).

No other changes have been made in either the membership or the planned activity of the venture. Membership in this venture remains open, and the Joint Venture intends to file additional written notifications disclosing all changes in membership.

On November 19, 2020, the Joint Venture filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on December 1, 2020 (85 FR 77241).

The last notification was filed with the Department on July 15, 2024. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on October 11, 2024 (89 FR 82628).

Suzanne Morris,
Deputy Director Civil Enforcement Operations, Antitrust Division.

BILLING CODE 4410-11-P

DEPARTMENT OF JUSTICE

Antitrust Division

Notice Pursuant To the National Cooperative Research and Production Act of 1993—Medical CBRN Defense Consortium

Notice is hereby given that, on October 2, 2024, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), Medical CBRN Defense Consortium ("MCDC") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, AIVOT Robotics, Inc., Seattle, WA; Appili Therapeutics USA, Inc., Frederick, MD; READDI, Inc., Chapel Hill, NC; Scorpius BioManufacturing, Inc., San Antonio, TX; Shionogi, Florham Park, NJ; and VeriSIM, Inc., San Francisco, CA, have been added as parties to this venture.

Also, QuickSilver Analytics, Inc., Hampstead, NC; and World Wide Technology, LLC, St. Louis, MO have withdrawn as parties to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and MCDC intends to file additional written notifications disclosing all changes in membership.

On November 13, 2015, MCDC filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on January 6, 2016 (81 FR 513).

The last notification was filed with the Department on July 2, 2024. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on September 26, 2024 (89 FR 78901).

Suzanne Morris,
Deputy Director Civil Enforcement Operations, Antitrust Division.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Mobile Satellite Services Association

Notice is hereby given that, on October 3, 2024, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), Mobile Satellite Services Association ("MSSA") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Specifically, Apex Technology, Inc., Los Angeles, CA; and Ericsson AB, Stockholm, SWEDEN, have been added as parties to this venture.

No other changes have been made in either the membership or the planned activity of the venture. Membership in MSSA remains open, and MSSA intends to file additional written notifications disclosing all changes in membership.

On April 26, 2024, the Joint Venture filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on June 21, 2024 (89 FR 52089).

The last notification was filed with the Department on July 23, 2024. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on October 11, 2024 (89 FR 82634).

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Countering Weapons of Mass Destruction

Notice is hereby given that, on October 1, 2024, pursuant to section 6(a) of the National Cooperative Research

and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (“the Act”), Countering Weapons of Mass Destruction (“CWMD”) has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, AIVOT Robotics, Inc., Seattle, WA; APL Engineered Materials, Inc., Urbana, IL; HELM Innovations LLC, McLean, VA; Obsidian Solutions Group LLC, Fredericksburg, VA; and Symbiosis.io LLC, Smyrna, GA, have been added as parties to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and CWMD intends to file additional written notifications disclosing all changes in membership.

On January 31, 2018, CWMD filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on March 12, 2018 (83 FR 10750).

The last notification was filed with the Department on July 1, 2024. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on September 26, 2024 (89 FR 78903).

[OMB Number 1122-0012]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension of a Previously Approved Collection; Semi Annual Progress Report for Education, Training and Enhanced Services To End Violence Against Abuse of Women With Disabilities Grant Program (Disability Grant Program)

AGENCY: Office on Violence Against Women, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Office on Violence Against Women, Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until January 31, 2025.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Catherine Poston, Office on Violence Against Women, at 202-514-5430 or Catherine.poston@usdoj.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the

public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Abstract: The Grants for Training and Services to End Violence Against Individuals with Disabilities and Deaf People Program (Disability Grant Program) seeks to create sustainable change within and between organizations that improves the response to individuals with disabilities and Deaf individuals who are victims of sexual assault, domestic violence, dating violence, and stalking and to hold perpetrators of such crimes accountable. The program was created by Congress to address the pressing need to focus on sexual assault, domestic violence, dating violence, and stalking against individuals with disabilities and Deaf individuals due to the proliferation of such crimes.

Disability Grant Program funds are used to establish and strengthen multidisciplinary collaborative relationships; increase organizational capacity to provide accessible, safe, and effective services to individuals with disabilities and Deaf individuals who are victims of violence and abuse; identify needs within the grantee’s organization and/or service area; and develop a plan to address those identified needs that builds a strong foundation for future work.

Eligible applicants are limited to: States; units of local government; Indian Tribal governments or Tribal organizations; and victim service providers, such as State or Tribal domestic violence or sexual assault coalitions or nonprofit,

nongovernmental organizations serving individuals with disabilities.

Overview of This Information Collection

1. Type of Information Collection: Extension of a previously approved collection.
2. The Title of the Form/Collection: Semi annual Progress Report for Education, Training and Enhanced Services to End Violence Against and Abuse of Women with Disabilities Grant Program.
3. The agency form number, if any, and the applicable component of the Department sponsoring the collection: 1122–0012.
4. Affected public who will be asked or required to respond, as well as the obligation to respond: The affected public includes the approximately 18 grantees of the Disability Grant Program. Grantees include States, units of local

- government, Indian Tribal governments or Tribal organizations and non-governmental private organizations. The goal of this program is to build the capacity of such jurisdictions to address such violence against individuals with disabilities through the creation of multi-disciplinary teams. Disability Grant Program recipients will provide training, consultation, and information on domestic violence, dating violence, stalking, and sexual assault against individuals with disabilities and enhance direct services to such individuals.
5. An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: It is estimated that it will take the approximately 18 respondents (grantees from the Disability Grant Program) approximately one hour to complete a semi-annual progress report. The semi-annual progress report is

- divided into sections that pertain to the different types of grantee activities.
6. An estimate of the total annual burden (in hours) associated with the collection: The total annual hour burden to complete the data collection forms is 36 hours, that is 18 grantees completing a form twice a year with an estimated completion time for the form being one hour.
7. The total annual hour burden to complete the data collection forms is 36 hours, that is 18 grantees completing a form twice a year with an estimated completion time for the form being one hour.
8. An estimate of the total annual cost burden associated with the collection, if applicable: The annualized costs to the Federal Government resulting from the OVW staff review of the progress reports submitted by grantees are estimated to be \$2016.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency semiannually	Total annual responses	Time per response (hours)	Total annual burden (hours)
Progress Report Form	18	2	36	1	36
Unduplicated Totals	18		36		36

Abstract: The Office on Violence Against Women (OVW) administers financial support and technical assistance to communities around the country that are creating programs, policies, and practices aimed at ending domestic violence, dating violence, sexual assault and stalking. Its mission is to provide national leadership to improve the Nation’s response to these crimes through the implementation of the Violence Against Women Act of 1994 (VAWA) as amended and reauthorized in 2000, 2005, 2013 and 2022. OVW pursues this mission by supporting community efforts, enhancing education and training, disseminating best practices, launching

special initiatives, and leading the Nation's efforts to end violence against women.

Currently, OVW administers discretionary grant programs and formula grant programs, all of which were established under VAWA and subsequent legislation. Since its inception in 1995, OVW has awarded billions in grant funding and cooperative agreements and has launched a multifaceted approach to implementing VAWA. These grant programs are designed to develop the nation's capacity to reduce domestic violence, dating violence, sexual assault, and stalking by strengthening services to victims and holding offenders accountable for their action. OVW posts notice of funding opportunities (NOFO) (previously referred to as solicitations), closes NOFO periods, performs initial internal reviews, conducts peer reviews, makes funding decisions and ultimately makes awards on a staggered basis by grant program according to a master calendar that ensures that grant awards are made in a timely manner in a specific fiscal year. The date of the posting of a NOFO is set by working backwards from the date that OVW is required to award grant funds.

OVW developed a NOFO template and an accompanying NOFO Guide to assist potential grantees in applying for current OVW programs. The NOFO template ensures that all applicants to OVW grant programs will be asked to provide uniform information in a consistent manner. The information addressed in the template includes: Application for Federal Assistance; Summary Data Sheet; Proposal Abstract; Summary of Other Federal Funding; Proposal Narrative; Budget Worksheet and Narrative; Memorandum of Understanding (MOU); Letter of Nonsupplanting; Financial Capability Questionnaire; and Indirect Cost Rate Agreement and additional items. Each NOFO is tailored to address the specific OVW grant program so that

identification of eligible applicants, availability of funds, award period, award amount, program scope, activities that may compromise victim safety and recovery or undermine offender accountability and unallowable activities will be consistent with the statutory requirements and funding amounts authorized for each particular grant program.

The purpose of the NOFO template is to provide a framework to develop program-specific announcements soliciting applications for funding. A program NOFO outlines the specifics of the funding program; describes the requirements for eligibility; instructs an applicant on the necessary components of an application under a specific program (e.g. project activities and timeline, proposed budget); and provides registration dates, due dates, and instructions on how to apply within the designated application system.

Overview of This Information Collection

1. *Type of Information Collection:*

Extension of a previously approved collection.

2. *The Title of the Form/Collection:*

OVW Notice of Funding Opportunity Template.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* 1122-0020.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* The affected public includes applicants to OVW grant programs authorized under the Violence Against Women Act of 1994 as amended. These include States, territories, Tribes or units of local government, institutions of higher education including colleges and universities, Tribal organizations, Federal, State, Tribal, territorial or local courts or court-based programs, State sexual assault coalitions, State domestic violence coalitions; territorial domestic violence or sexual assault coalitions, Tribal coalitions, community-based

organizations, and non-profit, nongovernmental organizations. The purpose of the NOFO template is to provide a framework to develop program-specific announcements soliciting applications for funding. A program NOFO outlines the specifics of the funding program; describes the requirements for eligibility; instructs an applicant on the necessary components of an application under a specific program (e.g., project activities and timeline, proposed budget); and provides registration dates, due dates, and instructions on how to apply within the designated application system.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that information will be collect annually from the approximately 1,800 respondents (applicants to the OVW grant programs). The public reporting burden for this collection of information is estimated at up to 30 hours per application. The 30-hour estimate is based on the amount of time to prepare a narrative, budget and other materials for the application and, if required, to coordinate with and develop a memorandum of understanding with requisite project partners.

6. *An estimate of the total annual burden (in hours) associated with the collection:* The total annual hour burden to complete the data collection forms is 54,000 hours, that is 1,800 applicants completing an application for funding which is estimated to take 30 hours.

7. The total annual hour burden to complete the data collection forms is 54,000 hours, that is 1,800 applicants completing a form twice a year with an estimated completion time for the form being 30 hours.

8. *An estimate of the total annual cost burden associated with the collection, if applicable:* The annualized costs to the Federal Government resulting from the OVW staff review of the progress reports submitted by grantees are estimated to be \$201,600.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency (semiannually)	Total annual responses	Time per response (hours)	Total annual burden (hours)
Progress Report Form	1,800	2	1,800	30	54,000
Unduplicated Totals	1,800		1,800		54,000

Previously Approved Collection;
Semiannual Progress Report for
Enhanced Training and Services To
End Abuse in Later Life Program
(Abuse in Later Life Program)**

AGENCY: Office on Violence Against
Women, Department of Justice.
ACTION: 60-Day notice.

SUMMARY: The Office on Violence
Against Women, Department of Justice
(DOJ), will be submitting the following
information collection request to the
Office of Management and Budget
(OMB) for review and approval in
accordance with the Paperwork
Reduction Act of 1995.

DATES: Comments are encouraged and
will be accepted for 60 days until
January 31, 2025.

FOR FURTHER INFORMATION CONTACT: If
you have additional comments
especially on the estimated public
burden or associated response time,
suggestions, or need a copy of the
proposed information collection
instrument with instructions or
additional information, please contact
Catherine Poston, Office on Violence
Against Women, at 202–514–5430 or
Catherine.poston@usdoj.gov.

SUPPLEMENTARY INFORMATION: Written
comments and suggestions from the
public and affected agencies concerning
the proposed collection of information
are encouraged. Your comments should
address one or more of the following
four points:

—Evaluate whether the proposed
collection of information is necessary
for the proper performance of the
functions of the Bureau of Justice

Statistics, including whether the
information will have practical utility;
—Evaluate the accuracy of the agency’s
estimate of the burden of the
proposed collection of information,
including the validity of the
methodology and assumptions used;
—Evaluate whether and if so how the
quality, utility, and clarity of the
information to be collected can be
enhanced; and
—Minimize the burden of the collection
of information on those who are to
respond, including through the use of
appropriate automated, electronic,
mechanical, or other technological
collection techniques or other forms
of information technology, *e.g.*,
permitting electronic submission of
responses.

Abstract: The Abuse in Later Life
Program funds projects that support a
comprehensive approach to addressing
elder abuse in their communities. These
projects provide training to criminal
justice professionals to enhance their
ability to address elder abuse, neglect,
and exploitation; provide cross-training
opportunities to professionals working
with older victims; establish or support
a coordinated community response to
elder abuse; and provide or enhance
services for victims who are 50 years of
age or older. Eligible applicants are
limited to: States, units of local
government, Tribal governments or
Tribal organizations, population specific
organizations with demonstrated
experience in assisting individuals over
50 years of age, victim service providers
with demonstrated experience in
addressing domestic violence, dating
violence, sexual assault, and stalking,
and State, Tribal, or territorial domestic
violence or sexual assault coalitions.

**Overview of This Information
Collection**

1. *Type of Information Collection:*
Extension of a previously approved
collection.
2. *The Title of the Form/Collection:*
Semiannual Progress Report for
Enhanced Training and Services to End
Abuse in Later Life Program.
3. *The agency form number, if any,
and the applicable component of the
Department sponsoring the collection:*
1122–0008.

4. *Affected public who will be asked
or required to respond, as well as the
obligation to respond:* Grantees from the
Abuse in Later Life Program. The
affected public includes the
approximately 15 grantees of the Abuse
in Later Life Program. Abuse in Later
Life Program grants may be used for
training programs to assist law
enforcement officers, prosecutors, and
relevant officers of Federal, State,
Tribal, and local courts in recognizing,
addressing, investigating, and
prosecuting instances of elder abuse,
neglect, and exploitation and violence
against individuals with disabilities,
including domestic violence and sexual
assault, against older or disabled
individuals. Grantees fund projects that
focus on providing training for criminal
justice professionals to enhance their
ability to address elder abuse, neglect
and exploitation in their communities
and enhanced services to address these
crimes.

5. *An estimate of the total number of
respondents and the amount of time
estimated for an average respondent to
respond:* It is estimated that it will take
the approximately 15 respondents
(grantees from the Abuse in Later Life
Program) approximately one hour to
complete a semi-annual progress report.
The semi-annual progress report is
divided into sections that pertain to the
different types of grantee activities.

6. An estimate of the total annual
burden (in hours) associated with the
collection: The total annual hour burden
to complete the data collection forms is
30 hours, that is 15 grantees completing
a form twice a year with an estimated
completion time for the form being one
hour.

7. The total annual hour burden to
complete the data collection forms is 30
hours, that is 15 grantees completing a
form twice a year with an estimated
completion time for the form being one
hour.

8. *An estimate of the total annual cost
burden associated with the collection, if
applicable:* The annualized costs to the
Federal Government resulting from the
OVW staff review of the progress reports
submitted by grantees are estimated to
be \$2016.

Agency Information Collection Activities; Proposed eCollection eComments Requested; Revision of a Currently Approved Collection: Survey of State Criminal History Information Systems (SSCHIS)

AGENCY: Bureau of Justice Statistics, Office of Justice Programs, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Office of Justice Programs, Bureau of Justice Statistics, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until January 2, 2025.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Devon Adams, Deputy Director, Bureau of Justice Statistics, 999 N Capitol St. NE, Washington, DC 20531 (email: devon.adams@usdoj.gov; telephone: 202–305–0765).

SUPPLEMENTARY INFORMATION: The proposed information was previously published in the **Federal Register** allowing for both a 60-day (88 FR 17017,

March 31, 2023) and 30-day (88 FR 35929, June 1, 2023) comment period. The Bureau of Justice Statistics received no comments during the comment period. This 30-day notice is being published to announce a substantive change to the collection. BJS is conducting this survey again for year-end 2024.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the information collection or the OMB Control Number 1121–0312. This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3)

years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a currently approved collection.

(2) *The Title of the Form/Collection:* Survey of State Criminal History Information Systems (SSCHIS), 2024.

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form number is N/A. The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Affected Public: State, Local and Tribal governments. Abstract: The SSCHIS report, the most comprehensive data available on the collection and maintenance of information by State criminal history record systems, describes the status of such systems and record repositories on a biennial basis. Data collected from State record repositories serves as the basis for estimating the percentage of total State records that are immediately available through the FBI's Interstate Identification Index (III), and the percentage of arrest records that include dispositions. Other data presented include the number of records maintained by each State, the percentage of automated records in the system, and the number of States participating in the National Fingerprint File and the National Crime Prevention and Privacy Compact which authorizes the interstate exchange of criminal history records for noncriminal justice purposes. The SSCHIS also contains information regarding the timeliness and completeness of data in State record systems and procedures employed to improve data quality.

(5) *Obligation to Respond:* Voluntary.

(6) *Total Estimated Number of Respondents:* 56.

(7) *Estimated Time per Respondent*: 4 hours.

(8) *Frequency*: Biennially.

(9) *Total Estimated Annual Time Burden*: 224 hours.

(10) *Total Estimated Annual Other Costs Burden*: \$84,440.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W-218, Washington, DC.

Dated: November 26, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410-18-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219-0095]

Proposed Extension of Information Collection; Explosive Materials and Blasting Units (Pertains Only to Category III Metal and Nonmetal Mines Deemed To Be Gassy)

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor (DOL), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information, in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection entitled Explosive Materials and Blasting Units (Pertains only to Category III Metal and Nonmetal Mines Deemed to be Gassy).

DATES: All comments must be received on or before January 31, 2025.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below. Please note that

late comments received after the deadline will not be considered.

• **Federal E-Rulemaking Portal:**

<https://www.regulations.gov>. Follow the on-line instructions for submitting comments for docket number MSHA-2024-0034.

• **Mail/Hand Delivery:** DOL-MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, 4th Floor West, Arlington, VA 22202-5452. Before visiting MSHA in person, call 202-693-9455 to make an appointment.

• MSHA will post all comments as well as any attachments, except for information submitted and marked as confidential, in the docket at <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: S.

Aromie Noe, Director, Office of Standards, Regulations, and Variances, MSHA, at MSHA.information.collections@dol.gov (email); (202) 693-9440 (voice); or (202) 693-9441 (facsimile). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION:

I. Background

A. Legal Authority

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act) as amended, 30 U.S.C. 813(h), authorizes the Mine Safety and Health Administration (MSHA) to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811(a), authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise, as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal, metal and nonmetal mines.

B. Information Collection

In order to fulfill the statutory mandates to promote miners' health and safety, MSHA requires the collection of information under the information collection request entitled Explosive Materials and Blasting Units (Pertains only to Category III Metal and Nonmetal Mines Deemed to be Gassy). The information collection is intended to determine whether nonapproved explosive materials and blasting units and procedures are safe for use in Category III mines.

All mines must use approved blasting units and explosives to ensure miner health and safety. If mine operators choose to use unapproved blasting units and explosives, they must obtain approval from MSHA before doing so. Under title 30 of the Code of Federal

Regulations (30 CFR) 57.22003(a) and (a)(3), mine category III applies to all underground metal and nonmetal mines and the surface mills of Subcategory I-C mines (gilsonite) in which noncombustible ore is extracted and which liberate a concentration of methane that is explosive, or is capable of forming explosive mixtures with air, or have the potential to do so based on the history of the mine or the geological area in which the mine is located. The concentration of methane in such mines is explosive or is capable of forming explosive mixtures if mixed with air at certain composition.

1. Notifying MSHA Prior to Using Nonapproved Explosive Materials and Blasting Units

Under 30 CFR 7.4 and 15, MSHA tests and approves blasting units and explosive materials as permissible for use in mines, respectively. Under 30 CFR 57.22606(a), mine operators of Category III metal and nonmetal mines must notify the appropriate MSHA District Manager of all nonapproved explosive materials and blasting units prior to their use. Explosive materials used for blasting must be approved by MSHA under 30 CFR part 15, or nonapproved explosive materials must be evaluated and determined by the District Manager to be safe for blasting in a potentially gassy environment. The notice must also include the millisecond-delay interval between successive shots and between the first and last shot in a round.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection entitled Explosive Materials and Blasting Units (Pertains only to Category III Metal and Nonmetal Mines Deemed to be Gassy). MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submission of responses.

The information collection request will be available on <https://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on <https://www.regulations.gov> and <https://www.reginfo.gov>.

The public may also examine publicly available documents at DOL-MSHA, Office of Standards, Regulations and Variances, 201 12th Street South, 4th Floor West, Arlington, VA 22202-5452. Sign in at the receptionist's desk on the 4th Floor via the West elevator. Before visiting MSHA in person, call 202-693-9455 to make an appointment.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

This information collection request concerns provisions for Explosive Materials and Blasting Units (Pertains only to Category III Metal and Nonmetal Mines Deemed to be Gassy). MSHA has updated the data with respect to the number of respondents, responses, time burden, and burden costs supporting this information collection request from the previous information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219-0095.

Affected Public: Business or other for-profit.

Number of Annual Respondents: 1.

Frequency: On occasion.

Number of Annual Responses: 1.

Annual Time Burden: 1 hours.

Annual Other Burden Costs: \$6.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the proposed information collection request; they will become a matter of public record and be available at <https://www.reginfo.gov>.

Song-ae Aromie Noe,

Certifying Officer, Mine Safety and Health Administration.

BILLING CODE 4510-43-P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA-2011-0032]

Construction Standards on Posting Emergency Telephone Numbers and Floor Load Limits; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning the proposal to extend the Office of Management and Budget's (OMB) approval of the information collection requirements specified in the Construction Standards on Posting Emergency Telephone Numbers and Maximum Safe Floor Load Limits.

DATES: Comments must be submitted (postmarked, sent, or received) by January 31, 2025.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at <https://www.regulations.gov>, which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Docket: To read or download comments or other material in the docket, go to <https://www.regulations.gov>. Documents in the docket are listed in the <https://www.regulations.gov> index; however, some information (e.g., copyrighted material) is not publicly available to read or download through the websites. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693-2350 (TTY (877) 889-5627) for assistance in locating docket submissions.

Instructions: All submissions must include the agency name and OSHA docket number (OSHA-2011-0032) for the Information Collection Request (ICR). OSHA will place all comments, including any personal information, in the public docket, which may be made available online. Therefore, OSHA cautions interested parties about submitting personal information such as social security numbers and birthdates.

For further information on submitting comments, see the "Public Participation" heading in the section of this notice titled **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT:

Seleda Perryman, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor; telephone (202) 693-2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose of these requirements is to reduce employees' risk of death and serious injury by ensuring that employment has been tested and is in safe operating condition.

Two construction standards, "Medical Services and First Aid" (section 1926.50), and "General Requirements for Storage" (section 1926.250), contain posting provisions. Paragraph (f) of section 1926.50 requires employers to conspicuously post emergency telephone numbers for physicians, hospitals, or ambulances at their worksites if 911 emergency telephone service is not locally available; in the event that a worker has a serious injury at a worksite, this posting requirement helps expedite emergency medical treatment of the worker. Paragraph (a)(2) of section 1926.250 specifies that employers must post the maximum safe load limits of floors located in storage areas inside buildings or other structures under construction, unless

the floors or slabs are on grade (sitting on the ground). This provision prohibits employers from overloading floors in areas used to store material and equipment where a structure's floors are not supported directly by the ground. This requirement is intended to prevent floor collapses which could seriously injure or kill workers.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Construction Standards on Posting Emergency Telephone Numbers and Maximum Safe Floor Load Limits. The agency is requesting an adjustment increase in burden from 55,184 to 65,283 hours, a difference of 10,099 hours. This increase is due to an increase in the number of construction sites, going from 885,922 to 937,602.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Construction Standards on Posting Emergency Telephone Numbers and Maximum Safe Floor Load Limits.

OMB Control Number: 1218-0093.

Affected Public: Business or other for-profits.

Number of Respondents: 937,602.

Number of Responses: 181,198.

Frequency of Responses: On occasion.

Average Time per Response: Varies.

Estimated Total Burden Hours: 65,283.

Estimated Cost (Operation and Maintenance): \$0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at <https://www.regulations.gov>, which is the Federal eRulemaking Portal; or (2) by facsimile (fax), if your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693-1648. All comments, attachments, and other material must identify the agency name and the OSHA docket number for the ICR (Docket No. OSHA-2011-0032). You may supplement electronic submission by uploading document files electronically.

Comments and submissions are posted without change at <https://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in the <https://www.regulations.gov> index, some information (e.g., copyrighted material) is not publicly available to read or download from this website. All submission, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the <https://www.regulations.gov> website to submit comments and access the docket is available at the website's "User Tips" link.

Contact the OSHA Docket Office at (202) 693-2350, (TTY) (877) 889-5627 for information about materials not available from the website, and for assistance in using the internet to locate docket submissions.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 8-2020 (85 FR 58393).

Signed at Washington, DC, on November 22, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2024-28055 Filed 11-29-24; 8:45 am]

BILLING CODE 4510-26-P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Notice of Proposed Information Collection Requests: Studies To Support Institute of Museum and Library Services' Learning Agendas for Libraries and Museums

AGENCY: Institute of Museum and Library Services, National Foundation on the Arts and the Humanities.

ACTION: Notice, request for comments, collection of information.

SUMMARY: The Institute of Museum and Library Services (IMLS), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act. This pre-clearance consultation program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The purpose of this Notice is to solicit comments about the proposed data collection for "Studies to Support IMLS's Learning Agendas for Libraries and Museums." A copy of the proposed information collection request can be obtained using the contact information listed below in the **ADDRESSES** section of this Notice.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section below on or before January 02, 2025.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be sent within 30 days of publication of this Notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection request by selecting "Institute of Museum and Library Services" under "Currently Under Review;" then check "Only Show ICR for Public Comment" checkbox. Once you have found this information collection request, select "Comment," and enter or upload your comment and information. Alternatively, please mail your written comments to Office of Information and Regulatory Affairs, Attn.: OMB Desk Officer for Education, Office of Management and Budget,

Room 10235, Washington, DC 20503, or call (202) 395-7316.

OMB is particularly interested in comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submission of responses).

FOR FURTHER INFORMATION CONTACT: Lisa Hechtman, Ph.D., Social Science Research Analyst, Office of Research and Evaluation, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW, Suite 4000, Washington DC 20024-2135. Dr. Hechtman can be reached by telephone at 202-653-4724, or by email at lhechtman@imls.gov. Persons who are deaf or hard of hearing (TTY users) can contact IMLS at 202-207-7858 via 711 for TTY-Based Telecommunications Relay Service.

SUPPLEMENTARY INFORMATION: The Institute of Museum and Library Services is the primary source of Federal support for the nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant making, research, and policy development. To learn more, visit www.imls.gov.

Current Actions: This notice proposes the clearance of information collection instruments that support IMLS's Learning Agenda for Libraries and Museums. The 60-day notice was published in the **Federal Register** on May 22, 2024 (89 FR 45029) (Document Number 2024-11217). IMLS received and responded to one comment requesting a copy of the proposed information collection and expressing interest in providing input. IMLS provided a summary of the research plan, planned activities, and study design.

Agency: Institute of Museum and Library Services.

Title: Studies to Support IMLS's Learning Agendas for Libraries and Museums.

OMB Control Number: 3137-NEW.

Agency Number: 3137.

Respondents/Affected Public:

Museum staff, library staff, IMLS awardees, library community partners.

Total Number of Annual

Respondents: 234.

Frequency of Response: Once per request.

Average Hours/Minutes per Response: 59 minutes.

Total Estimated Annual Burden Hours: 230.

Total Annual Cost Burden (dollars): \$8,397.19.

Total Annual Federal Cost (dollars): \$202,582.68.

Dated: November 26, 2024.

Suzanne Mbollo,

Grants Management Specialist, Institute of Museum and Library Services.

BILLING CODE 7036-01-P

NATIONAL SCIENCE FOUNDATION

Sunshine Act Meetings

The National Science Board's Committee on Awards and Facilities (A&F) hereby gives notice of the scheduling of meetings for the transaction of National Science Board business pursuant to the National Science Foundation Act and the Government in the Sunshine Act.

TIME AND DATE: The A&F meeting session will be held on Tuesday, December 3, 2024. The open session will be from 2:00 p.m.-3:00 p.m. The closed session will be from 3:00 p.m.-5:00 p.m.

PLACE: The meetings will be held at NSF headquarters, 2145 Eisenhower Ave., Alexandria, VA 22314, and by videoconference.

STATUS: One session is open, and one session is closed.

MATTERS TO BE CONSIDERED:

A&F open session agenda: Opening Remarks Regarding the Agenda; Discussion and Vote on Provisional Resolution related to Antarctic Science and Engineering Support Contract Update; Information Item: Indigenous Community Engagement.

A&F closed session agenda: Opening Remarks; Information Item: Annual Report of the Chief Officer for Research Facilities; Information Item: Briefing on U.S. Extremely Large Telescope Program Report from the External Panel.

CONTACT PERSON FOR MORE INFORMATION: Point of contact for this meeting is:

Michelle McCrackin, mmccrack@nsf.gov, (703) 292-7000. Members of the public can observe the public portion of this meeting through a YouTube livestream, which may be found at www.nsf.gov/nsb.

Ann E. Bushmiller,

Senior Legal Counsel to the National Science Board.

BILLING CODE 7555-01-P

NATIONAL SCIENCE FOUNDATION

Notice of Intent To Seek Approval To Establish an Information Collection

AGENCY: National Science Foundation.

ACTION: Notice and request for comments.

SUMMARY: Under the Paperwork Reduction Act of 1995, and as part of its continuing effort to reduce paperwork and respondent burden, the National Science Foundation (NSF) is inviting the general public or other Federal

agencies to comment on this proposed continuing information collection.

DATES: Written comments on this notice must be received by January 31, 2025 to be assured consideration. Comments received after that date will be considered to the extent practicable. Send comments to address below.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Suite E6300, Alexandria, Virginia 22314; telephone (703) 292-7556; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including Federal holidays).

SUPPLEMENTARY INFORMATION:

Comments: Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Foundation, including whether the information will have practical utility; (b) the accuracy of the Foundation's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology.

Title of Collection: 2026 U.S. NSF Integrated Data and Evidence Maturity and Capacity (IDEMC) Assessment.

OMB Number: 3145-NEW.

Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to establish an information collection.

Abstract: The "2026 NSF Integrated Data and Evidence Maturity and Capacity (IDEMC) Assessment" encompasses planning, execution, and reporting to evaluate NSF's data and evidence capabilities. Conducted periodically, this assessment supports compliance with the Foundations for Evidence-Based Policymaking Act (Evidence Act) and promotes continuous improvement in evidence-based decision-making. Building on the 2022 baseline assessment, the 2026 IDEMC Assessment will refine the evaluation framework to align with updated Office of Management and Budget (OMB) guidance.

The project will assess strengths, gaps, and opportunities across NSF's evidence and data capabilities by:

1. Conducting a review of agency artifacts;
2. Administering a survey to all NSF staff;
3. Organizing focus groups and individual interviews; and
4. Deploying interactive, real-time dashboards for decision-making.

The findings will be summarized in detailed reports and data briefs, offering actionable insights to enhance evidence capacity, maturity of foundational capabilities, and a culture of continuous learning and innovation. Additionally, the project will deliver a repeatable methodology, tools, and templates to support NSF in independently conducting the IDEMC Assessment in future years, if desired.

Expected Respondents: A census survey will be distributed to all 1,600 NSF staff, with a response burden of 30 minutes per respondent. Focus groups and interviews will be conducted with representative subsets of the population. Based on NSF's workforce size, approximately 10 focus groups (each with 6-8 participants, totaling ~70 participants) and 30 interviews will be conducted to ensure a range of perspectives and sufficient qualitative data.

Estimate of Burden: The overall annualized cost to the respondents is estimated to be \$46,750. The following table shows the estimated burden and costs to respondents:

Collection title	Total number of respondents	Burden hours per respondent	Total hour burden	Average hourly rate	Estimated annual cost
Census Survey	1,600	0.5	800	\$50	\$40,000
Focus Groups	70	1.5	105	50	5,250
Interviews	30	1	30	50	1,500
Total	1,700		935		46,750

Justification for \$50/hour Average Rate: The estimated average hourly rate of \$50 reflects data from the Bureau of Labor Statistics (BLS) and Office of Personnel Management (OPM). Comparable Federal roles, such as "Management Analysts," have an average hourly rate of approximately \$50 (BLS, May 2022 National Occupational Employment and Wage Estimates). Additionally, General Schedule (GS) rates for GS-12 and GS-13 employees, typical of NSF staff roles, average around \$50/hour when factoring in locality adjustments for the Washington, DC area.

Use of the Information: Aggregate findings will inform NSF's strategic planning, management, and evaluation efforts. Reports summarizing the results will support compliance with Evidence Act requirements and enhance NSF's

capacity for evidence-based decision-making.

Dated: November 25, 2024.

Suzanne H. Plimpton,
Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-P

NATIONAL SCIENCE FOUNDATION

Sunshine Act Meetings

The National Science Board (NSB) hereby gives notice of the scheduling of meetings for the transaction of National Science Board business pursuant to the National Science Foundation Act and the Government in the Sunshine Act.

TIME AND DATE: Wednesday, December 3, 2024, from 8:45 a.m.-5:25 p.m. and

Thursday, December 5, 2024, from 9:00 a.m.-2:25 p.m. Eastern.

PLACE: These meetings will be held at NSF headquarters, 2415 Eisenhower Avenue, Alexandria, VA 22314, and by videoconference. All open sessions of the meeting will be webcast live on the NSB YouTube channel.

December 4, 2024: <https://youtube.com/live/auhWaHXqe9w?feature=share>

December 5, 2024: <https://youtube.com/live/3yUcMZ2hsU0?feature=share>

STATUS: Parts of these meetings will be open to the public. The rest of the meetings will be closed to the public. See the full description below.

MATTERS TO BE CONSIDERED:

Wednesday, December 4, 2024*Plenary Board meeting*

Open Session: 10:00 a.m.–1:05 p.m.

- NSB Chair's Opening Remarks
 - Welcome and Agenda Preview
 - NSB Swearing-in Ceremony
- NSF Director's Presentation on Multi-sector Partnerships and Investments
 - Taking stock of NSF's progress to date
- NSB External Panel—*Vision for American Science and Technology/ Science & Technology Action Committee*
 - Panelists: France Cordova, President of the Science Philanthropy Alliance, 14th Director of the NSF
 - Monica Dus, Associate Professor in the Department of Molecular, Cellular, and Developmental Biology, University of Michigan
 - Darío Gil, NSB Chair
 - Marcia McNutt, President of the National Academy of Sciences
 - Sudip Parikh, American Association for the Advance of Science, Chief Executive Officer and Executive Publisher of Science Journals
- NSB External Panel—*A New National Defense Education Act for a Changed Landscape*
 - Panelists: Maria Klawe, President of Math for America
 - Tsu-Jae King Liu, Dean of the UC Berkeley College of Engineering
 - Nick Moore, Director of Governor's Office of Education and Workforce Transformation, State of Alabama

Plenary Board Meeting

Open Session: 1:50 p.m.–3:00 p.m.

- Approval of July 2024 Open Meeting Minutes
- NSB Committee Reports
 - Committee on Strategy
 - Development of NSF's 2026–2030 Strategic Plan and Learning Agenda
 - Committee on External Engagement
 - NSF 75th Anniversary Planning
 - Committee on National Science and Engineering Policy
 - *Science & Engineering Indicators 2026*
- NSF Director's Remarks
 - Engagement, Updates, and Senior Staff introductions

Plenary Board Meeting

Closed Session: 3:00 p.m.–4:00 p.m.

- Strategic-Level Thinking and Discussion about the NSF Budget

Thursday, December 5, 2024*Plenary Board Meeting*

Open Session: 9:00 a.m.–11:10 a.m.

- NSB Chair's Welcome
- NSB External Panel—*The Center for Strategic and International Studies, Institution Building as it Relates to Multi-sectoral Partnerships and Investments*
 - Panelists: Erica Fuchs, Professor, Department of Engineering and Public Policy, Carnegie Mellon University
 - Navin Girishankar, President of the Economic Security and Technology Department at the CSIS
 - Andrew Reamer, Research Professor at the George Washington University, Institute for Public Policy
- Commission Reports
- Committee on Awards & Facilities
- Indigenous community engagement
- Antarctic Engineering and Science Support Contract—Discussion and vote on resolution
- NSB–NSF Commission on Merit Review
- High-level summary of activities

Plenary Board Meeting

Closed Session: 11:10 a.m.–12:45 p.m.

- NSB Chair's Remarks and Welcome
 - Approval of closed meeting minutes July and September 2024
- NSF Director's Remarks
 - Agency Operations updates
- Committee Reports
 - NSB–NSF Commission on Merit Review
 - Presentation and discussion of final recommendations and guidance
 - Committee on Awards & Facilities
 - Annual Report of the Chief Officer for Research Facilities
 - U.S. Extremely Large Telescope report
- Vote to enter Executive Plenary Closed Session

Executive Closed Session: 1:30 p.m.–2:25 p.m.

- NSB Chair's Remarks and Welcome
 - Approval of May 2024 Executive Plenary Closed Minutes
- NSB honorary Awards—Discussion and Vote
 - 2025 Vannevar Bush and Science and Society Awards
- NSB Chair's closing remarks

Plenary Meeting Adjourns: 2:25 p.m.

Portions Open to the Public

Wednesday, December 4, 2024

10:00 a.m.–1:05 p.m. Plenary NSB
1:50 p.m.–3:00 p.m. Plenary NSB

Thursday, December 5, 2024

9:00 a.m.–11:10 a.m. Plenary NSB

Portions Closed to the Public

Wednesday, December 4, 2024

3:00 p.m.–4:00 p.m. Plenary NSB

Thursday, July 25, 2024

11:10 a.m.–12:45 p.m. Plenary NSB

1:30 p.m.–2:25 p.m. Executive Plenary closed

Members of the public are advised that the NSB provides some flexibility around start and end times. A session may be allowed to run over by as much as 15 minutes if the Chair decides the extra time is warranted. The next session will start no later than 15 minutes after the noticed start time. If a session ends early, the next meeting may start up to 15 minutes earlier than the noticed start time. Sessions will not vary from the times noticed by more than 15 minutes.

CONTACT PERSON FOR MORE INFORMATION:

The NSB Office contact is Christopher Blair, cblair@nsf.gov, 703–292–7000. The NSB Public Affairs contact is Nadine Lymn, nlymn@nsf.gov, 703–292–2490. Please refer to the NSB website for additional information: <https://www.nsf.gov/nsb>.

Ann E. Bushmiller,

Senior Legal Counsel to the National Science Board.

OFFICE OF PERSONNEL MANAGEMENT

Federal Prevailing Rate Advisory Committee Virtual Public Meeting

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: According to the provisions of section 10 of the Federal Advisory Committee Act, notice is hereby given that a virtual meeting of the Federal Prevailing Rate Advisory Committee will be held on Thursday, December 19, 2024. There will be no in-person gathering for this meeting.

DATES: The virtual meeting will be held on December 19, 2024, beginning at 10 a.m. (ET).

ADDRESSES: The meeting will convene virtually.

FOR FURTHER INFORMATION CONTACT: Ana Paunoiu, 202-606-2858, or email paypolicy@opm.gov.

SUPPLEMENTARY INFORMATION: The Federal Prevailing Rate Advisory Committee is composed of a Chair, five representatives from labor unions holding exclusive bargaining rights for Federal prevailing rate employees, and five representatives from Federal agencies. Entitlement to membership on the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the Prevailing Rate System and other matters pertinent to establishing prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Office of Personnel Management.

Annually, the Chair compiles a report of pay issues discussed and concluded recommendations. These reports are available to the public. Reports for calendar years 2008 to 2023 are posted at <https://www.opm.gov/fprac>. Previous reports are also available, upon written request to the Committee.

The public is invited to submit material in writing to the Chair on Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information on these meetings may be obtained by contacting the Committee at Office of Personnel Management, Federal Prevailing Rate Advisory Committee, Room 7H31, 1900 E Street NW, Washington, DC 20415, (202) 606-2858.

This meeting is open to the public, with an audio option for listening. This notice sets forth the participation guidelines for the meeting.

Meeting Agenda. The committee meets to discuss various agenda items

related to the determination of prevailing wage rates for the Federal Wage System. The committee's agenda is approved one week prior to the public meeting and will be available upon request at that time.

Public Participation: The December 19, 2024, meeting of the Federal Prevailing Rate Advisory Committee is open to the public through advance registration. Public participation is available for the meeting. All individuals who plan to attend the virtual public meeting to listen must register by sending an email to paypolicy@opm.gov with the subject line "December 19, 2024" no later than Tuesday, December 17, 2024.

The following information must be provided when registering:

- Name.
- Agency and duty station.
- Email address.
- Your topic of interest.

Members of the press, in addition to registering for this event, must also RSVP to media@opm.gov by December 17, 2024.

A confirmation email will be sent upon receipt of the registration. Audio teleconference information for participation will be sent to registrants the morning of the virtual meeting.

Office of Personnel Management.

Kayyonne Marston,
Federal Register Liaison.

BILLING CODE 6325-39-P

POSTAL REGULATORY COMMISSION

[Docket No. CP2025-1; Order No. 8131]

Competitive Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is recognizing a recently filed Postal Service document with the Commission concerning changes in rates of general applicability for Competitive products. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 13, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <https://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT:

David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:**Table of Contents**

- I. Introduction
- II. Summary of Changes
- III. Initial Administrative Actions
- IV. Ordering Paragraphs

I. Introduction

On November 15, 2024, the Postal Service filed notice with the Commission concerning changes in rates and classifications of general applicability for Competitive products.¹ The Postal Service represents that, as required by 39 CFR 3035.102(b) and 39 CFR 3035.104(b), the Notice includes an explanation and justification for the changes, the effective date, and a schedule of the changed rates. Notice at 1. The changes are scheduled to take effect on January 19, 2025. *Id.*

Attached to the Notice is Governors' Decision No. 24-7, which states the new prices are in accordance with 39 U.S.C. 3632 and 3633 and 39 CFR 3035.102-104.² The Governors' Decision provides an analysis of the Competitive products' price and classification changes intended to demonstrate that the changes comply with 39 U.S.C. 3633 and 39 CFR part 3035. Governors' Decision No. 24-7 at 1. The Attachment to the Governors' Decision No. 24-7 sets forth the classification and price changes and includes draft Mail Classification Schedule (MCS) language for Competitive products of general applicability.

In addition, the Notice includes a non-public annex showing FY 2025 projected volumes, revenues, attributable costs, contribution, and cost coverage for each product. *See* Notice at 1. The Postal Service also filed supporting forecast data and price adjustment calculations for each affected product as required by Order No. 1062. *Id.*

The Notice also includes an application for non-public treatment of the unredacted version of the annex to the Governors' Decision, as well as the supporting materials for the data. *Id.* at 1-2.

II. Summary of Changes

The Notice proposes price changes to Priority Mail Express, Priority Mail, Parcel Select, and USPS Ground Advantage, and several International Products. *Id.* at 2. Additionally, the proposed changes include price adjustments to Domestic Extra Services, including Premium Forwarding Service, Competitive Post Office Boxes, and Adult Signature Service among others. *Id.* The Postal Service proposes one classification change consisting of a new Live Animal and Perishable Handling Fee under the Priority Mail Express, Priority Mail, and USPS Ground Advantage products. *Id.* at 2-3. The Postal Service states that the Live Animal and Perishable Handling Fee is a change in rates of general applicability for Competitive products within the meaning of 39 CFR 3035.102. *Id.* at 3. No other price or classification changes are proposed in this docket. *Id.*; *See* Governors' Decision No. 24-7 at 2-5. The changes are summarized below and condensed to Table I-1.

A. Price changes**1. Domestic**

Priority Mail Express changes. The proposed changes to the MCS in the Governors' Decision No. 24-7 show the Postal Service's planned price changes for Priority Mail Express. On average, Priority Mail Express prices are proposed to increase 3.2 percent. *See id.* at 2. For January 2025, the Postal Service will maintain the consolidation of Commercial Base and Commercial Plus price categories into one Commercial price category and the differentiated "Local, 1, 2" Zone prices and dimensional weighting for all zones. *Id.* The retail prices for Priority Mail Express will increase an average of 3.2 percent. *Id.* On average, commercial prices will increase by 3.2 percent and reflect an average of 12.4 percent discount off of retail prices. *Id.* For January 2025, the Postal Service proposes a Live Animal and Perishable Handling Fee of \$7.50. *Id.*

Priority Mail changes. The proposed changes to the MCS in the Governors' Decision No. 24-7 show the Postal Service's planned price changes for Priority Mail. On average, Priority Mail prices are proposed to increase 3.2 percent. *See id.* For January 2025, the Postal Service will maintain the consolidation of Commercial Base and Commercial Plus price categories into one Commercial price category and the differentiated "Local, 1, 2" Zone prices and dimensional weighting for all zones. *Id.* On average, the retail prices will increase by 3.2 percent. *Id.* The

commercial prices will increase by an average of 3.2 percent and reflect an average of 20.8 percent discount off retail prices. *Id.* For January 2025, the Postal Service proposes a Live Animal and Perishable Handling Fee of \$15.00. *Id.* at 2-3.

Parcel Select. The proposed changes to the MCS in the Governors' Decision No. 24-7 show the Postal Service's planned price changes for Parcel Select. On average, Parcel Select prices are proposed to increase 9.2 percent. *See id.* at 3. The average price increase for parcels entered in destination delivery units is 10.3 percent and the average price increase for parcels entered at destination hubs is not changing. *Id.* The average price increase for parcels entered at destination sectional center facilities and destination network distribution centers and is 7.1 percent and 9.7 percent, respectively. *Id.* For USPS Connect Local, introduced in 2022, the average increase is 5.4 percent. *Id.* The Postal Service proposes to maintain dimensional weighting which was introduced for all zones in 2019. *Id.* The fee for Forward and Return to Sender will be increased to \$3.60 and the fee for Address Correction Service with Shipper Paid Forwarding/Returns will be increased to \$3.00. *Id.*

USPS Ground Advantage. The proposed changes to the MCS in the Governors' Decision No. 24-7 show the Postal Service's planned price changes for USPS Ground Advantage overall will increase an average of 3.9 percent. *Id.* The retail prices will increase an average of 4.9 percent and commercial will increase an average of 3.2 percent. *Id.* The Alaska Limited Overland Routes price category will increase an average of 9.0 percent. *Id.* For January 2025, the Postal Service proposes a Live Animal and Perishable Handling Fee of \$7.50. *Id.*

Domestic Extra Services. The proposed changes to the MCS in the Governors' Decision No. 24-7 show the Postal Service's planned price changes for Premium Forwarding Service will increase an average of 6.1 percent. *Id.* Prices for Adult Signature service will decrease to \$8.40 for basic service and \$8.65 for person-specific service. *Id.* On average, prices for Address Enhancement Service are proposed to increase 8.9 percent. *Id.* Competitive Post Office Box prices will increase an average of 5.7 percent. *Id.* at 3-4. Package Intercept Services prices will increase to \$18.35. *Id.* at 4. Premium Data Retention and Retrieval Service (USPS Tracking Plus) will increase 86.3 percent. *Id.* The fee for overweight/oversized items will increase from \$100 to \$200. *Id.* The Postal Service also

¹ USPS Notice of Changes in Rates and Classifications of General Applicability for Competitive Products, November 15, 2024 (Notice). Pursuant to 39 U.S.C. 3632(b)(2), the Postal Service is obligated to publish the Governors' Decision and record of proceedings in the **Federal Register** at least 30 days before the effective date of the new rates.

² Notice, Decision of the Governors of the United States Postal Service on Changes in Rates and Classifications of General Applicability for Competitive Products (Governors' Decision No. 24-7), at 1 (Governors' Decision No. 24-7).

proposes to increase the “upper bounds” of the price ranges for Greeting Cards and Stationery and Officially Licensed Retail Products to accommodate current and future offerings. *Id.*

2. International

Expedited Services. The proposed changes to the MCS in the Governors’ Decision No. 24–7 show the Postal Service’s planned price changes for Priority Mail Express International will increase an average of 4.9 percent with Commercial Plus equivalent to Commercial Base. *Id.*

Priority Mail International. The proposed changes to the MCS in the Governors’ Decision No. 24–7 show the Postal Service’s planned price changes for Priority Mail International will increase an average of 4.9 percent with Commercial Plus prices equivalent to Commercial Base. *Id.*

International Priority Airmail and International Surface Air Lift. The proposed changes to the MCS in the Governors’ Decision No. 24–7 show the Postal Service’s planned published price changes for International Priority Airmail and International Surface Air Lift will have an average increase of 4.9 percent and 28.9 percent, respectively. *Id.*

Airmail M-Bags. The published price changes for Airmail M-Bags will remain the same on average “although a few prices will change slightly.” *Id.*

First-Class Package International Service. The proposed changes to the MCS in the Governors’ Decision No. 24–7 show the Postal Service’s planned price changes for First-Class Package International Service will increase an average of 4.9 percent with Commercial Plus prices equivalent to Commercial Base. *Id.*

International Ancillary Service and Special Services. The proposed changes to the MCS in the Governors’ Decision No. 24–7 show the Postal Service’s planned price changes for several international ancillary services. *Id.* at 5. The price for International Certificate of Mailing will increase by 5.0 percent, while the price for International Registered Mail will increase by an average of 4.8 percent. *Id.* Lastly, the price for International Insurance will decrease by 10.0 percent and the price for Customs and Clearance Delivery Fee will increase by an average of 3.5 percent. *Id.*

B. Classification Changes

Live Animal and Perishable Handling Fee. For January 2025, the Postal Service proposes a Live Animal and Perishable Handling Fee for Priority

Mail Express, Priority Mail, and USPS Ground Advantage to cover the additional costs associated with handling and transporting these items. Notice at 2–3.

TABLE I—1 PROPOSED PRICE CHANGES

Product name	Average price increase (percent)
Domestic Competitive Products	
Priority Mail Express	3.2
Retail	3.2
Commercial	3.2
Priority Mail	3.2
Retail	3.2
Commercial	3.2
Parcel Select	9.2
Destination Delivery Unit	10.3
Destination Hub	0.0
Destination Sectional Center Facility	7.1
Destination Network Distribution Center	9.7
Connect Local	5.4
USPS Ground Advantage	3.9
Retail	4.9
Commercial	3.2
Domestic Extra Services	
Premium Forwarding Service	6.1
Adult Signature Service.	
Basic	– 10.2
Person-Specific	– 10.4
Competitive Post Office Box	5.7
Package Intercept Service	4.9
Address Enhancement Service ..	8.9
Premium Data Retention and Retrieval	86.3
Other Domestic	
Overweight Item Charge	3 100
International Competitive Products	
Priority Mail Express International	4.9
Priority Mail International	4.9
International Priority Airmail	4.9
International Surface Air Lift	28.9
Airmail M-Bags	4 0.0

International Ancillary Services and Special Services	
International Certificate of Mailing	5.0
International Insurance	– 10.0
International Registered Mail	4.8

³ The Postal Service describes the Overweight Item Charge as “the fee for deterring overweight/oversized items found in the system.” Governors’ Decision 24–7 at 4.

⁴ The Postal Service states that for Airmail M-Bags “a few prices will change slightly.” *Id.*

TABLE I—1 PROPOSED PRICE CHANGES—Continued

Product name	Average price increase (percent)
Customs and Clearance Delivery Fee	3.5

Source: See Governors’ Decision No. 24–7 at 2–5. Percentage increases for Adult Signature Service and Package Intercept Service are calculated based on the proportional difference between current rates as shown in the MCS and the proposed rates specified in Governors’ Decision No. 24–7.

III. Initial Administrative Actions

The Commission establishes Docket No. CP2025–1 to consider the Postal Service’s Notice. Interested persons may express views and offer comments on whether the planned changes are consistent with 39 U.S.C. 3632, 3633, and 3642, 39 CFR part 3035, and 39 CFR 3040 subparts B and E. Comments are due no later than December 13, 2024. For specific details of the planned price changes, interested persons are encouraged to review the Notice, which is available on the Commission’s website at www.prc.gov.

Pursuant to 39 U.S.C. 505, Samuel J. Robinson is appointed to serve as Public Representative to represent the interests of the general public in this docket.

IV. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. CP2025–1 to provide interested persons an opportunity to express views and offer comments on whether the planned changes are consistent with 39 U.S.C. 3632, 3633, and 3642, 39 CFR part 3035, and 39 CFR part 3040 subparts B and E.

2. Comments are due no later than December 13, 2024.

3. Pursuant to 39 U.S.C. 505, the Commission appoints Samuel J. Robinson to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this docket.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Erica A. Barker,
Secretary.

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35399; 812–15651]

Callodine Specialty Income Fund and Callodine Capital Management, LP

November 26, 2024.

AGENCY: Securities and Exchange Commission (“Commission” or “SEC”).

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (the “Act”) for an exemption from sections 18(a)(2), 18(c) and 18(i) of the Act, under sections 6(c) and 23(c) of the Act for an exemption from rule 23c–3 under the Act, and for an order pursuant to section 17(d) of the Act and rule 17d–1 under the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain registered closed-end investment companies to issue multiple classes of shares and to impose asset-based distribution and/or service fees and early withdrawal charges.

APPLICANTS: Callodine Specialty Income Fund and Callodine Capital Management, LP.

FILING DATES: The application was filed on October 25, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC’s Secretary at *Secretaries-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on December 20, 2024, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer’s interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission’s Secretary.

ADDRESSES: The Commission: *Secretaries-Office@sec.gov*. Applicants: Joshua B. Deringer, Esq., Faegre Drinker Biddle & Reath LLP, *joshua.deringer@faegredrinker.com*, with a copy to Callodine Capital Management, LP., Attention: James Morrow, Two

International Place, Suite 1830, Boston, Massachusetts 02110.

FOR FURTHER INFORMATION CONTACT:

Trace W. Rakestraw, Senior Special Counsel, at (202) 551–6825 (Division of Investment Management, Chief Counsel’s Office).

SUPPLEMENTARY INFORMATION: For Applicants’ representations, legal analysis, and conditions, please refer to Applicants’ application, dated October 25, 2024, which may be obtained via the Commission’s website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC’s EDGAR system. The SEC’s EDGAR system may be searched at <https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html>. You may also call the SEC’s Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101734; File No. SR–Phlx–2024–64]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Options 9, Section 13, Position Limits, and Options 8, Section 34, FLEX Trading, Regarding Options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on November 21, 2024, Nasdaq PHLX LLC (“Phlx” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Options 9, Section 13, Position Limits, and Options 8, Section 34, FLEX Trading.

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/phlx/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to: (1) amend Options 9, Section 13, Position Limits, to limit the position limits for options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF (collectively “Bitcoin Trusts”); and (2) except FLEX options on the Bitcoin Trusts from trading as a FLEX option contract.

Options 9, Section 13

Recently, Cboe Exchange, Inc. (“Cboe”) received approvals to list options on the Fidelity Wise Origin Bitcoin Fund, and the ARK21Shares Bitcoin ETF.³ Also, recently, NYSE American LLC (“NYSE American”) received approvals to list options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and

³ See Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SR–Cboe–2024–035) (Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds) (“Cboe Approval Order”).

the Bitwise Bitcoin ETF.⁴ Nasdaq ISE, LLC (“ISE”) filed a rule change to also list and trade options on the Bitcoin Trusts.⁵ Phlx’s Options 4 Rules were amended by the ISE rule change as those Rules are incorporated by reference to ISE’s Options 4 Rules, so Phlx has the ability to list the options on the Bitcoin Trusts. The Cboe Approval Order and the NYSE American Approval Order stated that the position and exercise limits for each of the Bitcoin Trusts shall be 25,000 contracts. At this time, the Exchange proposes to amend Phlx Option 9, Section 13 to similarly note that options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF shall have position limits of 25,000 contracts to mirror the Cboe Approval Order and the NYSE American Approval Order, respectively. Phlx Options 9, Section 15(a) provides that the exercise limits shall be determined in the manner described in Options 9, Section 13, therefore the exercise limits would also be 25,000 contracts for each of the Bitcoin Trusts.

Options 8, Section 34

Today, all options series listed on Phlx may trade as a FLEX Order on Phlx’s trading floor.⁶ At this time, the Exchange proposes to note within Options 8, Section 34(a) that it will not authorize for trading a FLEX option on each of the Bitcoin Trusts. The Exchange proposes this amendment in light of the position and exercise limits of 25,000 contracts that were set for the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF in the Cboe Approval Order and the NYSE American Approval Order, respectively. If the Exchange were to permit trading

in a FLEX option for any of the Bitcoin Trusts, it would establish different position and exercise limits than those set forth in the Cboe Approval Order and the NYSE American Approval Order, respectively.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁷ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁸ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange’s proposal to amend Options 9, Section 13, Position Limits, to provide that the position and exercise limits for each of the Bitcoin Trusts shall be 25,000 contracts is consistent with the Act as it will conform Phlx’s options position and exercise limits with ISE’s options position and exercise limits for the Bitcoin Trusts in order that there would be the same position and exercise limits on Phlx and ISE.⁹ Phlx Options 9, Section 15(a) provides that the exercise limits shall be determined in the manner described in Options 9, Section 13, therefore the exercise limits would also be 25,000 contracts and also consistent with ISE’s options position and exercise limits for the Bitcoin Trusts.

The Exchange’s proposal to amend Options 8, Section 34 to note that it will not authorize for trading a FLEX option on each of the Bitcoin Trusts is consistent with the spirit of the Cboe Approval Order and the NYSE American Approval Order, respectively, that limited the position and exercise limits for the Bitcoin Trusts to 25,000 contracts. The proposal will protect investors and the general public because without this prohibition, trading a FLEX option on the Bitcoin Trusts would otherwise establish different position and exercise limits than those set by Cboe Approval Order and the NYSE American Approval Order, respectively.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that

is not necessary or appropriate in furtherance of the purposes of the Act.

Amending Options 9, Section 13 to provide that the position and exercise limits for options on each of the Bitcoin Trusts shall be 25,000 contracts does not impose an undue burden on competition as the position and exercise limits will apply to all trading for options on the Bitcoin Trusts trading on the Exchange as well as those trading on other exchanges that file a similar proposal.¹⁰

The Exchange’s proposal to note that it will not authorize for trading a FLEX option on any of the Bitcoin Trusts does not impose an undue burden on competition as no Phlx member will be able to transact a FLEX option on any of Bitcoin Trusts

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act¹¹ and Rule 19b–4(f)(6) thereunder.¹² Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹³ and subparagraph (f)(6) of Rule 19b–4 thereunder.¹⁴

A proposed rule change filed under Rule 19b–4(f)(6)¹⁵ under the Act does not normally become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),¹⁶ the Commission may designate a shorter time if such action

⁴ See Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR–NYSEAMER–2024–49) (Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds) (“NYSE American Approval Order”).

⁵ See SR–ISE–2024–54.

⁶ Phlx Options 8, Section 34 rule text was previously amended by two rule changes which are effective, but not yet operative. These two prior rule changes will be implemented at the same time as the rule changes proposed herein. See Securities Exchange Act Release Nos. 97658 (June 7, 2023), 88 FR 38562 (June 13, 2023) (SR–Phlx–2023–22); and 100321 (June 12, 2024), 89 FR 51580 (June 18, 2024) (SR–Phlx–2024–24). Phlx further delayed the implementation so that it could implement SR–Phlx–2023–22 while also completing an OCC industry rule change prior.

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

⁹ The Exchange believes that other exchanges will adopt position and exercise limits of 25,000 contracts for each of the Bitcoin Trusts. All Nasdaq affiliated markets are filing to adopt a 25,000 contract position and exercise limit for options on the Bitcoin Trusts.

¹⁰ All Nasdaq affiliated markets are filing to adopt a 25,000 contract position and exercise limit for options on the Bitcoin Trusts.

¹¹ 15 U.S.C. 78s(b)(3)(A)(iii).

¹² 17 CFR 240.19b–4(f)(6).

¹³ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁴ 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission waives this requirement.

¹⁵ 17 CFR 240.19b–4(f)(6).

¹⁶ 17 CFR 240.19b–4(f)(6)(iii).

is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF.¹⁷ As noted above, Phlx's Options 4 Rules were amended by an ISE rule change¹⁸ as those Rules are incorporated by reference to ISE's Options 4 Rules, so Phlx has the ability to list the options on the Bitcoin Trusts. This proposal establishes position and exercise limits for options on the Bitcoin Trusts. The Commission believes that waiver of the operative delay could benefit investors by assuring that trading in Bitcoin Trust options are subject to the same position and exercise limits in place on other exchanges. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.¹⁹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings

to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-Phlx-2024-64 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-Phlx-2024-64. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number

SR-Phlx-2024-64 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁰

Vanessa A. Countryman,
Secretary.

[FR Doc. 2024-28104 Filed 11-29-24; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-029, OMB Control No. 3235-0037]

Submission for OMB Review; Comment Request; Extension: Rule 17f-1(c) and Form X-17F-1A

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget ("OMB") a request for approval of extension of the previously approved collection of information provided for in Rule 17f-1(c) (17 CFR 240.17f-1(c) and Form X-17F-1A (17 CFR 249.100) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rule 17f-1(c) requires approximately 9,500 entities in the securities industry to report lost, stolen, missing, or counterfeit securities certificates to the Commission or its designee, to a registered transfer agent for the issue, and, when criminal activity is suspected, to the Federal Bureau of Investigation. Such entities are required to use Form X-17F-1A to make such reports. Filing these reports fulfills a statutory requirement that reporting institutions report and inquire about missing, lost, counterfeit, or stolen securities. Since these reports are compiled in a central database, the rule facilitates reporting institutions to access the database that stores information for the Lost and Stolen Securities Program ("Program").

²⁰ 17 CFR 200.30-3(a)(12), (59).

¹⁷ See Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SR-Cboe-2024-035) (Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds). See also Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR-NYSEAMER-2024-49) (Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds).

¹⁸ See SR-ISE-2024-54.

¹⁹ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

We estimate that the total reporting burden for Regulation 17f-1(c), as adopted, for all respondents is approximately 2,937.5 hours. These burdens consist of a one-time burden in connection with Accenture Federal Services LLC ("Accenture") becoming the new Program operator of approximately 2,000 hours for set-up, and annual burdens thereafter of approximately 25 hours for maintenance and 287.5 hours for reporting. $[2,000 + 3(25 + 287.5) = 2,937.5 \text{ hours}]$.

- The Commission estimates that approximately 50 reporting institutions will be subject to this one-time burden, which corresponds to 40 hours for each of the applicable reporting institutions. Further, the Commission estimates that updates in the applicable reporting institutions' systems to maintain this connectivity will impose an aggregate ongoing annualized burden of 25 burden hours, which corresponds to 30 minutes for each of the applicable reporting institutions. Accordingly, this estimated burden to establish and maintain connectivity with Accenture over three years results in an aggregate burden of 691.67 hours per year or 13.83 hours per applicable reporting institution per year. $[(50 \text{ Respondents} \times 1 \text{ Responses over 3 years}) = 50 \times (40 \text{ hour}) = 2,000 \text{ hours} / 3 \text{ years} = 666.67 \text{ hours per year}; (50 \text{ Respondents} \times 1 \text{ Responses}) = 50 \times (.5 \text{ hours}) = 25 \text{ hours}; 666.67 \text{ hours} + 25 \text{ hours} = 691.67 \text{ hours}; 691.67 \text{ hours} / 50 \text{ Respondents} = 13.83 \text{ hours/Respondent}]$.

- In addition, we estimate that approximately 115 reporting institutions will submit a report on average 30 times each year. The staff estimates that the average amount of time necessary for each reporting institution to comply with the Rule 17f-1(c) and Form X-17F-1A is five minutes. As a result, the total hourly burden for the periodic reporting burden under Rule 17f-1(c) is approximately 287.5 hours $[(115 \text{ Respondents} \times 30 \text{ Responses}) \times (5 \text{ minutes} / 60 \text{ minutes/hour})]$.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The 30-day public comment period for this information collection request opens on December 3, 2024 and ends on January 2, 2025. View the full information request and submit comments at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202409-3235-021 or email comments to MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov.

Dated: November 26, 2024.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-451, OMB Control No. 3235-0763]

Proposed Collection; Comment Request; Extension: Rule 304 of Regulation ATS

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is soliciting comments on the existing collection of information provided for in Rule 304 of Regulation ATS (17 CFR 242.304) and Form ATS-N under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) ("Exchange Act"). The Commission plans to submit this existing collection of information to the Office of Management and Budget ("OMB") for extension and approval.

Regulation ATS provides a regulatory structure for alternative trading systems. Rule 304 of Regulation ATS provides conditions for NMS Stock ATSs seeking to rely on the exemption from the definition of "exchange" provided by Rule 3a1-1(a) of the Exchange Act, including to file a Form ATS-N, and for that Form ATS-N to become effective. Form ATS-N requires NMS Stock ATSs to provide information about their manner of operations, the broker-dealer operator, and the ATS-related activities of the broker-dealer operator and its affiliates to comply with the conditions provided under Rule 304. Form ATS-N promotes more efficient and effective market operations by providing more transparency to market participants about the operations of NMS Stock ATSs and the potential conflicts of interest of the controlling broker-dealer operator and its affiliates, and helps brokers meet their best execution obligations to their customers. Operational transparency rules, including Form ATS-N, are designed to increase competition among trading centers in regard to order routing and execution quality.

The Commission staff estimates that entities subject to the requirements of Rule 304 and Form ATS-N will spend

a total of approximately 1,901 hours a year to comply with the Rule.

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by January 31, 2025. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: Austin Gerig, Director/Chief Data Officer, Securities and Exchange Commission, c/o Tanya Ruttenberg, 100 F Street NE, Washington, DC 20549, or send an email to: PRA_Mailbox@sec.gov.

Dated: November 25, 2024.

Vanessa A. Countryman,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35400; 812-15646]

Hamilton Lane Private Assets Fund, Hamilton Lane Private Infrastructure Fund, Hamilton Lane Private Secondary Fund and Hamilton Lane Advisors, L.L.C.

November 26, 2024.

AGENCY: Securities and Exchange Commission ("Commission" or "SEC").

ACTION: Notice.

Notice of application for an order under section 6(c) of the Investment Company Act of 1940 (the "Act") granting an exemption from section 23(a)(1) of the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain registered closed-end management investment companies and business development companies (as defined under section 2(a)(48) of the Act) to pay investment advisory fees (as described

in the application) in shares of their common stock.

APPLICANTS: Hamilton Lane Private Assets Fund, Hamilton Lane Private Infrastructure Fund, Hamilton Lane Private Secondary Fund and Hamilton Lane Advisors, L.L.C.

FILING DATES: The application was filed on October 18, 2024, and amended on November 8, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at Secretarys-Office@sec.gov and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on December 20, 2024, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: Secretarys-Office@sec.gov. Applicants: Keith Kleinman, Esq., Hamilton Lane Advisors, L.L.C., kkleinman@hamiltonlane.com, with a copy to Ryan P. Brizek, Esq., Simpson Thacher & Bartlett LLP, Ryan.Brizek@stblaw.com.

FOR FURTHER INFORMATION CONTACT: Trace W. Rakestraw, Senior Special Counsel, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' application, dated November 8, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC's EDGAR system. The SEC's EDGAR system may be searched at <https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html>. You may also call the SEC's Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,
Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–421, OMB Control No. 3235–0481]

Submission for OMB Review; Comment Request Extension: Rule 15c2–8

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (“PRA”) (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (“Commission”) has submitted to the Office of Management and Budget (“OMB”) a request for approval of extension of the existing collection of information provided for in the following rule: Rule 15c2–8 (17 CFR 240.15c2–8), under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rule 15c2–8 requires broker-dealers to deliver preliminary and/or final prospectuses to certain people under certain circumstances. In connection with securities offerings generally, including initial public offerings (“IPOs”), the rule requires broker-dealers to take reasonable steps to distribute copies of the preliminary or final prospectus to anyone who makes a written request, as well as any broker-dealer who is expected to solicit purchases of the security and who makes a request. In connection with IPOs, the rule requires a broker-dealer to send a copy of the preliminary prospectus to any person who is expected to receive a confirmation of sale (generally, this means any person who is expected to actually purchase the security in the offering) at least 48 hours prior to the sending of such confirmation. This requirement is sometimes referred to as the “48-hour rule.”

Additionally, managing underwriters are required to take reasonable steps to ensure that all broker-dealers participating in the distribution of or trading in the security have sufficient copies of the preliminary or final prospectus, as requested by them, to enable such broker-dealer to satisfy their

respective prospectus delivery obligations pursuant to Rule 15c2–8, as well as Section 5 of the Securities Act of 1933.

Rule 15c2–8 implicitly requires that broker-dealers collect information, as such collection facilitates compliance with the rule. There is no requirement to submit collected information to the Commission. In order to comply with the rule, broker-dealers participating in a securities offering must keep accurate records of persons who have indicated interest in an IPO or requested a prospectus, so that they know to whom they must send a prospectus.

The Commission estimates that the time broker-dealers will spend complying with the collection of information required by the rule is 8,550 hours for equity IPOs and 23,970 hours for other offerings. The Commission estimates that the total annualized cost burden (copying and postage costs) is \$17,100,000 for IPOs and \$958,800 for other offerings.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The 30-day public comment period for this information collection request opens on December 3, 2024 and ends on January 2, 2025. View the full information request and submit comments at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202409-3235-013 or email comments to MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov.

Dated: November 26, 2024.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101737; File No. SR–NYSEAMER–2024–73]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Change To List and Trade Option Contracts on the iShares Bitcoin Trust, the Fidelity Wise Origin Bitcoin Fund, and the ARK21Shares Bitcoin ETF

November 25, 2024.

