

FEDERAL REGISTER

Vol. 89

Wednesday,

No. 238

December 11, 2024

Pages 99689–100288

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.govinfo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Proclamation 10869 of December 6, 2024

National Pearl Harbor Remembrance Day, 2024

By the President of the United States of America

A Proclamation

On National Pearl Harbor Remembrance Day, we honor the 2,403 service members and civilians who were killed on that tragic December morning 83 years ago. And we recognize the absolute courage of the service members who, in the wake of this painful and unprovoked attack, stood up to defend democracy and stand up to fascism abroad in World War II.

As we reflect on the honors and triumphs of the Greatest Generation, we must remember that they risked all, dared all, and gave all not for a person or a place—but for the idea of America. They recognized that freedom is never guaranteed: Every generation has had to earn and defend it in the battle between autocracy and democracy. This service and sacrifice helped deliver a world grounded in peace and security. And together, these brave women and men proved that no force—not destruction, death, or the darkness of hate—is a match for the flame of liberty that ignites the hearts of free people everywhere.

Today, we must be keepers of their mission and bearers of the flame of freedom they kept burning bright. That begins by honoring our sacred obligation to care for our service members and veterans and their families, caregivers, and survivors—especially our World War II veterans whose actions ensured that democracy endured. That is why my Administration began enrolling all World War II veterans, regardless of length of service or financial status, in Veterans Affairs health care services. And we also expanded access to benefits for those who participated in testing and clean-up activities related to World War II weapons programs, helping address radiation related illnesses for veterans and civilians.

During National Pearl Harbor Remembrance Day, may we remember the brave patriots whose lives were cut short on this day 83 years ago. May we honor all the service members who gave their last full measure of devotion to defend democracy in the years that followed. And may we all recommit to fulfilling the future they fought for—one grounded in freedom, democracy, equality, and opportunity for all.

The Congress, by Public Law 103–308, as amended, has designated December 7 of each year as “National Pearl Harbor Remembrance Day.” Today, let us commemorate the patriots who perished and who were wounded on December 7, 1941, and continue to fulfill our sacred obligation to care for our service members; our veterans; and their families, caregivers, and survivors.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, do hereby proclaim December 7, 2024, as National Pearl Harbor Remembrance Day. I encourage all Americans to reflect on the courage shown by our brave service members that day and remember their sacrifices. I ask us all to give sincere thanks and appreciation to the survivors of that unthinkable day. I urge all Federal agencies, interested organizations, groups, and individuals to fly the flag of the United States at half-staff on December 7, 2024, in honor of those American patriots who died as a result of their service at Pearl Harbor.

IN WITNESS WHEREOF, I have hereunto set my hand this sixth day of December, in the year of our Lord two thousand twenty-four, and of the Independence of the United States of America the two hundred and forty-ninth.

A handwritten signature in black ink, appearing to read "Joe Biden", is written over a diagonal line that serves as a signature line.

Rules and Regulations

Federal Register

Vol. 89, No. 238

Wednesday, December 11, 2024

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

U.S. AGENCY FOR GLOBAL MEDIA

2 CFR Chapter XIX

22 CFR Part 518

[3112-AA05]

Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards

AGENCY: U.S. Agency for Global Media

ACTION: Final rule.

SUMMARY: In this document, the U.S. Agency for Global Media (USAGM or the Agency) adopts the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance) initially set forth as guidance by the Office of Management and Budget (OMB) and published by OMB on December 26, 2013, and updated on April 4, 2024. This rule is necessary in order to incorporate into regulation and thus bring into effect the Uniform Guidance as required by OMB. Implementation of this guidance will reduce administrative burden and risk of waste, fraud, and abuse related to the Federal financial assistance awarded each year by the Agency. To avoid confusion, we additionally supersede existing agency regulations related to this same subject matter.

DATES: This regulation is effective December 11, 2024.

FOR FURTHER INFORMATION CONTACT: For general information, please contact Trina Mixson, Acting Chief Financial Officer, Office of the Chief Financial Officer, U.S. Agency for Global Media, 330 Independence Ave. SW, Washington, DC 20237; 202-322-9320; tmixson@usagm.gov.

SUPPLEMENTARY INFORMATION:

I. Discussion

USAGM is an independent establishment of the federal government that exercises authority over non-

military United States government broadcasting. USAGM oversees two federal entities—Voice of America and the Office of Cuba Broadcasting—and five grantee non-profit organizations—Radio Free Europe/Radio Liberty, Radio Free Asia, the Middle East Broadcasting Networks, the Open Technology Fund, and the Frontline Media Fund. Its broadcasting networks reach a cumulative weekly worldwide audience of more than 400 million people.

On December 19, 2014, OMB and more than 30 other federal agencies issued an interim final rule that implemented the final guidance on Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). In that interim final rule, Federal awarding agencies joined together to implement the Uniform Guidance in their respective chapters of title 2 of the CFR, and, where approved by the OMB, implemented any exceptions to the Uniform Guidance by including the relevant language in their regulations. The intent of this effort was to simultaneously reduce administrative burden and the risk of waste, fraud, and abuse while delivering better performance. Implementation of the Uniform Guidance became effective on December 26, 2014 (79 FR 75867, December 19, 2014).

On April 4, 2024, OMB revised that guidance to incorporate recent OMB policy priorities related to Federal financing assistance and to reduce agency and recipient burden. The updated guidance seeks to improve Federal financial assistance management, transparency, and oversight through more accessible and readily comprehensible guidance and clarifies sections of the prior version of the guidance.

Although USAGM's predecessor agency, the Broadcasting Board of Governors, did not implement the guidance when initially codified in 2014, for the past several years USAGM has incorporated the guidance in its Federal financial assistance agreements. USAGM now takes the opportunity of the recent updates to join the more than 30 federal agencies that have already done so. USAGM does so to bring its federal assistance processes in line with best practices suggested by OMB, streamline its financial assistance

processes, and increase transparency. To avoid confusion, the agency additionally supersedes existing agency regulations relating to the same subject matter.

II. Justification To Issue Final Rule

Under the Administrative Procedure Act, a federal agency may issue a final rule without first issuing a notice of proposed rulemaking (NPRM) in several circumstances. Two apply to this rule. First, an agency need not issue a proposed rulemaking to a matter relating to agency management or personnel or to public property, loans, grants, benefits, or contracts. This rule qualifies as a rule of agency procedure and practice related to the issuance and monitoring of federal awards. The Administrative Procedure Act therefore excepts this rule from traditional notice and comment periods.

Second, an agency must first find that issuing an NPRM would be impractical, unnecessary, or contrary to the public interest. As stated above, this rule incorporates—in full and without change—the Uniform Guidance developed by OMB. OMB initially issued the guidance only after considering public comment received following both an Advanced Notice of Public Guidance (available at www.regulations.gov under docket number OMB-2012-0002) and Notice of Proposed Guidance (available at www.regulations.gov under docket number OMB-2013-0001). Combined, those two dockets received more than 650 total comments. The public enjoyed similar opportunity to comment on the guidance more recently. OMB provided multiple opportunities for public comment when issuing the 2024 revisions to that guidance, including a Request for Information (available at www.regulations.gov under docket number OMB-2023-0007) and Notice of Proposed Guidance (available at www.regulations.gov under docket number OMB-2023-0017). Combined, those two dockets received more than 1150 total comments. Any NPRM issued by USAGM would be redundant of previous efforts by OMB, and is therefore unnecessary.

III. Procedural Matters

a. Paperwork Reduction Act

The Paperwork Reduction Act requires that agencies obtain OMB

approval before conducting a collection of information from the public. Any information collected under the regulations proposed does not to constitute a collection of information for the purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

b. Executive Order 12866 (Regulatory Planning and Review), Executive Order 13563 (Improving Regulation and Regulatory Review), and Executive Order 14094 (Modernizing Regulatory Review)

Executive Orders 12866, 13563, and 14094 direct agencies to assess all costs and benefits of available regulatory alternatives, and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). OMB's Office of Information and Regulatory Affairs (OIRA) designated the implementation of the Uniform Guidance by OMB and more than 25 other agencies to be not significant in 2014. USAGM similar concludes that its implementation is not significant and therefore is not subject to mandatory prior review by the OIRA pursuant to Executive Orders 12866, 13563, or 14094.

c. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act requires that agencies prepare a budgetary impact statement before promulgating a rule that may result in the expenditure by State, local, and tribal governments, or by the private sector, of \$100 million or more in any one year. Upon first implementing the Uniform Guidance, OMB determined that its joint interim final rule will not result in expenditures by State, local, and tribal governments, or by the private sector, of \$100 million or more in any one year. USAGM concurs. Therefore, no actions are necessary under the provisions of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1532.

d. Regulatory Flexibility Act

The Regulatory Flexibility Act requires an agency issuing a final rule to provide a final regulatory flexibility analysis or to certify that the rule will not have a significant economic impact on a substantial number of small entities. In accordance with the RFA, USAGM certifies that this rule will not have a significant economic impact on a substantial number of small entities, and thus no regulatory flexibility analysis is required under 5 U.S.C. 603.

e. Executive Order 13132 (Federalism Assessment)

Executive Order 13132 limits an agency's ability to promulgate rules that have federalism implications, impose substantial compliance costs on state and local governments, or pre-empt state and local law. This proposed rule will not have sufficient federalism implications to warrant the preparation of a federalism assessment pursuant to Executive Order 13132.

List of Subjects in 2 CFR Part 1900

Accounting, Administrative practice and procedure, Grant programs, Grants administration, Loan programs, Nonprofit organizations, Reporting and recordkeeping requirements.

For the reasons discussed in the preamble, and under the authority of 5 U.S.C. 301 and 2 CFR part 200, the U.S. Agency for Global Media adds chapter XIX to 2 CFR subtitle B, consisting of parts 1900 through 1999, and removes 22 CFR part 518 as follows:

Title 2—Grants and Agreements

Subtitle B—Federal Agency Regulations for Grants and Agreements

CHAPTER XIX—U.S. AGENCY FOR GLOBAL MEDIA

PART 1900—UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS

Sec.

1900.1 Adoption of 2 CFR part 200.

1900.2 [Reserved]

Authority: 5 U.S.C. 301; 2 CFR part 200

PART 1900—UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS

§ 1900.1 Adoption of 2 CFR Part 200.

The United States Agency for Global Media adopts the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards set forth at 2 CFR part 200. Thus, this part gives regulatory effect to the terms of 2 CFR part 200 (as effective October 1, 2024).

§ 1900.2 [Reserved]

PARTS 1901–1999 [Reserved]

Dated: December 4, 2024.

Amanda Bennett,
Chief Executive Officer, U.S. Agency for Global Media.

BILLING CODE 8610–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–0228; Project Identifier MCAI–2022–00599–T; Amendment 39–22881; AD 2024–23–02]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc., Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Bombardier, Inc., Model BD–700–1A10 and BD–700–1A11 airplanes. This AD was prompted by a determination that new or more restrictive airworthiness limitations for certain brake accumulators are necessary. This AD requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. This AD also requires determining the accumulated landings on the affected brake accumulators. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 15, 2025.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of January 15, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2024–0228; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For Bombardier material identified in this AD, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514-855-2999; email ac.yul@aero.bombardier.com; website bombardier.com.

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206-231-3195. It is also available at regulations.gov under Docket No. FAA-2024-0228.

FOR FURTHER INFORMATION CONTACT:

Mark Taylor, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; 516-228-7300; email 9-avs-nyaco-cos@faa.gov.

SUPPLEMENTARY INFORMATION:**Background**

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Bombardier, Inc., Model BD-700-1A10 and BD-700-1A11 airplanes. The NPRM published in the **Federal Register** on March 4, 2024 (89 FR 15517). The NPRM was prompted by AD CF-2022-25, dated May 17, 2022 (referred to after this as the MCAI), issued by Transport Canada, which is the aviation authority for Canada. The MCAI states that new or more restrictive airworthiness limitations (life limits) for certain brake accumulators have been developed, following in-service failures of brake accumulators on other types of airplanes with similar components. A brake accumulator surpassing a life limit could fail and result in loss of hydraulic pressure on the associated hydraulic system, which services the main and emergency/parking brakes on the main landing gear.

In the NPRM, the FAA proposed to require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations for certain brake accumulators and to determine the accumulated landings on the affected brake accumulators. The FAA is issuing this AD to address brake accumulators that could surpass a life limit and fail, resulting in loss of hydraulic pressure on the associated hydraulic system, which services the main and emergency/parking brakes on the main landing gear. The unsafe condition on these products could result in reduced or total loss of available braking and a possible runway excursion.

You may examine the MCAI in the AD docket at regulations.gov under Docket No. FAA-2024-0228.

Discussion of Final Airworthiness Directive**Comments**

The FAA received comments from three individuals who supported the NPRM without change.

The FAA received an additional comment from an individual who stated that accounting for the accumulated landings is a better method of gauging the necessity of maintenance or inspection on the brake accumulators since the accumulator is used in ground towing operations and to dampen sudden pressure changes in the aircraft's hydraulics during operation. The commenter stated another factor that might be accounted for is a potential difference in temperature during operation, especially if the brake accumulators in the Bombardier airplanes mentioned in the airworthiness directive have air (instead of nitrogen) as the fluid inside the accumulator.

The FAA agrees that the accumulated landings is the appropriate method of establishing the intervals for maintenance or inspection of the brake accumulators, as specified in the TLMCs. Reference to difference in temperature is unnecessary, as the currently stated calendar time requirements and accumulated landing requirements adequately and appropriately define the timing requirements of the needed actions. This methodology is consistent with that used by Transport Canada. The FAA has not changed the AD with regards to this issue.

Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed the following Bombardier material. This material specifies new or more restrictive airworthiness limitations for the No. 2 and No. 3 brake accumulators having certain part numbers. These documents are distinct since they apply to different airplane configurations.

- Section 5-10-11, "Life Limits (Systems)," of Part 2, "Airworthiness Limitations," of the Bombardier Global 5000 Featuring Global Vision Flight Deck Time Limits/Maintenance Checks (TLMC), Publication No. GL 5000 GVFD TLMC, Revision 16, dated December 19, 2023, which includes Tasks 32-43-37-01, "Discard the No. 2 Brake Accumulator, Part No. GW415-1250-1" and 32-44-05-101, "Discard the No. 3 Brake Accumulator, Part No. GW415-1200-1/-3." (For obtaining the tasks for Bombardier Global 5000 Featuring GVFD TLMC, Publication No. GL 5000 GVFD TLMC, use Document Identification No. GL 5000 GVFD TLMC.)

- Section 5-10-11, "Life Limits (Systems)," of Part 2, "Airworthiness Limitations," of the Bombardier Global 5000 Time Limits/Maintenance Checks, Publication No. BD-700 TLMC, Revision 26, dated December 19, 2023, which includes Tasks 32-43-37-101, "Discard the No. 2 Brake Accumulator, Part No. GW415-1250-1" and 32-44-05-101, "Discard the No. 3 Brake Accumulator, Part No. GW415-1200-1/-3." (For obtaining the tasks for Bombardier Global 5000 TLMC, Publication No. BD-700 TLMC, use Document Identification No. GL 5000 TLMC.)

- Section 5-10-11, "Life Limits (Systems)," of Part 2, "Airworthiness Limitations," of the Bombardier Global 6000 Time Limits/Maintenance Checks, Publication No. GL 6000 TLMC, Revision 16, dated December 19, 2023, which includes Tasks 32-43-37-101, "Discard the No. 2 Brake Accumulator, Part No. GW415-1250-1" and 32-44-05-101, "Discard the No. 3 Brake Accumulator, Part No. GW415-1200-1/-3." (For obtaining the tasks for Bombardier Global 6000 TLMC, Publication No. GL 6000 TLMC, use Document Identification No. GL 6000 TLMC.)

- Section 5-10-11, "Life Limits (Systems)," of Part 2, "Airworthiness Limitations," of the Bombardier Global Express Time Limits/Maintenance Checks, Publication No. BD-700 TLMC, Revision 35, dated December 19, 2023, which includes Tasks 32-43-37-101, "Discard the No. 2 Brake Accumulator,

Part No. GW415-1250-1” and 32-44-05-101, “Discard the No. 3 Brake Accumulator, Part No. GW415-1200-1/-3.” (For obtaining the tasks for Bombardier Global Express TLMC, Publication No. BD-700 TLMC, use Document Identification No. GL 700 TLMC.)

- Section 5-10-11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global Express XRS Time Limits/Maintenance Checks, Publication No. BD-700 XRS TLMC, Revision 22, dated December 19, 2023, which includes Tasks 32-43-37-101, “Discard the No. 2 Brake Accumulator, Part No. GW415-1250-1” and 32-44-05-101, “Discard the No. 3 Brake Accumulator, Part No. GW415-1200-1/-3.” (For obtaining the tasks for Bombardier Global Express XRS TLMC, Publication No. BD-700 XRS TLMC, use Document Identification No. GL XRS TLMC.)

- Section 5-10-11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global 5500 Time Limits/Maintenance Checks, Publication No. GL 5500 TLMC, Revision 5, dated December 19, 2023, which includes Task 32-44-05-101, “Discard the No. 3 Brake Accumulator, Part No. GW415-1200-3.” (For obtaining the task for Bombardier Global 5500 TLMC, Publication No. GL 5500

TLMC, use Document Identification No. GL 5500 TLMC.)

- Section 5-10-11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global 6500 Time Limits/Maintenance Checks, Publication No. GL 6500 TLMC, Revision 5, dated December 19, 2023, which includes Task 32-44-05-101, “Discard the No. 3 Brake Accumulator, Part No. GW415-1200-3.” (For obtaining the task for Bombardier Global 6500 TLMC, Publication No. GL 6500 TLMC, use Document Identification No. GL 6500 TLMC.)

The FAA also reviewed the following material, which specifies procedures for determining the accumulated landings on the brake accumulators. Knowing the accumulated landings is necessary to comply with the life limit. These documents are distinct because they apply to different airplane configurations.

- Bombardier Service Bulletin 700-1A11-32-030, Revision 02, dated March 2, 2023.

- Bombardier Service Bulletin 700-32-043, Revision 02, dated March 2, 2023.

- Bombardier Service Bulletin 700-32-5020, Revision 02, dated March 2, 2023.

- Bombardier Service Bulletin 700-32-5506, Revision 02, dated March 2, 2023.

- Bombardier Service Bulletin 700-32-6020, Revision 02, dated March 2, 2023.

- Bombardier Service Bulletin 700-32-6506, Revision 02, dated March 2, 2023.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 117 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

The FAA has determined that revising the maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, the agency estimates the average total cost per operator to be \$7,650 (90 work-hours × \$85 per work-hour).

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
1.5 work-hours × \$85 per hour = \$128	\$0	\$128	\$14,976

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024-23-02 Bombardier, Inc.: Amendment 39-22881; Docket No. FAA-2024-0228; Project Identifier MCAI-2022-00599-T.

(a) Effective Date

This airworthiness directive (AD) is effective January 15, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Bombardier, Inc., Model BD-700-1A10 and BD-700-1A11 airplanes, certificated in any category, serial numbers 9002 through 9998 inclusive, and 60001 through 60046 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks; 32, Landing Gear.

(e) Reason

This AD was prompted by a determination that new or more restrictive airworthiness limitations for certain brake accumulators are necessary. The FAA is issuing this AD to address brake accumulators that could surpass a life limit and fail, resulting in loss of hydraulic pressure on the associated hydraulic system, which services the main and emergency/parking brakes on the main landing gear. The unsafe condition, if not addressed, could result in reduced or total loss of available braking and a possible runway excursion.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Maintenance or Inspection Program Revision

Within 90 days after the effective date of this AD, revise the existing maintenance or inspection program, as applicable, to incorporate the information in the tasks specified in table 1 to paragraph (g) of this AD of Section 5-10-11, "Life Limits (Systems)," of Part 2, "Airworthiness Limitations," of the applicable Time Limits/Maintenance Checks (TLMC) Manual. The initial compliance time for doing the tasks is at the time specified in the tasks specified in table 1 to paragraph (g) of this AD, or within 90 days after the effective date of this AD, whichever occurs later.

TABLE 1 TO PARAGRAPH (g)—APPLICABLE TLMC MANUALS AND SERVICE BULLETINS

Airplane model and TLMC manual	Task Number 32-43-37-101 (Discard the No. 2 Brake Accumulator, Part No. GW415-1250-1) TLMC Revision	Task Number 32-44-05-101 (Discard the No. 3 Brake Accumulator, Part No. GW415-1200-1/-3) TLMC Revision	Bombardier service bulletin number
BD-700-1A10, Bombardier Global Express TLMC, Publication No. BD-700 TLMC ¹ .	Revision 35, dated December 19, 2023.	Revision 35, dated December 19, 2023.	700-32-043, Revision 02, dated March 2, 2023.

¹For obtaining the tasks for Bombardier Global Express TLMC, Publication No. BD-700 TLMC, use Document Identification No. GL 700 TLMC.

²For obtaining the tasks for Bombardier Global Express XRS TLMC, Publication No. BD-700 XRS TLMC, use Document Identification No. GL XRS TLMC.

³For obtaining the tasks for Bombardier Global 6000 TLMC, Publication No. GL 6000 TLMC, use Document Identification No. GL 6000 TLMC.

⁴For obtaining the task for Bombardier Global 6500 Time Limits/Maintenance Checks, Publication No. GL 6500 TLMC, use Document Identification No. GL 6500 TLMC.

⁵For obtaining the tasks for Bombardier Global 5000 TLMC, Publication No. BD-700 TLMC, use Document Identification No. GL 5000 TLMC.

⁶For obtaining the tasks for Bombardier Global 5000 Featuring GVFD TLMC, Publication No. GL 5000 GVFD TLMC, use Document Identification No. GL 5000 GVFD TLMC.

⁷For obtaining the task for Bombardier Global 5500 TLMC, Publication No. GL 5500 TLMC, use Document Identification No. GL 5500 TLMC.

(h) Determination of Accumulated Landings

Within 90 days after the effective date of this AD, determine the accumulated landings on the installed No. 2 and No. 3 brake accumulators in accordance with Paragraph

2.A. of the Accomplishment Instructions of the applicable service bulletin specified in table 1 to paragraph (g) of this AD.

(i) No Alternative Actions or Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (e.g., inspections) or

intervals may be used unless the actions and intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (k)(1) of this AD.

(j) Credit for Previous Actions

This paragraph provides credit for actions required by paragraph (h) of this AD, if those actions were performed before the effective date of this AD using the applicable service information specified in paragraphs (j)(1) through (12) of this AD.

- (1) Bombardier Service Bulletin 700–1A11–32–030, dated October 27, 2021.
- (2) Bombardier Service Bulletin 700–1A11–32–030, Revision 01, dated March 8, 2022.
- (3) Bombardier Service Bulletin 700–32–043, dated October 27, 2021.
- (4) Bombardier Service Bulletin 700–32–043, Revision 01, dated March 8, 2022.
- (5) Bombardier Service Bulletin 700–32–5020, dated October 27, 2021.
- (6) Bombardier Service Bulletin 700–32–5020, Revision 01, dated March 8, 2022.
- (7) Bombardier Service Bulletin 700–32–5506, dated October 27, 2021.
- (8) Bombardier Service Bulletin 700–32–5506, Revision 01, dated March 8, 2022.
- (9) Bombardier Service Bulletin 700–32–6020, dated October 27, 2021.
- (10) Bombardier Service Bulletin 700–32–6020, Revision 01, dated March 8, 2022.
- (11) Bombardier Service Bulletin 700–32–6506, dated October 27, 2021.
- (12) Bombardier Service Bulletin 700–32–6506, Revision 01, dated March 8, 2022.

(k) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (l)(1) of this AD. Information may be emailed to: 9-AVS-NYACO-COS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or Bombardier, Inc.'s Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(l) Additional Information

(1) For more information about this AD, contact Mark Taylor, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email 9-avs-nyaco-cos@faa.gov.

(2) Service information identified in this AD that is not incorporated by reference is available at the address specified in paragraph (m)(3) of this AD.

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Bombardier Service Bulletin 700–1A11–32–030, Revision 02, dated March 2, 2023.

(ii) Bombardier Service Bulletin 700–32–043, Revision 02, dated March 2, 2023.

(iii) Bombardier Service Bulletin 700–32–5020, Revision 02, dated March 2, 2023.

(iv) Bombardier Service Bulletin 700–32–5506, Revision 02, dated March 2, 2023.

(v) Bombardier Service Bulletin 700–32–6020, Revision 02, dated March 2, 2023.

(vi) Bombardier Service Bulletin 700–32–6506, Revision 02, dated March 2, 2023.

(vii) Section 5–10–11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global 5000 Time Limits/Maintenance Checks (TLMC), Publication No. BD–700 TLMC, Revision 26, dated December 19, 2023.

Note 1 to paragraph (m)(2)(vii):

For obtaining the tasks for Bombardier Global 5000 TLMC, Publication No. BD–700 TLMC, use Document Identification No. GL 5000 TLMC.

(viii) Section 5–10–11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global 5000 Featuring Global Vision Flight Deck Time Limits/Maintenance Checks, Publication No. GL 5000 GVFD TLMC, Revision 16, dated December 19, 2023.

Note 2 to paragraph (m)(2)(viii):

For obtaining the tasks for Bombardier Global 5000 Featuring GVFD TLMC, Publication No. GL 5000 GVFD TLMC, use Document Identification No. GL 5000 GVFD TLMC.

(ix) Section 5–10–11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global 5500 Time Limits/Maintenance Checks, Publication No. GL 5500 TLMC, Revision 5, dated December 19, 2023.

Note 3 to paragraph (m)(2)(ix):

For obtaining the task for Bombardier Global 5500 TLMC, Publication No. GL 5500 TLMC, use Document Identification No. GL 5500 TLMC.

(x) Section 5–10–11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global 6000 Time Limits/Maintenance Checks, Publication No. GL 6000 TLMC, Revision 16, dated December 19, 2023.

Note 4 to paragraph (m)(2)(x):

For obtaining the tasks for Bombardier Global 6000 TLMC, Publication No. GL 6000 TLMC, use Document Identification No. GL 6000 TLMC.

(xi) Section 5–10–11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global 6500 Time Limits/Maintenance Checks, Publication No. GL 6500 TLMC, Revision 5, dated December 19, 2023.

Note 5 to paragraph (m)(2)(xi):

For obtaining the task for Bombardier Global 6500 TLMC, Publication No. GL 6500 TLMC, use Document Identification No. GL 6500 TLMC.

(xii) Section 5–10–11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global Express Time Limits/Maintenance Checks, Publication No. BD–700 TLMC, Revision 35, dated December 19, 2023.

Note 6 to paragraph (m)(2)(xii):

For obtaining the tasks for Bombardier Global Express TLMC, Publication No. BD–700 TLMC, use Document Identification No. GL 700 TLMC.

(xiii) Section 5–10–11, “Life Limits (Systems),” of Part 2, “Airworthiness Limitations,” of the Bombardier Global Express XRS Time Limits/Maintenance Checks, Publication No. BD–700 XRS TLMC, Revision 22, dated December 19, 2023.

Note 7 to paragraph (m)(2)(xiii):

For obtaining the tasks for Bombardier Global Express XRS TLMC, Publication No. BD–700 XRS TLMC, use Document Identification No. GL XRS TLMC.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2024–2440; Airspace Docket No. 24–ANM–86]

RIN 2120–AA66

Modification of Class D and Class E airspace; Abbotsford Airport, Abbotsford, BC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies the administrative portions of the Class D and Class E airspace legal descriptions for Abbotsford Airport, Abbotsford, BC. This action does not change the airspace boundaries or operating requirements.

DATES: Effective date 0901 UTC, February 20, 2025. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year.

FAA Order JO 7400.11J, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

FOR FURTHER INFORMATION CONTACT: Nathan A. Chaffman, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231-3460.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies the administrative portion of the Class D and Class E airspace legal descriptions to support visual flight rules (VFR) and instrument flight rules (IFR) operations at Abbotsford Airport, Abbotsford, BC.

Incorporation by Reference

Class D and E airspace areas are published in paragraphs 5000 and 6005, respectively, of FAA Order JO 7400.11, Airspace Designations and Reporting

Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024, and effective September 15, 2024. FAA Order JO 7400.11J is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 by modifying the administrative portions of the Class D and Class E airspace legal descriptions for Abbotsford Airport, Abbotsford, BC.

The airspace locations within line one of both the Class D and Class E legal descriptions are incorrect, as Abbotsford, BC does not reside within a United States region or territory and Point Roberts, WA is not geographically associated with airspace designated to Abbotsford Airport. An appropriate city within the lateral boundaries of the Class D airspace designated for Abbotsford Airport is not available. As such, the location of the Class D airspace designated to Abbotsford Airport is updated to Lynden, WA, which is the most appropriate, geographically adjacent city that also resides within the Northwest Mountain Region and the state of Washington. The location of the Class E airspace designated to Abbotsford Airport is updated to Kendall, WA, which is the most appropriately located city within the airspace that also resides within the Northwest Mountain Region and the state of Washington.

The locations for which airspace is designated within line two of both the Class D and Class E legal descriptions are updated to remove mention of the country name "Canada," as the locations should only include a city and state.

Abbotsford Airport's geographic location within line three of both the Class D and Class E legal descriptions is updated to match the FAA database. As such, the reference to Abbotsford airport's location within their Class D airspace legal description is updated to instead reference a "Point in Space." The airport's previous, outdated geographic location was used as the location of the newly established "Point in Space" to preserve the airspace boundaries as they were prior to this airspace action.

The geographic coordinates for Vancouver International Airport, BC, are

added to the Abbotsford Class D airspace legal description, as the airport is referenced within the description.

This action is an administrative change and does not affect the airspace boundaries or operating requirements; therefore, notice and public procedure under 5 U.S.C. 553(b) is unnecessary.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5-6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR part 71.1 of FAA Order JO

7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 5000 Class D Airspace.

* * * * *

ANM WA D Lynden, WA [Amended]

Abbotsford Airport, BC

(Lat. 49°01'31" N, long. 122°21'36" W)

Point in Space

(Lat. 49°01'31" N, long. 122°21'48" W)

Vancouver VORTAC

(Lat. 49°04'38" N, long. 123°08'57" W)

Vancouver International Airport, BC

(Lat. 49°11'41" N, long. 123°11'02" W)

That airspace extending upward from the surface to 2,500 feet MSL beginning at lat. 48°57'59" N, long. 122°18'57" W, thence counterclockwise along the 4-mile radius of the Point in Space to lat. 49°00'05" N, long. 122°16'08" W, thence west along the U.S./Canadian border to lat. 49°00'05" N, long. 122°45'58" W, thence clockwise along the 16-mile arc of the Vancouver VORTAC to lat. 48°57'59" N, long. 122°47'12" W, thence east along lat. 48°57'59" N to the point of beginning, excluding the airspace below 1,500 feet MSL and west of long. 122°33'50" W, the airspace within the Vancouver International Airport Class C airspace area, and the airspace overlying the territory of Canada.

* * * * *

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

BILLING CODE 4910–13–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

15 CFR Part 744

[Docket No. 241205–0313]

RIN 0694–AJ96

Additions to the Entity List

AGENCY: Bureau of Industry and Security, Department of Commerce.

ACTION: Final rule.

SUMMARY: In this rule, the Bureau of Industry and Security (BIS) amends the Export Administration Regulations (EAR) by adding 8 entities to the Entity List, under the destinations of Burma (2), China, People's Republic of (China) (2), and Russia (4). These entities have been determined by the U.S. Government to be acting contrary to the national security or foreign policy interests of the United States.

DATES: This rule is effective December 11, 2024.

FOR FURTHER INFORMATION CONTACT: Chair, End-User Review Committee, Office of the Assistant Secretary for Export Administration, Bureau of Industry and Security, Department of Commerce, Phone: (202) 482–5991, Email: ERC@bis.doc.gov.

SUPPLEMENTARY INFORMATION:

Background

The Entity List

The Entity List (supplement no. 4 to part 744 of the EAR (15 CFR parts 730–774)) identifies entities for which there is reasonable cause to believe, based on specific and articulable facts, that the entities have been involved, are involved, or pose a significant risk of being or becoming involved in activities contrary to the national security or foreign policy interests of the United States, pursuant to § 744.11(b). The EAR imposes additional license requirements on, and limits the availability of, most license exceptions for exports, reexports, and transfers (in-country) when a listed entity is a party to the transaction. The license review policy for each listing is identified in the “License Review Policy” column on the Entity List, and the impact on the availability of license exceptions is described in the relevant **Federal Register** document that added the listing to the Entity List. BIS amends the Entity List pursuant to parts 744 (Control Policy: End-User and End-Use Based) and 746 (Embargoes and Other Special Controls) of the EAR.

The End-User Review Committee (ERC), composed of representatives of

the Departments of Commerce (Chair), State, Defense, Energy and, where appropriate, the Treasury, makes all decisions regarding additions to, removals from, or other modifications to the Entity List. The ERC makes all decisions to add an entry to the Entity List by majority vote and makes all decisions to remove or modify an entry by unanimous vote.

Entity List Decisions

Additions to the Entity List

The ERC determined to add Sky Aviator Company Limited and Synpex Shwe Company Ltd., under the destination of Burma, to the Entity List. These additions are being made because Sky Aviator Company Limited, and Synpex Shwe Company Ltd., have supplied the Burmese military with parts and components that have enabled the military to carry out human rights violations, including brutal aerial attacks against the civilian population. These activities are contrary to the foreign policy interests of the United States under § 744.11 of the EAR. Licenses to export, reexport or transfer (in-country) items subject to the EAR to both of these entities will be required for all items subject to the EAR, and license applications will be reviewed with a license review policy of presumption of denial.

The ERC determined to add Beijing Zhongdun Security Technology Group Co., Ltd. and Zhejiang Uniview Technologies Co., Ltd., under the destination of China, to the Entity List. Beijing Zhongdun Security Technology Group Co., Ltd. is being added because it develops and sells products and services that enable China's public security establishment to carry out human rights violations. Zhejiang Uniview Technologies Co., Ltd. is being added because it enables human rights violations, including high-technology surveillance targeted at the general population, Uyghurs, and members of other ethnic and religious minority groups. These activities are contrary to the foreign policy interests of the United States under § 744.11 of the EAR. Licenses to export, reexport or transfer (in-country) items subject to the EAR to both of these entities will be required for all items subject to the EAR, and license applications will be reviewed with a license review policy of presumption of denial.

The ERC determined to add Aviasnab LLC and Joint Stock Company Gorizont, under the destination of Russia, to the Entity List. These additions are being made because Aviasnab LLC and Joint Stock Company Gorizont have supplied

the Burmese military with parts and components that have enabled the military to carry out human rights violations, including brutal aerial attacks against the civilian population. These activities are contrary to the foreign policy interests of the United States under § 744.11 of the EAR. Licenses to export, reexport or transfer (in-country) items subject to the EAR to both of these entities will be required for all items subject to the EAR, and license applications will be reviewed with a license review policy of presumption of denial.

The ERC determined to add NTechLab LLC and Technology Videoanalysis LLC, under the destination of Russia, to the Entity List. These additions are being made because NtechLab LLC and Technology Videoanalysis LLC develop and supply facial recognition software to the Russian government that uses these products and services to track and target peaceful protesters and activists. The products and services that these companies provide have become integral to Russia's mass-surveillance apparatus. These activities are contrary to the foreign policy interests of the United States under § 744.11 of the EAR. Licenses will be required for all items subject to the EAR. License applications will be reviewed with a license review policy of presumption of denial.

For the reasons described above, this final rule adds the following 8 entities including aliases where appropriate, to the Entity List:

Burma

- Sky Aviator Company Limited; and
- Synepex Shwe Company Ltd.

China

- Beijing Zhongdun Security Technology Group Co., Ltd.; and
- Zhejiang Uniview Technologies Co., Ltd.

Russia

- Aviasnab LLC;
- Joint Stock Company Gorizont;
- NtechLab LLC; and
- Technology Videoanalysis LLC.

Savings Clause

For the changes being made in this final rule, shipments of items removed from eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) as a result of this regulatory action that were en route aboard a carrier to a port of export, reexport, or transfer (in-country), on December 11, 2024, pursuant to actual orders for export, reexport, or

transfer (in-country) to or within a foreign destination, may proceed to that destination under the previous eligibility for a License Exception or export, reexport, or transfer (in-country) without a license (NLR) before January 10, 2025. Any such items not actually exported, reexported or transferred (in-country) before midnight, on January 10, 2025, require a license in accordance with this final rule.

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA) (50 U.S.C. 4801–4852). ECRA provides the legal basis for BIS's principal authorities and serves as the authority under which BIS issues this rule. In particular, section 1753 of ECRA (50 U.S.C. 4812) authorizes the regulation of exports, reexports, and transfers (in-country) of items subject to U.S. jurisdiction. Further, section 1754(a)(1)–(16) of ECRA (50 U.S.C. 4813(a)(1)–(16)) authorizes, *inter alia*, establishing and maintaining a list of foreign persons and end-uses that are determined to be a threat to the national security and foreign policy of the United States pursuant to the policy set forth in section 1752(2)(A), and restricting exports, reexports, and in-country transfers of any controlled items to any foreign person or end-use so listed; apprising the public of changes in policy, regulations, and procedures; and any other action necessary to carry out ECRA that is not otherwise prohibited by law. Pursuant to section 1762(a) of ECRA (50 U.S.C. 4821(a)), these changes can be imposed in a final rule without prior notice and comment.

Rulemaking Requirements

1. This rule has been determined to be not significant for purposes of Executive Order 12866.

2. Notwithstanding any other provision of law, no person is required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves an information collection approved by OMB under control number 0694–0088, Simplified Network Application Processing System. BIS does not anticipate a change to the burden hours associated with this collection as a result of this rule.

Information regarding the collection, including all supporting materials, can be accessed at <https://www.reginfo.gov/public/do/PRAMain>.

3. This rule does not contain policies with federalism implications as that term is defined in Executive Order 13132.

4. Pursuant to section 1762 of the Export Control Reform Act of 2018, this action is exempt from the Administrative Procedure Act (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation, and delay in effective date.

5. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, are not applicable. Accordingly, no regulatory flexibility analysis is required, and none has been prepared.

List of Subjects in 15 CFR Part 744

Exports, Reporting and recordkeeping requirements, Terrorism.

Accordingly, part 744 of the Export Administration Regulations (15 CFR parts 730–774) is amended as follows:

PART 744—END-USE AND END-USER CONTROLS

■ 1. The authority citation for part 744 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.*; 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 3201 *et seq.*; 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.*; 22 U.S.C. 7210; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13099, 63 FR 45167, 3 CFR, 1998 Comp., p. 208; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13224, 66 FR 49079, 3 CFR, 2001 Comp., p. 786; Notice of September 7, 2023, 88 FR 62439 (September 11, 2023); Notice of November 1, 2023, 88 FR 75475 (November 3, 2023).

■ 2. Supplement no. 4 is amended by:

■ a. Under BURMA, adding entries in alphabetical order for “Sky Aviator Company Limited” and “Synepex Shwe Company Ltd.”

■ b. Under CHINA, PEOPLE'S REPUBLIC OF adding entries in alphabetical order for “Beijing Zhongdun Security Technology Group Co., Ltd.” and “Zhejiang Uniview Technologies Co., Ltd.,” and

■ c. Under RUSSIA, adding entries in alphabetical order for “Aviasnab LLC”, “Joint Stock Company Gorizont”,

“NtechLab LLC”, and “Technology Videoanalysis LLC”.

The additions read as follows:

[Docket No. FR–6051–F–03]

RIN 2502–AJ47

Federal Housing Administration (FHA): Single Family Sale Program

AGENCY: Office of the Assistant
Secretary for Housing—Federal Housing
Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule amends the requirements for the sale of eligible single family mortgage loans insured by the Federal Housing Administration (FHA) that have been assigned to the Secretary of the Department of Housing and Urban Development (HUD) in exchange for claim payments. The mortgage notes are sold, without FHA insurance, to qualified purchasers in a manner that seeks to maximize recoveries and strengthen HUD's Mutual Mortgage Insurance Fund (MMIF) and to achieve HUD's operational goals for the MMIF. This rule transitions the pilot Single Family Sale Program from a demonstration to a permanent program and removes existing Disposition of HUD-Acquired and -Owned Single Family Property regulations, which provided for a retired program that handled the sale of HUD-held single family mortgage loans.

DATES: *Effective:* January 10, 2025.

FOR FURTHER INFORMATION CONTACT: John Lucey, Director, FHA Office of Asset Sales, Office of Housing, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410–8000; telephone: (202) 708–2625 (this is not a toll-free number), or toll-free: (800) 481–9895. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as from individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 204 of the National Housing Act,¹ HUD has general authority to pay insurance claims and dispose of mortgages and properties acquired under the FHA single family mortgage insurance programs. Section 204(g) specifically grants HUD broad discretion to implement a range of disposition alternatives. The National Housing Act also requires that HUD ensure the MMIF remains financially sound. HUD must effectively manage HUD's defaulted assets and minimize losses to the MMIF to carry out its fiduciary responsibility to ensure the financial soundness of the MMIF.

Since 2002, HUD has operated a demonstration program to implement its broad disposition authority with respect to mortgages and properties acquired under the FHA single family mortgage insurance programs. By notice published in the **Federal Register** on February 5, 2002, HUD announced the establishment of the Accelerated Claim and Asset Disposition (ACD) Demonstration to “address any programmatic concerns” and “assess its success and determine whether to implement the ACD process on a permanent basis, throughout the country.”² On October 29, 2002, HUD responded to public comments and conducted its first sale of defaulted mortgages through the ACD Demonstration.³ HUD has continuously operated the ACD Demonstration for the purpose of paying insurance claims and disposing of mortgages and related properties acquired under the FHA single family mortgage insurance programs.

HUD has used various names to refer to the demonstration program, including the ACD Demonstration, the Single Family Loan Sales (SFLS) Program, and the Distressed Asset Stabilization Program (DASP). For purposes of this rule, HUD will refer to the demonstration as the “Single Family Sale Program,” which encompasses all of the iterations of Single Family Loan Sales, including any sales HUD designates as part of this program. The final rule applies to all Single Family Loan Sales by HUD.

¹ See 12 U.S.C. 1710 (2010), as amended by section 601 of the Fiscal Year 1999 Departments of Veterans Affairs and Housing and Urban Development and Independent Agencies Appropriations Act (Pub. L. 105–276, approved October 21, 1998) (“FY 1999 Appropriations Act”).

² See Notice of FHA Accelerated Claim Disposition Demonstration, 67 FR 5418 (February 5, 2002).

³ See Notice of FHA Accelerated Claim Disposition Demonstration, 67 FR 66038 (October 29, 2002).

Absent the Single Family Sale Program, if a borrower is unable to resume their mortgage payments after loss mitigation, the mortgagee in most cases would be required to foreclose the defaulted loan to perfect an insurance claim. If the property cannot be sold to a third party at foreclosure or a second-chance auction, the mortgagee may file a conveyance claim, which gives the property to HUD in exchange for receiving the FHA mortgage insurance claim payment. Prior to filing the conveyance claim, the mortgagee will incur legal and holding costs for which the mortgagee may seek reimbursement from HUD through claim payment. A property conveyed to HUD increases HUD's Real Estate Owned (REO) inventory, posing an additional financial burden on the MMIF for asset management costs. As an alternative to filing a conveyance claim, for a forward loan that has been foreclosed, HUD will pay a claim without conveyance of title claim from the MMIF to the mortgagee if the borrower defaults and the mortgagee loses money after selling the house in a foreclosure or post-foreclosure sale. Disposing of delinquent forward mortgage loans shortens the period between default and claim payment, reducing the financial exposure to these insurance funds for costs incurred after default.

For a Home Equity Conversion Mortgage (HECM) that has been foreclosed, the mortgagee cannot file a conveyance claim but can sell the foreclosed property to a third party and receive claim payment if the mortgagee is owed more than it receives from such sale. For HECMs endorsed before 2009, HUD pays claims from the General Insurance (GI) Fund. For HECMs endorsed in 2009 or after, HUD pays claims from the MMIF.

HUD's sale of defaulted loans through the Program is generally intended to yield a recovery to the MMIF that meets or exceeds the recovery obtained as a result of a foreclosure-based claim.

When a borrower passes away after assignment of a HECM, HUD incurs costs associated with real property when it is vacant or abandoned. HUD's servicing tenure and attempts to foreclose can be delayed by title or jurisdictional issues and backlogs resulting from high volume. These issues result in higher servicing costs along with additional inspection and property preservation costs while the HECMs remain in HUD's portfolio. After foreclosure, HECMs that converted to REO are added to HUD's inventories, increasing asset management costs to protect and dispose of the properties. Disposition of eligible assigned HECMs,

such as HECMs secured by vacant and abandoned properties, can result in significant cost savings to the MMIF and GI Fund, as applicable, and enable better and more timely resolution of these assets.

On June 5, 2006, HUD issued an Advance Notice of Proposed Rulemaking (ANPR) soliciting public comment on HUD's Program.⁴ The ANPR solicited public comments to make "possible improvements to the program," including the most efficient way to "maximize the return to the FHA insurance fund" by "minimiz[ing] the time an asset is held."⁵

On April 30, 2007, HUD published a regulatory agenda providing public notice that FHA had withdrawn the ANPR effective March 1, 2007.⁶ After this action, HUD adopted additional modifications to the Program, including changing the disposition method from joint venture to whole loan sales.

II. The Proposed Rule

On July 16, 2024, HUD published for public comment a proposed rule (89 FR 57798) to amend 24 CFR parts 203, 206, and 291. The proposed rule sought to transition the Single Family Sale Program from a demonstration to a permanent program by revising HUD's Single Family Mortgage Insurance, Home Equity Conversion Mortgages, and Disposition of HUD-Acquired and -Owned Single Family Property regulations to provide for the sale of HUD-held single family forward mortgages and Home Equity Conversion Mortgages through competitive sale and direct sale of single family loans. In addition, HUD proposed to remove the existing Disposition of HUD-Acquired and -Owned Single Family Property regulations, which provided for a retired program that handled the sale of HUD-held single family mortgage loans.

HUD sought public comment on all aspects of the rule and sought public feedback on ten (10) specific issues regarding the operation of the Program.

III. This Final Rule

This final rule adopts the proposed rule with no changes. The next section outlines how various issues raised through public comments may be addressed through guidance or by future updates to sale documents, including but not limited to Conveyance, Assignment, and Assumption Agreements (CAAs), **Federal Register**

Notices (FRNs), and Bidder Information Package (BIP) forms.

IV. Public Comments

The public comment period closed on September 16, 2024. HUD received 11 distinct responsive comments from individuals, associations, advocacy organizations and a variety of interested parties. The following presents the significant issues and questions related to the proposed rule raised by the commenters, and HUD's responses to these issues and questions. HUD would like to thank all the commenters for their thoughtful responses

Specific Questions for Comment From the Proposed Rule

In section IV of the proposed rule, HUD included several specific questions for public comment. Those specific questions from the proposed rule and public comments received in response to those specific questions are summarized here, along with HUD's responses to the public comments received.

A. Question #1: What Additional Actions HUD Can Take To Provide Greater Bidding Opportunities for Nonprofit Organizations and Governmental Entities

1. Recommendation To Modify Capital Requirements

One commenter stated that HUD should reduce the capital requirement to participate in the program. The commenter said that the general \$5,000,000 net worth requirement is extremely high, out of scope with the requirements of various localities, and is a mismatch for the relatively low average sale prices in some states. The commenter stated this requirement precludes the participation of entities that know their communities best, including many mission-driven nonprofits and smaller entities, such as smaller minority-led developers.

The commenter stated that while HUD permits nonprofits to participate if they have a net worth of \$3,000,000 or provide an irrevocable letter of credit or performance bond, those are still barriers to participation and should be revisited. The commenter stated that the net worth requirement is arbitrarily high and prevents participation by many nonprofits and community development organizations and recommended that HUD allow nonprofits to jointly participate and bid with a financial partner to meet the net worth requirement, such as a locally situated and active community redevelopment entity.

The commenter recommended that HUD replace the requirement of an irrevocable letter of credit with a lower dollar amount line of credit. The commenter stated that irrevocable letters of credit and performance bonds are expensive and difficult to obtain and maintain and may have impacts on the balance sheets of nonprofit entities, while many nonprofits have access to revolving lines of credit. The commenter also stated that both the irrevocable line of credit and performance bond would likely be unnecessary if HUD implemented a meaningful prioritization and "first look" program so nonprofits could know the capital they would need to bid at the loan sale.

HUD Response: HUD appreciates the stakeholder feedback. To maximize the usefulness and applicability of the Program, any capital requirement changes and what documentation may be used to demonstrate financial viability would be addressed not in the rule itself, but via notice or sale documents, such as the Bidder Information Package.

One commenter recommended the establishment of a fund for use by qualified non-profit bidders.

HUD Response: HUD appreciates the stakeholder feedback; however, HUD is unable to establish a capital fund absent congressional appropriations that would provide for such a fund.

2. Request To Revisit a 95 Percent Value Requirement

Two commenters recommended that HUD revisit a perceived 95 percent value requirement. The commenters stated that the requirement, based on market rate data, poses a challenge amid rising home prices and limits nonprofit competition. One commenter stated that the Claims Without Conveyance of Title program imposes a similar requirement, which results in very few mission-driven nonprofits participating in the program. The commenters recommended basing the 95 percent requirement on census tract or other methodology that takes into consideration the income of the local area, as opposed to market or asset value. Alternatively, the commenters suggested that the formula take into account rehabilitation costs and holding cost and legal fees for eviction of occupied assets.

HUD Response: The Single Family Sale Program does not impose such a requirement on purchasers. The National Housing Act imposes a statutory fiduciary obligation on HUD to ensure the MMIF remains financially sound (12 U.S.C. 1708(a)(3)) while also

⁴ See *Accelerated Claim and Asset Disposition (ACD) Program; Advanced Notice of Proposed Rulemaking*, 71 FR 32392 (June 5, 2006).

⁵ *Id.*

⁶ See *HUD Semiannual Regulatory Agenda*, 72 FR 22694 (April 30, 2007).

directing the Secretary to ensure that it continues to meet the housing needs of the borrowers that the single family mortgage program is designed to serve (12 U.S.C. 1708(a)(7)(B)). Consistent with those obligations, HUD seeks to obtain the maximum recoveries for the agency while also encouraging as many participants in the Single Family Sale Program as practical. HUD believes the current method for valuating loans offered for sale under the Single Family Sale Program appropriately balances those two obligations, but the method used by the Program does not impose the 95 percent requirement referenced by the commenters.

3. Participation by Wholly Owned Special-Purpose Entities

Two commenters asked HUD to allow wholly owned special purpose entities, classified as disregarded entities by the Internal Revenue Service (IRS), to participate in the program. A commenter identified the inability of disregarded entities to participate as a barrier faced by nonprofits when seeking HUD recognition as a qualifying nonprofit. The commenters stated that without the requested change, a significant portion of mission-driven organizations that are considered disregarded entities cannot benefit from the incentives HUD is proposing that would benefit nonprofit participation in the program. The commenters recommended that HUD recognize disregarded entities under the definition of a nonprofit and adopt standards that are similar to those used by the IRS.

HUD Response: HUD appreciates the stakeholder feedback. HUD may allow a Purchaser to endorse and assign Single Family Loans from HUD to Purchaser's special purpose entity acquisition vehicle on terms permitted in the CAA. HUD can establish eligibility criteria through sale documentation, such as the CAA, and will consider doing in a way that addresses this concern in future loan sales. HUD is not making the requested change through the rule as that method would limit the flexibility that HUD requires to run the Program.

4. Third-Party Capital Partners

Two commenters stated that FHA should incorporate flexibility in the use of third-party capital partners by nonprofit entities in both the bidding process and the deployment of equity from upside revenues, with safeguards to prevent abuse. The commenters stated that many nonprofit entities are working with capital partners to unlock additional resources and create more affordable supply. One commenter stated that if FHA's stance on third-

party capital partners remains unchanged, then the commenter suggests creating a fund accessible to qualified nonprofits to allow them to bid more competitively.

HUD Response: HUD appreciates the stakeholder feedback. HUD is unable to establish a capital fund absent congressional appropriations that would provide for such a fund. The ability to use third-party capital partners could potentially be addressed through future sale documentation such as the Sale Notice to maintain flexibility for future sales and future market environments.

B. Question # 2: Whether a Competitive Sale of Single Family Loans Should Disallow Low-Value Mortgages and Properties That Are Vacant

One commenter stated that low-value mortgages and properties that are vacant should not be disallowed and that more of these assets should be made available only to non-profit organizations and at a greater discount. The commenter also stated there should be a mandate to sell these assets to very-low-income buyers and the prices should be low enough to be viable for a non-profit.

Another commenter said that HUD should include low-value mortgages as they may still be valuable to specialty servicers who can offer modifications not available under FHA's waterfall to borrowers with low cash flow but substantial equity, to enable impacted borrowers to keep their homes.

The same commenter stated that HUD should remove the "exclusion of low-value mortgages secured by vacant properties" from § 203.413(b) as loan sales may offer a fast path to re-occupancy by a new owner and result in cost savings and more timely resolution of those assets.

HUD Response: HUD appreciates the stakeholder feedback. HUD is retaining the exclusion of low-value mortgages secured by vacant properties in the § 203.413(b) of the final rule. HUD believes that selling low-value, vacant, forward loans in bulk note sales is detrimental for neighborhoods because investors have few to no incentives to invest in these properties, and, without investor interest, they will blight neighborhoods which is contrary to the purposes of the Single Family Sale Program. Instead, HUD will address the sale of low-value mortgages secured by vacant properties through other means.

C. Question # 3: Should All Single Family Sales Require a "First Look" Program for Loans That Convert to Real Estate Owned Property

Three commenters supported the inclusion of a "first look" program, with various recommended changes.

One commenter stated that a "first look" program geared towards nonprofit entities would be impactful and allow for participation by the local community and local organizations. The commenter stated a recurring and regularly scheduled "first look" would add predictability and enable nonprofit organizations to assemble the required team, paperwork, and financing. The commenter also stated that stakeholders with proven community development experience, including community-based organizations and national nonprofits, should have priority to bid over investors and "unknown nonprofits".

One commenter recommended that the language be revised to "may", rather than "will", include a "first look" program. The commenter stated that applying the requirement to every Participating Service Agreement (PSA) may lengthen rehabilitation and re-occupancy timelines, increase holding costs, and reduce the purchase price of the loans and the corollary benefit to the Insurance Fund. The commenter stated that the PSA should set the first-look requirements and enable the evaluation of a nonprofit's capital and capacity to support a nationwide first look program in specific non-performing loan sale localities on a sale-by-sale basis.

HUD Response: HUD appreciates the stakeholder feedback. This final rule will maintain the "first look" program for every sale and will not make it optional. In addition to minimizing losses to the MMIF, the purpose of the Single Family Sale Program is to further HUD's historic mission of providing housing opportunities for low- and moderate-income families. The "first look" requirement serves that important purpose by providing owner-occupant buyers, governmental entities, and eligible nonprofit organizations the first opportunity to purchase property that converts to real estate owned (REO) property by foreclosure or deed-in-lieu of foreclosure following the sale of a mortgage loan under the Single Family Sale Program.

HUD believes every sale should have this requirement and the final rule retains the proposed language in § 291.615(a) that post-sale requirements for Single Family Loans that convert to real estate owned property through foreclosure or deed-in-lieu of foreclosure will include a "first look

program, providing an exclusive listing period for owner occupant, nonprofit organization, governmental entities, and other prospective buyers as permitted by HUD.”

D. Question #4: Whether Post-Sale Servicing Requirements Should Include Loss Mitigation Requirements That Match or Exceed FHA Loss Mitigation Requirements for Insured Mortgage Loans, What Loss Mitigation Options Have Been Successful, and What Loss Mitigation Standard and Waterfall Should Be Utilized

1. Comments on Loss Mitigation Options and Scope

Several commenters were supportive of the importance of loss mitigation options and the proposal to require buyers under the Single Family Sale Program to offer loss mitigation options that are as or more generous than the FHA loss mitigation options.

Two commenters stated that the requirement to provide FHA loss mitigation options should be a floor and that the waterfall of allowable outcomes should be broader. One commenter suggested that servicers should be encouraged to consider options such as principal forgiveness and payment deferral. One commenter stated that the first priority should be foreclosure prevention, and all buyers should offer borrowers options to reinstate, enter a trial, or permanent modification and, if that's not possible, to assist the buyer with a short sale, deed in lieu of foreclosure or short payoff.

One commenter said required loss mitigation would not place a significant burden on servicers as the options are set out in the FHA Single Family Housing Policy Handbook and there is increased standardization of streamlined loss mitigation reviews in the industry.

Two commenters noted the importance of loss-mitigation options that take into account the needs of specific borrowers. One commenter stated that the National Housing Act and the obligation to affirmatively further fair housing require HUD to take into account the needs of specific borrowers and design systems to promote the success of those borrowers. The commenter said that the obligation to affirmatively further fair housing is particularly relevant to FHA's insured loan program because Black and Latino borrowers rely heavily on it to purchase homes.

One commenter stated that requiring the loss-mitigation options would mitigate the risk of investors purchasing notes for the purpose of foreclosing and

avoid the unfairness of stripping away the benefits of FHA servicing options when there is a default. The commenter also noted that a borrower's circumstances may have changed and another opportunity to receive an affordable workout option is essential.

One commenter stated that post-sale loss mitigation options should not be “as or more generous” as the FHA waterfall as the requirement is undefined and may force purchasers to offer the same options as those in the FHA waterfall to avoid allegations that the loss mitigation terms were less generous.

One commenter stated that if foreclosure is unavoidable the buyer should be required to assume HUD's responsibility to create affordable homeownership for new owner/occupants, a requirement that benefits very low-, low-, and moderate-income buyers should be in place, and purchasers should be required to provide a percentage of outcomes in all categories. The commenter also stated that exceptions should be made only after a written request to HUD and HUD approval should be required before a sale to investors.

One commenter raised concerns that loss-mitigation practices by private equity firms may not comply with FHA servicing requirements. The commenter provided an example of an entity that uses data to assess borrowers' “job security” to determine when to pursue loan modification or foreclosure, which does not consider other important factors or involve interactions with the borrower.

One commenter stated that loss mitigation is extremely important, the foreclosure process is detrimental to families and communities, and it is important to allow families who are traditionally ostracized by mortgage lenders an opportunity at homeownership and second chances during hard economic times.

HUD Response: HUD acknowledges the importance of loss mitigation in providing stability for families and communities, especially those traditionally marginalized by mortgage lenders. The final rule retains language in § 291.615(a) requiring Purchasers to offer loss mitigation options “that are as or more generous than FHA loss mitigation options,” as outlined in the FHA Single Family Housing Policy Handbook. This standard ensures that borrowers receive robust support, with the flexibility for Purchasers to offer additional, tailored assistance as needed.

HUD values the commenters' concerns and encourages Purchasers not

to be deterred from providing expanded or customized loss mitigation options that exceed FHA standards. While the final rule specifies baseline requirements, HUD will address further enforcement of these requirements and any necessary future adjustments in sale notifications and legal documentation, allowing for adaptability as needs evolve.

2. Loss Mitigation Standards Should Be Publicly Available

Two commenters stated that HUD should require Purchasers to make loss mitigation standards public. The commenters cited examples where a lack of transparency harmed borrowers and stated that without access to the guidelines and loss mitigation standards, borrowers and their advocates will be unable to effectively challenge denials and other errors, leading to avoidable foreclosures.

A commenter considered it a major omission that the requirement to make loss mitigation standards public was not in the proposed rule. The commenter urged HUD to make the obligation to make loss mitigation guidelines accessible to the public clear in the final rule and in the FHA Single Family Housing Policy Handbook.

HUD Response: HUD appreciates the stakeholder feedback. Due to the specificity and the potential for needed changes in the future, HUD's decisions to publish the Purchaser's loss mitigation requirements would be captured in future sale legal documentation (the CAA) and/or sale notifications such as a **Federal Register** Notice if this is desired, and not in the rule.

3. Importance of an Enforcement Mechanism

One commenter stated it is essential that FHA develop proactive enforcement mechanisms to ensure that note purchasers are complying with their loss mitigation obligations. The commenter also stated that HUD should not rely on self-certification by purchasers, and purchasers that violate these loss mitigation obligations must face serious consequences, including bans from future note sales and civil prosecution.

HUD Response: HUD appreciates the stakeholder feedback. Due to the specificity and the potential for needed changes in the future, HUD's decisions to enforce loss mitigation requirements would be captured in future sale legal documentation and/or sale notifications if this is desired, and not in the rule.

E. Question # 5: Should HUD Allow Nonprofit Organizations and Governmental Entities To Qualify for Priority Bidding Status in Single Family Sales

Several commenters supported priority bidding status to allow nonprofit entities to be awarded up to 50 percent of the loans in a sale. One commenter recommended a priority bidding status for up to 75 percent of the loan pool for nonprofit entities. One commenter stated HUD should offer priority bidding for nonprofit entities and proven community investment and community redevelopment organizations and create a preferred order of qualifications and priority to purchase homes (owner-occupant, nonprofits, and government).

Two commenters recommended that a portion of assets in a sale should be set aside for nonprofit organizations with priority bidding status. One commenter recommended a 50 percent set aside and one commenter recommended a 75 percent set aside for both Single Family Sale Program and HECM loan sales. The commenters recommended that if the set aside has not been reached and a nonprofit is bidding on an asset, the nonprofit should win even if it is below the reserve. The commenters also recommended that if there are no nonprofit bids for assets in the set-aside, nonprofits should be offered a last look on the assets in an effort to obtain nonprofit bids. One commenter recommended that the last look include pricing of the available assets in the pool to obtain more nonprofit bids and a reserve disclosure to allow nonprofits to better target their bid strategy.

Two commenters stated that acquisition by private investors leads to the conversion to high priced rental units that drive up housing costs and private investors tend to bid over reserve and win properties in locations where the need for affordable homeownership is great and impact potential is high. The commenters stated that nonprofits should be awarded properties that are closer to transit, have access to favorable jobs, and where homeownership equity is hardest to achieve.

One commenter stated that the priority status for nonprofits must have adequate and enforceable safeguards to protect against fraud and sham nonprofit organizations.

One commenter supported HUD's efforts to enforce mechanisms that allow owner occupants, nonprofit organizations, and government entities to acquire loans through the Program and recommended that HUD offer loan

pools for sale through auctions limited to single family buyers, similar to the prior Neighborhood Stabilization Program.

HUD Response: HUD appreciates the stakeholder feedback. If HUD decides to revise the carve-out percentage and how it will be applied to various sale types, it will be captured in future sale legal documentation and/or sale notifications and not in the rule itself. Such a change would also need to be reviewed by the Office of Management and Budget under the A-11 Circular. Maintaining this potential change as part of the sale documents and/or sale notification creates greater opportunities for HUD to retain some flexibility for future sales.

F. Question #6: Whether HUD Has Proposed a Workable and Efficient Process for Direct Sales of Single Family Loans

Several commenters stated that nonprofits should be able to request a direct sale without a unit of government involved. One commenter suggested HUD consider extending the opportunity to qualified, capitalized non-profit organizations with proven track records. Two commenters suggested that nonprofit organizations that often partner with government should be able to request a direct sale without a unit of government involved, so long as HUD ensures the nonprofit is controlling the management and disposition of the assets.

HUD Response: HUD appreciates the stakeholder feedback. HUD's implementation of the specifics of the direct sales will be established via Sale Notice pursuant to the Secretary's authority to "prescribe requirements for a Direct Sale of Single Family Loans through Sale Notice" as set out in § 291.619(a) of the final rule. HUD is currently considering allowing direct sales to nonprofits as permitted by § 291.617 of the final rule.

G. Question #7: Should a Borrower Loan Sale Notification Be Required and What Information Should Be Included

1. General Comments Regarding Borrower Loan Sale Notification

One commenter strongly supported a requirement for pre-sale notice as an essential due process protection for borrowers that would enhance compliance with FHA's loss mitigation guidelines and protect the insurance fund from unnecessary losses. The commenter recommended that all servicers be required to provide the form to borrowers when a loan is referred to HUD for inclusion in a future loan sale.

The same commenter stated that the notice should be a HUD form or HUD-approved template and include: (1) a description of the Single Family Loan Sale Program; (2) a summary of the FHA loss mitigation options; (3) a chronology of the servicer's review of the borrower for the FHA loss mitigation options, including dates for waterfall reviews and outcomes or, if a waterfall review was not conducted, the reasons it did not occur, including dates of outreach and reference to specific communications; (4) notification that the borrower can still seek a loss mitigation review from the servicer under FHA guidelines if the borrowers' circumstances have changed since a prior review; (5) information about how the borrower can dispute the servicer's representations about past loss mitigation reviews; (6) notification that the loan will not be placed in a loan sale pool as long as a dispute over past loss mitigation conduct is pending or a new loss mitigation review based on changed circumstances is underway; and (7) information about referrals to housing counselors and legal aid offices in the borrower's vicinity.

One commenter questioned whether an advance notice is helpful or detrimental to the distressed borrower's wellbeing and suggested adding information to the default/delinquency notice instead.

One commenter stated that FHA should allow servicers to comply with the requirement by adding elements to the servicing transfer notification already required under 12 CFR 1024.33(b). The commenter suggested this approach would reduce the borrower's confusion, the cost, and the environmental impact of sending two separate interrelated letters.

HUD Response: HUD appreciates the stakeholder feedback. The final rule retains language in § 291.605(a)(5) that requires the Participating Servicer to ensure that the Loan Sale Notification is provided to each borrower and any other parties required by the Secretary. The details around how the Loan Sale Notification to the borrower is structured and what information must be included in such notification will be set out in more detail by HUD in the Sale Notice or Mortgagee Letter.

2. Post-Notice Loss Mitigation Reviews

One commenter stated that if the borrower informs the servicer that they had a change in financial circumstances before the sale occurs, the servicer should reconsider the borrower's eligibility under the HUD waterfall. The commenter stated that the presale notice will prompt those discussions with

borrowers who have improved their financial circumstances and HUD should clearly state the expectation that servicers will re-review before the sale.

HUD Response: HUD appreciates the stakeholder feedback. Due to the specificity and the potential for needed changes in the future, HUD's decisions around post-notice loss mitigation reviews would be captured in future sale legal documentation, such as the Participating Servicer Agreement, and/or sale notifications if this is desired, and not in the rule.

3. Recommended Dispute Resolution System

One commenter stated that HUD should provide a more comprehensive dispute resolution system through its National Servicing Center (NSC), with the capacity to directly address borrower disputes regarding loss mitigation. The commenter stated that the NSC should review complaints, maintain written records of the reviews, and produce a memorandum of findings and conclusions. The commenter further stated that HUD should conduct a final review of the NSC's determination at the request of the borrower and HUD decisions should be subject to review under the Administrative Procedures Act. The commenter further stated that the presale notice should give details about a dispute resolution process for borrowers and direct the borrower or their representative to address the complaint to the NSC and the servicer.

HUD Response: HUD appreciates the stakeholder feedback regarding the importance of a comprehensive dispute resolution system through the HUD National Servicing Center (NSC). The NSC will be consulted to develop a framework to address borrower disputes related to loss mitigation, including the maintenance of written records and the provision for final review requests. Specific details about a dispute resolution process will be included in future sale legal documentation and notifications rather than in the rule itself, ensuring that borrowers are informed about how to address their complaints effectively. HUD remains committed to enhancing transparency and responsiveness in the resolution of borrower disputes.

H. Question #8: What Information Should HUD Include in Periodic Reports on Single Family Sales Loan and Property Outcomes

1. Content of Data Collection and Reports

One commenter stated that reporting the post-sale status of loans sold through the Single Family Sale Program is important to fully assess the impact of the program on communities and borrowers. The commenter recommended that the data be publicly available, updated at least annually, and include: (1) post-sale loss mitigation activities, including approvals and denials of options, including the levels and nature of payment changes, and (when available) old and new borrower debt-to-income ratios; (2) demographic and geographic data about homeowners and loss mitigation; (3) data on the long-term performance of loans after loss mitigation, including rates of redefault; and (4) data on subsequent sales and rentals involving the properties. The commenter stated that reports with this type of data were produced by government entities, including during and after the 2008 foreclosure crisis.

Two commenters stated that racial and other demographic data about homeowners is important to ensure the program is affirmatively furthering fair housing.

A commenter stated that buyers should include the number of loss mitigation approvals and denials and the outcomes of all loans or properties that they or related entities control and that information should be made public and regularly updated.

A commenter stated that HUD should provide performance outcomes for each buyer at least once annually. The commenter stated HUD should also provide qualified bidders with defaulted buyer information and should consider allowing performing buyers with the opportunity to acquire assets from those buyers in default.

One commenter stated that the proposed rules maintain the current standard of four years of outcome data and that is an insufficient period of time to properly assess program outcomes.

One commenter requested that FHA publish more information broken down by note pools, including information on vacancy rates and a breakdown by pool of unpaid loan balances. The commenter also requested that FHA provide more data broken down by note purchaser, including unpaid loan balances and sales prices.

HUD Response: HUD appreciates the stakeholder feedback regarding data transparency and reporting on Single

Family Sales outcomes. HUD recognizes the value of detailed reporting, including post-sale loss mitigation activity, demographic and geographic data, and long-term loan performance metrics. The final rule continues to provide that outcome data and the timeline for reporting will be set out in the CAA, which will generally continue to provide for outcome data over a four-year period, while sale notification and sale documentation may address updates to reporting requirements and additional data presentation as deemed necessary to support program goals.

2. Requested Clarity on Reporting Obligations

A commenter stated that the proposed rule appears to direct subsequent transferees from initial buyers to comply with post-sale reporting obligations. The commenter recommended that the language be edited to make that point clear as the post-sale reporting obligation would have little value if it did not apply to transferees.

HUD Response: HUD appreciates the stakeholder feedback and will review the current reporting requirements and the information gathered. Any changes to the reporting requirements and how HUD presents the information will be captured through sale notifications like the **Federal Register** Notice and/or sale legal documents, including the BIP and the CAA. This will provide flexibility for the Department and the ability to improve and enhance reporting based on program experience.

3. Oversight and Enforcement of Reporting Obligations

One commenter identified concerns about reliance on self-reporting to assess servicers' post-sale performance and recommended that loan purchase agreements authorize limited direct HUD oversight of servicers before and after the four-year mandatory post-sale reporting period. The commenter stated that such oversight would help determine whether a property remains owner-occupied or was converted to a rental investment property and would allow assessment of the long-term efficacy of loss-mitigation options offered by post-sale servicers. The commenter also stated that HUD should assess meaningful sanctions, including disqualification from future sales and financial penalties, for substantial noncompliance with reporting requirements.

HUD Response: HUD appreciates the stakeholder feedback and will review the current reporting requirements, and the information gathered. Any changes to the reporting requirements and how

HUD presents the information will be captured through sale notification and/or sale legal documents.

I. Question #9: Should Eligibility Criteria for a Single Family Sale Include Satisfaction of HUD's Loss Mitigation Requirements

One commenter strongly supported the language in the proposed rule that requires satisfaction of HUD's loss mitigation requirements as a condition for sale eligibility. The commenter stated that HUD has long represented that compliance with HUD's loss mitigation requirements is a condition to a loan's eligibility for a sale, which is consistent with HUD's requirement that mortgagees certify comply with HUD's regulations as a condition to payment on an insurance claim.

The commenter stated that HUD should develop a system to ensure compliance by servicers and that servicer check-box self-certification is insufficient. The commenter provided examples of improper self-certifications and stated that HUD Office of the Inspector General reports have found problems with self-certification by servicers and failures by servicers to provide correct loss mitigation assistance.

The commenter stated that HUD should require documentation of the servicer's loss mitigation review as a condition to a loan's eligibility for early claim payment and a sale of the loan. The commenter stated the loss mitigation waterfall in the FHA Single Family Housing Policy Handbook requires servicers to have a record of how the HUD waterfall was applied and if a servicer cannot produce that documentation, it must be required to establish compliance with the HUD outreach requirements as set out in the Handbook.

One commenter stated that a loss mitigation addendum should be signed with every application approval and a report indicating each outcome should be provided on a quarterly basis, including whether it is a reinstatement, trial or permanent modification, short sale or payoff, deed in lieu, or if after foreclosure than evidence of sale to an owner/occupant, lease to an income-qualified tenant, and evidence of sale to a community of color or marginalized individual if available.

HUD Response: HUD appreciates the stakeholder feedback on ensuring servicers' compliance with loss mitigation requirements for loan sale eligibility. HUD reaffirms that satisfying these requirements is essential for sale eligibility and is a post sale requirement under § 291.615(a) of the final rule.

HUD acknowledges that flexibility may be needed for certain scenarios, such as disaster-related sales. The final rule sets out actions HUD may take in the event there is a failure to meet post-sale requirements or any submission of false information or misrepresentation § 291.621. Any related criteria will be detailed in the sale notification or sale documents, rather than the rule, to allow for adaptable policy implementation.

J. Question #10: Should HUD Offer Favorable Sale Terms to Governmental or Nonprofit Entities

1. Potential Favorable Sale Terms

Several commenters directly supported providing favorable sale terms to nonprofit entities. A commenter stated that a government or non-profit operator is more likely to utilize the program for community benefit and sell or lease the home to an income qualified person or person of color. A commenter said that more favorable sale terms and conditions for nonprofit organizations and community-based entities, such as allowing a first look, will help organizations know what properties are coming into the sale and how they can be poised to obtain a property and return it to a useful purpose.

One commenter recommended reducing the reserve price to better facilitate transitions of the property to nonprofit organizations at a price that is closer to fair market value. The commenter recommended additional favorable terms such as bulk bidding to allow for greater flexibility and faster disposition and allow a financial incentive to nonprofit organizations in the form of a reduced price for a larger purchase.

One commenter stated HUD should allow a waiver of certain reporting criteria, such as proof of ethnicity, familial status or income as most purchasers cannot ask those questions and it is not always possible to get a HUD-approved non-profit organization to engage in the process. The commenter recommended that HUD use census tract information to help the buyer with this situation.

HUD Response: HUD appreciates the feedback supporting favorable sale terms for nonprofit entities and community-based organizations. Adjustments such as reduced reserve prices, first-look provisions, bulk bidding, and streamlined reporting requirements could enhance nonprofits' participation and community impact. HUD will consider making modifications to sale terms in sale

notifications and sale documentation to address this concern.

2. Safeguards on Benefits to Nonprofit Organizations

One commenter stated that any system created for the benefit of nonprofit organizations must have appropriate safeguards to prevent abuse of the system by straw buyers and there should be adequate enforcement and oversight.

HUD Response: HUD appreciates the feedback regarding safeguards to prevent misuse of systems established for nonprofit organizations. The Department is committed to preventing bid abuse and ensuring fair qualification processes. Any adjustments to the bidding or qualification criteria will be implemented through sale notifications including the **Federal Register** and sale documents like the BIP and the CAA rather than in the rule, allowing for greater flexibility in enforcement and oversight.

3. Recommended Deadline Extensions for Nonprofits

Two commenters recommended that nonprofits be allowed 60 days to perform pre-bid due diligence and 90 days to close. The commenters stated that nonprofits often request extensions from HUD because they rely on debt to finance the sales and do not have immediate access to substantial cash reserves and providing the additional time up front would alleviate pressure on both nonprofits and HUD. One commenter stated an extended pre-bid due diligence period would allow more time to assess the interest of affiliate networks in the properties.

HUD Response: HUD appreciates the feedback regarding extended timelines for nonprofits to conduct pre-bid due diligence and close sales. HUD acknowledges the unique challenges nonprofits face in securing financing and recognizes that additional time could alleviate pressures on both nonprofits and HUD. Any timeline extensions would likely apply to all bidder types to ensure equity. Such changes would be implemented through sale notifications (such as the **Federal Register** Notice) and sale documentation (the Qualification Statement, the BIP and CAA) rather than in the rule itself, providing the Department greater flexibility.

Public Comments and Recommendations

A. General Support

A number of commenters expressed overall support for the rulemaking and appreciated that the proposed rule

incorporated prior stakeholder input. Several commenters expressed support for converting the Single Family Sale Program from a pilot to a permanent program.

HUD Response: HUD appreciates the stakeholder feedback in support of the Single Family Sale Program and this rule.

B. Racial Homeownership Disparities

Several commenters discussed racial homeownership disparities, the racial wealth gap, and the importance of homeownership to individuals and communities. One commenter stated that Black and Latino homeowners are disproportionately impacted by HUD note sales and the related impacts to communities that are targeted by institutional investors. One commenter said that the obligation to affirmatively further fair housing is particularly relevant to FHA's insured loan program because Black and Latine borrowers rely heavily on it to purchase homes.

HUD Response: HUD appreciates the comments on racial disparities in homeownership, the racial wealth gap, and the vital role of homeownership in supporting communities. The Department understands concerns that Black and Latine homeowners may be disproportionately affected by note sales and institutional investor involvement. Recognizing the importance of affirmatively furthering fair housing, HUD is aware of the critical role FHA-insured loans play for many Black and Latine borrowers. HUD remains committed to promoting equitable outcomes and strengthening protections for communities impacted by systemic inequities. These insights support HUD's ongoing efforts to foster fair housing access and reduce disparities across all communities.

C. Support for Nonprofit Organizations and Concerns Regarding Private Investors

Several comments were submitted that provide general support for nonprofit and community-based organizations and raise concerns regarding the role of private investors. Commenters noted the importance of nonprofit and community-based organizations in single family loan sales, and said these organizations have the experience and expertise to meaningfully invest in communities, navigate public and private funding, and foster homeownership.

A number of commenters raised concerns regarding the impacts of private investors in loan sales. One commenter provided data on the impact of purchases by institutional investors

and stated HUD's goal should be to end the practice of selling FHA notes to private investors. Two commenters stated that market forces alone cannot address the cost constraints placed on low- and moderate-income families. A commenter noted that if private investors continue to purchase loans, strong enforcement of borrower protections and public reporting data regarding the program and outcomes will be important. One commenter stated that given the capacity limits of nonprofit organizations, profit-motivated investors will likely remain a major part of the program and stated it is important for HUD to mitigate the harm that profit-motivated investors could impose on FHA borrowers if those investors are left with largely unfettered discretion.

HUD Response: HUD appreciates the strong support expressed by commenters for nonprofit and community-based organizations and acknowledges the valuable role these organizations play in single family loan sales. HUD recognizes that nonprofits have a unique capacity to positively impact communities through their extensive expertise, commitment to fostering homeownership, and ability to navigate public-private funding sources effectively.

HUD also notes the concerns raised by commenters regarding the role of private investors in loan sales, including the potential challenges market-driven entities may pose for low- and moderate-income families. While HUD anticipates that private investors will continue to participate alongside nonprofits due to capacity constraints within the nonprofit sector, HUD is committed to exploring avenues to balance investor involvement with strong borrower protections and community-focused objectives. To this end, HUD will continue to enforce borrower protections and enhance transparency by providing public reporting on program outcomes.

HUD remains dedicated to reviewing feedback on how best to support nonprofit organizations while ensuring private investor participation aligns with HUD's mission of promoting sustainable, affordable homeownership opportunities. The Department will carefully consider all suggestions as part of its ongoing commitment to improve the Single Family Sales Program.

D. Recommendation That HUD Impose and Enforce Income Limits

Two commenters recommended that HUD bolster the objective of selling to households earning less than 120 percent AMI and renting to households

at or below 80 percent AMI by requiring that both non-profit and for-profit comply with those AMI limits and barring entities that do not comply with those objectives from future sales.

HUD Response: HUD appreciates the stakeholder feedback. Any requirements related to income limits, eligibility, or restrictions on future participation for non-compliance will be outlined within the sale notifications (such as the **Federal Register** Notice) and associated legal documents like the Qualification Statement, the CAA and the BIP) rather than in the rule itself. Addressing these criteria through sale documentation provides HUD with the flexibility needed to adjust and strengthen program requirements in response to changing market conditions and program goals. HUD remains committed to transparency and will ensure stakeholders have clear guidance through publicly accessible sale documents.

E. Clarify That the Participating Servicer Agreement (PSA) Controls Eligibility Criteria

One commenter stated that in order to set proper expectations with Participating Servicers, § 203.413(b) should expressly state that the "acceptability criteria include to the satisfaction of the Single-Family Sale loss mitigation eligibility requirements as defined in the PSA".

HUD Response: HUD appreciates the stakeholder feedback. HUD acknowledges the importance of clearly setting expectations for Participating Servicers. This clarification will be addressed through the PSA and associated sale documentation rather than in the rule itself. This approach allows HUD the flexibility to update and refine the criteria as necessary in response to evolving program needs, while ensuring that servicers understand their obligations under the PSA. These documents will be publicly posted for each sale, ensuring transparency for all stakeholders.

F. Repurchase Protocol When Participating Servicer Is Engaged in Significant Misconduct

One commenter recommended that HUD implement a protocol for the repurchase of loans in cases where a participating servicer engaged in significant misconduct and identified ambiguity in the current requirements. The commenter stated that the rules provide that HUD can withdraw a loan from a sale for any reason, including noncompliance with the Conveyance, Assignment and Assumption Agreement (CAA), at any time prior to the

settlement date and the definitions of CAA and Sale Notice state that the documents will include certain “repurchase requirements”. The commenter stated that the comments to § 291.605 mentions “repurchase criteria” applicable to servicers, although it is not clear whether the “repurchase” mechanism is distinct from the “withdrawal” of a loan before the settlement.

The commenter also stated that HUD should not terminate repurchase obligations at the post-sale settlement date. The commenter recommended that the Sale Notice and CAA inform purchasers that the loans are subject to repurchase as long as they are held by the initial purchaser. The commenter recommended that if it becomes apparent after a sale that the Participating Servicer misrepresented its compliance with FHA loss mitigation guidelines, the purchaser should not be permitted to foreclose. Instead, the commenter stated that HUD should require the noncomplying Participating Servicer to repurchase the loan, comply with FHA loss mitigation guidelines and provide other remedies available under FHA guidance. The commenter stated this would deter routine misrepresentations of compliance with FHA guidelines.

HUD Response: HUD appreciates the stakeholder feedback. The Department acknowledges the importance of ensuring transparency and accountability in the sale process, particularly when there are potential compliance issues with FHA loss mitigation guidelines. HUD will review the possibility of more clearly distinguishing between the “withdrawal” of a loan prior to settlement and the “repurchase” mechanism applicable post-settlement. This may include ensuring that the definitions of the CAA and Sale Notice reflect these distinctions more explicitly.

The commenter’s suggestion that repurchase obligations extend beyond the post-sale settlement date in cases of noncompliance with FHA guidelines will also be carefully considered. HUD agrees that robust mechanisms should be in place to deter misrepresentations of compliance and ensure that loans are managed in accordance with FHA’s loss mitigation guidelines.

As stated in the rule, the repurchase criteria and related terms will be more clearly defined in the Sale Notice, which will be publicly posted for each sale. Any adjustments to these terms will be addressed through the legal documents rather than in the rule itself, as this provides the flexibility needed to

adapt to evolving concerns and ensure compliance with FHA’s standards.

G. Clarification Making the Purchaser Bound by the Terms of the CAA and Notice of Sale

A commenter supported the requirement that “any subsequent transferee of or servicer” of the initial loan purchaser comply with the terms of the CAA and Notice of Sale. The commenter stated that the proposed rule specifies that subsequent transferees and their servicers must offer loss mitigation options that meet the same standard as those of the original purchaser.

The commenter stated that the term “transferee” in § 291.615(a) is not defined in the regulations and could be open to interpretation. The commenter stated that further Handbook or Mortgagee Letter of clarification would be appropriate to clarify it if means transferees of the note, assignees of the mortgage, or transferees of title to the real property. The definition is relevant because transferees of the promissory note may not have knowledge of the terms of the CAA and Sale Notice. To avoid later enforcement issues, HUD could require information about the CAA and Sale Notice obligations to be included in the recorded assignment of the mortgage to the initial purchaser and recording the CAA in property records would also provide notice to subsequent purchasers.

HUD Response: HUD appreciates the stakeholder feedback. The Department acknowledges the commenter’s concern regarding the interpretation of the term “transferee” in § 291.615(a) and its potential ambiguity in the absence of a defined meaning within the regulations.

HUD agrees that further clarification—potentially through a Handbook or Mortgagee Letter—could be useful to specify whether “transferee” refers to transferees of the note, assignees of the mortgage, or transferees of title to the real property. Additionally, HUD recognizes the concern that transferees of the promissory note may not be aware of the terms of the CAA and Sale Notice, which could lead to enforcement challenges.

HUD will consider incorporating information about the CAA and Sale Notice obligations into the recorded assignment of the mortgage to the initial purchaser and may review the potential for recording the CAA in property records to provide notice to subsequent purchasers. Any changes to the recorded assignment requirements or sale terms will be addressed within the sale agreements and related legal documents.

As noted in the rule, these documents will be publicly posted for each sale, and making changes through these legal documents allows HUD the flexibility to adapt to evolving needs and stakeholder feedback.

H. Clarify That Reporting Requirements in 24 CFR 291.615(b) Apply to Transferees and Their Servicers

A commenter stated it is unclear who must comply with the purchaser reporting requirements in § 291.615(b) and requested that HUD clarify that subsection. The commenter stated that § 291.615(b) refers to the obligation of the “purchaser”, while § 291.615(a) specifically extends the obligations to subsequent transferees and their servicers. The commenter suggested the absence of a reference to transferees and their servicers in § 291.615(b) may be an oversight and requested that HUD clarify by specifically designating the reporting obligations as applicable to transferees and their servicers.

HUD Response: HUD appreciates the stakeholder feedback. While § 291.615(a) specifically extends obligations to subsequent transferees and their servicers, HUD acknowledges that the absence of a reference to transferees and their servicers in § 291.615(b) may cause some confusion.

To clarify, the reporting obligations do extend to transferees and their servicers, as detailed in the sale agreements and related documentation. These requirements are more fully defined within the legal agreements governing each sale. As stated in the rule, HUD will publicly post these documents for each sale, providing greater transparency on the obligations of purchasers, transferees, and servicers. Any future changes to sale terms or definitions will be reflected through these legal agreements to maintain flexibility in adapting to evolving program needs.

I. Transactional Documents Should Be Made Available to the Public

One commenter stated that the rule should make clear that all key transactional documents described in § 291.601, and adapted for the specific sale, will be accessible to the public on HUD’s website. The commenter stated that documents such as the Participating Servicer Agreement, Bidder Information Package, the Conveyance, Assignment and Assumption Agreement, the Interim Servicing Agreement, and the Desk Guide are referenced and defined by the proposed rule. The commenter also stated that the rule provides that an “Addendum” to each of the documents will be published on HUD’s website for

each Single Family Sale. The commenter is unclear whether “Addendum” means the form as adapted to the specific loan sale, but strongly support the provision if that is the intended meaning.

The commenter stated that transparency is important so borrowers can know the post-sale servicing obligations that are binding on a loan purchaser and its assignees, including the Conveyance, Assignment and Assumption Agreement and the Sale Notice. The commenter said that without easy access to those documents, borrowers and their advocates will not know the eligibility requirements for loss-mitigation options and that will prevent borrower’s from effectively challenging errors in servicing and will lead to unnecessary foreclosures.

HUD’s Response: HUD appreciates the stakeholder feedback. HUD is committed to ensuring transparency in the single family sale program process. As stated in the rule, key documents—including the Participating Servicer Agreement (PSA), Conveyance, Assignment and Assumption Agreement (CAA), Interim Servicing Agreement (ISA), and Desk Guide—will be made available to the public on HUD’s website.

The Bidder Information Package (BIP), however, will only be made available to qualified bidders to protect the integrity of the bidding process. Regarding the commenter’s question about the “Addendum,” HUD clarifies that the term refers to the document as adapted for each specific loan sale, and this will also be made available as part of the public documentation for each sale.

HUD recognizes the importance of transparency so that borrowers and their advocates are informed about post-sale servicing obligations and loss-mitigation options. By providing public access to these documents, HUD aims to ensure borrowers have the information they need to challenge servicing errors and avoid unnecessary foreclosures.

J. Recommended Flexibility to Curtailment Provisions

One commenter advocated for reform to FHA’s claims curtailment rules for all claim types. The commenter was concerned by the provision that “HUD will curtail Debenture Interest” in § 203.413(d), even if a claim remains suspended for reasons beyond the servicer’s control. The commenter was also concerned that HUD’s definition of “Debenture Interest” included “approved reimbursable expenses” subject to curtailment.

The commenter recommended that the final rule: (a) limit curtailment to

deadlines missed due to factors within the servicer’s control and (b) clarifying that servicers may file supplemental claims under FHA Single Family Housing Policy Handbook if necessary. The commenter stated that addressing curtailment provisions would encourage participation in the Single Family Sales Program as servicers will not be penalized when making every effort to comply with claims filing deadlines. The commenter suggested that without this change the prospect of losing interest and out of pocket costs may chill participation.

HUD’s Response: HUD appreciates the stakeholder feedback; however, the curtailment of claims, including debenture interest and reimbursable expenses, is outside the scope of this current rulemaking. HUD acknowledges the importance of addressing these issues and encourages continued engagement on how to improve the claims process. HUD will consider this feedback for future policy updates and administrative guidance.

K. Required Sales to Owner-Occupants

One commenter stated that given the negative effects market speculation on the single-family home market, there should be a requirement that 100 percent of the properties sold end up in the hands of owner occupants. The commenter criticized the HVLS program for not doing enough to ensure a broader market effort to maintain affordable homes for first time buyers and younger generations.

HUD’s Response: HUD appreciates the thoughtful feedback regarding the impact of market speculation on the single-family home market and the suggestion to ensure that 100 percent of properties sold end up in the hands of owner-occupants. HUD is committed to supporting affordable homeownership opportunities, particularly for first-time homebuyers and younger generations.

HUD will carefully consider this proposal as part of our ongoing efforts to enhance the Home Equity Conversion Mortgage Loan Sales (HVLS) program and other Single Family Sale Program initiatives. However, any modifications to the percentage of properties designated for owner-occupants would be implemented through the sale notifications and legal documents, rather than the rule itself. This approach allows the Department the flexibility to adapt sale requirements as needed in response to evolving market conditions and program goals.

HUD remains committed to exploring all options to increase affordable homeownership and reduce market

pressures on low- and moderate-income buyers.

L. Recommended Convening of Practitioners

Two commentors recommended that FHA convene practitioners with experience using the program to allow HUD to better understand the concerns of nonprofits working to expand their single-family housing footprint. The commenters suggested that providing an opportunity for mission-driven stakeholders to share best practices would expand the reach and effectiveness of the program and continue to inform necessary reforms.

HUD Response: HUD appreciates the insightful comments regarding the value of convening practitioners with experience in the Single Family Sale Program. HUD recognizes the importance of engaging mission-driven stakeholders to better understand the challenges nonprofits face as they work to expand their single-family housing footprint. HUD agrees that providing a forum for practitioners to share best practices would not only strengthen program effectiveness but also support broader affordable housing goals.

HUD is committed to expanding collaboration with the nonprofit community and will explore opportunities to convene experienced practitioners. Such a platform could enhance stakeholder engagement, facilitate knowledge sharing, and inform ongoing program reforms, ensuring that the needs and expertise of nonprofits are integrated into future improvements of the program. HUD welcomes continued dialogue on this important initiative.

M. Credit Scores for First-Time Homeowners

One commenter stated that credit scores should not be a consideration for first-time homeowners, who can build credit through homeownership.

HUD Response: HUD appreciates the comment regarding the consideration of credit scores for first-time homebuyers. HUD understands the viewpoint that homeownership itself can serve as a pathway to building credit. However, credit scores play an important role in assessing a borrower’s ability to repay a loan and managing overall risk within the housing market.

At the same time, HUD remains committed to expanding homeownership opportunities and continues to explore ways to responsibly assist first-time homebuyers, including offering programs with more flexible credit requirements. HUD values input on this

issue and will take it into account as we seek to balance financial accessibility with sustainable homeownership outcomes.

V. Findings and Certifications

Regulatory Review—Executive Orders 12866, 13563, and 14094

Pursuant to Executive Order 12866 (Regulatory Planning and Review), a determination must be made whether a regulatory action is significant, and therefore, subject to review by the Office of Management and Budget (OMB) in accordance with the requirements of the order. Executive Order 13563 (Improving Regulations and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. The order also directs executive agencies to analyze regulations that are “outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand or repeal them in accordance with that has been learned.” Executive Order 13563 further directs that, where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, agencies are to identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public. Executive Order 14094 entitled “Modernizing Regulatory Review” (hereinafter referred to as the “Modernizing E.O.”) amends section 3(f) of Executive Order 12866 (Regulatory Planning and Review), among other things.

As previously discussed, this rule would provide flexibility for the management of defaulted loans, more efficiently accept assignment, and dispose of assigned mortgages through loan sales and reduce the overall financial exposure of the MMIF. This final rule was determined not to be a “significant regulatory action” as defined in section 3(f) of Executive Order 12866 as amended by Executive Order 14094.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit organizations, and small governmental jurisdictions.

This rule makes the Single Family Sales Program permanent and makes changes to HUD’s regulations to implement parts 203, 206, respectively referring to Single Family Forward loans and HECM, and part 291 to efficiently manage HUD’s defaulted single family assets and minimize losses to the MMIF. While small entities such as mortgage service providers may be affected by this Program, these entities would not incur a significant economic impact because the Program would provide servicers with the chance to assign burdensome and problematic loans to HUD. Therefore, the undersigned certifies this proposed rule will not have a significant economic impact on a substantial number of small entities.

Environmental Impact

This rule is categorically excluded from environmental review under the National Environmental Policy Act of 1969 under 24 CFR 50.19(c)(1) because it does not direct, provide assistance or loan and mortgage insurance for, or otherwise govern or regulate, real property acquisition, disposition, rehabilitation, alteration, demolition, or new construction, or establish, revise or provide for standards for construction or construction materials, manufactured housing, or occupancy.

Executive Order 13132, Federalism

Executive Order 13132 (Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either (i) imposes substantial direct compliance costs on State and local governments and is not required by statute, or (ii) preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This rule does not have federalism implications and does not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive order.

Paperwork Reduction Act

The information collection requirements contained in this final rule have not been revised from those provided in the proposed rule and have been submitted to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) for review and approval.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) establishes requirements for Federal agencies to assess the effects

of their regulatory actions on State, local, and Tribal governments, and on the private sector. This rule does not impose any Federal mandates on any State, local, or Tribal government, or on the private sector, within the meaning of the UMRA.

List of Subjects

24 CFR Part 203

Hawaiian Natives, Home improvement, Indians—lands, Loan programs—housing and community development, Mortgage insurance, Reporting and recordkeeping requirements, and Solar energy.

24 CFR Part 206

Aged, Condominiums, Loan programs—housing and community development, Mortgage insurance, and Reporting and recordkeeping requirements.

24 CFR Part 291

Community facilities, Conflicts of interest, Homeless, Lead poisoning, Low- and moderate-income housing, Mortgages, Reporting and recordkeeping requirements, and Surplus government property.

Accordingly, for the reasons described in the preamble, HUD amends 24 CFR parts 203, 206, and 291 as follows:

PART 203—SINGLE FAMILY MORTGAGE INSURANCE

■ 1. The authority citation for part 203 continues to read as follows:

Authority: 12 U.S.C. 1707, 1709, 1710, 1715b, 1715z–16, 1715u, and 1715z–21; 15 U.S.C. 1639c; 42 U.S.C. 3535(d).

■ 2. Add § 203.413 to read as follows:

§ 203.413 Amount of payment—Single Family Sale assignments.

(a) *Time of payment.* Upon an assignment of a mortgage insured under this part *that is acceptable to the Commissioner, made pursuant to a Single Family Sale* and in accordance with § 291.609 or § 291.619 of this chapter, the Commissioner shall pay to the mortgagee the unpaid principal balance of the loan at the time of assignment and an amount calculated in accordance with the Participating Servicer Agreement (PSA), as defined in § 291.601 of this chapter.

(b) *Acceptability criteria.* For assignment, the mortgagee must determine and certify the mortgage satisfies the Commissioner’s acceptability criteria for the Single Family Sale. Acceptability criteria includes satisfaction of the Single Family Sale loss mitigation eligibility requirements and exclusion of low-

value mortgages secured by vacant properties.

(c) *Reduction in claim.* The mortgagee's claim for insurance will be reduced for failure to take the required actions within the specified schedule of dates for the Single Family Sale, as specified in the PSA.

(d) *Curtailment of Debenture Interest.* HUD will curtail Debenture Interest at the thirtieth (30th) day following the earliest anticipated claim submission date, as identified on the schedule of dates in the PSA, if:

(1) The mortgagee's claim for insurance is not submitted to HUD; or

(2) The claim for insurance is in a suspended status.

(e) *Debenture Interest.* For purposes of this section, *Debenture Interest* means interest at the debenture rate as computed by HUD in accordance with its rules and requirements for such calculations, on the unpaid principal balance as of the claim payment date, *plus* the approved reimbursable expenses identified in the PSA, *minus* any amount of such interest or expenses that would have been curtailed or for which the Participating Servicer would have been denied reimbursement pursuant to HUD's requirements for servicing defaulted notes and processing claims, including § 203.402(k)(1)(i) and (ii), had the Participating Servicer conveyed title to the property securing the Single Family Loan to the Secretary rather than assigned the Single Family Loan in connection with an insurance claim.

(f) *Rejection of claim.* HUD may reject the mortgagee's claim for insurance and exclude the related mortgage from settlement if within the thirty (30)-day period prior to the claim's submission cut-off date, as identified on the schedule of dates in the PSA:

(1) Any insurance claim is not submitted; or

(2) Any suspended insurance claim is not resolved.

PART 206—HOME EQUITY CONVERSION MORTGAGE INSURANCE

■ 3. The authority citation for part 206 continues to read as follows:

Authority: 12 U.S.C. 1715b, 1715z-20; 42 U.S.C. 3535(d).

■ 4. Add § 206.130, under the undesignated center heading "Claim Procedure," to read as follows:

§ 206.130 Amount of payment—HECM Single Family Sale assignments.

(a) *Time of payment.* Upon an assignment of a mortgage insured under this part that is acceptable to the

Commissioner, made pursuant to a *HECM Single Family Sale* and in accordance with § 291.609 or § 291.619 of this chapter, the Commissioner shall pay to the mortgagee the unpaid principal balance of the loan at the time of assignment and an amount calculated in accordance with the Participating Servicer Agreement (PSA), as defined in § 291.601 of this chapter.

(b) *Acceptability criteria.* For assignment, the mortgagee must determine and certify the mortgage satisfies the Commissioner's acceptability criteria for the Single Family Sale.

(c) *Reduction in claim.* The mortgagee's claim for insurance will be reduced for failure to take the required actions within the specified schedule of dates for the Single Family Sale, as specified in the PSA.

(d) *Curtailment of debenture interest.* HUD will curtail debenture interest at the thirtieth (30th) day following the earliest anticipated claim submission date, as identified on the schedule of dates in the PSA, if:

(1) The mortgagee's claim for insurance is not submitted to HUD; or

(2) The claim for insurance is in a suspended status.

(e) *Debenture Interest.* For purposes of this section, *Debenture Interest* means interest at the debenture rate as computed by HUD in accordance with its rules and requirements for such calculations, on the unpaid principal balance as of the claim payment date, *plus* the approved reimbursable expenses identified in the PSA, *minus* any amount of such interest or expenses that would have been curtailed or for which the Participating Servicer would have been denied reimbursement pursuant to HUD's requirements for servicing due and payable notes and processing claims, including § 206.129(d)(3)(x), had the Participating Servicer foreclosed or the borrower sold the property in connection with an insurance claim.

(f) *Rejection of the claim.* HUD may reject the mortgagee's claim for insurance and exclude the related mortgage from settlement if, within the thirty (30)-day period prior to the claim's submission cut-off date, as identified on the schedule of dates in the PSA:

(1) An insurance claim is not submitted; or

(2) Any suspended insurance claim is not yet resolved.

PART 291—DISPOSITION OF HUD-ACQUIRED AND -OWNED SINGLE FAMILY PROPERTY

■ 5. The authority citation for part 291 continues to read as follows:

Authority: 12 U.S.C. 1701 *et seq.*; 42 U.S.C. 1441, 1441a, 1551a, and 3535(d).

SUBPART D—[Removed and Reserved]

■ 6. Remove and reserve subpart D, consisting of §§ 291.301 through 291.307.

■ 7. Add subpart G, consisting of §§ 291.601 through 291.621, to read as follows:

Subpart G—Sale of HUD-Held Single Family Mortgage Loans

Sec.	
291.601	Definitions.
291.603	Purpose, scope, and applicability.
291.605	Participating Servicers.
291.607	Qualified participants.
291.609	Bidding process.
291.611	Post-bid process and HUD's execution of the CAA.
291.613	Settlement requirements.
291.615	Purchaser servicing requirements.
291.617	General policy—Direct Sales of Single Family Loans.
291.619	Direct Sale of Single Family Loans process.
291.621	Disqualifications.

§ 291.601 Definitions.

For purposes of this subpart, the following definitions apply:

Aggregate Loan Database (ALD) means the electronic data file containing Single Family Loan information available for Qualified Participants to review before a Single Family Sale.

Bidder Information Package (BIP) means the documents prepared for participants in a Single Family Sale, which may include, but are not limited to, the following: an executive summary of the Programs; the Single Family Sale post-sale servicing and reporting requirements published by HUD; due diligence information and reports; Single Family Loan information; the Conveyance, Assignment and Assumption Agreement (CAA); bidding and settlement information; and necessary information and requirements as determined by the Secretary.

Bidder Qualification Statement means HUD Forms 9611 and 9612, or any form approved for similar purpose in the future as prescribed by the Secretary. (OMB number 2502-0576)

Claim Date means, with respect to each Single Family Loan, the date on which the Single Family Sale assignment claim is paid by HUD to the P-Servicer.

Competitive Sale of Single Family Loans means a sale of an individual or group of Single Family Loans to Qualified Participants through a bid process prescribed by the Secretary in competition with other Qualified Participants in accordance with § 291.609.

Confidentiality Agreement means a nondisclosure agreement under which the individual or entity seeking to participate in Single Family Sales agrees that Single Family Loan data and documentation shared with the individual or entity as due diligence will remain confidential in accordance with the terms of the agreement as determined by the Secretary.

Conveyance, Assignment and Assumption Agreement (CAA) means the contract between HUD and a Purchaser, along with all applicable exhibits and riders, that governs the terms of the Single Family Sale as prescribed by the Secretary. The CAA will include any sale-specific post-sale servicing and outcome requirements, representations, repurchase requirements, schedule of dates, and reporting requirements published by the Secretary for the Single Family Sale through a Sale Notice.

Cut-off date or claim submission cut-off date means the last date specified by the Secretary on which the P-Servicer is permitted to submit to HUD a Single Family Sale insurance claim for payment under 24 CFR 203.413 and 206.130.

Desk Guide means the technical manual included in the PSA detailing the P-Servicer's steps for submitting Single Family Loans related to a Single Family Sale, including but not limited to the process for identifying eligible Single Family Loans, uploading due diligence files, and submitting insurance claims.

Direct Sale of Single Family Loans means a sale of an individual or group of Single Family Loans to a Qualified Participant through the process described in § 291.619.

Home Equity Conversion Mortgage (HECM) means reverse mortgages insured in accordance with 24 CFR part 206 under the FHA Home Equity Conversion Mortgage insurance program.

Interim Servicing Agreement (ISA) means the agreement between a Purchaser and P-Servicer that governs the servicing and administration of the purchased loans, including but not limited to transfer of mortgage information and loss mitigation evaluations, during the Interim Servicing Period in accordance with the terms prescribed by the Secretary.

Interim Servicing Period means the period commencing with Claim Date and ending with the Servicing Transfer Date.

Low-value means, in reference to a Mortgage, the value minimum stated in the Participating Servicer Agreement (PSA).

Nonprofit organization means an entity that is tax-exempt under section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C.A. 501(c)(3)) and meets the qualification requirements prescribed by the Secretary for participation in a Single Family Sale.

Participating Servicer (P-Servicer) means a mortgagee that complies with § 291.605 and submits Single Family Loans for a Single Family Sale.

Participating Servicer Agreement (PSA) means the agreement between HUD and a P-Servicer that governs the P-Servicer's submission of Single Family Loans to be sold in a Single Family Sale on terms as prescribed by the Secretary.

Purchaser means a Qualified Participant to which HUD has awarded one or more Single Family Loans through a Single Family Sale, as of the date of notification of the award.

Qualified Participant means an individual or entity that satisfies the requirements in § 291.607 for participation in Single Family Sales.

Sale Notice means an announcement published by HUD for an upcoming Single Family Sale and includes any stated mission objectives and additional sale, participant qualification, and loan eligibility requirements; representations; post-sale servicing, outcomes, and reporting requirements; and repurchase requirements for inclusion in the Qualification Statement, PSA, ISA, and CAA as applicable.

Servicing Transfer Date means, with respect to any Single Family Loan, the date on which the actual servicing duties for such Single Family Loan has been or will be transferred from the P-Servicer to the Purchaser's servicer. The latest Servicing Transfer Date will be set forth in a schedule of dates prescribed by the Secretary and included in the PSA, ISA, and CAA.

Single Family Loan means any HUD-selected eligible forward mortgage loan insured under Section 203 of the National Housing Act (12 U.S.C. 1709) that has or will be assigned to HUD and any HUD-selected eligible HECM insured under section 255 of the National Housing Act (12 U.S.C. 1715z-20) that has or will be assigned to HUD, or any other eligible single family mortgage loans owned by the Secretary that will be sold in a Single Family Sale.

Single Family Sale means a Competitive Sale of Single Family Loans

or Direct Sale of Single Family Loans conducted by HUD in accordance with this subpart.

Vacant means a mortgaged property is determined to be vacant or abandoned in accordance with the requirements of 24 CFR part 203 and FHA policy.

§ 291.603 Purpose, scope, and applicability.

The sale of Single Family Loans is at the discretion of the Secretary. All Single Family Loans will be sold without recourse to HUD and without FHA insurance. HUD may sell individual Single Family Loans or groups of Single Family Loans to Qualified Participants as a Competitive Sale of Single Family Loans, § 291.609, or as a Direct Sale of Single Family Loans, § 291.619. Nothing in this section shall be construed to prevent HUD from grouping Single Family Loans with other types of HUD assets for sale, including grouping any associated HUD-held mortgages subordinate to the respective assets. The procedures set out in this subpart, including any cross-referenced regulations, documentation, and published notices detailed in this subpart, govern the Single Family Sales.

§ 291.605 Participating Servicers.

(a) **Participation.** To participate in a Single Family Sale, a Participating Servicer must:

- (1) Be an FHA-approved Mortgagee contributing eligible Single Family Loans and assigning loans to HUD; and
- (2) Execute a PSA and agree to execute an ISA, as needed.

(b) **Sale.** For each Single Family Sale, the Participating Servicer must:

- (1) Identify mortgages that meet the eligibility criteria in accordance with terms of the PSA;
- (2) Conduct all sale activities in accordance with the PSA and ISA;
- (3) Comply with any Single Family Sale and Loan Sale Notification requirements as prescribed by the Secretary through notice; and
- (4) Comply with the terms of the Sale Notice.

(5) Ensure the Loan Sale Notification is provided to each borrower and any other parties as required by the Secretary and the Loan Sale Notification complies with all applicable law. Loan Sale notification requirements will be announced to the Participating Servicer through notice.

(c) **Claim payment requirements.** The Participating Servicer must comply with the claim payment process and requirements for Single Family Sales in accordance with the PSA and processes outlined in §§ 203.413 and 206.130, as applicable.

(d) *Interim servicing.* During the Interim Servicing Period, the Participating Servicer must service the purchased Single Family Loans on behalf of the Purchaser in accordance with the ISA.

(e) *Transfer documents and servicing.* The Participating Servicer must conduct the servicing transfer of the Single Family Loans in accordance with the requirements of the PSA and ISA and must service the purchased Single Family Loans in accordance with all applicable state and Federal law requirements, including applicable Consumer Finance Protection Bureau (CFPB) requirements.

§ 291.607 Qualified participants.

(a) *Confidentiality Agreement and Bidder Qualification Statement.* Individuals or entities must become a Qualified Participant before they may bid or purchase Single Family Loans in a Single Family Sale. An individual or entity seeking to participate in a Single Family Sale must sign a Confidentiality Agreement and complete a Bidder Qualification Statement. The Secretary will specify which Bidder Qualification Statement form(s) are applicable to a particular Single Family Sale and any additional sale specific qualification criteria through notice. HUD will only provide access to sensitive Single Family Sale materials to Qualified Participants.

(b) *Process for determining Qualified Participant.* HUD will qualify any individual or entity seeking to participate in a Single Family Sale if they have met the qualification requirements and executed the applicable Bidder Qualification Statement for the Single Family Sale.

§ 291.609 Bidding process.

(a) *Sale notice.* The Secretary will prescribe requirements for a Single Family Sale through the Sale Notice. For each Single Family Sale, HUD will publish the PSA Addendum, Desk Guide, ISA Addendum, CAA Addendum, and Sale Notices on HUD's public website.

(b) *Submission of bids.* All bids by a Qualified Participant must be submitted to HUD in accordance with the Sale Notice and the instructions in the BIP. By submitting a bid, the Qualified Participant is considered to have made an offer to purchase Single Family Loans as presented in the BIP. Submission of a bid constitutes acceptance of the terms and conditions set forth in the BIP. Along with the bid, the Qualified Participant must submit an executed copy of the CAA and ISA, as applicable.

(c) *Bids by brokers or agents.* Any bid submitted by a broker or agent for a Qualified Participant must be made in the name of the Qualified Participant and signed by the broker or agent as the attorney-in-fact for the Qualified Participant. All such bid documents must bind the Qualified Participant. Each bid must also include a power of attorney satisfactory to HUD as to form and content.

(d) *Earnest money deposits.* The Qualified Participant must submit to HUD, along with its bid, an earnest money deposit, as required in the CAA or Sale Notice. The earnest money deposit is nonrefundable for a Qualified Participant whose bid is selected for award and will be credited toward the purchase price. If a Qualified Participant's bid is not selected for any award, their earnest money will be returned.

(e) *Timing for withdrawal of bids.* A Qualified Participant may withdraw a submitted bid in accordance with the instructions in the BIP for a Single Family Sale. However, a previously submitted bid may not be withdrawn once the bidding has closed.

(f) *Termination of Single Family Sale.* HUD reserves the right to terminate a Single Family Sale in whole or in part at any time before the bid date.

(g) *Withdrawal of Single Family Loans.* HUD reserves the right to withdraw Single Family Loans from a Single Family Sale prior to the settlement date. Any earnest money deposits made by a Purchaser relating to withdrawn Single Family Loans will be retained by the Secretary and credited toward the total purchase price of the remaining Single Family Loans in the pool, in accordance with the CAA and BIP. After the bid date, HUD can withdraw Single Family Loans or not deliver all the Single Family Loans for settlement for any reason, including those set forth in the BIP and CAA.

(h) *Rejection of bids.* At HUD's discretion, any bid may be rejected under the following circumstances:

(1) The bid does not conform with the instructions in the BIP;

(2) HUD determines that an award based on the bid would not be in the best interests of the Secretary because the award would not further HUD's fiduciary responsibility to the mutual mortgage insurance fund (MMIF) or any stated mission objectives in the Sale Notice; or

(3) HUD can also issue a conditional rejection that would provide the opportunity for the bid to be amended and resubmitted for acceptance upon fulfillment of HUD's requests.

§ 291.611 Post-bid process and HUD's execution of the CAA.

After HUD evaluates conforming bids, HUD may request an adjustment to a bid in accordance with the BIP. After any bid adjustments, HUD will select bids for award and provide notice of award in a manner set forth in the BIP. After selection of a Purchaser, HUD will execute the CAA.

§ 291.613 Settlement requirements.

(a) *Settlement payment.* On the settlement date of a Single Family Sale, the Purchaser must pay to HUD the settlement payment, consisting of the balance of the amount due on the bid price, as adjusted in accordance with the CAA.

(b) *Settlement statement.* When the Purchaser delivers to HUD the documents required at settlement and the settlement payment in paragraph (a) of this section, HUD will execute and deliver to the Purchaser a settlement statement and updated Single Family Loan schedule for the CAA to document the Single Family Loans sold to the Purchaser in the Single Family Sale.

(c) *Endorsement and assignment.* HUD may grant a temporary Limited Power of Attorney to the Purchaser to effect endorsement and assignment of the Single Family Loans to the Purchaser.

(d) *Purchaser's special purpose entity.* HUD may allow a Purchaser to endorse and assign Single Family Loans from HUD to Purchaser's special purpose entity acquisition vehicle on terms permitted in the CAA.

§ 291.615 Purchaser servicing requirements.

(a) *Purchaser post-sale servicing.* The Purchaser and its servicer, and any subsequent transferee of or servicer for the Single Family Loan, must comply with the terms of the CAA and the Sale Notice post-sale loss mitigation and outcome requirements. Post-sale requirements will include a requirement that any Single Family Loan that converts to real estate owned property via foreclosure or deed-in-lieu of foreclosure be offered for sale through a first look program, providing an exclusive listing period for owner occupant, nonprofit organization, governmental entities, and other prospective buyers as permitted by HUD. Post-sale requirements will also include requirements that Purchasers offer borrowers loss mitigation options that are as or more generous than the FHA loss mitigation options, a prohibition on reselling real estate owned property through a contract for deed or similar financing mechanism, a

requirement that the Purchaser obtain prior approval from HUD before entering into a lease-purchase agreement with a prospective purchaser, and a prohibition on releasing liens on particular categories of properties, including vacant properties. Purchasers must take all lawful steps to service the Single Family Loans and collect amounts due in accordance with requirements as set forth by the CAA and all state and Federal law requirements, including applicable CFPB requirements.

(b) *Purchaser reporting requirements.* Purchasers must report on the post-sale servicing actions and outcomes obtained for each Single Family Loan purchased as prescribed by the CAA. HUD will publish reports for the public on loan and property outcomes and will include a breakdown of outcomes in different geographies. HUD will prescribe the reporting period as a specified period after settlement in the CAA.

(c) *Remedy for performance failures.* HUD may pursue appropriate remedies, including, but not limited to, the ability to deny future participation in loan sales, for a Purchaser's failure to comply with Single Family Sale requirements, including CAA obligations.

§ 291.617 General policy—Direct Sale of Single Family Loans.

The Secretary may pursue a Direct Sale of Single Family Loans to individuals or entity type the Secretary determines may be eligible to qualify as set forth in the Sale Notice. The Direct Sale of Single Family Loans will be subject to the requirements of this subpart, excluding §§ 291.609 and 291.611. The Secretary will publish in the Sale Notice, sale specific Single Family Loan eligibility criteria.

§ 291.619 Direct Sale of Single Family Loans process.

(a) *Sale Notice.* The Secretary will prescribe requirements for a Direct Sale of Single Family Loans through a Sale Notice.

(b) *Sale feasibility.* In all stages of the Direct Sale of Single Family Loans process, HUD may determine whether continuation with the Direct Sale of Single Family Loans is feasible and in HUD's interest, consistent with HUD's fiduciary responsibility to the MMIF and any stated mission objectives.

(c) *Direct Sale of Single Family Loans process.* An individual or entity interested in purchasing Single Family Loans through a Direct Sale of Single Family Loans must:

(1) Meet the Secretary's prescribed requirements for the Direct Sale of Single Family Loans in the Sale Notice;

(2) Submit a letter of interest to the Secretary that includes, at a minimum:

(i) The description of the individual or entity and a statement about how it would be able to satisfy the participant eligibility requirements and mission objectives, if any;

(ii) The geographic area of interest where the party wishes to purchase the loans;

(iii) The individual or entity's goals and how this purchase would assist in achieving these goals through post-sale outcomes;

(iv) The approximate timeframe for the purchase;

(v) The approximate number of loans or, alternatively, the approximate gross sale amount desired; and

(vi) The organizational documents for an entity including, but not limited to organizational documents, any required authorizing resolutions, and disclosure of all nonprofit organization or private entity partnership interests in the Direct Sale of Single Family Loans transaction.

(d) *HUD determination.* Upon receipt of a letter in paragraph (c)(2) of this section, HUD will respond in writing to the submitter to confirm receipt of the letter and, if necessary, request additional information needed for a final determination.

(e) *Secretary's determination to proceed.* (1) If the Secretary makes a final determination to proceed, the Secretary will request from the individual or entity, a business plan proposal from the individual or entity that details its ability to meet any stated mission objectives in the Sale Notice along with its goals and how these goals will be achieved with post-sale outcomes. Business plans must be received by HUD within 30 business days of request.

(2) Upon receipt and review of business plan proposal, HUD will:

(i) Reject the business plan proposal;

(ii) Issue a conditional rejection that would provide the opportunity for a business plan proposal to be amended and resubmitted for approval upon fulfillment of HUD's request; or

(iii) Approve the business plan proposal.

(3) Upon approval of such business plan proposal, HUD and the individual or entity will begin the Direct Sale of Single Family Loans process that includes:

(i) An executed Confidentiality Agreement;

(ii) An executed Bidder Qualification Statement;

(iii) A P-Servicer executed PSA; and

(iv) Review of Single Family Loans from P-Servicer(s) or HUD.

(4) HUD and the individual or entity reviews the ALD and will agree on the

Single Family Loan Sale List for the Direct Sale of Single Family Loans.

(f) *Direct Sale of Single Family Loans.* After satisfaction of the requirements in paragraph (d) of this section, HUD will conduct its valuation review, and issue a final price determination and a CAA, containing an estimated settlement date, to the individual or entity. If accepted, a final Settlement date is scheduled, and the Single Family Loan List is appended to the CAA.

(g) *Settlement.* HUD and the Purchaser will execute the CAA for settlement. The remaining settlement and transfer requirements will follow those in § 291.613.

§ 291.621 Disqualifications.

(a) *Fraudulent information.* If HUD determines there is any information indicating any certification or required document provided by any party participating in a Single Family Sale, including but not limited to P-Servicer, Purchaser, Qualified Participant, or a Purchaser's servicer, is false, misleading, or constitutes fraud or misrepresentation, HUD will not approve that party's participation in the Single Family Sale and will revoke any prior approval. The submission of false information or misrepresentation by an approved lender or mortgagee may result in the referral of the mortgagee to the Mortgagee Review Board.

(b) *Participant ineligibility.* An individual or entity is ineligible to participate in a Single Family Sale if, at the time of the Single Family Sale, that individual or entity is suspended, debarred, under a limited denial of participation (LDP), or otherwise restricted under 2 CFR part 180 or 2424, 24 CFR part 25, 48 CFR part 9, subpart 9.4, or under similar procedures of any other Federal agency.

(c) *Future participation.* Purchasers that made misrepresentations in the qualification process or failed to meet their contractual obligations under CAAs, including failing to meet post-sale requirements, for previous Single Family Sales in which they participated may be disqualified from participation in one or more future Single Family Sales or for a set period of time at the discretion of the Secretary.

Julia R. Gordon,

Assistant Secretary for the Office of Housing—Federal Housing Commissioner.
[FR Doc. 2024-28706 Filed 12-10-24; 8:45 am]

BILLING CODE 4210-67-P

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 82****[EPA-HQ-OAR-2003-0118; FRL-12145-01-OAR]****RIN 2060-AG12****Protection of Stratospheric Ozone: Determination 39 for the Significant New Alternatives Policy Program****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Determination of acceptability.

SUMMARY: This determination of acceptability expands the list of acceptable substitutes pursuant to the U.S. Environmental Protection Agency's Significant New Alternatives Policy program. This action lists four substitutes as acceptable additional substitutes for use in the refrigeration and air conditioning and foam blowing sectors.

DATES: This determination is applicable on December 11, 2024.

ADDRESSES: EPA established a docket for this action under Docket ID No. EPA-HQ-OAR-2003-0118 (continuation of Air Docket A-91-42). All electronic documents in the docket are listed in the index at <https://www.regulations.gov>. Although listed in the index, some information is not publicly available, e.g., confidential business information (CBI) or other information whose disclosure is restricted by statute. Publicly available docket materials are available either electronically at <https://www.regulations.gov> or in hard copy at the EPA Docket Center (EPA/DC), (Docket Nos. A-91-42 and EPA-HQ-OAR-2003-0118), William J. Clinton West, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20460. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the Air and Radiation Docket is (202) 566-1742. The Docket Center's hours of operations are 8:30 a.m.-4:30 p.m., Monday-Friday (except Federal Holidays). For further information on the EPA Docket Center services and the current status, please visit online at <https://www.epa.gov/dockets>.

- Appendix A: Summary of Decisions for New Acceptable Substitutes

SUPPLEMENTARY INFORMATION:**I. Listing of New Acceptable Substitutes**

This action is listing as acceptable additional substitutes for use in the refrigeration and air conditioning and foam blowing sectors. This action presents EPA's most recent decisions under the Significant New Alternatives Policy (SNAP) program to list as acceptable several substitutes in different end-uses. The new substitutes are:

- R-471A in retail food refrigeration, industrial process refrigeration, and cold storage warehouses (retrofit equipment only);
- R-480A in cold storage warehouses, commercial ice machines, positive displacement chillers, refrigerated transport, and water coolers (retrofit equipment only);
- R-513A in residential and light commercial air conditioning and heat pumps—self-contained units (new equipment only);
- XPS foam blowing agent blends of 0 to 90 percent hydrofluoroolefin (HFO)-1336mzz(Z), 0 to 90 percent HFO-1234ze(E), 0 to 75 percent hydrofluorocarbon (HFC)-152a, and 0 to 90 percent carbon dioxide (CO₂) in polystyrene: extruded boardstock and billet.

Listing decisions in the end-uses in this document do not prejudice EPA's listings of these substitutes for other end-uses. For additional information on SNAP, visit the SNAP website at <https://www.epa.gov/snap>. The full lists of acceptable substitutes for ozone-depleting substances (ODS) in the industrial sectors covered by the SNAP program are available at <https://www.epa.gov/snap/substitutes-sector>. For more information on the Agency's process for administering the SNAP program or criteria for evaluation of substitutes, refer to the initial SNAP rulemaking (59 FR 13044; March 18, 1994). The regulations are codified at 40 CFR part 82, subpart G. SNAP decisions and the appropriate **Federal Register** citations are available at: <https://www.epa.gov/snap/snap-regulations>.

Under the SNAP program, EPA may list a substitute as acceptable for specified end-uses where the Agency has reviewed the substitute and found no reason to restrict or prohibit its use. Substitutes listed as unacceptable; acceptable, subject to narrowed use limits; or acceptable, subject to use conditions are also listed in the appendices to 40 CFR part 82, subpart G.

This document discusses each substitute listing in detail and summarizes the results of EPA's assessment of the human health and environmental risks posed by each substitute. EPA's evaluation applies the criteria in 40 CFR 82.180(a)(7), including atmospheric effects and related health and environmental effects, ecosystem risks, occupational risks, consumer risks, flammability, and cost and availability of the substitute. EPA evaluates these criteria in risk screens, or technical documents that evaluate risks to human health and the environment from substitutes in specific end-uses, including comparisons to other available substitutes and evaluations against relevant thresholds of risk starting with protective assumptions. The risk screens cited in this document include evaluation of atmospheric effects, toxicity data, exposure assessments, flammability, and other environmental impacts such as ecotoxicity and local air quality impacts. You can find more information on the criteria used in the evaluation of substitutes in the SNAP program at <https://www.epa.gov/snap/snap-regulations>.

In this document, EPA determined the global warming potential (GWP) for a chemical or blend using the 100-year GWP values from the Intergovernmental Panel on Climate Change's (IPCC) Fourth Assessment Report (AR4)¹ for substances or components of blends if included.² Note that Annex F to the *Montreal Protocol on Substances that Deplete the Ozone Layer* lists GWPs for HFCs that are numerically equivalent to

¹ IPCC, 2007: *Climate Change 2007: The Physical Science Basis. Contribution of Working Group I to the Fourth Assessment Report of the Intergovernmental Panel on Climate Change* [Solomon, S., Qin, D., Manning, M., Chen, Z., Marquis, M., Averyt, K.B., Tignor M., and Miller, H.L. (eds.)]. Cambridge University Press, Cambridge, United Kingdom and New York, NY, USA. Available at: https://www.ipcc.ch/publications_and_data/ar4/wg1/en/contents.html.

² The IPCC, 2007 100-year GWP values are consistent with the exchange values for the regulated HFCs listed in subsection (c) of the AIM Act and with the GWPs in Annex F of the Montreal Protocol.

the AR4 values.³ These HFC 100-year GWP values are also numerically equivalent to the exchange values listed in the American Innovation and Manufacturing Act of 2020 (hereafter referred to as “the AIM Act”). If no GWP is provided in AR4 for a substance, the SNAP program is using the 100-year GWP listed in World Meteorological Organization (WMO), 2022.⁴ To calculate the GWP of blends of chemicals, such as the listed refrigerant blends, this document weights the GWP of each component of the blend by its mass percentage. This method of calculating GWPs is consistent with the method used to calculate GWPs in the October 2023 Technology Transitions Rule as codified at 40 CFR 84.64.

Under section 612 of the Clean Air Act (CAA), the SNAP program reviews substitutes using a comparative risk framework in different industrial sectors. In making listing decisions, EPA considers overall risk to human health and the environment. As a general matter, the substitutes being added through this action to the acceptable lists have a similar or lower risk than other substitutes already listed as acceptable in those end-uses. However, certain substitutes may have a higher risk than certain other substitutes already listed as acceptable or acceptable subject to restrictions. In such cases, those already-listed alternatives have other factors that limit their use in some situations within a particular end-use.

Appendix A contains tables summarizing each listing decision in this action. The statements in the “Further Information” column in the tables provide additional information, but these are not legally binding under section 612 of the CAA. Although users are not required to follow recommendations in the “Further Information” column of the table under section 612 of the CAA, some of these statements may refer to obligations that are enforceable or binding under federal or state programs other than the SNAP program. The identification of other enforceable or binding requirements should not be construed as a comprehensive list of such obligations. In many instances, the information simply refers to standard operating practices in existing industry standards

and/or building codes. When using these substitutes in the identified end-use, EPA strongly encourages you to apply the information in the “Further Information” column. Many of these recommendations, if adopted, would not require significant changes to existing operating practices.

It should be noted that a substitute listed as acceptable under the SNAP program may also be subject to requirements or limitations under other statutory or regulatory provisions. For example, there are relevant regulations under subsection (i) of the AIM Act that restrict the use of certain HFCs in a variety of sectors and subsectors. See 88 FR 73098 (October 24, 2023). Consequently, if a substitute listed as acceptable under the SNAP program is also subject to limitations on its use under other regulations, it may not be permitted for use in accordance with those other regulations. Those intending to use a substitute listed as acceptable under the SNAP program may need to consider restrictions under subsection (i) of the AIM Act, as well as other relevant authorities, and must also be followed.⁵

You can find submissions to EPA for the substitutes listed in this document, as well as other materials supporting the decisions in this action, in the docket (EPA-HQ-OAR-2003-0118) at <https://www.regulations.gov>.

A. Refrigeration and Air Conditioning

1. R-471A

EPA's decision: EPA finds R-471A acceptable as a substitute for use in:

- Cold storage warehouses (retrofit equipment only);
- Industrial process refrigeration (retrofit equipment only);
- Retail food refrigeration—Refrigerated food processing and dispensing equipment (retrofit equipment only);
- Retail food refrigeration—Remote condensing units (retrofit equipment only);
- Retail food refrigeration—Supermarket systems (retrofit equipment only).

R-471A, marketed under the trade name Solstice® N71, is a weighted blend of 78.7 percent HFO-1234ze(E), also known as *trans*-1,3,3,3-tetrafluoroprop-1-ene (Chemical Abstracts Service Registry Number [CAS Reg. No.] 29118–

24–9); 17.0 percent HFO-1336mzz(E), also known as *trans*-1,1,1,4,4,4-hexafluoro-2-butene (CAS Reg. No. 66711–86–2); and 4.3 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431–89–0).

You may find a copy of the applicant's submission, with CBI redacted, providing the required health and environmental information for this substitute in this end-use in the docket (EPA-HQ-OAR-2003-0118) at <https://www.regulations.gov> under the name, “Supporting Materials for Notice 39 Listing of R-471A in Refrigeration and Air Conditioning, SNAP Submission Received September 15, 2023.” EPA performed assessments to examine the health and environmental risks of this substitute, and the results are summarized below. These assessments are available in the docket EPA-HQ-OAR-2003-0118:

- “Risk Screen on Substitutes in Retail Food Refrigeration (Retrofit Equipment) Substitute: R-471A (Solstice® N71).”

- “Risk Screen on Substitutes in Industrial Process Refrigeration and Cold Storage Warehouses (Retrofit Equipment) Substitute: R-471A (Solstice® N71).”

Environmental information: R-471A has an ozone depletion potential (ODP) of 0. Its components, HFO-1234ze(E), HFO-1336mzz(E), and HFC-227ea, have GWPs of 1,⁶ 26,⁷ and 3,220,⁸ respectively. When these values are weighted by mass percentage of the blend, R-471A has a GWP of about 144. The components of R-471A are excluded from the EPA's regulatory definition of volatile organic compounds (VOC) under CAA regulations (see 40 CFR 51.100(s)) addressing the development of state implementation plans (SIPs) to attain and maintain the National Ambient Air Quality Standards (NAAQS). Knowingly venting or otherwise knowingly releasing this refrigerant blend is limited by the venting prohibition under section 608(c)(2) of the CAA, codified in EPA regulations at 40 CFR 82.154(a).

Flammability information: The component HFO-1234ze(E) has lower flammability as defined using the standard test method American Society of Testing and Materials (ASTM) E681.⁹ The other two components of R-471A are not flammable using the same

³ Annex F of the Montreal Protocol is available at: <https://ozone.unep.org/treaties/montreal-protocol/articles/annex-f-controlled-substances>.

⁴ WMO, *Scientific Assessment of Ozone Depletion: 2022*, GAW Report No. 278, 509 pp.; WMO: Geneva, 2022. Available at: <https://ozone.unep.org/system/files/documents/Scientific-Assessment-of-Ozone-Depletion-2022.pdf>. (WMO, 2022).

⁵ For example, there may be restrictions or prohibitions in regulations issued under section 610 of the CAA at 40 CFR part 82 subpart C for nonessential products containing ODS, under the Toxic Substances Control Act, under the Occupational Safety and Health Act, and under state or local laws and regulations that warrant consideration.

⁶ WMO, 2022.

⁷ WMO, 2022.

⁸ Annex F to the Montreal Protocol.

⁹ ASTM, E681. Standard Test Method for Concentration Limits of Flammability of Chemicals (Vapors and Gases).

method. R-471A is not flammable as formulated, in the worst-case formulation for flammability (WCF) and the worst-case of fractionation for flammability (WCFF). The American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE) has assigned R-471A a flammability class of “1,” meaning it does not propagate a flame under standard test conditions.¹⁰

Toxicity and exposure data: Potential health effects of exposure to this substitute include drowsiness or dizziness. The substitute may also irritate the skin or eyes or cause frostbite in the case of rapid evaporation of the liquid. The substitute could cause asphyxiation if air is displaced by vapors in a confined space. Excessive exposure may cause central nervous system effects including drowsiness and dizziness. Excessive exposure may also cause cardiac arrhythmia. These potential health effects are common to many refrigerants.

ASHRAE has adopted an occupational exposure limit (OEL) for the blend of 710 ppm¹¹ on an eight-hour time-weighted average (8-hr TWA) for HFO-1336mzz(E), the American Industrial Hygiene Association (AIHA) has established a WEEL of 1,000 ppm (8-hr TWA) for HFC-227ea, and ASHRAE has adopted an OEL of 800 ppm (8-hr TWA) for HFO-1234ze(E).¹³ EPA anticipates that users will be able to meet these workplace guidance limits and address potential health risks by following recommendations in the manufacturer’s safety data sheet (SDS), ASHRAE Standard 15,¹⁴ other industry standards, and other safety precautions common to the refrigeration and air conditioning industry.

Comparison to other substitutes in these end-uses: R-471A has an ODP of 0, comparable to or less than other listed substitutes in retrofits for these end-uses with ODPs ranging from 0 to less than 0.0004.

As a retrofit for supermarket systems, remote condensing units, and refrigerated food processing and dispensing equipment, R-471A with a GWP of 144 is lower than that of all other acceptable substitutes such as R-450A which has a GWP of 601; R-513A

with a GWP of 630; R-448A with a GWP of 1,386; R-449A with a GWP of 1,396; R-449B with a GWP of 1,412; R-407C with a GWP of 1,770; R-407F with a GWP of 1,825; and R-407A with a GWP of 2,107.

For retrofits in industrial process refrigeration, R-471A’s GWP of 144 is lower than that of other acceptable substitutes such as HFC-134a which has a GWP of 1,430; R-407C with a GWP of 1,770; and R-407F with a GWP of 1,825. Other alternatives in this sector have a lower GWP than R-471A such as CO₂ with a GWP of 1 and R-290 (propane) with a GWP of 3. There may be situations in which lower-GWP options may not be feasible for certain retrofitted industrial process refrigeration equipment. For example, CO₂, which has a GWP of 1 is a high-pressure refrigerant and cannot be used as a retrofit for low-pressure refrigerant systems. R-471A is a low-pressure refrigerant, making it more technically feasible to retrofit systems that use similar low-pressure refrigerants. R-290 is an A3, highly flammable refrigerant and may not be feasible for certain retrofitted industrial process refrigeration equipment where flammability is a concern.

Further, refrigerants offer cooling within a specific temperature range. Adding R-471A to the list of available substitutes in industrial process refrigeration systems may offer a refrigerant that achieves a specific cooling temperature that other retrofit alternatives with lower GWPs cannot achieve.¹⁵ For retrofits of cold storage warehouses, R-471A’s GWP of 144 is lower than that of all other acceptable substitutes such as R-450A with a GWP of 601; R-513A with a GWP of 630; HFC-134a with a GWP of 1,430; R-407C with a GWP of 1,770; and R-407F with a GWP of 1,825.

Flammability and toxicity risks are comparable to or lower than flammability and toxicity risks of other available substitutes in the same retrofit end-uses. Toxicity risks can be minimized by use consistent with the AIHA and OARS WEELs, ASHRAE OELs and ASHRAE 15, other industry standards, recommendations in the manufacturer’s SDS, and other safety precautions common in the refrigeration and air conditioning industry.

Based on the considerations described above, EPA finds R-471A acceptable as a retrofit refrigerant for the following end-uses: cold storage warehouses,

industrial process refrigeration, and retail food refrigeration (including supermarket systems, remote condensing units, and refrigerated food processing and dispensing equipment), because it does not pose greater overall environmental and human health risk than other available substitutes in the same end-uses.

2. R-480A

EPA’s decision: EPA finds R-480A acceptable as a substitute for use in:

- Cold storage warehouses (retrofit equipment only);
- Commercial ice machines (retrofit equipment only);
- Positive displacement chillers (retrofit equipment only);
- Refrigerated transport (retrofit equipment only);
- Water coolers (retrofit equipment only).

R-480A, marketed under the trade name RS-20, is a weighted blend of 5 percent CO₂ (CAS Reg. No. 124-38-9), 86 percent HFO-1234ze(E), also known as *trans*-1,3,3,3-tetrafluoroprop-1-ene (CAS Reg. No. 29118-24-9), and 9 percent HFC-227ea, also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0).

You may find a copy of the applicant’s submission, with CBI redacted, providing the required health and environmental information for this substitute in this end-use in the docket (EPA-HQ-OAR-2003-0118) at <https://www.regulations.gov> under the name, “Supporting Materials for Notice 39 Listing of R-480A in Refrigeration and Air Conditioning. SNAP Submission Received May 16, 2024.” EPA performed assessments to examine the health and environmental risks of this substitute, and the results are summarized below. These assessments are available in the docket EPA-HQ-OAR-2003-0118:

- “Risk Screen on Substitutes in Cold Storage Warehouses (Retrofit Equipment). Substitute: R-480A (RS-20).”
- “Risk Screen on Substitutes in Commercial Ice Machines (Retrofit Equipment). Substitute: R-480A (RS-20).”
- “Risk Screen on Substitutes in Chillers (Retrofit Equipment). Substitute: R-480A (RS-20).”
- “Risk Screen on Substitutes in Refrigerated Transport (Retrofit Equipment). Substitute: R-480A (RS-20).”
- “Risk Screen on Substitutes in Water Coolers (Retrofit Equipment). Substitute: R-480A (RS-20).”

Environmental information: R-480A has an ODP of 0. This blend consists of

¹⁰ ASHRAE Standard 34-2022: Designation and Safety Classification of Refrigerants. (ASHRAE, 2022).

¹¹ ASHRAE, 2022.

¹² *Trans*-1,1,1,4,4,4-hexafluoro-2-butene (HFO-1336mzz-E) (2018). *Toxicology and Industrial Health*. 2019; 35(3):204–210. doi:10.1177/0748233719825529.

¹³ ASHRAE, 2022.

¹⁴ ASHRAE 15. Safety Standard for Refrigeration Systems.

¹⁵ The October 2023 Technology Transitions Rule does not restrict the use of HFCs (*i.e.*, establish GWP limits) in retrofit applications (See 88 FR 73127).

CO₂ with a GWP of 1,¹⁶ HFO-1234ze(E) with a GWP of 1,¹⁷ and HFC-227ea with a GWP of 3,220.¹⁸ Weighting these values by mass percentage results in a GWP of 291 for R-480A. The components of R-480A are excluded from EPA's regulatory definition of VOC under CAA regulations (see 40 CFR 51.100(s)) addressing the development of SIPs to attain and maintain the NAAQS. Knowingly venting or otherwise knowingly releasing this refrigerant blend is limited by the venting prohibition under CAA section 608(c)(2), codified at 40 CFR 82.154(a).

Flammability information: The component HFO-1234ze(E) has lower flammability as defined using the standard test method ASTM E681, while the other two components of R-480A are not flammable using the same method. R-480A is not flammable as formulated, in the WCF and the WCFF. ASHRAE has assigned R-480A a flammability class of "1," meaning it does not propagate a flame under standard test conditions.

Toxicity and exposure data: The substitute may be hazardous if inhalation, skin contact, or eye contact with the substitute occurs at sufficiently high levels. The substitute could cause symptoms of asphyxiation if air is displaced by vapors in a confined space. These potential health effects are common to many refrigerants.

ASHRAE has adopted an OEL for the blend of 900 ppm (8-hr TWA).¹⁹ For the components of R-480A, the U.S. Occupational Safety and Health Administration (OSHA) has established a permissible exposure limit (PEL) of 5,000 ppm (8-hr TWA) for CO₂. AIHA has established a WEEL of 1,000 ppm for HFC-227ea, and ASHRAE has adopted an OEL of 800 ppm (8-hr TWA) for HFO-1234ze(E).²⁰ EPA anticipates that users will be able to meet these workplace guidance limits and address potential health risks by following recommendations in the manufacturer's SDS, ASHRAE Standard 15, other industry standards, and other safety precautions common to the refrigeration and air conditioning industry.

Comparison to other substitutes in these end-uses: R-480A has an ODP of 0, comparable to or less than other listed substitutes in these end-uses with ODPs ranging from 0 to less than 0.0004.

For cold storage warehouses, R-480A with a GWP of 291 is lower than all other acceptable substitutes for retrofit

equipment in this end-use, such as a number of HFC blends, including R-450A and R-513A, with GWPs of 601 and 630, respectively.

For commercial ice machines, R-480A's GWP of 291 is lower than all other acceptable substitutes for retrofit equipment in this end-use, such as a number of HFC blends, including R-450A and R-513A, with GWPs of 601 and 630, respectively.

For positive displacement chillers, R-480A's GWP of 291 is lower than that of certain other acceptable substitutes for retrofit equipment in this end-use, such as a number of HFC blends, including R-450A and R-513A, with GWPs of 601 and 630, respectively. The GWP of R-480A is higher than the GWPs of two other acceptable substitutes for retrofit equipment in this end-use, namely R-1224yd(Z) and R-514A, with GWPs of 1²¹ and 2,²² respectively. EPA is listing this substitute as acceptable because available lower-GWP options are not feasible to use in certain applications. For example, equipment retrofitted with R-480A can operate within a specific temperature range and pressure range that other retrofitted chillers using lower-GWP options such as R-1224yd(Z) and R-514A cannot achieve. For refrigerated transport, R-480A's GWP of 291 is lower than that of all other acceptable substitutes for retrofit equipment in this end-use, such as R-450A, R-513A, and HFC-134a, with GWPs of 601, 630, and 1,430, respectively.

For water coolers, R-480A's GWP of 291 is lower than that of all other acceptable substitutes for retrofit equipment in this end-use, such as R-450A, R-513A, R-426A, and R-411A, with GWPs of 601, 630, 1,510, and 1,600, respectively.

Flammability and toxicity risks are comparable to or lower than flammability and toxicity risks of other available substitutes in the same retrofit end-uses. Toxicity risks can be minimized by use consistent with the OSHA PEL, AIHA WEEL, ASHRAE OELs, ASHRAE 15 and other industry standards, recommendations in the manufacturer's SDS, and other safety precautions common in the refrigeration and air conditioning industry.

Based on the considerations described above, EPA finds R-480A acceptable in retrofit equipment in the following end-uses: cold storage warehouses,

commercial ice machines, positive displacement chillers, refrigerated transport, and water coolers, because it does not pose greater overall environmental and human health risk than other available substitutes in the same end-uses.

3. R-513A

EPA's decision: EPA finds R-513A acceptable as a substitute for use in:

- Residential and light commercial air conditioning and heat pumps—self-contained units (new equipment only).

R-513A, marketed under the trade name Opteon® XP-10, is a weighted blend of 44 percent HFC-134a and 56 percent HFO-1234yf by weight. HFC-134a is an HFC and is also known as 1,1,1,2-tetrafluoroethane (CAS Reg. No. 811-97-2). HFO-1234yf is an HFO and is also known as 2,3,3,3 tetrafluoroprop-1-ene (CAS Reg. No. 754-12-1).

You may find a copy of the applicant's submission, with CBI redacted, providing the required health and environmental information for this substitute in this end-use category in Docket EPA-HQ-OAR-2003-0118 at www.regulations.gov under the name, "SNAP Information Notice for R-513A as a Refrigerant. SNAP Submission Received January 9, 2024." EPA has performed an assessment to examine the health and environmental risks of this substitute and the results are summarized below. This assessment is available in Docket EPA-HQ-OAR-2003-0118:

- "Risk Screen on Substitutes for Use in Residential and Light Commercial Air Conditioning and Heat Pumps—Self-Contained Units (New Equipment) Substitute: R-513A (Opteon® XP-10)."

Environmental information: R-513A is a blend of HFC-134a and HFO-1234yf with an ODP of 0. HFC-134a has a GWP of 1,430²³ and HFO-1234yf has a GWP of 1.²⁴ The GWP of R-513A is 630 when the two components are weighted by mass percentage of their GWPs. All components of the blends are excluded from the EPA's regulatory definition of VOC under CAA regulations (see 40 CFR 51.100(s)) addressing the development of SIPs to attain and maintain the NAAQS. Knowingly venting or otherwise knowingly releasing this refrigerant blend is limited by the venting prohibition under section 608(c)(2) of the CAA, codified in EPA's regulations at 40 CFR 82.154(a).

Flammability information: The component HFO-1234yf has lower flammability as defined using the

¹⁶ IPCC, 2007.

¹⁷ WMO, 2022.

¹⁸ Annex F to the Montreal Protocol.

¹⁹ ASHRAE, 2022, Addendum h.

²⁰ ASHRAE, 2022.

²¹ WMO, 2022.

²² This value is calculated by weighting the GWPs of HFO-1336mzz(Z) (2) and 1,2-dichloroethene(Z) (1) from WMO, 2022 by the mass percentages of the blend components of 74.7 percent and 25.3 percent, respectively.