Pursuant to Section 19(b)(1) ¹ of the Securities Exchange Act of 1934

¹ 15 U.S.C. 78s(b)(1).

(“Act”)² and Rule 19b–4 thereunder,³ notice is hereby given that, on November 20, 2024, NYSE American LLC (“NYSE American” or the “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to list and trade option contracts on the iShares Bitcoin Trust, the Fidelity Wise Origin Bitcoin Fund, and the ARK21Shares Bitcoin ETF. The proposed rule change is available on the Exchange’s website at www.nyse.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 904 (Position Limits), Rule 915 (Criteria for Underlying Securities), and Rule 916 (Withdrawal of Approval of Underlying Securities) to allow the Exchange to list and trade options on the following exchange-traded products: the iShares Bitcoin Trust (“iShares Bitcoin” or “IBIT”), the Fidelity Wise Origin Bitcoin Fund (“Fidelity Wise” or “FBTC”), and the ARK21Shares Bitcoin ETF (“ARK21” or “ARKB”) (collectively, the “Bitcoin Funds” or “Funds”).

The Exchange notes that this is a competitive filing as the Commission recently approved rule proposals by

Nasdaq ISE, LLC (“ISE”) and Cboe Exchange, Inc. (“Cboe”) to allow the listing and trading of options on IBIT⁴ and on FBTC and ARKB, respectively.⁵ As discussed below, the Exchange believes options on the Bitcoin Funds would permit hedging, and allow for more liquidity, better price efficiency, and less volatility with respect to the underlying Funds. Further, permitting the listing of such options would enhance the transparency and efficiency of markets in these and correlated products.

Rule 915 provides that, subject to certain other criteria set forth in the Rule, securities deemed appropriate for options trading include Exchange-Traded Fund Shares (or ETFs) as defined in Commentary .06, that represent certain types of interests⁶ and

⁴ See Securities Exchange Act Release No. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR–ISE–2024–03) (Notice of Filing of Amendment Nos. 4 and 5 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1, 4, and 5, to Permit the Listing and Trading of Options on the iShares Bitcoin Trust) (“IBIT Approval Order”).

⁵ See Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SE–CBOE–2024–035) (Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds) (“FBTC and ARKB Approval Order”).

⁶ See Rule 915, Commentary .06, which permits options trading on ETFs that are traded on a national securities exchange and are defined as an “NMS stock” in Rule 600(b)(55) of Regulation NMS, that represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that hold portfolios of securities and/or financial instruments including, but not limited to, stock index futures contracts, options on futures, options on securities and indexes, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse purchase agreements (the “Financial Instruments”), and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the “Money Market Instruments”) comprising or otherwise based on or representing investments in indexes or portfolios of securities and/or Financial Instruments and Money Market Instruments (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities and/or Financial Instruments and Money Market Instruments); interests in a trust or similar entity that holds a specified non-U.S. currency deposited with the trust or similar entity when aggregated in some specified minimum number may be surrendered to the trust by the beneficial owner to receive the specified non-U.S. currency and pays the beneficial owner interest and other distributions on deposited non-U.S. currency, if any, declared and paid by the trust (“Currency Trust Shares”); commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency (“Commodity Pool Units”); or represents an interest in a registered

exchange-traded products (“ETPs”) structured as trusts that hold precious metals (which are deemed commodities)⁷ and that hold bitcoin (which is also deemed a commodity).⁸ The Exchange proposes to expand the list of bitcoin-backed ETPs on which it can list options to include the Bitcoin Funds.⁹

The Bitcoin Funds are structured as trusts that hold bitcoin. Like ETFs and ETPs currently deemed appropriate for options trading, the investment objective of each Bitcoin Fund trust is for its shares to reflect the performance of Bitcoin (less the expenses of the trust’s operations), offering investors an opportunity to gain exposure to Bitcoin without the complexities of Bitcoin delivery. Each Bitcoin Fund’s shares represent units of fractional undivided beneficial interest in the trust, the assets of which consist principally of Bitcoin and are designed to track Bitcoin or the performance of the price of Bitcoin and offer access to the Bitcoin market.¹⁰ The Bitcoin Funds provide investors with cost-efficient alternatives that allow a level of participation in the Bitcoin market through the securities market.

The Exchange believes each Bitcoin Fund satisfies the Exchange’s initial listing standards set forth in Commentary .01 to Rule 915.¹¹ The Exchange notes that the Bitcoin Funds also satisfy the listing standard applied to ETFs traded on the Exchange that

investment company (“Investment Company”) organized as an open-end management investment company or similar entity, that invests in a portfolio of securities selected by the Investment Company’s investment adviser consistent with the Investment Company’s investment objectives and policies, which is issued in a specified aggregate minimum number in return for a deposit of a specified portfolio of securities and/or a cash amount with a value equal to the next determined net asset value (“NAV”), and when aggregated in the same specified minimum number, may be redeemed at a holder’s request, which holder will be paid a specified portfolio of securities and/or cash with a value equal to the next determined NAV (“Managed Fund Share”); provided that all of the conditions listed in Rules 915 and 916 are met.

⁷ See Rule 915, Commentary .10 (permitting the listing and trading of options on shares of the following trusts: SPDR Gold Trust, the iShares COMEX Gold Trust the iShares Silver Trust, the ETFS Gold Trust, and the ETFS Silver Trust, pursuant to Rule 915 and 916).

⁸ See Rule 915, Commentary .10a (permitting the listing and trading of options on shares of the following trusts: the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust (BTC), and the Bitwise Bitcoin ETF, pursuant to Rule 915 and 916).

⁹ See proposed Rule 915, Commentary .10(a) (expanded to permit the listing and trading of options on shares of IBIT, FBTC, and ARKB, pursuant to Rule 915 and 916).

¹⁰ The trust may include minimal cash.

¹¹ Commentary .01 to Rule 915 provides for guidelines to be by the Exchange when evaluating potential underlying securities for Exchange option transactions.

² 15 U.S.C. 78a.

³ 17 CFR 240.19b–4.

they be available for creation and redemption each business day as set forth in Commentary .06(a)(ii).¹²

First, each of the Bitcoin Funds satisfy the criteria and guidelines set forth in Rule 915(a). Pursuant to Rule 915(a), a security on which options may be listed and traded on the Exchange must be duly registered with the Commission and be an NMS stock (as defined in Rule 600 of Regulation NMS under the Act) and be characterized by a substantial number of outstanding shares that are widely held and actively traded.¹³ Each of the Bitcoin Funds is an NMS Stock as defined in Rule 600 of Regulation NMS under the Act.¹⁴ The Exchange believes each Bitcoin Fund is characterized by a substantial number of outstanding shares that are widely held and actively traded.

The Bitcoin Funds had the following number of shares outstanding:

Bitcoin Fund	Shares outstanding
IBIT (as of 8/12/24)	611,040,000
FBTC (as of 8/7/24)	201,100,100
ARKB (as of 8/7/24)	45,495,000

As shown above, each of the Bitcoin Funds had significantly more than 7,000,000 shares outstanding, which is the minimum number of shares of a corporate stock that the Exchange generally requires to list options on that stock pursuant to Commentary .01(1) to Rule 915. The Exchange believes this demonstrates that each Bitcoin Fund is characterized by a substantial number of outstanding shares.

Further, the below table contains information regarding the number of beneficial holders of the Bitcoin Funds.

Bitcoin Fund	Number of beneficial holders
IBIT	193,956 (as of 5/22/23).
FBTC	279,656 (as of 6/27/24).
ARKB	69,425 (as of 6/26/24).

Each Bitcoin Fund has significantly more than 2,000 beneficial holders, which is the minimum number of holders the Exchange generally requires for corporate stock in order to list options on that stock pursuant to Commentary .01(2) to Rule 915. Therefore, the Exchange believes the shares of each Bitcoin Fund are widely held.

In addition, the Exchange believes the shares of each Bitcoin Fund are actively traded. The total trading volume (by shares and notional) for these funds since they began trading and the average daily volume ("ADV") over the 30-day period of July 9 through August 7, 2024, was as follows:

Bitcoin Fund	Trading volume (shares)	Trading volume (notional \$)	ADV (shares)
IBIT (as of 5/13/24)	34,825,921	1,246,060,738	26,000,000
FBTC (as of 8/7/24)	1,112,861,581	250,354,755	6,014,335
ARKB (as of 8/7/24)	279,360,739	90,484,307	1,893,335

As demonstrated above, even though these Bitcoin Funds have been trading for less than one year, the trading volume for each is substantially higher than 2,400,000 shares, which is the minimum 12-month volume the Exchange generally requires for a security in order to list options on that security as set forth in Commentary .01 to Rule 915. The Exchange believes this data demonstrates each Bitcoin Fund is characterized by a substantial number of outstanding shares that are actively traded.

In addition to satisfying the Exchange's initial listing standards, options on Bitcoin Funds will be subject

to the Exchange's continued listing standards as set forth in Commentary .07 to Rule 916.¹⁵ Pursuant to Commentary .07 to Rule 916, the Exchange will not open for trading any additional series of option contracts covering a fund traded on the Exchange if such fund ceases to be an "NMS stock" as provided for Commentary .01(5) to Rule 915 or the fund is halted from trading on its primary market.¹⁶ Additionally, options on funds traded on the Exchange may be subject to the suspension of opening transactions as follows: (1) the fund no longer meets the terms of Commentary .01 to Rule 916; (2) following the initial twelve-month

period beginning upon the commencement of trading of the fund, there are fewer than 50 record and/or beneficial holders of the fund for 30 or more consecutive trading days; (3) the value of the underlying commodity is no longer calculated or available; or (4) such other event occurs or condition exists that in the opinion of the Exchange makes further dealing on the Exchange inadvisable.

Options on each Bitcoin Fund will be physically settled contracts with American-style exercise.¹⁷ Consistent with Rule 903, which governs the opening of options series on a specific underlying security (including ETFs and

¹² Commentary .06(a)(ii) requires that ETFs must be available for creation or redemption each business day from or through the issuer in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue ETFs in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus.

¹³ The criteria and guidelines for a security to be considered widely held and actively traded are set

forth in Commentary .01 to Rule 915, subject to exceptions.

¹⁴ An "NMS stock" means any NMS security other than an option, and an "NMS security" means any security or class of securities for which transaction reports are collected, processed, and made available pursuant to an effective transaction reporting plan (or an effective national market system plan for reporting transaction in listed options). See 17 CFR 242.600(b)(64) (definition of "NMS security") and (65) (definition of "NMS stock").

¹⁵ The Exchange proposes to amend Commentary .11 to Rule 916 to include the Bitcoin Funds in the list of ETPs deemed "Exchange-Traded Fund Shares"—of ETFs—for purposes of the continued listing standards set forth in Commentary .07 to Rule 916. See proposed Commentary .11 to Rule

916. For avoidance of doubt, the Exchange refers "funds" rather than "ETFs" to make clear that the Bitcoin Funds are subject to these continued listing standards.

¹⁶ See Commentary .07 to Rule 916.

¹⁷ See Rule 902 (Rights and Obligations of Holders and Writers), which provides that the rights and obligations of holders and writers of option contracts of any class of options dealt in on the Exchange shall be as set forth in the Rules of the Clearing Corporation. See also OCC Rules, Chapter VIII, which governs exercise and assignment, and Chapter IX, which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts. OCC Rules can be located at: <https://www.theocc.com/getmedia/9d3854cd-b782-450f-bcf7-33169b0576ce/occrules.pdf>.

ETPs), the Exchange will open at least one expiration month for options on each Bitcoin Fund¹⁸ at the commencement of trading on the Exchange and may also list series of options on Bitcoin Funds for trading on a weekly,¹⁹ monthly,²⁰ or quarterly²¹ basis. The Exchange may also list long-term equity option series (“LEAPS”) that expire from twelve to thirty-nine months from the time they are listed.²²

Pursuant to Rule 903, Commentary .05(a), which governs strike prices of series of options on ETFs, the interval between strike prices of series of options on Bitcoin Funds will be \$1 or greater when the strike price is \$200 or less and \$5 or greater where the strike price is over \$200.²³ Additionally, the Exchange may list series of options pursuant to the \$1 Strike Price Interval Program,²⁴ the \$0.50 Strike Program,²⁵ the \$2.50 Strike Price Program,²⁶ and the \$5 Strike Program.²⁷ Pursuant to Rule 960NY, where the price of a series of a Bitcoin Fund option is less than \$3.00, the minimum increment will be \$0.05, and where the price is \$3.00 or higher, the minimum increment will be \$0.10.²⁸

¹⁸ See Rule 903(c), Commentary .03. The monthly expirations are subject to certain listing criteria for underlying securities described within Rule 915. Monthly listings expire the third Friday of the month. The term “expiration date” (unless separately defined elsewhere in the OCC By-Laws), when used in respect of an option contract (subject to certain exceptions), means the third Friday of the expiration month of such option contract, or if such Friday is a day on which the exchange on which such option is listed is not open for business, the preceding day on which such exchange is open for business. See OCC By-Laws Article I, Section 1. Pursuant to Rule 903(d), additional series of options of the same class may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying stock moves more than five strike prices from the initial exercise price or prices. New series of options on an individual stock may be added until the beginning of the month in which the options contract will expire. Due to unusual market conditions, the Exchange, in its discretion, may add a new series of options on an individual stock until the close of trading on the business day prior to expiration.

¹⁹ See Rule 903(h).

²⁰ See Rule 903, Commentary .11.

²¹ See Rule 903, Commentary .09.

²² See Rule 903, Commentary .03.

²³ The Exchange notes that for options listed pursuant to the Short Term Option Series Program, the Monthly Options Series Program, and the Quarterly Options Series Program, Rules 903(h) and Commentaries .09 and .03 to Rule 903, specifically set forth intervals between strike prices on Quarterly Options Series, Short Term Option Series, and Monthly Options Series, respectively.

²⁴ See Rule 903, Commentary .06.

²⁵ See Rule 903, Commentary .13.

²⁶ See Rule 903, Commentary .07(a).

²⁷ See Rule 903, Commentary .12.

²⁸ If options on a Bitcoin Fund are eligible to participate in the Penny Interval Program, the minimum increment of \$0.01 below \$3.00 and \$0.50 above \$3.00 would apply. See Rule

Any and all new series of Bitcoin Fund options that the Exchange lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Rules 903 and 960NY, as applicable. Further, the Exchange notes that Rule 462, which governs margin requirements applicable to the trading of all options on the Exchange, including options on ETFs and ETPs, will also apply to the trading of Bitcoin Fund options.

Rule 903G(a)(1) permits the Exchange to authorize for trading a FLEX option class on any equity security if it may authorize for trading a non-FLEX option class on that equity security pursuant to Rule 915.²⁹ Consistent with the Exchange’s treatment of bitcoin-backed ETPs available for options trading on the Exchange, the Bitcoin Fund options would not be eligible to trade as FLEX options.³⁰

Position and Exercise Limits

Position and exercise limits for options, including options on Bitcoin Funds, are determined pursuant to Rules 904 and 905. Position and exercise limits for options vary according to the number of outstanding shares and the trading volumes of the underlying security over the past six months, where the largest in capitalization and the most frequently traded funds have an option position and exercise limit of 250,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market; and smaller capitalization funds have position and exercise limits of 200,000, 75,000, 50,000 or 25,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market.³¹

960NY(a)(3). See also Rule 960.1NY (which describes the requirements for the Penny Interval Program).

²⁹ See Rule 903G(a)(1). See generally Section 15 (Flexible Exchange (“FLEX”) Options).

³⁰ See Rule 903G(a)(1) (which provides, in relevant part, that the Exchange may approve and open for trading any FLEX Equity Options series on any equity security that is eligible for Non-FLEX Options trading under Rule 915 “except those set forth in Commentary .10(a) to Rule 915,” i.e., the Bitcoin Funds). The Exchange will continue ongoing discussions with the Commission regarding appropriate position limits for the Bitcoin Funds and plans to submit a separate rule filing that would permit the Exchange to authorize for trading FLEX options on the Funds (which filing may propose changes to existing FLEX option position limits for such options if appropriate).

³¹ See Commentary .07(a)–(d) to Rule 904. For an option to be eligible for the 50,000-contract limit, the security underlying the option must have most recent six-month trading volume of at least 20,000,000 shares, or most recent six-month trading volume of at least 15,000,000 shares and at least 40,000,000 shares currently outstanding. For an option to be eligible for the 75,000-contract limit, the underlying security must have most recent six-

Position limits are designed to limit the number of options contracts traded on the Exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. The purpose of position limits, which are set forth in Rule 904, is to address potential manipulative schemes and adverse market impacts surrounding the use of options, such as disrupting the market in the security underlying the options. Accordingly, position limits must balance concerns regarding mitigating potential manipulation and the cost of inhibiting potential hedging activity that investors may use for legitimate economic purposes. To achieve this balance, the Exchange proposes to set the position and exercise limits for the options on the Bitcoin Funds at 25,000 contracts, which limits are already in place for the Bitcoin Funds as traded on other options exchanges and the bitcoin-backed ETPs available for options trading on the Exchange.³² Capping the position limit at 25,000 contracts, the lowest limit available in options, would address concerns related to manipulation and protection of investors as this number is conservative for the Bitcoin Funds and therefore appropriate given their liquidity. While the Exchange believes that the proposed 25,000-contract position limit is conservative for options on the Bitcoin Funds.³³

month trading volume of at least 40,000,000 shares, or most recent six-month trading volume of at least 30,000,000 shares and at least 120,000,000 shares currently outstanding. For an option to be eligible for the 200,000-contract limit, the underlying security must have most recent six-month trading volume of at least 80,000,000 shares, or most recent six-month trading volume of at least 60,000,000 shares and at least 240,000,000 shares currently outstanding. For an option to be eligible for the 250,000-contract limit, the security underlying the option must have most recent six-month trading volume of at least 100,000,000 shares, or most recent six-month trading volume of at least 75,000,000 shares and at least 300,000,000 shares currently outstanding. The 25,000-contract limit applies to options on underlying securities that do not qualify for a higher contract limit. See Commentary .07(e) to Rule 904. In addition, Commentary .07(f) to Rule 904 establishes higher position limits for options on certain ETFs.

³² See proposed 6.8–O, Commentary .07(f) See *supra* notes 4 and 5 (regarding the IBIT Approval Order and the FBTC and ARKB Approval Order). See also NYSE American Rule 904, Commentary .07(f) (setting 25,000 position limits for the Grayscale Bitcoin Trust (BTC) (symbol: GBTC), the Grayscale Bitcoin Mini Trust (BTC) (symbol: BTC), and the Bitwise Bitcoin ETF (symbol: BITB)).

³³ The Exchange may file a subsequent rule change to amend the position and exercise limit for options on any or all the Bitcoin Funds based on additional data regarding trading activity, to continue to balance any concerns regarding manipulation. A higher position limit would allow institutional investors to utilize options on the Bitcoin Funds for prudent risk management purposes.

Based on the foregoing, the Exchange believes the proposal to list options on the Bitcoin Funds with positions and exercise limits of 25,000 on the same side, the lowest position limit available in the options industry, is conservative and appropriate given the market capitalization, average daily volume, and high number of outstanding shares for each of the Bitcoin Funds. The proposed position and exercise limits reasonably and appropriately balance the liquidity provisioning in the market against the prevention of manipulation. The Exchange believes these proposed limits are effectively designed to prevent an individual customer or entity from establishing options positions that could be used to manipulate the market of the underlying Bitcoin Funds as well as the Bitcoin market.³⁴

As described herein, options on the Bitcoin Funds will trade in the same manner as any other ETF or ETP options on the Exchange, except that the Bitcoin Funds will not be eligible for FLEX options trading. The Exchange Rules that currently apply to the listing and trading of options on the Exchange, including, for example, Rules that govern listing criteria, expiration and exercise prices, minimum increments, margin requirements, customer accounts, and trading halt procedures will apply to the listing and trading of Bitcoin Funds on the Exchange in the same manner as they apply to all other ETFs and ETPs that are listed and traded on the Exchange, including the precious metal-backed commodity ETPs already deemed appropriate for options trading on the Exchange pursuant to Commentary .10 to Rule 915. Further, as described above, Exchange Rules regarding position and exercise limits will likewise apply to options on the Bitcoin Funds except that, as proposed, the position and exercise limits will be set at 25,000 on the same side.

* * * * *

The Exchange notes that options on Bitcoin Funds would not be available for trading until The Options Clearing Corporation (“OCC”) represents to the Exchange that it is fully able to clear and settle such options. The Exchange has also analyzed its capacity and represents that it and The Options Price Reporting Authority (“OPRA”) have the necessary systems capacity to handle the additional traffic associated with the listing of options on Bitcoin Funds. The Exchange believes any additional traffic that would be generated from the trading of options on Bitcoin Funds

would be manageable. The Exchange represents that Exchange members will not have a capacity issue as a result of this proposed rule change.

The Exchange represents that the same surveillance procedures applicable to all other options currently listed and traded on the Exchange will apply to options on Bitcoin Funds, and that it has the necessary systems capacity to support the new option series. The Exchange’s existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs and ETPs, such as (existing) precious metal- and bitcoin-backed ETP options, as well as the proposed options on Bitcoin Funds. The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of options on Bitcoin Funds in all trading sessions and to deter and detect violations of Exchange rules.

Specifically, the Exchange’s market surveillance staff also conducts surveillances with respect to the Bitcoin Funds and, as appropriate, would review activity in the underlying Funds when conducting surveillances for market abuse or manipulation in the options on each Trust. Additionally, the Exchange is a member of the Intermarket Surveillance Group (“ISG”) under the ISG Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. The Exchange will be able to obtain information regarding trading in the shares of the underlying Trusts from Nasdaq, LLC, Cboe Exchange, Inc., and other markets on which the Trusts trade through the ISG. In addition, the Exchange has a Regulatory Services Agreement (“RSA”) with the Financial Industry Regulatory Authority (“FINRA”). Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillances.³⁵ Further,

³⁵ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO’s own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO. Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO;

the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Bitcoin Funds.

The underlying shares of spot bitcoin ETPs, including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot bitcoin-based exchange-traded products (“Bitcoin ETP Order”³⁶):

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.³⁷

Given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, and given that the “CME’s surveillance can assist in detecting [the impact of fraud or manipulation] on CME bitcoin future prices,” the Commission was able to conclude that such surveillance sharing agreements could reasonably be “expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs].”³⁸

In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Funds,³⁹

or (iii) carry out other specified regulatory responsibilities with respect to such members.

³⁶ See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008 (January 17, 2024) (File Nos. SR-NYSEArca-2021-90; SR-NYSEArca-2023-44; SR-NYSEArca-2023-58; SR-NASDAQ-2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX-2023-040; SR-CboeBZX-2023-042; SR-CboeBZX-2023-044; and SR-CboeBZX-2023-072) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units) (“Bitcoin ETP Order”).

³⁷ See Bitcoin ETP Order, 89 FR at 3009.

³⁸ See Bitcoin ETP Order, 89 FR at 3010–11.

³⁹ See Amendment No. 1 to Proposed Rule Change to List and Trade Shares of the iShares Bitcoin Trust under Nasdaq Rule 5711(d), Commodity-Based Trust Shares (SR-NASDAQ-2023-016), filed Jan. 5, 2024, available at <https://www.sec.gov/comments/sr-nasdaq-2023-016/srnasdaq2023016-357659-883042.pdf>; Amendment No. 5 to Proposed Rule Change to List and Trade Shares of the ARK 21Shares Bitcoin ETP under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares (SR-CboeBZX-2023-028), filed Jan. 5, 2024, available at <https://www.sec.gov/comments/sr-cboebzx-2023-028/srcboebzx2023028-358679-884202.pdf>; and Amendment No. 3 to Proposed Rule Change to List and Trade Shares of the Fidelity

Continued

³⁴ See Securities Exchange Act Release No. 39489 (December 24, 1997), 63 FR 276 (January 5, 1998) (SR-CBOE-1997-11).

the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds.

Finally, quotation and last sale information for ETFs is available via the Consolidated Tape Association (“CTA”) high speed line. Quotation and last sale information for such securities is also available from the exchange on which such securities are listed. Quotation and last sale information for options on Bitcoin Funds will be available via OPRA and major market data vendors.

The Exchange believes that offering options on the Bitcoin Funds will benefit investors by providing them with an additional, relatively lower cost investing tool to gain exposure to the price of Bitcoin and hedging vehicle to meet their investment needs in connection with Bitcoin-related products and positions. The Exchange expects investors will transact in options on Bitcoin Funds in the unregulated over-the-counter (“OTC”) options market,⁴⁰ but may prefer to trade such options in a listed environment to receive the benefits of trading listed options, including (1) enhanced efficiency in initiating and closing out position; (2) increased market transparency; and (3) heightened contra-party creditworthiness due to the role of OCC as issuer and guarantor of all listed options. The Exchange believes that listing options on the Bitcoin Funds may cause investors to bring this liquidity to the Exchange, would increase market transparency and enhance the process of price discovery conducted on the Exchange through increased order flow. The Exchange notes that the ETPs that hold precious metal commodities on which the Exchange may already list and trade options are trusts structured in substantially the same manner as Bitcoin Funds and essentially offer the same objectives and benefits to investors, just with respect to different assets. The Exchange notes that it has not identified any issues with the continued listing and trading of options on any ETFs or ETPs that hold commodities (*i.e.*, precious metals) that

it currently lists and trades on the Exchange.

2. Statutory Basis

The Exchange believes that its proposed rule change is consistent with Section 6(b) of the Act⁴¹ in general and furthers the objectives of Section 6(b)(5) of the Act⁴² in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanisms of a free and open market and a national market system, and, in general, to protect investors and the public interest.

In particular, the Exchange believes that the proposal to list and trade options on the Bitcoin Funds will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because offering options on the Bitcoin Funds will provide investors with an opportunity to realize the benefits of utilizing options on a Bitcoin Fund, including cost efficiencies and increased hedging strategies.

The Exchange believes that offering Bitcoin Fund options will benefit investors by providing them with a relatively lower-cost risk management tool, which will allow them to manage their positions and associated risk in their portfolios more easily in connection with exposure to the price of Bitcoin and with Bitcoin-related products and positions. Additionally, the Exchange’s offering of Bitcoin Fund options will provide investors with the ability to transact in such options in a listed market environment as opposed to in the unregulated OTC market, which would increase market transparency and enhance the process of price discovery conducted on the Exchange through increased order flow to the benefit of all investors. The Exchange also notes that it already lists options on other commodity-based ETPs,⁴³ including on bitcoin-backed ETPs already trading on the Exchange, which, as described above, are trusts structured in substantially the same manner as the Bitcoin Funds and essentially offer the same objectives and benefits to investors.⁴⁴

The Exchange also believes the proposed rule change will remove impediments to and perfect the

mechanism of a free and open market and a national market system, because it is consistent with current Exchange Rules previously filed with the Commission. Options on the Bitcoin Funds satisfy the initial listing standards and continued listing standards currently in the Exchange Rules applicable to options on all ETFs and ETPs, including ETPs that hold other commodities already deemed appropriate for options trading on the Exchange. Additionally, as demonstrated above, each Bitcoin Fund is characterized by a substantial number of shares that are widely held and actively traded. Bitcoin Fund options will trade in the same manner as any other ETF or ETP options—the same Exchange Rules that currently govern the listing and trading of options, including permissible expirations, strike prices, minimum increments, and margin requirements, will govern the listing and trading of options on Bitcoin Funds in the same manner.

The Exchange believes the proposed exclusion of the Bitcoin Funds from being eligible for trading as FLEX options is consistent with the Act, because it will permit the Exchange to continue to participate in ongoing discussions with the Commission regarding appropriate position limits for options on the Bitcoin Funds.⁴⁵

The proposed position and exercise limit for options on the Bitcoin Funds is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given the Bitcoin Funds’ market capitalization, average daily volume, number of beneficial holders, and high number of outstanding shares. The proposed position and exercise limits are consistent with the Act as they addresses concerns related to manipulation and protection of investors because the position and exercise limits are extremely conservative and more than appropriate given the Bitcoin Funds are actively traded.

The Exchange represents that it has the necessary systems capacity to support the new Bitcoin Fund options. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options, including Bitcoin Fund options. The

Wise Origin Bitcoin Fund under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares (SR-ChoeBZX-2023-044), filed Jan. 5, 2024, available at <https://www.sec.gov/comments/sr-choebzx-2023-044/srchoebzx2023044-358759-884163.pdf>.

⁴⁰ The Exchange understands from customers that investors have historically transacted in options on ETFs in the OTC options market if such options were not available for trading in a listed environment.

⁴¹ 15 U.S.C. 78f(b).

⁴² 15 U.S.C. 78f(b)(5).

⁴³ See Rule 915, Commentary .10. The Exchange has not identified any issues with the continued listing and trading of precious metal commodity-backed ETP options that it currently lists for trading.

⁴⁴ See Rule 915, Commentary .10(a).

⁴⁵ The Exchange will submit a separate rule filing that would permit the Exchange to authorize for trading FLEX options on the Bitcoin Funds (which filing may propose changes to existing FLEX option position limits for such options if appropriate).

Exchange's existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs and ETPs, such as (existing) precious metal-commodity backed ETP options as well as the proposed options on Bitcoin Funds. The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of options on Bitcoin Funds in all trading sessions and to deter and detect violations of Exchange rules.

Specifically, the Exchange's market surveillance staff also conducts surveillances with respect to the Bitcoin Funds and, as appropriate, would review activity in the underlying Funds when conducting surveillances for market abuse or manipulation in the options on each Trust. Additionally, the Exchange is a member of the Intermarket Surveillance Group ("ISG") under the ISG Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. The Exchange will be able to obtain information regarding trading in the shares of the underlying Trusts from Nasdaq, LLC, Cboe Exchange, Inc., and other markets on which the Trusts trade through the ISG. In addition, the Exchange is a party to an RSA with FINRA and pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillances. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Bitcoin Funds.

The underlying shares of spot bitcoin ETPs, including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot bitcoin-based ETPs, "[e]ach Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market."⁴⁶ Given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, and given that the "CME's surveillance can assist in detecting [the

impact of fraud or manipulation] on CME bitcoin future prices," the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs]." ⁴⁷ In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Funds,⁴⁸ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on Bitcoin ETPs.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition: The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as options on the Bitcoin Funds would need to satisfy the initial listing standards set forth in the Exchange Rules in the same manner as any other options on an ETF before the Exchange could list these options. Additionally, Bitcoin Fund options will be equally available to all market participants who wish to trade such options. The Exchange Rules currently applicable to the listing and trading of options on ETFs on the Exchange will apply in the same manner to the listing and trading of all options on the Bitcoin Funds. Also, and as stated above, the Exchange

already lists options on other commodity-based ETPs, including on bitcoin-backed ETPs.⁴⁹

Intermarket Competition: The Exchange does not believe that the proposal to list and trade options on Bitcoin Funds will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that the advent of Bitcoin Fund options trading on the Exchange may make the Exchange a more attractive marketplace to market participants at other exchanges, such market participants are free to elect to become market participants on the Exchange. As noted herein, this is a competitive filing as the Commission recently approved the listing and trading of options on an ETP that, like the Bitcoin Funds, holds bitcoin.⁵⁰ Additionally, other options exchanges are free to amend their listing rules, as applicable, to permit them to list and trade options on Bitcoin Funds. The Exchange notes that listing and trading Bitcoin Fund options on the Exchange will subject such options to transparent exchange-based rules as well as price discovery and liquidity, as opposed to alternatively trading such options in the OTC market.

The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition as it is designed to increase competition for order flow on the Exchange in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering Bitcoin Fund options for trading on the Exchange will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment needs in connection with Bitcoin prices and Bitcoin-related products and positions on a listed options exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

⁴⁹ See Rule 915, Commentary .10 and Commentary .10(a).

⁵⁰ See *id.* See also *supra* notes 4 and 5 (regarding the IBIT Approval Order and the FBTC and ARKB Approval Order).

⁴⁶ See Bitcoin ETP Order, 89 FR at 3009.

⁴⁷ See Bitcoin ETP Order, 89 FR at 3010–11.

⁴⁸ See Amendment No. 1 to Proposed Rule Change to List and Trade Shares of the iShares Bitcoin Trust under Nasdaq Rule 5711(d), Commodity-Based Trust Shares (SR–NASDAQ–2023–016), filed Jan. 5, 2024, available at <https://www.sec.gov/comments/sr-nasdaq-2023-016/srnasdaq2023016-357659-883042.pdf>; Amendment No. 5 to Proposed Rule Change to List and Trade Shares of the ARK 21Shares Bitcoin ETF under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares (SR–CboeBZX–2023–028), filed Jan. 5, 2024, available at <https://www.sec.gov/comments/sr-cboebzx-2023-028/sr-cboebzx2023028-358679-884202.pdf>; and Amendment No. 3 to Proposed Rule Change to List and Trade Shares of the Fidelity Wise Origin Bitcoin Fund under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares (SR–CboeBZX–2023–044), filed Jan. 5, 2024, available at <https://www.sec.gov/comments/sr-cboebzx-2023-044/sr-cboebzx2023044-358759-884163.pdf>.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act⁵¹ and Rule 19b-4(f)(6) thereunder.⁵² Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act⁵³ and subparagraph (f)(6) of Rule 19b-4 thereunder.⁵⁴

A proposed rule change filed under Rule 19b-4(f)(6)⁵⁵ under the Act does not normally become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),⁵⁶ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the iShares Bitcoin Trust, the Fidelity Wise Origin Bitcoin Fund, and the ARK21Shares Bitcoin ETF.⁵⁷ The Exchange has provided information regarding the underlying Bitcoin Funds, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of

the Bitcoin Funds. The proposal also establishes position and exercise limits for options on the Bitcoin Funds and provides information regarding the surveillance procedures that will apply to Bitcoin Fund options. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Bitcoin Fund options. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.⁵⁸

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSEAMER-2024-73 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NYSEAMER-2024-73. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/>

[rules/sro.shtml](#)). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSEAMER-2024-73 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁹

Vanessa A. Countryman,
Secretary.

See also Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SR-Choe-2024-035) (Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds).

⁵⁸ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rules 3120 (Position Limits), 5020 (Criteria for Underlying Securities) to permit trading of iShares Bitcoin ETF options. Additionally, the Exchange proposes to amend Rule 5055 (FLEX Equity Options). The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's internet website at <https://rules.boxexchange.com/rulefilings>.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rules 3120 (Position Limits) and 5020 (Criteria for Underlying Securities) to permit trading of iShares Bitcoin ETF options on BOX. Additionally, the Exchange proposes to amend Rule 5055 (FLEX Equity Options). This is a competitive filing that is based on a proposal recently submitted by Nasdaq ISE, LLC ("Nasdaq ISE") and approved by the Commission.³

The Exchange proposes to amend Rule 5020, Criteria for Underlying Securities, to allow the Exchange to list and trade options on iShares Bitcoin

Trust (the "Trust")⁴ as an ETF deemed appropriate for options trading on BOX. Specifically, the Exchange proposes to amend Rule 5020(h) to allow BOX to list and trade options on the Trust. Currently, Rule 5020(h) provides that securities deemed appropriate for options trading shall include shares or other securities ("Exchange-Traded Fund Shares") that are traded on a national securities exchange and are defined as an "NMS stock" under Rule 600 of Regulation NMS and that (i) represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that hold portfolios of securities and/or financial instruments, including, but not limited to, stock index futures contracts, options on futures, options on securities and indices, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse repurchase agreements (the "Financial Instruments") and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the "Money Market Instruments") comprising or otherwise based on or representing investments in broad-based indexes or portfolios of securities and/or Financial Instruments and Money Market Instruments (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities and/or Financial Instruments and Money Market Instruments); or (ii) represent interests in a trust that holds a specified non-U.S. currency deposited with the trust or similar entity when aggregated in some specified minimum number may be surrendered to the trust by the beneficial owner to receive the specified non-U.S. currency or currencies and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency or currencies, if any, declared and paid by the trust ("Currency Trust Shares"); or (iii) represent commodity pool interests

⁴ On January 10, 2024, the Commission approved proposals by NYSE Arca, Inc., The Nasdaq Stock Market LLC, and Cboe BZX Exchange, Inc. to list and trade the shares of 11 bitcoin-based commodity-based trust shares and trust units, including the iShares Bitcoin Trust. See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008 (Jan. 17, 2024) (order approving File Nos. SR-NYSEARCA-2021-90; SR-NYSEARCA-2023-44; SR-NYSEARCA-2023-58; SR-NASDAQ-2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX-2023-040; SR-CboeBZX-2023-042; SR-CboeBZX-2023-044; SR-CboeBZX-2023-072) ("Bitcoin ETP Order"). The Exchange represents it would not list options on the Trust unless it satisfied all applicable criteria in Rule 5020.

principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency ("Commodity Pool ETFs"); or (iv) represent interests in the SPDR® Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the ETFS Gold Trust, the ETFS Silver trust, the ETFS Palladium Trust, the ETFS Platinum Trust or the Sprott Physical Gold Trust. In addition to the aforementioned requirements, Rules 5020(h)(1) and (2) must be met to list options on ETFs.⁵

Proposal

The Exchange proposes to expand the list of ETFs that are appropriate for options trading on the Exchange in Rule 5020(h) to include the Trust.⁶

Description of the Trust⁷

The Shares are issued by the Trust, a Delaware statutory trust. The Trust operates pursuant to a trust agreement (the "Trust Agreement") between the Sponsor, BlackRock Fund Advisors (the "Trustee") as the trustee of the Trust and Wilmington Trust, National Association, as Delaware trustee (the "Delaware Trustee"). The Trust issues Shares representing fractional undivided beneficial interests in its net assets. The assets of the Trust consist only of Bitcoin, held by a custodian on behalf of the Trust except under limited circumstances when transferred through the Trust's prime broker temporarily (described below), and cash. Coinbase Custody Trust Company, LLC (the "Bitcoin Custodian") is the custodian for the Trust's Bitcoin holdings, and

⁵ Rule 5020(h)(1) states that the Exchange-Traded Fund Shares either (i) meet the criteria and guidelines set forth in paragraphs (a) and (b) of this Rule 5020 above; or (ii) the Exchange-Traded Fund Shares are available for creation or redemption each business day from or through the issuing trust, investment company, commodity pool or other entity in cash or in kind at a price related to net asset value, and the issuer is obligated to issue Exchange-Traded Fund Shares in a specified aggregate number even if some or all of the investment assets and/or cash required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investment assets has undertaken to deliver them as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer of the Exchange-Traded Fund Shares, all as described in the Exchange-Traded Fund Shares' prospectus; and meet other criteria.

⁶ Specifically, the Exchange proposes to amend Rule 5020(h) to include the name of the Trust to enable options to be listed on the Trust on BOX.

⁷ See SR-NASDAQ-2023-016 for a complete description of the Trust.

³ See Securities Exchange Act Release No. 101128 (September 20, 2024) (Notice of Filing of Amendment Nos. 4 and 5 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1, 4, and 5, to Permit the Listing and Trading of Options on the iShares Bitcoin Trust), 89 FR 78942 (September 26, 2024) ("ISE Approval Order").

maintains a custody account for the Trust (“Custody Account”); Coinbase, Inc. (the “Prime Execution Agent”), an affiliate of the Bitcoin Custodian, is the prime broker for the Trust and maintains a trading account for the Trust (“Trading Account”); and Bank of New York Mellon is the custodian for the Trust’s cash holdings (the “Cash Custodian” and together with the Bitcoin Custodian, the “Custodians”) and the administrator of the Trust (the “Trust Administrator”). Under the Trust Agreement, the Trustee may delegate all or a portion of its duties to any agent, and has delegated the bulk of the day-to-day responsibilities to the Trust Administrator and certain other administrative and record-keeping functions to its affiliates and other agents. The Trust is not an investment company registered under the Investment Company Act of 1940, as amended, (the “1940 Act”).

The investment objective of the Trust is to reflect generally the performance of the price of Bitcoin. The Trust seeks to reflect such performance before payment of the Trust’s expenses and liabilities. The Shares are intended to constitute a simple means of making an investment similar to an investment in Bitcoin through the public securities market rather than by acquiring, holding and trading Bitcoin directly on a peer-to-peer or other basis or via a digital asset exchange. The Shares have been designed to remove the obstacles represented by the complexities and operational burdens involved in a direct investment in Bitcoin, while at the same time having an intrinsic value that reflects, at any given time, the investment exposure to the Bitcoin owned by the Trust at such time, less the Trust’s expenses and liabilities. Although the Shares are not the exact equivalent of a direct investment in Bitcoin, they provide investors with an alternative method of achieving investment exposure to Bitcoin through the public securities market, which may be more familiar to them.

Custody of the Trust’s Bitcoin

An investment in the Shares is backed by Bitcoin held by the Bitcoin Custodian on behalf of the Trust. All of the Trust’s Bitcoin will be held in the Custody Account, other than the Trust’s Bitcoin which is temporarily maintained in the Trading Account under limited circumstances, *i.e.*, in connection with creation and redemption Basket⁸ activity or sales of

Bitcoin deducted from the Trust’s holdings in payment of Trust expenses or the Sponsor’s fee (or, in extraordinary circumstances, upon liquidation of the Trust). The Custody Account includes all of the Trust’s Bitcoin held at the Bitcoin Custodian, but does not include the Trust’s Bitcoin temporarily maintained at the Prime Execution Agent in the Trading Account from time to time. The Bitcoin Custodian will keep all of the private keys associated with the Trust’s Bitcoin held in the Custody Account in “cold storage.”⁹ The hardware, software, systems, and procedures of the Bitcoin Custodian may not be available or cost-effective for many investors to access directly. As provided in the ISE Approval Order, the Exchange believes that offering options on the Trust will benefit investors by providing them with an additional, relatively lower cost investing tool to gain exposure to spot Bitcoin as well as a hedging vehicle to meet their investment needs in connection with Bitcoin products and positions. Similar to other commodity ETFs in which options may be listed on BOX (*e.g.*, SPDR[®] Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the ETFs Gold Trust, the ETFs Silver Trust, the ETFs Palladium Trust, the ETFs Platinum Trust or the Sprott Physical Gold Trust),¹⁰ the proposed ETF is a trust that essentially offers the same objectives and benefits to investors. Options on the Trust will trade in the same manner as options on other ETFs on BOX. Exchange Rules that currently apply to the listing and trading of all options on ETFs on BOX, including, for example, rules that govern listing criteria, expirations, exercise prices, minimum increments, position and exercise limits (including as proposed herein), margin requirements, customer accounts, and trading halt procedures will apply to the listing and trading of options on the Trust on BOX. Today, these rules apply to options on the various commodities ETFs deemed appropriate for options trading on BOX pursuant to Rule 5020(h)(iv). The Exchange’s initial listing standards for ETFs on which options may be listed and traded on BOX will apply to the Trust. The initial listing standard as set

block of 40,000 Shares is called a “Basket.” These transactions take place in exchange for Bitcoin.

⁹ The term “cold storage” refers to a safeguarding method by which the private keys corresponding to the Trust’s Bitcoin are generated and stored in an offline manner, subject to layers of procedures designed to enhance security. Private keys are generated by the Bitcoin Custodian in offline computers that are not connected to the internet so that they are more resistant to being hacked.

¹⁰ See Rule 5020(h)(iv).

forth in Rule 5020(a) provides that: Underlying securities with respect to which put or call options contracts are approved for listing and trading on the Exchange must meet the following criteria: (1) the security must be registered and be an “NMS stock” as defined in Rule 600 of Regulation NMS under the Exchange Act; and (2) the security shall be characterized by a substantial number of outstanding shares that are widely held and actively traded. Pursuant to Rule 5020, ETFs on which options may be listed and traded must satisfy the listing standards set forth in Rule 5020(h). Specifically, the Trust must meet either: (1) the criteria and guidelines for underlying securities set forth in Rules 5020(a) and (b), or (2) it must be available for creation or redemption each business day from or through the issuing trust, investment company, commodity pool or other entity in cash or in kind at a price related to net asset value, and the issuer is obligated to issue Exchange-Traded Fund Shares in a specified aggregate number even if some or all of the investment assets and/or cash required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investment assets has undertaken to deliver them as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer of the Exchange-Traded Fund Shares, all as described in the Exchange-Traded Fund Shares’ prospectus, and meet other criteria. Options on the Trust will also be subject to the Exchange’s continued listing standards for options on ETFs set forth in Rule 5030(h). Specifically, options approved for trading pursuant to Rule 5020(h) will not be deemed to meet the requirements for continued approval, and the Exchange shall not open for trading any additional series of option contracts of the class covering such ETFs if the ETFs are delisted from trading as provided in Rule 5030(b)(6)¹¹ or the ETFs are halted or suspended from trading on their primary market.¹² In addition, the Exchange shall consider the suspension of opening transactions in any series of options of the class covering ETFs in any of the following circumstances: (1) in the case of options covering Exchange-Traded Fund Shares approved pursuant to Rule 5020(h)(1)(i), in accordance with the terms of

¹¹ Rule 5030(b)(6) provides, “The underlying security ceases to be an “NMS stock” as defined in Rule 600 of Regulation NMS under the Exchange Act.”

¹² See Rule 5030(h).

⁸ The Trust issues and redeems Shares only in blocks of 40,000 or integral multiples thereof. A

subparagraphs (b)(1), (2), (3) and (6) of Rule 5030;¹³ (2) in the case of options covering Fund Shares approved pursuant to Rule 5020(h)(1)(ii), following the initial twelve-month period beginning upon the commencement of trading in the Exchange-Traded Fund Shares on a national securities exchange and are defined as an “NMS stock” under Rule 600 of Regulation NMS, there were fewer than 50 record and/or beneficial holders of such Exchange-Traded Fund Shares for 30 or more consecutive trading days; (3) the value of the index or portfolio of securities or non-U.S. currency, portfolio of commodities including commodity futures contracts, options on commodity futures contracts, swaps, forward contracts, options on physical commodities and/or Financial Instruments and Money Market Instruments, on which the Exchange-Traded Fund Shares are based is no longer calculated or available; or (4) such other event occurs or condition exists that in the opinion of the Exchange makes further dealing in such options on BOX inadvisable. Options on the Trust would be physically settled contracts with American-style exercise.¹⁴ Consistent with current Rule 5050, which governs the opening of options series on a specific underlying security (including ETFs), the Exchange will open at least one expiration month for options on the Trust and may also list series of options on the Trust for trading on a weekly,¹⁵ monthly,¹⁶ or quarterly¹⁷ basis. The Exchange may also list long-term equity option series (“LEAPS”)¹⁸ that expire from twelve to one hundred eighty months from the time they are listed.

¹³ Rules 5030(b)(1)–(3) and (6) provide, if: (1) there are fewer than 6,300,000 shares of the underlying security held by persons other than those who are required to report their security holdings under Section 16(a) of the Act, (2) there are fewer than 1,600 holders of the underlying security, (3) the trading volume (in all markets in which the underlying security is traded) has been less than 1,800,000 shares in the preceding twelve (12) months, or (6) the underlying security ceases to be an “NMS stock” as defined in Rule 600 of Regulation NMS under the Exchange Act.

¹⁴ See Rule 5010, Rights and Obligations of Holders and Writers, which provides that the rights and obligations of holders and writers shall be as set forth in the Rules of the Clearing Corporation. See also OCC Rules, Chapter VIII, which governs exercise and assignment, and Chapter IX, which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts. OCC Rules can be located at: https://www.theocc.com/getmedia/9d3854cd-b782-450f-bcf7-33169b0576ce/occ_rules.pdf.

¹⁵ See IM–5050–6.

¹⁶ See IM–5050–13.

¹⁷ See IM–5050–4.

¹⁸ See Rule 5070.

Pursuant to Rule 5050(d)(4), which governs strike prices of series of options on ETFs, the interval between strike prices of series of options on ETFs approved for options trading pursuant to Rule 5020(h) shall be fixed at a price per share which is reasonably close to the price per share at which the underlying security is traded in the primary market at or about the same time such series of options is first open for trading on the Exchange, or at such intervals as may have been established on another options exchange prior to the initiation of trading on BOX. With respect to the Short Term Options Series or Weekly Program, during the month prior to expiration of an option class that is selected for the Short Term Option Series Program, the strike price intervals for the related non-Short Term Option (“Related non-Short Term Option”) shall be the same as the strike price intervals for the Short Term Option.¹⁹ Specifically, the Exchange may open for trading Short Term Option Series at strike price intervals of (i) \$0.50 or greater where the strike price is less than \$100, and \$1 or greater where the strike price is between \$100 and \$150 for all option classes that participate in the Short Term Options Series Program; (ii) \$0.50 for option classes that trade in one dollar increments and are in the Short Term Option Series Program; or (iii) \$2.50 or greater where the strike price is above \$150.²⁰ Additionally, the Exchange may list series of options pursuant to the \$1 Strike Price Interval Program,²¹ the \$0.50 Strike Program,²² and the \$2.50 Strike Price Program.²³ Rule 7050 governs the minimum increment for bids and offers for options traded on BOX. Pursuant to Rule 7050, where the price of a series of options for the Trust is less than \$3.00 the minimum increment will be \$0.05, and where the price is \$3.00 or higher, the minimum increment will be \$0.10²⁴ consistent with the minimum increments for options on other ETFs listed on BOX. Any and all new series of Trust options that BOX lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Rules 5050 and 7050, as applicable. Position and exercise limits for options on ETFs, including options on the Trust, are determined pursuant to

¹⁹ See Rule 5050(d)(6).

²⁰ See IM–5050–6.

²¹ See IM–5050–2.

²² See IM–5050–5.

²³ See IM–5050–3.

²⁴ Options that are eligible to participate in the Penny Interval Program have a minimum increment of \$0.01 below \$3.00 and \$0.05 above \$3.00. See Rule 7260.

Rules 3120 and 3140, respectively. Position and exercise limits for ETFs options vary according to the number of outstanding shares and the trading volumes of the underlying ETF over the past six months, where the largest in capitalization and the most frequently traded ETFs have an option position and exercise limit of 250,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market; and smaller capitalization ETFs have position and exercise limits of 200,000, 75,000, 50,000 or 25,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market. Notwithstanding the position limits in Rule 3120 and exercise limits in Rule 3140, the Exchange proposes the position and exercise limits for the options on the Trust to be 25,000 contracts on the same side pursuant to proposed IM–3120–2. Capping the position and exercise limits at 25,000 contracts, the lowest limits available in options, would address concerns related to manipulation and protection of investors as this number is extremely conservative for the Trust and is more than appropriate given its liquidity.

For purposes of addressing position and exercise limits, the Exchange applies position and exercise limits for options for each underlying security and does not aggregate position and exercise limits. In considering the appropriate position and exercise limits for the Trust, the Exchange reviewed the data presented by ISE in its filing, specifically in Exhibit 3 of the filing,²⁵ where ISE measured the Trust’s market capitalization and ADV against other industry data as explained further below. The Commission should consider the position and exercise limits for options on the Trust exclusive of other options on Bitcoin. In its filing, ISE considered the Trust’s market capitalization and ADV, and prospective position limit in relation to other securities. In measuring the Trust against other securities, ISE aggregated market capitalization and volume data for securities that have defined position limits utilizing data from The Options

²⁵ See Securities Exchange Act Release No. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR–ISE–2024–03) (Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1, 4, and 5, to Permit the Listing and Trading of Options on the iShares Bitcoin Trust) (Exhibit 3) (“IBIT Approval Order”) (letter from Angela Dunn, Nasdaq ISE, LLC, to Vanessa Countryman, Secretary, Commission, dated August 21, 2024) (“ISE Letter”).

Clearing Corporations (“OCC”).²⁶ This pool of data took into consideration 3,984 options on single stock securities, excluding broad based ETFs.²⁷ Next, ISE aggregated the data based on market capitalization and ADV and grouped option symbols by position limit utilizing statistical thresholds for ADV and market capitalization that were one standard deviation above the mean for each position limit category (*i.e.*, 25,000, 50,000 to 65,000, 75,000, 100,000 to less than 250,000, 250,000 to 400,000, 450,000 to 1,000,000, and greater than or equal to 1,000,000) (*sic*).²⁸ Rule 3120(d) sets out position limits for various contracts. For example, on the Exchange like on ISE, a 25,000 contract limit applies to those options having an underlying security that does not meet the requirements for a higher options contract limit. ISE performed an exercise to demonstrate the Trust’s position limit relative to other options symbols in terms of market capitalization and ADV. For reference the market capitalization for the Trust was 19,789,068 billion²⁹ with an ADV, for the preceding three months prior to August 7, 2024, of greater than 26 million shares.³⁰ Today, by comparison, other options symbols with similar market capitalization and ADV have a position limit in excess of 400,000.³¹ Therefore, the proposed 25,000 same side position limit for options on the Trust is extremely conservative relative to these options symbols which are a full standard deviation above the mean in comparison. Second, ISE reviewed the Trust’s data relative to the market capitalization of the entire Bitcoin market in terms of exercise risk and availability of deliverables. Utilizing data as of August 3, 2024, there were 19,737,193 Bitcoins in circulation.³² ISE took a price of \$57,000 that equates to a market capitalization of greater than 1.125 trillion US dollars, and applied that to a position limit of 400,000 for

options on the Trust.³³ If a position limit of 400,000 options were considered (the position limit that would be typically assigned based upon data) the exercisable risk would represent only 6.6% of the outstanding shares of the Trust. The 25,000 position limit being sought only represents 0.4% of the outstanding shares of the Trust. Since the Trust has a creation and redemption process managed through the issuer, additionally it can be compared the position limit sought to the total market capitalization of the entire Bitcoin market. In this case, the exercisable risk for options on the Trust would be less than 0.01% of the market capitalization of all outstanding Bitcoin. Assuming a scenario where all options on the Trust’s shares were exercised given the proposed 25,000 per same side position limit, this would have a virtually unnoticed impact on the entire Bitcoin market. This analysis demonstrates that the proposed 25,000 per same side position limit is also extremely conservative and more than appropriate for options on the Trust. Third, ISE reviewed the proposed position limit by comparing it to position limits for derivative products regulated by the Commodity Futures Trading Commission (“CFTC”). While the CFTC, through the relevant Designated Contract Markets, only regulates options positions based upon delta equivalents (creating a less stringent standard), ISE examined equivalent Bitcoin futures position limits. In particular, ISE looked at the CME Bitcoin futures contract³⁴ that has a position limit of 2,000 futures.³⁵ On August 7, 2024, CME Bitcoin futures settled at \$55,000.³⁶ Taking the position limit of 2,000 futures at a \$5 multiplier³⁷ equates to \$550 million of notional value for Bitcoin futures. By way of comparison, on August 7, 2024, the Trust settled at \$31.19 per share, which would equate to 17,633,857 shares of the Trust³⁸ if the CME notional position limit were utilized.

Since substantial portions of any distributed options portfolio are likely to be out of the money on expiration, an options position limit equivalent to the CME position limit for Bitcoin futures (considering that all options deltas are ≤ 1.00) should be a bit higher than the CME implied 176,338 limit. Of note, unlike options contracts, CME position limits are calculated on a net futures equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an aggregation ratio(s).³⁹ Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.⁴⁰ If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day’s close of trading, but does not exceed the limits when evaluated using the previous day’s delta factors, then the position shall not constitute a position limit violation. Considering CME’s position limits on futures for bitcoin, the Exchange believes that that the proposed 25,000 per same side position limit is conservative and more than appropriate for options on the Trust.

In analyzing the proposed position limit for options on the Trust, ISE also considered the supply of Bitcoin. Specifically, ISE examined the number of market participants with position limits that would need to exercise in unison to put the underlying asset under stress. In the case of options on the Trust, the proposed 25,000 same side position limit effectively restricts a market participant from holding positions that could be exercised in excess of 2,500,000 shares of the Trust. Utilizing data from August 12, 2024, the Trust had 611,040,000 shares outstanding, therefore 244 market participants would have to simultaneously exercise position limits in order to create a scenario that may put the underlying asset (the Trust)

²⁶ The computations are based on OCC data from August 6, 2024. Data displaying zero values in market capitalization or ADV were removed.

²⁷ The Trust has one asset and therefore is not comparable to a broad based ETF where there are typically multiple components.

²⁸ See ISE Letter at 10.

²⁹ ISE acquired this figure as of August 13, 2024. See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust>. The global supply of Bitcoin grows each day Bitcoin are minted.

⁴⁰ *Id.*

under stress.⁴¹ As unlikely an occurrence as all market participants exercising their position limits in unison would be, if it were to occur, it should be noted that even such an occurrence would not likely put the Trust under stress as economic incentives, would induce the creation of more shares through the ETF creation and redemption process. By way of example, given that the current global supply of Bitcoin, the underlying asset of the Trust, is 19,789,068⁴² and that each Bitcoin can currently be redeemed for 1,755 shares of the Trust, another 34,729,814,340 shares of the Trust could be created. To exhaust this supply of the Trust, 13,891 market participants would have to simultaneously exercise their position limit. Comparing the Trust to the SPDR® Gold Shares (“GLD”) ETF or the iShares Silver Trust (“SLV”) ETF, which have position limits of 250,000 or ten times the proposed position limit for the Trust as well as lower shares outstanding in both products,⁴³ it is unjustified to mandate a different level of stringency with respect to a position limit for options on the Trust. The supply of Bitcoin does have a limit, which will take years to fully mint.⁴⁴ The Exchange notes that Bitcoin is a viable economic alternative to traditional assets. The price of goods denominated by Bitcoin has actually declined. This dynamic not only makes a fixed supply desirable, but a necessary condition of the value added by this asset in the broader economy. Further, the Exchange notes that corporations have a limited number of outstanding shares. Corporations may authorize additional shares, repurchase shares or split their shares. Similarly, ETFs, like the Trust, may also create, redeem, or split shares to suit the demand of the marketplace. Importantly, because the supply of Bitcoin is much larger than the available supply of most securities and the proposed 25,000 contract position limit is so conservative, the Exchange believes that evaluating the available supply of Bitcoin in

establishing a position limit for options on the Trust would demonstrate that the proposed limit is safe for investors and the market.⁴⁵ The Trust constitutes less than 2% of the entire Bitcoin supply. When comparing the market capitalization of Bitcoin against the largest securities, Bitcoin would rank 7th among those securities.⁴⁶ Further, the Exchange believes that its proposal to list options on the Trust with a position limit of 25,000 on the same side is a conservative position limit that does not lend itself to manipulation in the market given the ample market capitalization and liquidity in the Trust. If we look to the liquidity statistics of similar instruments and their concomitant position limits, we are able to extrapolate a reasonable standard for arriving at a position limit for a new product. In this case we can look to GLD, SLV, and the ProShares Bitcoin Strategy ETF (“BITO”). These products have volume statistics and “float” statistics, which gauge liquidity, which are in line, yet slightly lower than the Trust. All three of these reference products have position limits of 250,000 contracts. These reference products are remarkably similar in nature to the Trust; they are exchange-traded products (“ETPs”) holding one asset in a trust.

Further, Rule Series 10100, which governs margin requirements applicable to the trading of all options on BOX including options on ETFs, will also apply to the trading of the Trust options.

Lastly, Rule 5055(e)(2)(i) permits the Exchange to authorize for trading a FLEX Equity Option class on any equity security if it may authorize for trading a Non-FLEX Equity Option class on that equity security pursuant to Rule 5020.⁴⁷ At this time, the Exchange is not proposing to permit Trust options to trade as FLEX Equity Options.⁴⁸ The Exchange therefore proposes to modify Rule 5055(e)(2)(i) to specify this exception, which will add clarity and transparency to the Exchange Rules.⁴⁹

The Exchange represents that the same surveillance procedures applicable to all other options on other ETFs currently listed and traded on the Exchange will apply to options on the

Trust. Also, the Exchange represents that it has the necessary systems capacity to support the new option series. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading options on ETFs, including the proposed Trust options.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options on the Trust that it applies to the Exchange’s other options products.⁵⁰ The Exchange would review activity in the underlying Trust when conducting surveillances for market abuse or manipulation in the options on the Trust. Additionally, the Exchange is a member of the Intermarket Surveillance Group (“ISG”) under the Intermarket Surveillance Group Agreement. The Exchange would be able to obtain information regarding trading in shares of the Trust from Nasdaq and other markets that trade shares of the Trust through ISG. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority (“FINRA”). Pursuant to a multi-party 17d–2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.⁵¹

The underlying shares of spot Bitcoin ETPs, including the Trust, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission

⁵⁰ The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (e.g., spoofing, marking the close, phishing).

⁵¹ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO’s own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d–2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO (“common members”). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

⁴¹ See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust>.

⁴² This figure was acquired as of August 13, 2024. See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust>. The global supply of bitcoin grows each day bitcoin are minted.

⁴³ As of August 13, 2024, GLD had 294,000,000 shares outstanding and SLV had 510,200,000 shares outstanding. See <https://www.ssga.com/us/en/intermediary/etfs/funds/spdr-gold-shares-gld> and <https://www.ishares.com/us/products/239855/ishares-silver-trust-fund>.

⁴⁴ A recent article suggested that the remaining supply will take over 100 years to fully mint. See Sen, Vivek, “94% of Bitcoin’s Supply Has Now Been Issued,” Bitcoin Magazine, <https://bitcoinmagazine.com/business/94-of-bitcoins-supply-has-now-been-issued>. August 19, 2024.

⁴⁵ A supply consideration would likely be valuable for an option symbol that had far less liquidity than the Trust.

⁴⁶ See <https://companiesmarketcap.com/usa/largest-companies-in-the-usa-by-market-cap/>.

⁴⁷ See Rule 5055(e)(2)(i).

⁴⁸ The Exchange would be required to submit a separate rule filing to permit the Exchange to authorize for trading FLEX Equity Options on the Trust (which filing may propose changes to existing FLEX Equity Option position limits for such options if appropriate).

⁴⁹ See proposed Rule 5055(e)(2)(i).

stated in its orders approving proposals of several exchanges to list and trade shares of spot bitcoin-based exchange-traded products (“Bitcoin ETP Order”): Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.⁵² Given the consistently high correlation between the CME Bitcoin futures market and the spot Bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be “expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs].”⁵³ In light of surveillance measures related to both options and futures as well as the underlying Trust,⁵⁴ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Trust.

The Exchange has also analyzed its capacity and represents that it believes the Exchange and the Options Price Reporting Authority or “OPRA” have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on the Trust up to the number of expirations currently permissible under the Exchange Rules. Because the proposal is limited to one class, the Exchange believes any additional traffic that may be generated from the introduction of the Trust options will be manageable.

Finally, the Exchange proposes a technical amendment to Rule

5020(h)(iv) to amend the names “ETFS Gold Trust” to “abrdn Gold ETF Trust,”⁵⁵ “ETFS Silver Trust” to “abrdn Silver ETF Trust,”⁵⁶ “ETFS Palladium Trust” to “abrdn Palladium ETF Trust,”⁵⁷ and “ETFS Platinum Trust” to “abrdn Platinum ETF Trust.”⁵⁸ In 2018 and again in 2022 these trusts were renamed. As such, the Exchange proposes to amend the names of the ETFs to reflect their current names.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Securities Exchange Act of 1934 (the “Act”),⁵⁹ in general, and Section 6(b)(5) of the Act,⁶⁰ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

In particular, the Exchange believes that the proposal to list and trade options on the Trust will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because offering options on the Trust will

provide investors with a greater opportunity to realize the benefits of utilizing options on an ETF based on spot Bitcoin, including cost efficiencies and increased hedging strategies. The Exchange believes that offering options on a competitively priced ETF based on spot Bitcoin will benefit investors by providing them with an additional, relatively lower cost risk management tool allowing them to manage, more easily, their positions, and associated risks, in their portfolios in connection with exposure to spot Bitcoin. Today, BOX lists options on other commodity ETFs structured as a trust, which essentially offer the same objectives and benefits to investors, and for which the Exchange has not identified any issues with the continued listing and trading of options on those ETFs. The Exchange also believes the proposal to permit options on the Trust will remove impediments to and perfect the mechanism of a free and open market and a national market system because options on the Trust will comply with current Exchange Rules. As discussed above, options on the Trust must satisfy the initial listing standards and continued listing standards currently in the Exchange Rules, applicable to options on all ETFs, including options on other commodity ETFs already deemed appropriate for options trading on BOX pursuant to Rule 5020(h). Further, Exchange Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (including as proposed herein), and margin requirements will govern the listing and trading of options on the Trust. The proposed position and exercise limits for options on the Trust is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given the Trust’s market capitalization, average daily volume, and high number of outstanding shares. The proposed position limit, and exercise limit, is consistent with the Act as it addresses concerns related to manipulation and protection of investors because the position limit (and exercise limit) is extremely conservative and more than appropriate given the Trust is actively traded. In support of the proposed position and exercise limits for options on the Trust of 25,000 contracts, the Exchange is citing the in depth analysis ISE did in its filing. As noted above, in the IBIT Approval Order, ISE considered the: (i) Trust’s market

⁵⁵ Effective October 1, 2018, ETFS Gold Trust was renamed Aberdeen Standard Gold ETF Trust. See <https://www.sec.gov/Archives/edgar/data/1450923/000138713118005292/ex10-2.htm>. Effective March 31, 2022, Aberdeen Standard Gold ETF Trust was renamed abrdn Gold ETF Trust. See <https://www.sec.gov/Archives/edgar/data/1450923/000138713122003628/ex10-2.htm>.

⁵⁶ Effective October 1, 2018 ETFS Silver Trust was renamed Aberdeen Standard Silver ETF Trust. See <https://www.sec.gov/Archives/edgar/data/1450922/000138713118005294/ex10-2.htm>. Effective March 31, 2022 Aberdeen Standard Silver ETF Trust was renamed abrdn Silver ETF Trust. See <https://www.sec.gov/Archives/edgar/data/1450922/000138713122003632/ex10-2.htm>.

⁵⁷ Effective October 1, 2018 ETFS Palladium Trust was renamed Aberdeen Standard Palladium ETF Trust. See <https://www.sec.gov/Archives/edgar/data/1459862/000138713118005304/ex10-2.htm>. Effective March 31, 2022 Aberdeen Standard Palladium ETF Trust was renamed abrdn Palladium ETF Trust. See <https://www.sec.gov/Archives/edgar/data/1459862/000138713122003629/ex10-2.htm>.

⁵⁸ Effective October 1, 2018 ETFS Platinum Trust was renamed Aberdeen Standard Platinum ETF Trust. See <https://www.sec.gov/Archives/edgar/data/1460235/000138713118005301/ex10-2.htm>. Effective March 31, 2022 Aberdeen Standard Platinum ETF Trust was renamed abrdn Platinum ETF Trust. See <https://www.sec.gov/Archives/edgar/data/1460235/000138713122003633/ex10-2.htm>.

⁵⁹ 15 U.S.C. 78f(b).

⁶⁰ 15 U.S.C. 78f(b)(5).

capitalization and ADV, and prospective position limit in relation to other securities; (ii) market capitalization of the entire Bitcoin market in terms of exercise risk and availability of deliverables; (iii) proposed position limit by comparing it to position limits for derivative products regulated by the CFTC; and (iv) supply of Bitcoin. Based on the Exchange's review of IBIT Approval Order, the Exchange believes that setting position and exercise limits for options on the Trust of 25,000 contracts is more than appropriate for the Trust. The proposed position and exercise limits reasonably and appropriately balance the liquidity provisioning in the market against the prevention of manipulation. The Exchange believes these proposed limits are effectively designed to prevent an individual customer or entity from establishing options positions that could be used to manipulate the market of the underlying as well as the Bitcoin market.⁶¹

The Exchange believes the proposed rule change to exclude options on the Trust from being eligible for trading as FLEX Equity Options is consistent with the Act because, without this prohibition, trading a FLEX Equity Option in the Trust would otherwise establish different position and exercise limits than those proposed herein.⁶²

The Exchange represents that BOX has the necessary systems capacity to support options on the Trust. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs, including the Trust options.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options on the Trust that it applies to the Exchange's other options products.⁶³ The Exchange will review activity in the underlying Trust when conducting surveillances for market abuse or manipulation in the options on the Trust. Additionally, the Exchange is a member of the ISG under the Intermarket Surveillance Group

Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. The Exchange will be able to obtain information from Nasdaq, LLC and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with FINRA. Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.⁶⁴

The underlying shares of spot bitcoin ETPs, including the Trust, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in Bitcoin ETP Order:

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.⁶⁵

Given the consistently high correlation between the CME Bitcoin futures market and the spot Bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs]." ⁶⁶

In light of surveillance measures related to both options and futures as well as the underlying Trust,⁶⁷ the

Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Trust. Further, the Exchange represents that it will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Trust.

Finally, the Commission has previously approved the listing and trading of options on other commodity ETFs structured as a trust, such as SPDR® Gold Trust,⁶⁸ the iShares COMEX Gold Trust⁶⁹ the iShares Silver Trust,⁷⁰ the ETFS Gold Trust,⁷¹ and the ETFS Silver Trust.⁷²

Further, the Exchange's proposal to amend the names "ETFS Gold Trust" to "abrdn Gold ETF Trust," "ETFS Silver trust" to "abrdn Silver ETF Trust," "ETFS Palladium Trust" to "abrdn Palladium ETF Trust," and "ETFS Platinum Trust" to "abrdn Platinum ETF Trust" in Rule 5020(h)(iv) is consistent with the Act and the protection of investors as this amendment reflects the current names of these products.

The Exchange notes that the proposed rule change is substantively the same as a rule change proposed by Nasdaq ISE which the Commission recently approved.⁷³

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance

⁶⁸ See Securities Exchange Act Release No. 57897 (May 30, 2008), 73 FR 32061 (June 5, 2008) (SR-Amex-2008-15; SR-CBOE-2005-11; SR-ISE-2008-12; SR-NYSEArca-2008-52; and SR-Phlx-2008-17) (Order Granting Approval of a Proposed Rule Change, as Modified, and Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Changes, as Modified, Relating to Listing and Trading Options on the SPDR Gold Trust).

⁶⁹ See Securities Exchange Act Release No. 59055 (December 4, 2008), 73 FR 75148 (December 10, 2008) (SR-Amex-2008-68; SR-BSE-2008-51; SR-CBOE-2008-72; SR-ISE-2008-58; SR-NYSEArca-2008-66; and SR-Phlx-2008-58) (Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Changes Relating to the Listing and Trading Options on Shares of the iShares COMEX Gold Trust and the iShares Silver Trust).

⁷⁰ *Id.*

⁷¹ See Securities Exchange Act Release No. 61483 (February 3, 2010), 75 FR 6753 (February 10, 2010) (SR-CBOE-2010-007; SR-ISE-2009-106; SR-NYSEAmex-2009-86; and SR-NYSEArca-2009-110) (Order Granting Approval of Proposed Rule Changes and Notice of Filing and Order Granting Accelerated Approval of a Proposed Rule Change Relating to Listing and Trading Options on the ETFS Gold Trust and the ETFS Silver Trust).

⁷² *Id.*

⁷³ See *supra* note 3.

⁶¹ See Securities Exchange Act Release No. 39489 (December 24, 1997), 63 FR 276 (January 5, 1998) (SR-CBOE-1997-11).

⁶² The Exchange would need to submit a separate rule filing to permit the Exchange to authorize for trading FLEX Equity Options on the Trust (which filing may propose changes to existing FLEX Equity Option position limits for such options if appropriate).

⁶³ The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (e.g., spoofing, marking the close, phishing).

⁶⁴ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO ("common members"). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

⁶⁵ See *supra* note 4.

⁶⁶ See Bitcoin ETP Order, 89 FR at 3010-11.

⁶⁷ See Securities Exchange Act Release No. 99295 (January 8, 2024), 89 FR 2321, 2334-35 (January 12, 2024) (SR-NASDAQ-2023-016) (Notice of Filing of Amendment No. 1 to a Proposed Rule Change To List and Trade Shares of the iShares Bitcoin Trust Under Nasdaq Rule 5711(d)).

of the purposes of the Act. In this regard and as indicated above, the Exchange notes that the rule change is being proposed as a competitive response to a filing submitted by Nasdaq ISE that was recently approved by the Commission.⁷⁴

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as options on the Trust will be subject to initial listing standards and continued listing standards the same as other options on ETFs listed on BOX. Further, options on the Trust will be subject to Exchange Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (including as proposed to modify herein), and margin requirements. Options on the Trust will be equally available to all market participants who wish to trade such options. Also, and as stated above, the Exchange already lists options on other commodity ETFs structured as a trust. The Exchange does not believe that the proposal to list and trade options on the Trust will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that permitting options on the Trust to trade on BOX may make BOX a more attractive marketplace to market participants, such market participants are free to elect to become market participants on BOX.

Additionally, other options exchanges are free to amend their listing rules, as applicable, to permit them to list and trade options on the Trust. The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition as it is designed to increase competition for order flow on BOX in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering options on the Trust for trading on BOX will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment needs in connection with spot Bitcoin prices and Bitcoin related products and positions.

Additionally, the Exchange's proposal to amend the names "ETFS Gold Trust"

to "abrdn Gold ETF Trust," "ETFS Silver Trust" to "abrdn Silver ETF Trust," "ETFS Palladium Trust" to "abrdn Palladium ETF Trust," and "ETFS Platinum Trust" to "abrdn Platinum ETF Trust" in Rule 5020(h)(iv) does not impose an undue burden on competition as this amendment reflects the current names of these products.

Finally, the proposed rule change to exclude options on the Trust from being eligible for trading as FLEX Equity Options does not impose an undue burden on competition as no BOX Participant will be able to transact a FLEX Equity Option on the Trust.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act⁷⁵ and Rule 19b-4(f)(6) thereunder.⁷⁶

A proposed rule change filed pursuant to Rule 19b-4(f)(6) under the Act normally does not become operative for 30 days after the date of its filing. However, Rule 19b-4(f)(6)(iii)⁷⁷ permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the shares of the Trust.⁷⁸ The Exchange has provided information regarding the underlying Trust, including, among other things, information regarding trading volume, the number of

beneficial holders, and the market capitalization of the Trust. The proposal also establishes position and exercise limits for options on the Trust and provides information regarding the surveillance procedures that will apply to options on the Trust. In addition, the proposal updates the names of certain commodity-based trusts, as described above, which will ensure that the Exchange's rules identify these trusts by their current names. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Bitcoin Fund options and helping to ensure that the accuracy of the Exchange's rules. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.⁷⁹

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-BOX-2024-27 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-BOX-2024-27. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use

⁷⁵ 15 U.S.C. 78s(b)(3)(A).

⁷⁶ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission waives this requirement.

⁷⁷ 17 CFR 240.19b-4(f)(6)(iii).

⁷⁸ See *supra* note 3.

⁷⁹ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁷⁴ *Id.*

only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-BOX-2024-27 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁸⁰

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101740; File No. SR-CboeBZX-2024-121]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To List Options on Certain Bitcoin ETFs

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 21, 2024, Cboe BZX Exchange, Inc. ("Exchange" or "BZX Options") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in

Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the "Exchange" or "BZX Options") proposes to amend Rule 19.3. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 19.3 regarding the criteria for underlying securities. Specifically, the Exchange proposes to amend Rule 19.3(i)(4) to allow the Exchange to list and trade options on shares or other securities ("Fund Shares") that are principally traded on a national securities exchange and are defined as an "NMS stock" under Rule 600 of Regulation NMS and that represent interests the iShares Bitcoin Trust (the "iShares Fund"), the Grayscale Bitcoin Trust (the "Grayscale Fund"), the Grayscale Bitcoin Mini Trust (the "Grayscale Mini Fund"), or the Bitwise Bitcoin ETF (the "Bitwise Fund" and, together with the iShares Fund, the Grayscale Fund, and the Grayscale Mini Fund, the "Bitcoin Funds").³ This is a

competitive filing based on similar proposals submitted by Nasdaq ISE, LLC ("ISE") (with respect to the iShares Fund) and NYSE American, LLC ("NYSE American") (with respect to the Grayscale Fund, the Grayscale Mini Fund, and the Bitwise Fund), which were recently approved by the Securities and Exchange Commission (the "Commission").⁴ Current Rule 19.3(i) provides that, subject to certain other criteria set forth in that Rule, securities deemed appropriate for options trading include Fund Shares that represent certain types of interests,⁵ including interests in certain specific trusts that hold financial instruments, money market instruments, precious metals (which are deemed

2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX-2023-040; SR-CboeBZX-2023-042; SR-CboeBZX-2023-044; and SR-CboeBZX-2023-072) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units) ("Bitcoin ETP Approval Order").

⁴ See Securities Exchange Act Release Nos. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR-ISE-2024-03) ("ISE Approval"); and 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR-NYSEAMER-2024-49) ("NYSE American Approval").

⁵ See Rule 19.3(i) which permits options trading on Fund Shares that (1) represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities, and that hold portfolios of securities comprising or otherwise based on or representing investments in indexes or portfolios of securities (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities) ("Funds") and/or financial instruments including, but not limited to, stock index futures contracts, options on futures, options on securities and indexes, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse repurchase agreements (the "Financial Instruments"), and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the "Money Market Instruments") constituting or otherwise based on or representing an investment in an index or portfolio of securities and/or Financial Instruments and Money Market Instruments, or (2) represent commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward 477 contracts and/or options on physical commodities and/or non-U.S. currency ("Commodity Pool ETFs") or (3) represent interests in a trust or similar entity that holds a specified non-U.S. currency or currencies deposited with the trust or similar entity when aggregated in some specified minimum number may be surrendered to the trust by the beneficial owner to receive the specified non-U.S. currency or currencies and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency or currencies, if any, declared and paid by the trust ("Currency Trust Shares"), or (4) represent interests in the SPDR Gold Trust or are issued by the iShares COMEX Gold Trust, iShares Silver Trust, the Fidelity Wise Origin Bitcoin Fund (the "Fidelity Fund"), or the ARK 21Shares Bitcoin ETF (the "Ark 21 Fund").

⁸⁰ 17 CFR 200.30-3(a)(12), (59).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008, 3009 (January 17, 2024) (SR-NYSEArca-2021-90; SR-NYSEArca-2023-44; SR-NYSEArca-2023-58; SR-NASDAQ-

commodities), or Bitcoin (which is deemed a commodity. In addition, Rule 19.3(i)(1) requires that Fund Shares meet the criteria and standards set forth in Rule 19.3(a) and (b)⁶ or (2) be available for creation or redemption each business day from or through the issuer in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue Fund Shares in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus.

The Bitcoin Funds are Bitcoin-backed commodity exchange-traded funds ("ETFs") structured as trusts. Similar to any Fund Share currently deemed appropriate for options trading under Rule 19.3(i), the investment objective of each Bitcoin Fund is for its shares to reflect the performance of Bitcoin (less the expenses of the trust's operations), offering investors an opportunity to gain exposure to Bitcoin without the complexities of Bitcoin delivery. As is the case for Fund Shares currently deemed appropriate for options trading, a Bitcoin Fund's shares represent units of fractional undivided beneficial interest in the trust, the assets of which consist principally of Bitcoin and are designed to track Bitcoin or the performance of the price of Bitcoin and offer access to the Bitcoin market.⁷ The Bitcoin Funds provide investors with cost-efficient alternatives that allow a level of participation in the Bitcoin market through the securities market. The primary substantive difference between Bitcoin Funds and Fund Shares currently deemed appropriate for options trading is that Fund Shares may hold securities, certain financial instruments, and specified precious metals (which are deemed commodities), while Bitcoin Funds hold Bitcoin (which is also deemed a commodity). The Bitcoin Funds are similar to the Fidelity Fund and the Ark 21 Fund, which are already eligible for options trading on the Exchange.⁸

The Exchange's initial listing standards for Fund Shares on which options may be listed and traded on the Exchange will apply to the Bitcoin Funds. Pursuant to Rule 19.3(a), a security (which includes a Fund Share) on which options may be listed and traded on the Exchange must be registered with the Securities and Exchange Commission (the "Commission") and be an "NMS stock" as defined in Rule 600 of Regulation NMS under the Securities Exchange Act of 1934, as amended (the "Act"); and the security shall be characterized by a substantial number of outstanding shares that are widely held and actively traded. Rule 19.3(i)(1) requires that Fund Shares either (1) meet the criteria and standards set forth in Rule 19.3(a) and (b),⁹ or (2) are available for creation or redemption each business day in cash or in kind from the investment company, commodity pool or other entity at a price related to net asset value, and the investment company, commodity pool or other entity is obligated to provide that Fund Shares may be created even if some or all of the securities and/or cash required to be deposited have not been received by the Fund, the unit investment trust or the management investment company, provided the authorized creation participant has undertaken to deliver the securities and/or cash as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the Fund, all as described in the Fund's or unit trust's prospectus. Each Bitcoin Fund satisfies Rule 19.3(i)(1)(B) as each is subject to this creation and redemption process.

Options on the Bitcoin Funds will be subject to the Exchange's continued listing standards set forth in Rule 19.4(g) for Fund Shares deemed appropriate for options trading pursuant to Rule 19.3(i). Specifically, 19.4(g) provides that Fund Shares that were initially approved for options trading pursuant to Rule 19.3 will not be deemed to meet the requirements for continued approval, and the Exchange shall not open for trading any additional series of option contracts of the class covering such Fund Shares if the security ceases to be an NMS stock (see Rule 19.4(b)(4)). Additionally, the Exchange will not open for trading any additional series of option contracts of the class covering Fund Shares in any of the following circumstances: (1) in the case of options

covering Fund Shares approved for trading under Rule 19.3(i)(4)(A), in accordance with the terms of Rule 19.4(b)(1), (2) and (3); (2) in the case of options covering Fund Shares approved pursuant to Rule 19.3(i)(4)(B), following the initial 12-month period beginning upon the commencement of trading in the Fund Shares on a national securities exchange and are defined as NMS stock under Rule 600 of Regulation NMS, there were fewer than 50 record and/or beneficial holders of such Fund Shares for 30 consecutive days; (3) the value of the index, non-U.S. currency, portfolio of commodities including commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or Financial Instruments or Money Market Instruments, or portfolio of securities on which the Fund Shares are based is no longer calculated or available; or (4) such other event occurs or condition exists that in the opinion of the Exchange makes further dealing in such options on the Exchange inadvisable.

Options on each Bitcoin Fund will be physically settled contracts with American-style exercise.¹⁰ Consistent with current Rule 19.6, which governs the opening of options series on a specific underlying security (including Fund Shares), the Exchange will open at least one expiration month for options on each Bitcoin Fund¹¹ at the

¹⁰ See Rule 19.2, which provides that the rights and obligations of holders and writers are set forth in the Rules of the Options Clearing Corporation ("OCC"); and Equity Options Product Specifications January 3, 2024), available at Equity Options Specifications (cboe.com); see also OCC Rules, Chapters VIII (which governs exercise and assignment) and Chapter IX (which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts).

¹¹ See Rule 19.6(b). The monthly expirations are subject to certain listing criteria for underlying securities described within Rule 19.3. Monthly listings expire the third Friday of the month. The term "expiration date" (unless separately defined elsewhere in the OCC By-Laws), when used in respect of an option contract (subject to certain exceptions), means the third Friday of the expiration month of such option contract, or if such Friday is a day on which the exchange on which such option is listed is not open for business, the preceding day on which such exchange is open for business. See OCC By-Laws Article I, Section 1. Pursuant to Rule 19.6(c), additional series of options of the same class may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying stock moves more than five strike prices from the initial exercise price or prices. New series of options on an individual stock may be added until the beginning of the month in which the options contract will expire. Due to unusual market conditions, the Exchange, in its discretion, may add a new series of options on an individual stock until the close of trading on the business day prior to expiration.

⁶ Rule 19.3(a) and (b) sets forth the criteria that underlying securities must satisfy for option contracts on those underlying securities to be eligible for listing and trading on the Exchange.

⁷ The trust may include minimal cash.

⁸ See Rule 19.3(i); and SR-CboeBZX-2024-118 (filed November 21, 2024).

⁹ Rule 19.3(a) and (b) sets forth the criteria an underlying security must meet for the Exchange to be able to list options on the underlying.

commencement of trading on the Exchange and may also list series of options on a Bitcoin Fund for trading on a weekly,¹² monthly,¹³ or quarterly¹⁴ basis. The Exchange may also list long-term equity option series (“LEAPS”) that expire from 12 to 39 months from the time they are listed.¹⁵

Pursuant to Rule 19.6, Interpretation and Policy .01, which governs strike prices of series of options on Fund Shares, the interval of strikes prices for series of options on Bitcoin Funds will be \$1 or greater when the strike price is \$200 or less and \$5 or greater where the strike price is over \$200.¹⁶ Additionally, the Exchange may list series of options pursuant to the \$1 Strike Price Interval Program,¹⁷ the \$0.50 Strike Program,¹⁸ the \$2.50 Strike Price Program,¹⁹ and the \$5 Strike Program.²⁰ Pursuant to Rule 21.5, where the price of a series of a Bitcoin Fund option is less than \$3.00, the minimum increment will be \$0.05, and where the price is \$3.00 or higher, the minimum increment will be \$0.10.²¹ Any and all new series of Bitcoin Fund options that the Exchange lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Rules 19.6 and 21.5, as applicable.

Bitcoin Fund options will trade in the same manner as any other Fund Share options on the Exchange. The Exchange Rules that currently apply to the listing and trading of all Fund Share options on the Exchange, including, for example, Rules that govern listing criteria, expirations, exercise prices, minimum increments, margin requirements, customer accounts, and trading halt procedures will apply to the listing and trading of Bitcoin Funds options on the Exchange in the same manner as they apply to other options on all other Fund Shares that are listed and traded on the Exchange, including the precious-metal

backed commodity Fund Shares and the Fidelity and Ark 21 Funds already deemed appropriate for options trading on the Exchange pursuant to current already deemed appropriate for options trading on the Exchange pursuant to current Rule 19.3(i).

Pursuant to Rules 18.7 and 18.9, the position and exercise limits, respectively, for each Bitcoin Fund option will be 25,000 same side option contracts.²² In considering the appropriate position and exercise limits for the Bitcoin Funds, the Exchange reviewed the data presented by ISE in its filing (specifically in Exhibit 3 of the filing) with respect to the iShares Fund²³ and by NYSE American in its filing with respect to the Grayscale Fund, the Grayscale Mini Fund, and the Bitwise Fund.²⁴

With respect to the iShares Fund, in its filing, ISE considered the iShares Fund market capitalization and average daily volume (“ADV”) against those of other underlying securities, as well as the proposed position limit in relation to other options. In measuring the iShares Fund against other securities, ISE aggregated market capitalization and volume data for securities that have defined position limits utilizing data from The Options Clearing Corporations (“OCC”).²⁵ This pool of data took into consideration 3,984 options on single stock securities, excluding broad based ETFs.²⁶ Next, ISE aggregated the data based on market capitalization and ADV and grouped option symbols by position limit utilizing statistical thresholds for ADV and market capitalization that were one standard deviation above the mean for each position limit category (*i.e.*, 25,000, 50,000 to 65,000, 75,000, 100,000 to less than 250,000, 250,000 to 400,000, 450,000 to 1,000,000, and greater than or equal to 1,000,000)

(sic).²⁷ Rule 8.30 sets out position limits for various contracts. For example, on the Exchange, like ISE, a 25,000 contract position limit applies to options with an underlying security that does not meet the requirements for a higher options contract position limit. ISE performed an exercise to demonstrate the iShares Fund position limit relative to other options symbols in terms of market capitalization and ADV. For reference the market capitalization for the iShares Fund was 19,789,068 billion²⁸ with an ADV, for the preceding three months prior to August 7, 2024, of greater than 26 million shares.²⁹ By comparison, other options symbols with similar market capitalization and ADV have a position limit in excess of 400,000.³⁰ Therefore, the proposed 25,000 same side position limit for options on the iShares Fund is extremely conservative relative to these options symbols which are a full standard deviation above the mean in comparison.

Second, ISE reviewed the iShares Fund’s data relative to the market capitalization of the entire Bitcoin market in terms of exercise risk and availability of deliverables. Utilizing data as of August 3, 2024, there were 19,737,193 Bitcoins in circulation.³¹ ISE took a price of \$57,000 that equates to a market capitalization of greater than 1.125 trillion U.S. dollars, and applied that to a position limit of 400,000 for options on the iShares Fund.³² If a position limit of 400,000 options were considered (the position limit that would be typically assigned based upon data) the exercisable risk would represent only 6.6% of the outstanding shares of the iShares Fund. The 25,000 position limit being sought only represents 0.4% of the outstanding shares of the iShares Fund. Since the iShares Fund has a creation and redemption process managed through the issuer, additionally it can be compared the position limit sought to the total market capitalization of the entire Bitcoin market. In this case, the exercisable risk for options on the iShares Fund would be less than 0.01% of the market capitalization of all

¹² See Rule 19.6, Interpretation and Policy .05.

¹³ See Rule 19.6, Interpretation and Policy .08.

¹⁴ See Rule 19.6, Interpretation and Policy .04.

¹⁵ See Rule 19.8.

¹⁶ The Exchange notes that for options listed pursuant to the Short Term Option Series Program, the Monthly Options Series Program, and the Quarterly Options Series Program, Rule 19.6, Interpretations and Policies .05, .08, and .04 specifically sets forth intervals between strike prices on Quarterly Options Series, Short Term Option Series, and Monthly Options Series, respectively.

¹⁷ See Rule 19.6, Interpretation and Policy .02.

¹⁸ See Rule 19.6, Interpretation and Policy .06.

¹⁹ See Rule 19.6, Interpretation and Policy .03.

²⁰ See Rule 19.6(d)(5).

²¹ If options on a Bitcoin Fund are eligible to participate in the Penny Interval Program, the minimum increment will be \$0.01 for series with a price below \$3.00 and \$0.05 for series with a price at or above \$3.00. See 21.5(d) (which describes the requirements for the Penny Interval Program).

²² Rule 18.7(a)(1) provides that no Options Member shall make, for any account in which it has any interest or for the account of any Customer, an opening transaction on any exchange if the Options Member has reason to believe that as a result of such transaction the Options Member or its Customer would, acting alone or in concert with others, directly or indirectly, exceed the applicable position limit fixed by Cboe Exchange, Inc. (“Cboe Options”). Cboe Options Rule 8.30, Interpretation and Policy .10 establishes a position limit for the Bitcoin Fund options of 25,000. See SR-CBOE-2024-051.

²³ See ISE Approval; and Letter from Angela Dunn, Nasdaq ISE, LLC, to Vanessa Countryman, Secretary, Commission, dated August 21, 2024) (“ISE Letter”).

²⁴ See NYSE American Approval.

²⁵ The computations are based on OCC data from August 6, 2024. Data displaying zero values in market capitalization or ADV were removed.

²⁶ The iShares Fund has one asset and therefore is not comparable to a broad based ETF where there are typically multiple components.

²⁷ See ISE Letter at 10.

²⁸ ISE acquired this figure as of August 13, 2024. See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust>. The global supply of Bitcoin grows each day Bitcoin are minted.

²⁹ See ISE Letter at 10.

³⁰ See, e.g., iShares® iBoxx® \$ High Yield Corporate Bond ETF (“HYG”) with a market capitalization of 13,859,235,000 billion as of November 4, 2024. See <https://www.ishares.com/us/products/239565/ishares-iboxx-high-yield-corporate-bond-etf>. The Exchange notes that HYG has a position limit of 500,000 contracts.

³¹ See ISE Letter at 10.

³² *Id.*

outstanding Bitcoin. Assuming a scenario where all options on the iShares Fund's shares were exercised given the proposed 25,000 per same side position limit, this would have a virtually unnoticed impact on the entire Bitcoin market. This analysis demonstrates that the proposed 25,000 per same side position limit is also extremely conservative and more than appropriate for options on the iShares Fund.

Third, ISE reviewed the proposed position limit by comparing it to position limits for derivative products regulated by the Commodity Futures Trading Commission ("CFTC"). While the CFTC, through the relevant Designated Contract Markets, only regulates options positions based upon delta equivalents (creating a less stringent standard), ISE examined equivalent bitcoin futures position limits. In particular, ISE looked at the CME Bitcoin futures contract that has a position limit of 2,000 futures.³³ On August 7, 2024, CME Bitcoin futures settled at \$55,000.³⁴ Taking the position limit of 2,000 futures at a \$5 multiplier equates to \$550 million of notional value for Bitcoin futures. By way of comparison, on August 7, 2024, the iShares Fund settled at \$31.19 per share, which would equate to 17,633,857 shares of the iShares Fund³⁵ if the CME notional position limit were utilized. Since substantial portions of any distributed options portfolio are likely to be out of the money on expiration, an options position limit equivalent to the CME position limit for Bitcoin futures (considering that all options deltas are ≤ 1.00) should be a bit higher than the CME implied 176,338 limit.

The Exchange notes, unlike options contracts, CME position limits are calculated on a net futures-equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an aggregation ratio(s).³⁶ Therefore, if a portfolio

includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.³⁷ If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading but does not exceed the limits when evaluated using the previous day's delta factors, then the position shall not constitute a position limit violation. Considering CME's position limits on futures for Bitcoin, the Exchange believes that that the proposed same side position limits are more than appropriate for the iShares Fund options.

In analyzing the proposed position limit for options on the iShares Fund, ISE also considered the supply of Bitcoin. Specifically, ISE examined the number of market participants with position limits that would need to exercise in unison to put the underlying asset under stress. In the case of options on the iShares Fund, the proposed 25,000 same side position limit effectively restricts a market participant from holding positions that could be exercised in excess of 2,500,000 shares of the iShares Fund. Utilizing data from August 12, 2024, the iShares Fund had 611,040,000 shares outstanding, therefore 244 market participants would have to simultaneously exercise position limits in order to create a scenario that may put the underlying asset (iShares Fund) under stress.³⁸ The Exchange notes that historically, from observation only, it appears that no more than five market participants holding position limits in any security have exercised in unison in any option. As unlikely an occurrence as all market participants exercising their position limits in unison would be, if it were to occur, it should be noted that even such an occurrence would not likely put the iShares Fund under stress as economic incentives, would induce the creation of more shares through the ETF creation and redemption process.

By way of example, given that the current global supply of Bitcoin, the

underlying asset of the iShares Fund, is 19,789,068³⁹ and that each Bitcoin can currently be redeemed for 1,755 shares of the iShares Fund, another 34,729,814,340 shares of the iShares Fund could be created. To exhaust this supply of the iShares Fund, 13,891 market participants would have to simultaneously exercise their position limit. Comparing the iShares Fund to the SPDR Gold Shares ("GLD") ETF or the iShares Silver Trust ("SLV") ETF, which have position limits of 250,000 or ten times the proposed position limit for the iShares Fund as well as lower shares outstanding in both products,⁴⁰ it is unjustified to mandate a different level of stringency with respect to a position limit for options on the iShares Fund.

With respect to the Grayscale Fund, the Grayscale Mini Fund, and the Bitwise Fund, the Exchange reviewed the data presented by NYSE American in its filing. NYSE American aggregated market capitalization, volume, and shares outstanding data of the Bitcoin Funds and compared that data to those of other ETFs, and compared the proposed position limit of the Bitcoin Funds to the position limits of the options overlying those other ETFs. The Exchange reviewed NYSE American's data that demonstrated that each of these three Bitcoin Funds would easily qualify for the 250,000-contract position limit available to other ETFs and ETPs pursuant to the criterion in Rule 8.30, Interpretation and Policy .02, which requires the most recent six-month trading volume of the underlying security to be at least 100,000,000 shares.⁴¹

Bitcoin Fund	Total volume (shares) (as of September 30, 2024)
Grayscale Fund	723,758,100
Grayscale Mini Fund	335,492,930
Bitwise Fund	263,965,870

³³ See CME Rulebook Chapter 350 (description of CME Bitcoin Futures) and Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices. Each CME Bitcoin futures contract is valued at five Bitcoins as defined by the CME CF Bitcoin Reference Rate ("BRR"). See CME Rule 35001.

³⁷ *Id.*

³⁸ See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust>.

³⁹ This figure was acquired as of August 13, 2024. See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust>. The global supply of Bitcoin grows each day Bitcoin are minted.

⁴⁰ As of August 13, 2024, GLD had 294,000,000 shares outstanding and SLV had 510,200,000 shares outstanding. See <https://www.ssga.com/us/en/intermediary/etfs/funds/spdr-gold-shares-gld> and <https://www.ishares.com/us/products/239855/ishares-silver-trust-fund>.

⁴¹ Rule 8.30, Interpretation and Policy .02(e) states that to be eligible for the 250,000 option contract limit, either the most recent six-month trading volume of the underlying security must have totaled at least 100,000,000 shares; or the most recent six-month trading volume of the underlying security must have totaled at least 75,000,000 shares and the underlying security must have at least 300,000,000 currently outstanding.

Based on this trading volume,⁴² each Bitcoin Fund exceeded the requisite 100,000,000 shares necessary to qualify for the 250,000-contract position and exercise limits. By comparison, the underlying of other options with six-month trading volume less than the volumes in the table above are eligible

for position and exercise limits of at least 250,000.⁴³

Second, with respect to the outstanding shares of these three Bitcoin Funds, the Exchange reviewed NYSE American's data regarding the outstanding shares of each of these Bitcoin Funds. NYSE American performed an exercise to demonstrate that if a market participant held the

maximum number of contracts possible pursuant to the proposed position and exercise limits (25,000 contracts), the equivalent shares represented by the proposed position and exercise limits (2,500,000 shares) would represent the following approximate percentage of outstanding shares as of August 30, 2024:

Bitcoin Fund	Proposed position/ exercise limits in equivalent shares	Outstanding shares	Percentage of outstanding shares
Grayscale Fund	2,500,000	284,570,100	0.9
Grayscale Mini Fund	2,500,000	366,950,100	0.7
Bitwise Fund	2,500,000	68,690,000	3.6

As this table demonstrates, if a market participant held the maximum permissible options positions in one of the Bitcoin Fund options and exercised all of them at the same time, that market participant would control a small percentage of the outstanding shares of the underlying Bitcoin Fund. For

example, as noted above, a position limit of 25,000 same side contracts effectively restricts a market participant from holding positions that could result in the receipt of no more than 2,500,000 shares of the applicable Bitcoin Fund (if that market participant exercised all its options). NYSE American used the

number of shares outstanding for each Bitcoin Fund as of August 30, 2024, and calculated the approximate number of market participants that could hold the maximum of 25,000 same side positions in each Bitcoin Fund that would equate to the number of shares outstanding of that Bitcoin Fund:

Bitcoin Fund	Outstanding shares	Number of market participants with 25,000 same side positions
Grayscale Fund	284,570,100	114
Grayscale Mini Fund	366,950,100	147
Bitwise Fund	68,690,000	27

This means if 114 market participants had 25,000 same side positions in options on the Grayscale Fund, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security under stress. Similarly, this means if 147 market participants had 25,000 same side positions in options on the Grayscale Mini Fund, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security under stress. Finally, this means if 27 market participants had 25,000 same side positions in options on the Bitwise Fund, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security

under stress. The Exchange believes it is highly unlikely for this to occur; however, even if such event did occur, the Exchange would not expect any of the Bitcoin Fund to be under stress because such an event would merely induce the creation of more shares through the trust's creation and redemption process.

NYSE American also performed an exercise to compare the size of the proposed position limit to the market capitalization of the Bitcoin market given that the issuer of each of these three Bitcoin Funds may create and redeem shares that represent an interest in Bitcoin. NYSE American took the global supply of Bitcoin, which was 19,747,066, and the price of one Bitcoin, which was approximately \$59,108.23, as of August 30, 2024, which equates to a

market capitalization of approximately \$1.167 trillion.⁴⁴ Consider the proposed position and exercise limit of 25,000 option contracts for each Bitcoin Fund option. A position and exercise limit of 25,000 same side contracts effectively restricts a market participant from holding positions that could result in the receipt of no more than 2,500,000 shares of the Grayscale Fund, the Grayscale Mini Fund, or the Bitwise Fund, as applicable (if that market participant exercised all its options). NYSE American considered the share price of each Bitcoin Fund on August 30, 2024 and calculated the value of 2,500,000 shares of the Bitcoin Fund at that price, and the approximate percentage of that value of the size of the Bitcoin market:

⁴² See FactSet, 9/30/2024, <https://www.factset.com/data-attribution>. Bitwise Fund shares began trading on July 31, 2024, and therefore the data in the above table has only two months of trading data available.

⁴³ See <https://www.theocc.com/Market-Data/Market-Data-Reports/Series-and-Trading-Data/Series-Search> (including the following symbols that have a position limit of 250,000: GLD, IAU, SLV, SIVR, SGOL).

⁴⁴ See <https://www.blockchain.com/explorer/charts/total-bitcoins>.

Bitcoin Fund	Share price (\$)	Value of 2,500,000 shares	Percentage of Bitcoin market
Grayscale Fund	46.75	116,875,000	0.010
Grayscale Mini Fund	5.20	13,000,000	0.001
Bitwise Fund	31.95	79,875,000	0.007

Therefore, if a market participant with the maximum 25,000 same side contracts in options on the Grayscale Fund, the Grayscale Mini Fund, or the

Bitwise Fund exercised all positions at one time, such an event would have no practical impact on the Bitcoin market. The Exchange also reviewed NYSE American's data regarding the market

capitalization of each of these three Bitcoin Funds relative to the market capitalization of the entire Bitcoin market, as of August 30, 2024:⁴⁵

	Bitcoin/shares outstanding	Market value (\$)	Percentage of total Bitcoin market
Total Bitcoin Market	19,747,066	1,167,214,096,788	100
Grayscale Fund	284,570,100	13,443,091,524	1.15
Grayscale Mini Fund	366,950,100	1,930,157,526	0.17
Bitwise Fund	68,690,000	2,221,640,670	0.19

As this data gathered by NYSE American demonstrates, none of these three Bitcoin Funds represent more than 1.2% of the global supply of Bitcoin (19,747,066). Based on the \$46.75 price of a Grayscale Fund share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 1,264 Grayscale Fund shares. Another 24,967,146,455 Grayscale Fund shares could be created before the supply of Bitcoin was exhausted. As a result, 9,987 market participants would have to simultaneously exercise 25,000 same side positions in Grayscale Fund options to receive shares of the Grayscale Fund holding the entire global supply of Bitcoin. Similarly, based on the \$5.20 price of a Grayscale Mini Fund share on August 30, 2024, a market participant

could have redeemed one Bitcoin for approximately 11,367 Grayscale Mini Fund shares. Another 224,464,249,382 Grayscale Mini Fund shares could be created before the supply of Bitcoin was exhausted. As a result, 89,786 market participants would have to simultaneously exercise 25,000 same side positions in Grayscale Mini Fund options to receive shares of Grayscale Mini Fund holding the entire global supply of Bitcoin. Similarly, based on the \$31.95 price of a Bitwise Fund share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 1,850 Bitwise Fund shares. Another 36,532,522,591 Bitwise Fund shares could be created before the supply of Bitcoin was exhausted. As a result, 14,613 market

participants would have to simultaneously exercise 25,000 same side positions in Bitwise Fund options to receive shares of Bitwise Fund holding the entire global supply of Bitcoin.

As ISE did with respect to the iShares Fund, NYSE American compared the proposed position limits to the position limit of CME Bitcoin futures, which as noted above is 2,000 futures. On August 28, 2024, CME Aug 24 Bitcoin Futures settled at \$58,950. A position of 2,000 CME Bitcoin futures, therefore, would have a notional value of \$589,500,000. The following table shows the share price of each Bitcoin Fund on August 28, 2024, and the approximate number of option contracts that equates to that notional value:

Bitcoin Fund	Share price (\$)	Number of option contracts
Grayscale Fund	46.94	125,585
Grayscale Mini Fund	5.23	1,127,151
Bitwise Fund	32.08	183,759

The approximate number of option contracts for each Bitcoin Fund that equate to the notional value of CME Bitcoin futures is significantly higher than the proposed limit of 25,000 options contract for each Bitcoin Fund option. As noted above, the fact that many options ultimately expire out-of-the-money and thus are not exercised for shares of the underlying, while the delta of a Bitcoin Future is 1, further

demonstrates how conservative the proposed limits of 25,000 options contracts are for the Bitcoin Fund options.

The Exchange notes, again, unlike options contracts, CME position limits are calculated on a net futures-equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an aggregation ratio(s).⁴⁶ Therefore, if a

portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.⁴⁷ If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the

⁴⁵ See *id.*

⁴⁶ See CME Rulebook Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices.

⁴⁷ *Id.*

excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading but does not exceed the limits when evaluated using the previous day's delta factors, then the position shall not constitute a position limit violation. Considering CME's position limits on futures for Bitcoin, the Exchange believes that that the proposed same side position limits are more than appropriate for the Grayscale Fund, Grayscale Mini Fund, and Bitwise Fund options.

While the supply of Bitcoin is limited to 21,000,000, it is believed that it will take more than 100 years to fully mine the remaining Bitcoin.⁴⁸ The Exchange notes that Bitcoin is a viable economic alternative to traditional assets. The price of goods denominated by Bitcoin has actually declined. This dynamic not only makes a fixed supply desirable, but a necessary condition of the value added by this asset in the broader economy. Unlike the Bitcoin Funds, the number of shares that corporations may issue is limited. However, like corporations, which authorize additional shares, repurchase shares, or split their shares, the Bitcoin Funds may create, redeem, or split shares in response to demand. Given the significant unlikelihood of any of events described above ever occurring, the Exchange does not believe options on the Bitcoin Funds should be subject to position and exercise limits even lower than those proposed (which are already equal to the lowest available limit for equity options in the industry) to protect the supply of Bitcoin.

Importantly, because the supply of Bitcoin is much larger than the available supply of most securities and the proposed 25,000 contract position limit is so conservative, the Exchange believes that evaluating the available supply of Bitcoin in establishing a position limit for options on each of the Bitcoin Funds would demonstrate that the proposed limit is safe for investors and the market.⁴⁹ Each Bitcoin Fund represents less than 2% of the entire Bitcoin supply. When comparing the market capitalization of bitcoin against the largest securities, Bitcoin would

rank 7th among those securities.⁵⁰ Further, the Exchange believes that its proposal to list options on the Bitcoin Funds each with a position limit of 25,000 on the same side is a conservative position limit that does not lend itself to manipulation in the market given the ample market capitalization and liquidity in each Bitcoin Fund. If we look to the liquidity statistics of similar instruments and their concomitant position limits, we are able to extrapolate a reasonable standard for arriving at a position limit for a new product. In this case we can look to GLD, SLV, and the ProShares Bitcoin Strategy ETF. These products have volume statistics and "float" statistics, which gauge liquidity, which are in line, yet slightly lower than the Bitcoin Funds. All three of these reference products have position limits of 250,000 contracts. These reference products are remarkably similar in nature to the Bitcoin Funds; they are exchange-traded products ("ETPs") holding one asset in a trust.

The Exchange believes the available supply of Bitcoin is not relevant to the determination of position and exercise limits for options overlying the Bitcoin Funds.⁵¹ Position and exercise limits are not a tool that should be used to address a potential limited supply of the underlying of an underlying. Position and exercise limits do not limit the total number of options that may be held, but rather they limit the number of positions a single customer may hold or exercise at one time.⁵² "Since the

⁵⁰ See <https://companiesmarketcap.com/usa/largest-companies-in-the-usa-by-market-cap/>.

⁵¹ The Exchange is unaware of any proposed rule change related to position and exercise limits for any equity option (including commodity ETF options) for which the Commission required consideration of whether the available supply of an underlying (whether it be a corporate stock or an ETF) or the contents of an ETF (commodity or otherwise) should be considered when an exchange proposed to establish those limits. See, e.g., Securities Exchange Act Release No. 57894 (May 30, 2008), 73 FR 32061 (June 5, 2008) (SR-CBOE-2005-11) (approval order in which the Commission stated that the "listing and trading of Gold Trust Options will be subject to the exchanges' rules pertaining to position and exercise limits and margin"). The Exchange notes when the Commission approved this filing, the position limits in Rule 8.30 were the same as they are today. For reference, the current position and exercise limits for options on SPDR Gold Shares ETF ("GLD") and options on iShares Silver Trust ("SLV") are 250,000 contracts, or 10 times that proposed position and exercise limit for the Bitcoin Fund options.

⁵² For example, suppose an option has a position limit of 25,000 option contracts and there are a total of 10 investors trading that option. If all 10 investors max out their positions, that would result in 250,000 option contracts outstanding at that time. However, suppose 10 more investors decide to begin trading that option and also max out their positions. This would result in 500,000 option

inception of standardized options trading, the options exchanges have had rules imposing limits on the aggregate number of options contracts that a member or customer could hold or exercise."⁵³ Position and exercise limit rules are intended "to prevent the establishment of options positions that can be used or might create incentives to manipulate or disrupt the underlying market so as to benefit the options position. In particular, position and exercise limits are designed to minimize the potential for mini-manipulations and for corners or squeezes of the underlying market. In addition, such limits serve to reduce the possibility for disruption of the options market itself, especially in illiquid options classes."⁵⁴

The Exchange notes that a Registration Statement on Form S-1 was filed with the Commission for each Bitcoin Fund, each of which described the supply of Bitcoin as being limited to 21,000,000 (of which approximately 90% had already been mined), and that the limit would be reached around the year 2140.⁵⁵ Each Registration Statement permits an unlimited number of shares of the applicable Bitcoin Fund to be created. Further, the Commission approved proposed rule changes that permitted the listing and trading of shares of each Bitcoin Fund, which approval did not comment on the sufficient supply of Bitcoin or address whether there was a risk that permitting an unlimited number of shares for a Bitcoin Fund would impact the supply of Bitcoin.⁵⁶ Therefore, the Exchange believes the Commission had ample time and opportunity to consider whether the supply of Bitcoin was sufficient to permit the creation of unlimited Bitcoin Fund shares, and does not believe considering this supply with respect to the establishment of position and exercise limits is appropriate given its lack of relevance to the purpose of position and exercise limits. However, given the significant

contracts outstanding at that time. An increase in the number of investors could cause an increase in outstanding options even if position limits remain unchanged.

⁴⁸ See <https://www.blockchain.com/explorer/assets/btc> (citing 21 million as the "total supply" of bitcoin).

⁴⁹ A supply consideration would likely be valuable for an option symbol that had far less liquidity than the Trust.

size of the Bitcoin supply, the proposed positions limits are more than sufficient to protect investors and the market. All of the above information demonstrates that the proposed position and exercise limits for the Bitcoin Fund options are more than reasonable and appropriate. The trading volume, ADV, and outstanding shares of each Bitcoin Fund demonstrate that these funds are actively traded and widely held, and proposed position and exercise limits are well below those of other ETFs with similar market characteristics. The proposed position and exercise limits are the lowest position and exercise limits available for equity options in the industry, are extremely conservative, and are more than appropriate given each Bitcoin Fund's market capitalization and ADV.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options on the Bitcoin Funds that it applies to the Exchange's other options products.⁵⁷ The Exchange's market surveillance staff would have access to the surveillances conducted by Cboe BYX Exchange, Inc., Cboe EDGA Exchange, Inc., and Cboe EDGX Exchange, Inc., in addition to the Exchange's equity market,⁵⁸ with respect to the Bitcoin Funds and would review activity in the underlying Bitcoin Funds when conducting surveillances for market abuse or manipulation in the options on the Bitcoin Funds. Additionally, the Exchange is a member of the Intermarket Surveillance Group ("ISG") under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining information from its affiliated markets, the Exchange would be able to obtain information regarding trading in shares of the Bitcoin Funds from their primary listing markets and from other markets that trades shares of the Bitcoin Funds through ISG. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority ("FINRA") for certain market surveillance, investigation and examinations functions. Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate amongst themselves

and FINRA responsibilities to conduct certain options-related market surveillance that are common to rules of all options exchanges.⁵⁹

The underlying shares of spot bitcoin exchange-traded products ("ETPs"), including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot bitcoin-based ETPs, "[e]ach Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.⁶⁰ The Exchange states that, given the consistently high correlation between the CME Bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs]." ⁶¹ In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Funds,⁶² the

⁵⁹ Section 19(g)(1) of the Act, among other things, requires every self-regulatory organization ("SRO") registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO ("common members"). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

⁶⁰ See Bitcoin ETP Approval Order.

⁶¹ See Bitcoin ETP Approval Order, 89 FR at 3010-11.

⁶² See Securities Exchange Act Release Nos. 99290 (January 8, 2024), 89 FR 2338, 2343, 2347-2348 (January 12, 2024) (SR-CboeBZX-2023-044) Notice of Filing of Amendment No. 3 to a Proposed Rule Change To List and Trade Shares of the Fidelity Wise Origin Bitcoin Fund Under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares); and 99288 (January 8, 2024), 89 FR 2387, 2392, 2399-2400 (January 12, 2024) (SR-CboeBZX-2023-028) (Notice of Filing of Amendment No. 5 to a Proposed Rule Change To List and Trade Shares of the ARK 21Shares Bitcoin ETF Under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares). See also Securities Exchange Act Release No. 99306 (January 10, 2024),

Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on Bitcoin ETPs.

The Exchange has also analyzed its capacity and represents that it believes the Exchange and OPRA have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on Bitcoin Funds up to the number of expirations currently permissible under the Rules. Because the proposal is limited to two classes, the Exchange believes any additional traffic that may be generated from the introduction of Bitcoin Fund options will be manageable.

The Exchange believes that offering options on Bitcoin Funds will benefit investors by providing them with an additional, relatively lower cost investing tool to gain exposure to the price of Bitcoin and hedging vehicle to meet their investment needs in connection with Bitcoin-related products and positions. The Exchange expects investors will transact in options on Bitcoin Funds in the unregulated over-the-counter ("OTC") options market,⁶³ but may prefer to trade such options in a listed environment to receive the benefits of trading listing options, including (1) enhanced efficiency in initiating and closing out positions; (2) increased market transparency; and (3) heightened contra-party creditworthiness due to the role of OCC as issuer and guarantor of all listed options. The Exchange believes that listing Bitcoin Fund options may cause investors to bring this liquidity to the Exchange, would increase market transparency and enhance the process of price discovery conducted on the Exchange through increased order flow. The Fund Shares

89 FR 3008, 3009 (January 17, 2024) (SR-NYSEArca-2021-90; SR-NYSEArca-2023-44; SR-NYSEArca-2023-58; SR-NASDAQ-2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX-2023-040; SR-CboeBZX-2023-042; SR-CboeBZX-2023-044; and SR-CboeBZX-2023-072) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units) ("Bitcoin ETP Approval Order").

⁶³ The Exchange understands from customers that investors have historically transacted in options on Fund Shares in the OTC options market if such options were not available for trading in a listed environment.

⁵⁷ The surveillance program includes surveillance patterns for price and volume movements as well as patterns for potential manipulation (e.g., spoofing and marking the close).

⁵⁸ Cboe BYX Exchange, Inc., Cboe EDGA Exchange, Inc., and Cboe EDGX Exchange, Inc. are affiliated markets of the Exchange.

that hold financial instruments, money market instruments, or precious metal commodities on which the Exchange may already list and trade options are trusts structured in substantially the same manner as Bitcoin Funds and essentially offer the same objectives and benefits to investors, just with respect to different assets. The Exchange notes that it has not identified any issues with the continued listing and trading of any Fund Share options, including Fund Shares that hold commodities (*i.e.*, precious metals) that it currently lists and trades on the Exchange.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁶⁴ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁶⁵ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁶⁶ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that the proposal to list and trade options on the Bitcoin Funds will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because offering options on the Bitcoin Funds will provide investors with an opportunity to realize the benefits of utilizing options on a Bitcoin Fund, including cost efficiencies and increased hedging strategies. The Exchange believes that offering options on a competitively priced ETF based on spot Bitcoin will benefit investors by providing them with an additional, relatively lower-cost risk management tool, allowing them to manage, more easily, their positions and associated

risks in their portfolios in connection with exposure to spot Bitcoin. Today, the Exchange lists options on other commodity (including Bitcoin) ETFs structured as a trust, which essentially offer the same objectives and benefits to investors, and for which the Exchange has not identified any issues with the continued listing and trading of options on those ETFs.

The Exchange also believes the proposal to permit options on the Bitcoin Funds will remove impediments to and perfect the mechanism of a free and open market and a national market system, because options on the Bitcoin Funds will comply with current Exchange Rules. Options on the Bitcoin Funds must satisfy the initial listing standards and continued listing standards currently in the Rules, applicable to options on all ETFs, including options on other commodity ETFs already deemed appropriate for options trading on the Exchange pursuant to Rule 19.3(i). Additionally, as demonstrated above, the Bitcoin Funds are characterized by a substantial number of shares that are widely held and actively traded. Further, Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (as proposed herein), and margin requirements, will govern the listing and trading of options on the Bitcoin Funds.

The proposed position and exercise limits for options on each of the Bitcoin Funds is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given Bitcoin Fund's market capitalization, ADV, and high number of outstanding shares. The proposed position limit, and exercise limit, is consistent with the Act as it addresses concerns related to manipulation and protection of investors because, as demonstrated above, the position limit (and exercise limit) is extremely conservative and more than appropriate given the Bitcoin Funds are actively traded. In support of the proposed position and exercise limits for options on the Bitcoin Funds are 25,000 contracts, the Exchange is citing the in depth analysis each of ISE and NYSE American did in their respective filings. As noted above, in the ISE and NYSE American Approvals, each of ISE and NYSE American considered the: (1) applicable Bitcoin Fund's market capitalization and ADV, and proposed position limit in relation to other securities; (2) market capitalization of

the entire Bitcoin market in terms of exercise risk and availability of deliverables; (3) proposed position limit by comparing it to position limits for derivative products regulated by the CFTC; and (4) supply of Bitcoin. Based on the Exchange's review of these analyses, the Exchange believes that the setting position and exercise limits for options on each of the Bitcoin Funds is 25,000 contracts is more than appropriate. The proposed position and exercise limits reasonably and appropriately balance the liquidity provisioning in the market against the prevention of manipulation. The Exchange believes these proposed limits are effectively designed to prevent an individual customer or entity from establishing options positions that could be used to manipulate the market of the underlying as well as the Bitcoin market.⁶⁷

The Exchange represents that it has the necessary systems capacity to support the new Bitcoin Fund options. As discussed above, the Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading Fund Share options, including Bitcoin Fund options.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as the Bitcoin Fund options will be equally available to all market participants who wish to trade such options and will trade generally in the same manner as other options. The Rules that currently apply to the listing and trading of all Fund Share options on the Exchange, including, for example, Rules that govern listing criteria, expirations, exercise prices, minimum increments, margin requirements, customer accounts, and trading halt procedures will apply to the listing and trading of Bitcoin Funds options on the Exchange in the same manner as they apply to other options on all other Fund Shares that are listed and traded on the Exchange. Also, and as stated above, the Exchange already lists options on other

⁶⁴ 15 U.S.C. 78f(b).

⁶⁵ 15 U.S.C. 78f(b)(5).

⁶⁶ *Id.*

⁶⁷ See Securities Exchange Act Release No. 39489 (December 24, 1997), 63 FR 276 (January 5, 1998) (SR-CBOE-1997-11).

commodity-based Fund Shares (including Bitcoin-based).⁶⁸ Further, the Bitcoin Funds would need to satisfy the maintenance listing standards set forth in the Exchange Rules in the same manner as any other Fund Share for the Exchange to continue listing options on them.

The Exchange does not believe that the proposal to list and trade options on Bitcoin Funds will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that the advent of Bitcoin Fund options trading on the Exchange may make the Exchange a more attractive marketplace to market participants at other exchanges, such market participants are free to elect to become market participants on the Exchange. The Commission recently approved rule filings of other exchanges to permit the listing and trading of options on the Bitcoin Funds.⁶⁹ The Exchange notes that listing and trading Bitcoin Fund options on the Exchange will subject such options to transparent exchange-based rules as well as price discovery and liquidity, as opposed to alternatively trading such options in the OTC market.

The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition, as it is designed to increase competition for order flow on the Exchange in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering Bitcoin Fund options for trading on the Exchange will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment needs in connection with Bitcoin prices and Bitcoin-related products and positions on a listed options exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act⁷⁰ and Rule 19b-4(f)(6) thereunder.⁷¹

A proposed rule change filed pursuant to Rule 19b-4(f)(6) under the Act normally does not become operative for 30 days after the date of its filing. However, Rule 19b-4(f)(6)(iii)⁷² permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the Bitcoin Funds.⁷³ The Exchange has provided information regarding the underlying Bitcoin Funds, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of the Bitcoin Funds. The proposal also establishes position and exercise limits for options on the Bitcoin Funds and provides information regarding the surveillance procedures that will apply to options on the Bitcoin Funds. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Bitcoin Fund options. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.⁷⁴

⁷⁰ 15 U.S.C. 78s(b)(3)(A).

⁷¹ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission waives this requirement.

⁷² 17 CFR 240.19b-4(f)(6)(iii).

⁷³ See *supra* note 4.

⁷⁴ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBZX-2024-121 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-CboeBZX-2024-121. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All

⁶⁸ See Rule 19.3(i)(4).

⁶⁹ See ISE Approval and NYSE American Approval.

submissions should refer to file number SR–CboeBZX–2024–121 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁷⁵

Vanessa A. Countryman,
Secretary.

[FR Doc. 2024–28110 Filed 11–29–24; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101738; File No. SR–NYSE–2024–44]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change To Adopt a Provision That the Exchange Will Not Review a Compliance Plan Submitted by a Listed Company That Is Below Compliance With a Continued Listing Standard if the Company Owes Any Unpaid Fees to the Exchange and Will Instead Immediately Commence Suspension and Delisting Procedures if Such Fees Are Not Paid in Full

November 25, 2024.

On September 27, 2024, New York Stock Exchange LLC (“Exchange”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b–4 thereunder, ² a proposed rule change to amend Sections 802.02 and 802.03 of the NYSE Listed Company Manual (“Manual”) to provide that the Exchange will not review a compliance plan submitted by a domestic or non-U.S. listed company that is determined to be below compliance with a continued listing standard unless the company has paid in full all outstanding listing or annual fees due to the Exchange and will immediately commence suspension and delisting procedures in accordance with Section 804.00 of the Manual if such fees are not paid in full by the plan submission deadline or, with respect to any unpaid fees that have become due and payable since the commencement of its plan period, if such fees are not paid in full at the time of any required periodic review of such plan. The proposed rule change was published for comment in the **Federal Register** on October 16,

2024.³ The Commission has received no comment letters on the proposed rule change.

Section 19(b)(2) of the Act ⁴ provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents, the Commission will either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is November 30, 2024. The Commission is extending this 45-day time period.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change, so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act, ⁵ designates January 14, 2025, as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–NYSE–2024–44).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35401; 812–15649]

TCW Private Asset Income Fund and TCW Asset Backed Finance Management Company LLC

November 26, 2024.

AGENCY: Securities and Exchange Commission (“Commission” or “SEC”).

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (the “Act”) for an exemption from sections 18(a)(2), 18(c) and 18(i) of the Act, under sections 6(c) and 23(c) of the

Act for an exemption from rule 23c–3 under the Act, and for an order pursuant to section 17(d) of the Act and rule 17d–1 under the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain registered closed-end investment companies to issue multiple classes of shares and to impose asset-based distribution and/or service fees and early withdrawal charges.

APPLICANTS: TCW Private Asset Income Fund and TCW Asset Backed Finance Management Company LLC.

FILING DATES: The application was filed on October 24, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC’s Secretary at *Secretaries-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on December 20, 2024, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer’s interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission’s Secretary.

ADDRESSES: The Commission: *Secretaries-Office@sec.gov*. Applicants: Pamela Poland Chen, Esq., Kirkland & Ellis LLP, *pamela.chen@kirkland.com*, with a copy to Peter Davidson, Esq., TCW Asset Backed Finance Management Company LLC, *peter.davidson@tcw.com*.

FOR FURTHER INFORMATION CONTACT: Trace W. Rakestraw, Senior Special Counsel, at (202) 551–6825 (Division of Investment Management, Chief Counsel’s Office).

SUPPLEMENTARY INFORMATION: For Applicants’ representations, legal analysis, and conditions, please refer to Applicants’ application, dated October 24, 2024, which may be obtained via the Commission’s website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC’s EDGAR system. SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101741; File No. SR-CboeEDGX-2024-078]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 19.3

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 21, 2024, Cboe EDGX Exchange, Inc. ("Exchange" or "EDGX Options") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (the "Exchange" or "EDGX Options") proposes to amend Rule 19.3. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/options/regulation/rule_filings/edgx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these

statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 19.3 regarding the criteria for underlying securities. Specifically, the Exchange proposes to amend Rule 19.3(i)(4) to allow the Exchange to list and trade options on shares or other securities ("Fund Shares") that are principally traded on a national securities exchange and are defined as an "NMS stock" under Rule 600 of Regulation NMS and that represent interests the iShares Bitcoin Trust (the "iShares Fund"), the Grayscale Bitcoin Trust (the "Grayscale Fund"), the Grayscale Bitcoin Mini Trust (the "Grayscale Mini Fund"), or the Bitwise Bitcoin ETF (the "Bitwise Fund" and, together with the iShares Fund, the Grayscale Fund, and the Grayscale Mini Fund, the "Bitcoin Funds").³ This is a competitive filing based on similar proposals submitted by Nasdaq ISE, LLC ("ISE") (with respect to the iShares Fund) and NYSE American, LLC ("NYSE American") (with respect to the Grayscale Fund, the Grayscale Mini Fund, and the Bitwise Fund), which were recently approved by the Securities and Exchange Commission (the "Commission").⁴ Current Rule 19.3(i) provides that, subject to certain other criteria set forth in that Rule, securities deemed appropriate for options trading include Fund Shares that represent certain types of interests,⁵

including interests in certain specific trusts that hold financial instruments, money market instruments, precious metals (which are deemed commodities), or Bitcoin (which is deemed a commodity. In addition, Rule 19.3(i)(1) requires that Fund Shares meet the criteria and standards set forth in Rule 19.3(a) and (b)⁶ or (2) be available for creation or redemption each business day from or through the issuer in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue Fund Shares in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus.

The Bitcoin Funds are Bitcoin-backed commodity exchange-traded funds ("ETFs") structured as trusts. Similar to any Fund Share currently deemed appropriate for options trading under

comprising or otherwise based on or representing investments in indexes or portfolios of securities (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities) ("Funds") and/or financial instruments including, but not limited to, stock index futures contracts, options on futures, options on securities and indexes, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse repurchase agreements (the "Financial Instruments"), and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the "Money Market Instruments") constituting or otherwise based on or representing an investment in an index or portfolio of securities and/or Financial Instruments and Money Market Instruments, or (2) represent commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward 477 contracts and/or options on physical commodities and/or non-U.S. currency ("Commodity Pool ETFs") or (3) represent interests in a trust or similar entity that holds a specified non-U.S. currency or currencies deposited with the trust or similar entity when aggregated in some specified minimum number may be surrendered to the trust by the beneficial owner to receive the specified non-U.S. currency or currencies and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency or currencies, if any, declared and paid by the trust ("Currency Trust Shares"), or (4) represent interests in the SPDR Gold Trust or are issued by the iShares COMEX Gold Trust, iShares Silver Trust, the Fidelity Wise Origin Bitcoin Fund (the "Fidelity Fund"), or the ARK 21Shares Bitcoin ETF (the "Ark 21 Fund").

⁶ Rule 19.3(a) and (b) sets forth the criteria that underlying securities must satisfy for option contracts on those underlying securities to be eligible for listing and trading on the Exchange.

³ See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008, 3009 (January 17, 2024) (SR-NYSEArca-2021-90; SR-NYSEArca-2023-44; SR-NYSEArca-2023-58; SR-NASDAQ-2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX-2023-040; SR-CboeBZX-2023-042; SR-CboeBZX-2023-044; and SR-CboeBZX-2023-072) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units) ("Bitcoin ETP Approval Order").

⁴ See Securities Exchange Act Release Nos. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR-ISE-2024-03) ("ISE Approval"); and 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR-NYSEAMER-2024-49) ("NYSE American Approval").

⁵ See Rule 19.3(i) which permits options trading on Fund Shares that (1) represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities, and that hold portfolios of securities

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

Rule 19.3(i), the investment objective of each Bitcoin Fund is for its shares to reflect the performance of Bitcoin (less the expenses of the trust's operations), offering investors an opportunity to gain exposure to Bitcoin without the complexities of Bitcoin delivery. As is the case for Fund Shares currently deemed appropriate for options trading, a Bitcoin Fund's shares represent units of fractional undivided beneficial interest in the trust, the assets of which consist principally of Bitcoin and are designed to track Bitcoin or the performance of the price of Bitcoin and offer access to the Bitcoin market.⁷ The Bitcoin Funds provide investors with cost-efficient alternatives that allow a level of participation in the Bitcoin market through the securities market. The primary substantive difference between Bitcoin Funds and Fund Shares currently deemed appropriate for options trading are that Fund Shares may hold securities, certain financial instruments, and specified precious metals (which are deemed commodities), while Bitcoin Funds hold Bitcoin (which is also deemed a commodity). The Bitcoin Funds are similar to the Fidelity Fund and the Ark 21 Fund, which are already eligible for options trading on the Exchange.⁸

The Exchange's initial listing standards for Fund Shares on which options may be listed and traded on the Exchange will apply to the Bitcoin Funds. Pursuant to Rule 19.3(a), a security (which includes a Fund Share) on which options may be listed and traded on the Exchange must be registered with the Securities and Exchange Commission (the "Commission") and be an "NMS stock" as defined in Rule 600 of Regulation NMS under the Securities Exchange Act of 1934, as amended (the "Act"); and the security shall be characterized by a substantial number of outstanding shares that are widely held and actively traded. Rule 19.3(i)(1) requires that Fund Shares either (1) meet the criteria and standards set forth in Rule 19.3(a) and (b),⁹ or (2) are available for creation or redemption each business day in cash or in kind from the investment company, commodity pool or other entity at a price related to net asset value, and the investment company, commodity pool or other entity is obligated to provide that Fund Shares may be created even if some or all of the securities and/or cash required to be

deposited have not been received by the Fund, the unit investment trust or the management investment company, provided the authorized creation participant has undertaken to deliver the securities and/or cash as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the Fund, all as described in the Fund's or unit trust's prospectus. Each Bitcoin Fund satisfies Rule 19.3(i)(1)(B) as each is subject to this creation and redemption process.

Options on the Bitcoin Funds will be subject to the Exchange's continued listing standards set forth in Rule 19.4(g) for Fund Shares deemed appropriate for options trading pursuant to Rule 19.3(i). Specifically, 19.4(g) provides that Fund Shares that were initially approved for options trading pursuant to Rule 19.3 will not be deemed to meet the requirements for continued approval, and the Exchange shall not open for trading any additional series of option contracts of the class covering such Fund Shares if the security ceases to be an NMS stock (see Rule 19.4(b)(4)). Additionally, the Exchange will not open for trading any additional series of option contracts of the class covering Fund Shares in any of the following circumstances: (1) in the case of options covering Fund Shares approved for trading under Rule 19.3(i)(4)(A), in accordance with the terms of Rule 19.4(b)(1), (2) and (3); (2) in the case of options covering Fund Shares approved pursuant to Rule 19.3(i)(4)(B), following the initial 12-month period beginning upon the commencement of trading in the Fund Shares on a national securities exchange and are defined as NMS stock under Rule 600 of Regulation NMS, there were fewer than 50 record and/or beneficial holders of such Fund Shares for 30 consecutive days; (3) the value of the index, non-U.S. currency, portfolio of commodities including commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or Financial Instruments or Money Market Instruments, or portfolio of securities on which the Fund Shares are based is no longer calculated or available; or (4) such other event occurs or condition exists that in the opinion of the Exchange makes further dealing in such options on the Exchange inadvisable.

Options on each Bitcoin Fund will be physically settled contracts with American-style exercise.¹⁰ Consistent

with current Rule 19.6, which governs the opening of options series on a specific underlying security (including Fund Shares), the Exchange will open at least one expiration month for options on each Bitcoin Fund¹¹ at the commencement of trading on the Exchange and may also list series of options on a Bitcoin Fund for trading on a weekly,¹² monthly,¹³ or quarterly¹⁴ basis. The Exchange may also list long-term equity option series ("LEAPS") that expire from 12 to 39 months from the time they are listed.¹⁵

Pursuant to Rule 19.6, Interpretation and Policy .01, which governs strike prices of series of options on Fund Shares, the interval of strikes prices for series of options on Bitcoin Funds will be \$1 or greater when the strike price is \$200 or less and \$5 or greater where the strike price is over \$200.¹⁶ Additionally, the Exchange may list series of options pursuant to the \$1 Strike Price Interval Program,¹⁷ the \$0.50 Strike Program,¹⁸

in the Rules of the Options Clearing Corporation ("OCC"); and Equity Options Product Specifications January 3, 2024), available at Equity Options Specifications (cboe.com); see also OCC Rules, Chapters VIII (which governs exercise and assignment) and Chapter IX (which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts).

¹¹ See Rule 19.6(b). The monthly expirations are subject to certain listing criteria for underlying securities described within Rule 19.3. Monthly listings expire the third Friday of the month. The term "expiration date" (unless separately defined elsewhere in the OCC By-Laws), when used in respect of an option contract (subject to certain exceptions), means the third Friday of the expiration month of such option contract, or if such Friday is a day on which the exchange on which such option is listed is not open for business, the preceding day on which such exchange is open for business. See OCC By-Laws Article I, Section 1. Pursuant to Rule 19.6(c), additional series of options of the same class may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying stock moves more than five strike prices from the initial exercise price or prices. New series of options on an individual stock may be added until the beginning of the month in which the options contract will expire. Due to unusual market conditions, the Exchange, in its discretion, may add a new series of options on an individual stock until the close of trading on the business day prior to expiration.

¹² See Rule 19.6, Interpretation and Policy .05.

¹³ See Rule 19.6, Interpretation and Policy .08.

¹⁴ See Rule 19.6, Interpretation and Policy .04.

¹⁵ See Rule 19.8.

¹⁶ The Exchange notes that for options listed pursuant to the Short Term Option Series Program, the Monthly Options Series Program, and the Quarterly Options Series Program, Rule 19.6, Interpretations and Policies .05, .08, and .04 specifically sets forth intervals between strike prices on Quarterly Options Series, Short Term Option Series, and Monthly Options Series, respectively.

¹⁷ See Rule 19.6, Interpretation and Policy .02.

¹⁸ See Rule 19.6, Interpretation and Policy .06.

⁷ The trust may include minimal cash.

⁸ See Rule 19.3(i); and SR-ChoeEDGX-2024-077.

⁹ Rule 19.3(a) and (b) sets forth the criteria an underlying security must meet for the Exchange to be able to list options on the underlying.

¹⁰ See Rule 19.2, which provides that the rights and obligations of holders and writers are set forth

the \$2.50 Strike Price Program,¹⁹ and the \$5 Strike Program.²⁰ Pursuant to Rule 21.5, where the price of a series of a Bitcoin Fund option is less than \$3.00, the minimum increment will be \$0.05, and where the price is \$3.00 or higher, the minimum increment will be \$0.10.²¹ Any and all new series of Bitcoin Fund options that the Exchange lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Rules 19.6 and 21.5, as applicable.

Bitcoin Fund options will trade in the same manner as any other Fund Share options on the Exchange. The Exchange Rules that currently apply to the listing and trading of all Fund Share options on the Exchange, including, for example, Rules that govern listing criteria, expirations, exercise prices, minimum increments, margin requirements, customer accounts, and trading halt procedures will apply to the listing and trading of Bitcoin Funds options on the Exchange in the same manner as they apply to other options on all other Fund Shares that are listed and traded on the Exchange, including the precious-metal backed commodity Fund Shares and the Fidelity and Ark 21 Funds already deemed appropriate for options trading on the Exchange pursuant to current Rule 19.3(i).

Pursuant to Rules 18.7 and 18.9, the position and exercise limits, respectively, for each Bitcoin Fund option will be 25,000 same side option contracts.²² In considering the appropriate position and exercise limits for the Bitcoin Funds, the Exchange reviewed the data presented by ISE in its filing (specifically in Exhibit 3 of the filing) with respect to the iShares Fund²³ and by NYSE American in its

filing with respect to the Grayscale Fund, the Grayscale Mini Fund, and the Bitwise Fund.²⁴

With respect to the iShares Fund, in its filing, ISE considered the iShares Fund market capitalization and average daily volume (“ADV”) against those of other underlying securities, as well as the proposed position limit in relation to other options. In measuring the iShares Fund against other securities, ISE aggregated market capitalization and volume data for securities that have defined position limits utilizing data from The Options Clearing Corporations (“OCC”).²⁵ This pool of data took into consideration 3,984 options on single stock securities, excluding broad based ETFs.²⁶ Next, ISE aggregated the data based on market capitalization and ADV and grouped option symbols by position limit utilizing statistical thresholds for ADV and market capitalization that were one standard deviation above the mean for each position limit category (*i.e.*, 25,000, 50,000 to 65,000, 75,000, 100,000 to less than 250,000, 250,000 to 400,000, 450,000 to 1,000,000, and greater than or equal to 1,000,000) (*sic*).²⁷ Rule 8.30 sets out position limits for various contracts. For example, on the Exchange, like ISE, a 25,000 contract position limit applies to options with an underlying security that does not meet the requirements for a higher options contract position limit. ISE performed an exercise to demonstrate the iShares Fund position limit relative to other options symbols in terms of market capitalization and ADV. For reference the market capitalization for the iShares Fund was 19,789,068 billion²⁸ with an ADV, for the preceding three months prior to August 7, 2024, of greater than 26 million shares.²⁹ By comparison, other options symbols with similar market capitalization and ADV have a position limit in excess of 400,000.³⁰ Therefore, the proposed 25,000 same side position limit for options on the iShares Fund is extremely conservative

relative to these options symbols which are a full standard deviation above the mean in comparison.

Second, ISE reviewed the iShares Fund’s data relative to the market capitalization of the entire Bitcoin market in terms of exercise risk and availability of deliverables. Utilizing data as of August 3, 2024, there were 19,737,193 Bitcoins in circulation.³¹ ISE took a price of \$57,000 that equates to a market capitalization of greater than 1.125 trillion U.S. dollars, and applied that to a position limit of 400,000 for options on the iShares Fund.³² If a position limit of 400,000 options were considered (the position limit that would be typically assigned based upon data) the exercisable risk would represent only 6.6% of the outstanding shares of the iShares Fund. The 25,000 position limit being sought only represents 0.4% of the outstanding shares of the iShares Fund. Since the iShares Fund has a creation and redemption process managed through the issuer, additionally it can be compared the position limit sought to the total market capitalization of the entire Bitcoin market. In this case, the exercisable risk for options on the iShares Fund would be less than 0.01% of the market capitalization of all outstanding Bitcoin. Assuming a scenario where all options on the iShares Fund’s shares were exercised given the proposed 25,000 per same side position limit, this would have a virtually unnoticed impact on the entire Bitcoin market. This analysis demonstrates that the proposed 25,000 per same side position limit is also extremely conservative and more than appropriate for options on the iShares Fund.

Third, ISE reviewed the proposed position limit by comparing it to position limits for derivative products regulated by the Commodity Futures Trading Commission (“CFTC”). While the CFTC, through the relevant Designated Contract Markets, only regulates options positions based upon delta equivalents (creating a less stringent standard), ISE examined equivalent bitcoin futures position limits. In particular, ISE looked at the CME Bitcoin futures contract that has a position limit of 2,000 futures.³³ On August 7, 2024, CME Bitcoin futures

¹⁹ See Rule 19.6, Interpretation and Policy .03.