²³ Annex F to the Montreal Protocol.

²⁴ WMO, 2022.

standard test method ASTM E681. HFC-134a is not flammable using the same method. R-513A is not flammable as formulated in the WCF and the WCF. ASHRAE has assigned R-513A a flammability class of “1,” meaning it does not propagate a flame under standard test conditions.

Toxicity and exposure data: Potential health effects of exposure to this substitute include skin and eye irritation and frostbite upon contact. The substitute could cause asphyxiation if air is displaced by vapors in a confined space. These potential health effects are common to many refrigerants. EPA anticipates that R-513A will be used consistent with the recommendations specified in the SDS. ASHRAE has adopted an OEL for the blend R-513A of 650 ppm as an 8-hr TWA. The AIHA has established WEELs of 1000 ppm for HFC-134a and of 500 ppm for HFO-1234yf, both as an 8-hr TWA. EPA anticipates that users will be able to meet these workplace guidance limits and will address potential health risks by following requirements and recommendations in the manufacturer’s SDSs, ASHRAE Standard 15, other industry standards, and other safety precautions common to the refrigeration and air conditioning industry.

Comparison to other refrigerants in this end-use category: R-513A has an ODP of 0, which is comparable to other acceptable substitutes in the residential and light commercial air conditioning and heat pumps—self-contained units end-use category with ODPs ranging from 0 to less than 0.0004. R-513A which has a GWP of 630 is lower than or comparable to those of some acceptable substitutes in the same end-use category for which we are finding it acceptable, such as R-452B which has a GWP of 700 and HFC-32 which has a GWP of 675. R-513A has a GWP of 630, which is higher than those of other acceptable substitutes in this end-use category such as R-290, which has a GWP of 3, R-454A, which has a GWP of 240, R-454B, which has a GWP of 470, R-454C, which has a GWP of 150, and R-457A, which has a GWP of 140.

While other acceptable substitutes have lower GWPs, EPA is listing R-513A as acceptable in this end-use category recognizing it likely will be used only in certain self-contained units that use R-134a where other available options are not technically feasible. Self-contained units can include but are not limited to window units, packaged terminal air conditioners, packaged terminal heat pumps, portable room air conditioning units, and portable air conditioners used to cool commercial

aircraft interiors while on the ground.²⁵ As a general matter, the replacements for most of the equipment in the residential and light commercial air conditioning and heat pumps end-use category use refrigerants that mimic the thermodynamic qualities and high pressure of R-410A which was the dominant refrigerant used for the majority of equipment types in this end-use category. There are, however, some specific applications where R-134a was used in self-contained units because of its unique thermodynamic properties that make it a better choice. For example, self-contained portable air conditioners used to cool commercial aircraft while on the ground currently use R-134a. This refrigerant is used because R-134a is optimized for equipment that use screw compressors and need to be able to operate at extremely high ambient temperatures with high humidity. R-513A’s thermodynamic properties closely mimic those of R-134a, making it an important option for applications where R-134a is used. As noted above, self-contained portable air conditioners used to cool the aircraft interior while on the ground must function in a wide range of ambient temperatures and humidities, making R-513A an important option for this specific use. Other available refrigerant options with lower GWPs do not have the correct thermodynamic properties to fit the technical needs for this specific use. In addition, R-513A and R-134a are both low pressure refrigerants. As a result, R-513A could replace R-134a in equipment with minimal modifications but it is not expected to replace R-410A due to the extensive re-engineering required.

EPA expects that use of R-513A in residential and light commercial air conditioning and heat pumps will be limited to a narrow set of specific applications because it is likely to be used only in those few applications where R-134a is currently used in self-contained units and where other available options are not technically feasible. Therefore, EPA is listing this refrigerant as acceptable for use in the residential and light commercial air conditioning and heat pumps—self-contained units end-use category.

Flammability and toxicity risks are comparable to or lower than flammability and toxicity risks of other

available substitutes in the same end-use category. For example, R-513A is non-flammable and has comparable or lower flammability risk compared to other acceptable refrigerants in this end-use category, such as the lower flammability refrigerants R-454B and R-454C. Toxicity risks can be minimized by use consistent with the AIHA’s WEELs, ASHRAE’s OEL, ASHRAE 15 and other industry standards, recommendations in the SDS, and other safety precautions common in the refrigeration and air conditioning industry.

Based on the considerations described above, EPA finds R-513A acceptable in new self-contained units in the residential and light commercial air conditioning end-use because it provides a lower-GWP alternative for this end-use category. R-513A does not pose greater overall environmental and human health risk than other available substitutes in the same end-use category.

B. Foam Blowing

1. Extruded Polystyrene (XPS) Blowing Agent Blends of 0 to 90 Percent HFO-1336mzz(Z), 0 to 90 Percent HFO-1234ze(E), 0 to 75 Percent HFC-152a, and 0 to 90 Percent CO₂

EPA’s decision: EPA finds blends of 0 to 90 percent HFO-1336mzz(Z), 0 to 90 percent HFO-1234ze(E), 0 to 75 percent HFC-152a, and 0 to 90 percent CO₂ (“HFO-1336mzz(Z)/HFO-1234ze(E)/HFC-152a/CO₂ blends”) acceptable as a substitute for use as a foam blowing agent in:

- Polystyrene: extruded boardstock and billet.

HFO-1336mzz(Z) is an HFO and is also called (Z)-1,1,1,4,4,4-hexafluorobut-2-ene or *cis*-1,1,1,4,4,4-hexafluorobut-2-ene (CAS Reg. No. 692–49–9); it also goes by the trade names of FEA-1100 or Formacel® 1100. HFO-1234ze(E) is an HFO and is also known as *trans*-1,3,3,3-tetrafluoroprop-1-ene (CAS Reg. No. 29118–24–9). HFC-152a is an HFC and is also called ethane, 1,1-difluoro (CAS Reg. No. 75–37–6). CO₂ has CAS Reg. No. 124–38–9.

You may find a copy of the applicant’s submission, with CBI redacted, providing the required health and environmental information for this substitute in this end-use in the docket (EPA-HQ-OAR-2003–0118) at <https://www.regulations.gov> under the name, “SNAP Information Notice for Extruded Polystyrene Blend of 0 to 90% HFO-1336mzz(Z), 0 to 90% HFO-1234ze(E), 0 to 75% HFC-152a, and 0 to 90% CO₂ as a Foam Blowing Agent SNAP Submission Received August 7, 2023.”

²⁵ These are all examples of equipment defined as “factory sealed appliances” in the UL 60335–2–40 standard for electrical heat pumps, air-conditioners, and dehumidifiers, in which all refrigerating system parts have been sealed tight during the manufacturing process. Other equipment that meets the UL definition of factory sealed appliances are also self-contained units.

EPA has performed an assessment to examine the health and environmental risks of this substitute. This assessment is available in the docket EPA-HQ-OAR-2003-0118:

- “Risk Screen on Substitutes for Use in Extruded Polystyrene Boardstock and Billet Foam Substitute: HFO-1336mzz(Z)/HFO-1234ze(E)/HFC-152a/CO₂ Blends.”

Environmental information: These HFO-1336mzz(Z)/HFO-1234ze(E)/HFC-152a/CO₂ foam blowing agent blends have an ODP of 0. The components, HFO-1336mzz(Z), HFO-1234ze(E), HFC-152a, and CO₂ have GWPs of 2,²⁶ 1,²⁷ 124,²⁸ and 1, respectively. The GWPs of the blowing agent blends using these components range from 1 to 94. These reflect the composition ranges that result in the lowest GWP of 1 to the highest GWP of 94 given the GWP and range of percentages for each component. The components of the HFO-1336mzz(Z)/HFO-1234ze(E)/HFC-152a/CO₂ blends are excluded from EPA’s regulatory definition of VOC under CAA regulations (see 40 CFR 51.100(s)) addressing the development of SIPs to attain and maintain the NAAQS.

Flammability information: The component HFC-152a is flammable at standard temperature and pressure as defined by standard test method ASTM E681. HFO-1336mzz(Z) and HFO-1234ze(E) are not flammable at standard temperature and pressure using the same method. However, at higher temperatures, such as the temperatures typical for extruding XPS, HFO-1234ze(E) may also be flammable, particularly at higher humidity levels.²⁹ HFO-1336mzz(Z)/HFO-1234ze(E)/HFC-152a/CO₂ blends anticipated to be used in manufacturing polystyrene: extruded boardstock and billet are flammable at the temperatures typical for extruding XPS.

Toxicity and exposure data: Potential health effects of exposure to this substitute include skin or eye irritation or frostbite. At sufficiently high concentrations, the substitute may cause irregular heartbeat. The substitute could cause asphyxiation if air is displaced by vapors in a confined space. These potential health effects are common to many foam blowing agents. Exposure may be possible during the blowing of the foam if the foam manufacturer does not take standard precautions such as the use of personal protective equipment. EPA anticipates that these HFO-1336mzz(Z)/HFO-1234ze(E)/HFC-152a/CO₂ blends will be used consistent with the recommendations specified in the SDS.

The AIHA has established a WEEL of 1,000 ppm for HFC-152a as an 8-hr TWA. The WEEL committee of the OARS has established a WEEL of 500 ppm³⁰ for HFO-1336mzz(Z). OSHA has established a PEL of 5,000 ppm on an 8-hr TWA for CO₂. The manufacturer of HFO-1234ze(E) recommends an OEL of 800 ppm³¹ (8-hr TWA) for this chemical. EPA anticipates that users will be able to meet the AIHA and OARS WEELs, OSHA PEL, and manufacturer’s OEL and will follow requirements and recommendations in the manufacturer’s SDSs and other safety precautions common to the foam blowing industry, thereby addressing potential health risks.

Comparison to other foam blowing agents in this end-use: These HFO-1336mzz(Z)/HFO-1234ze(E)/HFC-152a/CO₂ blends have an ODP of 0, comparable to other acceptable substitutes in the polystyrene: extruded boardstock and billet end-use, such as HFC-152a, HFO-1234ze(E), methyl formate, and CO₂. These HFO-1336mzz(Z)/HFO-1234ze(E)/HFC-152a/CO₂ blends’ GWPs from 1 to 94 are lower than or comparable to those of other acceptable substitutes in the same

end-use for which we are finding it acceptable. Examples include HFC-152a, HFO-1234ze(E), light saturated hydrocarbons C3-C6, and methyl formate, with respective GWPs of 124,³² 1,³³ less than 4,³⁴ and 11.³⁵ Depending on the specific composition, the blend used may have a higher GWP than that of some individual chemicals that are acceptable substitutes in this end-use that are more flammable (e.g., HFO-1234ze(E)) or are less able to meet standard specifications (e.g., ASTM C578) than the blends because of properties such as solvency in the plastic resin (e.g., HFO-1336mzz(Z)) or contributions to insulation value (e.g., CO₂, water).

Flammability and toxicity risks are comparable to or lower than flammability and toxicity risks of other available substitutes in the same end-use. Toxicity risks can be minimized by use consistent with the AIHA’s and OARS’s WEELs, OSHA’s PEL, recommendations in the SDS, and other safety precautions common in the foam blowing industry.

Based on the considerations described above, EPA finds blends of 0 to 90 percent HFO-1336mzz(Z), 0 to 90 percent HFO-1234ze(E), 0 to 75 percent HFC-152a, and 0 to 90 percent CO₂ acceptable in the polystyrene: extruded boardstock and billet end-use because they do not pose greater overall environmental and human health risk than other available substitutes in the same end-use.

Appendix A: Summary of Decisions for New Acceptable Substitutes

REFRIGERATION AND AIR CONDITIONING

End-use	Substitute	Decision	Further information ¹
Cold storage warehouses (retrofit equipment only).	R-471A	Acceptable	This substitute is a blend of 78.7 percent hydrofluoroolefin (HFO)-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene; (Chemical Abstracts Service Registry Number [CAS Reg. No.] 29118-24-9); 17.0 percent HFO-1336mzz(E), also known as <i>trans</i> -1,1,1,4,4,4-hexafluoro-2-butene (CAS Reg. No. 66711-86-2); and 4.3 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-471A has a global warming potential (GWP) of 144 and an ozone depletion potential (ODP) of 0. The blend is not flammable as it has an American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE) flammability classification of “1”.

REFRIGERATION AND AIR CONDITIONING—Continued

End-use	Substitute	Decision	Further information ¹
Cold storage warehouses (retrofit equipment only).	R-480A	Acceptable	ASHRAE has adopted an occupational exposure limit (OEL) for the blend of 710 ppm on an eight-hour time-weighted average (8-hr TWA). For the components of R-471A, the Workplace Environmental Exposure Limit (WEEL) Committee of the Occupational Alliance for Risk Science (OARS) has established a WEEL of 400 ppm on an 8-hr TWA for HFO-1336mzz(E), the AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E). This substitute is a weighted blend of 5 percent CO ₂ , 86 percent HFO-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene CAS Reg. No. 29118-24-9, and 9 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-480A has a GWP of 291 and an ODP of 0. The blend is not flammable as it has an ASHRAE flammability classification of “1.” ASHRAE has adopted an OEL for the blend of 900 ppm (8-hr TWA). For the components of R-480A, the Occupational Safety and Health Administration (OSHA) has established a permissible exposure limit (PEL) for CO ₂ of 5,000 ppm on an 8-hr TWA, AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E).
Commercial ice machines (retrofit equipment only).	R-480A	Acceptable	This substitute is a weighted blend of 5 percent CO ₂ , 86 percent HFO-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene CAS Reg. No. 29118-24-9, and 9 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-480A has a GWP of 291 and an ODP of 0. The blend is not flammable as it has an ASHRAE flammability classification of “1.” ASHRAE has adopted an OEL for the blend of 900 ppm (8-hr TWA). For the components of R-480A, OSHA has established a PEL for CO ₂ of 5,000 ppm on an 8-hr TWA, AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E).
Industrial process refrigeration (retrofit equipment only).	R-471A	Acceptable	This substitute is a blend of 78.7 percent HFO-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene; (CAS Reg. No. 29118-24-9); 17.0 percent HFO-1336mzz(E), also known as <i>trans</i> -1,1,1,4,4,4-hexafluoro-2-butene (CAS Reg. No. 66711-86-2); and 4.3 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-471A has a GWP of 144 and an ODP of 0. The blend is not flammable as it has an ASHRAE flammability classification of “1.” ASHRAE has adopted an OEL for the blend of 710 ppm (8-hr TWA). For the components of R-471A, OARS has established a WEEL of 400 ppm on an 8-hr TWA for HFO-1336mzz(E), AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E).
Positive displacement chillers (retrofit equipment only).	R-480A	Acceptable	This substitute is a weighted blend of 5 percent CO ₂ , 86 percent HFO-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene CAS Reg. No. 29118-24-9, and 9 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-480A has a GWP of 291 and an ODP of 0. The blend is not flammable as it has an ASHRAE flammability classification of “1.” ASHRAE has adopted an OEL for the blend of 900 ppm (8-hr TWA). For the components of R-480A, the Occupational Safety and Health Administration (OSHA) has established a permissible exposure limit (PEL) for CO ₂ of 5,000 ppm on an 8-hr TWA, AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E).
Refrigerated transport (retrofit equipment only).	R-480A	Acceptable	This substitute is a weighted blend of 5 percent CO ₂ , 86 percent HFO-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene CAS Reg. No. 29118-24-9, and 9 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-480A has a GWP of 291 and an ODP of 0. The blend is not flammable as it has an ASHRAE flammability classification of “1.” ASHRAE has adopted an OEL for the blend of 900 ppm (8-hr TWA). For the components of R-480A, OSHA has established a PEL for CO ₂ of 5,000 ppm on an 8-hr TWA, AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E).
Residential and light commercial air conditioning and heat pumps—self-contained units (new equipment only).	R-513A	Acceptable	This HFC-134a/HFO-1234yf blend R-513A has an ODP of 0. Its components include HFC-134a which has a GWP of 1,430 and HFO-1234yf which has a GWP of 1. If these values are weighted by mass percentage, then the blend would have a GWP of 630. All components of the blends are excluded from EPA’s regulatory definition of VOC under CAA regulations (see 40 CFR 51.100(s)). ASHRAE has assigned R-513A a flammability class of “1,” meaning it does not propagate a flame under standard test conditions. ASHRAE has adopted an OEL for the blend R-513A of 650 ppm (8-hr TWA). The AIHA has established WEELS of 1000 ppm for HFC-134a and of 500 ppm for HFO-1234yf, both as an 8-hr TWA.
Retail food refrigeration—Refrigerated food processing and dispensing equipment (retrofit equipment only).	R-471A	Acceptable	This substitute is a blend of 78.7 percent HFO-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene; (CAS Reg. No. 29118-24-9); 17.0 percent HFO-1336mzz(E), also known as <i>trans</i> -1,1,1,4,4,4-hexafluoro-2-butene (CAS Reg. No. 66711-86-2); and 4.3 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-471A has a GWP of 144 and an ODP of 0. The blend is not flammable as it has an ASHRAE flammability classification of “1.” ASHRAE has established an OEL for the blend of 710 ppm on an eight-hour time-weighted average (8-hr TWA). For the components of R-471A, OARS has established a WEEL of 400 ppm on an 8-hr TWA for HFO-1336mzz(E), AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E).

REFRIGERATION AND AIR CONDITIONING—Continued

End-use	Substitute	Decision	Further information ¹
Retail food refrigeration—Remote condensing units (<i>retrofit equipment only</i>).	R-471A	Acceptable	This substitute is a blend of 78.7 percent HFO-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene; (CAS Reg. No. 29118-24-9); 17.0 percent HFO-1336mzz(E), also known as <i>trans</i> -1,1,1,4,4,4-hexafluoro-2-butene (CAS Reg. No. 66711-86-2); and 4.3 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-471A has a GWP of 144 and an ODP of 0. The blend is not flammable as it has an ASHRAE flammability classification of “1”. ASHRAE has established an OEL for the blend of 710 ppm (8-hr TWA). For the components of R-471A, OARS has established a WEEL of 400 ppm on an 8-hr TWA for HFO-1336mzz(E), AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E).
Retail food refrigeration—Supermarket systems (<i>retrofit equipment only</i>).	R-471A	Acceptable	This substitute is a blend of 78.7 percent HFO-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene; (CAS Reg. No. 29118-24-9); 17.0 percent HFO-1336mzz(E), also known as <i>trans</i> -1,1,1,4,4,4-hexafluoro-2-butene (CAS Reg. No. 66711-86-2); and 4.3 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-471A has a GWP of 144 and an ODP of 0. The blend is not flammable as it has an ASHRAE flammability classification of “1”. ASHRAE has established an OEL for the blend of 710 ppm (8-hr TWA). For the components of R-471A, OARS has established a WEEL of 400 ppm on an 8-hr TWA for HFO-1336mzz(E), AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E).
Water coolers (<i>retrofit equipment only</i>).	R-480A	Acceptable	This substitute is a weighted blend of 5 percent CO ₂ , 86 percent HFO-1234ze(E), which is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene CAS Reg. No. 29118-24-9, and 9 percent HFC-227ea, which is also known as 1,1,1,2,3,3,3-heptafluoropropane (CAS Reg. No. 431-89-0). R-480A has a GWP of 291 and an ODP of 0. The blend is not flammable as it has an ASHRAE flammability classification of “1.” ASHRAE has adopted an OEL for the blend of 900 ppm (8-hr TWA). For the components of R-480A, OSHA has established a PEL for CO ₂ of 5,000 ppm on an 8-hr TWA, AIHA has established a WEEL of 1,000 ppm for HFC-227ea (8-hr TWA), and ASHRAE has adopted an OEL of 800 ppm on an 8-hr TWA for HFO-1234ze(E).

¹ See recommendations in the manufacturer's SDS and guidance for all listed refrigerants.

FOAM BLOWING

End-use	Substitute	Decision	Further information ¹
Polystyrene: Extruded boardstock and billet.	Extruded polystyrene (XPS) foam blowing agent blends of 0 to 90 percent HFO-1336mzz(Z), 0 to 90 percent HFO-1234ze(E), 0 to 75 percent HFC-152a, and 0 to 90 percent CO ₂ .	Acceptable	HFO-1234ze(E) is also known as <i>trans</i> -1,3,3,3-tetrafluoroprop-1-ene (Chemical Abstracts Service Registry Number [CAS Reg. No.] 29118-24-9). HFO-1336mzz(Z) is also known as (Z)-1,1,1,4,4,4-hexafluoro-2-butene and <i>cis</i> -1,1,1,4,4,4-hexafluoro-2-butene (CAS Reg. No. 692-49-9). HFC-152a is also known as 1,1-difluoroethane (CAS Reg. No. 75-37-6). CO ₂ has CAS Reg. No. 124-38-9. These blends have 100-year GWPs from 1 to about 94, depending on the specific composition. Blends of these compounds anticipated to be used in manufacturing are flammable. The AIHA has established a WEEL of 1,000 ppm for HFC-152a on an eight-hour Time-Weighted Average (8-hr TWA). The OARS has established a WEEL of 500 ppm (8-hr TWA) for HFO-1336mzz(Z). The manufacturer of HFO-1234ze(E) has established an OEL of 800 ppm (8-hr TWA) and the American Society of Heating, Refrigerating and Air-Conditioning Engineers has adopted an OEL of 800 ppm (8-hr TWA) for this compound. The U.S. OSHA has established a PEL of 5,000 ppm on an 8-hr TWA for CO ₂ .

¹ See recommendations in the manufacturer's SDS and guidance for all listed foam blowing agents.

Hazardous Waste Generator Improvements Rule, the Hazardous Waste Pharmaceuticals Rule, and the Definition of Solid Waste Rule; Technical Corrections

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA or the Agency) is finalizing five amendments that were withdrawn in its December 6, 2023, partial withdrawal of direct final rule. Due to receipt of adverse comments, the EPA withdrew eight amendments from the August 9, 2023, direct final rule that included revisions to the 2016 Hazardous Waste Generator Improvements Rule, the 2019 Hazardous Waste Pharmaceuticals Rule and the 2018 Vacatur of the Definition of Solid Waste Rule (88 FR 54086). The EPA is

responding to the relevant adverse comments in this action.

DATES: This final rule is effective on February 10, 2025.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA-HQ-OLEM-2023-0081. All documents in the docket are listed on the <http://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically through <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Kathy Lett, U.S. Environmental Protection Agency, Office of Resource Conservation and Recovery (MC: 5304T), 1200 Pennsylvania Avenue NW, Washington, DC 20460, (202) 566-0517, (lett.kathy@epa.gov) or Kristin Fitzgerald, U.S. Environmental Protection Agency, Office of Resource Conservation and Recovery (MC: 5304T), 1200 Pennsylvania Avenue NW, Washington, DC 20460, (202) 566-0512 (fitzgerald.kristin@epa.gov).

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

Entities potentially affected by this action include hazardous waste generators, treatment, storage, and disposal facilities, healthcare facilities, reverse distributors, importers/exporters of hazardous waste, and users of the transfer-based exclusion to the definition of solid waste. Also affected are States and EPA Regions implementing these RCRA hazardous waste regulations.

This discussion is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. This discussion includes the types of entities that the EPA is now aware could potentially be regulated by this action. Other types of entities not included could also be regulated. To determine whether your entity is regulated by this action, you should carefully examine the applicability criteria found in Section IV of the preamble. If you have questions regarding the applicability of this action to a particular entity, consult the persons listed in the **FOR FURTHER INFORMATION CONTACT** section.

B. What action is the agency taking?

This action finalizes five amendments that were included in its August 9, 2023, direct final rule that made technical corrections to three rulemakings related to the generation of hazardous waste: the 2016 Hazardous Waste Generator Improvements Rule, the 2019 Hazardous Waste Pharmaceuticals Rule, and the 2018 Vacatur of the Definition of Solid Waste Rule (88 FR 54086). Due to receipt of adverse comments, eight amendments were withdrawn in the EPA's December 6, 2023, partial withdrawal of direct final rule (88 FR 84710). EPA has evaluated the comments received on the amendments and is finalizing five of these amendments, found in §§ 261.4(e)(1), 262.16(b)(1), 262.17(a)(8)(i) introductory text, 262.17(a)(8)(i)(A) and 266.508(a)(2)(ii). These five provisions relate to the 2016 Hazardous Waste Generator Improvements Rule and the 2019 Hazardous Waste Pharmaceuticals Rule.

Finalizing these technical corrections will correct or clarify the regulations for generators and handlers of hazardous waste. The EPA is also responding in this preamble to the adverse comments on the items that we are finalizing in this action. The three provisions we are not finalizing will not go into effect with this action and the EPA is not responding to the adverse comments on these three provisions.

C. What is the agency's authority for taking this action?

This rule is authorized under sections 1004, 2002, 3001, 3002, 3003, 3004, 3005, 3006, and 3010, of the Resource Conservation and Recovery Act of 1976, as amended, 42 U.S.C. 6903, 6912, 6921, 6922, 6923, 6924, 6925, 6926, and 6930.

III. Background

In the EPA's August 9, 2023, direct final rule (88 FR 54086), EPA explained that the Agency views the minor fixes and clarifications included in the action as noncontroversial. However, EPA published a parallel proposed rule the same day that could serve as the proposed rule to adopt the provisions in the direct final rule if adverse comments were received. EPA stated that in this case, there would not be a second comment period on this action.

The direct final rule preamble also stated that if the Agency were to receive adverse comment on any individual correction, we would publish a timely withdrawal in the **Federal Register** informing the public about the specific regulatory paragraph or amendment that will not take effect.

The EPA received adverse comments on eight amendments from the direct final rule and withdrew them on December 6, 2023 (88 FR 84710). All corrections that were not withdrawn became effective on December 7, 2023.

IV. Provisions Being Finalized and Response to Comment

A. Section 261.4(e)(1)

The August 9, 2023, direct final rule identified a number of regulatory citations that were incorrect and outdated in the regulations for generators of hazardous waste and updated those citations. Section 261.4(e) provides requirements for management of samples used in treatability studies and included citations that needed to be updated. The list of corrections included revising § 261.4(e)(1) to replace the references to quantity determinations in §§ 261.5 and 262.34(d) with a reference to the counting requirements in § 262.13 and the accumulation limits in § 262.16(b)(1).

EPA received an adverse comment to this revision. The commenter stated that it appears that the revised citation in this location, which identifies which categories of generators do not need to count treatability sample weight towards generator accumulation limits was incomplete. The comment stated that the revised citation should point to the accumulation limits for very small quantity generators (VSQGs), large quantity generators (LQGs), and satellite accumulation areas (SAAs), not just SQGs.

EPA partially agrees with the commenter and is revising this citation to include references to §§ 262.14(a)(3) and (4), the accumulation limits for VSQGs accumulating acute and non-acute hazardous waste. The original language in this section referred to accumulation limits for VSQGs and SQGs and this revision reestablishes those two references. Generators accumulating waste at SAAs must include that waste in their monthly quantities for determining generator status, but the original regulatory language did not refer to the SAA requirements and LQGs do not have an accumulation limit. For these reasons, EPA is not amending the language to add any references to SAA or LQG requirements.

B. Section 262.16(b)(1)

The 2016 Generator Improvements rule established definitions for very small, small, and large quantity generators, reorganized the regulations for these categories of generators, and

clearly distinguished the generator categories—determined by how much hazardous waste is generated per calendar month at a site—from the conditions for exemption that specify limits for how much hazardous waste small and very small quantity generators can accumulate on site at any one time.

However, the small quantity generator conditions for exemption include an on-site accumulation limit of 6,000 kilograms for non-acute hazardous waste but do not specify an on-site accumulation limit for acute hazardous waste.

In the original 1980 hazardous waste generator regulations, there were only two categories of hazardous waste generator: small (generating less than 1,000 kilograms of hazardous waste per month) and large (generating more than 1,000 kilograms of hazardous waste per month). These pre-1986 small quantity generators had a total on-site hazardous waste accumulation limit of 6,000 kilograms of non-acute hazardous waste and one kilogram of acute hazardous waste. The 1986 rule that established the category and specific requirements for those generating between 100 kilograms and 1,000 kilograms per month (small quantity generators) (51 FR 10146; March 24, 1986) implemented the changes to the hazardous waste program required by the Hazardous and Solid Waste Amendments of 1984 (HSWA) and established a new category of “conditionally exempt small quantity generator” for those generating less than 100 kilograms of non-acute hazardous waste per month.

The scope of HSWA and the new regulations for conditionally exempt small quantity generators did not include acute hazardous waste. Therefore, generators generating less than one kilogram of acute hazardous waste per month are conditionally exempt small quantity generators and those generating more than one kilogram of acute hazardous waste per month are large quantity generators. There is no separate small quantity generator category based solely on generation of acute hazardous waste.

The EPA clarified the distinctions between the three generator categories in the 2016 Generator Improvements rule and stated that a small quantity generator can only generate up to one kilogram of acute hazardous waste in a calendar month, but it was not clear in the new language whether there is a limit on the amount of acute hazardous waste a small quantity generator can accumulate on site at any one time. Consistent with what has been historically allowed for generators of

small amounts of acute hazardous waste since the 1980 regulations, in the August 2023 technical correction notice, the EPA revised § 262.16(b)(1) to clarify that the acute hazardous waste accumulation limit for a small quantity generator is one kilogram.

The EPA received an adverse comment on this provision. One commenter stated that a 1-kilogram limit for small quantity generators accumulating acute hazardous waste would create severe logistical issues for facilities that generate just slightly under 1 kilogram per month of acutely hazardous waste as the proposed rule will essentially make their allowable accumulation time 30 days. The commenter stated that it would be “impossible to collect samples, characterize the waste, receive disposal approval for the waste and have the waste transported offsite within the allowable time frame.”

EPA disagrees with the comment. As described in this preamble, a 1-kilogram accumulation limit for this category of generator was part of the RCRA regulations starting in 1980 and the revision being made is to make that clearer in the regulations. The generator regulations are designed so that if a generator needs additional time to sample, characterize, and arrange for disposal of an acute hazardous waste that is accumulating on site, it can operate under the requirements for a large quantity generator instead of those of a small quantity generator and remain in compliance with the generator regulations. The additional large quantity generator standards ensure the safe handling of the elevated amounts of acute hazardous waste being accumulated at the generator site.

EPA is finalizing this provision as described in the August 9, 2023, notice.

C. Section 262.17(a)(8)(i) Introductory Text and (a)(8)(i)(A)

The 2016 Hazardous Waste Generator Improvements Rule added a requirement that LQGs undergoing closure of a hazardous waste unit submit a notification that they are closing that unit, including information on the timing of the closure. The generators have two options for submitting that notification when a specific waste accumulation unit is closing, but the generator as a whole is not closing all its units on site (*i.e.*, it will continue generating and accumulating hazardous waste on site). The 2023 direct final rule revised the language in § 262.17(a)(8)(i) and (a)(8)(i)(A) to more clearly describe when the provisions apply and used the defined term “final closure.” The

preamble to the 2023 direct final rule explained that EPA made these changes to distinguish between the requirements that apply when a unit is closing and those that apply when the whole facility is closing.

EPA received an adverse comment on this revision from a State that implements hazardous waste regulations. The commenter argued that a reference to the defined term “final closure” in this introductory text is not appropriate and suggested that EPA instead use the phrase “undergoing closure of the facility.” The commenter argues that this would be more appropriate for a generator closing a waste unit and needing to follow this requirement.

The commenter also submitted comments on a suggested revision to § 262.17(a)(8)(i)(A), stating that this part of the closure regulations would be clearer if the last statement in § 262.17(a)(8)(i)(B) about when a generator can remove a closure notice from its operating record because a waste accumulation unit was reopened was moved from § 262.17(a)(8)(i)(B) to § 262.17(a)(8)(i)(A).

EPA agrees that using the term “final closure” in this paragraph adds unnecessary confusion and that the sentence the commenter identified would make more sense in the revised § 262.17(a)(8)(i)(A). EPA is finalizing revisions to this section to make those changes and to state that the regulations apply when closing a waste accumulation unit but not all waste accumulation units.

D. Section 266.508(a)(2)(ii)

The preamble to the 2023 direct final rule explained that EPA was amending § 266.508(a)(2)(ii) in two ways. First, EPA allowed the four-character PHRM code as well as the existing six-character PHARMS code in Item 13 when manifesting non-creditable hazardous waste pharmaceuticals to a TSDF. This was consistent with guidance EPA issued in 2019.¹ Second, EPA inserted a sentence at the end clarifying that a healthcare facility may choose to include the applicable EPA hazardous waste numbers (*i.e.*, hazardous waste codes) in Item 13 of EPA Form 8700–22, in addition to the PHARMS or PHRM code that was already required. This was consistent with preamble from the Hazardous Waste Pharmaceuticals final rule.²

EPA received one adverse comment on the second provision. The

¹ From Johnson to EPA Regions, December 19, 2019, RCRA Online #14919.

² 84 FR 5877; February 22, 2019.

commenter was a State that expressed concerns that the rule does not resolve the issue that the inclusion of RCRA codes with PHRM/PHARMS on a manifest seems to negate any benefits for a healthcare facility operating under Subpart P. The State was concerned that a healthcare facility would be charged a higher fee by those States which collect fees. The State noted that including PHRM or PHARMS along with RCRA hazardous waste codes creates confusion and that it is unclear why the RCRA codes are being listed.

EPA disagrees with the commenter and is finalizing the provision as proposed. First, with respect to the PHRM code, while we did not receive any comments on this specific aspect of the proposed amendment, the adverse comment on other portions of the same paragraph meant that this was withdrawn, as well. This final rule allows healthcare facilities to use the PHRM or PHARMS code in Item 13 when manifesting non-creditable hazardous waste pharmaceuticals.

Second, with respect to hazardous waste codes, this final rule allows healthcare facilities to include hazardous waste codes in addition to the PHRM/PHARMS code when manifesting non-creditable hazardous waste pharmaceuticals. As discussed in a Frequent Question that is posted to our website,³ as well as in a memorandum,⁴ there are certain situations where the hazardous waste codes need to be included when manifesting non-creditable hazardous waste pharmaceuticals. For example, in States that have not yet adopted part 266 subpart P, healthcare facilities are subject to the standard 40 CFR part 262 generator regulations for their hazardous waste pharmaceuticals, which require healthcare facilities to include all applicable waste codes on the manifest. Therefore, if a healthcare facility that is operating under part 266 subpart P ships non-creditable hazardous waste pharmaceuticals to a TSDF that is in a State that has not yet adopted part 266 subpart P, the healthcare facility would need to include the hazardous waste codes to satisfy the regulatory requirements in the receiving State. Additionally, some vendors may require their healthcare facility customers to include the hazardous waste codes and EPA does not want to preclude that practice because including all applicable hazardous waste codes could

help receiving facilities better understand the wastes and determine the best course of management including, for example, complying with the land disposal restriction treatment standards.

Finally, waste industry representatives have told EPA that their practice is to not commingle hazardous waste pharmaceuticals in the same container with non-pharmaceutical hazardous wastes.⁵ This means that when hazardous waste codes are included on the same line of the manifest as the PHRM/PHARMS code, the hazardous waste codes can be presumed to be referring to hazardous waste pharmaceuticals, and not to other, non-pharmaceutical hazardous wastes.

For these reasons, EPA is finalizing regulatory language that allows a healthcare facility to include the hazardous waste codes in Item 13 of the manifest, in addition to the PHRM/PHARMS code.

V. State Authorization

A. Applicability of Rules in Authorized States

Under section 3006 of RCRA, the EPA may authorize a qualified State to administer its own hazardous waste program within the State in lieu of the Federal program. Following authorization, the EPA retains enforcement authority under sections 3008, 3013, and 7003 of RCRA, although authorized States have primary enforcement responsibility. The standards and requirements for State authorization are found at 40 CFR part 271.

Prior to enactment of the Hazardous and Solid Waste Amendments of 1984 (HSWA), a State with final RCRA authorization administered its hazardous waste program entirely in lieu of the EPA administering the Federal program in that State. The Federal requirements no longer applied in the authorized State, and the EPA could not issue permits for any facilities in that State, since only the State was authorized to issue RCRA permits. When new, more stringent Federal requirements were promulgated, the State was obligated to enact equivalent authorities within specified time frames. However, the new Federal requirements did not take effect in an authorized State until the State adopted the Federal requirements as State law.

In contrast, under RCRA section 3006(g) (42 U.S.C. 6926(g)), which was

added by HSWA, new requirements and prohibitions imposed under HSWA authority take effect in authorized States at the same time that they take effect in unauthorized States. The EPA is directed by the statute to implement these requirements and prohibitions in authorized States, including the issuance of permits, until the State is granted authorization to do so. While States must still adopt HSWA related provisions as State law to retain final authorization, the EPA implements the HSWA provisions in authorized States until the States do so.

Authorized States are required to modify their program only when the EPA enacts Federal requirements that are more stringent or broader in scope than the existing Federal requirements. RCRA section 3009 allows the States to impose standards more stringent than those in the Federal program (see also 40 CFR 271.1). Therefore, authorized States may, but are not required to, adopt Federal regulations, both HSWA and non-HSWA, that are considered less stringent than or equally as stringent as the previous Federal regulations.

B. Effect on State Authorization

This final rule finalizes technical corrections to regulations in 40 CFR parts 261, 262, and 266 that are being promulgated in part under the authority of HSWA, and in part under non-HSWA authority. Thus, the technical corrections and clarifications finalized in this direct final rule that are under non-HSWA authority would be applicable on the effective date only in those States that do not have final authorization of their base RCRA programs. However, the technical corrections to regulations in § 262.16(b)(1) are promulgated under the authority of HSWA and would be effective on the effective date of this final rule in all States.

This final rule is considered to be neither more nor less stringent than the current standards. Therefore, because of section 3009 of RCRA, which allows States to impose more stringent regulations than the Federal program, as described in section V.a. of this preamble, authorized States would not be required to modify their programs to adopt the technical corrections promulgated in this final rule, although we would strongly urge the States to adopt these technical corrections to avoid any confusion or misunderstanding by the regulated community and the public.

VI. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at <https://www.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 14094: Modernizing Regulatory Review

This action is not a significant regulatory action as defined in Executive Order 12866, as amended by Executive Order 14094, and was therefore not subject to a requirement for Executive Order 12866 review.

B. Paperwork Reduction Act (PRA)

This action does not impose any new information collection burden under the PRA because it does not contain any information collection activities. OMB has previously approved the information collection activities contained in the existing regulations and has assigned OMB control numbers 2050–0213, 2050–0202, and 2050–0212.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action simply corrects typographical errors, incorrect citations, and omissions; provides clarifications; and makes conforming changes where they have not been made previously. We have therefore concluded that this action will have no regulatory burden for all directly regulated small entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million (adjusted annually for inflation) or more (in 1995 dollars) as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. Because the rule does not make any substantive change, it will not impose substantial direct costs on Tribal governments. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive Order.

Therefore, this action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk. Since this action does not concern human health, EPA’s Policy on Children’s Health also does not apply.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that these technical corrections do not concern human health or environmental conditions and therefore cannot be evaluated with respect to potentially disproportionate and adverse effects on people of color, low-income populations and/or indigenous peoples because this final rule does not create any new regulatory requirements, but rather clarifies existing requirements and makes conforming changes.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects

40 CFR Part 261

Environmental protection, Administrative practice and procedure, Air pollution control, Confidential business information, Hazardous waste, Intergovernmental relations, Licensing and registration, Reporting and recordkeeping requirements.

40 FR Part 262

Environmental protection, Exports, Hazardous materials transportation, Hazardous waste, Imports, Labeling, Packaging and containers, Reporting and recordkeeping requirements.

40 FR Part 266

Environmental protection, Energy, Hazardous waste, Recycling, Reporting and recordkeeping requirements.

Michael S. Regan,
Administrator.

For the reasons set forth in the preamble, title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

■ 1. The authority for part 261 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, 6922, 6924(y) and 6938.

■ 2. Section 261.4 is amended by revising (e)(1) introductory text to read as follows:

§ 261.4 Exclusions.

(e) * * *

(1) Except as provided in paragraphs (e)(2) and (4) of this section, persons who generate or collect samples for the purpose of conducting treatability studies as defined in 40 CFR 260.10, are not subject to any requirement of this part, 40 CFR parts 262 and 263, or to the notification requirements of Section 3010 of RCRA, nor are such samples included in the quantity determinations of 40 CFR 262.13 and the accumulation limits in 40 CFR 262.14(a)(3), 40 CFR 262.14(a)(4), and 40 CFR 262.16(b)(1) when:

* * * * *

PART 262—STANDARDS APPLICABLE TO GENERATORS OF HAZARDOUS WASTE

■ 3. The authority for part 262 continues to read as follows:

Authority: 42 U.S.C. 6906, 6912, 6922–6925, 6937, 6938 and 6939g.

■ 4. Section 262.16 is amended by revising paragraph (b)(1) to read as follows:

§ 262.16 Conditions for exemption for a small quantity generator that accumulates hazardous waste.

(b) * * *

(1) *Accumulation limit.* The quantity of acute hazardous waste accumulated on site never exceeds 1 kilogram (2.2 pounds) and the quantity of non-acute hazardous waste accumulated on site never exceeds 6,000 kilograms (13,200 pounds);

* * * * *

■ 5. Section 262.17 is amended by revising (a)(8)(i) to read as follows:

§ 262.17 Conditions for exemption for a large quantity generator that accumulates hazardous waste.

(a) * * *

(8) * * *

(i) *Notification for closure of a waste accumulation unit.* A large quantity generator must perform one of the following when closing a waste accumulation unit, but not all waste accumulation units:

(A) Place a notice in the operating record within 30 days after closure identifying the location of the unit within the facility (if the waste accumulation unit is subsequently reopened, the generator may remove the notice from the operating record); or

(B) Meet the closure performance standards of paragraph (a)(8)(iii) of this section for container, tank, and containment building waste accumulation units or paragraph (a)(8)(iv) of this section for drip pads and notify EPA following the procedures in paragraph (a)(8)(ii)(B) of this section for the waste accumulation unit.

* * * * *

PART 266—STANDARDS FOR THE MANAGEMENT OF SPECIFIC HAZARDOUS WASTES AND SPECIFIC TYPES OF HAZARDOUS WASTE MANAGEMENT FACILITIES

■ 6. The authority for part 266 continues to read as follows:

Authority: 42 U.S.C. 1006, 2002(a), 3001–3009, 3014, 3017, 6905, 6906, 6912, 6921, 6922, 6924–6927, 6934, and 6937.

■ 7. Section 266.508 is amended by revising paragraph (a)(2)(ii) to read as follows:

§ 266.508 Shipping non-creditable hazardous waste pharmaceuticals from a healthcare facility or evaluated hazardous waste pharmaceuticals from a reverse distributor.

(a) * * *

(2) * * *

(ii) A healthcare facility shipping non-creditable hazardous waste

pharmaceuticals must write the word “PHRM” or “PHARMS” in Item 13 of EPA Form 8700–22. A healthcare facility may also include the applicable EPA hazardous waste numbers (*i.e.*, hazardous waste codes) in Item 13 of EPA Form 8700–22.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. NHTSA–2023–0021]

RIN 2127–AM37

Federal Motor Vehicle Safety Standards; Automatic Emergency Braking Systems for Light Vehicles; Correction

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Final rule; response to petitions for reconsideration; correction.

SUMMARY: This document corrects a November 26, 2024 final rule partially granting petitions for reconsideration of a May 9, 2024, final rule that adopted Federal Motor Vehicle Safety Standard (FMVSS) No. 127, “Automatic Emergency Braking for Light Vehicles,” which requires automatic emergency braking (AEB), pedestrian automatic emergency braking (PAEB), and forward collision warning (FCW) systems on all new light vehicles. This document corrects a typographical error in the amendatory instructions.

DATES: Effective January 27, 2025.

ADDRESSES: Correspondence related to this rule should refer to the docket number set forth above (NHTSA–2023–0021) and be submitted to the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: For technical issues: Mr. Markus Price, Office of Crash Avoidance Standards, Telephone: (202) 366–1810, Facsimile: (202) 366–7002. For legal issues: Mr. Eli Wachtel, Office of the Chief Counsel, Telephone: (202) 366–2992, Facsimile: (202) 366–3820. The mailing address for these officials is: National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE, Washington, DC 20590.

SUPPLEMENTARY INFORMATION: In FR Doc. 2024–27349 appearing on page 93199 in the **Federal Register** of Tuesday, November 26, 2024, the following correction is made:

§ 571.127 [Corrected]

■ On page 93220, in the first column, in part 571, in amendment 2.b, the instruction “Revising S5.1.1(a)(3) and (4), S5.1.1(b)(2), S5.1.3, and S8.3.3(g).” is corrected to read “Revising S5.1.1(a)(3) and (4), S5.1.1(b)(1), S5.1.3, and S8.3.3(g).”.

Issued in Washington, DC, under authority delegated in 49 CFR 1.95 and 501.8.

Raymond R. Posten,
Associate Administrator, Rulemaking.

BILLING CODE P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 29

[Docket No. FWS–HQ–NWRs–2019–0017; FF09R50000–XXX–FVRS3451900000]

RIN 1018–BD78

Permitting of Rights-of-Way Across National Wildlife Refuges and Other U.S. Fish and Wildlife Service-Administered Lands

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are revising our process for permitting of rights-of-way across National Wildlife Refuge System lands and other Service-administered lands. By aligning Service processes more closely with those of other Department of the Interior bureaus, to the extent practicable and consistent with applicable law, we will reduce the amount of time the Service requires to process applications for rights-of-way across Service-managed lands. We will require a preapplication meeting and use of a standard application, allow electronic submission of applications, and provide the Service with additional flexibility, as appropriate, to determine the fair market value or fair market rental value of rights-of-way across Service-managed lands. Additionally, we are implementing new permit terms and conditions and other regulatory changes.

DATES: This rule is effective January 10, 2025.

ADDRESSES: This final rule, its supporting documents, and the comments we received on the proposed rule (86 FR 5120, January 19, 2021) and revised proposed rule (88 FR 47442, July 24, 2023) are available at <https://www.regulations.gov> at Docket No. FWS-HQ-NWRS-2019-0017.

Information collection requirements: Written comments and suggestions on the information collection requirements may be submitted at any time to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, 5275 Leesburg Pike, MS: PRB (JAO/3W), Falls Church, VA 22041-3803 (mail); or Info_Coll@fws.gov (email). Please reference “OMB Control Number 0596-0249” in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: Ken Fowler, U.S. Fish and Wildlife Service, MS: NWRS, 5275 Leesburg Pike, Falls Church, VA 22041; (703) 358-1876. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States.

SUPPLEMENTARY INFORMATION:

Background

The mission of the U.S. Fish and Wildlife Service (Service) is working with others to conserve, protect, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. The Service has some amount of management responsibility for more than 96 million terrestrial acres as well as an additional 760 million acres of submerged lands in marine national monuments. The 96 million acres of terrestrial land includes:

- approximately 89 million acres where the Service is the principal land manager and permitting authority;
- nearly 4.9 million acres of conservation easements on private lands, where landowners are the principal land managers but the Service has a permitting role when a proposed use will affect the United States’ real property interest;
- more than 1.7 million acres of public land, where another Federal agency is the principal land manager and permitting authority but where the Service has some management responsibility through an agreement with another agency; and
- approximately 775,000 acres under a temporary lease or agreement where

another entity is the permitting authority.

Of the 89 million acres of terrestrial land principally managed by the Service, 76.8 million acres are in Alaska, 12.2 million acres are in the lower 48 States, and 50,000 acres are in Hawaii. The vast majority of these acres are part of the National Wildlife Refuge System (Refuge System), the mission of which is to administer a national network of lands and waters for the conservation, management, and where appropriate, restoration of the fish, wildlife, and plant resources and their habitats within the United States for the benefit of present and future generations of Americans (16 U.S.C. 668dd(a)(2)). The total also includes approximately 21,000 acres of public land in the National Fish Hatchery System, which the Service manages for the propagation and distribution of fish and other aquatic animal life.

The 89 million acres of terrestrial land includes more than 20 million acres of designated wilderness that the Service manages for “the preservation of their wilderness character” in accordance with the Wilderness Act of 1964 (16 U.S.C. 1131 *et seq.*). Subject to existing private rights, and special provisions included in specific wilderness-designation statutes, the Wilderness Act prohibits commercial enterprises and permanent roads. The law also prohibits temporary roads; motor vehicles, motorized equipment, motorboats, landing of aircraft, and other forms of mechanical transport; structures; and installations, unless their use can be demonstrated to be necessary to meet minimum requirements for the administration of the area for Wilderness Act purposes. The Alaska National Interest Lands Conservation Act (ANILCA; Pub. L. 96-487; 16 U.S.C. 3101 *et seq.*) includes provisions that allow for transportation and utility system uses within conservation system units, including designated wilderness.

Statutory Authority

Refuge System lands and waters are managed according to the authorities of the National Wildlife Refuge System Administration Act of 1966 (Administration Act; 16 U.S.C. 668dd-668ee), as amended by the National Wildlife Refuge System Improvement Act of 1997 (Improvement Act; Pub. L. 105-57), and ANILCA. For lands in Alaska, the Improvement Act specifies that ANILCA provisions prevail in any situation in which there is a conflict between any provision in the Improvement Act and any provision of ANILCA. If a right-of-way across Refuge System lands is authorized by ANILCA

(see 16 U.S.C. 3162(B)), then the Service must follow the procedures in 43 CFR part 36 when permitting the right-of-way and follow other applicable Refuge System laws and regulations where they do not conflict with ANILCA.

The Administration Act, as amended by the Improvement Act, authorizes the Service to permit a new use, or expand, renew, or extend an existing use, of a refuge only when the Service determines it is a compatible use. The Improvement Act defines a “compatible use” as a wildlife-dependent recreational use or any other use of a refuge that, in the sound professional judgment of the Service Director, will not materially interfere with or detract from the fulfillment of the mission of the Refuge System or the purpose(s) of the refuge.

Compatible Use Determinations

A “compatibility determination” is a written determination, typically signed and dated by the Refuge Manager, that an existing or new use of a refuge is compatible with the Refuge System mission and the purpose(s) of the refuge. Currently, there are more than 570 national wildlife refuges, and each refuge has different establishing authorities, purposes, habitat types, wildlife species, and public uses, which can result in different compatibility determinations for the same use. The Improvement Act required the Service to issue regulations establishing a process for determining whether a proposed use is a compatible use; these regulations are set forth in title 50 of the Code of Federal Regulations (CFR) in parts 25 and 26. The Improvement Act authorizes the Service to permit a right-of-way across Refuge System land only when the right-of-way is a compatible use.

The Improvement Act’s compatibility requirements apply only to Service permitting of rights-of-way across Refuge System lands and do not apply to other Service lands, except in the case of National Fish Hatchery System lands, where, by regulation at 50 CFR 70.6, the Refuge compatibility requirements in 50 CFR part 26 are equally applicable to fish hatcheries, and at 50 CFR 70.7, where the right-of-way regulations are equally applicable to fish hatcheries. The Service processes applications for other rights-of-way across lands outside the Refuge System and National Fish Hatchery System under the applicable authority cited at 43 CFR part 2800, and these lands are not subject to the Improvement Act’s compatibility requirement.

The Administration Act authorizes the Secretary of the Interior, acting

through the Service Director, to issue a right-of-way permit for a compatible use across Refuge System lands only if the applicant pays the Service the fair market value or fair market rental value of the right-of-way, unless the applicant is exempt from such payment by any other provision of Federal law, including certain provisions of ANILCA. In addition, before issuing a right-of-way permit, the Service must assess the effects of the proposed use, as required by the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*); the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*); the National Historic Preservation Act of 1966 (NHPA; 54 U.S.C. 300101 *et seq.*); and other applicable laws and Executive orders.

Existing Rights-of-Way

The regulations at 50 CFR 26.41 state that, for existing rights-of-way, the Service will not make a compatibility determination and will deny any request for maintenance of an existing right-of-way that will affect a unit of the Refuge System, unless:

- the design adopts appropriate measures to avoid resource impacts and includes provisions to ensure no net loss of habitat quantity and quality;
- restored or replacement areas identified in the design are afforded permanent protection as part of the national wildlife refuge or wetland management district affected by the maintenance; and
- all restoration work is completed by the applicant prior to any title transfer or recording of the easement, if applicable.

In accordance with the Improvement Act and 50 CFR 25.21, in the case of any right-of-way permit issued on or before November 17, 2000, for a term of more than 10 years (such as an electric utility right-of-way), the Service will not reevaluate whether the use is a compatible use during the permit term so long as the right-of-way holder is in compliance with all the terms and conditions of the permit. Prior to extending or renewing such long-term uses at the expiration of the authorization, the Service will make a new compatibility determination, but such compatibility determinations will base their analysis on the existing conditions with the use in place, not from a pre-use perspective. All permits issued after November 17, 2000, must include terms and conditions that specifically allow for modifications to the terms and conditions, if necessary to ensure compatibility. For older permits that do not include this stipulation, the Service may request permit

modifications to ensure that a use remains a compatible use. All right-of-way permits issued by the Service include language allowing the Service to terminate the right-of-way permit if the permit holder's use violates the permit terms and conditions.

Additionally, this final rule and the Improvement Act's compatibility requirement do not apply to permanent rights and rights-of-way in existence prior to land acquisition by the United States, including prior existing highway rights-of-way held by State and local units of government, except in situations where there is a proposed expansion, rerouting, or additional use of a right-of-way that will encumber Refuge System lands. The Improvement Act requires that all uses of Refuge System lands be compatible with the purpose(s) for which those areas were established and the mission of the Refuge System, and activities not authorized by a preexisting right-of-way are subject to 50 CFR 26.41 and the regulations in this final rule.

The Service may not authorize an expansion, rerouting, or additional use of a right-of-way that will encumber Refuge System lands unless the use is compatible with the purpose(s) for which those areas were established and the Refuge System mission.

Amendments to the Right-of-Way Regulations

On January 19, 2021, we published in the **Federal Register** (86 FR 5120) a proposed rule to revise and streamline the Service's process for permitting of rights-of-way across National Wildlife Refuge System lands and other Service-administered lands, to the extent practicable and consistent with applicable law. On July 24, 2023, we published in the **Federal Register** (88 FR 47442) a revised proposed rule based on feedback we received on the original proposed rule. For a description of the substantive changes proposed to the regulations in 50 CFR part 29, subpart B, see the January 19, 2021, proposed rule (86 FR 5120) and the July 24, 2023, revised proposed rule (88 FR 47442).

Summary of Comments and Responses

We accepted public comments on the January 19, 2021, proposed rule (86 FR 5120) for 60 days, ending March 22, 2021. By that date, we received 11 comments. Three comments suggested that the Service make no changes to its regulations to streamline right-of-way permitting. Overall, nine comments suggested no additional changes to those we had proposed. We discussed the remaining comments in our July 24,

2023, revised proposed rule (88 FR 47442).

We accepted public comments on the revised proposed rule for 30 days, ending August 23, 2023. We received comments from 13 different individuals or organizations. Two individuals or organizations suggested the Service make no changes to its regulations to streamline right-of-way permitting. Two others suggested the Service streamline its permitting process only when doing so would benefit transmission of renewable energy. We discuss the remaining comments by topic, below.

Comment (1): The Center for Biological Diversity and another commenter expressed opposition to the changes in the proposed rule and urged the Service to withdraw the proposed rule, but, if the Service did not, these commenters suggested that the Service not finalize the rule until the Service completes a programmatic consultation under the ESA.

Our response: No regulatory revisions in this rule will change the types of uses that the Service authorizes across Service-managed lands. The rule provides more clarity to applicants about the right-of-way application process and streamlines inefficient processes for applicants and the Service. Given that this rule has no impact on authorized uses, a programmatic consultation to determine cumulative impacts is not appropriate. Where appropriate, the Service will conduct the appropriate ESA consultation when processing individual right-of-way permit applications. We did not make any changes to the proposed rule as a result of these comments.

Comment (2): The Edison Electric Institute (EEI) requested that the Service ensure that electric infrastructure rights-of-way remain a compatible use on Refuge System lands, and EEI requested guidance concerning the submittal of facility construction plans and vegetation management plans.

Our response: Consistent with the final compatibility regulations implementing the National Wildlife Refuge System Improvement Act, published at 65 FR 62458 (October 18, 2000), it is not the Service's intent to restrict or eliminate previously permitted rights-of-way for infrastructure. However, in accordance with 50 CFR 25.21, the Service may seek modifications to the terms and conditions of existing right-of-way permits if necessary to ensure that a permitted use remains a compatible use.

With respect to such preexisting uses, in this final rule, we added a new section, § 29.12, Preexisting uses, to clarify that these regulations have no

impact on activities explicitly authorized by a permanent right or right-of-way obtained prior to acquisition by the United States, such as existing rights-of-way for power lines and other electrical infrastructure. However, any proposed expansion, rerouting, or additional use of a right-of-way that will encumber Refuge System lands must be in accordance with the requirements and procedures of 50 CFR 25.21 and 26.41(c).

Before the Service will process a request for a right-of-way permit, the Service requires a preliminary site and facility construction plan for a proposed right-of-way that requires construction. A preliminary site and facility construction plan is an attachment required by the Standard Form 299, Application for Transportation, Utility Systems, Telecommunications and Facilities on Federal Lands and Property (SF-299), which applicants must submit to request a right-of-way permit. Before the Service can issue a right-of-way permit or renewal, the Service also requires a vegetation management plan when vegetation will be disturbed by construction, operation, or maintenance of the right-of-way. The contents of facility construction plans and vegetation management plans will vary depending on the scope and location of the proposed right-of-way and the wildlife habitat and species impacted. During a preapplication consultation for a right-of-way, a modification of an existing right-of-way, or a renewal, the Service can provide guidance to an applicant about information that must be covered by these plans. We did not make any changes to the final rule as a result of EEI's comments pertaining to these plans.

Comment (3): The Energy and Wildlife Action Coalition (EWAC) suggested that the Service revise proposed § 29.21–3, Compatibility-determination requirement, by adding “or to activities authorized by preexisting rights-of-way” after “privately owned minerals,” to make the language of the regulation consistent with the preamble.

Our response: We concur with EWAC's suggestion to make the language of the regulation consistent with the preamble of the proposed rule about how the Service handles preexisting rights-of-way. Therefore, in addition to adding the new section, § 29.12, as discussed above, to clarify that these regulations have no impact on permanent rights and rights-of-way in existence prior to acquisition by the United States, we also revised proposed § 29.21–3 (now at § 29.13 in this final rule) to add the words “or to activities

explicitly authorized by a permanent right or right-of-way obtained prior to acquisition by the United States” after “privately owned minerals” in this final rule.

Comment (4): EWAC suggested that, since a compatibility determination is a threshold requirement, the Service's implementing regulations should limit the information the agency initially requests to the information it requires to make a compatibility determination. Consistent with that idea, EWAC suggested that the Service be more flexible with respect to the amount of environmental information that must accompany a right-of-way application.

Our response: The Service typically requires an environmental analysis before we may make a final determination that a proposed use is compatible with the mission of the Refuge System and the purpose(s) of the refuge. However, the Service may require less information to ascertain whether or not a proposed use would conflict with the goals or objectives in an approved refuge management plan (e.g., comprehensive conservation plan, comprehensive management plan, or step-down management plan), which describe how the Service will accomplish the purpose(s) of the refuge. Such a conflict would require changes to the proposed use before it could potentially be found compatible with the purpose(s) of the refuge.

We concur with EWAC that the Service's implementing regulations should limit the information the agency initially requests to the information it requires to make a compatibility determination, and that an applicant should not prepare an environmental analysis to satisfy NEPA requirements until after the applicant has discussed the proposed use with the Service and provided basic environmental information to inform discussions with the Service. Therefore, we revised proposed § 29.21–4 (now at § 29.16, Right-of-way permit application, in this final rule), to require supplemental environmental information in lieu of an environmental analysis with initial application submission. Consistent with this change, we added the new section, § 29.15, General application procedures, which summarizes the steps in the right-of-way application process and clarifies that the Service will deem an application to be complete, and notify the applicant of such, after the Service has determined that the provided information is sufficient for the agency to make a compatibility determination and comply with NEPA. This section also states that the Service will notify

the applicant if additional information is required for a complete application.

Comment (5): EWAC suggested that, since NEPA documents are routinely developed by third-party contractors in consultation with the Service, required upfront payments for application processing should not include the estimated cost of preparing environmental review documents to satisfy NEPA requirements.

Our response: We concur, and we revised proposed § 29.21–6 (now at § 29.18 in this final rule) to clarify that the Service's required upfront payments for application processing will not include the cost of preparing environmental review documents to satisfy NEPA requirements when the applicant will assume responsibility for the costs of that work.

Comment (6): The State of Utah, Public Lands Policy Coordinating Office, suggested that the regulations include language similar to that included in the preamble of the proposed rule stating that there will be “no impact on prior existing highway rights-of-way held by State and local units of government on Service-administered land.”

Our response: We concur with the State of Utah's suggestion to make the language of the regulations consistent with the preamble of the proposed rule. Therefore, as discussed earlier in this final rule, we have added a new section, § 29.12, Preexisting uses, to clarify that these regulations have no impact on permanent rights-of-way in existence prior to acquisition by the United States. Additionally, consistent with this change, we revised proposed § 29.21–3, Compatibility-determination requirement (now at § 29.13 in this final rule), to clarify that no compatibility determination is required for activities explicitly authorized by a permanent right or right-of-way obtained prior to acquisition by the United States.

Comment (7): The State of Utah, Public Lands Policy Coordinating Office, reiterated its concern that, in remote areas, requiring an applicant to provide a survey plat prepared by a licensed professional land surveyor or another professional licensed by the State will create an unnecessary burden. The State reiterated its recommendation that the Service waive the requirement for a survey plat when it would be a burden for a right-of-way requestor.

Our response: The Service recognizes the challenges in surveying rights-of-way in remote areas. In the final rule, to increase flexibility for unique circumstances, we added a provision to allow a licensed Service land surveyor to waive the requirement of a survey

plat for a proposed right-of-way in a remote location if they determine that the Global Positioning System (GPS) coordinates and supporting location information submitted by the applicant for inclusion in the right-of-way permit are adequate to locate the proposed right-of-way with minimal risk to the United States.

Comment (8): The Wireless Infrastructure Association (WIA) recommended that the Service clarify that, in situations where tower or support infrastructure for wireless communications is owned by a neutral host provider that is separate from the entity operating the wireless communications equipment, the operator of the wireless communications equipment and not the owner of the tower or support infrastructure is responsible for compliance with Federal rules and requirements related to wireless communication. WIA recommended that the Service clarify that proposed § 29.21–8(c)(4) (now at § 29.20(c)(4) in this final rule) does not apply to communications facilities.

Our response: The Service supports collocation of wireless communications sites where possible and when compatible with refuge purposes. The proposed § 29.21–8(c)(4) contained contradictory text, and in this final rule we clarify at § 29.20(c)(4) that collocation is allowed but we require that each collocating entity obtain a right-of-way permit.

Comment (9): The WIA recommended that the Service clarify that, where tower or support infrastructure is owned and maintained by an organization separate from the entity operating the wireless communications equipment, the operator of the wireless communications equipment is responsible for complying with the applicable Federal rules and procedures for telecommunications sites.

Our response: The Service concurs that the requirements for communications facilities in § 29.20(g) in this final rule (formerly at § 29.21–8(g) in the proposed rule) should not apply to neutral host providers, also sometimes referred to as tower companies, who own and maintain towers or support infrastructure on Service-managed land but do not operate or maintain wireless communications equipment. We revised § 29.20(g) to clarify that requirements for communications facilities, including complying with the applicable Federal rules and procedures for telecommunications sites, apply to entities that operate or maintain wireless communications equipment.

Comment (10): The Red Cliff Band of Lake Superior Chippewa Indians and the Madison Office of the Great Lakes Indian Fish & Wildlife Commission requested that the Service include in its regulations a permit condition that ensures that the right-of-way permits it issues do not impede access to ceded ancestral Tribal lands or the exercise of court-affirmed treaty rights.

Our response: We concur that the right-of-way permits issued by the Service should not impede public access or the ability of Tribes to exercise court-affirmed treaty rights. Therefore, we revised proposed § 29.21–8(d), Terms and conditions required of most permit holders (now at § 29.20(d) in this final rule), to clarify that right-of-way permits issued by the Service will include language ensuring that Service-managed lands remain accessible to the public when access does not pose a threat to public safety or the environment.

Comment (11): The State of Alaska suggested that lands located within Alaska national wildlife refuges conveyed under the authority of ANILCA sections 103(c) and 906(o) are exempted from Service regulations by the interim management regulations for Alaska national wildlife refuges that published at 46 FR 31818–31834, on June 17, 1981.

Our response: The interim regulations promulgated in 1981 were repealed and superseded by the final rule promulgated in 1986 (51 FR 44791, December 12, 1986) and thus currently have no legal effect. Pursuant to 50 CFR 36.1, which sets forth the regulations for Alaska national wildlife refuges, the general National Wildlife Refuge System regulations in title 50 CFR are automatically applicable in their entirety to the federally owned lands within the boundaries of Alaska national wildlife refuges unless stated otherwise in those regulations or amended by ANILCA. We did not make any changes to the final rule as a result of these comments.

Comment (12): The State of Alaska requested that the Service exempt Alaska from this rule, based on the unique circumstances of Alaska's transportation and utility systems, such as the relatively undeveloped road system at the time of ANILCA passage, the need to develop roads and utilities across Alaska refuge lands to serve lands transferred to Native Corporations under the Alaska Native Claims Settlement Act (ANCSA), and pipeline right-of-way authorizations other than common carrier lines.

Our response: Pursuant to 50 CFR 36.1, which sets forth the regulations for

Alaska national wildlife refuges, the general National Wildlife Refuge System regulations in title 50 CFR are already applicable in their entirety to the federally owned lands within the boundaries of Alaska national wildlife refuges unless stated otherwise in those regulations or amended by ANILCA. As stated in § 29.21–1(b) in the proposed rules and § 29.11(b) in this final rule, requests for the transportation and utility system rights-of-way authorized under ANILCA must be submitted under the authority of 16 U.S.C. 3161 *et seq.* and follow the procedures set forth in 43 CFR part 36. The vast majority of rights-of-way requested from the Service in Alaska fall under ANILCA's definition of transportation and utility systems in 16 U.S.C. 3162(B) or are otherwise authorized under ANILCA; however, any rights-of-way not authorized under ANILCA are subject to the Administration Act and its implementing regulations in title 50 CFR. We did not make any changes to the final rule as a result of these comments.

Comment (13): The State of Alaska suggested that compatibility has a different standard under ANILCA, and, under that standard, set forth in 43 CFR 36.2(f), a title XI project is “compatible with the purposes for which the unit was established” if it “will not significantly interfere with or detract from the purposes for which the area was established” [emphasis added]. Therefore, the State suggests, the more restrictive compatibility determination and approval process described in 50 CFR 26.41(c) should not apply to these rights-of-way.

Our response: Consistent with 50 CFR 36.1, rights-of-way authorized under the Administration Act are subject to regulations in title 50 CFR including 50 CFR 25.21(b)(1) and 26.41. We did not make any changes to the final rule as a result of these comments.

Comment (14): The State of Alaska requested that the Service revise the regulation's definition of *National Wildlife Refuge System lands in Alaska* to include the list of the types of transportation and utility systems authorized in ANILCA section 1102(4)(B) and 43 CFR 36.2(p).

Our response: We revised the definition of *National Wildlife Refuge System lands in Alaska* in proposed § 29.21–1(b) (now at § 29.11 in this final rule) to reference the list of ANILCA-authorized transportation and utility systems in 16 U.S.C. 3162(B), which is the same list in ANILCA section 1102(4)(B) and 43 CFR 36.2(p).

Comment (15): The State of Alaska suggested that the Service revise

proposed § 29.21–2, Preapplication meeting, to impose an explicit timeframe for preapplication meetings.

Our response: The Service anticipates developing step-down policy for these regulations to provide guidance to Service employees on the appropriate timelines for preapplication meetings. Depending on the scope of the proposed use, multiple preapplication meetings may be appropriate. We did not make any changes to the rule as a result of this comment.

Comment (16): The State of Alaska requested that the Service expand the types of oil and gas pipelines that may be authorized by a Regional Director to include additional types of pipelines, such as contract carrier pipelines. The State also requested that the Service rephrase language in the preamble pertaining to ANILCA and the Wilderness Act, to avoid potential misunderstanding about where ANILCA allows commercial enterprises and permanent roads.

Our response: We incorporated the State's requested edits into the preamble description of the Wilderness Act and ANILCA, to clarify that ANILCA includes provisions that allow for transportation and utility systems within conservation system units, including designated wilderness. At this time, the Service is not prepared to expand the types of oil and gas pipelines that a Regional Director may authorize, so we did not make that suggested change.

Changes From the Proposed Rules

As discussed above under *Summary of Comments and Responses*, in this final rule we have made changes to the regulations in the proposed rules based on comments we received. Additionally, we made clarifying edits to several sections to eliminate potential sources of confusion.

In this final rule, in response to comments, we added to and updated several sections to make them consistent with the preamble of the proposed rule, which indicated that the regulations would have no impact on prior existing highway rights-of-way held by State and local units of government on Service-administered land. We added a new section, § 29.12, Preexisting uses, to clarify that these regulations have no impact on permanent rights-of-way in existence prior to acquisition by the United States, except that, consistent with Federal Highway Administration regulations in 23 CFR 645.205, activities not authorized by a prior existing highway right-of-way, as well as activities that fall outside the footprint of an existing right-of-way, are subject to

50 CFR 26.41 and the procedures in this final rule.

In response to public comments, and consistent with the preamble in the proposed rule, we revised and streamlined proposed § 29.21–3, Compatibility-determination requirement (now at § 29.13 in this final rule). Consistent with the Service's compatibility policy in the Service Manual at 603 FW 2, we clarified that the Service will not issue or renew a right-of-way permit across National Wildlife Refuge System land if the use would conflict with the goals or objectives in an approved refuge management plan (e.g., a comprehensive conservation plan). For brevity, we deleted proposed § 29.21–3's statutory citations and pointed applicants toward the Service's existing compatibility regulations in 50 CFR 25.21, which address compatible use determinations and reevaluations for rights-of-way permitted before and after November 17, 2000. Finally, in response to comments, we revised proposed § 29.21–3 to clarify that no compatibility determination is required for activities explicitly authorized by a permanent right or right-of-way obtained prior to acquisition by the United States.

The addition of a new section, § 29.12, Preexisting uses, in this final rule required the redesignations of proposed § 29.21–4 and the subsequent sections of the proposed rule.

We revised proposed § 29.21–4, Application procedures (now § 29.16, Right-of-way permit application, in this final rule), to clarify that the Service will not begin processing a right-of-way permit application until the agency has determined that the applicant has complied with application requirements. This provision was previously implied but not explicitly stated. The remainder of the section pertaining to application procedures follows what was previously included in the proposed rule with several revisions.

The most significant revision to proposed § 29.21–4 (now § 29.16), which we made in response to a public comment, is the elimination of the requirement that applicants include an environmental analysis with every application submission. An environmental analysis can be a time-consuming and expensive undertaking, and the Service agrees with a commenter that it is premature for an applicant to provide an environmental analysis suitable to satisfy NEPA requirements at the application submittal stage, and that the Service should first review other application

documentation before requesting a detailed environmental analysis.

We revised proposed § 29.21–4 (now § 29.16) to substitute supplemental environmental information for the environmental analysis in the list of documents that applicants must include with their application submission. This supplemental environmental information may include, but is not limited to, the anticipated impacts of the proposed use on air and water quality; scenic and aesthetic features; historic, architectural, archeological, and cultural features; and wildlife, fish, and marine life, including habitat connectivity and migratory routes.

Related to these changes, we revised proposed § 29.21–4 (now § 29.16) to require that applications include a description of proposed access routes and means of access for right-of-way construction and maintenance, and that the application's included maps identify proposed access points and routes (including uses of existing roads). This is information that would have otherwise been described in an environmental analysis, which, as explained above, the Service is no longer requiring as part of every right-of-way application submission.

We revised proposed § 29.21–4 (now § 29.16) to clarify that the preliminary site and facility construction plans listed on the SF–299 are required with application submission. Proposed § 29.21–4 identified preliminary site and facility construction plans as a post-application submission requirement, even though preliminary site and facility construction plans are a requirement of the SF–299, which is required with right-of-way application submission.

Finally, we revised proposed § 29.21–4 (now § 29.16) to indicate that an applicant may be required to provide proof of general liability insurance before the Service will issue a right-of-way permit. In the proposed rule, § 29.21–8(e) (now § 29.20(e)) stated that the Service may require a permit holder to maintain general liability insurance during the term of the permit, and, for transparency purposes, we copied this requirement to § 29.16(d)(4).

In this final rule, we have added a new section, § 29.15, General application procedures, summarizing steps an applicant must follow to request a right-of-way permit. These steps are described in more detail in other sections of the proposed rule and this final rule. This new section clarifies that the Service will deem a right-of-way application to be complete, and notify the applicant of such, after the Service has determined that the

information provided with an application is sufficient for the agency to make a compatibility determination and comply with NEPA. The section also states that the Service will notify the applicant if additional information is required for a complete application. These clarifications on application completeness are necessary given that the Service requires an environmental analysis to process many applications but is eliminating the proposed § 29.21–4 requirement that an environmental analysis be included with every application submission, to avoid situations where an applicant incurs an unnecessary expense to provide information the Service does not require.

In response to public comments, we revised proposed § 29.21–5 (now § 29.17) to be more flexible about the type of right-of-way location information the Service requires from an applicant before the agency may issue a right-of-way permit. The new paragraph under § 29.17(c) authorizes a licensed Service land surveyor to waive the requirement of a survey plat for a proposed right-of-way in a remote location if they determine that the GPS coordinates and supporting location information submitted by the applicant for inclusion in the right-of-way permit are adequate to locate the proposed right-of-way with minimal risk to the United States.

We revised proposed § 29.21–6 (now § 29.18) to clarify that the Service's required upfront payments for application processing will not include the cost of preparing environmental review documents to satisfy NEPA requirements when the applicant will pay for that work.

We revised proposed § 29.21–8(c)(4), under *Terms and conditions required for all permit holders*, to clarify that collocation of wireless facilities is allowed but requires that each collocating entity obtain a right-of-way permit. This revision corrects the contradictory language in proposed § 29.21–8(c)(4) that some may have interpreted as prohibiting collocation of wireless communications equipment, which the Service supports where possible and compatible with refuge purposes. The revised language appears in § 29.20(c)(4) in this final rule.

Although already common practice within the Service, we revised proposed § 29.21–8(d)(1), under *Terms and conditions required of most permit holders* (now at § 29.20(d)(1) in this final rule), to explicitly require that right-of-way permits issued by the Service include language ensuring that Service-managed public lands remain

accessible to the public when access does not pose a threat to public safety or the environment.

We revised proposed § 29.21–8(g) (now at § 29.20(g) in this final rule) to clarify that requirements for communications facilities, including complying with the applicable Federal rules and procedures for telecommunications sites, apply to entities that operate or maintain wireless communications equipment and are not applicable to owners of towers and support infrastructure who do not operate or maintain wireless communications equipment. This revision corrects the prior language at proposed § 29.21–8(g) that would have made owners of towers and support infrastructure responsible for ensuring collocated entities that operate or maintain wireless communications equipment meet regulatory requirements.

As indicated above, the Service requires that a company have a right-of-way permit to operate and maintain wireless telecommunications equipment on Service-managed land. In the situation where one company has a permitted tower or support infrastructure, and a second company will add their antennas and/or microwave dishes to the first company's tower or support infrastructure, and the second company will operate and maintain their equipment and be responsible for compliance with Federal rules and procedures, then the Service requires that the second company obtain a right-of-way permit and include with their right-of-way application proof of permission to collocate with the first company. Maps and the legal description for collocated use would match that of the permitted tower or infrastructure; however, the company seeking to install and operate the wireless communications equipment would identify their own operation and maintenance needs in their application. If collocating with another provider, the environmental analysis for the proposed additional use of an existing permitted tower or support infrastructure must address the cumulative impact of multiple collocated providers if that analysis was not performed as part of the permitting for the tower or support infrastructure.

In response to requests from the State of Alaska, we made minor clarifying edits to the preamble and the regulations in the sections referencing Alaska.

We revised a definition for a term we had proposed, *Regional Director*, and the proposed provisions for another term, *National Wildlife Refuge System*

lands—less than fee interest. We also replaced the term *right-of-way* with *right-of-way permit* and revised its definition.

- We revised the definition of *Regional Director* in proposed § 29.21 (§ 29.10 in this final rule) to eliminate the additional requirement that, when these regulations require the Regional Director's signature or written approval for a right-of-way, only the Regional Director or the person acting in the Regional Director's official capacity may sign. This change makes the definition of the term consistent with definitions found elsewhere in title 50 CFR and provides flexibility to allow a delegated representative of the Regional Director to sign. The Service will address delegations and signature requirements through the Service Manual rather than through this rulemaking action.

- We revised the provisions for *National Wildlife Refuge System lands—less than fee interest* in proposed § 29.21–1(d) (now at § 29.11(d) in this final rule) to clarify that, when the Service determines that a right-of-way will not affect a legal interest of the United States, a Regional Director will sign a letter to the applicant stating that the proposed right-of-way will not affect the interest of the United States and the Service has no objection to the fee owner allowing the right-of-way. The language in the proposed rule improperly stated that the Regional Director would send such a letter to an applicant when the Service determines that a right-of-way will not *adversely* affect a legal interest of the United States. In a situation where a proposed long-term use will affect a legal interest of the United States, regardless of how it impacts Service-managed lands, a right-of-way permit is required.

- We replaced the term *right-of-way* in proposed § 29.21 (§ 29.10 in this final rule) with the term *right-of-way permit* to be clearer and more specific about what may be authorized and to more closely align our definition with that of the National Park Service. The term “right-of-way permit” means a discretionary and revocable permit, issued by the Service to authorize the use of lands or waters within Refuge System units for the construction, operation, and maintenance of infrastructure.

We added several new definitions to better align our terminology with terminology being adopted by the National Park Service in their regulations.

- We add the term *Applicant* to mean an entity that has submitted an application for a right-of-way permit.

- We add the term *Permit holder* to mean an entity that holds a current, fully executed right-of-way permit.
- We add the term *Permitted area* to mean the area of land or water mapped, described, and authorized for use, including construction, operation, maintenance, as well as routes and means of access, in a right-of-way permit issued by the U.S. Fish and Wildlife Service.

We revise § 29.22, now § 29.26, Hearing and appeals procedures, to clarify how the Service handles appeals for rejections of new rights-of-way, renewals of previously authorized rights-of-way, and terminations of authorized rights-of-way. The language in the current regulation states that an appeal may be taken from any final disposition of the Regional Director to the Director of the U.S. Fish and Wildlife Service, and, except in the case of a denial of a right-of-way application, from the latter's decision to the Secretary of the Interior. Because this

language has caused confusion, we are revising the language in this section consistent with its meaning.

In this final rule, we clarify that denials of new requested rights-of-way, when the denial is based on a Service's determination that the proposed use is not compatible, may be appealed to the Regional Director and subsequently to the Director, but no further. In this respect, denials of requested rights-of-way are different than denials for all other proposed uses of Refuge System lands, which, in accordance with 50 CFR 25.45, cannot be appealed beyond the Regional Director. Service termination of an existing authorized right-of-way may be further appealed to the Secretary. We also clarify that a party with standing may appeal the Service's decision to issue a requested right-of-way to the Secretary. These revisions do not establish new policy or procedure but instead rephrase the existing language to make it more clear.

Finally, in this final rule, we add a section on severability in § 29.27. The Service intends the regulations in this rule to be severable. If any portion of this final rule were to be stayed or invalidated by a reviewing court, the remaining elements would continue to provide the Service with important and independently effective tools relating to the administration of its right-of-way permitting program. Hence, if a court prevents any provision of this rule from taking effect, that action should not affect the other regulations in the subpart. The remaining provisions would remain in force because they could still operate sensibly.

For convenience in comparing the organization of the regulations at 50 CFR part 29, subpart B, Rights-of-Way General Regulations, with the revised regulations in that subpart as of the effective date of this final rule, table 1 displays the previous and new section designations.

TABLE 1—PRIOR AND NEW SECTIONS IN 50 CFR PART 29, SUBPART B

Previous sections	New sections
§ 29.21 What do these terms mean?	§ 29.10 Definitions.
§ 29.21–1 Purpose and scope	§ 29.11 Purpose and scope.
§ 29.21–2 Application procedures	§ 29.12 Preexisting uses.
§ 29.21–3 Nature of interest granted	§ 29.13 Compatibility-determination requirement.
§ 29.21–4 Terms and conditions	§ 29.14 Preapplication meeting.
§ 29.21–5 Construction	§ 29.15 General application procedures.
§ 29.21–6 Disposal, transfer or termination of interest	§ 29.16 Right-of-way permit application.
§ 29.21–7 What payment do we require for use and occupancy of national wildlife refuge lands?	§ 29.17 Survey plat and legal description.
§ 29.21–8 Electric power transmission line rights-of-way	§ 29.18 Reimbursement of costs.
§ 29.21–9 Rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom.	§ 29.19 Nature of interest granted.
	§ 29.20 Terms and conditions.
	§ 29.21 Construction.
	§ 29.22 Disposal, transfer, or termination of interest.
	§ 29.23 Required payment for use and occupancy of National Wildlife Refuge System land.
	§ 29.24 Electric power transmission line rights-of-way.
	§ 29.25 Rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid, or gaseous fuels, or any refined product produced from these substances.
§ 29.22 Hearing and appeals procedures	§ 29.26 Hearing and appeals procedures.
	§ 29.27 Severability.

Required Determinations

As stated above, before issuing a right-of-way permit, the Service must assess the effects of the proposed use, as required by NEPA, the ESA, and the NHPA as well as other applicable laws and Executive orders. In regard to NEPA, we believe that this rulemaking action qualifies for a categorical exclusion as described in 43 CFR 46.210(i) for rulemaking actions that are primarily procedural in nature. As set forth in that regulation, under this rule, we will conduct NEPA analysis for individual permit applications.

Regulatory Planning and Review—Executive Orders 12866, 13563, and 14094

Executive Order (E.O.) 14094 amends E.O. 12866 and reaffirms the principles of E.O. 12866 and E.O. 13563 and states that regulatory analysis should facilitate agency efforts to develop regulations that serve the public interest, advance statutory objectives, and are consistent with E.O. 12866 and E.O. 13563. Regulatory analysis, as practicable and appropriate, shall recognize distributive impacts and equity, to the extent permitted by law. E.O. 13563 emphasizes further that regulations must be based on the best available

science and that the rulemaking process must allow for public participation and an open exchange of ideas. We developed this rule in a manner consistent with these requirements.

E.O. 12866, as reaffirmed by E.O. 13563 and amended and reaffirmed by E.O. 14094, provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget (OMB) will review all significant rules. OIRA determined that this final rule is not significant.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 et seq.) generally requires

that Federal agencies prepare a regulatory flexibility analysis for rules subject to the notice-and-comment rulemaking requirements under the Administrative Procedure Act (5 U.S.C. 500 *et seq.*), if the rule would have a significant economic impact, whether detrimental or beneficial, on a substantial number of small entities. See 5 U.S.C. 601–612. Congress enacted the RFA to ensure that Federal regulations do not unnecessarily or disproportionately burden small entities. Small entities include small businesses, small governmental jurisdictions, and small not-for-profit enterprises.

The Service reviewed the Small Business Size standards for the affected industries. We determined that a large share of the entities in the affected industries are small businesses as defined by the Small Business Act (15 U.S.C. 631 *et seq.*). However, the Service believes that the impact on the small entities is not significant, as the rule would impact a small number of small entities, and the Service does not believe that these effects would be economically significant.

This final rule will benefit small businesses by streamlining Service regulations for permitting rights-of-way and thereby reduce the amount of time that the Service requires to issue many right-of-way permits. The rule implements a requirement for a preapplication meeting to provide small businesses with information upfront about the Service's estimated time and cost to evaluate and process a right-of-way application, increasing regulatory certainty. Additionally, the rule eliminates the Service application fee previously required at § 29.21–2(a)(2) and provides the Service the flexibility to request only the documents that it requires to process a right-of-way application, thereby reducing the regulatory burden.

In summary, we have considered whether this rule would result in a significant economic impact on a substantial number of small entities. We certify that this rule will not have a significant economic impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis is not required.

Energy Supply, Distribution, or Use—Executive Order 13211

Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use) requires agencies to prepare statements of energy effects when undertaking certain actions. This rule will streamline and expedite

Service processing of industry requests for rights-of-way and modifications to rights-of-way that cross Service-managed lands, but it will not significantly affect energy supplies, distribution, or use. Moreover, this rule is not a significant regulatory action as determined by OIRA, and the OIRA administrator has not designated this rule as a significant energy action. Therefore, this action is not a significant energy action, and no statement of energy effects is required.

*Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*)*

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501, *et seq.*), this rule will not significantly or uniquely affect small governments, and a small government agency plan is not required. Moreover, this rule will not produce a Federal requirement of \$100 million or greater in any year and is not a “significant regulatory action” under the Unfunded Mandates Reform Act.

Takings—Executive Order 12630

Under Executive Order 12630, this rule will not have significant takings implications as it applies only to Service permitting of rights-of-way across lands, and interests in land, owned by the United States. A takings implication assessment is not required.

Federalism—Executive Order 13132

In accordance with E.O. 13132 (Federalism), this rule will not have significant federalism effects, as it waives right-of-way application processing costs and right-of-way monitoring costs for State or local governments when the right-of-way is for governmental purposes that benefit the general public, and all other application requirements are necessary for the Service to meet Improvement Act and NEPA requirements. A federalism summary impact statement is not required.

Civil Justice Reform—Executive Order 12988

In accordance with E.O. 12988 (Civil Justice Reform), the Office of the Solicitor has determined that the rule does not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of the order.

*Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*)*

This rule does not contain any new collections of information that require approval by OMB under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). OMB has previously approved

the information collection requirements associated with Service use of Common Form SF–299 and assigned OMB Control Number 0596–0249 (expires 01/31/2027). You may view the information collection request(s) at <https://www.reginfo.gov/public/do/PRAMain>. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994 (Government-to-Government Relations with Native American Tribal Governments; 59 FR 22951), Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments), and the Department of the Interior's manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with recognized Federal Tribes on a government-to-government basis. In accordance with Secretary's Order 3206 of June 5, 1997 (American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act), we readily acknowledge our responsibilities to work directly with Tribes in developing programs for healthy ecosystems, to acknowledge that Tribal lands are not subject to the same controls as Federal public lands, to remain sensitive to Indian culture, and to make information available to Tribes.

This rule has no impact on Tribal lands, as it applies only to Service permitting of rights-of-way across lands, and interests in land, owned by the United States. Consistent with 512 DM 2 and Secretary's Order 3206, we sought comments from Tribes, and addressed the comments we received from Tribes concerning permitting of rights-of-way across lands, and interests in land, owned by the United States and managed by the Service.

List of Subjects in 50 CFR Part 29

Public lands mineral resources, Public lands rights-of-way, Wildlife refuges.

Regulation Promulgation

For the reasons given in the preamble, we hereby amend part 29, subchapter C of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 29—LAND USE MANAGEMENT

■ 1. The authority citation for part 29 continues to read as follows:

Authority: 5 U.S.C. 301; 16 U.S.C. 460k, 664, 668dd, 685, 690d, 715i, 725, 3161; 30

U.S.C. 185; 31 U.S.C. 3711, 9701; 40 U.S.C. 319; 43 U.S.C. 315a; 113 Stat. 1501A–140.

■ 2. Revise and republish subpart B to read as follows:

Subpart B—Rights-of-Way General Regulations

Sec.

- 29.10 Definitions.
- 29.11 Purpose and scope.
- 29.12 Preexisting uses.
- 29.13 Compatibility-determination requirement.
- 29.14 Preapplication meeting.
- 29.15 General application procedures.
- 29.16 Right-of-way permit application.
- 29.17 Survey plat and legal description.
- 29.18 Reimbursement of costs.
- 29.19 Nature of interest granted.
- 29.20 Terms and conditions.
- 29.21 Construction.
- 29.22 Disposal, transfer, or termination of interest.
- 29.23 Required payment for use and occupancy of National Wildlife Refuge System land.
- 29.24 Electric power transmission line rights-of-way.
- 29.25 Rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid, or gaseous fuels, or any refined product produced from these substances.
- 29.26 Hearing and appeals procedures.
- 29.27 Severability.

§ 29.10 Definitions.

In this subpart, the following terms will have the meanings set forth in this section.

ANILCA means the Alaska National Interest Lands Conservation Act (16 U.S.C. 3101 *et seq.*).

Applicant means an entity that has submitted an application for a right-of-way permit.

Compatible use means a proposed or existing wildlife-dependent recreational use or any other use of a national wildlife refuge that, based on sound professional judgment, will not materially interfere with or detract from the fulfillment of the National Wildlife Refuge System mission or the purposes of the national wildlife refuge. The term “inconsistent” in section 28(b)(1) of the Mineral Leasing Act of 1920 (30 U.S.C. 185) means a use that is not compatible.

Department means the U.S. Department of the Interior unless otherwise specified.

National Fish Hatchery System land means lands and waters, and interests therein, administered by the Secretary to propagate and distribute fish and other aquatic animal life and managed for the protection of all species of wildlife.

National Wildlife Refuge System land means lands and waters, and interests therein, administered by the Secretary

under the National Wildlife Refuge System Administration Act (16 U.S.C. 668dd–668ee), as amended, including wildlife refuges, game ranges, wildlife management areas, conservation areas, waterfowl production areas, and other areas administered for the protection and conservation of fish, wildlife, and plant species.

Other lands mean all other lands, or interests therein, and waters administered by the Secretary through the U.S. Fish and Wildlife Service that are not included in the National Wildlife Refuge System or the National Fish Hatchery System, *e.g.*, administrative sites.

Permit holder means an entity that holds a current, fully executed right-of-way permit.

Permitted area means the area of land or water mapped, described, and authorized for use, including construction, operation, maintenance, as well as routes and means of access, in a right-of-way permit issued by the U.S. Fish and Wildlife Service.

Regional Director means the official in charge of a region of the U.S. Fish and Wildlife Service or an authorized representative of the Regional Director.

Right-of-way permit means a discretionary and revocable permit issued by the U.S. Fish and Wildlife Service to authorize a use on, under, or over Federal lands, excluding uses that are included in a contract for services to a Service facility and excluding uses requested by the Service to benefit the mission of the National Wildlife Refuge System or the National Fish Hatchery System. A right-of-way permit does not grant, convey, or imply transfer of title to any interest in, including a leasehold or easement interest in, the lands or waters authorized for use.

§ 29.11 Purpose and scope.

The regulations in this subpart prescribe the procedures for filing applications and the terms and conditions under which rights-of-way over and across the lands administered by the U.S. Fish and Wildlife Service may be permitted.

(a) *National Wildlife Refuge System lands except lands in Alaska.* Applications are submitted under authority of Public Law 89–669, as amended (80 Stat. 926; 16 U.S.C. 668dd), or for oil and gas pipelines under section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*), following the application procedures set out in § 29.15. The Service will not issue a right-of-way permit for a requested use that would conflict with the goals or objectives in an approved refuge management plan,

nor will the Service issue a right-of-way permit unless the use is a compatible use as described in § 29.13. See § 29.24 for additional requirements applicable to rights-of-way for electric power transmission lines and § 29.25 for additional requirements applicable to rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid, or gaseous fuels, or any refined product produced from these substances.

(b) *National Wildlife Refuge System lands in Alaska.* Applications for rights-of-way authorized under ANILCA (see 16 U.S.C. 3162(B)) must be submitted under authority of 16 U.S.C. 3101 *et seq.* and follow the procedures and requirements set forth in 43 CFR part 36 and other applicable Refuge laws and regulations where they do not conflict with ANILCA. Applications for all other rights-of-way on or over lands in Alaska must be submitted under authority of 16 U.S.C. 668dd, as amended, or for oil and gas pipelines under section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*), following the application procedures set out in § 29.15, except that compatibility determinations for Alaska Native Claims Settlement Act 22(g) lands shall follow the procedures in § 25.21(b)(1) of this chapter.

(c) *National Fish Hatchery System lands.* Applications for rights-of-way across National Fish Hatchery System lands follow the same procedures as applications for rights-of-way across National Wildlife Refuge System lands in this section.

(d) *National Wildlife Refuge System lands—less than fee interest.* The Service requires permits for rights-of-way that affect a property interest acquired by the United States. If the requested right-of-way or regular maintenance of the requested right-of-way may affect the United States’ interest, then an application for a right-of-way permit must be submitted in accordance with procedures set forth in § 29.15, except those applications for rights-of-way authorized under ANILCA (see 16 U.S.C. 3162(B)) will follow the procedures set forth in 43 CFR part 36. If the Regional Director determines that the proposed right-of-way and regular maintenance of the proposed right-of-way will not affect the United States’ interest, then the Regional Director will sign a letter to the applicant stating that the proposed right-of-way will not affect the interest of the United States and the Service has no objection to the right-of-way.

(e) *Other lands outside the National Wildlife Refuge System and National Fish Hatchery System.* Rights-of-way on

or over other lands will be permitted in accordance with controlling authorities cited in 43 CFR part 2800, or for oil and gas pipelines under section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*). See § 29.24 for additional requirements applicable to rights-of-way for electric power transmission lines and § 29.25 for additional requirements applicable to rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid, or gaseous fuels, or any other refined product produced from those substances. Applications must be submitted in accordance with procedures set out in § 29.15, except that the compatibility-determination requirement in § 29.13 does not apply to lands outside the National Wildlife Refuge System and National Fish Hatchery System.

§ 29.12 Preexisting uses.

The regulations in this subpart have no impact on permanent rights and rights-of-way in existence prior to acquisition by the United States, except those activities not explicitly authorized by a preexisting right-of-way, as well as activities that fall outside the footprint of such a right-of-way, are subject to § 26.41 of this chapter and the procedures in this subpart.

§ 29.13 Compatibility-determination requirement.

The Service will not issue or renew a right-of-way permit across National Wildlife Refuge System land if the use would conflict with the goals or objectives in an approved refuge management plan. The Service will not issue or renew a right-of-way permit across National Wildlife Refuge System land unless the agency determines that the use is a compatible use in accordance with the requirements and procedures of § 25.21 of this chapter. The requirements and procedures of § 26.41(c) of this chapter apply to any requested maintenance of or modifications to an existing right-of-way except as modified by any other prevailing provision of law. None of the requirements in this subpart apply to the access of privately owned minerals or to activities explicitly authorized by a permanent right or right-of-way obtained prior to acquisition by the United States, nor do they apply when access is required by any other prevailing provision of law. No compatibility determination is necessary to permit or renew a right-of-way across lands outside the National Wildlife Refuge System and National Fish Hatchery System.

§ 29.14 Preapplication meeting.

Before submitting an application for a new right-of-way permit or a modification of an existing right-of-way permit across lands managed by the Service, a potential applicant must contact the appropriate Regional Director to schedule a preapplication meeting with the Service. Contact information for the Service Regional Offices is available at <https://www.regulations.gov> in Docket No. FWS-HQ-NWRS-2019-0017. There is no fee for the preapplication meeting. During the meeting, the potential applicant may ask questions about the application process, provide information about the scope of the requested right-of-way permit and its location, and receive feedback. The Service will advise the potential applicant about documentation needed to make an application complete and provide the potential applicant with an expected timeline and potential costs to review and process the application.

§ 29.15 General application procedures.

(a) *Preapplication meeting.* To request the preapplication meeting required by § 29.14 for a new right-of-way or a modification of an existing right-of-way, contact the appropriate Service Regional Office, the geographic jurisdictions of which are listed at 50 CFR 2.2. Contact information for the Service Regional Offices is available at <https://www.regulations.gov> in Docket No. FWS-HQ-NWRS-2019-0017.

(b) *Application submission.* Applicants must submit an application that includes the completed form and required attachments as described in § 29.16. The Service will deem a right-of-way application to be complete, and notify the applicant of such, after the Service has determined that the provided information is sufficient for the agency to make a compatibility determination and comply with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). The Service will also notify the applicant if additional information is required for a complete application.

(c) *Payment for cost recovery.* After the Service has determined that an application is complete, the agency will notify the applicant and provide an updated estimate of application processing costs, as set forth at § 29.18(a). The Service will review and process a right-of-way permit application after it has requested and received payment for these costs.

(d) *Providing additional information for permit.* If the Service determines that the requested right-of-way is a compatible use, then the agency will

request additional information from the applicant necessary to draft a right-of-way permit document for applicant review. This includes but is not limited to the survey plat or Global Positioning System (GPS) location information described in § 29.17. The applicant must provide this information in order for the Service to develop the permit.

(e) *No guarantee of right-of-way permit.* Submitting a complete application and payment for application processing costs do not guarantee that the Service will issue or renew a right-of-way permit. Issuance or renewal of a right-of-way permit is contingent on a Service determination that the right-of-way is a compatible use. Permit issuance or renewal is also contingent on the applicant:

(1) Providing the information the Service requires to develop the right-of-way permit;

(2) Agreeing to the permit's terms and conditions; and

(3) Providing payment for use and occupancy of the land as well as for future right-of-way monitoring costs.

§ 29.16 Right-of-way permit application.

(a) *Complete application requirement.* The Service will not begin processing a right-of-way permit application until after the applicant has submitted a complete application with all required information. See paragraph (e) of this section for submission instructions.

(b) *Application form.* To request a new right-of-way permit, modifications to an existing right-of-way permit, or renewal of an existing right-of-way permit, applicants must submit a complete Standard Form 299, Application for Transportation, Utility Systems, Telecommunications and Facilities on Federal Lands and Property (SF-299), or the applicable common form approved by the General Services Administration at the time of the application, including all materials required in the SF-299 and the regulations in this subpart. The SF-299 must be signed by the applicant or applicant's authorized representative.

(c) *Required application attachments.* In addition to a completed and signed SF-299, an application for a right-of-way permit must include the attachments described in this section.

(1) *Map(s).* The map(s) must show a general view of the proposed right-of-way and a detailed view of the proposed project area in relation to the Service unit boundary. If the proposed right-of-way is within a Public Land Survey System area, the map(s) must show the section(s), township(s), and range(s) within which the proposed right-of-way

would be located. The maps must identify:

(i) The area proposed to be included in the right-of-way permit, including the placement of proposed infrastructure; and

(ii) Proposed access points and routes (including uses of existing roads), and other areas associated with the requested right-of-way.

(2) *Preliminary site and facility construction plans.* These plans, which are listed as an attachment to SF-299, are required for applications for rights-of-way or renewals of rights-of-way where construction is required. The plans must show all proposed construction work and include a list of equipment to be used in construction and a proposed construction timeline.

(3) *Proposed access.* The application must include a description of proposed access routes and means of access for construction and maintenance of the requested right-of-way.

(4) *Supplemental environmental information.* In addition to the basic environmental information on the SF-299, the applicant must provide supplemental information on the environmental impact of the proposed right-of-way that is suitable for the Service to determine whether the proposed use is compatible with the mission of the Refuge System and the purpose(s) of the refuge. This supplemental information may include, but is not limited to, anticipated impacts of the proposed use on air and water quality; scenic and aesthetic features; historic, architectural, archeological, and cultural features; and wildlife, fish, and marine life, including habitat connectivity and migratory routes. The supplemental information also may describe proposed design measures that will minimize or avoid resource impacts. The Service will review the provided supplemental environmental information to determine what additional information, if any, the agency requires from the applicant to determine whether the proposed use is compatible with the mission of the Refuge System and the purpose(s) of the refuge.

(d) *Other required documents.* During the preapplication meeting or in a subsequent communication, the Service will inform the applicant when the agency requires the following information and other information to prepare a right-of-way permit, which the applicant must provide before the Service may issue a right-of-way permit.

(1) *Survey plat and legal description.* See § 29.17 for requirements.

(2) *Detailed environmental analysis.* To comply with the National

Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an environmental assessment or environmental impact statement must be prepared in accordance with section 102(2)(C) of the National Environmental Policy Act and comply with the requirements of the Migratory Bird Treaty Act of 1918 (16 U.S.C. 703–712), the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*), the Wilderness Act of 1964 (16 U.S.C. 1131 *et seq.*), the Wild and Scenic Rivers Act of 1968 (16 U.S.C. 1271 *et seq.*), and the National Historic Preservation Act of 1966 (54 U.S.C. 300101 *et seq.*). The environmental assessment or environmental impact statement may be prepared by the Service, another Federal agency, the applicant, or the applicant's contractor; however, in all cases, this documentation must be prepared in consultation with the Regional Director.

(i) If the environmental assessment or environmental impact statement will be prepared by the Service or another Federal agency, rather than the applicant or the applicant's contractor, the applicant must provide sufficient data to enable the Service or the other agency to satisfy the requirements in this paragraph (d)(2) and reimburse the Service for its costs as described in § 29.18.

(ii) For renewals of existing rights-of-way permitted that involve no changes to the permitted use, the environmental analysis need address only the impacts, including the cumulative effects, of the ongoing operation and maintenance of the right-of-way. The environmental analysis must also address any statutory requirements not in place when the original permit was issued and therefore not previously considered.

(3) *Proposed vegetation management plan.* A proposed vegetation management plan is required for a requested right-of-way permit or permit renewal where there will be disturbance of vegetation resulting from the construction, operation, or maintenance of the right-of-way. The plan must be prepared in consultation with the Regional Director's designee and must describe:

(i) Vegetation clearing that may occur as part of structural construction, maintenance, and removal.

(ii) Routine vegetation management that may occur, including a description of all physical and mechanical methods that will be used, how equipment will be cleaned before and after entry to the right-of-way, and how the spread of nonnative species by equipment and activities will be minimized.

(iii) Any pesticides, herbicides, or other chemicals proposed for use, as

well as the actions the applicant will take to minimize the adverse impacts of pesticides, herbicides, and other chemicals on native species including pollinators present in or adjacent to the right-of-way.

(iv) Any revegetation and restoration activities, including how the applicant will incorporate regionally appropriate native seeds and plants, particularly those that provide breeding, feeding, and sheltering habitat for native species present in the area, including but not limited to native pollinators.

(4) *Financial assurance and liability insurance.* As appropriate to the proposed right-of-way, the Service may require proof of acceptable financial assurance and liability insurance.

(e) *Submission instructions.*

Applicants may submit applications for rights-of-way through electronic filing or certified mail.

(1) *Electronic filing.* Applications submitted through electronic filing (E-file) must include a digital copy of the SF-299, the map(s), the preliminary site and facility construction plans, and the supplemental environmental information, as well as any other attachments that the Regional Director requires for application processing. The Service may provide additional instructions at the preapplication meeting.

(2) *Certified mail.* Application submissions through certified mail must include one printed copy of the SF-299, the map(s), the preliminary site and facility construction plans, and the supplemental environmental information, as well as any other attachments that the Regional Director requires for application processing. Applicants must send all documents by certified mail to the Regional Director for the region where the proposed right-of-way is located. Addresses for the Service Regional Offices are provided at 50 CFR 2.2. Mailing envelopes should be clearly marked "Attn: NWRS Realty Right-of-Way Permit Processing."

§ 29.17 Survey plat and legal description.

(a) Before the Service will issue or renew a right-of-way permit, the applicant must provide a final survey plat and legal description that shows and describes the right-of-way in such detail that the Service can accurately locate the right-of-way on the ground.

(b) Survey plats and legal descriptions of the right-of-way area must be stamped and signed by a licensed professional land surveyor or other professional licensed or authorized by the State to carry out land-surveying activities.

(1) Survey plats must meet the following standards:

(i) Survey plats must be geodetically referenced to the current State or national datum. In some cases, new geodetic control points will need to be set within or near the right-of-way area.

(ii) Survey plats must show ties to the monuments marking the boundaries of the Service-owned land that the right-of-way would affect, or from which those boundaries are calculated. In cases such as road construction that involve allowing full control of the right-of-way area, a boundary survey is required.

(iii) The points where the right-of-way enters and leaves Service land must be annotated on the survey with distance ties to the nearest boundary monuments.

(iv) For a linear strip right-of-way, the courses and distances of the center line and the width of the right-of-way on each side of the center line must be annotated.

(v) If the right-of-way or site is located wholly within Service land, a minimum of two ties to boundary corners or geodetic control points that can be readily recovered must be shown.

(vi) Survey plats must show the existing or proposed facilities in sufficient detail that an average person can determine the nature and extent of the proposed use.

(vii) Survey plats must include all uses of Service-managed land required as part of the right-of-way, including access roads.

(viii) Survey plats must show the location of any other right-of-way areas in the vicinity.

(ix) Survey plats must show major natural or cultural features such as roads, rivers, fences, etc., required for orientation and intelligent interpretation.

(x) The acreage contained within the right-of-way area must be shown.

(xi) Letter-sized plats are preferred, but larger format plats, such as the right-of-way plan sets prepared for highway and utility projects, are acceptable if they meet the other requirements.

(xii) A digital version of the plat in AutoCAD, ArcGIS, or similar format must be submitted along with a signed paper or document prepared in Adobe Acrobat or similar process.

(2) The legal description must:

(i) Be in metes-and-bounds, aliquot parts, or linear strip format;

(ii) Conform to and reference the survey plat;

(iii) Be tied to the controlling monuments shown on the plat;

(iv) Reference the geodetic coordinates of the point of beginning or point of commencement, and have a

clearly documented basis of bearing; and

(v) For linear corridor projects, use a "strip description" format, based on a geometrically defined centerline. For example: "All that portion of [land unit description] lying within the following described strip of land."

(c) A licensed Service land surveyor may waive the requirement of a survey plat for a proposed right-of-way in a remote location if they determine that the GPS coordinates and supporting location information submitted by the applicant for inclusion in the right-of-way permit are adequate to locate the proposed right-of-way with minimal risk to the United States.

§ 29.18 Reimbursement of costs.

(a) *Application evaluation and processing activities.* (1) Unless reimbursement is waived as provided under paragraph (c) of this section, the applicant for a right-of-way permit must reimburse the United States for the costs the Service incurs in evaluating and processing the application, even if the result of this evaluation is a denial of the application.

(i) These costs may include, but are not limited to, the Service's costs to review the application and related materials, conduct surveys of the proposed permit area, prepare a compatibility determination, obtain an appraisal, draft correspondence, and draft the permit.

(ii) If the applicant or the applicant's contractor will prepare the environmental assessment or environmental impact statement necessary to comply with the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and other applicable laws, then the Service shall require no reimbursement for National Environmental Policy Act compliance with exception to the costs the Service incurs to ensure that the materials meet agency requirements.

(2) If requested by the applicant during or after the required preapplication meeting, the Regional Director will provide the applicant a preliminary estimate of the Service's application evaluation and processing costs using the information provided by the applicant during or after the preapplication meeting.

(3) After receiving a complete application, the Regional Director will estimate the Service's application evaluation and processing costs using the information the applicant provided in the application and during or after the preapplication meeting.

(4) Unless reimbursement is waived as provided under paragraph (c) of this

section, the applicant must submit a payment to reimburse the Service for its estimated costs before the Service will evaluate and process the right-of-way permit application.

(5) If the Service's cost to evaluate and process the right-of-way application exceeds the estimated amount, the Regional Director will promptly notify the applicant of the deficient amount, and the applicant must submit payment for the deficient amount before the Service will issue a right-of-way permit. The Regional Director will refund any overpayments at the request of the applicant.

(b) *Monitoring activities.* (1) By accepting a permit under this subpart, the permit holder agrees to reimburse the Service for the costs incurred for all monitoring activities, which include monitoring the construction, operation, maintenance, and termination of facilities, to ensure compliance with the terms, conditions, and stipulations of the right-of-way permit.

(2) The Regional Director will estimate the total costs the Service expects to incur for monitoring activities over the permit term using the information the applicant provided in the application and during or after the preapplication meeting.

(3) At the discretion of the Regional Director, the Service may require reimbursement for its estimated monitoring costs in a lump-sum payment before the Service issues a right-of-way permit, or at periodic intervals, not to exceed 5 years, specified in the permit.

(4) When reimbursement for costs for monitoring activities is required at periodic intervals specified in the permit, the Regional Director will review the amount of reimbursement not more than every 5 years after the issuance of the permit. The Regional Director will provide the permit holder with written notice of intent to impose new charges to reflect current monitoring costs commencing with the ensuing charge year. The revised charges will be effective unless the permit holder files an appeal in accordance with § 29.26.

(c) *Waiver of reimbursement for Service costs.* (1) No reimbursement for Service costs for right-of-way application evaluation and processing activities and monitoring activities will be required of:

(i) State or local governments or agencies or related instrumentalities;

(ii) Federal Government agencies; or

(iii) Private individuals or organizations when the proposed right-of-way contributes to the Service's operation or maintenance of the refuge

or fish hatchery as certified in writing by the Regional Director.

(2) Additionally, the Regional Director has the discretion to waive reimbursement for Service costs for right-of-way application evaluation and processing activities and monitoring activities so long as there are appropriated funds for these activities.

(3) When reimbursement for Service costs for monitoring activities is waived during the permit term, the permit will contain a statement to that effect.

(4) Reimbursement of costs is required and cannot be waived for any right-of-way permit issued under section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*).

(d) *Service use of payments received for reimbursement of costs.* Payments received by the Service to reimburse the United States for the costs incurred in evaluating and processing applications, and for monitoring, will be deposited into the United States Treasury until such time that any provision of law allows these payments to supplement the Service's appropriation.

§ 29.19 Nature of interest granted.

(a) Where the land administered by the Service is owned in fee by the United States and the right-of-way is compatible with the objectives of the area, the Service may issue a permit after it is approved in writing by the Regional Director.

(b) For rights-of-way permitted under authority of section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*), for pipelines for the transportation of oil, natural gas, synthetic liquid, or gaseous fuels, or any refined product produced from these substances:

(1) The permit term may not exceed 30 years.

(2) The right-of-way may not exceed 50 feet in width, plus the area occupied by the pipeline and its related facilities, unless the Regional Director finds, and records in writing the reasons for the finding based on the analysis in a compatibility determination, that a wider right-of-way is necessary for operation and maintenance after construction and to protect the environment or public safety. "Related facilities" include but are not limited to valves, pump stations, supporting structures, bridges, monitoring and communication devices, surge and storage tanks, and terminals.

(c) For rights-of-way other than those referred to in paragraph (b) of this section, the permit term may be up to 50 years when the Regional Director deems it appropriate, or a lesser term.

(d) The Service may issue a temporary permit supplementing a right-of-way for additional land needed during construction, operation, maintenance, or termination of the pipeline, or to protect the natural environment or public safety.

(e) Unless otherwise provided, no interest granted shall give the grantee any right whatsoever to remove any material, earth, or stone for construction or other purpose, except that stone or earth necessarily removed from the right-of-way in the construction of a project may be used elsewhere along the same right-of-way in the construction of the same project.

§ 29.20 Terms and conditions.

(a) *Prior rights.* Any right-of-way permit issued will be subject to rights reserved, if any, by a prior owner, and rights held, if any, by a third party.

(b) *Agreement of terms and conditions.* An applicant, by accepting a permit, agrees to such terms and conditions as may be prescribed by the Regional Director, including special stipulations required to ensure the permitted use is compatible with the mission of the Refuge System and the purpose(s) of the refuge. (See § 29.24 for specific requirements for electric powerlines and § 29.25 for specific requirements for oil and gas pipelines.)

(c) *Terms and conditions required for all permit holders.* In addition to any terms and conditions prescribed by the Regional Director, the permit holder must agree to all of the following terms and conditions:

(1) The permit is for the specific use described and may not be construed to authorize any other use within the permit area unless approved in writing by the Regional Director upon determination by the Service project manager that the additional use is a compatible use.

(2) The permit may be amended only by a written instrument signed and executed by the Regional Director and the permit holder.

(3) The permit holder may not transfer or assign the permit to another party without obtaining the Regional Director's prior written approval.

(4) The permit holder may not allow another party to collocate equipment or activities on their infrastructure or right-of-way unless the other party first obtains a right-of-way permit from the Service. Any entity that wants to collocate equipment or activities must apply for its own Service right-of-way permit by following the procedures set forth in § 29.15.

(5) The permit holder is responsible for ensuring that its officers, employees,

representatives, agents, contractors, and subcontractors are familiar with the permit and comply with its terms and conditions.

(6) The permit holder must provide the Service project manager with current contact information (company address, points of contact, telephone numbers, email addresses, etc.) for both routine and emergency communications, and, in the case of corporations, of the address of its principal place of business and the names and addresses of its principal officers.

(7) Authorized representatives of the United States have the right to enter and inspect the permitted area at any time without providing prior notice to the permit holder.

(8) The Regional Director may suspend or terminate all or any portion of the issued permit for failure of the permit holder to comply with any or all of the terms or conditions of the permit, or for abandonment.

(i) A rebuttable presumption of abandonment is raised by deliberate failure of the permit holder to use the permit, for any continuous 2-year period, for the purpose for which the permit was issued or renewed. In the event of noncompliance or abandonment, the Regional Director will notify the permit holder in writing of any intention to suspend or terminate the permit 60 days from the date of the notice and state the reasons, unless prior to that time the holder completes such corrective actions as are specified in the notice. The Regional Director may allow an extension of time within which to complete corrective actions if the Regional Director believes that extenuating circumstances, not within the permit holder's control, such as adverse weather conditions, disturbance to wildlife during breeding periods or periods of peak concentration, or other compelling reasons, warrant an extension.

(ii) Should the holder of a right-of-way permit issued under authority of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*), fail to take corrective action within the 60-day period, the Regional Director will provide for an administrative proceeding, pursuant to 5 U.S.C. 554, prior to a final departmental decision to suspend or terminate the permit. In the case of all other right-of-way permit holders, failure to take corrective action within the 60-day period will result in a determination by the Regional Director to suspend or terminate the permit.

(iii) No administrative proceeding is required in cases in which the permit terminates under its terms.

(9) The permit holder must prevent the disturbance or removal of any public land survey monument or project boundary monument unless and until the permit holder has requested and received from the Regional Director written approval of measures that the permit holder will take to perpetuate the location of the monument.

(10) The permit holder must conduct operations, including by setting their time and location, in a manner that avoids or minimizes impacts to fish and wildlife or their habitats, including, but not limited to, impacts caused by exposure to physical and chemical hazards, disruption of hydrologic processes, lighting and visual disturbance, and duration and frequency of noise.

(11) The permit holder must comply with State and Federal laws and regulations that are applicable to the project within which the permit is issued and to the lands that are included in the right-of-way.

(i) The permit holder must comply with the Archaeological Resources Protection Act (16 U.S.C. 470aa *et seq.*). The disturbance of archaeological or historical sites and the removal of artifacts from Federal land are prohibited.

(ii) The permit holder must comply with the applicable requirements of the Migratory Bird Treaty Act of 1918 (16 U.S.C. 703–712), the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*), the Wilderness Act of 1964 (16 U.S.C. 1131 *et seq.*), the Wild and Scenic Rivers Act of 1968 (16 U.S.C. 1271 *et seq.*), and the National Historic Preservation Act of 1966 (54 U.S.C. 300101 *et seq.*).

(iii) The permit holder must immediately suspend all activities and notify the Service project manager upon the discovery of any threatened or endangered species or archeological, paleontological, or historical resources within or near the permitted area. All natural and cultural resources discovered in the permitted area are the property of the United States.

(12) The permit holder must clear and keep clear the lands within the permit area to the extent and in the manner directed by the Service project manager in charge; and to dispose of all vegetative and other material cut, uprooted, or otherwise accumulated during the construction and maintenance of the project so as to decrease the fire hazard and also in accordance with any instructions that the Service project manager specifies.

(13) The permit holder must do everything reasonably within the permit holder's power, both independently and

on request of any duly authorized representative of the United States, to prevent and suppress fires on or near the permitted area, including making available such construction and maintenance resources that are reasonably obtainable for the suppression of such fires.

(14) After the expiration or termination of the permit, the permit holder must remove all facilities and equipment from the permitted area and restore the permitted area to its pre-permit condition as directed and approved by the Service project manager. Any facilities or equipment not removed within 6 months, unless more time is deemed necessary for conservation purposes by the Regional Director, will be deemed abandoned and will be disposed of in accordance with applicable Federal law. In that event, the permit holder will be liable to the Service for all of its costs in disposing of the facilities or equipment and restoring the permitted area.

(15) In accordance with applicable Federal law, in the construction, operation, and maintenance of the project, the permit holder will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin and must require an identical provision to be included in all subcontracts.

(16) The permit holder must pay the United States the full value for all damages to the lands or other property of the United States caused by the permit holder or that person's employees, contractors, or agents of the contractors.

(i) In cases in which the permit is issued to a State or other governmental agency that has no legal power to assume such a liability with respect to damages caused to lands or property, that agency will repair all such damages.

(ii) In cases in which the permit involves lands that are under the exclusive jurisdiction of the United States, the permit holder or his or her employees, contractors, or agents of the contractors will be liable to third parties for injuries incurred in connection with the permit area.

(17) The permit holder will indemnify and hold harmless the United States and its officers, employees, agents, and representatives from and against all liability of any sort whatsoever arising out of the permit holder's activities under the permit. This agreement to indemnify and hold harmless from and against all liability includes liability under Federal or State environmental laws, including but not limited to the

Comprehensive Environmental Response, Compensation, and Restoration Act, as amended (42 U.S.C. chapter 103); the Resource Conservation and Recovery Act, as amended (42 U.S.C. 6901 *et seq.*); and what is commonly known as the Clean Water Act, as amended (33 U.S.C. 1251–1387). This agreement to indemnify and hold harmless will survive the permit's termination or expiration.

(18) The Regional Director may require permit modifications at any future date to ensure that the permitted use is compatible with the Refuge System mission and the purpose(s) of the refuge. Required permit modifications could include but are not limited to changes to permit conditions and/or additional stipulations that a Regional Director deems necessary based on new information.

(d) *Terms and conditions required of most permit holders.* The permit holder must also agree to the following terms and conditions, which are required unless the Regional Director determines they are not relevant to the proposed use:

(1) The permit holder may not restrict public access to any portion of the permitted area unless the Service project manager concurs in writing that making the area accessible to the public would pose a threat to public safety or the environment.

(2) The permit holder must notify the Service project manager in writing at least 5 business days before conducting any maintenance or nonemergency repair work within the permitted area. The written notice must describe the location of the proposed work, the equipment to be used, and the size of work crews anticipated to be working on Service land. The Service project manager may require an onsite meeting before any maintenance or nonemergency repair work commences and may assign a site monitor to be present during such work. Except in emergencies, all work in the permitted area must be conducted during normal business hours. To respond to an emergency, the permit holder may enter the permitted area at other times to conduct repair work after calling the Service project manager.

(3) The permit holder must erect and maintain appropriate warning signs, barricades, or other warning devices during all periods when the permit holder is using the permitted area, including periods of maintenance or repair.

(4) The permit holder must rebuild and repair such roads, fences, structures, and trails as may be

destroyed or injured by construction work.

(5) Notwithstanding the issuance of the permit, the Service may establish trails, roads, or other improvements across, over, on, or through the permitted area for use by the Service, by visitors, or by others.

(6) Upon request by the Regional Director, the permit holder must build and maintain necessary and suitable crossings for all roads and trails that intersect the works constructed, maintained, or operated under the right-of-way.

(7) The permit holder must take any soil and resource conservation and protection measures, including weed control, on the land covered by the permit that the Service project manager in charge requests.

(8) The permit holder must provide for habitat connectivity on the land covered by the permit to the maximum extent possible, for example through use of wildlife-friendly fencing, perches or perch deterrents for birds, fish-passable culverts, vegetative screening or hiding cover, that the Service project manager in charge requests.

(9) The permit holder must promptly notify the Service project manager in charge of the amount of merchantable timber, if any, that will be cut, removed, or destroyed in the construction and maintenance of the project, and to pay the United States in advance of construction such sum of money that the project manager determines to be the full stumpage value of the timber to be cut, removed, or destroyed.

(10) Issuance of the permit is subject to the express condition that the exercise of the permit will not unduly interfere with the management, administration, or disposal by the United States of the land to be affected. The permit holder agrees and consents to the occupancy and use by the United States, or its grantees, permittees, or lessees, of any part of the permit area not actually occupied for the purpose of the permitted rights to the extent that the use does not unreasonably interfere with the permit holder's use of the permitted area.

(11) Any facility constructed on the permit area will be modified or adapted, if modification is found by the Regional Director to be necessary, without liability or expense to the United States, so that the facility will not conflict with the use and occupancy of the land for any authorized works that may be constructed on the land under the authority of the United States. The modification will be planned and scheduled so as not to interfere unduly with or to have minimal effect upon

continuity of energy and delivery requirements for Service facilities.

(e) *General liability insurance.* The Service may require the permit holder to procure and maintain in force and effect during the term of the permit commercial general liability insurance to protect against claims arising out of the acts or omissions of the permit holder or its officers, employees, agents, or representatives while conducting the activities authorized by the permit. The insurance policy must also provide coverage for discharges or escapes of pollutants or contaminants into the environment, including sudden or accidental discharges or escapes. The Regional Director will determine the minimum amount of coverage per occurrence and in the aggregate. The policy must be issued by a company duly licensed to do business in the State where the project is located and must name the United States of America as an additional insured. Before the Regional Director executes the permit, the applicant must provide the Service with a copy of its certificate of insurance showing the required coverage.

(f) *Bonds.* The Service may require a bond for a permit when the Regional Director determines that the Service is likely to incur reclamation costs during or after the term of the right-of-way due to the construction, operation, or maintenance of the right-of-way. The Service also may require a bond for a permit when the Service is likely to incur reclamation costs if the right-of-way is abandoned or terminated.

(1) No bond will be required of a Federal, State, or local government or its agent or instrumentality, except those that are:

(i) Using the facility, system, space, or any part of the right-of-way area for commercial purposes; or

(ii) A municipal utility or cooperative whose principal source of revenue is customer charges.

(2) When the Service requires a bond, the permit holder must agree to the following terms and conditions: Before the permit's effective date, the permit holder must file with the Service a performance bond payable to the Service, issued by a surety satisfactory to the Service, to guarantee its compliance with all terms and conditions of the permit and with all applicable laws and regulations. The Regional Director will determine the amount of the bond and with whom it must be filed.

(g) *Communications facilities.* If the permit is for a communications facility as defined by the Mobile Now Act (47 U.S.C. 1455(d)(1)), and the permit holder will operate or maintain wireless

communications equipment, then they must also agree to the following terms and conditions. These terms and conditions are not applicable to neutral host providers, sometimes referred to as tower companies, that own and maintain tower or support structures but do not operate or maintain wireless communications equipment on those structures.

(1) The permit holder agrees that use of wireless communications equipment is contingent upon the possession of a valid Federal Communications Commission (FCC) or National Telecommunications and Information Administration (NTIA) authorization/license (if required), and the operation of the equipment is in strict compliance with applicable requirements of FCC or NTIA. A copy of each applicable license or authorization must be maintained at all times by the permit holder for each transmitter being operated. The permit holder must provide the Service project manager, when requested, with current copies of all licenses for equipment in or on facilities covered by the permit.

(2) The permit holder must, at the permit holder's sole cost and expense, take all necessary actions to comply with all applicable FCC radio frequency (RF) exposure regulations and requirements, and take reasonable precautions so that neither workers nor the public are subject to RF exposures above the FCC specific levels.

(3) The permit holder agrees that the provisions of 18 U.S.C. 431 (contracts by Member of Congress) and 41 U.S.C. 6306 (prohibition on Members of Congress making contracts with the Federal Government) apply to the permit, as if set forth in full.

§ 29.21 Construction.

(a) If construction is not commenced within 2 years after the date of the right-of-way grant, the right-of-way may be canceled by the Director of the U.S. Fish and Wildlife Service.

(b) Upon completion of construction, the applicant shall file a certification of completion with the Regional Director.

§ 29.22 Disposal, transfer, or termination of interest.

(a) *Change in jurisdiction over and disposal of lands.* The final disposal by the United States of any tract of land traversed by a right-of-way shall not be construed to be a revocation of the right-of-way in whole or in part, but such final disposition shall be deemed and taken to be subject to such right-of-way unless it has been specifically canceled.

(b) *Transfer of permit.* Any proposed transfer, by assignment, lease, operating agreement or otherwise, of a permit

must be filed with the Regional Director and must be supported by a stipulation that the transferee agrees to comply with and be bound by the terms and conditions of the original permit. A \$100 nonrefundable service fee must accompany the proposal. No transfer will occur unless and until approved in writing by the Regional Director.

(c) *Disposal of property on termination of right-of-way.* In the absence of any agreement to the contrary:

(1) The holder of the right-of-way must, within 6 months after termination of the right-of-way, remove all property or improvements placed there by the holder, other than a road and usable improvements to a road.

(2) After 6 months, all property and improvements in the right-of-way area become the property of the United States.

(3) The Regional Director may use discretion to extend this timeframe.

§ 29.23 Required payment for use and occupancy of National Wildlife Refuge System land.

(a) Payment for use and occupancy of lands under the regulations of this subpart is required for the fair market value or fair market rental value as determined by the Regional Director using any method approved by the Department of the Interior to determine those values.

(1) At the discretion of the Regional Director, the payment may be a fair market rental payment, paid annually, or a lump-sum payment, made before permit issuance.

(2) If any Federal, State, or local agency is exempt from payment under any other provision of Federal law, the agency must inform the Service of the applicable Federal law during the preapplication meeting required by § 29.14. The agency must also otherwise compensate the Service by any other means acceptable to the Regional Director, including, but not limited to, making other land available or loaning of equipment or personnel, except that any such compensation must relate to, and be consistent with, the mission of the National Wildlife Refuge System. For agencies exempted from payment by law, the Regional Director may waive the requirement for other compensation upon finding this requirement to be impracticable or unnecessary.

(b) The terms of the permit will specify the amount of the lump sum paid by the applicant for use and occupancy during the current permit term, or, if applicable, the initial annual rental payment amount for use and occupancy of the permitted area.

(c) When annual rental payments are used, the Regional Director will periodically review and adjust the charges to reflect fair market value. The Regional Director will provide the permit holder with written notice of intent to impose new charges to reflect fair market value commencing with the ensuing charge year. The revised charges will be effective unless the permit holder files an appeal in accordance with § 29.26.

(d) Payments received by the Service for use and occupancy of rights-of-way on Refuge lands and interests in land will be deposited into the Migratory Bird Conservation Fund to carry out the land-acquisition provisions of the Migratory Bird Conservation Act (16 U.S.C. 715 *et seq.*) and the Migratory Bird Hunting Stamp Act (16 U.S.C. 718 *et seq.*). Payments received for use and occupancy of rights-of-way on other Service-managed lands and interests in land will be deposited into the National Wildlife Refuge Fund, to make payments annually to counties and other units of local government in accordance with regulations in 50 CFR part 34.

§ 29.24 Electric power transmission line rights-of-way.

By accepting a right-of-way for a power transmission line, the applicant thereby agrees and consents to comply with and be bound by the following terms and conditions, except those which the Secretary may waive in a particular case, in addition to those specified in § 29.20.

(a) To protect in a workmanlike manner, at crossings and at places in proximity to the transmission lines on the right-of-way authorized, in accordance with the rules prescribed in the National Electric Safety Code, all Government and other telephone, telegraph, and power transmission lines from contact and all highways and railroads from obstruction and to maintain the transmission lines in such manner as not to menace life or property.

(b) Neither the privilege nor the right to occupy or use the lands for the purpose authorized shall relieve the applicant of any legal liability for causing inductive or conductive interference between any project transmission line or other project works constructed, operated, or maintained by the applicant on the servient lands, and any radio installation, telephone line, or other communication facilities now or hereafter constructed and operated by the United States or any agency thereof.

§ 29.25 Rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid, or gaseous fuels, or any refined product produced from these substances.

(a) *Application procedure.* (1) Applications for pipelines and related facilities under this section are to be filed in accordance with § 29.15 with the following exception: When the right-of-way or proposed facility will occupy Federal land under the control of more than one Federal agency or more than one bureau or office of the Department of the Interior, a single application must be filed with the appropriate State Director of the Bureau of Land Management in accordance with regulations in 43 CFR part 2800.

(2) Any portion of the facility occupying land of the National Wildlife Refuge System is subject to the provisions of the regulations in this part.

(b) *Right-of-way permits.* Right-of-way permits issued under this section are subject to the special requirements of section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*). Gathering lines and associated structures used solely in the production of oil and gas under valid leases on the lands administered by the Service are excepted from the provisions of this section.

(1) *Pipeline safety.* Right-of-way permits issued under this section will include requirements that will protect the safety of workers and protect the public from sudden ruptures and slow degradation of the pipeline. An applicant must agree to design, construct, and operate all proposed facilities in accordance with the provisions of 49 CFR part 192 or 195 and in accordance with the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 *et seq.*) and any future amendments to that act.

(2) *Environmental protection.* An application for a right-of-way must contain environmental information required by § 29.16(c)(4). The applicant must also provide a plan of construction, operation, and rehabilitation of the proposed facilities. In addition to terms and conditions imposed under § 29.20, the Regional Director will impose any stipulations required to ensure:

(i) Restoration, revegetation, and curtailment of erosion of the surface;

(ii) That activities in connection with the right-of-way or permit will not violate applicable air- and water-quality standards in related facilities siting standards established by law;

(iii) Control or prevention of damage to the environment, including damage to fish and wildlife habitat, public or

private property, and public health and safety; and

(iv) Protection of the interests of individuals living in the general area of the right-of-way who rely on the fish, wildlife, and biotic resources of the area for subsistence purposes.

(c) *Disclosure.* Applicants that are a partnership, corporation, association, or other business entity must disclose the identity of all participants. Such disclosure will include where applicable:

(1) The name and address of each partner;

(2) The name and address of each shareholder owning 3 percent or more of the shares, together with the number and percentage of any class of voting shares that the shareholder is authorized for voting purposes; and

(3) The name and address of each affiliate of the entity, together with, in the case of an affiliate controlled by the entity, the number of shares and the percentage of any class of voting stock of that affiliate owned, directly or indirectly, by that entity, and in the case of an affiliate that controls the entity, the number of shares and the percentage of any class of voting stock of the entity owned, directly or indirectly, by the affiliate.

(d) *Technical and financial capability.* The Regional Director may require a financial statement and will issue or renew a right-of-way permit under this section only when satisfied that the applicant has the technical and financial capability to construct, operate, maintain, and terminate the facility.

(e) *Reimbursement of costs.* (1) In accordance with § 29.18, the holder of a right-of-way permit must reimburse the Service for the cost incurred in monitoring the construction, operation, maintenance, and termination of any pipeline or related facilities as determined by the Regional Director.

(2) Payments received by the Service to reimburse the United States for the costs incurred in monitoring the construction, operation, maintenance, and termination of any pipeline or related facilities will be deposited into the United States Treasury until such time that any provision of law allows these payments to supplement the Service's appropriation.

(f) *Public hearing.* The Regional Director will give notice to Federal, State, and local government agencies and the public of the opportunity to comment on right-of-way applications under this section. A notice will be published in the **Federal Register**, and a public hearing may be held where appropriate.

(g) *Bonding.* Where appropriate, the Regional Director will require the holder of a right-of-way permit to furnish a bond or other satisfactory financial assurance to secure all or any of the obligations imposed by the terms and conditions of the right-of-way permit or by any rule or regulation, not to exceed the period of construction plus 1 year or a longer period if necessary for the pipeline to stabilize or for any reclamation or restoration requirements to be met.

(h) *Suspension of right-of-way.* If the project manager determines that an immediate temporary suspension of activities within a right-of-way permit area is necessary to protect public health and safety or the environment, the project manager may issue an emergency suspension order to abate such activities prior to an administrative proceeding. The Regional Director must make a determination and notify the permit holder in writing within 15 days from the date of suspension as to whether the suspension should continue and list actions needed to terminate the suspension. The suspension will remain in effect for only so long as an emergency condition continues.

(i) *Joint use of rights-of-way.* Each right-of-way permit will reserve to the Regional Director the right to issue additional right-of-way permits for compatible uses on or adjacent to permitted rights-of-way areas after giving notice to the permit holder and an opportunity to comment.

(j) *Common carriers.* Pipelines and related facilities used for the transportation of oil, natural gas, synthetic liquid, or gaseous fuels, or any refined product made from these substances will be constructed, operated, and maintained as common carriers.

(1) The owners or operators of pipelines subject to the regulations in this subpart will accept, convey, transport, or purchase without discrimination all oil or gas delivered to the pipeline without regard to whether such oil or gas was produced on Federal or non-Federal lands.

(2) In the case of oil or gas produced from Federal lands or from the resources on the Federal lands in the vicinity of the pipelines, the Secretary may, after a full hearing following due notice to the interested parties and a proper finding of facts, determine the proportionate amounts to be accepted, conveyed, transported, or purchased.

(3) The common carrier provisions of this section will not apply to any natural gas pipeline operated by any person subject to regulation under the

Natural Gas Act (15 U.S.C. ch. 15B, sec. 717 *et seq.*) or by any public utility subject to regulation by a State or municipal regulatory agency having jurisdiction to regulate the rates and charges for the sale of natural gas to consumers within the State or municipality.

(4) The owners or operators of pipelines will purchase, without discrimination, any natural gas produced in the vicinity of the pipeline that is offered for sale unless that natural gas is subject to State regulatory or conservation laws governing its purchase by owners or operators of pipelines.

(k) *Required information.* The Regional Director will require, prior to issuing or renewing a right-of-way permit, that the applicant submit and disclose all plans, contracts, agreements, or other information or material that the Regional Director deems necessary to determine whether to issue or renew the right-of-way permit or the terms and conditions that should be included in the permit. That information may include, but is not limited to:

(1) Conditions for and agreements among owners or operators regarding the addition of pumping facilities, looping, or otherwise increasing the pipeline or terminal's throughput capacity in response to actual or anticipated increases in demand;

(2) Conditions for adding or abandoning intake, offtake, or storage points or facilities; and

(3) Minimum shipment or purchase tenders.

(l) *State standards.* The Regional Director will take into consideration, and to the extent practical comply with, applicable State standards for right-of-way construction, operation, and maintenance, taking into account any additional standards necessary to protect refuge resources.

(m) *Congressional notification.* The Secretary will promptly notify the Committee on Natural Resources of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate upon receipt of an application for a right-of-way for pipeline 24 inches or more in diameter, and no right-of-way permit for such a pipeline will be issued until a notice of intention to permit the right-of-way, together with the Secretary's detailed findings as to the terms and conditions the Secretary proposes to impose, has been submitted to those committees.

§ 29.26 Hearing and appeals procedures.

(a) *Application for a right-of-way.* When denial of an application for a

right-of-way permit is based on a determination that the proposed use is not compatible with the purposes for which the area was established, the denial may be appealed to the Regional Director and subsequently to the Director, but no further.

(b) *Existing authorized right-of-way.* The termination of an existing authorized right-of-way permit may be appealed to the Regional Director and subsequently to the Director and then further appealed to the Secretary.

(c) *Grant of a requested right-of-way.* A party with standing may appeal the Service's decision to issue a requested right-of-way permit to the Regional Director, subsequently to the Director, and finally to the Secretary.

(d) *Appeals to the Secretary.* Appeals to the Secretary must follow the applicable regulations in 43 CFR part 4.

§ 29.27 Severability.

If a court holds any provisions of the regulations in this subpart or their

applicability to any person or circumstance invalid, the remainder of the regulations in this subpart and their applicability to other people or circumstances will not be affected.

Shannon Estenoz,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4333-15-P

Proposed Rules

Federal Register

Vol. 89, No. 238

Wednesday, December 11, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

[Docket No. OP–1828]

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Chapter III

RIN 3064–ZA39

Regulatory Publication and Review Under the Economic Growth and Regulatory Paperwork Reduction Act of 1996

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury; Board of Governors of the Federal Reserve System (Board); Federal Deposit Insurance Corporation (FDIC).

ACTION: Regulatory review; request for comments.

SUMMARY: Pursuant to the Economic Growth and Regulatory Paperwork Reduction Act of 1996 (EGRPRA), the OCC, Board, and FDIC (collectively, the agencies) are reviewing agency regulations to identify outdated or otherwise unnecessary regulatory requirements on insured depository institutions and their holding companies. Over approximately two years, the agencies will publish four **Federal Register** documents requesting comment on multiple categories of regulations. This third **Federal Register** document requests comment on regulations in the categories of Rules of Procedure; Safety and Soundness; and Securities.

DATES: Written comments must be received no later than March 11, 2025.

ADDRESSES: Comments should be directed to:

OCC: Commenters are encouraged to submit comments through the Federal eRulemaking Portal. Please use the title “Regulatory Publication and Review Under the Economic Growth and Regulatory Paperwork Reduction Act of 1996” to facilitate the organization and distribution of the comments. You may submit comments by any of the following methods:

- *Federal eRulemaking Portal—Regulations.gov:*

Go to <https://regulations.gov/>. Enter “Docket ID OCC–2023–0016” in the Search Box and click “Search.” Public comments can be submitted via the “Comment” box below the displayed document information or by clicking on the document title and then clicking the “Comment” box on the top-left side of the screen. For help with submitting effective comments, please click on “Commenter’s Checklist.” For assistance with the *Regulations.gov* site, please call 1–866–498–2945 (toll free) Monday–Friday, 9 a.m.–5 p.m. eastern time (ET), or email regulationshelpdesk@gsa.gov.

- *Mail:* Chief Counsel’s Office, Attention: Comment Processing, Office of the Comptroller of the Currency, 400 7th Street SW, Suite 3E–218, Washington, DC 20219.

- *Hand Delivery/Courier:* 400 7th Street SW, Suite 3E–218, Washington, DC 20219.

Instructions: You must include “OCC” as the agency name and “Docket ID OCC–2023–0016” in your comment. In general, the OCC will enter all comments received into the docket and publish the comments on the *Regulations.gov* website without change, including any business or personal information provided such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

You may review comments and other related materials that pertain to this action by the following method:

- *Viewing Comments Electronically—Regulations.gov:*

Go to <https://regulations.gov/>. Enter “Docket ID OCC–2023–0016” in the

Search Box and click “Search.” Click on the “Dockets” tab and then the document’s title. After clicking the document’s title, click the “Browse All Comments” tab. Comments can be viewed and filtered by clicking on the “Sort By” drop-down on the right side of the screen or the “Refine Comments Results” options on the left side of the screen. Supporting materials can be viewed by clicking on the “Browse Documents” tab. Click on the “Sort By” drop-down on the right side of the screen or the “Refine Results” options on the left side of the screen checking the “Supporting & Related Material” checkbox. For assistance with the *Regulations.gov* site, please call 1–866–498–2945 (toll free) Monday–Friday, 9 a.m.–5 p.m. ET, or email regulationshelpdesk@gsa.gov.

The docket may be viewed after the close of the comment period in the same manner as during the comment period.

Board: You may submit comments, identified by Docket No. OP–1828 by any of the following methods:

- *Agency Website:* <https://www.federalreserve.gov>. Follow the instructions for submitting comments at <https://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm>.

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments.

- *Email:* regs.comments@federalreserve.gov. Include the docket number in the subject line of the message.

- *Fax:* 202–452–3819 or 202–452–3102.

- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

Public Inspection: In general, all public comments will be made available on the Board’s website at www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm as submitted, and will not be modified to remove confidential, contact or any identifiable information. Public comments may also be viewed electronically or in paper in Room M–4365A, 2001 C Street NW, Washington, DC 20551, between 9 a.m. and 5 p.m. during Federal business weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments by calling (202) 452–3684. Upon arrival,

visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments. For users of TTY-TRS, please call 711 from any telephone, anywhere in the United States.

FDIC: Interested parties are invited to submit written comments, identified by RIN 3064-ZA39, by any of the following methods:

- **Agency Website:** <https://www.fdic.gov/resources/regulations/federal-register-publications/>. Follow instructions for submitting comments on the FDIC's website.

- **Email:** comments@FDIC.gov. Include "EGRPRA" in the subject line of the message.

- **Mail:** James P. Sheesley, Assistant Executive Secretary, Attention: Comments—RIN 3064-ZA39, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.

- **Hand Delivery:** Comments may be hand-delivered to the guard station at the rear of the 550 17th Street NW building (located on F Street NW) on business days between 7 a.m. and 5 p.m. ET.

Public Inspection: Comments received, including any personal information provided, may be posted without change to <https://www.fdic.gov/resources/regulations/federal-register-publications/>. Commenters should submit only information that the commenter wishes to make available publicly. The FDIC may review, redact, or refrain from posting all or any portion of any comment that it may deem to be inappropriate for publication, such as irrelevant or obscene material. The FDIC may post only a single representative example of identical or substantially identical comments, and in such cases will generally identify the number of identical or substantially identical comments represented by the posted example. All comments that have been redacted, as well as those that have not been posted, that contain comments on the merits of this document will be retained in the public comment file and will be considered as required under all applicable laws. All comments may be accessible under the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT:

OCC: Allison Hester-Haddad, Special Counsel, Daniel Amodio, Counsel, or John Cooper, Counsel, Chief Counsel's Office (202) 649-5490, Office of the Comptroller of the Currency, 400 7th Street SW, Washington, DC 20219. If you are deaf, hard of hearing, or have a speech disability, please dial 7-1-1 to access telecommunications relay services.

Board: Katie Ballintine, Assistant Director, (202) 452-2555, and Colton Hamming, Financial Institution Policy Analyst III, (202) 452-3932, Division of Supervision and Regulation; Mandie Aubrey, Senior Counsel, (202) 452-2595, Division of Consumer and Community Affairs; Dafina Stewart, Deputy Associate General Counsel, (202) 452-2677, David Cohen, Counsel, (202) 452-5259, and Vivien Lee, Attorney, (202) 452-2029, Legal Division, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551. For users of TTY-TRS, please call 711 from any telephone, anywhere in the United States.

FDIC: Karen J. Currie, Chief, Policy & Program Development Section, (202) 898-3981, Division of Risk Management Supervision; or William Piervincenzi, Supervisory Counsel, (202) 898-6957, Legal Division.

I. Introduction

Section 2222 of EGRPRA¹ requires that not less frequently than once every 10 years, the Federal Financial Institutions Examination Council (FFIEC)² and the agencies³ conduct a review of their regulations to identify outdated or otherwise unnecessary regulatory requirements imposed on insured depository institutions. In conducting this review, the FFIEC or the agencies will (a) categorize their regulations by type and (b) at regular intervals, provide notice and solicit public comment on categories of regulations, requesting commenters to identify areas of regulations that are outdated, unnecessary, or unduly burdensome.⁴

¹ 12 U.S.C. 3311.

² The FFIEC is an interagency body empowered to prescribe uniform principles, standards, and report forms for the Federal examination of financial institutions and to make recommendations to promote uniformity in the supervision of financial institutions. The FFIEC does not issue regulations that impose burden on financial institutions and, therefore, we have not separately captioned the FFIEC in this document.

³ The FFIEC is comprised of the OCC, Board, FDIC, National Credit Union Administration (NCUA), Consumer Financial Protection Bureau (CFPB), and State Liaison Committee. Of these, only the OCC, Board, and FDIC are statutorily required to undertake the EGRPRA review. The NCUA elected to participate in the first and second EGRPRA reviews, and the NCUA Board again has elected to participate in this review process.

Consistent with its approach during the first and second EGRPRA reviews, the NCUA will separately issue documents and requests for comment on its rules. The CFPB is required to review its significant rules and publish a report of its review no later than five years after they take effect. See 12 U.S.C. 5512(d). This process is separate from the EGRPRA process.

⁴ Insured depository institutions are also subject to regulations that are not reviewed under the

EGRPRA also requires the FFIEC or the agencies to publish in the **Federal Register** a summary of the comments received, identifying significant issues raised and commenting on those issues. It also directs the agencies to eliminate unnecessary regulations, as appropriate. Finally, the statute requires the FFIEC to submit a report to Congress that summarizes any significant issues raised in the public comments and the relative merits of those issues. The report also must include an analysis of whether the agencies are able to address the regulatory burdens associated with such issues or whether those burdens must be addressed by legislative action.