²⁰ See Rule 19.6(d)(5).

²¹ If options on a Bitcoin Fund are eligible to participate in the Penny Interval Program, the minimum increment will be \$0.01 for series with a price below \$3.00 and \$0.05 for series with a price at or above \$3.00. See 21.5(d) (which describes the requirements for the Penny Interval Program).

²² Rule 18.7(a)(1) provides that no Options Member shall make, for any account in which it has any interest or for the account of any Customer, an opening transaction on any exchange if the Options Member has reason to believe that as a result of such transaction the Options Member or its Customer would, acting alone or in concert with others, directly or indirectly, exceed the applicable position limit fixed by Cboe Exchange, Inc. (“Cboe Options”). Cboe Options Rule 8.30, Interpretation and Policy .10 establishes a position limit for the Bitcoin Fund options of 25,000. See SR-CBOE-2024-051.

²³ See ISE Approval; and Letter from Angela Dunn, Nasdaq ISE, LLC, to Vanessa Countryman, Secretary, Commission, dated August 21, 2024) (“ISE Letter”).

²⁴ See NYSE American Approval.

²⁵ The computations are based on OCC data from August 6, 2024. Data displaying zero values in market capitalization or ADV were removed.

²⁶ The iShares Fund has one asset and therefore is not comparable to a broad based ETF where there are typically multiple components.

²⁷ See ISE Letter at 10.

²⁸ ISE acquired this figure as of August 13, 2024. See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust>. The global supply of Bitcoin grows each day Bitcoin are minted.

²⁹ See ISE Letter at 10.

³⁰ See, *e.g.*, iShares® iBoxx® \$ High Yield Corporate Bond ETF (“HYG”) with a market capitalization of 13,859,235,000 billion as of November 4, 2024. See <https://www.ishares.com/us/products/239565/ishares-iboxx-high-yield-corporate-bond-etf>. The Exchange notes that HYG has a position limit of 500,000 contracts.

³¹ See ISE Letter at 10.

³² *Id.*

³³ See CME Rulebook Chapter 350 (description of CME Bitcoin Futures) and Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices. Each CME Bitcoin futures contract is valued at five Bitcoins as defined by the CME CF Bitcoin Reference Rate (“BRR”). See CME Rule 35001.

settled at \$55,000.³⁴ Taking the position limit of 2,000 futures at a \$5 multiplier equates to \$550 million of notional value for Bitcoin futures. By way of comparison, on August 7, 2024, the iShares Fund settled at \$31.19 per share, which would equate to 17,633,857 shares of the iShares Fund³⁵ if the CME notional position limit were utilized. Since substantial portions of any distributed options portfolio are likely to be out of the money on expiration, an options position limit equivalent to the CME position limit for Bitcoin futures (considering that all options deltas are ≤ 1.00) should be a bit higher than the CME implied 176,338 limit.

The Exchange notes, unlike options contracts, CME position limits are calculated on a net futures-equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an aggregation ratio(s).³⁶ Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.³⁷ If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading but does not exceed the limits when evaluated using the previous day's delta factors, then the position shall not constitute a position limit violation. Considering CME's position limits on futures for Bitcoin, the Exchange believes that that the proposed same side position limits are

more than appropriate for the iShares Fund options.

In analyzing the proposed position limit for options on the iShares Fund, ISE also considered the supply of Bitcoin. Specifically, ISE examined the number of market participants with position limits that would need to exercise in unison to put the underlying asset under stress. In the case of options on the iShares Fund, the proposed 25,000 same side position limit effectively restricts a market participant from holding positions that could be exercised in excess of 2,500,000 shares of the iShares Fund. Utilizing data from August 12, 2024, the iShares Fund had 611,040,000 shares outstanding, therefore 244 market participants would have to simultaneously exercise position limits in order to create a scenario that may put the underlying asset (iShares Fund) under stress.³⁸ The Exchange notes that historically, from observation only, it appears that no more than five market participants holding position limits in any security have exercised in unison in any option. As unlikely an occurrence as all market participants exercising their position limits in unison would be, if it were to occur, it should be noted that even such an occurrence would not likely put the iShares Fund under stress as economic incentives, would induce the creation of more shares through the ETF creation and redemption process.

By way of example, given that the current global supply of Bitcoin, the underlying asset of the iShares Fund, is 19,789,068³⁹ and that each Bitcoin can currently be redeemed for 1,755 shares of the iShares Fund, another 34,729,814,340 shares of the iShares Fund could be created. To exhaust this supply of the iShares Fund, 13,891 market participants would have to simultaneously exercise their position limit. Comparing the iShares Fund to the SPDR Gold Shares ("GLD") ETF or the iShares Silver Trust ("SLV") ETF, which have position limits of 250,000 or ten times the proposed position limit for the iShares Fund as well as lower shares outstanding in both products,⁴⁰ it is

unjustified to mandate a different level of stringency with respect to a position limit for options on the iShares Fund.

With respect to the Grayscale Fund, the Grayscale Mini Fund, and the Bitwise Fund, the Exchange reviewed the data presented by NYSE American in its filing. NYSE American aggregated market capitalization, volume, and shares outstanding data of the Bitcoin Funds and compared that data to those of other ETFs, and compared the proposed position limit of the Bitcoin Funds to the position limits of the options overlying those other ETFs. The Exchange reviewed NYSE American's data that demonstrated that each of these three Bitcoin Funds would easily qualify for the 250,000-contract position limit available to other ETFs and ETPs pursuant to the criterion in Rule 8.30, Interpretation and Policy .02, which requires the most recent six-month trading volume of the underlying security to be at least 100,000,000 shares.⁴¹

Bitcoin Fund	Total volume (shares) (as of September 30, 2024)
Grayscale Fund	723,758,100
Grayscale Mini Fund	335,492,930
Bitwise Fund	263,965,870

Based on this trading volume,⁴² each Bitcoin Fund exceeded the requisite 100,000,000 shares necessary to qualify for the 250,000-contract position and exercise limits. By comparison, the underlying of other options with six-month trading volume less than the volumes in the table above are eligible for position and exercise limits of at least 250,000.⁴³

<https://www.ishares.com/us/products/239855/ishares-silver-trust-fund>.

⁴¹ Rule 8.30, Interpretation and Policy .02(e) states that to be eligible for the 250,000 option contract limit, either the most recent six-month trading volume of the underlying security must have totaled at least 100,000,000 shares; or the most recent six-month trading volume of the underlying security must have totaled at least 75,000,000 shares and the underlying security must have at least 300,000,000 currently outstanding.

⁴² See FactSet, 9/30/2024, <https://www.factset.com/data-attribution>. Bitwise Fund shares began trading on July 31, 2024, and therefore the data in the above table has only two months of trading data available.

⁴³ See <https://www.theocc.com/Market-Data/Market-Data-Reports/Series-and-Trading-Data/Series-Search> (including the following symbols that have a position limit of 250,000: GLD, IAU, SLV, SIVR, SGOL).

³⁴ See https://finance.yahoo.com/quote/BTC%3Df/history/?guccounter=1&guce_referrer=aHR0cHM6Ly93d3cuZ29vZ2x1LnNvbS8&guce_referrer_sig=AQAAAM7ngaS6ZQS9c2Wzx7JW2IUe-_-1FnLyr8T-Qw4jjkleHyCENfSMIEpPPt2hCzPDeryTVyB78NIwxkwFB5Fuw-jA-YiuSmYJHBriWbV6dYn91VQfzQNT3p0l2RkYLD3HhzXPwu4AP5as-WzHNpEBon4sk5sUZXgkapMrZR--CS.

³⁵ See ISE Letter at 11.

³⁶ See CME Rulebook Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices.

³⁷ Id.

³⁸ See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust>.

³⁹ This figure was acquired as of August 13, 2024. See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust>. The global supply of Bitcoin grows each day Bitcoin are minted.

⁴⁰ As of August 13, 2024, GLD had 294,000,000 shares outstanding and SLV had 510,200,000 shares outstanding. See <https://www.ssga.com/us/en/intermediary/etfs/funds/spdr-gold-shares-gld> and

Second, with respect to the outstanding shares of these three Bitcoin Funds, the Exchange reviewed NYSE American's data regarding the outstanding shares of each of these Bitcoin Funds. NYSE American

performed an exercise to demonstrate that if a market participant held the maximum number of contracts possible pursuant to the proposed position and exercise limits (25,000 contracts), the equivalent shares represented by the

proposed position and exercise limits (2,500,000 shares) would represent the following approximate percentage of outstanding shares as of August 30, 2024:

Bitcoin Fund	Proposed position/ exercise limits in equivalent shares	Outstanding shares	Percentage of outstanding shares
Grayscale Fund	2,500,000	284,570,100	0.9
Grayscale Mini Fund	2,500,000	366,950,100	0.7
Bitwise Fund	2,500,000	68,690,000	3.6

As this table demonstrates, if a market participant held the maximum permissible options positions in one of the Bitcoin Fund options and exercised all of them at the same time, that market participant would control a small percentage of the outstanding shares of the underlying Bitcoin Fund. For

example, as noted above, a position limit of 25,000 same side contracts effectively restricts a market participant from holding positions that could result in the receipt of no more than 2,500,000 shares of the applicable Bitcoin Fund (if that market participant exercised all its options). NYSE American used the

number of shares outstanding for each Bitcoin Fund as of August 30, 2024, and calculated the approximate number of market participants that could hold the maximum of 25,000 same side positions in each Bitcoin Fund that would equate to the number of shares outstanding of that Bitcoin Fund:

Bitcoin Fund	Outstanding shares	Number of market participants with 25,000 same side positions
Grayscale Fund	284,570,100	114
Grayscale Mini Fund	366,950,100	147
Bitwise Fund	68,690,000	27

This means if 114 market participants had 25,000 same side positions in options on the Grayscale Fund, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security under stress. Similarly, this means if 147 market participants had 25,000 same side positions in options on the Grayscale Mini Fund, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security under stress. Finally, this means if 27 market participants had

25,000 same side positions in options on the Bitwise Fund, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security under stress. The Exchange believes it is highly unlikely for this to occur; however, even if such event did occur, the Exchange would not expect any of the Bitcoin Fund to be under stress because such an event would merely induce the creation of more shares through the trust's creation and redemption process.

NYSE American also performed an exercise to compare the size of the

proposed position limit to the market capitalization of the Bitcoin market given that the issuer of each of these three Bitcoin Funds may create and redeem shares that represent an interest in Bitcoin. NYSE American took the global supply of Bitcoin, which was 19,747,066, and the price of one Bitcoin, which was approximately \$59,108.23, as of August 30, 2024, which equates to a market capitalization of approximately \$1.167 trillion.⁴⁴ Consider the proposed position and exercise limit of 25,000 option contracts for each Bitcoin Fund option. A position and exercise limit of

⁴⁴ See <https://www.blockchain.com/explorer/charts/total-bitcoins>.

25,000 same side contracts effectively restricts a market participant from holding positions that could result in the receipt of no more than 2,500,000 shares of the Grayscale Fund, the

Grayscale Mini Fund, or the Bitwise Fund, as applicable (if that market participant exercised all its options). NYSE American considered the share price of each Bitcoin Fund on August

30, 2024 and calculated the value of 2,500,000 shares of the Bitcoin Fund at that price, and the approximate percentage of that value of the size of the Bitcoin market:

Bitcoin Fund	Share price (\$)	Value of 2,500,000 shares	Percentage of Bitcoin market
Grayscale Fund	46.75	116,875,000	0.010
Grayscale Mini Fund	5.20	13,000,000	0.001
Bitwise Fund	31.95	79,875,000	0.007

Therefore, if a market participant with the maximum 25,000 same side contracts in options on the Grayscale Fund, the Grayscale Mini Fund, or the

Bitwise Fund exercised all positions at one time, such an event would have no practical impact on the Bitcoin market. The Exchange also reviewed NYSE American's data regarding the market

capitalization of each of these three Bitcoin Funds relative to the market capitalization of the entire Bitcoin market, as of August 30, 2024:⁴⁵

	Bitcoin/shares outstanding	Market value (\$)	% of total Bitcoin market
Total Bitcoin Market	19,747,066	1,167,214,096,788	100
Grayscale Fund	284,570,100	13,443,091,524	1.15
Grayscale Mini Fund	366,950,100	1,930,157,526	0.17
Bitwise Fund	68,690,000	2,221,640,670	0.19

As this data gathered by NYSE American demonstrates, none of these three Bitcoin Funds represent more than 1.2% of the global supply of Bitcoin (19,747,066). Based on the \$46.75 price of a Grayscale Fund share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 1,264 Grayscale Fund shares. Another 24,967,146,455 Grayscale Fund shares could be created before the supply of Bitcoin was exhausted. As a result, 9,987 market participants would have to simultaneously exercise 25,000 same side positions in Grayscale Fund options to receive shares of the Grayscale Fund holding the entire global supply of Bitcoin. Similarly, based on the \$5.20 price of a Grayscale Mini Fund share on August 30, 2024, a market participant

could have redeemed one Bitcoin for approximately 11,367 Grayscale Mini Fund shares. Another 224,464,249,382 Grayscale Mini Fund shares could be created before the supply of Bitcoin was exhausted. As a result, 89,786 market participants would have to simultaneously exercise 25,000 same side positions in Grayscale Mini Fund options to receive shares of Grayscale Mini Fund holding the entire global supply of Bitcoin. Similarly, based on the \$31.95 price of a Bitwise Fund share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 1,850 Bitwise Fund shares. Another 36,532,522,591 Bitwise Fund shares could be created before the supply of Bitcoin was exhausted. As a result, 14,613 market

participants would have to simultaneously exercise 25,000 same side positions in Bitwise Fund options to receive shares of Bitwise Fund holding the entire global supply of Bitcoin.

As ISE did with respect to the iShares Fund, NYSE American compared the proposed position limits to the position limit of CME Bitcoin futures, which as noted above is 2,000 futures. On August 28, 2024, CME Aug 24 Bitcoin Futures settled at \$58,950. A position of 2,000 CME Bitcoin futures, therefore, would have a notional value of \$589,500,000. The following table shows the share price of each Bitcoin Fund on August 28, 2024, and the approximate number of option contracts that equates to that notional value:

Bitcoin Fund	Share price (\$)	Number of option contracts
Grayscale Fund	46.94	125,585
Grayscale Mini Fund	5.23	1,127,151
Bitwise Fund	32.08	183,759

The approximate number of option contracts for each Bitcoin Fund that equate to the notional value of CME Bitcoin futures is significantly higher than the proposed limit of 25,000 options contract for each Bitcoin Fund option. As noted above, the fact that many options ultimately expire out-of-the-money and thus are not exercised

for shares of the underlying, while the delta of a Bitcoin Future is 1, further demonstrates how conservative the proposed limits of 25,000 options contracts are for the Bitcoin Fund options.

The Exchange notes, again, unlike options contracts, CME position limits are calculated on a net futures-

equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an

⁴⁵ See *id.*

aggregation ratio(s).⁴⁶ Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.⁴⁷ If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading but does not exceed the limits when evaluated using the previous day's delta factors, then the position shall not constitute a position limit violation. Considering CME's position limits on futures for Bitcoin, the Exchange believes that that the proposed same side position limits are more than appropriate for the Grayscale Fund, Grayscale Mini Fund, and Bitwise Fund options.

While the supply of Bitcoin is limited to 21,000,000, it is believed that it will take more than 100 years to fully mine the remaining Bitcoin.⁴⁸ The Exchange notes that Bitcoin is a viable economic alternative to traditional assets. The price of goods denominated by Bitcoin has actually declined. This dynamic not only makes a fixed supply desirable, but a necessary condition of the value added by this asset in the broader economy. Unlike the Bitcoin Funds, the number of shares that corporations may issue is limited. However, like corporations, which authorize additional shares, repurchase shares, or split their shares, the Bitcoin Funds may create, redeem, or split shares in response to demand. Given the significant unlikelihood of any of events described above ever occurring, the Exchange does not believe options on the Bitcoin Funds should be subject to position and exercise limits even lower than those proposed (which are already equal to the lowest available limit for equity options in the industry) to protect the supply of Bitcoin.

Importantly, because the supply of Bitcoin is much larger than the available supply of most securities and the proposed 25,000 contract position limit

is so conservative, the Exchange believes that evaluating the available supply of Bitcoin in establishing a position limit for options on each of the Bitcoin Funds would demonstrate that the proposed limit is safe for investors and the market.⁴⁹ Each Bitcoin Fund represents less than 2% of the entire Bitcoin supply. When comparing the market capitalization of bitcoin against the largest securities, Bitcoin would rank 7th among those securities.⁵⁰ Further, the Exchange believes that its proposal to list options on the Bitcoin Funds each with a position limit of 25,000 on the same side is a conservative position limit that does not lend itself to manipulation in the market given the ample market capitalization and liquidity in each Bitcoin Fund. If we look to the liquidity statistics of similar instruments and their concomitant position limits, we are able to extrapolate a reasonable standard for arriving at a position limit for a new product. In this case we can look to GLD, SLV, and the ProShares Bitcoin Strategy ETF. These products have volume statistics and "float" statistics, which gauge liquidity, which are in line, yet slightly lower than the Bitcoin Funds. All three of these reference products have position limits of 250,000 contracts. These reference products are remarkably similar in nature to the Bitcoin Funds; they are exchange-traded products ("ETPs") holding one asset in a trust.

The Exchange believes the available supply of Bitcoin is not relevant to the determination of position and exercise limits for options overlying the Bitcoin Funds.⁵¹ Position and exercise limits are not a tool that should be used to address

a potential limited supply of the underlying of an underlying. Position and exercise limits do not limit the total number of options that may be held, but rather they limit the number of positions a single customer may hold or exercise at one time.⁵² "Since the inception of standardized options trading, the options exchanges have had rules imposing limits on the aggregate number of options contracts that a member or customer could hold or exercise."⁵³ Position and exercise limit rules are intended "to prevent the establishment of options positions that can be used or might create incentives to manipulate or disrupt the underlying market so as to benefit the options position. In particular, position and exercise limits are designed to minimize the potential for mini-manipulations and for corners or squeezes of the underlying market. In addition, such limits serve to reduce the possibility for disruption of the options market itself, especially in illiquid options classes."⁵⁴

The Exchange notes that a Registration Statement on Form S-1 was filed with the Commission for each Bitcoin Fund, each of which described the supply of Bitcoin as being limited to 21,000,000 (of which approximately 90% had already been mined), and that the limit would be reached around the year 2140.⁵⁵ Each Registration Statement permits an unlimited number of shares of the applicable Bitcoin Fund to be created. Further, the Commission approved proposed rule changes that permitted the listing and trading of shares of each Bitcoin Fund, which approval did not comment on the sufficient supply of Bitcoin or address whether there was a risk that permitting an unlimited number of shares for a Bitcoin Fund would impact the supply

⁴⁹ A supply consideration would likely be valuable for an option symbol that had far less liquidity than the Trust.

⁵⁰ See <https://companiesmarketcap.com/usa/largest-companies-in-the-usa-by-market-cap/>.

⁵¹ The Exchange is unaware of any proposed rule change related to position and exercise limits for any equity option (including commodity ETF options) for which the Commission required consideration of whether the available supply of an underlying (whether it be a corporate stock or an ETF) or the contents of an ETF (commodity or otherwise) should be considered when an exchange proposed to establish those limits. See, e.g., Securities Exchange Act Release No. 57894 (May 30, 2008), 73 FR 32061 (June 5, 2008) (SR-CBOE-2005-11) (approval order in which the Commission stated that the "listing and trading of Gold Trust Options will be subject to the exchanges' rules pertaining to position and exercise limits and margin"). The Exchange notes when the Commission approved this filing, the position limits in Rule 8.30 were the same as they are today. For reference, the current position and exercise limits for options on SPDR Gold Shares ETF ("GLD") and options on iShares Silver Trust ("SLV") are 250,000 contracts, or 10 times that proposed position and exercise limit for the Bitcoin Fund options.

⁵² For example, suppose an option has a position limit of 25,000 option contracts and there are a total of 10 investors trading that option. If all 10 investors max out their positions, that would result in 250,000 option contracts outstanding at that time. However, suppose 10 more investors decide to begin trading that option and also max out their positions. This would result in 500,000 option contracts outstanding at that time. An increase in the number of investors could cause an increase in outstanding options even if position limits remain unchanged.

⁵³ See Securities Exchange Act Release No. 39489 (December 24, 1997), 63 FR 276 (January 5, 1998) (SR-CBOE-1997-11).

⁴⁷ *Id.*

⁴⁸ See <https://www.blockchain.com/explorer/assets/btc> (citing 21 million as the "total supply" of bitcoin).

of Bitcoin.⁵⁶ Therefore, the Exchange believes the Commission had ample time and opportunity to consider whether the supply of Bitcoin was sufficient to permit the creation of unlimited Bitcoin Fund shares, and does not believe considering this supply with respect to the establishment of position and exercise limits is appropriate given its lack of relevance to the purpose of position and exercise limits. However, given the significant size of the Bitcoin supply, the proposed positions limits are more than sufficient to protect investors and the market.

All of the above information demonstrates that the proposed position and exercise limits for the Bitcoin Fund options are more than reasonable and appropriate. The trading volume, ADV, and outstanding shares of each Bitcoin Fund demonstrate that these funds are actively traded and widely held, and proposed position and exercise limits are well below those of other ETFs with similar market characteristics. The proposed position and exercise limits are the lowest position and exercise limits available for equity options in the industry, are extremely conservative, and are more than appropriate given each Bitcoin Fund's market capitalization and ADV.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options on the Bitcoin Funds that it applies to the Exchange's other options products.⁵⁷ The Exchange's market surveillance staff would have access to the surveillances conducted by Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc., and Cboe EDGA Exchange, Inc., in addition to the Exchange's equity market,⁵⁸ with respect to the Bitcoin Funds and would review activity in the underlying Bitcoin Funds when conducting surveillances for market abuse or manipulation in the options on the Bitcoin Funds. Additionally, the Exchange is a member of the Intermarket Surveillance Group ("ISG") under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining information from its affiliated markets, the Exchange

would be able to obtain information regarding trading in shares of the Bitcoin Funds from their primary listing markets and from other markets that trades shares of the Bitcoin Funds through ISG. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority ("FINRA") for certain market surveillance, investigation and examinations functions. Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate amongst themselves and FINRA responsibilities to conduct certain options-related market surveillance that are common to rules of all options exchanges.⁵⁹

The underlying shares of spot bitcoin exchange-traded products ("ETPs"), including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot bitcoin-based ETPs, "[e]ach Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.⁶⁰ The Exchange states that, given the consistently high correlation between the CME Bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs]." ⁶¹ In light of surveillance measures related to both

options and futures as well as the underlying Bitcoin Funds,⁶² the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on Bitcoin ETPs.

The Exchange has also analyzed its capacity and represents that it believes the Exchange and OPRA have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on Bitcoin Funds up to the number of expirations currently permissible under the Rules. Because the proposal is limited to two classes, the Exchange believes any additional traffic that may be generated from the introduction of Bitcoin Fund options will be manageable.

The Exchange believes that offering options on Bitcoin Funds will benefit investors by providing them with an additional, relatively lower cost investing tool to gain exposure to the price of Bitcoin and hedging vehicle to meet their investment needs in connection with Bitcoin-related products and positions. The Exchange expects investors will transact in options on Bitcoin Funds in the unregulated over-the-counter ("OTC") options market,⁶³ but may prefer to trade such options in a listed environment to receive the benefits of trading listing options, including (1)

⁶² See Securities Exchange Act Release Nos. 99290 (January 8, 2024), 89 FR 2338, 2343, 2347–2348 (January 12, 2024) (SR–CboeBZX–2023–044) Notice of Filing of Amendment No. 3 to a Proposed Rule Change to List and Trade Shares of the Fidelity Wise Origin Bitcoin Fund Under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares); and 99288 (January 8, 2024), 89 FR 2387, 2392, 2399–2400 (January 12, 2024) (SR–CboeBZX–2023–028) (Notice of Filing of Amendment No. 5 to a Proposed Rule Change To List and Trade Shares of the ARK 21Shares Bitcoin ETF Under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares). See also Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008, 3009 (January 17, 2024) (SR–NYSEArca–2021–90; SR–NYSEArca–2023–44; SR–NYSEArca–2023–58; SR–NASDAQ–2023–016; SR–NASDAQ–2023–019; SR–CboeBZX–2023–028; SR–CboeBZX–2023–038; SR–CboeBZX–2023–040; SR–CboeBZX–2023–042; SR–CboeBZX–2023–044; and SR–CboeBZX–2023–072) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units) ("Bitcoin ETP Approval Order").

⁶³ The Exchange understands from customers that investors have historically transacted in options on Fund Shares in the OTC options market if such options were not available for trading in a listed environment.

⁵⁶ See Bitcoin ETP Approval Order.

⁵⁷ The surveillance program includes surveillance patterns for price and volume movements as well as patterns for potential manipulation (e.g., spoofing and marking the close).

⁵⁸ Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc., and Cboe EDGA Exchange, Inc. are affiliated markets of the Exchange.

⁵⁹ Section 19(g)(1) of the Act, among other things, requires every self-regulatory organization ("SRO") registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO ("common members"). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

⁶⁰ See Bitcoin ETP Approval Order.

⁶¹ See Bitcoin ETP Approval Order, 89 FR at 3010–11.

enhanced efficiency in initiating and closing out positions; (2) increased market transparency; and (3) heightened contra-party creditworthiness due to the role of OCC as issuer and guarantor of all listed options. The Exchange believes that listing Bitcoin Fund options may cause investors to bring this liquidity to the Exchange, would increase market transparency and enhance the process of price discovery conducted on the Exchange through increased order flow. The Fund Shares that hold financial instruments, money market instruments, or precious metal commodities on which the Exchange may already list and trade options are trusts structured in substantially the same manner as Bitcoin Funds and essentially offer the same objectives and benefits to investors, just with respect to different assets. The Exchange notes that it has not identified any issues with the continued listing and trading of any Fund Share options, including Fund Shares that hold commodities (*i.e.*, precious metals) that it currently lists and trades on the Exchange.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁶⁴ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁶⁵ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁶⁶ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that the proposal to list and trade options on the Bitcoin Funds will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because

offering options on the Bitcoin Funds will provide investors with an opportunity to realize the benefits of utilizing options on a Bitcoin Fund, including cost efficiencies and increased hedging strategies. The Exchange believes that offering options on a competitively priced ETF based on spot Bitcoin will benefit investors by providing them with an additional, relatively lower-cost risk management tool, allowing them to manage, more easily, their positions and associated risks in their portfolios in connection with exposure to spot Bitcoin. Today, the Exchange lists options on other commodity (including Bitcoin) ETFs structured as a trust, which essentially offer the same objectives and benefits to investors, and for which the Exchange has not identified any issues with the continued listing and trading of options on those ETFs.

The Exchange also believes the proposal to permit options on the Bitcoin Funds will remove impediments to and perfect the mechanism of a free and open market and a national market system, because options on the Bitcoin Funds will comply with current Exchange Rules. Options on the Bitcoin Funds must satisfy the initial listing standards and continued listing standards currently in the Rules, applicable to options on all ETFs, including options on other commodity ETFs already deemed appropriate for options trading on the Exchange pursuant to Rule 19.3(i). Additionally, as demonstrated above, the Bitcoin Funds are characterized by a substantial number of shares that are widely held and actively traded. Further, Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (as proposed herein), and margin requirements, will govern the listing and trading of options on the Bitcoin Funds.

The proposed position and exercise limits for options on each of the Bitcoin Funds is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given Bitcoin Fund's market capitalization, ADV, and high number of outstanding shares. The proposed position limit, and exercise limit, is consistent with the Act as it addresses concerns related to manipulation and protection of investors because, as demonstrated above, the position limit (and exercise limit) is extremely conservative and more than appropriate given the Bitcoin Funds are actively

traded. In support of the proposed position and exercise limits for options on the Bitcoin Funds are 25,000 contracts, the Exchange is citing the in depth analysis each of ISE and NYSE American did in their respective filings. As noted above, in the ISE and NYSE American Approvals, each of ISE and NYSE American considered the: (1) applicable Bitcoin Fund's market capitalization and ADV, and proposed position limit in relation to other securities; (2) market capitalization of the entire Bitcoin market in terms of exercise risk and availability of deliverables; (3) proposed position limit by comparing it to position limits for derivative products regulated by the CFTC; and (4) supply of Bitcoin. Based on the Exchange's review of these analyses, the Exchange believes that the setting position and exercise limits for options on each of the Bitcoin Funds is 25,000 contracts is more than appropriate. The proposed position and exercise limits reasonably and appropriately balance the liquidity provisioning in the market against the prevention of manipulation. The Exchange believes these proposed limits are effectively designed to prevent an individual customer or entity from establishing options positions that could be used to manipulate the market of the underlying as well as the Bitcoin market.⁶⁷

The Exchange represents that it has the necessary systems capacity to support the new Bitcoin Fund options. As discussed above, the Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading Fund Share options, including Bitcoin Fund options.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as the Bitcoin Fund options will be equally available to all market participants who wish to trade such options and will trade generally in the same manner as other options. The Rules that currently apply to the listing

⁶⁴ 15 U.S.C. 78f(b).

⁶⁵ 15 U.S.C. 78f(b)(5).

⁶⁶ *Id.*

⁶⁷ See Securities Exchange Act Release No. 39489 (December 24, 1997), 63 FR 276 (January 5, 1998) (SR-CBOE-1997-11).

and trading of all Fund Share options on the Exchange, including, for example, Rules that govern listing criteria, expirations, exercise prices, minimum increments, margin requirements, customer accounts, and trading halt procedures will apply to the listing and trading of Bitcoin Funds options on the Exchange in the same manner as they apply to other options on all other Fund Shares that are listed and traded on the Exchange. Also, and as stated above, the Exchange already lists options on other commodity-based Fund Shares (including Bitcoin-based).⁶⁸ Further, the Bitcoin Funds would need to satisfy the maintenance listing standards set forth in the Exchange Rules in the same manner as any other Fund Share for the Exchange to continue listing options on them.

The Exchange does not believe that the proposal to list and trade options on Bitcoin Funds will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that the advent of Bitcoin Fund options trading on the Exchange may make the Exchange a more attractive marketplace to market participants at other exchanges, such market participants are free to elect to become market participants on the Exchange. The Commission recently approved rule filings of other exchanges to permit the listing and trading of options on the Bitcoin Funds.⁶⁹ The Exchange notes that listing and trading Bitcoin Fund options on the Exchange will subject such options to transparent exchange-based rules as well as price discovery and liquidity, as opposed to alternatively trading such options in the OTC market.

The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition, as it is designed to increase competition for order flow on the Exchange in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering Bitcoin Fund options for trading on the Exchange will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment

needs in connection with Bitcoin prices and Bitcoin-related products and positions on a listed options exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act⁷⁰ and Rule 19b-4(f)(6) thereunder.⁷¹

A proposed rule change filed pursuant to Rule 19b-4(f)(6) under the Act normally does not become operative for 30 days after the date of its filing. However, Rule 19b-4(f)(6)(iii)⁷² permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the Bitcoin Funds.⁷³ The Exchange has provided information regarding the underlying Bitcoin Funds, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of the Bitcoin Funds. The proposal also establishes position and exercise limits for options on the Bitcoin Funds and provides information regarding the surveillance procedures that will apply to options on the Bitcoin Funds. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Bitcoin Fund options. Therefore, the Commission believes that waiver of the

30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.⁷⁴

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeEDGX-2024-078 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-CboeEDGX-2024-078. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE,

⁷⁰ 15 U.S.C. 78s(b)(3)(A).

⁷¹ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission waives this requirement.

⁷² 17 CFR 240.19b-4(f)(6)(iii).

⁷³ See *supra* note 4.

⁷⁴ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁶⁸ See Rule 19.3(i)(4).

⁶⁹ See ISE Approval and NYSE American Approval.

Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeEDGX-2024-078 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁷⁵

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101742; File No. SR-CboeBZX-2024-113]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Fees for New Logical Ports in Connection With a New Connectivity Offering on Its Equity Options Platform

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 12, 2024, Cboe BZX Exchange, Inc. (the “Exchange” or “BZX”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the “Exchange” or “BZX”) proposes to adopt fees for new logical ports in connection with a new connectivity offering on its equity options platform. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/equities/regulation/rule_filings/BZX/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to adopt fees for Unitized Logical Ports, a new connectivity offering for its equity options platform (“BZX Options”) and adopt new Average Daily Quote and Average Daily Order fees.³

Unitized Port Fees

By way of background, Exchange Members may interface with the Exchange’s Trading System by utilizing either the Financial Information Exchange (“FIX”) protocol or the Binary Order Entry (“BOE”) protocol. The Exchange further offers a variety of logical ports,⁴ which provide users of these ports with the ability within the Exchange’s System to accomplish a specific function through a connection, such as order entry, data receipt or access to information. For example, such ports include Logical Ports,⁵ Purge

Ports,⁶ and Ports with Bulk Quoting Capabilities⁷ (“Bulk Ports”). By way of further background, each of these ports corresponds to a single running order handler. Each order handler processes the messages it receives from these ports from the connected Members. This processing includes determining whether the message contains the required information to enter the System, whether the message parameters satisfy port-level (*i.e.*, pre-trade) risk controls, and where to send that message within the System (*i.e.*, to which matching engine⁸). Once an order handler completes the processing of a message, it sends that message to the appropriate matching engine.

Historically, all order handlers connect to all matching engines. That is, under the BOEv2 and FIX protocols, Members were able to access all symbols from a single logical port since each port corresponds to a single order handler that conveniently connects to all matching engines (“convenience layer”). Although the Exchange configures the software and hardware for its order handlers in the same manner, there can be a natural variance in the amount of time it takes individual order handlers to process messages of the same type under this architecture. Factors that contribute to this differentiation in processing times include the availability of shared resources (such as memory), which is impacted by (among other things) then-current message rates, the number of active symbols (*i.e.*, classes), and recent messages for a symbol. This natural differentiation in processing times inherently may cause some messages to

Port, Multicast PITCH Spin Server Port or GRP Port).

⁶ Purge Ports provide users the ability to cancel a subset (or all) of open orders across Executing Firm ID(s) (“EFID(s)”), Underlying symbol(s), or CustomGroupID(s), across multiple logical ports/sessions. See Securities Exchange Act Release 79956 (February 3, 2017), 82 FR 10102 (February 9, 2017) (SR-BatsBZX-2017-05). See also https://cdn.cboe.com/resources/membership/US_Options_BOE_Specification.pdf and https://cdn.cboe.com/resources/membership/US_Options_FIX_Specification.pdf.

⁷ See Exchange Rule 21.1 (l)(3), definition of “bulk port.” Bulk Ports provide users with the ability to submit and update multiple quote bids and offers in one message through logical ports enabled for bulk-quoting.

⁸ A matching engine is a part of the Exchange’s System that processes options quotes and trades on a symbol-by-symbol basis. Some matching engines will process option classes with multiple root symbols, and other matching engines will be dedicated to one single option root symbol (for example, options on SPY will be processed by one single matching engine that is dedicated only to SPY). A particular root symbol may only be assigned to a single designated matching engine. A particular root symbol may not be assigned to multiple matching engines.

⁷⁵ 17 CFR 200.30-3(a)(12), (59).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ The Exchange initially submitted the proposed rule change on August 30, 2024 and was effective September 3, 2024 (SR-CboeBZX-2024-082). On September 13, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-088. On November 12, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ See Exchange Rule 21.1 (l)(2), definition of “logical port.” Logical ports include FIX and BOE ports (used for order entry), drop logical port (which grants users the ability to receive and/or send drop copies) and ports that are used for receipt of certain market data feeds.

⁵ The term “Logical Ports” used herein shall refer to FIX and BOE ports (used for order entry). See Cboe BZX Options Fee Schedule, Options Logical Port Fees, “Logical Ports” (which exclude Purge

be sent from an order handler to a matching engine ahead of other messages that the Exchange's System may have received earlier on a different order handler.

The Exchange recently implemented a new architecture and protocol which includes, among other things, a single gateway per matching engine ("unitized layer"), which renders the above-described natural variance of order handler processing irrelevant for Members that connect to the unitized order handler.⁹ More specifically, effective August 19, 2024, the Exchange implemented this new unitized access architecture and a new version of its Binary Order Entry (BOE) protocol¹⁰ ("BOEv3"), which also resulted in the adoption of new logical port types

("Unitized Logical Ports"), for which the Exchange is now seeking to establish fees.¹¹ Under the new unitized BOEv3 architecture, a single BOEv3 order handler corresponds to a single matching engine and all message traffic (including FIX and current BOEv2¹² port traffic) pass through this unitized BOEv3 order handler before reaching that order handler's corresponding matching engine. If a Member desires to access this optional unitized layer of the BOEv3 architecture (which it is not required to do), the Member would need to obtain a Unitized Logical Port for each unitized BOEv3 order handler and corresponding matching engine(s) that process the symbol(s) that Member desires to trade.¹³ The three new port types that have been adopted are: (1)

BOE Unitized Logical Ports,¹⁴ (2) Bulk Unitized Logical Ports,¹⁵ and (3) Purge Unitized Logical Ports.¹⁶ As noted above, use of Unitized Logical Ports is completely voluntary, and no Member is required, or under any regulatory obligation, to utilize them.

The Exchange proposes to establish fees for the new Unitized Logical Ports, which can be purchased on an individual basis (*i.e.*, capable of accessing a specified matching engine ("Matching Unit")) and/or as a set ("Unitized Logical Port Set") (*i.e.*, will include the total number of ports needed to connect to each available Matching Unit). The proposed fees for Unitized Logical Ports purchased individually and as sets are as follows:

BOE unitized logical port	\$350/port/month.
Bulk Unitized Logical Port	\$550/port/month.
Purge Unitized Logical Port	\$400/port/month.
BOE Unitized Logical Port (Set)	\$2,500/month for 1st and 2nd port set. \$3,000/month for 3rd–14th port set. \$3,500/month for 15th–20th port set.
Bulk Unitized Logical Port (Set)	\$5,500/month for 1st and 2nd port set. \$6,000/month for 3rd–14th port set. \$6,500/month for 15th–20th port set.
Purge Unitized Logical Port (Set)	\$2,500/month for 1st and 2nd port set. \$3,000/month for 3rd–14th port set. \$3,500/month for 15th–20th port set.

The proposed fees for Unitized Logical Port Sets are progressive. For example, if a User were to purchase 11 BOE Unitized Logical Port Sets, it will be charged a total of \$32,000 per month ($\$2,500 \times 2 + \$3,000 \times 9$). As is the case today for existing logical ports, the monthly fees are assessed and applied in their entirety and are not prorated. The Exchange notes the current standard fees assessed for existing logical ports will remain applicable and unchanged.¹⁷ The proposed fees for Unitized Logical Port Sets will be assessed per set, per Port Type. As an example, if a Member requests three BOE Unitized Logical Port Sets, one Bulk Unitized Logical Port Set, and one Purge Unitized Logical Port Set, the firm would be charged \$8,000 ($\$2,500 +$

$\$2,500 + \$3,000$) for the three BOE Unitized Logical Port Sets, \$5,500 for the one Bulk Unitized Logical Port Set, and \$2,500 for the one Purge Unitized Logical Port Set.¹⁸

Since the Exchange has a finite amount of capacity, it also proposes to prescribe a maximum limit on the number of Unitized Logical Ports that may be purchased and used on a per firm, per Matching Unit basis. The purpose of establishing these limits is to manage the allotment of Unitized Logical Ports in a fair and reasonable manner while preventing the Exchange from being required to expend large amounts of resources in order to provide an unlimited capacity to its matching engines. Particularly, the Exchange proposes to provide that the two

structures (*i.e.*, individual unitized ports or unitized port sets) can be combined for up to a maximum of 20 Unitized Logical Ports per Member, per Matching Unit, per port type. As an example, a Member may request 2 BOE Unitized Logical Port Sets and 18 individual BOE Unitized Logical Ports for Matching Unit 1, providing a total max of 20 BOE Unitized Logical Ports on Matching Unit 1 specifically. This would result in having 20 BOE Unitized Logical Ports on Matching Unit 1 and 2 BOE Unitized Ports on all additional Matching Units as part of the 2 BOE Unitized Logical Port Sets requested. Additionally, a firm may request 20 Bulk Unitized Logical Port Sets and 20 Purge Unitized Logical Port Sets as those would constitute

⁹ See Securities Exchange Act Release 100582 (July 23, 2024), 89 FR 60958 (July 29, 2024) (SR–CboeBZX–2024–071).

¹⁰ The BOE protocol is a proprietary order entry protocol used by Members to connect to the Exchange. The current version is BOEv2.

¹¹ See Securities Exchange Act Release No. 100582 (July 23, 2024) 89 FR 60958 (July 29, 2024) (SR–CboeBZX–2024–071).

¹² The Exchange anticipates decommissioning BOEv2 in February 2025.

¹³ Members will be able to purchase Unitized Logical Ports individually or may purchase a "set," which will provide the total number of ports

needed to connect to each available matching engine.

¹⁴ Similar to the Exchange's preexisting Logical Ports, the new Unitized Logical Ports allow Members to submit orders and quotes.

¹⁵ Similar to the Exchange's preexisting Bulk Ports, the new Bulk Unitized Logical Ports allow Members to submit and update multiple quote bids and offers in one message and are particularly useful for Members that provide quotations in many different options.

¹⁶ Similar to the Exchange's preexisting Purge Ports, the new Purge Unitized Logical Ports are dedicated logical ports that provide the ability to cancel/purge all open orders, or a subset thereof, across multiple logical ports through a single

cancel/purge message. They also solely process purge messages and are designed to assist Members, including Market Makers, in the management of, and risk control over, their orders and quotes, particularly if the Member is dealing with a large number of options.

¹⁷ For example, the Exchange currently assesses a monthly per port fee of \$750 for Logical Ports and Purge Ports. It also assesses \$1,500 per port month for the 1st and 2nd Bulk Ports and \$2,500 for the 3rd or more Bulk Ports. See Cboe BZX Options Fee Schedule, Options Logical Port Fees.

¹⁸ The Exchange proposes to include this example in the Fee Schedule to provide further clarity as to the application of the proposed fees.

different port types.¹⁹ The Exchange believes the proposed cap will be sufficient for the vast majority of Members.²⁰ The Exchange notes that it will monitor interest in Unitized Logical Ports and system capacity availability with the goal of increasing these limits to meet Members needs if and when the demand is there, and the Exchange is able to accommodate it. Additionally, Members will still be able to utilize the existing logical port connectivity offerings with no maximum limit in addition to their Unitized Logical Port allocation.

Average Daily Quotes and Average Daily Order Fees

The Exchange also proposes to adopt Average Daily Order (“ADO”) and

Average Daily Quote (“ADQ”) fees. “ADO” represents the total number of orders for the month, divided by the number of trading days. “ADQ” represents the total number of quotes for the month, divided by the number of trading days. When measuring a Member’s ADO and ADQ, orders, quotes, cancel/replace modify orders, and quote updates which submit a bid or offer and do not include cancels, are included. Further ADO and ADQ will include orders and quotes submitted by a Member from all logical port types (*i.e.*, non-unitized logical ports and Unitized Logical Ports). Each Member may submit up to 2,000,000 average daily orders or up to 250,000,000 average daily quotes per calendar month

without incurring any ADO or ADQ fees. In the event that the average number of quotes per trading day during a calendar month submitted exceeds 250,000,000, each incremental usage of up to 20,000 average daily quotes will incur an additional fee as set forth in the table below. Similarly, in the event that the average number of orders per trading day during a calendar month submitted exceeds 2,000,000, each incremental usage of up to 1,000 average daily orders will incur an additional ADO fee as set forth in the table below.²¹ A Member’s ADO and ADQ will be aggregated together with any affiliated Member sharing at least 75% common ownership.

	Fee				
	Tier 1	Tier 2	Tier 3	Tier 4	Tier 5
ADQ Fee Rate per 20,000 ADQ	<= 250,000,000 \$0.00	>250,000,000 \$0.05	>500,000,000 \$0.075	>1,000,000,000 \$0.10	>3,500,000,000 \$0.20
ADO Fee Rate per 1,000 ADO	<= 2,000,000 \$0.00	>2,000,000 \$1.00	>2,500,000 \$1.50	>3,000,000 \$2.00	>3,500,000 \$2.50

As an example, a Member that has 510,000,000 ADQ would subsequently have 25,500 “ADQ increments” (510,000,000 ADQ/20,000 ADQ increments). While 12,500 of the 25,500 ADQ increments are free within Tier 1, 12,500 of the ADQ increments would be fee liable at \$0.050 within Tier 2, while the remaining 500 ADQ increments would be fee liable at \$0.075 within Tier 3, resulting in a total ADQ fee of \$662.50 for that month.²²

The Exchange notes that market participants with incrementally higher ADO or ADQ have the potential residual effect of exhausting system resources, bandwidth, and capacity. Higher ADO or ADQ may therefore, in turn, create latency and impact other Members’ ability to receive timely executions. The proposed fee structure has multiple thresholds, and the proposed fees are incrementally greater at higher ADO and ADQ rates because the potential impact on exchange systems, bandwidth and

capacity becomes greater with increased ADO and ADQ rates. As noted above, the proposal contemplates that a Member would have to exceed the high ADO rate of 2,000,000 and a Market Maker would have to exceed the high ADQ rate of 250,000,000 before that market participant would be charged a fee under the proposed respective tiers. The Exchange believes that it is in the interests of all Members and market participants who access the Exchange to not allow other market participants to exhaust System resources, but to encourage efficient usage of network capacity. The Exchange also believes this proposal (and in particular the proposed fee amounts associated with higher ADO and ADQ) will reduce the incentive for market participants to engage in excessive order/quote and trade activity that may require the Exchange to otherwise increase its storage capacity and will encourage

such activity to be submitted in good faith for legitimate purposes.

The Exchange also represents that the proposed fees are not intended to raise revenue; rather, as noted above, it is intended to encourage efficient behavior so that market participants do not exhaust System resources. Moreover, the Exchange intends to provide Members with daily reports, free of charge, which will detail their order and trade activity in order for those firms to be fully aware of all order and trade activity they (and their affiliates) are sending to the Exchange. This will allow Members to monitor their behavior and determine whether it is approaching any of the ADO or ADQ thresholds that trigger the proposed fees.

The Exchange lastly notes that other exchanges have adopted various fee programs that assess incrementally higher fees to Members that have incrementally higher order and/or

¹⁹ The Exchange proposes to include this example in its Fee Schedule to provide clarity as to how Unitized Logical Port fees will be assessed.

²⁰ The Exchange notes that one Member has indicated that it *may* desire more than the current maximum in the future.

²¹ The term “quote” refers to bids and offers submitted in bulk messages. A bulk message means a single electronic message a user submits with an M (Market-Maker) capacity to the Exchange in which the User may enter, modify, or cancel up to an Exchange-specified number of bids and offers. A

User may submit a bulk message through a bulk port as set forth in Exchange Rule 21.1(j)(3). See Rule 16.1 (definition of bulk message).

²² The Exchange proposes to include this example in the Fees Schedule to provide further clarity as to the application of the proposed fees.

²³ See, e.g., Securities Exchange Act Release No. 60102 (June 11, 2009), 74 FR 29251 (June 19, 2009) (SR-NYSEArca-2009-50) (adopting fees applicable to Members based on the number of orders entered compared to the number of executions received in a calendar month). It appears that Nasdaq similarly

assesses a penalty charge to its members that exceed certain “weighted order-to-trade ratios”. See *Price List—Trading Connectivity*, NASDAQ, available at <https://www.nasdaqtrader.com/trader.aspx?id=pricelisttrading2>. See also Securities Exchange Act Release No. 91406 (March 25, 2021), 86 FR 16795 (March 31, 2023) (SR-EMERALD-2021-10) (adopting an “Excessive Quoting Fee” to ensure that Market Makers do not over utilize the exchange’s System by sending messages to the MIAx Emerald, to the detriment of all other Members of the exchange).

quoting trading activity for similar reasons.²³

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.²⁴ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)²⁵ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)²⁶ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)²⁷ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

The Exchange believes the proposed fees are reasonable because Unitized Logical Ports provide an optional, valuable service in that the ports are intended to create a more consistent, deterministic experience for messages once received within the Exchange’s System under the recently adopted unitized BOEv3 architecture. As discussed above, the new architecture (and thereby the new Unitized Logical Ports) was designed to create a more consistent, deterministic experience for messages once received within the Exchange’s System, which the Exchange believes improves the overall access experience on the Exchange and will enable future system enhancements. As noted, the BOEv3 protocol and architecture, along with the three new corresponding Unitized Logical Ports, are intended to reduce the natural variance of order handler processing

times for messages, and as a result reduce the potential resulting “reordering” of messages when they are sent from order handlers to matching engines. The adoption of the unitized BOEv3 structure (including the corresponding new Unitized Ports) was a technical solution that is intended to reduce the potential of this reordering and increase determinism.²⁸ The Exchange believes the proposed fees are also reasonable to offset costs incurred in order to build out an entirely new unitized architecture.

The Exchange also emphasizes that the use of the Unitized Logical Ports is not necessary for trading on the Exchange and, as noted above, is entirely optional. Users can also continue to access the Exchange through existing logical port offerings at existing rates. It is a Member’s specific business needs that will drive its decision whether to use Unitized Logical Ports in lieu of, or in addition to, existing logical ports (or, as emphasized, not use them at all). If a User finds little benefit in having these ports based on its business model and trading strategies, or determines the Unitized Logical ports are not cost-efficient for its needs, or does not provide sufficient value to the firm, such User may continue connecting to the Exchange in the manner it does today, unchanged. Indeed, the Exchange notes that since the adoption of Unitized Logical Ports on August 19, only approximately 27% of logical ports, bulk ports and purge ports being used are Unitized Logical Ports and approximately 73% are the preexisting Logical Ports, Bulk Ports and Purge Ports. Moreover, the Exchange believes that providing Members the option of purchasing Unitized Logical Ports individually or in sets provides Members further flexibility and an opportunity for cost savings for those Members that wish to only trade a subset of classes.

The Exchange also believes that the proposed Unitized Logical Port fees are equitable and not unfairly discriminatory because they continue to be assessed uniformly to similarly situated users in that all Users who choose to purchase Unitized Logical Ports will be subject to the same proposed tiered fee schedule. Moreover, Members purchasing Unitized Logical Ports will only do so if they find a benefit and sufficient value in such ports as, all Members can otherwise continue to use the preexisting logical connectivity options. As such, Members

can choose whether or not to purchase Unitized Logical Ports based on their respective business needs.

The proposed ascending tier structure for Unitized Logical Port Sets is reasonable, equitable and not unfairly discriminatory as it’s designed to encourage market participants to be efficient with their respective Unitized Logical Port usage. It also is designed so that Members that use a higher allotment of the Exchange’s system resources pay higher rates, rather than placing that burden on market participants that have more modest needs. The Exchange believes the proposed ascending fee structure is therefore another appropriate means, in conjunction with an established Unitized Logical Port limit, to manage this finite resource (system capacity) and ensure its apportioned fairly. Furthermore, the Exchange already assesses higher fees to those that consume more Exchange resources for the existing non-Unitized Bulk Ports.²⁹ The proposed limit on Unitized Logical Ports is also reasonable, equitable and not unfairly discriminatory as the Exchange believes that it is in the interests of all Members and market participants who access the Exchange to not allow Members to exhaust System resources, but to encourage efficient usage of network capacity. The Exchange also notes that the new BOEv3 unitized architecture is subject to software limitations on the number of sessions that can be created on any one unitized process. Consideration was given to this limitation as well as to the amount of ports firms had indicated they would need prior to the implementation of Unitized Logical Ports.

The Exchange believes the proposed ADO and ADQ fees are reasonable as Members that do not exceed the high thresholds of 2,000,000 ADO and 250,000,000 ADQ will not be charged any fee under the proposed tiers. The Exchange notes that in establishing the proposed thresholds, it evaluated average ADO and ADQ rates over several months and the thresholds were designed to protect the Exchange’s Matching Engines from being adversely impacted from sustained and excessive orders/quotes throughout the course of a given month. The ADQ thresholds are also designed to ensure Market Makers quoting activity, which acts as important source of liquidity, is not

²⁴ 15 U.S.C. 78f(b).

²⁵ 15 U.S.C. 78f(b)(5).

²⁶ *Id.*

²⁷ 15 U.S.C. 78f(b)(4).

²⁸ See Securities Exchange Act Release 100582 (July 23, 2024), 89 FR 60958 (July 29, 2024) (SR–CboeBZX–2024–071).

²⁹ See Cboe U.S. Options Fees Schedule, BZX Options, Options Logical Port Fees, Ports with Bulk Quoting Capabilities.

impeded by the proposal.³⁰ The Exchange believes it's reasonable, equitable and not unfairly discriminatory to assess higher fees when a Member has higher ADO and ADQ rates because the potential impact on exchange systems, bandwidth and capacity becomes greater with increased ADO and ADQ rates. The Exchange believes the proposed fee amounts are reasonable as the Exchange believes them to be commensurate with the proposed thresholds. Particularly, the proposed fee amounts that correspond to higher ADO and ADQ rates are designed to incentivize Members to reduce excessive order and quoting trade activity that the Exchange believes can be detrimental to all market participants at those levels and encourage such activity to be made in good faith and for legitimate purposes. As noted above, the Exchange believes that it is in the interests of all Members and market participants who access the Exchange to not allow Members to exhaust System resources, but to encourage efficient usage of network capacity. The Exchange therefore also believes that the proposed fees appropriately reflect the benefits to different firms of being able to send orders and quotes into the Exchange's System and also believes the proposed fees are one method of facilitating the Commission's goal of ensuring that critical market infrastructure has "levels of capacity, integrity, resiliency, availability, and security adequate to maintain their operational capability and promote the maintenance of fair and orderly markets."³¹

The Exchange believes adopting the proposed ADO and ADQ fees are reasonable as unfettered usage of System capacity and network resource consumption can have a detrimental effect on all market participants who access and use the Exchange. As discussed above, high ADO and ADQ rates may adversely impact system resources, bandwidth, and capacity which may, in turn, create latency and impact other Members' ability to receive timely executions. The Exchange believes the proposed fees are therefore reasonable as they are designed to focus on activity that is truly disproportionate while fairly allocating costs.

Further, the Exchange believes that the proposed ADO and ADQ fees are equitable and not unfairly discriminatory because they will be assessed uniformly to similarly situated users in that all Members that exceed the thresholds in connection with ADO and ADQ will be assessed the proposed ADO and ADQ rates. Regarding ADO and ADQ, no market participant is assessed any fees unless it exceeds the proposed thresholds. As noted above, the Exchange believes the proposed ADO and ADQ thresholds (*i.e.*, 2,000,000 ADO and 250,000,000 ADQ) are appropriately high rates respectively, such that the Exchange expects the vast majority of Members to not exceed them. While the Exchange has no way of predicting with certainty how the proposed changes will impact Member activity, based on trading activity from the prior months the Exchange would expect that, absent any changes to Member behavior, all Members would fall within proposed ADO Tier 1 (and thus not be subject to any new fees) and approximately 74% of Members would fall within proposed ADQ Tier 1 (and thus also not be subject to any new fees). With respect to the remaining Members (approximately 26%) that would exceed the ADQ Tier 1 threshold based on current activity, the Exchange would anticipate, absent any change in behavior, approximately 3 Members to fall within Tier 2, approximately 6 Members to fall within Tier 3, approximately 3 Members to fall within Tier 4 and no Members to fall within Tier 5. Notwithstanding this impact, the Exchange believes that Market Makers are able to continue providing important liquidity to the Exchange and meet their quoting obligations[*sic*].

The Exchange believes it's equitable and not unfairly discriminatory to assess incrementally higher fees to Members that have higher ADO and ADQ rates because the potential impact on exchange systems, bandwidth and capacity becomes greater with increased ADO and ADQ. The Exchange also believes it's equitable and not unfairly discriminatory to aggregate Members trading activity with any affiliated Member sharing at least 75% common ownership in order to prevent members from shifting their order flow or quoting activity to other affiliates in order to circumvent the proposed fees.

The Exchange lastly believes that its proposal is reasonable, equitably allocated and not unfairly discriminatory because it is not intended to raise revenue for the Exchange; rather, it is intended to encourage efficient behavior so that Members do not exhaust System

resources. Moreover, as noted above, competing options exchanges similarly assess fees to deter Members from over utilizing the exchange's System by having excessive order and/or quoting trading activity.³²

The Exchange finally notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The Exchange is only one of 18 options exchanges which market participants may direct their order flow and/or participate on, and it represents a small percentage of the overall market.³³

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change to adopt fees for Unitized Logical Ports will impose any burden on intramarket competition that is not necessary in furtherance of the purposes of the Act because the proposed fees for will apply equally to all similarly situated Members. As discussed above, Unitized Logical Ports are optional and Members may choose to utilize Unitized Logical Ports, or not, based on their views of the additional benefits and added value provided by these ports. The Exchange believes the proposed fees will be assessed proportionately to the potential value or benefit received by Members with a greater number of Unitized Logical Ports and notes that Members may determine to cease using Unitized Logical Ports. As discussed, Members can also continue to access the Exchange through existing Logical Ports, which fees are not changing.

Similarly, the Exchange does not believe that the proposed rule change to adopt ADO and ADQ fees will impose any burden on intramarket competition that is not necessary in furtherance of the purposes of the Act because such fees will apply equally to all similarly situated Members. Particularly, the proposed fees apply uniformly to all Members, in that any Member who exceeds the ADO and/or ADQ Tier 1 thresholds will be subject to a fee under the proposed corresponding tiers. The Exchange believes that the proposed change neither favors nor penalizes one or more categories of market participants in a manner that would

³⁰ Since the implementation of the proposal on September 3, 2024, the Exchange notes that it has not received any feedback from Market Maker participants that the proposal has impeded their ability to meet their quoting obligations.

³¹ See Securities Exchange Act Release No. 73639 (November 19, 2014), 79 FR 72251 (December 5, 2014) (File No. S7-01-13) (Regulation SCI Adopting Release).

³² See *supra* note 20.

³³ See Cboe Global Markets, U.S. Options Market Volume Summary, Month-to-Date (August 27, 2024), available at https://www.cboe.com/us/options/market_statistics/ which reflects the Exchange representing only 3.3% of total market share.

impose an undue burden on competition. Rather, the proposal seeks to benefit all market participants by encouraging the efficient utilization of the Exchange's network while taking into account the important liquidity provided by its Members. As discussed above potential impact on exchange systems, bandwidth and capacity becomes greater with increased ADO and ADQ rates. The Exchange also anticipates that the vast majority of Members on the Exchange will not be subject to any fees under the proposed tiers. Accordingly, the Exchange believes that the proposed ADO and ADQ fees do not favor certain categories of market participants in a manner that would impose a burden on competition.

Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market, including competition for exchange memberships. Market Participants have numerous alternative venues that they may participate on, including 17 other options exchanges (including 3 other non-Cboe options exchanges), as well as off-exchange venues, where competitive products are available for trading. Indeed, participants can readily choose to submit their order flow to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system "has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies."³⁴ The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: "[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its

market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . ."³⁵ Accordingly, the Exchange does not believe its proposed change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act³⁶ and paragraph (f) of Rule 19b-4³⁷ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBZX-2024-113 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

³⁵ *NetCoalition v. SEC*, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782-83 (December 9, 2008) (SR-NYSEArca-2006-21)).

³⁶ 15 U.S.C. 78s(b)(3)(A).

³⁷ 17 CFR 240.19b-4(f).

All submissions should refer to file number SR-CboeBZX-2024-113. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBZX-2024-113 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³⁸

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-792; OMB Control No. 3235-0739]

Proposed Collection; Comment Request; Extension: Order Granting a Conditional Exemption Under the Securities Exchange Act of 1934 From the Confirmation Requirements of Exchange Act Rule 10b-10(a) for Certain Transactions in Money Market Funds

Upon Written Request, Copies Available From: U.S. Securities and Exchange Commission, Office of FOIA Services,

³⁸ 17 CFR 200.30-3(a)(12).

³⁴ See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

100 F Street NE, Washington, DC 20549-2736.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is soliciting comments on the existing collection of information provided for in the Order Granting a Conditional Exemption under the Securities Exchange Act of 1934 from the Confirmation Requirements of Exchange Act Rule 10b-10(a) for Certain Transactions in Money Market Funds (17 CFR 240.10b-10(a)). The Commission plans to submit this existing collection of information to the Office of Management and Budget ("OMB") for extension and approval.

Rule 10b-10 under the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a *et seq.*) generally requires broker-dealers to provide customers with specified information relating to their securities transactions at or before the completion of the transactions. Exchange Act Rule 10b-10(b), however, provides an exception from this requirement for certain transactions in money market funds that attempt to maintain a stable net asset value when no sales load or redemption fee is charged. The exception permits broker-dealers to provide transaction information to money market fund shareholders on a monthly, rather than immediate, basis, subject to the conditions. Amendments to Rule 2a-7 (17 CFR 270.2a-7) of the Investment Company Act of 1940 ("Investment Company Act") (15 U.S.C. 80a-1 *et seq.*) among other things, means, absent an exemption, broker-dealers would not be able to continue to rely on the exception under Exchange Act Rule 10b-10(b) for transactions in money market funds operating in accordance with Investment Company Act Rule 2a-7(c)(1)(ii).¹

In 2015, the Commission issued an Order Granting a Conditional Exemption under the Securities Exchange Act of 1934 From The Confirmation Requirements of Exchange Act Rule 10b-10(a) For Certain Transactions In Money Market Funds ("Order")² which allows broker-dealers,

subject to certain conditions, to provide transaction information to investors in any money market fund operating pursuant to Investment Company Act Rule 2a-7(c)(1)(ii) on a monthly basis in lieu of providing immediate confirmations as required under Exchange Act Rule 10b-10(a) ("the Exemption"). Accordingly, to be eligible for the Exemption, a broker-dealer must (1) provide an initial written notification to the customer of its ability to request delivery of immediate confirmations consistent with the written notification requirements of Exchange Act Rule 10b-10(a), and (2) not receive any such request to receive immediate confirms from the customer.

As of December 31, 2023, the Commission estimates there are approximately 206 broker-dealers that clear customer transactions or carry customer funds and securities who would be responsible for providing customer confirmations. The Commission estimates that the cost of the ongoing notification requirements would be minimal, approximately 5% of the initial burden which was previously estimated to be 36 hours per broker-dealer, or approximately 1.8 hours per broker-dealer per year, to provide ongoing notifications, or a total burden of approximately 371 hours annually for the 206 carrying broker-dealers.

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by January 31, 2025.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: Austin Gerig, Director/Chief Data Officer, Securities and Exchange Commission, c/o Tanya Ruttenberg, 100 F Street NE, Washington, DC 20549, or send an email to: PRA_Mailbox@sec.gov.

Market Funds, Exchange Act Release No. 34-76480 (Nov. 19, 2015), 80 FR 73849 (Nov. 25, 2015).

Dated: November 25, 2024.

Secretary.

[FR Doc. 2024-28123 Filed 11-29-24; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-028, OMB Control No. 3235-0032]

Submission for OMB Review; Comment Request; Extension: Rule 17f-1(b)

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget ("OMB") a request for approval of extension of the previously approved collection of information provided for in Rule 17f-1(b) (17 CFR 240.17f-1(b)), under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Under Rule 17f-1(b) under the Exchange Act, approximately 9,500 entities in the securities industry are registered in the Lost and Stolen Securities Program ("Program"). Registration fulfills a statutory requirement that entities report and inquire about missing, lost, counterfeit, or stolen securities. Registration also allows entities in the securities industry to gain access to a confidential database that stores information for the Program.

The Commission staff estimates that 4 new entities will register in the Program each year. The staff estimates that the average number of hours necessary to comply with Rule 17f-1(b) is one-half hour. Accordingly, the staff estimates that the total annual burden for all participants is 2 hours (4 × one-half hour). The Commission staff estimates that compliance staff work at subject entities results in an internal cost of compliance, at an estimated hourly wage of \$344, of \$172 per year per entity (.5 hours × \$344 per hour = \$172 per year). Therefore, the aggregate annual internal cost of compliance is approximately \$688 (\$172 × 4 = \$688).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101746; File No. SR–NYSE–2024–48]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change to Amend Section 802.01C of the NYSE Listed Company Manual (Price Criteria for Capital or Common Stock) To Restrict the Use of Reverse Stock Splits in Certain Circumstances

November 25, 2024.

On September 30, 2024, New York Stock Exchange LLC (“NYSE”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b–4 thereunder, ² a proposed rule change to amend Section 802.01C (Price Criteria for Capital or Common Stock) of the NYSE Listed Company Manual to provide that (i) a company that falls below the price criteria set forth therein and effects a reverse stock split to regain compliance will not be eligible for a compliance period in certain circumstances, and (ii) a company may not effectuate a reverse stock split if it would result in the company falling below continued listing requirements. The proposed rule change was published for comment in the **Federal Register** on October 17, 2024. ³

Section 19(b)(2) of the Act ⁴ provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period

to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents, the Commission will either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is December 1, 2024. The Commission is extending this 45-day time period.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change, so that it has sufficient time to consider the proposed rule change and comments received. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act, ⁵ designates January 15, 2025, as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–NYSE–2024–48).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority. ⁶

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101730; File No. SR–SAPPHIRE–2024–38]

Self-Regulatory Organizations; MIAx Sapphire, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities To List and Trade Options on the Fidelity Wise Origin Bitcoin Fund (the “Fidelity Fund”) and the ARK 21Shares Bitcoin ETF (the “ARK 21 Fund”)

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b–4 thereunder, ² notice is hereby given that on November 21, 2024, MIAx Sapphire, LLC (“Exchange”) filed with the Securities and Exchange Commission (“Commission”) a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is

publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Exchange Rule 402, Criteria for Underlying Securities. The text of the proposed rule change is available on the Exchange’s website at <https://www.miaxglobal.com/markets/us-options/miax-sapphire/rule-filings>, at the Exchange’s principal office, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 402, Criteria for Underlying Securities, ³ to allow the Exchange to list and trade options on Fidelity Wise Origin Bitcoin Fund (the “Fidelity Fund”) and the ARK 21Shares Bitcoin ETF (the “ARK 21 Fund” and, with the Fidelity Fund, the “Bitcoin Funds”), designating the Bitcoin Funds as appropriate for options trading on the Exchange. ⁴ This is a competitive filing

³ The Exchange notes that its affiliate exchanges, MIAx Options and MIAx Pearl, submitted substantively identical proposals. The Exchange notes that all the rules of Chapter III of the MIAx Options Exchange, including Rules 307 and 309, are incorporated by reference to MIAx Pearl and MIAx Sapphire. The Exchange also notes that all of the rules of Chapter III of the MIAx Options Exchange, including Rules 307 and 309, and the rules of Chapter IV of the MIAx Options Exchange, including Rule 402, are incorporated by reference to MIAx Emerald.

⁴ On January 10, 2024, the Commission approved proposals by NYSE Arca, Inc., The Nasdaq Stock Market LLC, and Cboe BZX Exchange, Inc. to list and trade the shares of 11 bitcoin-based commodity-based trust shares and trust units, including the iShares Bitcoin Trust. See Securities Exchange Act Release No. 99306 (Jan. 10, 2024), 89

⁵ See Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SR-CBOE-2024-35) (Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, to Permit the Listing and Trading of Options on Bitcoin Exchange Traded Funds).

⁶ See Exchange Rule 402(i), which permits options trading on ETFs that: (1) represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that hold portfolios of securities and/or financial instruments (“Funds”), including, but not limited to, stock index futures contracts, options on futures, options on securities and indices, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse repurchase agreements (the “Financial Instruments”), and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the “Money Market Instruments”) comprising or otherwise based on or representing investments in broad-based indexes or portfolios of securities and/or Financial Instruments and Money Market Instruments (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities and/or Financial Instruments and Money Market Instruments); (2) represent interests in a trust or similar entity that holds a specified non-U.S. currency or currencies deposited with the trust which when aggregated in some specified minimum number may be surrendered to the trust or similar entity by the beneficial owner to receive the specified non-U.S. currency or currencies and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency or currencies, if any, declared and paid by the trust (“Currency Trust Shares”); (3) represent commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency (“Commodity Pool ETFs”); (4) are issued by the are issued by the SPDR® Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the ETFs Silver Trust, the Aberdeen Standard Physical Gold Trust, the ETFs Palladium Trust, the ETFs Platinum Trust, the Sprott Physical Gold Trust, or the iShares Bitcoin Trust; or (5) represent an interest in a registered investment company (“Investment Company”) organized as an open-end management company or similar entity, that invests in a portfolio of securities selected by the Investment Company’s investment adviser consistent with the Investment Company’s investment objectives and policies,

including interests in certain specific trusts that hold financial instruments, money market instruments, or precious metals (which are deemed commodities).

The Bitcoin Funds are Bitcoin-backed commodity ETFs structured as trusts. Similar to any ETFs currently deemed appropriate for options trading under Exchange Rule 402(i), the investment objective of each Bitcoin Fund is for its shares to reflect the performance of Bitcoin (less the expenses of the trust’s operations), offering investors an opportunity to gain exposure to Bitcoin without the complexities of Bitcoin delivery. As is the case for ETFs currently deemed appropriate for options trading, a Bitcoin Fund’s shares represent units of fractional undivided beneficial interest in the trust, the assets of which consist principally of Bitcoin and are designed to track Bitcoin or the performance of the price of Bitcoin and offer access to the Bitcoin market.⁷ The Bitcoin Funds provide investors with cost-efficient alternatives that allow a level of participation in the Bitcoin market through the securities market. The primary substantive difference between Bitcoin Funds and ETFs currently deemed appropriate for options trading are that ETFs may hold securities, certain financial instruments, and specified precious metals (which are deemed commodities), while Bitcoin Funds hold Bitcoin (which is also deemed a commodity).

The Exchange believes each Bitcoin Fund satisfies the Exchange’s initial listing standards for ETFs on which the Exchange may list options. Specifically, each Bitcoin Fund satisfies the initial listing standards set forth in Exchange Rule 402(i)(5)(i), as is the case for other ETFs on which the Exchange lists options (including trusts that hold commodities). Exchange Rule 402(i)(5)(i) requires that the ETFs must either (1) meet the criteria and standards set forth in Exchange Rule 402(a) or 402(b),⁸ or (2) be available for creation or redemption each business day from or through the issuer in cash or in kind at a price related to net asset value, and

which is issued in a specified aggregate minimum number in return for a deposit of a specified portfolio of securities and/or a cash amount with a value equal to the next determined net asset value (“NAV”), and when aggregated in the same specified minimum number, may be redeemed at a holder’s request, which holder will be paid a specified portfolio of securities and/or cash with a value equal to the next determined NAV (“Managed Fund Share”); provided that all of the conditions listed in (5)(i) and 5(ii) are met.

⁷ The trust may include minimal cash.

⁸ Subparagraphs a and b of Exchange Rule 402 provide for guidelines to be used by the Exchange when evaluating potential underlying securities for Exchange option transactions.

the issuer must be obligated to issue ETFs in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus. Each Bitcoin Fund satisfies Exchange Rule 402(i)(5)(i)(B), as each is subject to this creation and redemption process.

While not required by the Rules for purposes of options listings, the Exchange believes each Bitcoin Fund satisfies the criteria and guidelines set forth in Exchange Rule 402. Pursuant to Exchange Rule 402, a security (which includes ETFs) on which options may be listed and traded on the Exchange must be duly registered (with the Commission) and be an NMS stock (as defined in Rule 600 of Regulation NMS under the Act, and be characterized by a substantial number of outstanding shares that are widely held and actively traded.⁹ Each Bitcoin Fund is an NMS Stock as defined in Rule 600 of Regulation NMS under the Act.¹⁰ The Exchange believes each Bitcoin Fund is characterized by a substantial number of outstanding shares that are widely held and actively traded.

As of August 7, 2024, the Bitcoin Funds had the following number of shares outstanding:

Bitcoin Fund	Shares outstanding
Fidelity Fund	201,100,100
ARK 21 Fund	45,495,000

Each Bitcoin Fund had significantly more than 7,000,000 shares outstanding (approximately 29 and 6.5 times that amount, respectively), which is the minimum number of shares of a corporate stock that the Exchange generally requires to list options on that stock pursuant to Exchange Rule 402(b)(1). The Exchange believes this demonstrates that each Bitcoin Fund is

⁹ The criteria and guidelines for a security to be considered widely held and actively traded are set forth in Exchange Rule 403(b).

¹⁰ An “NMS stock” means any NMS security other than an option, and an “NMS security” means any security or class of securities for which transaction reports are collected, processed, and made available pursuant to an effective transaction reporting plan (or an effective national market system plan for reporting transaction in listed options). See 17 CFR 242.600(b)(64) (definition of “NMS security”) and (65) (definition of “NMS stock”).

characterized by a substantial number of outstanding shares.

Further, the below table contains information regarding the number of

beneficial holders of the Bitcoin Funds as of the specified dates:

Bitcoin Fund	Beneficial holders	Date
Fidelity Fund	279,656	6/27/2024
ARK 21 Fund	69,425	6/26/2024

As this table shows, each Bitcoin Fund has significantly more than 2,000 beneficial holders (approximately 140 and 35 times more, respectively), which is the minimum number of holders the Exchange generally requires for corporate stock in order to list options on that stock pursuant to Exchange Rule 402(b)(2). Therefore, the Exchange believes the shares of each Bitcoin Fund are widely held.

As demonstrated above, despite the fact that the Bitcoin Funds had been trading for approximately seven months¹¹ only as of August 7, 2024, the six-month trading volume for each as of that date was substantially higher than 2,400,000 shares (approximately 464 and 124 times that amount, respectively), which is the minimum 12-month volume the Exchange generally requires for a corporate stock in order to list options on that security as set forth in Exchange Rule 402(b)(4).

Additionally, as of August 7, 2024, the trading volume for each Bitcoin Fund was in the top 5% of all ETFs that are currently trading. The Exchange believes this data demonstrates each Bitcoin Fund is characterized as having shares that are actively traded.

Options on the Bitcoin Funds will also be subject to the Exchange's continued listing standards set forth in Exchange Rule 403(g), for ETFs deemed appropriate for options trading pursuant to Exchange Rule 402(i). Specifically, Exchange Rule 403(g) provides that ETFs that were initially approved for options trading pursuant to Exchange Rule 402(i) shall be deemed not to meet the requirements for continued approval, and the Exchange shall not open for trading any additional series of option contracts of the class covering that such ETFs, if the ETFs are delisted from trading pursuant to Exchange Rule 403(b)(4), are halted or suspended from trading in their primary market. Additionally, options on ETFs may be subject to the suspension of opening transactions in any of the following circumstances: (1) in the case of options covering ETFs approved for trading under Exchange Rule 402(i)(5)(i)(A), in accordance with the terms of paragraphs

(b)(1), (2), and (3) of Exchange Rule 403; (2) in the case of options covering ETFs approved for trading under Exchange Rule 402(i)(5)(i)(B), following the initial twelve-month period beginning upon the commencement of trading in the ETFs on a national securities exchange and are defined as an NMS stock, there are fewer than 50 record and/or beneficial holders of such ETFs for 30 or more consecutive trading days; (3) the value of the index or portfolio of securities, non-U.S. currency, or portfolio of commodities including commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or financial instruments and money market instruments on which the ETFs are based is no longer calculated or available; or (4) such other event shall occur or condition exist that in the opinion of the Exchange makes further dealing in such options on the Exchange inadvisable.

Options on each Bitcoin Fund would be physically settled contracts with American-style exercise.¹² Consistent with current Exchange Rule 404, which governs the opening of options series on a specific underlying security (including ETFs), the Exchange will open at least one expiration month for options on each Bitcoin Fund¹³ at the

¹² See Exchange Rule 401, which provides that the rights and obligations of holders and writers are set forth in the Rules of the Options Clearing Corporation ("OCC"); see also OCC Rules, Chapters VIII (which governs exercise and assignment) and Chapter IX (which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts).

¹³ See Exchange Rule 404(b). The monthly expirations are subject to certain listing criteria for underlying securities described within Exchange Rule 404 and its Interpretations and Policies. Monthly listings expire the third Friday of the month. The term "expiration date" (unless separately defined elsewhere in the OCC By-Laws), when used in respect of an option contract (subject to certain exceptions), means the third Friday of the expiration month of such option contract, or if such Friday is a day on which the exchange on which such option is listed is not open for business, the preceding day on which such exchange is open for business. See OCC By-Laws Article I, Section 1. Pursuant to Exchange Rule 404(c), additional series of options of the same class may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying stock moves more than five strike prices

commencement of trading on the Exchange and may also list series of options on a Bitcoin Fund for trading on a weekly,¹⁴ monthly,¹⁵ or quarterly¹⁶ basis. The Exchange may also list long-term equity option series ("LEAPS") that expire from 12 to 39 months from the time they are listed.¹⁷

Pursuant to Exchange Rule 404, Interpretation and Policy .06, which governs strike prices of series of options on ETFs, the interval between strike prices of series of options on ETFs approved for options trading pursuant to Exchange Rule 402(i) shall be fixed at a price per share which is reasonably close to the price per share at which the underlying security is traded in the primary market at or about the same time such series of options is first open for trading on the Exchange, or at such intervals as may have been established on another options exchange prior to the initiation of trading on the Exchange. With respect to the Short Term Options Series or Weekly Program, during the month prior to expiration of an option class that is selected for the Short Term Option Series Program, the strike price intervals for the related non-Short Term Option ("Related non-Short Term Option") shall be the same as the strike price intervals for the Short Term Option.¹⁸ Specifically, the Exchange may open for trading Short Term Option Series at strike price intervals of (i) \$0.50 or greater where the strike price is less than \$100, and \$1 or greater where the strike price is between \$100 and \$150 for all option classes that participate in the Short Term Options Series Program; (ii) \$0.50 for option classes that trade in one dollar

from the initial exercise price or prices. Pursuant to Exchange Rule 404(e), new series of options on an individual stock may be added until the beginning of the month in which the options contract will expire. Due to unusual market conditions, the Exchange, in its discretion, may add a new series of options on an individual stock until the close of trading on the business day prior to expiration.

¹⁴ See Exchange Rule 404, Interpretations and Policies .02.

¹⁵ See Exchange Rule 404, Interpretations and Policies .13.

¹⁶ See Exchange Rule 404, Interpretations and Policies .03.

¹⁷ See Exchange Rule 404(d).

¹⁸ See Exchange Rule 404, Interpretations and Policies .02(e).

¹¹ The Bitcoin Funds began trading on January 11, 2024.

increments and are in the Short Term Option Series Program; or (iii) \$2.50 or greater where the strike price is above \$150.¹⁹ Additionally, the Exchange may list series of options pursuant to the \$1 Strike Price Interval Program,²⁰ the \$0.50 Strike Program,²¹ and the \$2.50 Strike Price Program.²² Pursuant to Exchange Rule 510, where the price of a series of options for a Bitcoin Fund is less than \$3.00, the minimum increment will be \$0.05, and where the price is \$3.00 or higher, the minimum increment will be \$0.10²³ consistent with the minimum increments for options on other ETFs listed on the Exchange. Any and all new series of a Bitcoin Fund options that the Exchange lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Rules 404 and 510, as applicable.

Bitcoin Fund options will trade in the same manner as any other ETF options on the Exchange. The Exchange Rules that currently apply to the listing and trading of all ETFs options on the Exchange, including, for example, Exchange Rules that govern listing criteria, expiration and exercise prices, minimum increments, position and exercise limits, margin requirements, customer accounts and trading halt procedures will apply to the listing and trading of Bitcoin Funds options on the Exchange in the same manner as they apply to other options on all other ETFs that are listed and traded on the Exchange, including the precious-metal backed commodity ETFs already deemed appropriate for options trading on the Exchange pursuant to current Exchange Rule 402(i)(4).

Position and exercise limits for options on ETFs, including Bitcoin Fund options, are determined pursuant to the Exchange's affiliate MIAX Options Rules 307 and 309, respectively.

Position and exercise limits for ETF options vary according to the number of outstanding shares and the trading volumes of the underlying ETF over the past six months, where the largest in capitalization and the most frequently traded ETFs have an option position and exercise limit of 250,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market; and smaller capitalization ETFs have position and exercise limits of 200,000, 75,000, 50,000 or 25,000

contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market. The Exchange further notes that the Exchange's affiliate MIAX Options Rule 1502, which governs margin requirements applicable to trading on the Exchange, including options on ETFs, will also apply to the trading of the Trust options.

Notwithstanding the position limits in the Exchange's affiliate MIAX Options Rule 307(d) and exercise limits in the Exchange's affiliate MIAX Options Rule 309, the Exchange proposes the position and exercise limits for the options on the Trust to be 25,000 contracts on the same side pursuant to proposed Supplementary Material .01 to the Exchange's affiliate MIAX Options Rule 307 and proposed Supplementary Material .01 to the Exchange's affiliate MIAX Options Rule 309.

The Exchange represents that the same surveillance procedures applicable to all other options on other ETFs currently listed and traded on the Exchange will apply to Bitcoin Fund options. Also the Exchange represents that it has the necessary systems capacity to support the new option series. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading options on ETFs, including the proposed Bitcoin Funds.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to Bitcoin Fund options that it applies to the Exchange's other options products.²⁴ The Exchange's staff will have access to the surveillance programs conducted by its affiliate exchanges, MIAX Options and MIAX Pearl with respect to trading in the shares of the underlying Bitcoin Funds when conducting surveillances for market abuse or manipulation in the options on the Bitcoin Funds. Additionally, the Exchange is a member of the Intermarket Surveillance Group ("ISG") under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining surveillance data from MIAX Options and MIAX Sapphire, the Exchange will be able to obtain information regarding trading in the shares of the underlying Bitcoin

Funds from Cboe and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority ("FINRA"). Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.²⁵

The underlying shares of spot bitcoin exchange-traded products ("ETPs"), including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in Bitcoin ETP Order:

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.²⁶

The Exchange states that, given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs]." ²⁷

In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Funds,²⁸

²⁵ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO ("common members"). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

²³ See Exchange Rule 510.

²⁴ The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (e.g., spoofing, marking the close, pinging, phishing).

the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds. Further, the Exchange represents that it will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on Bitcoin Funds.

The Exchange has also analyzed its capacity and represents that it believes the Exchange and Options Price Reporting Authority or “OPRA” have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on Bitcoin Funds up to the number of expirations currently permissible under the Rules. Because the proposal is limited to one class, the Exchange believes any additional traffic that may be generated from the introduction of Bitcoin Funds options will be manageable.

The Exchange believes that offering options on Bitcoin Funds will benefit investors by providing them with an additional, relatively lower cost investing tool to gain exposure to the price of Bitcoin and hedging vehicle to meet their investment needs in connection with Bitcoin-related products and positions. The Exchange expects investors will transact in options on Bitcoin ETPs in the unregulated over-the-counter (“OTC”) options market (if the Commission approves Bitcoin ETPs for exchange-trading),²⁹ but may prefer to trade such options in a listed environment to receive the benefits of trading listing options, including (1) enhanced efficiency in initiating and closing out position; (2) increased market transparency; and (3) heightened counterparty creditworthiness due to the role of OCC as issuer and guarantor of all listed options. The Exchange believes that listing Bitcoin Fund options may cause investors to bring this liquidity to the Exchange, would increase market transparency and enhance the process of price discovery conducted on the

Exchange through increased order flow. The ETFs that hold financial instruments, money market instruments, or precious metal commodities on which the Exchange may already list and trade options are trusts structured in substantially the same manner as Bitcoin Funds and essentially offer the same objectives and benefits to investors, just with respect to different assets. The Exchange notes that it has not identified any issues with the continued listing and trading of any ETFs options, including ETFs that hold commodities (*i.e.*, precious metals) that it currently lists and trades on the Exchange.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.³⁰ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)³¹ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)³² requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that the proposal to list and trade options on the Bitcoin Funds will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because offering options on the Bitcoin Funds will provide investors with a greater opportunity to realize the benefits of utilizing options on an ETF based on a Bitcoin Fund, including cost efficiencies and increased hedging strategies. The Exchange believes that offering Bitcoin Funds options will benefit investors by providing them with an additional, relatively lower-cost risk management tool, allowing them to manage, more

easily, their positions and associated risks in their portfolios in connection with exposure to the price of Bitcoin and with Bitcoin-related products and positions. Additionally, the Exchange’s offering of Bitcoin Fund options will provide investors with the ability to transact in such options in a listed market environment as opposed to in the unregulated OTC option market, which would increase market transparency and enhance the process of price discovery conducted on the Exchange through increased order flow to the benefit of all investors. The Exchange also notes that it already lists options on other commodity-based ETFs,³³ which, as described above, are trusts structured in substantially the same manner as Bitcoin Funds and essentially offer the same objectives and benefits to investors, just with respect to a different commodity (*i.e.*, Bitcoin rather than precious metals) and for which the Exchange has not identified any issues with the continued listing and trading of commodity-backed ETF options it currently lists for trading.

The Exchange also believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, because it is consistent with current Exchange Rules, previously filed with the Commission. Options on Bitcoin Funds must satisfy the initial listing standards and continued listing standards currently in the Exchange Rules, applicable to options on all ETFs, including ETFs that hold other commodities already deemed appropriate for options trading on the Exchange. Additionally, as demonstrated above, each Bitcoin Fund is characterized by a substantial number of shares that are widely held and actively traded. Bitcoin Fund options will trade in the same manner as any other ETF options—the same Exchange Rules that including permissible expirations, strike prices, minimum increments, position and exercise limits (including as proposed in the filing submitted by Exchange’s affiliate, MIAX Options), and margin requirements, will govern the listing and trading of options on the Bitcoin Funds.

The Exchange represents that it has the necessary systems capacity to support the new Bitcoin Fund options. As discussed above, the Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing

Exchange Act Release No. 99306 (Jan. 10, 2024), 89 FR 3008 (Jan. 17, 2024) (order approving File Nos. SR-NYSEARCA-2021-90; SR-NYSEARCA-2023-44; SR-NYSEARCA-2023-58; SR-NASDAQ-2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX-2023-040; SR-CboeBZX-2023-042; SR-CboeBZX-2023-044; SR-CboeBZX-2023-072) (“Bitcoin ETP Order”).

²⁹ The Exchange understands from customers that investors have historically transacted in options on ETFs in the OTC options market if such options were not available for trading in a listed environment.

and trading ETF options, including Bitcoin Fund options.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options on the Bitcoin Fund that it applies to the Exchange's other options products.³⁴ The Exchange's staff will have access to the surveillance programs conducted by its affiliate exchanges, MIAX Options and MIAX Sapphire with respect to the underlying Bitcoin Funds when conducting surveillances for market abuse or manipulation in the options on the Bitcoin Funds. The Exchange will review activity in the underlying Bitcoin Fund when conducting surveillances for market abuse or manipulation in the options on the Bitcoin Funds. Additionally, the Exchange is a member of the ISG under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining surveillance data from MIAX Options and MIAX Sapphire, the Exchange will be able to obtain information from Cboe and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with FINRA. Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.³⁵

The underlying shares of spot bitcoin ETPs, including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and

manipulation. As the Commission stated in Bitcoin ETP Order:

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.³⁶

The Exchange states that, given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs]." ³⁷

In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Funds,³⁸ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds. Further, the Exchange represents that it will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Bitcoin Funds.

Finally, the Commission has previously approved the listing and trading of options on other commodity ETFs structured as a trust, such as SPDR® Gold Trust,³⁹ the iShares COMEX Gold Trust⁴⁰ the iShares Silver

Trust,⁴¹ the ETFS Gold Trust,⁴² and the ETFS Silver Trust.⁴³

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In this regard and as indicated above, the Exchange notes that the rule change is being proposed as a competitive response to filings submitted by Cboe.⁴⁴

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as options on the Bitcoin Funds will be equally available to all market participants who wish to trade such options and will trade generally in the same manner as other options. Further, options on the Bitcoin Funds will be subject to Exchange Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (including as proposed in the filing submitted by Exchange's affiliate, MIAX Options), and margin requirements. Also, and as stated above, the Exchange already lists options on other commodity ETFs structured as a trust.⁴⁵ Further, the Bitcoin Funds would need to satisfy the maintenance listing standards set forth in the Exchange Rules in the same manner as any other ETF for the Exchange to continue listing options on them.

The Exchange does not believe that the proposal to list to list and trade options on the Trust will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that the advent of Bitcoin Fund options trading on the Exchange may make the Exchange a more attractive marketplace to market participants at other exchanges, such market participants are free to elect to become market participants on the Exchange. Additionally, other options exchanges are free to amend their listing

³⁴ The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (e.g., spoofing, marking the close, ping, phishing).

³⁵ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO ("common members"). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

⁴⁵ See Exchange Rule 402(i)(4).

rules, as applicable, to permit them to list and trade options on the Bitcoin Funds. The Exchange notes that listing and trading Bitcoin Fund options on the Exchange will subject such options to transparent exchange-based rules as well as price discovery and liquidity, as opposed to alternatively trading such options in the OTC market. The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition as it is designed to increase competition for order flow on the Exchange in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering Bitcoin Fund options for trading on the Exchange will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment needs in connection with Bitcoin prices and Bitcoin-related products and positions on a listed options exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act⁴⁶ and Rule 19b-4(f)(6) thereunder.⁴⁷ Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act⁴⁸ and subparagraph (f)(6) of Rule 19b-4 thereunder.⁴⁹

A proposed rule change filed under Rule 19b-4(f)(6)⁵⁰ under the Act does not normally become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),⁵¹ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the Fidelity Fund and the ARK 21 Fund.⁵² The Exchange has provided information regarding the underlying Bitcoin Funds, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of the Bitcoin Funds. The proposal also establishes position and exercise limits for options on the Bitcoin Funds and provides information regarding the surveillance procedures that will apply to Bitcoin Fund options. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Bitcoin Fund options. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.⁵³

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

⁵⁰ 17 CFR 240.19b-4(f)(6).

⁵¹ 17 CFR 240.19b-4(f)(6)(iii).

⁵² See Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SR-Choe-2024-035) (Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds).

⁵³ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-SAPPHIRE-2024-38 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-SAPPHIRE-2024-38. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-SAPPHIRE-2024-38 and should be submitted on or before December 23, 2024.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101736; File No. SR–NASDAQ–2024–073]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Options 9, Section 13, Position Limits, and Options 9, Section 15, Exercise Limits, Regarding Options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on November 21, 2024, The Nasdaq Stock Market LLC (“Nasdaq” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend The Nasdaq Options Market LLC (“NOM”) Options 9, Section 13, Position Limits, and Section 15, Exercise Limits.

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed

any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Options 9, Section 13, Position Limits, and Options 9, Section 15, Exercise Limits, to limit the position limits for options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF (collectively “Bitcoin Trusts”).

Recently, Cboe Exchange, Inc. (“Cboe”) received approvals to list options on the Fidelity Wise Origin Bitcoin Fund, and the ARK21Shares Bitcoin ETF.³ Also, recently, NYSE American LLC (“NYSE American”) received approvals to list options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF.⁴ Nasdaq ISE, LLC (“ISE”) filed a rule change to also list and trade options on the Bitcoin Trusts.⁵ NOM’s Options 4 Rules were amended by the ISE rule change as those Rules are incorporated by reference to ISE’s Options 4 Rules, so NOM has the ability to list the options on the Bitcoin Trusts. The Cboe Approval Order and the NYSE American Approval Order stated that the position and exercise limits for each of the Bitcoin Trusts shall be 25,000 contracts. At this time, the Exchange proposes to amend NOM Option 9, Section 13 and Options 9, Section 15 to similarly note that options on the Fidelity Wise Origin Bitcoin Fund, the

ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF shall have position and exercise limits of 25,000 contracts to mirror the Cboe Approval Order and the NYSE American Approval Order, respectively.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁶ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁷ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange’s proposal to amend Options 9, Section 13, Position Limits, and Options 9, Section 15, Exercise Limits, to provide that the position and exercise limits for options on each of the Bitcoin Trusts shall be 25,000 contracts is consistent with the Act as it will conform NOM’s options position and exercise limits for each of the Bitcoin Trusts with ISE’s options position and exercise limits on these same Bitcoin Trusts to align those limits.⁸

B. Self-Regulatory Organization’s Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Amending Options 9, Sections 13 and 15 to provide that the position and exercise limits for options on each of the Bitcoin Trusts shall be 25,000 contracts does not impose an undue burden on competition as the position and exercise limits will apply to all trading for options on the Bitcoin Trusts trading on the Exchange as well as those trading on other exchanges that file a similar proposal.⁹

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

⁶ 15 U.S.C. 78f(b).

⁷ 15 U.S.C. 78f(b)(5).

⁸ The Exchange believes that other exchanges will adopt position and exercise limits of 25,000 contracts for options on each of the Bitcoin Trusts. All Nasdaq affiliated markets have filed to adopt a 25,000 contract position and exercise limit for the Bitcoin Trusts.

⁹ All Nasdaq affiliated markets are filing to adopt a 25,000 contract position and exercise limit for options on the Bitcoin Trusts.

⁴ See Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR–NYSEAMER–2024–49) (Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds) (“NYSE American Approval Order”).

⁵ See SR–ISE–2024–54

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁰ and Rule 19b-4(f)(6) thereunder.¹¹ Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹² and subparagraph (f)(6) of Rule 19b-4 thereunder.¹³

A proposed rule change filed under Rule 19b-4(f)(6)¹⁴ under the Act does not normally become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁵ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF.¹⁶ As noted above, Nasdaq's Options 4 Rules were amended by an ISE rule change¹⁷ as those Rules are incorporated by reference to ISE's Options 4 Rules, so

Nasdaq has the ability to list the options on the Bitcoin Trusts. This proposal establishes position and exercise limits for options on the Bitcoin Trusts. The Commission believes that waiver of the operative delay could benefit investors by assuring that trading in Bitcoin Trust options are subject to the same position and exercise limits in place on other exchanges. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.¹⁸

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NASDAQ-2024-073 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NASDAQ-2024-073. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent

amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NASDAQ-2024-073 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange to amend Options 4, Section 3, Criteria for Underlying Securities.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/ise/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Options 4, Section 3, Criteria for Underlying Securities, to allow the Exchange to list and trade options the (1) Fidelity Wise Origin Bitcoin Fund ("Fidelity Fund"); (2) ARK21Shares Bitcoin ETF ("ARK 21 Fund"); (3) Grayscale Bitcoin Trust (BTC) (the "Grayscale Fund" or "GBTC"); (4) Grayscale Bitcoin Mini Trust BTC (the "Grayscale Mini Fund" or "BTC"); (5) and Bitwise Bitcoin ETF (the "Bitwise Fund" or "BITB"), (collectively "Bitcoin Trusts") as "Units" deemed appropriate for options trading on the Exchange. Options on each Bitcoin Trust were approved for trading on other options exchanges.³

³ See Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SR-Cboe-2024-035) (Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds) ("CBOE-2024-035"). See also Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR-NYSEAMER-2024-49) (Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Permit the Listing and

Currently, Options 4, Section 3(h) provides that securities deemed appropriate for options trading shall include shares or other securities ("Exchange-Traded Fund Shares" or "ETFs") that are traded on a national securities exchange and are defined as an "NMS" stock under Rule 600 of Regulation NMS, and that meet certain criteria specified in Options 4, Section 3(h), including that they:

(i) represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that hold portfolios of securities and/or financial instruments, including, but not limited to, stock index futures contracts, options on futures, options on securities and indices, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse repurchase agreements (the "Financial Instruments"), and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the "Money Market Instruments") comprising or otherwise based on or representing investments in broad-based indexes or portfolios of securities and/or Financial Instruments and Money Market Instruments (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities and/or Financial Instruments and Money Market Instruments) or

(ii) represent interests in a trust or similar entity that holds a specified non-U.S. currency or currencies deposited with the trust when aggregated in some specified minimum number may be surrendered to the trust or similar entity by the beneficial owner to receive the specified non-U.S. currency or currencies and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency or currencies, if any, declared and paid by the trust ("Currency Trust Shares") or

(iii) represent commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency ("Commodity Pool ETFs") or

(iv) represent interests in the SPDR® Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the Aberdeen Standard Physical Gold Trust, or the iShares Bitcoin Trust or

(v) represents an interest in a registered investment company ("Investment Company") organized as an open-end management company or similar entity, that invests in a portfolio of securities selected by the Investment Company's investment adviser consistent with the Investment Company's investment objectives and policies, which is issued in a specified aggregate minimum number in return for a deposit of a specified portfolio of securities

Trading of Options on Bitcoin Exchange-Traded Funds) ("NYSEAMER-2024-49").

and/or a cash amount with a value equal to the next determined net asset value ("NAV"), and when aggregated in the same specified minimum number, may be redeemed at a holder's request, which holder will be paid a specified portfolio of securities and/or cash with a value equal to the next determined NAV ("Managed Fund Share").

In addition to the aforementioned requirements, Options 4, Section 3(h)(1) and (2) must be met to list options on ETFs.⁴

Proposal

The Exchange proposes to expand the list of ETFs that are appropriate for options trading on the Exchange in Options 3, Section 4(h)(iv) to include the Bitcoin Trusts.⁵

The Bitcoin Trusts are Bitcoin-backed commodity ETFs structured as trusts. Similar to any Unit currently deemed appropriate for options trading under Options 3, Section 4(h), the investment objective of each Bitcoin Trust is for its shares to reflect the performance of Bitcoin (less the expenses of the trust's operations), offering investors an opportunity to gain exposure to Bitcoin without the complexities of Bitcoin delivery. As is the case for Units currently deemed appropriate for options trading, a Bitcoin Trust's shares represent units of fractional undivided beneficial interest in the trust, the assets of which consist principally of Bitcoin and are designed to track Bitcoin or the performance of the price of Bitcoin and offer access to the Bitcoin market.⁶ The Bitcoin Trusts provide investors with cost-efficient alternatives that allow a level of participation in the Bitcoin market through the securities market. The primary substantive difference

⁴ Options 4, Section 3(h)(1) and (2) state that the Exchange-Traded Fund Shares either (i) meet the criteria and guidelines set forth in paragraphs (a) and (b) described herein; or (ii) the Exchange-Traded Fund Shares are available for creation or redemption each business day from or through the issuing trust, investment company, commodity pool or other entity in cash or in kind at a price related to net asset value, and the issuer is obligated to issue Exchange-Traded Fund Shares in a specified aggregate number even if some or all of the investment assets and/or cash required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investment assets has undertaken to deliver them as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer of the Exchange-Traded Fund Shares, all as described in the Exchange-Traded Fund Shares' prospectus. Also, the Exchange-Traded Fund Shares based on international or global indexes, or portfolios that include non-U.S. securities, shall meet the criteria in Options 4, Section 3(h)(2)(A)-(F).

⁵ Specifically, the Exchange proposes to amend Options 3, Section 4(h)(iv) to include the name of each Bitcoin Trust to enable options to be listed on the Bitcoin Trusts on the Exchange.

⁶ The trust may include minimal cash.

between Bitcoin Trusts and Units currently deemed appropriate for options trading are that Units may hold securities, certain financial instruments, and specified precious metals (which are deemed commodities), while Bitcoin Trusts hold Bitcoin (which is also deemed a commodity).

The Exchange believes each Bitcoin Trust satisfies the Exchange's initial listing standards for Units on which the Exchange may list options. Specifically, each Bitcoin Trust satisfies the initial listing standards set forth in Options 3, Section 4(h), as is the case for other Units on which the Exchange lists options (including trusts that hold commodities). Currently, Options 4, Section 3(h)(1) and (2) requires that Units must either (i) meet the criteria and guidelines set forth in paragraphs (a) and (b) described herein; or (ii) be available for creation or redemption each business day from or through the issuing trust, investment company, commodity pool or other entity in cash or in kind at a price related to net asset value, and the issuer is obligated to issue Exchange-Traded Fund Shares in a specified aggregate number even if some or all of the investment assets and/or cash required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investment assets has undertaken to deliver them as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to

the issuer of the Exchange-Traded Fund Shares, all as described in the Exchange-Traded Fund Shares' prospectus. Each Bitcoin Trust Fund satisfies Options 4, Section 3(h)(1) and (2), as each is subject to this creation and redemption process.

While not required by the Rules for purposes of options listings, the Exchange believes each Bitcoin Trust satisfies the criteria and guidelines set forth in Options 4, Section 3(b).⁷ Options 4, Section 3(a), a security (which includes a Unit) on which options may be listed and traded on the Exchange must be duly registered (with the Commission) and be an NMS stock (as defined in Rule 600 of Regulation NMS under the Securities Exchange Act of 1934, as amended (the "Act")), and be characterized by a substantial number of outstanding shares that are widely held and actively traded.⁸ Each Bitcoin Trust is an NMS Stock as defined in Rule 600 of Regulation NMS under the Act.⁹ The Exchange believes each Bitcoin Trust is characterized by a substantial number of outstanding shares that are widely held and actively traded.

Fidelity Fund and ARK 21

Cboe Exchange, Inc. ("Cboe") noted in CBOE-2024-035 that, as of August 7, 2024, that the Fidelity Fund had 201,100,100 shares outstanding and the ARK 21 Fund had 45,495,000 shares outstanding. Further, each Bitcoin Trust had significantly more than 7,000,000 shares outstanding (approximately 29

and 6.5 times that amount, respectively), which is the minimum number of shares of a corporate stock that the Exchange generally requires to list options on that stock pursuant to Options 4, Section 3(b).¹⁰ Cboe noted in CBOE-2024-035 that this demonstrated that the Fidelity Fund and the ARK 21 Fund were both characterized by a substantial number of outstanding shares. Further, in CBOE-2024-035, Cboe noted that the Fidelity Fund, as of June 27, 2024, had 279,656 beneficial owners and the ARK 21 Fund, as of June 26, 2024, had 69,425 beneficial owners. Cboe noted that the Fidelity Fund and the ARK 21 Fund both had significantly more than 2,000 beneficial holders (approximately 140 and 35 times more, respectively), which is the minimum number of holders the Exchange generally requires for corporate stock in order to list options on that stock pursuant to Options 4, Section 3(b).¹¹ Therefore, Cboe noted in CBOE-2024-035, that it believed the shares of the Fidelity Fund and the ARK 21 Fund are widely held. Cboe noted in CBOE-2024-035 that it believed that the shares of the Fidelity Fund and the ARK 21 Fund are both actively traded. Cboe noted in CBOE-2024-035 that as of August 7, 2024, the total trading volume (by shares) for each fund for the six-month period of February 8 through August 7, 2024, and the approximate average daily volume ("ADV") (in shares and notional) over the 30-day period of July 9 through August 7, 2024, for each Bitcoin Trust was as follows:

Bitcoin Trust	6-Month trading volume (shares)	30-Day ADV (shares)	30-Day ADV (notional \$)
Fidelity Fund	1,112,861,581	6,014,335	250,354,755
ARK 21 Fund	297,360,739	1,893,335	90,484,307

⁷ ISE Options 4, Section 3(b) states that, in addition, the Exchange shall from time to time establish guidelines to be considered in evaluating potential underlying securities for Exchange options transactions. There are many relevant factors which must be considered in arriving at such a determination, and the fact that a particular security may meet the guidelines established by the Exchange does not necessarily mean that it will be selected as an underlying security. Further, in exceptional circumstances an underlying security may be selected by the Exchange even though it does not meet all of the guidelines. The Exchange may also give consideration to maintaining diversity among various industries and issuers in selecting underlying securities. Notwithstanding the foregoing, however, absent exceptional circumstances, an underlying security will not be selected unless: (1) There are a minimum of seven (7) million shares of the underlying security which are owned by persons other than those required to report their stock holdings under Section 16(a) of the Exchange Act; (2) There are a minimum of 2,000 holders of the underlying security; (3) The issuer is in compliance with any applicable requirements of the Exchange Act; (4) Trading volume (in all

markets in which the underlying security is traded) has been at least 2,400,000 shares in the preceding twelve (12) months; (5) Either: (i) If the underlying security is a "covered security" as defined under Section 18(b)(1)(A) of the Securities Act of 1933: (A) the market price per share of the underlying security has been at least \$3.00 for the previous three consecutive business days preceding the date on which the Exchange submits a certificate to the Clearing Corporation for listing and trading, as measured by the closing price reported in the primary market in which the underlying security is traded; however, (B) the requirements set forth in (5)(i)(A) will be waived during the three days following its initial public offering day for an underlying security having a market capitalization of at least \$3 billion based upon the offering price of its initial public offering, and may be listed and traded starting on or after the second business day following the initial public offering day; or (ii) If the underlying security is not a "covered security," the market price per share of the underlying security has been at least \$7.50 for the majority of business days during the three calendar months preceding the date of selection, as measured by the lowest closing price reported in any market in which the

underlying security traded on each of the subject days. Notwithstanding the requirements set forth in Paragraphs 1, 2, 4 and 5 above, the Exchange may list and trade an options contract if (i) the underlying security meets the guidelines for continued approval in Options 4, Section 4; and (ii) options on such underlying security are traded on at least one other registered national securities exchange.

⁸ The criteria and guidelines for a security to be considered widely held and actively traded are set forth in Options 4, Section 3(b), subject to exceptions.

⁹ An "NMS stock" means any NMS security other than an option, and an "NMS security" means any security or class of securities for which transaction reports are collected, processed, and made available pursuant to an effective transaction reporting plan (or an effective national market system plan for reporting transaction in listed options). See 17 CFR 242.600(b)(64) (definition of "NMS security") and (65) (definition of "NMS stock").

¹⁰ See supra note 7.

¹¹ See supra note 7.

Cboe noted that as demonstrated above, despite the fact that the Fidelity Fund and the ARK 21 Fund had been trading for approximately seven months (as of January 10, 2024) only as of August 7, 2024, the six-month trading volume for each as of that date was substantially higher than 2,400,000 shares (approximately 464 and 124 times that amount, respectively), which is the minimum 12-month volume the Exchange generally requires for a corporate stock in order to list options

on that security as set forth in Options 4, Section 3(b). Additionally, Cboe noted in in CBOE–2024–035 that as of August 7, 2024, the trading volume for the Fidelity Fund and the ARK 21 Fund was in the top 5% of all ETFs that are currently trading. Cboe noted in CBOE–2024–035 that this data demonstrates the Fidelity Fund and the ARK 21 Fund are characterized as having shares that are actively traded.

Cboe determined the proposed position and exercise limits considering,

among other things, the approximate six-month average daily volume (“ADV”) and outstanding shares of the Fidelity Fund and the ARK 21 Fund noted in the filing (which as discussed above demonstrate that these Bitcoin Trusts are widely held and actively traded and thus justify these conservatively proposed position limits), as set forth in in CBOE–2024–035 and below, along with market capitalization (as of August 7, 2024):

Underlying Bitcoin Trust	Six-month ADV (shares)	Outstanding shares	Market capitalization (\$)
Fidelity Fund	8,902,893	201,100,100	14,217,013,188
ARK 21 Fund	2,378,886	45,495,000	2,487,666,600

Cboe then compared the number of outstanding shares of the Fidelity Fund and the ARK 21 Fund to those of other ETFs. The following table in CBOE–

2024–035 provided the approximate average position (and exercise limit) of ETF options with similar outstanding shares (as of August 27, 2024),

compared to the proposed position and exercise limit for options on the Fidelity Fund and the ARK 21 Fund:

Underlying Bitcoin Trust	Average limit of other ETF options (contracts)	Proposed limit (contracts)	
Fidelity Fund	188,11023	25,000	Cboe noted in Cboe–2024–035 that over 80% of the ETFs used for comparison had a limit of at least 200,000, and more than half had a limit of 250,000. Additionally, the three-month ADV of the majority of the ETFs used for comparison was lower than the Fidelity Fund three-month ADV of 5,665,027 shares.
ARK 21 Fund	108,69624	25,000	Cboe noted in Cboe–2024–035 that nearly 80% of the ETFs used for comparison had a limit of at least 75,000 (and up to 250,000). Additionally, the three-month ADV of the majority of ETFs used for comparison was lower (many more than four times lower) than the ARK 21 Fund three-month ADV of 1,737,327 shares.

Cboe considered current position and exercise limits of options on ETFs with outstanding shares comparable to those of each the Fidelity Fund and the ARK 21 Fund, with the proposed limit significantly lower (between two and ten times lower) than the average limits of the options on the other ETFs. As discussed above in in CBOE–2024–035, the Fidelity Fund and the ARK 21 Fund are actively held and widely traded: (1) each of these Bitcoin Trusts (as of August 7, 2024) had significantly more than 7,000,000 shares outstanding, which is the minimum number of shares

of a corporate stock that the Exchange generally requires to list options on that stock pursuant to Options 4, Section 3(b); (2) the Fidelity Fund and the ARK 21 Fund (as of the dates listed above) had significantly more than 2,000 beneficial holders, which is the minimum number of holders the Exchange generally requires for corporate stock in order to list options on that stock pursuant to Options 4, Section 3(b)(2) and; (3) the Fidelity Fund and the ARK 21 Fund had a six-month trading volume substantially higher than 2,400,000 shares, which is

the minimum 12-month volume the Exchange generally requires for a security in order to list options on that security as set forth in Options 4, Section 3.

Cboe noted in in CBOE–2024–035 that with respect to outstanding shares, if a market participant held the maximum number of positions possible pursuant to the proposed position and exercise limits, the equivalent shares represented by the proposed position/exercise limit would represent the following approximate percentage of current outstanding shares:

Underlying Bitcoin Trust	Proposed position /exercise limit (in equivalent shares)	Outstanding shares	Percentage of outstanding shares (%)
Fidelity Fund	2,500,000	201,100,100	1.2
ARK 21 Fund	2,500,000	45,495,000	5.5

As this table demonstrated in CBOE–2024–035, if a market participant held

the maximum permissible options positions in either the Fidelity Fund or

the ARK 21 Fund and exercised all of them at the same time, that market

participant would control a small percentage of the outstanding shares of the particular underlying Bitcoin Trust. Cboe provided a table in in CBOE–2024–035 noting the equivalent shares

of the position limits applicable to equity options, including ETFs, further represents the percentages of the minimum number of outstanding shares that an underlying stock or ETF must

have to qualify for that position limit (under the second method described above), all of which are higher than the percentages for the Fidelity Fund and the ARK 21 Fund.

	Position/exercise limit (in equivalent shares)	Minimum outstanding shares	Percentage of outstanding shares (%)
2,500,000		6,300,000	40.0
5,000,000		40,000,000	12.5
7,500,000		120,000,000	6.3
20,000,000		240,000,000	8.3
25,000,000		300,000,000	8.3

6,300,000 is the minimum number of outstanding shares an underlying security must have for the Exchange to continue to list options on that security, so this would be the smallest number of outstanding shares permissible for any corporate option that would have a position limit of 25,000 contract. *See* Options 4, Section 3(b). This rule applies to corporate stock options but not ETF options, which currently have no requirement regarding outstanding shares of the underlying ETF for the

Exchange to continue listing options on that ETF. Therefore, there may be ETF options trading for which the 25,000 contract position limits represent an even larger percentage of outstanding shares of the underlying ETF than set forth above.

CBOE–2024–035 provided that the equivalent shares represented by the proposed position and exercise limits for the Fidelity Fund and the ARK 21 Fund as a percentage of outstanding shares of the underlying Bitcoin Trust is significantly lower than the percentage

for the lowest possible position limit for equity options of 25,000 (under 6% compared to 40%) and is lower than that percentage for each current position limit bucket.¹²

GBTC, BTC and BITB

NYSE American LLC (“NYSE American”) noted in NYSEAmerican–2024–49 that, as of August 30, 2024, GBTC, BTC and BITB had the following number of shares outstanding (and corresponding market capitalization):

Bitcoin Trust	Shares outstanding	Market value (08/30/2024) (\$)
GBTC	284,570,100	13,443,091,524
BTC	366,950,100	1,930,157,526
BITB	68,690,000	2,221,640,670

NYSE American noted in NYSEAmerican–2024–49 that, as displayed in the above table, GBTC, BTC and BITB had significantly more than 7,000,000 shares outstanding, which is the minimum number of shares of a corporate stock that the Exchange generally requires to list options on that stock pursuant to Options 4, Section 3(b). NYSE American noted in NYSEAmerican–2024–49 that this demonstrated that GBTC, BTC and BITB are characterized by a substantial number of outstanding shares. Further, as provided in NYSEAmerican–2024–49 the below table contained information regarding the number of beneficial

holders of GBTC, BTC and BITB as of August 14, 2024.

Bitcoin Trust	Beneficial holders (8/14/24)
GBTC	464,364
BTC	13,403
BITB	75,437

As shown in NYSEAmerican–2024–49, the table showed that GBTC, BTC and BITB each had significantly more than 2,000 beneficial holders (approximately 232, 7, and 38 times more, respectively), which is the minimum number of holders the

Exchange generally requires for corporate stock in order to list options on that stock pursuant to Options 4, Section 3(b)(2).¹³ Therefore, NYSE American noted that the shares of each GBTC, BTC and BITB are widely held. In addition, NYSE American noted that the shares of each GBTC, BTC and BITB are actively traded.

NYSEAmerican–2024–49 provided, as of September 30, 2024, that the total trading volume (by shares and notional) for these funds since they began trading¹⁴ and the average daily volume (“ADV”) over the 30-day period of September 1 through September 30, 2024, was as follows:

Bitcoin Trust	Trading volume (shares)	Trading volume (notional \$)	ADV (shares)
GBTC	1,803,567,700	93,472,544,497	3,266,138

¹² As these percentages are based on the minimum number of outstanding shares an underlying security must have to qualify for the applicable position limit, these are the highest

possible percentages that would apply to any option subject to that position and exercise limit.

¹³ *See supra* note 7.

¹⁴ GBTC and BITB began trading on January 11th and BTC began trading on July 31st. Thus, the

measurement period for the trading volume (shares/ notional) was January 11 through September 20, 2024, for GBTC and BITB (*i.e.*, nine months) and July 31 through September 20, 2024, for BTC (*i.e.*, two months).

Bitcoin Trust	Trading volume (shares)	Trading volume (notional \$)	ADV (shares)
BTC	335,492,930	1,792,866,521	6,838,546
BITB	434,815,840	14,433,361,384	1,949,835

As demonstrated above and in NYSEAmerican–2024–49, even though GBTC, BTC and BITB were trading for less than one year (and in the case of the BTC, less than two months), the trading volume for each was substantially higher than 2,400,000 shares (between roughly 165 and 700 times that amount), which is the minimum 12-month volume the Exchange generally requires for a security in order to list options on that security as set forth in Options 4, Section 3(b). NYSE American noted that this data demonstrated that GBTC, BTC and BITB are characterized by a substantial number of outstanding shares that are actively traded.

NYSE American noted in NYSEAmerican–2024–49 that BTC began trading on July 31, 2024, and

therefore had only two months of trading data available at the time of filing NYSEAmerican–2024–49. In terms of total volume, NYSEAmerican–2024–49 provided the below table.

Bitcoin Trust	Total volume (9/30/2024)
GBTC	723,758,100 (6-months).
BTC	335,492,930 (2-months).
BITB	263,965,870 (6-months).

NYSE American noted in NYSEAmerican–2024–49 that based on the most-recent trading volume, GBTC, BTC and BITB exceeded the requisite minimum of 100,000,000 shares

necessary to qualify for the 250,000-contract position and exercise limits. By comparison, NYSE American noted that other options symbols with six-month trading volume less than GBTC, BITB, and BTC were eligible for position and exercise limits of at least 250,000.¹⁵ NYSEAmerican–2024–49 provided, with respect to the outstanding shares of each Bitcoin Trust, if a market participant held the maximum number of contracts possible pursuant to the proposed position and exercise limits (25,000 contracts), the equivalent shares represented by the proposed position/exercise limit (2,500,000 shares) would represent the following approximate percentage of current outstanding shares:

Bitcoin Trust	Proposed position/exercise limit in equivalent shares	Outstanding shares (8/30/24)	Percentage of outstanding shares (%)
GBTC	2,500,000	284,570,100	0.9
BTC	2,500,000	366,950,100	0.7
BITB	2,500,000	68,690,000	3.6

As this table demonstrated in NYSEAmerican–2024–49, if a market participant held the maximum permissible options positions in any one of GBTC, BTB or BITB options and exercised all of them at the same time, that market participant would control a small percentage of the outstanding shares of the underlying GBTC, BTB or

BITB. For example, as noted above, a position limit of 25,000 same side contracts effectively restricts a market participant from holding positions that could result in the receipt of no more than 2,500,000 shares of the applicable Bitcoin Trust (if that market participant exercised all its options). Based on the number of shares outstanding for each

of GBTC, BTB or BITB as of August 30, 2024, NYSE American noted in NYSEAmerican–2024–49 and the table below, that the approximate number of market participants that could hold the maximum of 25,000 same side positions in each of GBTC, BTB and BITB that would equate to the number of shares outstanding of that Bitcoin Trust:

Bitcoin Trust	Shares outstanding	Number of market participants with 25,000 same side positions
GBTC	284,570,100	114
BTC	366,950,100	147
BITB	68,690,000	27

NYSE American concluded in NYSEAmerican–2024–49 that this meant if 114 market participants had 25,000 same side positions in options on GBTC, each of them would have to simultaneously exercise all of those options to create a scenario that may put

the underlying security under stress. Similarly, this means if 147 market participants had 25,000 same side positions in options on BTC, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying

security under stress. Finally, this means if 27 market participants had 25,000 same side positions in options on BITB, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security under stress.

¹⁵ See <https://www.theocc.com/Market-Data/Market-Data-Reports/Series-and-Trading-Data/>

Series-Search (including the following symbols that have a position limit of 250,000: GLD, IAU, SLV, SIVR, SGOL).

NYSE American noted in NYSEAmerican–2024–49 that it believed it was highly unlikely for this to occur; however, even if such event did occur, NYSE American would not expect GBTC, BTB or BITC to be under stress because such an event would merely induce the creation of more shares through the trust's creation and redemption process. Further, given that the issuer of each of GBTC, BTB or BITC may create and redeem shares that represent an interest in Bitcoin, NYSE American noted in NYSEAmerican–

2024–49 that it is relevant to compare the size of a position limit to the market capitalization of the Bitcoin market. NYSE American noted in NYSEAmerican–2024–49 that, as of August 30, 2024, the global supply of Bitcoin was 19,747,066, and the price of one Bitcoin was approximately \$59,108.23,39 which equates to a market capitalization of approximately \$1.167 trillion.¹⁶ NYSE American stated in NYSEAmerican–2024–49 that a position and exercise limit of 25,000 same side contracts effectively restricts a market

participant from holding positions that could result in the receipt of no more than 2,500,000 shares of GBTC, BTC, or BITB, as applicable (if that market participant exercised all its options). NYSE American presented the below table with the share price of each of GBTC, BTC and BITB on August 30, 2024, the value of 2,500,000 shares of the particular Bitcoin Trust at that price, and the approximate percentage of that value of the size of the Bitcoin market:

Bitcoin Trust	Aug. 30th share price (\$)	Value of 2,500,000 shares of Bitcoin Trust (\$)	Percentage of Bitcoin market (%)
GBTC	46.75	116,875,000	0.010
BTC	5.20	13,000,000	0.001
BITB	31.95	79,875,000	0.007

NYSE American concluded that, if a market participant with the maximum 25,000 same side contracts in options on GBTC, BTC, or BITB exercised all

positions at one time, such an event would have no practical impact on the Bitcoin market. NYSE American also reviewed the market capitalization of

each Bitcoin Trust relative to the market capitalization of the entire bitcoin market, as of August 30, 2024.

	Bitcoin/shares outstanding	Market value (8/30/2024) (\$)	% of total Bitcoin market (%)
Total Bitcoin Market	19,747,066	\$1,167,214,096,788	100.00
GBTC	284,570,100	\$13,443,091,524	1.15
BTC	366,950,100	\$1,930,157,526	0.17
BITB	68,690,000	\$2,221,640,670	0.19

As shown above and in NYSEAmerican–2024–49, GBTC, BTC and BITB collectively represented approximately 1.51% of the global supply of Bitcoin (19,747,066). Based on the \$46.75 price of a GBTC share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 1,264 GBTC shares. Further, NYSE American noted that another 24,967,146,455 GBTC shares could be created before the supply of Bitcoin was exhausted. NYSEAmerican–2024–49 provided that as a result, 9,987 market participants would have to simultaneously exercise 25,000 same side positions in GBTC options to receive shares of the GBTC holding the entire global supply of Bitcoin. NYSEAmerican–2024–49 also provided that based on the \$5.20 price of a BTC share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 11,367 BTC shares. Another 224,464,249,382 BTC

shares could be created before the supply of Bitcoin was exhausted. NYSE American stated that as a result, 89,786 market participants would have to simultaneously exercise 25,000 same side positions in BTC options to receive shares of BTC holding the entire global supply of Bitcoin. Similarly, NYSE American noted that based on the \$31.95 price of a BITB share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 1,850 BITB shares. NYSEAmerican–2024–49 provided that another 36,532,522,591 BITB shares could be created before the supply of Bitcoin was exhausted. NYSE American concluded that as a result, 14,613 market participants would have to simultaneously exercise 25,000 same side positions in BITB options to receive shares of BITB holding the entire global supply of Bitcoin. NYSE American also concluded that, unlike GBTC, BTB and BITB, the number of shares that

corporations may issue is limited. NYSEAmerican–2024–49 provided that, however, like corporations, which authorize additional shares, repurchase shares, or split their shares, the Bitcoin Trusts may create, redeem, or split shares in response to demand and while the supply of Bitcoin is limited to 21,000,000, it is believed that it will take more than 100 years to fully mine the remaining Bitcoin.¹⁷ NYSE American noted that the supply of Bitcoin is larger than the available supply of most securities.¹⁸ NYSE American concluded that given the significant unlikelihood of any of these events ever occurring, NYSE American noted that it did not believe options on GBTC, BTC and BITB should be subject to position and exercise limits even lower than those proposed (which are already equal to the lowest available limit for equity options in the industry) to protect the supply of Bitcoin. NYSE American also noted in

¹⁶ See <https://www.blockchain.com/explorer/charts/total-bitcoins>.

¹⁷ See <https://www.blockchain.com/explorer/assets/btc> (citing 21 million as the “total supply” of bitcoin).

¹⁸ The market capitalization of Bitcoin would rank in the top 10 among securities. See <https://companiesmarketcap.com/usa/largest-companies-in-the-usa-by-market-cap/>.

NYSEAmerican–2024–49 that it believed the proposed limits are appropriate given position limits for Bitcoin futures. NYSE American noted that the Chicago Mercantile Exchange (“CME”) imposed a position limit of 2,000 futures (for the initial spot month)

on its Bitcoin futures contract.¹⁹ Further, NYSE American provided that on August 28, 2024, CME Aug 24 Bitcoin Futures settled at \$58,950. NYSE American noted that a position of 2,000 CME Bitcoin futures, therefore, would have a notional value of

\$589,500,000. NYSEAmerican–2024–49 provided the following table with the share price of each of GBTC, BTC and BITB on August 28, 2024, and the approximate number of option contracts that equates to that notional value:

Bitcoin Trust	Aug. 28th share price	Number of options contracts
GBTC	46.94	125,585
BTC	5.23	1,127,151
BITB	32.08	183,759

NYSE American stated that approximate number of option contracts for GBTC, BTC and BITB that equate to the notional value of CME Bitcoin futures was significantly higher than the proposed limit of 25,000 options contract for each option on GBTC, BTC and BITB. Further, NYSE American noted that the fact that many options ultimately expire out-of-the-money and thus are not exercised for shares of the underlying, while the delta of a Bitcoin Future is 1, further demonstrated how conservative the proposed limits of 25,000 options contracts are for options on GBTC, BTC and BITB.

The Exchange notes, unlike options contracts, CME position limits are calculated on a net futures-equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an aggregation ratio(s).²⁰ Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.²¹ If a position exceeds position limits because of an option assignment, CME permits market

participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day’s close of trading but does not exceed the limits when evaluated using the previous day’s delta factors, then the position shall not constitute a position limit violation. Considering CME’s position limits on futures for Bitcoin, the Exchange believes that that the proposed same side position limits are more than appropriate for the options on Bitcoin Trusts.

NYSE American noted in NYSEAmerican–2024–049 that the available supply of Bitcoin is not relevant to the determination of position and exercise limits for options overlying the GBTC, BTC and BITB.²² NYSE American noted stated that position and exercise limits are not a tool that should be used to address a potential limited supply of the underlying of an underlying. NYSE American noted that position and exercise limits do not limit the total number of options that may be held, but rather they limit the number of positions a single customer may hold

or exercise at one time.²³ “Since the inception of standardized options trading, the options exchanges have had rules imposing limits on the aggregate number of options contracts that a member or customer could hold or exercise.”²⁴ NYSE American noted that position and exercise limit rules are intended “to prevent the establishment of options positions that can be used or might create incentives to manipulate or disrupt the underlying market so as to benefit the options position. In particular, position and exercise limits are designed to minimize the potential for mini-manipulations and for corners or squeezes of the underlying market. In addition, such limits serve to reduce the possibility for disruption of the options market itself, especially in illiquid options classes.”²⁵

The Exchange notes that a Registration Statement on Form S–1 was filed with the Commission for each of GBTC, BTC and BITB, each of which described the supply of Bitcoin as being limited to 21,000,000 (of which approximately 90% had already been mined), and that the limit would be reached around the year 2140.²⁶ Each Registration Statement permits an unlimited number of shares of the applicable Bitcoin Trust to be created.

¹⁹ See CME Rulebook Chapter 350 (description of CME Bitcoin Futures) and Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices. Each CME Bitcoin futures contract is valued at five Bitcoins as defined by the CME CF Bitcoin Reference Rate (“BRR”). See CME Rule 35001.

²⁰ See CME Rulebook Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices.

²¹ *Id.*

²² NYSE American in NYSEAmerican–2024–49 stated that it is unaware of any proposed rule change related to position and exercise limits for any equity option (including commodity ETF options) for which the Commission required consideration of whether the available supply of an underlying (whether it be a corporate stock or an ETF) or the contents of an ETF (commodity or otherwise) should be considered when an exchange proposed to establish those limits. See, e.g.,

Securities Exchange Act Release No. 57894 May 30, 2008), 73 FR 32061 (June 5, 2008) (SR–CBOE2005–11) (approval order in which the Commission stated that the “listing and trading of Gold Trust Options will be subject to the exchanges’ rules pertaining to position and exercise limits and margin”). The Exchange notes when the Commission approved this filing, the position limits in Rule 9054 were the same as they are today. For reference, the current position and exercise limits for options on SPDR Gold Shares ETF (“GLD”) and options on iShares Silver Trust (“SLV”) are 250,000 contracts, or 10 times that proposed position and exercise limit for the Bitcoin Trust options.

²³ NYSE American in NYSEAmerican–2024–49 provided an example that supposed an option had a position limit of 25,000 option contracts and there were a total of 10 investors trading that option. If all 10 investors maxed out their positions, that would result in 250,000 option contracts outstanding at that time. However, if 10 more

investors decided to begin trading that option and also maxed out their positions. This would result in 500,000 option contracts outstanding at that time. NYSE American concluded that an increase in the number of investors could cause an increase in outstanding options even if position limits remain unchanged.

²⁴ See Securities Exchange Act Release No. 39489 (December 24, 1997), 63 FR 276 (January 5, 1998) (SRCBOE–1997–11).

²⁵ *Id.*

²⁶ See, e.g., GBTC Form S–1 Registration Statement, at p. 17, <https://www.sec.gov/Archives/edgar/data/1588489/000119312517013693/d157414ds1.htm>; BTC Form S–1 Registration Statement, at p. 21, <https://www.sec.gov/Archives/edgar/data/2015034/000119312524065444/d785023ds1.htm>; and BITB Amendment No 2. to S–1, at p. 47, https://www.sec.gov/Archives/edgar/data/1763415/000199937123000735/bitwise-s1a_120423.htm (“Bitcoin Trusts Reg. Stmts.”).

Further, the Commission approved proposed rule changes that permitted the listing and trading of shares of each of GBTC, BTC and BITB, which approval did not comment on the sufficient supply of Bitcoin or address whether there was a risk that permitting an unlimited number of shares for a Bitcoin Trust would impact the supply of Bitcoin.²⁷ Therefore, the Exchange believes the Commission had ample time and opportunity to consider whether the supply of Bitcoin was sufficient to permit the creation of unlimited Bitcoin Trust shares, and does not believe considering this supply with respect to the establishment of position and exercise limits is appropriate given its lack of relevance to the purpose of position and exercise limits. However, given the significant size of the Bitcoin supply, the proposed positions limits are more than sufficient to protect investors and the market.

Based on the foregoing and notwithstanding the position limits in Options 9, Section 13(d) and exercise limits in Options 9, Section 15(c), ISE proposes the position and exercise limits for the options Fidelity Fund, the ARK 21 Fund, GBTC, BTC and BITB to be 25,000 contracts on the same side pursuant to proposed Supplementary Material .01 to Options 9, Section 13 and proposed Supplementary Material .01 to Options 9, Section 15. Further, Exchange Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, and margin requirements, will govern the listing and trading of options on the Bitcoin Trusts. The proposed position limit, and exercise limit, is consistent with the Act as it addresses concerns related to manipulation and protection of investors because the position limit (and exercise limit) is conservative and appropriate given the Bitcoin Trusts are actively traded.

Options on the Bitcoin Trusts will be subject to the Exchange's continued listing standards for options on ETFs set forth in Options 4, Section 4(g). Specifically, options approved for trading pursuant to Options 4, Section 3(h) will not be deemed to meet the requirements for continued approval, and the Exchange shall not open for trading any additional series of option contracts of the class covering such ETFs if the ETFs are delisted from trading as provided in subparagraph (b)(5) of Options 4, Section 4²⁸ or the

ETFs are halted or suspended from trading on their primary market.²⁹ In addition, the Exchange shall consider the suspension of opening transactions in any series of options of the class covering ETFs in any of the following circumstances:

(1) in the case of options covering Exchange-Traded Fund Shares approved pursuant to Options 4, Section 3(h)(A)(i), in accordance with the terms of subparagraphs (b)(1), (2), (3) and (4) of Options 4, Section 4;³⁰

(2) in the case of options covering Fund Shares approved pursuant to Options 4, Section 3(h)(A)(ii),³¹ following the initial twelve-month period beginning upon the commencement of trading in the Exchange-Traded Fund Shares on a national securities exchange and are defined as an "NMS stock" under Rule 600 of Regulation NMS, there were fewer than 50 record and/or beneficial holders of such Exchange-Traded Fund Shares for 30 or more consecutive trading days;

(3) the value of the index or portfolio of securities or non-U.S. currency, portfolio of commodities including commodity futures contracts, options on commodity futures contracts, swaps, forward contracts, options on physical commodities and/or Financial Instruments and Money Market Instruments, on which the Exchange-Traded Fund Shares are based is no longer calculated or available; or

(4) such other event occurs or condition exists that in the opinion of the Exchange makes further dealing in such options on the Exchange inadvisable.

Options on the Bitcoin Trusts would be physically settled contracts with American-style exercise.³² Consistent

Section 3(c), the trading volume of the Original Security (as therein defined) prior to but not after the commencement of trading in the Restructure Security (as therein defined), including 'when-issued' trading, may be taken into account in determining whether the trading volume requirement of (3) of this paragraph (b) is satisfied.

²⁹ See Options 4, Section 4(g).

³⁰ Options 4, Section 4(b)(5)(1) through (4) provides, if: (1) there are fewer than 6,300,000 shares of the underlying security held by persons other than those who are required to report their security holdings under Section 16(a) of the Act, (2) there are fewer than 1,600 holders of the underlying security, (3) the trading volume (in all markets in which the underlying security is traded) has been less than 1,800,000 shares in the preceding twelve (12) months, or (4) the underlying security ceases to be an 'NMS stock' as defined in Rule 600 of Regulation NMS under the Exchange Act. Options 4, Section 3(h)(i) refers to Financial Instruments and Money Market Instruments. In addition, the Exchange proposes to amend the citation to "Options 4, Section 3(h)(A)(i)" herein to "Options 4, Section 3(h)(i)."

³¹ Options 4, Section 3(h)(ii) refers to Currency Trust Shares. In addition, the Exchange proposes to amend the citation to "Options 4, Section 3(h)(A)(ii)" herein to "Options 4, Section 3(h)(ii)."

³² See Options 4, Section 2, Rights and Obligations of Holders and Writers, which provides that the rights and obligations of holders and writers shall be as set forth in the Rules of the Clearing Corporation. See also OCC Rules, Chapter

with current Options 4, Section 5, which governs the opening of options series on a specific underlying security (including ETFs), the Exchange will open at least one expiration month for options on the Bitcoin Trusts and may also list series of options on the Bitcoin Trusts for trading on a weekly³³ or quarterly³⁴ basis. The Exchange may also list long-term equity option series ("LEAPS")³⁵ that expire from twelve to thirty-nine from the time they are listed.

Pursuant to Options 4, Section 5(d), which governs strike prices of series of options on ETFs, the interval between strike prices of series of options on ETFs approved for options trading pursuant to Section 3(h) of Options 4 shall be fixed at a price per share which is reasonably close to the price per share at which the underlying security is traded in the primary market at or about the same time such series of options is first open for trading on the Exchange, or at such intervals as may have been established on another options exchange prior to the initiation of trading on the Exchange. With respect to the Short Term Options Series or Weekly Program, during the month prior to expiration of an option class that is selected for the Short Term Option Series Program, the strike price intervals for the related non-Short Term Option ("Related non-Short Term Option") shall be the same as the strike price intervals for the Short Term Option.³⁶ Specifically, the Exchange may open for trading Short Term Option Series at strike price intervals of (i) \$0.50 or greater where the strike price is less than \$100, and \$1 or greater where the strike price is between \$100 and \$150 for all option classes that participate in the Short Term Options Series Program; (ii) \$0.50 for option classes that trade in one dollar increments and are in the Short Term Option Series Program; or (iii) \$2.50 or greater where the strike price is above \$150.³⁷ Additionally, the Exchange may list series of options pursuant to the \$1 Strike Price Interval

VIII, which governs exercise and assignment, and Chapter IX, which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts. OCC Rules can be located at: https://www.theocc.com/getmedia/9d3854cd-b782-450f-bcf7-33169b0576ce/occ_rules.pdf.

³³ See Supplementary .03 to Options 4, Section 5.

³⁵ See Options 4, Section 8.

³⁶ See Supplementary Material .03(e) to Options 4, Section 5.

³⁷ *Id.*

²⁷ See NYSEAMER-2024-49.

²⁸ Options 4, Section 4(b)(5) provides, If an underlying security is approved for options listing and trading under the provisions of Options 4,

Program,³⁸ the \$0.50 Strike Program,³⁹ the \$2.50 Strike Price Program,⁴⁰ and the \$5 Strike Program.⁴¹ Options 3, Section 3 governs the minimum increment for bids and offers for both equity and index options. Pursuant to Options 3, Section 3, where the price of a series of options for the Bitcoin Trusts is less than \$3.00 the minimum increment will be \$0.05, and where the price is \$3.00 or higher, the minimum increment will be \$0.10⁴² consistent with the minimum increments for options on other ETFs listed on the Exchange. Any and all new series of options on the Bitcoin Trusts that the Exchange lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Options 4, Section 5 and Options 3, Section 3, as applicable.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options the Bitcoin Trusts that it applies to the Exchange's other options products.⁴³ ISE's market surveillance staff would have access to the surveillances conducted by Nasdaq⁴⁴ with respect to the Bitcoin Trusts and would review activity in the underlying Bitcoin Trusts when conducting surveillances for market abuse or manipulation in the options on the Bitcoin Trusts. Additionally, ISE is a member of the Intermarket Surveillance Group ("ISG") under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition, ISE has a Regulatory Services Agreement with the Financial Industry Regulatory Authority ("FINRA"). Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market

surveillance that are common to rules of all options exchanges.⁴⁵

The Exchange represents that the same surveillance procedures applicable to all other options on other ETFs currently listed and traded on the Exchange will apply to options on the Bitcoin Trusts. Also, the Exchange represents that it has the necessary systems capacity to support the new option series. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading options on ETFs, including the proposed options on the Bitcoin Trusts. The underlying shares of spot bitcoin ETPs, including the Bitcoin Trusts, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in the orders approving proposals of several exchanges to list and trade shares of spot bitcoin-based exchange-traded products:⁴⁶

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.⁴⁷

The Exchange states that, given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation

analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs]." ⁴⁸ In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Trusts,⁴⁹ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Trusts.

The Exchange has also analyzed its capacity and represents that it believes the Exchange and the Options Price Reporting Authority or "OPRA" have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on the Bitcoin Trusts up to the number of expirations currently permissible under the Exchange Rules. Because the proposal is limited to one class, the Exchange believes any additional traffic that may be generated from the introduction of the options on the Bitcoin Trust will be manageable.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁵⁰ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁵¹ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section (6)(b)(5)⁵² requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that the proposal to list and trade options on the Bitcoin Trusts will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in

³⁸ See Supplementary Material .01 to Options 4, Section 5.

³⁹ See Supplementary Material .05 to Options 4, Section 5.

⁴⁰ See Supplementary Material .02 to Options 4, Section 5.

⁴¹ See Supplementary Material .06 to Options 4, Section 5.

⁴² Options that are eligible to participate in the Penny Interval Program have a minimum increment of \$0.01 below \$3.00 and \$0.50 above \$3.00. See Supplementary Material .01 to Options 3, Section 3.

⁴³ The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (e.g., spoofing, marking the close, ping, phishing).

⁴⁴ The Nasdaq Stock Market LLC is an affiliated market of ISE.

⁴⁵ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules, and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO ("common members"). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

⁴⁶ See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008, 3009 (January 17, 2024) (SR-NYSEArca-2021-90; SR-NYSEArca-2023-44; SR-NYSEArca-2023-58; SR-NASDAQ-2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX-2023-040; SR-CboeBZX-2023-042; SR-CboeBZX-2023-044; and SR-CboeBZX-2023-072) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units) ("Bitcoin ETP Approval Order").

⁵⁰ 15 U.S.C. 78f(b).

⁵¹ 15 U.S.C. 78f(b)(5).

⁵² 15 U.S.C. 78(f)(b)(5).

general, protect investors because offering options on the Bitcoin Trusts will provide investors with an opportunity to realize the benefits of utilizing options on a Bitcoin Trust, including cost efficiencies and increased hedging strategies. The Exchange believes that offering options on the Bitcoin Trusts will benefit investors by providing them with a relatively lower-cost risk management tool, which will allow them to manage their positions and associated risk in their portfolios more easily in connection with exposure to the price of Bitcoin and with Bitcoin-related products and positions. Additionally, the Exchange's offering of options on the Bitcoin Trusts will provide investors with the ability to transact in such options in a listed market environment as opposed to in the unregulated OTC options market, which would increase market transparency and enhance the process of price discovery conducted on the Exchange through increased order flow to the benefit of all investors. The Exchange also notes that it already lists options on other commodity-based Units,⁵³ which, as described above, are trusts structured in substantially the same manner as Bitcoin Trusts and essentially offer the same objectives and benefits to investors, just with respect to a different commodity (*i.e.*, Bitcoin rather than precious metals) and for which the Exchange has not identified any issues with the continued listing and trading of commodity-backed Unit options it currently lists for trading.