II. The EGRPRA Review's Targeted Focus

The EGRPRA regulatory review provides an opportunity for the public and the agencies to evaluate groups of related regulations and to identify opportunities for burden reduction.⁵ For example, the EGRPRA review may facilitate the identification of statutes and regulations that share similar goals or complementary methods where one or more agencies could eliminate the overlapping regulatory requirements. Alternatively, commenters may identify regulations or statutes that impose requirements that are no longer consistent with current business practices and may warrant revision or elimination.

The EGRPRA review also provides the agencies and the public with an opportunity to consider how to reduce the impact of regulations on community banks or their holding companies. The agencies are aware of the role that these institutions play in providing consumers and businesses across the nation with essential financial services and access to credit. The agencies are especially concerned about the impact of requirements on these smaller institutions. The agencies understand that when a new regulation is issued or a current regulation amended, smaller institutions may have to devote a significant amount of their resources to determine if and how the regulation will affect them. Through the public comment process, the EGRPRA review can help the agencies identify and target

EGRPRA process because they were not prescribed by the agencies. Examples include rules for which rulemaking authority was transferred to the CFPB and anti-money laundering regulations issued by the Department of the Treasury's Financial Crimes Enforcement Network, among others. If, during the EGRPRA process, the agencies receive a comment about a regulation that is not subject to the EGRPRA review, we will forward that comment to the appropriate agency.

⁵ See *supra* note 1.

regulatory changes to reduce impacts on those smaller institutions.

Burden reduction must be compatible with consumer protection and the safety and soundness of insured depository institutions, their affiliates, and the financial system as a whole. Burden reduction also must be consistent with the agencies' statutory mandates, many of which require the issuance of regulations. EGRPRA recognizes that effective burden reduction may require statutory changes. Accordingly, as part of this review, the agencies specifically ask the public to comment on the relationship among burden reduction, regulatory requirements, policy objectives, and statutory mandates. The agencies also seek quantitative data about the impact of rules, where available.

The agencies note that they must consider regulatory burden each time an agency proposes, adopts, or amends a rule. For example, under the Paperwork Reduction Act of 1995⁶ and the Regulatory Flexibility Act,⁷ the agencies assess each rulemaking with respect to the burdens the rule might impose. The agencies also invite the public to comment on proposed rules as required by the Administrative Procedure Act.⁸

III. The EGRPRA Review Process

Taken together for purposes of the EGRPRA review process, the agencies' regulations covering insured depository institutions encompass more than 100 subjects.⁹ Consistent with the EGRPRA statute and past practice, the agencies have grouped these regulations into the following 12 categories listed in alphabetical order: Applications and Reporting; Banking Operations; Capital; Community Reinvestment Act; Consumer Protection;¹⁰ Directors, Officers and Employees; International Operations; Money Laundering; Powers and Activities; Rules of Procedure; Safety and Soundness; and Securities. These categories were used during the prior EGRPRA reviews. The agencies determined the categories by sorting the regulations by type and sought to have

no category be too large or broad. These categories remain useful for the review, and the agencies have not modified the categories for purposes of this review.

To carry out the EGRPRA review, the agencies plan to publish four **Federal Register** documents with each addressing one or more categories of rules. Each **Federal Register** document will have a 90-day comment period. On February 6, 2024, the agencies published the first document, addressing the following categories of regulations: Applications and Reporting; Powers and Activities; and International Operations.¹¹ On August 1, 2024, the agencies published a second document, addressing Consumer Protection; Directors, Officers and Employees; and Money Laundering.¹² Today the agencies are publishing the third document addressing the categories of Rules of Procedure; Safety and Soundness; and Securities. The agencies invite the public to identify outdated, unnecessary, or unduly burdensome regulatory requirements imposed on insured depository institutions and their holding companies in these three categories.

To assist the public's understanding of how the agencies have organized the EGRPRA review, the agencies have prepared a chart that lists the categories of regulations for which the agencies are requesting comments. The chart's left column divides the categories into specific subject-matter areas. The headings at the top of the chart identify the types of institutions affected by the regulations.

The agencies will review the comments received and determine whether further action is appropriate with respect to the regulations. The agencies will consult and coordinate with each other and expect generally to make this determination jointly, as appropriate, in the case of rules that have been issued on an interagency basis. Similarly, as appropriate, the agencies will coordinate to amend or repeal those rules on an interagency basis. For rules issued by a single agency, the issuing agency will review the comments received and independently determine whether amendments to or repeal of its rules are appropriate.

Further, as part of the EGRPRA review, the agencies are holding a series of public outreach meetings to provide an opportunity for bankers, consumer and community groups, and other interested parties to present their views directly to senior management and staff

of the agencies. More information about the outreach meetings can be found on the agencies' EGRPRA website, <https://egrpra.ffiec.gov>.

IV. Request for Comments on Regulations in the Rules of Procedure, Safety and Soundness, and Securities Categories

The agencies are requesting comment on regulations in the Rules of Procedure; Safety and Soundness; and Securities categories to identify outdated, unnecessary, or unduly burdensome requirements imposed on insured depository institutions and their holding companies. The agencies will solicit comment on all rules finalized by the agencies before the publication of the last EGRPRA document in the series. In addition to comments on regulations in these categories generally, the agencies are requesting comments on certain specific regulations described below within these categories issued since the last EGRPRA review. Where possible, the agencies ask commenters to cite to specific regulatory language or provisions. The agencies also welcome suggested alternative provisions or language in support of a comment, where appropriate. The agencies will consider comments submitted anonymously.

Specific Issues for Commenters To Consider

The agencies specifically invite comment on the following issues as they pertain to the agencies' Rules of Procedure; Safety and Soundness; and Securities rules addressed in this document. The agencies will ask these same questions for each document issued in connection with the EGRPRA process and invite comments on these questions for the categories in the previous EGRPRA documents.

- *Need and purpose of the regulations.*

- *Question 1:* Have there been changes in the financial services industry, consumer behavior, or other circumstances that cause any regulations in these categories to be outdated, unnecessary, or unduly burdensome? If so, please identify the regulations, provide any available quantitative analyses or data, and indicate how the regulations should be amended.

- *Question 2:* Do any of these regulations impose burdens not required by their underlying statutes? If so, please identify the regulations and indicate how they should be amended.

- *Overarching approaches/flexibilities.*

⁶ 44 U.S.C. 3501–3521.

⁷ 5 U.S.C. 610.

⁸ 5 U.S.C. 551–559.

⁹ Consistent with EGRPRA's focus on reducing burden on insured depository institutions, the agencies have not included their internal, organizational, or operational regulations in this review. These regulations impose minimal, if any, burden on insured depository institutions.

¹⁰ The agencies are seeking comment only on consumer protection regulations for which they retain rulemaking authority for insured depository institutions and holding companies under the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376 (2010) (Dodd-Frank Act).

¹¹ 89 FR 8084.

¹² 89 FR 62679.

○ *Question 3:* With respect to the regulations in these categories, could an agency use a different regulatory approach to lessen the burden imposed by the regulations and achieve statutory intent?

○ *Question 4:* Do any of these rules impose unnecessarily inflexible requirements? If so, please identify the regulations and indicate how they should be amended.

- *Cumulative effects.*

○ *Question 5:* Looking at the regulations in a category as a whole, are there any requirements that are redundant, inconsistent, or overlapping in such a way that taken together, impose an unnecessary burden that could potentially be addressed? If so, please identify those regulations, provide any available quantitative analyses or data, and indicate how the regulations should be amended.

○ *Question 6:* Have the agencies issued similar regulations in the same area that should be considered together as bodies of regulation, when assessing the cumulative effects on an insured depository institution or holding company? If so, please identify the regulations, why they should be considered together, and any available analyses or data for the agencies' consideration.

○ *Question 7:* Could any regulations or category of regulation be streamlined or simplified to reduce unduly burdensome or duplicative regulatory requirements?

- *Effect on competition.*

○ *Question 8:* Do any of the regulations in these categories create competitive disadvantages for one part of the financial services industry compared to another or for one type of insured depository institution compared to another? If so, please identify the regulations and indicate how they should be amended.

- *Reporting, recordkeeping, and disclosure requirements.*

○ *Question 9:* Do any of the regulations in these categories impose outdated, unnecessary, or unduly burdensome reporting, recordkeeping, or disclosure requirements on insured depository institutions or their holding companies?

○ *Question 10:* Could an insured depository institution or its holding company fulfill any of these requirements through new technologies (if they are not already permitted to do so) and experience a burden reduction? If so, please identify the regulations and indicate how they should be amended.

- *Unique characteristics of a type of institution.*

○ *Question 11:* Do any of the regulations in these categories impose requirements that are unwarranted by the unique characteristics of a particular type of insured depository institution or holding company? If so, please identify the regulations and indicate how they should be amended.

- *Clarity.*

○ *Question 12:* Are the regulations in these categories clear and easy to understand?

○ *Question 13:* Are there specific regulations for which clarification is needed? If so, please identify the regulations and indicate how they should be amended.

- *Impact to community banks and other small, insured depository institutions.*

○ *Question 14:* Are there regulations in these categories that impose outdated, unnecessary, or unduly burdensome requirements on a substantial number of community banks, their holding companies, or other small, insured depository institutions or holding companies?

○ *Question 15:* Have the agencies issued regulations pursuant to a common statute that, as applied by the agencies, create redundancies or impose inconsistent requirements?

○ *Question 16:* Should any of these regulations issued pursuant to a common statute be amended or repealed to minimize this impact? If so, please identify the regulations and indicate how they should be amended.

○ *Question 17:* Have the effects of any regulations in these categories changed over time that now have a significant economic impact on a substantial number of small, insured depository institutions or holding companies? If so, please identify the regulations and indicate how they should be amended. The agencies seek information on (1) the continued need for the rule; (2) the complexity of the rule; (3) the extent to which the rule overlaps, duplicates or conflicts with other Federal rules, and, to the extent feasible, with State and local governmental rules; and (4) the degree to which technology, economic conditions, or other factors have changed in the area affected by the rule.

- *Scope of rules.*

○ *Question 18:* Is the scope of each rule in these categories consistent with the intent of the underlying statute(s)?

○ *Question 19:* Could the agencies amend the scope of a rule to clarify its applicability or reduce the burden, while remaining faithful to statutory intent? If so, please identify the regulations and indicate how they should be amended.

Specific Interagency Regulations Issued Since the Last EGRPRA Review

- *Rules of Practice and Procedure:* On December 28, 2023, the agencies along with NCUA published updated rules of practice and procedure, including both joint uniform rules and agency-specific local rules, to govern administrative proceedings.¹³ The updated rules are effective as of April 1, 2024. The new rules recognize the use of electronic communications in administrative hearings and make various technical and conforming changes to increase the efficiency and fairness of administrative adjudications. The rules also apply 12 CFR part 19 to Federal savings associations and remove the current administrative practice and procedure-related rules for Federal savings associations. The agencies jointly amended the uniform rules, and the OCC, Federal Reserve, and FDIC also amended their local rules.

- *Appraisals for Higher-Priced Mortgage Loans Exemption Threshold:* The OCC, FRB, and CFPB finalized amendments to the official interpretations for their regulations that implement section 129H of the Truth in Lending Act (TILA). Section 129H of TILA establishes special appraisal requirements for “higher-risk mortgages,” termed “higher-priced mortgage loans” or “HPMLs” in the agencies’ regulations.¹⁴ The agencies amended the regulations to adjust the related Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) exemption threshold for certain loan types, effective January 1, 2024. The OCC joined other agencies in issuing corresponding regulations for each year between 2014 and 2022.¹⁵

- *Real Estate Appraisals:* The agencies adopted a final rule to amend their regulations requiring appraisals of real estate for certain transactions. The final rule increases the threshold level at or below which appraisals are not required for commercial real estate transactions from \$250,000 to \$500,000.¹⁶ The final rule defines a commercial real estate transaction as a real estate-related financial transaction that is not secured by a single 1-to-4 family residential property. It excludes all transactions secured by a single 1-to-4 family residential property, and, thus, construction loans secured by a single 1-

¹³ 88 FR 89820 (Dec. 28, 2023).

¹⁴ 88 FR 83311 (Nov. 29, 2023).

¹⁵ 87 FR 63663 (Oct. 20, 2022); 86 FR 67843 (Nov. 30, 2021); 85 FR 79385 (Dec. 10, 2020); 84 FR 58013 (Oct. 30, 2019); 83 FR 59272 (Nov. 23, 2018); 82 FR 51973 (Nov. 9, 2017); 81 FR 86250 (Nov. 30, 2016); 80 FR 73943 (Nov. 27, 2015); 79 FR 78296 (Dec. 30, 2014).

¹⁶ 83 FR 15019 (April 9, 2018).

to-4 family residential property are excluded. For commercial real estate transactions exempted from the appraisal requirement as a result of the revised threshold, regulated institutions must obtain an evaluation of the real property collateral that is consistent with safe and sound banking practices.

- *Real Estate Appraisals:* The agencies adopted a final rule to amend the agencies' regulations requiring appraisals of real estate for certain transactions. The final rule increases the threshold level at or below which appraisals are not required for residential real estate transactions from \$250,000 to \$400,000.¹⁷ The final rule defines a residential real estate transaction as a real estate-related financial transaction that is secured by a single 1-to-4 family residential property. For residential real estate transactions exempted from the appraisal requirement as a result of the revised threshold, regulated institutions must obtain an evaluation of the real property collateral that is consistent with safe and sound banking practices. The final rule makes a conforming change to add to the list of exempt transactions those transactions secured by residential property in rural areas that have been exempted from the agencies' appraisal requirement pursuant to the Economic Growth, Regulatory Relief, and Consumer Protection Act. The final rule requires evaluations for these exempt transactions. The final rule also amends the agencies' appraisal regulations to require regulated institutions to subject appraisals for federally related transactions to appropriate review for compliance with the Uniform Standards of Professional Appraisal Practice.

- *Net Stable Funding Ratio:* The agencies adopted a final rule to implement a stable funding requirement, known as the net stable funding ratio (NSFR), for certain large banking organizations. The final rule established a quantitative metric, the NSFR, to measure the stability of the funding profile of certain large banking organizations and requires these banking organizations to maintain minimum amounts of stable funding to support their assets, commitments, and derivatives exposures over a one-year time horizon. The final rule applied to certain large U.S. depository institution holding companies, depository institutions, and U.S. intermediate holding companies of foreign banking organizations, each with total consolidated assets of \$100 billion or more, together with certain depository

institution subsidiaries (together, covered companies). The final rule also amended certain definitions in the agencies' liquidity coverage ratio rule that are also applicable to the NSFR.¹⁸

Specific OCC Regulations Issued Since the Last EGRPA Review

- *National Bank and Federal Savings Association Payment System Memberships:* In December 2020, the OCC adopted a rule addressing national bank and Federal savings association membership in payment systems.¹⁹ The rule includes a notice requirement and safety and soundness reviews.

- *Permissible Derivatives Activities for National Banks:* In December 2020, the OCC adopted a rule governing permissible derivative activities for national banks.²⁰ The rule delineates the types of derivative activities that are permissible and includes notice and safety and soundness requirements.

- *Collective Investment Funds:* In January 2017, the OCC amended 12 CFR 9.18(b)(1) to require that a national bank make a copy of the investment fund plan available to the public either at its main office or on its website.²¹ The rule also permits a national bank to satisfy the requirement to provide a copy of the plan to any person who requests it by providing it in either written or electronic form. The OCC amended 12 CFR 9.18(c)(2) to increase the asset threshold for mini-funds to \$1,500,000, with an annual adjustment for inflation. In March 2020, the OCC revised the OCC's short-term investment fund rule (STIF Rule) for national banks acting in a fiduciary capacity.²² The OCC amended the rule to add a reservation of authority provision that addresses the rule's limits on weighted average portfolio maturity, weighted average portfolio life maturity, and the method for determining those limits. In August 2020, the OCC issued a rule to codify the standard withdrawal period for a collective investment fund and to provide that a national bank that requires a prior notice period for withdrawals generally must withdraw an account within the prior notice period or, if permissible under the collective investment fund's written plan, within one year after prior notice was required.²³ The rule also creates a limited exception that allows a national bank, with OCC approval, to withdraw an account from the collective

investment fund up to one year beyond the standard withdrawal period, with opportunities for further extensions, provided that certain conditions are satisfied.

- *Municipal Securities Dealers:* In March 2014, the OCC updated its headquarters mailing address.²⁴ In January 2017, the OCC codified an existing requirement for Federal savings associations that act as municipal securities dealers to file certain forms with the OCC. The OCC also made minor technical changes to 12 CFR part 10.²⁵

- *Securities Exchange Act Disclosure Rules:* In January 2017, the OCC adopted a rule designed to update certain relevant existing rules in accordance with a review of the EGRPA.²⁶ The rule treats Federal savings associations similar to national banks under the rule with regard to their periodic reporting obligations under the Exchange Act. In addition, the updates permit the electronic filing of periodic reporting requirements, and provide the ability to make technical, non-substantive edits and clarifications.

- *Recordkeeping and Confirmation Requirements for Securities Transactions (National Banks):* In January 2017, the OCC adopted a rule designed to update certain relevant existing rules in accordance with a review of the EGRPA.²⁷ The rule clarifies that national banks may use a third-party service provider for recordkeeping and storage. The rule also aligns customer notification requirements for national banks and Federal savings associations and allows for the use of electronic communications. In October 2018, the OCC and FDIC adopted a rule to shorten the standard settlement cycle for securities purchased or sold by national banks.²⁸ The rule requires banks to settle most securities transactions within the number of business days followed by registered broker dealers in the United States.

- *Recordkeeping and Confirmation Requirements for Securities Transactions (Federal Savings Associations):* In January 2017, the OCC adopted a rule designed to update certain relevant existing rules in accordance with a review of the EGRPA.²⁹ The rule treats Federal savings associations the same as national banks by reducing records

maintenance and storage requirements. The rule also reduces the frequency of statements that must be sent to a customer when a Federal savings association receives remuneration from any source. In October 2018, the OCC and FDIC adopted a rule to shorten the standard settlement cycle for securities purchased or sold by Federal savings associations.³⁰ The rule requires Federal savings associations to settle most securities transactions within the number of business days followed by registered broker dealers in the United States.

- *Securities Offering Disclosure Rules:* In January 2017, the OCC made amendments to 12 CFR part 16 as part of the EGRPRA process to integrate Federal savings associations into 12 CFR part 16 and delete former 12 CFR part 197, which previously applied to the securities activities of Federal savings associations.³¹ These amendments also took provisions from former 12 CFR part 197 pertaining to electronic filings and adapted them in 12 CFR part 16 to enable electronic filings under the latter. The OCC made further technical amendments in July 2020 regarding the form and content of registration statements and requests for interpretative advice and no-objection letters.³²

- *Applications for Stay or Review of Disciplinary Actions Imposed by Registered Clearing Agencies:* As part of the OCC's reorganization of the 12 CFR part 19 local rules, 12 CFR 19.135, "Applications for stay or review of disciplinary actions imposed by registered clearing agencies," was redesignated as 12 CFR 19.121(d). There was no change to the substance of the provision.

- *Securities and Borrowings:* The OCC has made minor revisions regarding provisions relating to Federal savings association securities and borrowing several times. The OCC removed certain provisions in 2015 as part of the integration of national bank and Federal savings association rules.³³ The OCC made technical and conforming edits in 2019 and 2020.³⁴

- *Federal Savings Association Financial Management Policies:* In

January 2017, as a result of the previous EGRPRA review, OCC revised its regulations for Federal savings associations for financial derivatives to clarify the rule.³⁵

- *Recovery Planning Guidelines:* In 2016, the OCC published enforceable standards for insured national banks, Federal savings associations, and Federal branches of foreign banks with \$50 billion or more in average total consolidated assets.³⁶ In 2018, the OCC increased this threshold to \$250 billion or more.³⁷ In 2024, the OCC adjusted the threshold to \$100 billion or more, incorporated a testing standard, and clarified the role of non-financial (operational and strategic) risk in recovery planning.³⁸ The guidelines provide a comprehensive framework for evaluating the financial effects of severe stress that may affect a covered institution and options it may take to remain viable under such stress. The OCC also made technical changes to 12 CFR part 30 when it issued these guidelines.

- *Voluntary Liquidation:* The OCC integrated the provisions related to national bank and Federal savings association voluntary liquidation.³⁹ The OCC made minor updates to this regulation in January 2017,⁴⁰ as part of the previous EGRPRA review, and December 2020.⁴¹

- *Other Real Estate Owned:* The OCC integrated its regulations for national banks and Federal savings associations.⁴²

- *Legal Lending Limits:* The OCC revised 12 CFR part 32 to make technical conforming amendments to certain definitions and provisions to make 12 CFR part 32 consistent with the capital framework,⁴³ integration of Federal savings associations into OCC regulations relating to policies and procedures,⁴⁴ implementation of the current expected credit losses methodology (CECL),⁴⁵ the community bank leverage ratio framework,⁴⁶ and the standardized approach for counterparty credit risk (SA-CCR).⁴⁷ In addition, the OCC revised 12 CFR part 32 to conform with and clarify

applicability of certain limits in Call Report instructions.⁴⁸

- *Affiliates Transactions:* As part of the previous EGRPRA review, the OCC integrated its regulations and added provisions for national banks and Federal savings association to request exemptions.⁴⁹

- *Federal Savings Association Financial Management Policies:* In response to the last EGRPRA review, the OCC revised its regulations for Federal savings associations for financial derivatives to clarify the rule.⁵⁰

Specific Board Regulations Issued Since the Last EGRPRA Review

- *Financial Market Utilities:* The Board issued a final rule amending the requirements relating to operational risk management in the Board's Regulation HH, which applies to certain financial market utilities (FMUs) that have been designated as systemically important (designated FMUs) by the Financial Stability Oversight Council (FSOC) under title VIII of the Dodd-Frank Act. The amendments updated, refined, and added specificity to the operational risk management requirements in Regulation HH to reflect changes in the operational risk, technology, and regulatory landscape in which designated FMUs operate. The final rule also required specific incident-notification requirements.⁵¹

- *Enhanced Prudential Standards:* The Board established risk-based categories for determining prudential standards for large U.S. banking organizations and foreign banking organizations, consistent with section 165 of the Dodd-Frank Act, as amended by the Economic Growth, Regulatory Relief, and Consumer Protection Act (EGRRCPA), and with the Home Owners' Loan Act. The rule amended certain prudential standards, including standards relating to liquidity, risk management, and single-counterparty credit limits, to reflect the risk profile of banking organizations under each category; applied prudential standards to certain large savings and loan holding companies using the same categories; and made corresponding changes to reporting forms.⁵²

- *Single-Counterparty Credit Limits:* The Board established single-counterparty credit limits for bank holding companies and foreign banking organizations with \$250 billion or more

in total consolidated assets, including any U.S. intermediate holding company of such a foreign banking organization with \$50 billion or more in total consolidated assets, and any bank holding company identified as a global systemically important bank holding company under the Board's capital rules. The final rule implemented section 165(e) of the Dodd-Frank Act, which requires the Board to impose limits on the amount of credit exposure that such a bank holding company or foreign banking organization can have to an unaffiliated company in order to reduce the risks arising from the company's failure.⁵³

- *Extensions of Credit by Federal Reserve Banks:* The Board revised provisions in its Regulation A regarding the establishment of the primary credit rate in a financial emergency and deleted the provisions relating to the use of credit ratings for collateral for extensions of credit under the former Term Asset-Backed Securities Loan Facility.⁵⁴

- *Qualified Financial Contracts:* The Board issued a rule imposing certain restrictions on firms with respect to qualified financial contracts. The rule applied to global systemically important banking organization and certain subsidiaries.⁵⁵

- *Resolution Plans:* The Board and FDIC issued a rule implementing the resolution planning requirements under Dodd Frank. The rule also established risk-based categories for determining the application of the resolution planning requirement to certain U.S. and foreign banking organizations. The final rule also extended the default resolution plan filing cycle, allowed for more focused resolution plan submissions, and improved certain aspects of the resolution planning rule.⁵⁶

Specific FDIC Regulations Issued Since the Last EGRPRA Review

- *Resolution Plans:* The FDIC issued a rule to require the submission of resolution plans by insured depository institutions (IDIs) with \$100 billion or more in total assets and informational filings by IDIs with at least \$50 billion but less than \$100 billion in total assets. The rule modified the content and timing of full resolution submissions, as well as interim supplements to those submissions provided to the FDIC. The rule also enhanced how the credibility of full resolution submissions will be assessed, expanded expectations

regarding engagement and capabilities testing, and explained expectations regarding the FDIC's review, feedback, and enforcement of IDIs' compliance with the rule.⁵⁷

- *Recordkeeping for Timely Deposit Insurance Determination:* In 2019, the FDIC amended its rules in 12 CFR part 370 to clarify its requirements for recordkeeping for timely deposit insurance determination, to better align the burdens of the rule with the benefits, and to make technical corrections.⁵⁸

- *Recordkeeping Requirements for Qualified Financial Contracts:* The FDIC amended its regulations regarding recordkeeping requirements for qualified financial contracts (QFCs) in 2017 to augment the scope of QFC records required to be maintained by an IDI that is subject to the FDIC's recordkeeping requirements and that has total consolidated assets equal to or greater than \$50 billion or is a consolidated affiliate of a member of a corporate group with one or more members of which are subject to the QFC recordkeeping requirements set forth in the regulations adopted by the Department of the Treasury (a "full scope entity"); for all other IDIs subject to the FDIC's QFC recordkeeping requirements, added and deleted a limited number of data requirements and made certain formatting changes with respect to the QFC recordkeeping requirements; required full scope entities to keep QFC records of certain of their subsidiaries; provided an exemption process; and included certain other changes, including changes that provided additional time for certain IDIs in a troubled condition to comply with the regulations.⁵⁹

- *Limited Exception for a Capped Amount of Reciprocal Deposits from Treatment as Brokered Deposits:* In 2019, the FDIC amended its regulations on brokered deposits and interest rate restrictions to conform with changes to section 29 of the Federal Deposit Insurance Act made by section 202 of the EGRPCA related to reciprocal deposits. The FDIC also made conforming amendments to the FDIC's regulations governing deposit insurance assessments.⁶⁰

- *Unsafe and Unsound Banking Practices Relating to Brokered Deposits and Interest Rate Restrictions:* In 2021, the FDIC revised regulations relating to the brokered deposits and interest rate

restrictions that apply to less than well capitalized IDIs. For brokered deposits, the FDIC issued a rule to establish a new framework for analyzing certain provisions of the "deposit broker" definition, including "facilitating" and "primary purpose." For the interest rate restrictions, the FDIC amended its methodology for calculating the national rate, the national rate cap, and the local market rate cap.⁶¹

- *Registration of Securities Transfer Agents:* The FDIC issued a rule in 2016 to amend its regulations requiring insured State nonmember banks, or subsidiaries of such banks, and insured State savings associations and subsidiaries of such State savings associations, that act as transfer agents for qualifying securities under section 12 of the Securities Exchange Act of 1934 to register with the FDIC. The rule also revised the definition of qualifying securities to reflect statutory changes to the Securities and Exchange Act of 1934.⁶²

V. The Agencies' Review of Regulations Under Section 610 of the Regulatory Flexibility Act (RFA)

Consistent with past practice, the agencies will use the EGRPRA review to satisfy their respective obligations under section 610 of the RFA.⁶³ To that end, for each rule that has a significant impact on a substantial number of small entities issued in the last 10 years, the agencies invite comment on (1) the continued need for the rule; (2) the complexity of the rule; (3) the extent to which the rule overlaps, duplicates or conflicts with other Federal rules, and, to the extent feasible, with State and local governmental rules; and (4) the length of time since the rule has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the rule. The purpose of the

⁶¹ 86 FR 6742 (Jan. 22, 2021).

⁶² 81 FR 27295 (May 6, 2016).

⁶³ Section 610 of the Regulatory Flexibility Act, 5 U.S.C. 610, imposes a continuing obligation on the agencies to review regulations that may have a significant economic impact upon a substantial number of small entities within 10 years after a final rulemaking is published. A subset of the rules the agencies will review under EGRPRA will also be reviewed under the section 610 review criteria. The agencies will indicate which rules are subject to section 610 review. The factors the agencies consider in evaluating a rule under 5 U.S.C. 610 are (1) the continued need for the rule; (2) the nature of complaints or comments received concerning the rule from the public; (3) the complexity of the rule; (4) the extent to which the rule overlaps, duplicates or conflicts with other Federal rules, and, to the extent feasible, with State and local governmental rules; and (5) the length of time since the rule has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the rule.

⁵³ 83 FR 38460 (Aug. 6, 2018).

⁵⁴ 83 FR 21167 (May 9, 2018).

⁵⁵ 82 FR 42882 (Sept. 12, 2017).

⁵⁶ 84 FR 59194 (Nov. 1, 2019).

⁵⁷ 89 FR 56620 (July 9, 2024).

⁵⁸ 84 FR 37020 (July 30, 2019).

⁵⁹ 82 FR 35584 (July 31, 2017).

⁶⁰ 84 FR 1346 (Feb. 4, 2019); 84 FR 15095 (April 15, 2019).

review will be to determine whether such rules should be continued without change, or should be amended or rescinded, consistent with the stated objectives of applicable statutes, to minimize any significant economic

impact of the rules upon a substantial number of such small entities.

The agencies have not identified any rules pertaining to Rules of Procedure; Safety and Soundness; and Securities that would have a significant impact on a substantial number of small entities.⁶⁴ The agencies will consider public

comments submitted through the EGRPRA review process and agency experience to identify regulations where the agencies can reduce burdens that have a significant impact on a substantial number of small, insured depository institutions.⁶⁵

⁶⁴ The FDIC certified that the Unsafe and Unsound Banking Practices Relating to Brokered Deposits and Interest Rate Restrictions rule issued in 2021 would not have a significant economic effect on a substantial number of small entities, after conducting a full Final Regulatory Flexibility

Act analysis. Because some expected effects were hard to assess or accurately quantify, the FDIC published a small entity compliance guide.

⁶⁵ The review will be consistent with the requirements of a Regulatory Flexibility Act, section 610 review. The agencies will determine whether

particular rules should be continued without change, amended, or rescinded, consistent with the objectives of applicable statutes, to minimize any significant economic impact of the rules on a substantial number of small, insured depository institutions.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Chapter II

[Docket No. DOT–OST–2024–0062]

RIN 2105–AF20

Airline Passenger Rights

AGENCY: Office of the Secretary (OST), Department of Transportation (DOT).
ACTION: Advanced notice of proposed rulemaking (ANPRM).

SUMMARY: The U.S. Department of Transportation (Department or DOT) seeks public comment on a rulemaking to ensure consumers experiencing

significant flight disruptions are taken care of and protected from financial losses. Specifically, the Department is considering imposing requirements on airlines to provide affected passengers cash compensation, free rebooking, and amenities such as meals, lodging for overnight delays, and transportation to and from lodging. The Department also seeks comment on whether some protections should be provided during any type of disruption, how to determine whether a cancellation or delay is within an airline’s control, and how to ensure that passengers receive the correct information from the airline in a timely manner. Additionally, the Department solicits comments on how to ensure that the process for passengers to receive compensation and amenities is clear, simple, straightforward, and prompt, and whether to require certain aspects of the process to be automatic. Further, the Department seeks comment on whether it should require airlines to offer free rebooking on the same or partner airline to a passenger with a disability and others in the same travel party when one or more accessibility feature needed by the person with disability is unavailable.

DATES: Comments should be filed by February 10, 2025. Late-filed comments will be considered to the extent practicable.

ADDRESSES: You may file comments identified by the docket number DOT–OST–2024–0062 by any of the following methods:

- *Federal eRulemaking Portal:* go to <https://www.regulations.gov> and follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Ave. SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Ave. SE, Washington, DC, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.
- *Fax:* (202) 493–2251.

Instructions: You must include the agency name and docket number DOT–OST–2024–0062 or the Regulatory Identification Number (RIN 2105–AF20) for the rulemaking at the beginning of your comment. All comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided.

Privacy Act: Anyone is able to search the electronic form of all comments received in any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). For information on DOT’s compliance with

the Privacy Act, please visit <https://www.transportation.gov/privacy>.

Docket: For access to the docket to read background documents and comments received, go to <https://www.regulations.gov> or to the street address listed above. Follow the online instructions for accessing the docket.

SUPPLEMENTARY INFORMATION:

A. Background and Overview of Existing Requirements

The Department's regulation at 14 CFR 259.5 requires U.S. and foreign airlines to have and adhere to a customer service plan that identifies the services that an airline provides to mitigate passenger hardships resulting from flight cancellations and misconnections. Under this regulation, airlines are free to choose the services to provide passengers affected by flight disruptions. In 2022, after an unacceptable level of flight delays and cancellations, the Department carefully reviewed these plans to determine how U.S. airlines were caring for their passengers and found that the airlines' commitments in these plans did not guarantee adequate services even for flight delays and cancellations within the airline's control. However, after a two-year DOT push to improve the passenger experience, today, almost all of the largest U.S. airlines voluntarily commit in their customer service plan to provide services such as meals, lodging, and free rebooking to passengers impacted by cancellations and lengthy delays when airlines are responsible.¹ While the Department had also urged U.S. airlines to voluntarily commit to compensating passengers experiencing significant flight disruptions due to circumstances within the airline's control, no U.S. airline currently guarantees cash compensation, and only

three airlines guarantee compensation in credits or frequent flyer miles for airline-caused delays and cancellations.

The ability of airlines to choose the services that they provide to mitigate passenger inconveniences resulting from flight disruptions under current U.S. law contrasts with consumer protection regimes in other jurisdiction like the European Union (EU) and Canada, where airlines are required to provide compensation and assistance to consumers affected by flight disruptions. In the EU, airlines must provide compensation to consumers facing cancellations or lengthy delays unless the airline proves that the cancellation or delay is "caused by extraordinary circumstances which could not have been avoided even if all reasonable measures had been taken."² Under that regime, airlines must also provide services, including meals, hotels, and ground transportation to and from the hotel (for overnight cancellations and delays) to passengers facing lengthy delays or cancellations and rebooking to passengers whose flights are cancelled, regardless of the cause of the delay or cancellation and whether it is unavoidable by the airline.³ United Kingdom regulations impose similar requirements and also use the "extraordinary circumstances" construct for compensation, with compensation amounts established in pounds.⁴ Current Canadian Air Passenger Protection Regulations (APPRs) require airlines to provide compensation for lengthy delays and cancellations that are controllable by the airline and not required for safety purposes and to provide services,

including meals, overnight accommodations, and ground transportation to and from the hotel (for overnight cancellations and delays), to passengers for lengthy delays and cancellations that are controllable by the airline, regardless of whether the controllable delay or cancellation is required for safety.⁵ Brazilian regulations also contain similar protections for air passengers, including a right to compensation, meals, and hotel accommodations for cancellations and lengthy flight delays.⁶

In developing this ANPRM, Department staff met with individuals from the Canadian Transportation Agency (CTA) on June 1, 2023, and the European Commission (EC) on June 12, 2023, to better understand the requirements under those existing regulatory regimes. On July 19, 2023, at the request of the International Air Transport Association (IATA) and Airlines for America (A4A), Department staff met with representatives of those groups to hear their perspective on compensation and assistance to passengers in the event of flight delays and cancellations. On May 10, 2024, at the request of AirHelp, Department staff met with representatives from that organization about its experience filing claims on behalf of passengers with airlines covered by compensation requirements in foreign jurisdictions, including the EU. On September 10, 2024, Department staff attended a panel discussion moderated by the National Consumers League, supported by a grant from AirHelp, and featuring speakers from the Travel Technology Association, U.S. Public Interest Research Group, the White House, and AirHelp, at which those groups discussed this contemplated rulemaking. Senator Edward Markey also gave remarks at that event. All documents submitted to the Department pertaining to these meetings and a summary of the panel discussion have been added to the rulemaking docket.⁷

B. Need for Rulemaking

(1) Data Indicates Controllable Cancellations and Lengthy Flight Delays Affect Millions of Passengers

Cancellations and lengthy flight delays pose significant inconvenience,

¹ All ten of the largest U.S. airlines guarantee meals and rebooking without charge on the ticketed airline, and nine of the 10 guarantee hotel accommodation and ground transportation to and from the hotel for passengers affected by controllable overnight delays and cancellations. Six of the 10 guarantee fee-free rebooking on a partner airline or another airline with which it has an agreement for controllable cancellations and five do so for lengthy, controllable delays. See <https://www.transportation.gov/airconsumer/airline-customer-service-dashboard>.

² See EC No 261/2004, Article 5; see also Joined Cases C–402/07 and C–432/07, *Sturgeon v. Air France*, 2009 E.C.R. I–10923, ¶ 69 (applying EU compensation requirements to delays of three hours or more).

³ See EC No 261/2004, Articles 5.1, 6.1, 8.1; see also European Commission Notice: Interpretative Guidelines on Regulation (EC) No 261/2004 of the European Parliament and of the Council Establishing Common Rules on Compensation and Assistance to Passengers in the Event of Denied Boarding and of Cancellation or Long Delay of Flights and on Council Regulation (EC) No 2027/97 on Air Carrier Liability in the Event of Accidents as Amended by Regulation (EC) No 889/2002 of the European Parliament and of the Council ("EU Interpretive Guidelines") (June 15, 2016) at C 214/13 ("According to the Regulation, the air carrier is obliged to fulfil the obligation of care even when the cancellation of a flight is caused by extraordinary circumstances, that is to say circumstances which could not have been avoided even if all reasonable measures had been taken"), available at [https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:52016XC0615\(01\)](https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:52016XC0615(01)).

⁵ APPRs, ¶¶ 12, 19. Under the Canadian Regulations, airlines must also provide rebooking for cancellations and lengthy delays that are either within or outside the airline's control. See APPRs, ¶¶ 17, 18. As discussed later in this ANPRM, the Canadian Transportation Agency has initiated a consultation to revise the APPRs.

⁶ See ANAC Resolution No. 400 (Dec. 13, 2016).

⁷ Docket available at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>.

stress, and financial cost to impacted passengers. Such delays and cancellations cause passengers to lose time, may disrupt other reservations (such as hotel reservations), and may cause passengers to miss important events.⁸ Flight cancellations, delays, and missed connections occurred in significant numbers as airlines adjusted their operations to meet the post-COVID pandemic air travel demand and have been the subject of a large number of the complaints about airlines that consumers have submitted to the Department since then.⁹

According to flight performance data reported by the largest U.S. carriers to the Department's Bureau of Transportation Statistics (BTS), in calendar year 2022, the carriers combined cancelled 190,038 domestic scheduled passenger flights (approximately 2.7 percent of their total domestic scheduled passenger flights), and over 1.4 million of their domestic scheduled passenger flights (more than 20 percent of their total domestic scheduled passenger flights) were delayed in arriving by 15 minutes or more.¹⁰ Of the more than 1.4 million delayed flights, 85,892 (approximately 6.1 percent) were delayed three hours or more.¹¹

In calendar year 2023, these carriers combined cancelled 93,897 domestic scheduled passenger flights (approximately 1.3 percent of their total domestic scheduled passenger flights).¹² Further, more than 1.4 million of the

carriers' domestic scheduled passenger flights (approximately 20 percent of their total domestic scheduled passenger flights) were delayed 15 minutes or more that year.¹³ Of the more than 1.4 million delayed flights, 95,024 of them were delayed three hours or more, which was approximately 6.8 percent of total flights delayed that year.¹⁴

A significant percentage of the domestic cancellations that air carriers reported to BTS in 2022 and 2023 were reported as "air carrier"-caused and most of the domestic delays of three hours or more that air carriers reported to BTS listed "air carrier" as a cause of the delay. Carriers reported to BTS that 38 percent of their domestic scheduled passenger flight cancellations were "air carrier"-caused in calendar year 2022, and 28 percent of their domestic scheduled passenger flight cancellations were "air carrier"-caused in calendar year 2023.¹⁵ For domestic scheduled passenger flight delays of three hours or more, the carriers reported to BTS that 65 percent of those delays included an "air carrier" cause of delay in 2022, and 62 percent included an "air carrier" cause of delay in 2023.¹⁶ These delay percentages do not include additional delays that were reported by carriers as caused by "late arriving aircraft." Such delays are not reported as "air carrier"-caused even when the reason for the "late arriving aircraft" was within the carrier's control.

In April 2023, the U.S. Government Accountability Office (GAO) published a report describing its examination of controllable cancellations and delays following the initial disruption to air transportation in 2020 due to the global COVID pandemic and documented concerns with the gap in consumer protections available to passengers facing cancellations and lengthy delays.¹⁷ GAO reviewed data from the Department's BTS and concluded that as airlines recovered in 2021 and 2022 "[s]ustained cancellation events, or a series of days where an airline cancelled a large percentage of daily flights, lasted longer and became more common as travel demand increased."¹⁸ GAO

estimated that flight cancellations from July 2021 through April 2022 potentially affected over 15 million passengers, and flight delays during that time period potentially affected over 116 million passengers.¹⁹ The 2023 GAO report also concluded that: "[b]eyond DOT's requirement for airlines to provide cash refunds to passengers for cancelled or significantly changed flights, airline compensation to passengers is generally limited. Airlines are not required to provide accommodations for flight disruptions unless specified in an airline's contract of carriage or customer service plan, although airlines may provide additional accommodations in certain circumstances. As we have previously reported, airline assistance to affected passengers can vary significantly. Flight disruptions, particularly if they are long lasting, can significantly inconvenience passengers."²⁰

The Department's Office of Aviation Consumer Protection investigates large-scale and sustained disruptive events that impact large numbers of passengers to ensure compliance with aviation consumer protection requirements. At times, these investigations can also reveal gaps in protections for aviation consumers, such as the importance for consumers to know whether a cancellation or delay is considered controllable and would entitle them to promised services and amenities. For example, from late December 2022 through early January 2023, Southwest Airlines cancelled 16,900 flights and stranded over two million passengers, reporting most of the cancelled flights to BTS as due to circumstances within the carrier's control.²¹ In July 2024, following a global information technology (IT) systems issue, Delta Air Lines cancelled more than 5,550 flights over a five-day period.²² The

period in 2018, and 42.9 percent more than in the first 4 months of 2019. There were 12.6 percent fewer scheduled flights during the relevant 2022 time period as compared to the same time period in 2019.").

¹⁹ *Id.* at 17.

²⁰ *Id.* at 9.

²¹ In December 2023, the Department assessed a \$140 million civil penalty against Southwest Airlines for numerous violations of consumer protection laws during and after its operational failures between December 2022 through January 2023. The penalty was 30 times larger than any previous DOT penalty for consumer protection violations. The majority of the penalty will go towards compensating future Southwest passengers affected by cancellations or significant delays caused by the airline. See *Southwest Airlines Co.*, DOT Order No. 2023-12-11, Consent Order (Dec. 15, 2023).

²² Bureau of Transportation Statistics, *Arrival Performance by Carrier*, July 19-24, 2024, available at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>.

⁸ See *Airline Passenger Protections: Observations on Flight Delays and Cancellations, and DOT's Efforts to Address Them*, GAO-23-105524 ("2023 GAO Report"), at 22 (Apr. 2023), available at <https://www.gao.gov/assets/gao-23-105524.pdf>.

⁹ Of the 49,958 air travel service complaints that the Department received in calendar year 2021, 13 percent concerned flight problems. See <https://www.transportation.gov/individuals/aviation-consumer-protection/february-2022-air-travel-consumer-report>. Of the 77,656 air travel service complaints that the Department received in calendar year 2022, 32 percent concerned flight problems. See <https://www.transportation.gov/resources/individuals/aviation-consumer-protection/february-2023-air-travel-consumer-report>. While the Department does not have complaint data available for calendar year 2023 because of revisions in how it processes consumer complaints for efficiency, it estimates that it received 88,136 complaints based on receiving 96,853 submissions that year and complaints making up an average of 91 percent of submissions over the past three years. See <https://www.transportation.gov/resources/individuals/aviation-consumer-protection/june-december-2023-and-2023-annual-consumer>. The percentage of complaints that concern flight problems in calendar year 2023 is not known.

¹² *Id.*

¹³ *Id.*

¹⁴ *Id.*

¹⁵ *Id.*

¹⁶ *Id.*

¹⁷ 2023 GAO Report.

¹⁸ See *id.* at 13 ("In the last half of 2021, there were 6.3 percent more sustained cancellation events than during the same time period in 2018, and 12.2 percent more than in 2019, despite 14 percent fewer scheduled flights compared to 2019. In the first 4 months of 2022, the number of sustained cancellation events increased even more substantially, with 56.9 percent more events in this time period compared to the same 4-month time

Department immediately notified U.S. carriers that it considers the flight disruptions resulting from the IT outage to be “controllable” since the issue is a computer outage of the carrier’s equipment and informed carriers that DOT expected the carriers to make good on the commitments that they voluntarily made to customers affected by controllable cancellations and delays. Notably, the Department saw a significant uptick in consumer complaints following each of these events, reflecting significant consumer harm, including financial harm from these controllable cancellations and delays.

(2) Inconsistency in How Airlines Determine Controllable Cancellations and Delays

The Department is exploring in this ANPRM how to determine which delays and cancellations are controllable such that airlines are held responsible for free rebooking, compensation, and payment for services such as meals, lodging, or transportation to and from lodging. Currently, when a flight disruption involves more than one cause, airlines determine whether the event was or was not controllable in different ways. For example, one airline might look at the first cause, another the longest cause, and another may use yet a different method to deem a multi-factor event controllable or not controllable, potentially ignoring factors that were within their control that caused or exacerbated consumer harm.

At the December 2021 meeting of the Department’s Aviation Consumer Protection Advisory Committee (ACPAC), presentations by a representative of the Arizona Attorney General’s Office (AAG) and representatives of A4A, among others, addressed the causes of cancellation and delay when weather is involved. The AAG representative explained that airlines have incentive to blame delays on weather because, when a delay is attributed to weather, the airline would not have to provide vouchers, meals, or hotels, and other amenities, if guaranteed in its customer service plan or contract of carriage for controllable events, and air travelers likely are more understanding about weather delays than delays due to mismanagement or short staffing. Also at that meeting, representatives of A4A explained that a weather event can affect multiple areas of airline planning in a scope and scale unique to each circumstance, including scheduling, flight planning, crew planning, aircraft routing, maintenance planning, gate sequencing, and aircraft and passenger support. One A4A

representative stated that FAA data indicates that 70 percent of all air traffic delays are caused by weather, which in the representative’s view explains why airlines often described weather as the root cause of a delay. The representative asserted that there is no clear demarcation of when a weather event stops being the original or primary factor for a delay associated with a flight or sequence of flights. An additional A4A representative added that some airlines’ contracts of carriage, to the extent they provide for amenities for flight irregularities, exclude delays or cancellations where the cause is outside the airline’s control, such as weather. He said that if weather is the original or primary factor, an airline’s contractual obligation to provide amenities may not apply based on the wording of the contract of carriage.

Section 512 of the FAA Reauthorization Act of 2024 (2024 FAA Act) requires the Department to direct certain air carriers “to establish policies regarding reimbursement for lodging, transportation between such lodging and the airport, and meal costs incurred due to a flight cancellation or significant delay directly attributable to the air carrier.” The statute does not further describe what “directly attributable” to the air carrier means, including when multiple causal factors are involved in a flight disruption. A regulation would be necessary to require air carriers to establish policies under section 512. The regulation could also clarify which cancellations and delays are directly attributable to a carrier.

(3) Challenges Remain for Passengers Seeking Rebooking, Compensation, Notifications, and Services Such as Meals, Lodging, and Transportation to and From Lodging

As previously discussed, current Department regulations do not require an airline to provide compensation, services, notifications of services due, or reimbursements to passengers impacted by cancellations and lengthy delays that are within its control unless the airline voluntarily commits to do so. Many airlines, including foreign airlines, have not made voluntary guarantees in their customer service plans to provide needed services and compensation to their customers affected by controllable cancellations or delays. In addition, airlines that have made enforceable commitments to their customers for controllable flight cancellations and lengthy controllable delays, including those reflected on the Department’s

Airline Customer Service Dashboard,²³ can remove these commitments from their customer service plan at any time. Further, the competition encouraged by the Dashboard has not resulted in any U.S. airline committing to provide cash compensation to passengers for controllable flight cancellations and lengthy controllable flight delays. Also, while many U.S. airlines have committed to providing free rebooking on partner airlines, meals, hotels for passengers affected by overnight cancellations or delays, and transportation to and from the hotel, not all U.S. airlines have, demonstrating a potential need for protections in this area.

In addition, on May 16, 2024, the President signed the 2024 FAA Act into law.²⁴ Section 512 of the 2024 FAA Act requires the Department to “direct all air carriers providing scheduled passenger interstate or intrastate air transportation to establish policies regarding reimbursement for lodging, transportation between such lodging and the airport, and meal costs incurred due to a flight cancellation or significant delay directly attributable to the air carrier.” Before the 2024 FAA Act was passed by Congress, the Executive Office of the President released a Statement of Administration Policy explaining that the Act “include[d] key consumer protection provisions on airline reimbursement for incurred costs due to controllable disruptions . . . that would set a floor that the Department of Transportation could build on as deemed appropriate by the Secretary of Transportation.”²⁵

This ANPRM requests public comment to assist the Department in its consideration of what regulations may be needed to implement the requirements of section 512 of the 2024 FAA Act, ensure that airlines do not engage in unfair or deceptive practices or unfair methods of competition by establishing minimum requirements for when and how airlines must compensate passengers and make relevant reimbursements and services available to them, ensure that these protections are not subject to removal at an airline’s discretion, and ensure passengers are protected from financial loss whether scheduled to be on a domestic or international flight that is cancelled or significantly delayed due to

²³ See <https://www.transportation.gov/airconsumer/airline-customer-service-dashboard>.

²⁴ Public Law 118–63.

²⁵ See Statement of Administration Policy, Senate Substitute Amendment to H.R. 3935—FAA Reauthorization Act of 2024 (May 8, 2024), available at <https://www.whitehouse.gov/wp-content/uploads/2024/05/SAP-SSA-HR3935.pdf>.

circumstances within an airline's control.

The Department is also issuing this ANPRM to assist its consideration of what regulations may be needed to ensure that passengers receive timely notifications of available compensation, rebooking, and services such as meals, lodging, and transportation to and from lodging. Some airlines currently condition service guarantees in their customer service plans on affirmative requests by consumers for those services.²⁶ Many passengers may not know the intricacies of airlines' customer service plan guarantees, and, even when passengers are aware of an airline's commitments, they may not know that a particular cancellation or delay is within the airline's control and so a service is owed.

The Department's ACPAC recently considered the quality and quantity of information on the causes of air carrier delays and cancellations provided to passengers adversely affected by an airline cancellation or delay, focusing on whether it is an unfair or deceptive practice for an air carrier to inform a passenger that a flight is delayed or cancelled due to weather alone when other factors are involved. At the December 2021 ACPAC meeting, a representative of the AAG and representatives of A4A, among others, presented to the ACPAC on the topic. The AAG stated that consumers need accurate information about the reasons for a delay so that they can exercise their rights and make an informed decision about their options at the time and whether to use that airline in the future. Also at that meeting, an A4A representative stated that he did not find withholding information on cause of delay meets the Department's test for unfair or deceptive practices in air transportation. The representative stated that the Department's regulation that requires airlines to provide passengers flight status notification in the event of a known delay, cancellation, or diversion, 14 CFR 259.8, is sufficient to inform consumers of the material information. The representative noted that the current regulation does not require airlines to provide the cause of a flight disruption but addresses material information, such as information that would assist the

passenger in deciding when to go to the airport or when to request a refund or rebooking on another flight. The representative added that some airlines' contracts of carriage, to the extent they provide for amenities for flight irregularities, exclude delays or cancellations where the cause is outside the airline's control, such as weather. He said that if weather is the original or primary factor, an airline's contractual obligation to provide amenities may not apply based on the wording of the contract of carriage. The representative raised concern should airlines be required to provide real-time detailed explanations of all subsidiary factors contributing to the delay that was fundamentally caused by weather, stating that airlines may be compelled to publish unsubstantiated information that the airlines lacked adequate time to confirm, which he believed would be a disservice to consumers.

At the December 2022 ACPAC meeting, the ACPAC deliberated on the topic of information provided to consumers adversely affected by airline delays or cancellations. The ACPAC member representing consumers asked that the ACPAC consider recommending that airlines notify passengers when a service or amenity becomes available due to a controllable delay or controllable cancellation. This member stated that his proposal reflected concern that, without such notifications, passengers would be required to understand an airline's customer service plan or contract of carriage and affirmatively request amenities from the airline. The member representing airlines opposed the recommendation, noting that information about services and amenities is available through the Department's Airline Customer Service Dashboard, and expressed concern about whether an airline would have contact information for the passenger to provide a notification for tickets sold through ticket agents. The member representing consumers responded that the Dashboard is useful to consumers, but some may not know about the Dashboard and those who do would be unsure whether the commitments apply to them because they would not know the cause of the delay or cancellation. After discussion, the ACPAC adopted a recommendation that the Department issue a regulation requiring airlines to notify affected consumers of the availability of services and amenities for controllable delays and cancellations, with the member representing airlines voting against the recommendation.

(4) Harm to Consumers, Including Passengers With Disabilities, When Free Rebooking Is Not Provided

In April 2024, the Department published a final rule, Refunds and Other Consumer Protections, codifying and clarifying its longstanding interpretation that, under 49 U.S.C. 41712, airlines must provide refunds to passengers for flights that are cancelled or significantly changed, regardless of whether the cancellation or change is within the airline's control.²⁷ In August 2024, the Department issued a second final rule, Refunds and Other Consumer Protections (2024 FAA Reauthorization) to implement the refund-related provisions of the 2024 FAA Act.²⁸ These final rules (collectively "Refund Rules") provide, among other things, that passengers are entitled to an automatic refund if their flight is cancelled and they do not accept any alternatives offered. The Refund Rules also provide that passengers are entitled to an automatic refund if they decide not to travel on a changed itinerary when the change results in a flight departing from the origination airport three hours or more for domestic itineraries and six hours or more for international itineraries earlier or later than the original scheduled departure time, or results in the flight departing from a different origination airport or arriving at a different destination airport.²⁹

In addition, under the Department's Refund Rules, an airline must provide an automatic refund to an individual with a disability (and others in that individual's reservation) upon notification that the individual decides not to travel on a changed itinerary because: (1) the individual with a disability is downgraded to a lower class of service that results in one or more accessibility features needed by the individual becoming unavailable, (2) the airline changes the aircraft to a substitute aircraft on which one or more accessibility features needed by the individual are unavailable, or (3) the airline changes the flight to schedule the passenger to travel through one or more connecting airports different from the original itinerary.³⁰

The Department's recent Refund Rules provide important new refund protections for passengers who are negatively impacted by a change in an airline itinerary. Those rules, however, do not require airlines to accommodate

²⁶ See, e.g., American Airlines Customer Service Plan (updated July 19, 2024), available at <https://www.aa.com/i18n/customer-service/support/customer-service-plan.jsp>, and Southwest Airlines Customer Service Plan (revised April 23, 2024), available at <https://www.southwest.com/assets/pdfs/corporate-commitments/customer-service-plan.pdf?clk=7396032> (guaranteeing meals and hotel accommodations "upon request" by the passenger).

²⁹ 14 CFR 260.2 (see definition of *significantly delayed or changed flight* at paragraphs (1) and (2)), 260.6(a).

³⁰ 14 CFR 260.6(b)(1) through (3).

passengers by offering rebooking to meet the passenger's needs, including the accessibility needs of passengers with disabilities. In the rulemaking on Refunds and Other Consumer Protections, the Paralyzed Veterans of America submitted a comment requesting the Department require airlines to "expeditiously locate and offer alternative transportation that meets the specific needs of the passenger with a disability," explaining that a "refund is purposeless if the passenger is stranded."

The Department is using this ANPRM to assist in its assessment of whether it should require airlines to provide rebooking without charge to a passenger when the airline makes a significant change to the passenger's itinerary. This includes an assessment of whether an airline should be required to provide rebooking without charge to a passenger with a disability, and others in the same travel party, when the carrier makes changes that result in the unavailability of an accessibility feature needed by the passenger with a disability or when the carrier makes other significant changes to the itinerary of an individual with a disability, like a change in the origination or destination airport or cancels a flight.

C. Statutory Authority

The Department's rulemaking would be based on several statutory authorities.

(1) *Unfair and Deceptive Practices and Unfair Methods of Competition*

Section 41712 of title 49 of the U.S. Code authorizes the Department to prohibit unfair and deceptive practices and unfair methods of competition by air carriers, foreign air carriers, and ticket agents in air transportation and the sale of air transportation. The Department's rule at 14 CFR 399.79 outlines its policies related to unfair and deceptive practices and defines the terms "unfair" and "deceptive." A practice is "unfair" to consumers if it causes or is likely to cause substantial injury, which is not reasonably avoidable, and the harm is not outweighed by benefits to consumers or competition.³¹ A practice is "deceptive" to consumers if it is likely to mislead a consumer, acting reasonably under the circumstances, with respect to a material matter.³² A matter is material if it is likely to have affected the consumer's conduct or decision with respect to a product or service.³³ Proof

of intent is not necessary to establish unfairness or deception.³⁴ The Department elaborated further on the elements of "unfair" and "deceptive" in a 2022 guidance document.³⁵

The Department may address unfair and deceptive practices under 49 U.S.C. 41712 and 49 U.S.C. 40113(a), which authorizes the Secretary to "take action the Secretary . . . considers necessary to carry out [part A of chapter 49 of the U.S. Code, which contains section 41712], including . . . prescribing regulations, standards, and procedures."

The Department is exploring through this ANPRM whether requirements for services such as rebooking, meals, lodging, and transportation to and from lodging or reimbursements for those services, or compensation are needed to prevent unfair and deceptive practices or unfair methods of competition in the event of cancellations and lengthy delays that are within the airline's control. The Department is also examining whether notifications by airlines to passengers of available services, reimbursements, and compensation when such services are due are necessary to address unfair and deceptive practices. Additionally, the Department is considering whether it may be an unfair or deceptive practice for an airline to fail to provide free rebooking for significant changes, including changes applicable to passengers with disabilities and others in the same travel party when a change in class of service or aircraft affects available accessibility features or a change in airport occurs. Finally, the Department is weighing whether any other unfair methods of competition should be addressed in this rulemaking. If the Department decides to propose regulations declaring a practice unfair or deceptive, then notice and an opportunity to petition the Department for a hearing will be provided in accordance with procedures found in 14 CFR 399.75.

(2) *FAA Reauthorization Act of 2024*

As described previously, section 512 of the 2024 FAA Act requires the Department to "direct all air carriers providing scheduled passenger interstate or intrastate air transportation to establish policies regarding reimbursement for lodging, transportation between such lodging and the airport, and meal costs incurred due to a flight cancellation or significant delay directly attributable to the air carrier." This ANPRM explores how the

Department should implement this statutory requirement.

In addition, section 505 of the 2024 FAA Act requires that certain air carriers must maintain, without charge and available at all times: (1) a customer service telephone line staffed by live agents, (2) a customer chat option that allows for customers to speak to a live agent within a reasonable time, to the greatest extent practicable, or (3) a monitored text messaging number that enables customers to communicate and speak with a live agent directly. Section 505 authorizes DOT to issue such rules as may be necessary to carry out the requirement and provides that airlines must comply with section 505's requirements "without regard to whether the Secretary has promulgated any rules to carry out" section 505. This ANPRM explores whether the Department should propose provisions regarding the manner and timeliness of airline customer service during flight disruptions, whether controllable or not, under this statutory requirement.

(3) *Safe and Adequate Interstate Air Transportation*

This ANPRM also involves topics related to air carriers³⁶ that may involve the Secretary's authority under 49 U.S.C. 41702, which states that "[a]n air carrier shall provide safe and adequate interstate air transportation."³⁷ The Civil Aeronautics Board (CAB), the predecessor to the Department, had the authority to ensure that air carriers provide "safe and adequate service, equipment and facilities" under section 404(a) of the Federal Aviation Act of 1958, which was later codified in 49 U.S.C. 41702.³⁸ The CAB relied on section 404(a) to adopt a regulation that restricted smoking on flights by dividing aircraft cabins into smoking and nonsmoking sections. The CAB reasoned that its authority to require air carriers to provide "adequate service" under section 41702 includes ensuring

³⁶ Pursuant to 49 U.S.C. 40102(a)(2), an "air carrier" means a citizen of the United States undertaking by any means, directly or indirectly, to provide air transportation.

³⁷ Pursuant to 49 U.S.C. 40102(a)(25) "interstate air transportation" means the transportation of passengers or property by aircraft as a common carrier for compensation, or the transportation of mail by aircraft—(A) between a place in—(i) a State, territory, or possession of the United States and a place in the District of Columbia or another State, territory, or possession of the United States; (ii) Hawaii and another place in Hawaii through the airspace over a place outside Hawaii; (iii) the District of Columbia and another place in the District of Columbia; or (iv) a territory or possession of the United States and another place in the same territory or possession; and (B) when any part of the transportation is by aircraft.

³⁸ Codification was effectuated in Public Law 103–272 (enacted July 5, 1994).

³¹ 14 CFR 399.79(b)(1).

³² 14 CFR 399.79(b)(2).

³³ *Id.*

³⁴ 14 CFR 399.79(c).

³⁵ 87 FR 52677 (Aug. 28, 2022).

that the service does not cause passenger discomfort.³⁹ The CAB's regulation and interpretation of "adequate service" was later challenged by a passenger, but the U.S. Court of Appeals for the Fifth Circuit found that "adequate service" referred both to the number of flights provided by an air carrier and the quality of service provided to passengers.⁴⁰

More recently, the Department relied on its authority to provide safe and adequate interstate transportation in section 41702 in its 2016 final rule prohibiting the use of e-cigarettes on-board aircraft.⁴¹ In that final rule, the Department reasoned that it had the authority to rely on the "adequate" prong in section 41702 to ban the use of e-cigarettes. The Department argued that discomfort from e-cigarettes was like the discomfort described by the CAB when it chose to restrict smoking on aircraft in 1973.⁴²

Through this ANPRM, the Department is exploring whether providing rebooking, meals, lodging, and transportation to and from lodging during flight disruptions is necessary to ensure that passengers are provided with adequate interstate transportation. In addition, the Department is exploring whether an airline is failing to provide adequate interstate air transportation when it doesn't offer and, if accepted, provide free rebooking to passengers when there is a significant change to the flight itinerary, including to passengers with disabilities and others in the same travel party when a change in airport, class of service, or aircraft affects available accessibility features.

(4) Air Carrier Access Act

The Department's questions in this ANPRM about rebooking for passengers with disabilities, and individuals in the same travel party, relate to the Department's authority under the Air Carrier Access Act (ACAA), in addition to the other authorities previously discussed.⁴³ The ACAA prohibits discrimination in airline service because of disability by U.S. and foreign air carriers. When it enacted the ACAA,

³⁹ "[T]he extent and depth of passenger discomfort and annoyance from unsegregated and unregulated smoking on aircraft compels the conclusion that service which does not provide for the effective separation of smokers constitutes neither adequate service nor reasonable practice and cannot be permitted under the act." 38 FR 12209 (May 10, 1973).

⁴⁰ See *Diefenthal v. Civil Aeronautics Bd.*, 681 F.2d 1039 (5th Cir. 1982) (adequate service can refer both to the number of flights scheduled as well as the quality of service provided).

⁴¹ 81 FR 11415 (Mar. 4, 2016).

⁴² *Id.* at 11421.

⁴³ 49 U.S.C. 41705.

Congress directed the Department "to promulgate regulations to ensure non-discriminatory treatment of qualified handicapped individuals consistent with safe carriage of all passengers on air carriers."⁴⁴ The Department responded by issuing a final rule that required carriers to provide nondiscriminatory service to individuals with disabilities.⁴⁵ The Department is exploring in this ANPRM whether imposing rebooking requirements on airlines is necessary to ensure individuals with disabilities are not denied reasonable access to air transportation when a change in class of service or aircraft affects available accessibility features or when a change in airport occurs.

(5) Reporting and Recordkeeping

The Department is considering whether to impose any reporting requirements under 49 U.S.C. 41708 or recordkeeping requirements under 49 U.S.C. 41709. Among other things, section 41708(b) authorizes the Secretary to require U.S. and foreign air carriers to file annual, monthly, periodical, and special reports in the form and way prescribed by the Secretary and to provide specific answers to questions on which the Secretary considers information to be necessary. Section 41709 authorizes the Secretary to prescribe the form of records to be kept by an air carrier.

(6) Other Authorities

In carrying out aviation economic programs, the Department is required to consider the factors identified in 49 U.S.C. 40101 as being in the public interest and consistent with public convenience and necessity. Among other things, under 49 U.S.C. 40101(a)(4), the Department is required to consider the availability of a variety of adequate, economic, efficient, and low-priced services without unreasonable discrimination or unfair or deceptive practices as being in the public interest. Under section 40101(a)(9), it is also in the public interest to prevent unfair, deceptive, predatory, or anticompetitive practices in air transportation. The Department is also required by section 40101(a)(12) to consider as being in the public interest encouraging, developing, and maintaining an air transportation system relying on actual and potential competition to provide efficiency, innovation, and low prices.

⁴⁴ Public Law 99-435, sec. 3, 100 Stat. 1080, 1080 (1986).

⁴⁵ 55 FR 8008 (Mar. 6, 1990).

D. Request for Data, Analysis, Views, Recommendations, and Other Comments

(1) Scope

(a) Covered Entities

Which carriers should be covered if DOT were to issue a rule requiring compensation, services such as meals or lodging, or reimbursements for such services when there are controllable cancellations and lengthy, controllable delays? As its primary option, the Department is considering covering certificated carriers, commuter carriers, and foreign air carriers operating to, from, or within the United States, conducting scheduled passenger service with at least one aircraft having a designed seating capacity of 30 or more seats. This would ensure the requirements would apply to substantially all scheduled passenger air traffic to, from, or within the United States.⁴⁶ This coverage would be consistent with the carriers currently required to have a customer service plan under 14 CFR 259.5, which addresses the services airlines voluntarily commit to provide their passengers to mitigate passenger inconveniences resulting from flight cancellations or misconnections.⁴⁷

Alternatively, should the Department exclude from coverage carriers that exclusively provide air transportation with aircraft of a designed seating capacity of 60 seats or less and who are considered small businesses for purposes of the Regulatory Flexibility Act?⁴⁸ Or should any requirements cover all certificated air carriers, commuter air carriers, and foreign air carriers, regardless of size? Rather than excluding only the smallest carriers entirely, should the Department impose less stringent requirements on U.S. carriers who comprise less than 10 percent of the domestic scheduled passenger revenue⁴⁹ or foreign air

⁴⁶ The largest 15 U.S. air carriers accounted for more than 95 percent of domestic scheduled passenger air transportation in 2023. Bureau of Transportation Statistics, *Transtats, T-100 Market Data*, available at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>. Each of these airlines operate an aircraft of 30 or more seats. Bureau of Transportation Statistics, *Part 241 Financial Data, Form B-43*, available at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>.

⁴⁷ See 14 CFR 259.5(b)(14).

⁴⁸ Under the Regulatory Flexibility Act carriers that exclusively provide air transportation with aircraft originally designed to have a maximum passenger capacity of 60 seats or less or a maximum payload capacity of 18,000 pounds or less are small entities. See 14 CFR 399.73.

⁴⁹ Four U.S. carriers, American Airlines, Delta Air Lines, United Airlines, and Southwest Airlines, comprised 10 percent or more of domestic scheduled passenger revenue in 2023, all with over

carriers who have fewer than two million total enplanements to and from the United States?⁵⁰ That approach would be like current Canadian regulations discussed further in the following sections, which impose requirements for flight cancellations and delays, and have modified rebooking and compensation requirements for small carriers based on the number of passengers transported.⁵¹ What, if any, other approaches should the Department consider when determining airline coverage requirements?

The Department also seeks information about whether it may be necessary and appropriate to impose any requirements on ticket agents or indirect air carriers. For example, should the Department require ticket agents or indirect air carriers to notify consumers of available services, reimbursements, or compensation provided by airlines for controllable delays or cancellations or refund the fare to consumers if the ticket agent or indirect air carrier is the merchant of record and the passenger elects to return to his or her origination point after the passenger is delayed at a connecting airport?

(b) Covered Flights

To which flights should any requirements apply? The Department is considering as its primary option applying any requirements to flight itineraries to, from, or within the United States, including itineraries with brief and incidental stopover(s) at a foreign point without a break in the journey.

The Department is considering defining break in journey consistent with the Department's recently issued Refund Rules.⁵² Under those rules, a "break in journey" is any deliberate interruption by a passenger of a journey between a point in the United States

and a point in a foreign country where there is a stopover at a foreign point that is scheduled to exceed 24 hours. If the stopover at a foreign point is 24 hours or less, those rules specify that whether the stop is a break in journey would depend on various factors, such as whether the segment between two foreign points and the segment between a foreign point and the United States were purchased in a single transaction and as a single ticket/itinerary, whether the segment between two foreign points is operated or marketed by a carrier that has no codeshare or interline agreement with the carrier operating or marketing the segment to or from the United States, and whether the stopover at a foreign point involves the passenger picking up checked baggage, leaving the airport, and continuing the next segment after a substantial amount of time.

Should the Department impose requirements on airlines to provide services and compensation to consumers experiencing significant flight disruptions to, from, or within the United States? If so, should those requirements apply to itineraries with brief and incidental stopover(s) at a foreign point without a break in the journey like the Refund Rules? Under that approach, delays or cancellations to flight segments not initiated by the passenger, whether controllable by the airline or not, would not result in a break in journey as only deliberate interruptions by the passenger would constitute a break in journey. The Department solicits comment on whether there is any reason not to cover brief stopovers at a foreign point without a break in the journey. The Department also asks whether there are flight segments or itineraries involving a point in the United States that should be excluded from coverage for any areas being contemplated by this rulemaking. If so, why? Alternatively, should the Department consider establishing a bright line rule on coverage of flights with a break in journey of less than 24 hours rather than relying on a multi-factor test if airlines would be required to promptly offer to provide rebooking and reimbursements? If so, why?

(c) Multiple Entities Involved

Which carrier should bear responsibility for providing compensation or services such as meals or hotels if required during a controllable cancellation or delay when one carrier "sold" the airline ticket (*i.e.*, the merchant of record for the ticket

transaction),⁵³ but the flight is operated by a different carrier? What if the merchant of record is a ticket agent? Which option would be the easiest and clearest for the consumer? Based on comments provided by the American Society of Travel Advisors in the Department's Refund Rule, it is the Department's understanding that the ticket agent's name appears as the merchant of record in five to eight percent of all airline ticket transactions by credit cards facilitated by ticket agents, the majority of which involve group bookings, air-inclusive tour packages, or resale of consolidated fares.⁵⁴

Should the Department consider requiring the merchants of record to be responsible for providing compensation for controllable delays and cancellations? How would the Department account for situations where the merchant of record is a ticket agent with no control on whether a flight is delayed or canceled? The Department requires merchants of record to be responsible for providing required refunds for airline ticket transactions because they have direct visibility of the passengers' payment instruments information and the total amounts paid for the itineraries. Does that rationale apply to compensation?

One option under consideration is for the operating carrier to be responsible for compliance. Would holding the operating carrier responsible ensure that the carrier that is making the operational decisions that affect the flight's performance is accountable? Are there reasons the "marketing carrier" should be responsible? For example, do "marketing carriers" often make planning decisions such as which flights are cancelled? Should responsibility be tied to consumer perception of which carrier is in control? Do consumers associate branded codeshare partners and their marketing partners, for example SkyWest operating as United Express, or Jazz Aviation operating as Air Canada Express, as the same carrier? If the operating carrier were responsible, should the operating carrier be allowed to rely on their marketing codeshare partner to issue compensation to consumers or assist in providing services such as meals or hotels to consumers on their behalf? The

15 percent. No other carrier comprised more than six percent of domestic scheduled passenger revenue. See docket at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>.

⁵⁰ Eighteen foreign carriers exceeded two million total enplanements to and from the United States in 2023. See *id.*

⁵¹ Air Passenger Protection Regulations, SOR/2019-150, ¶¶ 17, 19. Canadian regulations define small carrier to mean any carrier that has not transported a worldwide total of two million passengers or more during each of the two preceding calendar years. *Id.* ¶ 2. The CTA has initiated a consultation to amend its regulations, including improving the rebooking obligations for passengers of small airlines but proposed to continue to apply reduced compensation requirements and less stringent rebooking obligations to small carriers. See Consultation Paper: Proposed Changes to Clarify, Simplify and Strengthen the Air Passenger Protection Regulations at 10, available at https://otc-cta.gc.ca/sites/default/files/consultation_paper_-_july_2023.pdf.

⁵² See 89 FR 32833.

⁵³ A merchant of record means the entity responsible for processing payments for the airfare, as shown in the consumer's financial charge statements such as debit or credit card charge statements.

⁵⁴ See comment at 4, available at <https://www.regulations.gov/comment/DOT-OST-2022-0089-5192>.

Department notes that the assignment of responsibility to the operating carrier would be consistent with carrier responsibility for providing compensation and services under the EU and Canadian regulations.⁵⁵ Please provide any relevant information regarding the EU or Canadian regulations that the Department should consider.

Should the Department consider assigning responsibility differently, such as by assigning joint responsibility to carriers with certain arrangements? If so, under what carrier arrangements would joint responsibility be appropriate for domestic or foreign air carriers, and what would be the appropriate terminology to describe the relationship for which joint responsibility would apply (e.g., fee-for-service arrangements, branded codeshare partnerships, or another terminology)? Should carrier responsibility vary depending on the service, reimbursement, or compensation owed? For example, should the operating carrier be responsible for providing any rebooking, while the marketing carrier bears responsibility for compensation and reimbursements, which the carrier could have more time to provide? Should the Department require joint and several liability in some or all circumstances? Should any special considerations apply to the assignment of responsibility for multi-carrier itineraries? Should the final airline in a multi-carrier itinerary be responsible for any compensation requirements, similar to how airlines have generally handled responsibility for mishandled baggage traveling on multi-carrier itineraries?

(2) Definition of Controllable

The Department is considering defining “controllable” cancellations or delays to be those due in whole or in part to any circumstance within the control of the airline. Under this approach, the requirements of any rule would apply if a delay or cancellation involves any factors or event within the control of the airline, including its operating partner, and their employees, subcontractors, or other persons working on their behalf. This approach is being considered to create a standard that can be applied consistently across carriers. It could also address concerns that were noted by a State AG office at the December 2021 ACPAC public

meeting that airlines may choose to attribute a delay to weather when the delay is also directly attributable to an airline. This approach is also consistent with the requirements of section 512 of the 2024 FAA Act, which instructs the Department to direct air carriers to establish policies for reimbursements for costs of meals, lodging, and transportation to and from that lodging that are due to flight cancellations and significant delays *directly attributable* to the air carrier.

The Department seeks comment on whether this approach for consideration is the most appropriate or whether it should adopt any alternatives. How should the Department treat cancellations or delays with multiple causes, including when some airline cause is involved? The Department’s Bureau of Transportation Statistics (BTS), which requires U.S. carriers that account for at least 0.5 percent of the domestic scheduled-passenger revenues to report monthly on the causes of delayed and cancelled flights, allows multiple causes to be reported for delays but requires one cause to be reported for a cancellation.⁵⁶ Generally, airlines report on the predominant cause of a cancellation when there are multiple causes for a cancellation. As such, instead of treating a delay or cancellation as controllable if any cause is within the airline’s control, should the Department treat a delay or cancellation as controllable only if the predominant cause of the delay or cancellation is within the airline’s control? If so, how should the Department define predominant cause? What effect, if any, would each of those approaches likely have on airline performance?

Also, BTS requires airlines to report on the causes of delayed flights in five broad categories—air carrier, extreme weather, National Aviation System, security, and late arriving aircraft.⁵⁷ Airlines may use the reporting category of “late arriving aircraft” even if the cause of the late arriving aircraft was due to a circumstance within control of the air carrier. How should the Department treat a delay caused by a late arriving aircraft for the purposes of determining which delays are controllable under any rule? Should the Department consider the root cause of any late arriving aircraft for the purposes of determining whether a delay resulting from an aircraft arriving late is controllable? Flight disruptions occurring early in the day can disrupt multiple flights using the same aircraft

downline. If attributing the root cause of a late arriving aircraft is appropriate, should there be a cut-off point at which a root cause should not be considered for down-line delays? “Late arriving aircraft” is not available as a causal category to airlines when reporting causes for cancellations to BTS.⁵⁸ U.S. carriers are required to report causes of cancellations to BTS in four broad categories—air carrier, extreme weather, National Aviation System, and security.⁵⁹

The Department is of the tentative view that it would not be sufficient to define controllable cancellations or delays without providing examples of the delay and cancellation causes that it believes are within the control of the carrier. It is considering basing these examples on a non-exclusive list used by BTS as a guide for the type of occurrences that should be reported as “air carrier delay or cancellation” when U.S. carriers categorize delays and cancellations of domestic scheduled passenger flights and report these delays to BTS. This list is available in the latest comprehensive BTS reporting directive discussing causal reporting dated December 12, 2018.⁶⁰ The BTS reporting categories, which were first developed by the Department in 2002 through notice-and-comment rulemaking, are further explained in reporting directives issued by BTS.⁶¹

Under the December 2018 BTS directive, the following events are considered air carrier-caused, or in other words, due to circumstances within air carrier control: aircraft cleaning, aircraft damage (except bird strikes, lightning/hail damage), airport curfew, awaiting the arrival of connecting passengers or crew, awaiting alcohol test, awaiting gate space, baggage loading, cabin servicing, cargo loading, catering, computer outages involving carrier equipment, crew legality (pilot or attendant rest), damage by hazardous goods, engineering inspection, public health, flight paperwork, fueling, gate congestion, government forms not properly completed (INS, FAA, Agriculture),

⁵⁸ 14 CFR 234.4(h).

⁵⁹ *Id.*

⁶⁰ BTS has clarified that the Department’s list of air carrier caused delays and cancellations developed under 14 CFR 234.4 “should not be considered a complete list.” BTS Technical Reporting Directive #31—On-Time Performance (Dec. 12, 2018) at 27, available at https://www.bts.gov/sites/bts.dot.gov/files/docs/explore-topics-and-geography/topics/airlines-and-airports/224571/technical-directive-no-31-time-2019_1.pdf.

⁶¹ Reporting the Causes of Airline Delays and Cancellations, 67 FR 70535 (Nov. 25, 2002); see, e.g., BTS Technical Reporting Directive #31—On-Time Performance (Dec. 12, 2018).

⁵⁵ See EC No 261/2004, Article 3.5; APPRs ¶ 2; see also Canadian Transportation Agency, Application of the Air Passenger Protection Regulations: A Guide at 7, available at https://otc-cta.gc.ca/sites/default/files/application_of_the_air_passenger_protection_regulations_a_guide.pdf.

⁵⁶ 14 CFR part 234.

⁵⁷ 14 CFR 234.4(i).

ground equipment out of service, hot brakes restriction, last minute passenger, late mail from post office, late crew, lavatory servicing, maintenance, medical emergency, out of service aircraft, oversales, positive passenger baggage match, passenger services, potable water servicing, pre-flight check, ramp congestion (blocked by another aircraft under carrier's control), ramp service, removal of unruly passenger, revised weight sheet, shortage of ramp equipment, slow boarding or seating, snow removal (when it is a carrier ramp service function), stowing carry-on baggage, and weight and balance delays.⁶² While not currently listed in the BTS directive, the Department is also considering clarifying that delays and cancellations caused by labor strikes of airline personnel are controllable because the Department believes airlines are best capable of addressing or mitigating such delays and cancellations through effective labor management. The Department invites comment on this issue.

Section 511 of the 2024 FAA Act instructed BTS to revise its regulation covering the "air carrier" category for the purposes of airline reporting to BTS under 14 CFR 234.4. Section 511 further provides a list of causes of delay that shall not be included in the "air carrier" reporting category in the revised BTS reporting regulation: (1) aircraft cleaning necessitated by the death of a passenger; (2) aircraft damage caused by extreme weather, foreign object debris, or sabotage; (3) a baggage or cargo loading delay caused by an outage of a bag system not controlled by a carrier or its contractor; (4) cybersecurity attacks (provided that the air carrier is in compliance with applicable cybersecurity regulations); (5) a shutdown or system failure of government systems that directly affects the ability of an air carrier to safely conduct flights and is unexpected; (6) overheated brakes due to a safety incident resulting in the use of emergency procedures; (7) unscheduled maintenance, including in response to an airworthiness directive, manifesting outside a scheduled maintenance program that cannot be deferred or must be addressed before flight; (8) an emergency that required medical attention through no fault of the carrier; (9) the removal of an unruly passenger; and (10) an airport closure due to the presence of volcanic ash, wind, or wind shear. The Department issued the rule addressing the reportable causes of

delay and cancellation in 14 CFR 234.4 under different statutory authorities than those it relies upon in this rulemaking, and the 2024 FAA Act does not require the Department to incorporate those statutory exclusions from the "air carrier" reporting category described in section 511 in this rulemaking.⁶³ Nevertheless, the Department welcomes comments on whether it should or shouldn't consider the aforementioned causes of delay as airline-caused for purposes of this rulemaking.

The Department notes that the EU and Canada have requirements for services and compensation in similar circumstances to those addressed in this ANPRM. The EU currently requires compensation for cancellations and delays of three hours or more, unless the airline proves that the cancellation or delay is "caused by extraordinary circumstances which could not have been avoided even if all reasonable measures had been taken."⁶⁴ The term "extraordinary circumstances" has been interpreted and narrowly construed in a series of decisions by the Court of Justice of the European Union.⁶⁵ In 2013, the European Commission proposed to revise its regulation, EC 261, to provide a list of causes that would be included and excluded from the definition of "extraordinary circumstances," but that proposal was not finalized.⁶⁶

⁶³ The Department issued 14 CFR part 234 under 49 U.S.C. 329, 41708, and 41709.

⁶⁴ EC No 261/2004, Article 5.3; *see also* Joined Cases C-402/07 and C-432/07, *Sturgeon v. Air France*, 2009 E.C.R. I-10923, ¶ 69 (applying EU compensation requirements to delays of three hours or more).

⁶⁵ *See* EU Interpretive Guidelines at C 214/15–17 (summarizing cases).

⁶⁶ The 2013 EU proposal would have included the following non-exhaustive list of extraordinary circumstances: natural disasters rendering impossible the safe operation of the flight; technical problems which are not inherent in the normal operation of the aircraft, including hidden manufacturing defects revealed by the manufacturer or a competent authority and which impinges on flight safety; security risks, acts of sabotage or terrorism rendering impossible the safe operation of the flight; life threatening health risks or medical emergencies necessitating the interruption or deviation of the flight concerned; air traffic management restrictions or closure of airspace or an airport; meteorological conditions incompatible with flight safety; and labor disputes at the operating carrier or at essential service providers. *See* Proposal for a Regulation of the European Parliament and of the Council Amending Regulation (EC) No 261/2004 Establishing Common Rules on Compensation and Assistance to Passengers in the Event of Denied Boarding and of Cancellation or Long Delay of Flights and Regulation (EC) No 2027/97 on Air Carrier Liability in Respect of the Carriage of Passengers and Their Baggage by Air, COM(2013), *available at* eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:52013PC0130.

The Canadian APPRs currently require airlines to provide compensation for cancellations and delays of three hours or more that are within the airline's control and not required for safety purposes.⁶⁷ In 2023, the Canadian Transportation Agency (CTA) began a consultation to revise the APPRs. In its consultation paper, the CTA proposed to eliminate the categories in the existing APPRs and to move to a mode more similar to EC 261, requiring "compensation for inconvenience for all flight disruptions unless there are exceptional circumstances."⁶⁸ To fall within the proposed definition of exceptional circumstances, the CTA consultation paper would require that the event causing the disruption "must have been outside the airline's control, and not inherent to the normal exercise of the activities of the airline," and that the "event could not be avoided even if the airline took all reasonable measures to do so."⁶⁹ The CTA consultation paper provided a proposed list of events that would and would not constitute exceptional circumstances.⁷⁰

The Department seeks comment on whether this approach under consideration, which is to rely largely on the list of "air carrier" causes from the 2018 BTS directive, is the most appropriate approach for the Department to use to determine whether a delay or cancellation is controllable and asks for feedback on potential alternatives. Are there benefits to using the currently applicable EU or Canadian

⁶⁷ APPRs, ¶ 19.

⁶⁹ *Id.*

⁷⁰ Those circumstances considered exceptional would include: security risks such as war, political instability, illegal acts, sabotage, and terrorism; weather or other atmospheric conditions, or natural disasters, that make it impossible to safely operate the flight; airport operational issues for which the airline is not responsible; hidden manufacturing defects that come to light and affect flight safety; health risks or medical emergencies on route that require a flight diversion or discovered shortly before flight departure that make it impossible to safely operate the flight; air traffic management restrictions, airspace closures, and airport closures; an official NOTAM; orders or instructions from state, law enforcement agency, or airport security officials; and labor disruptions at the airline or by essential air service providers like airport managers, air navigation personnel, or ground handlers. Those circumstances not considered exceptional would include flight crew or cabin crew unavailability; staff shortages at the airline; technical problems that are an inherent part of normal airline operations; any situation the airline knew about, or should have known about, when it sold the ticket to the passenger; and any action, or failure to act, by the airline or others with which the airline has a contractual relationship. *Id.* at 7–8.

⁶² BTS Technical Reporting Directive #31—On-Time Performance (Dec. 12, 2018) at 27–28.

categories or any categories for assessing delays and cancellations that those jurisdictions have proposed but not enacted? In addition to the Department's requests for comment on specific EU and Canadian requirements throughout this ANPRM, the Department also requests comment on whether there are any additional elements of any current or proposed EU or Canadian regulations covering controllable cancellations and delays (including services and compensation available to passengers during such delays) that the Department should adopt in any rule.

Should the Department consider any alternatives for defining controllable? Should the Department consider applying requirements for services when a delay or cancellation is not within the control of the airline? For example, the Department is considering requiring airlines to provide certain services, such as rebooking, meals, and hotels on domestic flights, regardless of the reason for the flight disruption, as failing to provide those services may not be "adequate" service under 49 U.S.C. 41702. If so, what provisions should apply and why?

(3) Rebooking

(a) General Rebooking Provisions

Should the Department require airlines to offer rebooking, at no additional cost, to a passenger whose trip is disrupted because of a lengthy, controllable flight delay or cancellation and, if so, under what circumstances should rebooking be required? One option the Department is considering is requiring airlines to promptly offer rebooking without charge on the next available flight to any passenger: (1) whose flight is cancelled due to circumstances, in whole or in part, attributable to the carrier; (2) whose flight is delayed due to circumstances, in whole or in part, attributable to the carrier resulting in the passenger missing a connection on a single ticket; and (3) whose departure on a flight is significantly delayed (*i.e.*, delayed three hours or more for domestic flight or delayed six hours or more for an international flight), in whole or in part, attributable to the carrier.

This method is generally consistent with the commitments the largest U.S. airlines have already made in their customer service plans to provide rebooking at no additional cost in the event of a controllable cancellation or a significant controllable delay as reflected on the Department's Airline Customer Service Dashboard.⁷¹

However, unlike some customer service commitments that do not define when a delay is significant, the Department is considering requiring airlines to offer rebooking when the passenger's departure is delayed three hours or more for domestic flights and six hours or more for international flights due to a lengthy, controllable flight delay or cancellation. Additionally, regardless of the length of delay if a controllable delay results in a missed connection, the Department is considering requiring airlines to offer rebooking on the next available flight.

Under this approach, the rebooking offered to a passenger whose departure on a flight is significantly delayed would be prompt and without charge on the next available flight. The Department is considering defining significant delay to be a delay of three hours or more for domestic flight or a delay of six hours or more for an international flight, in whole or in part, attributable to the carrier. This is consistent with section 512 of the 2024 FAA Act, which requires the Department to direct certain air carriers to establish policies regarding reimbursements for the costs of meals, lodging, and transportation to and from that lodging incurred by passengers whose flights are cancelled or "significantly delayed." Section 512 defines "significantly delayed" to mean delayed three hours or more for a domestic flight and six hours or more for an international flight. These thresholds are also consistent with the definition of a significantly delayed flight in section 503 of the 2024 FAA Act and Department's recent Refund Rules.⁷² The Department is considering whether to apply the delay standards in section 512 of the 2024 FAA Act not only to rebooking requirements but also to compensation requirements and invites comment on whether it should do so. Would a consistent definition of significant delay that would entitle consumers to services or compensation promote awareness of passenger rights and reduce logistical burdens for airlines?

The Department requests comment on the appropriateness of this approach under consideration. Should the Department adopt this approach or should it adopt a different approach? For example, EU and Canadian rules provide for rebooking when a scheduled flight is cancelled, regardless of the reason for the cancellation.⁷³ Should the Department, like the EU and Canada,

require airlines to provide rebooking regardless of the reason for the cancellation based on its authority to require safe and adequate interstate transportation in 49 U.S.C. 41702? The Canadian rules require airlines to rebook passengers on another flight if their original flight is delayed for three hours or more whether that flight is domestic or international or if the original flight is cancelled.⁷⁴ Should requirements to provide rebooking for controllable delays of international flights be based on three-hour delays instead of six-hour delays?

Are there any circumstances in which rebooking requirements for controllable flight disruptions should not apply? What rebooking requirements, if any, should apply when a passenger does not accept the initial rebooking offered by the airline after a controllable delay or cancellation? Under what circumstances do airlines typically offer free rebooking? Under what circumstances do airlines typically charge for rebooking?

(b) Rebooking on Other Airlines

The Department is considering requiring an airline to offer an affected passenger the next available flight among flights operated by the airline and its branded codeshare partners. As discussed earlier in this ANPRM, a "branded codeshare partner" typically operates flights for the mainline carrier using the mainline carrier's name. The mainline carrier in this arrangement is generally responsible for selling the tickets for the flight, and consumers likely would consider the two carriers to be one entity when purchasing airline tickets.

If no flight operated by that airline or its branded codeshare partner would depart within 24 hours of the passenger's original scheduled departure time, the Department is also considering requiring an airline to offer rebooking on the next available departing flight among those operated by that airline, its branded codeshare partner, and any carrier with which the airline has a commercial agreement, interline or codeshare, to transport the airline's passengers. An "interline agreement" is a commercial agreement that enables the airlines to work together in providing services to passengers when the passengers travel on multiple airlines on a single itinerary. The agreement typically covers baggage handling, so passengers can check bags seamlessly to their final destination, and a ticketing agreement, to allow a passenger to obtain boarding

⁷¹ See <https://www.transportation.gov/airconsumer/airline-customer-service-dashboard>.

⁷² 89 FR 32833; 89 FR 65536–37.

⁷³ EC No 261/2004, Articles 5.1(a), 8; APPRs ¶¶ 10(3), 17, 18.

⁷⁴ APPRs ¶¶ 17, 18.

passes to their destination. Typically, interline agreements enable the airlines to rebook passengers on one another's flights at a pre-negotiated below-market cost when there is an irregular operation.

Several of the largest U.S. airlines have committed in their customer service plans to rebook passengers on a partner airline or another airline with which it has an agreement at no additional cost when there is a controllable cancellation or significant controllable delay.⁷⁵ Some airlines condition their commitment to use partner carriers on their own flights not being available until the next day. This is consistent with the option under consideration of requiring an airline to offer rebooking on any carrier by which the airline has a commercial agreement to transport the airline's passengers only if the airline cannot provide rebooking within 24 hours using its own branded network.⁷⁶ Some airlines do not have interline or rebooking agreements with other carriers and have not made these commitments. Usually, ultra low-cost carriers (ULCCs) do not have these agreements.

The Department requests comment on whether it should adopt the options described for rebooking or if it should adopt an alternate option and why. What effect, if any, would a requirement to provide rebooking on a carrier with which an airline has an interline or rebooking agreement have on competition among airlines, including those who do not have interline agreements? If the Department should require an airline to offer rebooking on a carrier with which it has an interline or rebooking agreement, should the Department require airlines to publish a list of their interline partners?

At what point, if at all, should the Department require an airline to offer rebooking on another carrier that is not its partner airline? The Canadian APPRs require large airlines to use any carrier to rebook passengers if they cannot rebook passengers on their own or a partner's next available flight leaving that airport within nine hours for controllable cancellations and controllable delays of three hours or more. For cancellations and delays outside the carrier's control, the Canadian APPR requires large airlines to use a non-partner carrier if the airline cannot rebook passengers on their own

or a partner's next available flight leaving that airport within 48 hours of the departure time on the passenger's ticket for cancellations and delays of three hours or more.⁷⁷ Also, under the Canadian APPRs, if the airline cannot provide rebooking from the airport where the passenger is located that departs within 48 hours, large airlines must use any airline leaving from a nearby airport for rebooking and must get the passenger to the other airport free of charge.⁷⁸ Should DOT impose similar requirements? What effect, if any, would a requirement to provide rebooking on any carrier, including non-partner carriers, have on competition among airlines?

The Canadian APPRs currently do not require small airlines to rebook passengers using a non-partner airline.⁷⁹ In 2023, the CTA initiated a consultation to revise the APPRs. In its consultation paper, the CTA proposed to expand requirements to rebook using any airline to small airlines, if they cannot rebook on their flight or their partner's flight within 24 hours.⁸⁰ In addition, the CTA proposed expanding the requirement to use nearby airports after 48 hours to small carriers.⁸¹

Public comments on the Canadian proposal highlight consumer organizations' general support for eliminating distinctions between large and small airlines to better protect passengers.⁸² Small airlines raised issues that rebooking on another airline and/or rebooking within 24 hours is not realistic if one airline operates from the airport or there is a low volume of flights.⁸³ Some industry members proposed that rebooking obligations only apply when there are viable rebooking options.⁸⁴ One airline suggested that rebooking on an unaffiliated airline should not be a requirement and that the passenger should be able to choose the rebooking options that best suits their needs, including being able to choose to rebook

with the same airline versus a different one.⁸⁵

The Department's options under consideration currently apply the same rebooking requirements to smaller airlines as to larger airlines. However, the Department invites comment on whether it should adopt that approach or a different one. Should the Department not impose any requirements or have reduced requirements to rebook passengers on other airlines after controllable flight disruptions by small airlines given these airlines may not have interline agreements and may need to pay the ticket price to transport their passengers on another airline? Is it fair to passengers flying on small airlines not to be provided rebooking on other airlines for controllable flight disruptions, particularly when the network of a small airline may be more limited? How, if at all, can the Department incentivize large airlines to provide rebooking reciprocity to small airlines during cancellations and lengthy delays, or disincentivize large airline practices that prevent reciprocity, in order to improve the options for consumers and facilitate competition? What additional requirements might be necessary to ensure that small carriers are not disadvantaged by the size and scale of their networks or other competitive factors that impact their ability to rebook passengers at the same general rate and cost as larger carriers? If small airlines are not required to rebook on other airlines, how should the Department determine which airlines are small—based on size of aircraft, number of U.S. enplanements, revenue, number of employees, or other criteria? Also, what is the best way to ensure passengers are aware of a two-tiered approach? For example, what sorts of disclosures, if any, should passengers flying on small airlines be provided regarding rebooking should there be flight disruptions under any two-tiered approach?

In the alternative, should the Department require rebooking on other airlines by small airlines but consider more stringent rebooking requirements for large U.S. and foreign airlines with flights to, within, and from the United States? For example, should the Department require large U.S. and foreign airlines to provide rebooking on any carrier if the airline cannot rebook passengers on their own or a partner's next available flight within nine hours instead of within 24 hours? This would be similar to the current Canadian

APPRs, which apply that requirement to large airlines. If the Department were to adopt more stringent requirements for large airlines, how should the Department determine which airlines are large—based on size of aircraft, number of U.S. enplanements, revenue, or other criteria? If based on revenue, should the focus be on any U.S. carrier that accounts for at least 10 percent of the domestic scheduled passenger revenue in the most recently reported 12-month period?⁸⁶ If based on enplanements, is the appropriate threshold for foreign air carriers at least two million total enplanements to or from the United States?⁸⁷

(c) Rebooking on Next Available Flight

The option under consideration is to require airlines to offer to rebook affected passengers on their next available departing flight in the passenger's reserved class of service that would advance the passenger to the final stop of their itinerary. Does this option ensure passengers are reaccommodated as soon as possible on a reasonable and productive route, without adversely affecting passengers with confirmed seats or passengers that might need priority or blocked seats, such as passengers with disabilities? If the Department should require rebooking on the next available flight, how should the Department define available? How, if at all, should the Department address rebooking for multiple passengers traveling on the same reservation? How do airlines currently approach free rebooking during controllable disruptions? How long from the time of a cancellation or significant delay does it typically take for an airline to place a passenger on a replacement flight? How do the airlines decide which passengers to rebook when upcoming flights have limited capacity? Are there current industry rebooking practices that the Department should consider either incorporating into a regulation or prohibiting as part of this rulemaking? Would rebooking a passenger on the next available flight be feasible for airlines in practice? Is this option appropriate to best serve affected passengers? Should any rebooking requirement provide more flexibility for passengers? Even if the airline can

rebook the passenger within 24 hours, should the Department require an airline to offer a passenger the option to select any comparable future rebooking on that airline in case the original itinerary no longer meets the passenger's travel needs? If so, how long should airlines be required to make that option available, and how far in the future should the passenger be permitted to rebook without charge? For example, should the passenger be required to rebook within 24 hours of the flight disruption, a week, or another time period? Should the future flight selected be limited to comparable flights departing within a month, a year, or another time period? How would the Department define comparable future rebooking? If rebooking is not comparable, should airlines explicitly be required in a rule to also provide a refund to account for any difference in cost or value? For example, should airlines explicitly be required in a rule to rebook and refund the difference in fare if the passenger is downgraded in fare class?

(d) Returning Consumers to the Point of Origin When Rebooking Is Declined

The Department is considering requiring that, when a passenger misses a connection because of a controllable flight cancellation or flight delay and the rebooking offered by the airline would cause the passenger to be delayed in arriving at their final stop 24 hours or more, the airline must offer the passenger the option of the next available return flight to the passenger's original departure point of that portion of their itinerary (outbound, intermediate, return) at no additional cost and a refund of the cost of the entire portion of their itinerary with the missed connection (including used segments of that portion) and all subsequent portions of their itinerary. This would be similar to a provision of the Canadian APPRs, which require an airline to provide a refund and return to the point of origin if the passenger's travel no longer serves its purpose because of the cancellation or lengthy delay and the passenger is no longer at the point of origin (e.g., is delayed departing at a connecting point).⁸⁸ Should the Department impose a requirement on airlines to return consumers to the point of origin when the passenger is delayed at a connecting point and no longer wishes to continue their journey? Why or why not? If the Department were to impose such a requirement, should it apply only for extended delays or, similar to the

Canadian APPRs, be based on whether the passenger states that his or her travel no longer serves its purpose? Should delays at a connecting point of 24 hours or more be considered extended delays or is there a more appropriate threshold on what is an extended delay? Are there reasons the Department should not require a refund for portions of the itinerary already traveled?

(e) Rebooking Protections When the Airline Makes a Significant Change to a Passenger's Flight Itinerary, Including for Passengers With Disabilities

What rebooking protections should apply when an airline makes significant changes to a passenger's itinerary, including a significant change that affects accessibility for a passenger with a disability? The Department is considering proposing to require airlines to promptly offer rebooking at no additional cost to a passenger who is an individual with a disability (and any individuals in the same travel party) upon notification that the individual decides not to travel on the flight due to any of the following changes: the individual with a disability (1) is downgraded to a lower class of service that results in one or more accessibility features needed by the individual becoming unavailable; (2) is scheduled to depart from, arrive to, or connect through one or more airports that are different from the original itinerary; or (3) is scheduled to travel on substitute aircraft on which one or more accessibility features available on the original aircraft needed by the individual are unavailable. The Department is considering proposing that the airline must offer rebooking on the next departing flight by that airline or its branded codeshare partner that advances the passenger to the final stop of their itinerary, accommodates the individual with a disability, and has open seats for the individual and for all other in the same travel party. The Department is considering proposing to apply this requirement regardless of whether the reason for the change was within the airline's control. In addition, if no flight operated by that airline or its branded codeshare partner would depart within 24 hours of the passenger's original scheduled departure time, the Department is also considering requiring an airline to offer rebooking on the next available departing flight among those operated by that airline, its branded codeshare partner, and any carrier with which the airline has a commercial agreement, interline or codeshare, to transport the airline's passengers.

⁸⁶ Four U.S. carriers—American Airlines, Delta Air Lines, United Airlines, and Southwest Airlines—exceeded this threshold in 2023, all with over 15 percent of domestic scheduled passenger revenue. No other carrier comprised more than six percent of domestic scheduled passenger revenue. See docket at <https://www.regulations.gov/docket/DOI-OST-2024-0062/>.

⁸⁷ Eighteen foreign carriers exceeded two million total enplanements to and from the United States in 2023. See *id.*

⁸⁸ APPRs ¶¶ 17(2)(a), 18(1.2).

In the rulemaking, Refunds and Other Consumer Protections, two disability rights advocacy groups, Paralyzed Veterans of America and United Spinal Association, commented that, from the perspective of passengers with disabilities, any change to the origination, connection, and destination airport should be considered a “significant change of flight itinerary.”⁸⁹ These commenters stated that when booking flights, passengers with disabilities may rely on the specific accessibility features of an airport to select the flights and itinerary, and this may include selecting a particular connecting airport based on the accessibility features needed to accommodate their disabilities during the layover time. In addition, the Paralyzed Veterans of America noted that a “refund” is purposeless if the passenger is stranded and requested the Department require airlines to “expeditiously locate and offer alternative transportation that meets the specific needs of the passenger with a disability.”⁹⁰

For example, when finding alternative transportation for individuals with disabilities who use wheelchairs, it is imperative that the alternative transportation selected is one where the passenger’s wheelchair can be safely stowed. In February 2022, the Department’s Air Carrier Access Act (ACAA) Advisory Committee issued a report that recognized the importance of logistical planning to ensure that wheelchairs are safely accommodated on aircraft. The Advisory Committee unanimously agreed on the benefit of passengers with disabilities completing airline forms describing their wheelchairs (e.g., device dimensions, battery type) and recommended that a group that includes disability organizations, airlines, airports, aircraft manufacturers, and wheelchair manufacturers work together to improve consistency within existing airline forms for handling wheelchairs. It is the Department’s understanding that this working group, led by the International Air Transport Association (IATA), intends to complete its work by the end of 2024.⁹¹ To ensure that any rebooking

requirements provide equitable access to air transportation to people with disabilities, there may be a need for consistent forms for wheelchairs. Should the Department require a consistent wheelchair handling form across airlines for air transportation to, from and within the United States? If so, what information should be included? Should the Department adopt the form developed by the working group led by IATA?

Should the Department propose the rebooking requirements for passengers with disabilities regardless of whether the reason for the cancellation or significant change was within the airline’s control as stated earlier in this section? Should the Department only require airlines to provide rebooking without charge to passengers who are individuals with disabilities when lengthy delays and cancellations are within the airline’s control or responsibility? Are there circumstances in which airlines should not be required to accommodate passengers by rebooking the passenger on another carrier with which the airline has a codeshare or interline agreement? Are there circumstances in which airlines should be required to accommodate passengers on a carrier with which the airline does not have a codeshare, interline, or any other agreement? If the Department proposes that airlines must provide free rebooking to members in the same travel party as a passenger with a disability, how should the Department define “travel party,” and how can airlines determine which passengers belong to the same “travel party?” Should the travel party be determined based on whether the passengers purchased their tickets in a single transaction, are on the same reservation or on linked Passenger Name Record (“PNR”), or based on other criteria?

Should airlines be required to offer the option of free rebooking for any cancellation or significant delay or change of a domestic flight that qualifies for a refund under section 503 of the 2024 FAA Act or under the Department’s Refund Rules?

(4) Compensation

(a) Compensation Amounts

The Department is considering requiring airlines to pay cash compensation to passengers whose trip is disrupted because of a cancellation or delay due, in whole or in part, to any circumstance within the control of the airline. The Department seeks comment on the effect that requiring compensation for lengthy, controllable

delays and cancellations may have on airline performance and profitability as well as the effect that such requirements would have on consumers. A working paper by the European University Institute supports that European compensation and service requirements (discussed later in this ANPRM) have reduced the likelihood and duration of flight delays under that regime, finding “an economically important and statistically significant effect of EC261 regulation [covering compensation and services] on both departure and arrival delay, as well as on-time performance.”⁹² In reaching that conclusion, the working paper compared flights operating on the same route around the same time that were covered by EC 261 with those that were not.⁹³ A separate study contracted by the European Commission documented an overall increase in the number of cancellations and lengthy delays of flights covered by the EU regulation between 2011 and 2018.⁹⁴ That study also documented reduced delays on flights covered by the EU regulation compared with those that were not, concluding that it was “possible” that the EU regulation “has a marginal impact on the proportion of flights delayed” but stating that the impact “does not appear to be significant compared to other factors.”⁹⁵ In addition, the Department requests comment on how requiring cash compensation may impact consumer behavior. For example, would requiring cash compensation make consumers impacted by cancellations and lengthy flight delays more likely to continue to travel by air in the future?

The Department is contemplating proposing that cash compensation would be due to a passenger whose arrival at the final stop of the itinerary is delayed by three hours or more for a domestic flight and six hours or more for an international flight because of a

⁹² See Hinnerk Gnitzmann and Piotr Śpiewanowski, *Can Regulation Improve Service Quality? Evidence from European Air Passenger Rights*, European University Institute Working Paper, RSCAS 2018/44 (2018) at 8, available at https://cadmus.eui.eu/bitstream/handle/1814/58304/RSCAS_2018_44.docx.pdf?sequence=1&isAllowed=y.

⁹³ Flights arriving to the EU from locations outside the EU are covered by EC 261 only if the carrier is an EU carrier. See *id.* at 1 (explaining that differences in EC 261 coverage based on the nationality of the carrier “makes it possible to identify the impact of the regulation while allowing for carrier fixed effects and controlling for route-time effects (e.g., caused by airspace congestion)”).

⁹⁴ See Study on the Current Level of Protection of Air Passenger Rights in the EU, No. MOVE/B5/2018–541 (2020), available at <https://op.europa.eu/en/publication-detail/-/publication/f03df002-335c-11ea-ba6e-01aa75ed71a1>.

⁹⁵ *Id.* at 20.

⁸⁹ See Comment from Paralyzed Veterans of America at 2, available at <https://www.regulations.gov/comment/DOT-OST-2022-0089-5262>, comment from United Spinal Association, available at <https://www.regulations.gov/comment/DOT-OST-2022-0089-5304>.

⁹⁰ See Comment from Paralyzed Veterans of America at 3.

⁹¹ See Final Report, ACAA Advisory Committee Recommendations at 9–10 (Feb. 4, 2022), available at <https://www.regulations.gov/document/DOT-OST-2018-0204-0040>.

controllable flight cancellation or delay. This structure is similar to that used in the Canadian APPRs.⁹⁶ In addition, using a three-hour delay threshold for domestic flights and six-hour thresholds for international flights to determine whether compensation is owed is consistent both with the definition of significantly delayed in section 512 of the 2024 FAA Act and with the definition of significantly delayed flight in the Department's recent Refund Rules.⁹⁷ The Department invites comment on these time thresholds for

compensation, including whether any compensation should be required for delays of less than three hours. To determine the compensation amounts that should be paid to consumers, the Department is considering two options. The first option is using amounts comparable to Canadian amounts of compensation applicable to large airlines. The second option is to base the cash compensation amounts on the value of passenger time and the weighted average flight delay. The Department seeks public comment

on these options and will also consider additional options recommended by commenters. For the first option, the Department is considering using the same compensation amounts required for large airlines under the Canadian APPRs, converted from Canadian to U.S. dollars. Canada currently applies the following tiers of cash compensation requirements to cancellations and flight delays that are within the airline's control and not required for safety:⁹⁸

CANADIAN COMPENSATION REQUIREMENTS⁹⁹

	Large carriers	Small carriers
Delayed Arrival of 3–5:59 hours	\$400 Canadian Dollars (CAD), Approximately \$295 U.S. Dollars (USD).	\$125 (CAD), Approximately \$92 USD.
Delayed Arrival of 6–8:59 hours	\$700 (CAD), Approximately \$517 USD	\$250 (CAD), Approximately \$185 USD.
Delayed Arrival of 9+ hours	\$1,000 (CAD), Approximately \$738 USD	\$500 (CAD), Approximately \$369 USD.

The Department is considering whether to use amounts similar to Canada to ensure U.S. passenger compensation requirements are in line with other similar international requirements. Under this first option, the Department is considering requiring an airline to pay compensation of \$300 USD to a passenger whose arrival at the final stop of a domestic flight is delayed at least three hours but less than six hours; \$525 USD to a passenger whose arrival at the final stop of a domestic flight is delayed at least six hours but less than nine hours; and \$750 USD to a passenger whose arrival at the final stop of a domestic flight is delayed at least nine hours.¹⁰⁰ The Department is considering requiring an airline to pay \$525 USD to a passenger whose arrival at the final stop of an international flight is delayed at least six hours but less than nine hours; and \$750 USD to a passenger whose arrival at the final stop of an international flight is delayed at least nine hours. If the Department proposes this option, should it also include reduced compensation amounts for small airlines like the Canadian APPRs? Why or why not?

The second option the Department is considering is to require airlines to pay compensation based on the Department's hourly value of travel time savings for air travel from DOT's Benefit-Cost Analysis Guidance for Discretionary Grant Programs¹⁰¹ and the weighted average flight segment delay of flights delayed at least three but less than six hours, at least six hours but less than nine hours, and nine hours or more on flight segments within the United States using 2022 and 2023 full-year domestic flight performance data collected by BTS.¹⁰² Under this second option the Department would require an airline to pay compensation of \$200 to a passenger whose arrival at the final stop of a domestic flight is delayed at least three hours but less than six hours; \$375 to a passenger whose arrival at the final stop of a domestic flight is delayed at least six hours but less than nine hours; and \$775 to a passenger whose arrival at the final stop of a domestic flight is delayed at least nine hours. The Department is considering requiring an airline to pay \$375 to a passenger whose arrival at the final stop of an international flight is delayed at least six hours but less than nine hours; and

\$775 to a passenger whose arrival at the final stop of an international flight is delayed at least nine hours. In calculating the compensation amounts for the second option, the Department relies on the BTS data because that data is reported and certified correct by U.S. airlines to the Department. The Department recognizes that BTS data have some limitations as applied to this rulemaking. Notably, BTS only collects flight performance data from U.S. airlines for domestic flight segments, and the data does not reflect passenger trip delay. Accordingly, the data used to establish any compensation amounts from BTS data would necessarily be limited to domestic segment-based delays, not overall delays for passengers arriving at their destinations. The Department invites comment on whether it should use BTS data to establish any compensation amounts or whether an alternate data source would provide information more appropriate to establishing compensation amounts. To arrive at the dollar value for compensation for purposes of soliciting comment on option two in this ANPRM, the Department multiplied its estimated

⁹⁶ See APPRs, ¶ 19(1).
⁹⁷ 89 FR 32833.
⁹⁸ APPRs ¶ 19(1).
⁹⁹ Conversions from CAD to USD estimated based on the average conversion rate on the Bank of Canada website for the week of September 3–September 10, 2024.
¹⁰⁰ The Department rounded the converted values of Canadian compensation to the nearest \$25 for purposes of providing compensation amounts for comment in this ANPRM. Conversion rates from Canadian to U.S. Dollars are provided in the docket at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>.

¹⁰¹ The value was weighted by the proportion of travel that is business and personal. See U.S. Department of Transportation, Benefit-Cost Analysis Guidance for Discretionary Grant Programs, 2024 Update (Dec. 5, 2023), Table A–2, p. 40, n. 2 and 3, available at <https://www.transportation.gov/sites/dot.gov/files/2023-12/Benefit%20Cost%20Analysis%20Guidance%202024%20Update.pdf>. The value of travel time in air transportation is \$47.70 per hour for personal travel and \$80.20 for business travel, with a ratio of 88.2 percent personal travel and 11.8 percent business travel.

¹⁰² The largest U.S. airlines report certified flight performance data for their domestic scheduled operations to BTS on a monthly basis. Based on 2023 BTS T–100 domestic market-based traffic data, these airlines account for more than 95 percent of domestic passenger air traffic. Bureau of Transportation Statistics, T–100 Market Data, available at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>. Additional information on the Department's calculations is available in the docket at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>.

weighted average arrival delay for each compensation tier (3–5:59 hours; 6–8:59 hours; 9+ hours) ¹⁰³ by the Department's hourly value of travel time savings for air travel from DOT's Benefit-Cost Analysis Guidance for Discretionary Grant Programs. This hourly value of travel time savings for air transportation is \$51.54. ¹⁰⁴ The Department developed its value of travel time savings "to be used in all DOT benefit-cost or cost-effectiveness analyses." ¹⁰⁵ Although the value of travel time savings was not specifically developed for the purpose of assessing the value of time lost due to air travel delays, the Department views the factors used to establish the

value of travel time savings—trip purpose, passenger characteristics, passenger income, mode and distance of transportation, and passenger comfort—are also potentially relevant to time lost due to air travel delays. ¹⁰⁶

The Department also closely reviewed the EU compensation regime when developing this ANPRM. The EU, like Canada, uses a three-tiered compensation system, but those compensation regimes have different criteria. Canadian compensation requirements are based on the length of a passenger's delayed arrival and whether the carrier is a large or small carrier. ¹⁰⁷ The EU compensation amounts are based on the distance and

location of the flight (*i.e.*, whether the flight is entirely within the EU), with a reduction of 50 percent if passengers arrive with delays of less than two, three, or four hours depending upon the distance and location of the flight. ¹⁰⁸ The EU applies the following requirements for compensation in the form of cash, electronic bank transfer, bank order or bank check for cancellations and delays of three hours or more unless the airline proves that the cancellation or delay is "caused by extraordinary circumstances which could not have been avoided even if all reasonable measures had been taken." ¹⁰⁹

EU COMPENSATION REQUIREMENTS ¹¹⁰

	Compensation	Reduced compensation if rerouting is provided
All flights 1500km or less	250 Euros, Approximately \$278 USD.	Reduced to 125 Euros (approximately \$139 USD) if passenger arrives less than 2 hours later than scheduled.
All flights entirely within the EU and all flights between the EU and a location outside the EU between 1500 and 3500 km.	400 Euros, Approximately \$445 USD.	Reduced to 200 Euros (approximately \$223 USD) if passenger arrives less than 3 hours later than scheduled.
All other flights	600 Euros, Approximately \$668 USD.	Reduced to 300 Euros (approximately \$334 USD) if passenger arrives less than 4 hours later than scheduled.

Should the Department use a tiered model if it imposes compensation requirements or should the Department require a single level of compensation for all lengthy, controllable delays and controllable cancellations? A tiered approach based on the length of delay as under options one and two would be similar to Canadian regulatory requirements. It would also reflect that passengers lose more time and are likely to experience greater inconvenience and discomfort during longer delays and may provide added incentive for airlines to rebook delayed and cancelled passengers on replacement flights arriving close to the passengers' originally scheduled arrival times. Instead of a tiered approach based on length of delay, should the Department adopt a different compensation model, such as a model more similar to the EU, with different compensation amounts

applicable to domestic and international flights?

If the Department requires airlines to pay compensation, what methodology should the Department use to establish compensation amounts? Should the Department establish compensation amounts using a methodology that provides compensation based on the value of a passenger's lost time, such as the methodology in option two discussed above that would calculate compensation amounts using the Department's hourly value of travel time savings for air travel from DOT's Benefit-Cost Analysis Guidance for Discretionary Grant Programs and BTS data on flight segment delays? ¹¹¹ Or, instead of determining any compensation amounts based on the value of a passenger's time, should the Department establish any compensation amounts with reference to the rates used

in other jurisdictions as under option one? Are there additional or alternate data sources that the Department should examine in order to establish any compensation amounts? Should the Department consider a compensation requirement that includes periodic updates to compensation amounts, such as for inflation using the consumer price index or based on another method?

Should any compensation methodology impose lower compensation requirements on some airlines, similar to the current Canadian regulatory requirements which apply lower compensation requirements to small airlines, or exclude some airlines entirely? ¹¹² For example, should the Department impose lower compensation requirements on airlines that meet the definition of a small entity for purposes of the Regulatory Flexibility Act or

¹⁰³ Additional information about these calculations is provided in the docket for this rulemaking, available at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>.

The value of travel time in air transportation is \$47.70 per hour for personal travel and \$80.20 for business travel, with a ratio of 88.2 percent personal travel and 11.8 percent business travel.

¹¹² See APPRs ¶ 19(1).

airlines that are small based on other criteria?¹¹³

Should the Department apply higher compensation requirements to those carriers that comprise a large percentage of domestic scheduled-service passenger revenues (e.g., 10 percent or greater)¹¹⁴ or comprise a large number of total enplanements to and from the United States (e.g., have two million or more total enplanements to and from the United States)?¹¹⁵ Would higher compensation requirements further incentivize the largest carriers to make operational changes to reduce the prevalence of controllable cancellations and delays?

Are there circumstances in which compensation requirements should not apply? For example, should compensation requirements not apply if the airline provides sufficient advance notice of the cancellation or delay? Among other options, the Department is considering not requiring compensation if the airline notifies the passenger of the flight cancellation or arrival delay at least eight days before the first scheduled departure for that part of the trip (e.g., before the scheduled departure for the first flight segment of an inbound or outbound portion of the itinerary). An eight-day time period is consistent with the BTS reporting rule which defines a cancelled flight as a flight not operated, but that was listed in the carrier's computer reservation system within seven calendar days of the scheduled departure.¹¹⁶ Under those rules, a flight removed for the carrier's reservation system more than seven days out are not reportable to the Department. Should the Department instead adopt a longer or shorter period during which any exclusion would apply, such as 14 days before the first scheduled departure? If commenters recommend a period longer than eight days, please provide a rationale for the recommended approach along any available data source that the Department can consult to estimate the number of flights that are cancelled

more than eight days in advance of the flight. Should higher compensation requirements apply to cancellations and delays that occur closer in time to the scheduled flight to reflect the likelihood of greater inconvenience and costs to passengers from last-minute cancellations and delays? If so, at what point in time should higher compensation requirements apply?

What compensation, if any, should be required if a passenger does not accept any flight offered by the airline and instead elects to receive a refund? In that circumstance, should the Department require compensation in the full amount that would otherwise be required based on the earliest arriving rebooking offered by the airline? Is there any reason for compensation not to be required when a passenger decides not to continue travel because of a controllable delay or cancellation and receives a refund? Canadian regulations require the airline to pay the lowest level of its tiered compensation structure if the passenger elects to accept a refund rather than rebooking.¹¹⁷ Should the Department similarly require reduced compensation in those circumstances? If the passenger elects to receive a refund, should the Department require different compensation if the airline is unable to offer prompt rebooking (for example, because alternate flights are unavailable) than if the airline offers prompt rebooking?

What compensation, if any, should be required if a passenger accepts rebooking, but does not accept the earliest flight offered by the airline? Should the compensation amount be calculated based on the earliest scheduled arrival of the itinerary offered by the carrier? The Department requests comment on whether there are other options that the Department should consider.

Do certain groups of passengers, such as passengers with disabilities, encounter unique costs associated with significant cancellations and delays? If so, should a compensation requirement address the potential for increased costs for certain groups of passengers, and how should it address these costs?

(b) Form of Compensation

The Department is contemplating requiring airlines to pay compensation in the form of cash or a cash equivalent for controllable flight disruptions rather than in alternative formats such as travel credits or vouchers or airline miles. In the Department's recent Refund Rules, the Department defined

"cash equivalent" as a form of payment that can be used like cash, including but not limited to a check, a prepaid card, funds transferred to the passenger's bank account, funds provided through digital payment methods (e.g., PayPal, Venmo), or a gift card that is widely accepted in commerce.¹¹⁸ The Department does not consider a form of payment to be "cash equivalent" if consumers bear the burden for transaction, maintenance, or usage fees related to the payment. The Department notes that cash or a cash equivalent would provide the highest degree of flexibility to a consumer inconvenienced by a controllable cancellation or delay in how and when to spend the required compensation.

Should the Department propose to allow airlines to provide compensation in a form other than cash or cash equivalent, and if so, under what circumstances would a non-cash option provide more benefit to consumers? Given that cash or a cash equivalent has no restriction on how and where it can be spent, under what conditions, if any, might non-cash compensation with limited use represent a better option? If non-cash or non-cash equivalent compensation is an acceptable compensation option, are additional consumer protections needed to ensure consumers are treated fairly and to ensure fair competition? How would the Department determine whether consumers have received the required compensation value with non-cash alternative compensation options? For example, if airlines were to offer miles or rewards points, how would the Department determine whether the miles or points represent a dollar value equivalent to or greater than the compensation amount required, particularly for miles or points that expire, cannot be converted into cash or a cash equivalent, and/or have a dynamic dollar value that changes at the discretion of the airline? How would the Department ensure that any vouchers or airline miles provided as an alternative to cash or cash equivalent compensation provide a benefit and maintain a value equal to or greater than cash or a cash equivalent? What misleading or unfair practices, if any, may occur when airline miles, travel credits or vouchers, or other similar types of compensation are offered in lieu of cash or cash equivalent compensation?

(c) Automatic Compensation Payments

Should the Department require airlines to make automatic cash or cash equivalent compensation payments to

¹¹³ Under the Regulatory Flexibility Act carriers that exclusively provide air transportation with aircraft originally designed to have a maximum passenger capacity of 60 seats or less or a maximum payload capacity of 18,000 pounds or less are small businesses. See 14 CFR 399.73.

¹¹⁴ Four U.S. carriers, American Airlines, Delta Air Lines, United Airlines, and Southwest Airlines, comprised 10 percent or more of domestic scheduled passenger revenue in 2023, all with over 15 percent. No other carrier comprised more than six percent of domestic scheduled passenger revenue. See docket at <https://www.regulations.gov/docket/DOT-OST-2024-0062/>.

¹¹⁵ Eighteen foreign carriers exceeded two million total enplanements to or from the United States in 2023. See *id.*

¹¹⁶ 14 CFR 234.2.

¹¹⁷ APPRs ¶ 19(2).

¹¹⁸ See 89 FR 32833.

consumers who are entitled to receive compensation? Under what circumstances, if any, should the Department require airlines to pay cash or cash equivalent compensation automatically, without requiring the submission of information by the consumer? What should a regulatory framework establishing automatic cash or cash equivalent compensation payment process look like to ensure automatic payments are provided effectively and efficiently to affected passengers? What information would airlines need to process automatic cash and cash equivalent compensation payments? Would cash-equivalent compensation (e.g., a Visa gift card) enable airlines to provide compensation without having to obtain passenger information, such as bank account information? If automatic compensation is required, how should the regulatory framework address disagreements between an airline and passenger about the compensation amounts or whether a given cancellation or delay was outside of the airline's control? Further, in cases where compensation is owed under the laws of multiple jurisdictions, how could a regulatory framework for automatic compensation enable passenger choice to receive compensation under the passenger's preferred regime?

Instead of requiring automatic compensation, should the Department allow airlines to require passengers to submit requests for compensation? What would be the necessary elements of such claims process, if needed? Should airlines be required to accept compensation requests through airline websites, by email, or by phone? If the Department were to allow airlines to require passengers to request compensation, are there ways to ensure that all passengers get the compensation they are entitled to receive? For example, if one passenger submits a compensation request, should that be sufficient to trigger a requirement that all passengers on the flight receive compensation if owed? Should airlines be required to proactively provide a way to request compensation as part of a notification process? What other requirements might be necessary to ensure that a request process results in all passengers getting the compensation they are entitled to, ensure that the request process is easy to navigate, and ensure that compensation disbursement is prompt?

In circumstances in which a third party, such as a private- or public-sector employer, has paid for a passenger's ticket, should any compensation be paid to the passenger or should it be paid to

the third-party payor? Are there challenges to either approach?

(5) Meals, Lodging, and Transportation to and From Lodging

As reflected on the Department's Airline Customer Service Dashboard, the largest U.S. airlines all currently guarantee in their customer service plans that they will cover a meal for passengers affected by a cancellation or delay within the airline's control that results in a passenger waiting three hours or more, and all but one of the largest U.S. carriers currently commit to providing hotel accommodations and travel to and from the hotel when there are controllable overnight delays and cancellations.¹¹⁹ Some of those airline policies contain limitations, for example, limiting their hotel guarantees to non-local passengers and limiting any reimbursements for hotels to reasonable costs.¹²⁰

Section 512 of the 2024 FAA Act requires the Department to "direct all air carriers providing scheduled passenger interstate or intrastate air transportation to establish policies regarding reimbursement for lodging, transportation between such lodging and the airport, and meal costs incurred due to a flight cancellation or significant delay directly attributable to the air carrier." For the purposes of section 512, "significantly delayed" means, "the departure or arrival at the originally ticketed destination associated with such transportation has changed—(1) in the case of a domestic flight, three or more hours after the original scheduled arrival time; and (2) in the case of an international flight, six or more hours after the original scheduled arrival time." As explained earlier in this ANPRM, the Administration views the 2024 FAA Act to "set a floor that the Department of Transportation could build on as deemed appropriate by the Secretary of Transportation."¹²¹

¹¹⁹ See <https://www.transportation.gov/airconsumer/airline-customer-service-dashboard>.

¹²⁰ See, e.g., Alaska Airlines Customer Service Plan, available at <https://www.alaskaair.com/content/about-us/customer-commitment/customer-commitment-delay-care> (guaranteeing a hotel only if the passenger is delayed overnight at "an airport located 100 or more miles away from [the passenger's] home"); American Airlines Customer Service Plan (updated July 19, 2024), available at <https://www.aa.com/i18n/customer-service/support/customer-service-plan.jsp> (guaranteeing a hotel if the passenger is delayed overnight "away from [their] city of residence").

¹²¹ See Statement of Administration Policy, Senate Substitute Amendment to H.R. 3935—FAA Reauthorization Act of 2024 (May 8, 2024), available at <https://www.whitehouse.gov/wp-content/uploads/2024/05/SAP-SSA-HR3935.pdf>.

(a) Service Standards

Consistent with the Administration's position that the 2024 FAA Act is a floor, the Department is considering requiring airlines to guarantee in their customer service plans that they will cover the cost of meals when a controllable cancellation results in passengers waiting for three hours or more for a new flight or when a flight delay results in passengers waiting for three hours or more. This is consistent with the commitments that the large U.S. airlines have made at the urging of DOT. Should the Department use the three-hour delay threshold from the Dashboard for any meal requirements for both domestic and international delays? Or should it apply different thresholds, such as requiring airlines to cover the cost of meals for domestic delays of three hours or more and international delays of six hours or more?

Canadian, EU, and United Kingdom regulatory meal requirements consider waiting time.¹²² Should the Department similarly require airlines to cover more than one meal for longer delays based on actual or expected length of delay, based on a daily per diem allotment per passenger, or based on another metric? Should the Department consider requirements ensuring airlines cover a meal with certain qualities, for example that the meal includes a non-alcoholic beverage and an entrée or that the meal meets the dietary restrictions of the affected passenger?

The Department is also considering requiring airlines to guarantee in their customer service plans that they will cover lodging for passengers affected by an overnight delay or cancellation or reimburse passengers for expenses incurred for lodging. If the Department proposes this approach, how should

¹²² The Canadian regulation currently requires airlines to provide "food and drink in reasonable quantities, taking into account the length of the wait, the time of day and the location of the passenger." See APPRs section 14(1)(a). Similarly, EC 261 requires "meals and refreshments in a reasonable relation to the waiting time." Article 9(1)(a). The EU has further explained that this means that "operating air carriers should provide passengers with appropriate care corresponding to the expected length of the delay and the time of day (or night) at which it occurs, including at the transfer airport in the case of connecting flights, in order to reduce the inconvenience suffered by the passengers as much as possible, while bearing in mind the principle of proportionality." EU Interpretative Guidelines. The United Kingdom's Civil Aviation Authority explains on its website that, in the case of a covered delay or cancellation, the airline must provide passengers with meals and hotel "until it is able to fly you to your destination, no matter how long the delay lasts or what has caused it." See <https://www.caa.co.uk/passengers/resolving-travel-problems/delays-and-cancellations/cancellations/>.

“overnight delay or cancellation” be defined? The Department notes that neither the EU nor Canadian regulations define when a delay is overnight for purposes of their requirements for overnight accommodations. How do those requirements apply in practice in those jurisdictions? Should the Department consider passengers delayed past 10 p.m. or 11 p.m. to be affected by an overnight delay or cancellation and thus entitled to receive lodging, or is there another measure that the Department should consider? Should the original scheduled time of the flight and length of delay be considered in making this determination (e.g., a flight was originally scheduled for 9 p.m. and is delayed for two hours to 11 p.m.)? Should the Department use the three hours for domestic delays and six hours for international delays from the 2024 FAA Act to establish a minimum waiting time that must occur before a passenger would be entitled to receive overnight accommodation? How should the length of the delay impact lodging requirements when a consumer experiences excessive delay (e.g., 12 hours) but the delay is not overnight? Should any requirement to cover lodging be based on the duration of the delay because the passenger may need to obtain lodging for multiple nights during an extended cancellation or delay?

How should the Department define lodging? Should the Department define lodging to include types of accommodation beyond traditional hotels and motels, and if so, what types of accommodation should be included? Are there circumstances when an airline should be required to cover lodging with more than one bedroom for a traveling party, and if so, in what circumstances? How should a traveling party be defined?

In addition, the Department is considering requiring any lodging provided by the airline must be reasonable in quality (*i.e.*, a safe and healthy environment that is accessible to a passenger who self identifies as a person with a disability) and be nearby to the airport, when available. The Department seeks comment on any options that would ensure lodging requirements appropriately address passenger needs, including any standards to determine what is reasonable and nearby for the purposes of lodging, as well as any additional or different requirements that the Department should apply. The Department also requests comment on whether airlines should be required to cover ancillary lodging costs such as

extra bedding, a baby crib, or parking at the lodging, and if so, which ancillary costs should be required to be covered.

The Department is considering allowing airlines to limit lodging to non-local travelers as provided in some current airline policies. If the Department allows airlines to limit lodging to non-local travelers, how should the Department define which travelers are “local”? If the Department does not require airlines to cover the cost of lodging for local travelers, should the Department require airlines to cover travel to and from the passenger’s residence or airport parking costs associated with a controllable cancellation or lengthy, controllable delay for those travelers?

The Department is also considering requiring airlines to guarantee in their customer service plans that they cover transportation to and from lodging to affected passengers, including transportation that is accessible to a passenger who self identifies as a person with a disability. What costs to and from lodging should airlines be required to cover? For example, should airlines be required to cover the cost of shuttle service, driver service such as taxi or ride share, rental car, or gas mileage for the passenger’s vehicle or for friend’s vehicle if picking up the passenger? Should the Department require airlines to cover the cost of a driver service such as a taxi or ride share to and from the lodging in all circumstances, or some circumstances, and if so, which circumstances should not be covered and why? The Department is considering allowing airlines to provide in their policies that they will not cover services if the passenger is provided sufficient advance notice of a cancellation or delay. If the Department proposes this approach, what time period should constitute sufficient advance notice? For example, should the Department allow airlines not to cover meals if the passenger is notified of the delay or cancellation at least 12 hours in advance of the scheduled departure because the passenger is less likely to need to purchase a meal at the airport in that circumstance? Should any differing time periods apply to any requirements for meals and lodging and transportation to and from lodging? If so, why?

What requirements for meals, lodging, and transportation to and from lodging, if any, should apply if a passenger accepts a refund, rather than rebooking, in the event of a controllable cancellation or a lengthy, controllable flight delay?

Should the Department, under its authority to ensure “adequate”

transportation in 49 U.S.C. 41702, extend any requirement that airlines cover the costs of meals, and lodging for overnight delays, and transportation to and from lodging to all cancellations and lengthy flight delays when the passengers are flying domestically, regardless of whether the cancellation or delay is controllable? Why or why not? Are there additional circumstances in which the Department should consider requiring these services?

(b) Upfront Services

The Department is seeking comment on the best way to ensure that passengers receive the services they are entitled to, with minimal expense and hassle. The Department is considering proposing a multi-tiered approach for airlines to provide meals, lodging, and transportation to and from lodging to passengers. Under this approach, an airline would be required to dispense all upfront vouchers or credits for these services as soon as the airline becomes aware of the flight disruption that triggers a passenger’s entitlement to services, and, if the airline does not offer and provide those services upfront, then the airline would be required to reimburse passengers for the cost of those services.

The Department is of the tentative view that passengers are best served when airlines cover the upfront costs of meals, lodging, and travel to and from lodging during flight disruptions so that passengers do not have to pay out of pocket for those services. Passengers may not have the means to pay for these unexpected costs, and some passengers may not be able to navigate the process of procuring some or all these services on their own. Under this option, the required services would be provided by airlines directly through physical or electronic vouchers, e-credits, or other mechanisms that ensure passengers receive the services upfront. The Department is concerned that airlines’ current policies and procedures for distributing services upfront may be inadequate for meeting passengers’ needs and may not be consistently or evenly provided, particularly during widespread flight disruptions. Airlines have disparate policies and processes for distribution and may not plan appropriately to have enough vouchers or credits to provide them to all affected passengers who are entitled to them. Moreover, frontline staff may lack training or instruction regarding when passengers are entitled to each of these services, what services are available upfront, who to prioritize when vouchers or credits are limited, and what costs will be reimbursed when

vouchers or credits run out or are not provided. Additionally, long waits to receive vouchers or credits for services may result in passengers giving up and paying for these services directly themselves.

How should the Department define “upfront” in terms of process and timing? What, if any, requirements might be necessary to ensure that the manner and timeliness of distribution is adequately meeting passengers’ needs? Does this option best address the Department’s concerns, or would an alternate approach better ensure that passengers receive needed services with minimal expense and hassle?

(c) Reimbursements for Services

The Department is contemplating proposing to require airlines to reimburse passengers for costs incurred for meals, lodging, and transportation to and from lodging when the airline fails to offer those services or those services are not offered and provided in a timely manner. In lieu of providing vouchers or credits, some airlines currently reimburse passengers for the costs of the services during wide-spread controllable disruptions. However, airlines do not consistently disclose when passengers are eligible for reimbursements for services and what costs the airlines will reimburse for and how much they will cover. Moreover, because the process for requesting reimbursement is different for each airline, it can be difficult for passengers to navigate, and the timing of the reimbursement payment is discretionary and often lengthy.

The Department believes frustrated and inconvenienced passengers may purchase a service that the airline should be providing if the passenger is unaware of when and where a service or voucher is available. How should any proposed requirements ensure that passengers are aware of the airlines’ obligations to provide a service, so that the consumer would not purchase the service out-of-pocket expecting reimbursement? How should any requirements for airlines to provide reimbursements apply, if at all, if the passenger purchased the service themselves before the airline notifies the passenger that the airline will provide the service? Should the Department require airlines to offer passengers the option of choosing reimbursements even if the airline also offers to provide a service or a voucher for the service? Should airlines be required to provide documentation that the passenger received the service upfront in lieu of reimbursement, if so, what kind of documentation should be required?

(i) Automatic Reimbursements for Services

The Department is considering how reimbursements for services should be provided, including whether reimbursements should be automatic or requested by the passenger. Due to concerns that the process for requesting reimbursements can be cumbersome for passengers, one option would be to require automatic reimbursements in some circumstances without submission of information by the passenger. The Department is considering requiring automatic reimbursement for a minimum amount after an established time period if an affected passenger does not submit receipts of their costs for meals, lodging, or transportation to and from lodging, and the airline has no documentation of the passenger receiving the service upfront. On the other hand, if the passenger submits receipts during that time period, the Department is considering proposing that the airline must reimburse the passenger for those expenses up to a pre-established maximum threshold for each service. The Department invites comment on what time period should apply to the submission of receipts and the minimum and maximum amounts for reimbursement if the Department proposes this approach. In addition, in both scenarios, the Department would consider requiring the airline to provide the reimbursement within a defined period and solicits comment on what that time period should be.

The Department is seeking comment on this approach and what requirements would be necessary to ensure that it produces the expected outcomes for passengers. Under what circumstances, if any, should the Department require airlines to pay reimbursements automatically, without requiring the submission of information by the consumer? How would the automatic payment process work? Would an airline need to obtain a passenger’s bank account information to process a reimbursement? Would cash-equivalent compensation (e.g., a Visa gift card) enable airlines to provide reimbursements without having to obtain passenger information, such as bank account information?

Would establishing minimums and maximums make obtaining meals, lodging, and transportation to and from lodging more predictable for consumers during a cancellation or lengthy delay compared with current airline practices? If it proposes this approach, how should the Department determine the minimum and maximum amounts that airlines must reimburse consumers for these

services? Should these values be nationwide or regional? Should the Department adjust these minimum and maximum values periodically to account for market pricing? Should the values for lodging be adjusted seasonally? Should any minimum payments for meals, lodging, and transportation to and from lodging, apply regardless of whether the consumer submits receipts? If the Department establishes minimum reimbursement amounts, should the Department require that if the airline offers a meal, lodging, or transportation to and from the lodging instead of providing reimbursement for that service, the airline must provide a service with equal value to the minimum reimbursement amount? How should that value be determined? Should the airline be required to provide reimbursement unless they present the passenger with documentation that the passenger received the service upfront?

Instead of requiring reimbursements based on minimum and maximum cost thresholds, should the Department require airlines to provide reimbursements for “reasonable” costs? If so, how should the Department establish the amount of reasonable reimbursements in any proposal? For example, should the Department establish reasonable reimbursement amounts for lodging or meals based on what airlines provide their own crews, based on per diem rates established by the U.S. General Services Administration, or using another methodology?¹²³

(ii) Claims for Reimbursement

For passenger claims for reimbursements supported by receipts, the Department is considering whether it is appropriate to require airlines to approve and pay a complete claim or deny a complete claim, with a written explanation of the airline’s reason for denying the claim if it does so, no later than a set timeframe after the complete claim is received. The Department invites comment on what timeframe should apply if the Department proposes this approach. If the Department does not propose automatic reimbursements for services during a set time period, should it establish a set time period during which passengers must submit claims for reimbursement, and, if so, what should that time period be?

Should the Department place any limits on information that airlines may

¹²³ See <https://www.gsa.gov/travel/plan-book/per-diem-rates>.

request from passengers to process their claims or establish a minimum basis for what qualifies as a “claim” the airline must accept? What other requirements, if any, should the Department establish for any process for consumer-provided information? For example, should the Department require airlines to establish their own policies and procedures for which reimbursements will be approved and not approved, provide opportunity for passengers to resubmit claims if corrections are needed and establish an internal appeals process? Should the Department require that airlines make any claims process streamlined, easy to access, available at any time, and with clear and conspicuous instructions and disclosures of airline policies for compensation or reimbursements? Are there circumstances in which the Department should permit airlines to reject, rather than respond to, submissions that do not provide sufficient information to process the claim? If an airline rejects a claim for reimbursement because they provided the service upfront, should the airline be required to present documentation of the passenger having received the service?

(6) Cancellations and Delays Covered by Foreign Legal Requirements

As previously discussed, EU and Canadian regulations require services and compensation similar to those on which the Department solicits comment in this ANPRM. How can the Department best avoid duplicative burdens on airlines? Are there provisions that are needed to ensure passengers receive favorable outcomes when more than one law applies to a controllable cancellation or lengthy controllable delay?

Both the EU and Canadian regulations limit entitlement to compensation if the passenger has already received compensation for the same delay or cancellation in another jurisdiction.¹²⁴ The EU regulation also limits entitlement to other services if the passenger has already received that service for the same delay or cancellation under another regime.¹²⁵

¹²⁴ See CTA, Air Passenger Protection Regulations—Regulatory Impact Analysis Statement, available at <https://otc-cta.gc.ca/eng/air-passenger-protection-regulations-regulatory-impact-analysis-statement> (noting that “passengers would only be able to receive compensation . . . if they have not already received compensation for the same event under a different regime”), see also EC No 261/2004, Article 3.1(b). Canadian regulations clarify that mere eligibility for compensation under another jurisdiction’s law is not a permissible basis for refusing compensation. See APPRs, ¶ 3(3).

¹²⁵ EC No 261/2004, Article 3.1(b); see also EU Interpretive Guidelines at C 214/7.

The European Commission has further clarified that if a passenger accepts only compensation or a service (but not both) under a different regime, the passenger’s entitlement to receive the compensation or service not accepted is unaffected under EU law.¹²⁶ Should the Department adopt similar limits to those under EU and Canadian regulations? How do these limits operate in practice? Can airlines efficiently provide a consumer their choice of benefits when more than one jurisdiction’s regulation applies to an event?

The Department is considering whether to require the airline to notify passengers of any differences in value of reimbursements, services, and compensation owed under any DOT requirements and the law of a foreign jurisdiction, if applicable, so that passengers would have the ability to accept a reimbursement, service, or compensation on an informed basis when the laws of multiple jurisdictions apply. The Department seeks comment on whether these options are appropriate, feasible for airlines, and benefit consumers, particularly if the Department were to decide to require automatic compensation and reimbursements. Would the value of services, such as lodging or a meal, likely be the same under any DOT-imposed requirement and the law of a foreign jurisdiction?

(7) Information Provided to Passengers

The Department is concerned that airlines do not sufficiently inform passengers about their rights when there are controllable cancellations and lengthy delays that entitle passengers to services such as meals, lodging, and rebooking. To address harm to consumers, the Department solicits comment on whether to require airlines to: (1) notify passengers of the required or promised services, (2) disclose proactively whether the cancellation or delay is controllable and would entitle passengers to services, (3) respond to passengers’ questions about reasons for disruptions and whether they qualify for services, (4) make information about services and reimbursements clear, easy to find, and accurate, and (5) explain the differences, if there are any, in the policies between codeshare partners for services and reimbursements.

If the Department requires airlines to provide compensation or rebooking without charge or to cover the costs of meals, lodging, and transportation to and from lodging, should the Department require notifications of available compensation, rebooking, or

costs of meals, lodging, and transportation to and from lodging? As discussed earlier in this ANPRM, at the December 2022 ACPAC meeting, the ACPAC recommended that the Department issue a regulation requiring airlines to notify affected consumers of the availability of services and amenities for controllable delays and cancellations, with three of the four members voting in favor of the recommendation.¹²⁷ The Department is considering requiring airlines to promptly notify consumers when a required service, reimbursement, or compensation is owed. The Department is considering requiring airlines to provide such notification when the airline expects that an entire flight segment will be subject to a controllable cancellation or delay that would entitle the passengers to services, reimbursements, and compensation. As an alternative, the Department is also considering instead requiring individualized notifications when only some passengers on a flight would be owed compensation, rebooking, or a service (e.g., when some passengers on a flight miss a connecting flight due to a controllable cancellation or delay) and seeks comment on whether it is feasible for airlines to do so. Are there challenges to providing individualized notifications or to providing these notifications to passengers who purchase air transportation from ticket agents, and if so, how should the Department address such challenges? What would be the costs for airlines to provide individualized notifications?

Where and by what means should any required notifications be provided? The Department is considering requiring that airlines provide notifications on the carrier’s primary website, to passengers who contact the airline’s customer service representative, at the boarding gate area, and/or through a method that the passenger has elected to receive flight status notifications. Should these or different notification methods apply? Should the Department require airlines to establish reasonable policies, procedures, and/or training for airline customer service staff to ensure that staff provide passengers proper notification of available reimbursements, compensation, and services and provide services promptly where applicable? If airlines are permitted to require passengers to affirmatively request compensation or services, should airlines be required to

¹²⁷ See ACPAC December 8 and 9, 2022 Meeting Minutes at 26, available at <https://www.regulations.gov/document/DOT-OST-2018-0190-0110>.