The Exchange also believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, because it is consistent with current Exchange Rules previously filed with the Commission. Options on the Bitcoin Trusts satisfy the initial listing standards and continued listing standards currently in the Exchange Rules applicable to options on all Units, including Units that hold other commodities already deemed appropriate for options trading on the Exchange. Additionally, as demonstrated above, each Bitcoin Trust is characterized by a substantial number of shares that are widely held and actively traded. Options on the Bitcoin Trusts will trade in the same manner as any other Unit options—the same Exchange Rules that currently govern the listing and trading of all Unit options, including permissible expirations, strike prices and minimum increments, and applicable margin

requirements, will govern the listing and trading of options on Bitcoin Trusts in the same manner.

The Exchange also believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, because it is consistent with current Exchange Rules previously filed with the Commission. Options on Bitcoin Trusts satisfy the initial listing standards and continued listing standards currently in the Exchange Rules applicable to options on all ETFs and ETPs, including ETPs that hold other commodities already deemed appropriate for options trading on the Exchange. Additionally, as demonstrated above, each Bitcoin Trust is characterized by a substantial number of shares that are widely held and actively traded. Options on the Bitcoin Trust will trade in the same manner as any other ETF or ETP options—the same Exchange Rules that currently govern the listing and trading of options, including permissible expirations, strike prices, minimum increments, and margin requirements, will govern the listing and trading of options on Bitcoin Trusts in the same manner.

The proposed position and exercise limit for options on the Bitcoin Trusts is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given the Bitcoin Trusts' market capitalization, average daily volume, number of beneficial holders, and high number of outstanding shares.⁵⁴ The proposed position and exercise limits are consistent with the Act as they addresses concerns related to manipulation and protection of investors because the position and exercise limits are extremely conservative and more than appropriate given the Bitcoin Trusts are actively traded.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options the Bitcoin Trusts that it applies to the Exchange's other options

⁵⁴ The Exchange notes that IBIT—which has been approved for options trading—represents a larger percentage of the bitcoin market than all proposed Bitcoin Trusts. As noted herein, the Bitcoin Trusts collectively represent approximately 1.51% of the bitcoin market. By comparison, IBIT options have an approved position limit of 25,000 contracts per side, which represents 4% of total underlying spot BTC liquidity, and IBIT is the most liquid spot Bitcoin ETF.

products.⁵⁵ ISE's market surveillance staff would have access to the surveillances conducted by Nasdaq⁵⁶ with respect to the Bitcoin Trusts and would review activity in the underlying Bitcoin Trusts when conducting surveillances for market abuse or manipulation in the options on the Bitcoin Trusts. Additionally, ISE is a member of the Intermarket Surveillance Group ("ISG") under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. ISE would be able to obtain information regarding trading and shares of the Bitcoin Trusts from their primary listing market, and from other markets that trade shares of the Bitcoin Trusts, through ISG. In addition, ISE has a Regulatory Services Agreement with the Financial Industry Regulatory Authority ("FINRA"). Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.⁵⁷

The Exchange represents that the same surveillance procedures applicable to all other options on other ETFs currently listed and traded on the Exchange will apply to options on the Bitcoin Trusts. Also, the Exchange represents that it has the necessary systems capacity to support the new option series. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading options on ETFs, including the proposed options on the Bitcoin Trusts. The underlying shares of spot bitcoin ETPs, including

⁵⁵ The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (*e.g.*, spoofing, marking the close, ping, phishing).

⁵⁶ The Nasdaq Stock Market LLC is an affiliated market of ISE.

⁵⁷ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules, and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. *See* 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO ("common members"). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

⁵³ *See* Options 4, Section 3(h)(iv).

the Bitcoin Trusts, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot bitcoin-based exchange-traded products (“Bitcoin ETP Order”):

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.⁵⁸

The Exchange states that, given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be “expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs].”⁵⁹ In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Trusts,⁶⁰ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Trusts.

The Exchange has also analyzed its capacity and represents that it believes the Exchange and the Options Price Reporting Authority or “OPRA” have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on the Bitcoin Trusts up to the number of expirations currently permissible under the Exchange Rules. Because the proposal is limited to one class, the Exchange believes any additional traffic that may be generated from the introduction of the options on the Bitcoin Trusts will be manageable.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as Bitcoin Trusts would need to satisfy the initial listing standards set forth in the Exchange Rules in the same manner as any other ETF before the Exchange could list options on them.

Additionally, options on the Bitcoin Trusts will be equally available to all market participants who wish to trade such options. The Exchange Rules currently applicable to the listing and trading of options on ETFs on the Exchange will apply in the same manner to the listing and trading of all options on Bitcoin Trusts. Also, and as stated above, the Exchange already lists options on other commodity-based ETPs.

The Exchange does not believe that the proposal to list and trade options on Bitcoin Trusts will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that the advent of options on the Bitcoin Trusts trading on the Exchange may make the Exchange a more attractive marketplace to market participants at other exchanges, such market participants are free to elect to become market participants on the Exchange. As noted herein, this is a competitive filing as the Commission recently approved the listing and trading of options on an ETP that, like the Bitcoin Trusts, holds bitcoin.⁶¹ Additionally, other options exchanges are free to amend their listing rules, as applicable, to permit them to list and trade options on Bitcoin Trusts. The Exchange notes that listing and trading options on Bitcoin Trust on the Exchange will subject such options to transparent exchange-based rules as well as price discovery and liquidity, as opposed to alternatively trading such options in the OTC market.

The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition as it is designed to increase competition for order flow on the Exchange in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange

notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering options on the Bitcoin Trusts for trading on the Exchange will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment needs in connection with Bitcoin prices and Bitcoin-related products and positions on a listed options exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act⁶² and Rule 19b-4(f)(6) thereunder.⁶³ Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act⁶⁴ and subparagraph (f)(6) of Rule 19b-4 thereunder.⁶⁵

A proposed rule change filed under Rule 19b-4(f)(6)⁶⁶ under the Act does not normally become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),⁶⁷ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the Fidelity Wise

⁵⁸ See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008, 3009 (January 17, 2024) (File Nos. SR-NYSEArca-2021-90; SR-NYSEArca-2023-44; SR-NYSEArca-2023-58; SR-NASDAQ-2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX-2023-040; SR-CboeBZX-2023-042; SRCboeBZX-2023-044; and SR-CboeBZX-2023-072) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units).

⁶¹ See *supra* note 3.

⁶² 15 U.S.C. 78s(b)(3)(A)(iii).

⁶³ 17 CFR 240.19b-4(f)(6).

⁶⁴ 15 U.S.C. 78s(b)(3)(A)(iii).

⁶⁵ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission waives this requirement.

⁶⁶ 17 CFR 240.19b-4(f)(6).

⁶⁷ 17 CFR 240.19b-4(f)(6)(iii).

Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust (BTC), and the Bitwise Bitcoin ETF.⁶⁸ The Exchange has provided information regarding the underlying Bitcoin Trusts, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of the Bitcoin Trusts. The proposal also establishes position and exercise limits for options on the Bitcoin Trusts and provides information regarding the surveillance procedures that will apply to Bitcoin Trust options. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Bitcoin Trust options. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.⁶⁹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-ISE-2024-54 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-ISE-2024-54. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-ISE-2024-54 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁷⁰

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101743; File No. SR-BX-2024-048]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Adopt an OTTO Protocol

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 15, 2024, Nasdaq BX, Inc. ("BX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt a new protocol, "Ouch to Trade Options" or "OTTO" and establish pricing for this new protocol.³

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

⁶⁸ See Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SR-Cboe-2024-035) (Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds). See also Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR-NYSEAMER-2024-49) (Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds).

⁶⁹ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁷⁰ 17 CFR 200.30-3(a)(12), (59).

² 17 CFR 240.19b-4.

³ On November 15, 2024, BX is withdrawing SR-BX-2024-019 and is filing this rule change.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

BX proposes to offer a new order entry protocol called OTTO. Today, BX Participants may enter orders into the Exchange through the "Financial Information eXchange" or "FIX."⁴ The proposed new OTTO protocol is identical to the OTTO protocol offered today on 3 Nasdaq affiliated exchanges, Nasdaq ISE, LLC ("ISE"), Nasdaq GEMX, LLC ("GEMX") and Nasdaq MRX, LLC ("MRX").

The OTTO protocol is a proprietary protocol of Nasdaq, Inc. The Exchange continues to innovate and modernize technology so that it may continue to compete among options markets. The ability to continue to innovate with technology and offer new products to market participants allows BX to remain competitive in the options space which currently has eighteen options markets and potential new entrants.

OTTO Protocol

As proposed, OTTO would allow Participants and their Sponsored Customers⁵ to connect, send, and receive messages related to orders, auction orders, and auction responses to the Exchange. OTTO features would include the following: (1) options symbol directory messages (e.g., underlying and complex instruments); (2) System⁶ event messages (e.g., start of

trading hours messages and start of opening); (3) trading action messages (e.g., halts and resumes); (4) execution messages; (5) order messages; (6) risk protection triggers and cancel notifications; (7) auction notifications; (8) auction responses; and (9) post trade allocation messages. The Exchange notes that unlike FIX, which offers routing capability, OTTO does not permit routing. The Exchange proposes to include this description of OTTO in new Options 3, Section 7(e)(1)(B) and re-letter current "B" as "C".

Only one order protocol is required for a BX Participant to submit orders into BX. Only BX Participants may utilize ports on BX. Any market participant that sends orders to a BX Participant would not need to utilize a port. The BX Participant may send all orders, proprietary and agency, through one port to BX. Participants may elect to obtain multiple ports to organize their business,⁷ however only one port is necessary for a Participant to enter orders on BX.

Participants may elect to enter their orders through FIX, OTTO, or both protocols, although both protocols are not necessary. Participants may prefer one protocol as compared to another protocol, for example, the ability to route may cause a Participant to utilize FIX and a Participant that desires to execute an order locally may prefer OTTO. Also, the OTTO Port offers lower latency as compared to the FIX Port, which may be attractive to Participants depending on their trading behavior. Nasdaq believes that the addition of OTTO will provide BX Participants with additional choice when submitting orders to BX.

While the Exchange has no way of predicting with certainty the amount or type of OTTO Ports market participants will in fact purchase, the Exchange anticipates that some Participants will subscribe to multiple OTTO Ports in combination with FIX Ports. The Exchange notes that Options

provides participants with monitoring and risk management capabilities to facilitate participation in a "locked-in" trading environment; and (C) the data feeds described in Options 3, Section 23. See BX Options 1, Section 1(a)(59).

⁷ For example, a Participant may desire to utilize multiple FIX or OTTO Ports for accounting purposes, to measure performance, for regulatory reasons, segregating order flow among different trading desks, or other determinations that are specific to that Participant. A market participant may utilize multiple ports in some cases to send multiple orders through different ports to avoid any latency or queuing of orders. The Exchange notes that to the extent that different OTTO Ports are used to send multiple orders as compared to sending multiple orders through one OTTO Port the difference from a latency standpoint would be in nanoseconds.

Participants may use varying number of OTTO ports based on their business needs.

Other Amendments

In connection with offering OTTO, the Exchange proposes to amend other rules within Options 3. Each amendment is described below.

Options 3, Section 7

BX proposes to amend Options 3, Section 7, Types of Orders and Quote Protocols. Specifically, BX proposes to amend Options 3, Section 7 (b)(2) that describes the Immediate-or-Cancel" or "IOC" order. Today, Options 3, Section 7(b)(2)(B) notes that an IOC order may be entered through FIX or SQF, provided that an IOC order entered by a Market Maker through SQF is not subject to the Order Price Protection, the Market Order Spread Protection, or Size Limitation in Options 3, Section 15(a)(1), (a)(2), and (b)(2), respectively. The Exchange proposes to add "OTTO" to the list of protocols to note that an IOC order may also be entered through OTTO.

BX also proposes to amend the "DAY" order in Options 3, Section 7(b)(3) that currently provides that a Day order may be entered through FIX. With the addition of OTTO, a Day order may also be entered through OTTO.

BX also proposes to amend the "Good Til Cancelled" or "GTC" order which currently does not specify that a GTC order may be entered through FIX. GTC orders would only be able to be entered through FIX and not OTTO. The Exchange proposes to amend Options 3, Section 7(b)(4) to add a sentence to note that GTC orders may be entered through FIX.

Options 3, Section 8

BX proposes to amend Options 3, Section 8, Options Opening Process. BX proposes to amend Options 3, Section 8(l) that describes the Opening Process Cancel Timer. The Opening Process Cancel Timer represents a period of time since the underlying market has opened. If an option series has not opened before the conclusion of the Opening Process Cancel Timer, a Participant may elect to have orders returned by providing written notification to the Exchange. Today, these orders include all non-Good Til Cancelled Orders received over the FIX protocol. The Exchange proposes to add the OTTO protocol as well to the rule text language in that paragraph.

Options 3, Section 12

The Exchange proposes to amend the Options 3, Section 12, Crossing Orders.

⁴ FIX is an interface that allows Participants and their Sponsored Customers to connect, send, and receive messages related to orders and auction orders and responses to and from the Exchange. Features include the following: (1) execution messages; (2) order messages; and (3) risk protection triggers and cancel notifications. In addition, a BX Participant may elect to utilize FIX to send a message and PRISM Order, as defined within Options 3, Section 13, to all BX Participants that opt in to receive Requests for PRISM requesting that it submit the sender's PRISM Order with responder's Initiating Order, as defined within Options 3, Section 13, into the Price Improvement Auction ("PRISM") mechanism, pursuant to Options 3, Section 13 ("Request for PRISM"). See Options 3, Section 7(e)(1)(A).

⁵ General 2, Section 22 describes Sponsored Access arrangements.

⁶ The term "System" or "Trading System" means the automated system for order execution and trade reporting owned and operated by BX as the BX Options market. The BX Options market comprises: (A) an order execution service that enables Participants to automatically execute transactions in option series; and provides Participants with sufficient monitoring and updating capability to participate in an automated execution environment; (B) a trade reporting service that submits "locked-in" trades for clearing to a registered clearing agency for clearance and settlement; transmits last-sale reports of transactions automatically to the Options Price Reporting Authority for dissemination to the public and industry; and

Specifically, the Exchange proposes to amend Customer Crossing Orders in Options 3, Section 12(a) that currently provides Public Customer-to-Public Customer Cross Orders are automatically executed upon entry provided that the execution is at or between the best bid and offer on the Exchange and (i) is not at the same price as a Public Customer Order on the Exchange's limit order book and (ii) will not trade through the NBBO. Public Customer-to-Public Customer Cross Orders must be entered through FIX. The Exchange proposes to remove the sentence that provides that Public Customer-to-Public Customer Cross Orders must be entered through FIX because they will be able to be entered through both FIX and OTTO.

Options 3, Section 17

The Exchange proposes to amend the Kill Switch at Options 3, Section 17. The Kill Switch provides Participants with an optional risk management tool to promptly cancel and restrict orders. With the introduction of OTTO, the Exchange proposes to align its Kill Switch rule text with MRX's Kill Switch.⁸ The Exchange proposes to note in Options 3, Section 17(a) that BX Participants may initiate a message(s) to the System to promptly cancel and restrict their order activity on the Exchange, as is the case today, as described in section (a)(1). This amendment simply rewords the rule text without a substantive amendment to the rule text.

The Exchange proposes to renumber Options 3, Section 17(a)(i) and (ii) as (a)(1) and (2). Current Options 3, Section 17(a)(i) states, "If orders are cancelled by the BX Participant utilizing the Kill Switch, it will result in the cancellation of all orders requested for the Identifier(s). The BX Participant will be unable to enter additional orders for the affected Identifier(s) until re-entry has been enabled pursuant to section (a)(ii)." The Exchange proposes to instead provide, "A BX Participant may submit a request to the System through FIX or OTTO to cancel all existing orders and restrict entry of additional orders for the requested Identifier(s) on a user level on the Exchange." With the addition of OTTO, the Exchange notes that both FIX and OTTO orders may be cancelled. Further, today, BX Participants utilize an interface to send a message to the Exchange to initiate a Kill Switch.⁹ The Exchange notes that in

lieu of the interface, BX Participants will only be able to initiate a cancellation of their orders by sending a mass purge request through FIX or OTTO. This change will align the Kill Switch functionality to that of ISE, GEMX and MRX Options 3, Section 17 and will enable BX Participants to initiate the Kill Switch more seamlessly without the need to utilize a separate interface. When initiating a cancellation of their orders by sending a mass purge request through FIX or OTTO, Participants will be able to submit a Kill Switch request on a user level only. This is a change from the ability to cancel orders on either a user or group level¹⁰ with the interface. The Exchange proposes to amend Options 3, Section 17(a) to note this change by removing the words "or group" and the following sentence that applies to a group.¹¹

Finally, the Exchange proposes to amend proposed Options 3, Section 17(a)(2) to align to MRX's rule text by providing "Once a BX Participant initiates a Kill Switch pursuant to (a)(1) above . . ." in the first sentence. This amendment simply rewords the rule text without a substantive amendment to the rule text.

Options 3, Section 18

The Exchange proposes to amend Options 3, Section 18, Detection of Loss of Communication. The Exchange proposes to add OTTO to Options 3, Section 18 as OTTO would also be subject to this rule. Today, when the SQF Port or the FIX Port detects the loss of communication with a Participant's Client Application because the Exchange's server does not receive a Heartbeat message for a certain time period, the Exchange will automatically logoff the Participant's affected Client Application and automatically cancel all of the Participant's open quotes through SQF and open orders through FIX. Quotes and orders are cancelled across all Client Applications that are associated with the same BX Options Market Maker ID and underlying issues.

At this time, the Exchange proposes to permit orders entered through OTTO to be cancelled similar to FIX orders when the Exchange's server does not receive a Heartbeat message for a certain time period. The Exchange is proposing to

amend Options 3, Section 18 to also rearrange the rule text to add the word "Definitions" next to "a" and move the rule text in current "a" to "b" and re-letter the other paragraphs accordingly. Also, the Exchange proposes to define "Session of Connectivity" for purposes of this rule to mean each time the Participant connects to the Exchange's System. Further, each new connection, intra-day or otherwise, is a new Session of Connectivity. The Exchange proposes to use the new definition throughout Options 3, Section 18.

Similar to FIX, when the OTTO Port detects the loss of communication with a Participant's Client Application because the Exchange's server does not receive a Heartbeat message for a certain time period, the Exchange will automatically logoff the Participant's affected Client Application and automatically cancel all of the Participant's open orders through OTTO. Orders would be cancelled across all Client Applications that are associated with the same BX Options Market Maker ID and underlying issues. The Exchange proposes to update Options 3, Section 18 to provide in proposed Options 3, Section 18(a)(3) that the OTTO Port is the Exchange's proprietary System component through which Participants communicate their orders from the Client Application. Further, the Exchange would note in proposed Options 3, Section 18(c) that when the OTTO Port detects the loss of communication with a Participant's Client Application because the Exchange's server does not receive a Heartbeat message for a certain time period ("nn" seconds), the Exchange will automatically logoff the Participant's affected Client Application and if the Participant has elected to have its orders cancelled pursuant to proposed Section 18(f), automatically cancel all orders. Proposed Options 3, Section 18(f) would provide that the default period of "nn" seconds for OTTO Ports would be fifteen (15) seconds for the disconnect and, if elected, the removal of orders. A Participant may determine another time period of "nn" seconds of no technical connectivity, as required in proposed paragraph (c), to trigger the disconnect and, if so elected, the removal of orders and communicate that time to the Exchange. The period of "nn" seconds may be modified to a number between one hundred (100) milliseconds and 99,999 milliseconds for OTTO Ports prior to each Session of Connectivity to the Exchange. This feature may be disabled for the removal of orders;

⁸ See MRX Options 3, Section 17.

⁹ See Securities Exchange Act Release No. 76116 (October 8, 2015), 80 FR 62147 (October 15, 2015) (SR-BX-2015-050) (Order Approving Proposed Rule Change To Adopt a Kill Switch).

¹⁰ A permissible group could include all badges associated with a Market Maker. Today, a Participant is able to set up these groups in the interface to include all or some of the Identifiers associated with the Participant firm so that a GUI Kill Switch request could apply to this pre-defined group.

¹¹ The Exchange proposes to remove this sentence, "Permissible groups must reside within a single broker-dealer" as the group option would no longer exist.

however, the Participant will be disconnected.

Proposed Options 3, Section 18(f)(1) would provide that if the Participant changes the default number of “nn” seconds, that new setting shall be in effect throughout the current Session of Connectivity and will then default back to fifteen seconds. The Participant may change the default setting prior to each Session of Connectivity. Finally, as proposed in Options 3, Section 18(f)(2), if the time period is communicated to the Exchange by calling Exchange operations, the number of “nn” seconds selected by the Participant will persist for each subsequent Session of Connectivity until the Participant either contacts Exchange operations by phone and changes the setting or the Participant selects another time period through the Client Application prior to the next Session of Connectivity. The trigger for OTTO Ports is event and Client Application specific. The automatic cancellation of the BX Options Market Maker’s open orders for OTTO Ports entered into the respective OTTO Ports via a particular Client Application will neither impact nor determine the treatment of orders of the same or other Participants entered into the OTTO Ports via a separate and distinct Client Application. The proposed amendments for OTTO mirror the manner in which FIX Ports are treated when the Exchange’s server does not receive a Heartbeat message for a certain time period for a FIX Port.¹²

Pricing

BX proposes to amend its Pricing Schedule at Options 7, Section 3, BX Options Market—Ports and other Services, to adopt a port fee for the new OTTO protocol of \$650 per port, per month, per account number. OTTO would be an additional order entry protocol for BX Participants in addition to FIX, which is currently utilized by BX Participants to enter orders into BX. The Exchange currently assesses a FIX Port Fee of \$650 per port, per month, per account number.¹³ The Exchange will provide each Participant the first FIX Port at no cost to submit orders into BX. BX Participants utilizing the first FIX Port offered at no cost do not need to purchase an OTTO Port, which is optional.

The Exchange also proposes to add OTTO to the list of ports that are capped at \$7,500 on BX. Today, the maximum

monthly fees in the aggregate for FIX Port, CTI Port, FIX DROP Port, BX Depth Port and BX TOP Port Fees on BX is \$7,500.¹⁴ These ports are available to all BX Participants. To the extent that a Participant expended more than \$7,500 for FIX or OTTO Ports in a month, BX would not charge a Participant for additional FIX or OTTO Ports, respectively, beyond the cap.

Implementation

The Exchange will implement this rule change on or before December 20, 2025. The Exchange will announce the operative date to Participants in an Options Trader Alert.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹⁵ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹⁶ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

OTTO Protocol

The Exchange’s proposal to adopt OTTO is consistent with the Act because OTTO would provide BX Participants with an alternative protocol to submit orders to the Exchange. As proposed, BX would offer the first FIX Port at no cost to submit orders into BX, which would remove impediments to and perfect the mechanism of a free and open market. While BX Participants may elect to obtain multiple ports to organize their business,¹⁷ only one order port is necessary for a Participant to enter orders on BX. A BX Participant may send all orders, proprietary and agency, through one port to BX without incurring any cost with this proposal. In the alternative, BX Participants may elect to obtain multiple ports to organize their business.¹⁸

With the addition of OTTO, a BX Participant may elect to enter their orders through FIX, OTTO, or both protocols, although both protocols are not necessary. Each BX Participant

would receive one FIX Port at no cost, thereby promoting just and equitable principles of trade. The Exchange notes that Participants may prefer one order protocol as compared to another order protocol, for example, the ability to route an order may cause a Participant to utilize FIX and a Participant that desires to execute an order locally may utilize OTTO. Also, the OTTO Port offers lower latency as compared to the FIX Port, which may be attractive to Participants depending on their trading behavior. With this proposal, BX Participant may organize their business as they chose with the ability to send orders to BX at no cost. The proposed new OTTO protocol is identical to the OTTO protocol offered today on ISE, GEMX, and MRX.

Other Amendments

In connection with offering OTTO, the Exchange proposes to amend other rules within Options 3 to make clear where the FIX and OTTO protocols may be utilized. IOC Orders may be entered through FIX, OTTO or SQF. A Day order may be entered through FIX or OTTO. A GTC order may only be entered through FIX. A Public Customer-to-Public Customer Cross Order may be entered through FIX or OTTO. Other processes such the Opening Cancel Timer would impact FIX and OTTO equally.

The Exchange’s proposal to amend the Kill Switch at Options 3, Section 17 to align its rule text in proposed Options 3, Section 17(a) and (a)(2) with MRX’s Options 3, Section 17 is consistent with the Act because it does not substantively amend the functionality beyond removing the group level cancel capability. The Exchange’s proposal to amend proposed Options 3, Section 17(a)(2) to specify that FIX and OTTO orders may be cancelled is consistent with the Act as it will make clear that all orders entered on BX may be purged through the Kill Switch. Finally, allowing BX Participants to send a mass purge request through FIX or OTTO, in lieu of an interface, is consistent with Act and the protection of investors and the general public because it will enable BX Participants to initiate the Kill Switch more seamlessly without the need to utilize a separate interface. Further, utilizing the order protocols directly, in lieu of the interface, will align the Kill Switch functionality to that of ISE, GEMX and MRX. When initiating a cancellation of their orders by sending a mass purge request through FIX or OTTO, Participants will be able to submit a Kill Switch request on a user level only because the purge

¹² The Exchange proposes to update internal cross-references to accommodate relocated text.

¹³ The term “account number” means a number assigned to a Participant. Participants may have more than one account number. See Options 1, Section 1(a)(2). Account numbers are free on BX.

¹⁴ See BX Options 7, Section 3(i).

¹⁵ 15 U.S.C. 78f(b).

¹⁶ 15 U.S.C. 78f(b)(5).

¹⁷ For example, a Participant may desire to utilize multiple FIX or OTTO Ports for accounting purposes, to measure performance, for regulatory reasons or other determinations that are specific to that Participant.

¹⁸ For example, a Participant may desire to utilize multiple FIX or OTTO Ports for accounting purposes, to measure performance, for regulatory reasons or other determinations that are specific to that Participant.

will be specific to a FIX or OTTO user for these ports.

Finally, the Detection of Loss of Communication would apply equally to FIX and OTTO. The Exchange believes that its proposal is consistent with the Act and protects investors as the Exchange is making clear what types of order types and other mechanisms may utilize OTTO. Today, BX Participants utilize FIX to enter their orders. Despite the fact that OTTO would not be available for the GTC Time-In-Force modifier, the Exchange notes that one FIX Port is being provided to Participants at no cost. Today, FIX is the only manner in which to enter orders into BX.

Pricing

Proposed Port Fees Are Reasonable, Equitable and Not Unfairly Discriminatory

The Exchange believes that its proposal furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,¹⁹ in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. This belief is based on comparability: the proposed fees are comparable to,

and in some cases less than, those of similarly situated exchanges.

The proposed fees for BX OTTO are nearly identical to fees on MRX²⁰ and GEMX²¹ for OTTO, an identical protocol. Additionally, the proposed fees for BX OTTO are comparable to those of its closest competitors, Cboe C2 Exchange, Inc. ("C2"), MEMX LLC ("MEMX"),²² MIAX Emerald, LLC ("Emerald")²³ and Cboe EDGX Exchange, Inc.'s ("BatsEDGX")²⁴ based on market share. Below is a chart comparing BX to affiliated Nasdaq exchanges that have an identical OTTO Port.

Exchange	Market share (%)	OTTO	First free FIX port	Cap
BX	2	\$650 per port, per month, per account number.	yes	OTTO Port subject to monthly cap of \$7,500.
MRX	2.5	\$650 per port, per month, per account number.	yes	OTTO Port currently subject to monthly cap of \$7,500.
GEMX	2.4	\$650 per port, per month, per account number.	no	OTTO Port currently subject to monthly cap of \$7,500.

Below is a chart comparing BX to unaffiliated exchanges with comparable logical ports.

Exchange	Market share (%)	Proprietary port	First free port	Cap
BX	2	\$650 per port, per month, per account number.	yes	OTTO Port subject to monthly cap of \$7,500.
C2	2.8	BOE Port fee of \$650 per port	no	no.
MEMX	2.3	MEMO SBE Port fee of \$450 per port ..	no	no.
Emerald	3.6	Emerald does not offer a proprietary port similar to OTTO.	no	no.
BatsEDGX	3.6	BOE Port fee of \$750 per port, per month.	no	no.

The Exchange's analysis utilizes the below graph representing the market

share²⁵ for each of the eighteen options markets based on total options contracts

traded in 2024 through October 28, 2024.

¹⁹ See 15 U.S.C. 78f(b)(4) and (5).

²⁰ MRX offers one free FIX Port to its Members and assesses the same OTTO Port fee of \$650 per port, per month, per account number. MRX also offers a free FIX Disaster Recovery Port. Today, BX does not assess Disaster Recovery Port fees. Finally, today, MRX offers a \$7,500 monthly cap for OTTO Ports, CTI Ports, FIX Ports, FIX Drop Ports and all Disaster Recovery Ports. BX's proposed monthly cap is \$7,500 and includes the same ports as MRX, except that BX also includes two data ports in addition to the other ports, BX Depth Ports and BX Top Ports. BX Depth Ports and BX Top Ports are assessed fees of \$650 per port, per month. Therefore, BX's proposed cap can also be obtained

utilizing BX Depth Port and BX Top Port in addition to the same ports that MRX aggregates for purposes of the monthly cap.

²¹ GEMX does not offer the first FIX Port for free and assesses the same OTTO Port fee of \$650 per port, per month, per account number. Also, GEMX caps OTTO Ports, CTI Ports, FIX Ports, FIX Drop Ports and all Disaster Recovery Ports at \$7,500 a month the same as the proposed fee for BX.

²² MEMX assesses \$450 per port for an order entry port.

²³ Emerald assesses \$550 for the first FIX Port, \$350 for 2 through 5 FIX Ports and \$150 for over 5 FIX Ports.

²⁴ BatsEDGX assesses \$750 per port, per month for a Logical Port.

²⁵ Market share is the percentage of volume on a particular exchange relative to the total volume across all exchanges, and indicates the amount of order flow directed to that exchange. High levels of market share enhance the value of trading and ports. Total contracts include both multi-list options and proprietary options products. Proprietary options products are products with intellectual property rights that are not multi-listed. BX does not list proprietary products.

US Options Market Share

Data using total options contracts traded from start of 2024 - October 28, 2024

Source: OCC, Nasdaq Economic Research

MRX

MRX has market share of 2.5% which is comparable to BX's market share of 2.0%. MRX offers one free FIX Port to its Members and assesses the same OTTO Port fee of \$650 per port, per month, per account number. MRX also offers a free FIX Disaster Recovery Port. Today, BX does not assess Disaster Recovery Port fees. Finally, today, MRX offers a \$7,500 monthly cap for OTTO Ports, CTI Ports, FIX Ports, FIX Drop Ports and all Disaster Recovery Ports. BX's proposed monthly cap is \$7,500 and includes the same ports as MRX, except that BX also includes two data ports in addition to the other ports, BX Depth Ports and BX Top Ports. BX Depth Ports and BX Top Ports are assessed fees of \$650 per port, per month. Therefore, BX's proposed cap can also be obtained utilizing BX Depth Port and BX Top Port in addition to the same ports that MRX aggregates for purposes of the monthly cap. The proposed fees are nearly identical to MRX's OTTO fees.

GEMX

GEMX has market share of 2.4% which is comparable to BX's market share of 2.0%. GEMX does not offer the first FIX Port for free and assesses the same OTTO Port fee of \$650 per port, per month, per account number. Also, GEMX caps OTTO Ports, CTI Ports, FIX Ports, FIX Drop Ports and all Disaster Recovery Ports at \$7,500 a month the same as the proposed fee for BX. The

proposed fees are nearly identical to GEMX's fees.

C2

C2 has market share of 2.8% which is comparable to BX's market share of 2.0%. C2 assesses \$650 per port for its Binary Order Entry ("BOE") Logical Port, a Cboe proprietary order entry protocol.²⁶ BOE provide users the ability to enter order/quotes. Unlike BOE, OTTO is only for order submission and is similarly a proprietary protocol. While OTTO is subject to a cap, BOE's logical port fee is applicable when used to enter up to 20,000 orders per trading day per logical port as measured on average in a single month. Each incremental usage of up to 20,000 per day per logical port will incur an additional logical port fee of \$650 per month. Incremental usage will be determined on a monthly basis based on the average orders per day entered in a single month across all of a market participant's subscribed BOE Logical Ports. OTTO does not have a similar limitation on its port for number of orders which would require additional ports if the orders per day were exceeded. With its proposal, BX is offering the first FIX at no cost, while C2 does not offer any ports at no cost. The proposed fees are similar to C2's fees.

²⁶ https://cdn.cboe.com/resources/membership/US_Options_BOE_Specification.pdf.

MEMX

MEMX has market share of 2.3% which is comparable to BX's market share of 2.0%. MEMX assesses \$450 per port for an order entry port. MEMO SBE, a binary, proprietary protocol used for order submission on MEMX Options,²⁷ would be similar to OTTO. MEMX does not cap its fees and also does not offer any ports at no cost. The proposed fees are higher than MEMX's fees. MEMX is a new options market that only recently began trading as compared to BX which began trading in 2012. Typically, new options entrants have no port fees²⁸ or lower port fees.

Emerald

Emerald has market share of 3.6% which is comparable to BX's market share of 2.0%. Emerald assesses \$550 for the first FIX Port, \$350 for 2 through 5 FIX Ports and \$150 for over 5 FIX Ports. FIX is a universal protocol while BX OTTO is a proprietary protocol. Emerald offers a FIX Port but not a similar proprietary logical port.²⁹ Emerald does not cap its fees and does not offer a FIX Port at no cost. The proposed fees are similar to Emerald's FIX fees for the first port and higher for subsequent Emerald FIX ports, however

²⁷ See MEMO SBE V1.12 specifications. Specifications must be downloaded from MEMX's website to be viewed.

²⁸ MRX had no port fees for the first 6 years of trading.

²⁹ https://www.miaxglobal.com/miax_emerald_user_manual.pdf.

Emerald does not offer any FIX ports at no cost.

BatsEDGX

BatsEDGX has market share of 3.6% which is comparable to BX's market share of 2.0%. BatsEDGX assesses \$750 per port, per month for its Binary Order Entry ("BOE") Logical Port, a Cboe proprietary order entry protocol.³⁰ BOE provide users the ability to enter order/quotes. Unlike BOE, OTTO is only for order submission and is similarly a proprietary protocol. BatsEDGX does not cap its fees and also does not offer any ports at no cost. The proposed fees are lower than BatsEDGX's fees.

In summary, (i) the proposed OTTO Port fees are (i) substantially similar to GEMX and MRX; (ii) comparable to C2; (iii) comparable, but less than BatsEDGX; and (iv) comparable, but higher than MEMX. Emerald offers a FIX Port but not a similar proprietary logical port.

The Proposal is equitable as the proposed fees would apply to all BX Participants in a uniform manner. Each BX Participant would be entitled to the first FIX Port at no cost. Also, the proposed BX OTTO fees would be assessed uniformly to each BX Participant that subscribes to OTTO. Finally, the proposed monthly cap would be applied uniformly to all BX Participants. The Proposal is not unfairly discriminatory. BX OTTO, a new protocol, would be an optional protocol available to all Participants on a non-discriminatory basis.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

OTTO Protocol

The OTTO protocol is a proprietary protocol of Nasdaq, Inc. The Exchange continues to innovate and modernize technology so that it may continue to compete among options markets. The ability to continue to innovate with technology and offer new products to market participants allows BX to remain competitive in the options space which currently has eighteen options markets and potential new entrants. The Exchange's proposal to adopt an OTTO Protocol does not impose an undue burden on intramarket competition. Today, all BX Participants utilize FIX to send orders to BX. The Exchange would

offer each BX Participant the first FIX Port at no cost with this proposal. With the addition of OTTO Ports, a BX Participant may elect to enter their orders through FIX, OTTO, or both protocols, although both protocols are not necessary. The Exchange's proposal to adopt an OTTO Protocol does not impose an undue burden on intermarket competition as other options exchanges offer multiple protocols today such as ISE, GEMX and MRX.

Other Amendments

The Exchange's proposal to amend other rules within Options 3 to make clear where the FIX and OTTO protocols may be utilized does not impose an undue burden on intramarket competition as these rules will apply in the same manner to all Participants. The Exchange's proposal to amend other rules within Options 3 to make clear where the FIX and OTTO protocols may be utilized does not impose an undue burden on intermarket competition as other options exchanges may elect to utilize their order entry protocols in different ways.

Pricing

Nothing in the proposal burdens inter-market competition (the competition among self-regulatory organizations) because approval of the Proposal does not impose any burden on the ability of other options exchanges to compete. BX OTTO fees are comparable to, and in some cases less than, those of other exchanges, as discussed above.

Nothing in the Proposal burdens intra-market competition (the competition among consumers of exchange data) because BX OTTO is available to any Participant at the same price and any Participant that elects to subscribe to OTTO may do so on a non-discriminatory basis.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section

19(b)(3)(A)(iii) of the Act³¹ and subparagraph (f)(6) of Rule 19b-4 thereunder.³²

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-BX-2024-048 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-BX-2024-048. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be

³¹ 15 U.S.C. 78s(b)(3)(A)(iii).

³² 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

³⁰ https://cdn.cboe.com/resources/membership/US_Options_BOE_Specification.pdf.

available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-BX-2024-048 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³³

Vanessa A. Countryman,
Secretary.

[FR Doc. 2024-28113 Filed 11-29-24; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101745; File No. SR-SAPPHIRE-2024-37]

Self-Regulatory Organizations; MIAX Sapphire, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities, To List and Trade Options on the Grayscale Bitcoin Trust, the Grayscale Bitcoin Mini Trust, and the Bitwise Bitcoin ETF

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 21, 2024, MIAX Sapphire, LLC ("Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Exchange Rule 402, Criteria for

Underlying Securities. The text of the proposed rule change is available on the Exchange's website at <https://www.miaxglobal.com/markets/us-options/miax-sapphire/rule-filings>, at the Exchange's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange³ proposes to amend Exchange Rule 402, Criteria for Underlying Securities, to allow the Exchange to list and trade options on the following exchange-traded products: the Grayscale Bitcoin Trust (BTC) (the "Grayscale Fund" or "GBTC"), the Grayscale Bitcoin Mini Trust BTC (the "Grayscale Mini Fund" or "BTC"), and the Bitwise Bitcoin ETF (the "Bitwise Fund" or "BITB" and, collectively, the "Bitcoin Funds" or "Funds").⁴ As noted

above, MIAX's rules governing position limits and exercise limits for options positions are incorporated by reference into the MIAX Sapphire Rulebook and are therefore MIAX Sapphire rules applicable to market participants on MIAX Sapphire. MIAX is filing a substantively similar proposal to list and trade options on the Bitcoin Funds. That filing includes proposed change to Exchange Rules 307 (position limits) and 309 (exercise limits), which changes will be incorporated by reference into the MIAX Sapphire Rulebook.

The Exchange notes that this is a competitive filing based on a similar proposal submitted by NYSE American LLC ("NYSE American"), which was approved by the Commission.⁵ The Commission also recently approved a rule proposal by Nasdaq ISE, LLC ("ISE") to allow the listing and trading of options on iShares Bitcoin Trust (or IBIT), which is a trust that holds bitcoin (referred to herein as the "ISE IBIT Approval Order").⁶ As discussed herein, the Exchange believes, like the recently-approved options on IBIT, options on the Bitcoin Funds would permit hedging, and allow for more liquidity, better price efficiency, and less volatility with respect to the underlying Funds. Further, permitting the listing of such options would enhance the transparency and efficiency of markets in these and correlated products.

Current Exchange Rule 402(i)(4) provides that securities deemed appropriate for options trading include shares or other securities ("Exchange Traded Fund Shares" or "ETFs") that represent certain types of interests,⁷

044; SR-CboeBZX-2023-072) ("Bitcoin ETP Order").

⁵ See Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR-NYSEAMER-2024-49) (Self-Regulatory Organizations; NYSE American LLC; Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds).

⁶ See Securities Exchange Act Release No. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR-ISE-2024-03) (Notice of Filing of Amendment Nos. 4 and 5 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1, 4, and 5, to Permit the Listing and Trading of Options on the iShares Bitcoin Trust ("IBIT") ("ISE IBIT Approval Order").

⁷ See Exchange Rule 402(i), which permits options trading on ETFs that: (1) represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that hold portfolios of securities and/or financial instruments ("Funds"), including, but not limited to, stock index futures contracts, options on futures, options on securities and indices, equity caps, collars and floors, swap agreements, forward contracts, repurchase

³³ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ The Exchange notes that its affiliate options exchanges, Miami International Securities Exchange, LLC ("MIAX") and MIAX PEARL, LLC ("MIAX Pearl"), plan to submit (or have already submitted) substantively identical proposals to list and trade options on the Bitcoin Funds. The Exchange notes that all the rules of Chapter III of MIAX, including Exchange Rules 307 and 309, are incorporated by reference to the MIAX Pearl and MIAX Sapphire Rulebooks. The Exchange also notes that all of the rules of Chapter III of MIAX, including Exchange Rules 307 and 309, and the rules of Chapter IV of MIAX, including Exchange Rule 402, are incorporated by reference into the Exchange's affiliate, MIAX Emerald, LLC ("MIAX Emerald").

⁴ On January 10, 2024, the Securities and Exchange Commission ("Commission") approved proposals by NYSE Arca, Inc., The Nasdaq Stock Market LLC, and Cboe BZX Exchange, Inc. to list and trade the shares of 11 bitcoin-based commodity-based trust shares and trust units, including the iShares Bitcoin Trust. See Securities Exchange Act Release No. 99306 (Jan. 10, 2024), 89 FR 3008 (Jan. 17, 2024) (order approving File Nos. SR-NYSEARCA-2021-90; SR-NYSEARCA-2023-44; SR-NYSEARCA-2023-58; SR-NASDAQ-2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX-2023-040; SR-CboeBZX-2023-042; SR-CboeBZX-2023-

including interests in certain specific trusts that hold financial instruments, money market instruments, or precious metals (which are deemed commodities).

The Bitcoin Funds are Bitcoin-backed commodity ETFs structured as trusts. Similar to any ETFs currently deemed appropriate for options trading under Exchange Rule 402(i), the investment objective of each Bitcoin Fund is for its shares to reflect the performance of Bitcoin (less the expenses of the trust's operations), offering investors an opportunity to gain exposure to Bitcoin without the complexities of Bitcoin delivery. As is the case for ETFs currently deemed appropriate for options trading, a Bitcoin Fund's shares represent units of fractional undivided beneficial interest in the trust, the assets of which consist principally of Bitcoin and are designed to track Bitcoin or the performance of the price of Bitcoin and offer access to the Bitcoin market.⁸ The Bitcoin Funds provide investors with cost-efficient alternatives that allow a level of participation in the Bitcoin market through the securities market. The primary substantive difference between Bitcoin Funds and ETFs currently deemed appropriate for options trading are that ETFs may hold

securities, certain financial instruments, and specified precious metals (which are deemed commodities), while Bitcoin Funds hold Bitcoin (which is also deemed a commodity).

The Exchange believes each Bitcoin Fund satisfies the Exchange's initial listing standards for ETFs on which the Exchange may list options.⁹ Specifically, each Bitcoin Fund satisfies the initial listing standards set forth in Exchange Rule 402(i)(5)(i), as is the case for other ETFs on which the Exchange lists options (including trusts that hold commodities). Exchange Rule 402(i)(5)(i) requires that the ETFs must either (1) meet the criteria and standards set forth in Exchange Rule 402(a) or 402(b),¹⁰ or (2) be available for creation or redemption each business day from or through the issuer in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue units in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting

of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus. Each Bitcoin Fund satisfies Exchange Rule 402(i)(5)(i)(B), as each is subject to this creation and redemption process.

While not required by the Rules for purposes of options listings, the Exchange believes each Bitcoin Fund satisfies the criteria and guidelines set forth in Exchange Rule 402. Pursuant to Exchange Rule 402, a security (which includes ETFs) on which options may be listed and traded on the Exchange must be duly registered (with the Commission) and be an NMS stock (as defined in Rule 600 of Regulation NMS under the Act, and be characterized by a substantial number of outstanding shares that are widely held and actively traded.¹¹ Each Bitcoin Fund is an NMS Stock as defined in Rule 600 of Regulation NMS under the Act.¹² The Exchange believes each Bitcoin Fund is characterized by a substantial number of outstanding shares that are widely held and actively traded.

Pursuant to the data presented in the NYSE American filing,¹³ as of August 30, 2024, the Bitcoin Funds had the following number of shares outstanding (and corresponding market capitalization):

Bitcoin fund	Shares outstanding	Market value (8/30/2024)
GBTC	284,570,100	\$13,443,091,524
BTC	366,950,100	1,930,157,526
BITB	68,690,000	2,221,640,670

As shown above, each Bitcoin Fund had significantly more than 7,000,000 shares outstanding (approximately 29 and 6.5 times that amount, respectively), which is the minimum

number of shares of a corporate stock that the Exchange generally requires to list options on that stock pursuant to Exchange Rule 402(b)(1). The Exchange believes this demonstrates that each

Bitcoin Fund is characterized by a substantial number of outstanding shares.

Further, according to the NYSE American filing,¹⁴ the below table

agreements and reverse repurchase agreements (the "Financial Instruments"), and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the "Money Market Instruments") comprising or otherwise based on or representing investments in broad-based indexes or portfolios of securities and/or Financial Instruments and Money Market Instruments (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities and/or Financial Instruments and Money Market Instruments); (2) represent interests in a trust or similar entity that holds a specified non-U.S. currency or currencies deposited with the trust which when aggregated in some specified minimum number may be surrendered to the trust or similar entity by the beneficial owner to receive the specified non-U.S. currency or currencies and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency or currencies, if any, declared and paid by the trust ("Currency Trust Shares"); (3) represent commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on

commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency ("Commodity Pool ETFs"); (4) are issued by the are issued by the SPDR® Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the ETFs Silver Trust, the Aberdeen Standard Physical Gold Trust, the ETFs Palladium Trust, the ETFs Platinum Trust, or the Sprott Physical Gold Trust; or (5) represent an interest in a registered investment company ("Investment Company") organized as an open-end management company or similar entity, that invests in a portfolio of securities selected by the Investment Company's investment adviser consistent with the Investment Company's investment objectives and policies, which is issued in a specified aggregate minimum number in return for a deposit of a specified portfolio of securities and/or a cash amount with a value equal to the next determined net asset value ("NAV"), and when aggregated in the same specified minimum number, may be redeemed at a holder's request, which holder will be paid a specified portfolio of securities and/or cash with a value equal to the next determined NAV ("Managed Fund Share");

provided that all of the conditions listed in subparagraphs (5)(i) and 5(ii) are met.

⁸ The trust may include minimal cash.

⁹ Subparagraphs (a) and (b) of Exchange Rule 402 provide for guidelines to be used by the Exchange when evaluating potential underlying securities for Exchange option transactions.

¹⁰ See Exchange Rule 402(a)–(b).

¹¹ The criteria and guidelines for a security to be considered widely held and actively traded are set forth in Exchange Rule 402(b), subject to exceptions.

¹² An "NMS stock" means any NMS security other than an option, and an "NMS security" means any security or class of securities for which transaction reports are collected, processed, and made available pursuant to an effective transaction reporting plan (or an effective national market system plan for reporting transaction in listed options). See 17 CFR 242.600(b)(64) (definition of "NMS security") and (65) (definition of "NMS stock").

¹³ See *supra* note 5.

¹⁴ See *supra* note 5.

contains information regarding the number of beneficial holders of the Bitcoin Funds as of August 14, 2024:

Bitcoin fund	Beneficial holders (8/14/24)
GBTC	464,364
BTC	13,403
BITB	75,437

As this table shows, each Bitcoin Fund has significantly more than 2,000 beneficial holders (approximately 232, 7, and 38 time more, respectively), which is the minimum number of holders the Exchange generally requires for corporate stock in order to list options on that stock pursuant to Exchange Rule 402(b)(2). Therefore, the Exchange believes the shares of each Bitcoin Fund are widely held.

In addition, the Exchange believes the shares of each Bitcoin Fund are actively traded. Further, according to the NYSE American filing,¹⁵ as of September 30, 2024, the total trading volume (by shares and notional) for these funds since they began trading¹⁶ and the average daily volume (“ADV”) over the 30-day period of September 1 through September 30, 2024, was as follows:¹⁷

Bitcoin fund	Trading volume (shares)	Trading volume (notional \$)	ADV (shares)
GBTC	1,803,567,700	93,472,544,497	3,266,138
BTC	335,492,930	1,792,866,521	6,838,546
BITB	434,815,840	14,433,361,384	1,949,835

As demonstrated above, even though these Bitcoin Funds have been trading for less than one year, the trading volume for each is substantially higher than 2,400,000 shares (between roughly 165 and 700 times that amount), which is the minimum 12-month volume the Exchange generally requires for a security in order to list options on that security as set forth in Exchange Rule 402(b). The Exchange believes this data demonstrates each Bitcoin Fund is characterized by a substantial number of outstanding shares that are actively traded.

In addition to satisfying the Exchange’s initial listing standards, options on the Bitcoin Funds will be subject to the Exchange’s continued listing standards as set forth in Exchange Rule 403(g).¹⁸ Pursuant to

Exchange Rule 403(g), the Exchange will not open for trading any additional series of option contracts covering a fund traded on the Exchange if such fund ceases to be an “NMS stock” as provided for Exchange Rule 402(b) or the fund is halted from trading on its primary market.¹⁹ Additionally, options on funds traded on the Exchange may be subject to the suspension of opening transactions as follows: (1) the fund no longer meets the terms of Exchange Rule 403(b); (2) following the initial twelve-month period beginning upon the commencement of trading of the fund, there are fewer than 50 record and/or beneficial holders of the fund for 30 or more consecutive trading days; (3) the value of the underlying commodity is no longer calculated or available; or (4) such other event occurs or condition

exists that in the opinion of the Exchange makes further dealing on the Exchange inadvisable.

Options on each Bitcoin Fund will be physically settled contracts with American-style exercise.²⁰ Consistent with Exchange Rule 404, which governs the opening of options series on a specific underlying security (including ETFs and ETPs), the Exchange will open at least one expiration month for options on each Bitcoin Fund²¹ at the commencement of trading on the Exchange and may also list series of options on Bitcoin Funds for trading on a weekly,²² monthly,²³ or quarterly²⁴ basis. The Exchange may also list long-term equity option series (“LEAPS”) that expire from twelve to thirty-nine months from the time they are listed.²⁵

¹⁵ See *supra* note 5.

¹⁶ As noted by NYSE American, GBTC and BITB began trading on January 11th and BTC began trading on July 31st. Thus, the measurement period for the trading volume (shares/notional) is January 11 through September 20, 2024, for GBTC and BITB (*i.e.*, nine months) and July 31 through September 20, 2024, for BTC (*i.e.*, two months). See *supra* note 5.

¹⁷ See FactSet, 9/30/2024, available at <https://www.factset.com/data-attribution>.

¹⁸ The Exchange proposes to amend Exchange Rule 402(i)(4) to include the Bitcoin Funds in the list of ETPs deemed “Exchange-Traded Fund Shares”—of ETFs—for purposes of the continued listing standards set forth in Exchange Rule 403(g). See proposed Exchange Rule 402(i)(4). For avoidance of doubt, the Exchange refers “funds” rather than “ETFs” to make clear that the Bitcoin Funds are subject to these continued listing standards.

¹⁹ See Exchange Rule 403(g).

²⁰ See Exchange Rule 401 (Rights and Obligations of Holders and Writers), which provides that the

rights and obligations of holders and writers of option contracts of any class of options dealt in on the Exchange shall be as set forth in the Rules of the Options Clearing Corporation (“OCC”). See also OCC Rules, Chapter VIII, which governs exercise and assignment, and Chapter IX, which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts. OCC Rules can be located at: <https://www.theocc.com/getmedia/9d3854cd-b782-450f-bcf7-33169b0576ce/occrules.pdf>.

²¹ See Exchange Rule 404. The monthly expirations are subject to certain listing criteria for underlying securities described within Exchange Rule 402. Monthly listings expire the third Friday of the month. The term “expiration date” (unless separately defined elsewhere in the OCC By-Laws), when used in respect of an option contract (subject to certain exceptions), means the third Friday of the expiration month of such option contract, or if such Friday is a day on which the exchange on which such option is listed is not open for business, the preceding day on which such exchange is open for business. See OCC By-Laws Article I, Section 1.

Pursuant to Exchange Rule 404(c), additional series of options of the same class may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying stock moves more than five strike prices from the initial exercise price or prices. Pursuant to Exchange Rule 404(e), new series of options on an individual stock may be added until the beginning of the month in which the options contract will expire. Due to unusual market conditions, the Exchange, in its discretion, may add a new series of options on an individual stock until the close of trading on the business day prior to expiration.

²² See Exchange Rule 404, Interpretation and Policy .02.

²³ See Exchange Rule 404, Interpretation and Policy .13.

²⁴ See Exchange Rule 404, Interpretation and Policy .03.

²⁵ See Exchange Rule 406.

Pursuant to Exchange Rule 404(g), which governs strike prices of series of options on ETFs, the interval between strike prices of series of options on Bitcoin Funds will be \$1 or greater when the strike price is \$200 or less and \$5 or greater where the strike price is over \$200.²⁶ Additionally, the Exchange may list series of options pursuant to the \$1 Strike Price Interval Program,²⁷ the \$0.50 Strike Program,²⁸ and the \$2.50 Strike Price Program.²⁹ Pursuant to Exchange Rule 510, where the price of a series of a Bitcoin Fund option is less than \$3.00, the minimum increment will be \$0.05, and where the price is \$3.00 or higher, the minimum increment will be \$0.10.³⁰ Any and all new series of Bitcoin Fund options that the Exchange lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Exchange Rules 404 and 510, as applicable. Further, the Exchange notes that MIAX Chapter XV Rules (Margin), which governs margin requirements applicable to the trading of all options on the Exchange as that chapter of rules is incorporated by reference into the MIAX Sapphire Rulebook, including options on ETFs and ETPs, will also apply to the trading of Bitcoin Fund options.

Position and Exercise Limits

As mentioned above, the rules for position and exercise limits for options, including options on Bitcoin Funds, are determined pursuant to MIAX Rules 307 and 309, respectively, as incorporated by reference into the MIAX Sapphire Rulebook. Position and exercise limits for options vary according to the number of outstanding shares and the trading volumes of the underlying security over the past six months, where the largest in capitalization and the most frequently traded funds have an option position and exercise limit of 250,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the

same side of the market; and smaller capitalization funds have position and exercise limits of 200,000, 75,000, 50,000 or 25,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market.³¹

Position limits are designed to limit the number of options contracts traded on the Exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. The purpose of position limits, which are set forth in MIAX Rule 307, is to address potential manipulative schemes and adverse market impacts surrounding the use of options, such as disrupting the market in the security underlying the options. As such, position limits must balance concerns regarding mitigating potential manipulation and the cost of inhibiting potential hedging activity that investors may use for legitimate economic purposes. To achieve this balance, the Exchange proposes to set the position and exercise limits for the options on the Bitcoin Funds at 25,000 contracts, a limit which has already been approved for IBIT at a competing exchange, an ETP that (like the Bitcoin Funds) holds bitcoin.³² Capping the position limit at 25,000 contracts, the lowest limit available in options, would address concerns related to manipulation and protection of investors as this number is conservative for the Bitcoin Funds and

therefore appropriate given their liquidity. While the Exchange believes that the proposed 25,000-contract position limit is conservative for options on the Bitcoin Funds, it nonetheless believes that, for the reasons set forth below, evidence exists to support a much higher position limit.³³

As shown in the table below, provided in the NYSE American filing,³⁴ GBTC, BITB and BTC would easily qualify for the 250,000-contract position limit available to other ETFs and ETPs pursuant to the criterion in MIAX Rule 307, which requires that, for the most recent six-month period, trading volume for the underlying security be at least 100,000,000 shares.³⁵ As noted in the NYSE American filing, BTC began trading on July 31, 2024, and therefore had only two months of trading data available at the time of the NYSE American filing, as shown below.³⁶

Bitcoin fund	Total volume (9/30/2024)
GBTC	723,758,100 (6-months).
BTC	335,492,930 (2-months).
BITB	263,965,870 (6-months).

Thus, based on the most-recent trading volume, each Bitcoin Fund exceeded the requisite minimum of 100,000,000 shares necessary to qualify for the 250,000-contract position and exercise limits. By comparison, other options symbols with six-month trading volume less than GBTC, BITB, and BTC are eligible for position and exercise limits of at least 250,000.³⁷

³³ The Exchange may file a subsequent rule change to amend the position and exercise limit for options on any or all the Bitcoin Funds based on additional data regarding trading activity, to continue to balance any concerns regarding manipulation. A higher position limit would allow institutional investors to utilize options on the Bitcoin Funds for prudent risk management purposes.

³⁴ See *supra* note 5.

³⁵ Per MIAX Rule 307, to qualify for the 250,000-contract position limit for options, the underlying security must (i) have trading volume of at least 100,000,000 shares during the most recent six-month trading period; or (ii) have trading volume of at least 75,000,000 shares during the most recent six-month trading period and have at least 300,000,000 shares currently outstanding.

³⁶ See *supra* note 5. See FactSet, 9/30/2024, <https://www.factset.com/data-attribution>. For avoidance of doubt, the Exchange notes that this chart depicts the most recent six months (at the time the NYSE American filing was filed) of trading data by shares for GBTC and BITB whereas the earlier chart (that depicts volume by notional and shares) covered the first nine months of trading. For BTC, both charts depict the same two-month trading volume by shares.

³⁷ See <https://www.theocc.com/Market-Data/Market-Data-Reports/Series-and-Trading-Delta/Series-Search> (including the following symbols that

²⁶ The Exchange notes that for options listed pursuant to the Short Term Option Series Program, the Monthly Options Series Program, and the Quarterly Options Series Program, Exchange Rules 404, Interpretation and Policies .02, .03, and .13, specifically set forth intervals between strike prices on Short Term Option Series, Quarterly Options Series, and Monthly Options Series, respectively.

²⁷ See Exchange Rule 404, Interpretation and Policy .01.

²⁸ See Exchange Rule 404, Interpretation and Policy .04.

²⁹ See Exchange Rule 404(f).

³⁰ See Exchange Rule 510(a). If options on a Bitcoin Fund are eligible to participate in the Penny Interval Program, the minimum increment of \$0.01 below \$3.00 and \$0.50 above \$3.00 would apply. See Exchange Rule 510(a)(3). See also Exchange Rule 510(c) (which describes the requirements for the Penny Interval Program).

³¹ See MIAX Rule 307. For an option to be eligible for the 50,000-contract limit, the security underlying the option must have most recent six-month trading volume of at least 20,000,000 shares, or most recent six-month trading volume of at least 15,000,000 shares and at least 40,000,000 shares currently outstanding. For an option to be eligible for the 75,000-contract limit, the underlying security must have most recent six-month trading volume of at least 40,000,000 shares, or most recent six-month trading volume of at least 30,000,000 shares and at least 120,000,000 shares currently outstanding. For an option to be eligible for the 200,000-contract limit, the underlying security must have most recent six-month trading volume of at least 80,000,000 shares, or most recent six-month trading volume of at least 60,000,000 shares and at least 240,000,000 shares currently outstanding. For an option to be eligible for the 250,000-contract limit, the security underlying the option must have most recent six-month trading volume of at least 100,000,000 shares, or most recent six-month trading volume of at least 75,000,000 shares and at least 300,000,000 shares currently outstanding. The 25,000-contract limit applies to options on underlying securities that do not qualify for a higher contract limit. See MIAX Rule 307. In addition, Interpretation and Policy .01 to MIAX Rule 307 establishes higher position limits for options on certain ETFs.

³² See Securities Exchange Act Release No. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR-ISE-2024-03) (Notice of Filing of Amendment Nos. 4 and 5 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1, 4, and 5, to Permit the Listing and Trading of Options on the iShares Bitcoin Trust ("IBIT") ("ISE IBIT Approval Order").

With respect to the outstanding shares of each Bitcoin Fund, if a market participant held the maximum number of contracts possible pursuant to the proposed position and exercise limits (25,000 contracts), the equivalent shares represented by the proposed position/exercise limit (2,500,000 shares) would represent the following approximate percentage of current outstanding shares, according to the data presented in the NYSE American filing:³⁸

Bitcoin Fund	Proposed position/ exercise limits in equivalent shares	Outstanding shares (8/30/24)	Percentage of outstanding shares
GBTC	2,500,000	284,570,100	0.9
BTC	2,500,000	366,950,100	0.7
BITB	2,500,000	68,690,000	3.6

As this table demonstrates, if a market participant held the maximum permissible options positions in one of the Bitcoin Fund options and exercised all of them at the same time, that market participant would control a small percentage of the outstanding shares of the underlying Bitcoin Fund. For example, as noted above, a position limit of 25,000 same side contracts effectively restricts a market participant from holding positions that could result in the receipt of no more than 2,500,000 shares of the applicable Bitcoin Fund (if that market participant exercised all its options). Based on data presented in the NYSE American filing regarding the number of shares outstanding for each Bitcoin Fund as of August 30, 2024, the table below sets forth the approximate number of market participants that could hold the maximum of 25,000 same side positions in each Bitcoin Fund that would equate to the number of shares outstanding of that Bitcoin Fund:³⁹

Bitcoin Fund	Shares outstanding	Number of market participants with 25,000 same side positions
GBTC	284,570,100	114
BTC	366,950,100	147
BITB	68,690,000	27

This means if 114 market participants had 25,000 same side positions in options on GBTC, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security under stress. Similarly, this means if 147 market participants had 25,000 same side positions in options on BTC, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security under stress. Finally, this means if 27 market participants had 25,000 same side positions in options on BITB, each of them would have to simultaneously exercise all of those options to create a scenario that may put the underlying security under stress.

The Exchange believes it is highly unlikely for this to occur; however, even if such event did occur, the Exchange would not expect any of the Bitcoin Fund to be under stress because such an event would merely induce the creation of more shares through the trust's creation and redemption process.

Further, given that the issuer of each Bitcoin Fund may create and redeem shares that represent an interest in Bitcoin, the Exchange believes it is relevant to compare the size of a position limit to the market capitalization of the Bitcoin market. As of August 30, 2024, the global supply of Bitcoin was 19,747,066, and the price of one Bitcoin was approximately \$59,108.23, which equates to a market

capitalization of approximately \$1.167 trillion.⁴⁰ Consider the proposed position and exercise limit of 25,000 option contracts for each Bitcoin Fund option. A position and exercise limit of 25,000 same side contracts effectively restricts a market participant from holding positions that could result in the receipt of no more than 2,500,000 shares of GBTC, BTC, or BITB, as applicable (if that market participant exercised all its options). The following table from the NYSE American filing shows the share price of each Bitcoin Fund on August 30, 2024, the value of 2,500,000 shares of the Bitcoin Fund at that price, and the approximate percentage of that value of the size of the Bitcoin market:⁴¹

Bitcoin Fund	Aug. 30th share price (\$)	Value of 2,500,000 shares of Bitcoin Funds (\$)	Percentage of Bitcoin market
GBTC	46.75	116,875,000	0.010
BTC	5.20	13,000,000	0.001
BITB	31.95	79,875,000	0.007

Therefore, if a market participant with the maximum 25,000 same side

contracts in options on GBTC, BTC, or BITB exercised all positions at one time,

such an event would have no practical impact on the Bitcoin market. As

have a position limit of 250,000: GLD, IAU, SLV, SIVR, SGOL).

³⁸ See *supra* note 5.

³⁹ See *supra* note 5.

⁴⁰ See <https://www.blockchain.com/explorer/charts/total-bitcoins>.

⁴¹ See *supra* note 5.

described in the NYSE American filing, the below chart shows the market

capitalization of each Bitcoin Fund relative to the market capitalization of

the entire bitcoin market, as of August 30, 2024.⁴²

	Bitcoin/shares outstanding	Market value (8/30/2024)	Percentage of Total bitcoin market
Total Bitcoin Market	\$19,747,066	\$1,167,214,096,788	100.00
GBTC	284,570,100	13,443,091,524	1.15
BTC	366,950,100	1,930,157,526	0.17
BITB	68,690,000	2,221,640,670	0.19

As shown above, the Bitcoin Funds collectively represent approximately 1.51% of the global supply of Bitcoin (19,747,066). Based on the \$46.75 price of a GBTC share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 1,264 GBTC shares. Another 24,967,146,455 GBTC shares could be created before the supply of Bitcoin was exhausted. As a result, 9,987 market participants would have to simultaneously exercise 25,000 same side positions in GBTC options to receive shares of the GBTC holding the entire global supply of Bitcoin. Similarly, based on the \$5.20 price of a BTC share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 11,367 BTC shares. Another 224,464,249,382 BTC shares could be created before the supply of Bitcoin was exhausted. As a result, 89,786 market participants would have to simultaneously exercise 25,000 same side positions in BTC options to receive shares of BTC holding the entire

global supply of Bitcoin. Similarly, based on the \$31.95 price of a BITB share on August 30, 2024, a market participant could have redeemed one Bitcoin for approximately 1,850 BITB shares. Another 36,532,522,591 BITB shares could be created before the supply of Bitcoin was exhausted. As a result, 14,613 market participants would have to simultaneously exercise 25,000 same side positions in BITB options to receive shares of BITB holding the entire global supply of Bitcoin. Unlike the Bitcoin Funds, the number of shares that corporations may issue is limited. However, like corporations, which authorize additional shares, repurchase shares, or split their shares, the Bitcoin Funds may create, redeem, or split shares in response to demand. While the supply of Bitcoin is limited to 21,000,000, it is believed that it will take more than 100 years to fully mine the remaining Bitcoin.⁴³ The supply of Bitcoin is larger than the available supply of most securities.⁴⁴ Given the

significant unlikelihood of any of these events ever occurring, the Exchange does not believe options on the Bitcoin Funds should be subject to position and exercise limits even lower than those proposed (which are already equal to the lowest available limit for equity options in the industry) to protect the supply of Bitcoin.

The Exchange also believes the proposed limits are appropriate given position limits for Bitcoin futures. For example, the Chicago Mercantile Exchange ("CME") imposes a position limit of 2,000 futures (for the initial spot month) on its Bitcoin futures contract.⁴⁵ On August 28, 2024, CME Aug 24 Bitcoin Futures settled at \$58,950. A position of 2,000 CME Bitcoin futures, therefore, would have a notional value of \$589,500,000. The following table shows the share price of each Bitcoin Fund on August 28, 2024, and the approximate number of option contracts that equates to that notional value:⁴⁶

Bitcoin Fund	Aug. 28th share price	Number of option contracts
GBTC	46.94	125,585
BTC	5.23	1,127,151
BITB	32.08	183,759

The approximate number of option contracts for each Bitcoin Fund that equate to the notional value of CME Bitcoin futures is significantly higher than the proposed limit of 25,000 options contract for each Bitcoin Fund option. The fact that many options ultimately expire out-of-the-money and thus are not exercised for shares of the underlying, while the delta of a Bitcoin Future is 1, further demonstrates how conservative the proposed limits of 25,000 options contracts are for the Bitcoin Fund options.

The Exchange notes, unlike options contracts, CME position limits are calculated on a net futures-equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an aggregation ratio(s).⁴⁷ Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month

position limits.⁴⁸ If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading but does not exceed the limits when evaluated using the previous day's delta factors, then the position

⁴² See *supra* note 5.

⁴³ See <https://www.blockchain.com/explorer/assets/btc> (citing 21 million as the "total supply" of bitcoin).

⁴⁴ The market capitalization of Bitcoin would rank in the top 10 among securities. See <https://>

companiesmarketcap.com/usa/largest-companies-in-the-usa-by-market-cap/.

⁴⁵ See CME Rulebook Chapter 350 (description of CME Bitcoin Futures) and Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices. Each CME Bitcoin futures contract is valued at five

Bitcoins as defined by the CME CF Bitcoin Reference Rate ("BRR"). See CME Rule 3500.1.

⁴⁶ See *supra* note 5.

⁴⁷ See CME Rulebook Chapter 5, Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices.

⁴⁸ *Id.*

shall not constitute a position limit violation. Considering CME's position limits on futures for Bitcoin, the Exchange believes that that the proposed same side position limits are more than appropriate for the Bitcoin Fund options.

The Exchange believes the available supply of Bitcoin is not relevant to the determination of position and exercise limits for options overlying the Bitcoin Funds.⁴⁹ Position and exercise limits are not a tool that should be used to address a potential limited supply of the underlying of an underlying. Position and exercise limits do not limit the total number of options that may be held, but rather they limit the number of positions a single customer may hold or exercise at one time.⁵⁰ "Since the inception of standardized options trading, the options exchanges have had rules imposing limits on the aggregate number of options contracts that a member or customer could hold or exercise."⁵¹ Position and exercise limit rules are intended "to prevent the establishment of options positions that can be used or might create incentives to manipulate or disrupt the underlying market so as to benefit the options position. In particular, position and exercise limits are designed to minimize the potential for mini-manipulations and for corners or squeezes of the underlying market. In addition, such limits serve to reduce the possibility for

disruption of the options market itself, especially in illiquid options classes."⁵²

The Exchange notes that a Registration Statement on Form S-1 was filed with the Commission for each Bitcoin Fund, each of which described the supply of Bitcoin as being limited to 21,000,000 (of which approximately 90% had already been mined), and that the limit would be reached around the year 2140.⁵³ Each Registration Statement permits an unlimited number of shares of the applicable Bitcoin Fund to be created. Further, the Commission approved proposed rule changes that permitted the listing and trading of shares of each Bitcoin Fund, which approval did not comment on the sufficient supply of Bitcoin or address whether there was a risk that permitting an unlimited number of shares for a Bitcoin Fund would impact the supply of Bitcoin.⁵⁴ Therefore, the Exchange believes the Commission has ample time and opportunity to consider whether the supply of Bitcoin was sufficient to permit the creation of unlimited Bitcoin Fund shares, and does not believe considering this supply with respect to the establishment of position and exercise limits is appropriate given its lack of relevance to the purpose of position and exercise limits. However, given the significant size of the Bitcoin supply, the proposed positions limits are more than sufficient to protect investors and the market.