¹²⁶ EU Interpretive Guidelines at C 214/7.

proactively provide information on how to make that request or provide a link or other avenue for submitting the request in any notification regarding the cancellation or delay? The Department also requests comment on what requirements are needed to ensure passengers who identify to airlines as persons with disabilities receive effective notification.

What timing requirements, if any, should apply to any notifications? The Department is considering a proposal that notifications for reimbursements, services, and compensations must be promptly provided to consumers. If the Department should require prompt notifications, is additional clarification needed regarding when a notification is “prompt?” Should the Department establish a set timeframe following the occurrence of a cancellation or delay during which an airline must provide any required notifications? The Department would expect airlines to begin to provide notifications soon after the delay or cancellation rather than hours after it. Should different timeframes apply to any notifications about compensation and to any notifications about rebooking or services that are likely needed during or soon after the delay or cancellation?

Should the Department require airlines to notify passengers in real time of the specific cause of a lengthy delay or cancellation? If so, how can the Department ensure that information provided by the airline is accurate?

(8) Timely Customer Service

Section 505 of the 2024 FAA Act requires that air carriers selling tickets for scheduled passenger air transportation on an aircraft that, as originally designed, has a passenger capacity of 30 or more seats must maintain, without charge and available at all times: (1) a customer service telephone line staffed by live agents, (2) a customer chat option that allows for customers to speak to a live agent within a reasonable time, to the greatest extent practicable, or (3) a monitored text messaging number that enables customers to communicate and speak with a live agent directly. Section 505 authorizes DOT to issue such rules as may be necessary to carry out the requirement and provides that airlines must comply with section 505’s requirements “without regard to whether the Secretary has promulgated any rules to carry out” section 505.

In enforcement matters, the Department has taken the position that the practice of not providing adequate customer service assistance when a carrier cancels or significantly changes

a passenger’s flight is an unfair practice and also that the practice is deceptive when a carrier advertises a particular service to consumers as an available means of obtaining customer service assistance and fails to provide that service or fails to provide the service within a reasonable time period.¹²⁸ However, the Department’s regulations do not currently set forth specific requirements for timely customer service assistance or contain provisions addressing section 505 of the 2024 FAA Act. The Department is considering whether to propose minimum timely customer service requirements, particularly for passengers affected by cancellations and delays. Should the Department establish specific minimum wait times for customer service during or after a cancellation or lengthy delay, and what should the minimum wait times be or what should minimum wait times be based on? Should any minimum customer service wait time be based on the type of customer service the passenger seeks, for example, customer service about rebooking, refunds, compensation, etc.? Should the Department consider requiring airlines to make call center service available at all times during a disruption, regardless of whether the other means of assistance are available as well? Should the Department consider as an option letting airlines determine a minimum standard of customer service and requiring the airline to put it in their customer service plan? The Department invites comments on these options for improving the timeliness of customer service.

(9) Reporting and Recordkeeping

What recordkeeping and reporting requirements should apply to the areas covered by this ANPRM, if any? The Department is considering proposing that airlines must submit periodic reports regarding compliance with any requirements adopted. The intent of this option would be to enable the Department to monitor airline implementation of and compliance with any requirements effectively and efficiently and to facilitate enforcement of noncompliance, when appropriate. Such reports may include, for example, information about cancellations and lengthy flight delays that the airline determined were controllable and not controllable and the specific bases for the carrier’s determinations; information about notifications, services, reimbursements, and compensation provided; and information about

requests for services and claims for reimbursements and/or compensation, including the airline’s responses. Should the Department require reports and, if so, should the Department require airlines to report on a fixed interval? Should different reporting requirements, if any, apply to foreign carriers, and, if so, why?

Regulatory Notices

A. Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The Office of Management and Budget (OMB) has determined that this ANPRM is a significant regulatory action under Executive Order 12866. Executive Order 12866 requires agencies to provide a meaningful opportunity for public participation. Accordingly, we have asked commenters to answer a variety of questions to elicit practical information about alternative approaches and relevant data. These comments will help the Department evaluate whether a NPRM is needed and if so, the content of the NPRM. If the Department issues a NPRM after the completion of the comment period on this ANPRM, it will prepare a regulatory impact analysis for the proposed rule, assessing the potential benefits, costs, and transfers. The Department seeks any information, data, and analysis that would help the Department understand the economic impacts of the potential regulatory options discussed within this ANPRM.

B. Executive Order 13132 (Federalism)

This ANPRM has been analyzed in accordance with the principles and criteria contained in Executive Order 13132 (“Federalism”). This ANPRM does not propose any requirement that (1) has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government, (2) imposes substantial direct compliance costs on State and local governments, or (3) preempts State law. States are already preempted from regulating in this area by the Airline Deregulation Act, 49 U.S.C. 41713. Therefore, the consultation and funding requirements of Executive Order 13132 do not apply.

C. Executive Order 13175

This ANPRM has been analyzed in accordance with the principles and criteria contained in Executive Order 13175 (“Consultation and Coordination with Indian Tribal Governments”). Because none of the options on which we are seeking comment would

¹²⁸ See *Southwest Airlines Co.*, DOT Order No. 2023–12–11, Consent Order (Dec. 15, 2023).

significantly or uniquely affect the communities of the Indian Tribal governments or impose substantial direct compliance costs on them, the funding and consultation requirements of Executive Order 13175 do not apply.

D. Regulatory Flexibility Act

When a Federal agency is required to publish a notice of proposed rulemaking (5 U.S.C. 553), the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires the agency to conduct an initial regulatory flexibility analysis (IRFA). An IRFA describes the impact of the rule on small entities (5 U.S.C. 603). An IRFA is not required if the agency head certifies that a rule will not have a significant economic impact on a substantial number of small entities (5 U.S.C. 605). Under the Regulatory Flexibility Act, carriers that exclusively provide air transportation with aircraft originally designed to have a maximum passenger capacity of 60 seats or less or a maximum payload capacity of 18,000 pounds or less are small businesses.¹²⁹ If the Department proposes to adopt the consumer protections discussed in this ANPRM, it is possible that it may have some impact on small entities. We invite comment to facilitate DOT's assessment of the potential impact of adopting the possible regulatory requirements discussed in this ANPRM on small entities.

E. Paperwork Reduction Act

Under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), no person is required to respond to a collection of information unless it displays a valid OMB control number. This ANPRM is not covered by the Paperwork Reduction Act because it does not propose any new information collection burdens. If the Department proposes to adopt information collections in a NPRM, the burdens associated with such a collection will be analyzed at that time.

F. Unfunded Mandates Reform Act

The Department has determined that the requirements of Title II of the Unfunded Reform Act of 1995 do not apply to this document.

G. National Environmental Policy Act

The Department has analyzed the environmental impacts of this ANPRM pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*) and has determined that it is categorically excluded pursuant to DOT Order 5610.1C, Procedures for Considering Environmental Impacts (44

FR 56420, Oct. 1, 1979). Categorical exclusions are actions identified in an agency's NEPA implementing procedures that do not normally have a significant impact on the environment and therefore do not require either an environmental assessment (EA) or environmental impact statement (EIS).¹³⁰ In analyzing the applicability of a categorical exclusion, the agency must also consider whether extraordinary circumstances are present that would warrant the preparation of an EA or EIS.¹³¹ Paragraph 4(c)(6)(i) of DOT Order 5610.1C provides that "actions relating to consumer protection, including regulations" are categorically excluded. The Department does not anticipate any environmental impacts, and there are no extraordinary circumstances present in connection with this rulemaking.

Signed this 3rd day of December, 2024, in Washington, DC.

Peter Paul Montgomery Buttigieg,

Secretary of Transportation.

BILLING CODE 4910-9X-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG-117213-24]

RIN 1545-BR37

Accounting for Disregarded Transactions Between a Qualified Business Unit and Its Owner

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the determination of taxable income or loss and foreign currency gain or loss with respect to a qualified business unit. The proposed regulations include an election that is intended to reduce the compliance burden of accounting for certain disregarded transactions between a qualified business unit and its owner. This document also includes a request for comments relating to the treatment of partnerships and controlled foreign corporations.

DATES: Written or electronic comments and requests for a public hearing must be received by March 11, 2025.

ADDRESSES: Commenters are strongly encouraged to submit public comments

electronically via the Federal eRulemaking Portal at <https://www.regulations.gov> (indicate IRS and REG-117213-24) by following the online instructions for submitting comments. Requests for a public hearing must be submitted as prescribed in the "Comments and Requests for a Public Hearing" section. Once submitted to the Federal eRulemaking Portal, comments cannot be edited or withdrawn. The Department of the Treasury (Treasury Department) and the IRS will publish for public availability any comments submitted to the IRS's public docket. Send paper submissions to: CC:PA:01:PR (REG-117213-24), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations, Adam G. Province at (865) 329-4546; concerning submissions of comments, requests for a public hearing, and access to a public hearing, Publications and Regulations Section at (202) 317-6901 (not toll-free numbers) or by email to publichearings@irs.gov (preferred).

SUPPLEMENTARY INFORMATION:

Authority

This document contains proposed additions and amendments to 26 CFR part 1 (Income Tax Regulations) addressing the application of section 987 of the Internal Revenue Code (Code) and related provisions (the "proposed regulations"). The additions and amendments are issued under sections 987 and 989, pursuant to the express delegations of authority provided under those sections. The express delegations relied upon are referenced in the Background section of this preamble. The proposed regulations are also issued under the express delegation of authority under section 7805 of the Code.

Background

This document contains proposed regulations under section 987 of the Code. Section 987 applies to any taxpayer that has a qualified business unit (QBU) with a functional currency other than the dollar. Section 987(1) and (2) provide rules for determining and translating taxable income or loss ("section 987 taxable income or loss") with respect to the QBU. In addition, foreign currency gain or loss must be determined under section 987(3) ("section 987 gain or loss"), which requires proper adjustments (as prescribed by the Secretary) for transfers of property between QBUs of the

¹²⁹ See 14 CFR 399.73.

¹³⁰ See 40 CFR 1508.4.

¹³¹ *Id.*

taxpayer having different functional currencies.

Sections 987 and 989 provide several explicit grants of regulatory authority. The statute does not specify how the proper adjustments should be made under section 987(3), but instead directs the Secretary to prescribe the proper adjustments needed to determine the taxable income of the owner of a section 987 QBU. Section 989(c) directs the Secretary to “prescribe such regulations as may be necessary or appropriate to carry out the purposes of this subpart.”¹ The grants of authority in section 989(c) include regulations providing for the appropriate treatment of related party transactions (including transactions between QBUs of the same taxpayer). Section 989(c)(5).

Concurrently with the publication of these proposed regulations, the Treasury Department and the IRS are publishing in the rules and regulations section of this edition of the **Federal Register** (RIN 1545–BO07) final regulations under sections 861, 985, 987 through 989, and 1502 of the Code (the “final regulations”). On November 14, 2023, the Treasury Department and the IRS published proposed regulations (REG–132422–17) under those same sections of the Code (the “2023 proposed regulations”) in the **Federal Register** (88 FR 78134). The comments received in response to the 2023 proposed regulations, and the revisions made in response to those comments, are summarized in the Summary of Comments and Explanation of Revisions in the preamble to the final regulations. In response to certain comments, the Treasury Department and the IRS are publishing this notice of proposed rulemaking to provide additional proposed rules under section 987 and to request comments relating to the application of section 987 to partnerships and controlled foreign corporations (“CFCs”).

Explanation of Provisions

The proposed regulations provide an election under which, in certain cases, taxpayers can translate a group of frequently recurring transfers between a section 987 QBU and its owner using the yearly average exchange rate (rather than the spot rate applicable on the date of each transfer). The proposed regulations also would simplify the computation of unrecognized section 987 gain or loss under § 1.987–4 for taxpayers that make this election.

I. Rules of the Final Regulations Relating to Disregarded Transactions

A. Accounting for Disregarded Transactions Between a Section 987 QBU and Its Owner

Under the final regulations, an asset is treated as transferred to a section 987 QBU from its owner if, because of a disregarded transaction, the asset is reflected on the books and records of the section 987 QBU. *See* § 1.987–2(c)(2)(i). Similarly, an asset is treated as transferred from a section 987 QBU to its owner if, because of a disregarded transaction, the asset ceases to be reflected on the books and records of the section 987 QBU. Thus, for example, if a section 987 QBU purchases inventory from its owner (or another eligible QBU of its owner) in a disregarded transaction, the section 987 QBU is treated as distributing cash to its owner, and the owner is treated as contributing the inventory to the section 987 QBU. Disregarded transactions, however, do not give rise to items of income, gain, deduction, or loss that are taken into account in determining section 987 taxable income or loss under § 1.987–3. *See* § 1.987–2(c)(2)(iii).

The final regulations provide rules for determining the basis of an asset or the amount of a liability that has been transferred by an owner to a section 987 QBU. In general, marked items are translated into the section 987 QBU’s functional currency at the spot rate applicable on the date of the transfer, while historic items are translated at the applicable historic rate. *See* § 1.987–2(d). Similarly, when an asset or liability is transferred from a section 987 QBU to its owner, marked items are translated into the owner’s functional currency at the spot rate applicable on the date of transfer, while historic items are translated at the applicable historic rate. *See* § 1.987–5(f). These rules apply to all transfers of assets and liabilities between a section 987 QBU and its owner, including transfers made in connection with ordinary course disregarded transactions (for example, sales of inventory).

The definition of a marked item under the final regulations includes an asset or liability denominated in, or determined by reference to, the functional currency of the section 987 QBU that would be a section 988 transaction if it were held or entered into directly by the owner of the section 987 QBU; it also includes several other categories of assets and liabilities. *See* § 1.987–1(d)(1). However, the final regulations provide an election to treat all items of a section 987 QBU as marked items (the “current rate election”). *See* § 1.987–1(d)(2).

B. Determination of Unrecognized Section 987 Gain or Loss With Respect to a Section 987 QBU

Section 1.987–4 provides rules for computing net unrecognized section 987 gain or loss with respect to a section 987 QBU. Under § 1.987–4(b), net unrecognized section 987 gain or loss is equal to the sum of (i) the unrecognized section 987 gain or loss for the current taxable year and (ii) net accumulated unrecognized section 987 gain or loss for all prior taxable years.

Section § 1.987–4(d) provides a ten-step formula for computing unrecognized section 987 gain or loss for the current taxable year. The first step of this formula is to determine the change in owner functional currency net value (“OFCNV”) of the section 987 QBU for the taxable year, computed using end-of-year exchange rates for marked items and historic rates for historic items. *See* § 1.987–4(d)(1) and (e). The other steps adjust for amounts comprising the separate components of the annual change in OFCNV (other than changes in the exchange rate). Steps 2 through 5 relate to transfers of assets and liabilities between a section 987 QBU and its owner, and steps 6 through 9 relate to items of income or loss of the section 987 QBU. *See* § 1.987–4(d)(2) through (9). Step 10 is a residual adjustment for any remaining increase or decrease to the section 987 QBU’s functional currency balance sheet. This residual adjustment is translated into the owner’s functional currency using the yearly average exchange rate for the taxable year. *See* § 1.987–4(d)(10).

In applying steps 2 through 5, an owner must account for all transfers of assets and liabilities between a section 987 QBU and its owner, including transfers made in connection with ordinary course disregarded transactions. *See* § 1.987–4(d)(2) through (5). For this purpose, marked items are translated into the owner’s functional currency at the spot rate applicable on the date of the transfer, while historic items are translated at the applicable historic rate.

II. Proposed Rules Relating to Disregarded Transactions

A. Comment Concerning the Compliance Burden of Accounting for Disregarded Transactions

A comment to the 2023 proposed regulations asserted that it is burdensome for taxpayers to track and translate disregarded transactions between a section 987 QBU and its owner (or between different section 987 QBUs of the same owner) that arise in

¹ The reference to “this subpart” refers to subpart J of part III of subchapter N of chapter 1 of the Code, which includes section 987.

the ordinary course of a section 987 QBU's trade or business. The comment recommended that, for taxpayers that make a current rate election, unrecognized section 987 gain or loss for the taxable year should be computed by applying only two of the steps provided in § 1.987-4(d): step 1 (determining the change in OFCNV) and step 10 (reducing or increasing the amount determined in step 1 by the change in QBU net value, translated into the owner's functional currency at the yearly average exchange rate). The comment asserted that, under this approach, it would not be necessary to track ordinary course disregarded transactions between a section 987 QBU and its owner (or different section 987 QBUs of the same owner), because those transactions would be eliminated from the computation of unrecognized section 987 gain or loss.

As explained in the preamble to the final regulations, the effect of the comment's recommended rule would be to translate the net amount of all transfers between a section 987 QBU and its owner at the yearly average exchange rate under step 10. *See* part V.A.3 of the Summary of Comments and Explanation of Revisions in the preamble to the final regulations. By contrast, § 1.987-4(d) requires each transfer to be translated at the appropriate exchange rate in applying steps 2 through 5. Under the final regulations, if a current rate election is in effect, the basis of each asset and the amount of each liability transferred is translated at the spot rate applicable on the date of transfer (because all assets and liabilities are treated as marked items). The final regulations do not adopt the rule recommended by the comment because the applicable spot rate could be significantly higher or lower than the yearly average exchange rate, in which case the comment's recommended rule could substantially distort the computation of unrecognized section 987 gain or loss.

B. Recurring Transfer Group Election

Notwithstanding the concern described in part II.A of this Explanation of Provisions, the Treasury Department and the IRS are of the view that, in certain cases, a group of frequently recurring transfers between a section 987 QBU and its owner could be translated using the yearly average exchange rate without creating significant distortions. Further, permitting taxpayers to use the yearly average exchange rate in lieu of the applicable spot rate would reduce the compliance burden of the section 987 regulations.

Therefore, the proposed regulations would provide that a taxpayer that has made a current rate election may elect to use the yearly average exchange rate to translate assets that are transferred between a section 987 QBU and its owner as part of a recurring transfer group (a "recurring transfer group election"). Proposed § 1.987-2(f)(1). The recurring transfer group election would be subject to the general timing and consistency requirements provided in § 1.987-1(g) of the final regulations.

If a recurring transfer group election is in effect, assets transferred between a section 987 QBU and its owner as part of a recurring transfer group ("grouped assets") are translated under §§ 1.987-2(d), 1.987-4(d)(2), and 1.987-5(f) using the yearly average exchange rate in lieu of the applicable spot rate. Proposed § 1.987-2(f)(4). In addition, proposed § 1.987-2(f)(5)(i) would provide that transfers made as part of a recurring transfer group are disregarded for purposes of § 1.987-4(d)(2) and (3) (steps 2 and 3). Proposed § 1.987-2(f)(5). That is, because all transfers that are part of a recurring transfer group are translated at the yearly average exchange rate, these transfers do not need to be separately tracked and translated for purposes of determining unrecognized section 987 gain or loss.

Transfers that are part of a recurring transfer group are also disregarded when applying steps 2 and 3 in the functional currency of the section 987 QBU for purposes of determining the residual increase or decrease to net assets under § 1.987-4(d)(10). Proposed § 1.987-4(d)(10)(ii)(D). To the extent that these transfers increase or reduce the year-end net assets of the section 987 QBU (determined in the section 987 QBU's functional currency), the residual increase or decrease to net assets will be translated at the yearly average exchange rate under § 1.987-4(d)(10) (step 10).

Under the proposed regulations, if a recurring transfer group election is in effect, and the only transfers between a section 987 QBU and its owner are part of a recurring transfer group, the owner would determine unrecognized section 987 gain or loss for the taxable year by applying only steps 1 and 10 (as recommended by the comment). Transfers that are not part of a recurring transfer group must be taken into account at the applicable spot rate under steps 2 through 5. However, the final regulations permit taxpayers to use a spot rate convention based on the average of spot rates for a reasonable period (which can be as long as three months), which should reduce the

compliance burden of accounting for these transfers. *See* § 1.987-1(c)(1)(ii).

The special rule for computing unrecognized section 987 gain or loss in proposed § 1.987-2(f)(5)(i) would not apply if the owner of a section 987 QBU determines QBU net value using the formula provided in § 1.987-4(e)(2)(iii). Proposed § 1.987-2(f)(5)(ii). Taxpayers using this formula must separately track each transfer for purposes of computing QBU net value, and therefore disregarding the transfers for purposes of § 1.987-4(d)(2) and (3) would not reduce the compliance burden for these taxpayers.

The proposed regulations also would modify the recordkeeping requirements in § 1.987-9 to provide that taxpayers are not required to maintain records concerning amounts transferred between an owner and a section 987 QBU unless the transferred amounts are taken into account in applying § 1.987-4 or § 1.987-5. Proposed § 1.987-9(b)(5) and (6). Therefore, if a taxpayer makes a recurring transfer group election and uses the alternative calculation provided in § 1.987-5(c)(2) (under which the remittance for a taxable year is determined by reference to the change in QBU net value, adjusted for income or loss of the section 987 QBU), the taxpayer generally would not be required to maintain records with respect to transfers of grouped assets.

C. Definition of a Recurring Transfer Group

Under the proposed regulations, a recurring transfer group would be defined as a group of frequently recurring transfers between a section 987 QBU and its owner (or another eligible QBU of the owner) that are made in the ordinary course of a trade or business. Proposed § 1.987-2(f)(2)(i). Only transfers made in connection with sales of inventory, payments for services, or rent or royalty transactions in which arm's length compensation (determined by applying the principles of the arm's length standard of § 1.482-1(b)(1)) has been paid would be included in a recurring transfer group. Proposed § 1.987-2(f)(2)(ii). For this purpose, the principles of the arm's length standard apply as if the section 987 QBU were a corporation that is separate from its owner and, thus, as if the disregarded transaction were a controlled transfer within the meaning of § 1.482-1(i)(8). A recurring transfer group would not include a transfer between the section 987 QBU and its owner if the transfer (or a portion of the transfer) would be treated as a distribution with respect to stock, or an exchange for stock (or a contribution to

capital), for U.S. tax purposes if the QBU were treated as a separate corporation. Proposed § 1.987–2(f)(2)(iii). Those transfers are unlikely to be made in the ordinary course of a trade or business and could be used to manipulate the computation of unrecognized section 987 gain or loss.

The definition of a recurring transfer group in § 1.987–2(f)(2) is tailored to identify ordinary business transactions for which the use of the yearly average exchange rate would not cause significant distortions and which could be burdensome to account for under the rules of the final regulations. The Treasury Department and the IRS request comments as to whether other transfers should be included in a recurring transfer group. For example, comments are requested as to whether intercompany lending transactions (or other transactions) of a bank or other financial entity should be included in a recurring transfer group and, if so, how the scope of the covered transactions should be defined. Although lending transactions are made in the ordinary course of a bank's trade or business, it may be difficult to distinguish between ordinary course loans and extraordinary transactions that could be used to manipulate a taxpayer's unrecognized section 987 gain or loss.

D. Exception for Disproportionate Transfers

The rules of proposed § 1.987–2(f)(4) and (5) would not apply in a taxable year in which a disproportionate amount of the assets transferred as part of a recurring transfer group are transferred during one or more quarters of the taxable year. Proposed § 1.987–2(f)(6). In particular, proposed § 1.987–2(f)(4) and (5) would not apply if either (i) more than 50 percent of the total amount transferred during the taxable year is transferred during one quarter of the taxable year or (ii) more than 80 percent of the total amount transferred during the taxable year is transferred during two quarters of the taxable year.

The exception in proposed § 1.987–2(f)(6) is intended to prevent significant distortions that could arise from using the yearly average exchange rate to translate transfers that primarily occur in only part of the taxable year, while being flexible enough to accommodate ordinary course disregarded transactions between a section 987 QBU and its owner. The Treasury Department and the IRS request comments as to whether other standards could be used to identify transfers that can appropriately be translated at the yearly average exchange rate. For example, comments are requested as to whether

more flexibility should be provided in taxable years in which exchange rates do not significantly fluctuate.

Applicability Dates

Once finalized, the regulations would apply to taxable years beginning after the date the Treasury Decision adopting these rules as final regulations is published in the **Federal Register**. A taxpayer may rely on these proposed regulations for a taxable year in which the final regulations (that is, the final regulations that are being published concurrently with the proposed regulations) apply, provided the taxpayer and each member of its consolidated group and section 987 electing group, as applicable, consistently follow the proposed regulations in their entirety and in a consistent manner.

In addition, for a taxable year in which the final regulations apply, a taxpayer may continue to rely on the parts of the proposed regulations published in the **Federal Register** (REG–128276–12, 81 FR 88882) on December 8, 2016 (the “2016 proposed regulations”) that have not been finalized or withdrawn, provided that the taxpayer and each member of its consolidated group and section 987 electing group, as applicable, consistently follow these parts in their entirety and in a consistent manner. The following parts of the 2016 proposed regulations have not been finalized or withdrawn: (1) rules regarding QBUs with the U.S. dollar as their functional currency (*see* §§ 1.987–1 and 1.987–6 of the 2016 proposed regulations); and (2) rules requiring the deferral of certain section 988 loss that arises with respect to related-party loans (*see* § 1.988–2 of the 2016 proposed regulations).

Comments and Request for Public Hearing

I. In General

Before these proposed regulations are adopted as final regulations, consideration will be given to comments that are submitted timely to the IRS as prescribed in this preamble under the **ADDRESSES** heading. In addition to the specific requests for comments in parts II.C and II.D of the Explanation of Provisions, the Treasury Department and the IRS request comments on all other aspects of the proposed regulations as well as on the specific issues identified in part II of this Comments and Request for Public Hearing section. Any comments submitted will be made available at <https://www.regulations.gov> or upon request.

A public hearing concerning the proposed regulations will be scheduled if requested in writing by any person who timely submits electronic or written comments. Requests for a public hearing are also encouraged to be made electronically. If a public hearing is scheduled, notice of the date and time for the public hearing will be published in the **Federal Register**.

II. Additional Requests for Comments

A. Treatment of Partnerships for Purposes of Sections 987 and 989(a)

The final regulations do not provide detailed rules concerning the application of section 987 to partnerships, and they reserve on the treatment of a partnership as a QBU under section 989(a). *See* part VIII.B.1 of the Summary of Comments and Explanation of Revisions in the preamble to the final regulations. *See* also part VIII of the Explanation of Provisions in the preamble to the 2023 proposed regulations. The Treasury Department and the IRS continue to study those issues and therefore request comments on the following topics:

1. Should section 987 be applied to partnerships using an entity approach, an aggregate approach, or a hybrid approach? Comments recommending an entity approach should address the concerns raised in the preamble to the 2023 proposed regulations regarding the potential for unrecognized section 987 gain or loss to be shifted between partners upon a sale of a partnership interest. *See* part VIII.C of the Explanation of Provisions in the preamble to the 2023 proposed regulations.

2. Should a partnership be treated as a per se QBU under section 989(a) and § 1.989(a)–1(b)(2)(i)?

3. Should different rules be provided for purposes of sections 987 and 989(a) depending on whether the partners in the partnership are related parties? Comments recommending an entity approach for partnerships owned by related parties should address the concerns raised in the preamble to the 2023 proposed regulations regarding the potential for a group of related parties to hold an eligible QBU through a partnership (rather than directly) in order to alter the section 987 treatment of the eligible QBU without meaningfully altering the group's economic position. *See* part VIII.E of the Explanation of Provisions in the preamble to the 2023 proposed regulations.

4. Under an entity approach, if a partnership's functional currency differs from that of its partners, how should the

partners account for currency gain or loss with respect to their partnership interests?

Comments submitted in response to the 2023 proposed regulations do not need to be resubmitted in response to these proposed regulations.

B. Application of Section 987 to CFCs

As discussed in part II.A.3 of the Summary of Comments and Explanation of Revisions in the preamble to the final regulations, a comment on the 2023 proposed regulations recommended that the application of section 987 be simplified by applying rules similar to section 986(c) to section 987 QBUs owned by CFCs in lieu of applying section 987. In response to this comment, the preamble to the final regulations explained that the Treasury Department and the IRS are of the view that it would not be feasible to adopt this comment, but nonetheless are studying whether there are instances in which it would be possible to simplify the application of section 987 by modifying the application of section 987(3) (and the related regulations, including §§ 1.987–4 through 1.987–6, 1.987–8, and 1.987–11 through 1.987–13) to certain entities.

In considering the appropriateness of such a rule, it is helpful to consider United States persons (“U.S. persons”) and foreign persons separately. In the case of a U.S. person, except to the extent that the Code specifically provides otherwise, the taxable income of the U.S. person should reflect that person’s accession to wealth, as measured in the U.S. dollar. Accordingly, when the amount of the U.S. person’s basis in its assets or the amount of its liabilities fluctuates as a result of fluctuations in the functional currency of a section 987 QBU, section 987(3) is necessary to ensure that currency gain or loss is taken into account to prevent these fluctuations from artificially increasing or decreasing the taxpayer’s income, gain, deduction, and loss, as measured in the U.S. dollar. In contrast, in the case of a foreign person, such as a CFC or a partnership with only foreign partners, the Treasury Department and the IRS are studying whether the U.S. tax system appropriately tracks and taxes the foreign person’s accession to wealth given that its functional currency may not be the U.S. dollar.

The Treasury Department and the IRS agree with the comment that the compliance and administrative burdens of the section 987 regulations would be substantially reduced if section 987(3) and the related regulations did not apply to CFCs or to partnerships with

only foreign partners. Under such an approach, a CFC or a partnership with only foreign partners would not calculate net unrecognized section 987 gain or loss with respect to a section 987 QBU and would not recognize section 987 gain or loss on a remittance or termination. Instead, if a section 987 QBU owned by the CFC or partnership transferred assets or liabilities to its owner, the CFC or partnership would merely take a basis in the assets or measure the amount of the liabilities by translating from the section 987 QBU’s functional currency into the CFC or partnership’s functional currency at the spot rate on the date of the transfer.

Relatedly, the Treasury Department and the IRS are concerned about the ability of foreign entities to manipulate the recognition of section 987 gain and loss under section 987(3) and the related regulations. This concern is not entirely alleviated by the loss-to-the-extent-of-gain-rule in § 1.987–11, which suspends the recognition of section 987 loss for taxpayers that make a current rate election.

Accordingly, the Treasury Department and the IRS are studying whether, in certain cases, it would be appropriate to not apply section 987(3) and the related regulations to CFCs and partnerships with only foreign partners. However, the Treasury Department and the IRS have a number of concerns, including that, under this approach, the amount of currency gain (or loss) that would have been taken into account under section 987(3) would give rise to an increase (or decrease) in a CFC’s aggregate inside asset basis without a corresponding change in the CFC’s earnings and profits, and the resulting mismatch between inside asset basis and earnings and profits could produce inappropriate results.

For example, over time, it would be common for a CFC’s aggregate inside asset basis to be greater or less than the sum of its (i) earnings and profits determined under the principles of § 1.367(b)–2(d) but without regard to whether the exchanging shareholder is a U.S. person or foreign person, (ii) total basis in the stock of the CFC; and (iii) the amount of the CFC’s liabilities. Although it is possible for a CFC to have aggregate inside asset basis in excess of these amounts (“excess asset basis”)² under current law, the Treasury Department and the IRS are concerned that, if CFCs were not required to recognize currency gain or loss under

section 987(3), excess asset basis would become more prevalent. If the United States shareholder (“U.S. shareholder”) ultimately sells its stock in the CFC, the U.S. shareholder would generally recognize the appropriate amount of gain or loss on the sale of stock (notwithstanding the potential excess asset basis of the CFC). However, if, in lieu of a sale of stock, the CFC merges or liquidates into a domestic corporation pursuant to an inbound asset reorganization or liquidation described in § 1.367(b)–3, the excess asset basis could be imported into the United States without a corresponding inclusion of income or gain under § 1.367(b)–3, and thus permanently escape U.S. taxation.

Accordingly, the Treasury Department and the IRS request comments concerning the following topics:

1. Should the final regulations be modified to provide that section 987(3) and the related regulations do not apply to CFCs or to partnerships with only foreign partners? If so, how should currency gain or loss be recognized with respect to the section 987 QBU (if at all)?

2. If section 987(3) did not apply to CFCs and partnerships with only foreign partners, what other rules would be needed to prevent value equal to the amount of excess asset basis from permanently escaping U.S. taxation upon an inbound transaction such as an asset reorganization or liquidation described in § 1.367(b)–3? For example, should the importation of excess asset basis trigger the recognition of gain in the same manner that § 1.367(b)–3 triggers a deemed dividend to a shareholder? If so, are there circumstances in which excess asset basis should not trigger gain (such as excess asset basis arising by reason of section 362(e) or by reason of minority interests)? How should excess asset basis be computed? What additional rules would be needed to similarly prevent taxpayers from planning into the permanent avoidance or indefinite deferral of gain or acceleration of losses?

3. If section 987(3) and the related regulations continue to apply to CFCs and partnerships with only foreign partners generally, are any modifications needed to the calculation of section 987 gain and loss for these entities?

Special Analyses

I. Regulatory Planning and Review—Economic Analysis

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under Executive Order

² For a discussion of “excess asset basis,” see the preambles accompanying issuance of § 1.367(b)–3(g) (TD 10004, 89 FR 58275) and proposed § 1.367(b)–3(g) (88 FR 69559), respectively.

12866 (June 9, 2023), tax regulatory actions issued by the IRS are not subject to the requirements of section 6 of Executive Order 12866, as amended. Therefore, a regulatory impact assessment is not required.

II. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) (PRA) requires that a Federal agency obtain the approval of the Office of Management and Budget (OMB) before collecting information from the public, whether such collection of information is mandatory, voluntary, or required to obtain or retain a benefit. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the OMB.

The collections of information in the proposed regulations with respect to section 987 are in proposed § 1.987–2(f)(1) (and the related election rules in § 1.987–1(g) of the final regulations). The likely respondents are individuals who file a Form 1040 and businesses that file a Form 1065 or Form 1120.

The collection of information in proposed § 1.987–2(f)(1) is required only when a taxpayer makes or revokes a recurring transfer group election under proposed § 1.987–2(f)(1). In the first year in which the section 987 regulations apply to a taxpayer, or the first year in which the taxpayer or a member of its consolidated group or section 987 electing group is the owner of a section 987 QBU, the taxpayer is permitted to make a recurring transfer group election without the Commissioner's consent. Thereafter, the taxpayer may make or revoke a recurring transfer group election only with the consent of the Commissioner, which may be granted with a private letter ruling. When a taxpayer makes or revokes an election, the collection of information is mandatory. The collection of information required by proposed § 1.987–2(f)(1) will be used by the IRS for tax compliance purposes.

The Treasury Department and the IRS intend that the information required by § 1.987–1(g) with respect to a recurring transfer group election under proposed § 1.987–2(f)(1) will be collected by attaching a statement to a taxpayer's return (such as the appropriate Form 1040, Form 1120, Form 1065, or other appropriate forms). For purposes of the PRA, the reporting burden associated with those collections of information will be reflected in the PRA submissions associated with those forms. The OMB Control Numbers for the forms will be approved under 1545–0074 for

individuals and under 1545–0123 for business entities.

To the extent that a taxpayer makes or revokes an election by obtaining a private letter ruling, the reporting burden associated with those collections of information will be reflected in the PRA submissions associated with revenue procedures governing private letter rulings. The OMB Control Number for those revenue procedures is control number 1545–1522. The proposed regulations would only require taxpayers to follow the procedures under Revenue Procedure 2024–1, IRB 2024–1 (or future revenue procedures governing private letter rulings) and would not change the collection requirements of the Revenue Procedure.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any Internal Revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

III. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that this rulemaking will not have a significant economic impact on a substantial number of small entities within the meaning of section 601(6) of the Regulatory Flexibility Act. The proposed regulations affect individuals and corporations (other than S corporations) with foreign branch operations.

The number of small entities potentially affected by the proposed regulations is unknown; however, it is unlikely to be a substantial number because taxpayers with wholly owned foreign operations are typically larger businesses. The Treasury Department and the IRS estimate that the total number of corporations (other than S corporations) with a foreign branch subject to section 987 is approximately 2,000. This estimate is based on the number of corporations (other than S corporations) that filed a Form 8858 in 2022 that showed that the filer: (1) owned at least one disregarded entity or branch with a functional currency different from the functional currency of the owner, and (2) indicated that the disregarded entity or branch was a section 989 QBU. As shown in the following table, only a small percentage of those filers are small entities.

Total receipts/positive income (2022)	Percentage of filers
Under \$5 Million	7
\$5 Million to \$10 Million	2

Total receipts/positive income (2022)	Percentage of filers
\$10 Million to \$25 Million	4
Over \$25 Million	87

The number of affected corporations (other than S corporations) with total receipts of less than \$25 million represents 0.02% of all corporations (other than S corporations) with total receipts of less than \$25 million.

These proposed regulations generally modify the rules that would otherwise apply under the final regulations by providing taxpayers with an election that reduces the compliance burden of applying section 987. Small entities generally would not be affected by these rules unless they choose to make an election to reduce their compliance burden.

A portion of the economic impact of the proposed regulations may derive from the collection of information requirements imposed under proposed § 1.987–2(f)(1) (and the related election rules in § 1.987–1(g) of the final regulations). The Treasury Department and the IRS have determined that the average burden is 1.95 hours per response. The IRS's Research, Applied Analytics, and Statistics division estimates that the appropriate wage rate for this set of taxpayers is \$99.87 per hour. Thus, the annual burden per taxpayer from each collection of information requirement is \$194.75. The requirements of proposed § 1.987–2(f)(1) apply only if a taxpayer chooses to make or revoke an election (and only in the year of the election or revocation).

IV. Section 7805(f)

Pursuant to section 7805(f) of the Code, this proposed regulation will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

V. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a State, local, or Tribal government, in the aggregate, or by the private sector, of \$100 million in 1995 dollars, updated annually for inflation. The proposed regulations do not include any Federal mandate that may result in expenditures by State, local, or Tribal governments, or by the private sector in excess of that threshold.

VI. Executive Order 13132: Federalism

Executive Order 13132 (entitled “Federalism”) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State and local governments, and is not required by statute, or preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. The proposed regulations do not have federalism implications and do not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive order.

Drafting Information

The principal authors of these proposed regulations are Adam G. Province and Raphael J. Cohen of the Office of Associate Chief Counsel (International). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, the Treasury Department and the IRS propose to amend 26 CFR part 1 as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.987–2 also issued under 26 U.S.C. 987, 989, and 1502.

* * * * *

Section 1.987–4 also issued under 26 U.S.C. 987 and 989.

* * * * *

Section 1.987–9 also issued under 26 U.S.C. 987, 989, and 6001.

* * * * *

Section 1.987–15 also issued under 26 U.S.C. 987 and 989.

* * * * *

■ **Par. 2.** Section 1.987–2 is amended by adding paragraph (f) to read as follows:

§ 1.987–2 Attribution of items to eligible QBUs; definition of a transfer and related rules.

* * * * *

(f) Recurring transfer group election—
(1) In general. For a taxable year in which a current rate election is in effect, the owner of a section 987 QBU may

elect to use the yearly average exchange rate to translate all assets that are transferred to or from the section 987 QBU in a taxable year as part of a recurring transfer group (a recurring transfer group election). The rules of this paragraph (f) apply to all transfers that are part of a recurring transfer group in any taxable year to which the recurring transfer group election applies (regardless of whether transfers of the same kind occurred in the first year to which the election applied).

(2) Recurring transfer group. A recurring transfer group is a group of frequently recurring transfers made between a section 987 QBU and its owner (or another eligible QBU of the owner) in a taxable year that meet the requirements of paragraphs (f)(2)(i) through (iii) of this section.

(i) Ordinary course transfers. The transfers must be made in the ordinary course of a trade or business.

(ii) Specified transactions. The transfers must be made as part of one or more disregarded transactions described in paragraphs (f)(2)(ii)(A) through (C) of this section between the section 987 QBU and its owner (or another eligible QBU of the owner), the compensation for which would satisfy the principles of the arm’s length standard (within the meaning of § 1.482–1(b)) if the section 987 QBU were treated as a separate corporation. Transfers made in connection with different disregarded transactions described in paragraphs (f)(2)(ii)(A) through (C) of this section in the same taxable year are treated as part of a single recurring transfer group.

(A) Sales of inventory;
(B) Payments for services;
(C) Rents or royalties.

(iii) *Distributions and contributions excluded.* A transfer is not included in a recurring transfer group if the transfer (or any portion of the transfer) would be treated as a distribution with respect to stock, or an exchange for stock (or a contribution to capital), if the section 987 QBU were treated as a separate corporation.

(3) *Consistency requirement.* The determination as to which transfers are included in a recurring transfer group must be made consistently from year to year. However, this determination may change from one year to the next based on changes in the nature and timing of the relevant transfers.

(4) *Effect of recurring transfer group election.* Except as provided in paragraph (f)(6) of this section, in a taxable year in which a recurring transfer group election is in effect, assets that are transferred to or from a section 987 QBU in a taxable year as part of a recurring transfer group (*grouped assets*)

are translated under paragraph (d) of this section and §§ 1.987–4(d)(2) and 1.987–5(f) by deeming the spot rate applicable on the date of each transfer to be equal to the yearly average exchange rate for the taxable year. However, if the Commissioner determines that the use of the yearly average exchange rate to translate grouped assets in a taxable year does not clearly reflect income, the Commissioner may require some or all transfers of the grouped assets to be excluded from the recurring transfer group or may prescribe the use of a different exchange rate to translate the grouped assets.

(5) *Accounting for a disregarded transfer group in determining unrecognized section 987 gain or loss for the taxable year—(i) In general.* Except as provided in paragraph (f)(5)(ii) or (f)(6) of this section, in a taxable year in which a recurring transfer group election is in effect, transfers of grouped assets are disregarded for purposes of § 1.987–4(d)(2) and (3) (steps 2 and 3).

(ii) *Exception.* Paragraph (f)(5)(i) of this section does not apply to a section 987 QBU in a taxable year in which the owner determines QBU net value with respect to the section 987 QBU under the steps provided in § 1.987–4(e)(2)(iii) (alternative formula for determining QBU net value without preparing an adjusted balance sheet).

(6) *Exception for taxable years in which a disproportionate amount of grouped assets is transferred in one or more quarters of the taxable year—(i) In general.* Paragraphs (f)(4) and (5) of this section do not apply to a section 987 QBU in a taxable year in which—

(A) More than 50 percent of the total amount of grouped assets transferred to or from the section 987 QBU during the taxable year is transferred during one quarter of the taxable year; or

(B) More than 80 percent of the total amount of grouped assets transferred to or from the section 987 QBU during the taxable year is transferred during two quarters of the taxable year.

(ii) *Amount of grouped assets transferred.* For the purpose of applying paragraph (f)(6)(i) of this section, the amount of grouped assets transferred to or from a section 987 QBU in a taxable year and in each quarter of the taxable year is determined in the functional currency of the section 987 QBU by reference to the aggregate of the amount of functional currency transferred and the basis of the other assets transferred (taking into account the total gross amount of both the transfers from the section 987 QBU to the owner or another eligible QBU of the owner and

the transfers from the owner or another eligible QBU of the owner to the section 987 QBU). For this purpose, amounts transferred from the owner (or another eligible QBU of the owner) to the section 987 QBU are translated into the section 987 QBU's functional currency at the yearly average exchange rate.

(iii) *Short taxable year.* For purposes of applying this paragraph (f)(6) in a short taxable year, each quarter comprises a number of days equal to one fourth of the total number of days in the taxable year. If a section 987 QBU did not exist for the full taxable year of the owner, this paragraph (f)(6) is applied with respect to the section 987 QBU by treating the taxable year as comprising the portion of the taxable year in which the section 987 QBU existed.

(7) *Examples.* The following examples illustrate the application of this paragraph (f). For purposes of the examples, DC1 is a domestic corporation that owns Business A, a section 987 QBU that has the euro as its functional currency. In year 1, DC1's home office provides services to Business A in exchange for arm's length cash payments (within the meaning of § 1.482-1(b)). The payments are made in the ordinary course of the Business A trade or business. A current rate election and a recurring transfer group election are in effect for year 1. DC1 does not determine QBU net value with respect to Business A under the steps provided in § 1.987-4(e)(2)(iii).

(i) *Example 1: Transfers treated as part of a recurring transfer group—(A) Facts.* In year 1, Business A made 50 payments for services to DC1's home office, totaling €30,000x. Of this amount, Business A paid €5,000x in the first quarter of year 1, €7,500x in the second quarter of year 1, €10,000x in the third quarter of year 1, and €7,500x in the fourth quarter of year 1. No other transfers were made between Business A and DC1 for year 1.

(B) *Analysis—(1) Recurring transfer group.* Under paragraph (c)(2) of this section, each payment for services is treated as a transfer of assets from Business A to DC1. These transfers qualify as a recurring transfer group under paragraph (f)(2) of this section because they are frequently recurring payments for services made in the ordinary course of the Business A trade or business that would satisfy the principles of the arm's length standard (within the meaning of § 1.482-1(b)) if Business A were treated as a separate corporation. In addition, the exception in paragraph (f)(6) of this section does not apply because Business A did not transfer more than 50 percent of the

total amount of grouped assets transferred in year 1 in any one quarter, and Business A did not transfer more than 80 percent of the total amount of grouped assets transferred in year 1 in any two quarters.

(2) *Effect of recurring transfer group election.* Under paragraph (f)(4) of this section, because Business A's transfers to DC1 comprise a recurring transfer group, DC1 applies § 1.987-5(f) by deeming the spot rate applicable on the date of each transfer to be equal to the yearly average exchange rate for year 1. As a result, DC1 determines its basis in the euros received from Business A by translating the total amount of euros transferred in year 1 at the yearly average exchange rate for year 1. In addition, under paragraph (f)(5) of this section, the transfers are disregarded for purposes of determining unrecognized section 987 gain or loss for year 1 under § 1.987-4(d)(2).

(ii) *Example 2: Disproportionate transfers—(A) Facts.* The facts are the same as in paragraph (f)(7)(i) of this section (*Example 1*), except that most of the payments are made in the fourth quarter of year 1 to compensate DC1's home office for additional services provided at the end of year 1. Specifically, of the €30,000 paid by Business A for services in year 1, €18,000x is transferred in the fourth quarter of year 1, and €4,000x is transferred in each of the first three quarters of year 1.

(B) *Analysis.* The amount of grouped assets transferred in the fourth quarter (€18,000x) exceeds 50 percent of the total amount of grouped assets transferred in year 1 (€30,000x). Therefore, under paragraph (f)(6) of this section, paragraphs (f)(4) and (5) of this section do not apply. As a result, DC1 determines its basis in the euros received from Business A by translating each transfer at the applicable spot rate under § 1.987-5(f), and DC1 must take each transfer into account for purposes of determining unrecognized section 987 gain or loss for year 1 under § 1.987-4(d)(2).

(iii) *Example 3: Determination of the transfers including in a recurring transfer group over multiple taxable years—(A) Facts.* The facts in year 1 are the same as in paragraph (f)(7)(i) of this section (*Example 1*). The recurring transfer group election remains in effect in years 2 and 3. In year 2, DC1's home office continues to provide services to Business A in exchange for arm's length cash payments made in the ordinary course of the Business A trade or business. Additionally, in year 2, Business A begins to sell Product X inventory to Business B, an eligible

QBU of DC1 that is not a section 987 QBU, in exchange for arm's length cash payments. In year 3, DC1's home office no longer provides services to Business A, but Business A continues to sell Product X inventory to Business B in exchange for arm's length cash payments. Additionally, in year 3, Business A begins to sell Product Y inventory to Business B in exchange for arm's length cash payments. In each of years 1, 2, and 3, the transfers to and from Business A are made on a frequent basis in the ordinary course of the Business A trade or business.

(B) *Analysis.* In year 1, the cash payments for services made by Business A to DC1's home office are part of a recurring transfer group. In year 2, the recurring transfer group includes the cash payments for services made by Business A to DC1's home office, the transfers of Product X inventory from Business A to Business B, and the cash payments made by Business B to Business A in connection with the inventory sales. In year 3, the recurring transfer group includes the transfers of Product X inventory and Product Y inventory from Business A to Business B and the cash payments made by Business B to Business A in connection with the inventory sales. Therefore, in each of years 1, 2, and 3, unless the exception in paragraph (f)(6) of this section applies, the grouped assets are translated at the yearly average exchange under paragraph (f)(4) of this section, and the transfers of the grouped assets are disregarded for purposes of determining unrecognized section 987 gain or loss under § 1.987-4(d)(2) and (3).

* * * * *

■ **Par 3.** Section 1.987-4 is amended by adding paragraph (d)(10)(ii)(D) to read as follows:

§ 1.987-4 Determination of net unrecognized section 987 gain or loss of a section 987 QBU.

* * * * *

(d) * * *

(10) * * *

(ii) * * *

(D) *Recurring transfer group.* In order to determine the residual increase or decrease to net assets under this paragraph (d)(10) in a taxable year in which transfers of grouped assets are disregarded under § 1.987-2(f)(5), the transfers of grouped assets are disregarded for purposes of applying steps 2 and 3 (paragraphs (d)(2) and (3) of this section) in the functional currency of the section 987 QBU.

* * * * *

■ **Par 4.** Section 1.987–9 is amended by revising paragraphs (b)(5) and (6) to read as follows:

§ 1.987–9 Recordkeeping requirements.

* * * * *

(b) * * *

(5) The amount of assets and liabilities transferred by the owner to the section 987 QBU determined in the functional currency of the owner and the section 987 QBU (to the extent those amounts are taken into account in applying § 1.987–4 or § 1.987–5).

(6) The amount of assets and liabilities transferred by the section 987 QBU to the owner determined in the functional currency of the owner and the section 987 QBU (to the extent those amounts are taken into account in applying § 1.987–4 or § 1.987–5).

* * * * *

■ **Par 5.** Section 1.987–15 is amended by adding paragraph (e) to read as follows:

§ 1.987–15 Applicability date.

* * * * *

(e) *Recurring transfer group election.* Sections 1.987–2(f), 1.987–4(d)(10)(ii)(D), and 1.987–9(b)(5) and (6) apply to taxable years beginning after [DATE OF PUBLICATION OF THE FINAL RULE IN THE **FEDERAL REGISTER**].

Douglas W. O'Donnell,
Deputy Commissioner.

Air Plan Approval; Pennsylvania; Redesignation of the Allegheny County Nonattainment Area to Attainment and Approval of the Area's Maintenance Plan for the 2010 1-Hour Primary Sulfur Dioxide National Ambient Air Quality Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a state implementation plan (SIP) revision and redesignation request submitted on November 14, 2023, by the Pennsylvania Department of Environmental Protection (PADEP) on behalf of the Allegheny County Health Department (ACHD). The SIP revision asks the EPA to redesignate the Allegheny County, Pennsylvania area from nonattainment to attainment for the 2010 1-hour primary sulfur dioxide (SO₂) national ambient air quality standard (NAAQS). The revision also asks the EPA to approve into the SIP Allegheny County's maintenance plan for the 2010 1-hour primary SO₂ standard for the Allegheny County area. This action is being taken under the Clean Air Act (CAA).

DATES: Written comments must be received on or before January 10, 2025.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R03–OAR–2024–0316 at www.regulations.gov, or via email to talley.david@epa.gov. For comments submitted at Regulations.gov, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from Regulations.gov. For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For

additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit www.epa.gov/dockets/commenting-epa-dockets.

FOR FURTHER INFORMATION CONTACT:

Philip McGuire, Planning & Implementation Branch (3AD30), Air & Radiation Division, U.S. Environmental Protection Agency, Region III, 1600 John F Kennedy Boulevard, Philadelphia, Pennsylvania 19103. SUPPLEMENTARY INFORMATION:

I. Background

A. Nonattainment Designation

On June 22, 2010, the EPA revised the primary SO₂ NAAQS, establishing a new 1-hour primary standard of 75 parts per billion (ppb).¹ Under the EPA's regulations at title 40 of the Code of Federal Regulations (CFR) part 50, the 2010 1-hour SO₂ NAAQS is met at a monitoring site when the 3-year average of the annual 99th percentile of daily maximum 1-hour average concentrations is less than or equal to 75 ppb (based on the rounding convention in 40 CFR part 50, appendix T).² Ambient air quality monitoring data for the 3-year period must meet a data completeness requirement. A year meets data completeness requirements when all four quarters are complete, and a quarter is complete when at least 75 percent of the sampling days for each quarter have complete data. A sampling day has complete data if 75 percent of the hourly concentration values, including State-flagged data affected by exceptional events which have been approved for exclusion by the Administrator, are reported.³

Upon promulgation of a new or revised NAAQS, the CAA requires the EPA to designate as nonattainment any area that does not meet (or that contributes to ambient air quality in a nearby area that does not meet) the NAAQS.⁴ On August 5, 2013, the EPA designated a portion of Allegheny County, Pennsylvania (hereafter the “Allegheny County NAA”), as nonattainment for the 2010 1-hour primary SO₂ NAAQS, effective October

¹ 75 FR 35520, June 22, 2010.

² 40 CFR 50.17.

³ 40 CFR part 50, appendix T, section 3(b).

⁴ CAA section 107(d)(1)(A)(i).

4, 2013.⁵ The designation was based on violating air quality monitoring data for calendar years 2009–2011. The Allegheny County NAA consists of 22 municipalities including: the Borough of Braddock, Borough of Dravosburg, Borough of East McKeesport, Borough of East Pittsburgh, Borough of Elizabeth, Borough of Glassport, Borough of Jefferson Hills, Borough of Liberty, Borough of Lincoln, Borough of North Braddock, Borough of Pleasant Hills, Borough of Port Vue, Borough of Versailles, Borough of Wall, Borough of West Elizabeth, Borough of West Mifflin, City of Clairton, City of Duquesne, City of McKeesport, Elizabeth Township, Forward Township, and North Versailles Township.⁶ This action established an attainment date five years after the effective date for the areas designated as nonattainment for the 2010 SO₂ NAAQS (*i.e.*, by October 4, 2018). The Commonwealth was also required to submit an attainment SIP revision for the Allegheny County NAA to the EPA that meets the requirements of CAA sections 110, 172(c) and 191–192 within 18 months following the October 4, 2013, effective date of designation (*i.e.*, by April 6, 2015).

B. Relevant Historical SIP Actions

The EPA did not receive an attainment SIP revision for the Allegheny County NAA by the April 6, 2015 deadline and subsequently on March 18, 2016, the EPA published a finding of failure to submit indicating that Pennsylvania did not submit the required SO₂ attainment plan.⁷ This finding initiated a clock under CAA section 179(a) for the potential imposition of new source review sanctions 18 months after the effective date of the finding and the potential imposition of highway funding sanctions 6 months following that, in accordance with CAA section 179(b) and 40 CFR 52.31. Additionally, under CAA section 110(c), the finding triggered a requirement for the EPA to promulgate a Federal implementation plan (FIP) within two years of the effective date of the finding unless, by that time, Pennsylvania made the necessary complete submittal, and the EPA approved the submittal.

Pursuant to Pennsylvania's October 3, 2017 attainment plan submittal, and the EPA's October 6, 2017 letter to Pennsylvania finding the submittal complete and noting the stopping of the

sanctions' deadline, these CAA section 179(b) sanctions were not imposed as Pennsylvania did not miss the original deadline.⁸ The EPA proposed approving the SIP revision submittal on November 19, 2018,⁹ and issued a final approval on April 23, 2020.¹⁰ This approval ended the requirement for the EPA to promulgate a FIP under CAA section 110(c). On November 14, 2023, PADEP, on behalf of ACHD, submitted a revision to its SIP for the inclusion of a maintenance plan for the 2010 1-hour primary SO₂ NAAQS and requested a concurrent redesignation of the Allegheny County NAA to attainment for the 2010 1-hour primary SO₂ NAAQS.

C. Redesignation to Attainment Criteria

After a State has submitted a redesignation request for a nonattainment area, the EPA must assess if the statutory criteria identified in CAA section 107(d)(3)(E) have been met to redesignate the area to attainment. These conditions include: (1) the EPA has determined that the applicable NAAQS has been attained; (2) the applicable SIP has been fully approved by the EPA under CAA section 110(k); (3) the EPA has determined that the improvement in the area's air quality is due to permanent and enforceable reductions in emissions; (4) the area has a fully approved maintenance plan, including a contingency plan, under CAA section 175A; and (5) the State has met all applicable requirements for the area under CAA section 110 and part D. The EPA has provided direction for how it would consider if these conditions have been met in the April 23, 2014 memorandum "Guidance for 1-Hour SO₂ Nonattainment Area SIP Submissions" (2014 SO₂ Guidance).¹¹

D. Maintenance Plan Approval Criteria

CAA section 175A and additional EPA guidance, including the September 4, 1992 memorandum "Procedures for Processing Requests to Redesignate Areas to Attainment" (Calcagni Memo),¹² identify the required elements

for an approvable maintenance plan for areas seeking redesignation from nonattainment to attainment. Under CAA section 175A, the plan must demonstrate continued attainment of the applicable NAAQS for at least 10 years after the EPA approves a redesignation request to attainment. Eight years after the redesignation, the State must submit a revised maintenance plan demonstrating that attainment will continue to be maintained for an additional 10 years following the initial 10-year period. To address the possibility of future NAAQS violations, the maintenance plan must contain contingency measures, as the EPA deems necessary, to assure prompt correction of any future 2010 1-hour SO₂ violations. The Calcagni Memo provides further guidance on the content of a maintenance plan, explaining that a maintenance plan should address five requirements: (1) an attainment emissions inventory that identifies the level of emissions in the area which is sufficient to attain the NAAQS; (2) a maintenance demonstration that shows future emissions of a pollutant will not exceed the level of the attainment inventory; (3) the continued operation of a monitoring network that conforms to 40 CFR part 58; (4) a means for verifying the continued attainment of the NAAQS; and (5) a contingency plan to correct any violation of the NAAQS in the area following redesignation of the area.

II. Summary of SIP Revision and EPA Analysis

The EPA's evaluation of Pennsylvania's redesignation request and maintenance plan is based on consideration of the five redesignation criteria provided under CAA section 107(d)(3)(E) and relevant guidance, including the aforementioned 2014 SO₂ Guidance and Calcagni Memo.

A. Criterion (1)—The Allegheny County SO₂ Nonattainment Area Has Attained the 2010 1-Hour SO₂ NAAQS

CAA section 107(d)(3)(E)(i) requires that the EPA determine if a nonattainment area has attained the applicable NAAQS in order to redesignate the area to attainment. In assessing if the area has attained the NAAQS, the 2014 SO₂ Guidance stipulates that the EPA can interdependently consider two components to support an attainment

determination: air quality monitoring data and air quality modeling data.¹³

The Allegheny County NAA contains two operational SO₂ monitor sites: the Liberty site (Air Quality System (AQS) Site ID 42-003-0064) and the North Braddock site (AQS Site ID 42-003-1301). The Liberty monitor is located centrally within the Allegheny County NAA and has been in operation since 1969, while the North Braddock monitor

is located in the northern segment of the Allegheny County NAA and has been in operation since 2014. Both monitors have been in attainment of the 2010 1-hour primary SO₂ NAAQS since the 2019–2021 period, with Liberty recording a design value of 63 ppb for the 2021–2023 period and North Braddock recording a design value of 54 ppb for the 2021–2023 period.¹⁴ Design values for the past 10 years are reported

in Table 1 in this document. Although both monitors are currently in attainment of the NAAQS, prior analysis has determined that neither of these monitoring sites are located in the area of maximum concentration,¹⁵ and as such, additional air quality modeling is generally needed to estimate SO₂ concentrations within the area.

TABLE 1—2014–2023 SO₂ DESIGN VALUES FOR ALLEGHENY COUNTY NONATTAINMENT AREA MONITOR SITES
[Parts per billion]

Monitor site	2012–2014	2013–2015	2014–2016	2015–2017	2016–2018	2017–2019	2018–2020	2019–2021	2020–2022	2021–2023
Liberty	101	99	94	97	103	109	85	59	56	63
North Braddock *	89	71	64	55	61	63	64	58	56	54

* North Braddock design values from the 2012–2014 and 2013–2015 periods are comprised of less than three years of data as the monitor began operating in 2014.

Pennsylvania's 2017 attainment plan contained an attainment demonstration which utilized allowable SO₂ emission limits from stationary sources within the Allegheny County NAA to inform several modeling analyses for SO₂ emissions.¹⁶ These modeling analyses were based on emissions limits for large, stationary sources of SO₂, which, if enacted, would ensure that the Allegheny County NAA would attain the 2010 1-hour primary SO₂ NAAQS. The 2014 SO₂ Guidance states that the EPA may make a determination of attainment based on this attainment plan modeling, eliminating the need for separate actual emissions-based modeling to support a redesignation request—provided that the source characteristics are still reasonably represented.¹⁷ The source characteristics are still reasonably represented¹⁸ and from 2020–2021, large, stationary SO₂ sources¹⁹ within the Allegheny County NAA were meeting their allowable emission limits for attainment.²⁰ As such, the 2017 attainment demonstration modeling submitted by Pennsylvania will allow for the EPA's determination of attainment. The 2014 SO₂ Guidance further states that a demonstration that the control strategy in the SIP has been fully implemented will also be pertinent for making the determination of

attainment.²¹ Pennsylvania has submitted information detailed in its redesignation request and maintenance plan to confirm that the control strategy outlined in the SIP has been fully implemented. The specific measures identified in the control strategy include upgrades to the Vacuum Carbonate Unit equipment at the U.S. Steel (USS) Clairton Plant, the implementation of a tail gas recycling project at the USS Clairton Plant, and a new stack and combined flue system for select boilers at the USS Edgar Thomson Plant.²² Additionally, lower permitted SO₂ emission rates were implemented for nearly all processes at the primary stationary SO₂ sources in the Allegheny County NAA, including the USS Clairton Plant, the USS Edgar Thomson Plant, the USS Irvin Plant, and Harsco Metals. These implemented, permanent and federally enforceable control measures have aided in reducing the actual total emissions from large, stationary USS SO₂ sources to 2,373 tons per year (as of 2021),²³ which is below the revised total emissions limits proposed for USS facilities in the 2017 attainment demonstration modeling (2,669 tons per year),²⁴ thus contributing to bringing the Allegheny County NAA into attainment.

In this action, the EPA proposes to find that the air quality monitoring data

and air quality modeling data demonstrate that the Allegheny County NAA has attained the 2010 1-hour primary SO₂ NAAQS.

B. Criterion (2)—Pennsylvania Has a Fully Approved SIP Under Section 110(k)

CAA section 107(d)(3)(E)(ii) requires that the EPA fully approve the applicable implementation plan for the area under CAA section 110(k) in order to redesignate that area to attainment. The EPA has fully approved the applicable Pennsylvania SIP for the Allegheny County NAA under section 110(k) of the CAA for all requirements applicable for purposes of redesignation. An area cannot be redesignated to attainment if a required element of the SIP is the subject of a disapproval; a finding of failure to submit, or failure to implement the SIP; or a partial, conditional, or limited approval.²⁵ The 2017 attainment plan SIP was initially proposed for EPA approval on November 19, 2018²⁶ and received final EPA approval on April 23, 2020.²⁷ The approved elements from the 2017 attainment plan include a 2011 base year emissions inventory, a control strategy and air quality modeling demonstration, a reasonable available control measures/reasonably available control technology (RACM/RACT)

¹³ See 2014 SO₂ Guidance, at 62.

¹⁴ Design values are calculated by computing the three-year average of the annual 99th percentile daily maximum 1-hour average concentrations. An SO₂ 1-hour primary standard design value is valid if it encompasses three consecutive calendar years of complete data. The data completeness requirements were previously described in the *Nonattainment Designation* section I.A. of this document above.

analysis, a reasonable further progress (RFP) analysis, contingency measures, and nonattainment new source review (NNSR) regulations.

C. Criterion (3)—The Air Quality Improvement in the Allegheny County SO₂ Nonattainment Area Is Due to Permanent and Enforceable Reductions in Emissions

For redesignating a nonattainment area to attainment, CAA section 107(d)(3)(E)(iii) requires the EPA to determine that the air quality improvement in the area is due to permanent and enforceable reductions in emissions resulting from implementation of the SIP, applicable Federal air pollution control regulations, and other permanent and enforceable reductions. The EPA proposes to find that Pennsylvania has demonstrated that the requirements of CAA section 107(d)(3)(E)(iii) have been met.

Specifically, the implementation of multiple permanent and federally enforceable control measures at stationary point sources of SO₂ identified in the EPA-approved 2017 attainment demonstration aided in a substantial decrease in SO₂ emissions, and consequently lower SO₂ concentrations in the Allegheny County NAA. These measures include upgrades to the Vacuum Carbonate Unit equipment at the USS Clairton Plant, the implementation of a tail gas recycling project at the USS Clairton Plant, and a new stack and combined flue system for select boilers at the USS Edgar Thomson Plant. Furthermore, the Guardian Glass Plant ceased operations in August 2015 and its operating permit was terminated in November 2015.²⁸ The Calcagni Memo states that “[e]mission reductions from source shutdowns can be considered permanent and enforceable to the extent that those shutdowns have been reflected in the SIP and all applicable permits have been modified accordingly,” and therefore the Guardian shutdown is considered permanent and enforceable.²⁹ Any future operations at this location would require a new permit and a new source evaluation, as described in ACHD Article XXI, sections 2102.04 and 2103.13.³⁰ Additionally, Emissions

Reductions Credits for SO₂ were not requested for the Guardian Glass Plant, preventing the transfer or sale of associated emission credits to another entity in Pennsylvania or some surrounding states.

Allegheny County also established lower SO₂ emissions limits for nearly all processes at the USS facilities in the Allegheny County NAA, including USS Clairton, USS Edgar Thomson, and USS Irvin, as well as the Harsco (Braddock Recovery) facility, located on the property of USS Edgar Thomson. These emissions limits are embedded in the installation permits issued by ACHD for these facilities and are federally enforceable as they have been approved into Pennsylvania’s SIP, and they are permanent because they cannot be altered without an additional SIP submittal.³¹ Details on the imposed emissions limits were included as copies of the installation permits in Appendix K of the 2017 attainment plan submittal and are available in the docket for this action.³²

Collectively, the implemented controls and lower permitted SO₂ emissions rates resulted in an actual decrease of 835 tons of SO₂ emitted per year from 2011 to 2017. This is approximately a 25% reduction from 2011 levels of 3,418 tons of SO₂ emitted per year.³³ As this reduction comes from EPA-approved SIP controls and permit-controlled emission limits, the EPA finds the air quality improvement in the Allegheny County NAA to be due to permanent and enforceable reductions in emissions.

D. Criterion (4)—The Allegheny County SO₂ Nonattainment Area Has a Fully Approved Maintenance Plan Pursuant to Section 175A of the CAA

To redesignate a NAA to attainment, CAA section 107(d)(3)(E)(iv) requires the EPA to determine that the area has a fully approved maintenance plan pursuant to section 175A of the CAA. In conjunction with its request to redesignate the Allegheny County NAA to attainment for the 2010 1-hour primary SO₂ NAAQS, the State submitted a SIP revision to provide for the maintenance of the 2010 1-hour primary SO₂ NAAQS for at least 10 years after the effective date of redesignation to attainment. The EPA is proposing to find that this maintenance plan meets the requirements for

approval under section 175A of the CAA.

1. What is required in a maintenance plan?

CAA section 175A sets forth the elements of a maintenance plan. Under section 175A, the plan must demonstrate continued attainment of the applicable NAAQS for at least 10 years after the Administrator approves a redesignation request to attainment. Eight years after the redesignation, the State must submit a revised maintenance plan demonstrating that attainment will continue to be maintained for an additional 10 years following the initial 10-year period. To address the possibility of future NAAQS violations, the maintenance plan must contain contingency measures as the EPA deems necessary to assure prompt correction of any future 2010 1-hour primary SO₂ NAAQS violations. The Calcagni Memo provides further guidance on the content of a maintenance plan, explaining that a maintenance plan should address five requirements: the attainment emissions inventory, maintenance demonstration, monitoring, verification of continued attainment, and a contingency plan.³⁴ As is discussed more fully later in this section, the EPA is proposing to determine that Pennsylvania’s maintenance plan meets the requirements in CAA section 175A and is thus proposing to approve it as a revision to the Allegheny County portion of the Pennsylvania SIP.

2. Attainment Emissions Inventory

In a maintenance plan, states are required to submit an emissions inventory to identify the level of emissions in the area which is sufficient to attain and maintain the SO₂ NAAQS, which is called the attainment inventory. This inventory is used as the basis for future, projected emission inventories that are used to show the area will remain in attainment. Pennsylvania submitted a 2017 SO₂ emissions inventory as the attainment inventory with its maintenance plan. The year 2017 was selected because it was the first year in which emissions were at levels required to demonstrate attainment of the 2010 SO₂ NAAQS, with the exception of emissions associated with malfunctions of the desulfurization facility at the USS Clairton Plant. Additionally, 2017 was a year in which a fully reviewed National Emission Inventory (NEI) was released. The NEI is a comprehensive, triennial estimate of emissions. Generally, the

attainment year is selected as a year within the attaining design value period (i.e., 2019–2021). However, alternate years from 2018–2022 were less ideal than 2017 for the attainment year for a variety of factors, including excess emissions from sources due to equipment breakdowns, atypical emissions during the COVID pandemic, and incomplete emissions compilations for recent years. Additional details for choosing 2017 as the attainment year are available in the submitted redesignation request.³⁵

For the 2017 attainment year inventory, Pennsylvania directly used point and area source emissions reported in the 2017 NEI, except for corrections identified in Appendix B of the submitted redesignation request.³⁶ The point source emissions for the Allegheny County NAA were verified against the EPA’s emissions inventory system (EIS) and the EPA found them to be acceptable.³⁷ Area source emissions were estimated based on the relative percentage of the Allegheny County population residing in the Allegheny County NAA and the resulting factor allocated the appropriate fraction of the County’s total emissions to the Allegheny County NAA.

Nonroad and onroad mobile source emissions for 2017 were obtained from the EPA’s Motor Vehicle Emissions Simulator (MOVES) model, specifically the MOVES3 version. PADEP executed the MOVES3 modeling runs for nonroad mobile sources and utilized a contractor

to run the model for onroad mobile source emissions. Natural SO₂ emission sources, such as fires and biogenics, were also compiled. Fire emissions data was pulled from the EPA’s Fires³⁸ inventory, while biogenic emissions from soils and vegetation were predicted by the Biogenic Emission Inventory System³⁹ (BEIS) model. Projection inventories predicted from the attainment inventory demonstrate that the area will continue to remain in attainment during the maintenance period. Pennsylvania developed 2026 and 2035 emission projections for the interim and maintenance plan end year, respectively. Projected emissions for these years—as well as the base year inventory—are available in Table 2 in this document. Projected emissions for point and area sources were estimated from the 2017 base year emissions and growth factors developed by the Mid-Atlantic Regional Air Management Association, Inc., and other sources. These growth factors are developed based on forecasts from various databases and tools, including the Energy Information Administration’s Annual Energy Outlook 2022, Pennsylvania Industry Employment 2018–2028 Long-Term Projections, National Inventory Collaborative 2016v1 Emissions Modeling Platform, and the Federal Aviation Administration’s Terminal Area Forecast. Projected emissions were subject to the same corrections utilized in the 2017 base year inventory for consistency.

Furthermore, point sources with implemented enforceable controls or shutdowns since the 2017 base year were excluded from the 2026 and 2035 projections. Specifically, the Koppers Clairton tar refining facility ceased operation in 2017 and its permit expired in 2021. Additionally, Coke Batteries 1, 2, and 3 at the USS Clairton Plant ceased operation in March 2023. Conversely, projections for the 2026 and 2035 inventories included the permitted plantwide SO₂ emissions limit of 23.89 tons/year for a new major source facility—the Invenergy Allegheny Energy Center. However, the permit for this facility was terminated on November 9, 2023,⁴⁰ and construction of this facility is not expected to proceed at this time. As such, the actual emissions in 2026 and 2035 should be even lower than the anticipated values reported in the maintenance year projections. Nonroad and onroad mobile source emissions for the projected years 2026 and 2035 were also obtained from the MOVES3 version. MOVES3 modeling runs were once again executed by PADEP for nonroad mobile source emissions and by the contractor for onroad mobile source emissions. Additional details on some of the assumptions and inputs to the model are available in the redesignation request and its associated Appendix B.⁴¹ Fire and biogenic sources are typically not projected for future case scenarios and therefore emissions were held constant from 2017 to 2026 and 2035.

TABLE 2—EMISSIONS INVENTORIES FOR THE ALLEGHENY COUNTY NONATTAINMENT AREA
[Tons per year]

Sector	2017 Actual emissions (base year)	2026 Projected emissions (interim year)	2035 Projected emissions (maintenance year)
Point Sources	2,556	2,511	2,472
Area Sources	22	26	27
Nonroad Mobile Sources	0	0	0
Onroad Mobile Sources	5	2	2
Fires	0	0	0
Biogenics	0	0	0
Total	2,583	2,539	2,501

3. Maintenance Demonstration

The Calcagni memo describes two ways for a State to demonstrate maintenance of the NAAQS for a period of at least 10 years following the

redesignation of the area: (1) the State can show that future emissions of a pollutant will not exceed the level of the attainment inventory, or (2) the State can model to show that the future mix

of sources and emission rates will not cause a violation of the standard.⁴² Pennsylvania’s projected actual emissions for the interim year of 2026 and for the maintenance year of 2035

are both below the total attainment inventory, which is acceptable for showing maintenance in the Allegheny County NAA.

4. Monitoring Network

The 2014 SO₂ Guidance indicates that once an area has been redesignated to attainment, the state should continue to operate an appropriate air quality monitoring network as provided under 40 CFR part 58 to verify the attainment status of the area. ACHD has committed to continued operation of its SO₂ monitoring network in the Allegheny County NAA to verify the attainment status. Also, ACHD will continue to submit an annual monitoring network plan to the EPA for approval, in accordance with 40 CFR 58.10. No changes will be made to the existing network unless pre-approved by the EPA.

5. Verification of Continued Attainment

The 2014 SO₂ Guidance states that each air agency should ensure that it has the legal authority to implement and enforce all measures necessary to attain and maintain the 2010 SO₂ NAAQS. The air agency's submittal should indicate how it will track the progress of the maintenance plan for the area either through air quality monitoring or modeling.

Article XXI, section 2101.07(a) grants the ACHD legal authority to implement and enforce all measures necessary to maintain the 2010 1-hour primary SO₂ NAAQS. In addition, ACHD has indicated it will track the progress of the maintenance plan through an integrated approach utilizing monitoring data and emissions inventories.

As previously indicated, ACHD will continue to operate its SO₂ monitoring network to verify the attainment status of the Allegheny County NAA. Monitored concentrations will serve as the primary indicator for verifying continued attainment and will also act as the triggering mechanism for contingency measures.

ACHD will also use emissions inventories—developed annually by ACHD for point sources and triennially by PADEP for area and mobile sources—and compare these inventories to the 2017 attainment inventory for assessing continued attainment. It is anticipated that future inventories will remain below the levels of the attainment inventory. However, if future inventories exceed the attainment inventory levels, ACHD will conduct a study to evaluate if the increased emissions have caused increased monitored concentrations within the Allegheny County NAA and, if so,

ACHD will determine if any additional emission control measures should be enacted. Emissions data will not serve as a triggering mechanism for contingency measures for two reasons. Primarily, increased emissions may not directly affect monitored concentrations, as SO₂ concentrations can be impacted by meteorological conditions. Additionally, emissions inventory reporting is slower than monitoring data reporting, and the use of emissions data as a contingency initiator would not provide for a prompt response to any potential NAAQS violations.

Under ACHD's new source review program, any major new sources or modifications to existing sources that would affect emissions must provide a modeling demonstration that illustrates new emissions will not cause or contribute to a violation of the 2010 1-hour primary SO₂ NAAQS, as described in ACHD Article XXI, section 2102.04(b). ACHD will not approve any modifications that would lead to expected violations of the 2010 1-hour primary SO₂ NAAQS in the Allegheny County NAA.

The EPA proposes to find that these proposed measures will provide for verifying continued attainment within the Allegheny County NAA.

6. Contingency Measures

Section 175A(d) of the CAA requires that a maintenance plan include such contingency measures as the EPA deems necessary to assure that the State will promptly correct a violation of the NAAQS that occurs after redesignation. The maintenance plan should identify the contingency measures to be adopted, a schedule and procedure for adoption and implementation, and a time limit for action by the State. A State should also identify specific indicators to be used to determine when the contingency measures need to be implemented. The maintenance plan must also include a requirement that a State will continue to implement all measures with respect to control of the pollutant that were contained in the SIP before redesignation of the area to attainment.

ACHD has committed to continuing implementation of all measures indicated in the SIP after redesignation of the Allegheny County NAA.⁴³ Furthermore, ACHD has identified triggering indicators for its contingency measures, a schedule for implementing these potential measures, and has

specified multiple potential options to correct any NAAQS violation.⁴⁴

Fully validated and quality assured SO₂ monitoring data will serve as the primary trigger for any responses to prevent or correct a NAAQS violation in the Area. ACHD has established both warning level and action level responses with specific triggering indicators for each.

Warning level responses are subdivided into two tiers. A first-level warning will occur when the 99th percentile daily maximum 1-hour SO₂ concentration exceeds 75 ppb at any monitor site in the Allegheny County NAA in a single calendar year. This first-level warning will prompt an ACHD study to determine if the trigger indicates a trend toward increasing SO₂ concentrations in the Allegheny County NAA. If there seems to be a rising trend in SO₂ concentrations, the study will examine if the trend is likely to continue and if so, the needed measures that could reverse the trend. A second-level warning will occur when the average of two consecutive years of 99th percentile daily maximum 1-hour SO₂ concentrations exceeds 75 ppb at any monitor in the Allegheny County NAA. This second-level warning will result in ACHD evaluating the chance of a violation of the NAAQS and the need for supplemental control measures to be activated. Both first- and second-level warnings will allow for ACHD to consider the early adoption of measures to permit the expeditious implementation of these measures in the event of a NAAQS violation. This early adoption could allow for implementation of the measures within 30 to 90 days following the potential occurrence of a NAAQS violation.

An action level response will occur when the 1-hour design value, based on the average of three consecutive years of 99th percentile daily maximum 1-hour SO₂ concentrations, violates the 2010 1-hour SO₂ NAAQS at any monitor site in the Allegheny County NAA. This response will include the adoption and implementation of additional control measures as needed to promptly correct the violation. If regulatory measures are selected, these measures will conform to all Federal, State, and local rules and regulations. Both non-regulatory and regulatory measures are expected to be implemented within one year following a violation of the NAAQS.⁴⁵

ACHD has specified multiple potential regulatory and non-regulatory

⁴⁴ See *ACHD SO₂ RR and MP*, at 28–31.

⁴⁵ Specific schedules and associated procedures for the adoption and implementation of regulatory and non-regulatory measures are available in the *ACHD SO₂ RR and MP* document at pp. 29–30.

⁴³ See *ACHD SO₂ RR and MP*, at 27.

contingency measures for this maintenance plan—including both area-wide and USS Mon Valley Works measures.⁴⁶ Selection will be based on several factors, including but not limited to, the degree of the violation, the emission reduction potential, and cost. ACHD has identified non-regulatory, area-wide measures such as wood burning-related programs and alternative fuel promotions as potential options for correcting a NAAQS violation. Additionally, ACHD has proposed USS Mon Valley Works regulatory measures, including but not limited to, additional desulfurization controls for coke oven gas at USS Clairton, additional fugitive controls at USS Mon Valley Works plants, and restrictions on fuel usage at USS Mon Valley Works plants. All of these measures can be individually implemented or in conjunction with others to ensure correction of any NAAQS violation.

The EPA proposes to find that ACHD's submitted maintenance plan meets the requirements set forth in CAA section 175A and EPA guidance and is proposing to approve the maintenance plan as a revision to the Pennsylvania SIP.

E. Criterion (5)—Pennsylvania Has Met All Applicable Requirements Under Section 110 and Part D of Title I of the CAA

In accordance with section 107(d)(3)(E)(v) of the CAA, to redesignate the Allegheny County NAA to attainment, Pennsylvania must meet all requirements applicable to the Allegheny County NAA under CAA section 110 (general SIP requirements) and part D of title I of the CAA (SIP requirements for nonattainment areas).

1. Section 110 General Requirements for SIPs

Pursuant to CAA section 110(a)(1), whenever new or revised NAAQS are promulgated, the CAA requires States to submit a plan (*i.e.*, SIP) for the implementation, maintenance, and enforcement of such NAAQS. Section 110(a)(2) of title I of the CAA contains the general requirements for a SIP, also known as “infrastructure” requirements. These requirements include, but are not limited to, the following: submittal of a SIP that has been adopted by the state after reasonable public notice and hearing; provisions for establishment and operation of appropriate procedures needed to monitor ambient air quality;

implementation of a source permit program; provisions for the implementation of part C requirements (Prevention of Significant Deterioration (PSD)) and provisions for the implementation of part D requirements (New Source Review (NSR) permit programs); provisions for air pollution modeling; and provisions for public and local agency participation in planning and emission control rule development.

Section 110(a)(2)(D) requires that SIPs contain certain measures to prevent sources in a state from significantly contributing to air quality problems in another state. To implement this provision, the EPA has required certain states to establish programs to address the interstate transport of air pollutants.⁴⁷ The section 110(a)(2)(D) requirements for a state are not linked with a particular nonattainment area's designation and classification in that state. The EPA has concluded that the requirements linked with a particular nonattainment area's designation and classifications are the relevant measures to evaluate in reviewing a redesignation request. The transport SIP submittal requirements, where applicable, continue to apply to a state regardless of the designation of any one particular area in the state. Thus, the EPA has concluded that the CAA's interstate transport requirements should not be construed to be applicable requirements for purposes of redesignation.

In addition, the EPA has concluded other section 110 elements—those that are neither connected with nonattainment plan submissions nor linked with an area's attainment status—are not applicable requirements for purposes of redesignation. The area will still be subject to these requirements after the area is redesignated. The section 110 and part D requirements which are linked with a particular area's designation and classification are the relevant measures to evaluate in reviewing a redesignation request. This approach is consistent with the EPA's existing policy on applicability (*i.e.*, for redesignations) of conformity and oxygenated fuels requirements, as well as with section 184 ozone transport requirements. See Reading, Pennsylvania, proposed and final rules (61 FR 53174–53176, October 10, 1996), (62 FR 24826, May 7, 2008); Cleveland-Akron-Loraine, Ohio, final rule (61 FR 20458, May 7, 1996); and Tampa, Florida, final rule (60 FR 62748, December 7, 1995). See also the

⁴⁷ See Nitrogen Oxides (NO_x) SIP Call and amendments to the NO_x SIP Call (64 FR 26298, May 14, 1999 and 65 FR 11222, March 2, 2000), and the Cross-State Air Pollution Rule (CSAPR) Update (81 FR 74504, October 26, 2016).

discussion on this issue in the Cincinnati, Ohio, redesignation (65 FR 37890, June 19, 2000), and in the Pittsburgh, Pennsylvania, redesignation (66 FR 50399, October 19, 2001).

The EPA approved elements of Pennsylvania's June 15, 2014 SO₂ infrastructure SIP submittal on August 5, 2015.⁴⁸ As explained previously, certain general requirements of CAA section 110(a)(2) are statewide requirements that are not linked to the nonattainment status of the Allegheny County NAA and are therefore not “applicable requirements” for the purpose of reviewing Pennsylvania's redesignation request. Because Pennsylvania satisfies the general SIP elements and requirements set forth in CAA section 110(a)(2) applicable to and necessary for SO₂ redesignation, the EPA proposes to conclude that Pennsylvania has satisfied the criterion of section 107(d)(3)(E)(v) related to section 110(a)(2) of the CAA.

2. Part D Requirements

In addition to the CAA section 110 requirements, section 107(d)(3)(E)(v) requires that the state meet all the requirements applicable to the nonattainment area “under part D of this subchapter” for the nonattainment area to be redesignated. Both section 107 and part D are within subchapter 1 of the CAA. Part D, entitled “Plan Requirements for Nonattainment Areas,” consists of six subparts, of which only subparts 1 and 5 are applicable to SO₂ nonattainment areas. Subpart 1 (sections 171 through 179B) contains provisions that can apply to all nonattainment areas for all criteria pollutants, while subpart 5 (sections 191 through 192) contains additional provisions for SO₂, NO_x, or lead nonattainment areas. The requirements applicable to this redesignation are discussed below.

a. Subpart 1 Requirements

1. Section 172 Requirements

CAA section 172 requires states with nonattainment areas to submit plans that provide for timely attainment of the NAAQS. More specifically, CAA section 172(c) contains general requirements for nonattainment plans. A thorough discussion of these requirements is found in the General Preamble for Implementation of title I.⁴⁹

As noted in the General Preamble, certain attainment-related planning requirements under section 172(c) no longer have meaning for an area that is already attaining the NAAQS, and

⁴⁸ 80 FR 46494, August 5, 2015.

⁴⁹ 57 FR 13498, April 16, 1992.

⁴⁶ USS Mon Valley Works collectively refers to the USS Clairton, Edgar Thomson, and Irvin Plants located within the Allegheny County NAA.

therefore are not applicable for purposes of redesignation. For example, for an area that is already attaining the NAAQS, there would be nothing for the State to provide to show reasonable further progress to attainment in that area. Similarly, the CAA section 172 requirements for the attainment demonstration, implementation of reasonably available control measures, including reasonably available control technology, and contingency measures that are triggered if an area fails to meet RFP or fails to attain are also not applicable for purposes of redesignation.

With respect to CAA section 172(c)(3), Pennsylvania was required to submit an actual current emissions inventory with its attainment plan. Pennsylvania had submitted a base year inventory with its attainment plan SIP on October 3, 2017 and the EPA approved this element on April 23, 2020.⁵⁰

2. Section 173 Requirements

Section 173 of the CAA includes requirements for permit programs that are required in a nonattainment area for new sources as required by section 172(c)(5), known as nonattainment new source review (NNSR). However, the EPA has a longstanding interpretation that because the NNSR permit program is replaced by the PSD permit program upon an area's redesignation to attainment, nonattainment areas seeking redesignation to attainment do not need a fully approved part D NNSR program to be redesignated. A more detailed rationale for this view is described in a memorandum from Mary Nichols, Assistant Administrator for Air and Radiation, dated October 14, 1994, entitled, "Part D New Source Review Requirements for Areas Requesting Redesignation to Attainment."⁵¹ Nevertheless, the EPA notes that the ACHD's Article XXI Rules and Regulations for Air Pollution Control have SIP-approved NNSR and PSD programs found in section 2102.06 for NNSR and section 2102.07 for PSD. Allegheny County has incorporated by reference Pennsylvania's NNSR provisions at 25 Pa. Code 127.201–127.218 and also Pennsylvania's PSD regulations found at 25 Pa. Code 127.81–127.83. Pennsylvania's PSD regulations merely incorporate by reference the Federal PSD regulations found at 40 CFR part 52. Allegheny County has therefore addressed all required provisions for the permitting of

sources in NAAs, including NNSR. See 40 CFR 52.2020(c). Pennsylvania's PSD program will become applicable for SO₂ in the Allegheny County NAA upon redesignation to attainment.

3. Section 175A Requirements

CAA section 175A requires that states seeking redesignation of an area to attainment submit a "maintenance plan" containing certain elements. Pennsylvania included a maintenance plan for the Allegheny County NAA with its November 14, 2023 redesignation request, which the EPA is proposing to approve in conjunction with the redesignation, and it is discussed in detail in section II, Criterion (4) of this document.

4. Section 176 Requirements

Section 176(c) of the CAA requires that Federal actions conform to the air quality planning goals in the applicable SIP. The requirement to determine conformity applies to transportation plans, programs, and projects that are developed, funded, or approved under title 23 of the United States Code and the Federal Transit Act (transportation conformity) as well as to all other Federally-supported or funded projects (general conformity). Section 176(c) of the CAA also requires that states establish criteria and procedures to ensure that Federally-supported or funded transportation plans, transportation improvement programs (TIPs) and projects conform to the goals of the applicable SIP. This is referred to as a transportation conformity SIP. In the preamble to the January 1993 proposed transportation conformity rule, the EPA stated that, "Based on available emissions information, EPA believes highway and transit motor vehicles are not significant sources of lead or sulfur dioxide. Therefore, transportation plans, TIPs, and projects are presumed to conform to the applicable implementation plans for these pollutants."⁵² In November 1993, the EPA finalized its transportation conformity regulations. One section of those regulations addressed the geographic applicability of the transportation conformity regulations. The regulation stated at that time that, "The provisions of this subpart apply with respect to emissions of the following criteria pollutants: Ozone, carbon monoxide, nitrogen dioxide, and particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM₁₀)."⁵³ Based on this

provision, transportation conformity does not apply in nonattainment or maintenance areas for SO₂. Therefore, a transportation conformity SIP is not required for SO₂ nonattainment and maintenance areas and is not necessary for an SO₂ nonattainment area to be redesignated to attainment, and the EPA's transportation conformity rules do not apply to SO₂ for the Allegheny County NAA.

5. Section 179 Requirements

Section 179(a) of the CAA addresses potential sanctions for the failure of a State to submit certain required SIP elements by statutory deadlines. The EPA is not aware of any missing or incomplete Allegheny County planning elements subject to Section 179(a) of the CAA.

b. Subpart 5 Requirements

The subpart 5 requirements, which consist of sections 191 and 192 of the CAA, are specific provisions applicable to SO₂, NO₂ or lead nonattainment areas. Section 191 of the CAA requires states with areas designated nonattainment for SO₂, NO₂ or lead after November 15, 1990, to submit within 18 months of the designation an implementation plan meeting the requirements of part D. The substance of the required plans is established by section 172(c). Section 192 sets forth attainment dates for nonattainment areas under section 191.

For SO₂, section 192(a) requires that attainment plans provide for attainment of the primary standard as expeditiously as possible, but no later than five years from the date of the nonattainment designation. The EPA designated the Allegheny County NAA as nonattainment on August 5, 2013, with an attainment date of October 4, 2018. However, because the EPA is reviewing a redesignation request under section 107(d)(3)(E), rather than a determination of attainment under section 179(c), the determination of whether the Area attained by the attainment date set forth in section 192 is not applicable to this action proposing approval of Pennsylvania's redesignation request.

Based on the above, the EPA is proposing to find that Pennsylvania has satisfied the applicable requirements for the redesignation of the Allegheny County NAA under section 110 and part D of title I of the CAA.

III. Environmental Justice Concerns

Within its redesignation request and maintenance plan, ACHD provided

equal to a nominal 2.5 micrometers (PM_{2.5}). See 40 CFR 93.102(b)(1).

⁵⁰ 85 FR 22593, April 23, 2020.

⁵¹ Available in the docket for this action as *Nichols Memo* and at www.epa.gov/sites/default/files/2015-07/documents/101494m.pdf.

⁵² 58 FR 3776, January 11, 1993.

⁵³ This provision has been revised to include particles with an aerodynamic diameter less than or

supplemental information regarding environmental justice considerations within the Allegheny County NAA. Utilizing the Environmental Justice Index (EJI) tool developed by ACHD's Bureau of Assessment, Statistics, & Epidemiology, ACHD identified areas within the Allegheny County NAA with higher environmental health risks. The EJI tool uses Allegheny County-specific factors to evaluate environmental justice concerns, including the following indicators: race, education, median household income, housing vacancy, lead paint risk, greenness, air quality, and flood risk. Six municipalities within the Allegheny County NAA were designated as "highest need" areas according to EJI, while seven other municipalities were designated as "high need" areas. ACHD has indicated that its SO₂ monitoring network provides enhanced surveillance in vulnerable communities, and the two current SO₂ monitors in the Allegheny County NAA are located within or directly downwind of areas labeled as "highest need." Furthermore, ACHD states that the controls specified in its 2017 attainment demonstration as well as the shutdowns denoted in the maintenance demonstration illustrate the greatest emissions reductions in the "highest need" areas.

As explained in the EJ Legal Tools to Advance Environmental Justice 2022 document, the CAA provides states with the discretion to consider environmental justice in developing rules and measures related to redesignation requests and maintenance plans. In this instance, ACHD exercised this discretion, as is described above in summary. In reviewing ACHD's analysis, the EPA defers to ACHD's reasonable exercise of its discretion in considering EJ in this way. The EPA is taking proposed action to approve the SIP revision because it meets minimum requirements pursuant to the CAA and relevant implementing regulations. The EPA also finds that ACHD's consideration of EJ analyses in this context is reasonable. The EPA encourages air agencies generally to evaluate environmental justice considerations of their actions and carefully consider impacts to communities. The EJ analyses submitted by the air agency were considered but were not the basis for the EPA's decision making and the SIP met the minimum applicable requirements, as explained above.

IV. Proposed Action

The EPA's review of this material indicates that the Allegheny County NAA has met the criteria necessary

under CAA section 107(d)(3)(E) for the EPA to redesignate the Area from nonattainment to attainment for the 2010 1-hour primary SO₂ NAAQS. The EPA is proposing to approve the Pennsylvania redesignation request for the Allegheny County NAA, which was submitted on behalf of ACHD on November 14, 2023. Final approval of Pennsylvania's redesignation request would change the legal designation of the portion of Allegheny County designated nonattainment at 40 CFR 81.339 to attainment for the 2010 1-hour primary SO₂ NAAQS. The EPA is also proposing to approve ACHD's maintenance plan, which is designed to ensure that the potentially redesignated Allegheny County NAA will continue to maintain the SO₂ NAAQS. The EPA is soliciting public comments on the issues discussed in this document. These comments will be considered before taking final action.

V. Statutory and Executive Order Reviews

Under the CAA, the redesignation of an area to attainment and the accompanying approval of the maintenance plan under CAA section 107(d)(3)(E) are actions that affect the status of geographical area and do not impose any additional regulatory requirements on sources beyond those required by state law. A redesignation to attainment does not in and of itself impose any new requirements, but rather results in the application of requirements contained in the CAA for areas that have been redesignated to attainment. Moreover, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities

under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
 - Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
 - Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
 - Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
 - Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; Executive Order 12898 (Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994) directs Federal agencies to identify and address "disproportionately high and adverse human health or environmental effects" of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. The EPA defines environmental justice (EJ) as "the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies." The EPA further defines the term fair treatment to mean that "no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies."
- ACHD evaluated environmental justice considerations as part of its SIP submittal even though the CAA and applicable implementing regulations neither prohibit nor require an evaluation. The EPA's evaluation of ACHD's environmental justice considerations is described above in the section titled, "Environmental Justice Considerations." The analysis was done for the purpose of providing additional context and information about this rulemaking to the public, not as a basis of the action. The EPA is taking action under the CAA on bases independent of ACHD's evaluation of environmental justice. Due to the nature of the action

being taken here, this action is expected to have a neutral to positive impact on the air quality of the affected area. In addition, there is no information in the record upon which this decision is based that is inconsistent with the stated goal of Executive Order 12898 of achieving environmental justice for people of color, low-income populations, and Indigenous peoples.

In addition, this proposed rulemaking, for the redesignation and approval of the maintenance plan for the Allegheny County NAA, does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and the EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

RIN 0331-AA02

Freedom of Information Act and Privacy Act Regulations

AGENCY: Council on Environmental Quality.

ACTION: Proposed rule.

SUMMARY: The Council on Environmental Quality (CEQ) is proposing to amend its Freedom of Information Act (FOIA) regulations to incorporate amendments to the FOIA set forth in the FOIA Improvement Act of 2016; to conform to guidance for Federal agencies from the Department of Justice;

to make them easier for the public to understand and use; and to better reflect CEQ's current policy and practice.

These proposed regulations reaffirm CEQ's commitment to providing the fullest possible disclosure of records to the public. In addition, CEQ is proposing to amend its regulations implementing the Privacy Act of 1974 (the Privacy Act) to make them easier for the public to understand and use and to better reflect CEQ's current policy and practice. The proposed regulations would also make administrative changes, including reorganizing, renumbering, and renaming the sections of CEQ's current FOIA and Privacy Act regulations.

DATES: Send comments on or before January 10, 2025.

ADDRESSES: You may submit comments, identified by docket number [CEQ-2024-0001], by any of the following methods:

- **Federal eRulemaking Portal:** Visit <https://www.regulations.gov> and follow the instructions for submitting comments.
- **Fax:** 202-456-6546.
- **Mail:** Council on Environmental Quality, 730 Jackson Place NW, Washington, DC 20503.

Instructions: Your submission must include the agency name, "Council on Environmental Quality," and the docket number for this rulemaking, [CEQ-2024-0001]. CEQ will post your comment without change, including any personal information you provide, to <https://www.regulations.gov>. Do not submit any information you consider to be private information, privileged or confidential commercial or financial information, or other information the disclosure of which is restricted by statute.

Docket: For access to the docket, visit <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Samuel Roth, Associate General Counsel, 202-395-5750, Samuel.E.Roth@ceq.eop.gov.

SUPPLEMENTARY INFORMATION:

I. Background

A. The FOIA

The FOIA, 5 U.S.C. 552, provides a right of access to certain records that Federal agencies maintain and control. The FOIA directs each Federal agency to publish regulations that describe how the agency will process FOIA requests it receives from members of the public.

CEQ first adopted its FOIA regulations in 1977.¹ In 2010, CEQ

amended its regulation to reflect legislative amendments to the FOIA, a 2009 Presidential Memorandum regarding FOIA policy, and additional guidance from the Department of Justice (DOJ) and the Office of Management and Budget (OMB).² CEQ's current FOIA regulation is codified at 40 CFR part 1515.

CEQ is proposing to revise and republish its FOIA regulation in its entirety in order to make several improvements to the current rule. First, CEQ is proposing updates to reflect a number of important changes to the FOIA made by the FOIA Improvement Act of 2016 (Pub. L. 114-185). Section 3(a) of the Act directs each agency to review its FOIA regulations and update them to implement the changes set forth in the Act. Second, CEQ is proposing to include a number of provisions to improve the usefulness and readability of its FOIA regulations consistent with DOJ's 2017 revised Template for Agency Regulations (the Template).³ CEQ modeled this proposed rule on the Template, which also incorporates the FOIA Improvement Act of 2016's amendments to the FOIA.

Third, CEQ is proposing updates to better convey the FOIA's and CEQ's requirements to members of the public who are interested in CEQ's operations and activities, so they can easily understand and use CEQ's FOIA process.⁴ Specifically, CEQ referred to the Plain Writing Act of 2010 and the Federal Plain Language Guidelines⁵ in preparing the proposed rule.

Finally, the proposed rule reflects updates to CEQ's FOIA policies and procedures, as well as the practical experience of CEQ's FOIA staff. As it does under its current regulations, CEQ would administer the FOIA under the proposed regulations with a presumption of openness, consistent with the Memorandum of the Attorney General dated March 15, 2022.⁶

B. The Privacy Act

The Privacy Act, 5 U.S.C. 552a, governs each Federal agency's

¹ CEQ, Freedom of Information Act Procedures; Final Rule, 42 FR 65158 (Dec. 30, 1977).

collection, maintenance, use, and dissemination of any information about individuals that it maintains in a system of records. The Privacy Act directs each Federal agency to publish regulations that describe the agency's procedures for carrying out the provisions of the Privacy Act. CEQ first adopted a Privacy Act regulation in 1977,⁷ codified at 40 CFR part 1516.

CEQ is proposing to revise and republish its Privacy Act regulation in its entirety to make it easier for the public to understand and use and to reflect updates to CEQ's Privacy Act procedures over the past five decades.

II. Summary of the Proposed Rules

A. Part 1515—Freedom of Information Act Procedures

1. Subpart A—The Council on Environmental Quality's FOIA Program

Section 1515.1—What is the purpose of the rules in this part? This section describes the purpose of part 1515, which is to set forth CEQ's FOIA procedures, and explains the limitations of the regulations.

Section 1515.2—What kind of records does CEQ maintain? This section explains CEQ's activities and legal authorities.

Section 1515.3—Are there any CEQ records for which I do not have to make a request? This section describes CEQ information the public can access without filing a FOIA request.

Section 1515.4—Who is responsible for processing FOIA requests and appeals to CEQ? This section explains the roles of Chief FOIA Officer and FOIA Appeals Officer at CEQ.

Section 1515.5—Who can help me with my FOIA request to CEQ? This section explains that FOIA requesters can obtain assistance from CEQ's FOIA Public Liaison and dispute resolution services from the National Archives and Records Administration's Office of Government Information Services.

Section 1515.6—What are CEQ's procedures for preserving records? This section explains CEQ's procedures for preserving records in connection with its administration of the FOIA.

2. Subpart B—Making a FOIA Request and Receiving a Response

Section 1515.11—How do I make a FOIA request to CEQ? This section explains how members of the public

may request CEQ records under the FOIA. It also describes CEQ's procedures for clarifying requests that do not reasonably describe the records that the requester is seeking.

Section 1515.12—Will CEQ keep my request confidential? This section notes that FOIA requests and the identities of FOIA requesters are generally matters of public record.

Section 1515.13—When will CEQ respond to my request? This section describes CEQ's timeline for responding to FOIA requests, including circumstances in which CEQ will extend or pause the ordinary time period for processing FOIA requests.

Section 1515.14—What if my request is urgent? This section explains how to ask CEQ to expedite its processing of a FOIA request or appeal.

Section 1515.15—How will CEQ process my request? This section describes CEQ's procedures for processing requests and circumstances in which CEQ will deny requests.

Section 1515.16—How does CEQ determine when to withhold records or portions of a record? This section describes CEQ's procedures for applying the statutory exemptions from disclosure set forth in the FOIA.

Section 1515.17—What if I request records that involve another government office or agency? This section describes CEQ's procedures for consulting with other Federal agencies regarding whether to disclose or withhold particular records in response to a FOIA request, as well as CEQ's procedures for referring records to another agency for processing.

Section 1515.18—What happens if CEQ grants my request in full or in part? This section describes CEQ's procedure for disclosing records in response to a FOIA request.

Section 1515.19—What happens if CEQ denies my request in full or in part? This section describes CEQ's procedure for withholding records in response to a FOIA request.

3. Subpart C—Appealing a FOIA Request

Section 1515.20—Can I appeal CEQ's response to my request? This section describes how a FOIA requester may appeal a determination that CEQ made in processing the requester's request.

Section 1515.21—How will CEQ process my appeal? This section describes CEQ's procedures for upholding, reversing, or modifying a prior determination on appeal.

4. Subpart D—Fees for FOIA Requests and Appeals

Section 1515.31—Can CEQ charge fees for processing FOIA requests and appeals? This section explains that CEQ charges fees for processing FOIA requests, but not appeals, and describes the rules that CEQ will follow in determining whether to charge a fee and the amount of the fee. As in CEQ's current FOIA regulation, the provisions of this section and the subsequent sections reflect OMB's Uniform Freedom of Information Act Fee Schedule and Guidelines.

Section 1515.32—What is the amount of the fee for processing a request? This section describes how CEQ will determine the amount of the fee for processing a FOIA request.

Section 1515.33—Are there any exceptions for non-commercial requests? This section describes the services that CEQ will exclude from the calculation of fees for non-commercial requesters, in general, and for representatives of non-commercial scientific institutions, educational institutions, and the news media, in particular.

Section 1515.34—Can I apply for a fee waiver? This section describes the availability of fee waivers and explains the criteria CEQ will apply in determining whether to grant a fee waiver.

Section 1515.35—When will CEQ contact me about fee-related matters? This section describes CEQ's procedures for contacting FOIA requesters to resolve fee-related matters.

Section 1515.36—Do I have to pay fees if CEQ misses the deadline for responding to my request? This section describes the circumstances in which CEQ will not charge fees for processing a FOIA request because CEQ did not respond to the request within the time period set forth in the FOIA.

Section 1515.37—When are fees due and how do I pay them? This section describes when and how FOIA requesters must pay fees to CEQ, including the circumstances in which CEQ may require a FOIA requester to pay fees in advance.

Section 1515.38—What will CEQ do if I do not promptly pay the fee? This section explains when CEQ will charge interest and use debt collection procedures.

5. Subpart E—Confidential Commercial Information and Preservation of Records

Section 1515.41—How does CEQ handle confidential commercial information? This section implements the requirements of Executive Order

⁷ CEQ, Procedures for Gaining Access to Information Under the Privacy Act of 1974; Final Regulations, 42 FR 32537 (June 27, 1977); see also Procedures for Gaining Access to Information Under the Privacy Act of 1974, Correction to Final Regulations, 42 FR 35960 (July 13, 1977) (technical amendment).

(E.O.) 12600, *Predisclosure Notification Procedures for Confidential Commercial Information*,⁸ which directs Federal agencies to allow submitters of information to designate records that contain confidential commercial information and to notify submitters when a FOIA requester seeks disclosure of confidential commercial information.

B. Part 1516—Privacy Act Implementation

Section 1516.1—What is the purpose of these rules? This section describes the purpose of part 1516, which is to set forth CEQ's Privacy Act procedures.

Section 1516.2—What records do these rules cover? This section explains when part 1516 applies and explains the meaning of "record" and "system of records" for purposes of part 1516.

Section 1516.3—When will CEQ disclose records about me? This section describes the conditions under which CEQ will disclose records, which are (1) in response to an individual's request for the individual's own records; (2) as part of a routine use of records; or (3) pursuant to one of the other bases for disclosure that appear in section 3 of the Privacy Act, 5 U.S.C. 552a(b).

Section 1516.4—How can I obtain access to CEQ's records about me? This section describes the procedures for an individual to request access to the individual's own records.

Section 1516.5—How can I obtain information about how CEQ has used its records about me? This section describes the procedures for an individual to request an accounting of disclosures of the individual's own records.

Section 1516.6—How can I ask CEQ to correct my records? This section describes the procedures for an individual to request an amendment of the individual's own records and explains how CEQ will review such a request.

Section 1516.7—How can I appeal CEQ's decision to deny my request to access or correct records about me? This section describes the procedures for an individual to appeal CEQ's denial of the individual's request to amend the individual's own records.

Section 1516.8—Will CEQ charge me a fee for a copy of my records? This section describes the fees CEQ will charge for copies of records.

III. Regulatory Analysis and Notices

A. Regulatory Flexibility Act and Executive Order 13272, Proper Consideration of Small Entities in Agency Rulemaking

The Regulatory Flexibility Act (RFA), as amended, 5 U.S.C. 601 *et seq.*, and E.O. 13272, *Proper Consideration of Small Entities in Agency Rulemaking*,⁹ require agencies to assess the impacts of proposed and final rules on small entities. Under the RFA, small entities include small businesses, small organizations, and small governmental jurisdictions. An agency must prepare an Initial Regulatory Flexibility Analysis (IRFA) unless it determines and certifies that a proposed rule, if promulgated, would not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605(b). The FOIA authorizes Federal agencies to charge fees only to certain requesters, and only in order to recover the direct costs of searching for, reviewing, and duplicating agency records. Under the proposed rule, CEQ would continue to charge fees in accordance with the FOIA and guidelines from DOJ and OMB. The Privacy Act authorizes Federal agencies to charge fees only to individuals, and accordingly CEQ will not charge fees under the Privacy Act to small entities within the meaning of the RFA.

The fees that CEQ assesses for processing FOIA requests are nominal and will not have a significant impact on a substantial number of small entities within the meaning of the RFA. Accordingly, CEQ hereby certifies that the proposed rule, if finalized, would not have a significant economic impact on a substantial number of small entities.

B. Unfunded Mandates Reform Act

Section 201 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4, 2 U.S.C. 1531), requires Federal agencies to assess the effects of their regulatory actions on State, local, and Tribal governments, and the private sector to the extent that such regulations incorporate requirements specifically set forth in law. Before promulgating a rule that may result in the expenditure by a State, Tribal, or local government, in the aggregate, or by the private sector of \$100 million, adjusted annually for inflation, in any 1 year, an agency must prepare a written statement that assesses the effects on State, Tribal, and local governments and the private sector. 2 U.S.C. 1532. This proposed rule would apply only to requesters under the FOIA

or the Privacy Act and would not result in expenditures of \$100 million or more for State, local, and Tribal governments, in the aggregate, or the private sector in any 1 year. This proposed action also would not impose any enforceable duty, contain any unfunded mandate, or otherwise have any effect on small governments subject to the requirements of 2 U.S.C. 1531–1538.

C. Executive Order 12866, Regulatory Planning and Review

E.O. 12866, as supplemented and affirmed by E.O. 13563 and amended by E.O. 14094, provides that the Office of Information and Regulatory Affairs will review any regulatory action that qualifies as a "significant regulatory action" within the meaning of the E.O.¹⁰ The proposed rule does not qualify as a significant regulatory action.

D. Executive Order 12988, Civil Justice Reform

Under section 3(a) of E.O. 12988,¹¹ agencies must review their proposed regulations to eliminate drafting errors and ambiguities, draft them to minimize litigation, and provide a clear legal standard for affected conduct. Section 3(b) provides a list of specific matters that agencies must consider when conducting the review required by section 3(a). CEQ has conducted this review and determined that this proposed rule complies with the requirements of E.O. 12988.

E. Paperwork Reduction Act

This proposed rule would not impose any new information collection burden that would require additional review or approval by OMB under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*

F. National Environmental Policy Act (NEPA)

The National Environmental Policy Act of 1969 (NEPA) (Pub. L. 118-5, 42 U.S.C. 4321 *et seq.*), as amended, and the CEQ regulations that implement NEPA, 40 CFR parts 1500 through 1508, require consideration of the environmental effects of proposed actions in agency decision making. NEPA provides for three levels of review. First, agencies may establish in their agency-specific NEPA procedures categorical exclusions (CEs) for categories of actions that normally do

¹⁰ See E.O. 12866, *Regulatory Planning and Review*, 58 FR 51735, 51737 (Oct. 4, 1993); E.O. 14094, *Modernizing Regulatory Review*, 88 FR 21879, 21879–80 (Apr. 11, 2023); E.O. 13563, *Improving Regulation and Regulatory Review*, 76 FR 3821, 3822 (Jan. 21, 2011).

¹¹ 61 FR 4729 (Feb. 7, 1996).

⁸ 52 FR 23781 (June 25, 1987).

⁹ 67 FR 53461 (Aug. 16, 2002).

not have a significant effect on the human environment, individually or in the aggregate, and apply CEs to individual actions, as appropriate.¹² If an agency proposes to take an action that does not fall within a CE but is not likely to have significant environmental effects (or the significance of whose effects is unknown), CEQ's NEPA regulations direct the agency to prepare an environmental assessment (EA).¹³ If, as a result of this assessment, the agency determines that the proposed action will not have significant effects, the agency may make a finding of no significant impact (FONSI), in which case the agency may proceed with the action.¹⁴ Otherwise, the agency must prepare an environmental impact statement (EIS).¹⁵

CEQ has not established a CE for the dissemination of information under the FOIA; the disclosure of records under the Privacy Act; or the preparation, revision, and adoption of regulations generally. Accordingly, CEQ has prepared an EA to determine whether the proposed revisions to CEQ's FOIA and Privacy Act regulations would have a significant effect on the human environment. Because, as set forth below, the proposed regulation will likely result in a small reduction in the use of resources in CEQ's administration of the FOIA and the Privacy Act, CEQ proposes finding that the proposed regulation will have no significant impact on the human environment and that it is therefore unnecessary to prepare an EIS.

1. Environmental Assessment

Purpose and Need: As set forth above in the Summary of the Proposed Rule, CEQ adopted its FOIA regulations in 1977 and has not updated them to reflect developments in FOIA law, policy, and practice since 2010. As such, the current regulations fail to reflect current FOIA requirements, including those set forth in the FOIA Improvement Act of 2016. Furthermore, CEQ's current FOIA regulations do not conform in all points to the Template and the directions in the Plain Writing Act of 2010, and do not fully reflect CEQ's current policy and practice with respect to the FOIA. Likewise, CEQ adopted its Privacy Act regulations in 1977, and has not updated them since that time to reflect updates to CEQ's Privacy Act procedures.

Proposed Action and Alternatives: A summary of the proposed action is set forth above in the Summary of the

Proposed Rule. Under a "no action" alternative, CEQ would continue to operate under its current regulations, addressing inconsistencies between the regulations and current law and agency procedure on a case-by-case basis. CEQ has decided that this approach is undesirable because it is confusing to the public and requires CEQ staff to address inconsistencies between the regulation, the law, and agency procedure that CEQ can obviate by updating the regulation.

CEQ considered an alternative of making only narrowly tailored amendments to its current FOIA regulations in order to implement the FOIA Improvement Act of 2016. While this alternative would eliminate direct inconsistencies between CEQ's regulations and the FOIA, it would not address inconsistencies between CEQ's FOIA regulations, the Template and CEQ's FOIA policies and procedures, or inconsistencies between CEQ's Privacy Act regulations and CEQ's practice in implementing the Privacy Act.

CEQ's preferred alternative is to amend its regulations as proposed in this notice of proposed rulemaking, for the reasons set forth in parts I and II of this preamble.

Environmental Effects of Alternatives: CEQ's FOIA and Privacy Act programs affect the environment primarily through requesters' use of paper and energy in submitting requests and CEQ's use of paper and energy in searching for, reviewing, and duplicating responsive records. CEQ's use of paper and energy for these purposes has remained within the range typical of the operations of a small office. Currently, CEQ accepts FOIA and Privacy Act requests by mail and fax, which require the use of paper and energy to print and transmit requests to CEQ. The proposed regulations would direct FOIA and Privacy Act requesters to submit their requests electronically if they are able to do so, thereby reducing the use of paper and energy associated with mailed and faxed requests. CEQ receives requests by fax or mail infrequently, however, so any reduction in the use of resources is likely to be modest. In addition, by improving the public's timely access to information contained in CEQ records, the proposed regulations support the meaningful involvement of all communities, including communities with environmental justice concerns, in Federal decision-making processes.

List of Agencies and Persons Consulted: CEQ's NEPA staff reviewed and commented on this EA and this notice of proposed rulemaking.

2. Finding of No Significant Impact

Based on the foregoing EA, which this FONSI incorporates by reference, CEQ proposes to find that implementation of the proposed regulations in this document would reduce the use of paper and energy resources in CEQ's FOIA and Privacy Act programs, streamline CEQ's FOIA and Privacy Act procedures, make CEQ more accessible and responsive to the public, and improve the opportunity for all communities to access information and be meaningfully involved in Federal decision-making processes. Thus, there would be no significant effects associated with implementation of the proposed action, and it is not necessary for CEQ to prepare an EIS.

CEQ further finds that the proposed action is not one that normally requires the preparation of an EIS, closely similar to such an action, or an action without precedent. CEQ invites public comment on this environmental assessment.

List of Subjects

Administrative practice and procedures, Courts, Government employees, Privacy, Records.

Amy B. Coyle,
Principal Deputy General Counsel.

For the reasons discussed in the preamble, the Council on Environmental Quality proposes to revise and republish 40 CFR parts 1515 and 1516 to read as follows:

PART 1515—FREEDOM OF INFORMATION ACT PROCEDURES

Subpart A—The Council on Environmental Quality's FOIA Program

Sec.

1515.1 What is the purpose of the rules in this part?

1515.2 What kind of records does CEQ maintain?

1515.3 Are there any CEQ records for which I do not have to make a request?

1515.4 Who is responsible for processing FOIA requests and appeals to CEQ?

1515.5 Who can help me with my FOIA request to CEQ?

1515.6 What are CEQ's procedures for preserving records?

Subpart B—Making a FOIA Request and Receiving a Response

1515.11 How do I make a FOIA request to CEQ?

¹² 40 CFR 1501.4(a).

¹³ *Id.* § 1501.5(a).

¹⁴ *Id.* § 1501.6.

¹⁵ 40 CFR part 1502.

- 1515.12 Will CEQ keep my request confidential?
- 1515.13 When will CEQ respond to my request?
- 1515.14 What if my request is urgent?
- 1515.15 How will CEQ process my request?
- 1515.16 How does CEQ determine when to withhold records or portions of a record?
- 1515.17 What if I request records that involve another government office or agency?
- 1515.18 What happens if CEQ grants my request in full or in part?

- 1515.38 What will CEQ do if I do not promptly pay the fee?

Subpart E—Confidential Commercial Information and Preservation of Records

- 1515.41 How does CEQ handle confidential commercial information?

Authority: 5 U.S.C. 552; E.O. 13392; Pres. Mem. 74 FR 4685.

Section 1515.41 also issued under E.O. 12600.

Subpart A—The Council on Environmental Quality's FOIA Program

§ 1515.1 What is the purpose of the rules in this part?

(a) This part explains how you, a member of the public, may request copies of records from the Council on Environmental Quality (CEQ) under the Freedom of Information Act (the FOIA). You can find the text of the FOIA at 5 U.S.C. 552.

(b) Nothing in this part entitles you to any service or to the disclosure of any record to which you are not entitled under the FOIA.

§ 1515.2 What kind of records does CEQ maintain?

CEQ carries out responsibilities under the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321–4347); the Environmental Quality Improvement Act of 1970, as amended (42 U.S.C. 4371–4375); Reorganization

Plan No. 1 of 1977 (July 15, 1977); and various Executive orders, among other authorities. CEQ maintains certain records on these subjects, among others.

§ 1515.3 Are there any CEQ records for which I do not have to make a request?

Yes. The FOIA requires CEQ to make certain records available for public inspection online, such as records that have been or are likely to become the subject of repeated requests. You can find those records, together with an index, at <https://www.whitehouse.gov/ceq/foia/>.

§ 1515.4 Who is responsible for processing FOIA requests and appeals to CEQ?

(a) CEQ's Chief FOIA Officer oversees the administration of requests made to CEQ under the FOIA. The Chief FOIA Officer, or the Chief FOIA Officer's designee, is responsible for processing and granting or denying FOIA requests. The Chair of CEQ appoints the Chief FOIA Officer.

(b) The Chief FOIA Officer may appoint a FOIA Appeals Officer. If the Chief FOIA Officer does so, the FOIA Appeals Officer or the FOIA Appeals Officer's designee is responsible for processing and granting or denying FOIA appeals. Otherwise, the Chief FOIA Officer or the Chief FOIA Officer's designee is responsible for processing FOIA appeals.

§ 1515.5 Who can help me with my FOIA request to CEQ?

(a) You may contact CEQ's FOIA Public Liaison for assistance with your FOIA request, including help in formulating your request and information about the status of your request, or to submit concerns about CEQ's handling of your request. You can contact CEQ's FOIA Public Liaison by email at efoia@ceq.eop.gov or by phone at 202–395–5750. For additional contact information, visit <https://www.foia.gov> and choose “Council on Environmental Quality” in the index of government agencies.

(b) If you have a dispute with CEQ over its handling of your FOIA request, you may contact the National Archives and Records Administration's Office of Government Information Services for assistance or dispute resolution services by calling (202) 741–5770 or visiting <https://archives.gov/ogis>.

(c) If you are an individual with a disability, CEQ will provide you with access to and use of information and data through its FOIA program that is comparable to the access to and use of the information and data by members of the public who are not individuals with

disabilities, unless doing so would impose an undue burden on CEQ.

(d) If your proficiency in English is limited, CEQ will take steps as appropriate to provide you with meaningful access to CEQ's FOIA program.

§ 1515.6 What are CEQ's procedures for preserving records?

(a) CEQ preserves records pursuant to title 44 of the United States Code and the Records Schedules issued by the Archivist of the United States.

(b) CEQ will not dispose of or destroy agency records that are the subject of a pending request, appeal, or lawsuit under the FOIA.

Subpart B—Making a FOIA Request and Receiving a Response

§ 1515.11 How do I make a FOIA request to CEQ?

(a) You must make your request by email to efoia@ceq.eop.gov or by completing the request form at <https://www.foia.gov>. If you are not able to make your request by either of these methods, please contact CEQ's FOIA Public Liaison for assistance.

(b) When making a request to CEQ, you must:

(1) Include “Freedom of Information Act Request” in the subject line if you are submitting your request by email. If your email includes attachments, you must enter your request in the body of the email in addition to the attachment.

(2) Identify or reasonably describe the records you are requesting in sufficient detail to enable CEQ personnel to locate them with a reasonable amount of effort. Make your request as specific as you can. If possible, include the date (or a range of dates), title or name, author, recipient, subject matter, case number, file designation, or reference number for the records you seek.

(3) Explain if you need CEQ to provide the records in a particular form or format. CEQ ordinarily provides records in Portable Document Format (PDF), but CEQ will provide its response in the format you request if it is reasonably practicable to do so.

(4) Provide your contact information, such as your phone number, your email address, or both, so that CEQ is able to contact you, as necessary, regarding the status of your request and to clarify matters related to your request.

(5) Indicate the maximum amount you are willing to pay in fees, as described in subpart E of this Part. If you are requesting a fee waiver as part of your initial request, include the statement described at § 1515.34(a).

(6) If applicable, include a signed letter on your institution's official

letterhead, stating that you believe you qualify for a reduction of fees, as described in § 1515.33, because you are a representative of a non-commercial scientific institution, a representative of an educational institution, or a member of the news media.

(c) If you are requesting information that is subject to the Privacy Act of 1974 (*i.e.*, records about you that CEQ maintains in a system of records), you must follow the procedures under part 1516 of this chapter, instead of the procedures in this part.

(d) If you are requesting copies of ethics-related documents that CEQ makes available pursuant to section 105 of the Ethics in Government Act of 1978 (such as CEQ employees' public financial disclosure reports), you must follow the procedures at 5 CFR 2634.603, instead of the procedures in this part. For more information, visit the U.S. Office of Government Ethics website at <https://www.oge.gov>.

(e) If CEQ determines that your request does not reasonably describe the records you are seeking, such that CEQ would not be able to locate the records you have requested with a reasonable amount of effort, CEQ will notify you and explain what additional information you need to provide regarding the records that you seek.

(1) For example, if you request all records related to a broad subject or all communications between CEQ and a third party, we will generally ask you to clarify the scope of your request.

(2) Furthermore, your request must seek existing records of CEQ; we will not create new records or compile new information in order to respond to a FOIA request.

(3) If you have not provided a way to contact you, or you do not respond to our inquiry within 30 working days (*i.e.*, excepting Saturdays, Sundays, and Federal holidays), CEQ will administratively close your request. If possible, we will notify you of the closure.

§ 1515.12 Will CEQ keep my request confidential?

No, CEQ will not keep your request confidential. A FOIA request, including the requester's identity, is generally a matter of public record. CEQ publishes logs of requests and requesters at <https://www.whitehouse.gov/ceq/foia/>.

§ 1515.13 When will CEQ respond to my request?

(a) CEQ's Chief FOIA Officer or the Chief FOIA Officer's designee will make an initial determination of how CEQ will respond to your request within 20 working days from the date that CEQ

received your request, except as provided in this section.

(b) If CEQ is unable to make a determination within the 20-day period because of "unusual circumstances," we may extend the period of time in which we will respond to your request.

(1) "Unusual circumstances" exist when, in order to properly process your request, CEQ must search for, collect, and appropriately examine a voluminous amount of separate and distinct records, or CEQ must consult with another agency or another component of the Executive Office of the President.

(2) In determining whether "unusual circumstances" are present, CEQ may treat multiple requests on clearly related matters from you (or from other persons acting in concert with you) as a single request.

(3) Before the conclusion of the 20-day period, CEQ will notify you of the "unusual circumstances" that apply and the date by which we estimate we will complete processing your request.

(4) When the extension will exceed 10 working days, CEQ will provide you the opportunity to modify the request or arrange an alternative time period for processing the original or modified request.

(c) If CEQ reasonably requires additional information from you to clarify your request or to resolve fee-related matters, we may toll (*i.e.*, pause) the 20-day period, or any extension of that period, from the date we request information from you until the date you respond. We will only toll the response period one time for the purpose of clarifying your request, but we may toll the response period more than once to resolve fee-related matters.

§ 1515.14 What if my request is urgent?

(a) You may ask CEQ to expedite the processing of your FOIA request or appeal. If CEQ agrees to expedite processing of your request or appeal, we will process it with priority over non-expedited requests and appeals and respond to you as quickly as possible.

(b) CEQ will expedite requests or appeals if:

(1) Failing to expedite the request or appeal could reasonably be expected to pose an imminent threat to the life or physical safety of an individual; or

(2) You are primarily engaged in disseminating information (*e.g.*, you are a member of the news media), and you have an urgent need to inform the public about an actual or alleged Federal Government activity, beyond the public's right to know about government activity generally.

(c) You may ask for expedited processing when you make your initial request or appeal, or at any later time.

(d) In order to ask for expedited processing, you must submit a statement, certified to be true and correct, that explains in detail why your request or appeal satisfies the requirements of paragraph (b)(1) or (b)(2) of this section. If you believe that you have an urgent need to inform the public about an actual alleged Federal Government activity, you should provide examples of other coverage of the same or related subjects, if possible. CEQ may waive the formal certification requirement at its discretion.

(e) CEQ will notify you within 10 calendar days whether we will grant or deny you expedited processing.

(f) If CEQ denies you expedited processing, you may appeal that determination using the procedures in subpart C of this part. We will process your appeal as promptly as we can.

§ 1515.15 How will CEQ process my request?

(a) If your request does not reasonably describe the records you seek; the information you have requested is not a record subject to FOIA; CEQ has already published the information you are requesting; or your request does not follow the procedures described in the regulations in this part, we will deny your request in accordance with § 1515.19.

(b) If your request reasonably describes the records you seek and otherwise comports with the procedures described in this part, CEQ will process your request as follows:

(1) CEQ will acknowledge your request in writing and assign it an individualized tracking number. The written acknowledgment will include CEQ's estimate of the date on which we will respond to your request.

(2) CEQ will search for agency records that respond to your request. CEQ ordinarily will search records in our possession as of the date that we begin our search. We will notify you if we use a different date.

(3) If CEQ finds records that you have requested, we will determine whether grant your request (*i.e.*, provide you with the records you have requested) or to deny it (*i.e.*, withhold the relevant records from disclosure in accordance with § 1515.16).

(4) Once CEQ has determined whether to grant your request in full, grant it in part and deny it in part, or deny it in full, we will notify you of our determination in writing.

(c) If CEQ determines that it has a voluminous amount of records

responsive to your request, or if your request requires CEQ to search for records in multiple locations (electronic or physical), CEQ may provide you with one or more interim responses, releasing responsive records to you on a rolling basis.

§ 1515.16 How does CEQ determine when to withhold records or portions of a record?

(a) If CEQ finds records that are responsive to your request, we will review the records to determine whether to withhold any of the records or portions of individual records.

(b) The FOIA identifies nine exemptions to the requirement that agencies provide agency records upon request. CEQ will withhold a record or a portion of a record if disclosing it would harm an interest that one of these FOIA exemptions protects. In determining the interests at stake in disclosing or withholding CEQ records, we bear in mind that Congress, in creating CEQ, intended for the CEQ Chair to serve as a confidential advisor to the President and the President's immediate advisors on matters of environmental policy.

(c) CEQ will also withhold a record, or a portion of a record, if disclosing it would violate another provision of the FOIA or a law other than the FOIA.

(d) If the record concerns another government agency, CEQ generally will involve the other agency in determining whether to withhold the record or portions of the record, using the procedures at § 1515.17.

§ 1515.17 What if I request records that involve another government office or agency?

(a) If CEQ determines that any of the CEQ records you have requested involve another agency in the Federal Government, including another component of the Executive Office of the President, we generally will involve the other agency in reviewing that record in either of two ways.

(1) CEQ may consult with the other agency regarding the record to obtain the other agency's views on whether the record or portions of the record are exempt from disclosure under the FOIA. We will take the other agency's views into consideration when making a final determination of whether to withhold the record or any portions of the record.

(2) CEQ may refer the record to the other agency, in which case the other agency will determine whether the record or portions of the record are exempt from disclosure under the FOIA, and will respond directly to you regarding your request for the record. If CEQ determines to refer records you

have requested to another agency, we will notify you of the referral and explain how to contact the other agency's FOIA officials.

(b) CEQ will choose between consulting with another agency about a record and referring the record to the other agency according to the following principles:

(1) Ordinarily, CEQ will use consultation procedures for records that originated with CEQ but that contain information of interest to another agency or office, and CEQ will refer records that originated with another agency to that agency.

(2) CEQ will typically refer a classified record (or a portion of a record) or a record that may be appropriate for classification to the agency that either classified the information or should consider the information for classification.

(c) CEQ may make agreements with other agencies about how CEQ will handle records involving that agency or how that agency will handle records involving CEQ. Any agreement we make will comply with the FOIA and these rules.

§ 1515.18 What happens if CEQ grants my request in full or in part?

Once you have paid the fees that are due under subpart E of this part (if any), CEQ will promptly provide you with a copy of the records you requested, except for the records or portions of records we have determined to withhold under § 1515.16. We will follow the procedures in § 1515.19 with respect to those records or portions of records.

§ 1515.19 What happens if CEQ denies my request in full or in part?

(a) CEQ may deny your request in full or in part for these reasons, among others:

(1) CEQ determines to withhold all or a portion of the records you requested under § 1515.16;

(2) Your request does not reasonably describe the records you seek;

(3) The information you requested is not a record subject to the FOIA;

(4) CEQ has already published the information you are requesting;

(5) The records you requested do not exist, cannot be located, or have been destroyed;

(6) The records you requested are not readily reproducible in the form or format you seek; or

(7) Your request does not comport with the procedures set forth in these regulations.

(b) If CEQ denies your request regarding expedited processing or fee-related matters, we will also treat that as

a denial of your request in part and follow the procedures in this section.

(c) If CEQ determines to deny your request in full or in part, we will notify you of the basis for the denial. The notification will include the following information:

(1) The name and title or position of the person responsible for the denial;

(2) A brief statement of the reasons for the denial, including any FOIA exemption CEQ applied in determining to withhold records (or portions thereof) under § 1515.16;

(3) An estimate of the volume of the records CEQ is withholding, unless the volume is indicated by markings we have made on the records we are providing;

(4) A statement that you may appeal the denial to CEQ, under subpart C of this part, and an explanation of what you must do to appeal; and

(5) A reminder that you can obtain assistance from CEQ's FOIA Public Liaison and dispute resolution services from the National Archives and Records Administration's Office of Government Information Services.

(d) For each record CEQ discloses in part, we will mark the record clearly to show which portions we are withholding and the FOIA exemptions we applied in determining to withhold those portions, unless doing so would harm an interest protected by an applicable FOIA exemption. If technically feasible, we will mark the record to indicate the location of the portions we are withholding.

Subpart C—Appealing a FOIA Request

§ 1515.20 Can I appeal CEQ's response to my request?

(a) Yes. You may appeal CEQ's response if you disagree with any determination that CEQ made in responding to your request, including CEQ's determination to deny your request in whole or in part. CEQ's determination to deny you expedited processing, CEQ's determination of how to conduct the search for records, and fee-related determinations.

(b) CEQ must receive your appeal within 90 calendar days of the date on which CEQ notified you of the relevant determination in writing.

(c) You must make your appeal by email to efoia@ceq.eop.gov. If you are not able to make your appeal by email, please contact CEQ's FOIA Public Liaison for assistance.

(1) You must include "Freedom of Information Act Appeal" in the subject line. If your email includes attachments, you also must explain your request in the body of the email, in addition to the attachment.

(2) If you are not able to make your appeal by email, please contact CEQ's FOIA Public Liaison for assistance.

(d) Your appeal must include your request's individualized tracking number and must identify the specific CEQ determinations you are appealing.

(e) If you fail to properly appeal a determination that CEQ made in processing your request, you may lose your right to challenge that determination in Federal court.

§ 1515.21 How will CEQ process my appeal?

(a) CEQ will review the determinations you have appealed and determine if they are consistent with applicable law and policy. CEQ will conduct this review *de novo*, which means that CEQ will not presume that its prior determinations were correct.

(b) CEQ will respond to your appeal within 20 working days from the date that CEQ received your appeal.

(c) If CEQ determines to uphold a determination that you have appealed, CEQ's response will:

(1) Include a statement that identifies our reasons for affirming the decision, including any FOIA exemption CEQ applied in determining to affirm our determination to withhold a record or a portion of a record; and

(2) Explain how to challenge our determination by filing a lawsuit in Federal court and how to seek dispute resolution services from the National Archives and Records Administration's Office of Government Information Services.

(d) If CEQ determines to reverse or modify a determination that you have appealed, we will reprocess your request in accordance with the reversed or modified determination, using the procedures set forth at § 1515.15.

Subpart D—Fees for FOIA Requests and Appeals

§ 1515.31 Can CEQ charge fees for processing FOIA requests and appeals?

(a) Yes. CEQ may charge fees for processing your FOIA request.

(b) CEQ will determine whether to charge a fee and the amount of the fee by using the rules in this subpart and the Office of Management and Budget's Uniform Freedom of Information Act Fee Schedule and Guidelines, as amended.¹

(c) CEQ will not charge fees for deciding whether to grant or deny your appeal. If CEQ grants your appeal, we will charge fees for any additional searching, reviewing, or duplication that we carry out as a result of your appeal.

For instance, if you appeal our determination of how to conduct the search for records, and we grant your appeal, we will conduct a new search in the manner you requested and will charge you fees accordingly.

§ 1515.32 What is the amount of the fee for processing a request?

(a) CEQ will charge fees equal to:

(1) The basic hourly rate of pay for each employee who participates in searching for records, reviewing records, or duplicating records (including contract employees), multiplied by the total number of hours that the employee worked on your request (rounded to the nearest quarter of an hour), plus 16 percent (to account for employee benefits); plus

(2) The total direct costs that CEQ incurs in searching for, reviewing, or duplicating records, such as the cost of operating computers and other electronic equipment, but excluding overhead expenses such as the cost of office space, heating, and lighting; plus

(3) An additional fee equal to the total direct costs of any additional services that you and CEQ agree upon, such as providing multiple copies of a record.

(b) In determining the fee under paragraph (a) of this section, CEQ will use the following guidelines:

(1) "Searching for records" is the process of looking for and retrieving the records you requested (including by electronic search) and determining whether individual records contain the information that you seek. CEQ will charge fees for searching for records even if we do not locate any records that respond to your request, or even if we determine not to disclose any of the records that we locate.

(2) "Reviewing records" is the process of examining records to determine whether to withhold them, in accordance with § 1515.16, and preparing records for disclosure (for instance, by marking records to indicate which portions CEQ is withholding).

(i) "Reviewing records" also includes the time CEQ spends obtaining and considering the views of other government agencies under § 1515.17 and the time CEQ spends obtaining and considering formal objections to disclosure under § 1515.41.

(ii) "Reviewing records" does not include time CEQ spends resolving general legal or policy questions regarding the application of exemptions.

(iii) CEQ will charge fees for reviewing records even if we determine not to disclose any of the records that we review.

(3) "Duplicating records" is the process of reproducing records,

including scanning or printing records as necessary, in order to provide you with a copy.

(4) CEQ may include employee costs and direct costs that another component of the Executive Office of the President incurs in assisting CEQ with your request.

(c) CEQ will not charge fees if the total is less than \$25.00, or if we determine that the cost of collecting the fee would exceed the amount of the fee.

(d) If CEQ reasonably determines that you (or other persons acting in concert with you) have submitted multiple requests on related matters for the purpose of avoiding fees, we may aggregate those requests and charge fees accordingly.

§ 1515.33 Are there any exceptions for special requesters?

(a) Yes. CEQ makes the following exceptions for special requesters:

(1) CEQ will not charge you fees for searching for records if you are an educational institution, a noncommercial scientific institution, or a representative of the news media. Otherwise, CEQ will not charge you fees for the first 2 hours of searching for records, unless you are a commercial requester.

(2) CEQ will not charge you fees for reviewing records, unless you are a commercial requester.

(3) CEQ will not charge you fees for the first 100 pages of duplication (or an equivalent cost for duplication in other media), unless you are a commercial requester.

(b) For purposes of applying these exceptions:

(1) You are a representative of a non-commercial scientific institution if your institution operates solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry, and your request is in furtherance of scientific research.

(2) You are a representative of an educational institution if you work for or study at a school that operates a program of scholarly research and your request is in furtherance of scholarly research.

(3) You are a representative of the news media if you or your employer gathers information of potential interest to a segment of the public, uses editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience, and your request is in furtherance of these activities. For the purposes of this paragraph (b)(3), "news" means information that is about events of current interest to the public.

(i) If you are a freelance journalist, CEQ will consider you a representative

¹ 52 FR 10016 (Mar. 27, 1987).

of the news media if you can demonstrate that you have a solid basis to expect that a news media entity will publish the work to which your request relates, such as a publishing contract or a strong record of past publications.

(ii) If you are a representative of the news media, CEQ will ordinarily presume that your request does not primarily further a commercial interest for purposes of this section and § 1515.34.

(4) You are a commercial requester if you do not qualify as a special requester under paragraphs (b)(1), (b)(2), or (b)(3) of this section and your request furthers a commercial, trade, or profit interest or supports litigation in furtherance of those interests.

(c) If you claim to be a representative of a non-commercial scientific institution, an educational institution, or the news media, CEQ may require you to verify your status by providing reasonable documentation, such as a signed letter on official letterhead. If you claim that your request is non-commercial for another reason, CEQ may require you to explain why it is non-commercial.

§ 1515.34 Can I apply for a fee waiver?

(a) Yes. You can apply for a waiver of fees (or a reduction of fees) by submitting a written statement that explains why disclosing the information will meet the conditions in paragraph (c) of this section.

(b) You can apply for a fee waiver at any time before CEQ completes processing your request or an appeal of your request. You can apply for a fee waiver with respect to a part of the records you seek or with respect to all of them.

(c) CEQ will grant you a fee waiver if all of the following conditions are met:

(1) Disclosure of the requested information would shed light on the operations or activities of the government. The connection between the subject matter of your request, on the one hand, and identifiable operations or activities of the Federal Government, on the other, must be direct and clear, not remote or attenuated.

(2) Disclosure of the requested information would likely contribute significantly to public understanding of those operations or activities, because it would satisfy both of the following criteria:

(i) Disclosure of the requested records would be meaningfully informative about government operations or activities. (The disclosure of information that already is in the public domain, in either the same or a

substantially identical form, would not be meaningfully informative if nothing new would be added to the public's understanding.)

(ii) The disclosure would contribute to the understanding of a reasonably broad audience of persons interested in the subject, as opposed to your own individual understanding. (CEQ will presume that your request satisfies this criterion if you are a representative of the news media; otherwise, we will consider your expertise in the subject area as well as your ability and intention to effectively convey information to the public.)

(3) Disclosure of the requested information would not primarily advance your commercial, trade, or profit interests.

(d) CEQ will determine whether to grant or deny your request for a fee waiver if and when we would otherwise charge you fees. If we determine prior to that time that we are unlikely to grant your request for a fee waiver, we may notify you of our determination so that you may modify your request.

§ 1515.35 When will CEQ contact me about fee-related matters?

(a) If CEQ determines or estimates that we will charge you more than \$25.00 in fees, we will notify you of our determination or estimate, unless you have already told us that you are willing to pay fees equal to or in excess of the amount we have determined or estimated.

(1) If CEQ can only estimate a part of the fee, we will explain that in the notice.

(2) If you are entitled to 2 hours of searching and 100 pages of duplication for free for the reasons described in § 1515.33, CEQ will advise you of this and explain whether we have already provided these entitlements.

(3) CEQ may ask you to tell us the maximum amount you are willing to pay in fees in writing, in which case we will toll the period for processing your request until you respond.

(b) If CEQ determines or estimates that the fee will exceed the maximum amount you previously told us you were willing to pay, we will inquire with you about modifying your request or increasing the maximum, and we will toll the period for processing your request until you respond.

(c) If you have not provided a way to contact you regarding fee matters, or you do not respond to a fee-related inquiry within 30 calendar days, CEQ will deny your request.

§ 1515.36 Do I have to pay fees if CEQ misses the deadline for responding to my request?

CEQ will not charge search fees or duplication fees if we have failed to grant or deny your request within the period described in § 1515.13, unless:

(a) CEQ determines that unusual circumstances are present, as described in § 1515.13, and

(1) CEQ finishes processing your request within 10 working days of the original deadline; or

(2) Your request seeks more than 5,000 pages of records; CEQ has provided you timely written notice of the unusual circumstances; and we have discussed with you how you could effectively limit the scope of your request (or we made at least three attempts in good faith to do so); or

(b) A court grants CEQ additional time to process your request due to exceptional circumstances, and we finish processing your request within the period set forth in a court order.

§ 1515.37 When are fees due and how do I pay them?

(a) Ordinarily, CEQ will bill you for fees at the time we respond to your FOIA request.

(b) When CEQ determines or estimates that the total fee for your request will exceed \$250, we may require that you pay all or part of the anticipated fee in advance before we will process (or continue to process) your request.

(c) If you have previously failed to pay a FOIA fee that was due to any government agency within 30 calendar days of the billing date, CEQ may require you to pay the outstanding fee (including interest) and make an advance payment of the anticipated fee for your current request before we will process (or continue to process) your request.

(d) If CEQ requires you to make an advance payment under this section, we will toll the period for processing your request until we receive the payment. If you do not pay within 30 calendar days, we will deny your request.

(e) CEQ will inform you of how to make a payment at the time that we bill you or require you to make an advance payment.

§ 1515.38 What will CEQ do if I do not promptly pay the fee?

If you do not pay a fee within 30 calendar days of the date of the bill:

(a) CEQ may charge interest, at the rate provided for in 31 U.S.C. 3717, from the 31st day following the date of billing through the date we receive your payment; and

(b) CEQ will follow the provisions of the Debt Collection Act of 1982 (Pub. L. 97–365, 96 Stat. 1749), as amended, including its administrative procedures, which provide for the use of consumer reporting agencies, collection agencies, and offset.

Subpart E—Confidential Commercial Information and Preservation of Records

§ 1515.41 How does CEQ handle confidential commercial information?

(a) At the time that a person or entity outside the Federal Government (a submitter) directly or indirectly provides information to CEQ, the submitter must mark or otherwise designate any part of its submission that it considers in good faith to be confidential commercial information.

(1) “Confidential commercial information” means commercial or financial information that comes within the scope of Exemption 4 of the FOIA, 5 U.S.C. 552(b)(4).

(2) “In good faith” means not frivolously.

(3) The submitter also must explain how long CEQ should consider the information to be confidential commercial information, or else CEQ will presume that the designation expires after 10 years.

(b) Prior to disclosing information in response to a FOIA request, CEQ will provide written notice to the submitter if:

(1) The submitter has properly designated the information as confidential commercial information pursuant to paragraph (a) of this section; or

(2) CEQ requires the submitter's views on whether the information is confidential commercial information.

(c) Each notice under paragraph (b) of this section will either describe the information in question or include a copy of the requested records (or portions of records) containing the information. If the matter involves a large number of submitters, CEQ may post or publish the notice in a place or manner reasonably likely to inform the submitters of the potential disclosure, instead of sending individual notifications.

(d) CEQ will not provide a notice under paragraph (b) of this section if:

(1) CEQ has determined to withhold the information under § 1515.16;

(2) Someone other than CEQ has already lawfully published the information; or

(3) A law other than the FOIA requires CEQ to disclose the information.

(e) When CEQ provides a notice under paragraph (b) of this section:

(1) CEQ will give the submitter a reasonable period in which to reply.

(2) If the submitter objects to CEQ disclosing the information (in whole or in part), the submitter must reply to CEQ with a detailed explanation of which FOIA exemptions it believes apply to the information and why the information comes within the scope of those FOIA exemptions. CEQ will consider the submitter's reply, if any, in determining whether to disclose the information in question in response to a FOIA request.

(3) If the submitter does not reply to CEQ during the period stated in the notice, CEQ will deem the submitter to have no objection to CEQ's disclosure of the information, except that CEQ may consider late replies in its discretion.

(f) If CEQ determines to disclose information over a submitter's objection, CEQ will notify the submitter in writing.

(1) The notice will explain why CEQ disagreed with the submitter's objections and describe the information CEQ will disclose (or include a copy of the relevant agency records in the form in which CEQ will release them).

(2) The notice will indicate the date on which CEQ will disclose the information, which will be a reasonable number of calendar days following the date of the notice unless the FOIA requires us to disclose the information more promptly.

(3) CEQ will also provide the notice described in this paragraph (f) when CEQ determines to disclose information that a submitter designated as confidential commercial information not in good faith.

(g) CEQ will notify a submitter who has designated confidential commercial information pursuant to paragraph (b) of this section if a requester files a lawsuit seeking to compel CEQ to disclose the information under the FOIA.

(h) CEQ will notify the relevant FOIA requester whenever it provides a notice under paragraph (b) or (f) of this section, and whenever a submitter files a lawsuit to prevent the disclosure of information.

PART 1516—PRIVACY ACT IMPLEMENTATION

Sec.

1516.1 What is the purpose of these rules?

1516.2 What records do these rules cover?

1516.3 When will CEQ disclose records about me?

1516.4 How can I obtain access to CEQ's records about me?

1516.5 How can I get information about how CEQ has used its records about me?

1516.6 How can I ask CEQ to correct my records?

1516.7 How can I appeal CEQ's decision to deny my request to access or correct records about me?

1516.8 Will CEQ charge me a fee for a copy of my records?

Authority: 5 U.S.C. 552a.

§ 1516.1 What is the purpose of these rules?

(a) This part explains how the Council on Environmental Quality (CEQ) manages certain records about individuals under the Privacy Act of 1974 (the Privacy Act). You can find the text of the Privacy Act at 5 U.S.C. 552a.

(b) This part explains how you, a citizen or lawful permanent resident of the United States, can request access to records about yourself, request that CEQ amend or correct those records, or request that CEQ inform you about how it has used those records.

§ 1516.2 What records do these rules cover?

(a) This part covers any records about you that CEQ maintains in a system of records.

(b) A record is any item, collection, or grouping of information about you that contains your name or another piece of information that identifies you (for example, your social security number).

(c) CEQ maintains your record in a system of records if CEQ:

(1) Maintains, collects, uses, or disseminates the record as part of a larger group of records; and

(2) Organizes the group by individuals' names or by another piece of information that identifies individuals (such as their social security numbers).

§ 1516.3 When will CEQ disclose records about me?

CEQ will only disclose records about you that it maintains in system of records if:

(a) You or your authorized representative submit a request for your own records or agree in writing that CEQ may disclose the records to someone else;

(b) CEQ is making the disclosure as part of one of CEQ's routine uses of the records, which CEQ must have previously established in a written public notice; or

(c) The disclosure qualifies for one of the other exceptions described in section 3 of the Privacy Act, which you can find at 5 U.S.C. 552a(b).

§ 1516.4 How can I obtain access to CEQ's records about me?

(a) You can obtain access to CEQ's records about you by submitting a request by email to efoia@ceq.eop.gov. If you are not able to make your request

by email, please contact CEQ's Office of the General Counsel for assistance by calling 202-395-5750.

(b) Your request must describe the records that you want, in enough detail to enable CEQ to locate them with a reasonable amount of effort.

(1) You should name or describe the system of records you want CEQ to search.

(2) If you are not sure which system of records you are interested in, you may request that CEQ inform you which of its systems of records, if any, contain records about you.

(c) To protect the privacy of your records, CEQ will require you to verify your identity before processing your request. CEQ may require you to:

(1) Provide a statement that contains your name, your current address, and your date and place of birth, and sign the statement before a notary public;

(2) Verify your identity using an electronic authentication process; or

(3) Supply additional information as necessary in order to verify your identity.

(d) CEQ may deny your request if:

(1) CEQ prepared the records you are seeking in reasonable anticipation of a civil action or proceeding (that is, a lawsuit or a similar proceeding); or

(2) The Privacy Act exempts the system containing your records from the requirement that CEQ provide those records upon request.

(e) If CEQ grants your request, you may arrange to review your records in person, obtain a copy from CEQ, or both. If you choose to review your records in person, you may choose one person to accompany you, except that CEQ may first require you to authorize CEQ to discuss your records in that person's presence.

(f) If CEQ denies your request in whole or in part, CEQ will give you the reason for its decision in writing and explain how you can challenge the denial.

§ 1516.5 How can I get information about how CEQ has used its records about me?

You can request information about how CEQ has used its records about you—called an “accounting of disclosures”—using the same procedures you would use to make a request for access to your records under § 1516.4.

§ 1516.6 How can I ask CEQ to correct my records?

(a) You can request that CEQ correct or update its records about you using the same procedures you would use to make a request for access to your records under § 1516.4.

(b) In your request, you must explain exactly what change you are requesting and point out specific pieces of information in your CEQ records that are inaccurate, irrelevant, outdated, or incomplete.

(c) CEQ will review your request, decide whether to grant or deny it, and inform you of the decision within 10 working days (*i.e.*, excepting Saturdays, Sundays, and Federal holidays).

(d) If CEQ denies your request, CEQ will give you the reason for its decision in writing and explain how you can appeal the denial.

§ 1516.7 How can I appeal CEQ's decision to deny my request to access or correct records about me?

(a) If CEQ denies your request to access or correct CEQ's records about you, you can appeal the decision using the same procedures you would use to make a request for access to your records under § 1516.4.

(b) In your appeal, you must include a copy of CEQ's decision denying your request and explain exactly why you believe the decision was wrong.

(c) The General Counsel of CEQ (or the General Counsel's designee) will review your appeal, decide whether to grant or deny it, and inform you of the decision within 30 working days. If it is necessary to extend the time for making a decision, the Chair of CEQ (or the Chair's designee) will explain why in writing.

(d) If CEQ's General Counsel (or designee) denies your appeal, you may provide CEQ with a concise statement that explains your disagreement with the decision, and you may bring a civil lawsuit against CEQ.

(1) If CEQ subsequently discloses the disputed record under § 1516.4, we will clearly identify the disputed portion of the record and attach a copy of your statement of disagreement.

(2) For more information about filing a civil lawsuit, see 5 U.S.C. 552a(g)(1).

§ 1516.8 Will CEQ charge me a fee for a copy of my records?

If you request a copy of CEQ's records about you, CEQ may charge you a fee of no more than 10 cents per page, which you must pay before CEQ provides you with a copy of your records.

RIN 1018-BG68

Endangered and Threatened Wildlife and Plants; Reclassification of the Rough Popcornflower From Endangered to Threatened With a Section 4(d) Rule

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose to reclassify the rough popcornflower (*Plagiobothrys hirtus*) from endangered to threatened (downlist) under the Endangered Species Act of 1973, as amended (Act). The proposed downlisting is based on our evaluation of the best available scientific and commercial information, which indicates that the species' status has improved such that it is not currently in danger of extinction throughout all or a significant portion of its range, but that it is still likely to become so within the foreseeable future. We also propose protective regulations under the authority of section 4(d) of the Act that are necessary and advisable to provide for the conservation of the rough popcornflower.

DATES: We will accept comments received or postmarked on or before February 10, 2025. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. eastern time on the closing date. We must receive requests for public hearings, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by January 27, 2025.

ADDRESSES: You may submit comments by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: <https://www.regulations.gov>. In the Search box, enter FWS-R1-ES-2024-0005, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the panel on the left side of the screen, under the Document Type heading, check the Proposed Rule box to locate this document. You may submit a comment by clicking on “Comment.”

(2) *By hard copy:* Submit by U.S. mail to: Public Comments Processing, Attn: FWS-R1-ES-2024-0005, U.S. Fish and

Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We request that you send comments only by the methods described above. We will post all comments on <https://www.regulations.gov>. This generally means that we will post any personal information you provide us (see Information Requested, below, for more information).

Availability of supporting materials: This proposed rule and supporting documents, including the 5-year reviews, the Recovery Plan, and the species status assessment (SSA) report are available at <https://www.regulations.gov> at Docket No. FWS–R1–ES–2024–0005.

FOR FURTHER INFORMATION CONTACT:

Kessina Lee, State Supervisor, U.S. Fish and Wildlife Service, Oregon Fish and Wildlife Office, 2600 SE 98th Avenue, Suite 100, Portland, OR 97266; telephone: (503) 231–6179. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. Please see Docket No. FWS–R1–ES–2024–0005 on <https://www.regulations.gov> for a document that summarizes this proposed rule.

SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Act, a species warrants reclassification from endangered to threatened if it no longer meets the definition of an endangered species (in danger of extinction throughout all or a significant portion of its range). The rough popcornflower is listed as endangered, and we are proposing to reclassify (downlist) the rough popcornflower as threatened. We have determined the rough popcornflower does not meet the Act's definition of an endangered species, but it does meet the Act's definition of a threatened species (likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range). Reclassifying a species as a threatened species can be completed only by issuing a rule through the Administrative Procedure Act rulemaking process (5 U.S.C. 551 *et seq.*).

What this document does. This rule proposes to downlist the rough popcornflower from endangered to

threatened, with a rule issued under section 4(d) of the Act (a “4(d) rule”), based on the species' current status, which has been improved through implementation of conservation actions.

The basis for our action. Under the Act, we may determine that a species is an endangered species or a threatened species because of any of five factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence. We may reclassify a species if the best available commercial and scientific data indicate the species no longer meets the applicable definition in the Act. Based on the status review, the current threats analysis, and evaluation of conservation measures discussed in this proposed rule, we conclude that the rough popcornflower no longer meets the Act's definition of an endangered species and should be reclassified to a threatened species. The species is no longer in danger of extinction throughout all or a significant portion of its range, but it is likely to become so within the foreseeable future.

We have determined that rough popcornflower is a threatened species due to the following threats: destruction or alteration of habitat by development and hydrological changes, competition from native and nonnative plant species, and impacts due to climate change.

Information Requested

We intend that any final action resulting from this proposed rule will be based on the best scientific and commercial data available and be as accurate and as effective as possible. Therefore, we request comments or information from other governmental agencies, Native American Tribes, the scientific community, industry, or any other interested parties concerning this proposed rule.

We particularly seek comments concerning:

(1) Reasons we should or should not downlist the rough popcornflower as a threatened species.

(2) New information on the historical and current status, range, distribution, and population size of the species.

(3) New information on the known and potential threats to the species, including habitat loss, habitat modification, competition, or climate change.

(4) New information regarding the life history, ecology, and habitat use of the species.

(5) Current or planned activities within the geographic range of the species that may have adverse or beneficial impacts on the species.

(6) Information to assist with applying or issuing protective regulations under section 4(d) of the Act that may be necessary and advisable to provide for the conservation of the rough popcornflower.

(a) In particular, information concerning the extent to which we should include any of the section 9 prohibitions in the 4(d) rule; or

(b) whether we should consider any additional or different exceptions from the prohibitions in the 4(d) rule.

Please include sufficient information with your submission (such as scientific journal articles or other publications) to allow us to verify any scientific or commercial information you include.

Please note that submissions merely stating support for, or opposition to, the action under consideration without providing supporting information, although noted, will not be considered in making a determination, as section 4(b)(1)(A) of the Act directs that determinations as to whether any species is an endangered or a threatened species must be made solely on the basis of the best scientific and commercial data available.

You may submit your comments and materials concerning this proposed rule by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in **ADDRESSES**.

If you submit information via <https://www.regulations.gov>, your entire submission—including any personal identifying information—will be posted on the website. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on <https://www.regulations.gov>.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on <https://www.regulations.gov>.

Our final determination may differ from this proposal because we will consider all comments we receive during the comment period, as well as any information that may become available after this proposal. Based on the new information we receive (and if relevant, any comments on that new

information), we may conclude that the species should remain listed as endangered instead of being reclassified as threatened, or we may conclude that the species no longer warrants listing as either an endangered species or a threatened species. In addition, we may change the parameters of the prohibitions or the exceptions to those prohibitions in the protective regulations under section 4(d) of the Act if we conclude it is appropriate in light of comments and new information received. For example, we may expand the prohibitions if we conclude that the protective regulation as a whole, including those additional prohibitions, is necessary and advisable to provide for the conservation of the species. Conversely, we may establish additional or different exceptions to the prohibitions in the final rule if we conclude that the activities would facilitate or are compatible with the conservation and recovery of the species. In our final rule, we will clearly explain our rationale and the basis for our final decision, including why we made changes, if any, that differ from this proposal.

Public Hearing

Section 4(b)(5) of the Act provides for a public hearing on this proposal, if requested. Requests must be received by the date specified in **DATES**. Such requests must be sent to the address shown in **FOR FURTHER INFORMATION CONTACT**. We will schedule a public hearing on this proposal, if requested, and announce the date, time, and place of the hearing, as well as how to obtain reasonable accommodations, in the **Federal Register** and local newspapers at least 15 days before the hearing. We may hold the public hearing in person or virtually via webinar. We will announce any public hearing on our website, in addition to the **Federal Register**. The use of these virtual public hearings is consistent with our regulations at 50 CFR 424.16(c)(3).

Previous Federal Actions

Section 12 of the Act directed the Secretary of the Smithsonian Institution to prepare a report on plants considered to be endangered, threatened, or extinct in the United States. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. On July 1, 1975, we published a notice in the **Federal Register** (40 FR 27823) of our acceptance of the report as a petition within the context of section 4(c)(2) (now section 4(b)(3)) of the Act and our intention to review the status of the plant species named in the report.

On June 16, 1976, we published a proposed rule in the **Federal Register** (41 FR 24523) to designate approximately 1,700 vascular plant species, including rough popcornflower, as endangered pursuant to section 4 of the Act. In 1978, amendments to the Act required that all proposals over 2 years old be withdrawn. On December 10, 1979, we published a notice in the **Federal Register** (44 FR 70796) of the withdrawal of that portion of the June 16, 1976, proposal that had not been made final, along with four other proposals that had expired.

On December 15, 1980, we published an updated notice of review for plants in the **Federal Register** (45 FR 82480) that included rough popcornflower as a category 1 candidate species. On November 28, 1983, we published a supplement to the December 15, 1980, notice of review in the **Federal Register** (48 FR 53640) in which we changed the status of rough popcornflower to a category 2 candidate species, and this species remained a category 2 candidate species until 1996. On January 20, 1984, we published a notice in the **Federal Register** (49 FR 2485) that the petitioned listing of this species was warranted but precluded by other pending listing actions. On February 28, 1996, we published a notice of review in the **Federal Register** (61 FR 7596) that discontinued the designation of category 2 species as candidates. In that notice of review, we retained rough popcornflower as a candidate species.

On November 20, 1997, we published a proposed rule in the **Federal Register** (62 FR 61953) to list this species as an endangered species under the Act, and on January 22, 1998, we announced a public hearing on, and reopened and extended the comment period for, that proposal (63 FR 3301). On January 25, 2000, we published a final rule in the **Federal Register** (65 FR 3866) to list the rough popcornflower as an endangered species without designating critical habitat.

On January 28, 2003, we published in the **Federal Register** (68 FR 4228) a notice of availability of the draft recovery plan for the rough popcornflower (hereafter “recovery plan”). We published the notice of availability for the final recovery plan on September 25, 2003 (68 FR 55410). On October 25, 2019, we published a notice of availability of a draft amendment updating the recovery criteria in the recovery plan (84 FR 57468), and that recovery plan amendment was signed on December 20, 2019.

On April 29, 2008, we published in the **Federal Register** (73 FR 23264) a

notice of initiation of a 5-year review for rough popcornflower. A 5-year review was completed on August 11, 2010, recommending no change in the plant’s endangered status. On February 12, 2016, we again published in the **Federal Register** (81 FR 7571) a notice of initiation of a 5-year review for rough popcornflower. In the most recent 5-year status review completed on April 14, 2021, we determined the species no longer met the Act’s definition of an endangered species and should be reclassified to a threatened species. The 2021 5-year status review is available at <https://www.regulations.gov> under Docket No. FWS–R1–ES–2024–0005 and at https://ecosphere-documents-production-public.s3.amazonaws.com/sams/public_docs/species_nonpublish/949.pdf.

For additional details on previous Federal actions, see <https://ecos.fws.gov/ecp/species/2500> for the species profile for this plant.

Peer Review

A species status assessment (SSA) team prepared an SSA report for the rough popcornflower. The SSA team was composed of Service biologists, in consultation with other species experts. The SSA report represents a compilation of the best scientific and commercial data available concerning the status of the species, including the impacts of past, present, and future factors (both negative and beneficial) affecting the species.

In accordance with our joint policy on peer review published in the **Federal Register** on July 1, 1994 (59 FR 34270), and our August 22, 2016, memorandum updating and clarifying the role of peer review in listing actions under the Act, we solicited independent scientific review of the information contained in the rough popcornflower SSA report. We sent the SSA report to three independent peer reviewers and received two responses. The peer reviews can be found at <https://www.regulations.gov>. In preparing this proposed rule, we incorporated the results of these reviews, as appropriate, into the SSA report, which is the foundation for this proposed rule.

Summary of Peer Reviewer Comments

As discussed above in Peer Review, we received comments from two peer reviewers on the draft SSA report. We reviewed all comments we received from the peer reviewers for substantive issues and new information regarding the information contained in the SSA report. The peer reviewers generally concurred with our methods and provided additional information,

clarifications, and editorial suggestions. Two specific comments were to include a description of the role of natural disturbances in the species' habitat and to offer an explanation of the downlisting criteria as they relate to a minimum population size. We clarified these aspects in the SSA report. Otherwise, no substantive changes to our analysis and conclusions within the SSA report were deemed necessary, and

peer reviewer comments are addressed in version 1.0 of the SSA report (USFWS 2021, entire).

Proposed Reclassification Determination

Background

Rough popcornflower (*Plagiobothrys hirtus*) is an herbaceous plant in the borage or "forget-me-not" family

(Boraginaceae) and is endemic to the Umpqua River basin in Douglas County, Oregon. Rough popcornflower is closely associated with emergent wetlands within seasonally wet meadows or prairie and relatively level, open habitats formed from poor draining clay-loam soils, concentrated in the Sutherlin Creek sub-watershed in Oregon (see figure 1, below).

Figure 1. Distribution of rough popcornflower in Douglas County, Oregon.

Rough popcornflower can be either an annual or a short-lived perennial. Individual rough popcornflower plants are between 2.75 inches (in) (7 centimeters (cm)) and 23.6 in (60 cm) tall, with narrow, bright-green leaves. Their trumpet-shaped, non-fragrant flowers consist of five fused petals, and are mostly white with yellow centers. Rough popcornflower plants, whether annual or perennial, reach sexual maturity and produce fruits in their first year. The plants generally germinate in the fall, bloom in late spring and early summer, produce seed beginning in late June, and then senesce between July and November. The species is capable of either self-fertilization or cross-fertilization; however, generalist insect pollination appears to be the predominant vector enabling rough popcornflower reproduction (Amsberry and Meinke 2001, pp. 12–13). A thorough review of the taxonomy, life history, and ecology of the rough popcornflower is presented in the SSA report, version 1.0 (USFWS 2021, entire).

Recovery Criteria

Section 4(f) of the Act directs us to develop and implement recovery plans for the conservation and survival of endangered and threatened species unless we determine that such a plan will not promote the conservation of the species. Under section 4(f)(1)(B)(ii), recovery plans must, to the maximum extent practicable, include objective, measurable criteria which, when met, would result in a determination, in accordance with the provisions of section 4 of the Act, that the species be removed from the Lists of Endangered and Threatened Wildlife and Plants.

Recovery plans provide a roadmap for us and our partners on methods of enhancing conservation and minimizing threats to listed species, as well as measurable criteria against which to evaluate progress towards recovery and assess the species' likely future condition. However, they are not regulatory documents and do not substitute for the determinations and promulgation of regulations required under section 4(a)(1) of the Act. A decision to revise the status of a species, or to delist a species, is ultimately based on an analysis of the best scientific and commercial data available to determine whether a species is no longer an endangered species or a threatened species, regardless of whether that

information differs from the recovery plan.

There are many paths to accomplishing recovery of a species, and recovery may be achieved without all of the criteria in a recovery plan being fully met. For example, one or more criteria may be exceeded while other criteria may not yet be accomplished. In that instance, we may determine that the threats are minimized sufficiently and that the species is robust enough that it no longer meets the definition of an endangered species or a threatened species. In other cases, we may discover new recovery opportunities after having finalized the recovery plan. Parties seeking to conserve the species may use these opportunities instead of methods identified in the recovery plan. Likewise, we may learn new information about the species after we finalize the recovery plan. The new information may change the extent to which existing criteria are appropriate for identifying recovery of the species. The recovery of a species is a dynamic process requiring adaptive management that may, or may not, follow all of the guidance provided in a recovery plan.

We completed a final recovery plan for the rough popcornflower in 2003 (USFWS 2003, entire) and amended the plan in 2019 (USFWS 2019, entire). The objective of the original recovery plan for rough popcornflower was to reduce the threats and increase population viability to the point that the species could be downlisted to threatened status (USFWS 2003, p. 21). The original recovery plan assigned each known natural population to one of three recovery units (Calapooya Creek, Sutherlin Creek, and Yoncalla Creek). The recovery units each corresponded to a drainage basin within the Lower North Umpqua system and represented groups of populations which share phenotypic similarities and are potentially genetically similar to one another. The original recovery plan also established recovery criteria for downlisting (USFWS 2003, pp. 21–22). At that time, the information available was insufficient to identify recovery criteria for delisting. The 2019 recovery plan amendment evaluated the adequacy of existing recovery criteria, amended downlisting criteria, added delisting criteria, and presented rationale supporting the recovery plan modification (USFWS 2019, entire).

Below are the downlisting criteria for the rough popcornflower as amended in 2019 (USFWS 2019, pp. 4–6), and the progress made to date toward achieving each criterion.

Criterion 1 for Downlisting

Criterion 1 states that at least 9 reserves, containing a minimum of 5,000 plants each, are protected and managed to assure their long-term survival. A reserve refers to one or more patches of rough popcornflower located within 0.6 miles (mi) (1 kilometer (km)) of each other that are protected from development and managed for the continued existence of the species (USFWS 2019, p. 3). The minimum population size of 5,000 individuals per reserve is intended to provide sufficient resiliency to withstand stochastic events (Culotta 1995, pp. 31–32; Traill et al. 2007, p. 164). The number of reserves is intended to provide sufficient redundancy such that rough popcornflower is not at risk of extinction due to catastrophic events. The maximum distance between patches within a reserve provides connectivity for pollinator-mediated gene flow across the population (USFWS 2019, p. 4).

At the time of listing, our knowledge of rough popcornflower abundance and distribution was limited to roughly 7,000 known plants in 8 populations (USFWS 2021 p. 9). Since then, many conservation partners have made significant contributions to rough popcornflower recovery efforts. For example, the Oregon Department of Agriculture has collected seed, sown seed for use by multiple partners, augmented existing populations, conducted monitoring, and provided technical expertise. Other conservation partners, such as the Douglas County Soil and Water Conservation District, City of Sutherlin, and Bureau of Land Management, have entered into formal agreements to perform habitat restoration followed by seeding on a number of properties. Recent surveys (USFWS 2021, appendix 3; USFWS 2022, entire; USFWS 2023a, entire) documented a total of 12 rough popcornflower reserves. Eleven of those reserves are protected and managed while one reserve (a privately owned parcel containing over 700,000 plants) is currently adequately managed but is not protected (see table 1, below). Ten of the 12 reserves meet the minimum population size of 5,000 individuals per reserve to fully satisfy criterion 1. This number of plants and the distribution of populations is expected to enable rough popcornflower to withstand both stochastic and catastrophic events, and to maintain the capacity to adapt to future environmental changes. As such, we conclude that this downlisting criterion has been met and exceeded.

Criterion 2 for Downlisting

Criterion 2 states a minimum of 5,382 square feet (ft²) (500 square meters (m²)) is occupied by the rough popcornflower within each of the 9 reserves meeting criterion 1. The intent of this criterion is to have multiple populations large enough to maintain sufficient resiliency to withstand stochastic events.

Seven of the 10 reserves that meet criterion 1 contain at least 5,382 ft² (500 m²) of occupied habitat to meet the description of criterion 2. Two other populations (Deady and Southside Swale) also meet or exceed the area coverage parameter but do not satisfy the criterion as they are either not considered to be a protected population or do not meet the minimum number of plants to be considered a reserve (see table 1, below). Although this criterion is not fully met as identified in the recovery plan, there are nine populations that meet or exceed the area coverage parameter. We conclude that the intent of this criterion has been met because having 9 populations with 5,382 ft² (500 m²) occupied by rough popcornflower distributed across the species' range is expected to enable rough popcornflower to withstand both stochastic and catastrophic events, and to maintain the capacity to adapt to future environmental changes.

Criterion 3 for Downlisting

Criterion 3 states that a minimum of nine reserves, each meeting criteria 1 and 2, are distributed across the recovery units, with a minimum of five reserves in the Sutherlin Creek recovery unit and at least one reserve each in the Yoncalla Creek and Calapooya Creek recovery units. The remaining two reserves may be located within any of

the natural recovery units, or elsewhere within the watersheds containing the recovery units. The intent of this criterion is to provide sufficient redundancy of populations across the species' range to allow the species to withstand catastrophic events.

Of the seven reserves meeting criteria 1 and 2, four are in the Sutherlin Creek recovery unit, one is in the Yoncalla Creek recovery unit, and two are in the Umpqua Management Area, which includes introduced populations of rough popcornflower in the Bureau of Land Management (BLM)'s North Bank Habitat Management Area.

Criterion 3 has not been fully met because the number of reserves fully meeting both criteria 1 and 2 is not met. However, the distribution of 11 populations that exceed 5,000 plants (10 protected) across all recovery units and the Umpqua Management Area, and 9 populations that exceed 5,382 ft² (500 m²) occupied by rough popcornflower, demonstrate that relatively large populations are spatially distributed across the species' range such that rough popcornflower is expected to withstand both stochastic and catastrophic events, and to maintain the capacity to adapt to future environmental changes, lead us to conclude that the intent of this downlisting criterion has been met.

Criterion 4 for Downlisting

Criterion 4 states that over a 5-year period, with a minimum of 3 individual years of monitoring, demographic data indicate at least seven of the nine reserves referenced in criterion 1 have average population numbers that are stable or increasing, without decreasing trends lasting more than 2 years. Stable or increasing populations are an

indicator of resiliency. While some inter-annual variability is expected due to demographic and environmental stochasticity, this criterion is intended to provide sufficient confidence that large, sustained declines will not occur. Population monitoring, which entails taking a full plant census, takes place in late spring or early summer either annually or biannually. We monitor populations on private, city, or county land when authorized to do so. Alternatively, we provide funding through the Cooperative Endangered Species Conservation Fund to the Oregon Department of Agriculture to monitor populations. Conservation partners including the Bureau of Land Management, Oregon Department of Transportation, and The Nature Conservancy monitor populations on their lands biennially.

Five of the 10 rough popcornflower reserves that meet criterion 1 also currently meet this criterion (see table 1, below). Although the remaining five reserves meeting criterion 1 have not been monitored with sufficient frequency to satisfy all of the requirements of this criterion, they have maintained relatively stable population numbers between monitoring events from 2011 to 2023 (USFWS 2021 pp. 13–16; USFWS 2022, entire; USFWS 2023a, entire). Having all 10 of the reserve populations exhibiting stable or increasing numbers across the range of the species demonstrates that rough popcornflower has sufficient resiliency to respond to inter-annual environmental variability and is unlikely to experience sustained declines across its range. As such, we conclude that the intent of this downlisting criterion has been met.

TABLE 1—ROUGH POPCORNFLOWER DOWNLISTING CRITERIA AND STATUS BY RECOVERY UNITS/AREA, DOUGLAS COUNTY, OREGON
[✓ = criterion met]

Population	Recovery unit	Downlisting criteria					
		#1			#2	#3	#4

¹ TNC means The Nature Conservancy.

² ODOT means the Oregon Department of Transportation.

³ The Umpqua Management Area is not an official recovery unit. This area is an additional recovery management area that includes introduced populations of rough popcornflower in the Bureau of Land Management (BLM)'s North Bank Habitat Management Area.

⁴ Downlisting Criterion 3 states that a minimum of nine reserves, each meeting the requirements in Downlisting Criteria 1 and 2, are distributed with at least one reserve each in the Calapooya Creek and Yoncalla Creek recovery units, and a minimum of five reserves in the Sutherlin Creek recovery unit.

Regulatory and Analytical Framework

Regulatory Framework

Section 4 of the Act (16 U.S.C. 1533) and the implementing regulations in title 50 of the Code of Federal Regulations set forth the procedures for determining whether a species is an endangered species or a threatened species, issuing protective regulations for threatened species, and designating critical habitat for threatened and endangered species.

The Act defines an “endangered species” as a species that is in danger of extinction throughout all or a significant portion of its range, and a “threatened species” as a species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether any species is an endangered species or a threatened species because of any of the following factors:

(A) The present or threatened destruction, modification, or curtailment of its habitat or range;

(B) Overutilization for commercial, recreational, scientific, or educational purposes;

(C) Disease or predation;

(D) The inadequacy of existing regulatory mechanisms; or

(E) Other natural or manmade factors affecting its continued existence.

These factors represent broad categories of natural or human-caused actions or conditions that could have an effect on a species' continued existence. In evaluating these actions and conditions, we look for those that may have a negative effect on individuals of the species, as well as other actions or conditions that may ameliorate any negative effects or may have positive effects. We consider these same five factors in downlisting a species from endangered to threatened.

We use the term “threat” to refer in general to actions or conditions that are known to or are reasonably likely to negatively affect individuals of a species. The term “threat” includes actions or conditions that have a direct impact on individuals (direct impacts), as well as those that affect individuals through alteration of their habitat or required resources (stressors). The term “threat” may encompass—either together or separately—the source of the action or condition or the action or condition itself.

However, the mere identification of any threat(s) does not necessarily mean that the species meets the statutory definition of an “endangered species” or a “threatened species.” In determining whether a species meets either definition, we must evaluate all identified threats by considering the species' expected response and the effects of the threats—in light of those

actions and conditions that will ameliorate the threats—on an individual, population, and species level. We evaluate each threat and its expected effects on the species, then analyze the cumulative effect of all of the threats on the species as a whole. We also consider the cumulative effect of the threats in light of those actions and conditions that will have positive effects on the species—such as any existing regulatory mechanisms or conservation efforts. The Secretary determines whether the species meets the definition of an “endangered species” or a “threatened species” only after conducting this cumulative analysis and describing the expected effect on the species.

The Act does not define the term “foreseeable future,” which appears in the statutory definition of “threatened species.” Our implementing regulations at 50 CFR 424.11(d) set forth a framework for evaluating the foreseeable future on a case-by-case basis which is further described in the 2009 Memorandum Opinion on the foreseeable future from the Department of the Interior, Office of the Solicitor (M-37021, January 16, 2009; “M-Opinion,” available online at <https://www.doi.gov/sites/doi.opengov.ibmcloud.com/files/uploads/M-37021.pdf>). The foreseeable future extends as far into the future as the U.S. Fish and Wildlife Service and

National Marine Fisheries Service (hereafter, the Services) can make reasonably reliable predictions about the threats to the species and the species' responses to those threats. We need not identify the foreseeable future in terms of a specific period of time. We will describe the foreseeable future on a case-by-case basis, using the best available data and taking into account considerations such as the species' life-history characteristics, threat-projection timeframes, and environmental variability. In other words, the foreseeable future is the period of time over which we can make reasonably reliable predictions. "Reliable" does not mean "certain"; it means sufficient to provide a reasonable degree of confidence in the prediction, in light of the conservation purposes of the Act.

Analytical Framework

The SSA report documents the results of our comprehensive biological review of the best scientific and commercial data regarding the status of the species, including an assessment of the potential threats to the species. The SSA report does not represent our decision on whether the species should be reclassified as a threatened species under the Act. However, it does provide the scientific basis that informs our regulatory decisions, which involve the further application of standards within the Act and its implementing regulations and policies.

To assess the rough popcornflower's viability, we used the three conservation biology principles of resiliency, redundancy, and representation (Shaffer and Stein 2000, pp. 306–310). Briefly, resiliency is the ability of the species to withstand environmental and demographic stochasticity (for example, wet or dry, warm or cold years), redundancy is the ability of the species to withstand catastrophic events (for example, droughts, large pollution events), and representation is the ability of the species to adapt to both near-term and long-term changes in its physical and biological environment (for example, climate conditions, pathogens). In general, species viability will increase with increases in resiliency, redundancy, and representation (Smith et al. 2018, p. 306). Using these principles, we identified the species' ecological requirements for survival and reproduction at the individual, population, and species levels, and described the beneficial and risk factors influencing the species' viability.

The SSA process can be categorized into three sequential stages. During the first stage, we evaluated individual

species' life-history needs. The next stage involved an assessment of the historical and current condition of the species' demographics and habitat characteristics, including an explanation of how the species arrived at its current condition. The final stage of the SSA involved making predictions about the species' responses to positive and negative environmental and anthropogenic influences. Throughout all of these stages, we used the best available information to characterize viability as the ability of a species to sustain populations in the wild over time. We use this information to inform our regulatory decision.

The following is a summary of the key results and conclusions from the SSA report; the full SSA report (USFWS 2021, entire) can be found on <https://www.regulations.gov> under Docket No. FWS–R1–ES–2024–0005.

Summary of Biological Status and Threats

In this discussion, we review the biological condition of the species and its resources, and the threats that influence the species' current and future condition, in order to assess the species' overall viability and the risks to that viability. In addition, the SSA report (USFWS 2021, entire) documents our comprehensive biological status review for the species, including an assessment of the potential threats to the species.

The following is a summary of this status review and the best available information gathered since that time that have informed this decision.

Ecological Needs

Rough popcornflower typically occupies seasonally wet meadows or prairie, seasonally-ponding mudflats, and Oregon ash (*Fraxinus latifolia*) swale openings dominated by native wetland-associated plants in valley lowlands where the ground is moist well into the summer season. Rough popcornflower requires early seral habitat and is not associated with dense tree or shrub canopies. Periodic disturbance (e.g., flooding, fire, mowing, or grazing) is necessary to control nonnative and native plant competitors and maintain the early seral and open habitat conditions in which rough popcornflower populations thrive. Several insects are known to pollinate rough popcornflower: honey bees (*Apis* spp.); bumble bees (*Bombus* spp.); halictid and megachilid bees; Hemiptera (true bugs); bombyliid, syrphid, and tachinid flies; and red-shouldered ctenucha moths (*Ctenucha rubroscapus*). These insects require

diverse native vegetation and minimal pesticide exposure.

Resilient rough popcornflower populations need enough individuals to withstand stochastic events and disturbances. The minimum viable population size for rough popcornflower has not been identified. However, the recovery plan characterizes 500 plants as an effective population size and expanded that effective population size by a factor of 10 to determine a minimum population size estimate of 5,000 plants. This number represents the population size resilient to most disturbances and capable of resisting inbreeding depression (USFWS 2003, p. 17; USFWS 2019, p. 4). Though some current populations may have fewer than 5,000 plants, taking into consideration other factors such as habitat quantity, habitat quality, connectivity, management, protection, reproduction, they may still be considered to have high resiliency (USFWS 2021, p. 31).

For rough popcornflower to be considered viable as a species, it must be able to withstand catastrophic events and adapt to environmental changes. This can be achieved with enough resilient populations distributed across the species' geographic range, representing the range of ecological settings in which the species is known to exist. The minimum number of populations required for rough popcornflower has not been determined. However, distribution and abundance goals laid out in the recovery plan (USFWS 2003, pp. 21–22; USFWS 2019, pp. 4–8) and described above under Recovery Criteria provide a benchmark for evaluating the species' condition.

Factors Influencing the Species

When we listed rough popcornflower as endangered (65 FR 3866; January 25, 2000), the primary threats included habitat alteration by wetland filling and development, livestock grazing (or herbivory), and competition from native and nonnative species. Small, isolated populations were identified as making the species more vulnerable to these threats. Overcollection for scientific or horticultural purposes, vandalism, the inadequacy of regulatory mechanisms, road maintenance, fire, and flooding were also identified as potential threats (65 FR 3866 at 3870–3872; January 25, 2000), but the available information does not indicate that these factors pose a threat to the species (USFWS 2003, p. 13; USFWS 2023b, entire). Climate change was recognized as an additional threat in 2010 (USFWS 2010, p. 28).

Habitat Loss and Fragmentation

In the final listing rule (65 FR 3866 at 3869; January 25, 2000), we described how rough popcornflower populations had become fragmented due to draining and filling of wetlands from properties being developed. At the time of listing, only five populations of rough popcornflower were protected from detrimental land-use activities. Currently, 11 of the 18 known populations are under Federal, State, municipal, or land trust protections; one is not protected but is on adequately managed land. Education efforts have increased recognition of rough popcornflower habitat, as well as avoidance, minimization, or mitigation of development impacts. Because 11 of the 18 known populations are now protected, the threat posed by detrimental land use activities has been significantly reduced since the time of listing. However, because formal commitments for the long-term beneficial management of rough popcornflower have not been secured for 7 populations (approximately 84 percent of the total number of individuals nationwide) this threat may increase in the future.

Small Population Size

In the final listing rule (65 FR 3866 at 3869–3870; January 25, 2000), we described the distribution of the rough popcornflower as 17 small patches of 1 to 3,000 plants (8 populations with approximately 7,000 plants total) that were threatened by natural (*i.e.*, flood) and/or anthropogenic (*e.g.*, herbicide treatment) events. At that time, the species' small population size was considered a threat because a single natural or human-caused event could have the potential to extirpate rough popcornflower patches.

Since that time, rough popcornflower occurrences have expanded to 18 populations and more than 800,000 plants (see table 1, above). Twelve of the 18 current individual populations have 3,000 or more plants, 11 of which have more than 5,000 plants. Although small populations occur that remain vulnerable to extirpation, individual populations are broadly distributed and the likelihood of a large-scale event affecting them collectively is unlikely. During years with below average precipitation, drought, or fires, seed set could fall short of what is needed to maintain population stability. However, with a large amount of seed produced by plants, it is likely that any periodic depletion of seed bank will be short-term and the seed bank will be replenished (USFWS 2021, p. 7). One

population thought to be extirpated for several years was documented flowering after 3 years of species absence (Amsberry and Meinke 2008, p. 14).

At the time of listing, data also indicated that small, isolated populations may not be able to sustain adequate genetic variation, and that a lack of connectivity between isolated patches and populations would limit pollinator-mediated gene flow. Our current analysis of connectivity for the 18 rough popcornflower populations ranked 11 populations as having high connectivity (within 950 meters (m) (3,117 feet (ft)) or less) and 3 populations as having medium connectivity (between 950 and 1,500 m (3,117 and 4,921 ft)) (USFWS 2021, p. 35), indicating that rough popcornflower populations are less isolated than at the time of listing. Overall, while the connectivity of small populations is still of some concern, the species is much less vulnerable to the effects of small population size and genetic isolation than when it was listed in 2000.

Herbivory

Herbivory by Columbian white-tailed deer (*Odocoileus virginianus leucurus*), black-tailed deer (*Odocoileus hemionus columbianus*), rodents, and livestock has been documented and was identified as a threat to rough popcornflower (65 FR 3866 at 3871; January 25, 2000). Although high densities of white-tailed and black-tailed deer overlap with the distribution of rough popcornflower, the best available information does not indicate that deer herbivory is adversely impacting rough popcornflower populations (USFWS 2021, p. 23).

Grazing by livestock may or may not be consistent with rough popcornflower conservation. Grazing of rough popcornflower during its growing period can be detrimental to the species. However, grazing can help control native and nonnative plant competitors and provide a measure of disturbance that maintains the preferable early seral and open habitat conditions for rough popcornflower. Four rough popcornflower populations with more than 5,000 plants are on privately-owned grazing lands; the largest single population (more than 700,000 plants) is on a private horse ranch where grazing is managed in a manner compatible with the long-term survival of rough popcornflower (USFWS 2021, p. 16). Depending on how grazing is managed, it can adversely impact or benefit individual populations of rough popcornflower. With 12 of the 18 populations considered protected or on

adequately managed land, livestock herbivory is not currently considered a threat to the species overall. However, because formal commitments for long-term management of livestock grazing for the benefit of rough popcornflower have not been secured for some populations (including the largest population of over 700,000 plants), this threat may increase in the future.

Native and Nonnative Plant Encroachment

Native and nonnative plants, including pennyroyal (*Mentha pulegium*), teasel (*Dipsacus* spp.), creeping thistle (*Cirsium arvense*), and reed canary grass (*Phalaris arundinacea*), are a primary threat to the establishment and maintenance of rough popcornflower due to their encroachment of habitat and elimination of bare ground, which popcornflower seeds require to germinate. Pennyroyal is present at many rough popcornflower sites, and teasel and creeping thistle control require constant conservation efforts at the North Bank Habitat Management Area (NBHMA), Yoncalla South and TNC Popcorn Swale Preserve populations.

Rough popcornflower is conservation reliant, and when natural disturbance events are lacking, active management (*e.g.*, manual weeding, herbicide application, mowing, and strategic grazing) is necessary to control competing vegetation and maintain early seral habitats to help maintain many of the rough popcornflower populations into the future (USFWS 2010, p. 27). Invasive plants appear to be less of a concern on private lands due to livestock grazing (USFWS 2020, p.2). Strategic grazing by livestock, in terms of seasonal grazing periods and intensity, when closely monitored, can benefit rough popcornflower populations by reducing plant competition and creating open ground that facilitates seed germination and enables population expansion (USFWS 2021, p. 24).

While competition with native and nonnative plants remains an ongoing threat to rough popcornflower, this threat can be successfully managed through continued investments in the adaptive management practices that have resulted in flourishing populations across the species' range (USFWS 2021, appendices 3 and 4).

Fire

At the time of listing, fire was considered a natural event key to the formation and maintenance of rough popcornflower habitat (65 FR 3866 at

3867; January 25, 2000). In late September 2003, an accidental fire burned across the North Bank/Soggy Bottoms rough popcornflower population at moderate intensity. The year following the burn, staff noted that individual rough popcornflower plants were much larger and robust, and the population had increased. The population dropped significantly during the following 5 years, although that was considered likely due to changed site hydrology. While the effects of fire in rough popcornflower habitat restoration are still unknown (USFWS 2010, p. 27), data collected after the 2003 fire suggest that low- to moderate-intensity fire can have at least short-term beneficial effects to the species.

Climate Change

The likely impacts of climate change on rough popcornflower’s ecological processes are closely connected to the availability of water. Due to their shallow and ephemeral nature, wet swales in southwestern Oregon are particularly sensitive to increases in evaporation or reductions in rainfall. Strong climate variability is likely to persist in the Pacific Northwest, owing in part to the annual and decadal climate variability associated with the Pacific Ocean (May et al. 2018, p. 1039). Models project periods of prolonged drought interspersed with years featuring heavy rainfall driven by powerful atmospheric rivers and strong El Niño winters (May et al. 2018, p. 1039). Even modest temperature increases could result in more water

runoff in winter and less in spring and summer, more winter flooding, and drier summer soils, thereby altering the seasonality and duration of wetland hydration (Field et al. 2017, p. 18). Reduced soil moisture due to evaporation and transpiration may exacerbate drought effects (Field et al. 2017, p. 18). Drought-mediated decreases in water depth and inundation periods could increase the frequency at which wetlands dry before rough popcornflower has completed its flowering and fruiting stages. However, Southern Oregon, along with other areas in the western United States, has been experiencing a prolonged drought for several years (Fleishman 2023, p. 52) and rough popcornflower continued to demonstrate stable or increasing population trends. Climate change could also cause temperatures to exceed those suitable for growth of the species (USFWS 2010, p. 28).

The impact of climate change on rough popcornflower will likely vary depending on site-specific conditions and annual precipitation variation. Rough popcornflower individuals are naturally adaptive to fall and winter inundation and depend on soil moisture until their seed has matured. An earlier warming trend may result in a limited seed set because the soil will dry out quicker and may benefit nonnative plants. Habitat management using herbicides and prescribed burning would likely increase with an increase in nonnative plants. However, if climate change in Oregon results in wetter

winters and springs as predicted (Fleishman 2023, pp. 11–12), then the additional precipitation may lengthen seed set and favor popcornflower survival over competitors unable to adapt to saturated soils.

Current Condition

Resiliency

Resiliency, the ability of populations to withstand stochastic events, is commonly determined as a function of metrics such as population size, growth rate, or habitat quality and quantity. We evaluated the current resiliency of rough popcornflower populations based on the population size, habitat quantity, connectivity, habitat quality, management frequency, reproductive success, and the degree of protection afforded to each population (see tables 2 through 8, below). Populations with over 5,000 mature plants were determined to be in high condition based on the downlisting criteria outlined in the species’ recovery plan. Populations of over 1,000 plants were considered to be in medium condition, and those with under 200 plants were considered to be in low condition. We then assigned numerical values to each of those condition category rankings in order to categorize the current overall resiliency of each rough popcornflower population (see table 9, below). A complete description of our analytical approach to current condition is available in the SSA report (USFWS 2021, pp. 34–37).

TABLE 2—POPULATION SIZE RANKINGS OF ROUGH POPCORNFLOWER POPULATIONS FROM THE SSA REPORT AND SUBSEQUENT SURVEYS

Population size (# of plants)	Number of populations in 2021	Number of populations in 2023
High (≥5,000)	13	11
Medium (1,000–4,999)	2	2
Low (1–999)	3	5

TABLE 3—HABITAT QUANTITY RANKINGS OF ROUGH POPCORNFLOWER POPULATIONS FROM THE SSA REPORT AND SUBSEQUENT SURVEYS

Habitat quantity (amount)	Number of populations in 2021	Number of populations in 2023
High (>5,382 ft²/1640 m²)	7	9
Medium (820–5,382 ft²/250–1640 m²)	3	3
Low (<820 ft²/250 m²)	8	6

TABLE 4—CONNECTIVITY RANKINGS OF ROUGH POPCORNFLOWER POPULATIONS FROM THE SSA REPORT AND SUBSEQUENT SURVEYS

Connectivity (proximity to next population) *	Number of populations in 2021	Number of populations in 2023
High (<3,117 ft/950 m)	11	No change reported.
Medium (3,120–4921 ft/950–2000 m)	3	No change reported.
Low (>6,562 ft/2000 m)	4	No change reported.

* Scores are not strictly distance-based if populations are separated by barriers such as development, roads, or expanses of unsuitable habitat.

TABLE 5—HABITAT QUALITY RANKINGS OF ROUGH POPCORNFLOWER POPULATIONS FROM THE SSA REPORT AND SUBSEQUENT SURVEYS

Habitat quality (presence of invasive species)	Number of populations in 2021	Number of populations in 2023
High (no invasive species)	5	No change reported.
Medium (1–2 invasive species)	8	No change reported.
Low (dominated by invasive species)	5	No change reported.

TABLE 6—MANAGEMENT FREQUENCY RANKINGS OF ROUGH POPCORNFLOWER POPULATIONS FROM THE SSA REPORT AND SUBSEQUENT SURVEYS

Management frequency (interval)	Number of populations in 2021	Number of populations in 2023
High (continuous, annual, or biennial)	10	No change reported.
Medium (3–5 years)	5	No change reported.
Low (5 years)	3	No change reported.

TABLE 7—REPRODUCTIVE SUCCESS RANKINGS OF ROUGH POPCORNFLOWER POPULATIONS FROM THE SSA REPORT AND SUBSEQUENT SURVEYS

Reproductive success (measures)	Number of populations in 2021	Number of populations in 2023
High (>5,000 plants and 100 percent seed production)	15	No change reported.
Medium (3,000–5,000 plants, 75–99 percent seed production)	1	No change reported.
Low (<3,000 plants, 0–74 percent seed production)	2	No change reported.

TABLE 8—PROTECTED STATUS RANKINGS OF ROUGH POPCORNFLOWER POPULATIONS FROM THE SSA REPORT AND SUBSEQUENT SURVEYS

Protected status	Number of populations in 2021	Number of populations in 2023
Yes	12	No change reported.
No	6	No change reported.

TABLE 9—OVERALL RESILIENCY RANKINGS OF ROUGH POPCORNFLOWER POPULATIONS FROM THE SSA REPORT AND SUBSEQUENT SURVEYS

Overall resiliency	Number of populations in 2021	Number of populations in 2023
High	11	10
Moderate	3	3
Low	4	5

As shown above in table 9, at the time of the SSA report in 2021, 11 (61 percent) of the 18 rough popcornflower

populations scored high for resiliency, 3 (17 percent) scored moderate, and 4 (22 percent) scored low. Changes in

condition category rankings as a result of additional surveys conducted from 2021–2023 (USFWS 2022, entire;

USFWS 2023a, entire) resulted in overall resiliency rankings of 10 (55 percent) high, 3 (17 percent) moderate, and 5 (28 percent) low. These results demonstrate relatively high resiliency across the range of the rough popcornflower.

Redundancy

Redundancy is a species' ability to withstand catastrophic events and is a function of the number and resilience of populations, as well as their distribution and connectivity. At the time of listing, there were eight known rough popcornflower populations. Currently, there are 18 known populations. Some of this increase is due to newly discovered populations; however, since the time of listing, habitat restoration, reintroductions, and habitat protection have collectively improved the status of the species. Of the 18 known populations, 10 populations score high for overall resiliency and are distributed across the range of the species, with 6 in the Sutherlin Creek recovery unit, 2 in the Yoncalla Creek recovery unit, and 2 in the Umpqua Management Area. The eight populations with moderate or low resiliency contribute to the species' redundancy to a lesser degree and are distributed across the Calapooya Creek and Sutherlin Creek recovery units and the Umpqua Management Area. The distribution of 10 populations with high resiliency across two of the three recovery units and the management area demonstrates good redundancy for the species.

Representation

Representation refers to the ability of a species to adapt to change, and is assessed using geographic, genetic, ecological, and niche diversity data. Ecological diversity and genetic variation based on habitat differences, differences in annual and biennial life histories, and differences in growth forms may be inferred from the rough popcornflower's distribution across different sub-watersheds. Multiple populations with high resiliency throughout the species' range, along with populations of lesser resiliency, facilitate the preservation of the genetic diversity present within each recovery unit. Although populations with fewer than 5,000 plants may have lower genetic variation, rough popcornflower's wide variety of possible pollinators (Amsberry and Meinke 2001, pp. 12–13) assists in gene transfer and could boost the genetic variation of these populations.

Natural and reintroduced rough popcornflower populations are currently distributed in multiple sub-

watersheds across the species' historical range, and plants demonstrate diversity within and between populations, including different growth forms and flowering times. Additionally, rough popcornflower seeds do not all germinate every year, and a portion of the seed bank likely remains in the ground. The presence of a long-term seed bank allows rough popcornflower to persist through periods of adverse environmental conditions. In combination, these factors indicate that the species has the capacity to adapt to a variety of environmental conditions and has good representation.

Future Condition

To assess the future viability of rough popcornflower, we considered the factors that will influence the species within the foreseeable future. We define the foreseeable future as 30 years, as we consider this a reasonable timeframe to make reliable predictions about the threats to this species and its response to those threats due to this plant's reproductive strategy as an annual or short-lived perennial. Our viability assessment is characterized in terms of the resiliency, redundancy, and representation of the species as projected under various plausible future conditions (Shaffer and Stein 2000 pp. 306–310; Wolf et al. 2015, entire; Smith et al. 2018, pp. 304, 306–307). We projected the viability of rough popcornflower from 2020 to 2050 under three plausible future scenarios based on potential trends with conservation partners, climate patterns, and population demographics. Scenario A represented improvements over current conditions. Scenario B represented the most likely conditions if current trends continue. Scenario C represented conditions that are worse than current conditions.

Scenario A assumes continued conservation support for the rough popcornflower, including from private landowners throughout the species' range, as well as additional funding for outplanting and invasive vegetation control. Scenario B is the most likely scenario for the rough popcornflower based on current agency commitments, outplanting successes, the current ability to place conservation agreements, and species' population demographic trends. We discuss Scenario B further below. Scenario C assumes diminished habitat conditions and management actions (e.g., mowing, manual or chemical control of non-native herbaceous plants, prescribed burning), falling short of what is needed, resulting in the reduction of the species' resiliency, redundancy, and

representation over the next 30 years. For further details on all three scenarios, see the SSA report (USFWS 2021, pp. 41–47).

We determined that rough popcornflower is expected to continue to be influenced by the factors that have historically influenced and are currently influencing the species, at rates most closely associated with Scenario B. Scenario B represents the most likely conditions if current trends continue (USFWS 2021, pp. 44–45).

In Scenario B, we made several assumptions about ongoing conservation support within the foreseeable future. Several conservation partners (government agencies, nonprofit conservation organizations, academic institutions, and private landowners) have made significant contributions to recovery efforts for rough popcornflower. We assume that these partners will continue to collaborate and contribute conservation resources to rough popcornflower and its habitat based on current regulations and agency commitments, outplanting successes, and our ability to obtain conservation agreements. Continued outreach efforts are likely to support awareness of the species among private landowners and the public and to generate support for conservation. We also assume that development projects will continue to be evaluated and modified by the Service, the Oregon Department of State Lands, and the Oregon Department of Agriculture, to minimize or mitigate impacts to rough popcornflower and its habitats.

Under a continually increasing greenhouse gas emission scenario, Oregon's annual average temperature is projected to increase by 5 degrees Fahrenheit (°F) (2.8 degrees Celsius (°C)) by the 2050s (Fleishman 2023, p. 11). In this scenario, the amount of annual precipitation is projected to be highly uncertain. Summers are expected to warm more than the annual average and are likely to become drier. Extreme heat and precipitation events are expected to become more frequent (Dalton et al. 2017, p. 8). The effects of climate change on rough popcornflower populations are expected to be relatively moderate. Most rough popcornflower plants are expected to adjust to warmer temperatures by dispersing to moister habitats (via ungulates, other mammals, or birds), flowering earlier, and shortening their flowering period (USFWS 2021, p. 42). Climate change may limit rough popcornflower's growing season and habitat as well as moisture availability, though the species would continue to maintain viability within the three recovery units and the

introduced populations at the Umpqua Management Area (USFWS 2021, p. 45). We acknowledge that some populations may fare better than others under future conditions.

For species resiliency in Scenario B, we expect there will be a total of 20 rough popcornflower populations. At

least 10 of those populations are anticipated to be in protected areas (reserves), contain populations that meet or exceed 5,000 plants, and exhibit stable or increasing population counts in 7 out of 10 years (see table 10, below).

In terms of redundancy, protected rough popcornflower populations are

expected to continue to be distributed in all three recovery units. With a total of 20 populations distributed across the species' range, we conclude that the rough popcornflower will be able to withstand catastrophic events.

TABLE 10—FUTURE VIABILITY OF ROUGH POPCORNFLOWER UNDER THE MOST LIKELY SCENARIO, FUTURE SCENARIO B

Viability elements	Expected condition
Population Resilience	Protected populations (≥ 10) meet or exceed criterion of $\geq 5,000$ individual stems and show stable or positive demographic trends. The total population number is 20. Stable or increasing population counts occur 7 out of 10 years.
Species Redundancy	Redundancy is provided by having 20 populations present across the range to withstand catastrophic events.
Species Representation	20 populations, distributed across the range of the species, would provide genetic and ecological diversity for the species. No evidence of inbreeding depression.
Overall Viability	Moderate: The species is able to adapt to climate change, and species receives adequate monitoring to inform management needs. Species requires continued management.

For species representation, rough popcornflower populations are expected to be well distributed across all three recovery units and the Umpqua Management Area. We expect genetic diversity to be maintained in the foreseeable future because there has been no evidence of inbreeding depression or genetic drift detected in any of the populations (Amsberry and Meinke 2017, p. 2).

Collectively, our analysis of the resiliency, redundancy, and representation under this scenario indicates that the viability of the rough popcornflower is not likely to be significantly reduced over the next 30 years.

We note that, by using the SSA framework to guide our analysis of the scientific information documented in the SSA report, we have analyzed the cumulative effects of identified threats and conservation actions on the species. To assess the current and future condition of the species, we evaluate the effects of all the relevant factors that may be influencing the species, including threats and conservation efforts. Because the SSA framework considers not just the presence of the factors, but to what degree they collectively influence risk to the entire species, our assessment integrates the cumulative effects of the factors and replaces a standalone cumulative-effects analysis.

Conservation Efforts and Regulatory Mechanisms

Rough popcornflower is a conservation-reliant species, meaning that the species will require continued conservation efforts to survive due to continuous encroachment from natural seral succession (USFWS 2010, p. 30).

Since listing the species in 2000, we have coordinated with local, State, and Federal stakeholders on conservation actions for the species, some of which we supported with funding.

Mowing in rough popcornflower habitat to control competing native and nonnative plant species, and subsequent outplanting of rough popcornflower, has occurred regularly at several sites. Other conservation actions include fencing to protect populations from anthropogenic disturbance; population introductions and augmentations; and stakeholder workshops in which species needs, recovery targets, and habitat conservation were discussed to raise landowner awareness. Agencies and property owners who have made commitments to protect or manage rough popcornflower and its habitat are the City of Sutherlin, Oregon; Douglas Soil and Water Conservation District, Oregon; Oregon Department of Agriculture (ODA), Native Plant Conservation Program; the BLM; the Native Plant Society of Oregon, Umpqua Valley Chapter; and The Nature Conservancy.

In the 2007 City of Sutherlin Conservation Agreement and Conservation Plan (ODA 2007, entire), the cooperators (the Service, the City of Sutherlin, ODA, the Umpqua Valley Chapter of the Native Plant Society of Oregon, the Sutherlin Stampede Association, and the Sutherlin Blackberry Festival, Inc.) agreed to the following measures:

- Prohibit activities that would disturb or destroy existing populations of rough popcornflower, or their habitat, on land owned or managed by the City of Sutherlin;
- Contract or coordinate appropriately timed surveys for new

populations of rough popcornflower on city-owned or -managed land prior to initiating ground-disturbing projects;

- Contact the ODA Native Plant Conservation Program if a new population of rough popcornflower is found during a pre-project survey; cooperate with the ODA Native Plant Conservation Program to develop conservation-based alternatives to proposed projects that would impact rough popcornflower populations or their habitat; and

- Cooperate with the ODA Native Plant Conservation Program to implement a management plan promoting the conservation of the populations of rough popcornflower at the Red Rock Park (formerly Timber Days Grounds).

Signatories of the agreement include the Service, the City of Sutherlin, ODA, the Umpqua Valley Chapter of the Native Plant Society of Oregon, the Sutherlin Stampede Association, and the Sutherlin Blackberry Festival, Inc. Since 2007, implementation of this agreement has provided fencing to protect rough popcornflower populations, reduced competitive and invasive species, and increased population numbers. This agreement was updated in 2023. In the updated agreement, entitled "Conservation Agreement for Rough Popcornflower," the City of Sutherlin agreed to continue to protect the plant and to extend the protection to Ford's Pond, a property acquired after the original signing in 2007. The 2023 agreement also allows introduction of the species at Ford's Pond (USFWS 2023c, p. 8).

The biological opinion on the North Bank Habitat Management Area issued by the Service in 2001 evaluated the effects of proposed management actions

and conservation measures conducted by the BLM for three rough popcornflower populations occurring in the management area (USFWS 2001, p. 15). Proposed management actions included manual and mechanical removal of competitive vegetation and the use of integrated pest management techniques to control noxious weeds. Proposed conservation measures included retaining existing populations and introducing additional populations into suitable habitat. To date, the BLM has consistently implemented these management actions and conservation measures, and the BLM is expected to continue to maintain and enhance habitat for this species into the future.

The Oregon Department of Transportation (ODOT) has established the Special Management Areas program to protect State-listed and federally listed endangered and threatened plant species identified on ODOT rights-of-way (ODOT 2017, p. 4). Special Management Areas are marked with signs that instruct ODOT maintenance crews on allowable activities. ODOT entered a statewide habitat conservation plan (HCP) with the Service in 2017 (USFWS 2017, entire). Under the HCP, the Special Management Areas identify the known populations of rare plants along ODOT rights-of-way that they have agreed to avoid impacting. In most cases, only periodic maintenance is necessary in Special Management Areas, and site-specific restrictions have been developed to protect listed species.

All federally listed plants in Oregon are also protected by State law under the Oregon Endangered Species Act, and their protection and conservation are administered by the ODA. The Oregon Endangered Species Act protects many other plant species in addition to those protected under the Federal Endangered Species Act. All State and municipal agencies, including City of Sutherlin, Douglas County, Douglas Soil and Water Conservation Service, and ODOT, must consult with ODA when a proposed action on land owned or leased by the State, or for which the State holds a recorded easement, has the potential to appreciably reduce the likelihood of the survival or recovery of any listed plant species.

While we do not have a specific agreement in place with The Nature Conservancy that guarantees a commitment to future management, they have actively managed the rough popcornflower habitat at their property (the Popcornswale preserve) since 1995, by monitoring populations, controlling nonnative and invasive species, managing habitat by reducing tree cover, mowing, and augmenting the

population with seeding. The Nature Conservancy has continued to manage the Popcornswale preserve multiple times a year since 1995, and is expected to continue these efforts.

These and other conservation efforts have increased the number of protected sites and vastly improved the number of plants in the overall population (from 7,000 to over 800,000). Currently, 11 of the 18 known populations throughout the species' range are under Federal, State, municipal, or land trust protections offering indefinite protection from habitat conversion to other uses. The remaining 7 populations (approximately 84 percent of the total number of individuals) do not have formal commitments for the long-term beneficial management of rough popcornflower but are benefitting from voluntary management practices employed by land management agencies and private landowners.

Determination of Rough Popcornflower's Status

Section 4 of the Act (16 U.S.C. 1533) and its implementing regulations (50 CFR part 424) set forth the procedures for determining whether a species meets the definition of an endangered species or a threatened species. The Act defines an endangered species as a species "in danger of extinction throughout all or a significant portion of its range," and a threatened species as a species "likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range." The Act requires that we determine whether a species meets the definition of an endangered species or a threatened species because of any of the following factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence.

Status Throughout All of Its Range

After evaluating threats to the species and assessing the cumulative effect of the threats under the Act's section 4(a)(1) factors, we find that the primary threats to rough popcornflower, since the time of listing, have been the destruction and/or alteration of habitat by development and hydrological changes (e.g., wetland fills, draining, construction), competition from native and nonnative plant species, impacts due to climate change (e.g., winter flooding, drier summer soils, and

decreased fruit production), and lack of (or noncompliance with) regulatory mechanisms. The best available information does not indicate that overcollection (Factor B) or herbivory (Factor C) are threats to the viability of the rough popcornflower. Our current analysis also indicates that the habitat threats (Factor A) and threats from the inadequacy of regulatory mechanisms (Factor D) have decreased since the time of listing, while climate change (Factor E) related threats have increased.

Habitat-related threats (destruction and/or alteration of habitat and competition from native and nonnative plant species), identified as drivers of rough popcornflower's status, are still present on the landscape; however, their magnitude and scope have decreased from historical levels and have been offset by a variety of management and conservation measures by many conservation partners since the rough popcornflower was listed as an endangered species (see 65 FR 3866; January 25, 2000), and these conservation actions continue today (USFWS 2021, p. 25 and appendix 3). Improvements in habitat management practices and extensive habitat restoration have been implemented, which have improved population resiliency and redundancy at several sites. Increased public awareness of the species has resulted in increased stewardship across lands with rough popcornflower populations and improved regulatory compliance. Greater understanding and compliance along with improvements in habitat management practices and extensive habitat restoration have helped ameliorate threats to the species, resulting in population increases and greater distribution. A majority of the rough popcornflower population sites (12 of 18) are protected by public ownership or managed to benefit the species; with these site protections and increased public knowledge of the species, compliance with regulatory mechanisms has increased significantly.

At the time of listing, rough popcornflower was known to exist in only 8 populations totaling 7,000 plants. There are currently 18 known populations totaling more than 800,000 plants. Although a majority (700,000) of the plants are within a single population, there are 17 other populations comprising more than 100,000 rough popcornflower plants distributed across the range of the species. Although the plants and populations are not distributed precisely as identified in recovery plan downlisting criteria (USFWS 2019, pp. 4–6), the population size (both the

number of plants and the physical area covered) in two of the three recovery units and the additional recovery management area exceed the target population size by unit/area, and six of the populations have stable and/or increasing trends. Our viability analysis determined that the species currently has high resiliency, good redundancy, and sufficient representation (USFWS 2021, pp. 32–41). Thus, after assessing the best available information, we conclude that the rough popcornflower is not in danger of extinction throughout all of its range.

We therefore proceed with determining whether the rough popcornflower is likely to become endangered within the foreseeable future throughout all of its range.

The best available information indicates that, at the species level, the most influential factors affecting rough popcornflower into the future are habitat-related threats (destruction and/or alteration of habitat and competition from native and nonnative plant species) (Factor A) and climate change (Factor E), which will likely cause more winter flooding, drier summer soils, and decreased fruit production. In our analysis of future viability (USFWS 2021, pp. 41–47), under Scenarios A and B, we project the species' resiliency, redundancy, and representation to be stable or increasing within the next 30 years. While a continuation of current conservation efforts as modeled under Scenario B is most likely, 7 of the 18 known populations (approximately 84 percent of the total number of plants) do not have formal commitments for long-term beneficial management of rough popcornflower and continued beneficial management is not assured.

Additionally, under Scenario C, we project the species' resiliency, redundancy, and representation to diminish within the next 30 years. Although this scenario is considered the least likely to occur, diminished habitat conditions along with reduced management actions and agency commitments are plausible and would likely to lead to long-term demographic declines, reductions in the number of populations, and reduced genetic diversity.

Thus, after assessing the best available information, we conclude that rough popcornflower is not currently in danger of extinction but is likely to become in danger of extinction within the foreseeable future throughout all of its range.

Status Throughout a Significant Portion of Its Range

Under the Act and our implementing regulations, a species may warrant listing if it is in danger of extinction or likely to become so within the foreseeable future throughout all or a significant portion of its range. The court in *Center for Biological Diversity v. Everson*, 435 F. Supp. 3d 69 (D.D.C. 2020) (*Everson*), vacated the provision of the Final Policy on Interpretation of the Phrase “Significant Portion of Its Range” in the Endangered Species Act’s Definitions of “Endangered Species” and “Threatened Species” (hereafter “Final Policy”; 79 FR 37578, July 1, 2014) that provided that if the Service determines that a species is threatened throughout all of its range, the Service will not analyze whether the species is endangered in a significant portion of its range.

Therefore, we proceed to evaluating whether the species is endangered in a significant portion of its range—that is, whether there is any portion of the species' range for which both (1) the portion is significant; and (2) the species is in danger of extinction in that portion. Depending on the case, it might be more efficient for us to address the “significance” question or the “status” question first. We can choose to address either question first. Regardless of which question we address first, if we reach a negative answer with respect to the first question that we address, we do not need to evaluate the other question for that portion of the species' range.

Following the court's holding in *Everson*, we now consider whether there are any significant portions of the species' range where the species is in danger of extinction now (*i.e.*, endangered). In undertaking this analysis for rough popcornflower, we choose to address the status question first—we consider information pertaining to the geographic distribution of both the species and the threats that the species faces to identify portions of the range where the species may be endangered.

We evaluated the range of the rough popcornflower to determine if the species is in danger of extinction in any portion of its range. The range of a species can theoretically be divided into portions in an infinite number of ways. We focused our analysis on portions of the species' range that may meet the definition of an endangered species. For rough popcornflower, we considered whether the threats or their effects on the species are greater in any biologically meaningful portion of the species' range than in other portions

such that the species is in danger of extinction now in that portion. As discussed above, we divided the range of the rough popcornflower in several ways (*e.g.*, populations, recovery units) for the purposes of our viability analyses. We divide the range into three recovery units (Sutherland Creek, Yoncalla Creek, and Callapooya Creek) that correspond to drainage basins within the Lower North Umpqua system, and represent groups of populations which share phenotypic similarities and are potentially genetically similar to one another. This scale is appropriate for considering whether the species may be in danger of extinction in any portion of the range.

We examined the following threats: habitat loss and fragmentation, small population size, native and invasive plant encroachment, fire, and climate change, including cumulative effects. We considered the effects of these threats on the rough popcornflower within each of the three recovery units.

As discussed above, through recovery efforts from multiple stakeholders, the rough popcornflower has increased to over 883,154 plants in 18 populations. In each recovery unit there are at least two populations that meet or exceed the resiliency criterion size of 5,000 individuals exceeding a patch size of 5,382 ft² (500 m²), indicating they have a high probability of persistence over the next 30 years.

The rough popcornflower has a current distribution that is analogous to its historical range in all three recovery units (USFWS 2021, p. 39). Near-term threats are similar for all populations distributed throughout the recovery units. The rough popcornflower is a conservation reliant species, and in each recovery unit populations receive some form of habitat management in the form of mowing, grazing, prescribed burning, or invasive plant control to address the near-term threats (USFWS 2021, p. 38).

Given the distribution of resilient populations across recovery units, the uniformity of the near-term threats to the species within each unit and ongoing conservation measures addressing those threats, there is no one recovery unit that has a different status from its range-wide status. In summary, we found no portion of the rough popcornflower's range where threats are impacting individuals differently from how they are affecting the species elsewhere in its range, or where the biological condition of the species differs from its condition elsewhere in its range such that the status of the species in that portion does not differ from any other portion of the species' range.

Therefore, no portion of the species' range provides a basis for determining that the species is in danger of extinction in a significant portion of its range, and we determine that the species is likely to become in danger of extinction within the foreseeable future throughout all of its range. This does not conflict with the courts' holdings in *Desert Survivors v. U.S. Department of the Interior*, 321 F. Supp. 3d 1011, 1070–74 (N.D. Cal. 2018) and *Center for Biological Diversity v. Jewell*, 248 F. Supp. 3d 946, 959 (D. Ariz. 2017) because, in reaching this conclusion, we did not apply the aspects of the Final Policy, including the definition of "significant" that those court decisions held were invalid.

Determination of Status

Based on the best scientific and commercial data available, we determine that the rough popcornflower meets the Act's definition of a threatened species. Therefore, we propose to downlist the rough popcornflower as a threatened species in accordance with sections 3(20) and 4(a)(1) of the Act.

Protective Regulations Under Section 4(d) of the Act

Section 4(d) of the Act contains two sentences. The first sentence states that the Secretary shall issue such regulations as she deems necessary and advisable to provide for the conservation of species listed as threatened species. Conservation is defined in the Act to mean the use of all methods and procedures which are necessary to bring any endangered species or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary. Additionally, the second sentence of section 4(d) of the Act states that the Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a)(1), in the case of fish or wildlife, or section 9(a)(2), in the case of plants. With these two sentences in section 4(d), Congress delegated broad authority to the Secretary to determine what protections would be necessary and advisable to provide for the conservation of threatened species, and even broader authority to put in place any of the section 9 prohibitions, for a given species.

The courts have recognized the extent of the Secretary's discretion under this standard to develop rules that are appropriate for the conservation of a species. For example, courts have upheld, as a valid exercise of agency authority, rules developed under section

4(d) that included limited prohibitions against takings (see *Alsea Valley Alliance v. Lautenbacher*, 2007 WL 2344927 (D. Or. 2007); *Washington Environmental Council v. National Marine Fisheries Service*, 2002 WL 511479 (W.D. Wash. 2002)). Courts have also upheld 4(d) rules that do not address all of the threats a species faces (see *State of Louisiana v. Verity*, 853 F.2d 322 (5th Cir. 1988)). As noted in the legislative history when the Act was initially enacted, "once an animal is on the threatened list, the Secretary has an almost infinite number of options available to [her] with regard to the permitted activities for those species. [She] may, for example, permit taking, but not importation of such species, or [she] may choose to forbid both taking and importation but allow the transportation of such species" (H.R. Rep. No. 412, 93rd Cong., 1st Sess. 1973).

The provisions of this species' proposed protective regulations under section 4(d) of the Act are one of many tools that we would use to promote the conservation of the rough popcornflower. The proposed protective regulations would apply only if and when we make final the reclassification of the rough popcornflower as a threatened species. Nothing in 4(d) rules change in any way the recovery planning provisions of section 4(f) of the Act, the consultation requirements under section 7 of the Act, or the ability of the Service to enter into partnerships for the management and protection of the rough popcornflower.

Section 7(a)(2) states that each Federal action agency shall, in consultation with the Secretary, ensure that any action they authorize, fund, or carry out is not likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of designated critical habitat. Each Federal agency shall review its action at the earliest possible time to determine whether it may affect listed species or critical habitat. If a determination is made that the action may affect listed species or critical habitat, formal consultation is required (50 CFR 402.14(a)), unless the Service concurs in writing that the action is not likely to adversely affect listed species or critical habitat. At the end of a formal consultation, the Service issues a biological opinion, containing its determination of whether the Federal action is likely to result in jeopardy or adverse modification.

Examples of discretionary actions for the rough popcornflower that may be subject to consultation procedures under section 7 are management of

Federal lands administered by the BLM, as well as actions that require a Federal permit (such as a permit from the U.S. Army Corps of Engineers under section 404 of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or actions funded by Federal agencies such as the Federal Highway Administration, Federal Aviation Administration, or the Federal Emergency Management Agency. Federal actions not affecting listed species or critical habitat—and actions on State, Tribal, local, or private lands that are not federally funded, authorized, or carried out by a Federal agency—do not require section 7 consultation. Federal agencies should coordinate with the local Service Field Office (see **FOR FURTHER INFORMATION CONTACT**) with any specific questions on section 7 consultation and conference requirements.

These requirements are the same for a threatened species regardless of what is included in its 4(d) rule. Section 7 consultation is required for Federal actions that "may affect" a listed species regardless of whether take caused by the activity is prohibited or excepted by a 4(d) rule (under application of a "blanket rule" (for more information, see 89 FR 23919, April 5, 2024) or a species-specific 4(d) rule). A 4(d) rule does not change the process and criteria for informal or formal consultations and does not alter the analytical process used for biological opinions or concurrence letters. For example, as with an endangered species, if a Federal agency determines that an action is "not likely to adversely affect" a threatened species, it will require the Service's written concurrence (50 CFR 402.13(c)). Similarly, if a Federal agency determines that an action is "likely to adversely affect" a threatened species, it will require formal consultation and the formulation of a biological opinion (50 CFR 402.14(a)). Because consultation obligations and processes are unaffected by 4(d) rules, we may consider developing tools to streamline future intra-Service and inter-Agency consultations for actions that result in forms of take that are not prohibited by the 4(d) rule (but that still require consultation). These tools may include consultation guidance, online consultation processes via the Service's digital project planning tool (Information for Planning and Consultation; <https://ipac.ecosphere.fws.gov/>), template language for biological opinions, or programmatic consultations.

Exercising the Secretary's authority under section 4(d) of the Act, we are applying the protections for the rough popcornflower through our regulations at 50 CFR 17.71(a). In our April 5, 2024, final rule revising those regulations (89 FR 23919, at 23922–23923), we found that applying those regulations as a whole satisfies the requirement in section 4(d) of the Act to issue regulations deemed necessary and advisable to provide for the conservation of threatened species. We have not identified any ways in which a protective regulation for this threatened species would need to differ from the regulations at 50 CFR 17.71(a) in order to contain the protections that are necessary and advisable to provide for the conservation of the rough popcornflower. Therefore, the regulations at 50 CFR 17.71(a) apply. This means that except as provided in a permit issued pursuant to 50 CFR 17.72, all of the provisions of 50 CFR 17.61 for endangered plants, except § 17.61(c)(2) through (4), apply to the rough popcornflower, and the provisions of 50 CFR 17.71(b) concerning exceptions for certain entities also apply to the species.

Required Determinations

Clarity of the Rule

We are required by E.O.s 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

- (1) Be logically organized;
- (2) Use the active voice to address readers directly;
- (3) Use clear language rather than jargon;
- (4) Be divided into short sections and sentences; and
- (5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell

us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

Regulations adopted pursuant to section 4(a) of the Act are exempt from the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and do not require an environmental analysis under NEPA. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244). This includes listing, delisting, and reclassification rules, as well as critical habitat designations and species-specific protective regulations promulgated concurrently with a decision to list or reclassify a species as threatened. The courts have upheld this position (*e.g.*, *Douglas County v. Babbitt*, 48 F.3d 1495 (9th Cir. 1995) (critical habitat); *Center for Biological Diversity v. U.S. Fish and Wildlife Service*, 2005 WL 2000928 (N.D. Cal. Aug. 19, 2005) (concurrent 4(d) rule)).

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994 (Government-to-Government Relations with Native American Tribal Governments; 59 FR 22951), E.O. 13175 (Consultation and Coordination with Indian Tribal Governments), and the Department of the Interior's manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with federally recognized Tribes on a government-to-government basis. In accordance with Secretary's Order 3206 of June 5, 1997 (American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act), we readily acknowledge our responsibilities to work directly with Tribes in developing programs for healthy ecosystems, to acknowledge that Tribal lands are not

subject to the same controls as Federal public lands, to remain sensitive to Indian culture, and to make information available to Tribes. We will continue to work with Tribal entities during the development of a final downlisting determination for the rough popcornflower.

Steel Wire Garment Hangers From the People's Republic of China: Final Results of the Expedited Third Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of this expedited sunset review, the U.S. Department of Commerce (Commerce) finds that revocation of the antidumping duty (AD) order on steel wire garment hangers (steel hangers) from the People's Republic of China (China) would be likely to lead to continuation or recurrence of dumping at the levels indicated in the "Final Results of Sunset Review" section of this notice.

DATES: Applicable December 10, 2024.

FOR FURTHER INFORMATION CONTACT: Kabir Archuletta, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-2953.

SUPPLEMENTARY INFORMATION:

Background

On October 6, 2008, Commerce published the AD *Order* on steel

hangers from China.¹ On July 1, 2024, Commerce published the notice of initiation of the five-year sunset review of the *Order*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).² On July 10, 2024, Commerce received a notice of intent to participate in this review from M&B Metal Products Company, Inc. (the domestic interested party) within the deadline specified in 19 CFR 351.218(d)(1)(i).³ The domestic interested party claimed interested party status under section 771(9)(C) of the Act as a manufacturer, producer, or wholesaler of a domestic like product in the United States.

On July 18, 2024, the domestic interested party provided a timely substantive response for this review within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i).⁴ We received no substantive responses from any other interested parties, nor was a hearing requested. On August 21, 2024, Commerce notified the U.S. International Trade Commission (ITC) that it did not receive an adequate substantive response from respondent interested parties.⁵ As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited (120-day) sunset review of this *Order*. On July 22, 2024, Commerce tolled certain deadlines in this administrative proceeding by seven days.⁶ The deadline for the final results is now November 5, 2024.

Scope of the Order

The merchandise subject to this *Order* is steel hangers. For a complete description of the scope of the *Order*, see the Issues and Decision Memorandum.⁷

¹ See *Notice of Antidumping Duty Order: Steel Wire Garment Hangers from the People's Republic of China*, 73 FR 58111 (October 6, 2008) (*Order*).

² See *Initiation of Five-Year (Sunset) Reviews*, 89 FR 54435 (July 1, 2024).

³ See Domestic Interested Party's Letter, "Notice of Intent to Participate," dated July 10, 2024.

⁴ See Domestic Interested Party's Letter, "Substantive Response to Notice of Initiation," dated July 18, 2024.

⁵ See Commerce's Letter, "Sunset Review for July 2024," dated August 21, 2024.

⁶ See Memorandum, "Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings," dated July 22, 2024.

⁷ See Memorandum, "Issues and Decision Memorandum for the Final Results of the Expedited Third Sunset Review of the Antidumping Duty Order on Certain Steel Wire Garment Hangers from

Continued

Analysis of Comments Received

All issues raised in this review, including the likelihood of continuation or recurrence of dumping in the event of revocation and the magnitude of the margins likely to prevail if the *Order* were revoked, are addressed in the accompanying Issues and Decision Memorandum.⁸ A list of topics discussed in the Issues and Decision Memorandum is included as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Final Results of Sunset Review

Pursuant to sections 751(c)(1) and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the antidumping duty order on steel hangers from China would be likely to lead to the continuation or recurrence of dumping, and that the magnitude of the margins likely to prevail would be weighted-average dumping margins up to 187.25 percent.

Administrative Protective Order (APO)

This notice serves as the only reminder to interested parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results and notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2) and 19 CFR 351.221(c)(5)(ii).

the People's Republic of China" (Issues and Decisions Memorandum), dated concurrently with these results and hereby adopted by this notice.

DEPARTMENT OF COMMERCE

International Trade Administration

Open Meeting of the President's Advisory Council on Doing Business in Africa

AGENCY: U.S. Department of Commerce, International Trade Administration.

ACTION: Notice.

SUMMARY: The President's Advisory Council on Doing Business in Africa (PAC-DBIA or Council) will hold a meeting to deliberate and adopt a report commemorating the 10-year anniversary of the establishment of the PAC-DBIA. The PAC-DBIA will present summaries of past recommendations across twelve key topics: Infrastructure, Financing, Technology & Digital Economy, Energy & Environment, Health, Agribusiness & Food-Water Security, Trade Facilitation & Supply-Value Chains, Bilateral Engagement Mechanisms, Public Procurement, Workforce & Skills Development, SMEs & Women Entrepreneurs, and the African Growth and Opportunity Act (AGOA). U.S. Government principals will provide feedback summarizing actions taken by departments, agencies, and programs that have address the PAC-DBIA's recommendations. The PAC-DBIA will also present a review of key fact-finding activities conducted and analytical reports produced over the 10 years of the PAC-DBIA's existence. Finally, the PAC-DBIA will present forward-looking recommendations regarding utilization of the PAC-DBIA and U.S.-Africa commercial engagement in general. The final agenda for the meeting will be posted prior to the meeting on the Council's website at <http://trade.gov/pac-dbia>.

DATES: December 13, 2024, time to be determined and posted in advance on the PAC-DBIA website at <http://trade.gov/pac-dbia>.

ADDRESSES: The President's Advisory Council on Doing Business in Africa meeting will be broadcast to the public via live webcast on the internet at <http://whitehouse.gov/live>.

FOR FURTHER INFORMATION CONTACT: Giancarlo Cavallo, Designated Federal Officer, President's Advisory Council on Doing Business in Africa, Department of Commerce, 1401 Constitution Ave. NW, Room 22004, Washington, DC 20230, telephone: 202–766–8044; email: dbia@trade.gov, Giancarlo.Cavallo@trade.gov.

SUPPLEMENTARY INFORMATION:

Background: The PAC-DBIA was established on August 5, 2014, to advise the President, through the Secretary of Commerce, on strengthening commercial engagement between the United States and Africa. The Council's charter was renewed for a fifth two-year term in December 2023. The Council was established in accordance with the provisions of the Federal Advisory Committee Act, as amended, 5 U.S.C. App.

Exceptional Circumstances: Pursuant to 41 CFR 102–3.150(b), the notice for this meeting is given less than 15 calendar days prior to the meeting because of the exceptional circumstances of the two-year anniversary of the 2022 U.S.–Africa Leaders Summit and Business Forum being on December 14, 2024, and the need for the PAC-DBIA's 10-year review of the Council's input to the U.S. Government to be incorporated into public messaging about progress and accomplishments in U.S.-Africa commercial engagement over the past two years.

Public Participation: Members of the public are invited to submit written statements to the Council for consideration in advance of this meeting by 12:00 p.m. ET on December 13, 2024. Members of the public are encouraged to submit written comments via email to ensure timely receipt, but may submit by either of the following methods:

a. Electronic Submissions

Submit statements electronically to Giancarlo Cavallo, Designated Federal Officer, President's Advisory Council on Doing Business in Africa, via email: dbia@trade.gov.

b. Paper Submissions

Send paper statements to Giancarlo Cavallo, Designated Federal Officer, President's Advisory Council on Doing Business in Africa, Department of

Commerce, 1401 Constitution Ave. NW, Room 22004, Washington, DC 20230.

Statements will be provided to PAC–DBIA members in advance of the meeting for consideration and may be posted on the Council website (<http://trade.gov/pac-dbia>). Any business proprietary information should be clearly designated as such. All statements received, including attachments and other supporting materials, are part of the public record and subject to public disclosure.

Meeting transcripts: Copies of the Council’s meeting transcript and a video recording of the meeting will be available within ninety (90) days of the meeting on the Council’s website at <http://trade.gov/pac-dbia>.

Giancarlo Cavallo,

Deputy Director, Office of Africa.

BILLING CODE 3510–FP–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–557–828]

Ferrosilicon From Malaysia: Amended Preliminary Determination of Sales at Less Than Fair Value and Amended Preliminary Negative Determination of Critical Circumstances

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is amending the preliminary affirmative determination in the less-than-fair-value (LTFV) investigation of ferrosilicon from Malaysia to correct significant ministerial errors. The period of investigation (POI) is January 1, 2023, through December 31, 2023.

DATES: Applicable December 11, 2024.

FOR FURTHER INFORMATION CONTACT:

Jacob Waddell, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1369.

SUPPLEMENTARY INFORMATION:

Background

On November 6, 2024, Commerce published in the *Federal Register* its preliminary affirmative determination in the LTFV investigation of ferrosilicon from Malaysia.¹ On November 8 and 12, 2024, the petitioners² timely alleged that Commerce made significant ministerial errors in the *Preliminary Determination* with respect to calculation of the preliminary weighted-average dumping margins for OM Materials Sarawak Sdn. Bhd (OMSA) and Pertama Ferroalloys Sdn. Bhd (Pertama),³ respectively.

Scope of the Investigation

The product covered by this investigation is ferrosilicon from Malaysia. For a complete description of the scope of this investigation, see the *Preliminary Determination*.

Legal Framework

Pursuant to 19 CFR 351.224(e), Commerce will correct any significant ministerial error by amending the preliminary determination. A ministerial error is defined as including errors “in addition, subtraction, or other arithmetic function, clerical error resulting from inaccurate copying, duplication, or the like, and any other similar type of unintentional error which {Commerce} considers ministerial.”⁴ A ministerial error is considered to be “significant” if its correction, either singly or in combination with other errors, would result in: (1) a change of at least five absolute percentage points in, but not less than 25 percent of, the weighted-average dumping margin calculated in the preliminary determination; or (2) a difference between a weighted-average dumping margin of zero (or *de minimis*) and a weighted-average dumping margin of greater than *de minimis* or vice versa.⁵

Analysis of Significant Ministerial Errors

In the *Preliminary Determination*, Commerce made significant ministerial errors within the meaning of section 735(3) of the Act and 19 CFR 35.224(f)–

(g) in calculating the weighted-average dumping margins for OMSA and Pertama. Specifically, for OMSA, we included an incorrect currency conversion for OMSA’s home market costs.⁶ For Pertama, an error in our aggregation of five third-country market databases resulted in a distortion of the results of the arm’s-length test in the comparison market program.⁷

We find that these errors meet the definition of “ministerial errors,” and that the corrections of the errors for OMSA and Pertama result in a change that is at least five absolute percentage points in, and not less than 25 percent of, the margins calculated for OMSA and Pertama in the *Preliminary Determination*. As such, they constitute significant errors within the meaning of 19 CFR 351.224(g). Accordingly, pursuant to 19 CFR 224(e), Commerce is amending the *Preliminary Determination* to correct these significant ministerial errors by revising the rates for OMSA, Pertama, and all other producers and/or exporters.⁸

For a complete discussion of the alleged ministerial errors, see the Preliminary Ministerial Error Memorandum.

Amended Preliminary Negative Determination of Critical Circumstances

Because we have revised the rates calculated for OMSA, Pertama, and all other producers and/or exporters, we have also amended our preliminary analysis of critical circumstances. In accordance with section 733(e) of the Act and 19 CFR 351.206, Commerce preliminarily finds that critical circumstances do not exist for OMSA, Pertama, and all other companies not individually examined. For a full description of the results of Commerce’s critical circumstances analysis, see the Ministerial Error Memorandum.

Amended Preliminary Determination

As a result of correcting the significant ministerial errors, Commerce determines the following estimated weighted-average dumping margins exist:

¹ See *Ferrosilicon from Malaysia: Preliminary Affirmative Determination of Sales at Less than Fair Value, Preliminary Negative Determination of Critical Circumstances, Postponement of Final Determination, and Extension of Provisional Measures*, 89 FR 88010 (November 6, 2024) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum.

² The petitioners are CC Metals and Alloys, LLC and Ferrolobe USA, TNC.

³ See Petitioners’ Letter, “Ministerial Error Allegation Pertaining to OMSA in the Preliminary

Determination,” dated November 8, 2024 (Petitioners’ OMSA Ministerial Error Allegation); see also “Ministerial Error Allegation Pertaining to Pertama in the Preliminary Determination,” dated November 12, 2024 (Petitioners’ Pertama Ministerial Error Allegation).

⁴ See section 735(e) of the Tariff Act of 1930, as amended (the Act); see also 19 CFR 351.224(f).

⁵ See 19 CFR 351.224(g).

⁶ See Petitioners’ OMSA Ministerial Error Allegation; see also Commerce’s Memorandum,

“Preliminary Analysis Memorandum for OM Materials Sarawak Sdn. Bhd,” dated October 31, 2024.

⁷ See Petitioners’ Pertama Ministerial Error Allegation; see also Commerce’s Memorandum, “Preliminary Analysis Memorandum for Pertama Ferroalloys Sdn. Bhd,” dated October 31, 2024.

⁸ See Memorandum, “Analysis of Ministerial Error Allegations,” dated concurrently with, and hereby adopted by, this notice (Ministerial Error Memorandum).

Exporter/producer	Weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offsets(s)) (percent)
OM Sarawak Sdn. Bhd	19.48	18.80
Pertama Ferroalloys Sdn. Bhd	38.19	37.91
All Others	27.73	27.17

Disclosure

We intend to disclose the calculations performed for this amended preliminary determination to parties within five days after public announcement or, if there is no public announcement, within five days of the date of publication of this notice, in accordance with 19 CFR 351.224.

Amended Cash Deposits and Suspension of Liquidation

The collection of cash deposits and suspension of liquidation will be revised according to the rates calculated in this amended preliminary determination, in accordance with section 733(d) of the Act. Because this amended preliminary determination results in increased cash deposit rates, these rates will be effective on the date of publication of this notice in the **Federal Register**. These suspension of liquidation instructions will remain in effect until further notice.

Notification of U.S. International Trade Commission

In accordance with section 703(f) of the Act, we intend to notify the U.S. International Trade Commission of our amended preliminary determination.

Notification to Interested Parties

This notice is issued and published pursuant to sections 703(f) and 777(i) of the Act and 19 CFR 351.205(c).

Dated: December 5, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

[A–523–810]

Polyethylene Terephthalate Resin From the Sultanate of Oman: Final Results of Antidumping Duty Administrative Review; 2022–2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that

the sole producer/exporter under administrative review, OCTAL SAOC FZC (OCTAL), did not sell subject merchandise at less than normal value during the period of review (POR), May 1, 2022, through April 30, 2023.

DATES: Applicable December 11, 2024.

FOR FURTHER INFORMATION CONTACT: Jeff Pedersen, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2769.

SUPPLEMENTARY INFORMATION:

Background

On June 5, 2024, Commerce published the *Preliminary Results* in the **Federal Register**.¹ For a complete description of the events that occurred since Commerce issued the *Preliminary Results*, see the Issues and Decision Memorandum.² Commerce conducted this administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order³

The merchandise covered the *Order* is polyethylene terephthalate resin (PET resin) from the Sultanate of Oman (Oman). For a full description of the scope of the *Order*, see the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs that interested parties filed in this administrative review are listed in the in the appendix to this notice and addressed in the Issues and Decision Memorandum. The Issues and

¹ See *Polyethylene Terephthalate Resin from the Sultanate of Oman: Preliminary Results and Partial Rescission of Antidumping Duty Administrative Review; 2022–2023*, 89 FR 48153 (June 5, 2024) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

² See Memorandum, “Issues and Decision Memorandum for the Final Results of the 2022–2023 Administrative Review of the Antidumping Duty Order on Polyethylene Terephthalate Resin From the Sultanate of Oman,” dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

³ See *Certain Polyethylene Terephthalate Resin from Canada, the People’s Republic of China, India, and the Sultanate of Oman: Amended Final Affirmative Antidumping Determination (Sultanate of Oman) and Antidumping Duty Orders*, 81 FR 27979 (May 6, 2016) (*Order*).

Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Services System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be assessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Changes Since the Preliminary Results

Based on our review of the record and interested parties’ comments on the *Preliminary Results*, we revised certain language in the program that we used to calculate OCTAL’s dumping margin to accurately reclassify certain sales as constructed export price sales. For a discussion of these changes, see the Issues and Decision Memorandum.

Final Results of Review

Commerce determines that the following estimated weighted-average dumping margin exists for the period, May 1, 2022, through April 30, 2023:

Producer or exporter	Weighted-average dumping margin (percent)
OCTAL SAOC FZC	0.00

Disclosure

Commerce intends to disclose its calculations and analysis performed in these final results of review to parties to the proceeding within five days after the date of any public announcement of the final results or, if there is no public announcement of the final results, within five days after the date of publication of this notice in the **Federal Register** in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(1), Commerce has determined the antidumping duty assessment rate on all appropriate entries of subject merchandise during the POR. Because OCTAL’s *ad valorem* weighted-average dumping margin is zero, we will instruct U.S. Customs and Border

Protection (CBP) to liquidate the appropriate entries without regard to antidumping duties.

Pursuant to a refinement to Commerce's assessment practice, where sales of subject merchandise that was produced or exported by an individually examined respondent were not reported in the U.S. sales data submitted by the respondent, but the merchandise was entered for consumption into the United States during the POR, we will instruct CBP to liquidate any entries of such merchandise at the all-others rate (*i.e.*, 7.62 percent) ⁴ if there is no rate for the intermediate company(ies) involved in the transaction.⁵

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of this notice of the final results of review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of this notice in the **Federal Register**, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for OCTAL will be zero percent; (2) for merchandise exported by a company that is not under review and the company has a company-specific cash deposit rate from a completed segment of this proceeding, the cash deposit rate will continue to be the company-specific cash deposit rate from a completed segment of the proceeding that is currently applicable to the company; (3) if the exporter of the subject merchandise was not covered by this review or a previously completed segment of this proceeding, but the producer of the subject merchandise was covered, then the cash deposit rate will be equal to the company-specific cash deposit rate from a completed segment of this proceeding that is currently applicable to the producer of the subject merchandise; and (4) if neither the exporter nor the producer of the subject merchandise was covered by this review or a previously completed

segment of this proceeding, then the cash deposit rate will be 7.62 percent *ad valorem*,⁶ the all-others rate established in the less-than-fair-value investigation. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Administrative Protective Order (APO)

This notice serves as the only reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under the APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results of review and this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: December 5, 2024.

Abdelali Elouaradia,
Deputy Assistant Secretary for Enforcement and Compliance.

Laminated Woven Sacks From the Socialist Republic of Vietnam: Final Results of the Expedited First Sunset Review of the Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that revocation of the countervailing duty (CVD) order on Laminated Woven Sacks (LWS) from the Socialist Republic of Vietnam (Vietnam) would be likely to lead to continuation or recurrence of countervailing subsidies at the levels indicated in the “Final Results of Sunset Review” section of this notice.

DATES: Applicable December 10, 2024.

FOR FURTHER INFORMATION CONTACT: Luke Caruso, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2081.

SUPPLEMENTARY INFORMATION:

Background

On June 4, 2019, Commerce published in the **Federal Register** the CVD order on LWS from Vietnam.¹ On May 1, 2024, Commerce initiated the first sunset review of the Order, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).² On May 10, 2024, Commerce received a timely notice of intent to participate from Polytex Fiber LLC and ProAmpac Holdings Inc. (collectively, the domestic interested parties) within the 15-day deadline specified in 19 CFR 351.218(d)(1)(i).³ The domestic interested parties claimed interested party status under sections 771(9)(E) and (F) of the Act.

On May 30, 2024, Commerce received an adequate substantive response to the *Initiation Notice* from the domestic interested parties within the 30-day deadline specified in 19 CFR

¹ See *Laminated Woven Sacks from the Socialist Republic of Vietnam: Antidumping Duty and Countervailing Duty Orders*, 84 FR 25753 (June 4, 2019) (Order).

² See *Initiation of Five-Year (Sunset) Reviews*, 89 FR 35073 (May 1, 2024) (*Initiation Notice*).

³ See Domestic Interested Parties' Letter, “Domestic Interested Party Notice Of Intent To Participate,” dated May 10, 2024.

⁴ See Order, 81 FR 27982.

⁵ For a full discussion of this practice, see *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003).

351.218(d)(3)(i).⁴ We received no substantive responses from any other interested parties, including the Government of Vietnam, and no interested party requested a hearing. On June 21, 2024, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from respondent interested parties, and that Commerce would conduct an expedited (120-day) sunset review of the *Order*,⁵ pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(B)–(C).

Scope of the Order

The product covered by the *Order* is LWS. For a complete description of the scope of the *Order*, see the Issues and Decision Memorandum.⁶

Analysis of Comments Received

All issues raised in this sunset review are addressed in the accompanying Issues and Decision Memorandum. A list of the issues discussed in the Issues and Decision Memorandum is attached as the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNotices/ListLayout.aspx>.

Final Results of Sunset Review

Pursuant to sections 751(c)(1) and 752(b) of the Act, Commerce determines that revocation of the *Order* would likely lead to continuation or recurrence of countervailable subsidies at the following net countervailable subsidy rates:

Company	Subsidy Rate (percent <i>ad valorem</i>)
Duong Vinh Hoa Packaging Company Limited	3.02
Xinsheng Plastic Industry Co., Ltd	198.87
All Others	3.02

⁴ See Domestic Interested Parties’ Letter, “Domestic Interested Party Substantive Response,” dated May 30, 2024 (Substantive Response).
⁵ See Commerce’s Letter, “Sunset Reviews Initiated on May 1, 2024,” dated June 21, 2024.
⁶ See Memorandum, “Decision Memorandum for the Final Results of the Expedited First Sunset Review of the Countervailing Duty Order on Laminated Woven Sacks from Vietnam,” dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

Administrative Protective Order

This notice serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a). Timely written notification of the destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

Commerce is issuing and publishing these final results and notice in accordance with sections 751(c), 752(b), and 777(i)(1) of the Act and 19 CFR 351.218.

Dated: September 5, 2024.
Abdelali Elouaradia,
Deputy Assistant Secretary for Enforcement and Compliance.

Editorial Note: This document was received for publication by the Office of the Federal Register on December 6, 2024.

Laminated Woven Sacks From the Socialist Republic of Vietnam: Final Results of Expedited First Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.
SUMMARY: As a result of this expedited sunset review, the U.S. Department of Commerce (Commerce) finds that revocation of the antidumping duty (AD) order on Laminated Woven Sacks (LWS) from the Socialist Republic of Vietnam (Vietnam) would likely lead to continuation or recurrence of dumping

at the levels indicated in the “Final Results of the Sunset Review” section of this notice.

DATES: Applicable December 11, 2024.
FOR FURTHER INFORMATION CONTACT: Luke Caruso, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2081.

SUPPLEMENTARY INFORMATION:

Background

After Commerce initiated the sunset review¹ of the *Order*,² pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act), domestic interested parties³ timely submitted complete notices of intent to participate in,⁴ and adequate substantive responses regarding, the review.⁵ The domestic interested parties claimed domestic interested party status under section 771(9)(C) of the Act as producers of the domestic like product in the United States.⁶ Commerce did not receive a substantive response from any respondent interested party, nor was a hearing requested. On June 21, 2024, Commerce notified the U.S. International Trade Commission that it did not receive adequate substantive responses from respondent interested parties.⁷ As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited (120-day) sunset review of the *Order*.

Scope of the Order

The merchandise covered by the *Order* is laminated woven sacks.. For a complete description of the scope of the *Order*, see the Issues and Decision Memorandum.⁸

¹ See *Initiation of Five-Year (Sunset) Reviews*, 89 FR 35073 (May 1, 2024).
² See *Laminated Woven Sacks from the Socialist Republic of Vietnam: Antidumping Duty and Countervailing Duty Orders*, 84 FR 753 (June 4, 2019) (*Order*).
³ The domestic interested parties are Polytex Fiber LLC and ProAmpac Holdings Inc.
⁴ See Domestic Interested Parties’ Letter, “Domestic Interested Party Notice Of Intent To Participate,” dated May 10, 2024.
⁵ See Domestic Interested Parties’ Letter, “Domestic Interested Party Substantive Response,” dated May 30, 2024 (Substantive Response).
⁶ *Id.*
⁷ See Commerce’s Letter, “Sunset Reviews initiated on May 1, 2023,” dated June 21, 2024.
⁸ See Memorandum, “Decision Memorandum for the Final Results of the First Expedited Sunset Review of the Antidumping Duty Order on Laminated Woven Sacks from the Socialist Republic of Vietnam,” dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

Analysis of Comments Received

A complete discussion of all issues raised in this sunset review is contained in the accompanying Issues and Decision Memorandum.⁹ A list of topics discussed in the Issues and Decision Memorandum is included as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be directly accessed at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Final Results of Sunset Review

Pursuant to sections 751(c)(1) and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the *Order* would likely lead to continuation or recurrence of dumping, and that the magnitude of the dumping margins likely to prevail are weighted-average margins up to a weighted-average margin of up to 292.61 percent.

Administrative Protective Order

This notice serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a). Timely notification of the return or destruction of APO materials or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results of sunset review in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act, and 19 CFR 351.218(e)(1)(ii)(C)(2) and 19 CFR 351.221(c)(5)(iii).

Dated: September 5, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Editorial Note: This document was received for publication by the Office of the Federal Register on December 6, 2024.

International Trade Administration

[A–823–816]

Carbon and Alloy Steel Wire Rod From Ukraine: Rescission of Antidumping Duty Administrative Review; 2023–2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is rescinding the administrative review of the antidumping duty (AD) order on carbon and alloy steel wire rod (wire rod) from Ukraine for the period of review (POR) March 1, 2023 through February 29, 2024.

DATES: Applicable December 11, 2024.

FOR FURTHER INFORMATION CONTACT: Brittany Bauer, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3860.

SUPPLEMENTARY INFORMATION:

Background

On March 14, 2018, Commerce published in the *Federal Register* the AD order on wire rod from Ukraine.¹ On March 1, 2024, Commerce published in the *Federal Register* a notice of opportunity to request an administrative review of the *Order*.² On April 1, 2024, Commercial Metals Company and Nucor Corporation (collectively, the petitioners) submitted a timely request

¹ See *Carbon and Alloy Steel Wire Rod from the Republic of South Africa and Ukraine: Antidumping Duty Orders*, 83 FR 11175 (March 14, 2018) (*Order*).

² See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review and Join Annual Inquiry Service List*, 89 FR 15157 (March 1, 2024).

that Commerce conduct an administrative review of the *Order*.³ On May 8, 2024, Commerce published in the *Federal Register* its notice of initiation of an administrative review of the *Order*, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.221(c)(1)(i).⁴

This review covers subject merchandise exported and/or produced by the following six companies: (1) ArcelorMittal Steel Kryvyi Rih; (2) Public Joint Stock Company Yenakieve Iron and Steel Works; (3) PrJSC Electrometallurgical Works Dnepropetsstal; (4) PJSC Dneprovsky Iron & Steel Integrated Works; (5) Metinvest Holding LLC; and (6) Variant Agro Build Ltd.⁵ On May 10, 2024, we placed on the record U.S. Customs and Border Protection (CBP) data for entries of wire rod from Ukraine during the POR, showing no reviewable POR entries for any company listed in the *Initiation Notice*.

On November 6, 2024, Commerce notified all interested parties of its intent to rescind the instant review because there were no reviewable, suspended entries of subject merchandise by any of the companies subject to this review during the POR, and we invited interested parties to comment.⁶ We did not receive any comments.

Rescission of Review

Pursuant to 19 CFR 351.213(d)(3), it is Commerce's practice to rescind an administrative review of an AD order when there are no reviewable entries of subject merchandise during the POR for which liquidation is suspended.⁷ Normally, upon completion of an administrative review, the suspended entries are liquidated at the AD assessment rate calculated for the review period.⁸ Therefore, for an administrative review to be conducted, there must be a reviewable, suspended entry that Commerce can instruct CBP to liquidate at the AD assessment rate

³ See Petitioners' Letter, "Request for Administrative Review," dated April 1, 2024.

⁴ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 89 FR 38867 (May 8, 2024) (*Initiation Notice*).

⁵ *Id.*, 89 FR 38871.

⁶ See Memorandum, "Notice of Intent to Rescind Review," dated November 6, 2024.

⁷ See, e.g., *Diocetyl Terephthalate from the Republic of Korea: Rescission of Antidumping Administrative Review; 2021–2022*, 88 FR 24758 (April 24, 2023); see also *Certain Carbon and Alloy Steel Cut-to-Length Plate from the Federal Republic of Germany: Rescission of Antidumping Administrative Review; 2020–2021*, 88 FR 4154 (January 24, 2023).

⁸ See 19 CFR 351.212(b)(1).

calculated for the review period.⁹ As noted above, there were no entries of subject merchandise for the companies subject to this review during the POR. Accordingly, in the absence of suspended entries of subject merchandise during the POR, we are hereby rescinding this administrative review, in its entirety, in accordance with 19 CFR 351.213(d)(3).

Assessment

Commerce will instruct CBP to assess antidumping duties on all appropriate entries of wire rod from Ukraine. Antidumping duties shall be assessed at rates equal to the cash deposit rate of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions to CBP no earlier than 35 days after the date of publication of this rescission notice in the **Federal Register**.

Administrative Protective Order (APO)

This notice also serves as the only reminder to parties subject to APO of their responsibility concerning the disposition of proprietary information disclosed under APO, in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(d)(4).

Dated: December 5, 2024.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[FR Doc. 2024–29124 Filed 12–10–24; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Environmental Policy Act; Proposed Implementing Procedures and Categorical Exclusions

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice; request for comments.

SUMMARY: Federal agencies are required to develop procedures to implement the National Environmental Policy Act (NEPA) and the Council on Environmental Quality (CEQ) regulations implementing NEPA. Consistent with these requirements, the National Institute of Standards and Technology (NIST) is proposing new NEPA implementing procedures (NEPA Procedures), including the establishment of new categorical exclusions (CEs) as part of its NEPA Procedures. CEs are categories of actions that an agency has determined normally do not have a significant effect on the human environment, individually or in the aggregate. CEs are a form of review that agencies use to comply with NEPA for proposed actions that normally have no or minimal environmental effects. NIST requests the views of the public on its draft NEPA Procedures as well as its substantiation record for the proposed CEs.

DATES: Submit written comments on or before January 10, 2025.

ADDRESSES: The draft NEPA Procedures and CE substantiation record are available for review at <https://www.nist.gov/chips/national-environmental-policy-act-nepa>. Submit all electronic public comments via email to CHIPSNEPA@chips.gov citing “NEPA Procedures” in the subject line. NIST will accept comments in attached Word or PDF formats or within the body of the email.

Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NIST. All comments received are a part of the public record; commenters should not include personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information. NIST will accept anonymous comments. The most helpful comments include a specific recommendation, explain the reason for any recommended change, and provide supporting information. NIST will consider all relevant comments received on or before the closing date.

FOR FURTHER INFORMATION CONTACT: David Frenkel, NIST, telephone number 240–204–1960, email David.Frenkel@chips.gov.

SUPPLEMENTARY INFORMATION:

Legal Framework

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires Federal agencies to consider the environmental effects of their proposed actions in their decision-

making processes and inform and engage the public in that process. Section 101(a) of NEPA sets forth a national policy to use all practicable means and measures, including financial and technical assistance, in a manner calculated to foster and promote the general welfare, to create and maintain conditions under which humans and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans. 42 U.S.C. 4331(a). Section 102 of NEPA directs agencies to interpret and administer Federal policies, regulations and laws consistent with NEPA’s policies. 42 U.S.C. 4332.

NEPA also created the Council on Environmental Quality (CEQ), which has issued regulations implementing NEPA, 40 CFR parts 1500 through 1508 (CEQ regulations). CEQ also has issued numerous guidance documents to facilitate agency implementation of NEPA. See CEQ, CEQ Guidance Documents, <https://ceq.doe.gov/guidance/guidance.html>.

To comply with NEPA, agencies determine the appropriate level of review of any major Federal action—an environmental impact statement (EIS), environmental assessment (EA), or categorical exclusion (CE). 40 CFR 1501.3. If a proposed action is likely to have significant environmental effects, the agency must prepare an EIS and document its decision in a record of decision. 40 CFR 1501.3(c)(3), part 1502, 1505.2. If the proposed action is not likely to have significant environmental effects or the effects are unknown, the agency may instead prepare an EA, which is a concise public document used to support agency decision making. 40 CFR 1501.3(c)(2), 1501.5, 1508.1(j). After completing the analysis in the EA, the agency may conclude that the action will have no significant effects and document that conclusion in a finding of no significant impact, or conclude that the action is likely to have significant effects and therefore requires preparation of an EIS. 40 CFR 1501.6(a), 1508.1(j).

Under NEPA and the CEQ regulations, a Federal agency may establish CEs—categories of actions that the agency has determined normally do not have a significant effect on the human environment, individually or in the aggregate—in its agency NEPA procedures. 42 U.S.C. 4336(e)(1); 40 CFR 1501.4(a), 1507.3(c)(8), 1508.1(e). If an agency determines that a CE established in its agency NEPA procedures covers a proposed action, it then evaluates the proposed action for

⁹ See 19 CFR 351.213(d)(3).

extraordinary circumstances, which are factors or circumstances that indicate a normally categorically excluded action may have a significant effect. 40 CFR 1501.4(b), 1508.1(o). If an extraordinary circumstance exists, the agency nevertheless may apply the CE if it conducts an analysis and determines that the proposed action does not in fact have the potential to result in significant effects notwithstanding the extraordinary circumstance, or the agency modifies the action to avoid the potential to result in significant effects. 40 CFR 1501.4(b)(1). In these cases, the agency must document such determination. *Id.* If the agency cannot categorically exclude the proposed action, it will prepare an EA or EIS, as appropriate. 40 CFR 1501.4(b)(2).

On May 1, 2024, CEQ finalized its “Bipartisan Permitting Reform Implementation Rule” to revise its regulations for implementing the procedural provisions of NEPA, including the amendments to NEPA in the Fiscal Responsibility Act. Under the revised regulations, each Federal agency must, by July 1, 2025, develop procedures to implement NEPA and the CEQ regulations, facilitate efficient decision making, and ensure that the agencies make decisions in accordance with the policies and requirements of NEPA. 40 CFR 1507.3. As part of their procedures, agencies must establish CEs and identify extraordinary circumstances. 40 CFR 1507.3(c)(8). When establishing new or revising existing CEs in agency NEPA procedures, agencies must substantiate the proposed new or revised CEs with sufficient information to conclude that each category of actions does not have a significant effect, individually or in the aggregate, on the human environment, and provide this substantiation in a written record that is made publicly available as part of the notice and comment process for developing or revising proposed agency procedures. *See* 40 CFR 1507.3(b), (c)(8). In developing NEPA procedures, agencies must consult with CEQ and provide an opportunity for public review. 40 CFR 1507.3(b)(1), (2). Before publishing final procedures, agencies must receive a determination from CEQ that the procedures conform with NEPA and the CEQ regulations. *See* 40 CFR 1507.3(b)(2).

Background

Founded in 1901, NIST’s mission is to promote U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology in ways that enhance economic security and improve our

quality of life. Historically, NIST has carried out this mission through operation of the NIST Laboratories, which conduct world-class research, often in close collaboration with industry, that advances the nation’s technology infrastructure and helps U.S. companies continually improve products and services.

In August 2022, Congress passed the CHIPS Act of 2022, which amended title XCIX of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021, 15 U.S.C. 4651 *et seq.*, also known as the Creating Helpful Incentives to Produce Semiconductors (CHIPS) for America Act. The law provides the Department of Commerce with \$50 billion for a suite of programs to strengthen and revitalize the U.S. position in semiconductor research, development, and manufacturing. The CHIPS for America program encompasses two offices within NIST responsible for implementing the law: the CHIPS Research and Development Office is investing \$11 billion into developing a robust domestic semiconductor R&D ecosystem, while the CHIPS Program Office is dedicating \$39 billion to provide incentives for investment in semiconductor facilities and equipment in the United States. NIST is uniquely positioned to successfully administer the CHIPS for America program because of the bureau’s strong relationships with U.S. industries, its deep understanding of the semiconductor ecosystem, and its reputation as fair and trustworthy.

NEPA may apply to activities conducted by NIST, including on its campuses in Gaithersburg, MD, and Boulder, CO, as well as to activities for which NIST provides financial assistance. NIST’s NEPA Procedures are intended to make the NEPA process more useful to both NIST and the public and will serve as a repository for guidance and resources to aid NIST in implementation of NEPA.

As part of its NEPA Procedures, NIST is proposing 18 new CEs and has prepared a substantiation record to support establishment of each CE. The proposed CEs are supported by long-standing CEs and substantiation records that have been developed by other Federal agencies through processes consistent with NEPA regulatory requirements and CEQ guidance on the establishment of CEs. NIST identified existing CEs established by other federal agencies that are sufficiently described in supporting substantiation records to demonstrate that the actions covered by these existing CEs are similar in nature, scope, and impact on the human

environment to actions performed by NIST. NIST also reviewed and analyzed other past actions by NIST and other federal agencies, including supporting NEPA documentation, to develop the proposed CEs. The past actions were evaluated to demonstrate that the actions that would be covered by NIST’s proposed CEs normally do not have a substantial effect on the human environment, individually or in the aggregate. For a detailed discussion of and substantiation for each proposed CE, please refer to the substantiation record available at <https://www.nist.gov/chips/national-environmental-policy-act-nepa>.

In this notice, NIST is requesting public comment on its draft NEPA Procedures, including on the 18 new CEs proposed as part of those Procedures, and on the substantiation record supporting those new CEs. To facilitate public comment, NIST is reproducing those 18 proposed CEs in this Notice. Additionally, the Building CHIPS in America Act recently established a number of CEs for use by NIST, which are also reproduced below. The Procedures include an Appendix A that lists all CEs available for use by NIST. NIST has consulted with CEQ on its proposal and is seeking input from the public.

A. Proposed New Categorical Exclusions

I. Administrative Activities

I–1. Preparation, modification, and issuance of policy directives, rules, regulations, procedures, guidelines, guidance documents, bulletins, and informational publications that are of an administrative, financial, legal, technical, or procedural nature, for which the environmental effects are too broad, speculative, or conjectural to lend themselves to meaningful analysis and will be, in whole or part, subject later to the NEPA process, either collectively or on a case-by-case basis.

I–2. Planning, educational, informational, or advisory activities provided to other agencies, public and private entities, visitors, individuals, or the public, including training exercises and simulations conducted under appropriately controlled conditions and in accordance with all applicable laws, regulations, and requirements.

I–3. Preparation and dissemination of scientific results, studies, surveys, audits, reports, plans, papers, recommendations, and technical advice.

I–4. Technical assistance to other Federal, Tribal, State, and local agencies or the public.

I–5. Contracts, collaborative research agreements, cooperative research and development agreements, interagency agreements, and other agreements that do not concern environmental matters or where the environmental effects are negligible.

II. Operations

II–1. Routine procurement, use, storage, transportation, and disposal of non-hazardous goods and services in support of administrative, operational, or maintenance activities in accordance with Executive Orders and Federal procurement guidelines. Examples include office supplies and furniture; equipment; mobile assets (*i.e.*, vehicles, vessels, aircraft); utility services; and deployable emergency response supplies and equipment.

II–2. Routine use of hazardous materials (including procurement, transportation, distribution, and storage of such materials) and reuse, recycling, and disposal of solid, medical, radiological, or hazardous waste in a manner that is consistent with all applicable laws, regulations, and requirements. Examples include use of chemicals for laboratory applications; refueling of storage tanks; temporary storage and disposal of solid waste; disposal of waste through manufacturer return and recycling programs; and hazardous waste minimization activities, including source reduction activities and recycling.

II–3. Maintenance of facilities, equipment, and grounds. Examples include interior utility work, road maintenance, window washing, lawn mowing, landscaping, weed management/maintenance, trash collecting, facility cleaning, and snow removal.

III. Facility Modernization

III–1. Internal modifications, renovations, or additions (*e.g.*, computer facilities, relocating interior walls) to structures or buildings that do not result in a change in the functional use of the property.

* III–2. Exterior renovation, addition, repair, alteration, safety and environmental improvements, and demolition projects affecting buildings, roads, grounds, equipment, and other facilities, including subsequent disposal of debris, which may be contaminated with hazardous materials, lead, or asbestos. Hazardous materials must be disposed of at approved sites in accordance with all applicable laws, regulations, and requirements. These actions do not result in a significant change in the expected useful life, design capacity, or function of the

facility and during which operations may be suspended and then resumed, and they do not include rebuilding or modifying substantial portions of a facility (such as replacing a reactor vessel). Examples include the following:

- (a) Painting, roofing, siding, or alterations to an existing building;
- (b) Adding a small storage shed to an existing building;
- (c) Retrofitting for energy and water conservation and efficiency, including weatherization, installation of timers on hot water heaters, installation of energy efficient lighting, and installation of low flow plumbing fixtures.
- (d) Closing and demolishing a building not eligible for listing under the National Register of Historic Places; or

(e) Replacement/upgrade of control valves, in-core monitoring devices, facility air filtration systems, or substation transformers or capacitors; addition of structural bracing to meet earthquake standards and/or sustain high wind loading; and replacement of aboveground or belowground tanks and related piping, provided that there is no evidence of leakage, based on testing in accordance with applicable requirements (such as 40 CFR 265, “Interim Status Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities” and 40 CFR 280, “Technical Standards and Corrective Action Requirements for Owners and Operators of Underground Storage Tanks”).

(f) Covered actions include, but are not limited to weatherization (such as insulation and replacing windows and doors); programmed lowering of thermostat settings; placement of timers on hot water heaters; installation or replacement of energy efficient lighting, low-flow plumbing fixtures (such as faucets, toilets, and showerheads), heating, ventilation, and air conditioning systems, and appliances; installation of drip-irrigation systems; improvements in generator efficiency and appliance efficiency ratings; efficiency improvements for vehicles and transportation (such as fleet changeout); power storage (such as flywheels and batteries, generally less than 10 megawatt equivalent); transportation management systems (such as traffic signal control systems, car navigation, speed cameras, and automatic plate number recognition); development of energy-efficient manufacturing, industrial, or building practices; and small-scale energy efficiency and conservation research and development and small-scale pilot projects.

* III–3. Minor improvements to existing steam plants and cooling water systems (including, but not limited to, modifications of existing cooling towers and ponds), provided that the improvements would not:

- (a) Create new sources of water or involve new receiving waters;
- (b) Have the potential to significantly alter water withdrawal rates;
- (c) Exceed the permitted temperature of discharged water; or
- (d) Increase introductions of, or involve new introductions of, hazardous substances, pollutants, contaminants, or Comprehensive Environmental Response, Compensation, and Liability Act-excluded (CERCLA) petroleum and natural gas products.

* III–4. Installation or relocation and operation of machinery and equipment (including, but not limited to, laboratory equipment, electronic hardware, manufacturing machinery, maintenance equipment, and health and safety equipment), provided that uses of the installed or relocated items are consistent with the general missions of the receiving structure. Covered actions include modifications to an existing building, within or contiguous to a previously disturbed or developed area, that are necessary for equipment installation and relocation. Such modifications would not appreciably increase the footprint or height of the existing building or have the potential to cause significant changes to the type and magnitude of environmental impacts.

IV. Real Property

* IV–1. Acquisition or use of existing facilities or portions thereof by purchase, lease, or use agreement where use or operation will remain unchanged. Examples include acquiring office space through lease, purchase, or use agreement, and acquisition of laboratory space through lease, purchase, or use agreement.

* IV–2. Decisions and actions to close facilities, decommission equipment, or temporarily discontinue use of facilities or equipment, where the facility or equipment, including office equipment, telecommunications equipment, and computer equipment, is not used to prevent or control environmental impacts.

V. Research

* V–1. Proposed new and recurring activities and operations conducted in laboratories and facilities where research practices and safeguards (including but not limited to environmental permits for operation) prevent environmental impacts, would

be consistent with previously established safety levels, and would not result in a change in use of the facility. Examples include types of research, development, testing, and evaluation activities, and laboratory operations conducted within existing facilities designed to support research and development activities. Not included in this category are demonstration actions, meaning actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.

* V–2. Outdoor research activities conducted in compliance with all applicable laws, regulations, and requirements. Examples include types of research, development, testing, and evaluation activities conducted outdoors where no new ground disturbance occurs and no sensitive resources (e.g., threatened or endangered species, archaeological sites, Tribal resources, wetlands, and waterbodies) are present, such as radar testing, radio noise measurements, and public safety communications research.

VI. Facility Construction

* VI–1. New construction or improvement of buildings or experimental equipment (e.g., trailers, prefabricated buildings, and test slabs) on previously disturbed ground, with no more than 1 acre (0.4 hectare) of ground disturbance in previously disturbed areas, where the proposed facility use is generally compatible with the surrounding land use and applicable zoning standards and will not require additional support infrastructure. Such facilities could be used for indoor small-scale research and development projects and small-scale pilot projects using nanoscale materials in accordance with applicable requirements (such as engineering, worker safety, procedural, and administrative regulations) necessary to ensure the containment of any hazardous materials.

VII. Federal Assistance

VII–1. Actions related to financial assistance administration performed at any stage during the financial assistance lifecycle, such as the development and issuance of guidance; announcements of availability of funds; project reviews for program eligibility; provision of technical assistance; conducting inspections, financial audits, and monitoring activities; development of information technology systems for financial assistance management; close-out activities; and actions taken in situations where an awardee is in non-conformance with program

requirements, such as disallowances, recoupment of funds, and debarment.

CEs labeled with an asterisk (*) require documentation in accordance with NIST's NEPA Procedures.

B. Categorical Exclusions Established by 15 U.S.C. 4652(d)(1)

Each of the following categorical exclusions was established for the National Institute of Standards and Technology with respect to a covered activity, defined as any activity relating to the construction, expansion, or modernization of a facility, the investment in which is eligible for Federal financial assistance under 15 U.S.C. 4652 or 4656, and is available for use by the Secretary:

A. Categorical exclusion 17.04.d (relating to the acquisition of machinery and equipment) in the document entitled 'EDA Program to Implement the National Environmental Policy Act of 1969 and Other Federal Environmental Mandates As Required' (Directive No. 17.02–2; effective date October 14, 1992).

- *EDA (d). Acquisition of machinery and equipment (M&E) unless these require applications for or amendments to existing air, water or solid waste permits.*

B. Categorical exclusion A9 in Appendix A to subpart D of part 1021 of title 10, Code of Federal Regulations, or any successor regulation.

- *DOE A9. Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)*

C. Categorical exclusions B1.24, B1.31, B2.5, and B5.1 in Appendix B to subpart D of part 1021 of title 10, Code of Federal Regulations, or any successor regulation.

- *DOE B1.24. Transfer, lease, disposition, or acquisition of interests in personal property (including, but not limited to, equipment and materials) or real property (including, but not limited to, permanent structures and land), provided that under reasonably foreseeable uses (1) there would be no potential for release of substances at a level, or in a form, that could pose a*

threat to public health or the environment and (2) the covered actions would not have the potential to cause a significant change in impacts from before the transfer, lease, disposition, or acquisition of interests.

- *DOE B1.31. Installation or relocation and operation of machinery and equipment (including, but not limited to, laboratory equipment, electronic hardware, manufacturing machinery, maintenance equipment, and health and safety equipment), provided that uses of the installed or relocated items are consistent with the general missions of the receiving structure. Covered actions include modifications to an existing building, within or contiguous to a previously disturbed or developed area, that are necessary for equipment installation and relocation. Such modifications would not appreciably increase the footprint or height of the existing building or have the potential to cause significant changes to the type and magnitude of environmental impacts.*

- *DOE B2.5. Safety and environmental improvements of a facility (including, but not limited to, replacement and upgrade of facility components) that do not result in a significant change in the expected useful life, design capacity, or function of the facility and during which operations may be suspended and then resumed. Improvements include, but are not limited to, replacement/upgrade of control valves, in-core monitoring devices, facility air filtration systems, or substation transformers or capacitors; addition of structural bracing to meet earthquake standards and/or sustain high wind loading; and replacement of aboveground or belowground tanks and related piping, provided that there is no evidence of leakage, based on testing in accordance with applicable requirements (such as 40 CFR part 265, "Interim Status Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities" and 40 CFR part 280, "Technical Standards and Corrective Action Requirements for Owners and Operators of Underground Storage Tanks"). These actions do not include rebuilding or modifying substantial portions of a facility (such as replacing a reactor vessel).*

- *DOE B5.1. (a) Actions to conserve energy or water, demonstrate potential energy or water conservation, and promote energy efficiency that would not have the potential to cause significant changes in the indoor or outdoor concentrations of potentially harmful substances. These actions may involve financial and technical*

assistance to individuals (such as builders, owners, consultants, manufacturers, and designers), organizations (such as utilities), and governments (such as state, local, and tribal). Covered actions include, but are not limited to weatherization (such as insulation and replacing windows and doors); programmed lowering of thermostat settings; placement of timers on hot water heaters; installation or replacement of energy efficient lighting, low-flow plumbing fixtures (such as faucets, toilets, and showerheads), heating, ventilation, and air conditioning systems, and appliances; installation of drip-irrigation systems; improvements in generator efficiency and appliance efficiency ratings; efficiency improvements for vehicles and transportation (such as fleet changeout); power storage (such as flywheels and batteries, generally less than 10 megawatt equivalent); transportation management systems (such as traffic signal control systems, car navigation, speed cameras, and automatic plate number recognition); development of energy-efficient manufacturing, industrial, or building practices; and small-scale energy efficiency and conservation research and development and small-scale pilot projects. Covered actions include building renovations or new structures, provided that they occur in a previously disturbed or developed area. Covered actions could involve commercial, residential, agricultural, academic, institutional, or industrial sectors.

D. The categorical exclusions described in paragraphs (4) and (13) of section 50.19(b) of title 24, Code of Federal Regulations, or any successor regulation.

- HUD a(4). Public services that will not have a physical impact or result in any physical changes, including but not limited to services concerned with employment, crime prevention, child care, health, drug abuse, education, counseling, energy conservation and welfare or recreational needs.

- HUD a(13). Operating costs including maintenance, security, operation, utilities, furnishings, equipment, supplies, staff training and recruitment and other incidental costs; however, in the case of equipment, compliance with § 50.4(b)(1) is required.

E. Categorical exclusion (c)(1) in Appendix B to part 651 of title 32, Code of Federal Regulations, or any successor regulation.

- Army (c)(1). Construction of an addition to an existing structure or new construction on a previously undisturbed site if the area to be disturbed has no more than 5.0

cumulative acres of new surface disturbance. This does not include construction of facilities for the transportation, distribution, use, storage, treatment, and disposal of solid waste, medical waste, and hazardous waste.

F. Categorical exclusions A2.3.8 and A2.3.14 in Appendix B to part 989 of title 32, Code of Federal Regulations, or any successor regulation.

- USAF A2.3.8. Performing interior and exterior construction within the 5-foot line of a building without changing the land use of the existing building.

- USAF A2.3.14. Installing on previously developed land, equipment that does not substantially alter land use (i.e., land use of more than one acre). This includes outgrants to private lessees for similar construction.

Extraordinary Circumstances

NIST has identified a list of extraordinary circumstances in its draft NEPA Procedures. If NIST determines that a CE is appropriate for a proposed action, NIST must also evaluate the proposed action for the presence of extraordinary circumstances. 40 CFR 1501.4(b). Extraordinary circumstances are situations for which NIST has determined that further NEPA analysis may be required because they are circumstances in which a categorically excluded action may have significant effects. The mere presence of one or more extraordinary circumstances does not preclude the use of a CE. A determination of whether an action that is categorically excluded requires additional evaluation because of extraordinary circumstances focuses on the action's potential effects and considers the significance of those effects in terms of the context (the potentially affected region, interests, and resources) and the intensity (the degree or severity of the effects) of the action. Before applying a CE, NIST must consider whether the proposed action involves one or more of the following extraordinary circumstances:

1. The action has potential to adversely affect human health or safety;

2. The action is located in or may affect an area with unique environmental characteristics, such as historic or cultural resources; park, recreation or refuge lands; wilderness areas; wild or scenic rivers; national natural landmarks; sole or principal drinking water aquifers; prime farmlands; wetlands (E.O. 11990); floodplains (E.O. 11988); national monuments; and other ecologically significant or critical areas;

3. The action may affect a species that is listed, or proposed to be listed, as

threatened or endangered under the Endangered Species Act (ESA), or is located in the habitat of such a species;

4. The action has the potential to affect properties that are listed or eligible for listing on the National Register of Historic Places;

5. The action has the potential to affect lands owned by or held in trust for a Federally recognized Tribe;

6. The action has the potential to restrict access to and ceremonial use of Indian sacred sites on Federal lands by Indian religious practitioners or significantly adversely affect the physical integrity of such sacred sites (E.O. 13007);

7. The action has the potential to have a disproportionate and adverse effect on communities with environmental justice concerns (E.O. 14096);

8. The action has the potential to violate a Federal, State, Tribal, or local law or requirement imposed for protection of the environment;

9. The action involves unresolved conflicts concerning alternative uses of available resources;

10. The action has highly uncertain and potentially significant environmental effects or involves unique or unknown environmental risks;

11. The action has the potential to establish a precedent for future action or represents a decision in principle about future actions with potentially significant environmental effects; or

12. The action has the potential for significant cumulative impacts when the proposed action is combined with other past, present and reasonably foreseeable future actions, even though the impacts of the proposed action may not be significant by themselves.

For CEs that NIST has adopted from other Federal agencies under Section 109 of NEPA, NIST will consider extraordinary circumstances in the manner described in the **Federal Register** notice announcing the adoption. This process may require considering extraordinary circumstances identified by the agency that developed the CE in that agency's NEPA implementing procedures.

If NIST determines that an extraordinary circumstance exists, NIST may nonetheless determine that a CE is appropriate for the proposed action if NIST conducts an analysis and determines that the proposed action does not in fact have the potential to result in significant effects notwithstanding the extraordinary circumstance or modifies the action to avoid the potential to result in significant effects. In such cases, NIST will document the determination and

make it publicly available on a NIST website or through other means.

Documenting the Use of a CE

Some activities, such as routine personnel actions or purchases of small amounts of supplies, may carry no risk of significant environmental effects, such that there is no benefit from preparing additional documentation when applying a CE to those activities. NIST must, however, prepare a separate document to evaluate the applicability of a CE in each of the following cases:

1. For any application of a CE designated by NIST as requiring documentation, as indicated by an asterisk in the list of proposed new CEs;
2. For any application of a CE adopted from another Federal agency under Section 109 of NEPA; and
3. For any case in which NIST determines that a CE is appropriate notwithstanding the existence of an extraordinary circumstance.

Such documentation must include the following:

- (a) a description of the proposed action;
- (b) the CE category number, title, and CE text that applies to the action;
- (c) a brief summary of the agency's rationale for determining that the proposed action is consistent with the terms of the CE, including a description of how the action complies with any limitations in the CE (e.g., surface disturbance limitations);
- (d) a brief summary of the agency's review of the extraordinary circumstances (or, where applicable, the extraordinary circumstances identified by the agency that developed a CE adopted by NIST under Section 109 of NEPA); and
- (e) where the agency has determined that one or more extraordinary circumstance exists, the rationale for the agency's determination that the proposed action does not in fact have the potential to result in significant effects notwithstanding the extraordinary circumstance, or a description of the modifications that NIST has made to the action to avoid the potential to result in significant effects.

The document may take the form of a memorandum, a completed form, or other similar document, so long as the above components are included. Before the action is implemented, NIST must sign and date the document to indicate that use of the CE is appropriate. NIST must keep the original, signed document as part of the record for the action.

Request for Comments

NIST requests comments from the public on its draft NEPA Procedures and its proposal to establish new CEs. The agency will consider input from the public and consult with CEQ for a conformity determination before finalizing its proposal.

Alicia Chambers,

NIST Executive Secretariat.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE524]

Endangered Species; File No. 28262

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; withdrawal of application.

SUMMARY: Notice is hereby given that Kori Johnsen, 1792 Harrison Avenue, Melbourne, FL 32935, has withdrawn their application for a permit to conduct research on green (*Chelonia mydas*), hawksbill (*Eretmochelys imbricata*), and Kemp's ridley (*Lepidochelys kempii*) sea turtles.

ADDRESSES: The application and related documents are available for review upon written request via email to NMFS.Pr1Comments@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Erin Markin, Ph.D., or Amy Hapeman, (301) 427–8401.

SUPPLEMENTARY INFORMATION: On September 9, 2024, notice was published in the **Federal Register** (89 FR 73069) that a request for a permit to conduct research on green, hawksbill, and Kemp's ridley sea turtles had been submitted by the above-named applicant. The applicant has withdrawn the application from further consideration.

Dated: December 5, 2024.

Julia M. Harrison,

*Chief, Permits and Conservation Division,
Office of Protected Resources, National
Marine Fisheries Service.*

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE508]

Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 88 Red Tide Topical Working Group Webinar IV for Gulf of Mexico Red Grouper.

SUMMARY: The SEDAR 88 assessment of Gulf of Mexico red grouper will consist of a series of webinars. See

SUPPLEMENTARY INFORMATION.

DATES: The SEDAR 88 Red Tide Topical Working Group Webinar IV will be held January 15, 2025, from 11 a.m. to 1 p.m., Eastern.

ADDRESSES: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; phone: (843) 571–4366; email: Julie.neer@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research

and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the webinar are as follows:

Participants will discuss red tide modeling work and provide recommendations for its use in the assessment of Gulf of Mexico red grouper.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 10 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 6, 2024.

Key Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Coastal Ocean Program Grants Proposal Application Package

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on 08/16/2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration, Commerce.

Title: Coastal Ocean Program Grants Proposal Application Package.

OMB Control Number: 0648–0384.

Form Number(s): None.

Type of Request: Revision and Extension of a current information collection.

Number of Respondents: 1,400.

Average Hours Per Response: 30 minutes each for a project summary, data management template, milestone Gantt chart and current and pending federal support; 5.5 hours for a semi-annual report; 5 hours for an annual report, 10 hours for a CRP final report, 10.5 hours for the RSP final report.

Total Annual Burden Hours: 1,912.5.

Needs and Uses: This request is for a revision and extension of a currently approved information collection. The National Oceanic and Atmospheric Administration's Coastal Ocean Program (COP) now known as the Competitive Research Program (CRP) under the National Centers for Coastal Ocean Science provides direct financial assistance through grants and cooperative agreements for research supporting the management of coastal ecosystems and the NOAA Restore Science Program. The statutory authority for COP is Public Law 102–567 sec. 201 (Coastal Ocean Program). NOAA was authorized to establish and administer the Restore Science Program,

in consultation with the U.S. Fish and Wildlife Service, by the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies (RESTORE) of the Gulf States Act of 2012 (Pub. L. 112–141, sec. 1604). Identified in the RESTORE Act as the Gulf Coast Ecosystem Restoration Science, Observation, Monitoring, and Technology Program, the Program is commonly known as the NOAA RESTORE Science Program (RSP). In addition to standard government application requirements, applicants for financial assistance are required to submit a project summary form, current and pending form and a Data Management form template for both programs. The Data Management form template is an addition to the application package. Data Management is a required element of the application package and the use of this form will reduce the public burden by providing a specific format instead of requiring each applicant to create their own format. The Key Contacts form has been removed from the collection. CRP recipients are required to file annual progress reports and a project final report using CRP formats. The RSP recipients are required to file semiannual progress reports, a final report and a Gantt chart showing project milestones using RSP formats. All of these requirements are needed for better evaluation of proposals and monitoring of awards.

Affected Public: Non-profit institutions; State, local, or Tribal government; business or other for-profit organizations.

Frequency: Annually, semi-annually, and on occasion.

Respondent's Obligation: Mandatory.

Legal Authority: The statutory authority for COP is Public Law 102–567 sec. 201 (Coastal Ocean Program). NOAA was authorized to establish and administer the Restore Science Program, in consultation with the U.S. Fish and Wildlife Service, by the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies (RESTORE) of the Gulf States Act of 2012 (Pub. L. 112–141, sec. 1604).

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by

selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0384.

Sheleen Dumas,

Departmental PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–JE–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE499]

Pacific Fishery Management Council; Public Meetings and Hearings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of reports, public meetings, and hearings.

SUMMARY: The Pacific Fishery Management Council (Pacific Council) has begun its annual preseason management process for the 2025 ocean salmon fisheries. This document announces the availability of Pacific Council documents, as well as the anticipated dates and locations of upcoming Pacific Council meetings and public hearings hosted by the Pacific Council. These documents and events comprise the Pacific Council’s complete schedule for determining the annual proposed and final modifications to ocean salmon fishery management measures. The agendas for the March and April 2025 Pacific Council meetings will be published in subsequent **Federal Register** documents prior to the actual meetings.

DATES: Written comments on the salmon management alternatives must be submitted through the Pacific Council’s e-portal (<https://pfmc.psmfc.org>) and received by the public comment deadline prior to the April 2025 Council meeting. Information will be available on the Pacific Council’s website (<http://www.pcouncil.org>) as the date for the April Council meeting approaches.

ADDRESSES: Written documents will be available upon request from the Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384, telephone: (503) 820–2280 (voice) or (503) 820–2299 (fax).

Council address: Pacific Fishery Management Council, 7700 NE

Ambassador Place, Suite 101, Portland, OR 97220.

FOR FURTHER INFORMATION CONTACT: Ms. Angela Forristall, telephone: (503) 820–2419.

SUPPLEMENTARY INFORMATION:

Tentative Schedule for Document Completion and Availability

Mid-February 2025: “Review of 2024 Ocean Salmon Fisheries, Stock Assessment and Fishery Evaluation Document for the Pacific Coast Salmon Fishery Management Plan” is scheduled to be posted on the Pacific Council website at <https://www.pcouncil.org>.

Early March 2025: “Preseason Report I—Stock Abundance Analysis and Environmental Assessment Part 1 for 2025 Ocean Salmon Fishery Regulations” is scheduled to be posted on the Pacific Council website at <https://www.pcouncil.org>.

Late March 2025: “Preseason Report II—Proposed Alternatives and Environmental Assessment Part 2 for 2025 Ocean Salmon Fishery Regulations.” The report will include a description of the adopted salmon management alternatives and a summary of their biological and economic impacts. The public hearings schedule will also be included on the inside cover of the report and will be posted on the Pacific Council website at <https://www.pcouncil.org>.

April 24, 2025: “Preseason Report III—Council-Adopted Management Measures and Environmental Assessment Part 3 for 2025 Ocean Salmon Fishery Regulations” is scheduled to be posted on the Pacific Council website at <https://www.pcouncil.org>.

May 16, 2025: Federal regulations for 2025 ocean salmon regulations are published in the **Federal Register** and implemented.

Meetings and Hearings

January 21–24, 2025: The Salmon Technical Team (STT) will meet for a public work session to draft “Review of 2024 Ocean Salmon Fisheries, Stock Assessment and Fishery Evaluation Document for the Pacific Coast Salmon Fishery Management Plan” and to consider any other estimation or methodology issues pertinent to the 2025 ocean salmon fisheries. The STT may also discuss additional topics and work as time allows, including but not limited to salmon essential fish habitat review, salmon risk tables, or administrative matters on the Pacific Council’s March and April 2025 meetings. The meeting is scheduled to be held in-person at the Pacific Council

office located at 7700 NE Ambassador Place, Suite 101, Portland, OR 97220, however an online option to allow for the STT to be briefed on ancillary items may be added to support those particular discussions. Consult the Pacific Council’s website at <https://www.pcouncil.org> as the meeting date approaches to get the most current information.

February 18–21, 2025: The STT will meet for a public work session to draft “Preseason Report I—Stock Abundance Analysis and Environmental Assessment Part 1 for 2025 Ocean Salmon Fishery Regulations” and to consider any other estimation or methodology issues pertinent to the 2025 ocean salmon fisheries. The STT may also discuss additional topics as time allows, including but not limited to those identified in the description for the January 2025 STT work session. The meeting is scheduled to be held in-person at the Pacific Council office located at 7700 NE Ambassador Place, Suite 101, Portland, OR 97220. Consult the Pacific Council’s website at <https://www.pcouncil.org> as the meeting date approaches to get the most current information.

March 24–25, 2025: Three public hearings will be held to receive comments on the proposed 2025 ocean salmon fishery management alternatives adopted by the Pacific Council. Public hearings focusing on Washington and Oregon salmon fisheries are tentatively scheduled to occur simultaneously on March 24, and the public hearing for California salmon fisheries is tentatively scheduled for March 25. Each public hearing will be state-specific and begin at 7 p.m. The Washington and California public hearings are tentatively scheduled to be held in-person and occur in Westport, Washington and Santa Rosa, CA. The Oregon public hearing is scheduled to be held on-line. Consult the Pacific Council’s website at <https://www.pcouncil.org> as the meeting date approaches to get the most current information. A summary of oral comments heard at the hearings will be provided to the Pacific Council at its April meeting.

Written comments on the salmon management alternatives must be submitted through the Pacific Council’s e-portal (<https://pfmc.psmfc.org>) and received by the public comment deadline which is tentatively scheduled for 5 p.m. April 7, 2025, and prior to the start of the April 2025 Council meeting. Verbal comments on the salmon management alternatives are accepted during the Council meeting consistent with the Council’s April 2025 agenda dates for salmon topics. Information

will be available on the Pacific Council’s website (<https://www.pcouncil.org>) as the date for the April Council meeting approaches.

Specific meeting information, including instructions on how to join the meeting and system requirements will be provided in meeting announcements on the Pacific Council’s website (see www.pcouncil.org). You may send an email to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov) or contact him at (503) 820–2412 for technical assistance.

Although non-emergency issues not contained in the STT meeting agendas may come before the STT for discussion, those issues may not be the subject of formal STT action during these meetings. STT action will be restricted to those issues specifically listed in this document and to any issues arising after publication of this document requiring emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the STT’s intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov; (503) 820–2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 6, 2024.

Rey Israel Marquez,
Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2024–29116 Filed 12–10–24; 8:45 am]

BILLING CODE 3510–22–P

ACTION: Notice; issuance of permits and permit amendments.

SUMMARY: Notice is hereby given that permits and permit amendments have been issued to the following entities under the Marine Mammal Protection Act (MMPA) and the Endangered Species Act (ESA), as applicable.

ADDRESSES: The permits and related documents are available for review upon written request via email to NMFS.Pr1Comments@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Jennifer Skidmore (Permit No. 28223), Sara Young (Permit No. 22678–01), and Amy Hapeman (Permit No. 27911); at (301) 427–8401.

SUPPLEMENTARY INFORMATION: Notices were published in the **Federal Register** on the dates listed below that requests for a permit or permit amendment had been submitted by the below-named applicants. To locate the **Federal Register** notice that announced our receipt of the application and a complete description of the activities, go to <https://www.federalregister.gov> and search on the file number provided in table 1 below.

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council (Pacific Council) will host an online meeting of the Area 2A Pacific halibut governmental

management entities that is open to the public.

DATES: The online meeting will be held Thursday, January 16, 2025, from 10 a.m. until 11:30 a.m., Pacific time, or until business for the day has been completed.

ADDRESSES: This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see www.pcouncil.org). You may send an email to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov) or contact him at (503) 820-2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220-1384.

FOR FURTHER INFORMATION CONTACT: Ms. Angela Forristall, Staff Officer, Pacific Council; telephone: (503) 820-2419.

SUPPLEMENTARY INFORMATION: The primary purpose of the online meeting is to prepare and develop recommendations for the 2025 International Pacific Halibut Commission's (IPHC) annual meeting held in Vancouver, British Columbia, Canada from January 27 through January 31, 2025. Recommendations generated from the 2A managers' meeting will be communicated to the IPHC by the Pacific Council's representatives. Attendees may also address other topics relating to Pacific halibut management.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov; (503) 820-2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 6, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[RTID 0648-XE506]

Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 87 Assessment Webinar V for Gulf of Mexico White, Pink, and Brown Shrimp.