Based on the foregoing, the Exchange believes the proposal to list options on the Bitcoin Funds with positions and exercise limits of 25,000 on the same side, the lowest position limit available in the options industry, is conservative and appropriate given the market capitalization, average daily volume, and high number of outstanding shares for each of the Bitcoin Funds. The proposed position and exercise limits reasonably and appropriately balance the liquidity provisioning in the market against the prevention of manipulation. The Exchange believes these proposed limits are effectively designed to prevent an individual customer or entity from establishing options positions that could be used to manipulate the market

of the underlying Bitcoin Funds as well as the Bitcoin market.⁵⁵

As described herein, options on the Bitcoin Funds will trade in the same manner as any other ETF or ETP options on the Exchange. The Exchange Rules that currently apply to the listing and trading of options on the Exchange, including, for example, Rules that govern listing criteria, expiration and exercise prices, minimum increments, margin requirements, customer accounts and trading halt procedures will apply to the listing and trading of Bitcoin Funds on the Exchange in the same manner as they apply to all other ETFs and ETPs that are listed and traded on the Exchange, including the precious metal-backed commodity ETPs already deemed appropriate for options trading on the Exchange pursuant to Exchange Rule 404. Further, as described above, Exchange Rules regarding position and exercise limits will likewise apply to options on the Bitcoin Funds except that, as proposed, the position and exercise limits will be set at 25,000 on the same side.

* * * * *

The Exchange notes that options on Bitcoin Funds would not be available for trading until The Options Clearing Corporation ("OCC") represents to the Exchange that it is fully able to clear and settle such options. The Exchange has also analyzed its capacity and represents that it and The Options Price Reporting Authority ("OPRA") have the necessary systems capacity to handle the additional traffic associated with the listing of options on Bitcoin Funds. The Exchange believes any additional traffic that would be generated from the trading of options on Bitcoin Funds would be manageable. The Exchange represents that Exchange Members⁵⁶ will not have a capacity issue as a result of this proposed rule change.

The Exchange represents that the same surveillance procedures⁵⁷ applicable to all other options currently listed and traded on the Exchange will apply to options on Bitcoin Funds, and that it has the necessary systems capacity to support the new option series. The Exchange's existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs and ETPs, such as (existing)

⁴⁹ The Exchange is unaware of any proposed rule change related to position and exercise limits for any equity option (including commodity ETF options) for which the Commission required consideration of whether the available supply of an underlying (whether it be a corporate stock or an ETF) or the contents of an ETF (commodity or otherwise) should be considered when an exchange proposed to establish those limits. See, e.g., Securities Exchange Act Release No. 57894 May 30, 2008), 73 FR 32061 (June 5, 2008) (SR-CBOE-2005-11) (approval order in which the Commission stated that the "listing and trading of Gold Trust Options will be subject to the exchanges' rules pertaining to position and exercise limits and margin"). The Exchange notes the position limits in Exchange Rule 307 are the same as when the Commission approved this filing. For reference, the current position and exercise limits for options on SPDR Gold Shares ETF ("GLD") and options on iShares Silver Trust ("SLV") are 250,000 contracts, or 10 times that proposed position and exercise limit for the Bitcoin Fund options.

⁵⁰ For example, suppose an option has a position limit of 25,000 option contracts and there are a total of 10 investors trading that option. If all 10 investors max out their positions, that would result in 250,000 option contracts outstanding at that time. However, suppose 10 more investors decide to begin trading that option and also max out their positions. This would result in 500,000 option contracts outstanding at that time. An increase in the number of investors could cause an increase in outstanding options even if position limits remain unchanged.

⁵¹ See Securities Exchange Act Release No. 39489 (December 24, 1997), 63 FR 276 (January 5, 1998) (SR-CBOE-1997-11).

⁵² *Id.*

⁵³ See, e.g., GBTC Form S-1 Registration Statement, at p. 17, <https://www.sec.gov/Archives/edgar/data/1588489/000119312517013693/d157414ds1.htm>; BTC Form S-1 Registration Statement, at p. 21, <https://www.sec.gov/Archives/edgar/data/2015034/000119312524065444/d785023ds1.htm>; and BITB Amendment No 2, to S-1, at p. 47, https://www.sec.gov/Archives/edgar/data/1763415/000199937123000735/bitwise-s1a_120423.htm ("Bitcoin Funds Reg. Stmts.").

⁵⁴ See Bitcoin ETP Approval Order.

⁵⁵ See Securities Exchange Act Release No. 39489 (December 24, 1997), 63 FR 276 (January 5, 1998) (SR-CBOE-1997-11).

⁵⁶ See Exchange Rule 100.

⁵⁷ The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (e.g., spoofing, marking the close, ping, phishing).

precious metal-commodity backed ETP options as well as the proposed options on Bitcoin Funds. The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of options on Bitcoin Funds in all trading sessions and to deter and detect violations of Exchange rules. The Exchange's staff will have access to the surveillance programs conducted by its affiliate exchanges, MIAX and MIAX Pearl, with respect to trading in the shares of the underlying trust for each Fund when conducting surveillances for market abuse or manipulation in the options on the Funds. Additionally, the Exchange is a member of the Intermarket Surveillance Group ("ISG") under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining surveillance data from MIAX and MIAX Pearl, the Exchange will be able to obtain information regarding trading in the shares of the underlying Bitcoin Funds from NYSE American and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority ("FINRA"). Pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillances.⁵⁸ Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Bitcoin Funds.

The underlying shares of spot bitcoin ETPs, including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot bitcoin-based exchange-traded products ("Bitcoin ETP Order"):

⁵⁸ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d-2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO. Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.⁵⁹

The Exchange states that, given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs]." ⁶⁰

In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Funds,⁶¹ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds.

Finally, quotation and last sale information for ETFs is available via the Consolidated Tape Association ("CTA") high speed line. Quotation and last sale information for such securities is also available from the exchange on which such securities are listed. Quotation and last sale information for options on Bitcoin Funds will be available via OPRA and major market data vendors.

The Exchange believes that offering options on Bitcoin Funds will benefit

investors by providing them with an additional, relatively lower cost investing tool to gain exposure to the price of Bitcoin and hedging vehicle to meet their investment needs in connection with Bitcoin-related products and positions. The Exchange expects investors will transact in options on Bitcoin Funds in the unregulated over-the-counter ("OTC") options market,⁶² but may prefer to trade such options in a listed environment to receive the benefits of trading listed options, including (1) enhanced efficiency in initiating and closing out position; (2) increased market transparency; and (3) heightened contra-party creditworthiness due to the role of OCC as issuer and guarantor of all listed options. The Exchange believes that listing Bitcoin Fund options may cause investors to bring this liquidity to the Exchange, would increase market transparency and enhance the process of price discovery conducted on the Exchange through increased order flow. The Exchange notes that the ETPs that hold precious metal commodities on which the Exchange may already list and trade options are trusts structured in substantially the same manner as Bitcoin Funds and essentially offer the same objectives and benefits to investors, just with respect to different assets. The Exchange notes that it has not identified any issues with the continued listing and trading of options on any ETFs or ETPs that hold commodities (*i.e.*, precious metals) that it currently lists and trades on the Exchange.

Finally, the Exchange notes that applicable Exchange rules will require that customers receive appropriate disclosure before trading options in Bitcoin Funds.⁶³ Further, brokers opening accounts and recommending options transactions must comply with relevant customer suitability standards.⁶⁴

2. Statutory Basis

The Exchange believes that its proposed rule change is consistent with Section 6(b) of the Act⁶⁵ in general and furthers the objectives of Section 6(b)(5)

⁵⁹ See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008, 3009 (January 17, 2024) (File Nos. ⁶² The Exchange understands from customers that investors have historically transacted in options on ETFs in the OTC options market if such options were not available for trading in a listed environment.

⁶³ See MIAX Rules 1307(b) and (e), which are incorporated by reference into the MIAX Sapphire Rulebook.

⁶⁴ See MIAX Rule 1309, which is incorporated by reference into the MIAX Sapphire Rulebook.

⁶⁵ 15 U.S.C. 78f(b).

of the Act⁶⁶ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanisms of a free and open market and a national market system, and, in general, to protect investors and the public interest.

In particular, the Exchange believes that the proposal to list and trade options on Bitcoin Funds will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because offering options on Bitcoin Funds will provide investors with an opportunity to realize the benefits of utilizing options on a Bitcoin Fund, including cost efficiencies and increased hedging strategies.

The Exchange believes that offering Bitcoin Fund options will benefit investors by providing them with a relatively lower-cost risk management tool, which will allow them to manage their positions and associated risk in their portfolios more easily in connection with exposure to the price of Bitcoin and with Bitcoin-related products and positions. Additionally, the Exchange's offering of Bitcoin Fund options will provide investors with the ability to transact in such options in a listed market environment as opposed to in the unregulated OTC options market, which would increase market transparency and enhance the process of price discovery conducted on the Exchange through increased order flow to the benefit of all investors. The Exchange also notes that it already lists options on other commodity-based ETPs,⁶⁷ which, as described above, are trusts structured in substantially the same manner as Bitcoin Funds and essentially offer the same objectives and benefits to investors, just with respect to a different commodity (*i.e.*, Bitcoin rather than precious metals) and for which the Exchange has not identified any issues with the continued listing and trading of commodity-backed ETP options it currently lists for trading.

The Exchange also believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, because it is consistent with current Exchange Rules previously filed with the Commission. Options on Bitcoin Funds satisfy the initial listing standards and continued listing standards currently in the Exchange Rules applicable to options on all ETFs and ETPs, including

ETPs that hold other commodities already deemed appropriate for options trading on the Exchange. Additionally, as demonstrated above and in the NYSE American filing,⁶⁸ each Bitcoin Fund is characterized by a substantial number of shares that are widely held and actively traded. Bitcoin Fund options will trade in the same manner as any other ETF or ETP options—the same Exchange Rules that currently govern the listing and trading of options, including permissible expirations, strike prices, minimum increments, and margin requirements, will govern the listing and trading of options on Bitcoin Funds in the same manner.

The proposed position and exercise limit for options on the Bitcoin Funds is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given the Bitcoin Funds' market capitalization, average daily volume, number of beneficial holders, and high number of outstanding shares.⁶⁹ The proposed position and exercise limits are consistent with the Act as they addresses concerns related to manipulation and protection of investors because the position and exercise limits are extremely conservative and more than appropriate given the Bitcoin Funds are actively traded.

The Exchange represents that it has the necessary systems capacity to support the new Bitcoin Fund options. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options, including Bitcoin Fund options. The Exchange's existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs and ETPs, such as (existing) precious metal-commodity backed ETP options as well as the proposed options on Bitcoin Funds. The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of options on Bitcoin Funds in all trading sessions

and to deter and detect violations of Exchange rules. Specifically, the Exchange's market surveillance staff will have access to the surveillances conducted by its affiliates, MIAX and MIAX Pearl, with respect to the Bitcoin Funds and would review activity in the underlying Funds when conducting surveillances for market abuse or manipulation in the options on the Trust. Additionally, the Exchange is a member of the ISG under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition, the Exchange has a Regulatory Services Agreement with the FINRA and, as noted herein, pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillances. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Bitcoin Funds.

The underlying shares of spot bitcoin ETPs, including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot bitcoin-based ETPs, "[e]ach Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.⁷⁰ The Exchange states that, given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the

⁶⁸ See *supra* note 5.

⁶⁹ The Exchange notes that IBIT—which has been approved for options trading—represents a larger percentage of the bitcoin market than all three Bitcoin Funds. See ISE IBIT Approval Order, *supra* note 6. As noted herein, the Bitcoin Funds collectively represent approximately 1.51% of the bitcoin market. By comparison, IBIT options have an approved position limit of 25,000 contracts per side, which represents 4% of total underlying spot BTC liquidity, and IBIT is the most liquid spot Bitcoin ETF. See *id.*

⁶⁶ 15 U.S.C. 78f(b)(5).

⁶⁷ See Exchange Rule 402(i)(4).

⁷⁰ See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008, 3009 (January 17, 2024) (File Nos. SR-NYSEArca-2021-90; SR-NYSEArca-2023-44; SR-NYSEArca-2023-58; SR-NASDAQ2023-016; SR-NASDAQ-2023-019; SR-CboeBZX-2023-028; SR-CboeBZX-2023-038; SR-CboeBZX2023-040; SR-CboeBZX-2023-042; SR-CboeBZX-2023-044; and SR-CboeBZX-2023-072) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units).

[Bitcoin ETPs].”⁷¹ In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Funds,⁷² the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on Bitcoin ETPs.

Finally, the Exchange notes that this proposal will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because applicable Exchange rules will require that customers receive appropriate disclosure before trading options in Bitcoin Funds⁷³ and will require that brokers opening accounts and recommending options transactions comply with relevant customer suitability standards.⁷⁴

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition: The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as Bitcoin Funds would need to satisfy the initial listing standards set forth in the Exchange Rules in the same manner as any other ETF before the Exchange could list options on them. Additionally, Bitcoin Fund options will be equally available to all market participants who wish to trade such

options. The Exchange Rules currently applicable to the listing and trading of options on ETFs on the Exchange will apply in the same manner to the listing and trading of all options on Bitcoin Funds. Also, and as stated above, the Exchange already lists options on other commodity-based ETPs.⁷⁵

Intermarket Competition: The Exchange does not believe that the proposal to list and trade options on Bitcoin Funds will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that the advent of Bitcoin Fund options trading on the Exchange may make the Exchange a more attractive marketplace to market participants at other exchanges, such market participants are free to elect to become market participants on the Exchange. As noted herein, this is a competitive filing as the Commission recently approved the listing and trading of options on the Bitcoin Funds,⁷⁶ as well as another ETP that, like the Bitcoin Funds, holds bitcoin.⁷⁷ Additionally, other options exchanges are free to amend their listing rules, as applicable, to permit them to list and trade options on Bitcoin Funds. The Exchange notes that listing and trading Bitcoin Fund options on the Exchange will subject such options to transparent exchange-based rules as well as price discovery and liquidity, as opposed to alternatively trading such options in the OTC market. The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition as it is designed to increase competition for order flow on the Exchange in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering Bitcoin Fund options for trading on the Exchange will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment needs in connection with Bitcoin prices and Bitcoin-related products and positions on a listed options exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act⁷⁸ and Rule 19b-4(f)(6) thereunder.⁷⁹ Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act⁸⁰ and subparagraph (f)(6) of Rule 19b-4 thereunder.⁸¹

A proposed rule change filed under Rule 19b-4(f)(6)⁸² under the Act does not normally become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),⁸³ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the Grayscale Bitcoin Trust, the Grayscale Bitcoin Mini Trust, and the Bitwise Bitcoin ETF.⁸⁴ The Exchange has provided information regarding the underlying Bitcoin Funds, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of

⁷³ See MIAx Rules 1307(b) and (e).

⁷⁴ See MIAx Rule 1309.

⁷⁵ See Exchange Rule 402(i).

⁷⁶ See *supra* note 5.

⁷⁷ See ISE IBIT Approval Order, *supra* note 6.

⁷⁸ 15 U.S.C. 78s(b)(3)(A)(iii).

⁷⁹ 17 CFR 240.19b-4(f)(6).

⁸⁰ 15 U.S.C. 78s(b)(3)(A)(iii).

⁸¹ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission waives this requirement.

⁸² 17 CFR 240.19b-4(f)(6).

⁸³ 17 CFR 240.19b-4(f)(6)(iii).

⁸⁴ See Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR–NYSEAMER–2024–49) (Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds).

the Bitcoin Funds. The proposal also establishes position and exercise limits for options on the Bitcoin Funds and provides information regarding the surveillance procedures that will apply to Bitcoin Fund options. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Bitcoin Fund options. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.⁸⁵

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-SAPPHIRE-2024-37 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to file number SR-SAPPHIRE-2024-37. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the

submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-SAPPHIRE-2024-37 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁸⁶

Vanessa A. Countryman,
Secretary.

[FR Doc. 2024-28115 Filed 11-29-24; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-221, OMB Control No. 3235-0232]

Submission for OMB Review; Comment Request; Extension: Form 1-E, Regulation E

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the "Commission") has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Form 1-E (17 CFR 239.200) under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*) ("Securities Act") is the form that

a small business investment company ("SBIC") or business development company ("BDC") uses to notify the Commission that it is claiming an exemption under Regulation E from registering its securities under the Securities Act. Rule 605 of Regulation E (17 CFR 230.605) under the Securities Act requires an SBIC or BDC claiming such an exemption to file an offering circular with the Commission that must also be provided to persons to whom an offer is made. Form 1-E requires an issuer to provide the names and addresses of the issuer, its affiliates, directors, officers, and counsel; a description of events which would make the exemption unavailable; the jurisdictions in which the issuer intends to offer the securities; information about unregistered securities issued or sold by the issuer within one year before filing the notification on Form 1-E; information as to whether the issuer is presently offering or contemplating offering any other securities; and exhibits, including copies of the rule 605 offering circular and any underwriting contracts.

The Commission uses the information provided in the notification on Form 1-E and the offering circular to determine whether an offering qualifies for the exemption under Regulation E. The Commission estimates that, each year, one issuer files two notifications on Form 1-E, together with offering circulars, with the Commission.¹ Based on the Commission's experience with disclosure documents, we estimate that the burden from compliance with Form 1-E and the offering circular requires approximately 100 hours per filing. The annual burden hours for compliance with Form 1-E and the offering circular would be 200 hours (2 responses × 100 hours per response). Estimates of the burden hours are made solely for the purposes of the PRA, and are not derived from a comprehensive or even a representative survey or study of the costs of SEC rules and forms.

Compliance with the information collection requirements of the rules is necessary to obtain the benefit of relying on the rules. The information provided on Form 1-E and in the offering circular will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it

¹ According to Commission records, one issuer filed two notifications on Form 1-E, together with offering circulars, during 2013 and 2014. According to Commission records, during 2015, 2016, and 2017, one issuer filed seven notifications on Form 1-E, together with offering circulars; no Form 1-E has been filed with the Commission since 2017.

⁸⁵ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁸⁶ 17 CFR 200.30-3(a)(12), (59).

displays a currently valid OMB control number.

The 30-day public comment period for this information collection request opens on December 3, 2024 and closes on January 2, 2025. The public may view the full information request and submit comments at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202408-3235-029 or email comments to MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov.

Dated: November 26, 2024.

Sherry R. Haywood,
Assistant Secretary.

[FR Doc. 2024–28221 Filed 11–29–24; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101739; File No. SR–BOX–2024–28]

Self-Regulatory Organizations; BOX Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rules 3120 (Position Limits) and 5020 (Criteria for Underlying Securities) To Permit Options Trading on Bitcoin Funds

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on November 21, 2024, BOX Exchange LLC (“Exchange” or “BOX Options”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rules 3120 (Position Limits), 5020 (Criteria for Underlying Securities) to permit options trading on Bitcoin Funds. Additionally, the Exchange proposes to amend Rule 5055 (FLEX Equity Options). The text of the proposed rule change is available from the principal office of the Exchange, at the Commission’s Public Reference Room and also on the Exchange’s internet website at <https://rules.boxexchange.com/rulefilings>.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rules 3120 (Position Limits) and 5020 (Criteria for Underlying Securities) to permit options trading on Grayscale Bitcoin Trust (BTC) (the “Grayscale Fund” or “GBTC”), the Grayscale Bitcoin Mini Trust BTC (the “Grayscale Mini Fund” or “BTC”), and the Bitwise Bitcoin ETF (the “Bitwise Fund” or “BITB” and, collectively, the “Bitcoin Funds” or “Funds”) on BOX. Additionally, the Exchange proposes to amend Rule 5055 (FLEX Equity Options). Specifically, the Exchange proposes to amend Rule 5020(h) to allow the Exchange to list and trade options on the following exchange-traded products: the Grayscale Fund, the Grayscale Mini Fund, and the Bitwise Fund.³ This is a competitive filing that is based on a proposal recently submitted by NYSE American LLC (“NYSE American”) and approved by the Commission.⁴

³ See proposed Rule 5020(h). On January 11, 2024, GBTC and BITB began trading on NYSE Arca, Inc. (“NYSE Arca”), after the Commission approved rule changes to list and trade shares of “Bitcoin-Based Commodity-Based Trust Shares” pursuant to Rule 8.201–E(c)(1) (Commodity-Based Trust Shares), including GBTC and BITB. See Securities Exchange Act Release No. 99306 (January 10, 2024) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units), 89 FR 3008 (January 17, 2024) (SR–NYSEARCA–2023–44; SR–NYSEARCA–2021–90). On July 13, 2024, after receiving approval of the Commission, BTC began trading on NYSE Arca. See Securities Exchange Act Release No. 100610 (July 26, 2024) (Order Granting Approval of Proposed Rule Changes, as Modified by Amendment No. 1, to List and Trade Share of BTC pursuant to NYSE Arca Rule 8.201–E (Commodity-Based Trust Shares)), 89 FR 62821 (August 1, 2024) (SR–NYSEARCA–2023–45).

⁴ See Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (Notice of Filing of Amendment No. 3 and Order

As discussed herein and as provided in the NYSE American Approval Order, the Exchange believes options on the Bitcoin Funds would permit hedging, and allow for more liquidity, better price efficiency, and less volatility with respect to the underlying Funds. Further, permitting the listing of such options would enhance the transparency and efficiency of markets in these and correlated products. Rule 5020(h) provides that, subject to certain other criteria set forth in the Rule, securities deemed appropriate for options trading include Exchange-Traded Fund Shares (or ETFs), that represent certain types of interests⁵ and exchange-traded products (“ETPs”) structured as trusts that hold precious metals (which are deemed

Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, to Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds) (SR–NYSEAMER–2024–49, as amended) (“NYSE American Approval Order”).

⁵ See Rule 5020(h), which permits options trading on ETFs that are traded on a national securities exchange and are defined as an “NMS stock” in Rule 600 of Regulation NMS and that (i) represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that hold portfolios of securities and/or financial instruments, including, but not limited to, stock index futures contracts, options on futures, options on securities and indices, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse repurchase agreements (the “Financial Instruments”) and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the “Money Market Instruments”) comprising or otherwise based on or representing investments in broad-based indexes or portfolios of securities and/or Financial Instruments and Money Market Instruments (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities and/or Financial Instruments and Money Market Instruments); or (ii) represent interests in a trust that holds a specified non-U.S. currency deposited with the trust or similar entity when aggregated in some specified minimum number may be surrendered to the trust by the beneficial owner to receive the specified non-U.S. currency or currencies and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency or currencies, if any, declared and paid by the trust (“Currency Trust Shares”); or (iii) represent commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency (“Commodity Pool ETFs”) or (iv) represent interests in the SPDR® Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the abrdn Gold ETF Trust, the abrdn Silver ETF Trust, the abrdn Palladium ETF Trust, the abrdn Platinum ETF Trust, the Sprott Physical Gold Trust or the iShares Bitcoin Trust; provided that all of the conditions in Rules 5020(h)(1) and (2) are met.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

commodities).⁶ Like ETPs backed by precious metals (*i.e.*, commodities), the Exchange proposes to allow options trading on the Bitcoin Funds that hold Bitcoin—which is also deemed a commodity.⁷ The Bitcoin Funds are structured as trusts that hold Bitcoin. Like ETFs and ETPs currently deemed appropriate for options trading, the investment objective of each Bitcoin Fund trust is for its shares to reflect the performance of Bitcoin (less the expenses of the trust's operations), offering investors an opportunity to gain exposure to Bitcoin without the complexities of Bitcoin delivery. Each Bitcoin Fund's shares represent units of fractional undivided beneficial interest in the trust, the assets of which consist principally of Bitcoin and are designed to track Bitcoin or the performance of the price of Bitcoin and offer access to the Bitcoin market.⁸ The Bitcoin Funds provide investors with cost-efficient alternatives that allow a level of participation in the Bitcoin market through the securities market. The Exchange believes each Bitcoin Fund satisfies the Exchange's initial listing standards set forth in Rule 5020(a).⁹ The Exchange notes that the Bitcoin Funds also satisfy the listing standard applied to ETFs traded on the Exchange that they be available for creation and redemption each business day as set forth in Rule 5020(h).¹⁰ First, each of the Bitcoin Funds satisfy the criteria and guidelines set forth in Rule 5020(a). Pursuant to Rule 5020(a), a security on which options may be listed and traded on the Exchange must be duly registered (with the Commission) and be an NMS stock (as defined in Rule 600 of Regulation NMS under the Act) and be characterized by a substantial number of outstanding shares that are widely held

and actively traded.¹¹ Each of the Bitcoin Funds is an NMS Stock as defined in Rule 600 of Regulation NMS under the Act.¹²

As provided in the NYSE American Approval Order, the Exchange believes each Bitcoin Fund is characterized by a substantial number of outstanding shares that are widely held and actively traded. Specifically, as shown in the NYSE American Approval Order, each of the Bitcoin Funds had significantly more than 7,000,000 shares outstanding, which is the minimum number of shares of a corporate stock that the Exchange generally requires to list options on that stock pursuant to Rule 5020(b). The Exchange believes this demonstrates that each Bitcoin Fund is characterized by a substantial number of outstanding shares.

Further as provided in the NYSE American Approval, each Bitcoin Fund has significantly more than 2,000 beneficial holders (approximately 232, 7, and 38 times more, respectively), which is the minimum number of holders the Exchange generally requires for corporate stock in order to list options on that stock pursuant to Rule 5020(b)(2). Therefore, the Exchange believes the shares of each Bitcoin Fund are widely held.

In addition, as provided in the NYSE American Approval Order, the Exchange believes the shares of each Bitcoin Fund are actively traded. Specifically, even though these Bitcoin Funds have been trading for less than one year, the trading volume for each is substantially higher than 2,400,000 shares (between roughly 165 and 700 times that amount), which is the minimum 12-month volume the Exchange generally requires for a security in order to list options on that security as set forth in Rule 5020(b). The Exchange believes this data demonstrates each Bitcoin Fund is characterized by a substantial number of outstanding shares that are actively traded.

In addition to satisfying the Exchange's initial listing standards, options on Bitcoin Funds will be subject to the Exchange's continued listing standards as set forth in Rule 5030(h).

¹¹ The criteria and guidelines for a security to be considered widely held and actively traded are set forth in Rule 5020(b), subject to exceptions.

¹² An "NMS stock" means any NMS security other than an option, and an "NMS security" means any security or class of securities for which transaction reports are collected, processed, and made available pursuant to an effective transaction reporting plan (or an effective national market system plan for reporting transactions in listed options). See 17 CFR 242.600(b)(64) (definition of "NMS security") and (65) (definition of "NMS stock").

Pursuant to Rule 5030(b), the Exchange will not open for trading any additional series of option contracts covering a fund traded on the Exchange if such fund ceases to be an "NMS stock" as provided for in Rule 5030(a) or the fund is halted from trading on its primary market.¹³ Additionally, options on funds traded on the Exchange may be subject to the suspension of opening transactions as follows: (1) the fund no longer meets the terms of Rule 5030(b); (2) following the initial twelve-month period beginning upon the commencement of trading of the fund, there are fewer than 50 record and/or beneficial holders of the fund for 30 or more consecutive trading days; (3) the value of the underlying commodity is no longer calculated or available; or (4) such other event occurs or condition exists that in the opinion of the Exchange makes further dealing on BOX inadvisable. Options on each Bitcoin Fund will be physically settled contracts with American-style exercise.¹⁴ Consistent with Rule 5050, which governs the opening of options series on a specific underlying security (including ETFs and ETPs), BOX will open at least one expiration month for options on each Bitcoin Fund¹⁵ at the commencement of trading on the Exchange and may also list series of options on Bitcoin Funds for trading on

¹³ See Rule 5030(h).

¹⁴ See Rule 5010 (Rights and Obligations of Holders and Writers), which provides that the rights and obligations of holders and writers of option contracts of any class of options dealt in on the Exchange shall be as set forth in the Rules of the Clearing Corporation. See also OCC Rules, Chapter VIII, which governs exercise and assignment, and Chapter IX, which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts. OCC Rules can be located at: <https://www.theocc.com/getmedia/9d3854cd-b782-450f-bcf7-33169b0576ce/occrules.pdf>.

¹⁵ See Rule 5050(b). The standard expirations are subject to certain listing criteria for underlying securities described within Rule 5020. Standard listings expire the third Friday of the month. The term "expiration date" (unless separately defined elsewhere in the OCC By-Laws), when used in respect of an option contract (subject to certain exceptions), means the third Friday of the expiration month of such option contract, or if such Friday is a day on which the exchange on which such option is listed is not open for business, the preceding day on which such exchange is open for business. See OCC By-Laws Article I, Section 1. Pursuant to Rule 5050(c), additional series of options of the same class may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying stock moves more than five strike prices from the initial exercise price or prices. New series of options on an individual stock may be added until the beginning of the month in which the options contract will expire. Due to unusual market conditions, the Exchange, in its discretion, may add a new series of options on an individual stock until the close of trading on the business day prior to expiration.

⁶ See Rule 5020(h) (permitting the listing and trading of options on certain ETPs backed by precious metals.)

⁷ See proposed Rule 5020(h).

⁸ The trust may include minimal cash.

⁹ Rule 5020(a) provides for guidelines to be used by the Exchange when evaluating potential underlying securities for Exchange option transactions.

¹⁰ Rule 5020(h)(1) requires that ETFs must be available for creation or redemption each business day from or through the issuer in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue ETFs in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus.

a weekly,¹⁶ monthly,¹⁷ or quarterly¹⁸ basis. BOX may also list long-term equity option series (“LEAPS”) that expire from twelve to one hundred eighty months from the time they are listed.¹⁹ Pursuant to IM–5050–1(b), which governs strike prices of series of options on ETFs, the interval between strike prices of series of options on Bitcoin Funds will be \$1 or greater when the strike price is \$200 or less and \$5 or greater where the strike price is over \$200.²⁰ Additionally, BOX may list series of options pursuant to the \$1 Strike Price Interval Program,²¹ the \$0.50 Strike Program,²² and the \$2.50 Strike Price Program.²³ Pursuant to Rule 7050, where the price of a series of a Bitcoin Fund option is less than \$3.00, the minimum increment will be \$0.05, and where the price is \$3.00 or higher, the minimum increment will be \$0.10.²⁴ Any and all new series of Bitcoin Fund options that BOX lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Rules 5050 and 7050, as applicable. Further, the Exchange notes that Rule Series 10100, which governs margin requirements applicable to the trading of all options on BOX, including options on ETFs and ETPs, will also apply to the trading of Bitcoin Fund options.

Rule 5055(e)(2)(i) permits the Exchange to authorize for trading a FLEX Equity Option class on any equity security if it may authorize for trading a Non-FLEX Equity Option class on that equity security pursuant to Rule 5020.²⁵ At this time, the Exchange is not proposing to permit Bitcoin Fund options to trade as FLEX Equity Options.²⁶ The Exchange therefore

proposes to modify Rule 5055(e)(2)(i) to specify this exception, which will add clarity and transparency to Exchange Rules.²⁷

Position and Exercise Limits

NYSE American’s Approval Order stated that the position and exercise limits for Bitcoin Funds shall be 25,000 contracts. At this time, the Exchange proposes to amend IM–3120–2 to similarly note that Bitcoin Fund options position limits shall be 25,000 contracts to mirror NYSE American’s Approval Order. Rule 3140 provides that the exercise limits shall be determined in the manner described in Rule 3120, therefore the exercise limits would also be 25,000 contracts.

The Exchange has also analyzed its capacity and represents that it and The Options Price Reporting Authority (“OPRA”) have the necessary systems capacity to handle the additional traffic associated with the listing of options on Bitcoin Funds. The Exchange believes any additional traffic that would be generated from the trading of options on Bitcoin Funds would be manageable. The Exchange represents that Participants will not have a capacity issue as a result of this proposed rule change.

The Exchange represents that the same surveillance procedures applicable to all other options currently listed and traded on BOX will apply to options on Bitcoin Funds, and that BOX has the necessary systems capacity to support the new option series. The Exchange’s existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs and ETPs, such as (existing) precious metal-commodity backed ETP options as well as the proposed options on Bitcoin Funds. The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of options on Bitcoin Funds and to deter and detect violations of Exchange rules. Additionally, the Exchange is a member of the Intermarket Surveillance Group (“ISG”) under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. The Exchange would be able to obtain information regarding trading in shares of the Bitcoin Funds from NYSE Arca, Inc. (“Arca”) and other markets that trade shares of the Bitcoin Funds through ISG. In addition, the Exchange

has a Regulatory Services Agreement with the Financial Industry Regulatory Authority (“FINRA”). Pursuant to a multi-party 17d–2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillances.²⁸ Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Bitcoin Funds.

The underlying shares of spot bitcoin ETPs, including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot bitcoin-based exchange-traded products (“Bitcoin ETP Order”): Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.²⁹ Given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be “expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the

²⁸ Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO’s own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d–2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO. Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

²⁹ See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008, 3009 (January 17, 2024) (File Nos. SR–NYSEArca–2021–90; SR–NYSEArca–2023–44; SR–NYSEArca–2023–58; SR–NASDAQ–2023–016; SR–NASDAQ–2023–019; SR–CboeBZX–2023–028; SR–CboeBZX–2023–038; SR–CboeBZX–2023–040; SR–CboeBZX–2023–042; SR–CboeBZX–2023–044; and SR–CboeBZX–2023–072) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, to List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units).

¹⁶ See IM–5050–6.

¹⁷ See IM–5050–13.

¹⁸ See IM–5050–4.

¹⁹ See Rule 5070.

²⁰ The Exchange notes that for options listed pursuant to the Short Term Option Series Program, the Monthly Options Series Program, and the Quarterly Options Series Program, IM–5050–6, IM–5050–13, and IM–5050–4, specifically set forth intervals between strike prices on Quarterly Options Series, Short Term Option Series, and Monthly Options Series, respectively.

²¹ See BOX IM–5050–2.

²² See BOX IM–5050–5.

²³ See BOX IM–5050–3.

²⁴ If options on a Bitcoin Fund are eligible to participate in the Penny Interval Program, the minimum increment of \$0.01 below \$3.00 and \$0.05 above \$3.00 would apply. See Rule 7050(a)(3). See also Rule 7260 (which describes the requirements for the Penny Interval Program).

²⁵ See Rule 5055(e)(2)(i).

²⁶ The Exchange would be required to submit a separate rule filing to permit the Exchange to authorize for trading FLEX Equity Options on the Bitcoin Funds (which filing may propose changes to existing FLEX Equity Option position limits for such options if appropriate).

²⁷ See proposed Rule 5055(e)(2)(i).

[Bitcoin ETPs].”³⁰ In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Funds,³¹ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds.

The Exchange notes quotation and last sale information for ETFs is available via the Consolidated Tape Association (“CTA”) high speed line. Quotation and last sale information for such securities is also available from the exchange on which such securities are listed. Quotation and last sale information for options on Bitcoin Funds will be available via OPRA and major market data vendors. The Exchange believes that offering options on Bitcoin Funds will benefit investors by providing them with an additional, relatively lower cost investing tool to gain exposure to the price of Bitcoin and hedging vehicle to meet their investment needs in connection with Bitcoin-related products and positions. The Exchange believes that listing Bitcoin Fund options may cause investors to bring this liquidity to BOX, which would increase market transparency and enhance the process of price discovery conducted on BOX through increased order flow.

Finally, the Exchange notes that applicable Exchange rules will require that customers receive appropriate disclosure before trading options in Bitcoin Funds.³² Further, brokers opening accounts and recommending options transactions must comply with relevant customer suitability standards.³³

2. Statutory Basis

The Exchange believes that the proposal is consistent with the

requirements of Section 6(b) of the Securities Exchange Act of 1934 (the “Act”),³⁴ in general, and Section 6(b)(5) of the Act,³⁵ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

In particular, the Exchange believes that the proposal to list and trade options on Bitcoin Funds will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because offering options on Bitcoin Funds will provide investors with an opportunity to realize the benefits of utilizing options on a Bitcoin Fund, including cost efficiencies and increased hedging strategies. The Exchange believes that offering Bitcoin Fund options will benefit investors by providing them with a relatively lower-cost risk management tool, which will allow them to manage their positions and associated risk in their portfolios more easily in connection with exposure to the price of Bitcoin and with Bitcoin-related products and positions. Additionally, the Exchange’s offering of Bitcoin Fund options will provide investors with the ability to transact in such options in a listed market environment as opposed to in the unregulated OTC options market, which would increase market transparency and enhance the process of price discovery conducted on BOX through increased order flow to the benefit of all investors. The Exchange also notes that BOX already lists options on other commodity-based ETPs,³⁶ which, as described above, are trusts structured in substantially the same manner as Bitcoin Funds and essentially offer the same objectives and benefits to investors, just with respect to a different commodity (*i.e.*, Bitcoin rather than precious metals) and for which the Exchange has not identified any issues with the continued listing and trading of commodity-backed ETP options it currently lists for trading. The Exchange also believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system,

because it is consistent with current Exchange Rules previously filed with the Commission. Options on Bitcoin Funds satisfy the initial listing standards and continued listing standards currently in the Exchange Rules applicable to options on all ETFs and ETPs, including ETPs that hold other commodities already deemed appropriate for options trading on BOX. Additionally, as demonstrated above, each Bitcoin Fund is characterized by a substantial number of shares that are widely held and actively traded. Bitcoin Fund options will trade in the same manner as any other ETF or ETP options—the same Exchange Rules that currently govern the listing and trading of options, including permissible expirations, strike prices, minimum increments, and margin requirements, will govern the listing and trading of options on Bitcoin Funds in the same manner.

The Exchange believes the proposed rule change to exclude the Bitcoin Funds from being eligible for trading as FLEX Equity Options is consistent with the Act, because without this prohibition, trading a FLEX Equity Option in the Bitcoin Funds would otherwise establish different position and exercise limits than those proposed herein.³⁷ The proposed position and exercise limit for options on the Bitcoin Funds is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given the Bitcoin Funds’ market capitalization, average daily volume, number of beneficial holders, and high number of outstanding shares. The proposed position and exercise limits are consistent with the Act as they address concerns related to manipulation and protection of investors because the position and exercise limits are extremely conservative and more than appropriate given the Bitcoin Funds are actively traded.

The Exchange also believes the proposed rule change to Rule 5055(e), to make clear that options on the Bitcoin Funds are not eligible for FLEX trading, will remove impediments to and perfect the mechanism of a free and open market and a national market system because it adds clarity and transparency to Exchange Rules making them easier to navigate and understand to the

³⁵ 15 U.S.C. 78f(b)(5).

³⁶ See Rule 5020(h).

³⁷ The Exchange would be required to submit a separate rule filing to permit the Exchange to authorize for trading FLEX Equity Options on the Bitcoin Funds (which filing may propose changes to existing FLEX Equity Option position limits for such options if appropriate).

benefit of investors and the public interest. The Exchange represents that BOX has the necessary systems capacity to support the new Bitcoin Fund options. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options, including Bitcoin Fund options. The Exchange's existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs and ETPs, such as (existing) precious metal-commodity backed ETP options as well as the proposed options on Bitcoin Funds.

The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of options on Bitcoin Funds and to deter and detect violations of Exchange rules. Additionally, the Exchange is a member of the ISG under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. The Exchange would be able to obtain information regarding trading in shares of the Bitcoin Funds from Arca and other markets that trade shares of the Bitcoin Funds through ISG. In addition, the Exchange has a Regulatory Services Agreement with FINRA and, as noted herein, pursuant to a multi-party 17d-2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillances. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Bitcoin Funds. The underlying shares of spot bitcoin ETPs, including the Bitcoin Funds, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in its order approving proposals of several exchanges to list and trade shares of spot bitcoin-based ETPs, "[e]ach Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.³⁸ Given the

consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be "expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs]."³⁹ In light of surveillance measures related to both options and futures as well as the underlying Bitcoin Funds,⁴⁰ the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Bitcoin Funds. Further, the Exchange will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on Bitcoin ETPs.

Finally, the Exchange notes that this proposal will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because applicable Exchange rules will require that customers receive appropriate disclosure before trading options in Bitcoin Funds⁴¹ and will require that brokers opening accounts and recommending options transactions comply with relevant customer suitability standards.⁴² The Exchange notes the proposed rule change is substantively the same as a rule change proposed by NYSE American which the Commission recently approved.⁴³

⁴⁰ See Amendment No. 2 to Proposed Rule Change to List and Trade Shares of the Grayscale Bitcoin Trust (BTC) under NYSE Arca Rule 8.201-E (Commodity-Based Trust Shares) (SR-NYSEARCA-2021-90), filed Jan. 5, 2024, available at <https://www.sec.gov/comments/sr-nysearca-2021-90/srnysearca202190-358659-884182.pdf>; Amendment No. 2 to Proposed Rule Change to List and Trade Shares of the Bitwise Bitcoin ETF under NYSE Arca Rule 8.201-E (Commodity-Based Trust Shares) (SR-NYSEARCA-2023-44), filed Jan. 5, 2024, available at <https://www.sec.gov/comments/sr-nysearca-2023-44/srnysearca202344-358800-884322.pdf>; and Notice of Filing of Proposed Rule Change, as Modified by Amendment No. 1, To List and Trade Shares of the Grayscale Bitcoin Mini Trust Under NYSE Arca Rule 8.201-E, Commodity-Based Trust Shares, Securities Exchange Act Release No. 100290 (June 6, 2024), 89 FR 49931 (June 12, 2024) (SR-NYSEARCA-2024-45).

⁴¹ See Rules 4020(b), (e) and 4100.

⁴² See Rule 4040.

⁴³ See *supra* note 4.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In this regard and as indicated above, the Exchange notes that the rule change is being proposed as a competitive response to a filing submitted by NYSE American that was recently approved by the Commission.⁴⁴

Intramarket Competition: The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as Bitcoin Funds would need to satisfy the initial listing standards set forth in the Exchange Rules in the same manner as any other ETF before the Exchange could list options on them. Additionally, Bitcoin Fund options will be equally available to all market participants who wish to trade such options. The Exchange Rules currently applicable to the listing and trading of options on ETFs on BOX will apply in the same manner to the listing and trading of all options on Bitcoin Funds. Also, and as stated above, the Exchange already lists options on other commodity-based ETPs.⁴⁵

Intermarket Competition: The Exchange does not believe that the proposal to list and trade options on Bitcoin Funds will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that the advent of Bitcoin Fund options trading on BOX may make BOX a more attractive marketplace to market participants at other exchanges, such market participants are free to elect to become market participants on BOX. As noted herein, this is a competitive filing as the Commission recently approved the listing and trading of the Bitcoin Funds on another options exchange.⁴⁶ Additionally, other options exchanges are free to amend their listing rules, as applicable, to permit them to list and trade options on Bitcoin Funds. The Exchange notes that listing and trading Bitcoin Fund options on BOX will subject such options to transparent exchange-based rules as well as price discovery and liquidity, as opposed to alternatively trading such options in the OTC market. The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote,

⁴⁴ See *supra* note 4.

⁴⁵ See Rule 5020(h).

⁴⁶ See *supra* note 4.

³⁸ See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008, 3009 (January 17, 2024) (File Nos. SR-NYSEArca-2021-90; SR-NYSEArca-2023-44; SR-NYSEArca-2023-58; SR-

competition as it is designed to increase competition for order flow on BOX in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange notes that BOX operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering Bitcoin Fund options for trading on BOX will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment needs in connection with Bitcoin prices and Bitcoin-related products and positions on a listed options exchange.

Finally, the proposed rule change to exclude Bitcoin Fund options from being eligible for trading as FLEX Equity Options does not impose an undue burden on competition as no BOX Participant will be able to transact a FLEX Equity Option on the Bitcoin Funds.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act⁴⁷ and Rule 19b-4(f)(6) thereunder.⁴⁸

A proposed rule change filed pursuant to Rule 19b-4(f)(6) under the Act normally does not become operative for 30 days after the date of its filing. However, Rule 19b-4(f)(6)(iii)⁴⁹ permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested

that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the shares of the Bitcoin Funds.⁵⁰ The Exchange has provided information regarding the underlying Bitcoin Funds, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of the Bitcoin Funds. The proposal also establishes position and exercise limits for options on the Bitcoin Funds and provides information regarding the surveillance procedures that will apply to options on the Bitcoin Funds. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading Bitcoin Fund options. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.⁵¹

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-BOX-2024-28 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

⁵⁰ See *supra* note 4.

⁵¹ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

All submissions should refer to file number SR-BOX-2024-28. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-BOX-2024-28 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵²

Vanessa A. Countryman,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101732; File No. SR–BX–2024–051]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Options 9, Section 13, Position Limits, and Options 9, Section 15, Exercise Limits, Regarding Options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF iShares Bitcoin Trust ETF

November 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 21, 2024, Nasdaq BX, Inc. (“BX” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Options 9, Section 13, Position Limits, and Section 15, Exercise Limits.

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Options 9, Section 13, Position Limits, and Options 9, Section 15, Exercise Limits, to limit the position limits for options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF (collectively “Bitcoin Trusts”).

Recently, Cboe Exchange, Inc. (“Cboe”) received approvals to list options on the Fidelity Wise Origin Bitcoin Fund, and the ARK21Shares Bitcoin ETF.³ Also, recently, NYSE American LLC (“NYSE American”) received approvals to list options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF.⁴ Nasdaq ISE, LLC (“ISE”) filed a rule change to also list and trade options on the Bitcoin Trusts.⁵ BX’s Options 4 Rules were amended by the ISE rule change as those Rules are incorporated by reference to ISE’s Options 4 Rules, so BX has the ability to list the options on the Bitcoin Trusts. The Cboe Approval Order and the NYSE American Approval Order stated that the position and exercise limits for each of the Bitcoin Trusts shall be 25,000 contracts. At this time, the Exchange proposes to amend BX Option 9, Section 13 and Options 9, Section 15 to similarly note that options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF shall have position and exercise limits of 25,000 contracts to mirror the Cboe Approval Order and the NYSE American Approval Order, respectively.

³ See Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SR–Cboe–2024–035) (Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds) (“Cboe Approval Order”).

⁴ See Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR–NYSEAMER–2024–49) (Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds) (“NYSE American Approval Order”).

⁵ See SR–ISE–2024–54.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁶ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁷ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange’s proposal to amend Options 9, Section 13, Position Limits, and Options 9, Section 15, Exercise Limits, to provide that the position and exercise limits for options on each of the Bitcoin Trusts shall be 25,000 contracts is consistent with the Act as it will conform BX’s options position and exercise limits for each of the Bitcoin Trusts with ISE’s options position and exercise limits on these same Bitcoin Trusts to align those limits.⁸

B. Self-Regulatory Organization’s Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Amending Options 9, Sections 13 and 15 to provide that the position and exercise limits for options on each of the Bitcoin Trusts shall be 25,000 contracts does not impose an undue burden on competition as the position and exercise limits will apply to all trading for options on the Bitcoin Trusts trading on the Exchange as well as those trading on other exchanges that file a similar proposal.⁹

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁰ and Rule

⁶ 15 U.S.C. 78f(b).

⁷ 15 U.S.C. 78f(b)(5).

⁸ The Exchange believes that other exchanges will adopt position and exercise limits of 25,000 contracts for options on each of the Bitcoin Trusts. All Nasdaq affiliated markets have filed to adopt a 25,000 contract position and exercise limit for the Bitcoin Trusts.

⁹ All Nasdaq affiliated markets are filing to adopt a 25,000 contract position and exercise limit for options on the Bitcoin Trusts.

¹⁰ 15 U.S.C. 78s(b)(3)(A)(iii).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

19b-4(f)(6) thereunder.¹¹ Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹² and subparagraph (f)(6) of Rule 19b-4 thereunder.¹³

A proposed rule change filed under Rule 19b-4(f)(6)¹⁴ under the Act does not normally become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁵ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on the Fidelity Wise Origin Bitcoin Fund, the ARK21Shares Bitcoin ETF, the Grayscale Bitcoin Trust (BTC), the Grayscale Bitcoin Mini Trust BTC, and the Bitwise Bitcoin ETF.¹⁶ As noted above, BX's Options 4 Rules were amended by an ISE rule change¹⁷ as those Rules are incorporated by reference to ISE's Options 4 Rules, so BX has the ability to list the options on the Bitcoin Trusts. This proposal also establishes position and exercise limits for options on the Bitcoin Trusts. The Commission believes that waiver of the operative delay could benefit investors by assuring that trading Bitcoin Trust

options are subject to the same position and exercise limits in place on other exchanges. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.¹⁸

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-BX-2024-051 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to file number SR-BX-2024-051. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than

those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-BX-2024-051 and should be submitted on or before December 23, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

Vanessa A. Countryman,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #20641 and #20642; IDAHO Disaster Number ID-20010]

Administrative Declaration of a Disaster for the State of Idaho

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Administrative declaration of a disaster for the State of Idaho dated November 22, 2024.

Incident: Gwen Fire.

DATES: Issued on November 22, 2024.

Incident Period: July 24, 2024 through August 9, 2024.

Physical Loan Application Deadline Date: January 21, 2025.

Economic Injury (EIDL) Loan Application Deadline Date: August 22, 2025.

ADDRESSES: Visit the MySBA Loan Portal at <https://lending.sba.gov> to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Alan Escobar, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205-6734.

¹¹ 17 CFR 240.19b-4(f)(6).

¹² 15 U.S.C. 78s(b)(3)(A)(iii).

¹³ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission waives this requirement.

¹⁴ 17 CFR 240.19b-4(f)(6).

¹⁵ 17 CFR 240.19b-4(f)(6)(iii).

¹⁶ See Securities Exchange Act Release No. 101387 (October 18, 2024), 89 FR 84948 (October 24, 2024) (SR-Cboe-2024-035) (Notice of Filing of Amendment Nos. 2 and 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds). See also Securities Exchange Act Release No. 101386 (October 18, 2024), 89 FR 84960 (October 24, 2024) (SR-NYSEAMER-2024-49) (Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 3, To Permit the Listing and Trading of Options on Bitcoin Exchange-Traded Funds).

¹⁷ See SR-ISE-2024-54.

¹⁸ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

¹⁹ 17 CFR 200.30-3(a)(12), (59).

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's disaster declaration, applications for disaster loans may be submitted online using the MySBA Loan Portal <https://lending.sba.gov> or other locally announced locations. Please contact the SBA disaster assistance customer service center by email at disastercustomerservice@sba.gov or by phone at 1-800-659-2955 for further assistance.

The following areas have been determined to be adversely affected by the disaster:

Primary County: Nez Perce.

Contiguous Counties:

Idaho: Clearwater, Idaho, Latah, Lewis.

Oregon: Wallowa.

Washington: Asotin, Whitman.

The Interest Rates are:

	Percent
<i>For Physical Damage:</i>	
Homeowners with Credit Available Elsewhere	5.375
Homeowners without Credit Available Elsewhere	2.688
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Non-Profit Organizations with Credit Available Elsewhere ...	3.250
Non-Profit Organizations without Credit Available Elsewhere	3.250
<i>For Economic Injury:</i>	
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Non-Profit Organizations without Credit Available Elsewhere	3.250

The number assigned to this disaster for physical damage is 206415 and for economic injury is 206420.

The States which received an EIDL Declaration are Idaho, Oregon, Washington.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA-2024-0076]

Agency Information Collection Activities: Request for Comments for a New Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: The FHWA invites public comments about our intention to request the Office of Management and Budget's (OMB) approval for a new information collection, which is summarized below under **SUPPLEMENTARY INFORMATION**. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by January 31, 2025.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 0076 by any of the following methods:

Website: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to <https://www.regulations.gov>.

Follow the online instructions for submitting comments.

Fax: 1-202-493-2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590-0001.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Alison Rogers, Discretionary Grants Training Liaison, FHWA Discretionary Grants Coordination Division, (304) 347-3574 or via email at alison.rogers@dot.gov or Tamiko Burnell, Chief, FHWA Discretionary Grants Coordination Division, (202) 366-1200 or via email at tamiko.burnell@dot.gov. Office hours are from 8 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: Federal Highway Administration (FHWA) Performance Progress Report (PPR) Form.

Background: FHWA is administering over 40 discretionary grant and cooperative agreement programs, including those established under the

Bipartisan Infrastructure Law (BIL), enacted as the Infrastructure Investment and Jobs Act, (November 15, 2021, Pub. L. 117-58) and the Inflation Reduction Act, 2022 (August 16, 2022, Pub. L. 117-169). The Uniform Administrative Requirements in 2 CFR part 200 require recipients of Federal financial assistance awards to monitor activities under Federal awards to ensure compliance with applicable Federal requirements and performance expectations are being achieved. In addition, the regulations require Federal awarding agencies, such as FHWA, to use OMB-approved common information collections. The FHWA PPR form will be used by recipients of FHWA grant awards and cooperative agreements to report performance and progress of a Federal financial assistance-funded construction or non-construction project.

Respondents: Recipients of a discretionary grant or cooperative agreement award administered by FHWA. Discretionary grant or cooperative agreement recipients include but are not limited to State DOTs as defined in 23 U.S.C. 101, U.S. Territories, Federally recognized tribes, and other entities identified as eligible for federal financial assistance from FHWA.

Frequency: The information will be collected quarterly, semiannually, or annually, as required by the Notice of Funding Opportunity (NOFO) for the grant program.

Estimated Average Burden per Response: 1 hour per respondent per form per grant award. This includes time to review the form instructions, research existing sources to gather necessary data, complete and review the form before submitting to FHWA.

Estimated Total Annual Burden Hours: It is expected that approximately 2,500 respondents will complete up to 4 PPR forms for a up to 10 grant awards per respondent for an estimated total of 100,000 annual burden hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued on November 25, 2024.

Jazmyne Lewis,

Information Collection Officer.

BILLING CODE 4910-22-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on Transportation Project in Washington State

AGENCY: Federal Highway Administration (FHWA), Department of Transportation (DOT).

ACTION: Notice of limitation on claims for judicial review of actions by FHWA.

SUMMARY: This notice announces actions taken by the FHWA that are final. The action relates to the SR 3 Freight Corridor—New Alignment project, located in western Washington within the City of Bremerton, Kitsap County, and Mason County. The Project will construct the SR 3 Freight Corridor—New Alignment to the east of the existing SR3 with a design and posted speed of 50 miles per hour. The proposed alignment will begin at MP 22.81 on existing SR 3 and connect back to the existing SR 3 alignment at MP 29.49. The project includes stormwater treatment facilities, 12-foot lanes with 8-foot shoulders, and roundabouts at the north and south connections to existing SR 3. The FHWA's Finding of No Significant Impact (FONSI) provides details on the Selected Alternative for the proposed improvements.

DATES: A claim seeking judicial review of the Federal agency actions on the listed highway project will be barred unless the claim is filed on or before May 1, 2025. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: Liana Liu, Area Engineer, Federal Highway Administration, 711 S Capitol Way, Suite 501, Olympia, WA, 98501-1284, (360) 753-9553, liana.liu@dot.gov or Washington.FHWA@dot.gov, or Victoria Book, Environmental & Hydraulics Manager, WSDOT Olympic Region, P.O. Box 47440, Olympia, WA 98504-7440, (360) 570-6707, victoria.book@wsdot.wa.gov.

SUPPLEMENTARY INFORMATION: Notice is hereby given that FHWA has taken final

agency actions within the meaning of 23 U.S.C. 139(l)(1) by issuing a NEPA Finding of No Significant Impact (FONSI) for the SR 3 Freight Corridor-New Alignment Project in Mason and Kitsap Counties, Washington. The action(s) by FHWA and the laws under which such actions were taken, are described in the FONSI and the associated agency records. That information is available by contacting FHWA at the addresses provided above.

The project proposed to provide a reliable, high-speed, regional route between Kitsap and Mason Counties. This new route will move freight and regional traffic between Shelton and Bremerton, thus bypassing the urban center of Belfair. This project will reduce congestion and improve safety through Belfair and provide an alternate route during highway closures resulting from vehicular crashes and other incidents. Construction of this project will provide safe and reliable regional access to jobs, goods, and services, and improve efficiencies for all public service providers, on SR 3 through Belfair. A FONSI for the project was signed on November 15, 2024.

Information about the NEPA FONSI and associated records are available from FHWA at the addresses provided above and can be found at: <https://wsdot.wa.gov/construction-planning/search-projects/sr-3-freight-corridor-new-alignment>. This notice applies to all Federal agency decisions related to the FONSI as of the issuance date of this notice and all laws under which such actions were taken, including but not limited to:

1. *General:* National Environmental Policy Act (NEPA) [42 U.S.C. 4321-4347]; Federal-Aid Highway Act [23 U.S.C. 109].
2. *Air:* Clean Air Act, as amended [42 U.S.C. 7401-7671(q)].
3. *Land:* Section 6(f) of the Land and Water Conservation Fund Act of 1965 [16 U.S.C. 4601]; section 4(f) of the Department of Transportation Act of 1966 [49 U.S.C. 303].
4. *Wildlife:* Endangered Species Act [16 U.S.C. 1531-1544 and 1536]. Fish and Wildlife Coordination Act [16 U.S.C. 661-667(d)]. Migratory Bird Treaty Act [16 U.S.C. 703-712]. Bald and Golden Eagle Protection Act [16 U.S.C. 668-668c]. Magnuson-Stevens Fishery Conservation and Management Act of 1976, as amended [16 U.S.C. 1801 *et seq.*].
5. *Historic and Cultural Resources:* Section 106 of the National Historic Preservation Act of 1966, as amended [16 U.S.C. 470(f) *et seq.*]; Archaeological and Historic Preservation Act [16 U.S.C. 469-469(c)];

6. *Social and Economic:* Civil Rights Act of 1964 [42 U.S.C. 2000d *et seq.*]; Farmland Protection Policy Act [7 U.S.C. 4201-4209].

7. *Wetlands and Water Resources:* Clean Water Act (section 319, section 401, section 402, section 404) [33 U.S.C. 1251-1377]. Safe Drinking Water Act [42 U.S.C. 300(f) *et seq.*].

8. *Executive Orders:* Executive Order 11990 Protection of Wetlands; Executive Order 11988 Floodplain Management; Executive Order 12898 Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations; Executive Order 11593 Protection and Enhancement of Cultural Resources; Executive Order 13007 Indian Sacred Sites; Executive Order 13287 Preserve America; Executive Order 13175 Consultation and Coordination with Indian Tribal Governments; Executive Order 11514 Protection and Enhancement of Environmental Quality; Executive Order 13112 Invasive Species; Executive Order 13166 Improving Access to Services for Persons with Limited English Proficiency; Executive Order 13045 Protection of Children From Environmental Health Risks and Safety Risks; Executive Order 14096 Revitalizing Our Nation's Commitment to Environmental Justice for All.

Authority: 23 U.S.C. 139(l)(1).

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2022-0148]

Commercial Driver's License: National School Transportation Association Application for Renewal of Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of final disposition; granting of renewal of exemption.

SUMMARY: FMCSA announces its final decision to renew the exemption granted to the National School Transportation Association (NSTA) for a period of two years to permit all commercial driver's license (CDL) applicants seeking a school bus endorsement to forgo the engine compartment portion of the pre-trip vehicle inspection skills testing requirement, known informally as the

“under-the-hood” testing requirement. Drivers issued CDLs pursuant to the requested exemption are restricted to intrastate operation of school buses only.

DATES: The exemption is effective for the period of November 28, 2024, through November 28, 2026.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Clemente, FMCSA Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; 202–366–2722; MCPSPD@dot.gov. If you have questions on viewing or submitting material to the docket, contact Dockets Operations at (202) 366–9826.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant’s safety analyses. The Agency must provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305(a)). The Agency must publish its decision in

the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision(s) from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reasons for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Background

Current Regulatory Requirements

Under 49 CFR 383.113(a), CDL applicants are required to possess basic pre-trip vehicle inspection skills for the vehicle class that the applicant operates or expects to operate. For all test vehicles, applicants must be able to identify each safety-related part on the vehicle and explain what needs to be inspected to ensure a safe operating condition of each part, including the engine compartment.

IV. Application for Renewal of Exemption

The renewal application for exemption from NSTA was described in detail in a **Federal Register** notice published on May 30, 2024 (89 FR 46986) and will not be repeated here as the facts have not changed.

V. Public Comments

The Agency received 75 comments; 64 supported the exemption, including 12 from individuals. Six commenters opposed the exemption, including three from individuals. Five others took no position either for or against the request.¹ Various school bus companies and contractors and industry associations including NSTA, American Bus Association (ABA), Chicago Public Schools, Pennsylvania School Bus Association, Wisconsin School Bus Association, First Student, and individuals supported the exemption renewal. Common themes of commenters in support of granting the exemption renewal included the ongoing school bus driver shortage, the frequent lack of a need for school bus drivers to make under-the-hood repairs, and the eventual obsolescence of under-the-hood testing as the industry transitions to electric school buses.

¹ FMCSA received verbal comments from two States during a CDL Bi-Monthly Roundtable Meeting held on October 1, 2024. These comments were made long after the comment period closed on July 1, 2024, were raised in an entirely different context, and did not raise new substantive issues. Accordingly, FMCSA did not consider them in its decision. A summary of the comments is nevertheless available in the docket to this notice.

B.R. Williams, Inc., a school bus contractor, commented, “As you know, a national school bus driver shortage has been a prevalent problem of the student transportation system, and the effects of the Covid–19 pandemic only served to increase this shortage in many areas. The pronounced shortage of school bus drivers, and more importantly school bus driver candidates, have had a great impact on the ability of our company to serve the community. We believe that one impediment to qualifying and licensing school bus driver candidates is the Under the Hood testing requirements for school bus driver candidates.”

The Washington State Student Transportation Coalition commented, “[o]ur bus drivers are not allowed to perform any on-road repairs or maintenance to their vehicle in the event of a break down. The bus driver must call dispatch with the problem, and typically a replacement bus is sent to their location to transport students from the original bus . . . Safety for students in this situation is the priority for our drivers. They must stay with the students and let those with training address the mechanical issues. To this end, the need for Under the Hood knowledge is extremely limited and only serves as a deterrent for potential school bus drivers. Removing this outdated requirement will allow us to focus our drivers on what is most important, keeping students safe.”

The Wisconsin School Bus Association added, “given the current transition to electric school buses, the Under the Hood testing will eventually become obsolete entirely . . . Bus manufacturers warn against untrained laypersons going under the hood to inspect or repair a vehicle. Requiring drivers to do so is fraught with danger, and ultimately becomes a liability concern for operators and testing facilities. Wisconsin was one of the first states to adopt this exemption and many members are using it when existing drivers renew their license. The exemption has allowed employers to maintain the driver pool and discontinuing it would be a large burden on employers, including potentially losing those drivers.”

James Lynch, an individual commenter who supported granting the exemption renewal, stated, “We should all consider potential options that can assist us with overcoming the bus driver shortage that has contributed to a substantial increase in lost instructional time across all schools. This waiver does not pose any concerns with safety standards and is a practical option that

each State would have the discretion to implement.”

The prevalent themes of comments opposed to the exemption included that the exemption may pose an increased risk to safety, it is costly for States to change the current testing process, and drivers who lack the strength to lift the hood may not be able to perform other essential functions, such as assisting passengers in an emergency evacuation.

AWM Associates, LLC commented, “FMCSA must recognize there are safety issues impacting the operation of school buses and the issues must be addressed to reduce the high turnover rate driving the renewal for the exception. NSTA’s request should be denied as the request places school children and drivers in [h]arm’s way.” AWM Associates, LLC further asked, “Has NSTA conducted any research to identify the root cause of high turnover rates and taken corrective actions to repair the issues that cause drivers to quit as soon as they start?” Jennifer Brunette stated: “In our company it would handicap our drivers from making extra money due to the restriction that is placed on their license. They are class B, CDL drivers and should be held to the same standards of every CDL driver.”

The National Association of State Directors of Pupil Transportation Services (NASDPTS) commented that it was “concerned by the cost states would incur to change the current testing process. Licensing and testing agencies would have to update their systems, all trainers and third-party testers would need to be trained on the waiver and law enforcement would need to be trained on the additional license. NASDPTS urges FMCSA to consider the burdensome costs, both financial and in work hours, to states before considering such a requirement.”

NASDPTS further commented: “NASDPTS continues to believe that the unintended consequences of this waiver have result[ed] in an increased risk to safety. Many public-school transportation fleets rely upon school bus drivers to perform pre-trip inspections. In addition, many rural school bus drivers take their buses home each night and therefore must perform the pre-trip inspections themselves.” NASDPTS also noted “there is also a shortage of school bus maintenance personnel facing the school transportation industry and to not ensure all school bus drivers are capable of performing the inspection themselves could leave a district shorthanded or in the position of compromising safety . . . NASDPTS believes that if a driver is capable of adequately ensuring safety in an emergency, then that same driver

is capable of inspecting under the hood of a vehicle.” NASDPTS added that it “has great unease with limiting drivers to intrastate only operations as state lines are not always easily avoided in school transportation. In the State of Vermont, for example, school bus drivers often cross state lines even in home-to-school transportation as in doing so can result in shorter route distances and times.”

The American Association of Motor Vehicle Administrators (AAMVA) did not oppose the exemption but had technical concerns and stated, “[t]esting experience tells us that of all the applicable testing requirements, being able to identify the under the hood components is not one of the more taxing requirements on applicants. AAMVA also notes that to date, not many jurisdictions have utilized the available exemption, and we remain unsure that this specific relief will amount to a dramatic increase in the number of eligible school bus driver applicants.” AAMVA also commented that the under-the-hood testing component “may prevent safety critical issues, like fire prevention or other hazard mitigation prior to the onboarding of children.” AAMVA also noted that “the school bus endorsement, in conjunction with a passenger endorsement, may be transferred to general passenger carrying duties or other commercial vehicle operations that have nothing to do with the school bus endorsement—but the exemption may provide individual testing relief.” Finally, AAMVA commented that “there is no way for licensing agencies to currently differentiate the record of someone who has been granted relief from this specific exemption from those that have not. Meaning, that if someone is initially granted the exemption and moves to another jurisdiction, the new jurisdiction of record may not know that the applicant was previously subject to an exemption that may not conform with their own testing requirements.”

The National Association of Pupil Transportation (NAPT) did not oppose the exemption but commented, “[i]t is our belief that such a long-term extension needs to be based in evidence that the exemption is working effectively and that the continued exemption would not compromise safety for the children who ride our yellow school buses.” The NAPT asked if FMCSA has “data that demonstrates that the ‘under the hood’ component has led to any of the following (1) candidates refusing to complete the test; (2) trainees deciding not to continue because of the test; or (3) CDL candidates failing the test because of the

component?” The NAPT also asked if FMCSA has data demonstrating that the exemption has increased the numbers of school bus drivers, about the experiences of States that have implemented the exemption, and why many States have not implemented the exemption. NAPT also suggested consideration of information on the extent to which potential drivers have abandoned their pursuit of a CDL because of other ELDT requirements that might be unrelated to the characteristics of school bus driving.

VI. FMCSA Safety Analysis and Agency Decision

FMCSA has evaluated NSTA’s application and the public comments and grants the exemption renewal request for a two-year period. Due to the limited scope, terms, conditions, and restrictions of the exemption and the existing regulatory requirements that remain in place, FMCSA has determined that the “under-the-hood” exemption will likely achieve a level of safety that is equivalent to the level of safety that would be obtained absent the exemption. The exemption does not apply to the remaining elements of the pre-trip vehicle inspection components of the skills test, as set forth in 49 CFR 383.113(a)(1)(ii–ix). Accordingly, drivers obtaining CDLs under this exemption will have demonstrated the ability to safely operate the special features of a school bus.

Further, because school buses are typically operated for relatively short distances, mechanics or other qualified personnel can readily provide roadside assistance in the event of an engine malfunction. The exemption does not change FMCSA’s vehicle maintenance requirements in 49 CFR part 396, including that every motor carrier must systematically inspect, repair, and maintain all vehicles (49 CFR 396.3) and that unsafe operations of a CMV are forbidden (49 CFR 396.7). All State or local school bus inspection maintenance standards continue to apply. In response to concerns about costs, FMCSA notes that use of the exemption is optional for States, as a State may elect to continue to require all CDL applicants to meet the requirements of 49 CFR 383.113(a)(1)(i). As it pertains to bus routes that require crossing state lines, the exemption is expressly limited to intrastate operations and drivers obtaining licenses under the exemption must adhere to that restriction. A driver who was granted a CDL under this exemption simply would not be eligible to drive a school bus on a route that crosses State lines; to drive on such a route would require a CDL without a K

restriction granted upon passing the full skills test.

FMCSA believes requiring States to include “school bus only” and K restrictions on CDLs issued under this exemption per 49 CFR 383.153(a)(10)(vii) and (ix) addresses concerns about drivers operating under the exemption moving to a jurisdiction that did not adopt the exemption. The new jurisdiction will become aware of these restrictions when driver applicants surrender their old CDLs, as required by 49 CFR 383.71(c)(4).

FMCSA agrees with comments from AAMVA and NAPT that additional data would be useful to examine the impact of a longer-term exemption. FMCSA therefore requires States report to FMCSA on a monthly basis the names and CDL numbers of drivers who are issued a CDL pursuant to the terms of this exemption.