SUMMARY: The SEDAR 87 assessment process of Gulf of Mexico white, pink, and brown shrimp will consist of a Data Workshop, a series of assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 87 Assessment Webinar V will be held Monday, January 6, 2025, from 1 p.m. to 5 p.m., eastern time.

ADDRESSES: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; phone: (843) 571-4366; email: Julie.neer@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop, (2) a series of assessment webinars, and (3) A Review Workshop. The product of the Data Workshop is a

report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the Assessment Webinar V are as follows:

Participants will review the assessment modeling work to date and provide recommendations to the analytic team.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 6, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE**National Telecommunications and Information Administration**

[Docket No. 241204–0309]

RIN 0660–XC064

Ethical Guidelines for Research Using Pervasive Data

AGENCY: National Telecommunications and Information Administration (NTIA), Department of Commerce.

ACTION: Notice, request for public comments.

SUMMARY: The National Telecommunications and Information Administration (NTIA) is seeking public input on the potential writing of ethical guidelines for the use of “pervasive data” in research. “Pervasive data” refers to data about people gathered through online services. NTIA will rely on these comments, along with stakeholder engagements, in considering whether to draft and issue non-binding guidelines to assist researchers working with pervasive data. Such guidelines, if warranted, would detail how researchers can work with pervasive data while meeting ethical expectations of research and protecting individuals’ privacy and other rights.

DATES: Interested persons are invited to submit comments on or before January 15, 2025.

ADDRESSES: All electronic public comments on this action, identified by *Regulations.gov* docket number NTIA–2024–0004, may be submitted through the Federal eRulemaking Portal at www.regulations.gov. The docket established for this request for comments can be found at www.regulations.gov, NTIA–2024–0004. Please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. All comments received are a part of the public record and will generally be posted to *Regulations.gov* without change. All personally identifiable information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Information obtained as a result of this notice may be used by the federal government for program planning on a non-attribution basis.

FOR FURTHER INFORMATION CONTACT:

Please direct questions regarding this Request for Comments to Emma Llansó, NTIA, 1401 Constitution Avenue NW, Washington, DC 20230, at ellanso@ntia.gov or 202–482–3821. Please direct

media inquiries to NTIA’s Office of Public Affairs, telephone: (202) 482–7002; email: press@ntia.gov.

SUPPLEMENTARY INFORMATION:**Overview**

The National Telecommunications and Information Administration (NTIA) is seeking input from the public on the potential writing of ethical guidelines for the use of “pervasive data” in research. “Pervasive data” refers to data about people gathered through online services.¹ Researchers have leveraged pervasive data to better understand human behavior, societal forces, public health, and the impact of the technology that surrounds us. These insights are essential for informing policy in the digital age, and researchers and organizations have called for ethical guidelines to help ensure this work is done responsibly.² Such guidelines, if warranted, would detail how independent third-party researchers³ can work with pervasive data while meeting ethical expectations of research and protecting individuals’ privacy and other rights. The goal of ethical guidelines would be to outline principles and best practices that researchers, research institutions, data intermediaries,⁴ and online service

¹ The term *pervasive data* is intended to mean data about people—user-contributed, observed, derived, or inferred—collected through online services regardless of the extent to which the data is publicly available, is aggregated, or could lead to the identification of an individual. Pervasive data may include text, images, videos, biometric information, information about a data subject’s behavior (purchases, financial standing, media consumption, search history, medical conditions, location, etc.), and other information that makes up a person’s digital footprint. *Online services* may include a wide range of information technologies throughout the technology stack/technical infrastructure, including but not limited to web-based monitoring tools, content delivery networks, blockchain technology, digital labor platforms, education technology, Internet of Things devices, connected cars, wearable devices, mobile sensors, data brokers, streaming services, search engines, online marketplaces, social media platforms, and AI systems. The term *pervasive data* is informed by research conducted under NSF Grant Award Number 1144934 (https://www.nsf.gov/awardsearch/showAward?AWD_ID=1144934).

² See e.g. Michael Zimmer, *Addressing Conceptual Gaps in Big Data Research Ethics: An Application of Contextual Integrity*, *Social Media + Society* 4, no. 2 (2018), <https://doi.org/10.1177/2056305118768300>; aline shakti franzke et al., *Internet Research: Ethical Guidelines 3.0*, *Association of Internet Researchers* (2020), <https://aoir.org/reports/ethics3.pdf>.

³ The ethics and privacy guidelines described for consideration in this Request for Comments focus on the flow of data from online service providers to independent researchers that operate outside of the online service provider and are often affiliated with an academic or non-profit institution.

⁴ The term *data intermediary* is intended to describe an independent entity that is operated specifically to facilitate data access and sharing under commercial or non-commercial agreements

providers can choose to follow when involved in research with pervasive data. Any such ethical guidelines may be a reference for research conducted solely within the United States (U.S.) or through international collaborations.

NTIA will rely on these comments, along with engagements with researchers, civil society, research institutions, industry, and other government bodies, to consider whether to draft and issue guidelines to assist researchers working with pervasive data. The ethical guidelines outlined for consideration in this Request for Comments would be non-binding and would not supersede any existing laws or regulations, or pre-empt future laws. For example, human subjects research conducted or supported by one of the U.S. government departments or agencies that have adopted the Federal Policy for the Protection of Human Subjects (‘Common Rule’)⁵ would need to adhere to any applicable regulatory requirements. Federal agencies and federal data are bound by additional laws and regulations, which these voluntary ethical guidelines would not supersede.⁶

Background

Research with pervasive data is essential in efforts to understand the impact of technology on society. For example, the Kids Online Health and Safety Task Force Report and the Surgeon General’s Youth Mental Health Advisory both emphasize that access to pervasive data, paired with privacy safeguards and ethical research guidelines, is essential to understanding technology’s impact on children.⁷

between researchers and online service providers or that evaluates and approves researcher requests for access to designated subsets of stored pervasive data. See Organisation for Economic Co-operation and Development, *Data Stewardship, Access, Sharing, and Control: A Going Digital III module synthesis report*, DSTI/CDEP(2022)6/FINAL (2023) at 37.

⁵ See Office for Human Research Protections (OHRP), *Federal Policy for the Protection of Human Subjects (‘Common Rule’)*, OHRP (June 23, 2009), <https://www.hhs.gov/ohrp/regulations-and-policy/regulations/common-rule/index.html>.

⁶ See, e.g., the Privacy Act of 1974, 5 U.S.C. 552a (1974); the Paperwork Reduction Act of 1980, 44 U.S.C. 3501–3521 (1980); the Federal Information Security Modernization Act of 2014, Public Law 113–283 (2014); the E-Government Act of 2002, 44 U.S.C. 101 (2002).

⁷ Kids Online Health and Safety Task Force, *Online Health and Safety for Children and Youth: Best Practices for Families and Guidance for Industry*, Substance Abuse and Mental Health Services Administration (July 19, 2024), <https://www.samhsa.gov/kids-online-health-safety-task-force/kohs-report-safe-internet-use>; Office of the Assistant Secretary for Health (OASH), *Surgeon General Issues New Advisory About Effects Social Media Use Has on Youth Mental Health*, OASH (May 23, 2023), <https://www.hhs.gov/about/news/>

Pervasive data is also crucial to enabling responsible research in other fast-moving technologies. For example, the National Artificial Intelligence (AI) Initiative Act of 2020, along with the CHIPS and Science Act of 2022, include landmark investments in AI research to advance the use of trustworthy AI.⁸ Such research often relies on pervasive data and should be conducted ethically.⁹

Research with pervasive data is widespread and in high demand. To better understand the impact of technology on society, researchers have developed methods for accessing pervasive data, including large-scale collection of publicly available information, entering into agreements with online service providers, and managing collections of user-contributed data.¹⁰ Policymakers in the U.S. and globally have called for providers of online services to make data available to researchers.¹¹ European regulators recently enacted the Digital Services Act, which mandates that Very Large Online Platforms share pervasive data with researchers to study systemic risks in the information environment.¹² However, the risks to the rights and welfare of individuals associated with

the use of pervasive data for research are nuanced and context-specific. This Request for Comments aims to explore these complexities and work toward more ethical practices for researchers working with pervasive data.

Discussion of research ethics has a long history, and the U.S. government has worked to shape well-recognized principles.¹³ In 1979, the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research released the Belmont Report, which outlined three principles: respect for persons, beneficence, and justice.¹⁴ These principles were the foundation of regulations implemented in 1981 by both the Department of Health and Human Services (HHS) and the Food and Drug Administration.¹⁵ Today, a version of the Common Rule, which was revised in 2017, has been adopted by 21 Federal departments and agencies.¹⁶ The regulations mandate that institutions engaged in nonexempt human subjects research supported or conducted by a Common Rule department or agency obtain institutional review board (IRB) approval before research can begin. With certain exemptions, IRBs review human subjects research according to specific criteria which are grounded in the Belmont Report's ethical principles, including a requirement for researchers to obtain informed consent from study participants unless the research is

eligible for a waiver of informed consent.¹⁷

The Common Rule sometimes applies to research conducted on pervasive data. However, as with other broad categories of research, the Common Rule does not apply to the full range of research using pervasive data and was not designed to address all societal risks associated with research using pervasive data.¹⁸ Specifically, the Common Rule applies to *human subjects research* which, in the context of online data, involves either obtaining information through an intervention or interaction with the living individual(s) about whom the research is conducted, or obtaining, using, studying, analyzing, or generating identifiable private information about the living individual(s).¹⁹ Therefore, the secondary use of only non-identifiable data in research, for example, would generally not be subject to the Common Rule's requirements, even for research that is federally supported or conducted.²⁰ Further, some research conducted with identifiable private information may meet the criteria of one or more categories of exemption from the Common Rule requirements, which

2023/05/23/surgeon-general-issues-new-advisory-about-effects-social-media-use-has-youth-mental-health.html.

¹⁰ See e.g. Jakob Ohme, et al., *Digital Trace Data Collection for Social Media Effects Research: APIs, Data Donation, and (Screen) Tracking*, Communication Methods and Measures 18, no. 2, 124–41 (April 2, 2024), <https://doi.org/10.1080/19312458.2023.2181319>; Michael W. Wagner, *Independence by Permission*, Science 381, no. 6656, 388–91 (July 28, 2023), <https://doi.org/10.1126/science.adi2430>.

¹¹ See e.g. The White House, *U.S.–EU Joint Statement of the Trade and Technology Council*, The White House (April 5, 2024), <https://www.whitehouse.gov/briefing-room/statements-releases/2024/04/05/u-s-eu-joint-statement-of-the-trade-and-technology-council-3/>; UNESCO, *Guidelines for the Governance of Digital Platforms: Safeguarding Freedom of Expression and Access to Information through a Multi-Stakeholder Approach*, UNESCO (2023), <https://unesdoc.unesco.org/ark:/48223/p0000387339>.

¹² Regulation (EU) 2022/2065 of the European Parliament and of the Council of 19 October 2022 on a Single Market for Digital Services and amending Directive 2000/31/EC (Digital Services Act), OJ L § Article 40 (2022), <http://data.europa.eu/eli/reg/2022/2065/oj/eng>.

¹³ In addition to ethical guidelines, laws regulating privacy are also relevant for researchers to consider. While the U.S. does not currently have an over-arching data protection law, sectoral laws such as the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Family Educational Rights and Privacy Act (FERPA), Children's Online Privacy Protection Act (COPPA), Electronic Communications Privacy Act (ECPA), Federal Trade Commission Act, Digital Millennium Copyright Act (DMCA) and other provisions in Title 17 of the United States Code, Title 9 of the United States Code, Title 18 of the United States Code, the 21st Century Cures Act, and other statutes may be relevant for researchers in certain contexts. Additionally, some online service providers may be under federal consent orders that affect how they can collect and share their users' data, including with researchers.

¹⁹ 45 CFR 46.102. Note that the Common Rule also includes definitions of both “private information” and “identifiable private information.” Specifically, “[p]rivate information includes information about behavior that occurs in a context in which an individual can reasonably expect that no observation or recording is taking place, and information that has been provided for specific purposes by an individual and that the individual can reasonably expect will not be made public (e.g., a medical record)” and “[i]dentifiable private information is private information for which the identity of the subject is or may readily be ascertained by the investigator or associated with the information.” Also, note that not all Common Rule signatories incorporate the Common Rule regulations into their own agency-specific regulations.

²⁰ Office for Human Research Protections (OHRP), *Human Subject Regulations Decision Charts: 2018 Requirements* (December 28, 2010), <https://www.hhs.gov/ohrp/regulations-and-policy/decision-charts-2018/index.html>.

would mean that IRB approval is not required.²¹

Recognizing the need for ethical guidelines beyond the Belmont Report and Common Rule, multiple institutions have tried to fill the gap. Starting in 2009, the Department of Homeland Security, which is a signatory to the Common Rule, engaged lawyers and computer scientists to draft a set of non-binding ethical guidelines for computer security and network measurement research. This led to the Menlo Report in 2012, which applied the Belmont Principles to network and security research and added an additional principle: respect for law and public interest.²² The Association of Internet Researchers (AoIR) has gone through several versions of ethical guidelines targeted at researchers and organizations involved in studying people in internet-related venues.²³ The American Statistical Association (ASA) has developed guidelines focused on “statistical practice”, which includes, among other things, designing data collection, processing data, and analyzing data.²⁴ The ASA guidelines also include the development and deployment of algorithms and AI models.

As technology has continued to advance, online services have developed the capacity to collect data on human behavior at massive scales.²⁵ Building on the government’s commitment to ethical research, NTIA is considering drafting ethical guidelines for research involving pervasive data, which requires considerations beyond

those enshrined in existing ethics regulations and practices.²⁶

Pervasive data can be drawn from global networks and may be analyzed by an international community of researchers. Therefore, it is increasingly important to use a global lens to address ethical issues in pervasive data. Advancements in research using pervasive data may benefit from international collaboration and agreed-upon norms for ethical research and the protection of privacy and other rights. For example, the U.S.-EU²⁷ Trade and Technology Council Working Group on Tech Platform Governance recently announced a shared commitment to advance data access for researchers and has begun discussing such principles.²⁸

Risks created by research vary throughout the lifecycle of a project, from research design to dissemination.²⁹ Users of commercial online services often do not understand or have control over how their data will be used.³⁰ Previous research has further found that researchers’ use of pervasive data for research is often not consistent with users’ expectations, even if the information involves public social

media posts.³¹ Risks to data subjects presented by research with pervasive data include reidentification of anonymous user accounts; release or inference of information that can be used to perpetuate a range of privacy and other individual-level harms, including fraud, impersonation, discrimination, reputational harms, and emotional distress; and decreased willingness to post and access information online and engage in the digital economy.³² Research using pervasive data also has the potential to generate societal and/or systemic risks beyond the individual-level risks to data subjects. These risks include the potential to undermine trust in the research ecosystem when users learn about unethical research,³³ further disadvantage historically disadvantaged groups,³⁴ cause negative impacts on the environment,³⁵ and create risks from the products of that research, such as machine learning models being used out of context.³⁶ While researchers across

the country have taken voluntary measures to consider risks to data subjects in their research with pervasive data, the U.S. does not have a recognized set of shared guidelines.³⁷

This Request for Comments considers ethical issues and risks to privacy and other rights, and mitigation strategies throughout the lifecycle of a research project, from research design, data acquisition, and access, data processing, and analysis to dissemination.³⁸ The questions recognize that the research design phase allows researchers to reflect on the potential for harm to data subjects, society, and themselves; these considerations should be revisited throughout the remaining phases of research.³⁹

Definitions

For purposes of responding to this Request for Comments, please refer to the following definitions:

The term pervasive data is intended to mean data about people—user-contributed, observed, derived, or inferred—collected through online services regardless of the extent to which the data is publicly available, is aggregated, or could lead to the identification of an individual. Pervasive data may include text, images, videos, biometric information, information about a data subject's behavior (purchases, financial standing, media consumption, search history, medical conditions, location, etc.), and

other information that makes up a person's digital footprint.⁴⁰

Online services may include a wide range of information technologies throughout the technology stack/technical infrastructure, including but not limited to web-based monitoring tools, content delivery networks, blockchain technology, digital labor platforms, education technology, Internet of Things devices, connected cars, wearable devices, mobile sensors, data brokers, streaming services, search engines, online marketplaces, social media platforms, and AI systems.⁴¹

The term *data intermediary* is intended to describe an independent entity that is operated specifically to facilitate pervasive data access and sharing under commercial or non-commercial agreements between researchers and online service providers or that evaluates and approves researcher requests for access to designated subsets of stored pervasive data.

A *data subject*, for the purposes of this Request for Comments, is an individual whose personal information is contained in the pervasive data. The individual may be a digital device user who creates the information or who sets up and manages an account, or they could be an individual whose data is captured in the user's information (e.g., a child in a parent's photo, a visitor to a home that has smart devices, an electronically-monitored employee, or a passenger in a vehicle with tracking technology). Data subjects may or may not be "human subjects" as defined in the Common Rule.

Instructions for Commenters

Through this Request for Comments, we hope to gather information on the following questions and the broader topic outlined above. These questions are not exhaustive and commenters are invited to provide input on relevant questions not asked below. Commenters are not required to respond to all questions. When responding to one or more of the questions below, commenters are requested to include a question number with each part of their response. Commenters should include a page number on each page of their submissions. Commenters are welcome to provide specific actionable proposals, frameworks, rationales, and relevant facts.

⁴⁰ This project does not include biospecimens as pervasive data.

⁴¹ For the purpose of this project, online services do not include health plans, healthcare clearinghouses, or healthcare providers as defined by the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

Questions

1. What are the potential benefits of developing national-level ethical guidelines for researchers collecting, analyzing, and sharing pervasive data?

2. What are the potential drawbacks of developing national-level ethical guidelines for researchers collecting, analyzing, and sharing pervasive data?

3. To what extent does the definition of *pervasive data* in this Request for Comments capture the appropriate scope for national ethical guidelines?

a. Are there particular types of data or other digital artifacts⁴² that should be carefully considered or included/excluded in the definition?

b. Are there pre-existing similar definitions, similar to the one provided, that should be considered?

4. What are some existing barriers to accessing pervasive data?

a. What are examples of research questions, if any, that are challenging to answer because of the barriers to accessing pervasive data?⁴³ If possible, also explain why other methodological approaches and data types are insufficient for answering those questions.

b. If those barriers were removed, what would be the potential benefits and additional risks to society and individuals, if any?

5. What data held by online services would be most valuable to the public interest if researchers were able to access it?

6. Consent and autonomy are key principles in human subjects research ethics. However, users of online services may be required to divulge certain personal information and/or have no ability to freely make decisions about its use.⁴⁴ How should researchers working with pervasive data consider consent and autonomy?

a. What, if any, would be an appropriate consent model for research

⁴² Here, the term *digital artifact* is intended to include digital information that may not immediately be recognized as *data*, regardless of whether the information satisfies any particular definition of *data*. Examples might include AI models or systems, algorithm-to-human response patterns, or digital items exchanged in a marketplace.

⁴³ See e.g. U.S.-EU Trade and Technology Council, *Commission and White House Published Workshop Report on Researcher Access to Online Platform Data and Its Role for Research on Gender-Based Violence Online | Shaping Europe's Digital Future*, European Commission (May 6, 2024), <https://digital-strategy.ec.europa.eu/en/news/commission-and-white-house-published-workshop-report-researcher-access-online-platform-data-and-its>.

with pervasive data? How and how often should consent occur?

b. Are there alternative models to traditional consent that either support autonomy or provide protections for data subjects in cases where autonomy is limited?

c. How, if at all, is user autonomy influenced by context, such as the need to use online services for school, work,⁴⁵ or socializing?

7. What ethical issues and risks to privacy and other rights, and mitigation strategies, should be considered during the research design phase?

a. Users' concerns about researcher data access vary based on contextual factors.⁴⁶ What contextual factors increase or alter the risks to data subjects in research using pervasive data?⁴⁷

b. What factors contribute to a user's expectations of privacy on an online service?⁴⁸

c. What power differences exist between researchers and data subjects, or between online service providers and data subjects, that could create unique

risks and potential for harm.⁴⁹ How should these differences be considered and mitigated during the research design phase?

d. What unique risks affect children and youth? How do these differ depending on their gender, age, developmental capabilities, and other factors?⁵⁰ How does this impact the way researchers should think about risks when using pervasive data that includes young data subjects, especially those who are not legally adults? What are best practices when working with pervasive data created by or containing information about children and youth? What is the appropriate role of parents/guardians in such research?

e. What other vulnerable communities or vulnerability risk factors warrant additional consideration when conducting research with pervasive data? Please explain.

f. How might researchers account for changes in data subject status over time (e.g., aging into an adult category; dying; transitioning gender; changing citizenship, employment, disability, or veteran status)? How should researchers consider privacy and other rights when data subjects change status?

g. When considering ethical issues and risks to privacy and other rights for data subjects, how should researchers consider differences in views across individuals, communities, ethnicities, nationalities, languages, cultures, socioeconomic status, employment status, and educational levels?

h. How can researchers best conduct research with pervasive data in a way that engages the community, users, and data subjects.⁵¹ What are the best

practices for such participatory research that uses pervasive data? What are the challenges and/or barriers to conducting participatory research? What important research questions cannot be answered using participatory mechanisms, and why?

i. What research conducted with pervasive data could pose societal-level risks beyond those to the researcher and data subject individually?⁵² How should researchers assess and mitigate societal-level risks in comparison with potential benefits during the design phase?

j. How should ethical guidelines address risks to researchers?⁵³ What risks to researchers are currently difficult for researchers to mitigate on their own?

k. How, if at all, should ethical guidelines address methodological rigor, including the strength of the underlying research design and the confidence with which conclusions can be drawn?

l. How do changes in the norms, features, policies, and use of online services impact the ability to have well-understood and accepted methods for the collection, study design, and analysis of pervasive data? How can researchers adapt to changes in online services? How can online service providers support researchers in ethical research with pervasive data?

8. What are the risks and mitigation measures related to pervasive data acquisition and access?

Platform Governance, In Proceedings of the 2018 CHI Conference on Human Factors in Computing Systems, 1–13. CHI '18. New York, NY, USA: Association for Computing Machinery (2018), <https://doi.org/10.1145/3173574.3173583>; Tom Denison & Larry Stillman, Academic and Ethical Challenges in Participatory Models of Community Research, *Information, Communication & Society* 15, no. 7, 1037–54 (2012), <https://doi.org/10.1080/1369118X.2012.656138>.

⁵² Societal-level risks may include risks to groups including historically marginalized or otherwise vulnerable communities, crowd workers (workers that label data and/or complete surveys), the environment, trust in research, national security, and others. See Anja Bechmann & Bendert Zevenbergen, *AI and Machine Learning: internet Research Ethics Guidelines, IRE 3.0 Companion 6.1*, Association of Internet Researchers, 33–49 (2020), <https://aoir.org/reports/ethics3.pdf>, at 46; Michael S. Bernstein, et al., *ESR: Ethics and Society Review of Artificial Intelligence Research*, arXiv/Stanford University (July 9, 2021), <https://doi.org/10.48550/arXiv.2106.11521>.

⁵³ Risks to researchers may include but are not limited to, legal risks, challenges associated with studying content that evokes strong emotional reactions, or personal and professional hazards from performing public research on controversial topics. See alina shakti franzke et al., *internet Research: Ethical Guidelines 3.0*, Association of Internet Researchers (2020), <https://aoir.org/reports/ethics3.pdf>, at 11; Aya Yadlin, *Understanding Researcher Risk and Safety in Qualitative Research Online*, *Digital Society* 3, no. 1, 4 (February 1, 2024), <https://doi.org/10.1007/s44206-024-00089-z>.

⁴⁵ See, e.g., Ifeoma Ajunwa, Kate Crawford & Jason Schultz, *Limitless Worker Surveillance*, 105 Calif. L. Rev. 735 (2017), <https://heinonline.org/HOL/LandingPage?handle=hein.journals/calr105&div=28&id=&page=>.

⁴⁶ See Michael Zimmer, *Addressing Conceptual Gaps in Big Data Research Ethics: An Application of Contextual Integrity*, *Social Media + Society* 4, no. 2 (2018), <https://doi.org/10.1177/2056305118768300>; Sarah Gilbert, *When Research Is the Context: Cross-Platform User Expectations for Social Media Data Reuse*, *Big Data & Society* 10, no. 1 (2023), <https://doi.org/10.1177/20539517231164108>; Kristen E. Martin, *Diminished or Just Different? A Factorial Vignette Study of Privacy as a Social Contract*, *Journal of Business Ethics* 111, no. 4, 519–39 (December 1, 2012), <https://doi.org/10.1007/s10551-012-1215-8>; Kirsten Martin & Katie Shilton, *Putting mobile application privacy in context: An empirical study of user privacy expectations for mobile devices*, *The Information Society*, 32:3, 200–216 (2016), <https://doi.org/10.1080/01972243.2016.1153012>.

⁴⁷ Considerations may include, for example, the type of online service (social media, marketplace, infrastructure), the type of data collected (comments, photos, geolocation), demographics of the data subjects as a group, the situation in which data is collected (e.g., in the workplace), online service features, values and norms on the online service, feasibility of reidentification or research topic, how research output might be used for other purposes, and the data quality and fitness for purpose. See, e.g., Russell T. Vought, Office of Management and Budget, *Memorandum re: Improving Implementation of the Information Quality Act* (April 24th, 2019), <https://www.whitehouse.gov/wp-content/uploads/2019/04/M-19-15.pdf>.

⁴⁸ Considerations may include, for example, high-profile accounts, audience settings, requirements that users log in to view content, encryption services, data sharing/linking provisions, and privacy policies. See also James M. Hudson & Amy Bruckman, "Go Away": Participant Objections to Being Studied and the Ethics of Chatroom Research. *The Information Society* 20, 2, 127–139 (April 2004), <https://doi.org/10.1080/01972240490423030>.

⁵⁰ See, e.g., Office of the Assistant Secretary for Health (OASH), *Surgeon General Issues New Advisory About Effects Social Media Use Has on Youth Mental Health*, OASH (May 23, 2023), <https://www.hhs.gov/about/news/2023/05/23/surgeon-general-issues-new-advisory-about-effects-social-media-use-has-youth-mental-health.html>.

⁵¹ See e.g. Nathan J. Matias & Merry Mou, *CivilServant: Community-Led Experiments in*

a. What are the risks to data subjects resulting from the methods used by researchers to access pervasive data? How do these risks vary based on the methods of access?⁵⁴

b. Pervasive data often includes data subjects from different places, which may involve geographical region, legal jurisdiction, or culture. What limitations are posed by research with pervasive data that only includes data subjects from one place? How can quality research and data integrity be maintained in those cases? What best practices are available to ensure that the treatment of pervasive data across places remains consistent with the privacy expectations where the data were created?

c. What are the current best practices for de-identifying, pseudonymizing, or aggregating pervasive data? What practices exist to prevent or reduce the chance of re-identification of de-identified data? Where do these techniques fall short? What research questions may require identifiable data, and why?⁵⁵

d. One common method for mitigating ethical issues and risks to privacy and other rights from sharing data is to provide controlled access.⁵⁶

i. What are the challenges and opportunities associated with provisioning pervasive data through controlled access?

ii. What criteria should be used to evaluate a request for controlled access to pervasive data?⁵⁷

iii. How can evaluation and approval procedures ensure access to pervasive data is non-discriminatory?

e. Under what conditions should data subjects be notified that their data is used for research? What are necessary and/or best practices for communicating with data subjects when their data is used for research? What barriers exist to notifying data subjects?⁵⁸

i. When should informed consent be obtained from users or data subjects? What should be the differences between informed consent obtained for a specific project versus for commercial or general secondary use (e.g., “broad consent”)? What are the barriers to obtaining informed consent from users and data subjects?

ii. What practices exist to support autonomy of data subjects in ways that may differ from standard concepts of informed consent?

iii. What are the best ways to communicate with users and data subjects when their data is used for research?

9. What are the risks and mitigation measures that arise when processing and analyzing pervasive data?⁵⁹

sharing.nih.gov/data-management-and-sharing-policy/protecting-participant-privacy-when-sharing-scientific-data/designating-scientific-data-for-controlled-access; The National Secure Data Service Demonstration, <https://ncses.nsf.gov/initiatives/national-secure-data-service-demo>; The Standard Application Process, <https://ncses.nsf.gov/initiatives/standard-application-process>.

⁵⁷ Considerations might include, for example, the researcher (e.g., affiliation), the research project (e.g., research design, data security), the type of data (e.g., identifiability, publicness, source, level of sensitivity, or information modality) or other factors.

⁵⁸ See National Institutes of Health, *Informed Consent for Research Using Digital Health Technologies*, 2024, https://osp.od.nih.gov/wp-content/uploads/2024/05/DigitalHealthResource_Final.pdf; Nathan J. Matais & Merry Mou, *CivilServant: Community-Led Experiments in Platform Governance*, In Proceedings of the 2018 CHI Conference on Human Factors in Computing Systems, 1–13. CHI ’18. New York, NY, USA: Association for Computing Machinery (2018), <https://doi.org/10.1145/3173574.3173583>; Casey Fiesler & Nicholas Proferes, *Participant’ Perceptions of Twitter Research Ethics*, *Social Media & Society* 4, no. 1 (2018), <https://doi.org/10.1177/2056305118763366>.

⁵⁹ Considerations may include assumptions made about the data, methodological flaws, misapplication of AI/ML systems, or statistical techniques used to analyze data. See e.g., Anja Bechmann & Bendert Zevenbergen, *AI and Machine Learning: internet Research Ethics Guidelines, IRE 3.0 Companion 6.1*, Association of internet Researchers, 33–49 (2020), <https://aoir.org/reports/ethics3.pdf>; See also Zeynep Tufekci, *Big Questions*

a. Researchers will sometimes combine pervasive data with other pervasive data or with non-pervasive data from other sources. How might this impact risks? What best practices exist to mitigate these risks?

10. What are the risks to privacy and other rights related to the dissemination and archiving of research outputs? What mitigation measures exist?

a. What steps should researchers take to protect data subjects or against societal-level harms prior to the dissemination of research outputs (publications, presentation slides, data visualization, datasets, AI/ML models, etc.)?⁶⁰

b. Under what circumstances is it appropriate for an online service provider or data intermediary to have access to or review third-party research papers before they are submitted for publication? Are there circumstances where pre-publication review is inappropriate?⁶¹

c. Reproducibility can help promote trust in research.⁶² What factors do/should researchers consider when deciding when/how to delete, store, share, or archive pervasive data?⁶³

11. What existing ethical frameworks, such as those from professional organizations⁶⁴ or government agencies,⁶⁵ should be considered when drafting national-level ethical guidelines for research with pervasive data?

a. To what extent do existing frameworks apply to the collection and use of pervasive data?

b. What modifications of existing frameworks might be necessary to ensure that those frameworks are applicable to the needs of research with pervasive data?

12. What are the existing requirements and legal obligations that impact research with pervasive data?

a. What are the risks around research that uses pervasive data, if any, that currently fall beyond the usual considerations of IRBs operating under the Common Rule or FDA regulations?

b. What steps can be taken to ensure that potential new guidelines for research with pervasive data complement the existing regulatory framework for human subjects research?

c. How can research ethics guidelines be either integrated into existing workflows (such as IRB review processes) or given new workflows to ensure research is performed ethically and in a manner that protects individual privacy and other rights?⁶⁶

d. To what extent do state laws, federal laws, or other legal obligations⁶⁷ create uncertainties, barriers, or appropriate protections for:

i. Online service providers to voluntarily share pervasive data with researchers?

ii. Data intermediaries' ability to store and provide access to pervasive data?

iii. Researchers' ability to collect and analyze pervasive data?

e. How are researchers constrained by provisions in online service's terms of service, such as online services' general end-user agreements or the terms associated with APIs and other researcher access programs?⁶⁸

f. Pervasive data can include data subjects that reside outside of the U.S. and are therefore subject to different laws.⁶⁹ In what ways do international and foreign laws create uncertainties or barriers for:

i. Online service providers to voluntarily share pervasive data with researchers?

ii. Data intermediaries' ability to store and provision access to pervasive data?

iii. Researchers' ability to collect and analyze pervasive data?

13. What structured processes (questionnaires, rubrics, assessment frameworks) could be used to determine which techniques should be used to mitigate risks to data subjects and society in research that relies on pervasive data?⁷⁰

⁶⁸ See U.S.-EU Trade and Technology Council, *Status Report: Mechanisms for Researcher Access to Online Platform Data | Shaping Europe's Digital Future*, Section 1.5.2 (April 5, 2024) <https://digital-strategy.ec.europa.eu/en/library/status-report-mechanisms-researcher-access-online-platform-data> at Section 1.5. See also Casey Fiesler, et al., *No Robots, Spiders, or Scrapers: Legal and Ethical Regulation of Data Collection Methods in Social Media Terms of Service*, Proceedings of the International AAAI Conference on Web and Social Media 14, 187–96 (May 26, 2020), <https://doi.org/10.1609/icwsm.v14i1.7290>. See also Emil Chiauzzi, & Paul Wicks, *Digital Trespass: Ethical and Terms-of-Use Violations by Researchers Accessing Data From an Online Patient Community*, Journal of Medical Internet Research 21, no. 2 (February 21, 2019), <https://doi.org/10.2196/11985>.

⁶⁹ See Office for Human Research Protections (OHRP), *Attachment B—European Union's General Data Protection Regulations* (March 13, 2018), <https://www.hhs.gov/ohrp/sac/rp-committee/recommendations/attachment-b-implementation-of-the-european-unions-general-data-protection-regulation-and-its-impact-on-human-subjects-research/index.html>.

⁷⁰ See, for example, the following examples of frameworks, questionnaires, rubrics, and assessment tools to help researchers reason through ethical principles and select best practices: Michael S. Bernstein, et al., *ESR: Ethics and Society Review of Artificial Intelligence Research*, arXiv/Stanford University (July 9, 2021), <https://doi.org/10.48550/arXiv.2106.11521>; Katie Shilton et al., *PERVADE Decision Support Tool—PERVADE*, University of Maryland (April 10, 2024), <https://pervade.umd.edu/2024/04/pervade-decision-support-tool/>; European Digital Media Observatory, *EDMO Releases Report on Researcher Access to Platform Data*, 76 (May 31, 2022), <https://edmo.eu/2022/05/31/edmo-releases-report-on-researcher-access-to-platform-data/>; Annette N Markham et al., *Ethics as Methods: Doing Ethics in the Era of Big Data Research—Introduction*, Social Media + Society 4, no. 3 (2018), <https://doi.org/10.1177/2056305118784502>; Lorrie Cranor et al., *Conference Submission and Review Policies to Foster Responsible Computing Research*, Washington, DC Computing Research Association (2024) <https://cra.org/wp-content/uploads/2024/07/Report-Conference-Submission-and-Review-Policies.pdf>.

14. How should ethical guidelines take into account future technological advances around research with pervasive data?

Dated: December 5, 2024.

Stephanie Weiner,
Chief Counsel, National Telecommunications and Information Administration.

BILLING CODE 3510–60–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL25–14–000]

Idaho Power Company; Notice of Institution of Section 206 Proceeding and Refund Effective Date

On December 5, 2024, the Commission issued an order in Docket No. EL25–14–000, pursuant to section 206 of the Federal Power Act (FPA), 16 U.S.C. 824e, instituting an investigation to determine whether Idaho Power Company's Rate Schedule is unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. *Idaho Power Company*, 189 FERC ¶ 61,172 (2024).

The refund effective date in Docket No. EL25–14–000, established pursuant to section 206(b) of the FPA, will be the date of publication of this notice in the **Federal Register**.

Any interested person desiring to be heard in Docket No. EL25–14–000 must file a notice of intervention or motion to intervene, as appropriate, with the Federal Energy Regulatory Commission, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214 (2023), within 21 days of the date of issuance of the order.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<https://www.ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. From FERC's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access

cra.org/wp-content/uploads/2024/07/Report-Conference-Submission-and-Review-Policies.pdf.

reshared or used, including whether data can be used for commercial purposes.

⁶⁶ See e.g. Jessica Pater, et al., *No Humans Here: Ethical Speculation on Public Data, Unintended Consequences, and the Limits of Institutional Review*, Proc. ACM Hum.-Comput. Interact. 6, no. GROUP 38, 1–13 (January 14, 2022), <https://doi.org/10.1145/3492857>.

⁶⁷ In addition to the laws referenced in the Background, laws such as the Confidential Information Protection and Statistical Efficiency Act and Title 13 of the U.S. Code also set requirements for interactions with data.

this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field. User assistance is available for eLibrary and the FERC's website during normal business hours from FERC Online Support at 202-502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFile" link at <https://www.ferc.gov>. In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Dated: December 5, 2024.

Carlos D. Clay,

Acting Deputy Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: RP25-268-000.

Applicants: Crux1, LLC, HEDV Gala, LLC.

Description: Joint Petition for Limited Waiver of Capacity Release Regulations, et al. of CRUX1, LLC, et al.

Filed Date: 12/5/24.

Accession Number: 20241205-5058.

Comment Date: 5 p.m. ET 12/17/24.

Docket Numbers: RP25-269-000.

Applicants: LA Storage, LLC.

Description: Tariff Amendment: LA Storage Tariff Cancellation Filing to be effective 1/1/2025.

Filed Date: 12/5/24.

Accession Number: 20241205-5082.

Comment Date: 5 p.m. ET 12/17/24.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Dated: December 5, 2024.

Carlos D. Clay,

Acting Deputy Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 4113-067]

Oswego Hydro Partners, LP; Notice of Application Accepted for Filing and Soliciting Motions To Intervene and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 4113-067.

c. *Date Filed:* February 27, 2024.

d. *Applicant:* Oswego Hydro Partners, LP.

e. *Name of Project:* Phoenix Hydroelectric Project (project).

f. *Location:* On the Oswego, Oneida, and Seneca Rivers in Onondaga and Oswego counties, New York.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Jody Smet, Vice President Regulatory Affairs, Eagle Creek Renewable Energy, LLC, 7315 Wisconsin Avenue, Suite 1100W, Bethesda, MD 20814; telephone at (240) 482-2700; email at Jody.smet@eaglecreekre.com.

i. *FERC Contact:* Joshua Dub, Project Coordinator, Great Lakes Branch, Division of Hydropower Licensing; telephone at (202) 502-8138; email at Joshua.Dub@ferc.gov.

j. *Deadline for filing motions to intervene and protests:* February 3, 2025.

The Commission strongly encourages electronic filing. Please file motions to intervene and protests using the Commission's eFiling system at <https://ferconline.ferc.gov/FEROnline.aspx>. For assistance, please contact FERC Online Support at FEROnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All filings must clearly identify the project name and docket number on the first page: Phoenix Hydroelectric Project (P-4113-067).

The Commission's Rules of Practice and Procedure require all intervenors

filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted, but is not ready for environmental analysis at this time.

l. *Project Description:* The project consists of a 981-foot-long concrete dam, known as the Phoenix Dam, that includes: (1) an approximately 90-foot-long, 55-foot-wide powerhouse that is integral with the dam and includes: (a) north and south intake openings with a trashrack with 1-inch clear bar spacing; and (b) two 1.59-megawatt (MW) vertical Kaplan turbine-generator units, for a total installed capacity of 3.18 MW; (2) a 25-foot-long section that includes a 10-foot-long debris sluice gate and a 7-foot-long sluice gate; (3) a 163-foot-long ogee spillway with 1-foot-high flashboards that have a crest elevation of 362.42 feet North American Vertical Datum of 1988 (NAVD 88); (4) an approximately 206-foot-long section with four 46.5-foot-long Tainter gates; (5) a 390-foot-long ogee spillway with 1-foot-high flashboards that have a crest elevation of 362.42 feet NAVD 88; and (6) a 107-foot-long section with two 41.5-foot-long Tainter gates.

The 107-foot-long Tainter gate section of Phoenix Dam abuts Lock Island, which is a non-project feature that spans approximately 150 feet of the Oswego River. In addition, a non-project lock, known as the Phoenix Lock, spans approximately 45 feet of the Oswego River between Lock Island and the east shoreline of the Oswego River. Together, the Phoenix Dam, Lock Island, and Phoenix Lock create an impoundment that has a surface area of approximately 1,400 acres at 362.42 feet NAVD 88.

From the impoundment, water flows through the trashrack to a forebay, and then through the powerhouse. Water is discharged from the turbines to an approximately 120-foot-long tailrace that discharges to the Oswego River.

The project includes a trap and transport facility for the upstream passage of American eel, including an eel ramp and eel collection box located approximately 160 feet downstream of the project dam on the west shoreline of the Oswego River. The project also includes a downstream fishway that consists of the 7-foot-long sluice gate and a 4.8-foot-deep concrete plunge pool. Additionally, the project includes an aluminum walkway that provides

access to the 206-foot-long Tainter gate section of the dam.

The project generators are connected to the regional electric grid by a 4.16/34.5-kilovolt (kV) step-up transformer and a 230-foot-long, 34.5-kV underground transmission line. The minimum and maximum hydraulic capacities of the powerhouse are 500 and 4,580 cubic feet per second (cfs), respectively. The average annual energy production of the project was 10,518 megawatt-hours from 2016 through 2023.

The current license requires Oswego Hydro to operate the project in a run-of-river mode and maintain a maximum impoundment surface elevation of 362.42 feet NAVD88. Oswego Hydro currently maintains the surface elevation of the impoundment between 361.92 feet and 362.42 feet NAVD 88. The current license also requires Oswego Hydro to: (1) release a year-round minimum flow of 300 cfs or inflow, whichever is less, to the Oswego River downstream of the project; and (2) when inflow is less than 1,900 cfs from June 1 through October 31, monitor water quality and, if average tailwater dissolved oxygen drops below 5 milligrams per liter, provide mitigative flow releases for the protection of downstream water quality. Oswego Hydro provides upstream eel passage from June through October, using the trap and transport facility, and provides downstream fish passage year-round using the downstream fishway.

Oswego Hydro proposes to continue operating the project in a run-of-river mode and maintaining the surface elevation of the impoundment at 361.92 to 362.42 feet NAVD 88. Oswego Hydro proposes to continue releasing a year-round minimum flow of 300 cfs or inflow, whichever is less, to the Oswego River downstream of the project, but does not propose to continue water quality monitoring and mitigative flow releases when inflow is less than 1,900 cfs from June 1 through October 31. In addition, Oswego Hydro proposes to continue operating and maintaining the trap and transport facility and the downstream fishway for eel and fish passage. Oswego Hydro proposes to develop a fish passage operation and maintenance plan, implement a Bat and Bald Eagle Protection Plan that it filed in the application, and maintain an existing interpretative display and fencing for the protection of historic properties.

m. A copy of the application can be viewed on the Commission's website at <https://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in

the docket number field to access the document. For assistance, contact FERC Online Support. A copy is also available for inspection and reproduction at the Phoenix Public Library, 34 Elm Street, Phoenix, New York.

You may also register online at <https://ferconline.ferc.gov/FERCOnline.aspx> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

n. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

o. Anyone may submit a protest or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, 385.211, and 385.214. In determining the appropriate action to take, the Commission will consider all protests filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any protests or motions to intervene must be received on or before the specified deadline date for the particular application.

All filings must (1) bear in all capital letters the title "PROTEST" or "MOTION TO INTERVENE;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and email address of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application.

Dated: December 5, 2024.

Carlos D. Clay,

Acting Deputy Secretary.

Accession Number: 20241205–5160.
Comment Date: 5 p.m. ET 12/26/24.
Take notice that the Commission received the following electric securities filings:
Docket Numbers: ES25–17–000.
Applicants: Trans-Allegheny Interstate Line Company.
Description: Application Under Section 204 of the Federal Power Act for Authorization to Issue Securities of Trans-Allegheny Interstate Line Company.
Filed Date: 12/4/24.
Accession Number: 20241204–5281.

Comment Date: 5 p.m. ET 12/26/24.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Dated: December 5, 2024.

Carlos D. Clay,

Acting Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2290-130]

Southern California Edison Company; Notice of Application Tendered for Filing With the Commission and Establishing Procedural Schedule for Licensing and Deadline for Submission of Final Amendments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 2290-130.

c. *Date Filed:* November 22, 2024.

d. *Applicant:* Southern California Edison Company (SCE).

e. *Name of Project:* Kern River No. 3 Hydroelectric Project (KR3 Project).

f. *Location:* On the North Fork Kern River and on Salmon Creek and Corral Creek near the town of Kernville in Kern and Tulare Counties, California.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Stephanie Fincher-DeMillo, Project Manager, Southern California Edison Company, 54170 Mtn Spruce Road, Big Creek, California 93605; (262) 302-0945; stephanie.fincher@sce.com.

i. *FERC Contact:* Quinn Emmering, Project Coordinator; (202) 502-6382 or quinn.emmering@ferc.gov.

j. The application is not ready for environmental analysis at this time.

k. *Project Description:* The KR3 Project is operated as a run-of-river facility to generate power and has no water storage. Project facilities are primarily located on federal land in the Sequoia National Forest and consist of: (1) the project's main diversion, Fairview Dam, located on the North Fork Kern River (NFKR) at river mile 18.6, which is a 26-foot-high mass concrete overflow gravity structure with a 206-foot-long, 6.5-foot-wide overflow crest at 3,632 feet above mean sea level that also serves as the spillway with a capacity of about 15,000 cubic feet per second (cfs) with 8 feet of head; (2) two non-operational fish ladders located adjacent to the west abutment of the dam; (3) two 19-foot by 8-foot fish-release slide gates each with a capacity of 300 cfs located near the east abutment of the dam passing minimum instream flow releases to the 16-mile-long NFKR bypassed reach; (4) an 85-foot-long, 19-foot-wide rectangular reinforced concrete intake structure and trash rack with 2-inch spacing on the east abutment of the dam diverting water from the NFKR; (5) a 61-foot-long, 5-foot-high mass concrete diversion structure on Salmon Creek located about 0.4 miles upstream of its confluence with the NFKR, which includes two drain gates directing water to the creek and a third gate conveying water to a diversion pipe; (6) a 226-foot-long, 26-inch-diameter steel pipe delivering water to the project's conveyance system; (7) a 43-foot-long, 8-foot-high mass concrete diversion structure on Corral Creek located about 1.1 miles upstream of its confluence with the NFKR, which includes a 17-foot-wide spillway notch on top; an 8-inch slide gate to pass natural flows downstream when not diverting; and a pipe with interchangeable fixed-orifice plates to deliver water for minimum instream

flows and to the diversion pipe; (8) a 904-foot-long, 14-inch- and 11-inch-diameter steel pipe delivering water to the project's conveyance system; (9) two flowline intake gates conveying water to an approximately 13-mile-long, 620-cfs capacity water conveyance system located along the eastern hillslope above the NFKR that is comprised of: (a) a 449-foot-long sandbox to trap sediment before water is directed to the flowline; (b) a buried flowline consisting of 24, 8-foot-high, 8.5- to 9.5-foot-wide concrete-lined tunnel segments totaling 60,270 feet long; (c) 4,600 feet of 8.5-foot-high, 8.25-foot-wide, above-ground concrete flumes between each tunnel segment; (d) the Cannell Creek siphon and spillway consisting of a 1,146-foot-long, steel pipe and a 515-foot-long spillway conveying excess water in the flowline to Cannell Creek during unplanned outages or paused generation; (e) a 1,100-foot-long, 9.5-foot-diameter concrete pressure flume pipe; (f) two 24-inch slide gates between the flume and forebay controlling flow to the penstocks; (g) a 61-foot-long, 20-foot-wide, 30-foot-high concrete box forebay with a 2,700-foot-long spillway to the NFKR; and (h) two 2,500-foot-long steel penstocks extending from the forebay to the powerhouse; (10) an 130-foot-long, 88-foot-wide concrete powerhouse containing two Francis reaction-type turbines and two generator units with installed capacities of 20.5 and 19.7 megawatts; (7) a 90-foot-long, 20-foot-wide concrete wing wall attached to the powerhouse serving as a tailrace that discharges all diverted water to the NFKR; (11) two communication lines totaling 2.5 miles long; (12) 33 project roads totaling about 18.4 miles; (13) an approximately 3.4-acre recreation facility downstream of the powerhouse with parking and a boat launch; and (14) appurtenant facilities. The estimated average annual generation (1997-2023) is 118,497 megawatt-hours.

SCE proposes to continue operating the KR3 Project in run-of-river mode with minor adjustments to the FERC project boundary and operation and maintenance activities in response to implementing proposed environmental measures. No new project facilities are proposed.

l. In addition to publishing this notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this notice, as well as other documents in the proceeding (e.g., license application) via the internet through the Commission's Home Page (<http://www.ferc.gov>), using the "eLibrary" link. Enter the docket number, excluding the last three digits

in the docket number field to access the document (P–2290). For assistance, contact FERC at FERCOnlineSupport@ferc.gov, (866) 208–3676 (toll free), or (202) 502–8659 (TTY). You may also register online at <https://ferconline.ferc.gov/FEROnline.aspx> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

m. The Commission’s Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595, or OPP@ferc.gov.

n. *Procedural Schedule*: The application will be processed according to the following preliminary schedule. Revisions to the schedule will be made as appropriate.

Deficiency Letter (if necessary)

December 2024

Additional Information Request (if necessary) January 2025

Notice of Acceptance April 2025

Issue Notice of Ready for Environmental Analysis April 2025

o. Final amendments to the application must be filed with the Commission no later than 30 days from the issuance date of the notice of ready for environmental analysis.

Dated: December 5, 2024.

Carlos D. Clay,

Acting Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 4113–067]

Oswego Hydro Partners, LP; Notice of Revised Procedural Schedule

This notice revises the Federal Energy Regulatory Commission’s (Commission) schedule for processing the relicense application for the Phoenix Hydroelectric Project No. 4113, which was filed by Oswego Hydro Partners, LP (Oswego Hydro) on February 27, 2024. On July 8, 2024, Commission staff issued Scoping Document 1 (SD1),

which included an initial processing schedule with an issuance date of September 2024, for a public notice indicating that the application is ready for environmental analysis.

On August 7, 2024, Oswego Hydro notified the Commission that it is actively engaged in settlement negotiations on potential protection, mitigation, and enhancement measures at the project. On September 6, 2024, Oswego Hydro filed a letter stating that settlement discussions with the New York State Department of Environmental Conservation and the U.S. Fish and Wildlife Service have been productive and the parties are making progress towards formalizing terms and conditions that would resolve operational and environmental issues raised by the parties. Oswego Hydro anticipated filing a Settlement Agreement with the Commission by the end of 2024. On December 2, 2024, Oswego Hydro filed an update on the settlement negotiations, stating that fish passage discussions have been productive and that it now expects to file a Settlement Agreement in the first quarter of 2025.

To provide additional time for the parties to conduct settlement negotiations, the application will be processed according to the following revised schedule.

Milestone	Target date
Notice of Ready for Environmental Analysis.	May 2025.
Comments, Recommendations, and Agency Terms and Conditions/Prescriptions.	June 2025.

If a schedule change becomes necessary, an additional notice will be provided so that interested parties and government agencies are kept informed of the project’s progress.

Dated: December 5, 2024.

Carlos D. Clay,

Acting Deputy Secretary.

[FR Doc. 2024–29097 Filed 12–10–24; 8:45 am]

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2020–0262; FRL–12436–01–OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Reporting and Recordkeeping for Asbestos Abatement Worker Protection (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Reporting and Recordkeeping for Asbestos Worker Protection, (EPA ICR Number 1246.15, OMB Control Number 2070–0072) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through January 31, 2025. Public comments were previously requested via the **Federal Register** on April 23, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before January 10, 2025.

ADDRESSES: Submit your comments, referencing Docket ID number EPA–HQ–OPPT–2020–0262, to EPA online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA’s policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Katherine Sleasman, Office of Program Support (7602M), Office of Chemical Safety and Pollution Prevention,

Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 566-1204; email address:

Sleasman.katherine@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through January 31, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on April 23, 2024, during a 60-day comment period (89 FR 30358). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: This ICR covers reporting and recordkeeping requirements associated with EPA's workplace standards for the protection of state and local government employees who work with asbestos and who are not covered by a state plan approved by the Occupational Safety and Health Administration. Currently, some 23 states and state equivalent territories have reporting and recordkeeping requirements under the Toxic Substances Control Act, Section 8, documenting worker protection actions for state and local government employees involved in asbestos work. EPA's asbestos work protection regulations incorporate, by reference, the OSHA Construction Industry Standard for Asbestos, and the General Industry Standard for Asbestos. EPA does not collect any information under this collection. All information subject to this collection request is to be gathered and maintained by the employer.

Form number(s): None.

Respondents/affected entities: Public Administration, Educational Services. North American Industrial Classification System (NAICS) codes identified in question 12 of the ICR.

Respondent's obligation to respond: Mandatory. (15 U.S.C 2605, 2607(a)).

Estimated number of respondents: 34,138 (total).

Frequency of response: On occasion.

Total estimated burden: 358,049 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$21,175,968 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is a decrease of 14,920 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This change, which is discussed in more detail in the ICR, reflects a decrease in the number of states subject to the rule. This change is an adjustment.

Courtney Kerwin,

Director, Information Engagement Division.

[FR Doc. 2024-29065 Filed 12-10-24; 8:45 am]

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2024-0423; FRL-12291-01-OAR]

Information Collection Request Number 2265.04; Proposed Information Collection Request; Comment Request; Information Collection Activities Associated With the SmartWay Transport Partnership

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) is planning to submit an information collection request (ICR), "Information Collection Activities Associated with the SmartWay Transport Partnership" (EPA ICR No. 2265.04, OMB Control No. 2060-0663) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through March 25, 2025. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before February 10, 2025.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA-HQ-OAR-2024-0423 online using www.regulations.gov (our preferred method), by email to smartway_transport@epa.gov, or by mail to: EPA Docket Center, Environmental

Protection Agency, Mail Code 28221 T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Erik Herzog, U.S. Environmental Protection Agency, 2000 Traverwood Drive, S-72, Ann Arbor, MI 48105; telephone number: 734-214-4487; Fax: 734-214-4906; email address: herzog.erik@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <https://www.epa.gov/dockets>.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** document to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The EPA's Office of Air and Radiation (OAR) developed the SmartWay Transport Partnership ("SmartWay") under directives outlined

in Subtitle D of the Energy Policy Act of 2005 which calls on EPA to assess the energy and air quality impacts of activities within the freight industry. These activities include long-duration truck idling, the development and promotion of strategies for reducing idling, fuel consumption, and negative air quality effects. SmartWay's objectives also are consistent with the Clean Air Act, the Federal Technology Transfer Act and other laws that authorize and support research, training and air pollutant control activities.

SmartWay is open to organizations that own, operate, or contract with fleet operations, including truck, rail, barge, air and multi-modal carriers, logistics companies, and shippers. Organizations that do not operate fleets, but that are working to strengthen the freight industry, such as industry trade associations, state and local transportation agencies and environmental groups, also may join as SmartWay affiliates. All organizations that join SmartWay are asked to provide EPA with information as part of their SmartWay registration to annually benchmark their transportation-related operations and improve the environmental performance of their freight activities.

A company joins SmartWay when it completes and submits a SmartWay Annual Reporting tool to EPA. The company submits an updated reporting tool annually thereafter. Truck carriers with fewer than 20 trucks may submit their annual updates through the On-Line Truck Tool Short Form, rather than the full On-Line Truck Tool version. The data outputs from the submitted tool are used by partners and SmartWay in several ways. First, the data provides confirmation that SmartWay partners are meeting established objectives in their Partnership Agreement. The reporting tool outputs enable EPA to provide partners with environmental performance information to assist them in incorporating freight efficiency in their goods movement decisions. Additionally, the data allows EPA to empower SmartWay partners, as appropriate, by providing them with environmental strategies and technology information that improve their efficiency. This information also improves EPA's knowledge and understanding of the environmental and energy impacts associated with goods movement, and the effectiveness of both proven and emerging strategies to lessen those impacts.

In addition to requesting annual freight transportation-related data, EPA may ask its SmartWay partners for other kinds of information which could

include opinions and test data on the effectiveness of new and emerging technology applications, sales volumes associated with SmartWay-recommended vehicle equipment and technologies, the reach and value of partnering with EPA through the SmartWay Partnership, and awareness of the SmartWay brand. In some instances, EPA might query other freight industry representatives (not just SmartWay partners), including trade and professional associations, nonprofit environmental groups, energy and community organizations, and universities, and a small sampling of the general public.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action include private and public organizations that join the SmartWay Transport Partnership; freight industry representatives who engage in activities related to the SmartWay Partnership; and representative samplings of consumers in the general public. These entities may be affected by EPA efforts to assess the effectiveness and value of the SmartWay program, awareness of the SmartWay brand, and ideas for developing and improving SmartWay.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 4,770.

Frequency of response: The information collections described in the ICR must be completed in order for an organization to register as or continue its status as a SmartWay partner, to become a SmartWay affiliate, to use the SmartWay logo on an EPA-designated tractor or trailer, or to be considered for a SmartWay Excellence Award.

Total estimated burden: The annual burden for this collection of information that all respondent partners and affiliates incur is estimated to average 8,879 hours with a projected annual aggregate cost of \$732,210. The annual burden for this collection of information that federal agency respondents incur is estimated to average 4,578 hours with a projected annual aggregate cost of \$122,602.

This ICR estimates that approximately 5,844 respondent partners will incur burden associated with SmartWay in the first year, with a growth of 330 partners per year projected into the future. The estimated average burden time per respondent is 1.52 hours annually. This is an average across all Smart Way partners, regardless of whether they are affiliates, shippers, carriers or logistics companies. The average also includes 150 consumer and industry respondents, who spend far less time,

providing the SmartWay program with basic information on their awareness of the program. Among respondent partners the burden hours are typically higher for larger companies with complex fleets, than for smaller companies.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Total estimated cost: The total annual cost to all respondent partners is \$732,210. The total annual cost to federal agency respondents is \$122,602.

Changes in estimates: There is a decrease of 3,678 hours and \$129,672 in the total estimated respondent partner burden compared with the ICR currently approved by OMB. This decrease reflects the following adjustments and program changes:

(1) Implementation of a new On-Line Truck Tools for the majority of partners.

(2) The reduction of the number of annual Affiliate Applications.

There is also a decrease of 110 hours and \$48,228 in the total estimated agency burden currently approved by OMB. This decrease is due to the following:

(1) Implementation of a new On-Line Truck Tools for the majority of partners.

(2) The reduction of the number of annual Affiliate Applications.

Karl Simon,

Director, Transportation and Climate Division, Office of Transportation and Air Quality.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NSPS for Petroleum Refineries (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NSPS for Petroleum Refineries (EPA ICR Number 1054.15, OMB Control Number 2060-0022) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through December 31, 2024. Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before January 9, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2020-0627, to EPA online using <https://www.regulations.gov/> (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

The EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243-05), Office of Air Quality Planning and Standards,

U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541-0833; email address: ali.muntasir@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through December 31, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period (88 FR 31748). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The New Source Performance Standards (NSPS) for the regulations published at 40 CFR part 60, subpart J were proposed on June 11, 1973; promulgated on March 8, 1974; and amended on both September 12, 2012, and December 1, 2015. These regulations apply to affected facilities at petroleum refineries that were constructed, modified or reconstructed on or before May 14, 2007. The affected sources are: (1) fluid catalytic cracking unit (FCCU) catalyst regenerator or fuel gas combustion device (FGCD) other than a flare that commenced construction, reconstruction or modification after June 11, 1973 and on/ or before May 14, 2007; (2) FGCD that is also a flare that commenced construction, reconstruction or modification after June 11, 1973 and on/ or before June 24, 2008; or (3) any Claus sulfur recovery plant with a design capacity of more than 20 long tons per day sulfur feed which commenced construction, reconstruction or modification after October 4, 1976 and on/ or before May 14, 2007. These regulations also apply to flares which commenced construction, modification, or reconstruction on/ or before June 24, 2008. At the time of this ICR renewal, all refinery flares are subject to the NSPS Subpart Ja requirements. This information is being collected to assure compliance with 40 CFR part 60, subpart J.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities: Petroleum refineries.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart J).

Estimated number of respondents: 130 (total).

Frequency of response: Semiannually.

Total estimated burden: 13,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,830,000 (per year), includes \$1,090,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. There is an increase in capital and operation & maintenance costs due to an adjustment to increase from 2005 to 2022 \$ using the CEPCI Equipment Cost Index. Capital and operation & maintenance costs were previously adjusted from 2005 to 2019 \$.

Courtney Kerwin,

Director, Information Engagement Division.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NSPS for Electric Utility Steam Generating Units (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), NSPS for Electric Utility Steam Generating Units (EPA ICR Number 1053.14, OMB Control Number 2060-0023) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through December 31, 2024. Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Additional comments may be submitted on or before January 9, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2023-0114, to EPA online using <https://www.regulations.gov/> (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Muntasir Ali, Sector Policies and Program Division (D243-05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711; telephone number: (919) 541-0833; email address: ali.muntasir@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through December 31, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** (88 FR 31748) on May 18, 2023 during a 60-day comment period (88 FR 31748). This notice allows for an additional 30 days for public comments. Supporting documents that explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov> or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The New Source Performance Standards (NSPS) for NSPS for Electric Utility Steam Generating Units (40 CFR part 60 subpart Da) were proposed on September 18, 1978, promulgated on June 11, 1979, and amended on November 19, 2014 and April 6, 2016. These regulations apply to new and existing electric utility steam generating units capable of combusting more than 73 megawatts (MW) heat input of fossil fuel. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart Da.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form numbers: None.

Respondents/affected entities:

Owners and operators of electric steam generating units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart Da).

Estimated number of respondents: 732 (total).

Frequency of response: Initially, semiannually, and quarterly.

Total estimated burden: 171,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$37,100,000 (per year), includes \$15,600,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. There is an increase in operation & maintenance costs due to an adjustment to increase from 2008 to 2022 \$ using the CEPCI Equipment Cost Index.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2024-0007; FRL-12450-01-OCSPP]

Pesticide Emergency Exemptions; Agency Decisions and State and Federal Agency Crisis Declarations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted emergency exemptions under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for use of pesticides as listed in this notice. The exemptions were granted during the period April 1, 2024, to September 30, 2024, to control unforeseen pest outbreaks.

FOR FURTHER INFORMATION CONTACT:

Charles Smith, Director, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; main telephone number: (202) 566-1030; email address: RDFRNotices@epa.gov.

SUPPLEMENTARY INFORMATION:**I. General Information***A. Does this action apply to me?*

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).

- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

If you have any questions regarding the applicability of this action to a particular entity, consult the person listed after **FOR FURTHER INFORMATION CONTACT**.

B. How can I get copies of this document and other related information?

The docket for this action, identified by docket identification (ID) number EPA-HQ-OPP-2024-0007, is available at <https://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460-0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP Docket is (202) 566-1744. Please review the visitor instructions and additional information about the docket available at <https://www.epa.gov/dockets>.

II. Background

EPA has granted or denied emergency exemptions to the following State and Federal agencies. The emergency exemptions may take the following form: specific, quarantine, public health, or crisis.

Under FIFRA section 18 (7 U.S.C. 136p), EPA can authorize the use of a pesticide when emergency conditions exist. Authorizations (commonly called emergency exemptions) are granted to State and Federal agencies and are of four types:

1. A “specific exemption” authorizes use of a pesticide against specific pests on a limited acreage in a particular State. Most emergency exemptions are specific exemptions.
2. “Quarantine” and “public health” exemptions are emergency exemptions issued for quarantine or public health purposes. These are rarely requested.
3. A “crisis exemption” is initiated by a State or Federal agency (and is confirmed by EPA) when there is insufficient time to request and obtain EPA permission for use of a pesticide in an emergency.

EPA may deny an emergency exemption: If the State or Federal agency cannot demonstrate that an emergency exists, if the use poses unacceptable risks to the environment, or if EPA cannot reach a conclusion that

the proposed pesticide use is likely to result in “a reasonable certainty of no harm” to human health, including exposure of residues of the pesticide to infants and children.

If the emergency use of the pesticide on a food or feed commodity would result in pesticide chemical residues, EPA establishes a time-limited tolerance meeting the “reasonable certainty of no harm standard” of the Federal Food, Drug, and Cosmetic Act (FFDCA).

In this document: EPA identifies the State or Federal agency granted the exemption, the type of exemption, the pesticide authorized and the pests, the crop or use for which authorized, number of acres (if applicable), and the duration of the exemption. EPA also gives the **Federal Register** citation for the time-limited tolerance, if any.

III. Emergency Exemptions

A. U.S. States and Territories

American Samoa

Environmental Protection Agency

Public health exemption: EPA authorized the use of 95,000 units of the unregistered product, Guardian, a hanging polyester mesh emanator that passively releases TRANSFLUTHRIN in communities to protect residents from mosquitoes that may transmit the dengue virus. This authorization was effective July 9, 2024, to July 9, 2025.

Arkansas

Department of Agriculture

Crisis Exemption: EPA concurred upon a crisis exemption declared by the Arkansas Department of Agriculture for the use of methoxyfenozide on rice to control fall armyworms. The authorization was effective July 11, 2024.

Specific Exemption: EPA authorized the use of methoxyfenozide on a maximum of 250,000 acres of rice to control fall armyworms. Permanent tolerances in connection with a previous action are established in 40 CFR 180.544 to support this emergency use. The authorization was effective September 4, 2024, to September 30, 2024.

California

Department of Pesticide Regulation

Crisis Exemption: EPA concurred upon a crisis exemption declared by the California Department of Pesticide Regulation for the use of afidopyropen on field-grown strawberries to control lygus bugs. The authorization was effective May 20, 2024.

Specific Exemption: EPA authorized the use of afidopyropen on a maximum

of 17,000 acres of field-grown strawberries to control lygus bugs. A time-limited tolerance supports this emergency use and is established in 40 CFR 180.700(b). The authorization was effective June 13, 2024, to October 31, 2024.

Colorado

Department of Agriculture

Specific Exemption: On September 12, 2024, EPA denied a specific exemption request for use of the unregistered product MAGNET, containing the unregistered active ingredients alpha-pinene, anisyl alcohol, butyl salicylate, cineole (eucalyptol), and phenylacetaldehyde as well as the registered active ingredient d-limonene on up to 1,400 acres of sweet corn as an insect attractant to manage corn earworm. Because an unregistered pesticide was requested, a Notice of Receipt, with opportunity for public comment (required by 40 CFR 166.24), published in the **Federal Register** on June 7, 2024 (89 FR 48610) (FRL-11998-01-OCSPP). The public comment period closed on June 24, 2024. EPA received two comments, one negative comment was submitted anonymously concerning potential risk and one from a federal government stakeholder supported allowing the use.

Florida

Department of Agriculture and Consumer Services

Specific Exemption: EPA authorized the use of clothianidin on a maximum of 75,000 acres of immature (3 to 5 years old) citrus trees to control the Asian citrus psyllid, the vector of huanglongbing (HLB, or citrus greening) disease. A time-limited tolerance in connection with this action supports this emergency use and is established in 40 CFR 180.586(b). Because the applicant proposed a use that has been requested in 5 or more previous years, a Notice of Receipt, with opportunity for public comment in accordance with the requirements at 40 CFR 166.24(a)(7)(i), published in the **Federal Register** on December 29, 2023 (88 FR 80717) FRL-11634-01-OCSPP). The public comment period closed on January 16, 2024. Two public comments were received: one from a nongovernmental organization that included substantive supporting material objected to the use and the other from a federal government stakeholder supported the use. EPA posted a document addressing the comments in response to the NOR to the docket, as well as EPA’s evaluations associated with the use, which may be accessed at <https://www.regulations.gov>

www.regulations.gov/docket/EPA-HQ-OPP-2023-0597. The authorization was effective April 16, 2024, to April 16, 2025

Hawaii

Department of Agriculture

Crisis Exemption: EPA concurred upon a crisis exemption declared by the Hawaii Department of Agriculture for the use of cypermethrin on the crowns of ornamental palm trees to control coconut rhinoceros beetles. This authorization was effective November 13, 2023.

Specific Exemption: EPA authorized the use of the unregistered product, DQB Males (*Wolbachia pipientis* DQB strain (wAlbB) contained in live adult male *Culex quinquefasciatus* mosquitoes) on a maximum of 20,000 acres of State, Federal, and private lands to control mosquitoes (*Cx.*

quinquefasciatus). Because the applicant proposed a use of a new chemical, a Notice of Receipt, with opportunity for public comment in accordance with the requirements at 40 CFR 166.24(a)(1), published in the **Federal Register** on February 8, 2024 (89 FR 8675) (FRL-11721-01-OCSPP). The public comment period closed on February 23, 2024. Eighty-seven public comments were received. EPA posted a document addressing the comments in response to the NOR to the docket, as well as EPA's evaluations associated with the use, which may be accessed at <https://www.regulations.gov/docket/EPA-HQ-OPP-2024-0035>. The authorization was effective April 25, 2024, to April 25, 2025.

Quarantine Exemption: EPA authorized the use of cypermethrin on a maximum of 10,000 acres of ornamental palm trees, applied on the crowns via unmanned aerial vehicles, to control coconut rhinoceros beetles. The authorization was effective April 22, 2024, to April 22, 2027.

Louisiana

Department of Agriculture and Forestry

Crisis Exemption: EPA concurred upon a crisis exemption declared by the Louisiana Department of Agriculture and Forestry for the use of methoxyfenozide on rice to control fall armyworms. The authorization was effective July 16, 2024.

Specific Exemption: EPA authorized the use of methoxyfenozide on a maximum of 40,000 acres of rice to control fall armyworms. Permanent tolerances in connection with a previous action are established in 40 CFR 180.544 to support this emergency use. The authorization was effective

September 4, 2024, to September 30, 2024.

Michigan

Department of Agriculture and Rural Development

Specific Exemption: EPA authorized the use of acifluorfen on a maximum of 48,000 acres of sugar beets for postemergence control of invasive *Amaranthus* (pigweed) spp., water hemp, and Palmer amaranth. Time-limited tolerances in connection with a previous action support this emergency use and are established in 40 CFR 180.383(b). The authorization was effective May 1, 2024, to July 31, 2024.

Minnesota

Department of Agriculture

Specific Exemption: EPA authorized the use of acifluorfen on a maximum of 65,000 acres of sugar beets for postemergence control of glyphosate-resistant water hemp. Time-limited tolerances in connection with a previous action support this emergency use and are established in 40 CFR 180.383(b). The authorization was effective May 20, 2024, to July 31, 2024.

Mississippi

Department of Agriculture and Commerce

Crisis Exemption: EPA concurred upon a crisis exemption declared by the Mississippi Department of Agriculture and Commerce for the use of methoxyfenozide on rice to control fall armyworms. The authorization was effective July 11, 2024.

Specific Exemption: EPA authorized the use of methoxyfenozide on a maximum of 60,000 acres of rice to control fall armyworms. Permanent tolerances in connection with a previous action are established in 40 CFR 180.544 to support this emergency use. The authorization was effective September 4, 2024, to September 30, 2024.

Missouri

Department of Agriculture

Crisis Exemption: EPA concurred upon a crisis exemption declared by the Missouri Department of Agriculture for the use of methoxyfenozide on rice to control fall armyworms. The authorization was effective July 18, 2024.

Specific Exemption: EPA authorized the use of methoxyfenozide on a maximum of 60,000 acres of rice to control fall armyworms. Permanent tolerances in connection with a previous action are established in 40

CFR 180.544 to support this emergency use. The authorization was effective September 4, 2024, to September 30, 2024.

North Dakota

Department of Agriculture

Specific Exemption: EPA authorized the use of acifluorfen on a maximum of 20,000 acres of sugar beets for postemergence control of glyphosate resistant water hemp. Time-limited tolerances in connection with a previous action support this emergency use and are established in 40 CFR 180.383(b). The authorization was effective May 27, 2024, to July 31, 2024.

Puerto Rico

Department of Agriculture

Public Health Exemption: EPA authorized the use of 750,000 units of the unregistered product, Guardian, a hanging polyester mesh emanator that passively releases TRANSFLUTHRIN in communities to protect residents from mosquitoes that may transmit the dengue virus. This authorization was effective June 20, 2024, to June 20, 2025.

B. Federal Departments and Agencies

United States Department of Agriculture

Animal and Plant Health Inspection Service

Quarantine Exemptions: EPA authorized the use of acetic acid (vinegar) on hard nonporous surfaces to control African swine fever virus. The authorization was effective June 10, 2024, to June 10, 2027.

EPA authorized the use of sodium hypochlorite on porous and nonporous, nonfood/feed contact surfaces to control foot-and mouth disease virus (FMDv), African swine fever virus (ASFv), and classical swine fever virus (CSFv). The authorization was effective September 17, 2024, to September 17, 2027.

EPA authorized the use of sodium hydroxide on hard, nonporous, nonfood/feed contact surfaces to control prions. The authorization was effective September 25, 2024, to September 25, 2027.

EPA authorized the use of sodium hypochlorite on hard, nonporous, nonfood/feed contact surfaces to control prions. The authorization was effective September 25, 2024, to September 25, 2027.

C. Annual Report of Crisis Exemptions Declared and Revoked

Seven crisis exemptions were declared, and none were revoked between November 6, 2023, to July 18, 2024.

Authority: 7 U.S.C. 136 *et seq.*

Dated: December 5, 2024.

Charles Smith,

*Director, Registration Division, Office of
Pesticide Programs.*

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; General Performance Reporting for Assistance Programs

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), General Performance Reporting for Assistance Programs (EPA ICR Number 2802.01, OMB Control Number 2090-NEW) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a request for approval of a new collection. Public comments were previously requested via the **Federal Register** on March 7, 2024 during a 60-day comment period; and on September 19, 2024 during a 30-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before January 9, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OCFO-2024-0107, to EPA online using www.regulations.gov (our preferred method), by email to Docket_OMS@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

Aarti Iyer, Office of the Chief Financial Officer, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; email address: iyer.aarti@epa.gov; phone: 202-564-0214.

SUPPLEMENTARY INFORMATION: This is a request for approval of a new collection. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it

displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on March 7, 2024 during a 60-day comment period, and on September 21, 2024 during a 30-day comment period. This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The U.S. Environmental Protection Agency (EPA) awards billions of dollars in funding for grants and other assistance agreements, with recipients ranging from small non-profit organizations to large state governments. With this Information Collection Request (ICR), EPA seeks authorization to collect information to track progress by the Agency's assistance programs. Collection of this information from award recipients enables EPA to assess and manage its assistance programs, which in turn ensures responsible stewardship of public funds; rigorous evidence-based learning and improvement; and transparent accountability to the American public. The information requested under this ICR will be collected via performance report forms, including work plans, interim reports, and final reports.

Form numbers: None.

Respondents/affected entities: Recipients of financial assistance awards from EPA.

Respondent's obligation to respond: Mandatory for grant recipients as per reporting requirements included in EPA regulations 2 CFR parts 200 and 1500.

Estimated number of respondents: 2,662 (per year).

Frequency of response: Varies.

Total estimated burden: 87,088 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$7,071,495.82 (per year), there are no annualized capital or operation & maintenance costs.

Changes in the estimates: This is a new collection, and so does not involve

any program changes or burden adjustments.

Courtney Kerwin,

Director, Information Engagement Division.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-12127-01-OAR]

Official Release of the MOVES5 Motor Vehicle Emissions Model for SIPs and Transportation Conformity

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the availability of the latest major release of the MOtor Vehicle Emission Simulator (MOVES) model, MOVES5, for official purposes outside of California. MOVES5 is the latest version of EPA's state-of-the-science modeling tool for estimating emissions from cars, trucks, buses, and motorcycles based on the latest data and regulations. MOVES5 is available for use in state implementation plans (SIPs) and transportation conformity analyses outside of California. This notice starts a two-year grace period before MOVES5 will need to be used as the latest EPA emissions model for transportation conformity determinations outside of California, both in new regional emissions analyses and in new hot-spot analyses.

DATES: EPA's announcement of the MOVES5 emissions model for SIPs and transportation conformity determinations in states other than California is effective December 11, 2024. This announcement starts a two-year transportation conformity grace period that ends on *December 11, 2026*. After this date, MOVES5 will need to be used as the latest EPA emissions model for new transportation conformity analyses outside of California in both regional emissions analyses and in hot-spot analysis.

FOR FURTHER INFORMATION CONTACT: For technical model questions regarding the official release or use of MOVES5, please email EPA at mobile@epa.gov. For questions about SIPs, contact Kaitlyn Leffert at Leffert.Kaitlyn@epa.gov. For transportation conformity questions, contact Aaron Letterly at Letterly.Aaron@epa.gov.

SUPPLEMENTARY INFORMATION:

The contents of this notice are as follows:

I. General Information

- II. What is MOVES5?
 III. SIPs and MOVES5
 IV. Transportation Conformity and MOVES5

I. General Information

A. Does this action apply to me?

Entities potentially impacted by the approval of MOVES5 are those that adopt, approve, or fund transportation plans, transportation improvement programs (TIPs), or transportation projects as defined in 40 CFR 93.101 and those that develop and submit SIPs to EPA. Regulated categories and entities potentially affected by today's action include:

Category	Examples of regulated entities
Local government	Local air quality and transportation agencies, including metropolitan planning organizations (MPOs).
State government ..	State air quality and transportation agencies.
Federal government.	Department of Transportation (Federal Highway Administration (FHWA) and Federal Transit Administration (FTA)).

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by the release of MOVES. Other entities not listed in the table could also be affected. To determine whether your organization is affected by this action, you should carefully examine the transportation conformity applicability requirements in 40 CFR 93.102. If you have questions regarding the applicability of this action to a particular entity, consult the persons listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

B. How can I get copies of MOVES5 and other related information?

The official version of the MOVES5 model and supporting documentation are available on EPA's MOVES website: <https://www.epa.gov/moves>. Individuals who want to receive EPA announcements related to the MOVES5 model can subscribe to the EPA–MOBILENEWS email listserv, which can be done at EPA's website at: <https://www.epa.gov/moves/forms/epa-mobileneews-listserv>.

Available guidance on how to apply MOVES5 for SIPs and transportation conformity purposes can be found on EPA's transportation conformity website, [https://www.epa.gov/state-and-local-transportation/policy-and-](https://www.epa.gov/state-and-local-transportation/policy-and-technical-guidance-state-and-local-transportation)

[technical-guidance-state-and-local-transportation](https://www.epa.gov/state-and-local-transportation/policy-and-technical-guidance-state-and-local-transportation),¹ including the “MOVES5 Policy Guidance: Use of MOVES for State Implementation Plan Development, Transportation Conformity, General Conformity, and Other Purposes.” (EPA–420–B–24–038, November 2024).

EPA will continue to update these websites as other MOVES support materials and guidance are developed or updated.

II. What is MOVES5?

MOVES5 is EPA's latest official motor vehicle emissions model for state and local agencies to estimate volatile organic compounds (VOCs), nitrogen oxides (NO_x), particulate matter (PM_{2.5} and PM₁₀), carbon monoxide (CO), and other pollutants and precursors from cars, trucks, buses, and motorcycles for SIP purposes and transportation conformity determinations outside of California.² The model is based on analyses of millions of emission test results and considerable advances in the Agency's understanding of vehicle emissions. MOVES5 is a major revision to the MOVES series of models. This model is the fifth major MOVES release.³

MOVES5 includes new regulations, features, and significant new data, as detailed in the MOVES5 technical reports. Notably, MOVES5 incorporates several important updates, including:

- Accounting for EPA's Light- and Medium-Duty Multi-Pollutant Rule with higher projected electric vehicle (EV) fractions and more stringent standards for carbon dioxide (CO₂), PM, non-methane organic gases (NMOG) and NO_x.⁴
- Accounting for EPA's Heavy-Duty Greenhouse Gas Emissions-Phase 3 Rule with higher projected EV fractions and updated energy consumption estimates for heavy-duty EVs.⁵
- Incorporating new data on light-duty (LD) and heavy-duty (HD) brake wear emissions.

¹ Interested parties can find these documents under the “Emission Models and Conformity” and “Project-Level Conformity” topics on this website.

² MOVES can also model emissions in the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. Nonattainment and maintenance areas located in California use the latest approved version of the Emission FAcTtor (EMFAC) model.

³ For more information, see EPA's MOVES Versions in Limited Current Use website at <https://www.epa.gov/moves/moves-versions-limited-current-use>.

⁴ See EPA's final rule, “Multi-Pollutant Emissions Standards for Model Years 2027 and Later Light-Duty and Medium-Duty Vehicles,” published in the **Federal Register** on April 18, 2024 (89 FR 27842).

⁵ See EPA's final rule, “Greenhouse Gas Emissions Standards for Heavy-Duty Vehicles—Phase 3,” published in the **Federal Register** on April 22, 2024 (89 FR 29440).

- Expanding detailed calculations to vehicles up to 40 years old, instead of 30.

- Updating onroad and nonroad fuel properties for calendar year 2021 and later.

- Updated historical and forecast default vehicle miles travelled (VMT), vehicle populations, age distributions, and fuel distributions.

For additional information on the updates included in MOVES5, please refer to the “Overview of EPA's Motor Vehicle Emissions Simulator (MOVES5),” found at EPA's MOVES website. Specific information about MOVES5 inputs and algorithms can be found on EPA's websites for MOVES Onroad Technical Reports and MOVES Nonroad Technical Reports.⁶

Like its predecessors, MOVES5 can estimate vehicle exhaust and evaporative emissions as well as brake wear and tire wear emissions for criteria pollutants and precursors. Also, like previous versions, MOVES5 does not estimate emissions of re-entrained road dust. To estimate emissions from re-entrained road dust, practitioners should continue to use the latest approved methodologies.⁷

The structure of MOVES5 is fundamentally the same as MOVES4, although there are some minor differences, e.g., in the user interface. However, inputs developed by model users for previous versions of MOVES will need to be updated to work with MOVES5. Model run time may differ depending on the type of run and user inputs and computer configuration. As for emissions, EPA performed a comparison of onroad emissions from MOVES5 to emissions from MOVES4 using default information in MOVES5 at the national level, and for three sample urban counties with different local travel patterns and ambient conditions. In general, compared to MOVES4, MOVES5 emissions of NO_x, PM_{2.5}, VOC, and CO tend to be higher in the 2020s and 2030s. In the longer term, emissions of these pollutants in MOVES5 are lower due to the emissions reductions of new EPA regulations. Note that results will vary based on the pollutant selected and that area's local inputs.

III. SIPs and MOVES5

EPA has articulated its policy regarding the use of MOVES5 in SIP development in its “MOVES5 Policy

⁶ For more information, see EPA's MOVES website: <https://www.epa.gov/moves>.

⁷ See EPA's notice of availability, “Official Release of the January 2011 AP–42 Method for Estimating Re-Entrained Road Dust from Paved Roads,” published in the **Federal Register** on February 4, 2011 (76 FR 6328).

Guidance: Use of MOVES for State Implementation Plan Development, Transportation Conformity, General Conformity, and Other Purposes” (EPA–420–B–24–038, November 2024).

Today’s notice highlights certain aspects of the guidance, but state and local governments should refer to the guidance for more detailed information on how and when to use MOVES5 in reasonable further progress SIPs, attainment demonstrations, maintenance plans, inventory updates, and other SIP submissions.

MOVES5 should be used in ozone, CO, PM, and nitrogen dioxide (NO₂) SIP development as expeditiously as possible, as there is no grace period for the use of MOVES5 in SIPs. The Clean Air Act requires that SIP inventories and control measures be based on the most current information and applicable models that are available when a SIP is developed.⁸ States other than California should use the latest version of MOVES that is available at the time that a SIP is developed, which is now MOVES5. Using MOVES5 for SIPs that will be submitted in the future ensures that they are based on the most accurate estimates of emissions possible.

However, EPA recognizes the time and level of effort involved in SIP development, so in cases where state and local agencies have already completed significant work on a SIP with MOVES4 (e.g., attainment modeling has already been completed with MOVES4), they may continue to rely on this earlier version. In addition, due to the fact that EPA is releasing multiple versions of MOVES in a short timeframe, MOVES3 may have already been used in SIP development. In areas where state and local agencies have already completed significant work on a SIP with MOVES3, MOVES3 may continue to be used in SIP development. EPA believes this would be only a limited number of cases. States should consult with their EPA Regional Office if they have questions about how MOVES5 affects SIPs under development in specific nonattainment or maintenance areas. Early consultation can facilitate EPA’s adequacy finding for SIP motor vehicle emissions budgets for transportation conformity purposes or for the SIP approval process.

⁸ See Clean Air Act section 172(c)(3). Also see the discussion of emissions inventory requirements in the “Fine Particulate Matter National Ambient Air Quality Standards: State Implementation Plan Requirements” rule (81 FR 58029, August 24, 2016) and in the “Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area State Implementation Plan Requirements” rule (83 FR 63022, December 6, 2018).

The Clean Air Act does not require states to revise submitted SIPs or SIPs that have already been approved simply because a new motor vehicle emissions model is now available.⁹ States can choose to update these SIPs with MOVES5, for example, if it is determined that it is appropriate to update motor vehicle emissions budgets (“budgets”) with the model for future conformity determinations. However, as stated above, states should use MOVES5 where SIP development is in its initial stages or has not progressed far enough along that switching from a previous model version would create a significant adverse impact on state resources.

Incorporating MOVES5 into the SIP now could assist areas in mitigating possible transportation conformity difficulties in the future after the MOVES5 conformity grace period ends. New regional emissions analyses using EPA’s emissions model that are started after the grace period is over must be based on MOVES5 (40 CFR 93.111), so having MOVES5-based SIP budgets in place at that time could provide more consistency with transportation conformity determinations. For complete explanations of how MOVES5 is to be implemented for SIP purposes, refer to the “MOVES5 Policy Guidance: Use of MOVES for State Implementation Plan Development, Transportation Conformity, General Conformity, and Other Purposes.” (EPA–420–B–24–038).

IV. Transportation Conformity and MOVES5

Transportation conformity is required under CAA section 176(c) (42 U.S.C. 7506(c)) to ensure that federally funded or approved highway and transit activities are consistent with (“conform to”) the purpose of the SIP. Conformity to the purpose of the SIP means that transportation activities will not cause or contribute to new air quality violations, worsen existing violations, or delay timely attainment of the relevant national ambient air quality standards (NAAQS) or any interim milestones. EPA’s transportation conformity rule (40 CFR parts 51 and 93) establishes the criteria and procedures for determining whether metropolitan transportation plans, TIPs, and federally supported highway and transit projects conform to the SIP. Transportation conformity applies to designated nonattainment and maintenance areas¹⁰ for

⁹ *Sierra Club v. EPA*, 356 F.3d. 296, 308 (D.C. Cir. 2004) (“To require states to revise completed plans every time a new model is announced would lead to significant costs and potentially endless delays in the approval processes.”)

¹⁰ “Maintenance areas” are those areas that were initially designated nonattainment for a criteria

transportation-related criteria pollutants: ozone, PM_{2.5}, PM₁₀, CO, and NO₂.

In this notice, EPA is announcing the availability of MOVES5 for use in transportation conformity determinations outside of California. EPA is also establishing a two-year grace period before MOVES5 will need to be used in regional emissions analyses for transportation conformity determinations of transportation plans and transportation improvement programs (TIPs)¹¹ and in hot-spot analyses for project-level transportation conformity determinations which use EPA’s emissions model. The MOVES5 grace period for regional emissions and hot-spot analyses applies to the use of MOVES5 and any future minor revisions that occur during the grace period.

This MOVES5 grace period is separate and distinct from the two-year grace period established with the release of the previous version of the model, MOVES4. The two-year grace period established by EPA’s September 2023 MOVES4 Notice of Availability in the **Federal Register** is unchanged by the release of MOVES5 and continues to be in effect until September 12, 2025.¹² For more information, see the MOVES4 Notice of Availability in the **Federal Register** and the “MOVES5 Policy Guidance: Use of MOVES for State Implementation Plan Development, Transportation Conformity, General Conformity, and Other Purposes” (EPA–420–B–24–038, November 2024).

The remainder of this section describes how the transportation conformity grace period was determined and summarizes how it will be implemented, including those circumstances when the MOVES5 grace period could be shorter than two years for regional emissions analyses. However, for complete explanations of how MOVES5 is to be implemented for transportation conformity, including details about using MOVES5 during the grace period, refer to the “MOVES5 Policy Guidance: Use of MOVES for

pollutant and subsequently redesignated to attainment after 1990. Maintenance areas have SIPs developed under CAA section 175A. (40 CFR 93.101).

¹¹ The grace period also applies in the case that a regional emissions analysis is done for a project not from a conforming transportation plan and TIP (i.e., a project in an isolated rural area). See the transportation conformity rule at 40 CFR 93.101 for the definition of an isolated rural area and 40 CFR 93.109(g) for how conformity is done in an isolated rural area.

¹² See EPA’s Notice of Availability, “Official Release of the MOVES4 Motor Vehicle Emissions Model for SIPs and Transportation Conformity,” published in the **Federal Register** on September 12, 2023 (88 FR 62567).

State Implementation Plan Development, Transportation Conformity, General Conformity, and Other Purposes.” (EPA-420-B-24-038).

A. Why is EPA establishing a two-year conformity grace period?

Section 176(c)(1) of the Clean Air Act states that “. . . [t]he determination of conformity shall be based on the most recent estimates of emissions, and such estimates shall be determined from the most recent population, employment, travel, and congestion estimates . . .”. Additionally, the transportation conformity rule (40 CFR 93.111) requires conformity determinations to be based on “the latest emission estimation model available,” and further states that this requirement is satisfied if the most current version of EPA’s motor vehicle emissions model is used in the conformity analysis. When EPA announces a new emissions model, such as MOVES5, we establish a grace period before the model needs to be used for transportation conformity purposes (40 CFR 93.111(b)). In consultation with DOT, EPA must consider the degree of change in the emissions model and the effects of the new model on the transportation planning process (40 CFR 93.111(b)(2)). The transportation conformity rule provides that EPA will establish a grace period for new emissions models of between three and 24 months (40 CFR 93.111(b)(1)).

EPA articulated its intentions for establishing the length of a conformity grace period in the preamble to the 1993 transportation conformity rule (November 24, 1993; 58 FR 62211):

“EPA and DOT [the Department of Transportation] will consider extending the grace period if the effects of the new emissions model are so significant that previous SIP demonstrations of what emission levels are consistent with attainment would be substantially affected. In such cases, States should have an opportunity to revise their SIPs before MPOs must use the model’s new emissions factors.”

In consultation with DOT, EPA considered the degree of change in MOVES5 and the effects of the new model on the transportation planning process (40 CFR 93.111(b)(2)). EPA considered the time it will take state and local transportation and air quality agencies to conduct and provide technical support for analyses. State and local agencies will need to become familiar with the MOVES5 emissions model and will need to convert existing data for use in MOVES5. Since 1993, the fundamental purpose of section 93.111(b) of the transportation conformity rule has been to provide a

sufficient amount of time for MPOs and other state and local agencies to learn and employ new emissions models. The transition to a new emissions model for conformity involves more than learning to use the new model and preparing input data and model output. After model start-up is complete, state and local agencies also need to consider how the model affects regional emissions analysis results and whether SIP and/or transportation plan/TIP changes are necessary to assure future conformity determinations.

The two-year conformity grace period also provides sufficient time for state and local agencies to learn and apply new technical guidance and training that reflect MOVES5. EPA provides guidance on how to run the latest MOVES version for SIP and transportation conformity purposes with the release of the model¹³ and is working to update other guidance documents and training materials as quickly as possible. Generally, existing guidance and training applies to MOVES5 as noted on EPA’s website, and EPA will notify MOVES5 users when updates to these materials are available. Training materials will continue to address different levels of state and local expertise.

In addition, many agencies will be implementing the transition to MOVES5 for PM and CO hot-spot analyses for applicable projects in those nonattainment and maintenance areas, with each analysis potentially involving multiple state and local agencies. States with CO hot-spot protocols that were previously approved into the SIP (40 CFR 93.123(a)(1)) that are based on a previous version of MOVES will need time to revise them. Finally, EPA considered the general time and monetary resource constraints in which state and local agencies currently operate. Upon considerations of all these factors, EPA is establishing a two-year grace period, which begins today and ends on *December 11, 2026*, before MOVES5 needs to be used for new transportation conformity analyses outside of California.

B. Circumstances When the MOVES5 Grace Period Will Be Shorter Than Two Years

The MOVES5 grace period for regional emissions analyses will be shorter than two years for a given

pollutant if an area revises its SIP and motor vehicle emissions budgets with MOVES5 and such budgets have been found adequate or approved into the SIP prior to the end of the two-year grace period. In this case, the new regional emissions analysis must use MOVES5 if the conformity determination is based on a MOVES5-based budget (40 CFR 93.111).

Areas that are designated nonattainment or maintenance for more than one pollutant may rely on both MOVES5 and MOVES4 to determine conformity for different pollutants during the MOVES5 grace period. For example, if an area revises a previously submitted (but not approved) PM₁₀ SIP with MOVES5 and EPA finds these revised MOVES5 budgets adequate for conformity, such budgets would apply for conformity on the effective date of the **Federal Register** notice announcing EPA’s adequacy finding. In this example, if the area is nonattainment for PM₁₀ and ozone, the MOVES5 grace period would end for PM₁₀ regional emissions analyses once EPA found the new MOVES5-based SIP budgets adequate. However, MOVES4 could continue to be used for ozone-related regional emissions analyses begun before the end of the MOVES5 grace period.¹⁴ Refer to the MOVES5 Policy Guidance for additional details.

In addition, the length of the MOVES5 grace period for hot-spot analyses would not be affected by an early submission of MOVES5-based budgets. In the above example, the two-year grace period for PM₁₀ hot-spot analyses would continue to apply even if the grace period is shortened for regional PM₁₀ conformity analyses. EPA Regional Offices should be consulted for questions regarding such situations in multi-pollutant areas.

In addition, in most cases, if the state revises previously approved budgets based on an earlier EPA emissions model, the revised MOVES5 budgets could not be used for conformity purposes until EPA approves them, *i.e.*, approves the SIP revision. In general, submitted SIPs cannot supersede approved budgets until the submitted SIP is approved. See 40 CFR 93.118(e)(1).

However, 40 CFR 93.118(e)(1) allows an approved budget to be replaced by an adequate budget if EPA’s approval of the initial budgets specifies that the budgets

¹³ Refer to EPA’s “MOVES5 Technical Guidance: Using MOVES to Prepare Emission Inventories for State Implementation Plans and Transportation Conformity,” EPA-420-B-24-043, November 2024, available on EPA’s website at: <https://www.epa.gov/state-and-local-transportation/policy-and-technical-guidance-state-and-local-transportation>.

¹⁴ In this example, such an area would use MOVES5 to develop a regional emissions analysis for PM₁₀ for comparison to the revised MOVES5-based budgets (*e.g.*, PM₁₀ budgets). The regional emissions analysis for ozone could be based on MOVES4 for the VOC and NO_x budgets in the ozone SIP for the remainder of the conformity grace period.

being approved may be replaced in the future by new adequate budgets. This flexibility has been used in limited situations in the past. In such cases, the MOVES5-based budgets would be used for conformity purposes once they have been found adequate, if requested by the state in its SIP submission and specified in EPA's SIP approval. States should consult with their EPA Regional Office to determine if this flexibility applies to their situation.

C. Use of MOVES5 for Regional Emissions Analyses During the Grace Period

During the conformity grace period, areas should use interagency consultation to examine how MOVES5 will impact their future transportation plan and TIP conformity determinations, including regional emissions analyses. Isolated rural areas should also consider how future regional emissions analyses will be affected when the MOVES5 grace period ends. Areas should carefully consider whether the SIP and budgets should be revised with MOVES5 or if transportation plans and TIPs should be revised before the end of the conformity grace period, since doing so may be necessary to ensure conformity in the future.

Finally, the transportation conformity rule provides flexibility for completing conformity determinations based on regional emissions analyses that use MOVES4 that are started before the end of the grace period. Regional emissions analyses that are started during the MOVES5 grace period can use either MOVES5 or MOVES4. The interagency consultation process should be used if it is unclear if a MOVES4-based analysis was begun before the end of the grace period. If there are questions about which model should be used in a conformity determination, the EPA Regional Office can be consulted.

When the grace period ends on December 11, 2026, MOVES5 will become the only EPA motor vehicle emissions model for regional emissions analyses for transportation conformity in states other than California. In general, this means that all new transportation plan and TIP conformity determinations started after the end of the grace period must be based on MOVES5, even if the SIP is based on MOVES4 or an older version of the MOVES model.

D. Use of MOVES5 for Project-Level Hot-Spot Analyses During the Conformity Grace Period

The MOVES5 grace period also applies to the use of MOVES5 for CO,

PM₁₀ and PM_{2.5} hot-spot analyses. Sections 93.116 and 93.123 of the transportation conformity regulation contain the requirements for when a hot-spot analysis is required for project-level conformity determinations.¹⁵ The transportation conformity rule provides flexibility for analyses that are started before the end of the grace period. A conformity determination for a transportation project may be based on a previous model if the analysis was begun before or during the grace period, and if the final environmental document for the project is issued no more than three years after the issuance of the draft environmental document (40 CFR 93.111(c)). Interagency consultation should be used if it is unclear if a previous analysis was begun before the end of the grace period. For CO, PM₁₀ and PM_{2.5} hot-spot analyses that start during the MOVES5 grace period, project sponsors can choose to use MOVES5 or MOVES4. Any new CO, PM₁₀ or PM_{2.5} hot-spot analyses for conformity purposes begun after the end of the MOVES5 grace period must be based on MOVES5.

Interagency consultation must be used to evaluate and choose model(s) and associated methods and assumptions to be used in hot-spot analyses and regional emissions analyses (40 CFR 93.105(c)(1)(i)). This includes which MOVES version to use for a hot-spot analysis. EPA encourages project sponsors to use the consultation process to determine which option may be most appropriate for a given situation. For questions about how the MOVES grace periods apply in a project-level conformity determination, contact your EPA Regional Office.

EPA has guidance on how to conduct quantitative PM_{2.5} and PM₁₀ hot-spot modeling for transportation conformity purposes, and on how to use MOVES for a CO hot-spot analysis. See EPA's "Project-level Conformity" website, <https://www.epa.gov/state-and-local-transportation/project-level-conformity-and-hot-spot-analyses>, for the latest information and guidance documents on how to conduct CO, PM₁₀ and PM_{2.5} hot-spot modeling for transportation conformity purposes.

¹⁵ In CO nonattainment and maintenance areas, a hot-spot analysis is required for all non-exempt projects, with quantitative hot-spot analyses being required for larger, congested intersections and other projects (40 CFR 93.123(a)(1)). In addition, in PM_{2.5} and PM₁₀ nonattainment and maintenance areas, the transportation conformity regulation requires that a quantitative hot-spot analysis be completed for certain projects (see 40 CFR 93.123(b)(1)).

E. FHWA's CO Categorical Hot-Spot Finding

FHWA released the most recent CO categorical hot-spot finding for intersection projects on January 31, 2023, that was based on MOVES3.¹⁶ Until September 12, 2025, a project sponsor outside of California may continue to rely on the categorical finding for applicable projects that are determined through interagency consultation to be covered by the finding's parameters. However, any new CO hot-spot analyses for conformity purposes begun after September 12, 2025, would not be able to rely on the MOVES3-based January 2023 CO categorical hot-spot finding.

F. CO Hot-spot Protocols that Were Previously Approved into the SIP

Section 93.123(a)(1) of the transportation conformity regulation allows areas to develop alternate procedures for determining localized CO hot-spot analyses, when developed through interagency consultation and approved by the EPA Regional Administrator. Some states have chosen in the past to develop such procedures based on previous EPA emissions models.

During the MOVES5 grace period, areas with previously approved CO hot-spot protocols based on MOVES4 may continue to rely on these protocols. Once the MOVES5 two-year grace period ends, new CO hot-spot analyses for conformity purposes will need to be based on MOVES5 and thus may no longer rely on CO hot-spot protocols based on MOVES4 or earlier versions.

William Charmley,

FEDERAL COMMUNICATIONS COMMISSION

[FR ID 267397]

Open Commission Meeting Wednesday, December 11, 2024

December 04, 2024.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Wednesday, December 11, 2024, which is scheduled to commence at 10:30 a.m. in the Commission Meeting Room of the

¹⁶ See <https://www.epa.gov/state-and-local-transportation/project-level-conformity-and-hot-spot-analyses#cohotspot>.

Federal Communications Commission,
45 L Street NE, Washington, DC.

While attendance at the Open Meeting is available to the public, the FCC headquarters building is not open access

and all guests must check in with and be screened by FCC security at the main entrance on L Street. Attendees at the Open Meeting will not be required to have an appointment but must

otherwise comply with protocols outlined at: www.fcc.gov/visit. Open Meetings are streamed live at: www.fcc.gov/live and on the FCC's YouTube channel.

Item No.	Bureau	Subject
1	Office of Engineering and Technology	<i>Title:</i> Unlicensed Use of the 6 GHz Band (ET Docket No. 18–295); Expanding Flexible Use in Mid-Band Spectrum Between 3.7 and 24 GHz (GN Docket No. 17–183). <i>Summary:</i> The Commission will consider a Third Report and Order that would expand unlicensed use of the 6 GHz band by very low power devices in two additional sub-bands, making a contiguous 1200 megahertz of spectrum available for use by these devices.
2	Media	<i>Title:</i> Broadcast Rule Update (MB Docket No. 24–626). <i>Summary:</i> The Commission will consider a Notice of Proposed Rulemaking that would amend its rules for radio and television stations to reflect current application processing requirements, clarify and harmonize provisions, and remove references to outdated procedures and legacy filing systems.
3	Wireline Competition	<i>Title:</i> Connect America Fund (WC Docket No. 10–90); The Uniendo a Puerto Rico Fund and the Connect USVI Fund (WC Docket No. 18–143); Rural Digital Opportunity Fund (WC Docket No. 19–126); Letters of Credit for Recipients of High-Cost Competitive Bidding Support (WC Docket No. 24–144); Connect America Fund Phase II Auction (AU Docket No. 17–182); Rural Digital Opportunity Fund Auction (AU Docket No. 20–34); Establishing a 5G Fund for Rural America (GN Docket No. 20–32). <i>Summary:</i> The Commission will consider a Report and Order that would adopt targeted modifications to the requirements for Letters of Credit that recipients of Universal Service Fund (USF) high-cost support awarded through a competitive process must obtain.
4	Enforcement	<i>Title:</i> Enforcement Order on Reconsideration (EB Docket No. 23–64). <i>Summary:</i> The Commission will consider an Order on Reconsideration of its March 19, 2024, Memorandum Opinion and Order in the UPM Technology, Inc. v. Unigestion Holding, S.A., d/b/a Digicel Haiti, complaint proceeding.
5	Enforcement	<i>Title:</i> Enforcement Bureau Action. <i>Summary:</i> The Commission will consider an enforcement action.
6	Enforcement	<i>Title:</i> Enforcement Bureau Action. <i>Summary:</i> The Commission will consider an enforcement action.
7	Enforcement	<i>Title:</i> Enforcement Bureau Action. <i>Summary:</i> The Commission will consider an enforcement action.

* * * * *

The meeting will be webcast at: www.fcc.gov/live. Open captioning will be provided as well as a text only version on the FCC website. Other reasonable accommodations for people with disabilities are available upon request. In your request, include a description of the accommodation you will need and a way we can contact you if we need more information. Last minute requests will be accepted but may be impossible to fill. Send an email to: fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202–418–0530.

Press Access—Members of the news media are welcome to attend the meeting and will be provided reserved seating on a first-come, first-served basis. Following the meeting, the Chairwoman may hold a news conference in which she will take questions from credentialed members of the press in attendance. Also, senior policy and legal staff will be made available to the press in attendance for questions related to the items on the meeting agenda. Commissioners may

also choose to hold press conferences. Press may also direct questions to the Office of Media Relations (OMR): MediaRelations@fcc.gov. Questions about credentialing should be directed to OMR.

Additional information concerning this meeting may be obtained from the Office of Media Relations, (202) 418–0500. Audio/Video coverage of the meeting will be broadcast live with open captioning over the internet from the FCC Live web page at www.fcc.gov/live.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0819; FR ID 266290]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.” The Commission may not conduct or sponsor a collection of

information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before January 10, 2025.

ADDRESSES: Comments should be sent to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Your comment must be submitted into www.reginfo.gov per the above instructions for it to be considered. In addition to submitting in www.reginfo.gov also send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to PRA@fcc.gov and to Nicole.Ongele@fcc.gov. Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Nicole Ongele at (202) 418–2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page <http://www.reginfo.gov/public/do/PRAMain>, (2) look for the section of the web page called “Currently Under Review,” (3) click on the downward-pointing arrow in the “Select Agency” box below the “Currently Under Review” heading, (4) select “Federal Communications Commission” from the list of agencies presented in the “Select Agency” box, (5) click the “Submit” button to the right of the “Select Agency” box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the

Commission’s burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.”

OMB Control Number: 3060–0819.

Title: Bridging the Digital Divide for Low-Income Consumers, Lifeline and Link Up Reform and Modernization, Telecommunications Carriers Eligible for Universal Service Support.

Form No.: FCC Forms 481, 497, 555, 5629, 5630, and 5631.

Type of Review: Revision of a currently approved collection.

Respondents: Individuals or households, businesses or other for-profit institutions, and not-for-profit institutions.

Number of Respondents and Responses: 25,111,368 respondents; 26,878,712 responses.

Estimated Time per Response: 0.0167–125 hours.

Frequency of Response: Annual, biennial, monthly, daily and on occasion reporting requirements, recordkeeping requirement and third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits and Voluntary. Statutory authority is contained in Sections 1, 4(i), 5, 201, 205, 214, 219, 220, 254, 303(r), and 403 of the Communications Act of 1934, as amended, and section 706 of the Communications Act of 1996, as amended; 47 U.S.C. 151, 154(i), 155, 201, 205, 214, 219, 220, 254, 303(r), 403, and 1302.

Total Annual Burden: 6,534,599 hours.

Total Annual Cost: \$937,500.

Needs and Uses: On November 15, 2023, the Commission adopted the *Supporting Survivors of Domestic and Sexual Violence et al.*, WC Docket Nos. 22–238, 11–42, 21–450, Report and Order, FCC 23–96 (2023) (*Safe Connections Act Order*). The *Safe Connections Act Order*, among other things, adopted rules to address the emergency communications portions of the *Safe Connections Act*. The *Order* also required that surveys be developed and sent to stakeholder groups working directly with survivors in order to conduct a program evaluation,

including examining the impact and effectiveness of the support offered to survivors. The Commission is requesting the Office of Management and Budget (OMB) approval for this revised information collection to implement the new requirements captured in the *Safe Connections Act Survey* in the *Safe Connections Act Order*, FCC 23–96. The revision requires that surveys be developed and sent to stakeholder groups working directly with survivors in order to conduct a program evaluation, including examining the impact and effectiveness of the support offered to survivors.

The Commission first adopted rules for the Lifeline program in 1997. On May 8, 1997, the Commission adopted rules establishing, among other things, that eligible telecommunications carriers (ETCs) offering Lifeline and Link Up to qualifying low-income customers would receive reimbursement from the federal Universal Service Fund (USF or Fund) for low-income support.

On April 2, 2004, in its Report and Order and Further Notice of Proposed Rulemaking (*Lifeline Order*), the Commission directed ETCs to certify their Lifeline/Link Up subscribers’ eligibility for the program and to verify a portion of their subscribers’ eligibility on an annual basis. States that operated their own Lifeline/Link Up programs were allowed to develop their own certification procedures (referred to as non-federal default states). The *Lifeline Order* also required ETCs to submit to the Universal Service Administrative Company (USAC or Administrator) proof that they certified that their Lifeline subscribers are eligible for Lifeline, and proof that they verified a portion of their subscribers’ continued eligibility for Lifeline.

On September 23, 2011, the Commission issued an *Inquiry into Disbursement Process for the Universal Service Fund Low Income Program* seeking comment on a proposal for disbursing USF low-income support to ETCs based upon claims for reimbursement of actual support payments made, instead of projected claims for support. On February 6, 2012, the Commission issued its Report and Order and Further Notice of Proposed Rulemaking (*2012 Lifeline Order*). In the *2012 Lifeline Order*, the Commission adopted the proposal to file the FCC Form 497 monthly and changed the low-income disbursement process from payments based on projected subscriber counts to payments based on actual subscriber counts. After the *2012 Lifeline Order*, ETCs were required to recertify the eligibility of their entire subscriber base annually. Starting in

2013, ETCs could elect to have USAC conduct the annual recertification process on their behalf.

On June 22, 2015, the Commission released a Second Further Notice of Proposed Rulemaking, Order on Reconsideration, Second Report and Order, and Memorandum Opinion and Order (2015 Lifeline Order). The Commission adopted several rules in the 2015 Lifeline Order to: strengthen the document retention requirements; ensure that only ETCs directly serving low-income customers receive reimbursement under the Lifeline program; and require ETCs to use a uniform snapshot date to request reimbursement from USAC for the provision of Lifeline support.

On April 27, 2016, the Commission adopted the *Lifeline and Link Up Reform and Modernization et al.*, WC Docket Nos. 11–42, 09–197, 10–90, Third Report and Order, Further Report and Order, and Order on Reconsideration, FCC 16–38 (2016) (2016 Lifeline Order). The 2016 Lifeline Order changes included requiring ETCs to certify compliance with the new minimum service requirements, moving to rolling annual subscriber recertification, streamlining the first-year ETC audit requirements, and eliminating the temporary address requirements.

The Commission's decision to transition to a centralized National Verifier was outlined in detail in the 2016 Lifeline Order. The National Verifier was established to make eligibility determinations and perform a variety of other functions necessary to enroll subscribers into the Lifeline program. The National Verifier verifies Lifeline subscriber eligibility, checks for duplicate Lifeline subscribers, conducts recertification of subscribers, and calculates support payments to ETCs. ETCs maintain ultimate responsibility for the accuracy of information submitted to the National Verifier and complying with the Lifeline program's rules. The National Verifier was launched over a period of several years from late 2017 through December 2020, serving all states, territories, and the District of Columbia.

On October 30, 2019, the Commission adopted the *Bridging the Digital Divide for Low-Income Consumers*, WC Docket Nos. 17–287, 11–42, 09–197, Fifth Report and Order, Memorandum Opinion and Order and Order on Reconsideration, and Further Notice of Proposed Rulemaking, FCC 19–111 (2019) (2019 Lifeline Order). The 2019 Lifeline Order restored the states' lawful role in designating eligible telecommunications carriers and

eliminated the Lifeline Broadband Provider designation category and its associated designation procedures. The Order also implemented a number of administrative changes to improve the integrity of the Lifeline eligibility verification, enrollment, and recertification processes.

On October 20, 2023, the Commission adopted the *Connect America Fund et al.*, WC Docket No. 10–90 et al. WT Docket No. 10–208, Notice of Proposed Rulemaking and Report and Order, FCC 23–87 (Oct. 20, 2023) (*Administrative Order*). In the *Administrative Order*, the Commission modified, in relevant part, section 205 of the Commission's rules, to require an ETC that intends to relinquish its ETC designation to provide: (1) advance notice to the state commission and to the Commission of such intention to relinquish, and (2) notice to the Commission of the state authority's decision to permit or deny such relinquishment, within 10 days of its decision. These filings must be submitted regardless of whether the ETC is currently receiving federal support.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1223; FR ID 266484]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize

the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before February 10, 2025. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to nicole.ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION: OMB Control Number: 3060–1223.

Title: Payment Instructions from the Eligible Entity Seeking Reimbursement from the TV Broadcaster Relocation Fund.

Form Number: FCC Form 1876.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, Not-for-profit institutions and State, Local or Tribal Government.

Number of Respondents and Responses: 15 respondents; 15 responses.

Estimated Time per Response: 5 hours.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in Middle Class Tax Relief and Job Creation Act of 2012, Public Law 112–96 (Spectrum Act) section 6403(a)(1) and Repack Airwaves Yielding Better Access for Users of Modern Services Act of 2018, Public Law 115–141, Div. P, (RAY BAUM'S Act) section 1452.

Total Annual Burden: 75 hours.

Total Annual Cost: No Cost.

Needs and Uses: The Commission is requesting Office of Management and Budget (OMB) approval for a three-year extension of this information collection.

The Spectrum Act requires the Commission to reimburse broadcast

television licensees for costs “reasonably incurred” in relocating to new channels assigned in the repacking process and Multichannel Video Programming Distributors (MVPDs) for costs reasonably incurred in order to continue to carry the signals of stations relocating to new channels as a result of the repacking process or a winning reverse auction bid.¹

The Commission decided through notice-and-comment rulemaking that it will issue all eligible broadcasters and MVPDs an initial allocation of funds based on estimated costs, which will be available for draw down (from individual accounts in the U.S. Treasury) as the entities incur expenses, followed by a subsequent allocation to the extent necessary. The reason for allowing eligible entities to draw down funds as they incur expenses is to reduce the chance that entities will be unable to finance necessary relocation changes.²

The information collection for which we are requesting approval is necessary for eligible entities to instruct the Commission on how to pay the amounts the entities draw down, and for the entities to make certifications that reduce the risk of waste, fraud, abuse and improper payments.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments, relevant information, or documents regarding the agreements to the Secretary by email at Secretary@fmc.gov, or by mail, Federal Maritime Commission, 800 North Capitol Street, Washington, DC 20573. Comments will be most helpful to the Commission if received within 12 days of the date this notice appears in the **Federal Register**, and the Commission requests that comments be submitted within 7 days on agreements that request expedited review. Copies of agreements are

available through the Commission’s website (www.fmc.gov) or by contacting the Office of Agreements at (202) 523–5793 or tradeanalysis@fmc.gov.

Agreement No.: 011707–021.

Agreement Name: Gulf/South America Discussion Agreement.

Parties: BBC Chartering Carriers GmbH & Co. KG and BBC Chartering Logistics GmbH & Co. KG (acting as a single party); and Intermarine Carriers LLC.

Filing Party: Wayne Rohde; Cozen O’Connor.

Synopsis: The amendment deletes Industrial Maritime Carrier, L.L.C. as a party to the Agreement.

Proposed Effective Date: 12/3/2024.

Location: <https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/684>.

Agreement No.: 201437.

Agreement Name: ONE/WHL Slot Exchange Agreement.

Parties: Ocean Network Express Pte. Ltd; and Wan Hai Lines Ltd. and Wan Hai Lines (Singapore) PTE Ltd. (acting as a single party).

Filing Party: Rebecca Fenneman; Jeffrey/Fenneman Law and Strategy PLLC.

Synopsis: The Agreement authorizes the Parties to exchange slots in the trade between Vietnam, China, Korea, and Taiwan, on the one hand, and the U.S. West Coast on the other hand.

Proposed Effective Date: 12/4/2024.

Location: <https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/86583>.

Dated: December 6, 2024.

Alanna Beck,

Federal Register Alternate Liaison Officer.

FEDERAL MARITIME COMMISSION

Notice of Requests for Additional Information

The Commission gives notice that it has formally requested that the parties to the below listed agreement provide additional information pursuant to 46 U.S.C. 40304(d). This action suspends the statutory effective date until 45 days after the Commission receives all the additional information and documents requested. Interested parties may submit written comments, including relevant information and documents, regarding the agreement to the Secretary by email at Secretary@fmc.gov, or by mail, Federal Maritime Commission, 800 North Capitol Street NW, Washington, DC 20573. Comments may be filed up to fifteen (15) days after publication of this notice appears in the **Federal Register**.

Agreement No.: 201435.

Title: Premier Alliance Agreement.

Parties: HMM Co., Ltd.; Ocean

Network Express Pte. Ltd.; and Yang Ming Joint Service Agreement, FMC Agreement No. 201392. Current parties to the Yang Ming Joint Service Agreement are: Yang Ming Marine Transport Corp. and Yang Ming (Singapore) Pte. Ltd.

By Order of the Federal Maritime Commission.

Dated: December 6, 2024.

Jennifer Everling,

Assistant Secretary.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10515 and CMS–10780]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by February 10, 2025.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for “Comment or Submission” or “More Search Options” to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs; Division of Regulations Development; Attention: Document Identifier/OMB Control Number: Room C4-26-05; 7500 Security Boulevard, Baltimore, Maryland 21244-1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing>

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786-4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection’s supporting statement and associated materials (see **ADDRESSES**).

CMS-10515 Payment Collections Operations Contingency Plan
CMS-10780 Requirements Related to Surprise Billing: Qualifying Payment Amount, Notice and Consent, Disclosure on Patient Protections Against Balance Billing, and State Law Opt-in

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term “collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of

information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collections

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Payment Collections Operations Contingency Plan; *Use:* The Patient Protection and Affordable Care Act, Public Law 111–148, enacted on March 23, 2010, and the Health Care and Education Reconciliation Act, Public Law 111–152, enacted on March 30, 2010 [collectively, the “Affordable Care Act” (ACA)], provides for consumers to receive subsidies based on income to purchase affordable health care on the Exchanges. The U.S. Department of Health and Human Services (HHS) uses a manual process to obtain enrollment and payment data from issuers in States transitioning from Federally-facilitated Exchanges (FFE) and State-based Exchanges on the Federal platform (SBE-FPs) to State-based Exchanges (SBEs) to facilitate the payment of subsidies to issuers on behalf of eligible enrollees. This document describes the data collection requirements related to this manual process, known as the Enrollment and Payment Data template. This extension reduces burden compared to the currently approved collection based on recent program experience. *Form Number:* CMS-10515 (OMB Control Number: 0938-1217); *Frequency:* Annually; *Affected Public:* Private Sector, Business or other for-profit and not-for-profit institutions; *Number of Respondents:* 25; *Number of Responses:* 150; *Total Annual Hours:* 1,500. (For policy questions regarding this collection, contact Jacquelyn Rudich at 301-492-5211.)

2. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Requirements Related to Surprise Billing: Qualifying Payment Amount, Notice and Consent, Disclosure on Patient Protections Against Balance Billing, and State Law Opt-in; *Use:* On December 27, 2020, the Consolidated Appropriations Act, 2021 (Pub. L. 116–260), which included the No Surprises Act, was signed into law. The No Surprises Act provides federal protections against surprise billing and limits out-of-network cost sharing under many of the circumstances in which surprise medical bills arise most frequently. The July 13, 2021 interim

final rules “Requirements Related to Surprise Billing; Part I” (86 FR 36872, July 2021 interim final rules) issued by the Department of Health and Human Services, the Department of Labor, the Department of the Treasury, and the Office of Personnel Management, implement provisions of the No Surprises Act that apply to group health plans, health insurance issuers offering group or individual health insurance coverage, and carriers in the Federal Employees Health Benefits (FEHB) Program that provide protections against balance billing and out-of-network cost sharing with respect to emergency services, non-emergency services furnished by nonparticipating providers related to patient visits to certain types of participating health care facilities, and services furnished by nonparticipating providers of air ambulance services. The July 2021 interim final rules prohibit nonparticipating providers, emergency facilities, and providers of air ambulance services from balance billing participants, beneficiaries, and enrollees in certain situations unless they satisfy certain notice and consent requirements.

The No Surprises Act and the July 2021 interim final rules require group health plans and issuers of health insurance coverage to provide information about qualifying payment amounts (QPAs) to nonparticipating providers and facilities and to provide disclosures on patient protections against balance billing to participants, beneficiaries and enrollees. Self-insured plans opting in to a specified state law are required to provide a disclosure to participants. Certain nonparticipating providers and nonparticipating emergency facilities may provide participants, beneficiaries, and enrollees with notice and obtain their consent to waive balance billing protections, provided certain requirements are met. In addition, certain providers and facilities are required to provide disclosures on patient protections against balance billing to participants, beneficiaries and enrollees. The No Surprises Act requires the Secretary of HHS to audit no more than 25 group health plans and health insurance issuers offering group or individual health insurance coverage annually, and permits additional audits based on complaints, to ensure that such plans and coverage are in compliance with the requirement of applying a QPA and that the QPA applied satisfies the definition under the No Surprises Act with respect to the year involved. *Form Number:* CMS-10780 (OMB control number:

0938–1401); *Frequency*: On Occasion; *Affected Public*: Individuals, State, Local, or Tribal Governments, Private Sector; *Number of Respondents*: 2,477,197; *Total Annual Responses*: 85,148,199; *Total Annual Hours*: 6,006,654. (For policy questions regarding this collection, contact Russell Tipps at 667–290–9640.)

William N. Parham III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

Centers for Medicare & Medicaid Services

[CMS–3460–FN]

Medicare and Medicaid Programs: Approval of Application by the DNV Healthcare USA, Inc. for Continued CMS-Approval of Its Critical Access Hospital Accreditation Program

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice acknowledges the approval of an application by the DNV Healthcare USA, Inc., for continued recognition as a national accrediting organization for Critical Access Hospitals that wish to participate in the Medicare or Medicaid programs.

FOR FURTHER INFORMATION CONTACT: Caecilia Andrews, (410) 786–2190.

SUPPLEMENTARY INFORMATION:

I. Background

Under the Medicare program, eligible beneficiaries may receive covered services in a critical access hospital (CAH), provided that the facility meets certain requirements. Sections 1820(c)(2)(B), 1820(e), and 1861(mm)(1) of the Social Security Act (the Act) establish distinct criteria for facilities seeking designation as a CAH. Regulations concerning provider agreements are at 42 CFR part 489 and those pertaining to activities relating to the survey and certification of facilities are at 42 CFR part 488. Our regulations at 42 CFR part 485, subpart F specify the conditions of participation (CoPs) that a CAH must meet to participate in the Medicare program, the scope of covered services, and the conditions for Medicare payment for CAHs. The regulations at § 485.647 specify that a CAH's psychiatric or rehabilitation

distinct part unit (DPU), if any, must meet the hospital requirements specified in subparts A, B, C, and D of part 482 in order for the CAH DPU to participate in the Medicare program.

Prior to becoming a CAH, to enter into an agreement, a CAH must first be certified by a state survey agency as a hospital complying with the conditions of participation at 42 CFR part 482. It then can convert to a CAH by complying with the conditions or requirements at part 485, subpart F. Thereafter, the CAH is subject to regular surveys by a state survey agency to determine whether it continues to meet these requirements. However, there is an alternative to surveys by state agencies. Certification by a nationally recognized accreditation program can substitute for ongoing state review.

Section 1865(a)(1) of the Act provides that, if a provider entity demonstrates through accreditation by a Centers for Medicare & Medicaid Services (CMS) approved national accrediting organization (AO) that all applicable Medicare requirements are met or exceeded, we will deem those provider entities as having met such requirements. Accreditation by an AO is voluntary and is not required for Medicare participation.

If an AO is recognized by the Secretary of the Department of Health and Human Services (the Secretary) as having standards for accreditation that meet or exceed Medicare requirements, any provider entity accredited by the national accrediting body's approved program would be deemed to meet the Medicare requirements. A national AO applying for approval of its accreditation program under 42 CFR part 488, subpart A, must provide CMS with reasonable assurance that the AO requires the accredited provider entities to meet requirements that are at least as stringent as the Medicare requirements.

Our regulations concerning the approval of AOs are at §§ 488.4 and 488.5. The regulations at § 488.5(e)(2)(i) require an AO to reapply for continued approval of its accreditation program every 6 years or sooner, as determined by CMS. This notice is to announce our continued approval of the DNV Healthcare USA, Inc.'s (DNV's) CAH accreditation program for a period of 4 years.

II. Application Approval Process

Section 1865(a)(3)(A) of the Act provides a statutory timetable to ensure that our review of applications for CMS approval of an accreditation program is conducted in a timely manner. The Act provides us 210 days after the date of receipt of a complete application, with

any documentation necessary to make the determination, to complete our survey activities and application process. Within 60 days after receiving a complete application, we must publish a notice in the **Federal Register** that identifies the national accrediting body making the request, describes the request, and provides no less than a 30-day public comment period. At the end of the 210-day period, we must publish a notice in the **Federal Register** approving or denying the application.

III. Provisions of the Proposed Notice

On June 13, 2024, we published a proposed notice in the **Federal Register** (89 FR 50332), announcing DNV's request for continued approval of its Medicare critical hospital accreditation program. In the proposed notice, we detailed our evaluation criteria. Under section 1865(a)(2) of the Act and in our regulations at § 488.5, we conducted a review of DNV's Medicare CAH accreditation application in accordance with the criteria specified by our regulations, which include, but are not limited to the following:

- An administrative review of DNV's: (1) corporate policies; (2) financial and human resources available to accomplish the proposed surveys; (3) procedures for training, monitoring, and evaluation of its surveyors; (4) ability to investigate and respond appropriately to complaints against accredited facilities; and (5) survey review and decision-making process for accreditation.

- A comparison of DNV's accreditation to our current Medicare CAH conditions of participation (CoPs).
- A documentation review of DNV's survey process to:

- ++ Determine the composition of the survey team, surveyor qualifications, and DNV's ability to provide continuing surveyor training.

- ++ Compare DNV's processes to those of state survey agencies, including survey frequency, and the ability to investigate and respond appropriately to complaints against accredited facilities.

- ++ Evaluate DNV's procedures for monitoring CAHs out of compliance with DNV's program requirements. The monitoring procedures are used only when DNV identifies noncompliance. If noncompliance is identified through validation reviews, the state survey agency monitors corrections as specified at § 488.7(d).

- ++ Assess DNV's ability to report deficiencies to the surveyed facilities and respond to the facility's plan of correction in a timely manner.

- ++ Establish DNV's ability to provide CMS with electronic data and reports necessary for effective validation and

assessment of the organization's survey process.

++ Determine the adequacy of staff and other resources.

++ Confirm DNV's ability to provide adequate funding for performing required surveys.

++ Confirm DNV's policies with respect to whether surveys are unannounced.

++ Obtain DNV's agreement to provide CMS with a copy of the most current accreditation survey together with any other information related to the survey as we may require, including corrective action plans.

IV. Analysis of and Responses to Public Comments on the Proposed Notice

In accordance with section 1865(a)(3)(A) of the Act, the June 13, 2024 proposed notice also solicited public comments regarding whether DNV's requirements met or exceeded the Medicare CoPs for CAHs. We did not receive any comments.

V. Provisions of the Final Notice

A. Differences Between DNV's Standards and Requirements for Accreditation and Medicare Conditions and Survey Requirements

We compared DNV's CAH requirements and survey process with the Medicare CoPs and survey process as outlined in the State Operations Manual (SOM). Our review and evaluation of DNV's CAH application were conducted as described in section III. of this notice and has yielded the following areas where, as of the date of this notice, DNV's has completed revising its standards and certification processes in order to:

- Meet the standard's requirements of all of the following regulations:

++ Section 485.614, to incorporate language ensuring promotion and protection of each patient's rights.

++ Section 485.614(b)(4), to incorporate language ensuring the patient's family member or representative of their choice and their own physician are notified promptly of their admission to the hospital.

++ Section 485.614(d)(2), to incorporate language that the patient has the right to access their medical records, including current medical records, upon an oral or written request, in the form and format requested by the individual, if it is readily producible in such form and format.

++ Section 485.618(d)(1)(ii)(A), to add the definition of a CAH that is located in an area designated as a frontier area.

++ Section 485.625(d), to specify that the CAH must review and update its

emergency preparedness training program at least every two years.

++ Section 485.625(d)(1), to include language that training must include: prompt reporting and extinguishing of fires; protection and, where necessary, evacuation, of patients, personnel, and guests; fire prevention; and cooperation with firefighting and disaster authorities, to all new and existing staff, individuals providing services under arrangement, and volunteers, consistent with their expected roles.

++ Section 485.625(d)(1)(iv), to specify that staff must be able to demonstrate knowledge of their role during an emergency.

++ Section 485.627(b), to include the requirement for addresses within the disclosure.

++ Section 485.631(a)(3), to clarify that staff is sufficient to provide the services essential to the operation of the CAH.

++ Section 485.638(b)(2), to provide additional language that there must be written policies and procedures that govern the use and removal of records from the CAH and the conditions for the release of information.

++ Section 485.639(c), to revise the language from "directing" to "administering" anesthesia.

++ Section 485.639(c)(2), to clarify the requirement surrounding a Certified Registered Nurse Anesthetist supervision requirements under the operating practitioner when administering anesthesia.

++ Section 485.640, to include that the CAH's infection prevention and control and antibiotic stewardship program is an active facility-wide program.

++ Section 485.645(d)(5), to encompass the notation of comprehensive assessment of a resident's needs, strengths, goals, life history and preferences.

++ Section 485.645(d)(8), to state "assisted nutrition and hydration."

In addition to the standards review, we also reviewed DNV's comparable survey processes, which were conducted as described in section III. of this notice, and yielded the following areas where, as of the date of this notice, DNV has completed revising its survey processes, in order to demonstrate that it uses survey processes that are comparable to state survey agency processes by:

- Revising DNV's complaint policy to reflect that any withdrawals from accreditation and deemed status, whether voluntary or involuntary, must be reported within three business days.

- Revising DNV's internal policies to ensure all surveyors are qualified.

- Providing training and education to surveyors to ensure records are reviewed and reported consistently on DNV's survey report.

- Developing a process to verify levels of deficiency citations for the physical environment and Life Safety Codes citations to ensure facilities are appropriately cited based on the potential for harm.

- Ensuring citations are closely aligned or cross-walked from DNV's standard to the Medicare condition(s).

- Developing process or policy to ensure swing beds are reviewed, when applicable, and providing education to surveyors to adequately annotate swing bed reviews in DNV's surveyor notes.

- Providing additional education to surveyors related to observations of care and patient interviews.

- Providing additional clarifications on the survey process for medical record reviews comparable to those in the SOM, Appendix W.

B. Term of Approval

Based on our review and observations described in section III. and section V. of this notice, we approve DNV as a national AO for CAHs that request participation in the Medicare program. The decision announced in this final notice is effective December 23, 2024 through December 23, 2028 (4 years).

VI. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping, or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Administrator of the Centers for Medicare & Medicaid Services (CMS), Chiquita Brooks-LaSure, having reviewed and approved this document, authorizes Vanessa Garcia, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Vanessa Garcia,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Unaccompanied Children Office of the Ombuds (UCOO) Statement of Organization, Functions, and Delegations of Authority

AGENCY: Administration for Children and Families, Department of Health and Human Services (HHS).

ACTION: Notice of reorganization; Establishment of the Unaccompanied Children Office of the Ombuds (UCOO).

SUMMARY: The Administration for Children and Families (ACF) has reorganized to establish the Unaccompanied Children Office of the Ombuds (UCOO) within the Immediate Office of the Assistant Secretary, to be headed by a Director (“Ombuds”), who reports directly to the HHS Assistant Secretary for Children and Families.

FOR FURTHER INFORMATION CONTACT: Leah Chavla, Senior Advisor, Administration for Children and Families, 330 C Street SW, Washington, DC 20201, (202) 838–3307.

SUPPLEMENTARY INFORMATION: This notice amends Part K of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (HHS), Administration for Children and Families (ACF), as follows: Chapter KA, Immediate Office of the Assistant Secretary as last amended by 88 FR 17229–17233 dated March 22, 2023.

I. Amend Chapter K, Administration for Children and Families, Chapter KA, Office of the Assistant Secretary for Children and Families, Subchapter KA.10 Organization, by Adding

Unaccompanied Children Office of the Ombuds (KAO)

II. Amend Chapter KA, Office of the Assistant Secretary for Children and Families, by Establishing Chapter KAO, Unaccompanied Children Office of the Ombuds

KAO.00 Mission. The Mission of the Unaccompanied Children Office of the Ombuds (UCOO) is to be an independent, impartial office with authority to receive reports, including confidential and informal reports, of concerns regarding the care and custody of unaccompanied children; to investigate such reports; to work collaboratively with the Office of Refugee Resettlement (ORR) to potentially resolve such reports; issue

its own reports concerning UCOO’s efforts; and make recommendations to ORR regarding UC program policies and procedures related to protecting unaccompanied children in the care and custody of ORR.

KAO.10 Organization. The UCOO is headed by a Director (“Ombuds”), who reports directly to the ACF Assistant Secretary, and consists of:

Immediate Office of the Ombuds for Unaccompanied Children (KAO1)
Division of Case Management (KAO2)
Division of Operations (KAO3)

KAO.20 Functions. The UCOO may engage in activities including, but not limited to: (1) Receiving reports from unaccompanied children, potential sponsors, other stakeholders in a child’s case, and the public regarding ORR’s adherence to its regulations and standards; (2) Investigating implementation of or adherence to Federal law and ORR regulations, in response to reports it receives, and meeting with interested parties to receive input on ORR’s compliance with Federal law and ORR policy; (3) Requesting and receiving information or documents, such as the Ombuds deems relevant, from ORR and ORR care provider facilities, to determine implementation of and adherence to Federal law and ORR policy; (4) Preparing formal reports and recommendations on findings to publish or present, including an annual report describing activities conducted in the prior year; (5) Conducting investigations, interviews, and site visits at care provider facilities as necessary to aid in the preparation of reports and recommendations; (6) Visiting ORR care providers in which unaccompanied children are or will be housed; (7) Reviewing individual circumstances, including, but not limited to, concerns about unaccompanied children’s access to services, ability to communicate with service providers, parents/legal guardians of children in ORR custody, sponsors, and matters related to transfers within or discharge from ORR care; (8) Making efforts to resolve complaints or concerns raised by interested parties as it relates to ORR’s implementation or adherence to Federal law or ORR policy; (9) Hiring and retaining others, including, but not limited to, independent experts, specialists, assistants, interpreters, and translators to assist the Ombuds in the performance of their duties; (10) Making non-binding recommendations to ORR regarding its policies and procedures, specific to protecting unaccompanied children in the care of ORR; (11) Providing general educational

information about pertinent laws, regulations, and policies, ORR child advocates, and legal services as appropriate; and (12) Advising and updating the Director of ORR, Assistant Secretary, and the Secretary, as appropriate, on the status of ORR’s implementation and adherence with Federal law or ORR policy.

The Ombuds shall manage the files, records, and other information of the program, regardless of format, and such files must be maintained in a manner that preserves the confidentiality of the records except in instances of imminent harm or judicial action and is prohibited from using or sharing information for any immigration enforcement related purpose.

III. Continuation of Policy

Except as inconsistent with this reorganization, all statements of policy and interpretations with respect to organizational components affected by this notice within ACF, heretofore issued and in effect on this date of this reorganization are continued in full force and effect.

IV. Delegation of Authority

All delegations and re-delegations of authority made to officials and employees of affected organizational components will continue in them, or their successors, pending further re-delegations, provided they are consistent with this reorganization.

V. Funds, Personnel, and Equipment

Transfer of organizations and functions affected by this reorganization shall be accompanied in each instance by direct and support funds, positions, personnel, records, equipment, supplies, and other resources.

This reorganization will be effective upon date of signature.

Xavier Becerra,

Secretary, Health and Human Services.

[FR Doc. 2024–29188 Filed 12–9–24; 11:15 am]

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

12th Amendment to Declaration Under the Public Readiness and Emergency Preparedness Act for Medical Countermeasures Against COVID–19

ACTION: Notice of amendment.

SUMMARY: The Secretary issues this amendment pursuant to section 319F–3 of the Public Health Service Act to

extend the duration of the Declaration to December 31, 2029, and to republish the Declaration in full.

DATES: This amendment is effective as of January 1, 2025.

FOR FURTHER INFORMATION CONTACT: L. Paige Ezernack, Administration for Strategic Preparedness and Response, U.S. Department of Health and Human Services, 400 7th St. SW, Washington, DC 20024; 202–260–0365, paige.ezernack@hhs.gov.

SUPPLEMENTARY INFORMATION: The Public Readiness and Emergency Preparedness (PREP) Act authorizes the Secretary of Health and Human Services (the Secretary) to issue a Declaration to provide liability immunity to certain individuals and entities (Covered Persons) against any claim of loss caused by, arising out of, relating to, or resulting from the manufacture, distribution, administration, or use of medical countermeasures (Covered Countermeasures), except for claims involving “willful misconduct” as defined in the PREP Act. Under the PREP Act, a Declaration may be amended as circumstances warrant.

The PREP Act was enacted on December 30, 2005, as Public Law 109–148, Division C, section 2. It amended the Public Health Service (PHS) Act, adding section 319F–3, which addresses liability immunity, and section 319F–4, which creates a compensation program. These sections are codified at 42 U.S.C. 247d–6d and 42 U.S.C. 247d–6e, respectively. Section 319F–3 of the PHS Act has been amended by the Pandemic and All-Hazards Preparedness Reauthorization Act (PAHPRA), Public Law 113–5, enacted on March 13, 2013, and the Coronavirus Aid, Relief, and Economic Security (CARES) Act, Public Law 116–136, enacted on March 27, 2020, to expand Covered Countermeasures under the PREP Act.

On January 31, 2020, the former Secretary, Alex M. Azar II, declared a public health emergency (PHE) pursuant to section 319 of the PHS Act, 42 U.S.C. 247d, effective January 27, 2020, for the entire United States to aid in the response of the nation’s health care community to the COVID–19 outbreak. Pursuant to section 319 of the PHS Act, the declaration was renewed effective April 26, 2020, July 25, 2020, October 23, 2020, January 21, 2021, April 21, 2021, July 20, 2021, October 15, 2021, January 14, 2022, April 12, 2022, July 15, 2022, October 13, 2022, January 11, 2023, and February 11, 2023. The PHE declared under section 319 of the PHS Act ended on May 11, 2023. Nonetheless, as stated in section I of this amended PREP Act Declaration, I have

determined there is a credible risk that COVID–19 may in the future constitute such an emergency and am thus amending this Declaration to prepare for and mitigate that risk.

On March 10, 2020, former Secretary Azar issued a Declaration under the PREP Act for medical countermeasures against COVID–19 (85 FR 15198, Mar. 17, 2020) (the Declaration). On April 10, 2020, the former Secretary amended the Declaration under the PREP Act to extend liability immunity to covered countermeasures authorized under the CARES Act (85 FR 21012, Apr. 15, 2020). On June 4, 2020, the former Secretary amended the Declaration to clarify that Covered Countermeasures under the Declaration include qualified countermeasures that limit the harm COVID–19 might otherwise cause (85 FR 35100, June 8, 2020). On August 19, 2020, the former Secretary amended the Declaration to add additional categories of Qualified Persons and amend the category of disease, health condition, or threat for which he recommended the administration or use of the Covered Countermeasures. (85 FR 52136, Aug. 24, 2020).

On December 3, 2020, the former Secretary amended the Declaration to incorporate Advisory Opinions of the General Counsel interpreting the PREP Act and the Secretary’s Declaration and authorizations issued by the Department’s Office of the Assistant Secretary for Health as an Authority Having Jurisdiction to respond; added an additional category of qualified persons under section V of the Declaration, *i.e.*, healthcare personnel using telehealth to order or administer Covered Countermeasures for patients in a state other than the state where the healthcare personnel are permitted to practice; made explicit that the Declaration covers all qualified pandemic and epidemic products as defined under the PREP Act; added a third method of distribution to provide liability protections for, among other things, private distribution channels; made explicit that there can be situations where not administering a covered countermeasure to a particular individual can fall within the PREP Act and the Declaration’s liability protections; made explicit that there are substantive Federal legal and policy issues and interests in having a unified whole-of-nation response to the COVID–19 pandemic among Federal, state, local, and private-sector entities; revised the effective time period of the Declaration; and republished the Declaration in full (85 FR 79190, Dec. 9, 2020).

On February 2, 2021, the Acting Secretary Norris Cochran amended the Declaration to add additional categories of Qualified Persons authorized to prescribe, dispense, and administer COVID–19 vaccines that are Covered Countermeasures under the Declaration (86 FR 7872, Feb. 2, 2021). On February 16, 2021, the Acting Secretary amended the Declaration to add additional categories of Qualified Persons authorized to prescribe, dispense, and administer COVID–19 vaccines that are covered countermeasures under the Declaration (86 FR 9516, Feb. 16, 2021) and on February 22, 2021, the Department filed a notice of correction to the February 2 and February 16 notices correcting effective dates stated in the Declaration, and correcting the description of qualified persons added by the February 16, 2021, amendment (86 FR 10588, Feb. 22, 2021). On March 11, 2021, the Acting Secretary amended the Declaration to add additional Qualified Persons authorized to prescribe, dispense, and administer Covered Countermeasures under the Declaration (86 FR 14462, Mar. 16, 2021).

On August 4, 2021, I amended the Declaration to clarify categories of Qualified Persons and to expand the scope of authority for certain Qualified Persons to administer seasonal influenza vaccines to adults (86 FR 41977, Aug. 4, 2021). On September 14, 2021, I amended the Declaration to expand the scope of authority for certain Qualified Persons to administer COVID–19 therapeutics subcutaneously, intramuscularly, or orally (86 FR 51160, Sept. 14, 2021), and on September 30, 2021, the Department filed a notice of correction to the September 14 notice clarifying the terms “ACIP recommendations” and “ACIP’s standard immunization schedules” (86 FR 54696, Oct. 4, 2021). On January 7, 2022, I amended the Declaration to expand the scope of authority for licensed pharmacists to order and administer and qualified pharmacy interns to administer seasonal influenza vaccines (87 FR 982, January 7, 2022).

On May 9, 2023, I amended the Declaration to update the determination of a PHE to state that COVID–19 continues to present a credible risk of a future PHE after the end of the PHE declared pursuant to section 319 of the PHS Act; to add a new limitation on distribution to provide coverage under the PREP Act Declaration through December 31, 2024, for manufacturing, distribution, administration and use of Covered Countermeasures while they are authorized for emergency use (EUA) by the U.S. Food and Drug

Administration (FDA) pursuant to section 564 of the Federal Food, Drug & Cosmetic (FD&C) Act, regardless of any Federal agreement related to manufacturing, distribution, administration or use of the countermeasures, and regardless of any Federal, regional, state, or local emergency Declaration; to add a new limitation on distribution to provide coverage under this PREP Act Declaration through December 31, 2024, for manufacturing, distribution, administration and use of Covered Countermeasures that are COVID-19 vaccines licensed by FDA, and any FDA-approved or cleared in vitro diagnostic product or other device used to treat, diagnose, cure, prevent, or mitigate COVID-19, or the transmission of SARS-CoV-2 or a virus mutating therefrom regardless of any Federal agreement related to manufacturing, distribution, administration or use of the vaccines, and regardless of any Federal, regional, state, or local emergency Declaration; to clarify that the category of disease, health condition or health threat includes the burden on healthcare providers caused by coterminous seasonal influenza infections and COVID-19 infections; to extend the time period of PREP Act coverage through December 31, 2024, to Qualified Persons who are licensed pharmacists to order and administer, and pharmacy interns and qualified pharmacy technicians to administer, Covered Countermeasures that are COVID-19 vaccines, seasonal influenza vaccines, and COVID-19 tests regardless of any Federal agreement related to manufacturing, distribution, administration or use of these Covered Countermeasures and regardless of any Federal, regional, state, or local emergency Declaration or other limitations on distribution stated in section VII of the Declaration; to clarify the time period of coverage for other qualified persons authorized under section V of the Declaration; and to extend the duration of the Declaration to December 2024 (88 FR 30769, May 12, 2023).

I am now amending section XII of the Declaration to extend the time period of PREP Act coverage through December 31, 2029. COVID-19 continues to present a credible risk of a future public health emergency. COVID-19 continues to cause significant serious illness, morbidity, and mortality during outbreaks. The risk of domestic cases is high due to ongoing outbreaks that continue domestically and internationally in the year since the PHE for COVID-19 ended. Development of

and stockpiling vaccines, therapeutics, devices, and diagnostics for COVID-19 continues to be needed for U.S. preparedness against the credible threat of a public health emergency due to outbreaks of COVID-19. Continued coverage under the PREP Act, as provided in this Declaration, is intended to prepare for and mitigate the credible risk presented by COVID-19. This includes extending the time period for PREP Act coverage for licensed pharmacists, pharmacy interns, and qualified technicians, which allows for continued access by the recipient Population to Covered Countermeasures that are COVID-19 vaccines, seasonal influenza vaccines and COVID-19 tests. As stated in prior amendments to this Declaration, licensed pharmacists, pharmacy interns and qualified pharmacy technicians are well positioned to provide continued access to Covered Countermeasures, particularly in certain areas or for certain populations that have too few primary-care providers or that are otherwise medically underserved. As of 2022, nearly 90 percent of Americans lived within five miles of a community pharmacy. During the COVID-19 pandemic, the majority of Americans have received their COVID-19 vaccines and tests from a pharmacy. In addition, continued access by the Population to seasonal influenza vaccines mitigates risks that seasonal influenza infections, in conjunction with COVID-19 infections, could overwhelm healthcare providers.

As qualified persons, these licensed pharmacists, pharmacy interns, and qualified pharmacy technicians will be afforded liability protections in accordance with the PREP Act and the terms of this amended Declaration. To the extent that any State law would otherwise prohibit these healthcare professionals who are a “qualified person” from prescribing, dispensing, or administering Covered Countermeasures that are COVID-19 vaccines, seasonal influenza vaccines or COVID-19 tests, such law is preempted.

Other conforming changes and technical corrections are made throughout the Declaration for consistency and clarity.

Declaration, as Amended, for Public Readiness and Emergency Preparedness Act Coverage for Medical Countermeasures Against COVID-19

To the extent any term previously in the Declaration, including its amendments, is inconsistent with any provision of this Republished Declaration, the terms of this Republished Declaration are controlling.

This Declaration must be construed in accordance with the Advisory Opinions of the Office of the General Counsel (Advisory Opinions). I incorporate those Advisory Opinions as part of this Declaration. Declaration is a “requirement” under the PREP Act.

I. Determination of Public Health Emergency

42 U.S.C. 247d–6d(b)(1)

I have determined that the spread of SARS-CoV-2 or a virus mutating therefrom and the resulting disease COVID-19 constitutes a credible risk of a future public health emergency. I have also determined that use of any respiratory protective device approved by the National Institute for Occupational Safety and Health (NIOSH) under 42 CFR part 84, or any successor regulations, was a priority for use during the public health emergency that former Secretary Azar declared on January 31, 2020, under section 319 of the PHS Act for the entire United States to aid in the response of the nation’s healthcare community to the COVID-19 outbreak, and that ended on May 11, 2023.

II. Factors Considered

42 U.S.C. 247d–6d(b)(6)

I have considered the desirability of encouraging the design, development, clinical testing, or investigation, manufacture, labeling, distribution, formulation, packaging, marketing, promotion, sale, purchase, donation, dispensing, prescribing, administration, licensing, and use of the Covered Countermeasures.

III. Recommended Activities

42 U.S.C. 247d–6d(b)(1)

I recommend, under the conditions stated in this Declaration, the manufacture, testing, development, distribution, administration, and use of the Covered Countermeasures.

IV. Liability Protections

42 U.S.C. 247d–6d(a), 247d–6d(b)(1)

Liability protections as prescribed in the PREP Act and conditions stated in this Declaration are in effect for the Recommended Activities described in Section III.

V. Covered Persons

42 U.S.C. 247d–6d(i)(2), (3), (4), (6), (8)(A) and (B)

Covered Persons who are afforded liability immunity under this Declaration are “manufacturers,” “distributors,” “program planners,” “qualified persons,” and their officials,

agents, and employees, as those terms are defined in the PREP Act, and the United States.

“Order” as used herein and in guidance issued by the Office of the Assistant Secretary for Health means a provider medication order, which includes prescribing of vaccines, or a laboratory order, which includes prescribing laboratory orders, if required.

“Qualified person” includes (A) a licensed health professional or other individual who is authorized to prescribe, administer, or dispense such countermeasures under the law of the State in which the countermeasure was prescribed, administered, or dispensed; or (B) “a person within a category of persons so identified in a Declaration by the Secretary” under subsection (b) of the PREP Act. 42 U.S.C. 247d–6d(i)(8)

In addition, I have determined that the following additional persons are qualified persons:

(a) Any person authorized in accordance with the public health and medical emergency response of the Authority Having Jurisdiction, as described in Section VII below, to prescribe, administer, deliver, distribute, or dispense the Covered Countermeasures, and their officials, agents, employees, contractors, and volunteers, following a Declaration of an Emergency, as that term is defined in Section VII of this Declaration;

(b) Any person authorized to prescribe, administer, or dispense the Covered Countermeasures or who is otherwise authorized to perform an activity under an Emergency Use Authorization in accordance with Section 564 of the FD&C Act.

(c) Any person authorized to prescribe, administer, or dispense Covered Countermeasures in accordance with section 564A of the FD&C Act.

(d) A State-licensed pharmacist who orders and administers, and pharmacy interns and qualified pharmacy technicians who administer (if the pharmacy intern or technician acts under the supervision of such pharmacist and the pharmacy intern or technician is licensed or registered by his or her State board of pharmacy), (1) vaccines that the Centers for Disease Control and Prevention (CDC)/Advisory Committee on Immunization Practices (ACIP) recommend to persons ages three through 18 according to CDC’s/ACIP’s standard immunization schedule; or (2) seasonal influenza vaccine administered by qualified pharmacy technicians and interns that the CDC/ACIP recommends to persons aged 19 and older according to CDC’s/ACIP’s standard immunization schedule; or (3) FDA-authorized or

FDA-licensed COVID–19 vaccines to persons ages three or older. Such State-licensed pharmacists and the State-licensed or registered interns or technicians under their supervision are qualified persons only if the following requirements are met:

i. The vaccine must be authorized, approved, or licensed by the FDA;

ii. In the case of a COVID–19 vaccine, the vaccination must be ordered and administered according to CDC’s/ACIP’s COVID–19 vaccine recommendation(s);

iii. In the case of a childhood vaccine, the vaccination must be ordered and administered according to CDC’s/ACIP’s standard immunization schedule;

iv. In the case of seasonal influenza vaccine administered by qualified pharmacy technicians and interns, the vaccination must be ordered and administered according to CDC’s/ACIP’s standard immunization schedule;

v. In the case of pharmacy technicians, the supervising pharmacist must be readily and immediately available to the immunizing qualified pharmacy technician;

vi. The licensed pharmacist must have completed the immunization training that the licensing State requires for pharmacists to order and administer vaccines. If the State does not specify training requirements for the licensed pharmacist to order and administer vaccines, the licensed pharmacist must complete a vaccination training program of at least 20 hours that is approved by the Accreditation Council for Pharmacy Education (ACPE) to order and administer vaccines. Such a training program must include hands on injection technique, clinical evaluation of indications and contraindications of vaccines, and the recognition and treatment of emergency reactions to vaccines;

vii. The licensed or registered pharmacy intern and qualified pharmacy technician must complete a practical training program that is approved by the ACPE. This training program must include hands-on injection technique, clinical evaluation of indications and contraindications of vaccines, and the recognition and treatment of emergency reactions to vaccines;

viii. The licensed pharmacist, licensed or registered pharmacy intern, and qualified pharmacy technician must have a current certificate in basic cardiopulmonary resuscitation;

ix. The licensed pharmacist must complete a minimum of two hours of ACPE-approved, immunization-related continuing pharmacy education during each State licensing period;

x. The licensed pharmacist must comply with recordkeeping and reporting requirements of the jurisdiction in which he or she administers vaccines, including informing the patient’s primary care provider when available, submitting the required immunization information to the State or local immunization information system (vaccine registry), complying with requirements with respect to reporting adverse events, and complying with requirements whereby the person administering a vaccine must review the vaccine registry or other vaccination records prior to administering a vaccine;

xi. The licensed pharmacist must inform his or her childhood-vaccination patients and the adult caregiver accompanying the child of the importance of a well-child visit with a pediatrician or other licensed primary care provider and refer patients as appropriate; and

xii. The licensed pharmacist, the licensed or registered pharmacy intern and the qualified pharmacy technician must comply with any applicable requirements (or conditions of use) as set forth in the CDC COVID–19 vaccination provider agreement and any other federal requirements that apply to the administration of COVID–19 vaccine(s).

(e) Healthcare personnel using telehealth to order or administer Covered Countermeasures for patients in a state other than the state where the healthcare personnel are licensed or otherwise permitted to practice. When ordering and administering Covered Countermeasures by means of telehealth to patients in a state where the healthcare personnel are not already permitted to practice, the healthcare personnel must comply with all requirements for ordering and administering Covered Countermeasures to patients by means of telehealth in the state where the healthcare personnel are permitted to practice. Any state law that prohibits or effectively prohibits such a qualified person from ordering and administering Covered Countermeasures by means of telehealth is preempted. Nothing in this Declaration shall preempt state laws that permit additional persons to deliver telehealth services.

(f) Any healthcare professional or other individual who holds an active license or certification permitting the person to prescribe, dispense, or administer vaccines under the law of any State as of the effective date of this amendment, or a pharmacist or pharmacy intern as authorized under the section V(d) of this Declaration, who

prescribes, dispenses, or administers COVID-19 vaccines that are Covered Countermeasures under section VI of this Declaration in any jurisdiction where the PREP Act applies, other than the State in which the license or certification is held, in association with a COVID-19 vaccination effort by a federal, state, local, tribal, or territorial authority or by an institution in the State in which the COVID-19 vaccine Covered Countermeasure is administered, so long as the license or certification of the healthcare professional has not been suspended or restricted by any licensing authority, surrendered while under suspension, discipline or investigation by a licensing authority or surrendered following an arrest, and the individual is not on the List of Excluded Individuals/Entities maintained by the Office of Inspector General, subject to Documentation of completion of the COVID-19 (CDC) Vaccine Training Modules and, for healthcare providers who are not currently practicing, documentation of an observation period by a currently practicing healthcare professional experienced in administering intramuscular injections, and for whom administering intramuscular injections is in their ordinary scope of practice, who confirms competency of the healthcare provider in preparation and administration of the COVID-19 vaccine(s) to be administered.

(g) Any member of a uniformed service (including members of the National Guard in a Title 32 duty status) (hereafter in this paragraph “service member”) or federal government, employee, contractor, or volunteer who prescribes, administers, delivers, distributes or dispenses a Covered Countermeasure. Such federal government service members, employees, contractors, or volunteers are qualified persons if the following requirement is met: The executive department or agency by or for which the federal service member, employee, contractor, or volunteer is employed, contracts, or volunteers has authorized or could authorize that service member, employee, contractor, or volunteer to prescribe, administer, deliver, distribute, or dispense the Covered Countermeasure as any part of the duties or responsibilities of that service member, employee, contractor, or volunteer, even if those authorized duties or responsibilities ordinarily would not extend to members of the public or otherwise would be more limited in scope than the activities such service member, employees, contractors,

or volunteers are authorized to carry out under this Declaration.

(h) The following healthcare professionals and students in a healthcare profession training program subject to the requirements of this paragraph:

1. Any midwife, paramedic, advanced or intermediate emergency medical technician (EMT), physician assistant, respiratory therapist, dentist, podiatrist, optometrist, or veterinarian licensed or certified to practice under the law of any state who prescribes, dispenses, or administers COVID-19 vaccines that are Covered Countermeasures under section VI of this Declaration in any jurisdiction where the PREP Act applies in association with a COVID-19 vaccination effort by a state, local, tribal or territorial authority or by an institution in which the COVID-19 vaccine covered countermeasure is administered;

2. Any physician, advanced practice registered nurse, registered nurse, practical nurse, pharmacist, pharmacy intern, midwife, paramedic, advanced or intermediate EMT, respiratory therapist, dentist, physician assistant, podiatrist, optometrist, or veterinarian who has held an active license or certification under the law of any State within the last five years, which is inactive, expired or lapsed, who prescribes, dispenses, or administers COVID-19 vaccines that are Covered Countermeasures under section VI of this Declaration in any jurisdiction where the PREP Act applies in association with a COVID-19 vaccination effort by a state, local, tribal or territorial authority or by an institution in which the COVID-19 vaccine Covered Countermeasure is administered, so long as the license or certification was active and in good standing prior to the date it went inactive, expired or lapsed and was not revoked by the licensing authority, surrendered while under suspension, discipline, or investigation by a licensing authority or surrendered following an arrest, and the individual is not on the List of Excluded Individuals/Entities maintained by the Office of Inspector General;

3. Any medical, nursing, pharmacy, pharmacy intern, midwife, paramedic, advanced or intermediate EMT, physician assistant, respiratory therapy, dental, podiatry, optometry or veterinary student with appropriate training in administering vaccines as determined by his or her school or training program and supervision by a currently practicing healthcare professional experienced in administering intramuscular injections

who administers COVID-19 vaccines that are Covered Countermeasures under section VI of this Declaration in any jurisdiction where the PREP Act applies in association with a COVID-19 vaccination effort by a state, local, tribal or territorial authority or by an institution in which the COVID-19 vaccine Covered Countermeasure is administered;

Subject to the following requirements:

i. The vaccine must be authorized, approved, or licensed by the FDA;

ii. Vaccination must be ordered and administered according to CDC’s/ACIP’s COVID-19 vaccine recommendation(s);

iii. The healthcare professionals and students must have documentation of completion of the CDC COVID-19 Vaccine Training Modules; and if applicable, such additional training as may be required by the state, territory, locality, or tribal area in which they are prescribing, dispensing, or administering COVID-19 vaccines;

iv. The healthcare professionals and students must have documentation of an observation period by a currently practicing healthcare professional experienced in administering intramuscular injections, and for whom administering vaccinations is in their ordinary scope of practice, who confirms competency of the healthcare provider or student in preparation and administration of the COVID-19 vaccine(s) to be administered and, if applicable, such additional training as may be required by the state, territory, locality, or tribal area in which they are prescribing, dispensing, or administering COVID-19 vaccines;

v. The healthcare professionals and students must have a current certificate in basic cardiopulmonary resuscitation;

vi. The healthcare professionals and students must comply with recordkeeping and reporting requirements of the jurisdiction in which he or she administers vaccines, including informing the patient’s primary-care provider when available, submitting the required immunization information to the state or local immunization information system (vaccine registry), complying with requirements with respect to reporting adverse events, and complying with requirements whereby the person administering a vaccine must review the vaccine registry or other vaccination records prior to administering a vaccine; and

vii. The healthcare professionals and students comply with any applicable requirements (or conditions of use) as set forth in the CDC COVID-19 vaccination provider agreement and any other federal requirements that apply to

the administration of COVID-19 vaccine(s).

(i) A State-licensed pharmacist who orders and administers, and pharmacy interns and qualified pharmacy technicians who administer (if the pharmacy intern or technician acts under the supervision of such pharmacist and the pharmacy intern or technician is licensed or registered by his or her State board of pharmacy) FDA-authorized, approved, or licensed COVID-19 therapeutics. Such State-licensed pharmacists and the State licensed or registered interns or technicians under their supervision are qualified persons only if the following requirements are met:

i. The COVID-19 therapeutic must be authorized, approved, or licensed by the FDA;

ii. In the case of a licensed pharmacist ordering a COVID-19 therapeutic, the therapeutic must be ordered for subcutaneous, intramuscular, or oral administration and in accordance with the FDA approval, authorization, or licensing;

iii. In the case of licensed pharmacists, qualified pharmacy technicians, and licensed or registered pharmacy interns administering the COVID-19 therapeutic, the therapeutic must be administered subcutaneously, intramuscularly, or orally in accordance with the FDA approval, authorization, or licensing;

iv. In the case of qualified pharmacy technicians, the supervising pharmacist must be readily and immediately available to the qualified pharmacy technician;

v. In the case of COVID-19 therapeutics administered through intramuscular or subcutaneous injections, the licensed pharmacist, licensed or registered pharmacy intern and qualified pharmacy technician must complete a practical training program that is approved by the ACPE. This training program must include hands-on injection technique, clinical evaluation of indications and contraindications of COVID-19 therapeutics, the recognition and treatment of emergency reactions to COVID-19 therapeutics, and any additional training required in the FDA approval, authorization, or licensing;

vi. The licensed pharmacist, licensed or registered pharmacy intern and qualified pharmacy technician must have a current certificate in basic cardiopulmonary resuscitation;

vii. The licensed pharmacist must comply with recordkeeping and reporting requirements of the jurisdiction in which he or she administers COVID-19 therapeutics; including informing the patient's

primary-care provider when available and complying with requirements with respect to reporting adverse events; and

viii. The licensed pharmacist, the licensed or registered pharmacy intern and the qualified pharmacy technician must comply with any applicable requirements (or conditions of use) that apply to the administration of COVID-19 therapeutics.

(j) Any pharmacist who holds an active license or certification permitting the person to prescribe, dispense, or administer vaccines under the law of any State or who is authorized under section V(d) of this Declaration who prescribes, dispenses, or administers seasonal influenza vaccines, or a pharmacy intern as authorized under the section V(d) of this Declaration who administers seasonal influenza vaccines, in any jurisdiction where the PREP Act applies, other than the State in which the license or certification is held, so long as the license or certification of the pharmacist or pharmacy intern has not been suspended or restricted by any licensing authority, surrendered while under suspension, discipline or investigation by a licensing authority or surrendered following an arrest, and the individual is not on the List of Excluded Individuals/Entities maintained by the Office of Inspector General.

Nothing in this Declaration shall be construed to affect the National Vaccine Injury Compensation Program, including an injured party's ability to obtain compensation under that program. Covered countermeasures that are subject to the National Vaccine Injury Compensation Program authorized under 42 U.S.C. 300aa-10 *et seq.* are covered under this Declaration for the purposes of liability immunity and injury compensation only to the extent that injury compensation is not provided under that Program. All other terms and conditions of the Declaration apply to such covered countermeasures.

VI. Covered Countermeasures

42 U.S.C. 247d-6b(c)(1)(B), 42 U.S.C. 247d-6d(i)(1) and (7)

Covered Countermeasures are:

(a) Any antiviral, any drug, any biologic, any diagnostic, any other device, any respiratory protective device, or any vaccine manufactured, used, designed, developed, modified, licensed, or procured:

i. To diagnose, mitigate, prevent, treat, or cure COVID-19, or the transmission of SARS-CoV-2 or a virus mutating therefrom; or

ii. to limit the harm that COVID-19, or the transmission of SARS-CoV-2 or

a virus mutating therefrom, might otherwise cause;

(b) a product manufactured, used, designed, developed, modified, licensed, or procured to diagnose, mitigate, prevent, treat, or cure a serious or life-threatening disease or condition caused by a product described in paragraph (a) above;

(c) a product or technology intended to enhance the use or effect of a product described in paragraph (a) or (b) above; or

(d) any device used in the administration of any such product, and all components and constituent materials of any such product.

To be a Covered Countermeasure under the Declaration, a product must also meet 42 U.S.C. 247d-6d(i)(1)'s definition of "Covered Countermeasure."

VII. Limitations on Distribution

42 U.S.C. 247d-6d(a)(5) and (b)(2)(E)

I have determined that liability protections are afforded to Covered Persons only for Recommended Activities involving:

(a) Covered Countermeasures that are related to present or future federal contracts, cooperative agreements, grants, other transactions, interagency agreements, memoranda of understanding, or other federal agreements;

(b) Covered Countermeasures that are related to activities authorized in accordance with the public health and medical response of the Authority Having Jurisdiction to prescribe, administer, deliver, distribute or dispense the Covered Countermeasures following a Declaration of Emergency;

(c) Covered Countermeasures other than licensed COVID-19 vaccines that are:

i. Licensed, approved, or cleared by the FDA (or that are permitted to be used under an Investigational New Drug Application or an Investigational Device Exemption) under the FD&C Act or PHS Act to treat, diagnose, cure, prevent, mitigate, or limit the harm from COVID-19, or the transmission of SARS-CoV-2 or a virus mutating therefrom; or

ii. A respiratory protective device approved by NIOSH under 42 CFR part 84, or any successor regulations, that the Secretary determines to be a priority for use during a public health emergency declared under section 319 of the PHS Act to prevent, mitigate, or limit the harm from COVID-19, or the transmission of SARS-CoV-2 or a virus mutating therefrom.

To qualify for this third distribution channel, a Covered Person must

manufacture, test, develop, distribute, administer, or use the Covered Countermeasure pursuant to the FDA licensure, approval, or clearance (or pursuant to an Investigational New Drug Application or Investigational Device Exemption), or the NIOSH approval;

(d) Covered Countermeasures that are authorized by the FDA under section 564 of the FD&C Act to treat, diagnose, cure, prevent, mitigate, or limit the harm from COVID-19, or the transmission of SARS-CoV-2 or a virus mutating therefrom. To qualify for this fourth distribution channel, a Covered Person must manufacture, test, develop, distribute, administer, or use the Covered Countermeasure pursuant to the FDA authorization; or

(e) Covered Countermeasures that are COVID-19 vaccines licensed by the FDA to prevent, mitigate, or limit the harm from COVID-19, or the transmission of SARS-CoV-2 or a virus mutating therefrom and any approved or cleared in vitro diagnostic product or other device used to treat, diagnose, cure, prevent, or mitigate COVID-19, or the transmission of SARS-CoV-2 or a virus mutating therefrom. To qualify for this fifth distribution channel, a Covered Person must manufacture, test, develop, distribute, administer, or use the Covered Countermeasure pursuant to the FDA license, clearance, or approval.

As used in this Declaration, the terms “Authority Having Jurisdiction” and “Declaration of Emergency” have the following meanings:

(i) The Authority Having Jurisdiction means the public agency or its delegate that has legal responsibility and authority for responding to an incident, based on political or geographical (*e.g.*, city, county, tribal, state, or federal boundary lines) or functional (*e.g.*, law enforcement, public health) range or sphere of authority.

(ii) A Declaration of Emergency means any declaration by any authorized local, regional, state, or federal official of an emergency specific to events that indicate an immediate need to administer and use the Covered Countermeasures, with the exception of a federal declaration in support of an Emergency Use Authorization under section 564 of the FD&C Act unless such declaration specifies otherwise.

I have also determined that, for governmental program planners only, liability protections are afforded only to the extent such program planners obtain Covered Countermeasures through voluntary means, such as (a) donation; (b) commercial sale; (c) deployment of Covered Countermeasures from federal stockpiles; or (d) deployment of

donated, purchased, or otherwise voluntarily obtained Covered Countermeasures from state, local, or private stockpiles.

VIII. Category of Disease, Health Condition, or Threat

42 U.S.C. 247d-6d(b)(2)(A)

The category of disease, health condition, or threat for which I recommend the administration or use of the Covered Countermeasures is not only COVID-19 caused by SARS-CoV-2, or a virus mutating therefrom, but also other diseases, health conditions, or threats that may have been caused by COVID-19, SARS-CoV-2, or a virus mutating therefrom, including the threat of increased burden on the healthcare system due to seasonal influenza infections occurring at the same time as COVID-19 infections, which will lead to an increase in the rate of infectious diseases.

IX. Administration of Covered Countermeasures

42 U.S.C. 247d-6d(a)(2)(B)

Administration of the Covered Countermeasure means physical provision of the countermeasures to recipients, or activities and decisions directly relating to public and private delivery, distribution and dispensing of the countermeasures to recipients, management and operation of countermeasure programs, or management and operation of locations for the purpose of distributing and dispensing countermeasures. Where there are limited Covered Countermeasures, *not* administering a Covered Countermeasure to one individual in order to administer it to another individual can constitute “relating to . . . the administration to . . . an individual” under 42 U.S.C. 247d-6d. For example, consider a situation where there is only one dose of a COVID-19 vaccine, and a person in a vulnerable population and a person in a less vulnerable population both request it from a healthcare professional. In that situation, the healthcare professional administers the one dose to the person who is more vulnerable to COVID-19. In that circumstance, the failure to administer the COVID-19 vaccine to the person in a less-vulnerable population “relat[es] to . . . the administration to” the person in a vulnerable population. The person in the vulnerable population was able to receive the vaccine only because it was not administered to the person in the less-vulnerable population. Prioritization or purposeful allocation of a Covered Countermeasure, particularly

if done in accordance with a public health authority’s directive, can fall within the PREP Act and this Declaration’s liability protections.

X. Population

42 U.S.C. 247d-6d(a)(4), 247d-6d(b)(2)(C)

The populations of individuals to whom the liability protections of this Declaration extend include any individual who uses or is administered the Covered Countermeasures in accordance with this Declaration.

Liability protections are afforded to manufacturers and distributors without regard to whether the countermeasure is used by or administered to this population; liability protections are afforded to program planners and qualified persons when the countermeasure is used by or administered to this population, or the program planner or qualified person reasonably could have believed the recipient was in this population.

XI. Geographic Area

42 U.S.C. 247d-6d(a)(4), 247d-6d(b)(2)(D)

Liability protections are afforded for the administration or use of a Covered Countermeasure without geographic limitation.

Liability protections are afforded to manufacturers and distributors without regard to whether the Covered Countermeasure is used by or administered in any designated geographic area; liability protections are afforded to program planners and qualified persons when the countermeasure is used by or administered in any designated geographic area, or the program planner or qualified person reasonably could have believed the recipient was in that geographic area.

COVID-19 is a global challenge that requires a whole-of-nation response. There are substantial federal legal and policy issues, and substantial federal legal and policy interests within the meaning of *Grable & Sons Metal Products, Inc. v. Darue Eng’g. & Mfg.*, 545 U.S. 308 (2005), in having a unified, whole-of-nation response to the COVID-19 pandemic among federal, state, local, and private-sector entities. The world faced an unprecedented pandemic. To effectively respond, there needed to be a more consistent pathway for Covered Persons to manufacture, distribute, administer or use Covered Countermeasures across the nation and the world. Thus, there are substantial federal legal and policy issues, and substantial federal legal and policy

interests within the meaning of *Grable & Sons Metal Products, Inc. v. Darue Eng'g. & Mfg.*, 545 U.S. 308 (2005), in having a uniform interpretation of the PREP Act. Under the PREP Act, the sole exception to the immunity from suit and liability of covered persons under the PREP Act is an exclusive federal cause of action against a covered person for death or serious physical injury proximately caused by willful misconduct by such covered person. In all other cases, an injured party's exclusive remedy is an administrative remedy under section 319F-4 of the PHS Act. Through the PREP Act, Congress delegated to me the authority to strike the appropriate federal-state balance with respect to Covered Countermeasures through PREP Act Declarations.

XII. Effective Time Period

42 U.S.C. 247d-6d(b)(2)(B)

The effective time period for Covered Countermeasures and Covered Persons depends on the means of distribution identified in Section VII of this Declaration as applied to categories of Countermeasures and Qualified Persons:

(a) Liability protections for any respiratory protective device approved by NIOSH under 42 CFR part 84, or any successor regulations, through the means of distribution identified in section VII(a) of this Declaration, begin on March 27, 2020, and extend through December 31, 2029.

(b) Liability protections for all other Covered Countermeasures identified in section VI of this Declaration, through means of distribution identified in section VII(a) of this Declaration, begin on February 4, 2020, and extend through December 31, 2029.

(c) Liability protections for all Covered Countermeasures administered and used in accordance with the public health and medical response of the Authority Having Jurisdiction, as identified in section VII(b) of this Declaration, begin with a Declaration of Emergency as that term is defined in section VII (except that, with respect to qualified persons who order or administer a routine childhood vaccination that CDC/ACIP recommends to persons ages three through 18 according to CDC's/ACIP's standard immunization schedule, liability protections began on August 24, 2020), and last through (a) the final day the Declaration of Emergency is in effect, or (b) December 31, 2029, whichever occurs first.

(d) Liability protections for all Covered Countermeasures identified in section VII(c)(i) of this Declaration begin

on December 9, 2020, and last through the final day the Declaration of Emergency is in effect or December 31, 2029, whichever occurs first. Liability protections for all Covered Countermeasures identified in section VII(c)(ii) of this Declaration last for the time period stated in section (a) of this section XII if applicable, or otherwise December 31, 2024.

(e) Liability protections for all Covered Countermeasures identified in section VII(d) of this Declaration begin on December 9, 2020, and last until December 31, 2029, regardless of any Declaration of Emergency that might otherwise terminate the time period of coverage under paragraphs (c) or (d) of this section XII.

(f) Liability protections for all Covered Countermeasures identified in section VII(e) of this Declaration begin on December 9, 2020, and last until December 31, 2029, regardless of any Declaration of Emergency that might otherwise terminate the time period of coverage under paragraphs (c) or (d) of this section XII.

(g) Liability protections for Manufacturers, Distributors, and Program Planners, as defined at 42 U.S.C. 247d-6d(i), begin on February 4, 2020, and last through the time periods stated in paragraphs (a)–(f) of this section XII.

(h) Liability protections for Qualified Persons who are a licensed health professional or other individual who is authorized to prescribe, administer, or dispense such countermeasures under the law of the State in which the countermeasure was prescribed, administered, or dispensed begin on February 4, 2020, and last through the time periods stated in paragraphs (a)–(f) of this section XII.

(i) Liability protections for Additional Qualified Persons identified under section V of the Declaration and in Guidance implementing section V of the Declaration begin on the dates listed below, and last through the time periods stated in paragraphs (a)–(d) of this section XII of the Declaration, unless otherwise stated in this paragraph (i).

i. Liability protections for Qualified Persons under section V(d) of the Declaration who are licensed pharmacists to order and administer, and licensed or registered pharmacy interns and qualified pharmacy technicians to administer CDC/ACIP recommended vaccines for persons aged three through 18 (other than seasonal influenza vaccines and COVID-19 vaccines) begins on August 24, 2020.

ii. Liability protections for Qualified Persons under section V(d) of the Declaration who are licensed

pharmacists to order and administer, and licensed or registered pharmacy interns and qualified pharmacy technicians to administer CDC/ACIP recommended seasonal influenza vaccines for persons aged three through 18 begins on August 24, 2020, and lasts through December 31, 2029, regardless of the time periods stated in paragraphs (c)–(d) of this section XII or limitations on distribution stated in section VII (a)–(b) of this Declaration.

iii. Liability protections for Qualified Persons under section V(d) of the Declaration who are licensed pharmacists to order and administer, and pharmacy interns and qualified pharmacy technicians to administer, COVID-19 vaccines to individuals aged three and above begins on February 4, 2020, and lasts through December 31, 2029, regardless of the time periods stated in paragraphs (c)–(d) of this section XII or limitations on distribution stated in section VII (a)–(b) of this Declaration.

iv. Liability protections for Qualified Persons under section V(d) of the Declaration who are licensed pharmacists to order and administer, and pharmacy interns and qualified pharmacy technicians to administer, seasonal influenza vaccines to individuals aged nineteen and above begins on August 4, 2021, and lasts through December 31, 2029, regardless of the time periods stated in paragraphs (c)–(d) of this section XII or limitations on distribution stated in section VII (a)–(b) of this Declaration.

v. Liability protections for Qualified Persons under section V(e) of the Declaration begin on February 4, 2020.

vi. Liability protections for Qualified Persons under section V(f) of the Declaration begin on February 2, 2021.

vii. Liability protections for Qualified Persons under section V(g) of the Declaration begin on February 16, 2021, and last through December 31, 2029.

viii. Liability protections for Qualified Persons who are physicians, advanced practice registered nurses, registered nurses, or practical nurses under section V(h) of the Declaration begin on February 2, 2021, with additional conditions effective as of March 11, 2021, and liability protections for all other Qualified persons under section V(h) begin on March 11, 2021.

ix. Liability protections for Qualified Persons under section V(i) of the Declaration who are licensed pharmacists to order and administer and qualified pharmacy technicians and licensed or registered pharmacy interns to administer COVID-19 therapeutics identified in section VII(d) of the Declaration begin on September 9, 2021,

and last through December 31, 2029, regardless of time periods stated in paragraphs (c)–(d) of this section or limitations on distribution stated in section VII (a)–(b) of this Declaration.

x. Liability protections for Qualified Persons under section V(i) of the Declaration who are licensed pharmacists to order and administer and qualified pharmacy technicians and licensed or registered pharmacy interns to administer COVID–19 therapeutics identified in section VII(c) of the Declaration begin on September 9, 2021.

xi. Liability protections for Qualified Persons under section V(j) of the Declaration begin on December 30, 2021.

xii. Liability protections for Qualified Persons authorized under Guidance issued by this Department as an Authority Having Jurisdiction to respond to a declared emergency, incorporated into this Declaration by reference, to administer COVID–19 tests who are licensed pharmacists begin April 8, 2020, and last until December 31, 2029, regardless of any limitations stated in paragraphs (c)–(d) of this section XII or limitations on distribution stated in section VII (a)–(b) of this Declaration.

xiii. Liability protections for Qualified Persons authorized under Guidance issued by this Department as an Authority Having Jurisdiction to respond to a declared emergency, incorporated into this Declaration by reference, to administer COVID–19 tests who are licensed or registered pharmacy interns or qualified pharmacy technicians begin October 20, 2020, and last until December 31, 2029, regardless of any limitations stated in paragraphs (c)–(d) of this section XII or limitations on distribution stated in section VII (a)–(b) of this Declaration.

xiv. Liability protections for Qualified Persons authorized under Guidance issued by this Department as an Authority Having Jurisdiction to respond to a declared emergency, incorporated into this Declaration by reference, who are pharmacies when their staff pharmacists order and administer, or their pharmacy interns and pharmacy technicians administer COVID–19 vaccines to individuals aged three and above, seasonal influenza vaccines to individuals aged three through eighteen, seasonal influenza vaccines to individuals aged nineteen and above, COVID–19 tests, and COVID–19 therapeutics identified in section VII(d) of the Declaration begin October 29, 2020, and last until December 31, 2029, regardless of any limitations stated in paragraphs (c)–(d) of this section XII or limitations on

distribution stated in section VII (a)–(b) of this Declaration.

xv. Liability protections for Qualified Persons authorized under Guidance issued by this Department as an Authority Having Jurisdiction to respond to a declared emergency, incorporated into this Declaration by reference, who are pharmacies when their staff pharmacists order and administer, or their pharmacy interns and pharmacy technicians administer CDC/ACIP recommended vaccines for persons aged three through 18 (other than seasonal influenza vaccines and COVID–19 vaccines) and countermeasures identified in section VII(c) of the Declaration begin October 29, 2020.

xvi. Liability protections for Qualified Persons authorized under Guidance issued by this Department as an Authority Having Jurisdiction to respond to a declared emergency, incorporated into this Declaration by reference to prescribe or administer point-of-care COVID–19 tests, using anterior nares specimen collection or self-collection, for screening in congregate facilities across the Nation who are licensed healthcare practitioners begin August 31, 2020, and last until December 31, 2029, regardless of any limitations stated in paragraphs (c)–(d) of this section XII or limitations on distribution stated in section VII (a)–(b) of this Declaration.

XIII. Additional Time Period of Coverage

42 U.S.C. 247d–6d(b)(3)(B) and (C)

I have determined that an additional 12 months of liability protection is reasonable to allow for the manufacturer(s) to arrange for disposition of the Covered Countermeasure, including return of the Covered Countermeasures to the manufacturer, and for Covered Persons to take such other actions as are appropriate to limit the administration or use of the Covered Countermeasures.

Covered Countermeasures obtained for the Strategic National Stockpile (SNS) during the effective period of this Declaration are covered through the date of administration or use pursuant to a distribution or release from the SNS, including NIOSH Approved® respirators that have been rescinded or are beyond their manufacturers' declared shelf life.

XIV. Countermeasures Injury Compensation Program

42 U.S.C 247d–6e

The PREP Act authorizes the Countermeasures Injury Compensation Program (CICP) to provide benefits to

certain individuals or estates of individuals who sustain a covered serious physical injury as the direct result of the administration or use of the Covered Countermeasures, and benefits to certain survivors of individuals who die as a direct result of the administration or use of the Covered Countermeasures. The causal connection between the countermeasure and the serious physical injury must be supported by compelling, reliable, valid, medical, and scientific evidence in order for the individual to be considered for compensation. The CICP is administered by the Health Resources and Services Administration, within the U.S. Department of Health and Human Services. Information about the CICP is available at the toll-free number 1–855–266–2427 or <http://www.hrsa.gov/cicp/>.

XV. Amendments

42 U.S.C. 247d–6d(b)(4)

Amendments to this Declaration will be published in the **Federal Register**, as warranted.

Authority: 42 U.S.C. 247d–6d.

Dated: December 6, 2024.

Xavier Becerra,

Secretary, U.S. Department of Health and Human Services.

BILLING CODE 4150–37–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Request for Public Comments on the Scientific Report of the 2025 Dietary Guidelines Advisory Committee

AGENCY: Office of Disease Prevention and Health Promotion, Office of the Assistant Secretary for Health (OASH), U.S. Department of Health and Human Services (HHS); Food, Nutrition, and Consumer Services (FNCS), U.S. Department of Agriculture (USDA).

ACTION: Notice and request for public comments on the Scientific Report of the 2025 Dietary Guidelines Advisory Committee (Scientific Report).

SUMMARY: The Departments of Health and Human Services and Agriculture invite the public to provide written comments and virtual oral comments on the Scientific Report.

DATES: The written and oral comment collection dates are scheduled as follows:

- Once the Scientific Report is published online, the public will have 60 days to provide written comments to HHS and USDA; this public comment period closes on the 60th calendar day

at 11:59 p.m. EST. Specific dates will be announced at www.DietaryGuidelines.gov.

- The public is invited to present virtual oral comments to HHS and USDA on Thursday, January 16, 2025, from 1:00 p.m. to 4:30 p.m. EST; pre-registration is required. Registration for oral comments will open on Monday, December 16, 2024, at 1:00 p.m. EST and close once capacity has been reached. Virtual oral comments can be pre-recorded or provided live virtually via videocast. More information on the oral comment opportunity will be available at www.DietaryGuidelines.gov.

FOR FURTHER INFORMATION CONTACT:

Designated Federal Officer, 2025 Dietary Guidelines Advisory Committee, Janet M. de Jesus, MS, RD; Office of Disease Prevention and Health Promotion, 1101 Wootton Parkway, Suite 420, Rockville, MD 20852; Phone: 240-453-8266; Email DietaryGuidelines@hhs.gov. Additional information is available at www.DietaryGuidelines.gov.

SUPPLEMENTARY INFORMATION:

Authority and Purpose: Under section 301 of Public Law 101-445 (7 U.S.C. 5341, the National Nutrition Monitoring and Related Research Act of 1990, title III), the Secretaries of HHS and USDA are directed to publish the *Dietary Guidelines for Americans* jointly at least every five years. See 88 FR 3423, January 19, 2023, for notice of the first meeting of the 2025 Dietary Guidelines Advisory Committee, the complete Authority and Purpose, and the Committee's Task. The 2025 Dietary Guidelines Advisory Committee is formed and governed under the provisions of the Federal Advisory Committee Act (FACA), Public Law 92-463, as amended (5 U.S.C. app).

Public Comments: Written comments from the public will be accepted once the Scientific Report of the 2025 Dietary Guidelines Advisory Committee is published online. The public will have 60 calendar days to provide written comments to HHS and USDA; this public comment period closes on the 60th day at 11:59 p.m. EST. Specific dates will be announced at www.DietaryGuidelines.gov.

- *Online (preferred method):* Follow the instructions for submitting comments at www.regulations.gov. Comments submitted electronically, including attachments, will be posted to Docket HHS-OASH-2024-0017.

- *Mail:* Mail/courier to Janet M. de Jesus, MS, RD, HHS/OASH/ODPHP, 1101 Wootton Parkway, Suite 420, Rockville, MD 20852. For written/paper submissions, ODPHP will post your

comment, and any attachments, to www.regulations.gov.

Oral Comments: HHS and USDA invite the public to present virtual oral comments on Thursday, January 16, 2025. Pre-registration is required, and the number of commenters is limited based on time constraints. Registration for oral comments will open on Monday, December 16, 2024, at 1:00 p.m. EST and will close once capacity has been reached. Oral comments will be confirmed on a first-come, first-served basis. Oral comments will be limited to one representative per organization. All commenters' remarks should be respectful and given in a manner that recognizes and protects the dignity of the proceedings. Oral comments should focus on the scientific review and evidence-based advice found in the Scientific Report of the 2025 Dietary Guidelines Advisory Committee. More information on the oral comment opportunity will be available at www.DietaryGuidelines.gov.

Registration for Oral Comments: Requests to present oral comments can be made by going to www.DietaryGuidelines.gov. For registration to be accepted, a written outline or a summary of the intended oral comment will be required as part of the registration process. Please limit your written outline or summary to no more than 250 words. A confirmation email with instructions will be sent to confirmed speakers from DietaryGuidelines@hhs.gov. Confirmed speakers will have the option to submit a pre-recorded video to be played at the public meeting on January 16, 2025, or present virtual live oral remarks via videocast on January 16, 2025. To avoid technical difficulties, submission of a pre-recorded video is strongly encouraged.

Paul L. Reed,

Deputy Assistant Secretary for Health, Office of Disease Prevention and Health Promotion.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

Notice of Proposed Purchased/ Referred Care Delivery Area Redesignation for the Iowa Tribe of Kansas and Nebraska

AGENCY: Indian Health Service, HHS.

ACTION: Notice.

SUMMARY: This Notice advises the public that the Indian Health Service (IHS)

proposes to expand the geographic boundaries of the Purchased/Referred Care Delivery Area (PRCDA) for the Iowa Tribe of Kansas and Nebraska (Iowa Tribe, or Tribe) to include the counties of Jackson in the State of Kansas, and Holt in the State of Missouri. The current PRCDA for the Iowa Tribe includes the Kansas counties of Doniphan and Brown, as well as Richardson County, Nebraska. Iowa Tribe members who reside outside of the PRCDA are eligible for direct care services; however, they are not eligible for Purchased/Referred Care (PRC) services. The sole purpose of this expansion would be to authorize additional Iowa Tribe members and beneficiaries to receive PRC services.

DATES: Comments must be submitted by January 10, 2025.

ADDRESSES: Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission. You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to <http://www.regulations.gov>. Follow the "Submit a Comment" instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Carl Mitchell, Director, Division of Regulatory and Policy Coordination, Indian Health Service, 5600 Fishers Lane, Mail Stop: 09E70, Rockville, Maryland 20857.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the above address.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to the address above.

If you intend to deliver your comments to the Rockville address, please call telephone number (301) 443-1116 in advance to schedule your arrival with a staff member.

FOR FURTHER INFORMATION CONTACT:

CAPT John Rael, Director, Office of Resource Access and Partnerships, Indian Health Service, 5600 Fishers Lane, Mail Stop: 10E85C, Rockville, Maryland 20857. Telephone (301) 443-0969 (This is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential

business information that is included in a comment.

Background: The IHS provides services under regulations in effect as of September 15, 1987, and republished at 42 CFR part 136, subparts A–C. Subpart C defines a Contract Health Service Delivery Area (CHSDA), now referred to as a PRCDA, as the geographic area within which PRC will be made available by the IHS to members of an identified Indian community who reside in the PRCDA. Residence within a PRCDA by a person who is within the scope of the Indian health program, as set forth in 42 CFR 136.12, creates no legal entitlement to PRC services but only potential eligibility for services. Services needed, but not available at an IHS/Tribal facility, are provided under the PRC program depending on the availability of funds, the relative medical priority of the services to be provided, and the actual availability and accessibility of alternate resources in accordance with the regulations.

The regulations at 42 CFR part 136, subpart C provide that, unless otherwise designated, a PRCDA shall consist of a county which includes all or part of a reservation and any county or counties which have a common boundary with the reservation. 42 CFR 136.22(a)(6). The regulations also provide that after consultation with the Tribal governing body or bodies on those reservations included within the PRCDA, the Secretary may, from time to time, redesignate areas within the United States for inclusion in or exclusion from a PRCDA. 42 CFR 136.22(b). The regulations require that certain criteria be considered before any redesignation is made. The criteria are as follows:

(1) The number of Indians residing in the area proposed to be so included or excluded;

(2) Whether the Tribal governing body has determined that Indians residing in the area near the reservation are socially and economically affiliated with the Tribe;

(3) The geographic proximity to the reservation of the area whose inclusion or exclusion is being considered; and

(4) The level of funding which would be available for the provision of PRC. Additionally, the regulations require that any redesignation of a PRCDA be made in accordance with the procedures of the Administrative Procedure Act (5 U.S.C. 553). 42 CFR 136.22(c). In compliance with this requirement, the IHS is publishing this Notice and requesting public comments.

The Iowa Tribe is located in White Cloud, Kansas, and operates their PRC program as a Tribal Health Program out of the White Cloud Health Center. The

IHS and the Iowa Tribe estimate that approximately 77 Tribal members reside in Jackson County, Kansas, and Holt County, Missouri, and would become PRC eligible through the proposed redesignation and expansion of the Tribe's PRCDA.

If the Iowa Tribe's PRCDA redesignation and expansion is finalized as proposed, the Tribe's expanded PRCDA would overlap the PRCDA's of three other Tribes: the Sac and Fox Nation of Missouri in Kansas and Nebraska, the Kickapoo Tribe of Indians of the Kickapoo Reservation (Jackson County, Kansas), and the Prairie Band of Potawatomi Nation (Jackson County, Kansas). The Iowa Tribe and the Sac and Fox Nation of Missouri in Kansas and Nebraska share a PRC program, but currently have different PRCDA's; the Sac and Fox Nation of Missouri has submitted a concurrent request for redesignation and expansion of their own PRCDA. Both redesignation requests were submitted to the IHS through the same correspondence from the White Cloud Health Center. If the Iowa Tribe's and Sac and Fox Nation of Missouri's PRCDA's are each redesignated and expanded as requested, the Tribes would have identical, overlapping PRCDA's, simplifying the administration and operation of their local PRC program.

The IHS has consulted with the Kickapoo Tribe of Indians of the Kickapoo Reservation and the Prairie Band of Potawatomi Nation regarding the potential for overlapping PRCDA's in Jackson County, Kansas. Neither the Kickapoo Tribe of Indians of the Kickapoo Reservation nor the Prairie Band of Potawatomi Nation expressed concerns regarding the proposed redesignation and expansion.

Under 42 CFR 136.23, those otherwise eligible Indians who do not reside on a reservation, but reside within a PRCDA, must be either members of the Tribe or other IHS beneficiaries who maintain close economic and social ties with the Tribe. In this case, applying the aforementioned PRCDA redesignation criteria required by operative regulations codified at 42 CFR part 136, subpart C, the following findings are made:

1. By expanding the PRCDA to include Jackson County, Kansas, and Holt County, Missouri, the Iowa Tribe's PRC eligible population will increase by an estimated 77 Tribal members.

2. The Iowa Tribe communicated its governing body's determination that their members residing in the proposed expansion counties are socially and economically affiliated with the Tribe. The IHS therefore finds that the Tribe's

members within the proposed, expanded PRCDA are socially and economically affiliated with the Iowa Tribe.

3. The expanded PRCDA counties form a contiguous area with the existing PRCDA. Holt County, Missouri, shares a common boundary with the Iowa Tribe's reservation lands in Richardson County, Nebraska. Jackson County, Kansas, is contiguous with Brown County, which includes part of the Iowa Tribe's reservation lands and is currently included in the Iowa Tribe's PRCDA. Members of the Iowa Tribe reside in each of the counties proposed for inclusion in the expanded PRCDA. For these reasons, the IHS has determined the additional counties proposed for inclusion herein to be geographically proximate, meaning "on or near," to the Tribe's reservation.

4. The White Cloud Health Center has indicated that the PRC program can continue providing the same level of care to the PRC eligible population if the PRCDA is expanded as proposed, without requiring additional funding or reduction of the current medical priority level.

Accordingly, the IHS proposes to expand the PRCDA of the Iowa Tribe to include the counties of Jackson in the State of Kansas, and Holt in the State of Missouri.

This Notice does not contain reporting or recordkeeping requirements subject to prior approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980.

Roselyn Tso,

Director, Indian Health Service.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment.

Background: The IHS provides services under regulations in effect as of September 15, 1987, and republished at

42 CFR part 136, subparts A–C. Subpart C defines a Contract Health Service Delivery Area (CHSDA), now referred to as a PRCDA, as the geographic area within which PRC will be made available by the IHS to members of an identified Indian community who reside in the PRCDA. Residence within a PRCDA by a person who is within the scope of the Indian health program, as set forth in 42 CFR 136.12, creates no legal entitlement to PRC services but only potential eligibility for services. Services needed, but not available at an IHS/Tribal facility, are provided under the PRC program depending on the availability of funds, the relative medical priority of the services to be provided, and the actual availability and accessibility of alternate resources in accordance with the regulations.

The regulations at 42 CFR part 136, subpart C provide that, unless otherwise designated, a PRCDA shall consist of a county which includes all or part of a reservation and any county or counties which have a common boundary with the reservation. 42 CFR 136.22(a)(6). The regulations also provide that after consultation with the Tribal governing body or bodies on those reservations included within the PRCDA, the Secretary may, from time to time, redesignate areas within the United States for inclusion in or exclusion from a PRCDA. 42 CFR 136.22(b). The regulations require that certain criteria be considered before any redesignation is made. The criteria are as follows:

(1) The number of Indians residing in the area proposed to be so included or excluded;

(2) Whether the Tribal governing body has determined that Indians residing in the area near the reservation are socially and economically affiliated with the Tribe;

(3) The geographic proximity to the reservation of the area whose inclusion or exclusion is being considered; and

(4) The level of funding which would be available for the provision of PRC. Additionally, the regulations require that any redesignation of a PRCDA be made in accordance with the procedures of the Administrative Procedure Act (5 U.S.C. 553). 42 CFR 136.22(c). In compliance with this requirement, the IHS is publishing this Notice and requesting public comments.

The Sac and Fox Nation of Missouri is located in Reserve, Kansas. The Sac and Fox Nation of Missouri's PRC program is operated, as authorized by Tribal resolution, by the Iowa Tribe of Kansas and Nebraska as a Tribal Health Program out of the White Cloud Health Center. The IHS and the Sac and Fox Nation of Missouri estimate that

approximately seven Tribal members reside in Doniphan and Jackson Counties, Kansas, and Holt County, Missouri, and would become PRC eligible through the proposed redesignation and expansion of the Tribe's PRCDA.

If the Sac and Fox Nation of Missouri's PRCDA redesignation and expansion is finalized as proposed, the Tribe's expanded PRCDA would overlap the PRCDA's of three other Tribes: the Iowa Tribe of Kansas and Nebraska, the Kickapoo Tribe of Indians of the Kickapoo Reservation (Jackson County, Kansas), and the Prairie Band of Potawatomi Nation (Jackson County, Kansas). The Sac and Fox Nation of Missouri and the Iowa Tribe of Kansas and Nebraska share a PRC program, but currently have different PRCDA's; the Iowa Tribe of Kansas and Nebraska has submitted a concurrent request for redesignation and expansion of their own PRCDA. Both redesignation requests were submitted to the IHS through the same correspondence from the White Cloud Health Center. If the Sac and Fox Nation of Missouri's and the Iowa Tribe's PRCDA's are each redesignated and expanded as requested, the Tribes would have identical, overlapping PRCDA's, simplifying the administration and operation of their local PRC program. The IHS has consulted with the Kickapoo Tribe of Indians of the Kickapoo Reservation and the Prairie Band of Potawatomi Nation regarding the potential for overlapping PRCDA's in Jackson County, Kansas. Neither the Kickapoo Tribe of Indians of the Kickapoo Reservation nor the Prairie Band of Potawatomi Nation expressed concerns regarding the proposed redesignation and expansion.

Under 42 CFR 136.23, those otherwise eligible Indians who do not reside on a reservation, but reside within a PRCDA, must be either members of the Tribe, or other IHS beneficiaries who maintain close economic and social ties with the Tribe. In this case, applying the aforementioned PRCDA redesignation criteria required by operative regulations codified at 42 CFR part 136, subpart C, the following findings are made:

1. By expanding the PRCDA to include Doniphan and Jackson Counties in Kansas, and Holt County, Missouri, the Sac and Fox Nation of Missouri's PRC eligible population will increase by an estimated seven Tribal members.

2. Through communication with the Tribe and information relayed by the White Cloud Health Center, the IHS understands that the Tribe's governing body has determined that its members

residing in the proposed expansion counties are socially and economically affiliated with the Tribe. The IHS therefore finds that the Tribal members within the proposed, expanded PRCA are socially and economically affiliated with the Sac and Fox Nation of Missouri.

3. The expanded PRCA counties form a contiguous area with the existing PRCA, and members of the Sac and Fox Nation of Missouri reside in each of the counties proposed for inclusion in the expanded PRCA. Jackson County, Kansas and Doniphan County, Kansas both share a common boundary with Brown County, Kansas, where the Sac and Fox Nation of Missouri has reservation lands. Holt County, Missouri, shares a common boundary with Richardson County, Nebraska, where the Sac and Fox Nation of Missouri has reservation lands. For these reasons, the IHS has determined the additional counties proposed for inclusion herein to be geographically proximate, meaning “on or near,” to the Tribe’s reservation.

4. The White Cloud Health Center has indicated that the PRC program can continue providing the same level of care to the PRC eligible population if the PRCA is expanded as proposed, without requiring additional funding or reduction of the current medical priority level.

Accordingly, the IHS proposes to expand the PRCA of the Sac and Fox Nation of Missouri in Kansas and Nebraska to include the counties of Doniphan and Jackson in the State of Kansas, and Holt in the State of Missouri.

This Notice does not contain reporting or recordkeeping requirements subject to prior approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980.

Prospective Grant of an Exclusive Patent License: Anti-KK-LC-1 T Cell Receptors for the Treatment of Cancer

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Cancer Institute (NCI), an institute of the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an Exclusive Patent License to practice the inventions embodied in the Patents and Patent Applications listed in the Supplementary Information section of this notice to StraightLine Bio, Inc. located in Princeton, New Jersey.

DATES: Only written comments and/or applications for a license which are received by the National Cancer Institute's Technology Transfer Center on or before December 26, 2024 will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, and comments relating to the contemplated an Exclusive Patent License should be directed to: Suna Gulay French, Ph.D., Technology Transfer Manager, NCI Technology Transfer Center at Telephone: (240)-276-5530, Email: suna.gulay@nih.gov.

SUPPLEMENTARY INFORMATION:

Intellectual Property

1. United States Provisional Patent Application No. 62/327,529, filed April 26, 2016 and entitled "Anti-KK-LC-1 T Cell Receptors" [HHS Reference No. E-153-2016-0-US-01];

2. PCT Patent Application No. PCT/US2017/027865, filed April 17, 2017 and entitled "Anti-KK-LC-1 T Cell Receptors" [HHS Reference No. E-153-2016-0-PCT-02];

3. Australian Patent No. 2017258745, issued July 14, 2022 and entitled "Anti-KK-LC-1 T Cell Receptors" [HHS Reference No. E-153-2016-0-AU-03];

4. Canadian Patent Application No. 3021898, filed April 17, 2017 and entitled "Anti-KK-LC-1 T Cell Receptors" [HHS Reference No. E-153-2016-0-CA-04];

5. European Patent No. 3448882, issued November 24, 2021 and entitled "Anti-KK-LC-1 T Cell Receptors" [HHS Reference No. E-153-2016-0-EP-05];

a. Validated in the following jurisdictions: CH, DE, BE, DK, ES, FI, FR, GB, IE, IT, NL, NO and SE.

6. U.S. Patent No. 11,352,410, issued June 7, 2022 and entitled "Anti-KK-LC-1 T Cell Receptors" [HHS Reference No. E-153-2016-0-US-06].

The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America.

The prospective exclusive license territory may be worldwide and the field of use may be limited to the following:

Development, manufacture and commercialization of autologous T cell therapy products that are genetically engineered via retroviral-mediated gene transfer or CRISPR-based gene transfer or transposon-mediated gene transfer to express a T cell receptor (TCR) targeting human Kita-Kyushu Lung Cancer Antigen 1 (KK-LC-1) restricted to HLA-A*01, as claimed in the Licensed Patent Rights, for the treatment of KK-LC-1 positive cancers and premalignant conditions in humans.

For the avoidance of doubt, specifically excluded from the Field of Use are:

1. Development, manufacture, and commercialization of Natural Killer cell therapy products engineered via viral vectors (including lentivirus or retrovirus) to express the TCR(s) claimed in the Licensed Patent Rights; and

2. Development, manufacture and commercialization of a combination therapy for the treatment of KK-LC-1 positive human cancers that do not have the HLA-A*01 genotype, wherein the treatment comprises as a step: Modification of the patient's tumor to express the HLA-A*01 restriction element.

This technology discloses isolated T cell receptors (TCR) reactive to the KK-LC-1 within the context of human leukocyte antigen (HLA) A*01:01. KK-LC-1 is expressed by various epithelial cancers including carcinomas of the bladder, cervix, stomach, breast, lung, and pancreas. Due to its minimal expression in normal tissues, this antigen may be targeted on KK-LC-1—expressing tumors with minimal normal tissue toxicity.

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information in these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

Date: December 6, 2024.

Richard U. Rodriguez,
Associate Director, Technology Transfer Center, National Cancer Institute.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Allergy and Infectious Diseases; Notice of Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Allergy and Infectious Diseases Special Emphasis Panel; NIAID Resource Related Research Projects (R24 Clinical Trial Not Allowed).

Date: January 30, 2025.

Time: 10:30 a.m. to 12:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute of Allergy and Infectious Diseases, National Institutes of Health, 5601 Fishers Lane, Room 3G56, Rockville, MD 20892 (Video Assisted).

Contact Person: Maryam Rohani, Ph.D., Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, National Institute of Allergy and Infectious Diseases, National Institutes of Health, 5601 Fishers Lane, Room 3G56, Rockville, MD 20892, (301) 761-6656, maryam.rohani@nih.gov.

(Catalogue of Federal Domestic Assistance Program Nos. 93.855, Allergy, Immunology, and Transplantation Research; 93.856, Microbiology and Infectious Diseases Research, National Institutes of Health, HHS)

Dated: December 4, 2024.

Lauren A. Fleck,

Program Analyst, Office of Federal Advisory Committee Policy.

BILLING CODE 4140-01-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket Number USCG-2021-0183]

Final Programmatic Environmental Impact Statement for the Expansion and Modernization of Base Seattle

AGENCY: Coast Guard, DHS.

ACTION: Notice of Availability; extension of waiting period for the Final Programmatic Environmental Impact Statement Expansion and Modernization of Base Seattle.

SUMMARY: The Coast Guard is extending the waiting period for the Final Programmatic Environmental Impact Statement (PEIS) for the proposed Expansion and Modernization of Base Seattle. We published a Notice of Availability of the Final PEIS on November 15, 2024. That notice marked the start of a 30-day waiting period. We are extending the wait period. January 10, 2025, is the earliest date that the Coast Guard would issue a final decision.

DATES: The Coast Guard will not issue a final decision on the proposed action until at least January 10, 2025.

ADDRESSES: The complete text of the Final PEIS is available in the docket, which can be found by searching the docket number USCG-2021-0183 using the Federal eRulemaking Portal at <https://www.regulations.gov> or at <https://www.dcms.uscg.mil/NEPA>.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be sent to U.S. Coast Guard, Shore Infrastructure Logistics Center, Environmental Management Division, ATTN: Dean Amundson, 1301 Clay Street, Suite 700N, Oakland, CA 94612-5203; phone 510-637-5541; email BaseSeattlePEIS@uscg.mil.

SUPPLEMENTARY INFORMATION: The Final PEIS was prepared in accordance with the requirements of the National Environmental Policy Act (NEPA), the Council on Environmental Quality regulations implementing NEPA (40

CFR 1500-1508), DHS procedures for implementing NEPA (DHS Instruction Manual 023-01-001-01 (series)), Coast Guard Environmental Planning Policy (Commandant Instruction [COMDTINST] 5090.1), and other applicable DHS and Coast Guard policies and guidance. A Notice of Intent (NOI) to prepare the PEIS was published in the **Federal Register** on May 7, 2021 (86 FR 24637). On October 11, 2022, the Coast Guard published a Notice of Availability (NOA) and a request for comments on the Draft PEIS (87 FR 61344). In response to a comment in the Docket the Coast Guard extended the Public Comment Period until December 16, 2022, which was announced in the **Federal Register** (87 FR 73011) and in local newspapers on November 28, 2022.

The NOA for the Final PEIS was published on November 15, 2024, and the original wait period would have concluded on December 16, 2024. The Coast Guard will extend the wait period for the Final PEIS to allow for additional time for public review due to the complexity of the proposed action and the presence of multiple federal holidays during the review period. The Coast Guard will not issue a Record of Decision until after January 10, 2025.

For more detailed information, please see the original notice titled "Final Programmatic Environmental Impact Statement for the Expansion and Modernization of Base Seattle" published on November 15, 2024 (89 FR 90302). A copy of that notice is also available in the docket.

Following the wait period concluding on January 10, 2025, the Coast Guard will announce its Record of Decision, which will be published in the **Federal Register**.

Dated: December 5, 2024.

A. Grable,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Engineering and Logistics.

[FR Doc. 2024-29048 Filed 12-10-24; 8:45 am]

BILLING CODE 9110-04-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA 2024-0034; OMB No. 1660-0068]

Agency Information Collection Activities: Proposed Collection; Comment Request; Federal Hotel and Motel Fire Safety Declaration Form

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day notice of Extension extension and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on an extension, without change, of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning a list of hotels, motels, and similar places of public accommodations meeting minimum fire-safety requirements. The information collected is voluntary and if approved for listing, the lodging establishment may be used by Federal employees on government related travel and for Federal agency conferences. As the list is open to use by the public, non-government travelers may use the list to identify lodging meeting minimum life-safety criteria from fire.

DATES: Comments must be submitted on or before February 10, 2025.

ADDRESSES: To avoid duplicate submissions to the docket, please submit comments at www.regulations.gov under Docket ID FEMA-2024-0034. Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at <http://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via a link on the homepage of www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Teressa Kaas, Fire Program Specialist, FEMA/U.S. Fire Administration, 301-447-1263, and teressa.kaas@

fema.dhs.gov. You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov*.

SUPPLEMENTARY INFORMATION: The Hotel and Motel Fire Safety Act of 1990 (Pub. L. 101–391) requires FEMA to establish and maintain a list of hotels, motels, and similar places of public accommodation meeting minimum requirements for protection of life from fire. This list is known as the National Master List (NML). This law resulted from a series of deadly fires in hotels and motels, occurring in the late 1970's and 1980's, with high loss of life. The legislative intent of this public law is to provide all travelers the assurance of fire-safety in accommodations identified on the NML. Public Law 101–391 further stipulates that Federal employees on official travel stay in properties approved by the authority having jurisdiction and listed on the current NML. For statutory reference see 15 U.S.C. 2224–26.

Collection of Information

Title: Federal Hotel and Motel Fire Safety Declaration Form.

Type of Information Collection: Extension, without change, of a currently approved information collection.

OMB Number: 1660–0068.

FEMA Forms: FF–USFA–FY–21–112. (formerly FEMA Form 516–0–1).

Abstract: FF–USFA–FY–21–112 (formerly FEMA Form 516–0–1) collects basic information on life-safety systems related directly to fire-safety in hotels, motels, and similar places of accommodations applying for inclusion on the National Master List in compliance with the Hotel and Motel Fire Safety Act of 1990 (Pub. L. 101–391). Information is published in the National Master List and is publicly available.

Affected Public: Business or other for-profit; State, Local or Tribal Government.

Estimated Number of Respondents: 2,021.

Estimated Number of Responses: 2,630.

Estimated Total Annual Burden Hours: 710.

Estimated Total Annual Respondent Cost: \$40,178.

Estimated Respondents' Operation and Maintenance Costs: \$0.

Estimated Respondents' Capital and Start-Up Costs: \$0.

Estimated Total Annual Cost to the Federal Government: \$102,005.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Millicent Brown Wilson,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

[FR Doc. 2024–29012 Filed 12–10–24; 8:45 am]

BILLING CODE 9111–76–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2024–0023; OMB No. 1660–0026]

Agency Information Collection Activities: Submission for OMB Review, Comment Request; Administrative Plan for the Hazard Mitigation Grant Program

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 30-Day notice of extension and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. FEMA invites the general public to take this opportunity to comment on an extension of a currently approved information collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, this notice seeks comments concerning the State

Administrative Plan for the procedural guide that details how the State will administer the Hazard Mitigation Grant Program (HMGP).

DATES: Comments must be submitted on or before January 10, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Information Management Division, 500 C Street SW, Washington, DC 20472, email address *FEMA-Information-Collections-Management@fema.dhs.gov* or Travis Battiest, Section Chief for Tools, SOPS, and Implementation, Hazard Mitigation Assistance Division, Mitigation Directorate, FEMA, at (202) 714–8052 or *travis.battiest@fema.dhs.gov*.

SUPPLEMENTARY INFORMATION: FEMA regulations in 44 CFR 206.437 require development and updates to the Administrative Plan by Applicants or Recipients as a condition of receiving Hazard Mitigation Grant Program (HMGP) funding under Section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act of 1988 (Pub. L. 93–288, as amended) (42 U.S.C. 5170c). Applicants or Recipients can be any State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, or the government of a Federally-recognized Tribe that chooses to act as an Applicant or Recipient.

The regulation at 44 CFR 206.437 requires a State to have a FEMA-approved Administrative Plan to receive HMGP funding. At its minimum, the Administrative Plan will include the designated State agency or Indian Tribal government that will act as the Recipient, identify the State Hazard Mitigation Officer or Tribal Hazard Mitigation Officer, identify staffing requirements, and establish a guide for implementation activities and procedures to account for non-Federal cost sharing. Additional information requirements are guided by the type of mitigation activities being pursued.

The State, territorial, or Tribal government must establish procedures to guide the administration of the HMGP in the Administrative Plan, as outlined in the listed activities below.

FEMA will review the information provided to ensure proper documentation of each activity.

The Department of Homeland Security (DHS) adopted in its entirety the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR part 200) on December 26, 2014. This rule eliminates overlapping and duplicative requirements for stakeholders, including States, territories and Indian Tribal governments, by using general terms such as “recipient” or “pass-through entity.” FEMA is also avoiding unnecessary duplication, overlap and the demand for maintenance of requirements under HMGP in two documents, the State Administrative Plan, and the Tribal Administrative Plan. FEMA instead is offering and referring to one common set of requirements in an “Administrative Plan.” The term “State Administrative Plan” is now referred to “Administrative Plan for the Hazard Mitigation Grant Program.”

This proposed information collection previously published in the **Federal Register** on August 19, 2024, at 89 FR 67101 with a 60-day public comment period. Three public comments were received. Two of the comments discuss policy concerns with the HMGP and are not germane to this information collection. The third public comment is a statement of support from a private non-profit organization and FEMA thanks them for their comment.

The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: Administrative Plan for the Hazard Mitigation Grant Program.

Type of Information Collection: Extension of a currently approved information collection.

OMB Number: 1660–0026.

FEMA Forms: Not applicable.

Abstract: The State Administrative Plan for the Hazard Mitigation Grant Program (HMGP) is a procedural guide that details how the State, territory, or Tribal government will administer the HMGP. The State, territory, or Tribal government (who acts as a recipient) must have a current administrative plan approved by the appropriate FEMA Regional Administrator before receiving HMGP funds. The administrative plan may take any form including a chapter within a comprehensive State, territory, or Tribal mitigation program strategy.

Affected Public: State, Local, or Tribal Government.

Estimated Number of Respondents:

35.

Estimated Number of Responses: 70.

Estimated Total Annual Burden

Hours: 560.

Estimated Total Annual Respondent

Cost: \$37,257.

Estimated Respondents’ Operation and Maintenance Costs: \$0.

Estimated Respondents’ Capital and Start-Up Costs: \$0.

Estimated Total Annual Cost to the Federal Government: \$26,581.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Millicent Brown Wilson,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111–BW–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7080–N–57]

30-Day Notice of Proposed Information Collection; 2025 American Housing Survey; OMB Control No.: 2528–0017

AGENCY: Office of Policy Development and Research, Chief Data Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of

information. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date:* January 10, 2025.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Interested persons are also invited to submit comments regarding this proposal and comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Anna Guido, Clearance Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT:

Anna Guido, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Anna.P.Guido@hud.gov or telephone (202) 402–3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit: <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on September 3, 2024 at 89 FR 71384.

A. Overview of Information Collection

Title of Information Collection: 2025 American Housing Survey.

MB Approval Number: 2528–0017.

Type of Request: Revision of a currently approved collection.

Form Number: N/A.

Description of the need for the information and proposed use:

The purpose of the American Housing Survey (AHS) is to supply the public with detailed and timely information

about housing quality, housing costs, and neighborhood assets, in support of effective housing policy, programs, and markets. Title 12, United States Code, Sections 1701Z–1, 1701Z–2(g), and 1710Z–10a mandates the collection of this information.

Increasing field costs and declining response rates have led HUD to adopt a continuous data collection model as opposed to the periodic 5-month data collection every other year. HUD believes continuous data collection will be more effective, primarily because: (1) it eliminates the expensive, time-consuming Regional Office AHS ramp-up costs every two years, and (2) it puts in place a more experienced AHS workforce with a constant workload. An added benefit is that we will be able to increase the frequency of national and metro AHS estimates, allowing for more current estimates and better comparability to other data sources which collect annual data (surveys such as the American Community Survey and key estimates such as homeownership/vacancy rates).

The survey will continue to be longitudinal, interviewing the same housing unit every two years. The sample will be divided into 12 cohorts where each cohort has a 2-month data collection period. Data collection will begin May 2025.

In addition to the “core” data, HUD plans to collect supplemental data on climate risk and insurance, arts and culture, home accessibility, accessory dwelling units, and housing costs roster. Additionally wording variations related to sexual orientation and gender will be tested in support of the American Community Survey Content Test.

The 2025 survey will begin a new longitudinal sample consisting of approximately 175,000 housing units. The sample is designed to provide

estimates twenty metropolitan areas and at least seventeen states. An oversample of HUD-assisted housing units is included in the sample design. For the first survey cycle (2025–26) a bridge sample will be fielded. The bridge sample will be drawn from housing units that were successfully interviewed in 2023.

The bridge sample serves as an evaluation tool. If something unforeseen were to happen with the 2025 sample, the estimates from the bridge sample can measure what the 2025 estimates would have looked like if we had not redesigned the AHS sample. The bridge sample size will be 8,500. Approximately seven percent of all interviews will be reinterviewed for the purpose of interviewer quality control (an estimated total of 12,845 housing units).

To help reduce respondent burden on households in the longitudinal sample, the 2025 AHS will make use of dependent interviewing techniques, which will decrease the number of questions asked. Policy analysts, program managers, budget analysts, and Congressional staff use AHS data to advise executive and legislative branches about housing conditions and the suitability of public policy initiatives. Academic researchers and private organizations also use AHS data in efforts of specific interest and concern to their respective communities.

The Department of Housing and Urban Development (HUD) needs the AHS data for the following two reasons:

1. With the data, policy analysts can monitor the interaction among housing needs, demand and supply, as well as changes in housing conditions and costs, to aid in the development of housing policies and the design of housing programs appropriate for

different target groups, such as first-time home buyers and the elderly.

2. With the data, HUD can evaluate, monitor, and design HUD programs to improve efficiency and effectiveness.

HUD received two comments.

The first, from the Pine Street Inn, a nonprofit organization that provides resources and support to the homeless population in the greater Boston area. The organization expressed strong support for the proposed changes to the American Housing Survey data collection process and commented that “data regarding the country’s current housing crisis, including the physical condition of homes and neighborhoods, the cost of financing and maintaining homes, and the characteristics of households, is of great importance to our organization.” HUD appreciates the Pine Street Inn’s comments and support of the proposed changes for the 2025 AHS.

The second, from Manufactured Housing Institute (MHI), expressed support for the change to continuous data collection, stating “MHI collects and analyzes information to produce research publications on a near real-time basis. MHI relies on reliable up-to-date information to do so. Therefore, a continuous data collection process would be more accurate and improve MHI’s capabilities in this area.” MHI also asked for clarification on the intervals for release of data and if the releases would be annual or even monthly. HUD appreciates the Manufactured Housing Institute’s comments and support of the proposed changes for the 2025 AHS. Currently, HUD plans to release annual and biennial PUF data products. The biennial file will produce two-year estimates, similar to an average of two consecutive annual estimates.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Occupied Interviews	59,500	1	59,500	0.75	44,625	23.11	\$1,031,283.75
Vacant Interviews	8,750	1	8,750	0.08	700	23.11	16,177.00
Non-interviews	16,625	1	16,625	0	0	23.11	0
Ineligible	2,625	1	2,625	0	0	23.11	0
Subtotal	87,500	1	87,500		45,325.00		1,047,460.75
Reinterviews	6,423	1	6,423	0.17	1,091.91	23.11	25,234.04
Total	93,923	1	93,923		46,416.91		1,072,694.79

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

- (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) The accuracy of the agency’s estimate of the burden of the proposed collection of information;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of

information technology, *e.g.*, permitting electronic submission of responses.

(5) Ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

Colette Pollard,

*Department Reports Management Officer,
Office of Policy Development and Research,
Chief Data Officer.*

[FR Doc. 2024-29094 Filed 12-10-24; 8:45 am]

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-7086-N-33]

60-Day Notice of Proposed Information Collection: Multifamily Insurance Benefits Claims Package, OMB Control No.: 2502-0418

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* February 10, 2025.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal.

Written comments and recommendations for the proposed information collection can be sent within 60 days of publication of this notice to www.regulations.gov. Interested persons are also invited to submit comments regarding this proposal by name and/or OMB Control Number and can be sent to: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410-5000; telephone (202) 402-3400. (this is not a toll-free number) or email at Colette.Pollard@hud.gov, for a copy of

the proposed forms or other available information.

FOR FURTHER INFORMATION CONTACT:

Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette.Pollard@hud.gov or telephone (202) 402-3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Multifamily Insurance Benefits Claims Package.

OMB Approval Number: 2502-0418.

OMB Expiration Date: 07/31/2025.

Type of Request: Extension of a currently approved collection.

Form Numbers: HUD-2741; HUD-2742; HUD-2744-A; HUD-2744-B; HUD-2744-C; HUD-2744-D; HUD-2744-E; HUD-434; HUD-1044-D.

Description of the need for the information and proposed use: A lender with an insured multifamily mortgage pays an annual insurance premium to the Department. When and if the mortgage goes into default, the lender may elect to file a claim for FHA Multifamily insurance benefits with the Department. HUD needs this information to determine if FHA multifamily insurance claims submitted to HUD are accurate, valid and support payment.

Respondents: Business or other for-profit; State, Local, or Tribal Government.

Estimated Number of Respondents: 110.

Estimated Number of Responses: 110.

Frequency of Response: Occasional.

Average Hours per Response: 6.25.

Total Estimated Burden: 688.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

HUD encourages interested parties to submit comments in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.

Jeffrey D. Little,

General Deputy Assistant Secretary for Housing.

[FR Doc. 2024-29058 Filed 12-10-24; 8:45 am]

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-6495-N-01]

Notice of Certain Operating Cost Adjustment Factors for 2025

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice; request for comment.

SUMMARY: This notice establishes operating cost adjustment factors (OCAFs) for project-based assistance contracts issued under section 8 of the United States Housing Act of 1937 and renewed under the Multifamily Assisted Housing Reform and Affordability Act of 1997 (MAHRA) for eligible multifamily housing projects having an anniversary date on or after February 11, 2025. OCAFs are annual factors used to adjust section 8 rents renewed under section 515 or section 524 of MAHRA. Additionally, OCAFs are part of an allowable method of rent adjustment for project-based voucher contracts pursuant to the provision at section 8(o)(13)(I) of the United States Housing Act of 1937 that was implemented June 6, 2024. Through this notice HUD also seeks public input on the technical changes to its OCAF calculation method.

DATES: *Comment due date:* January 10, 2025.

Applicability Date: February 11, 2025.

ADDRESSES: HUD invites interested persons to submit comments regarding changes to the OCAF calculation method. Communications must refer to the above docket number and title and should contain the information specified in the “Request for Public Comments and FMR Reevaluations” section. There are two methods for submitting public comments:

1. *Electronic Submission of Comments.* Interested persons may submit comments or reevaluation requests electronically through the Federal eRulemaking Portal at <https://www.regulations.gov>. HUD strongly encourages commenters to submit comments or reevaluation requests electronically. Electronic submission of comments or reevaluation requests allows the author maximum time to prepare and submit a comment or reevaluation request, ensures timely receipt by HUD, and enables HUD to make them immediately available to the public. Comments or reevaluation requests submitted electronically through the <https://www.regulations.gov> website can be viewed by other submitters and interested members of the public. Commenters or reevaluation requestors should follow instructions provided on that site to submit comments or reevaluation requests electronically.

2. *Submission of Comments by Mail.* Members of the public may submit comments or requests for reevaluation by mail to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW, Room 10276, Washington, DC 20410–0500. Due to security measures at all federal agencies, however, submission of comments by standard mail often results in delayed delivery. To ensure timely receipt of comments or reevaluation requests, HUD recommends that comments or requests submitted by standard mail be submitted at least two weeks in advance of the deadline. HUD will make all comments or reevaluation requests received by mail available to the public at <https://www.regulations.gov>.

Note: To receive consideration as public comments or reevaluation requests, comments or requests must be submitted through one of the two methods specified above. Again, all submissions must refer to the docket number and title of the notice.

No Facsimile Comments or Reevaluation Requests. HUD does not accept facsimile (FAX) comments or requests.

FOR FURTHER INFORMATION CONTACT:

Jennifer Lavorel, Director, Office of Asset Management and Portfolio Oversight Program Administration Office, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; telephone number 202–402–2515 (this is not a toll-free number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

SUPPLEMENTARY INFORMATION:

I. Background

Section 514(e)(2) and section 524(c)(1) of the Multifamily Assisted Housing Reform and Affordability Act of 1997 (MAHRA) (42 U.S.C. 1437f note), as amended, require HUD to establish guidelines for the development of operating cost adjustment factors (OCAFs) for rent adjustments. Similar language is found in sections 524(a)(4)(C)(i), 524(b)(1)(A), and 524(b)(3)(A) of MAHRA, all of which prescribe the use of the OCAF in the calculation of renewal rents. MAHRA gives HUD broad discretion in setting OCAFs, referring, for example, in sections 524(a)(4)(C)(i), 524(b)(1)(A), 524(b)(3)(A), and 524(c)(1), to simply “an operating cost adjustment factor established by the Secretary.” HUD uses a single methodology for establishing OCAFs. The sole limitation to this grant of authority is a specific requirement in each of the foregoing provisions that application of an OCAF “shall not result in a negative adjustment.”

In addition to their use under MAHRA, section 8(o)(13)(I)(i) of the United States Housing Act of 1937 allows the use of OCAFs for project-based voucher contracts as implemented on June 6, 2024 in *Housing Opportunity Through Modernization Act of 2016—Housing Choice Voucher (HCV) and Project-Based Voucher Implementation; Additional Streamlining Changes* (89 FR 38224 (May 7, 2024)).

OCAFs vary among States and territories. Contract rents are adjusted by applying the OCAF for the State or territory in which the subject project is located to that portion of the rent attributable to operating expenses exclusive of debt service.

The OCAFs provided in this notice are applicable to eligible projects having a contract anniversary date on or after February 11, 2025.

II. Changes to OCAF Methodology

HUD seeks public input on the following technical changes to its OCAF calculation methodology.

Insurance component data source. To calculate the inflation factor for the insurance component, HUD has since 2023 used the industry data for Direct Property and Casualty Insurers-Commercial Multiple Peril Insurance series from the Bureau of Labor Statistics, Producer Price Index (PPI). Beginning with the 2025 OCAFs, HUD instead will use the year-to-year change in actual cost data from audited financial statements, as it better captures the significant rise in property insurance costs that multifamily properties have faced in recent years. Specifically, HUD will use actual State-level data, except for States that have fewer than 100 multifamily properties with submitted audited financial statements in 2022 and 2023. For those States, HUD instead uses the HUD Regional average change in actual insurance expenditures. By contrast, HUD’s former methodology of using the PPI failed to capture significant geographic variations in the cost of insurance, as it is a national index. With respect to these changes to OCAF methodology, HUD will consider all comments submitted not later than 30 days from the date of publication of this notice. Unless HUD receives comment that would lead to the reconsideration of these changes, the changes will become effective on February 11, 2025. If HUD receives adverse comment that leads to reconsideration, HUD will notify the public via a revised notice issued immediately following the close of the comment period.

III. OCAF Data Sources

OCAFs are calculated as the sum of weighted component cost changes for electricity, employee benefits, employee wages, fuel oil, goods/supplies/equipment, insurance, natural gas, property taxes, and water/sewer/trash, using publicly available indices. The weights used in the OCAF calculations for each of the nine cost component groupings are set using current percentages attributable to each of the nine expense categories. HUD calculates weights using three years of audited Annual Financial Statements from projects covered by OCAFs. The expenditure percentages for these nine categories have been found to be stable over time, and using three years of data increases their stability. The nine cost component weights, and, thus, the OCAFs, are calculated at the State level, which is the lowest level of

geographical aggregation with enough projects to permit statistical analysis. These data are not available for the Western Pacific Islands, so data for Hawaii are used as the best available indicator of OCAF's for these areas.

HUD uses the best current price data sources for the nine cost categories in calculating annual change factors. State-level data for electricity, fuel oil, and natural gas from Department of Energy surveys are relatively current and continue to be used. Data on changes in employee benefits, employee wages, goods/supplies/equipment, property taxes, and water/sewer/trash costs are available only at the national level. For insurance in 2025, HUD will use State and HUD Region data as described below.

The data sources used for the selected nine cost indicators are as follows:

- **Electricity:** Energy Information Agency (EIA), May 2024 "Electric Power Monthly" report, Table 5.6.B. HUD compares the January 2024 to May 2024 estimate to the January 2023 to May 2023 estimate. https://www.eia.gov/electricity/monthly/epm_table_grapher.php?t=epmt_5_06_b.

- **Employee benefits:** Bureau of Labor Statistics (BLS) Employment Cost Index (ECI), Private Industry Benefits, All Workers (Series ID CIU203000000000000I), at the national level. HUD compares the second quarter 2024 to the second quarter of 2023.

- **Employee wages:** Bureau of Labor Statistics (BLS) ECI, Private Industry Wages and Salaries, All Workers (Series ID CIU202000000000000I), at the national level. HUD compares the second quarter 2024 to the second quarter of 2023.

- **Fuel Oil:** EIA U.S. Weekly Heating Oil and Propane Prices report. Average weekly residential heating oil prices in cents per gallon excluding taxes for the period from October 2, 2023, through the week of March 25, 2024, are compared to the average from October 3, 2022, through the week of March 27, 2023. For the States with insufficient fuel oil consumption to have separate estimates, the relevant regional Petroleum Administration for Defense Districts (PADD) change between these two periods is used; if there is no regional PADD estimate, the U.S. change between these two periods is used. https://www.eia.gov/dnav/pet/pet_pri_wfr_a_EPD2F_PRS_dpgal_w.htm.

- **Goods/Supplies/Equipment:** Bureau of Labor Statistics (BLS) Consumer Price Index, All Items Less Food, Energy and Shelter (Series ID CUUR0000SA0L12E) at the national level. HUD compares the July 2024 estimate to the estimate for July 2023.

- **Insurance:** Audited Financial Statements (AFS), multifamily data for property insurance at the State-level or, for those States with fewer than 100 multifamily properties, at the HUD regional level.¹ HUD compares the average annual property insurance expenditures in 2022 to the expenditures in 2023.

- **Natural Gas:** Energy Information Agency (EIA), Natural Gas, Residential Energy Price, June 2023–May 2024 monthly prices in dollars per 1,000 cubic feet at the State level. Due to EIA data quality standards, several States were missing data for one or two months in 2023 and 2024; in these cases, data for these missing months were estimated using data from the surrounding months in that year and the relationship between that same month and the surrounding months in 2022. http://www.eia.gov/dnav/ng/ng_pri_sum_a_EPG0_PRS_DMcf_a.htm.

- **Property Taxes:** Census Quarterly Summary of State and Local Government Tax Revenue—Table 1 [https://www.census.gov/econ/currentdata/dbsearch?programCode=QTAX&startYear=2021&endYear=2024&categories\[\]=QTAXCAT1&dataType=TOTAL&geoLevel=US&adjusted=0&notAdjusted=1&errorData=0](https://www.census.gov/econ/currentdata/dbsearch?programCode=QTAX&startYear=2021&endYear=2024&categories[]=QTAXCAT1&dataType=TOTAL&geoLevel=US&adjusted=0&notAdjusted=1&errorData=0). Twelve-month property taxes are computed as the total of four quarters of tax receipts for the period from April through March. Total 12-month taxes are then divided by the number of occupied housing units to arrive at average 12-month tax per housing unit. The number of occupied housing units is taken from U.S. Census Bureau's Current Population Survey/Housing Vacancy Survey (CPS/HVS) housing inventory estimates, Table 8: <https://www.census.gov/housing/hvs/data/histtab8.xlsx>.

- **Water/Sewer/Trash:** Consumer Price Index, All Urban Consumers, Water and Sewer and Trash Collection Services (Series ID CUUR00 00SEHG) at the national level. HUD compares the estimate for July 2024 to the estimate for July 2023.

The sum of the nine cost component percentage weights equals 100 percent of operating costs for purposes of OCAF calculations. To calculate the OCAFs, State-level cost component weights developed from AFS data are multiplied by the selected inflation factors. For

¹ The financial statements comprise approximately 17,000 residential properties, including those in the section 8 (including RAD conversions), section 202, and section 811 programs of HUD's Office of Multifamily Housing. There are 17 States with fewer than 100 properties that receive a regional average.

instance, if wages in Virginia comprised 50 percent of total operating cost expenses and increased by 4 percent from 2023 to 2024, the wage increase component of the Virginia OCAF for 2025 would be 2.0 percent (50% * 4%). This 2.0 percent would then be added to the increases for the other eight expense categories to calculate the 2025 OCAF for Virginia. For States where the calculated OCAF is less than zero, the OCAF is floored at zero. The OCAFs for 2025 are included as an Appendix to this notice.

IV. Findings and Certifications: Environmental Impact

This notice sets forth rate determinations and related external administrative requirements and procedures that do not constitute a development decision affecting the physical condition of specific project areas or building sites. Accordingly, under 24 Code of Federal Regulations 50.19(c)(6), this notice is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

V. Paperwork Reduction Act

This notice does not impact the information collection requirements already approved by the Office of Management and Budget (OMB) with OMB Approval Number 2502–0587, under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). In accordance with the Paperwork Reduction Act, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a currently valid OMB control number.

VI. Assistance Listing Number

The Assistance Listing number for this program is 14.195.

Julia R. Gordon,

Assistant Secretary for Housing—FHA Commissioner.

BILLING CODE P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7086–N–32]

60-Day Notice of Proposed Information Collection: Disaster Response Survey and Disaster Recovery Survey, OMB Control No.: 2502–0615

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* February 10, 2025.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal.

Written comments and recommendations for the proposed information collection can be sent within 60 days of publication of this notice to www.regulations.gov. Interested persons are also invited to submit comments regarding this proposal by name and/or OMB Control Number and can be sent to: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410–5000; telephone (202) 402–3400. (this is not a toll-free number) or email at Colette.Pollard@hud.gov, for a copy of the proposed forms or other available information.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette.Pollard@hud.gov or telephone (202) 402–3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Disaster Response Survey and Disaster Recovery Survey.

OMB Approval Number: 2502–0615.

OMB Expiration Date: July 31, 2025.

Type of Request: Revision of a currently approved collection.

Form Number: None.

Description of the need for the information and proposed use: The two Disaster Surveys (Disaster Response Survey and Disaster Recovery Survey) will assess the operational and capacity status of Housing Counseling Agencies impacted disasters through the life cycle of the disasters. These Surveys are necessary to assess the impact of the disasters on the operation of HUD-approved housing counseling agencies. These surveys will more accurately assess the current operating status and

capacity of housing counseling agencies impacted by disasters through the life cycle of disasters. The information collected will be used to identify the needs of the housing counseling agency and to inform OHC about the types of support that would be the most responsive to the needs of agencies and their clients.

Respondents: Not-for-profit institutions.

Estimated Number of Respondents: 2,500.

Estimated Number of Responses: 5,000.

Frequency of Response: 1–3 per year.

Average Hours per Response: 1.

Total Estimated Burden: 5,000 hours.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.

Jeffrey D. Little,

General Deputy Assistant Secretary for Housing.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7080–N–58]

30-Day Notice of Proposed Information Collection: Energy Efficient Mortgage (EEM) Program, OMB Control No.: 2502–0561

AGENCY: Office of Policy Development and Research, Chief Data Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comments from all interested parties on the proposed collection of information. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date:* January 10, 2025.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. Interested persons are also invited to submit comments regarding this proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410–5000; telephone 202–402–3577 (this is not a toll-free number) or email: PaperworkReductionActOffice@hud.gov.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email: Colette.Pollard@hud.gov, telephone (202) 402–3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on May 24, 2024 at 89 FR 45913.

A. Overview of Information Collection

Title of Information Collection: Energy Efficient Mortgage (EEM) Program.

OMB Approval Number: 2502–0561.

Type of Request: Extension of a previously approved collection.

Form Number: N/A.

Description of the need for the information and proposed use: Lenders provide the required information to determine the eligibility of a mortgage to be insured under Section 513 of the Housing and Community Development Act of 1992 (Section 106 of the Energy Policy Act of 1992). Section 2123 of the Housing and Economic Recovery Act of 2008 (HERA) (Pub. L. 110–289, approved July 30, 2008) amended Section 106 of the Energy Policy Act of 1992 by revising the maximum dollar amount that can be added to an FHA-insured mortgage for energy efficient improvements.

Respondents: Business or other for-profit (lenders).

Estimated Number of Respondents: 3.

Estimated Number of Responses: 17.

Frequency of Response: On occasion.

Average Hours per Response: 4.25.

Total Estimated Burdens: 29.75.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comments in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

(phone); permitsR3ES@fws.gov (email). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite review and comment from the public and local, State, Tribal, and Federal agencies on applications we have received for permits to conduct certain activities with endangered and threatened species under section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and our regulations in the Code of Federal Regulations (CFR) at 50 CFR part 17. Documents and

other information submitted with the applications are available for review, subject to the requirements of the Privacy Act and the Freedom of Information Act.

Background

The ESA prohibits certain activities with endangered and threatened species unless authorized by a Federal permit. The ESA and our implementing regulations in part 17 of title 50 of the Code of Federal Regulations (CFR) provide for the issuance of such permits and require that we invite public comment before issuing permits for activities involving endangered species.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. Our regulations implementing section

10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

The ESA requires that we invite public comment before issuing these permits. Accordingly, we invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies. Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild.

Application No.	Applicant	Species	Location	Activity	Type of take	Permit action
ES06801A	Pittsburgh Wildlife & Environmental, Inc., McDonald, PA.	Indiana bat (<i>Myotis sodalis</i>), gray bat (<i>M. grisescens</i>), northern long-eared bat (<i>M. septentrionalis</i>).	AL, AR, CT, DE, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MO, MS, MT, NE, NH, NJ, NY, NC, ND, OK, OH, PA, RI, SC, SD, TN, TX, VT, VA, WV, WI, WY.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, and evaluate impacts.	Capture, handle, band, radiotelemetry, enter hibernacula, release.	Renew.
ESPER13438511 ...	Michael Moore, Ames, IA.	Topeka shiner (<i>Notropis topeka</i>).	IA	Conduct presence/absence surveys, document habitat use, conduct population monitoring, and evaluate impacts.	Capture, handle, release.	New.
ES53616C	Illinois Natural History Survey, Champaign, IL.	Add—Hines' Emerald Dragonfly (<i>Somatochlora hineana</i>)—to existing authorized species: rusty patched bumble bee (<i>Bombus affinis</i>).	Add WI to existing authorized location IL.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, and evaluate impacts.	Capture, handle, release.	Amend.

Public Availability of Comments

Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment

that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Next Steps

If we decide to issue permits to any of the applicants listed in this notice, we will publish a notice in the **Federal Register**.

Authority

We publish this notice under section 10(c) of the Endangered Species Act of

1973, as amended (16 U.S.C. 1531 *et seq.*).

Lori Nordstrom,

Assistant Regional Director, Ecological Service, Midwest Region.

[FR Doc. 2024–29018 Filed 12–10–24; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[256A2100DD/AAKC001030/
A0A501010.999900]

Indian Entities Recognized by and Eligible To Receive Services From the United States Bureau of Indian Affairs

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes the current list of 574 Tribal entities recognized by and eligible for funding and services from the Bureau of Indian Affairs (BIA) by virtue of their status as Indian Tribes.

DATES: The list is updated from the notice published on January 8, 2024 (88 FR 944).

FOR FURTHER INFORMATION CONTACT: Ms. Shyla Joe, Bureau of Indian Affairs, Tribal Relations Specialist, Office of Indian Services, Mail Stop 3645–MIB, 1849 C Street NW, Washington, DC 20240. Telephone number: (202) 513–7641.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to section 104 of the Federally Recognized Indian Tribe List Act of November 2, 1994 (Pub. L. 103–454; 108 Stat. 4791, 4792), in accordance with section 83.6(a) of part 83 of title 25 of the Code of Federal Regulations, and in exercise of authority delegated to the Assistant Secretary—Indian Affairs under 25 U.S.C. 2 and 9 and Department of the Interior Manual part 209, chapter 8. Published below is an updated list of federally recognized Indian Tribes within the contiguous 48 states and Alaska. Amendments to the list include formatting edits and name changes.

To aid in identifying Tribal name changes, Tribes' previously listed, former names, or also known as (aka) names are included in parentheses after the correct current Tribal name. The BIA will continue to list the Tribe's former or previously listed name for several years before dropping the former or previously listed name from the list.

The listed Indian entities are recognized to have the immunities and privileges available to federally

recognized Indian Tribes by virtue of their Government-to-Government relationship with the United States as well as the responsibilities, powers, limitations, and obligations of such Indian Tribes. The BIA has continued the practice of listing the Alaska Native entities separately for the purpose of facilitating identification of them.

Bryan Newland,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[256A2100DD/AAKC001030/
 A0A501010.999900]

Receipt of Documented Petition for Federal Acknowledgment as an American Indian Tribe

AGENCY: Bureau of Indian Affairs,
 Interior.

ACTION: Notice.

SUMMARY: The Department of the Interior (Department) gives notice that the group known as the Tuskarora Nation of Moratoc Indians has filed a documented petition for Federal acknowledgment as an American Indian Tribe with the Assistant Secretary—Indian Affairs. The Department seeks comment and evidence from the public on the petition.

DATES: Comments and evidence must be received or postmarked by April 15, 2025.

ADDRESSES: Copies of the narrative portion of the documented petition, as submitted by the petitioner (with any redactions appropriate under 25 CFR 83.21(b)), and other information are available at the Office of Federal Acknowledgment's (OFA) website: www.bia.gov/as-ia/ofa. Submit any comments or evidence to: Department of the Interior, Office of the Assistant Secretary—Indian Affairs, Attention: Office of Federal Acknowledgment, Mail Stop 4071 MIB, 1849 C Street NW, Washington, DC 20240, or by email to: Ofa_Info@bia.gov.

FOR FURTHER INFORMATION CONTACT:
 Nikki Bass, OFA Director, Office of the

Assistant Secretary—Indian Affairs,
 Department of the Interior, telephone:
 (202) 513–7650.

SUPPLEMENTARY INFORMATION: On July 31, 2015, the Department's revisions to 25 CFR part 83 became final and effective (80 FR 37862). A key goal of the revisions was to improve transparency through increased notice of petitions and providing improved public access to petitions. Today the Department informs the public that a complete documented petition has been submitted under the current regulations, that portions of that petition are publicly available on the website identified above for easy access, and that we are seeking public comment early in the process on this petition.

Under 25 CFR 83.22(b)(1), OFA publishes notice that the following group has filed a documented petition for Federal acknowledgment as an American Indian Tribe to the Assistant Secretary—Indian Affairs: Tuskarora Nation of Moratoc Indians. The contact information for the petitioner is Mr. Gary Wayne Revels, Jr, 193 Coon Trail Lane, Saint Pauls, North Carolina 28384.

Also, under 25 CFR 83.22(b)(1), OFA publishes on its website the following:

- i. The narrative portion of the documented petition, as submitted by the petitioner (with any redactions appropriate under 25 CFR 83.21(b));
- ii. The name, location, and mailing address of the petitioner and other information to identify the entity;
- iii. The date of receipt;
- iv. The opportunity for individuals and entities to submit comments and evidence supporting or opposing the petitioner's request for acknowledgment within 120 days of the date of the website posting; and
- v. The opportunity for individuals and entities to request to be kept informed of general actions regarding a specific petitioner.

The Department publishes this notice and request for comment in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by Department Manual part 209, chapter 8.

Bryan Newland,

Assistant Secretary—Indian Affairs.

BILLING CODE 4337–15–P

DEPARTMENT OF THE INTERIOR**Bureau of Land Management****[BLM_ID_FRN; MO# 4500183156]****Notice of Availability of the Record of Decision for the Lava Ridge Wind Project in Jerome, Lincoln, and Minidoka Counties, Idaho****AGENCY:** Bureau of Land Management, Interior.**ACTION:** Notice of availability.**SUMMARY:** The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the Lava Ridge Wind Project Final Environmental Impact Statement (EIS). The ROD constitutes the decision of the BLM, as approved by the Department of the Interior (DOI).**DATES:** The ROD was signed on Dec. 5, 2024.**ADDRESSES:** The ROD is available at <https://eplanning.blm.gov/eplanning-ui/project/2013782/510> and in hard copy at the BLM Shoshone Field Office, 400 W F St., Shoshone, ID 83352.**FOR FURTHER INFORMATION CONTACT:**

Kasey Prestwich, project manager, telephone 208-732-7204; address in

ADDRESSES above; and email kprestwich@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mr. Prestwich. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.**SUPPLEMENTARY INFORMATION:** The DOI has approved the BLM's decision to issue a right-of-way (ROW) grant for the Lava Ridge Wind Project. Consistent with the direction provided through the ROD and applicable laws and regulations, the BLM will issue Magic Valley Energy (MVE) a non-exclusive, non-possessory ROW grant with stipulations, to construct, operate and maintain, and decommission a wind-powered electrical generation facility on public lands within Jerome, Lincoln, and Minidoka counties, Idaho. The ROW grant will authorize MVE to develop and operate the project as described in an approved plan of development, updated consistent with the terms established in the ROD.

The ROW authorizes installation of up to 231 wind turbines, along with related infrastructure and facilities on BLM-managed public lands. The ROW

grant issued by the BLM will require MVE to comply with terms and conditions, including project avoidance and minimization measures, fulfill compensatory mitigation requirements, adhere to processes established for the preservation of historic properties, and meet any additional requirements, such as obtaining additional permits or authorizations, established by Federal, State, or local laws.

The ROW area encompasses the BLM-managed public lands delineated and described in Appendices A and B of the ROD. The estimated total area of the ROW is 57,447 acres, with all project-related infrastructure and facilities confined within the designated siting corridors. The siting corridors, estimated to be 38,535 acres, limit the location of the project infrastructure to areas considered within the Lava Ridge Wind Project Final EIS; however, the final footprint of the project will be smaller and consistent with the disturbance area described in the Final EIS (the portion of ground disturbance on public lands is estimated to be 3,926 acres).

The decision to authorize this energy generation project on BLM-managed public lands is consistent with the Federal Land Policy and Management Act, as amended, and the BLM's ROW regulations (43 U.S.C. 1761; 43 CFR part 2800).

Approval of this ROW constitutes the final decision of the DOI and, in accordance with the regulations at 43 CFR 4.410(a)(3), is not subject to appeal under DOI regulations at 43 CFR part 4.

Michael C. Courtney,*Twin Falls District Manager.*

BILLING CODE 4340-98-P**INTERNATIONAL TRADE COMMISSION****[Investigation Nos. 701-TA-716-719 and 731-TA-1683-1687 (Final)]****Epoxy Resins From China, India, South Korea, Taiwan, and Thailand; Revised Schedule for the Subject Investigations****AGENCY:** United States International Trade Commission.**ACTION:** Notice.**DATES:** November 29, 2024.**FOR FURTHER INFORMATION CONTACT:**Alejandro Orozco (202-205-3177), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.**SUPPLEMENTARY INFORMATION:** Effective November 13, 2024, the Commission established a schedule for the conduct of the final phase of the subject investigations (89 FR 92719, November 22, 2024) following the U.S. Department of Commerce's ("Commerce")

preliminary affirmative sales-at-less-than-fair-value determination with respect to epoxy resins from China (89 FR 89594, November 13, 2024). Commerce subsequently postponed the date for its final determination in the sales-at-less-than-fair-value investigation with respect to China from January 21, 2025 to March 28, 2025 (89 FR 94709, November 29, 2024). The Commission, therefore, is revising its schedule to conform with Commerce's new schedule.

The Commission's revised dates in the schedule are as follows: the prehearing staff report will be placed in the nonpublic record on March 18, 2025; the deadline for filing prehearing briefs is 5:15 p.m. on March 25, 2025; requests to appear at the hearing must be filed with the Secretary to the Commission not later than 5:15 p.m. on March 26, 2025; the prehearing conference, if deemed necessary, will be held at the U.S. International Trade Commission Building on March 28, 2025; the hearing will be held at the U.S. International Trade Commission Building at 9:30 a.m. on April 3, 2025; the deadline for filing posthearing briefs is 5:15 p.m. on April 10, 2025; the Commission will make its final release of information on April 23, 2025; and final party comments are due on 5:15 p.m. on April 25, 2025.

For further information concerning this proceeding, see the Commission's notice cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

Authority: This investigation is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.21 of the Commission's rules.

By order of the Commission.

Issued: December 6, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024–29106 Filed 12–10–24; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1426]

Certain Crafting Machines and Components Thereof; Notice of Institution of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on October 4, 2024, under section 337 of the Tariff Act of 1930, as amended, on behalf of Cricut, Inc. of South Jordan, Utah. Supplements were filed on October 24, 2024, October 25, 2024, and October 29, 2024. The complaint, as supplemented, alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain crafting machines and components thereof by reason of infringement of certain claims of U.S. Patent No. 11,208,758 (“the ‘758 patent”); U.S. Patent No. 11,905,646 (“the ‘646 patent”); U.S. Patent No. D893,563 (“the ‘D563 patent”); U.S. Patent No. D910,724 (“the ‘D724 patent”); U.S. Patent No. D926,237 (“the ‘D237 patent”); and U.S. Patent No. D1,029,090 (“the ‘D090 patent”). The complaint further alleges that an industry in the United States exists or is in the process of being established as required by the applicable Federal Statute. The complaint requests that the Commission institute an investigation pursuant to Section 337 and, after the investigation, issue a limited exclusion order with respect to the ‘758 Patent, the ‘646 Patent, and the ‘D090 Patent; issue a general exclusion order, or in the alternative a limited exclusion order, with respect to the ‘D563 Patent, the ‘D724 Patent, and the ‘D237 Patent; and issue cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email EDIS3Help@usitc.gov. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205–2000. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>.

FOR FURTHER INFORMATION CONTACT: Pathenia M. Proctor, The Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–2560.

SUPPLEMENTARY INFORMATION:

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff

Act of 1930, as amended, 19 U.S.C. 1337, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2024).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on December 5, 2024, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain products identified in paragraph (2) by reason of infringement of one or more of claims 18–23 of the ‘758 patent; and claims 1, 2, 8–12, and 14–16 of the ‘646 patent; the claim of the ‘D563 patent; the claim of the ‘D724 patent; the claim of the ‘D237 patent; and the claim of the ‘D090 patent, and whether an industry in the United States exists or is in the process of being established as required by subsection (a)(2) of section 337;

(2) Pursuant to section 210.10(b)(1) of the Commission's Rules of Practice and Procedure, 19 CFR 210.10(b)(1), the plain language description of the accused products or category of accused products, which defines the scope of the investigation, is “cutting machines and heat press machines for use in crafting and components thereof”;¹

(3) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Cricut, Inc., 10855 South River Front Parkway, South Jordan, Utah 84095.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Hunan Sijiu Technology, Co. Ltd., 1301, Building B–8, Lugu Yuyuan Production Workshop, No. 27 Wenxuan Road, High-tech Zone, Changsha, China 410000

Hunan Sijiu Electronic Technology Co., Ltd., 1301, Building B–8, Lugu Yuyuan Production Workshop, No. 27

¹ In this plain English statement of the scope of investigation, “components thereof” is included pursuant to the allegations in the complaint. To the extent that the Complainant has included such an allegation based upon a concern regarding specific components, the Complainant should, during the course of this investigation, seek adjudication and specifically identify the components of the claimed invention sought for exclusion. The lack of adjudication of specific components, however, would not affect any later ability to adjudicate and remedy circumvention through the importation of components with additional enforcement actions.

Wenxuan Road, High-tech Zone,
Changsha, China 410000
Guangdong Rongtu Technology Co.,
Ltd., Floor 8, No. 15, Huafa Road,

(c) The Office of Unfair Import
Investigations, U.S. International Trade
Commission, 500 E Street SW, Suite
401, Washington, DC 20436; and

(4) For the investigation so instituted,
the Chief Administrative Law Judge,
U.S. International Trade Commission,
shall designate the presiding
Administrative Law Judge.

Responses to the complaint and the
notice of investigation must be
submitted by the named respondents in
accordance with section 210.13 of the
Commission's Rules of Practice and
Procedure, 19 CFR 210.13. Pursuant to
19 CFR 201.16(e) and 210.13(a), as
amended in 85 FR 15798 (March 19,
2020), such responses will be
considered by the Commission if
received not later than 20 days after the
date of service by the complainant of the
complaint and the notice of
investigation. Extensions of time for
submitting responses to the complaint
and the notice of investigation will not
be granted unless good cause therefor is
shown.

Failure of a respondent to file a timely
response to each allegation in the
complaint and in this notice may be
deemed to constitute a waiver of the
right to appear and contest the
allegations of the complaint and this
notice, and to authorize the
administrative law judge and the
Commission, without further notice to
the respondent, to find the facts to be as
alleged in the complaint and this notice
and to enter an initial determination
and a final determination containing
such findings, and may result in the

issuance of an exclusion order or a cease
and desist order or both directed against
the respondent.

By order of the Commission.

Issued: December 6, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024-29107 Filed 12-10-24; 8:45 am]

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: International Trade
Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that
the U.S. International Trade
Commission has received a complaint
entitled *Certain Composite Intermediate
Bulk Containers, DN 3789*; the
Commission is soliciting comments on
any public interest issues raised by the
complaint or complainant's filing
pursuant to the Commission's Rules of
Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa
R. Barton, Secretary to the Commission,
U.S. International Trade Commission,
500 E Street SW, Washington, DC
20436, telephone (202) 205-2000. The
public version of the complaint can be
accessed on the Commission's
Electronic Document Information
System (EDIS) at <https://edis.usitc.gov>.
For help accessing EDIS, please email
EDIS3Help@usitc.gov.

General information concerning the
Commission may also be obtained by
accessing its internet server at United
States International Trade Commission
(USITC) at <https://www.usitc.gov>. The
public record for this investigation may
be viewed on the Commission's
Electronic Document Information
System (EDIS) at <https://edis.usitc.gov>.
Hearing-impaired persons are advised
that information on this matter can be
obtained by contacting the
Commission's TDD terminal on (202)
205-1810.

SUPPLEMENTARY INFORMATION: The
Commission has received a complaint
and a submission pursuant to § 210.8(b)
of the Commission's Rules of Practice
and Procedure filed on behalf of Schütz
Container Systems, Inc. and Protechna
S.A. on December 5, 2024. The
complaint alleges violations of section
337 of the Tariff Act of 1930 (19 U.S.C.
1337) in the importation into the United
States, the sale for importation, and the

sale within the United States after
importation of certain composite
intermediate bulk containers. The
complaint names as respondents:
Shandong Jinshan Jieyuan Container
Co., Ltd. of China; Zibo Jieli Plastic
Pipe Manufacture Co. Ltd. of China;
Shanghai Sakura Plastic Products Co.,
Ltd. (d/b/a Shanghai Yinghua Plastic
Products Co., LTD) of China; and Hebei
Shijiheng Plastics, Co., Ltd. of China.
The complainant requests that the
Commission issue a general exclusion
order or, in the alternative, issue a
limited exclusion order, and cease and
desist orders.

Proposed respondents, other
interested parties, members of the
public, and interested government
agencies are invited to file comments on
any public interest issues raised by the
complaint or § 210.8(b) filing.
Comments should address whether
issuance of the relief specifically
requested by the complainant in this
investigation would affect the public
health and welfare in the United States,
competitive conditions in the United
States economy, the production of like
or directly competitive articles in the
United States, or United States
consumers.

In particular, the Commission is
interested in comments that:

(i) explain how the articles potentially
subject to the requested remedial orders
are used in the United States;

(ii) identify any public health, safety,
or welfare concerns in the United States
relating to the requested remedial
orders;

(iii) identify like or directly
competitive articles that complainant,
its licensees, or third parties make in the
United States which could replace the
subject articles if they were to be
excluded;

(iv) indicate whether complainant,
complainant's licensees, and/or third
party suppliers have the capacity to
replace the volume of articles
potentially subject to the requested
exclusion order and/or a cease and
desist order within a commercially
reasonable time; and

(v) explain how the requested
remedial orders would impact United
States consumers.

Written submissions on the public
interest must be filed no later than by
close of business, eight calendar days
after the date of publication of this
notice in the **Federal Register**. There
will be further opportunities for
comment on the public interest after the
issuance of any final initial
determination in this investigation. Any
written submissions on other issues
must also be filed by no later than the

close of business, eight calendar days after publication of this notice in the **Federal Register**. Complainant may file replies to any written submissions no later than three calendar days after the date on which any initial submissions were due, notwithstanding § 201.14(a) of the Commission's Rules of Practice and Procedure. No other submissions will be accepted, unless requested by the Commission. Any submissions and replies filed in response to this Notice are limited to five (5) pages in length, inclusive of attachments.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. Submissions should refer to the docket number ("Docket No. 3789") in a prominent place on the cover page and/or the first page. (See Handbook for Electronic Filing Procedures, Electronic Filing Procedures¹). Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>.) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice. Persons with questions regarding filing should contact the Secretary at EDIS3Help@usitc.gov.

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract

personnel², solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS³.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of §§ 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: December 5, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

Notice of Proposed Settlement Agreement Under the Oil Pollution Act

On December 5, 2024, the Department of Justice approved a proposed Settlement Agreement among the United States, State of California, and settling defendant United Molasses, Inc. under the Oil Pollution Act, related to the Port of Richmond Terminal 4 site in Richmond, California. The Settlement Agreement requires the settling defendant to pay \$650,000.00 to resolve a claim for damages for injuries to natural resources from alleged oil discharges from the site.

The publication of this notice opens a period for public comment on the Settlement Agreement. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to Settlement Agreement among the United States, State of California, and United Molasses, Inc., D.J. Ref. No. 90-5-1-1-12847. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

<i>To submit comments:</i>	<i>Send them to:</i>
By email	pubcomment-ees.enrd@usdoj.gov .
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044-7611.

During the public comment period, the Settlement Agreement may be examined at and downloaded from this

Justice Department website: <https://www.justice.gov/enrd/consent-decrees>. If you require assistance accessing the Consent Decree you may request assistance by email or by mail to the addresses provided above for submitting comments.

BILLING CODE 4410-15-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the System Unit Resource Protection Act

On December 6, 2024, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of Colorado in the lawsuit entitled *United States v. Water Supply and Storage Company, in personam, and Grand River Ditch, in rem*, Civil Action No. 1:23-cv-00533-CNS-TPO.

On February 27, 2023, the United States filed a lawsuit alleging that Defendants, Water Supply and Storage Company ("WSSC"), *in personam*, and Grand River Ditch, *in rem*, are liable for damages and response costs under the System Unit Resource Protection Act and that WSSC is liable under a March 21, 1907 stipulation between WSSC and the U.S. Forest Service regarding operation and maintenance of the Grand River Ditch. The verified complaint alleges that on or around June 17, 2017, a closed culvert/pipe system, which forms part of the Grand River Ditch's infrastructure, ruptured, causing substantial water to flow into the drainage below in Rocky Mountain National Park and resulting in significant damage to natural resources.

The consent decree requires Defendants to pay the United States \$2,680,000 in response costs and damages, to enter into an operations and maintenance agreement governing management of the Grand River Ditch, and to hire a third-party independent consultant to develop a comprehensive operations and maintenance plan for the Grand River Ditch.

The publication of this notice opens a period for public comment on the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. Water Supply and Storage Company, in personam, and Grand River Ditch, in rem*, D.J. Ref. No.

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Employment and Training Administration

Agency Information Collection Activities; Comment Request; Criteria and Non-Criteria Agricultural Clearance Order Forms and H–2A Application for Temporary Employment Certification in States and by Employers Covered by Injunction of the Farmworker Protection

ACTION: Notice.

SUMMARY: The Department of Labor’s (DOL) Employment and Training Administration (ETA) is soliciting comments concerning a proposed extension for the authority to conduct the information collection request (ICR) titled, “Criteria and Non-Criteria Agricultural Clearance Order Forms and H–2A Application for Temporary Employment Certification in States and by Employers Covered by Injunction of the Farmworker Protection Rule” and the related information collection and retention requirements (Office of Management and Budget (OMB) Control Number 1205–0562), which covers

Forms ETA–9142A, *Application for H–2A Temporary Employment Certification*; ETA–9142A, Appendix A, *Assurances and Obligations*; ETA–9142A, *Final Determination: H–2A Temporary Labor Certification Approval*; ETA–790, *Agricultural Clearance Order*; ETA–790A, *H–2A Agricultural Clearance Order*; ETA–790/790A, Addendum A, *Additional Crops or Agricultural Activities*; ETA–790/790A, Addendum B, *Additional Worksite and/or Housing Information*; ETA–790B, (Non-Criteria) *Agricultural Clearance Order*; and related form instructions. This comment request is part of continuing Departmental efforts to reduce paperwork and respondent burden in accordance with the Paperwork Reduction Act of 1995 (PRA).

DATES: Consideration will be given to all written comments received by February 10, 2025.

ADDRESSES: A copy of this ICR with applicable supporting documentation, including a description of the likely respondents, proposed frequency of response, and estimated total burden, may be obtained for free by contacting Brian Pasternak, Administrator, Office of Foreign Labor Certification, by telephone at 202–693–8200 (this is not a toll-free number), TTY 1–877–889–5627 (this is not a toll-free number), or by email at ETA-PRA@dol.gov.

Instructions: Submit written comments about, or requests for a copy of, this ICR by email at ETA-PRA@dol.gov. To ensure proper consideration, include the OMB Control number 1205–0562.

FOR FURTHER INFORMATION CONTACT: Patrice Gibson, by telephone at 202–693–8200 (this is not a toll-free number) or by email at ETA-PRA@dol.gov.

SUPPLEMENTARY INFORMATION: DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the Office of Management and Budget (OMB) for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The information collection is required by secs. 101(a)(15)(H)(ii)(a), 214(c), and 218 of the Immigration and Nationality Act (INA) (8 U.S.C. 1101(a)(15)(H)(ii)(a), 1184(c), and 1188), as well as 8 CFR

214.2(h)(5) and 20 CFR part 655, subpart B, and 20 CFR part 653, subpart F, and 29 CFR part 501. The H–2A visa program enables employers to bring nonimmigrant foreign workers to the United States to perform agricultural work of a seasonal or temporary nature as defined in 8 U.S.C.

1101(a)(15)(H)(ii)(a). Before an employer can file a petition with the Department of Homeland Security (DHS) to import temporary workers as H–2A nonimmigrants, the INA and DHS regulations require an employer to first obtain a determination from DOL certifying whether a qualified U.S. worker is available to fill the job opportunity described in the employer’s petition for a temporary agricultural worker and whether a foreign worker’s employment in the job opportunity will adversely affect the wages or working conditions of similarly employed workers in the U.S. 8 U.S.C. 1188, INA sec. 218; 8 CFR 214.2(h)(5)(i), (ii), and (iv)(B). DOL’s regulations establish the processes by which an employer must obtain a temporary labor certification from DOL and the rights and obligations of workers and employers. 20 CFR part 655, subpart B; 29 CFR part 501.

This ICR, OMB Control No. 1205–0562, includes the collection of information related to the temporary labor certification process and agricultural clearance order process, which may or may not be connected to the H–2A program. The information contained in the application Form ETA–9142A, *H–2A Application for Temporary Employment Certification*, and job order Form ETA–790/790A, *H–2A Agricultural Clearance Order*, together serve as the basis for the Secretary of Labor’s determination that qualified U.S. workers are not available to perform the services or labor needed by the employer and that the wages and working conditions of similarly employed workers in the U.S. will not be adversely affected by the employment of H–2A workers. Employers use *Appendix A* of Form ETA–9142A to attest that they will comply with all of the terms, conditions, and obligations of the H–2A program. ETA is seeking a three-year extension, without change, for each of these forms.

DOL uses Form ETA–9142A and Forms ETA 790/790A to meet its statutory and regulatory responsibilities for administering the H–2A program. Similarly, DOL uses Forms ETA 790/790B to administer the Agricultural Recruitment System (ARS). Employers seeking to use the H–2A program to employ nonimmigrant workers to perform agricultural services or labor on

a temporary or seasonal basis must submit a completed agricultural clearance order (Forms ETA790/790A) and *Application for Temporary Employment Certification* (Form ETA 9142A) electronically through the Office of Foreign Labor Certification's Foreign Labor Application Gateway (FLAG) system. Employers seeking to employ U.S. workers through the ARS intrastate and interstate job clearance system, without also intending to use the H-2A visa program, must submit a completed agricultural clearance order (Forms ETA 790/790B) to the applicable State Workforce Agency.

DOL published an emergency PRA **Federal Register** Notice that would allow the Department to retain the current H-2A and ARS forms for use by the parties subject to the *Kansas v. DOL* litigation, while also providing DOL the authority to simultaneously proceed with implementation of the new H-2A forms under OMB number 1205-0466 that went into effect under the Farmworker Protection Rule on September 12, 2024, and the new ARS forms under OMB number 1205-0134 that went into effect on July 11, 2024. The emergency PRA clearance would allow DOL to utilize prior approved Forms ETA 790, 790A, 790B, and 9142A, which are necessary to ensure continuity in administering the H-2A program and the ARS nationwide. See 89 FR 73725. On September 12, 2024, OMB approved and granted DOL emergency approval of this new OMB Control number through February 28, 2025, and provided a new OMB Control Number of 1205-0562 for this new ICR.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1205-0562.

Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, (e.g., permitting electronic submission of responses).

Agency: DOL-ETA.

Type of Review: Extension Without Changes.

Title of Collection: Criteria and Non-Criteria Agricultural Clearance Order Forms and H-2A Application for Temporary Employment Certification in States and by Employers Covered by Injunction of the Farmworker Protection Rule.

Forms: ETA-9142A, H-2A *Application for Temporary Employment Certification*; ETA-9142A—*Appendix A*; ETA-9142A—*Final Determination: H-2A Temporary Labor Certification Approval*; ETA-790, *Agricultural Clearance Order*; ETA-790A, H-2A *Agricultural Clearance Order*; ETA-790/790A—*Addendum A*; ETA-790/790A—*Addendum B*; ETA-790B (Non-Criteria) *Agricultural Clearance Order*.

OMB Control Number: 1205-0562.

Affected Public: Individuals or Households, Private Sector—businesses or other for-profits, Government, State, Local and Tribal Governments.

Estimated Number of Respondents: 11,905.

Frequency: On Occasion.

Total Estimated Annual Responses: 141,472.

Estimated Average Time per Response: Varies.

Estimated Total Annual Burden Hours: 63,906.94 hours.

Total Estimated Annual Other Cost Burden: \$0.

Authority: 44 U.S.C. 3506(c)(2)(A).

José Javier Rodríguez,

Assistant Secretary for Employment and Training, Labor.

BILLING CODE 4510-FP-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Rockwell Mining, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before January 10, 2025.

ADDRESSES: You may submit comments identified by Docket No. MSHA-2024-0103 by any of the following methods:

1. *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments for MSHA-2024-0103.

2. *Fax:* 202-693-9441.

3. *Email:* petitioncomments@dol.gov.

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202-5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202-693-9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202-693-9440 (voice), Petitionsformodification@dol.gov (email), or 202-693-9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–078–C.

Petitioner: Rockwell Mining, LLC, 250 West Main Street, Suite 2000, Lexington, KY 40507.

Mine: Eagle #3 Mine, MSHA ID No. 46–09427, located in Wyoming County, West Virginia.

Regulation Affected: 30 CFR 75.1002(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.1002(a) to allow the use of unapproved Powered Air Purifying Respirators (PAPRs) within 150 feet of pillar workings or longwall faces. Specifically, the petitioner is requesting to utilize the CleanSpace EX PAPR and sealed motor/blower/battery power pack assembly, and the 3M Versaflo TR–800 Intrinsically Safe PAPR motor/blower and battery with battery pack. The petitioner states that:

(a) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe.

(b) The CleanSpace EX PAPR also qualifies as intrinsically safe.

(c) Both the CleanSpace EX and the 3M Versaflo TR–800 PAPRs provide a constant flow of air inside the mask or helmet. This airflow provides respiratory protection and comfort in hot working conditions.

(d) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is MSHA-approved as permissible.

(e) Neither the 3M nor the CleanSpace is pursuing MSHA approval.

(f) Eagle #3 Mine currently makes available to all miners NIOSH-approved high efficiency 100 series respirators to protect the miners against potential exposure to respirable coal mine dust, including crystalline silica, during

normal mining conditions. Eagle #3 Mine desires to expand the miners' option in choosing a respirator that provides the greatest degree of protection as well as comfort while being worn. Powered PAPRs provide a constant flow of filtered air and serve that purpose.

(g) On June 17, 2024, MSHA's final rule *Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection* took effect. The rule requires the mine operator to have a written respiratory protection program in place when miners are required to use respirators. Adding the CleanSpace EX and the 3M TR–800 Versaflo PAPRs to the respiratory protection program as additional options will provide the miners with alternatives to the series 100 high efficiency respirators already in use at the mine. The PAPRs will also serve as a respirator option to protect the miners with facial hair who may not be able to pass the "fit test" requirement of the program. In addition, the positive flow of filtered air provided by the PAPRs will provide a solution for the miners who are unable to wear a tight-fitting respirator.

(h) Since the 3M Airstream Headgear-Mounted PAPR System has been discontinued by the manufacturer, there are no other MSHA-approved units available that can be used within 150 feet of pillar workings or longwall faces.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard. The petitioner proposes the following alternative method:

(a) All miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the Proposed Decision and Order (PDO) granted by MSHA and manufacturer guidelines. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used within 150 feet of pillar workings or longwall faces. The operator shall keep a record of such training and provide such record to MSHA upon request.

(b) The PAPRs, battery packs, and all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) A separate logbook shall be maintained for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that will be kept with the equipment, or in a

location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Examination records shall be maintained for one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used within 150 feet of pillar workings or longwall faces shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment, prior to taking the equipment underground, to ensure that the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case.

(2) Remove the battery and inspect for corrosion.

(3) Inspect the contact points to ensure a secure connection to the battery.

(4) Reinsert the battery and power up and shut down to ensure proper connections.

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened.

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the "power unit" assembly, and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR shall include any indications of physical damage.

(e) All 3M Versaflo TR–800 and CleanSpace EX PAPR units shall be serviced according to the manufacturer's recommendations.

(f) Prior to energizing and during use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR within 150 feet of pillar workings or longwall faces, procedures in accordance with 30 CFR 75.323 shall be followed.

(g) Only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR shall be used. Only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX shall be used.

(h) If battery packs for the 3M Versaflo TR-800 PAPR are provided, all battery "change outs" shall occur in intake air outby the last open crosscut.

(i) The following maintenance and use conditions shall apply to equipment containing lithium type batteries:

(1) Neither the 3M TR-830 Battery Pack nor the CleanSpace EX Power Unit shall be disassembled or modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR-830 Battery Pack shall be charged only in an area free of combustible material and in intake air outby the last open crosscut. The 3M TR-830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as:

(i) 3M Battery Charger Kit TR-641N, which includes one 3M Charger Cradle TR-640 and one 3M Power Supply TR-941N; or

(ii) 3M 4-Station Battery Charger Kit TR-644N, which includes four 3M Charger Cradles TR-640 and one 3M 4-Station Battery Charger Base/Power Supply TR-944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air, and only the manufacturer's recommended battery chargers shall be used, such as the CleanSpace EX Battery Charger, Product Code PAF-0066.

(4) Neither the 3M TR-830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR-830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR-800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR-800 PAPR or the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(j) Annual retraining shall be given to all miners who will be involved with or affected by the use of the 3M Versaflo TR-800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. Training of new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and training of experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6 shall be given. The operator shall keep a record of such training and provide such record to MSHA upon request.

(k) The miners at Rockwell Mining LLC, Eagle #3 Mine, are not represented by a labor organization and there are no representatives of miners at the mine. A copy of this petition has been posted on the bulletin board at Rockwell Mining LLC, Eagle #3 Mine, on November 21, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520-43-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Rockwell Mining, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before January 10, 2025.

ADDRESSES: You may submit comments identified by Docket No. MSHA-2024-0102 by any of the following methods:

1. *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments for MSHA-2024-0102.

2. *Fax:* 202-693-9441.

3. *Email:* petitioncomments@dol.gov.

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202-5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202-693-9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards,

Regulations, and Variances at 202-693-9440 (voice), Petitionsformodification@dol.gov (email), or 202-693-9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M-2024-077-C.

Petitioner: Rockwell Mining, LLC, 250 West Main Street, Suite 2000, Lexington, KY 40507.

Mine: Eagle #3 Mine, MSHA ID No. 46-09427, located in Wyoming County, West Virginia.

Regulation Affected: 30 CFR 75.507-1(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.507-1(a) to allow the use of unapproved Powered Air Purifying Respirators (PAPRs) taken into or used inby the last open crosscut or used in the return air outby the last open crosscut. Specifically, the petitioner is requesting to utilize the CleanSpace EX PAPR and sealed motor/blower/battery power pack assembly, and the 3M Versaflo TR-800 Intrinsically Safe PAPR motor/blower and battery with battery pack.

The petitioner states that:

(a) The 3M Versaflo TR-800 PAPR with motor/blower and battery qualifies as intrinsically safe.

(b) The CleanSpace EX PAPR also qualifies as intrinsically safe.

(c) Both the CleanSpace EX and the 3M Versaflo TR-800 PAPRs provide a constant flow of air inside the mask or helmet. This airflow provides

respiratory protection and comfort in hot working conditions.

(d) Neither the 3M Versaflo TR-800 nor the CleanSpace EX PAPR is MSHA-approved as permissible.

(e) Neither the 3M nor the CleanSpace is pursuing MSHA approval.

(f) Eagle #3 Mine currently makes available to all miners NIOSH-approved high efficiency 100 series respirators to protect the miners against potential exposure to respirable coal mine dust, including crystalline silica, during normal mining conditions. Eagle #3 Mine desires to expand the miners' option in choosing a respirator that provides the greatest degree of protection as well as comfort while being worn. Powered PAPRs provide a constant flow of filtered air and serve that purpose.

(g) On June 17, 2024, MSHA's final rule *Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection* took effect. The rule requires the mine operator to have a written respiratory protection program in place when miners are required to use respirators. Adding the CleanSpace EX and the 3M TR-800 Versaflo PAPRs to the respiratory protection program as additional options will provide the miners with alternatives to the series 100 high efficiency respirators already in use at the mine. The PAPRs will also serve as a respirator option to protect the miners with facial hair who may not be able to pass the "fit test" requirement of the program. In addition, the positive flow of filtered air provided by the PAPRs will provide a solution for the miners who are unable to wear a tight-fitting respirator.

(h) Since the 3M Airstream Headgear-Mounted PAPR System has been discontinued by the manufacturer, there are no other MSHA-approved units available that can be taken into or used inby the last open crosscut or in the return air outby the last open crosscut.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) All miners who will be involved with or affected by the use of the 3M Versaflo TR-800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the Proposed Decision and Order (PDO) granted by MSHA and manufacturer guidelines. Such training shall be completed before any 3M Versaflo TR-800 or CleanSpace EX PAPR can be used inby the last open crosscut or in the return air outby the

last open crosscut. The operator shall keep a record of such training and provide such record to MSHA upon request.

(b) The PAPRs, battery packs, and all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) A separate logbook shall be maintained for the 3M Versaflo TR-800 and CleanSpace EX PAPRs that will be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512-1 and the examination results recorded in the logbook. Examination records shall be maintained for one year.

(d) All 3M Versaflo TR-800 and CleanSpace EX PAPRs to be used inby the last open crosscut or in the return air outby the last open crosscut shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment, prior to taking the equipment underground, to ensure that the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR-800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case.

(2) Remove the battery and inspect for corrosion.

(3) Inspect the contact points to ensure a secure connection to the battery.

(4) Reinsert the battery and power up and shut down to ensure proper connections.

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened.

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the "power unit" assembly, and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR shall include any indications of physical damage.

(e) All 3M Versaflo TR-800 and CleanSpace EX PAPR units shall be

serviced according to the manufacturer's recommendations.

(f) Prior to energizing and during use of the 3M Versaflo TR-800 or the CleanSpace EX PAPR inby the last open crosscut or in the return air outby the last open crosscut, procedures in accordance with 30 CFR 75.323 shall be followed.

(g) Only the 3M TR-830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR-800 PAPR shall be used. Only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX shall be used.

(h) If battery packs for the 3M Versaflo TR-800 PAPR are provided, all battery "change outs" shall occur in intake air outby the last open crosscut.

(i) The following maintenance and use conditions shall apply to equipment containing lithium type batteries:

(1) Neither the 3M TR-830 Battery Pack nor the CleanSpace EX Power Unit shall be disassembled or modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR-830 Battery Pack shall be charged only in an area free of combustible material and in intake air outby the last open crosscut. The 3M TR-830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as:

(i) 3M Battery Charger Kit TR-641N, which includes one 3M Charger Cradle TR-640 and one 3M Power Supply TR-941N; or

(ii) 3M 4-Station Battery Charger Kit TR-644N, which includes four 3M Charger Cradles TR-640 and one 3M 4-Station Battery Charger Base/Power Supply TR-944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air, and only the manufacturer's recommended battery chargers shall be used, such as the CleanSpace EX Battery Charger, Product Code PAF-0066.

(4) Neither the 3M TR-830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR-830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR-800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR-800 PAPR

or the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(j) Annual retraining shall be given to all miners who will be involved with or affected by the use of the 3M Versaflo TR-800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. Training of new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and training of experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6 shall be given. The operator shall keep a record of such training and provide such record to MSHA upon request.

(k) The miners at Rockwell Mining, LLC, Eagle #3 Mine are not represented by a labor organization and there are no representatives of miners at the mine. A copy of this petition has been posted on the bulletin board at Rockwell Mining, LLC, Eagle #3 Mine, on November 21, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520-43-P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA-24-0026; NARA-2025-010]

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice of certain Federal agency requests for records disposition authority (records schedules). We publish notice in the **Federal Register** and on *regulations.gov* for records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on such records schedules.

DATES: We must receive responses on the schedules listed in this notice by January 27, 2025.

ADDRESSES: To view a records schedule in this notice, or submit a comment on

one, use the following address: <https://www.regulations.gov/docket/NARA-24-0026/document>. This is a direct link to the schedules posted in the docket for this notice on *regulations.gov*. You may submit comments by the following method:

• **Federal eRulemaking Portal:** <https://www.regulations.gov>. On the website, enter either of the numbers cited at the top of this notice into the search field. This will bring you to the docket for this notice, in which we have posted the records schedules open for comment. Each schedule has a 'comment' button so you can comment on that specific schedule. For more information on *regulations.gov* and on submitting comments, see their FAQs at <https://www.regulations.gov/faq>.

If you are unable to comment via *regulations.gov*, you may email us at request.schedule@nara.gov for instructions on submitting your comment. You must cite the control number of the schedule you wish to comment on. You can find the control number for each schedule in parentheses at the end of each schedule's entry in the list at the end of this notice.

FOR FURTHER INFORMATION CONTACT:

Eddie Germino, Strategy and Performance Division, by email at regulation_comments@nara.gov or at 301-837-3758. For information about records schedules, contact Records Management Operations by email at request.schedule@nara.gov or by phone at 301-837-1799.

SUPPLEMENTARY INFORMATION:

Public Comment Procedures

We are publishing notice of records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on these records schedules, as required by 44 U.S.C. 3303a(a), and list the schedules at the end of this notice by agency and subdivision requesting disposition authority.

In addition, this notice lists the organizational unit(s) accumulating the records or states that the schedule has agency-wide applicability. It also provides the control number assigned to each schedule, which you will need if you submit comments on that schedule. We have uploaded the records schedules and accompanying appraisal memoranda to the *regulations.gov* docket for this notice as "other" documents. Each records schedule contains a full description of the records at the file unit level as well as their proposed disposition. The appraisal

memorandum for the schedule includes information about the records.

We will post comments, including any personal information and attachments, to the public docket unchanged. Because comments are public, you are responsible for ensuring that you do not include any confidential or other information that you or a third party may not wish to be publicly posted. If you want to submit a comment with confidential information or cannot otherwise use the *regulations.gov* portal, you may contact request.schedule@nara.gov for instructions on submitting your comment.

We will consider all comments submitted by the posted deadline and consult as needed with the Federal agency seeking the disposition authority. After considering comments, we may or may not make changes to the proposed records schedule. The schedule is then sent for final approval by the Archivist of the United States. After the schedule is approved, we will post on *regulations.gov* a "Consolidated Reply" summarizing the comments, responding to them, and noting any changes we made to the proposed schedule. You may elect at *regulations.gov* to receive updates on the docket, including an alert when we post the Consolidated Reply, whether or not you submit a comment. If you have a question, you can submit it as a comment, and can also submit any concerns or comments you would have to a possible response to the question. We will address these items in consolidated replies along with any other comments submitted on that schedule.

We will post schedules on our website in the Records Control Schedule (RCS) Repository, at <https://www.archives.gov/records-mgmt/rcs>, after the Archivist approves them. The RCS contains all schedules approved since 1973.

Background

Each year, Federal agencies create billions of records. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval. Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. The records schedules authorize agencies to preserve records of continuing value in the National Archives or to destroy, after a specified period, records lacking continuing administrative, legal, research, or other

value. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

Agencies may not destroy Federal records without the approval of the Archivist of the United States. The Archivist grants this approval only after thorough consideration of the records' administrative use by the agency of origin, the rights of the Government and of private people directly affected by the Government's activities, and whether or not the records have historical or other value. Public review and comment on these records schedules is part of the Archivist's consideration process.

Schedules Pending

1. Department of Defense, Defense Contract Audit Agency, Portfolio Management and Integrated Risk Management System (DAA-0372-2024-0001).
2. Department of Defense, Office of the Secretary of Defense, Records of Unidentified Anomalous Phenomena (DAA-0330-2023-0002).
3. Department of Energy, Federal Energy Regulatory Commission, Electric Reliability Standards (DAA-0138-2025-0003).
4. Department of Energy, Federal Energy Regulatory Commission, FERC Form 65-A and 65-B (PH Dockets) (DAA-0138-2024-0016).
5. Department of the Treasury, Internal Revenue Service, Issue Management System (DAA-0058-2024-0006).
6. National Aeronautics and Space Administration, Agency-wide, Agency Archival Collections (DAA-0255-2024-0002).

William P. Fischer,

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-275 and 50-323; NRC-2024-0148]

**Pacific Gas & Electric Company;
Diablo Canyon Nuclear Power Plant,
Units 1 and 2; Petition**

AGENCY: Nuclear Regulatory Commission.

ACTION: 10 CFR 2.206 request; supplement.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is giving notice that by petition dated March 4, 2024, as supplemented on June 7, 2024, and October 30, 2024, San Luis Obispo Mothers for Peace, Friends of the Earth, and Environmental Working Group (the petitioners) requested that the NRC exercise its supervisory authority to order the immediate closure of Diablo Canyon Nuclear Power Plant, Units 1 and 2 (Diablo Canyon) due to "the unacceptable risk of a seismically induced severe accident." The Commission referred the request to the enforcement petition process under NRC regulations. Details regarding NRC review of the petitioners' October 30, 2024, supplement is included in the Supplementary Information section of this document.

DATES: December 10, 2024.

ADDRESSES: Please refer to Docket ID NRC-2024-0148 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0148. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to PDR.Resource@nrc.gov. For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the "Availability of Documents" section of this document.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern

time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Perry Buckberg, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington DC 20555-0001; telephone: 301-415-1383; email: Perry.Buckberg@nrc.gov.

I. Supplementary Information

On March 4, 2024, the petitioners filed a petition requesting that the NRC exercise its supervisory authority to order the immediate closure of Diablo Canyon due to "the unacceptable risk of a seismically induced severe accident." An order was issued on March 12, 2024, referring the request to the enforcement petition process under section 2.206 of title 10 of the *Code of Federal Regulations* (10 CFR), "Requests for action under this subpart."

On August 27, 2024, the NRC staff issued an Acknowledgement Letter that summarized the evaluation activities of the March 4, 2024, petition, as supplemented on June 7, 2024, and described that the Petition Review Board (PRB) had accepted four specific concerns for further review.

Consistent with Section IV.B "Schedule," of the handbook for NRC Management Directive (MD) 8.11, "Review Process for 10 CFR 2.206 Petitions," and its associated Directive Handbook 8.11, the PRB intended to issue the proposed director's decision for comment within 120 days after issuing the August 27, 2024, acknowledgment letter. On October 24, 2024, Pacific Gas & Electric Company (PG&E) provided a voluntarily submittal to the NRC related to the PRB review of the petition. On October 31, 2024, the petitioners submitted a supplement to the petition. The PRB has considered information in the new supplement and intends to address the following supplemental concerns in the proposed director's decision:

1. PG&E's 2015 and 2024 seismic source characterizations omitted modern deformation modeling and failed to use globally-calibrated strainrate-to-seismicity conversions, that would have prevented their serious underestimates.

2. Additional justification supporting the use of the Noto Peninsula earthquake as a model characteristic thrust earthquake for the Irish Hills.

Consistent with Section III.I.6, "Supplements to the Petition," of the handbook for MD 8.11, the PRB now intends to issue the proposed director's decision for comment within 120 days of the issuance of the supplemental acknowledgement letter.

II. Availability of Documents

The documents identified in the following table are available to

interested persons through ADAMS, as indicated.

Document description	ADAMS accession No.
Petition submitted by San Luis Obispo Mothers for Peace, Friends of the Earth, and Environmental Working Group, dated March 4, 2024.	ML24067A066.
NRC SECY Order referring the petition to the 10 CFR 2.206 process, dated March 12, 2024	ML24072A529.
Petition Supplement, dated June 7, 2024	ML24162A079.
NRC Management Directive 8.11, "Review Process for 10 CFR 2.206 Petitions," dated March 1, 2019	ML18296A043.
NRC Acknowledgement Letter dated August 27, 2024	ML24205A066.
PG&E voluntarily submittal dated October 24, 2024	ML24298A234.
Petition Supplement, dated October 30, 2024	ML24305A187.

Dated: December 5, 2024.

For the Nuclear Regulatory Commission.

Michael X. Franovich,

Acting Deputy Director, Office of Nuclear Reactor Regulation.

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 12, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT:

David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:**Table of Contents**

- I. Introduction
- II. Public Proceeding(s)
- III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (<http://www.prc.gov>). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.¹

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041.

¹ See Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. See 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)-(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).*: MC2025–598 and K2025–597; *Filing Title*: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 875 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date*: December 4, 2024; *Filing Authority*: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative*: Maxine Bradley; *Comments Due*: December 12, 2024.

2. *Docket No(s).*: MC2025–599 and K2025–598; *Filing Title*: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 876 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date*: December 4, 2024; *Filing Authority*: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative*: Maxine Bradley; *Comments Due*: December 12, 2024.

None. See Section II for public proceedings.

This Notice will be published in the **Federal Register**.

Erica A. Barker,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101820; File No. SR–ICC–2024–010]

Self-Regulatory Organizations; ICE Clear Credit LLC; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change Relating to the Governance Playbook and Seventh Amended and Restated Operating Agreement

December 5, 2024

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934,¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 22, 2024, ICE Clear Credit LLC (“ICE Clear Credit” or “ICC”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared primarily by ICC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons and to approve the proposed rule change on an accelerated basis.

I. Clearing Agency’s Statement of the Terms of Substance of the Proposed Rule Change

The principal purpose of the proposed rule change is to revise ICC’s (i) Governance Playbook (the “Playbook”), and (ii) Seventh Amended and Restated Operating Agreement (the “Operating Agreement”).

II. Clearing Agency’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ICC included statements concerning the purpose of and basis for the proposed rule change, security-based swap submission, or advance notice and discussed any comments it received on the proposed rule change, security-based swap submission, or advance notice. The text of these statements may be examined at the places specified in Item IV below. ICC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

(A) Clearing Agency’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change, Security-Based Swap Submission, or Advance Notice

(a) Purpose

The amendments are intended principally to provide for the establishment of a Nominating

Committee. ICC believes that such revisions will facilitate the prompt and accurate clearance and settlement of securities transactions and derivative agreements, contracts, and transactions for which it is responsible. ICC proposes to make such changes effective following Commission approval of the proposed rule change. The proposed revisions are described in detail as follows.

I. Operating Agreement

ICC would amend and restate its Operating Agreement³ to add a Nominating Committee. As provided in revised Section 3.12 of the Operating Agreement, the Board will establish and maintain a Board level Nominating Committee which will be responsible for evaluating the independence and fitness of the persons proposed to be designated as Managers of the Board. In connection with this addition, the amendments would add a definition of ‘Nominating Committee’ to Section 1.01 of the Operating Agreement. Furthermore, proposed Section 3.12(a) of the Operating Agreement provides that the Nominating Committee will be composed of at least three members, a majority of which are required to be independent (*i.e.*, either a Parent Independent Manager⁴ or a Risk Committee Independent Manager⁵). Two of the members of the Nominating Committee will be required to be Managers nominated to the Board by the Risk Committee, and one of these Risk Committee nominees will be required to be a Risk Committee Independent Manager, and the other Risk Committee nominee is not required to be an independent (*i.e.*, they may be a Risk Committee Non-Independent Manager⁶). The chairperson of the

³ Following Commission approval, ICC proposes to implement the collective changes to the Operating Agreement proposed herein and the changes to the Operating Agreement described in ICC rule filing SR–ICC–2024–009 (approved by the Commission and available here: <https://www.federalregister.gov/documents/2024/10/24/2024-24638/self-regulatory-organizations-ice-clear-credit-llc-order-approving-proposed-rule-change-as-modified>) in the same version of the amended and restated Operating Agreement.

⁴ As defined in the Operating Agreement, ‘Parent Independent Manager’ means a Manager of the Board elected by the Parent that meets the independence requirements of each of the New York Stock Exchange listing standards, the Securities Exchange Act of 1934, and Intercontinental Exchange, Inc. Board of Director Governance Principles (collectively, the “Independence Standards”).

⁵ As defined in the Operating Agreement, ‘Risk Committee Independent Manager’ means a Manager of the Board nominated by the Risk Committee that meets the Independence Standards.