VII. Exemption Decision

A. Grant of Renewal of Exemption

This exemption covers States for the period beginning at 12:00 a.m. (ET) on November 28, 2024, through 11:59 p.m. on November 28, 2026. Under this exemption, a State may, but is not required to, waive the engine compartment portion of the pre-trip vehicle inspection skills test, set forth in 49 CFR 383.113(a)(1)(i), only for CDL applicants seeking the S and P endorsements, subject to the K restriction limiting their operation to intrastate commerce. States issuing CDLs pursuant to this exemption are not subject to the requirement in 49 CFR 383.133(c)(1) that this portion of the pre-trip vehicle inspection test be administered in accordance with an FMCSA pre-approved examiner information manual.

FMCSA intends to continue to closely monitor the safety impacts of the relief granted under this exemption. As necessary, FMCSA may take action to modify the exemption, including scaling back the regulatory relief provided, or to terminate the exemption sooner, if conditions warrant.

B. Terms and Conditions

States issuing CDLs pursuant to this exemption must abide by the following terms and conditions:

1. The State driver's licensing agency must submit the names and CDL numbers of drivers who are issued a CDL pursuant to the terms of this exemption, as authorized by 49 CFR 383.73(h) and 384.225(e)(2), monthly to MCPSD@dot.gov.

2. The CDL credential must conform to the requirements of 49 CFR part 383, subpart J.

3. When issuing a K-restricted CDL with the S and P endorsements pursuant to this exemption, States must continue to comply with the applicable provisions set forth in 49 CFR 383.73.

4. When issuing a K-restricted CDL with the S and P endorsements pursuant to this exemption, States must place a school bus only restriction on the CDL in accordance with 49 CFR 383.153(a)(10)(ix).

5. States must conduct the remaining pre-trip vehicle inspection components of the skills test for drivers subject to this exemption, as set forth in 49 CFR 383.113(a)(1)(ii–ix).

6. This exemption applies only to the intrastate operation of school buses used to transport pre-primary, primary, or secondary school students from home to school, from school to home, or to and from school-sponsored events, as defined in 49 CFR 383.5.

C. Termination

FMCSA does not believe that drivers issued CDLs under the exemption will experience any deterioration of safety below the level that would be achieved without the exemption. The exemption will be rescinded if: (1) States fail to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).

Vincent G. White,

Deputy Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2021–0080; Notice 2]

FCA US LLC; Receipt of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: FCA US LLC f/k/a Chrysler Group LLC (collectively referred to as “FCA US”) has determined that certain model year (MY) 2018–2022 Alfa Romeo Stelvio motor vehicles do not fully comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 111, *Rear Visibility*. FCA US filed a

noncompliance report dated September 21, 2021. FCA US subsequently petitioned NHTSA on October 14, 2021, for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety. This notice announces receipt of FCA US’ petition and amended petition.

DATES: Send comments on or before January 2, 2025.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited in the title of this notice and submitted by any of the following methods:

- **Mail:** Send comments by mail addressed to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery:** Deliver comments by hand to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except for Federal holidays.

- **Electronically:** Submit comments electronically by logging onto the Federal Docket Management System (FDMS) website at <https://www.regulations.gov/>. Follow the online instructions for submitting comments.

- Comments may also be faxed to (202) 493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to <https://www.regulations.gov/>, including any personal information provided.

All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and will be considered. All comments and supporting materials received after the closing date will also be filed and will be considered to the fullest extent possible.

When the petition is granted or denied, notice of the decision will also be published in the **Federal Register**

pursuant to the authority indicated at the end of this notice.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the internet at <https://www.regulations.gov> by following the online instructions for accessing the docket. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000 (65 FR 19477–78).

SUPPLEMENTARY INFORMATION:

I. Overview

FCA US has determined that certain MY 2018–2022 Alfa Romeo Stelvio motor vehicles do not fully comply with the requirements of paragraphs S2 and S5.5.1 of FMVSS No. 111, *Rear Visibility* (49 CFR 571.111). FCA US filed a noncompliance report dated September 21, 2021, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports*. FCA US subsequently petitioned NHTSA on October 14, 2021, for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety, pursuant to 49 U.S.C. 30118(d) and 30120(h) and 49 CFR part 556, *Exemption for Inconsequential Defect or Noncompliance*.

NHTSA previously published notice of receipt of FCA US' petition on June 17, 2022, in the **Federal Register** (87 FR 36573). FCA US submitted an amended petition to NHTSA on July 30, 2024, that broadened the scope of FCA US' petition. Therefore, NHTSA invites interested persons to comment on FCA US' petition and supplemental information. This notice of receipt of FCA US' petition and amended petition is published under 49 U.S.C. 30118 and 30120 and does not represent any Agency decision or other exercise of judgment concerning the merits of the petition.

II. Vehicles Involved

Approximately 43,701 MY 2018–2022 Alfa Romeo Stelvio motor vehicles manufactured between April 12, 2017, and August 27, 2021, are potentially involved.

III. Noncompliance

FCA US explains that the noncompliance is that the subject vehicles are equipped with rearview camera displays that when tested to

FMVSS No. 111, covers a required portion of a test object and therefore, do not fully meet the field of view requirements outlined in paragraphs S2 and S5.5.1 of FMVSS No. 111.

Specifically, the rearview camera display includes “dynamic gridlines” that project the vehicle to be wider than it is. As a result, the “dynamic gridlines” partially cover the lower inside edges of the front test object when the steering wheel is straight.

IV. Rule Requirements

Paragraphs S2 and S5.5.1 of FMVSS No. 111 include the requirements relevant to this petition. Paragraph S2 of FMVSS No. 111 specifies that the purpose of this standard is to reduce the number of deaths and injuries that occur when the driver of a motor vehicle does not have a clear and reasonably unobstructed view to the rear. Paragraph S5.5.1 of FMVSS No. 111 requires the rearview image to include: (a) A minimum of a 150-mm wide portion along the circumference of each test object located at positions F and G; and (b) the full width and height of each test object located at positions A through E, when tested in accordance with the procedures in S14.1 of FMVSS 111.

V. Summary of FCA US' Petition

The following views and arguments presented in this section, V. Summary of FCA US' Petition and Amended Petition, are the views and arguments provided by FCA US. They have not been evaluated by the Agency and do not reflect the views of the Agency.

A. Summary of FCA's Petition

In its petition, FCA US describes the subject noncompliance and explains that it is caused by an incorrect calibration in the subject vehicles. According to FCA US the subject noncompliance is inconsequential to motor vehicle safety because the subject noncompliance “does not create an unclear or unreasonably obstructed view to the rear.” FCA US specifies that although the subject noncompliance exists, the obstruction caused by the gridlines while performing the FMVSS No. 111 test is “transitory” and does not “significantly obstruct the view to the rear.”¹ Further, the gridlines will move rearward as the vehicle does, resulting in the test objects to be “displayed in full.”

FCA US quoted an excerpt from the notice of final rule for FMVSS No. 111 in which FCA US says that NHTSA

“acknowledged that over lays, such as gridlines, could provide safety-related benefits.”

B. Summary of FCA's Amended Petition

In its amended petition, FCA US adds that an analysis of the gridline's overlap with the lower inner portion of test object E, which exceeds that of test object D, shows that the overlap is smaller than the size of a seated Riley Low Birth Weight Infant, the smallest test dummy, as referenced by the University of Michigan Transport Research Institute and 49 CFR part 572.² While FCA US acknowledges that the gridline intersects a portion of the test object specified in FMVSS No. 111, FCA US believes that the obstruction is minimal and insufficient to cover the area where a small child would be seated or lying at the point of the gridline meets the test object.

FCA US concludes that the subject noncompliance is inconsequential as it relates to motor vehicle safety, and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that FCA US no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after FCA US notified them that the subject noncompliance existed.

(Authority: 49 U.S.C. 30118, 30120; delegations of authority at 49 CFR 1.95 and 501.8)

Otto G. Matheke III,

Director, Office of Vehicle Safety Compliance.

FOR FURTHER INFORMATION CONTACT:

Ahmad Barnes, General Engineer, NHTSA, Office of Vehicle Safety Compliance, (202) 366–7236.

SUPPLEMENTARY INFORMATION:**I. Overview**

DTNA determined that one MY 2022 Western Star 4900 truck tractor does not fully comply with section 5.2 of FMVSS No. 136, *Electronic Stability Control Systems for Heavy Vehicles*. (49 CFR 571.136).

DTNA filed a noncompliance report dated February 28, 2024, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports*. DTNA petitioned NHTSA on March 22, 2024, for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety, pursuant to 49 U.S.C. 30118(d) and 30120(h) and 49 CFR part 556, *Exemption for Inconsequential Defect or Noncompliance*.

This notice of receipt of DTNA’s petition is published under 49 U.S.C.

30118 and 30120 and does not represent any agency decision or another exercise of judgment concerning the merits of the petition.

II. Vehicles

Involved One MY 2022 Western Star 4900 truck tractor, manufactured on October 6, 2021, was reported by the manufacturer.

III. Rule Requirements

Paragraph S5.2 of FMVSS No. 136 includes the requirements relevant to this petition. FMVSS No. 136 establishes the standards for, and requires the installation of, electronic stability control (ESC) systems in certain heavy vehicles for the purpose of reducing loss of control and rollovers. The system’s operational requirements outlined in paragraph S5.2 are:

- (1) The ESC system must function when the vehicle is traveling at speeds greater than 20 km/h (12.4 mph), while reversing, and during system initialization.
- (2) The ESC system must remain capable of activation, even when the antilock brake system or the traction control system is engaged.

IV. Noncompliance

DTNA explains that the subject vehicle does not conform to FMVSS No. 136 paragraph S5.2 because it is equipped with a function that deactivates the required ESC system. Specifically, the subject vehicle is equipped with an “off-road mode” that the driver can activate which deactivates the vehicle’s ESC system, including at speeds above 20 km/h (12.4 mph).

V. Summary of DTNA Petition

The following views and arguments presented in this section, “V. Summary of DTNA’s Petition,” are the views and arguments provided by DTNA. They have not been evaluated by the Agency and do not reflect the views of the Agency. DTNA describes the subject noncompliance and contends that the noncompliance is inconsequential as it relates to motor vehicle safety.

DTNA reports that the subject vehicle was inadvertently equipped with a feature that disables the ESC functionality. DTNA states that this feature, which is commonly used in vocational trucks for off-road conditions, was also used in truck tractors prior to the implementation of FMVSS No. 136. DTNA asserts that this feature is necessary for vocational use in off-road conditions that antilock brake (ABS) and electronic stability control (ESC) systems are not designed to handle effectively. DTNA explains that

the feature enables wheel locking to reduce stopping distances on uneven terrain and surfaces with poor traction, such as dirt or gravel. DTNA notes that the subject noncompliance has been corrected in production, and the off-road system is no longer installed on DTNA's truck tractors subject to FMVSS No. 136.

DTNA explains that ABS and ESC systems are not optimized for off-road use and may impact vehicle safety in such settings. DTNA states that while ABS and ESC systems were designed and tested for driving on paved roads, they do not account for driving on surfaces with irregularities. DTNA cites brake supplier ZF, which asserts that vehicles tuned for off-road driving is safer without ABS/ESC functions in those conditions, not less. According to ZF, ESC systems require accurate vehicle speed data based on the reference speed. The reference speed is normally determined by a reading from a non-driven steer axle, as that axle is not influenced by drive slip; by definition, however, all-wheel-drive vehicles do not have a non-driven steer axle. This limitation is addressed in modern trucks not subject to FMVSS No. 136 by disabling ESC when the front axle is engaged by the transfer case. DTNA further highlights that ZF representatives indicate that off-road driving requires more aggressive maneuvers, which exceed the thresholds of ABS/ESC systems designed for highway use. Additionally, the inertial sensors and algorithms designed for highway conditions, may inadvertently activate inappropriately in off-road conditions.

According to DTNA, the optional off-road mode makes the vehicle safer in off-road conditions. DTNA's petition cites a graph from SAE International's report J2246 (2014) to illustrate that ABS systems are optimized for hard, paved surfaces, which typically involves a wheel slip ratio of around 20 percent before arresting longitudinal force. DTNA notes that off-road driving often occurs on looser, more deformable surfaces with higher wheel slip ratios. DTNA states that the ABS algorithm, which limits wheel slip, may result in sub-optimal performance in these conditions. Instead, DTNA suggests that an algorithm allowing for wheel lock-up in these conditions would provide superior stopping distance on loose, deformable surfaces, particularly for trained commercial drivers who select the off-road mode.

DTNA explains that prohibiting the optimization of vocational vehicles for off-road environments restricts their ability to complete their tasks. DTNA's

petition includes a table (Figure 3) showing that while vehicles in normal operation mode are compliant and optimal for paved road conditions, they may have difficulties when used on off-road terrain. DTNA contends that while vehicles in off-road mode are not compliant, they are unlikely to be operated on paved roads as all drivers of the subject vehicle should have a commercial driver's license and training as well as the presence of an off-road mode indicator on the instrument cluster. Vehicles in normal operation mode in off-road conditions are compliant but not optimal for the conditions and are difficult to operate. DTNA asserts that vehicles in off-road mode in off-road conditions are, while noncompliant, are the best suited for off-road conditions.

DTNA notes that while NHTSA might be concerned that this off-road function may be used on road conditions, this is unlikely because the system must be manually engaged before it can activate, and the instrument cluster indicates when off-road mode is engaged. Additionally, the system cannot be accidentally left on as it disengages automatically after the vehicle is shut off. DTNA also emphasizes that drivers of the subject vehicle must have commercial driver's licenses, ensuring that they are trained and familiar with commercial vehicles and would understand the off-road function and its activation.

DTNA notes that light-duty trucks are allowed to be equipped with a switch that disables the ESC system, in accordance with FMVSS No. 126. Citing NHTSA's rationale from the FMVSS No. 126 final rule on April 6, 2007 (72 FR 17236), DTNA states that NHTSA recognized the need to temporarily disable the ESC in certain conditions where the system could hinder vehicle performance. DTNA further notes that NHTSA permitted the option to temporarily disable ESC because ESC is not suited for certain conditions and may be an unnecessary impediment to the operation of a vehicle in those conditions and without the ability to temporarily disable the function, drivers may disable it entirely. DTNA points out that similar to in light-duty trucks, the heavy-duty vehicle in question defaults back to ESC enabled mode after the vehicle is turned off. DTNA also suggests that the conditions in which ESC might be temporarily disabled and reactivated are similar to those considered by NHTSA for light duty vehicles, which NHTSA concluded allowed for an appropriate level of safety.

Experienced commercial vehicle drivers highlight the necessity of ESC disablement in off-road environments. Drivers working in the construction, mining, logging, and forestry industries agree that standard ABS and ESC systems are disruptive and counterproductive in the off-road environments where they frequently work. Rugged off-road conditions present challenges that could and would not exist in highway conditions and would therefore necessitate a different approach to vehicle control.

Drawing from customer complaints, DTNA cites real world situations in which the mandatory ABS and ESC systems in question are frustrating and inadequate in off-road conditions. According to one customer, it has become such a commonplace issue that dealers in the Canadian logging industry "predominantly order logging trucks as trucks (rather than truck tractors) to avoid ESC."

(1) DTNA refers to NHTSA precedent to highlight the importance of prioritizing real-world safety benefits when necessary. DTNA compares its petition to the 1988 D.C. Circuit Court case *U.S. v. General Motors Corp.* also known as the "X-Cars Case" (6556 F. Supp. 15555, D.D.C. 1987). DTNA summarizes that in the "X-Cars Case," the D.C. Circuit Court recognized the propensity of those vehicles to lock up their wheels during certain braking events but concluded that the risk to motor vehicle safety was insignificant and did not rise to the level of a defect posing an unreasonable risk to motor vehicle safety. DTNA notes that the testing procedures outlined in FMVSS No. 136 were based on conditions like a "solid-paved surface" with a peak friction coefficient of 1.02 and a slope of 0 percent to 1 percent, while surfaces with irregularities like dips and large cracks, are unsuitable for testing under the standard. However, DTNA believes this does not reflect real-world scenarios where wheel lock up may be necessary under certain circumstances.

DTNA also mentions that NHTSA maintained its decision to deny ESC disablement functions in FMVSS No. 136 as part of the rulemaking process as neither Bendix nor Meritor WABCO provided justification for why disablement would be beneficial in off-road conditions. (80 FR 36085, June 23, 2015.) DTNA states that while NHTSA acknowledged Bendix's assertion that the current ESC systems were optimized for on-road and mild off-road conditions, more severe off-road conditions may require optimization better suited to those conditions. DTNA suggests that this acknowledgment

implies that certain ESC systems may not perform optimally in severe off-road conditions, which are relevant to operators of the subject vehicle.

DTNA concludes by stating its belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety and its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that DTNA no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after DTNA notified them that the subject noncompliance existed.

(Authority: 49 U.S.C. 30118, 30120; delegations of authority at 49 CFR 1.95 and 501.8)

Otto G. Matheke III,

Director, Office of Vehicle Safety Compliance.

BILLING CODE 4910–59–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons

are generally prohibited from engaging in transactions with them.

DATES: This action was issued on September 25, 2024. See **SUPPLEMENTARY INFORMATION** for relevant dates.

FOR FURTHER INFORMATION CONTACT:

OFAC: Associate Director for Global Targeting, 202–622–2420; or Assistant Director for Sanctions Compliance, 202–622–2490 or <https://ofac.treasury.gov/contact-ofac>.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: <https://ofac.treasury.gov>.

Notice of OFAC Actions

On September 25, 2024, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

Individuals

1. VICTOR, Prophane (a.k.a. PROFANE, Victor; a.k.a. PROPHANE, Victor), 64 Pelerin 5, Petion-Ville, West, HT6142, Haiti; 3, Rue Marcelin, Tabarre 61, Tabarre, Ouïest, HT6125, Haiti; DOB 08 Feb 1969; POB Port-au-Prince, Haiti; nationality Haiti; citizen Haiti; Gender Male; Passport R10097145 (Haiti) expires 09 May 2031; National ID No. 0033760991 (Haiti) (individual) [GLOMAG].

Designated pursuant to section (1)(a)(iii)(A)(3) of Executive Order 13818 of December 20, 2017, "Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption," 82 FR 60839, 3 CFR, 2017 Comp., p. 399, (E.O. 13818) for being a person who has materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services to or in support of an entity, including any government entity, that has engaged in, or whose members have engaged in serious human rights abuse, where the activity is conducted by a foreign person.

2. ELAN, Luckson (Latin: ÉLAN, Luckson) (a.k.a. ELAN, Lucson; a.k.a. "GENERAL LUCKSON"; a.k.a. "JENERAL LUCKSON"), Artibonite Department, Haiti; DOB 06 Jan 1988; nationality Haiti; Gender Male (individual) [GLOMAG].

Designated pursuant to section (1)(a)(ii)(A) and (1)(a)(ii)(C)(1) of E.O. 13818 for being a foreign person who is responsible for or complicit in, or has directly or indirectly engaged in, serious human rights abuse and is or has been

a leader or official of an entity, including any government entity, that has engaged in, or whose members have engaged in serious human rights abuse relating to the leader's or official's tenure.

Notice of OFAC Action

On November 26, 2024, OFAC determined that the persons identified below meet one or more of the criteria for the imposition of sanctions set forth in section 1(a)–(c) of Executive Order 14059 of December 15, 2021, "Imposing Sanctions on Foreign Persons Involved in the Global Illicit Drug Trade," 86 FR 71549 (December 17, 2021) (E.O. 14059). OFAC has selected to impose blocking sanctions pursuant to section 2(a)(i) of E.O. 14059 on the persons identified below.

Individuals

1. CARRILLO SAPIEN, Ildelfonso (a.k.a. CARRILLO SAPIEN, Idelfonso; a.k.a. "El Chivo"), Mexico; DOB 21 Aug 1976; POB Veracruz, Mexico; nationality Mexico; Gender Male; C.U.R.P. CASI760821HVZRPL04 (Mexico) (individual) [ILLICIT-DRUGS-EO14059] (Linked To: GULF CARTEL).

Designated pursuant to section (1)(b)(iii) of E.O. 14059 for being owned, controlled, or directed by, or having acted or purported to act for or on behalf of, directly or indirectly, Gulf Cartel, a person sanctioned pursuant to E.O. 14059.

2. DECUIR GARCIA, Raul (a.k.a. "La Burra"), Mexico; DOB 14 Mar 1971; POB Tamaulipas, Mexico; nationality Mexico; Gender Male; C.U.R.P. DEGR710314HVZCRL01 (Mexico) (individual) [ILLICIT-DRUGS-EO14059] (Linked To: GULF CARTEL).

Designated pursuant to section (1)(b)(iii) of E.O. 14059 for being owned, controlled, or directed by, or having acted or purported to act for or on behalf of, directly or indirectly, Gulf Cartel, a person sanctioned pursuant to E.O. 14059.

3. GUERRA SALINAS, Ismael (a.k.a. "El Comandante"; a.k.a. "Mayelo"), Mexico; DOB 01 Jun 1990; POB Tamaulipas, Mexico; nationality Mexico; Gender Male; C.U.R.P. GUSI900601HTSRLS09 (Mexico) (individual) [ILLICIT-DRUGS-EO14059] (Linked To: GULF CARTEL).

Designated pursuant to section (1)(b)(iii) of E.O. 14059 for being owned, controlled, or directed by, or having acted or purported to act for or on behalf of, directly or indirectly, Gulf Cartel, a person sanctioned pursuant to E.O. 14059.

4. GUERRA SALINAS, Omar (a.k.a. "Samorano"), Mexico; DOB 11 Apr 1986; POB Tamaulipas, Mexico; nationality Mexico; Gender Male; C.U.R.P. GUSO860411HTSRLM03 (Mexico) (individual) [ILLICIT-DRUGS-EO14059] (Linked To: GULF CARTEL).

Designated pursuant to section (1)(b)(iii) of E.O. 14059 for being owned, controlled, or directed by, or having acted or purported to act for or on behalf of, directly or indirectly, Gulf Cartel, a person sanctioned pursuant to E.O. 14059.

5. SIERRA ANGULO, Francisco Javier (a.k.a. "El Borrado"), Mexico; DOB 24 Dec 1988; POB Tamaulipas, Mexico; nationality Mexico; Gender Male; C.U.R.P. SIAF881224HTSRNR05 (Mexico) (individual) [ILLICIT-DRUGS-EO14059] (Linked To: GULF CARTEL).

Designated pursuant to section (1)(b)(iii) of E.O. 14059 for being owned, controlled, or directed by, or having acted or purported to act for or on behalf of, directly or indirectly, Gulf Cartel, a person sanctioned pursuant to E.O. 14059.

Notice of OFAC Action(s)

On September 12, 2024, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

Individual

1. LY, Yong Phat (a.k.a. "PAD SUPA"; a.k.a. "PAT SUPAPHA"; a.k.a. "PHAT SUPHAPHA"; a.k.a. "PHAT, Suphapha"; a.k.a. "PUT SUPAPA"), 9352 Moo 1 Wangkrajai Amphur Muang, Trat Trat 23000, Thailand; DOB 07 Jan 1958; POB Thmor Sor Village, Thmor Sor Commune, Botum Sakor District, Koh Kong Province, Cambodia; alt. POB Trat, Thailand; nationality Cambodia; alt. nationality Thailand; Gender Male; National ID No. 5230200031049 (Thailand) (individual) [GLOMAG].

Designated pursuant to section (1)(a)(ii)(A) of Executive Order 13818 of December 20, 2017, "Blocking the

Property of Persons Involved in Serious Human Rights Abuse or Corruption," 82 FR 60839, 3 CFR, 2017 Comp., p. 399, (E.O. 13818) for being a foreign person who is responsible for or complicit in, or has directly or indirectly engaged in, serious human rights abuse.

Entities

1. L.Y.P. GROUP CO., LTD (a.k.a. L.Y.P. GROUP), Neang Kok, Bak Khlang, Mondol Seima, Koh Kong 9351, Cambodia; N. 205-209, Mao Tse Tong Boulevard, Sangkat, Toul Svay Prey I, Khan Chamkamo, Phnom Penh, Cambodia; website www.lypgroup.com; Email Address fc@gardencityhotel.com.kh; Organization Established Date 28 Sep 2017;

Organization Type: Short term accommodation activities; Tax ID No. L001-360000010 (Cambodia) [GLOMAG] (Linked To: LY, Yong Phat).

Designated pursuant to section (1)(a)(ii)(A) of Executive Order 13818 of December 20, 2017, "Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption," 82 FR 60839, 3 CFR, 2017 Comp., p. 399, (E.O. 13818) for being a foreign person who is responsible for or complicit in, or has directly or indirectly engaged in, serious human rights abuse.

2. O-SMACH RESORT (a.k.a. O SMACH RESORT; a.k.a. O'SMACH CASINO RESORT), National Highway 68, Krong Samraong, Cambodia; Organization Established Date 01 Jan 2000; Organization Type: Short term accommodation activities; alt. Organization Type: Gambling and betting activities [GLOMAG] (Linked To: LY, Yong Phat).

Designated pursuant to section (1)(a)(ii)(A) of Executive Order 13818 of December 20, 2017, "Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption," 82 FR 60839, 3 CFR, 2017 Comp., p. 399, (E.O. 13818) for being a foreign person who is responsible for or complicit in, or has directly or indirectly engaged in, serious human rights abuse.

3. GARDEN CITY HOTEL, #205, Mao Tse Tong Boulevard (388), Sangkat Chamkarmon, Phnom Penh, Cambodia; Street Ly Yong Phat, Phum Prek Tarath, Khum Prek Tasek Khan, 12111, Cambodia-Japan Friendship Bridge, Phnom Penh, Cambodia; website www.gardencityhotel.com.kh; Email Address info@gardencityhotel.com.kh; Phone Number 855 66 678 716; Organization Type: Short term accommodation activities [GLOMAG] (Linked To: LY, Yong Phat).

Designated pursuant to section (1)(a)(iii)(B) of Executive Order 13818 of December 20, 2017, "Blocking the

Property of Persons Involved in Serious Human Rights Abuse or Corruption,” 82 FR 60839, 3 CFR, 2017 Comp., p. 399, (E.O. 13818) for being owned or controlled by, or having acted or purported to act for or on behalf of, directly or indirectly, LY, an individual concurrently designated pursuant to E.O. 13818.

4. KOH KONG RESORT (a.k.a. KOH KONG CASINO RESORT; a.k.a. KOH KONG RESORT AND CASINO; a.k.a. KOH RONG RESORT AND CASINO), Phum Cham Yeam, Khum Paklong, Srok Mondul Seyma, AH123, Khum Pak Khlang, Cambodia; Email Address *info@kohkongresort.com*; Phone Number 85 51 155 5706; Organization Established Date 1998; Organization Type: Short term accommodation activities [GLOMAG] (Linked To: LY, Yong Phat).

Designated pursuant to section (1)(a)(iii)(B) of Executive Order 13818 of December 20, 2017, “Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption,” 82 FR 60839, 3 CFR, 2017 Comp., p. 399, (E.O. 13818) for being owned or controlled by, or having acted or purported to act for or on behalf of, directly or indirectly, LY, an individual concurrently designated pursuant to E.O. 13818.

5. PHNOM PENH HOTEL, No. 53 Monivong Boulevard, Phnom Penh, Phnom Penh, Cambodia; No. 53 Monivong Boulevard, Sangkat Srah Chok, P.O. Box 1131, Phnom Penh 12201, Cambodia; website *www.phnompenhhotel.com*; Email Address *info@phnompenhhotel.com*; Phone Number 855 23 991 868; Organization Established Date 2003; Organization Type: Short term accommodation activities [GLOMAG] (Linked To: LY, Yong Phat).

Designated pursuant to section (1)(a)(iii)(B) of Executive Order 13818 of December 20, 2017, “Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption,” 82 FR 60839, 3 CFR, 2017 Comp., p. 399, (E.O. 13818) for being owned or controlled by, or having acted or purported to act for or on behalf of, directly or indirectly, LY, an individual concurrently designated pursuant to E.O. 13818.

Dated: September 12, 2024.

Lisa M. Palluconi,

Acting Director, Office of Foreign Assets Control, U.S. Department of the Treasury.

BILLING CODE 4810-AL-P

DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Purchases of Bank Checks and Drafts, Cashier's Checks, Money Orders, and Traveler's Checks

AGENCY: Departmental Offices, U.S. Department of the Treasury.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on these requests.

DATES: Comments should be received on or before January 2, 2025 to be assured of consideration.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Copies of the submissions may be obtained from Spencer W. Clark by emailing *PRA@treasury.gov*, calling (202) 927-5331, or viewing the entire information collection request at *www.reginfo.gov*.

SUPPLEMENTARY INFORMATION:

Financial Crimes Enforcement Network (FinCEN)

Title: Purchases of Bank Checks and Drafts, Cashier's Checks, Money Orders, and Traveler's Checks.

OMB Control Number: 1506-0057.

Type of Review: Extension without change of a currently approved collection.

Description: The Bank Secrecy Act (BSA) prohibits financial institutions from issuing any “bank check, cashier's check, traveler's check, or money order to any individual in connection with a transaction or group of such contemporaneous transactions which involves United States coins or currency (or such other monetary instruments as the Secretary may prescribe) in amounts or denominations of \$3,000 or more” unless (1) the financial institution verifies, through a signature card or

other account documentation or information, that the individual has a transaction account with the financial institution, and records the method of verification in accordance with regulations issued by the Secretary; or (2) the individual furnishes the financial institution with such forms of identification as the Secretary may require by regulation, and the financial institution verifies and records such information in accordance with regulations issued by the Secretary. To implement these requirements, FinCEN issued a regulation requiring financial institutions to maintain records related to the issuance or sale of bank checks and drafts, cashier's checks, money orders, and traveler's checks. The regulation applies to all financial institutions as defined in 31 CFR 1010.100(t). However, it is FinCEN's experience that banks and money services businesses (MSBs) are more likely than other categories of financial institution to issue or sell bank checks and drafts, cashier's checks, money orders, and traveler's checks.

Under 31 CFR 1010.415, financial institutions are required to maintain records of certain information related to the issuance or sale of bank checks and drafts, cashier's checks, money orders, and traveler's checks when the issuance or sale involves currency between \$3,000 and \$10,000, inclusive, to any individual purchaser of one or more of these instruments.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 23,207.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 23,207.

Estimated Time per Response: 7.5 hours.

Estimated Total Annual Burden Hours: 174,053.

Authority: 44 U.S.C. 3501 *et seq.*

SUPPLEMENTARY INFORMATION:

Bureau of the Fiscal Service (BFS)

Title: Schedule of Excess Risks.

OMB Control Number: 1530-0062.

Type of Review: Extension without change of a currently approved collection.

Description: The information contained in the Schedule of Excess Risks, FS 285-A (Schedule), is collected pursuant to 31 CFR 223.14 and Instruction VII of Treasury’s “Annual Letter to Executive Officers of Surety Companies” by the Surety Bond Branch (SBB). The Schedule provides a listing of risks, either written or assumed, that exceed a company’s underwriting limitation as established by the Treasury (for companies holding Certificates of Authority from Treasury) or in excess of 10 percent of that company’s Policyholders’ surplus (for companies applying for certification). Treasury has been mandated at 31 U.S.C. 9304 through 9308, to ensure that companies so certified by Treasury are solvent and able to carry out their contracts. The information contained in this Schedule assists in this analysis.

Form: FS Form 285-A.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 283.

Frequency of Response: One time, Quarterly.

Estimated Total Number of Annual Responses: 1,072.

Estimated Time per Response: 20 hours for new applications and 5 hours for quarterly renewals.

Estimated Total Annual Burden Hours: 5,660.

Authority: 44 U.S.C. 3501 *et seq.*

SUMMARY: The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on these requests.

DATES: Comments should be received on or before January 2, 2025 to be assured of consideration.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained from Spencer W. Clark by emailing PRA@treasury.gov, calling (202) 927-5331, or viewing the entire information collection request at www.reginfo.gov.

SUPPLEMENTARY INFORMATION:

Alcohol and Tobacco Tax and Trade Bureau (TTB)

1. Title: Volatile Fruit-Flavor Concentrate Plants—Applications and Related Records (TTB REC 5520/2).

OMB Control Number: 1513-0006.

Type of Request: Extension without change of a currently approved collection.

Description: Volatile fruit-flavor concentrates contain alcohol when made by an evaporative process from the mash or juice of a fruit. However, under the Internal Revenue Code (IRC) at 26 U.S.C. 5511, alcohol excise taxes and most other provisions of chapter 51 of the IRC do not apply to such concentrates if the manufacturers file applications, keep records, and meet certain statutory and regulatory requirements. Under that IRC authority, the Alcohol and Tobacco Tax and Trade Bureau (TTB) regulations in 27 CFR part 18 require volatile fruit-flavor concentrate manufacturers to register using form TTB F 5520.3 and file amendments to their registrations using that form or a letterhead application (depending on circumstances). Additionally, the regulations require concentrate manufacturers to maintain a record file of all approved registrations and related supporting documents. TTB uses the collected information to identify concentrate manufacturers and their operations to ensure that the tax provisions of the IRC are appropriately applied.

Form: TTB F 5520.3.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 55.

Frequency of Response: On Occasion.

Estimated Total Number of Annual Responses: 55.

Estimated Time per Response: 2 hours.

Estimated Total Annual Burden Hours: 110.

2. Title: Volatile Fruit-Flavor Concentrate Manufacturers—Annual Report, and Usual and Customary Business Records (TTB REC 5520/1).

OMB Control Number: 1513-0022.

Type of Request: Extension without change of a currently approved collection.

Description: Volatile fruit-flavor concentrates contain alcohol when made by an evaporative process from the mash or juice of a fruit. However, under the Internal Revenue Code (IRC) at 26 U.S.C. 5511, alcohol excise taxes and most other provisions of chapter 51 of the IRC do not apply to such concentrates if the manufacturers meet certain statutory and regulatory requirements. Under that IRC authority, the TTB regulations in 27 CFR part 18 require manufacturers of volatile fruit-flavor concentrates to submit an annual summary report using form TTB F 5520.2 in order to account for all volatile fruit-flavor concentrates produced, removed, or made unfit for beverage use. Such manufacturers compile this report from usual and

customary business records, which, under the regulations, respondents must retain for 3 years. TTB uses the collected information to ensure that the tax provisions of the IRC are appropriately applied.

Form: TTB F 5520.2.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 55.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 55.

Estimated Time per Response: 20 minutes.

Estimated Total Annual Burden Hours: 18.

Authority: 44 U.S.C. 3501 *et seq.*

BILLING CODE 4810-31-P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900-0897]

Agency Information Collection Activity Under OMB Review: Statement of Assurance of Compliance With 85 Percent Enrollment Ratios; Statement of Assurance of Compliance With 85 Percent Enrollment Ratios Continuation Sheet

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent by January 2, 2025.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: www.reginfo.gov/public/do/PRAMain, select “Currently under Review—Open for Public Comments”, then search the

list for the information collection by Title or “OMB Control No. 2900-0897.”

FOR FURTHER INFORMATION CONTACT: VA PRA information: Maribel Aponte, 202-461-8900, vacopaperworkreduact@va.gov.

SUPPLEMENTARY INFORMATION:

Title: Statement of Assurance of Compliance with 85 Percent Enrollment Ratios; Statement of Assurance of Compliance with 85 Percent Enrollment Ratios Continuation Sheet, VA Form 22-10215; VA Form 22-10215a.

OMB Control Number: 2900-0897, <https://www.reginfo.gov/public/do/PRASearch>.

Type of Review: Revision of a currently approved collection.

Abstract: The VA uses data from the VA Form 22-10215 and VA Form 22-10215a for this information collection to ensure the compliance of IHLs and NCD training institutions that are approved by the VA to ensure that no more than 85% of students in any approved program are students in receipt of financial support from the educational institution or by VA under title 38, U.S.C., or under title 10, U.S.C. Without this information, VA might pay benefits in error. Except as otherwise provided by regulation, VA shall not approve an enrollment in any course for an eligible Veteran, not already enrolled, for any period during which more than 85 percent of the students enrolled in the course are having all or part of their tuition, fees or other charges paid for them by the educational institution or by VA under title 38, U.S.C., or under title 10, U.S.C. This is known as the 85/15 Rule and is applicable to Institutions of Higher Learning (IHLs) and Non-College Degree postsecondary schools (NCDs). The requirements apply to all courses, not otherwise exempt, or waived, offered by all educational institutions, regardless of whether the institution is degree-granting, proprietary profit, proprietary nonprofit, eleemosynary, public and/or tax-supported. These schools are required to submit information necessary to determine if their programs of training are approved for the payment of VA educational assistance. This specified information is submitted either to VA or to the State Approving Agency (SAA) having jurisdiction over that school.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 89 FR 77583, September 23, 2024.

Affected Public: Educational Institutions.

Estimated Annual Burden: 1,814 hours.

Estimated Average Burden Per Respondent: 60 minutes.

Frequency of Response: Quarterly.

Estimated Number of Respondents: 1,814.

Authority: 44 U.S.C. 3501 *et seq.*

Dorothy Glasgow,

VA PRA Clearance Officer, (Alt.) Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900-0171]

Agency Information Collection Activity Under OMB Review: Application for Individualized Tutorial Assistance

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by clicking on the following link www.reginfo.gov/public/do/PRAMain, select “Currently under Review—Open for Public Comments”, then search the list for the information collection by Title or “OMB Control No. 2900-0171.”

FOR FURTHER INFORMATION CONTACT: VA PRA information: 202-461-8900, vacopaperworkreduact@va.gov.

SUPPLEMENTARY INFORMATION:

Title: Application for Individualized Tutorial Assistance, VA Form 22-1990t.

OMB Control Number: 2900-0171, <https://www.reginfo.gov/public/do/PRASearch>.

Type of Review: Revision of a currently approved collection.

Abstract: The VA uses the information collected to determine

eligibility and payment for tutorial assistance. Without the information on this form, VA would be unable to determine the applicant's eligibility for tutorial assistance.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register**

Notice with a 60-day comment period soliciting comments on this collection of information was published at 89 FR 79366, September 27, 2024.

Affected Public: Educational Institutions.

Estimated Annual Burden: 51 hours.

Estimated Average Burden per Respondent: 30 minutes.

Frequency of Response: Once annually.

Estimated Number of Respondents: 102.

No. 231

December 2, 2024

Part II

Department of the Treasury

Internal Revenue Service

26 CFR Part 1

Previously Taxed Earnings and Profits and Related Basis Adjustments;
Proposed Rule

DEPARTMENT OF THE TREASURY**Internal Revenue Service****26 CFR Part 1****[REG–105479–18]****RIN 1545–BO61****Previously Taxed Earnings and Profits and Related Basis Adjustments****AGENCY:** Internal Revenue Service (IRS), Treasury.**ACTION:** Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations regarding previously taxed earnings and profits of foreign corporations and related basis adjustments. The proposed regulations affect foreign corporations with previously taxed earnings and profits and their shareholders.

DATES: Written or electronic comments and requests for a public hearing must be received by March 3, 2025.

ADDRESSES: Commenters are strongly encouraged to submit public comments electronically. Submit electronic submissions via the Federal eRulemaking Portal at www.regulations.gov (indicate IRS and REG–105479–18) by following the online instructions for submitting comments. Requests for a public hearing must be submitted as prescribed in the “Comments and Requests for a Public Hearing” section. Once submitted to the Federal eRulemaking Portal, comments cannot be edited or withdrawn. The Department of the Treasury (Treasury Department) and the IRS will publish for public availability any comment submitted electronically or on paper to its public docket. Send paper submissions to: CC:PA:01:PR (REG–105479–18), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations generally, Elena M. Madaj at (202) 317–3576; concerning the portions of the proposed regulations relating to section 1502, Jeremy Aron-Dine at (202) 317–6847; concerning the portions of the proposed regulations relating to partnerships, Jennifer N. Keeney at (202) 317–6850; and concerning submissions of comments and requests for a public hearing, contact the Publications and Regulations Section of the Office of Associate Chief Counsel (Procedure and Administration) by email at publichearings@irs.gov (preferred) or by telephone at (202) 317–6901 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:**Authority**

This document contains proposed additions and amendments to 26 CFR part 1 (proposed regulations) under sections 959 and 961 and certain other provisions of the Internal Revenue Code (Code) regarding previously taxed earnings and profits (PTEP). As discussed in the Explanation of Provisions, the primary provisions of the proposed regulations are issued pursuant to the express delegations of authority under sections 245A(g), 743(b), 904(d)(7), 951A(f)(1)(B), 960(f), 961(a) through (c), 965(o), 986(c)(2), 989(c), and 1502. The proposed regulations are also issued pursuant to the express delegation of authority under section 7805(a).

Background*I. Scope*

The Background describes PTEP, including provisions giving rise to PTEP and provisions regarding the treatment of PTEP, and related guidance and issues under existing law. Any term used but not defined in this preamble has the meaning given to it in the proposed regulations.

*II. PTEP**A. Overview*

Sections 959 and 961 are intended to operate in tandem to prevent double taxation of PTEP, which is earnings and profits (E&P) of a foreign corporation described in section 959(c)(1) or (c)(2). Section 959 designates amounts of E&P as PTEP based on amounts included, or treated as included, in gross income with respect to the foreign corporation under section 951(a).

The remainder of this part II of the Background summarizes provisions giving rise to PTEP, provisions regarding the treatment of PTEP, and existing regulations under sections 959 and 961.

*B. Provisions Giving Rise to PTEP**1. Section 951(a)*

Section 951(a)(1)(A) requires a United States shareholder (as defined in section 951(b) or, if applicable, section 953(c)(1)(A)) of a foreign corporation to include in gross income its pro rata share of the corporation's subpart F income (as defined in section 952) for a taxable year of the corporation (subpart F income inclusion), if the corporation is a controlled foreign corporation (CFC) (as defined in section 957(a) or, if applicable, section 957(b) or 953(c)(1)(B)) at any time during the taxable year and the shareholder owns

(within the meaning of section 958(a)) stock of the corporation on the last day of the taxable year on which the corporation is a CFC (last relevant day). Pursuant to section 951(a)(1)(B), the United States shareholder is generally required to also include in gross income its amount determined under section 956 (section 956 amount) for the taxable year of the foreign corporation (section 956 inclusion). This amount represents an effective repatriation of E&P and is computed based on certain United States property held by the corporation. Ownership of stock within the meaning of section 958(a) means stock owned directly and stock owned indirectly through foreign entities, including domestic partnerships to the extent treated as foreign partnerships under § 1.958–1(d)(1) (discussed in part III.B of the Background). For purposes of the remainder of this preamble, a reference to stock ownership means stock owned within the meaning of section 958(a).

Section 951(a)(2) determines a United States shareholder's pro rata share of a foreign corporation's subpart F income by first allocating a portion of such subpart F income to the United States shareholder, and then reducing such allocation in accordance with section 951(a)(2)(B) to take into account certain distributions where ownership of the stock of the foreign corporation is acquired by the United States shareholder during the corporation's taxable year. *See* § 1.951–1(b). Subpart F income allocated to a United States shareholder before the application of section 951(a)(2)(B) is computed by multiplying the subpart F income by a fraction, the numerator of which is the portion of the foreign corporation's hypothetical distribution described in § 1.951–1(e) that would be distributed with respect to the shareholder's stock of the corporation, and the denominator of which is the amount of such hypothetical distribution. *See* § 1.951–1(e). The amount of the hypothetical distribution is equal to the foreign corporation's allocable E&P, which is generally the corporation's E&P for the taxable year (not reduced by distributions during the year). *See* § 1.951–1(e)(1)(ii).

A special rule under section 245A(e) treats certain hybrid dividends received by a CFC as subpart F income of the receiving CFC for purposes of section 951(a)(1)(A). Similarly, section 964(e)(4) treats certain gain from a sale of stock of a foreign corporation by a CFC as subpart F income of the selling CFC for purposes of section 951(a)(1)(A). Consequently, a United States shareholder of such a receiving CFC or selling CFC includes in gross income

under section 951(a)(1)(A) its pro rata share of such subpart F income.

2. Section 951A(a)

Pursuant to section 951A(a), a United States shareholder of a CFC is required to include in gross income its global intangible low-taxed income (GILTI inclusion). *See* § 1.951A-1(b). A United States shareholder's GILTI inclusion is determined by taking into account the shareholder's pro rata share of tested items (as defined in § 1.951A-1(f)(5)) of CFCs in which the shareholder owns stock, such as tested income, tested loss, and qualified business asset investment. *See* § 1.951A-1(c). A United States shareholder's pro rata share of a CFC's tested items is determined in the same manner as a pro rata share of subpart F income under section 951(a)(2), subject to certain modifications. *See* § 1.951A-1(d).

Section 951A(f)(1)(A) provides that a GILTI inclusion is treated in the same manner as a subpart F income inclusion for purposes of applying certain provisions of the Code, including sections 959 and 961. Section 951A(f)(1)(B) grants the Secretary authority to provide rules for applying section 951A(f)(1)(A) to other provisions of the Code in any case in which the determination of subpart F income is required to be made at the level of the CFC.

3. Section 1248(a) or (f)

Section 1248(a) requires a United States person that satisfies certain ownership requirements with respect to stock in a foreign corporation to include gain recognized on a sale or exchange of stock in such foreign corporation in gross income as a dividend, to the extent of the E&P of the foreign corporation attributable to the stock (including E&P of certain lower-tier foreign corporations pursuant to section 1248(c)(2), but not including PTEP pursuant to section 1248(d)(1)). Section 1248(f) provides similar rules for certain distributions in nonrecognition transactions.

Section 959(e) treats an amount included in gross income of any person as a dividend under section 1248(a) or (f) as an amount included in gross income under section 951(a)(1)(A), for purposes of section 959.

4. Section 965

The transition tax imposed under section 965 as part of the Tax Cuts and Jobs Act, Public Law 115-97, 131 Stat. 2054 (2017) (the Act) increased the subpart F income of certain foreign corporations and treated such foreign corporations as CFCs for purposes of

section 951 (if not already the case). Section 965(a) and (e). Consequently, a United States shareholder of such a foreign corporation generally included in gross income under section 951(a)(1)(A) its pro rata share of such additional subpart F income, subject to reduction under section 965(b) for certain E&P deficits attributable to stock of other foreign corporations owned by the shareholder.

For purposes of section 959, the transition tax also treated the amount of a reduction to a United States shareholder's inclusion with respect to a foreign corporation under section 965(b) as an amount included in the shareholder's gross income with respect to the foreign corporation under section 951(a). Section 965(b)(4)(A).

C. Provisions Regarding the Treatment of PTEP

1. Gross Income Exclusions Under Section 959

Section 959 prevents double taxation by excluding PTEP from gross income of United States persons and CFCs. *See* H.R. Rep. No. 87-1447, at A101-102 (1962).

Section 959(a) provides that, when PTEP of a foreign corporation is distributed to, or would otherwise be included under section 951(a)(1)(B) in gross income of, a United States shareholder whose inclusion under section 951(a) gave rise to the PTEP, the PTEP is excluded from the United States shareholder's gross income. Under successor rules within section 959(a), the exclusion extends to any other United States person who acquires from any person any portion of the United States shareholder's interest in the foreign corporation (subject to any proof of identity rules that may be prescribed by the Secretary).

Section 959(b) applies for purposes of section 951(a) and provides that, when PTEP of a CFC is distributed through a chain of ownership described under section 958(a), the PTEP is excluded from the gross income of another CFC in the chain for purposes of applying section 951(a) to such CFC with respect to the United States shareholder whose inclusion under section 951(a) gave rise to the PTEP. Under successor rules within section 959(b), the exclusion extends to any CFC of any other United States shareholder who acquires from any person any portion of the United States shareholder's interest in the CFC (subject to any proof of identity rules that may be prescribed by the Secretary).

Section 959(c) treats PTEP as distributed before E&P that is not PTEP.

It does so by allocating distributions first to PTEP described in section 959(c)(1) (PTEP resulting from a section 956 inclusion or PTEP that have been excluded under section 959(a)(2)), then to PTEP described in section 959(c)(2) (all other PTEP), and finally to non-PTEP (section 959(c)(3) E&P).

For purposes of section 959, section 951A(f)(1) treats the portion of a United States shareholder's GILTI inclusion that is allocated to a CFC in the same manner as a subpart F income inclusion.

Section 959(f) allocates a section 956 amount first to PTEP described in section 959(c)(2) and then to section 959(c)(3) E&P, taking into account distributions made by the foreign corporation. A section 956 amount is not allocated to PTEP described in section 959(c)(1) because, under section 956(a) and (b)(1), that PTEP is taken into account in determining the section 956 amount.

Thus, under section 959, a CFC's E&P for a taxable year of the CFC is first classified as PTEP to reflect any subpart F income inclusions or GILTI inclusions with respect to the CFC. Next, any distributions made by the CFC during the taxable year are allocated to PTEP (and such PTEP is reduced). Then, any section 956 amount with respect to the CFC is determined for the taxable year, which is allocated to remaining section 959(c)(2) PTEP (and such PTEP is reclassified as section 959(c)(1) PTEP). Finally, the CFC's E&P for the taxable year is classified as PTEP to reflect any inclusion under section 951(a)(1)(B).

2. Basis Adjustments Under Section 961

Section 961 describes rules that provide for basis increases to reflect amounts included in gross income under section 951(a) and basis reductions and gain recognition to reflect distributions of PTEP. Basis increases prevent undistributed PTEP of a foreign corporation from giving rise to gain or a subpart F income inclusion of a covered shareholder, and thus additional tax, in a sale or exchange of stock of the foreign corporation or property through which such stock is owned. *See* H.R. Rep. No. 87-1447, at A106 (1962); H.R. Rep. No. 105-148, at 529-30 (1997). Basis reductions and gain recognition prevent double benefits that would otherwise arise (for example, by ensuring a distribution of PTEP does not create a loss in the stock or other property on which the distribution is made because of basis provided under section 961 for the inclusion that gave rise to the PTEP).

Section 961(a) provides that, under regulations prescribed by the Secretary, a United States shareholder's basis in its

stock in a CFC, and basis in property through which it owns such stock, is increased by the amount included in the shareholder's gross income under section 951(a) with respect to such stock or property.

Section 961(b)(1) provides that, under regulations prescribed by the Secretary, when a United States shareholder or a United States person receives an amount that is excluded from gross income under section 959(a), the basis of the stock or other property with respect to which the amount is received is reduced by the amount so excluded. To the extent that an amount excluded from gross income under section 959(a) exceeds the basis of the stock or other property with respect to which it is received, section 961(b)(2) treats the amount as gain from the sale or exchange of property.

Section 961(c) provides that, under regulations prescribed by the Secretary, if a United States shareholder owns stock in a CFC that is owned by another CFC, then adjustments similar to the adjustments provided by section 961(a) and (b) are made to the basis of such stock, and the basis of stock in any other CFC through which the United States shareholder owns the stock of the first mentioned CFC, but only for the purposes of determining the amount included under section 951 in the gross income of such United States shareholder. Under successor rules within section 961(c), basis adjustments carry over to any other United States shareholder who acquires from any person any portion of the interest of the United States shareholder by reason of which the shareholder was treated as owning the relevant CFC stock (subject to any proof of identity rules that may be prescribed by the Secretary). Section 961(c) further provides that the adjustments described in section 961(c) do not apply to any stock owned by the United States shareholder to which a basis adjustment applies under section 961(a) or (b).

For purposes of section 961, section 951A(f)(1) treats the portion of a United States shareholder's GILTI inclusion that is allocated to a CFC in the same manner as a subpart F income inclusion.

Section 1.965–2(f)(1) generally provides that basis is not increased under section 961 to reflect PTEP resulting from section 965(b), but § 1.965–2(f)(2) permits taxpayers to elect to make certain basis adjustments.

3. Foreign Currency Gain or Loss Under Section 986(c)

Section 986(c)(1) requires the recognition of foreign currency gain or loss with respect to distributions of

PTEP attributable to movements in exchange rates between the date of the income inclusion that gave rise to the PTEP and the distribution of the PTEP. Section 986(c)(1) further provides that such foreign currency gain or loss is treated as ordinary income or loss from the same source as the associated income inclusion. Section 986(c)(2) provides that the Secretary shall prescribe regulations with respect to distributions of PTEP through tiers of foreign corporations. Section 989(c) provides that the Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of the subpart that includes section 986 (subpart J of part III, subchapter N, chapter 1, subtitle A of the Code).

Notice 88–71, 1988–2 C.B. 374 (1988 notice), provides guidance regarding foreign currency gain or loss with respect to PTEP and announced an intent to issue regulations consistent with the guidance. Under the 1988 notice, such foreign currency gain or loss is determined with respect to each separate category of income listed in section 904(d)(1) pursuant to a formula and is recognized immediately before certain sales or exchanges of stock of a foreign corporation with respect to undistributed PTEP of the foreign corporation. *See also* § 1.985–5(e)(2) (requiring a United States shareholder to recognize foreign currency gain or loss when a CFC changes its functional currency to the U.S. dollar); § 1.367(b)–2(j)(2)(i) (application of section 986(c) to certain nonrecognition).

Section 1.986(c)–1 addresses foreign currency gain or loss with respect to distributions of PTEP resulting from section 965. The rules provide that foreign currency gain or loss with respect to PTEP resulting from section 965(a) is determined based on movements in the exchange rate between December 31, 2017, and the time such PTEP is distributed, and that any such gain or loss recognized is reduced in the same proportion as the reduction by a section 965(c) deduction amount (as defined in § 1.965–1(f)(42)) of the section 965(a) inclusion amount (as defined in § 1.965–1(f)(38)) that gave rise to the PTEP. The rules also provide that section 986(c) does not apply with respect to distributions of PTEP resulting from section 965(b).

4. Foreign Income Taxes Under Sections 164(a), 901(a), and 960(b)

Section 164(a) generally provides that a taxpayer is allowed a deduction for certain foreign income taxes paid or accrued by the taxpayer.

Section 901(a) generally provides that a taxpayer choosing to credit foreign income taxes is allowed a credit for certain foreign income taxes paid or accrued by the taxpayer plus, in the case of a domestic corporation, the taxes deemed to have been paid by the domestic corporation under section 960.

Section 960(b) applies for purposes of sections 901 through 909 (relating to the foreign tax credit). Section 960(b)(1) provides that, if PTEP distributed by a CFC to a corporate United States shareholder of the CFC is excluded from gross income under section 959(a), the United States shareholder is deemed to have paid the foreign income taxes that are properly attributable to the PTEP and that have not already been deemed paid by a domestic corporation. Similarly, section 960(b)(2) provides that, if PTEP distributed by a CFC to another CFC is excluded from gross income under section 959(b), the recipient CFC is deemed to have paid the foreign income taxes that are properly attributable to the PTEP and that have not already been deemed paid by a domestic corporation. Section 960(f) provides that the Secretary shall prescribe such regulations or other guidance as may be necessary or appropriate to carry out the provisions of section 960. Section 904(d)(1) provides that certain provisions including section 960 apply separately with respect to certain categories of income, and section 904(d)(7) provides that the Secretary shall prescribe such regulations as may be necessary or appropriate for the purposes of section 904(d).

For purposes of determining the amount of foreign income taxes deemed paid, § 1.960–3 requires the establishment and maintenance of foreign corporation-level accounts that track a foreign corporation's PTEP and foreign income taxes associated with the PTEP. Those regulations adopt a system of accounting for PTEP in annual accounts for each separate section 904 category (as defined in § 1.960–1(b)(23)) and further segregate each annual account among ten PTEP groups.

Section 965(g) and § 1.965–5 disallow a percentage (referred to as the applicable percentage, as defined in § 1.965–5(d)) of any credit or deduction for foreign income taxes associated with PTEP resulting from section 965(a) or (b). Section 245A(d) and § 1.245A(d)–1 disallow the entirety of any credit or deduction for foreign income taxes associated with PTEP resulting from income inclusions by reason of section 245A(e)(2) (regarding hybrid dividends) or certain income inclusions by reason of section 964(e)(4) (regarding sales of

stock of a foreign corporation by a CFC). Sections 245A(g) and 965(o) provide that the Secretary shall prescribe such regulations or other guidance as may be necessary or appropriate to carry out the provisions of sections 245A and 965, respectively.

5. Election Under Section 962

Section 962(a) provides that, under regulations prescribed by the Secretary, an individual United States shareholder may elect to be taxed at domestic corporate rates on amounts included in the individual's gross income under section 951(a) and that those amounts are treated as taken into account by a domestic corporation for purposes of applying the relevant provisions of section 960. The election also applies to amounts included in the individual's gross income under section 951A(a) because, for purposes of section 962, such amounts are treated in the same manner as a subpart F income inclusion. *See* section 951A(f)(1). The purpose of section 962 generally is to equate an individual's tax burden with respect to certain earnings of a CFC with the tax burden the individual would have had if the individual were to own the CFC through a domestic corporation. *See* S. Rep. No. 87–1881, at 92–93 (1962).

To carry out this purpose, section 962(d) generally subjects PTEP to an additional level of taxation when distributed. It does so by, notwithstanding section 959(a)(1), requiring that the distributed PTEP be included in gross income to the extent it exceeds the amount of tax paid on the amounts to which the election under section 962 applied.

Section 961(a) also carries out this purpose by, in the case of an election under section 962, limiting a basis increase for an income inclusion to which the election applied to the amount of tax paid by the individual with respect to the income inclusion. Additionally, in a distribution of PTEP, section 961(b)(1) limits a basis decrease to the amount that is excluded from gross income under section 959(a) after the application of section 962(d).

6. Section 1411

Section 1411 generally imposes a 3.8 percent tax on the net investment income of certain individuals, trusts, and estates. Under section 1411(c)(1) and § 1.1411–4(a), net investment income includes certain income from dividends and net gain from the disposition of property. Section 1.1411–10 provides, in relevant part, rules regarding the application of section 1411 to individuals, trusts, and estates that own stock of a CFC, and § 1.1411–10(g)

allows an election with respect to a CFC to treat amounts included in income under section 951(a) with respect to the CFC as net investment income for purposes of § 1.1411–4(a)(1)(i). *See also* § 1.951A–5(b)(1) (treating a GILTI inclusion in the same manner as a subpart F income inclusion for purposes of applying section 1411). If the election provided under § 1.1411–10(g) is made, a distribution of E&P that is not treated as a dividend pursuant to section 959(d) is generally not treated as a dividend for purposes of section 1411(c)(1)(A)(i) and § 1.1411–4(a)(1)(i). *See* § 1.1411–10(c)(1)(i)(B). If the election provided under § 1.1411–10(g) is not made, however, net investment income could reflect value attributable to PTEP, either when the PTEP is distributed or when a United States shareholder directly or indirectly disposes of stock of the CFC. Thus, if no election is made, a distribution of E&P that is not treated as a dividend pursuant to section 959(d) is nevertheless a dividend for purposes of determining net investment income under section 1411(c)(1)(A)(i) and § 1.1411–4(a)(1)(i), provided the distribution is attributable to amounts that are or have been included in gross income under section 951(a) in a taxable year beginning after December 31, 2012. *See* § 1.1411–10(c)(1)(i)(A)(1). For purposes of calculating gain on the disposition of stock of a CFC, basis adjustments under section 961(a) and (b) are similarly not taken into account for section 1411 purposes in the absence of the election. *See* § 1.1411–10(d)(1).

D. Regulations Under Sections 959 and 961

The current regulations under sections 959 and 961 were issued in 1965 and have not been updated to reflect certain statutory changes (for example, the enactment of section 961(c)). The regulations also do not address a number of issues relating to the operation of sections 959 and 961.

In 2006, the Treasury Department and the IRS issued a notice of proposed rulemaking (71 FR 51155) (2006 proposed regulations) to provide more complete rules and address various open issues under sections 959 and 961 and related provisions.

In 2018, the Treasury Department and the IRS issued Notice 2019–01, 2019–02 I.R.B. 275 (2019 notice), which announced an intent to withdraw the 2006 proposed regulations and issue a new notice of proposed rulemaking under sections 959 and 961 to address certain issues arising from the Act. The 2019 notice described rules for the maintenance of PTEP accounts and other aspects relating to the operation of

section 959 and requested comments on certain topics. The Treasury Department and the IRS received several written comments in response to the 2019 notice. In 2022, the Treasury Department and the IRS formally withdrew the 2006 proposed regulations (87 FR 63981).

As indicated in the 2019 notice, changes made by the Act had a significant impact on the role of PTEP and how it functions within the U.S. tax system and, in certain cases, exacerbated the need to address longstanding issues. Thus, in addition to the need for updated and more complete rules as contemplated in the 2006 proposed regulations, the issuance of new regulations requires consideration of multiple issues raised by the Act. Certain significant considerations about the role of PTEP in the current U.S. tax system are summarized below.

First, the Act significantly increased the types of income that give rise to PTEP, several of which involve specific rules and limitations to determine foreign currency gain or loss and the availability of foreign tax credits. Giving effect to the various rules and limitations introduced by the Act requires a detailed accounting system to track PTEP in new groups, and to ensure those rules and limitations are appropriately applied by taxpayers and can be administered by the IRS.

The Act also substantially increased the amount of PTEP in the U.S. tax system. In many cases, a considerable portion of a CFC's income has been (or will be) subject to tax under section 951(a)(1)(A) or 951A(a), including by reason of the transition tax imposed under section 965, and thus only the residual amount of the CFC's income constitutes section 959(c)(3) E&P.

At the same time, the Act introduced section 245A, which in certain cases allows a domestic corporation to claim a dividends received deduction for section 959(c)(3) E&P. As a result, unlike before the Act where section 959(c)(3) E&P generally was subject to U.S. tax (with a possible foreign tax credit in some cases) when repatriated to the domestic corporation, such E&P may now generally be repatriated without U.S. tax to a recipient domestic corporation. Nonetheless, there are important distinctions between section 959(c)(3) E&P and PTEP—in particular, the section 245A deduction generally allows E&P to be distributed without a corresponding basis reduction (but see sections 961(d) and 1059), whereas a distribution of PTEP reduces basis (or gives rise to gain) in accordance with section 961(b). Therefore, PTEP may not

be preferable to section 959(c)(3) E&P and taxpayers might take inappropriate positions to maximize the existence of section 959(c)(3) E&P. For example, a taxpayer may wish to claim a section 961 basis increase for an amount included in gross income but apply the section 245A deduction on a distribution of the corresponding E&P so that such E&P is repatriated tax-free without any basis reduction under section 961(b). To prevent this type of planning, it is critical for the system to properly maintain the PTEP character of that E&P so that section 961(b) applies when the E&P is distributed.

Existing rules governing PTEP also do not adequately address structures where a United States shareholder owns only a portion of the stock in an upper-tier CFC that owns stock in a lower-tier CFC. In particular, there are no rules prescribing the manner in which basis under section 961(c) functions in these non-wholly owned structures. Further, after the enactment of section 951A in the Act, it is much more likely for United States shareholders to have disparate amounts of PTEP with respect to the same CFC because a United States shareholder's GILTI inclusion is determined based on items attributable to all the stock of CFCs owned by the United States shareholder, and this can raise issues about how section 959(b) applies in distributions of the PTEP (such as the issues discussed in part II.D.1.ii of the Explanation of Provisions). Thus, changes in the Act have compounded already existing complexities with respect to the treatment of PTEP and basis in stock in non-wholly owned structures.

Finally, existing rules do not sufficiently address the operation of the PTEP provisions with respect to domestic partnerships (or certain S corporations) in light of the enactment of section 951A and the extension of aggregate treatment to such entities in determining inclusions under both sections 951(a) and 951A(a) (as discussed in part III.A of the Background). Moreover, certain unresolved issues, such as whether a partnership obtains basis in stock of a CFC to account for PTEP, which had previously been limited to foreign partnerships, now apply equally to domestic partnerships (and certain S corporations).

III. Other Guidance and Issues

A. Regulations Under Section 958

Before the Act, domestic partnerships (and S corporations by operation of section 1373(a)) were treated as owning stock of a foreign corporation for

purposes of determining inclusions in gross income under section 951(a), and, thus, PTEP accounts under section 959 were maintained, and related basis adjustments under section 961 were made, at the partnership level.

Following the enactment of section 951A in the Act, in 2019 the Treasury Department and the IRS published final regulations treating a domestic partnership (and certain S corporations) as an aggregate of its partners for purposes of applying section 951A and related provisions. TD 9866, 84 FR 29288. That is, partners do not take into account a distributive share of a section 951A inclusion with respect to the domestic partnership and its CFCs, but instead are treated as proportionately owning the stock of those CFCs, with the result that (as with foreign partnerships) income inclusions under section 951A are determined directly (and solely) by partners that are United States shareholders with respect to a CFC. Subsequently, in 2022, the Treasury Department and the IRS published § 1.958–1(d) which, consistent with the approach adopted under section 951A, extends the aggregate treatment of domestic partnerships to section 951. TD 9960, 87 FR 3648.

Under § 1.958–1(d), for purposes of sections 951, 951A, and 956(a), as well as any provision that specifically applies by reference to those sections (or regulations issued under those sections), a domestic partnership is generally not treated as owning stock of a foreign corporation under section 958(a), and stock of a foreign corporation owned by the domestic partnership is instead treated in the same manner as stock of a foreign corporation owned by a foreign partnership under section 958(a)(2) and § 1.958–1(b). Accordingly, because sections 959 and 961 specifically apply by reference to sections 951 and 951A (in the latter case, as a result of section 951A(f)(1)(A)), aggregate treatment of domestic partnerships applies for purposes of sections 959 and 961 pursuant to § 1.958–1(d). Regulations do not, however, specifically address the application of sections 959 and 961 with respect to domestic partnerships or their partners under § 1.958–1(d).

B. Regulations Under Section 1502

Section 1502 authorizes the Secretary to prescribe regulations for an affiliated group of corporations that join in filing (or that are required to join in filing) a consolidated return (consolidated group, as defined in § 1.1502–1(h)) to clearly reflect the U.S. tax liability of the consolidated group and to prevent avoidance of such tax liability. For

purposes of carrying out those objectives, section 1502 also permits the Secretary to prescribe rules that may be different from the provisions of chapter 1 of subtitle A of the Code that would apply if the corporations composing the consolidated group filed separate returns. Pursuant to these rules, members of a consolidated group are treated as separate entities for some purposes but as divisions of a single corporation for other purposes. *See, for example*, § 1.1502–13(a)(2).

Regulations issued under section 1502 address the application of certain provisions of subpart F in the context of consolidated groups. *See, for example*, § 1.1502–51 (application of section 951A to consolidated groups); § 1.1502–80(j) (addressing determination of section 951(a)(2)(B) reduction for distributions under section 959(b) for purposes of sections 951(a)(1)(A) and 951A(a)). However, regulations do not address the application of sections 959 and 961 with respect to a consolidated group or its members.

Explanation of Provisions

I. Scope

The proposed regulations provide rules addressing core aspects of the PTEP system, including rules that address longstanding issues under sections 959 and 961, account for new provisions and amendments under the Act, and implement the 1988 notice and 2019 notice. Future guidance will address certain issues not addressed in the proposed regulations, for example, issues involving nonrecognition transactions, redemptions, transactions to which section 964(e) applies, and structures where CFCs are partners in a partnership. *See also* Notice 2024–16, 2024–5 I.R.B. 622 (announcing intent to issue proposed regulations addressing the treatment of section 961(c) basis in certain transactions in which a domestic corporation acquires stock of a CFC in a liquidation described in section 332 or an asset reorganization described in section 368(a)(1)). Future guidance may also address any issues regarding the interaction of the proposed regulations with existing rules under other provisions.

II. Section 959 Regulations

A. Overview

The proposed regulations under section 959 provide rules for PTEP accounting (both at the shareholder-level and foreign corporation-level), exclusions from gross income, and related determinations and adjustments.

B. PTEP Accounting (Proposed § 1.959–2)

1. Shareholder-Level Accounts

i. In General

Integral to the proposed regulations are annual PTEP accounts, dollar basis pools, and PTEP tax pools, which are established and maintained by a covered shareholder with respect to a foreign corporation in which the shareholder owns stock. *See* proposed § 1.959–2(b)(1). These are integral aspects of the PTEP system because they ensure proper tracking of amounts described under provisions of the Code such as sections 959(a), 986(c), and 960(b). These rules are issued pursuant to the express delegations of authority under sections 245A(g), 904(d)(7), 960(f), 965(o), and 989(c).

A covered shareholder means any United States person, other than a domestic partnership. *See* proposed § 1.959–1(b); *see also* part VIII.A of the Explanation of Provisions (providing that an S corporation is generally treated in the same manner as a domestic partnership). Domestic partnerships are excluded from this definition because they are treated as aggregates of their partners in determining stock ownership for purposes of section 959 (discussed in part III.A of the Background). A covered shareholder is not limited to a United States shareholder because the exclusion under section 959(a) is not limited to United States shareholders. For example, section 959(a) applies to any United States person who acquires from any person an interest in a foreign corporation with PTEP.

ii. Annual PTEP Accounts

Annual PTEP accounts track a foreign corporation's PTEP with respect to a covered shareholder. *See* proposed § 1.959–2(b)(1). These accounts represent PTEP distributable exclusively to the covered shareholder (or a successor), directly or indirectly through tiers, on any stock of the foreign corporation.

Each annual PTEP account relates to a single taxable year of the foreign corporation and a single section 904 category, and PTEP within an annual PTEP account is maintained in the foreign corporation's functional currency and assigned among ten PTEP groups and two subgroups. *See* proposed § 1.959–2(b)(2). Tracking PTEP on an annual basis is necessary to apply the “last-in, first-out” rule for distributions of PTEP in section 959(c), and PTEP is maintained in the foreign corporation's functional currency pursuant to section 986(b). Tracking

PTEP by section 904 category and by PTEP groups is necessary to implement rules determining foreign currency gain or loss and foreign tax credits with respect to PTEP.