⁶ As defined in the Operating Agreement, ‘Risk Committee Non-Independent Manager’ means a

Continued

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

Nominating Committee will be a Parent Independent Manager. Proposed Section 3.12(b) of the Operating Agreement provides that the Nominating Committee will have access to the records of ICC, as well as access to Managers of the Board, and ICC officers and employees. The Nominating Committee will meet as needed to fulfill its duties, but in no event less than annually. Proposed Section 3.12(c) of the Operating Agreement provides for the limitation of the fiduciary duties on the members of the Nominating Committee. Such proposed limitation of fiduciary duties on members of the Nominating Committee is analogous to the current limitation of fiduciary duties provided in the Operating Agreement for members of the ICC Audit Committee and Managers of the Board. Specifically, proposed Section 3.12(c) provides that notwithstanding any provision of, any duty otherwise existing under, or anything to the contrary at applicable law (whether common or statutory), in equity or otherwise, the Operating Agreement is not intended to, and does not, create or impose any fiduciary duties on the members of the Nominating Committee. Further, each of the Parent and the other parties to or bound under the Operating Agreement waives any and all fiduciary duties that, absent such waiver or otherwise, may be implied or may otherwise apply under applicable law (whether common or statutory), in equity or otherwise to the members of the Nominating Committee. In addition, the parties to the Operating Agreement agree that the only duties and obligations of the members of the Nominating Committee to ICC, the Parent, ICC Clearing Participants, or any other person under applicable law (whether common or statutory), in equity or otherwise, are limited solely to performing those contractual duties expressly set forth in the Operating Agreement. Proposed Section 3.12(c) further provides that that none of the foregoing waivers or limitations shall be construed as eliminating the implied covenant of good faith and fair dealing.

Furthermore, the amendments would modify Section 3.02 of the Operating Agreement to add the Nominating Committee's role in the evaluation of potential members of the Board. Specifically, Section 3.02(a) of the Operating Agreement would be revised to indicate that the Parent shall not elect any person as a Manager of the Board until the Nominating Committee

provides their evaluation of such person to the Parent. In addition, the amendments add the related definitions of 'Nominating Committee Evaluation' and 'Nominating Committee Charter' ⁷ to Section 1.01 of the Operating Agreement.

In addition, the amendments would add a definition of 'SEC' to Section 1.01 of the Operating Agreement. Furthermore, the amendments would modify the current definition of 'Governmental Authority' contained in Section 1.01 of the Operating Agreement to include reference to the SEC to reflect the list of governmental authorities more accurately with jurisdiction over ICC. Lastly, the amendments would add a reference to members of the Nominating Committee to the definition of 'Covered Persons' contained in Section 1.01 of the Operating Agreement. Such change properly adds members of the new Nominating Committee to the list of persons to which the liability and indemnification provisions (contained in Article VI of the Operating Agreement) apply.

II. Governance Playbook

ICE Clear Credit would also amend the Playbook to conform to the amendments to the Operating Agreement discussed above. Section I and Section III of the Playbook would be revised to add reference to Commission Rule 17Ad-25 ⁸ to the list of applicable regulations covering the governance structure of ICC. Such change properly adds reference to new Commission Rule 17Ad-25 ⁹ as such rule applies to the governance structure of Commission registered clearing agencies, including ICC. Section II of the Playbook would be amended to add the new Nominating Committee to the existing chart summarizing ICC's governance structure. Section III of the Playbook would be amended to add the defined term 'Manager' to reference any individual member of the Board. Furthermore, ICC's definition of the independence standards it applies to independent Managers of the Board would be revised to include a reference to Commission Rule 17Ad-25 ¹⁰ which provides for independence requirements for Commission registered clearing agencies, including ICC. The

⁷ 'Nominating Committee Evaluation' means, in respect of any person, the Nominating Committee's written evaluation of such person's independence and fitness for election as a Manager, based on the standards and pursuant to the process set forth in the Nominating Committee Charter. 'Nominating Committee Charter' means the Charter of the Nominating Committee.

⁸ 17 CFR 240.17ad-25.

⁹ *Id.*

¹⁰ *Id.*

amendments would also formalize the defined term 'Independence Standards.' Section III.A. of the Playbook would also be amended to remove the fitness standards for serving as a Manager on ICC's Board and, as a result, the related definition of 'Qualified Manager' would also be removed. As a replacement for these specified fitness standards, the amendments would add a reference that the fitness standards for serving as a Manager, and the criteria for selecting new Managers will be specified by the new Nominating Committee and thereafter approved by the Board. Such process for having Manager fitness standards specified by the Nominating Committee is intended to comply with new Commission Rule 17Ad-25(c)(3) ¹¹ which requires this process. The amendments would add the defined term 'Manager Fitness Standards' to refer to these Nominating Committee specified and Board approved fitness standards for Managers. The Nominating Committee will be formed, and their process of specifying the Manager Fitness Standards will occur, following Commission approval, and ICC implementation, of these proposed rule changes. Once such Manager Fitness Standards are specified by the new Nominating Committee and are approved by the Board, they will be included as new Appendix 1 to the Playbook. Due to the addition of Appendix 1, subsequent appendices would be renumbered and references to such appendices would be updated as well.

Section III.B. of the Playbook would be revised to add the Nominating Committee's role in the evaluation of potential members of the Board. Specifically, the Nominating Committee shall provide their evaluation and recommendation of an individual they believe to be qualified to become a Manager of the Board to the Parent, consistent with the Manager Fitness Standards. Furthermore, such section would be amended to reference that the Nominating Committee may consult with the Board, the Parent, the Risk Committee and ICC management regarding the skills, experience, and incentives of the potential new Manager. As a result of the addition of the Nominating Committee and its role in evaluating potential new Managers, the provisions in Section III.B. of the Playbook regarding the Parent's consultation and information sharing related to potential new Managers is proposed to be removed as this role will be assumed by the Nominating Committee. In addition, the

Manager of the Board nominated by the Risk Committee that is not required to meet the Independence Standards.

¹¹ 17 CFR 240.17ad-25(c)(3).

amendments will include a reference that the Parent will document their election of a new Manager, typically through a unanimous written consent of the directors of the Parent's general partner, to provide additional transparency on current practices. Section III of the Playbook would also be amended to add the Nominating Committee to the list of parties that will be notified regarding the removal or resignation of a current Manager. With respect to the election of Managers designated by the Risk Committee, the amendments would add the Nominating Committee to the list of parties that would receive the biographical information of potential Managers designated by the Risk Committee. The amendments would also indicate that the Nominating Committees shall provide their evaluation and recommendation of individuals designated by the Risk Committee for a Manager position.

Section III of the Playbook would also be revised with respect to the annual election process of Managers by the Parent, noting that in connection with this process, the Nominating Committee will provide the Parent with their evaluation of any proposed new Manager which will be based on the Board approved Manager Fitness Standards. With respect to any re-designated Manager, the Nominating Committee will be added to the list of parties that will receive details from ICC management regarding each re-designated Manager's performance/attendance from the previous year, including information specific to Nominating Committee performance such as results from the Nominating Committee evaluation process.

Section III.E. of the Playbook would be revised to add clarifying information to ICC's conflicts of interest process regarding potential Manager conflicts. Specifically, Section III.E. would be amended to clarify that ICC's Code of Business Conduct and Ethics policy applicable to Managers provides for the disclosure and resolution of conflicts of interest, and further clarifies that resolution of Manager conflicts of interest means mitigation or elimination.¹² Such section will also be amended to indicate that the ICC legal department will maintain documentation of any conflicts of

interest disclosed by Managers and the mitigation or elimination thereof.

Section III.F. of the Playbook would be revised to add the Nominating Committee's role in evaluating and recommending to the Board if each Manager, and any nominee for Manager, qualifies as independent under the Independence Standards. Such evaluation by the Nominating Committee shall be provided to the Board to aid in the Board's independence determination with respect to each Manager. In addition, ICC proposes amendments to clarify that (i) Nominating Committee members shall recuse themselves from evaluating their own independence and (ii) Managers shall recuse themselves from the determination of their own independence. Such section would also be modified to use the defined term Independence Standards. Furthermore, the independence qualifications described in Section III.F. of the Playbook would be modified to incorporate additional independence qualification definitions provided in new Commission Rule 17Ad-25(a), for example the definition of 'family member.' To ensure compliance with the independence qualification requirement of new Commission Rule 17Ad-25(a),¹³ Section III.F. of the Playbook would be augmented with the following additional relationships that would disqualify an individual from being deemed independent:

- In addition to an individual that is employee of an ICE Group company, an individual that otherwise receives compensation from an ICE Group company.
- An individual with a family member that is (or has been in the year prior to the determination date) an employee or otherwise receives compensation from any ICE Group company.
- An individual, or a family member of such individual, that is or has been in the year prior to the determination date, receiving payments from ICE Group companies that could reasonably affect the independent judgement or decision-making of the individual (other than director and committee fees of pension or other forms of deferred compensation for prior services not contingent on continued service).
- In addition to an individual that is an employee of a firm that is the ICE Group's internal or external auditor, an individual that has a family member who is either a partner of such auditing firm or a current employee of such auditing firm, or the individual has a

family member that was within the prior year from the determination date an employee or such auditing firm and personally worked on the ICE Group audit within that time.

- An individual with a family member that is, or has been within the prior year from the determination date, employed as an executive officer of another company where any of ICC's executive officers at the same time serves or served on that company's compensation committee.

- An individual, or a family member of such individual, that is or has been within the prior year from the determination date, a partner or controlling shareholder on any organization to or from which an ICE Group company is making or receiving payments for property or services other than: (i) payments arising solely from investments in the ICE Group company securities; or (ii) payments under non-discretionary charitable contribution matching programs.

Further amendments would be made to the description of the ICC annual independence questionnaire process to add the Nominating Committee's role with respect to evaluating and recommending to the Board if each Manager qualifies as independent under the Independence Standards. Specifically, the section would be amended to indicate that the completed independence questionnaires will be provided to the Nominating Committee to aid in their evaluation/recommendation process. In addition, ICC proposes amendments to describe the process followed should the circumstances regarding an existing Manager's independence change. Specifically, in such event, the Nominating Committee shall re-evaluate and recommend to the Board whether such Manager continues to qualify as independent under the Independence Standards. Following such re-evaluation and recommendation by the Nominating Committee, the Board shall determine if such Manager continues to be independent.

With respect to the Board performance review process described in Section III.G. of the Playbook, such section would be revised to indicate that the ICC General Counsel will provide a summary of all Board performance survey results (including survey results related to individual Board member performance) to the Nominating Committee.

In addition, Section IV of the Playbook would be revised to add the Nominating Committee to the list of ICC's primary governance committees. Furthermore, Section IV.B. would be

¹² Please note that the identification and resolution of conflicts of interest covered in the Playbook relate to conflicts of interest involving Managers. With respect to potential conflicts of interest involving ICC staff (including senior managers), such employee conflicts of interest are covered in other ICC policies and procedures outside of the Playbook.

¹³ 17 CFR 240.17ad-25(a).

added to the Playbook to describe the Nominating Committee's purpose, its membership composition, the new Nominating Committee member administration procedures, the Nominating Committee meeting frequency, the Nominating Committee performance review process, and the documents relevant to the Nominating Committee. The additional sections describing the Nominating Committee's purpose, its composition and its meeting frequency reflect the same changes made to the Operating Agreement described above. The section describing the new Nominating Committee member administrative procedures provides an overview of the steps that will be taken by the ICC legal department to onboard a new member of the Nominating Committee (*e.g.*, updating distribution lists and updating the permissions of such individual on the Diligent platform which is used to distribute materials to the Board and other committees, including the Nominating Committee). The proposed revisions also add a description of the Nominating Committee performance review process and procedures. Such performance review process is conducted on an annual basis and includes each member of the Nominating Committee completing a self-evaluation survey. The annual review process is designed to gather feedback on the operation of the Nominating Committee and solicit suggestions for improvements, as well as provide a forum for the identification of problems with respect to the performance of the Nominating Committee. Such process includes the compilation of a summary of the survey responses received from the Nominating Committee by the ICC legal department, which are presented to the entire Nominating Committee. Such summary shall include disclosure of the minimum, maximum, and average score for each survey item, as well as a summary of relevant comments received throughout the process. The proposed process and procedures for the Nominating Committee annual performance review process are fully analogous to the performance review processes currently in place for both the Board and the ICC Audit Committee. Lastly the revisions add information related to relevant documents of the Nominating Committee (*e.g.*, meeting agendas, minutes and meeting materials), noting that such relevant documents will be maintained by the ICC legal department on their shared network drive.

ICC also proposes a number of other drafting clarifications and conforming changes, such as updating use of relevant defined terms, rule references and other non-substantive drafting improvements, would also be made throughout the Playbook. Various provisions would also be relabeled or renumbered in the Playbook. The amendments would also update the revision history section to the Playbook.

(b) Statutory Basis

ICE Clear Credit believes that the proposed amendments to the Operating Agreement and the Playbook are consistent with the requirements of Section 17A of the Securities Exchange Act of 1934 (the "Act")¹⁴ and the regulations thereunder applicable to it. In particular, Section 17A(b)(3)(F) of the Act¹⁵ requires, among other things, that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts, and transactions, the safeguarding of securities and funds in the custody or control of the clearing agency or for which it is responsible, and the protection of investors and the public interest.

The proposed amendments are designed to reflect the addition of the Nominating Committee to ICC's governance structure, consistent with requirements of new Commission Rule 17Ad-25. The amendments provide details on the purpose of the Nominating Committee and its composition. In ICC's view, the amendments will improve ICC's governance structure by reducing the likelihood that conflicts of interest may influence the Board. Thus, the proposed amendments enhance the overall risk management of ICC and are consistent with the prompt and accurate clearance and settlement of securities transactions and derivatives agreements, contracts and transactions, the safeguarding of securities and funds which are in the custody or control of ICC or for which it is responsible, and the protection of investors and the public interest in the operation of clearing services, within the meaning of Section 17A(b)(3)(F) of the Act.¹⁶

The proposed amendments are also consistent with relevant provisions of Rule 17Ad-22(e)(2) which provides that the "covered clearing agency shall establish, implement, maintain and enforce written policies and procedures

reasonably designed to, as applicable [. . .] provide for governance arrangements that are [c]lear and transparent"¹⁷ and "[c]onsider the interests of participants' customers . . . and other relevant stakeholders of the covered clearing agency."¹⁸ The proposed amendments are intended to add a Nominating Committee to ICC's governance structure with the role of evaluating the independence and fitness of the persons proposed to be designated as Managers of the Board. As such, the Nominating Committee is intended to improve ICC's governance structure by reducing the likelihood that conflicts of interest may influence the Board. In ICC's view, the amendments to the Operating Agreement and the Playbook are therefore consistent with the requirements of Rule 17Ad-22(e)(2).¹⁹

The proposed amendments also are consistent with the relevant provisions of Rule 17Ad-25(c) which provides that "Each registered clearing agency must establish a nominating committee and a written evaluation process whereby such nominating committee shall evaluate nominees for serving as directors and evaluate the independence of nominees and directors."²⁰ The proposed amendments add a new Nominating Committee to ICC's governance structure with the role of evaluating the independence and fitness of the persons proposed to be designated as Managers of the Board. In ICC's view, the amendments to the Operating Agreement and Playbook are therefore consistent with the requirements of Rule 17Ad-25(c).²¹

The proposed amendments also are consistent with the relevant provisions of Rule 17Ad-25(f) which provides for circumstances which would "preclude a director from being an independent director" ²² The proposed amendments would add circumstances that would disqualify individuals from being deemed independent consistent with the requirements of Rule 17Ad-25(f).²³ In ICC's view, the amendments to the Operating Agreement and Playbook are therefore consistent with the requirements of Rule 17Ad-25(f).²⁴

(B) Clearing Agency's Statement on Burden on Competition

ICE Clear Credit does not believe the proposed amendments would have any

¹⁷ 17 CFR 240.17ad-22(e)(2)(i).

¹⁸ 17 CFR 240.17ad-22(e)(2)(vi).

¹⁴ 15 U.S.C. 78q-1.

¹⁵ 15 U.S.C. 78q-1(b)(3)(F).

¹⁶ 15 U.S.C. 78q-1(b)(3)(F).

impact, or impose any burden, on competition not necessary or appropriate in furtherance of the purposes of the Act. The amendments are being adopted to add a Nominating Committee. The amendments do not otherwise change the rights and responsibilities of ICC or its market participants. Accordingly, ICE Clear Credit does not believe the amendments would affect the costs of clearing, the ability of market participants to access clearing, or the market for clearing services generally. Therefore, ICE Clear Credit does not believe the proposed rule change imposes any burden on competition that is inappropriate in furtherance of the purposes of the Act.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments relating to the proposed rule change have not been solicited or received. ICC will notify the Commission of any written comments received by ICC.

III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules-regulations/self-regulatory-organization-rulemaking>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-ICC-2024-010 on the subject line.

Paper Comments

Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549. All submissions should refer to File Number SR-ICC-2024-010. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the

Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filings will also be available for inspection and copying at the principal office of ICE Clear Credit and on ICE Clear Credit's website at <https://www.ice.com/clear-credit/regulation>.

Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR-ICC-2024-010 and should be submitted on or before December 31, 2024.

IV. Discussion and Commission's Findings

Section 19(b)(2)(C) of the Act requires the Commission to approve a proposed rule change of a self-regulatory organization if it finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the organization.²⁵ Under the Commission's Rules of Practice, the "burden to demonstrate that a proposed rule change is consistent with the Exchange Act and the rules and regulations issued thereunder . . . is on the self-regulatory organization ['SRO'] that proposed the rule change."²⁶

The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding,²⁷ and any failure of an SRO to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Act and the applicable rules and regulations.²⁸ Moreover, "unquestioning reliance" on an SRO's representations in a proposed rule change is not sufficient to justify

Commission approval of a proposed rule change.²⁹

After carefully considering the proposed rule change, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to ICC. More specifically, for the reasons given below, the Commission finds that the proposed rule change is consistent with Section 17A(b)(3)(A) and (F) of the Act³⁰ and Rules 17Ad-22(e)(2) and 17Ad-25 thereunder.³¹

A. Consistency With Section 17A(b)(3) of the Act

Section 17A(b)(3) of the Act requires, among other things, that ICC be so organized and has the capacity to be able to comply with the provisions of the Act and the rules and regulations thereunder,³² and that ICC's rules be designed to foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions.³³ Based on review of the record, and for the reasons discussed below,³⁴ ICC's changes are consistent with ICC being so organized and having the capacity to comply with the provisions of the Act and the rules and regulations thereunder and with fostering cooperation and coordination with persons engaged in the clearance and settlement of securities transactions. Accordingly, the proposed rule change is consistent with the requirements of Sections 17A(b)(3)(A) and (F) of the Act.³⁵

B. Consistency With Rule 17Ad-22(e)(2) Under the Act

Rule 17Ad-22(e)(2) requires covered clearing agencies to, among other things, provide for governance arrangements that are clear and transparent,³⁶ establish that the board of directors and senior management have appropriate experience and skills to discharge their duties and responsibilities,³⁷ and specify clear and direct lines of responsibility.³⁸ In adopting Rule

²⁸ *Id.*

17Ad–22(e)(2), the Commission provided guidance that a covered clearing agency generally should consider in establishing and maintaining policies and procedures, including, in part, whether the board of directors contains suitable members with the appropriate skills and incentives to fulfill the board's multiple roles, and whether the board of directors should include non-executive board members.³⁹

ICC's proposed changes would strengthen ICC's written independence qualifications for current and potential Board members and establish a Nominating Committee to evaluate Board members against these independence qualifications. As discussed above, the proposed rule change would update the Playbook to augment the list of relationships that disqualify a person from being an independent member of the Board by adding to the list new, additional relationships as specified in Rule 17Ad–25 under the Exchange Act.⁴⁰ For example, pursuant to the current Playbook, an individual that is an employee of an ICE Group company is not considered independent. Under the proposed rule change, the Playbook would be updated to specify that an individual that otherwise receives compensation from an ICE Group company also would not be considered independent.

Strengthening the criteria by which ICC evaluates both current Managers and nominees would help ICC review each individual nominee within the broader context of the Board's overall makeup and the specific skills, knowledge, experience, and perspectives represented by each Manager and nominee. An increased focus on director independence would help ensure that Managers have the appropriate incentives to perform the Board's functions and fulfill its responsibilities. Moreover, the addition of a Nominating Committee to ICC's governance structure will help ensure that ICC evaluates the independence and fitness of the persons proposed to be designated as Managers of the Board as required by Rule 17Ad–25 under the Exchange Act.⁴¹ Accordingly, the proposed changes are consistent with ensuring that ICC's board of directors contains members with the appropriate

skills and incentives to discharge their duties.

In addition to establishing the Nominating Committee, the proposed changes also would establish the Nominating Committee's role, responsibilities, and composition. Pursuant to ICC's revised Operating Agreement, the Nominating Committee would have at least three members, a majority of which would be independent. The Nominating Committee would be responsible for evaluating and recommending individuals to be members of the Board. For each potential member of the Board, the Nominating Committee would produce a written evaluation of such person's independence and fitness for election as a Manager, based on the standards and pursuant to the process set forth in the Nominating Committee Charter. These changes would establish clear and direct lines of responsibility for the Nominating Committee.

Based on the foregoing, the proposed rule change is consistent with the requirements of Rule 17Ad–22(e)(2) under the Act.⁴²

C. Consistency With Rule 17Ad–25 Under the Act

Rule 17Ad–25 requires, among other things, that covered clearing agencies establish a nominating committee, written evaluation process, fitness standards, and evaluation of the independence of nominees and directors.⁴³

The amendments and revisions discussed above are consistent with the relevant provisions of Rule 17Ad–25(c), which provides that “[e]ach registered clearing agency must establish a nominating committee and a written evaluation process whereby such nominating committee shall evaluate nominees for serving as directors and evaluate the independence of nominees and directors.”⁴⁴ As stated, ICC's proposed changes would add a new Nominating Committee to ICC's Board, with the role of evaluating the independence and fitness of the persons proposed to be designated as members of the Board. The proposed changes would establish the Nominating Committee's purpose, composition, authority, and responsibilities. As discussed above, ICC's proposed changes also would amend the Playbook to establish specific additional relationships, as enumerated in Rule 17Ad–25,⁴⁵ that would disqualify a

person from being an independent member of the Board.

Accordingly, based on the foregoing, the proposed rule change is consistent with the requirements of Rule 17Ad–25 under the Act.⁴⁶

V. Accelerated Approval of Proposed Rule Change

Under Section 19(b)(2) of the Act,⁴⁷ the Commission may approve a proposed rule change prior to the 30th day after the date of publication of notice of filing of the proposed rule change in the **Federal Register** if the Commission finds good cause for doing so.

The Commission finds good cause, pursuant to Section 19(b)(2) of the Act,⁴⁸ to approve the proposed rule change prior to the 30th day after the date of publication of notice of filing of the proposed rule change in the **Federal Register**. As discussed above, the proposed rule change would establish a Nominating Committee. The Nominating Committee would have at least three members, a majority of which would be independent. As further discussed above, the Nominating Committee would be responsible for evaluating and recommending individuals to be members of the Board. For each potential member of the Board, the Nominating Committee would produce a written evaluation of such person's independence and fitness for election as a Manager, based on the standards and pursuant to the process set forth in the Nominating Committee Charter.

Moreover, as discussed above, the proposed rule change would add to the list of relationships that disqualify a person from being an independent member of the Board. ICC currently has a list of relationships that disqualify a person from being considered independent, and the proposed rule change would add new, additional relationships to this list, based on the specific relationships enumerated in Rule 17Ad–25 under the Exchange Act.⁴⁹ For example, currently an individual that is employee of an ICE Group company is not considered independent. Under the proposed rule change, an individual that otherwise receives compensation from an ICE Group company would also not be considered independent.

Rule 17Ad–25 requires, among other things, that covered clearing agencies establish: a nominating committee;

³⁹ Securities Exchange Act Release No. 78961 (Sept. 28, 2016), 81 FR 70786, 70806 (Oct. 13, 2016) (File No. S7–03–14) (“Standards for Covered Clearing Agencies”).

⁴⁰ 17 CFR 240.17ad–25.

⁴¹ 17 CFR 240.17ad–25.

⁴⁷ 15 U.S.C. 78s(b)(2).

⁴⁸ 15 U.S.C. 78s(b)(2).

⁴⁹ 17 CFR 240.17ad–25.

written evaluation process; fitness standards; and standards for the evaluation of the independence of nominees and directors.⁵⁰ The proposed rule change would establish a Nominating Committee, make the Nominating Committee responsible for evaluating and recommending individuals to be potential members of the Board, and augment ICC's existing independence standards to be consistent with Rule 17Ad-25.⁵¹ Based on the foregoing, and as discussed above, the proposed rule change is consistent with the requirements of Rule 17Ad-25 under the Act.⁵²

The compliance date for Rule 17Ad-25 generally is December 5, 2024.⁵³ Approving the proposed rule change on an accelerated basis will allow ICC to establish, among other things, a nominating committee and additional independence standards, by this compliance date. Accordingly, the Commission finds good cause to approve the proposed rule change on an accelerated basis prior to the 30th day after the date of publication of notice of filing of the proposed rule change in the **Federal Register**, pursuant to Section 19(b)(2) of the Act.⁵⁴

VI. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and in particular, Sections 17A(b)(3)(A) and (F) of the Act⁵⁵ and Rules 17Ad-22(e)(2) and 17Ad-25.⁵⁶

It is therefore ordered pursuant to Section 19(b)(2) of the Act that the proposed rule change (SR-ICC-2024-010) be, and hereby is, approved on an accelerated basis.⁵⁷

For the Commission by the Division of Trading and Markets, pursuant to delegated authority.⁵⁸

Sherry R. Haywood,
Assistant Secretary.

[FR Doc. 2024-29038 Filed 12-10-24; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-662, OMB Control No. 3235-0720]

Submission for OMB Review; Comment Request; Extension: Form 1-K

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Form 1-K (17 CFR 239.91) is used to file annual reports by Tier 2 issuers under Regulation A, an exemption from registration under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*). Tier 2 issuers under Regulation A conducting offerings of up to \$50 million within a 12-month period are required to file Form 1-K. Form 1-K provides audited year-end financial statements and information about the issuer's business operation, ownership, management, liquidity, capital resources and operations on an annual basis. In addition, Part I of the Form 1-K collects information on any offerings under Regulation A that have been terminated or completed unless it has been previously reported on Form 1-Z. The purpose of the Form 1-K is to better inform the public about companies that have conducted Tier 2 offerings under Regulation A. We estimate that approximately 353 issuers file Form 1-K annually. We estimate that Form 1-K takes approximately 600 hours to prepare. We estimate that 75% of the 600 hours per response (450 hours) is prepared by the company for a total annual burden of 158,850 hours (450 hours per response × 353 responses).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information

unless it displays a currently valid control number.

Public Comment Instructions: The 30-day public comment period for this information collection request opens on December 12, 2024 and closes at the end of the day on January 13, 2025. The public may view the full information request and submit comments at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202412-3235-004 or email comments to MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101828; File No. SR-Phlx-2024-65]

Self-Regulatory Organizations; Nasdaq PHLX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Equity 4, Rule 3304 Concerning Data Feeds Utilized

December 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 25, 2024, Nasdaq PHLX, LLC ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Equity 4, Rule 3304 (Data Feeds Utilized) to change the primary and secondary source of quotation data of certain market centers in the list of proprietary and network processor feeds that the Exchange utilizes for the handling, routing, and execution of orders as well as regulatory compliance processes related to those functions.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal

office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the data feeds table in Equity 4, Rule 3304, which sets forth on a market-by-market basis the specific proprietary and network processor feeds that the Exchange utilizes for the handling, routing, and execution of orders, and for performing the regulatory compliance processes related to each of those functions. Specifically, the table would be amended to reflect that the Exchange will receive a direct feed from the Long-Term Stock Exchange ("LTSE") as its primary quotation data source and CQS/UQDF will become its secondary data source for the handling, routing and execution of orders and for performing regulatory compliance processes related to each of those functions. The change to the primary sources reflects the Exchange's effort to include an additional source and the use of secondary sources in the event the primary source is unable to provide data.

The operative date of the proposed rule change shall be November 25, 2024.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,³ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁴ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market because updating its data feeds table of market centers for which the exchange consumes quotation data through a direct feed will provide clarity to market participants. Additionally, it is necessary and consistent with the public interest and the protection of investors to update the Exchange's table of market centers in Equity 4, Rule 3304 in order to provide transparency with respect to all the direct proprietary and network processor feeds from which the Exchange obtains market data.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, its purpose is to enhance transparency with respect to the operation of the Exchange and its use of market data feeds.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act⁵ and Rule 19b-4(f)(6) thereunder.⁶ Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁷ and Rule 19b-4(f)(6) thereunder.⁸

⁵ 15 U.S.C. 78s(b)(3)(A)(iii).

⁶ 17 CFR 240.19b-4(f)(6).

⁷ 15 U.S.C. 78s(b)(3)(A).

⁸ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires the Exchange to give the Commission written notice of the Exchange's intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing

A proposed rule change filed under Rule 19b-4(f)(6)⁹ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁰ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative immediately. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because the proposal does not raise any novel regulatory issues and waiver will allow the Exchange to begin receiving and using a direct feed from LTSE as soon as possible. For this reason, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.¹¹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-Phlx-2024-65 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

⁹ 17 CFR 240.19b-4(f)(6).

¹⁰ 17 CFR 240.19b-4(f)(6)(iii).

¹¹ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

³ 15 U.S.C. 78f(b).

⁴ 15 U.S.C. 78f(b)(5).

All submissions should refer to file number SR-Phlx-2024-65. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-Phlx-2024-65, and should be submitted on or before December 31, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹²

Sherry R. Haywood,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101822; File No. SR-Phlx-2024-67]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing of Proposed Rule Change To Amend the Exchange's Fees for Top of PHLX Options (TOPO), PHLX Orders, and TOPO Plus Orders

December 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934

("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 27, 2024, Nasdaq PHLX LLC ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's proprietary data fees for Top of PHLX Options ("TOPO"), PHLX Orders, and TOPO Plus Orders at Options 7, Section 10, as described further below.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/phlx/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Options 3, Section 23(a)(1) ("Top of PHLX Options ("TOPO") is a direct data feed product that includes the Exchange's best bid and offer price, with aggregate size, based on displayable order and quoting interest on Phlx and last sale information for trades executed on Phlx. The data contained in the TOPO data feed is identical to the data simultaneously sent to the processor for the OPRA and subscribers of the data feed. The data provided for each options series includes the symbols (series and underlying security), put or call indicator, expiration date, the strike price of the series, and whether the option series is available for trading on Phlx and identifies if the series is available for closing transactions only.").

⁴ See Options 3, Section 23(a)(1) ("PHLX Orders is a real-time full Limit Order book data feed that provides pricing information for orders on the PHLX Order book for displayed order types as well as market participant capacity. PHLX Orders is currently provided as part of the TOPO Plus Orders data product. PHLX Orders provides real-time information to enable users to keep track of the single and complex order book(s). The data provided for each options series includes the symbols (series and underlying security), put or call

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's proprietary data fees for Top of PHLX Options ("TOPO"),³ PHLX Orders,⁴ and TOPO Plus Orders at Options 7, Section 10.⁵

Top of PHLX Options ("TOPO")

TOPO is a direct data feed that provides subscribers with PHLX Best Bid and Offer ("BBO")⁶ and last sale information.⁷ The data distributed on TOPO is identical to the data simultaneously sent to the Options Price Reporting Authority ("OPRA").⁸ The TOPO feed also provides administrative information to facilitate trading on the Exchange such as, for example, the list of symbols trading on a particular day.⁹ TOPO reduces the transmission and processing latencies for top of book information relative to the OPRA feed by avoiding the latencies generated by the latter in consolidating data.

indicator, expiration date, the strike price of the series, leg information on complex strategies and whether the option series is available for trading on Phlx and identifies if the series is available for closing transactions only. The feed also provides auction and exposure notifications and order imbalances on opening/reopening (size of matched contracts and size of the imbalance)".

⁵ The proposed changes were initially filed on November 16, 2023, as SR-Phlx-2023-51. On December 5, 2023, SR-Phlx-2023-51 was withdrawn and replaced with SR-Phlx-2023-57. On January 29, 2024, SR-Phlx-2023-57 was withdrawn and replaced with SR-Phlx-2024-03. On March 20, 2024, SR-Phlx-2024-03 was withdrawn and replaced with SR-Phlx-2024-15. On May 16, 2024, the Commission instituted proceedings to determine whether to approve or disapprove the proposed rule change. See Securities Exchange Act Release No. 100160 (May 16, 2024), 89 FR 45036 (May 22, 2024). On November 19, 2024, SR-Phlx-2024-15 was withdrawn and replaced with SR-Phlx-2024-60. On November 27, 2024, SR-Phlx-2024-60 was withdrawn and replaced with the instant filing.

⁶ The Best Bid and Offer includes aggregate size information based on displayable order and quoting interest on the Exchange.

⁷ See PHLX, "Top of Phlx Options," available at [https://www.nasdaqtrader.com/Micro.aspx?id=TOPO#:~:text=Top%20of%20PHLX%20Options%20\(TOPO,in%20the%20consolidated%20market%20feed](https://www.nasdaqtrader.com/Micro.aspx?id=TOPO#:~:text=Top%20of%20PHLX%20Options%20(TOPO,in%20the%20consolidated%20market%20feed).

⁸ See Options 3 (Options Trading Rules), Section 23(a)(1) (Data Feeds and Trade Information) ("The data contained in the TOPO data feed is identical to the data simultaneously sent to the processor for the OPRA and subscribers of the data feed.").

⁹ See, e.g., Nasdaq, "Top of Phlx Options Interface Specifications, Version 3.4" Section 4.3 available at <https://www.nasdaqtrader.com/content/technicalsupport/specifications/dataproducts/topofphlx.pdf> (describing the start of day options directory message, which lists all symbols eligible for the auction process).

¹² 17 CFR 200.30-3(a)(12), (59).

Monthly fees for TOPO are currently \$2,000 for Internal Distributors,¹⁰ \$2,500 for External Distributors,¹¹ \$1 for a Non-Professional Subscriber,¹² and \$40 for a Professional Subscriber.¹³ None of these fees have changed for over a decade, since January 2013.¹⁴

PHLX Orders

PHLX Orders is a real-time order book feed with pricing information for displayed orders on the PHLX order book.¹⁵ The data provided for each options series includes the symbols (series and underlying security), a put or call indicator, expiration date, and the strike price of the series. It also provides the real-time status of simple and complex orders¹⁶ on the order book, including new orders and changes to orders resting on the PHLX book for all PHLX-listed options.¹⁷ The PHLX Orders feed includes data on the opening imbalance, Price Improvement

XL (PIXL),¹⁸ and Complex Order Live Auction (COLA).¹⁹ A notification message is sent for symbols entering an auction.²⁰ PHLX Orders also furnishes an historical record of all simple and complex order message data from the PHLX Orders data feed. PHLX Orders information is not sent to OPRA.²¹

PHLX Orders is an alternative to PHLX Depth of Market. It is an optimized technical channel designed to lower technology costs, reduce processing time, and facilitate the ingestion of data while still providing customers insight beyond the top of book by viewing active buy and sell orders. PHLX Orders excludes quotations by market makers and other authorized entities that is included in PHLX Depth of Market.²²

What is the utility of an orders-only data feed? It provides customers with the opportunity to reduce bandwidth (and therefore data processing costs) by several orders of magnitude relative to the full depth of book feed, while retaining a view of market participant orders (setting aside symbols where participants have not placed orders).

The December 2023 bandwidth report shows that the PHLX Depth of Market feed transmitted a maximum of 14.3 billion messages per day during the month of December,²³ while the PHLX

Orders feed transmitted a maximum of 53.6 million messages over the same period (41.5 million messages for simple orders, and 12.1 million messages for complex orders). The Exchange's full depth of book feed requires the customer to process over 200 times more messages than the orders feed over the course of a day; replacing a depth of book feed with an orders feed allows a customer to reduce the maximum number of daily messages it receives by 99.6%.

To cite another example, the 1millisecond bandwidth peak for PHLX Depth of Market was 13.96 million messages; the comparable number of messages for orders was 1.45 million (891 thousand for simple and 561 thousand for complex orders). Replacing depth of book with orders can therefore reduce the number of messages processed at peak at the 1 millisecond bandwidth by nearly 90%.

Approximately 56% of customers who take any data feed at all from the PHLX exchange take an orders feed (either Orders only or TOPO Plus Orders) without depth of book. Another 38% of customers take both orders and depth feeds. The remaining 6% take either top of book or depth of book alone.

What type of customer takes an orders feed in lieu of depth? In general, firms that only need information on actively trading options do so. There are a great number of use cases that fit this broad description, but, for purposes of illustration, the Exchange is aware of at least two such types of customers.

The first is the market participant that does not engage in order routing. These are broker dealers that use third parties to route orders, either because the originating broker-dealer is not a member of the exchange or to save costs. Without the need for additional information to inform routing decisions, such customers often focus on active trading alone, and therefore purchase the orders feed.

A second category of customers are those that use options data to analyze trends in other markets. One example of this type of customer is the equity trader that analyzes equity-based options orders to gauge market sentiment in the underlying equity. For such customers, there is relatively little utility in the full depth feed.

¹⁰ See Options 7, Section 10 (Proprietary Data Feed Fees) (Top of PHLX Options) ("A 'distributor' of Nasdaq PHLX data is any entity that receives a feed or data file . . . directly from Nasdaq PHLX or indirectly through another entity and then distributes it either internally (within that entity) or externally (outside that entity). All distributors execute a Nasdaq PHLX distributor agreement.").

¹¹ See *id.*

¹² See *id.* ("A Non-Professional Subscriber is a natural person who is neither: (i) registered or qualified in any capacity with the Commission, the Commodities Futures Trading Commission, any state securities agency, any securities exchange or association, or any commodities or futures contract market or association; (ii) engaged as an 'investment adviser' as that term is defined in Section 201(11) of the Investment Advisors Act of 1940 (whether or not registered or qualified under that Act); nor (iii) employed by a bank or other organization exempt from registration under federal or state securities laws to perform functions that would require registration or qualification if such functions were performed for an organization not so exempt. A Non-Professional Subscriber may only use the data provided for personal purposes and not for any commercial purpose.").

¹³ See *id.* ("A Professional Subscriber is any Subscriber that is not a Non-Professional Subscriber. If the Nasdaq Subscriber agreement is signed in the name of a business or commercial entity, such entity would be considered a Professional Subscriber.").

¹⁴ See Securities Exchange Act Release No. 68576 (January 3, 2013), 78 FR 1886 (January 9, 2013) (SR-Phlx-2012-145).

¹⁵ See Options 3 (Options Trading Rules), Section 23(a)(2) (Data Feeds and Trade Information).

¹⁶ See Options 3 (Options Trading Rules), Section 23(a)(2) (Data Feeds and Trade Information); Section 14(a)(i) ("Complex Order. For purposes of the electronic trading of Complex Orders, a Complex Order is an order involving the simultaneous purchase and/or sale of two or more different options series in the same underlying security, priced as a net debit or credit based on the relative prices of the individual components, for the same account, for the purpose of executing a particular investment strategy.").

¹⁷ See Nasdaq, "PHLX Orders," available at <https://www.nasdaqtrader.com/Micro.aspx?id=PHLXOrders>.

¹⁸ See Options 3 (Options Trading Rules), Section 23(a)(2); Section 13 (Price Improvement XL) ("A member may electronically submit for execution an order it represents as agent on behalf of a Public Customer, broker-dealer, or any other entity ('PIXL Order') against principal interest or against any other order (except as provided in sub-paragraph (a)(6) below) it represents as agent (an 'Initiating Order') provided it submits the PIXL Order for electronic execution into the PIXL Auction ('Auction') pursuant to this Rule.").

¹⁹ See Options 3, Section 14(e) (describing the process for the Complex Order Live Auction ("COLA")).

²⁰ Nasdaq, "PHLX Orders Interface Specification," (Version 1.92) available at <https://www.nasdaqtrader.com/content/technicalsupport/specifications/dataproducts/topoplusorders.pdf> (describing auction notification message).

²¹ See Limited Liability Company Agreement of Options Price Reporting Authority, LLC Article V, Section 5.2(c)(i) (January 1, 2010), available at https://assets.website-files.com/5ba40927ac854d8c97bc92d7/5d0bd57d87d3ccca102102d7_OPRA%20Plan%20with%20Updated%20Exhibit%20A%20-%202006-19-2019.pdf (describing last sale and best bid and offer information disseminated by OPRA).

²² See Options 3 (Options Trading Rules), Section 23(a)(3) (Data Feeds and Trade Information) ("PHLX Depth of Market is a data product that provides: (i) order and quotation information for individual quotes and orders on the order book . . .") (emphasis added); Section 4(b) (Entry and display of Quotes) (identifying the market participants authorized to submit quotes to the Exchange).

²³ See Nasdaq, "December 2023 Bandwidth Report," available at <https://view.officeapps.live.com/op/view.aspx?src=https%3A%2F%2Fwww.nasdaqtrader.com%2Fcontent%2Ftechnicalsupport%2Fspecifications%2>

[Fdataproducts%2Fbandwidthreport.xls&wdOrigin=BROWSELINK](https://view.officeapps.live.com/op/view.aspx?src=https%3A%2F%2Fwww.nasdaqtrader.com%2Fcontent%2Ftechnicalsupport%2Fspecifications%2Fdataproducts%2Fbandwidthreport.xls&wdOrigin=BROWSELINK).

As noted above, there are some customers that purchase both orders and depth. Vendors are one example of this type of customer. They purchase market data solely for resale, not for trading on behalf of themselves or others. Another example is the firm that uses orders for analysis and depth for order routing. As noted above, the orders feed can be useful for assessing sentiment in equity markets, while depth is often used in order routing decisions. Firms that engage in both functions can lower overall processing requirements by using orders for analytics and depth for routing.

Customers can obtain all of the data contained in PHLX Orders from PHLX Depth of Market feed and may purchase the latter if they do not realize the cost savings offered by PHLX Orders.

PHLX Orders is a derivative product designed as a lower-cost alternative to a depth of book feed. It is not a complement to any other product offered by the Exchange or any of its competitors. Customers are free to purchase PHLX Orders or not, and can reject the feed for any reason, including the fee charged.

Current monthly fees for PHLX Orders are \$3,000 for Internal Distributors, \$3,500 for External Distributors, \$1 for a Non-Professional Subscriber, and \$40 for a Professional Subscriber. None of these fees have changes for over a decade, since January 2013.²⁴

TOPO Plus Orders

TOPO Plus is a direct market data product that offers subscribers both TOPO and PHLX Orders for a consolidated fee that is less than the combined fee of the two products.²⁵

Monthly fees for TOPO Plus Orders are currently \$4,500 for Internal Distributors, \$5,000 for External Distributors, \$1 for a Non-Professional Subscriber, and \$40 for a Professional Subscriber.

Internal Distributor fees for TOPO Plus Orders were modified in January 2018, over five years ago,²⁶ but the other TOPO Plus Orders fees have not changed since January 2013.²⁷

Usage of TOPO, PHLX Orders, and TOPO Plus Orders

Different types of market participants purchase TOPO, PHLX Orders and TOPO Plus Orders, including market makers, vendors, banks, proprietary traders, agency brokers (brokers that route trades on behalf of other market participants), hedge funds, index providers and other firms.

In characterizing market participants, we must be clear that firms use data feeds for multiple tasks. A market maker, for example, may use market data for order routing, or for risk analysis used in quoting in their assigned option series. Banks may use market data for prime brokerage services, proprietary trading, or risk management. Market data vendors do not directly use the data at all, but rather disseminate data to market participants that use the data for a multiplicity of purposes. Other firms purchase options data to assess the value of equity securities.²⁸

Characterizing firms based on what we understand to be their primary market activity, and understanding that firms play multiple roles, we estimate that approximately half of the customers that take top of book data in any form, in combination with other products or alone, are market makers, and the remaining half are market data vendors, banks, proprietary traders, agency brokers, hedge funds, index providers, and others. Roughly the same distribution applies to customers that purchase PHLX Orders, whether alone or in combination with other products. Although the distributions are roughly similar, different customers are purchasing different products in different combinations.

As explained above, firms generally purchase PHLX Orders rather than depth of book data to lower technology costs and reduce processing time, while still providing customers insight into open executable orders that could impact the BBO.

A more specific explanation of how TOPO, PHLX Orders and TOPO Plus Orders is used will vary based on use case, with many firms employing multiple use cases. Market makers, banks, hedge funds, and proprietary traders often use top of book and orders feeds for trading, order routing and analysis. Banks may use market data for prime brokerage services, proprietary

trading, or risk management. The clients of market data vendors will utilize the data for many different purposes. We do not have sufficient visibility into our customers' businesses and proprietary processes to be able to determine precise data usage by customer category.

Proposed Changes

For TOPO, the Exchange proposes to increase the monthly charge for Internal Distributors from \$2,000 to \$2,500, and the monthly charge for External Distributors from \$2,500 to \$3,000. No changes are proposed for Non-Professional and Professional Subscriber fees.

For PHLX Orders, the Exchange proposes to increase the monthly charge for Internal Distributors from \$3,000 to \$3,500, and the monthly charge for External Distributors from \$3,500 to \$4,000. No changes are proposed for Non-Professional and Professional Subscriber fees.

For TOPO Plus Orders, the Exchange proposes to increase the monthly charge for Internal Distributors from \$4,500 to \$5,500, and the monthly charge for External Distributors from \$5,000 to \$6,000. No changes are proposed for Non-Professional and Professional Subscriber fees.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,²⁹ in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,³⁰ in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The proposal provides for the equitable allocation of reasonable dues, fees and other charges because the proposed fees are comparable to, and in some cases less than, those of similarly situated exchanges.

The proposal is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers because: (i) it is not unfair discrimination to charge external distributors more for the product because external distributors receive additional value not available to internal distributors by disseminating information externally and typically charging for the service; and (ii) the market data feeds subject to the proposed fee will be available to

²⁴ See Securities Exchange Act Release No. 68576 (January 3, 2013), 78 FR 1886 (January 9, 2013) (SR-Phlx-2012-145).

customers on a non-discriminatory basis.

Equitable Allocation of Reasonable Dues, Fees and Other Charges

The Exchange assesses the market share for each of the eighteen options markets utilizing total options contracts

traded in 2024 through October 28, 2024, as set forth in the following graph:³¹

Figure 1

US Options Market Share

Data using total options contracts traded from start of 2024 - October 28, 2024

The proposed fees for Top of PHLX Options are comparable to those charged by Miami International

Securities Exchange, LLC ("MIAX"), MIAX Emerald (for both internal and external distribution) and Cboe

Exchange, Inc. ("Cboe") (for external distribution), as summarized in Table 1:

TABLE 1

Exchange	Market share %	Monthly fees (top of book)	
		Internal distribution	External distribution
PHLX	9.1	\$2,500	\$3,000.
MIAX	5.7	\$4,000	\$6,000
MIAX Emerald	3.6	(\$2,000 for simple orders; \$2,000 for complex orders).	(\$3,000 for simple orders; \$3,000 for complex orders).
Cboe	17.9	\$2,500	\$3,500.
		(\$1,250 for simple orders; \$1,250 for complex orders).	(\$1,750 for simple orders; \$1,750 for complex orders).
		N/A	\$8,000.
		(fee is part of a package of multiple products)	(\$5,000 for simple orders; \$3,000 for complex orders).

A more detailed discussion of the comparison follows.

MIAX

MIAX, with a market share of approximately 5.7%, provides less information in its top of book feeds than PHLX, yet charges more for those feeds than the PHLX proposal.

MIAX charges different fees for internal distribution of its simple and complex top of book feeds: \$2,000 for its Top of Market feed, and another \$2,000 for its complex Top of Market feed, for a total of \$4,000.³² PHLX TOPO includes both simple and complex orders in a single feed, and therefore the proposed fee of \$2,500 for internal distribution is much less than the \$4,000 charged by MIAX for less information.

For external distribution, MIAX charges \$3,000 for Top of Market feed, and another \$3,000 for its complex top

³¹ Market share is the percentage of volume on a particular exchange relative to the total volume across all exchanges, and indicates the amount of order flow directed to that exchange. High levels of market share enhance the value of trading and

ports. Total contracts include both multi-list options and proprietary options products. Proprietary options products are products with intellectual property rights that are not multi-listed. BX does not list proprietary products.

³² See MIAX Options Exchange Fee Schedule (October 1, 2024), available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Options_Fee_Schedule_10012024.pdf.

of market feed,³³ for a total of \$6,000. The proposed fees of \$3,000 for the PHLX TOPO feed, which includes both simple and complex orders, is far less than the fees charged by MIAX for less information.

MIAX Emerald

The same analysis applies to MIAX Emerald, with a market share of 3.6%. Similar to MIAX, MIAX Emerald charges different fees for simple and complex top of book feeds: \$1,250 for internal distribution of its Top of Market feed, and another \$1,250 for internal distribution of its Complex Top of Market feed, for a total of \$2,500.³⁴ This is the same amount proposed for TOPO internal distribution, for less information.

MIAX Emerald charges \$1,750 for external distribution of its Top of Market feed, and another \$1,750 for external distribution of its complex Top of Market feed, for a total of \$3,500.³⁵ MIAX Emerald therefore charges more than PHLX's proposed monthly charges of \$3,000 for external distribution of TOPO, notwithstanding the fact that MIAX Emerald provides less market information.

This supports the proposition that the proposed PHLX fees are comparable to those of other exchanges and therefore reasonable.

Cboe

Cboe has an approximately 17.9% market share, nearly twice the PHLX market share of 9.1%.³⁶

The Cboe fee for external distribution of the top of book feed is \$5,000 per month.³⁷ If a customer also wants Cboe's Complex Order Book ("COB"), the customer would pay an additional \$3,000.³⁸ These fees are comparable to the proposed PHLX fee of \$3,000 per month for external distribution of a combined simple and complex orders feed because the higher fee for Cboe reflects the higher market share of the Cboe exchange.

PHLX Orders

The proposed fees for PHLX Orders are comparable to the fees charged by MIAX, MIAX Emerald, and Nasdaq ISE, LLC ("ISE"), an affiliate of PHLX, as set forth in Table 2 below.

TABLE 2

Exchange	Market share %	Monthly fees (orders)	
		Internal distribution	External distribution
PHLX	9.1	\$3,500	\$4,000.
MIAX	5.7	\$3,000	\$3,500.
MIAX Emerald	3.6	\$3,000	\$3,500.
ISE	6.2	\$3,000	\$3,000 per month plus \$20 per month per controlled device.

MIAX

MIAX has a market share of approximately 5.7%, somewhat more than half of PHLX's market share of 9.1%.

MIAX charges \$3,000 for internal distribution of its orders feed.³⁹ PHLX, with a market share over 50 percent more than MIAX, proposes to charge \$3,500 for the same service. The PHLX fee is only about 17% more than the MIAX fee.

MIAX charges \$3,500 for external distribution of its orders feed.⁴⁰ PHLX, with a market share over 50 percent more than MIAX, proposes to charge \$4,000 for the same service. The PHLX fee is only about 14% more than the MIAX fee.

MIAX Emerald

MIAX Emerald also has a market share of 3.6%, less than half of PHLX's market share of 9.1%.

Like MIAX, MIAX Emerald charges \$3,000 for internal distribution of its orders feed.⁴¹ PHLX, with a market share over twice that of MIAX Emerald, proposes to charge \$3,500 for the same service. The PHLX fee is only about 17% more than the MIAX fee.

MIAX Emerald also charges \$3,500 for external distribution of its orders feed.⁴² PHLX, with a market share over twice that of MIAX Emerald, proposes to charge \$4,000 for the same service. The PHLX fee is only about 14% more than the MIAX Emerald fee.

ISE

ISE has a market share of approximately 6.2%, below PHLX's market share of 9.1%.

ISE charges \$3,000 for internal distribution of its Order Feed.⁴³ This is comparable to the proposed PHLX Orders feed for internal distribution of \$3,500 because PHLX has a larger share

and the ISE feed does not include information on complex orders.

For external distribution, ISE charges \$3000 per month, plus an additional \$20 per month for each controlled device, up to a maximum fee of \$5,000 per month.⁴⁴ This is comparable to the proposed PHLX fee of \$4,000 (the ISE fee may be above or below the PHLX fee, depending on the number of controlled devices) and the proposed fee is reasonable given PHLX's larger market share.

TOPO Plus Orders

The separate fees for TOPO and PHLX Orders are each reasonable because, as shown above, they are comparable to other SRO fees. The TOPO Plus Orders product offers a discount for the purchase of these two separate feeds together. A discount from fees that have already been shown to be reasonable is

³³ See id.

³⁴ See MIAX Emerald Options Schedule (December 8, 2022), available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Emerald_Fee_Schedule_12082022c.pdf.

³⁵ See id.

³⁶ See Nasdaq, Options Market Statistics (Last updated November 3, 2023), available at <https://www.nasdaqtrader.com/Trader.aspx?id=OptionsVolumeSummary>.

³⁷ See id.

³⁸ As explained in note 32, Cboe waives its Complex Order Book feed for internal distribution of top of book and depth, but not for external distribution of top of book.

³⁹ See MIAX Options Exchange Fee Schedule (October 1, 2024), available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Options_Fee_Schedule_10012024.pdf.

⁴⁰ See id.

⁴¹ See MIAX Emerald Options Schedule (December 8, 2022), available at https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Emerald_Fee_Schedule_12082022c.pdf.

www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Emerald_Fee_Schedule_12082022c.pdf.

⁴² See id.

⁴³ See Nasdaq ISE, LLC Rules, Options 7, Section 10(G) (Nasdaq ISE Order Feed). The ISE Order feed differs from the PHLX Orders feed in that it provides information only on simple orders, whereas the PHLX Orders feed provides information on both simple and complex orders.

⁴⁴ See id.

reasonable and consistent with the Exchange Act.

In summary, (i) the proposed fees for Top of PHLX Options are comparable to those of MIAX, MIAX Emerald and Cboe; (ii) the proposed fees for PHLX Orders are comparable to those of MIAX, MIAX Emerald, and ISE; and (iii) the proposed PHLX TOPO Plus Orders fees offer a discount from the amount the customer would pay for TOPO and Orders separately, and, because these separate fees are comparable to those charged by other exchanges, the proposed discount for TOPO Plus Orders is reasonable.

No Unfair Discrimination Between Customers, Issuers, Brokers, or Dealers

The proposal is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers because: (i) external distributors receive additional value not available to internal distributors; and (ii) these market data feeds will be available on a non-discriminatory basis.

External Distributors receive additional value not available to Internal Distributors by disseminating information externally and typically charging for the service. This additional value supports higher fees for external distribution for TOPO, PHLX Orders, and TOPO Plus Orders. Higher fees for external distribution of data are common throughout the industry, and nearly universal among exchanges. The difference in value between internal and external distribution is also reflected in the current fee schedule, which has previously been shown to be consistent with the Exchange Act.

The three market data feeds at issue here—TOPO, PHLX Orders, and TOPO Plus Orders—are used by a variety of market participants for a variety of purposes. Users include regulators, market makers, competing exchanges, media, retail, academics, portfolio managers. Market data feeds will be available to members of all of these groups on a non-discriminatory basis.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Nothing in the Proposal burdens inter-market competition (the competition among self-regulatory organizations) because approval of the Proposal does not impose any burden on the ability of other options exchanges to compete. PHLX fees are comparable

to, and in some cases less than, those of other exchanges, as discussed above.

Nothing in the Proposal burdens intra-market competition (the competition among consumers of exchange data) because PHLX market data is available to any customer under the same fee schedule as any other customer, and any market participant that wishes to purchase PHLX market data can do so on a non-discriminatory basis.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) by order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-Phlx-2024-67 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to file number SR-Phlx-2024-67. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the

submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-Phlx-2024-67 and should be submitted on or before December 31, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴⁵

Sherry R. Haywood,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101825; File No. SR-CboeBZX-2024-122]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule Regarding Dedicated Cores

December 5, 2024

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 26, 2024, Cboe BZX Exchange, Inc. (the "Exchange" or "BZX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to

⁴⁵ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the "Exchange" or "BZX Equities") proposes to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/BZX/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to adopt fees for Dedicated Cores.³

By way of background, the Exchange recently began to allow Users⁴ to assign a Single Binary Order Entry ("BOE") logical order entry port⁵ to a single

dedicated Central Processing Unit (CPU Core) ("Dedicated Core"). Historically, CPU Cores had been shared by logical order entry ports (*i.e.*, multiple logical ports from multiple firms may connect to a single CPU Core). Use of Dedicated Cores however, can provide reduced latency, enhanced throughput, and improved performance since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core instead of sharing that power with other firms. This offering is completely voluntary and is available to all Users that wish to purchase Dedicated Cores. Users may utilize BOE logical order entry ports on shared CPU Cores, either in lieu of, or in addition to, their use of Dedicated Core(s). As such, Users are able to operate across a mix of shared and dedicated CPU Cores which the Exchange believes provides additional risk and capacity management. Further, Dedicated Cores are not required nor necessary to participate on the Exchange and as such Users may opt not to use Dedicated Cores at all.

The Exchange proposes to assess the following monthly fees for Users that wish to use Dedicated Cores and adopt a maximum limit. First, the Exchange proposes to provide up to two Dedicated Cores to all Users who wish to use Dedicated Cores, at no additional cost. For the use of more than two Dedicated Cores, the Exchange proposes to assess the following fees: \$650 per Dedicated Core for 3–15 Dedicated Cores; \$850 per Dedicated Core for 16–30 Dedicated Cores; and \$1,050 per Dedicated Core for 31 or more Dedicated Cores. The proposed fees are progressive and the Exchange proposes to include the following example in the Fees Schedule to provide clarity as to how the fees will be applied. Particularly, the Exchange will provide the following example: if a User were to purchase 16 Dedicated Cores, it will be charged a total of \$9,300 per month ($\$0 * 2 + \$650 * 13 + \$850 * 1$). The Exchange also proposes to make clear in the Fees Schedule that the monthly fees are assessed and applied in their entirety and are not prorated. The Exchange notes the current standard fees assessed for BOE Logical Ports, whether used with Dedicated or shared CPU cores, will remain applicable and unchanged.⁶

Since the Exchange currently has a finite amount of physical space in its data centers in which its servers (and

therefore corresponding CPU Cores) are located, the Exchange also proposes to prescribe a maximum limit on the number of Dedicated Cores that Users may purchase each month. The purpose of establishing these limits is to manage the allotment of Dedicated Cores in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an unlimited number of Dedicated Cores. The Exchange previously established a limit for Members of a maximum number of 60 Dedicated Cores and Sponsoring Members a limit of a maximum number of 25 Dedicated Cores for each of their Sponsored Access relationships.⁷ The Exchange has since been able to procure additional physical space in its third-party data center as well as additional servers with CPU Cores and also has a better understanding of User demand relative to its available space and available Dedicated Cores since the initial launch of Dedicated Cores. After seeing increased User demand, the Exchange proposed to increase the cap and provided that Members will be limited to a maximum number of 80 Dedicated Cores and Sponsoring Members will be limited to a maximum number of 35 Dedicated Cores for each of their Sponsored Access relationships.⁸ The Exchange noted at that time that it would continue monitoring Dedicated Core interest by all Users and allotment availability with the goal of increasing these limits to meet Users' needs if and when the demand is there and/or the Exchange is able to accommodate additional Dedicated Cores. Since then, the Exchange has determined that it is able to accommodate an increased cap relative to current demand. As such, the Exchange proposes to increase the cap to 120 Dedicated Cores for Members, effective December 1, 2024.⁹ Sponsoring Members will continue to be limited to a maximum of 35 Dedicated Cores for each of their Sponsored Access relationships.¹⁰

⁷ See Securities Exchange Act Release No. 100395 (June 21, 2024), 89 FR 53687 (June 27, 2024) (SR-CboeBZX-2024-054).

⁸ See Securities Exchange Act Release No. 101302 (October 10, 2024), 89 FR 83727 (October 17, 2024) (SR-CboeBZX-2024-094).

⁹ The prescribed maximum quantity of Dedicated Cores for Members applies regardless of whether that Member purchases the Dedicated Cores directly from the Exchange and/or through a Service Bureau. In a Service Bureau relationship, a customer allows its MPID to be used on the ports of a technology provider, or Service Bureau. One MPID may be allowed on several different Service Bureaus.

¹⁰ The fee tier(s) applicable to Sponsoring Members are determined on a per Sponsored

³ The Exchange initially introduced pricing for Dedicated Cores on June 10, 2024 (SR-CboeBZX-2024-054). On August 1, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-075. On business date September 30, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-094. On November 26, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ A User may be either a Member or Sponsored Participant. The term "Member" shall mean any registered broker or dealer that has been admitted to membership in the Exchange, limited liability company or other organization which is a registered broker or dealer pursuant to Section 15 of the Act, and which has been approved by the Exchange. A Sponsored Participant may be a Member or non-Member of the Exchange whose direct electronic access to the Exchange is authorized by a Sponsoring Member subject to certain conditions. See Exchange Rule 11.3.

⁵ Users may currently connect to the Exchange using a logical port available through an application programming interface ("API"), such as the Binary

Order Entry ("BOE") protocol. A BOE logical order entry port is used for order entry.

⁶ The Exchange currently assesses \$550 per port per month. Port fees will also continue to be assessed on the first two Dedicated Cores that Users receive at no additional cost. See Cboe BZX Equities Fee Schedule.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹¹ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹² requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹³ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁴ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

The Exchange believes the proposal is reasonable because the Exchange is offering any User who wishes to utilize Dedicated Cores up to two Dedicated Cores at no additional cost. For example, of the Users that currently maintain Dedicated Cores, 26% maintain only 1 or 2 Dedicated Cores

and therefore pay no additional fees. The Exchange believes the proposed fees are reasonable because Dedicated Cores provide a valuable service in that it can provide reduced latency, enhanced throughput, and improved performance compared to use of a shared CPU Core since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core. The Exchange also emphasizes however, that the use of Dedicated Cores is not necessary for trading and as noted above, is entirely optional. Users can also continue to access the Exchange through shared CPU Cores at no additional cost. Indeed, only 16% of the Exchange’s Members currently use Dedicated Cores and as noted above, of that 16%, only 26% take 1 or 2 Dedicated Cores at no additional cost. Depending on a firm’s specific business needs, the proposal enables Users to choose to use Dedicated Cores in lieu of, or in addition to, shared CPU Cores (or as emphasized, not use Dedicated Cores at all). If a User finds little benefit in having Dedicated Cores based on its business model and trading strategies, or determines Dedicated Cores are not cost-efficient for its needs or does not provide sufficient value to the firm, such User may continue its use of the shared CPU Cores, unchanged. The Exchange also has no plans to eliminate shared CPU Cores nor to require Users to purchase Dedicated Cores.

The Exchange has seen general interest in Dedicated Cores from a variety of market participants, with varying size and business models. Such market participants include proprietary trading firms (who tend to be more latency sensitive), as well as sell-side market participants and buy-side market participants (who tend to be less latency sensitive). For background, proprietary trading firms utilize their own capital to trade without taking outside money from clients. Due to the nature of their respective businesses, the Exchange has classified proprietary trading firms as latency sensitive, and other groups, such as buy-side hedge funds, sell-side banks and sell-side non-banks (such as agency brokers) as non-latency sensitive. Proprietary trading firms’ strategies may range from, marketing making, to relative value trading and arbitrage—these all rely on profiting from general market activity and, generally, requires faster entry and exit into trades and positions making proprietary trading firms more latency sensitive than other market segments. Buy-side hedge funds, banks and agency brokers are not as latency sensitive as strategy for hedge funds is based on

overall long-term positioning in the market and banks and agency brokers may profit from commissions of customer order flow; both are generally strategies that are not reliant on speed to the same extent proprietary trading firms are. Further, Members have various reasons for obtaining Dedicated Cores. Some Members for example, may be seeking to further reduce latency, whereas others may use Dedicated Cores as a general risk mitigation by siloing their respective activity. Of further note, only 40% of Members that are propriety trading firms (who again, generally tend to be more latency sensitive) utilize Dedicated Cores, and of that 40%, 36% are only utilizing the 1 to 2 free Dedicated Cores available to all Users. As mentioned above, some non-latency sensitive firms have chosen to also adopt Dedicated Cores. 9% of Members that are not latency sensitive utilize Dedicated Cores, and of that 9%, 13% are only utilizing the 1 to 2 free Dedicated Cores available to all Users.

The lack of universal, or even widespread, adoption by all such users therefore demonstrates that purchasing Dedicated Cores is not effectively a requirement to compete for any one type of market participant, including latency sensitive market participants. Instead, Dedicated Cores are an optional and voluntary connectivity offering, which market participants are free to choose whether or not to utilize based on whether they meet their unique business needs. Moreover, the Exchange has received overwhelming positive feedback and support for Dedicated Cores, with some Members even noting that they have moved more of their order flow to the Exchange and its affiliated equities exchanges (the “Equities Exchanges”) as they have noticed both better fills and greater consistency of order execution at the Equities Exchanges. This demonstrates that despite any incurred costs for Members that choose to purchase Dedicated Cores, it is ultimately a net win for them as they benefit from better execution. The Exchange believes it also demonstrates that Members find the proposed fees to be both reasonable and have benefited from purchasing or, at alternatively benefiting from the proposed one or two free Dedicated Cores available at no additional cost. The Exchange believes this is shown by both the level of demand for Dedicated Cores and the feedback from market participants, including as described above. The Exchange also believes it’s notable that no negative comment letters in connection with the proposed pricing have been received since the Exchange

Access relationship basis and not on the combined total of Dedicated Cores across Sponsored Users. For example, under the proposed changes, a Sponsoring Member that has three Sponsored Access relationships is entitled to a total of 105 Dedicated Cores for those 3 Sponsored Access relationships but would be assessed fees separately based on the 35 Dedicated Cores for each Sponsored User (instead of combined total of 105 Dedicated Cores). For example, a Sponsoring Member with 3 Sponsored Access relationships would pay \$30,450 per month if each Sponsored Access relationship purchased the maximum 35 Dedicated Cores. More specifically, the Sponsoring Member would be provided 2 Dedicated Cores at no additional cost for each Sponsored User under Tier 1 (total of 6 Dedicated Cores at no additional cost) and provided an additional 8 Dedicated Cores at \$650 each for each Sponsored User, 5 Dedicated Cores at \$850 each for each Sponsored User and 20 Dedicated Cores at \$1,050 each for each Sponsored User (combined total of 99 additional Dedicated Cores).

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(5).

¹³ *Id.*

¹⁴ 15 U.S.C. 78f(b)(4).

first filed proposed fees for Dedicated Cores back on June 10, 2024. Additionally, as noted earlier, Members can (and many have) decide that utilizing even a free Dedicated Core is not needed for their business. Ultimately, this is a business decision that each Member must make and is best suited to determine and will ultimately depend on the priorities and strategies of that Member's respective business needs.

The Exchange also believes that the proposed Dedicated Core fees are equitable and not unfairly discriminatory because they continue to be assessed uniformly to similarly situated users in that all Users who choose to purchase Dedicated Cores will be subject to the same proposed tiered fee schedule. Moreover, all Users are entitled to up to 2 Dedicated Cores at no additional cost and, as previously discussed, 26% of all Users that take Dedicated Cores (including both latency sensitive and non-latency sensitive Users) take only 1 or 2 Dedicated Cores at no additional cost. The Exchange believes the proposed ascending fee structure is also reasonable, equitable and not unfairly discriminatory as it is designed so that firms that use a higher allotment of the Exchange's finite number of Dedicated Cores pay higher rates, rather than placing that burden on market participants that have more modest needs who will have the flexibility of obtaining Dedicated Cores at lower price points in the lower tiers. As such, the proposed fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the ascending fee structure reflects the (finite) resources consumed by the various needs of market participants—that is, the lowest Dedicated Core consuming Users pay the least, and highest Dedicated Core consuming Users pay the most. Other exchanges similarly assess higher fees to those that consume more Exchange resources, including the Exchange on its options platform.¹⁵ Moreover, those consuming more Dedicated Cores do so if they find a benefit in having higher quantities of Dedicated Cores based on their respective business needs. The proposed tier structure is also designed to encourage firms to manage their needs in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an additional number of Dedicated Cores. Moreover, as

discussed above and in more detail below, the Exchange cannot currently offer an unlimited number of Dedicated Cores due in part to physical space constraints in the third-party data center. The Exchange believes the proposed ascending fee structure is therefore another appropriate means, in conjunction with an established cap, to manage this finite resource and ensure the resource is apportioned more fairly.

The Exchange believes it is reasonable to limit the number of Dedicated Cores Users can purchase because the Exchange has a finite amount of space in its third-party data centers to accommodate CPU cores, including Dedicated Cores. The Exchange must also take into account timing and cost considerations in procuring additional Dedicated Cores and related hardware such as servers, switches, optics and cables, as well as the readiness of the Exchange's data center to accommodate additional Dedicated Cores in the Exchange's respective Order Handler Cabinets.¹⁶ Moreover, procuring data center space has grown to be more challenging than it was five years ago with the increased demand for data center space. For example, the U.S. colocation data center market has doubled in size in just four years. In addition to the Exchange's rollout of Dedicated Cores, the Exchange is mindful of its other business areas and the need to continue to be mindful of its existing, external restraints in procuring additional space in this area. The Exchange has, and will continue to, monitor market participant demand and space availability and endeavor to adjust the limit if and when the Exchange is able to acquire additional space and power within the third-party data centers and/or additional CPU Cores to accommodate additional Dedicated Cores.¹⁷ The Exchange monitors its capacity and data center space and thus is in the best place to determine these limits and modify them as appropriate in response to changes to this capacity and space, as well as market demand. For example, the Exchange's affiliate Cboe EDGA Exchange, Inc. has increased the prescribed maximum limit three times since the launch of Dedicated Cores on its exchange on February 26, 2024 as a result of evaluating the demand relative to Dedicated Cores availability.¹⁸ The

proposed increased limits continue to apply uniformly to similarly situated market participants (*i.e.*, all Members are subject to the same limit and all Sponsored Participants are subject to the same limit, respectively). The Exchange believes it's not unfairly discriminatory to provide for different limits for different types of Users. For example, the Exchange believes it's not unfairly discriminatory to provide for an initial lower limit to be allocated for Sponsored Participants because unlike Members, Sponsored Participants are able to access the Exchange without paying a Membership Fee. Members also have more regulatory obligations and risk that Sponsored Participants do not. For example, while Sponsored Participants must agree to comply with the Rules of the Exchange, it is the Sponsoring Member of that Sponsored Participant that remains ultimately responsible for all orders entered on or through the Exchange by that Sponsored Participant. The industry also has a history of applying fees differently to Members as compared to Sponsored Participants.¹⁹ Lastly, the Exchange believes its proposed maximum limits, and distinction between Members and Sponsored Users, is another appropriate means to help the Exchange manage its allotment of Dedicated Cores and better ensure this finite resource is apportioned fairly.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary in furtherance of the purposes of the Act because the proposed tiered fee structure will apply equally to all similarly situated Users that choose to use Dedicated Cores. As discussed above, Dedicated Cores are optional and Users may choose to utilize Dedicated Cores, or not, based on their views of the additional benefits and added value provided by utilizing a Dedicated Core. The Exchange believes the proposed fees will be assessed proportionately to the potential value or benefit received by Users with a greater number of Dedicated Cores and notes that Users may determine at any time to cease using Dedicated Cores. As

CboeEDGA-2024-014) Securities Exchange Act Release No. 100300 (June 10, 2024), 89 FR 50653 (June 14, 2024) (SR-CboeEDGA-2024-020); and Securities Exchange Act Release No. 100736 (August 21, 2024), 89 FR 67696 (August 15, 2024) (SR-CboeEDGA-2024-032).

¹⁹ See *e.g.*, Securities Exchange Act Release No. 68342 (December 3, 2012), 77 FR 73096 (December 7, 2012) (SR-CBOE-2012-114) and Securities Exchange Act Release No. 66082 (January 3, 2012), 77 FR 1101 (January 9, 2012) (SR-C2-2011-041).

¹⁵ See *e.g.*, Cboe U.S. Options Fee Schedule, BZX Options, Options Logical Port Fees, Ports with Bulk Quoting Capabilities.

¹⁶ The Exchange notes that it cannot currently convert shared CPU cores into Dedicated Cores.

¹⁷ The Exchange notes that approximately 5% of Users that have Dedicated Cores currently are at or near the maximum limits. The average number of Dedicated Cores used for the Exchange is 21.

¹⁸ See Securities Exchange Act Release No. 99983 (April 17, 2024), 89 FR 30418 (April 23, 2024) (SR-

discussed, Users can also continue to access the Exchange through shared CPU Cores at no additional cost. Finally, all Users will be entitled to two Dedicated Cores at no additional cost.

Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market, including competition for exchange memberships. Market Participants have numerous alternative venues that they may participate on, including 15 other equities exchanges, as well as off-exchange venues, where competitive products are available for trading. Indeed, participants can readily choose to submit their order flow to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”²⁰ The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: “[n]o one disputes that competition for order flow is ‘fierce.’ . . . As the SEC explained, ‘[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution’; [and] ‘no exchange can afford to take its market share percentages for granted’ because ‘no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers’”²¹ Accordingly, the Exchange does not believe its proposed change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²² and paragraph (f) of Rule 19b-4²³ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBZX-2024-122 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to file number SR-CboeBZX-2024-122. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written

communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBZX-2024-122 and should be submitted on or before January 2, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴

Sherry R. Haywood,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101821; File No. SR-NASDAQ-2024-074]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing of Proposed Rule Change To Amend Equity 4, Rule 4759 Concerning Data Feeds Utilized

December 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 25, 2024, The Nasdaq Stock Market LLC (“Nasdaq” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Equity 4, Rule 4759 (Data Feeds

Utilized) to change the primary and secondary source of quotation data of certain market centers in the list of proprietary and network processor feeds that the Exchange utilizes for the handling, routing, and execution of orders as well as regulatory compliance processes related to those functions.

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the data feeds table in Equity 4, Rule 4759, which sets forth on a market-by-market basis the specific proprietary and network processor feeds that the Exchange utilizes for the handling, routing, and execution of orders, and for performing the regulatory compliance processes related to each of those functions. Specifically, the table would be amended to reflect that the Exchange will receive a direct feed from the Long-Term Stock Exchange (“LTSE”) as its primary quotation data source and CQS/UQDF will become its secondary data source for the handling, routing and execution of orders and for performing regulatory compliance processes related to each of those functions. The change to the primary sources reflects the Exchange’s effort to include an additional source and the use of secondary sources in the event the primary source is unable to provide data.

The operative date of the proposed rule change shall be November 25, 2024.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b)

of the Act,³ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁴ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market because updating its data feeds table of market centers for which the exchange consumes quotation data through a direct feed will provide clarity to market participants. Additionally, it is necessary and consistent with the public interest and the protection of investors to update the Exchange’s table of market centers in Equity 4, Rule 4759 in order to provide transparency with respect to all the direct proprietary and network processor feeds from which the Exchange obtains market data.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, its purpose is to enhance transparency with respect to the operation of the Exchange and its use of market data feeds.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act⁵ and Rule 19b-4(f)(6) thereunder.⁶ Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of

³ 15 U.S.C. 78f(b).

⁴ 15 U.S.C. 78f(b)(5).

⁵ 15 U.S.C. 78s(b)(3)(A)(iii).

⁶ 17 CFR 240.19b-4(f)(6).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁷ and Rule 19b-4(f)(6) thereunder.⁸

A proposed rule change filed under Rule 19b-4(f)(6)⁹ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁰ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative immediately. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because the proposal does not raise any novel regulatory issues and waiver will allow the Exchange to begin receiving and using a direct feed from LTSE as soon as possible. For this reason, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.¹¹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NASDAQ-2024-074 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NASDAQ-2024-074. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NASDAQ-2024-074, and should be submitted on or before December 31, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹²

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101824; File No. SR-CboeEDGX-2024-080]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule Regarding Dedicated Cores

December 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 26, 2024, Cboe EDGX Exchange, Inc. (the "Exchange" or "EDGX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc (the "Exchange" or "EDGX") proposes to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/options/regulation/rule_filings/edgx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

⁷ 15 U.S.C. 78s(b)(3)(A).

⁸ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires the Exchange to give the Commission written notice of the Exchange's intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

⁹ 17 CFR 240.19b-4(f)(6).

¹⁰ 17 CFR 240.19b-4(f)(6)(iii).

¹¹ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

¹² 17 CFR 200.30-3(a)(12), (59).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to adopt fees for Dedicated Cores.³

By way of background, the Exchange recently began allowing Users⁴ to assign a Single Binary Order Entry ("BOE") logical order entry port⁵ to a single dedicated Central Processing Unit (CPU Core) ("Dedicated Core"). Historically, CPU Cores had been shared by logical order entry ports (*i.e.*, multiple logical ports from multiple firms may connect to a single CPU Core). Use of Dedicated Cores however, can provide reduced latency, enhanced throughput, and improved performance since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core instead of sharing that power with other firms. This offering is completely voluntary and is available to all Users that wish to purchase Dedicated Cores. Users may utilize BOE logical order entry ports on shared CPU Cores, either in lieu of, or in addition to, their use of Dedicated Core(s). As such, Users are able to operate across a mix of shared and dedicated CPU Cores which the Exchange believes provides additional risk and capacity management. Further, Dedicated Cores are not required nor necessary to participate on the Exchange and as such Users may opt not to use Dedicated Cores at all.

The Exchange proposes to assess the following monthly fees for Users that wish to use Dedicated Cores and adopt a maximum limit. First, the Exchange proposes to provide up to two Dedicated Cores to all Users who wish to use Dedicated Cores, at no additional cost.

³ The Exchange initially adopted pricing for Dedicated Cores on July 1, 2024 (SR-CboeEDGX-2024-043). On August 1, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-051. On business date September 30, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-061. On November 26, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ A User may be either a Member or Sponsored Participant. The term "Member" shall mean any registered broker or dealer that has been admitted to membership in the Exchange, limited liability company or other organization which is a registered broker or dealer pursuant to Section 15 of the Act, and which has been approved by the Exchange. A Sponsored Participant may be a Member or non-Member of the Exchange whose direct electronic access to the Exchange is authorized by a Sponsoring Member subject to certain conditions. See Exchange Rule 11.3.

⁵ Users may currently connect to the Exchange using a logical port available through an application programming interface ("API"), such as the Binary Order Entry ("BOE") protocol. A BOE logical order entry port is used for order entry.

For the use of more than two Dedicated Cores, the Exchange proposes to assess the following fees: \$650 per Dedicated Core for 3–15 Dedicated Cores; \$850 per Dedicated Core for 16–30 Dedicated Cores; and \$1,050 per Dedicated Core for 31 or more Dedicated Cores. The proposed fees are progressive and the Exchange proposes to include the following example in the Fees Schedule to provide clarity as to how the fees will be applied. Particularly, the Exchange will provide the following example: if a User were to purchase 16 Dedicated Cores, it will be charged a total of \$9,300 per month ($\$0 * 2 + \$650 * 13 + \$850 * 1$). The Exchange also proposes to make clear in the Fees Schedule that the monthly fees are assessed and applied in their entirety and are not prorated. The Exchange notes the current standard fees assessed for BOE Logical Ports, whether used with Dedicated or shared CPU cores, will remain applicable and unchanged.⁶

Since the Exchange currently has a finite amount of physical space in its data centers in which its servers (and therefore corresponding CPU Cores) are located, the Exchange also proposes to prescribe a maximum limit on the number of Dedicated Cores that Users may purchase each month. The purpose of establishing these limits is to manage the allotment of Dedicated Cores in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an unlimited number of Dedicated Cores. The Exchange previously established a limit for Members of a maximum number of 60 Dedicated Cores and Sponsoring Members a limit of a maximum number of 25 Dedicated Cores for each of their Sponsored Access relationships.⁷ The Exchange has since been able to procure additional space in its third-party data center, as well as procure additional servers with CPU Cores and the Exchange has a better understanding of User demand relative to its available space since the initial launch of Dedicated Cores. After seeing increased User demand, the Exchange proposed to increase the cap and provided that Members will be limited to a maximum number of 80 Dedicated Cores and Sponsoring Members will be limited to a maximum number of 35 Dedicated Cores for each of their Sponsored

⁶ The Exchange currently assesses \$550 per port per month. Port fees will also continue to be assessed on the first two Dedicated Cores that Users receive at no additional cost. See Cboe EDGX Equities Fee Schedule.

⁷ See Securities Exchange Act Release No. 100471 (July 9, 2024) 89 FR 57454 (July 15, 2024) (SR-CboeEDGX-2024-043).

Access relationships.⁸ The Exchange noted at that time that it would continue monitoring Dedicated Core interest by all Users and allotment availability with the goal of increasing these limits to meet Users' needs if and when the demand is there and/or the Exchange is able to accommodate additional Dedicated Cores. Since then, the Exchange has determined that it is able to accommodate an increased cap relative to current demand. As such, the Exchange proposes to increase the cap to 120 Dedicated Cores for Members, effective December 1, 2024.⁹ Sponsoring Members will continue to be limited to a maximum of 35 Dedicated Cores for each of their Sponsored Access relationships.¹⁰

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹¹ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹² requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling,

⁸ See Securities Exchange Act Release No. 101305 (October 10, 2024) 89 FR 83720 (October 17, 2024) (SR-CboeEDGX-2024-061).

⁹ The prescribed maximum quantity of Dedicated Cores for Members applies regardless of whether that Member purchases the Dedicated Cores directly from the Exchange and/or through a Service Bureau. In a Service Bureau relationship, a customer allows its MPID to be used on the ports of a technology provider, or Service Bureau. One MPID may be allowed on several different Service Bureaus.

¹⁰ The fee tier(s) applicable to Sponsoring Members are determined on a per Sponsored Access relationship basis and not on the combined total of Dedicated Cores across Sponsored Users. For example, under the proposed changes, a Sponsoring Member that has three Sponsored Access relationships is entitled to a total of 105 Dedicated Cores for those 3 Sponsored Access relationships but would be assessed fees separately based on the 35 Dedicated Cores for each Sponsored User (instead of combined total of 105 Dedicated Cores). For example, a Sponsoring Member with 3 Sponsored Access relationships would pay \$30,450 per month if each Sponsored Access relationship purchased the maximum 35 Dedicated Cores. More specifically, the Sponsoring Member would be provided 2 Dedicated Cores at no additional cost for each Sponsored User under Tier 1 (total of 6 Dedicated Cores at no additional cost) and provided an additional 8 Dedicated Cores at \$650 each for each Sponsored User, 5 Dedicated Cores at \$850 each for each Sponsored User and 20 Dedicated Cores at \$1,050 each for each Sponsored User (combined total of 99 additional Dedicated Cores).

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(5).

processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹³ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁴ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

The Exchange believes the proposal is reasonable because the Exchange is offering any User who wishes to utilize Dedicated Cores up to two Dedicated Cores at no additional cost. For example, of the Users that currently maintain Dedicated Cores, 33% maintain only 1 or 2 Dedicated Cores and therefore pay no additional fees. The Exchange believes the proposed fees are reasonable because Dedicated Cores provide a valuable service in that it can provide reduced latency, enhanced throughput, and improved performance compared to use of a shared CPU Core since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core. The Exchange also emphasizes however, that the use of Dedicated Cores is not necessary for trading and as noted above, is entirely optional. Users can also continue to access the Exchange through shared CPU Cores at no additional cost. Indeed, 18% of the Exchange's Members currently use Dedicated Cores, and as noted above, of those who do, 33% take only 1 or 2 Dedicated Cores at no additional cost. Depending on a firm's specific business needs, the proposal enables Users to choose to use Dedicated Cores in lieu of, or in addition to, shared CPU Cores (or as emphasized, not use Dedicated Cores at all). If a User finds little benefit in having Dedicated Cores based on its business model and trading strategies, or determines Dedicated Cores are not cost-efficient for its needs or does not provide sufficient value to the firm, such User may continue its use of the shared CPU Cores, unchanged. The Exchange also has no plans to eliminate shared CPU Cores nor to require Users to purchase Dedicated Cores.

The Exchange has seen general interest in Dedicated Cores from a variety of market participants, with varying size and business models. Such market participants include proprietary trading firms (who tend to be more latency sensitive), as well as sell-side market participants and buy-side market participants (who tend to be less latency sensitive). For background, proprietary trading firms utilize their own capital to trade without taking outside money from clients. Due to the nature of their respective businesses, the Exchange has classified proprietary trading firms as latency sensitive, and other groups, such as buy-side hedge funds, sell-side banks and sell-side non-banks (such as agency brokers) as non-latency sensitive. Proprietary trading firms' strategies may range from, marketing making, to relative value trading and arbitrage—these all rely on profiting from general market activity and, generally, requires faster entry and exit into trades and positions making proprietary trading firms more latency sensitive than other market segments. Buy-side hedge funds, banks and agency brokers are not as latency sensitive as strategy for hedge funds is based on overall long-term positioning in the market and banks and agency brokers may profit from commissions of customer order flow; both are generally strategies that are not reliant on speed to the same extent proprietary trading firms are. Further, Members have various reasons for obtaining Dedicated Cores. Some Members for example, may be seeking to further reduce latency, whereas others may use Dedicated Cores as a general risk mitigation by siloing their respective activity. Of further note, only 46% of Members that are propriety trading firms (who again, generally tend to be more latency sensitive) utilize Dedicated Cores, and of that 46%, 33% are only utilizing the 1 to 2 free Dedicated Cores available to all Users. As mentioned above, some non-latency sensitive firms have chosen to also adopt Dedicated Cores. 12% of Members that are not latency sensitive utilize Dedicated Cores, and of that 12%, 33% are only utilizing the 1 to 2 free Dedicated Cores available to all Users.

The lack of universal, or even widespread, adoption by all such users therefore demonstrates that purchasing Dedicated Cores is not effectively a requirement to compete for any one type of market participant, including latency sensitive market participants. Instead, Dedicated Cores are an optional and voluntary connectivity offering, which market participants are free to choose whether or not to utilize based on

whether they meet their unique business needs. Moreover, the Exchange has received overwhelming positive feedback and support for Dedicated Cores, with some Members even noting that they have moved more of their order flow to the Exchange and its affiliated equities exchanges (the "Equities Exchanges") as they have noticed both better fills and greater consistency of order execution at the Equities Exchanges. This demonstrates that despite any incurred costs for Members that choose to purchase Dedicated Cores, it is ultimately a net win for them as they benefit from better execution. The Exchange believes it also demonstrates that Members find the proposed fees to be both reasonable and have benefited from purchasing or, at alternatively benefiting from the proposed one or two free Dedicated Cores available at no additional cost. The Exchange believes this is shown by both the level of demand for Dedicated Cores and the feedback from market participants, including as described above. The Exchange also believes it's notable that no negative comment letters in connection with the proposed pricing have been received since the Exchange first filed proposed fees for Dedicated Cores back on July 1, 2024. Additionally, as noted earlier, Members can (and many have) decide that utilizing even a free Dedicated Core is not needed for their business. Ultimately, this is a business decision that each Member must make and is best suited to determine and will ultimately depend on the priorities and strategies of that Member's respective business needs.

The Exchange also believes that the proposed Dedicated Core fees are equitable and not unfairly discriminatory because they continue to be assessed uniformly to similarly situated users in that all Users who choose to purchase Dedicated Cores will be subject to the same proposed tiered fee schedule. Moreover, all Users are entitled to up to 2 Dedicated Cores at no additional cost and as previously discussed, 33% of all Users that take Dedicated Cores (including both latency sensitive and non-latency sensitive Users) take only 1 or 2 Dedicated Cores at no additional cost. The Exchange believes the proposed ascending fee structure is also reasonable, equitable and not unfairly discriminatory as it is designed so that firms that use a higher allotment of the Exchange's finite number of Dedicated Cores pay higher rates, rather than placing that burden on market participants that have more modest needs who will have the

¹³ *Id.*

¹⁴ 15 U.S.C. 78f(b)(4).

flexibility of obtaining Dedicated Cores at lower price points in the lower tiers. As such, the proposed fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the ascending fee structure reflects the (finite) resources consumed by the various needs of market participants—that is, the lowest Dedicated Core consuming Users pay the least, and highest Dedicated Core consuming Users pay the most. Other exchanges similarly assess higher fees to those that consume more Exchange resources.¹⁵ Moreover, those consuming more Dedicated Cores do so if they find a benefit in having higher quantities of Dedicated Cores based on their respective business needs. The proposed tier structure is also designed to encourage firms to manage their needs in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an additional number of Dedicated Cores. Moreover, as discussed above and in more detail below, the Exchange cannot currently offer an unlimited number of Dedicated Cores due in part to physical space constraints in the third-party data center. The Exchange believes the proposed ascending fee structure is therefore another appropriate means, in conjunction with an established cap, to manage this finite resource and ensure the resource is apportioned more fairly.

The Exchange believes it is reasonable to limit the number of Dedicated Cores Users can purchase because the Exchange has a finite amount of space in its third-party data centers to accommodate CPU cores, including Dedicated Cores. The Exchange must also take into account timing and cost considerations in procuring additional Dedicated Cores and related hardware such as servers, switches, optics and cables, as well as the readiness of the Exchange's data center to accommodate additional Dedicated Cores in the Exchange's respective Order Handler Cabinets.¹⁶ Moreover, procuring data center space has grown to be more challenging than it was five years ago with the increased demand for data center space. For example, the U.S. colocation data center market has doubled in size in just four years. In addition to the Exchange's rollout of Dedicated Cores, the Exchange is mindful of its other business areas and

the need to continue to be mindful of its existing, external restraints in procuring additional space in this area. The Exchange has, and will continue to, monitor market participant demand and space availability and endeavor to adjust the limit if and when the Exchange is able to acquire additional space and power within the third-party data centers and/or CPU Cores to accommodate additional Dedicated Cores.¹⁷ The Exchange monitors its capacity and data center space and thus is in the best place to determine these limits and modify them as appropriate in response to changes to this capacity and space, as well as market demand. For example, the Exchange's affiliate Cboe EDGA Exchange, Inc. has increased the prescribed maximum limit three times since the launch of Dedicated Cores on its exchange on February 26, 2024 as a result of evaluating the demand relative to Dedicated Cores availability.¹⁸ The proposed increased limits continue to apply uniformly to similarly situated market participants (*i.e.*, all Members are subject to the same limit and all Sponsored Participants are subject to the same limit, respectively). The Exchange believes it's not unfairly discriminatory to provide for different limits for different types of Users. For example, the Exchange believes it's not unfairly discriminatory to provide for an initial lower limit to be allocated for Sponsored Participants because unlike Members, Sponsored Participants are able to access the Exchange without paying a Membership Fee. Members also have more regulatory obligations and risk that Sponsored Participants do not. For example, while Sponsored Participants must agree to comply with the Rules of the Exchange, it is the Sponsoring Member of that Sponsored Participant that remains ultimately responsible for all orders entered on or through the Exchange by that Sponsored Participant. The industry also has a history of applying fees differently to Members as compared to Sponsored Participants.¹⁹ Lastly, the Exchange

believes its proposed maximum limits, and distinction between Members and Sponsored Users, is another appropriate means to help the Exchange manage its allotment of Dedicated Cores and better ensure this finite resource is apportioned fairly.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary in furtherance of the purposes of the Act because the proposed tiered fee structure will apply equally to all similarly situated Users that choose to use Dedicated Cores. As discussed above, Dedicated Cores are optional and Users may choose to utilize Dedicated Cores, or not, based on their views of the additional benefits and added value provided by utilizing a Dedicated Core. The Exchange believes the proposed fees will be assessed proportionately to the potential value or benefit received by Users with a greater number of Dedicated Cores and notes that Users may determine at any time to cease using Dedicated Cores. As discussed, Users can also continue to access the Exchange through shared CPU Cores at no additional cost. Finally, all Users will be entitled to two Dedicated Cores at no additional cost.

Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market, including competition for exchange memberships. Market Participants have numerous alternative venues that they may participate on, including 15 other equities exchanges, as well as off-exchange venues, where competitive products are available for trading. Indeed, participants can readily choose to submit their order flow to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system "has been remarkably successful in promoting market competition in its broader forms that are most important to

¹⁷ The Exchange does not expect any Users that take Dedicated Cores to be at or near the maximum limits and the average number of Dedicated Cores used for the Exchange is 17.

¹⁹ See *e.g.*, Securities Exchange Act Release No. 68342 (December 3, 2012), 77 FR 73096 (December 7, 2012) (SR-CBOE-2012-114) and Securities Exchange Act Release No. 66082 (January 3, 2012), 77 FR 1101 (January 9, 2012) (SR-C2-2011-041).

¹⁵ See *e.g.*, Cboe U.S. Options Fee Schedule, BZX Options, Options Logical Port Fees, Ports with Bulk Quoting Capabilities.

¹⁶ The Exchange notes that it cannot currently convert shared CPU cores into Dedicated Cores.

investors and listed companies.”²⁰ The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: “[n]o one disputes that competition for order flow is ‘fierce.’ . . . As the SEC explained, ‘[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution’; [and] ‘no exchange can afford to take its market share percentages for granted’ because ‘no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers’. . . .”²¹ Accordingly, the Exchange does not believe its proposed change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²² and paragraph (f) of Rule 19b-4²³ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeEDGX-2024-080 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeEDGX-2024-080. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission’s Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeEDGX-2024-080 and should be submitted on or before January 2, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101823; File No. SR-CboeEDGA-2024-048]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule Regarding Dedicated Cores

December 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 26, 2024, Cboe EDGA Exchange, Inc. (the “Exchange” or “EDGA”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (the “Exchange” or “EDGA Equities”) proposes to amend its Fees Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/equities/regulation/rule_filings/edga/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

²⁰ See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

² 17 CFR 240.19b-4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to adopt fees for Dedicated Cores.³

By way of background, the Exchange recently began to allow Users⁴ to assign a Single Binary Order Entry ("BOE") logical order entry port⁵ to a single dedicated Central Processing Unit (CPU Core) ("Dedicated Core"). Historically, CPU Cores had been shared by logical order entry ports (*i.e.*, multiple logical ports from multiple firms may connect to a single CPU Core). Use of Dedicated Cores however, can provide reduced latency, enhanced throughput, and improved performance since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core instead of sharing that power with other firms. This offering is completely voluntary and is available to all Users that wish to purchase Dedicated Cores. Users may utilize BOE logical order entry ports on shared CPU Cores, either in lieu of, or in addition to, their use of Dedicated Core(s). As such, Users are able to operate across a mix of shared and dedicated CPU Cores which the Exchange believes provides additional risk and capacity management. Further, Dedicated Cores are not required nor necessary to participate on the Exchange

and as such Users may opt not to use Dedicated Cores at all.

The Exchange proposes to assess the following monthly fees for Users that wish to use Dedicated Cores and adopt a maximum limit. First, the Exchange proposes to provide up to two Dedicated Cores to all Users who wish to use Dedicated Cores, at no additional cost. For the use of more than two Dedicated Cores, the Exchange proposes to assess the following fees: \$650 per Dedicated Core for 3–10 Dedicated Cores; \$850 per Dedicated Core for 11–15 Dedicated Cores; and \$1,050 per Dedicated Core for 16 or more Dedicated Cores. The proposed fees are progressive and the Exchange proposes to include the following example in the Fees Schedule to provide clarity as to how the fees will be applied. Particularly, the Exchange will provide the following example: if a User were to purchase 11 Dedicated Cores, it will be charged a total of \$6,050 per month ($\$0 * 2 + \$650 * 8 + \$850 * 1$). The Exchange also proposes to make clear in the Fees Schedule that the monthly fees are assessed and applied in their entirety and are not prorated. The Exchange notes the current standard fees assessed for BOE Logical Ports, whether used with Dedicated or shared CPU cores, will remain applicable and unchanged.⁶

Since the Exchange currently has a finite amount of physical space in its data centers in which its servers (and therefore corresponding CPU Cores) are located, the Exchange also proposes to prescribe a maximum limit on the number of Dedicated Cores that Users may purchase each month. The purpose of establishing these limits is to manage the allotment of Dedicated Cores in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an unlimited number of Dedicated Cores. The Exchange previously established a limit for Members of a maximum number of 60 Dedicated Cores and Sponsoring Members a limit of a maximum number of 25 Dedicated Cores for each of their Sponsored Access relationships.⁷ The Exchange has since been able to procure additional servers with CPU Cores and also has a better understanding of User demand relative to its available space and available Dedicated Cores since the initial launch of Dedicated Cores. After

seeing increased User demand, the Exchange proposed to increase that cap and provided that Members will be limited to a maximum number of 80 Dedicated Cores and Sponsoring Members will be limited to a maximum number of 35 Dedicated Cores for each of their Sponsored Access relationships.⁸ The Exchange noted at that time that it would continue monitoring Dedicated Core interest by all Users and allotment availability with the goal of increasing these limits to meet Users' needs if and when the demand is there and/or the Exchange is able to accommodate additional Dedicated Cores. Since then, the Exchange has determined that it is able to accommodate an increased cap relative to current demand. As such, the Exchange proposes to increase the cap to 120 Dedicated Cores for Members, effective December 1, 2024.⁹ Sponsoring Members will continue to be limited to a maximum of 35 Dedicated Cores for each of their Sponsored Access relationships.¹⁰

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹¹ Specifically, the Exchange believes the proposed rule change is consistent with the Section

⁸ See Securities Exchange Act Release No. 101304 (October 10, 2024), 89 FR 83748 (October 17, 2024) (SR-CboeEDGA-2024-039).

⁹ The prescribed maximum quantity of Dedicated Cores for Members applies regardless of whether that Member purchases the Dedicated Cores directly from the Exchange and/or through a Service Bureau. In a Service Bureau relationship, a customer allows its MPID to be used on the ports of a technology provider, or Service Bureau. One MPID may be allowed on several different Service Bureaus.

¹⁰ The fee tier(s) applicable to Sponsoring Members are determined on a per Sponsored Access relationship basis and not on the combined total of Dedicated Cores across Sponsored Users. For example, under the proposed changes, a Sponsoring Member that has three Sponsored Access relationships is entitled to a total of 105 Dedicated Cores for those 3 Sponsored Access relationships but would be assessed fees separately based on the 35 Dedicated Cores for each Sponsored User (instead of combined total of 105 Dedicated Cores). For example, a Sponsoring Member with 3 Sponsored Access relationships would pay \$30,450 per month if each Sponsored Access relationship purchased the maximum 35 Dedicated Cores. More specifically, the Sponsoring Member would be provided 2 Dedicated Cores at no additional cost for each Sponsored User under Tier 1 (total of 6 Dedicated Cores at no additional cost) and provided an additional 8 Dedicated Cores at \$650 each for each Sponsored User, 5 Dedicated Cores at \$850 each for each Sponsored User and 20 Dedicated Cores at \$1,050 each for each Sponsored User (combined total of 99 additional Dedicated Cores).

¹¹ 15 U.S.C. 78f(b).

³ The Exchange initially introduced Dedicated Cores and corresponding pricing on March 1, 2024 (SR-CboeEDGA-2024-008). On March 20, 2024, the Exchange refiled the proposed fees (SR-CboeEDGA-2024-009). The Exchange amended the Dedicated Cores fees on April 1, 2024 (SR-CboeEDGA-2024-012). On April 12, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGA-2024-014. On May 13, 2024, the Exchange withdrew SR-CboeEDGA-2024-009. On June 3, 2024, the Exchange also withdrew SR-CboeEDGA-014 and SR-CboeEDGA-2024-020. On August 1, the Exchange withdrew that filing and submitted SR-CboeEDGA-2024-032. On business date September 30, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGA-2024-039. On November 26, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ A User may be either a Member or Sponsored Participant. The term "Member" shall mean any registered broker or dealer that has been admitted to membership in the Exchange, limited liability company or other organization which is a registered broker or dealer pursuant to Section 15 of the Act, and which has been approved by the Exchange. A Sponsored Participant may be a Member or non-Member of the Exchange whose direct electronic access to the Exchange is authorized by a Sponsoring Member subject to certain conditions. See Exchange Rule 11.3.

⁵ Users may currently connect to the Exchange using a logical port available through an application programming interface ("API"), such as the Binary Order Entry ("BOE") protocol. A BOE logical order entry port is used for order entry.

⁶ The Exchange currently assesses \$550 per port per month. Port fees will also continue to be assessed on the first two Dedicated Cores that Users receive at no additional cost. See Cboe EDGA Equities Fee Schedule.

⁷ See Securities Exchange Act Release No. 100300 (June 10, 2024), 89 FR 50653 (June 14, 2024) (SR-CboeEDGA-2024-020).

6(b)(5)¹² requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹³ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁴ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

The Exchange believes the proposal is reasonable because the Exchange is offering any User who wishes to utilize Dedicated Cores up to two Dedicated Cores at no additional cost. For example, of the Users that currently maintain Dedicated Cores, 32% maintain only 1 or 2 Dedicated Cores and therefore pay no additional fees. The Exchange believes the proposed fees are reasonable because Dedicated Cores provide a valuable service in that it can provide reduced latency, enhanced throughput, and improved performance compared to use of a shared CPU Core since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core. The Exchange also emphasizes however, that the use of Dedicated Cores is not necessary for trading and as noted above, is entirely optional. Users can also continue to access the Exchange through shared CPU Cores at no additional cost. Indeed, only 21% of the Exchange's Members currently use Dedicated Cores and as noted above, of those 21%, 32% take only 1 or 2 Dedicated Cores at no additional cost. Depending on a firm's specific business needs, the proposal enables Users to choose to use Dedicated Cores in lieu of, or in addition to, shared CPU Cores (or as emphasized, not use Dedicated Cores at all). If a User finds little benefit in having Dedicated Cores based on its business model and trading strategies,

or determines Dedicated Cores are not cost-efficient for its needs or does not provide sufficient value to the firm, such User may continue its use of the shared CPU Cores, unchanged. The Exchange also has no plans to eliminate shared CPU Cores nor to require Users to purchase Dedicated Cores.

The Exchange has seen general interest in Dedicated Cores from a variety of market participants, with varying size and business models. Such market participants include proprietary trading firms (who tend to be more latency sensitive), as well as sell-side market participants and buy-side market participants (who tend to be less latency sensitive). For background, proprietary trading firms utilize their own capital to trade without taking outside money from clients. Due to the nature of their respective businesses, the Exchange has classified proprietary trading firms as latency sensitive, and other groups, such as buy-side hedge funds, sell-side banks and sell-side non-banks (such as agency brokers) as non-latency sensitive. Proprietary trading firms' strategies may range from, marketing making, to relative value trading and arbitrage—these all rely on profiting from general market activity and, generally, requires faster entry and exit into trades and positions making proprietary trading firms more latency sensitive than other market segments. Buy-side hedge funds, banks and agency brokers are not as latency sensitive as strategy for hedge funds is based on overall long-term positioning in the market and banks and agency brokers may profit from commissions of customer order flow; both are generally strategies that are not reliant on speed to the same extent proprietary trading firms are. Further, Members have various reasons for obtaining Dedicated Cores. Some Members for example, may be seeking to further reduce latency, whereas others may use Dedicated Cores as a general risk mitigation by siloing their respective activity. Of further note, only 47% of Members that are propriety trading firms (who again, generally tend to be more latency sensitive) utilize Dedicated Cores, and of that 47%, 33% are only utilizing the 1 to 2 free Dedicated Cores available to all Users. As mentioned above, some non-latency sensitive firms have chosen to also adopt Dedicated Cores. 15% of Members that are not latency sensitive utilize Dedicated Cores, and of that 15%, 33% are only utilizing the 1 to 2 free Dedicated Cores available to all Users.

The lack of universal, or even widespread, adoption by all such users therefore demonstrates that purchasing Dedicated Cores is not effectively a

requirement to compete for any one type of market participant, including latency sensitive market participants. Instead, Dedicated Cores are an optional and voluntary connectivity offering, which market participants are free to choose whether or not to utilize based on whether they meet their unique business needs. Moreover, the Exchange has received overwhelming positive feedback and support for Dedicated Cores, with some Members even noting that they have moved more of their order flow to the Exchange and its affiliated equities exchanges (the "Equities Exchanges") as they have noticed both better fills and greater consistency of order execution at the Equities Exchanges. This demonstrates that despite any incurred costs for Members that choose to purchase Dedicated Cores, it is ultimately a net win for them as they benefit from better execution. The Exchange believes it also demonstrates that Members find the proposed fees to be both reasonable and have benefited from purchasing or, at alternatively benefiting from the proposed one or two free Dedicated Cores available at no additional cost. The Exchange believes this is shown by both the level of demand for Dedicated Cores and the feedback from market participants, including as described above. The Exchange also believes it's notable that no negative comment letters in connection with the proposed pricing have been received since the Exchange first filed proposed fees for Dedicated Cores back on March 1, 2024.

Additionally, as noted earlier, Members can (and many have) decide that utilizing even a free Dedicated Core is not needed for their business. Ultimately, this is a business decision that each Member must make and is best suited to determine and will ultimately depend on the priorities and strategies of that Member's respective business needs.

The Exchange also believes that the proposed Dedicated Core fees are equitable and not unfairly discriminatory because they continue to be assessed uniformly to similarly situated users in that all Users who choose to purchase Dedicated Cores will be subject to the same proposed tiered fee schedule. Moreover, all Users are entitled to up to 2 Dedicated Cores at no additional cost and as previously discussed, 32% of all Users that take Dedicated Cores (including both latency sensitive and non-latency sensitive Users) take only 1 or 2 Dedicated Cores at no additional cost. The Exchange believes the proposed ascending fee structure is also reasonable, equitable

¹² 15 U.S.C. 78f(b)(5).

¹³ *Id.*

¹⁴ 15 U.S.C. 78f(b)(4).

and not unfairly discriminatory as it is designed so that firms that use a higher allotment of the Exchange's finite number of Dedicated Cores pay higher rates, rather than placing that burden on market participants that have more modest needs who will have the flexibility of obtaining Dedicated Cores at lower price points in the lower tiers. As such, the proposed fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the ascending fee structure reflects the (finite) resources consumed by the various needs of market participants—that is, the lowest Dedicated Core consuming Users pay the least, and highest Dedicated Core consuming Users pay the most. Other exchanges similarly assess higher fees to those that consume more Exchange resources.¹⁵ Moreover, those consuming more Dedicated Cores do so if they find a benefit in having higher quantities of Dedicated Cores based on their respective business needs. The proposed tier structure is also designed to encourage firms to manage their needs in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an additional number of Dedicated Cores. Moreover, as discussed above and in more detail below, the Exchange cannot currently offer an unlimited number of Dedicated Cores due in part to physical space constraints in the third-party data center. The Exchange believes the proposed ascending fee structure is therefore another appropriate means, in conjunction with an established cap, to manage this finite resource and ensure the resource is apportioned more fairly.

The Exchange believes it is reasonable to limit the number of Dedicated Cores Users can purchase because the Exchange has a finite amount of space in its third-party data centers to accommodate CPU cores, including Dedicated Cores. The Exchange must also take into account timing and cost considerations in procuring additional Dedicated Cores and related hardware such as servers, switches, optics and cables, as well as the readiness of the Exchange's data center to accommodate additional Dedicated Cores in the Exchange's respective Order Handler Cabinets.¹⁶ Moreover, procuring data center space has grown to be more challenging than it was five years ago

with the increased demand for data center space. For example, the U.S. colocation data center market has doubled in size in just four years. In addition to the Exchange's rollout of Dedicated Cores, the Exchange is mindful of its other business areas and the need to continue to be mindful of its existing, external restraints in procuring additional space in this area. The Exchange has, and will continue to, monitor market participant demand and space availability and endeavor to adjust the limit if and when the Exchange is able to acquire additional space and power within the third-party data centers and/or additional CPU Cores to accommodate additional Dedicated Cores.¹⁷ The Exchange monitors its capacity and data center space and thus is in the best place to determine these limits and modify them as appropriate in response to changes to this capacity and space, as well as market demand. Indeed, since the launch of Dedicated Cores on February 26, 2024, the Exchange has already increased the prescribed maximum limit three times not including the increase proposed herein, as a result of evaluating the demand relative to Dedicated Cores availability and procuring additional physical space and CPU Cores.¹⁸ The proposed increased limits continue to apply uniformly to similarly situated market participants (*i.e.*, all Members are subject to the same limit and all Sponsored Participants are subject to the same limit, respectively). The Exchange believes it's not unfairly discriminatory to provide for different limits for different types of Users. For example, the Exchange believes it's not unfairly discriminatory to provide for an initial lower limit to be allocated for Sponsored Participants because unlike Members, Sponsored Participants are able to access the Exchange without paying a Membership Fee. Members also have more regulatory obligations and risk that Sponsored Participants do not. For example, while Sponsored Participants must agree to comply with the Rules of the Exchange, it is the Sponsoring Member of that Sponsored Participant that remains ultimately responsible for all orders entered on or through the Exchange by that Sponsored

Participant. The industry also has a history of applying fees differently to Members as compared to Sponsored Participants.¹⁹ Lastly, the Exchange believes its proposed maximum limits, and distinction between Members and Sponsored Users, is another appropriate means to help the Exchange manage its allotment of Dedicated Cores and better ensure this finite resource is apportioned fairly.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary in furtherance of the purposes of the Act because the proposed tiered fee structure will apply equally to all similarly situated Users that choose to use Dedicated Cores. As discussed above, Dedicated Cores are optional and Users may choose to utilize Dedicated Cores, or not, based on their views of the additional benefits and added value provided by utilizing a Dedicated Core. The Exchange believes the proposed fee will be assessed proportionately to the potential value or benefit received by Users with a greater number of Dedicated Cores and notes that Users may determine at any time to cease using Dedicated Cores. As discussed, Users can also continue to access the Exchange through shared CPU Cores at no additional cost. Finally, all Users will be entitled to two Dedicated Cores at no additional cost.

Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market, including competition for exchange memberships. Market Participants have numerous alternative venues that they may participate on, including 15 other equities exchanges, as well as off-exchange venues, where competitive products are available for trading. Indeed, participants can readily choose to submit their order flow to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the

¹⁷ The Exchange does not expect any Users that take Dedicated Cores to be at or near the maximum limits and the average number of Dedicated Cores used for the Exchange is 11.

¹⁸ See Securities Exchange Act Release No. 99983 (April 17, 2024), 89 FR 30418 (April 23, 2024) (SR-CboeEDGA-2024-014); Securities Exchange Act Release No. 100300 (June 10, 2024), 89 FR 50653 (June 14, 2024) (SR-CboeEDGA-2024-020) and Securities Exchange Act Release No. 100736 (August 15, 2024), 89 FR 67696 (August 21, 2024) (SR-CboeEDGA-2024-032).

¹⁵ See *e.g.*, Cboe U.S. Options Fees Schedule, BZX Options, Options Logical Port Fees, Ports with Bulk Quoting Capabilities.

¹⁶ The Exchange notes that it cannot currently convert shared CPU cores into Dedicated Cores.

¹⁹ See *e.g.*, Securities Exchange Act Release No. 68342 (December 3, 2012), 77 FR 73096 (December 7, 2012) (SR-CBOE-2012-114) and Securities Exchange Act Release No. 66082 (January 3, 2012), 77 FR 1101 (January 9, 2012) (SR-C2-2011-041).

Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”²⁰ The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: “[n]o one disputes that competition for order flow is ‘fierce.’ . . . As the SEC explained, ‘[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution’; [and] ‘no exchange can afford to take its market share percentages for granted’ because ‘no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers’”²¹ Accordingly, the Exchange does not believe its proposed change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²² and paragraph (f) of Rule 19b-4²³ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

²⁰ See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

²¹ *NetCoalition v. SEC*, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca–2006–21)).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR–CboeEDGA–2024–048 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeEDGA–2024–048. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission’s Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeEDGA–2024–048 and should be submitted on or before December 31, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–659, OMB Control No. 3235–0723]

Submission for OMB Review; Comment Request; Extension: Form 1–Z

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (“Commission”) has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Form 1–Z (17 CFR 239.94) is used to report terminated or completed offerings or to suspend the duty to file ongoing reports under Regulation A, an exemption from registration under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*). The purpose of the Form 1–Z is to collect empirical data for the Commission on offerings conducted under Regulation A that have terminated or completed, to indicate to the Commission that issuers that have conducted Tier 2 offering are suspending their duty to file reports under Regulation A and to provide such information to the investing public. We estimate that approximately 51 issuers file Form 1–Z annually. We estimate that Form 1–Z takes approximately 1.5 hours to prepare. We estimate that 100% of the 1.5 hours per response is prepared by the company for a total annual burden of 77 hours (1.5 hours per response × 51 responses).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Public Comment Instructions: The 30-day public comment period for this information collection request opens on December 12, 2024 and closes at the end of the day on January 13, 2025. The public may view the full information

²⁴ 17 CFR 200.30–3(a)(12).

request and submit comments at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202412-3235-006 or email comments to MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov.

Dated: December 5, 2024.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101827; File No. SR-CboeBYX-2024-047]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule Regarding Dedicated Cores

December 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 4, 2024, Cboe BYX Exchange, Inc. (the “Exchange” or “BYX”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (the “Exchange” or “BYX Equities”) proposes to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/equities/regulation/rule_filings/BYX/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the

proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to adopt fees for Dedicated Cores.³

By way of background, the Exchange recently began to allow Users⁴ to assign a Single Binary Order Entry (“BOE”) logical order entry port⁵ to a single dedicated Central Processing Unit (CPU Core) (“Dedicated Core”). Historically, CPU Cores had been shared by logical order entry ports (*i.e.*, multiple logical ports from multiple firms may connect to a single CPU Core). Use of Dedicated Cores however, can provide reduced latency, enhanced throughput, and improved performance since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core instead of sharing that power with other firms. This offering is completely voluntary and is available to all Users that wish to purchase Dedicated Cores. Users may utilize BOE logical order entry ports on shared CPU Cores, either in lieu of, or in addition to, their use of Dedicated Core(s). As such, Users are able to operate across a mix of shared and dedicated CPU Cores which the

Exchange believes provides additional risk and capacity management. Further, Dedicated Cores are not required nor necessary to participate on the Exchange and as such Users may opt not to use Dedicated Cores at all.

The Exchange proposes to assess the following monthly fees for Users that wish to use Dedicated Cores and adopt a maximum limit. First, the Exchange proposes to provide up to two Dedicated Cores to all Users who wish to use Dedicated Cores, at no additional cost. For the use of more than two Dedicated Cores, the Exchange proposes to assess the following fees: \$650 per Dedicated Core for 3–10 Dedicated Cores; \$850 per Dedicated Core for 11–15 Dedicated Cores; and \$1,050 per Dedicated Core for 16 or more Dedicated Cores. The proposed fees are progressive and the Exchange proposes to include the following example in the Fees Schedule to provide clarity as to how the fees will be applied. Particularly, the Exchange will provide the following example: if a User were to purchase 11 Dedicated Cores, it will be charged a total of \$6,050 per month ($\$0 * 2 + \$650 * 8 + \$850 * 1$). The Exchange also proposes to make clear in the Fees Schedule that the monthly fees are assessed and applied in their entirety and are not prorated. The Exchange notes the current standard fees assessed for BOE Logical Ports, whether used with Dedicated or shared CPU cores, will remain applicable and unchanged.⁶

Since the Exchange currently has a finite amount of physical space in its data centers in which its servers (and therefore corresponding CPU Cores) are located, the Exchange also proposes to prescribe a maximum limit on the number of Dedicated Cores that Users may purchase each month. The purpose of establishing these limits is to manage the allotment of Dedicated Cores in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an unlimited number of Dedicated Cores. The Exchange previously established a limit for Members of a maximum number of 60 Dedicated Cores and Sponsoring Members a limit of a maximum number of 25 Dedicated Cores for each of their Sponsored Access relationships.⁷ The Exchange has since been able to procure additional servers with CPU Cores and

³ The Exchange initially adopted pricing for Dedicated Cores on May 6, 2024 (SR-CboeBYX-2024-014). On July 1, 2024, the Exchange withdrew that filing and submitted SR-CboeBYX-2024-024. On August 1, 2024, the Exchange withdrew that filing and submitted SR-CboeBYX-2024-028. On business date September 30, 2024, the Exchange withdrew that filing and submitted SR-CboeBYX-2024-036. On November 26, 2024, the Exchange withdrew that filing and submitted SR-CboeBYX-2024-043 and subsequently withdrew that filing and submitted SR-CboeBYX-2024-044. On November 27, 2024, the Exchange withdrew that filing and submitted SR-CboeBYX-2024-045. On December 4, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ A User may be either a Member or Sponsored Participant. The term “Member” shall mean any registered broker or dealer that has been admitted to membership in the Exchange, limited liability company or other organization which is a registered broker or dealer pursuant to Section 15 of the Act, and which has been approved by the Exchange. A Sponsored Participant may be a Member or non-Member of the Exchange whose direct electronic access to the Exchange is authorized by a Sponsoring Member subject to certain conditions. See Exchange Rule 11.3.

⁵ Users may currently connect to the Exchange using a logical port available through an application programming interface (“API”), such as the Binary Order Entry (“BOE”) protocol. A BOE logical order entry port is used for order entry.

⁶ The Exchange currently assesses \$550 per port per month. Port fees will also continue to be assessed on the first two Dedicated Cores that Users receive at no additional cost. See Cboe BYX Equities Fee Schedule.

⁷ See Securities Exchange Act Release No. 100476 (July 9, 2024), 89 FR 57482 (July 15, 2024) (SR-CboeBYX-2024-024).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

also has a better understanding of User demand relative to its available space since the initial launch of Dedicated Cores. After seeing increased User demand, the Exchange proposed to increase that cap and provided that Members will be limited to a maximum number of 80 Dedicated Cores and Sponsoring Members will be limited to a maximum number of 35 Dedicated Cores for each of their Sponsored Access relationships.⁸ The Exchange noted at that time that it would continue monitoring Dedicated Core interest by all Users and allotment availability with the goal of increasing these limits to meet Users' needs if and when the demand is there and/or the Exchange is able to accommodate additional Dedicated Cores. Since then, the Exchange has determined that it is able to accommodate an increased cap relative to current demand. As such, the Exchange proposes to increase the cap to 120 Dedicated Cores for Members, effective December 1, 2024.⁹ Sponsoring Members will continue to be limited to a maximum of 35 Dedicated Cores for each of their Sponsored Access relationships.¹⁰

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of

Section 6(b) of the Act.¹¹ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹² requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹³ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁴ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

The Exchange believes the proposal is reasonable because the Exchange is offering any User who wishes to utilize Dedicated Cores up to two Dedicated Cores at no additional cost. For example, of the Users that currently maintain Dedicated Cores, 32% maintain only 1 or 2 Dedicated Cores and therefore pay no additional fees. The Exchange believes the proposed fees are reasonable because Dedicated Cores provide a valuable service in that it can provide reduced latency, enhanced throughput, and improved performance compared to use of a shared CPU Core since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core. The Exchange also emphasizes however, that the use of Dedicated Cores is not necessary for trading and as noted above, is entirely optional. Users can also continue to access the Exchange through shared CPU Cores at no additional cost. Indeed, only 19% of the Exchange's Members currently use Dedicated Cores and as noted above, of those who do, only 32% take only 1 or 2 Dedicated Cores at no additional cost. Depending on a firm's specific business needs, the proposal enables Users to choose to use Dedicated Cores in lieu of, or in addition to, shared CPU Cores (or

as emphasized, not use Dedicated Cores at all). If a User finds little benefit in having Dedicated Cores based on its business model and trading strategies, or determines Dedicated Cores are not cost-efficient for its needs or does not provide sufficient value to the firm, such User may continue its use of the shared CPU Cores, unchanged. The Exchange also has no plans to eliminate shared CPU Cores nor to require Users to purchase Dedicated Cores.

The Exchange has seen general interest in Dedicated Cores from a variety of market participants, with varying size and business models. Such market participants include proprietary trading firms (who tend to be more latency sensitive), as well as sell-side market participants and buy-side market participants (who tend to be less latency sensitive). For background, proprietary trading firms utilize their own capital to trade without taking outside money from clients. Due to the nature of their respective businesses, the Exchange has classified proprietary trading firms as latency sensitive, and other groups, such as buy-side hedge funds, sell-side banks and sell-side non-banks (such as agency brokers) as non-latency sensitive. Proprietary trading firms' strategies may range from, marketing making, to relative value trading and arbitrage—these all rely on profiting from general market activity and, generally, requires faster entry and exit into trades and positions making proprietary trading firms more latency sensitive than other market segments. Buy-side hedge funds, banks and agency brokers are not as latency sensitive as strategy for hedge funds is based on overall long-term positioning in the market and banks and agency brokers may profit from commissions of customer order flow; both are generally strategies that are not reliant on speed to the same extent proprietary trading firms are. Further, Members have various reasons for obtaining Dedicated Cores. Some Members for example, may be seeking to further reduce latency, whereas others may use Dedicated Cores as a general risk mitigation by siloing their respective activity. Of further note, only 44% of Members that are propriety trading firms (who again, generally tend to be more latency sensitive) utilize Dedicated Cores, and of that 44%, 25% are only utilizing the 1 to 2 free Dedicated Cores available to all Users. As mentioned above, some non-latency sensitive firms have chosen to also adopt Dedicated Cores. 15% of Members that are not latency sensitive utilize Dedicated Cores, and of that 15%, 38%

⁸ See Securities Exchange Act Release No. 101303 (October 10, 2024), 89 FR 83740 (October 17, 2024) (SR-ChoeBYX-2024-036).

⁹ The prescribed maximum quantity of Dedicated Cores for Members applies regardless of whether that Member purchases the Dedicated Cores directly from the Exchange and/or through a Service Bureau. In a Service Bureau relationship, a customer allows its MPID to be used on the ports of a technology provider, or Service Bureau. One MPID may be allowed on several different Service Bureaus.

¹⁰ The fee tier(s) applicable to Sponsoring Members are determined on a per Sponsored Access relationship basis and not on the combined total of Dedicated Cores across Sponsored Users. For example, under the proposed changes, a Sponsoring Member that has three Sponsored Access relationships is entitled to a total of 105 Dedicated Cores for those 3 Sponsored Access relationships but would be assessed fees separately based on the 35 Dedicated Cores for each Sponsored User (instead of combined total of 105 Dedicated Cores). For example, a Sponsoring Member with 3 Sponsored Access relationships would pay \$30,450 per month if each Sponsored Access relationship purchased the maximum 35 Dedicated Cores. More specifically, the Sponsoring Member would be provided 2 Dedicated Cores at no additional cost for each Sponsored User under Tier 1 (total of 6 Dedicated Cores at no additional cost) and provided an additional 8 Dedicated Cores at \$650 each for each Sponsored User, 5 Dedicated Cores at \$850 each for each Sponsored User and 20 Dedicated Cores at \$1,050 each for each Sponsored User (combined total of 99 additional Dedicated Cores).

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(5).

¹³ *Id.*

¹⁴ 15 U.S.C. 78f(b)(4).

are only utilizing the 1 to 2 free Dedicated Cores available to all Users.

The lack of universal, or even widespread, adoption by all such users therefore demonstrates that purchasing Dedicated Cores is not effectively a requirement to compete for any one type of market participant, including latency sensitive market participants. Instead, Dedicated Cores are an optional and voluntary connectivity offering, which market participants are free to choose whether or not to utilize based on whether they meet their unique business needs. Moreover, the Exchange has received overwhelming positive feedback and support for Dedicated Cores, with some Members even noting that they have moved more of their order flow to the Exchange and its affiliated equities exchanges (the "Equities Exchanges") as they have noticed both better fills and greater consistency of order execution at the Equities Exchanges. This demonstrates that despite any incurred costs for Members that choose to purchase Dedicated Cores, it is ultimately a net win for them as they benefit from better execution. The Exchange believes it also demonstrates that Members find the proposed fees to be both reasonable and have benefited from purchasing or, at alternatively benefiting from the proposed one or two free Dedicated Cores available at no additional cost. The Exchange believes this is shown by both the level of demand for Dedicated Cores and the feedback from market participants, including as described above. The Exchange also believes it's notable that no negative comment letters in connection with the proposed pricing have been received since the Exchange first filed proposed fees for Dedicated Cores back on May 6, 2024. Additionally, as noted earlier, Members can (and many have) decide that utilizing even a free Dedicated Core is not needed for their business. Ultimately, this is a business decision that each Member must make and is best suited to determine and will ultimately depend on the priorities and strategies of that Member's respective business needs.

The Exchange also believes that the proposed Dedicated Core fees are equitable and not unfairly discriminatory because they continue to be assessed uniformly to similarly situated users in that all Users who choose to purchase Dedicated Cores will be subject to the same proposed tiered fee schedule. Moreover, all Users are entitled to up to 2 Dedicated Cores at no additional cost and as previously discussed, 32% of all Users that take Dedicated Cores (including both latency

sensitive and non-latency sensitive Users) take only 1 or 2 Dedicated Cores at no additional cost. The Exchange believes the proposed ascending fee structure is also reasonable, equitable and not unfairly discriminatory as it is designed so that firms that use a higher allotment of the Exchange's finite number of Dedicated Cores pay higher rates, rather than placing that burden on market participants that have more modest needs who will have the flexibility of obtaining Dedicated Cores at lower price points in the lower tiers. As such, the proposed fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the ascending fee structure reflects the (finite) resources consumed by the various needs of market participants—that is, the lowest Dedicated Core consuming Users pay the least, and highest Dedicated Core consuming Users pay the most. Other exchanges similarly assess higher fees to those that consume more Exchange resources.¹⁵ Moreover, those consuming more Dedicated Cores do so if they find a benefit in having higher quantities of Dedicated Cores based on their respective business needs. The proposed tier structure is also designed to encourage firms to manage their needs in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an additional number of Dedicated Cores. Moreover, as discussed above and in more detail below, the Exchange cannot currently offer an unlimited number of Dedicated Cores due in part to physical space constraints in the third-party data center. The Exchange believes the proposed ascending fee structure is therefore another appropriate means, in conjunction with an established cap, to manage this finite resource and ensure the resource is apportioned more fairly.

The Exchange believes it is reasonable to limit the number of Dedicated Cores Users can purchase because the Exchange has a finite amount of space in its third-party data centers to accommodate CPU cores, including Dedicated Cores. The Exchange must also take into account timing and cost considerations in procuring additional Dedicated Cores and related hardware such as servers, switches, optics and cables, as well as the readiness of the Exchange's data center to accommodate additional Dedicated Cores in the Exchange's respective Order Handler

Cabinets.¹⁶ Moreover, procuring data center space has grown to be more challenging than it was five years ago with the increased demand for data center space. For example, the U.S. colocation data center market has doubled in size in just four years. In addition to the Exchange's rollout of Dedicated Cores, the Exchange is mindful of its other business areas and the need to continue to be mindful of its existing, external restraints in procuring additional space in this area. The Exchange has, and will continue to, monitor market participant demand and space availability and endeavor to adjust the limit if and when the Exchange is able to acquire additional space and power within the third-party data centers and/or additional CPU Cores to accommodate additional Dedicated Cores.¹⁷ The Exchange monitors its capacity and data center space and thus is in the best place to determine these limits and modify them as appropriate in response to changes to this capacity and space, as well as market demand. Indeed, the Exchange has already increased the prescribed maximum since the launch of Dedicated Cores on May 6, 2024 as a result of evaluating the demand relative to Dedicated Cores availability and proposes to increase the prescribed maximum again due to the Exchange's continued ability to support current demand relative to current availability.¹⁸ As another example, the Exchange's affiliate Cboe EDGA Exchange, Inc. has increased the prescribed maximum limit three times since the launch of Dedicated Cores on its exchange on February 26, 2024 as a result of evaluating the demand relative to Dedicated Cores availability.¹⁹ The proposed increased limits continue to apply uniformly to similarly situated market participants (*i.e.*, all Members are subject to the same limit and all Sponsored Participants are subject to the same limit, respectively). The Exchange believes it's not unfairly discriminatory to provide for different limits for different types of Users. For

¹⁶ The Exchange notes that it cannot currently convert shared CPU cores into Dedicated Cores.

¹⁷ The Exchange does not expect any Users that take Dedicated Cores to be at or near the maximum limits and the average number of Dedicated Cores used for the Exchange is 10.

¹⁸ See Securities Exchange Act Release No. 100476 (July 9, 2024), 89 FR 57482 (July 15, 2024) (SR-CboeBYX-2024-024).

¹⁹ See Securities Exchange Act Release No. 99983 (April 17, 2024), 89 FR 30418 (April 23, 2024) (SR-CboeEDGA-2024-014) Securities Exchange Act Release No. 100300 (June 10, 2024), 89 FR 50653 (June 14, 2024) (SR-CboeEDGA-2024-020); and Securities Exchange Act Release No. 100736 (August 21, 2024), 89 FR 67696 (August 15, 2024) (SR-CboeEDGA-2024-032).

¹⁵ See *e.g.*, Cboe U.S. Options Fees Schedule, BZX Options, Options Logical Port Fees, Ports with Bulk Quoting Capabilities.

example, the Exchange believes it's not unfairly discriminatory to provide for an initial lower limit to be allocated for Sponsored Participants because unlike Members, Sponsored Participants are able to access the Exchange without paying a Membership Fee. Members also have more regulatory obligations and risk that Sponsored Participants do not. For example, while Sponsored Participants must agree to comply with the Rules of the Exchange, it is the Sponsoring Member of that Sponsored Participant that remains ultimately responsible for all orders entered on or through the Exchange by that Sponsored Participant. The industry also has a history of applying fees differently to Members as compared to Sponsored Participants.²⁰ Lastly, the Exchange believes its proposed maximum limits, and distinction between Members and Sponsored Users, is another appropriate means to help the Exchange manage its allotment of Dedicated Cores and better ensure this finite resource is apportioned fairly.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary in furtherance of the purposes of the Act because the proposed tiered fee structure will apply equally to all similarly situated Users that choose to use Dedicated Cores. As discussed above, Dedicated Cores are optional and Users may choose to utilize Dedicated Cores, or not, based on their views of the additional benefits and added value provided by utilizing a Dedicated Core. The Exchange believes the proposed fee will be assessed proportionately to the potential value or benefit received by Users with a greater number of Dedicated Cores and notes that Users may determine at any time to cease using Dedicated Cores. As discussed, Users can also continue to access the Exchange through shared CPU Cores at no additional cost. Finally, all Users will be entitled to two Dedicated Cores at no additional cost.

Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market, including competition for exchange memberships. Market Participants have

numerous alternative venues that they may participate on, including 15 other equities exchanges, as well as off-exchange venues, where competitive products are available for trading. Indeed, participants can readily choose to submit their order flow to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable.

Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system "has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies."²¹ The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: "[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers' . . .".²² Accordingly, the Exchange does not believe its proposed change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)

of the Act²³ and paragraph (f) of Rule 19b-4²⁴ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBYX-2024-047 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeBYX-2024-047. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also

²⁰ See e.g., Securities Exchange Act Release No. 68342 (December 3, 2012), 77 FR 73096 (December 7, 2012) (SR-CBOE-2012-114) and Securities Exchange Act Release No. 66082 (January 3, 2012), 77 FR 1101 (January 9, 2012) (SR-C2-2011-041).

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–620, OMB Control No. 3235–0675]

Submission for OMB Review; Comment Request; Extension: Rule 15Ga–2 and Form ABS–15G

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (“Commission”) has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Rule 15Ga–2 and Form ABS–15G (17 CFR 249.1400) is used for reports of information required under Rule 15Ga–1 and Rule 15Ga–2 (17 CFR 240.15Ga–1) (17 CFR 240.15Ga–2) of the Exchange Act of 1934 (“Exchange Act”). Exchange Act Rule 15Ga–1 requires asset-backed securitizers to provide disclosure regarding fulfilled an unfulfilled repurchase requests with respect to asset-backed securities. The purpose of the information collected on Form ABS–15G is to implement the disclosure requirements of Section 943 of the Dodd-Frank Wall Street Reform and Consumer Protection Act to provide information regarding the use of representations and warranties in the asset-backed securities markets.

Form ABS–15G is a collection of information required by Rules 15Ga–1

and 15Ga–2 under the Exchange Act. For just Rule 15Ga–1, Form ABS–15G takes approximately 27.2234 hours per response and is filed by approximately 1,142 respondents. We estimate that 75% of the 27.2234 hours per response (20.4176 hours) is prepared by the filer for a total annual reporting burden of 23,317 hours (20.4176 hours per response × 1,142 responses).

For just Rule 15Ga–2, Form ABS–15G takes approximately 2.1279 hours per response and is filed by approximately 864 respondents. We estimate that 100% of the 2.1279 hours per response (2.1279 hours) is prepared by the filer for a total annual reporting burden of 1,839 hours (2.1279 hours per response × 864 responses).

Rule 15Ga–1 and Rule 15Ga–2 combined filing on Form ABS–15G we estimate that approximately 2006 securitizers will file Form ABS–15G annually at estimated (16.7205 hours) burden hours per response. In addition, we estimate that 75% of the 16.7205 hours per response (12.5403 hours) is carried internally by the securitizers for a total annual reporting burden of 25,156 hours (12.5403 hours per response × 2006 responses).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Public Comment Instructions: The 30-day public comment period for this information collection request opens on December 12, 2024 and closes at the end of the day on January 13, 2025. The public may view the full information request and submit comments at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202411-3235-012 or email comments to MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov.

Dated: December 6, 2024.

Sherry R. Haywood,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101819; File No. SR–ICC–2024–011]

Self-Regulatory Organizations; ICE Clear Credit LLC; Order Granting Accelerated Approval of Proposed Rule Change Relating to the ICC Operational Risk Management Framework

December 5, 2024.

I. Introduction

On November 13, 2024, ICE Clear Credit LLC (“ICC”) filed with the Securities and Exchange Commission (the “Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”) ¹ and Rule 19b–4 thereunder,² a proposed rule change (hereafter, “Proposed Rule Change”) to revise the Operational Risk Management Framework (“ORMF”). The Proposed Rule Change was published for comment in the **Federal Register** on November 19, 2024.³ The Commission has not received comments regarding the Proposed Rule Change. For the reasons discussed below, the Commission is approving the Proposed Rule Change on an accelerated basis.

II. Description of the Proposed Rule Change

ICC is registered with the Commission as a clearing agency for the purpose of clearing Credit Default Swap (“CDS”) contracts.⁴ In its role as a CDS clearing agency, ICC faces operational risks stemming from the breakdown of systems and processes that that would impair ICC’s ability to complete settlements or ICC’s internal business operations. The ORMF outlines ICC’s risk assessment and oversight program, which aims to address such operational risks, including by reducing operational incidents, encouraging process and control improvement, bringing transparency to operational performance standard monitoring, and fulfilling regulatory obligations. The ORMF also explains how ICC vets and manages service agreements with providers covering various aspects of ICC’s operations. According to ICC, one of the purposes of the Proposed Rule Change

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ Self-Regulatory Organizations; ICE Clear Credit LLC; Notice of Filing of Proposed Rule Change Relating to the ICC Operational Risk Management Framework; Securities Exchange Act Release No. 34–101603 (Nov. 13, 2024), 89 FR 91443 (Nov. 19, 2024) (SR–ICC–2024–011) (“Notice”).

⁴ Capitalized terms not otherwise defined herein have the meanings assigned to them in ICC Rules and the ORMF, as applicable.

²⁵ 17 CFR 200.30–3(a)(12).

is to align the ORMF with the requirements of Rule 17Ad-25(i) under the Act,⁵ primarily by adding to the ORMF details about ICC's relationships with service providers.⁶ Further changes in the ORMF would be included to more clearly describe ICC's risk mitigation process and technology control functions, among other revisions.

A. Management of Risks From Service Providers for Core Services

The Proposed Rule Change would amend the ORMF primarily by adding new Section II.B., titled "Management of Risks from Relationships with Service Providers for Core Services," which would describe ICC's vetting and management processes regarding any service provider for critical services ("SPCS").⁷ The new section would require ICC's senior management to:

(1) Evaluate and document the risks related to an agreement with a SPCS, including under changes to circumstances and potential disruptions, and whether the risks can be managed in a manner consistent with the ORMF;

(2) Submit to the ICC Board of Managers ("Board") for review and approval any agreement that would establish a relationship with a SPCS, along with the above-mentioned risk evaluation;

(3) Be responsible for establishing the policies and procedures that govern relationships and manage risks related to such agreements with a SPCS (while the Board would be required to be responsible for reviewing and approving such policies and procedures); and

(4) Perform ongoing monitoring of the relationship, and report to the Board for its evaluation of any action taken by senior management to remedy significant deterioration in performance or address changing risks or material issues identified through such monitoring; or if the risks or issues cannot be remedied, to assess and document weaknesses or deficiencies in the relationship with the service provider for submission to the Board.

The Proposed Rule Change would introduce a two-pronged assessment

approach when identifying and managing ICC's relationships with a SPCS, differentiating between internal and external service providers.

Under the first prong, ICC would conduct an assessment of internal service providers. Currently, ICC engages only one internal service provider: ICC's parent company, Intercontinental Exchange, Inc. ("ICE").⁸ ICE is a SPCS because, pursuant to written service agreements, it provides core services to ICC that directly support the delivery of clearance and settlement functionality or other purposes material to ICC's business as a registered clearing agency. ICE provides business services such as staffing, finance, and accounting pursuant to a Master Services Agreement between ICC and ICE, and provides clearing and settlement-specific services to ICC pursuant to a Clearing Settlement Services Agreement ("CSSA"). The CSSA specifies that ICE provides clearing and settlement services pursuant to certain of ICE's "Key Policies."⁹ Each Key Policy sets forth its purpose and is applicable to all ICE and ICC employees impacted by such policy. Further, the CSSA provides for a governance structure (set forth in more detail in ICE's Technology Planning and Governance Policy) whereby the Key Policies may only be amended by ICE's Operational Oversight Committee ("OOC") which includes representatives of both ICE and ICC. The OOC acts as the forum to discuss changes and improvements to the services provided to ICC by ICE. Further, changes to any Key Policy may not take effect until they have been approved by the OOC and any material proposed changes to the Key Policies are subject to a veto by ICC.

Under the second prong, ICC would conduct an assessment of external service providers, utilizing ICC's External Service Provider Assessment process. This process would be outlined in Section II.C. of the ORMF and in ICE's Third Party Risk Management ("TPRM") program, which is applicable to ICC as a subsidiary of ICE. Further,

with respect to ICC's Financial Service Providers¹⁰ that are identified as SPCSs, ICC utilizes its Counterparty Monitoring Procedures. ICC's External Service Provider Assessment process is supplemental to ICE's TPRM program, which applies to external vendors and suppliers, service providers, and contractors/consultants of ICE and its subsidiaries, including ICC. The TPRM program establishes a comprehensive and structured approach for assessing, managing, monitoring, and governance of third-party risks at ICE and its subsidiaries, including ICC. It requires an assessment of operations and resiliency through, among other things, completion of initial on-boarding assessments of the third party's viability and capability to meet expected deliverables, business objectives, and compliance with contractual obligations, followed by ongoing monitoring.

The Proposed Rule Change would update vocabulary around and clarify the description of ICC's external service provider assessments in newly renumbered Section II.C of the ORMF. As proposed, this section would no longer refer to "critical vendors,"¹¹ but would instead use the term "external SPCS" to align the ORMF with Rule 17Ad-25 under the Exchange Act, which uses and defines the term "service provider for core services."¹² Currently, Section II.C provides that external service providers are reviewed and evaluated for re-approval based on ICC's current risk ranking system, which is based on "tiers." Under the Proposed Rule Change, Section II.C. would no longer describe the re-approval process for such external service providers with a "risk ranking" system based on "tiers" but would instead use a system of "risk ratings." Despite the terminology change, the basic review methodology would not. Under the Proposed Rule Change, ICC would still assign the risk rating based on a schedule of risk assessments divided into low, moderate, and high risks, that considers the risk direction for strategic, reputational, compliance, legal and operational risk

⁵ See generally Securities Exchange Act Release No. 98959 (Nov. 16, 2023), 88 FR 84454 (Dec. 5, 2023) (File No. S7-21-22) ("Clearing Agency Governance and Conflicts of Interest").

⁶ See Notice, 89 FR at 91443.

⁷ A service provider for core services means any person that, through a written services provider agreement for services provided to or on behalf of the registered clearing agency, on an ongoing basis, directly supports the delivery of clearance or settlement functionality or any other purposes material to the business of the registered clearing agency. 17 CFR 240.17Ad-25(a). ICC's ORMF has adopted the same terminology and meaning of SPCS as Rule 17Ad-25(a).

⁸ See Notice, 89 FR at 91444.

⁹ ICE's Key Policies include the following, which may be updated from time to time: 1. Technology Planning and Governance Policy; 2. Capacity Planning Policy; 3. Change Management Policy; 4. Corporate Business Continuity Policy; 5. Corporate Information Security Policy; 6. Corporate Information Technology Policy; 7. Corporate Physical Security Policy; 8. Disaster Recovery Policy; 9. Enterprise Risk Management Policy; 10. Incident Management Policy; 11. Information Technology Asset Management Policy; 12. Infrastructure Observability Policy; 13. Software Development Lifecycle Policy; 14. Third Party Risk Management Policy.

¹⁰ Financial service providers ("FSPs") are not covered by the TPRM program. FSPs, as defined in ICC's Counterparty Monitoring Procedures, are the entities to which ICC has actual or potential credit exposure, e.g., settlement banks, custodians, depositories, reverse repurchase agreement ("repo") counterparties, committed repo counterparties, and committed foreign exchange ("FX") counterparties.

¹¹ Currently the ORMF defines a "critical vendor" as any third party service which is deemed essential to complete ICC's core processes. Core processes means acceptance of new trades, management of positions, production of risk and banking reports, and the movement of funds.

¹² See 17 CFR 240.17Ad-25(a).

presented by the external service provider, in the same way that ICC currently assigns risk rankings.

Thus, when assessing an external SPCS, ICC would continue to analyze and manage risks posed by such external service providers, including strategic, reputational, compliance, legal, and operational risk, in the same manner as under the current ORMF. Similarly, ICC would use existing concepts when performing assessments of an external SPCS. As noted above, ICC is replacing the term “critical vendor” with the term “external SPCS.” ICC also is replacing the term “core processes” with the term “CDS core clearing services.” Currently, a critical vendor is any third party service provider which is deemed essential to complete ICC’s core processes, which include acceptance of new trades, management of positions, production of risk and banking reports, and the movement of funds. The definition of external SPCS would include external service providers for core services, including CDS core clearing services, which would continue to include acceptance of new trades, management of positions, production of risk and banking reports, and the movement of funds.

Similarly, risk assessments are and would continue to be completed as part of the initial onboarding process, as well as periodically. Section II.C. would clarify that ICC’s assessment of an external SPCS would be in addition to ICE’s TPRM program, which applies to any external vendor or supplier, service provider, and contractors and consultants utilized by ICE or its subsidiaries, including ICC. Although ICC’s Business Continuity Planning and Disaster Recovery programs Oversight Committee (“BDOC”) will continue to be the body performing these assessments, proposed Section II.C. would eliminate the current bullet point list of items that may be included in the risk assessments¹³ and replace it with the requirement to “evaluate and document the risks related to an agreement with the external SPCS, including under changes to

circumstances and potential disruptions, and whether the risks can be managed in a manner consistent with the ORMF,” thus mirroring the language found in Rule 17Ad–25(i)(1) under the Act.¹⁴ Although the BDOC will continue to review and recommend approval of the inventory of ICC external SPCSs and to assign risk ratings to the risk assessments in order to determine the frequency of ongoing risk assessment reviews, Section II.C. would be updated to state that the risk ratings will take into consideration ICC’s plan to complete core processing if the service is unavailable. Additionally, Section II.C. would state explicitly that the BDOC reviews and recommends that the ICC Compliance Committee (“Compliance Committee”) approve the inventory of ICC external SPCS.¹⁵

B. Further Changes to the ORMF

In addition to the above-described changes, which primarily address consistency with Rule 17Ad–25(i) under the Act,¹⁶ the Proposed Rule Change would:

- amend the ‘Introduction’ section of the ORMF to provide uniform abbreviations to existing defined terms, which ICC believes will enhance the clarity and readability of the ORMF;¹⁷
- amend terms within the ‘Operational Risk Lifecycle’ chart of Section I of the ORMF to ensure that it accurately reflects the description of the operational life cycle narrative and correct typographical errors; and
- revise Section II., ‘Operational Risk Focus Areas,’ to update ICC’s reference to certain functions performed by ICE, remove references to such functions being “outsourced,” and instead note that the functions are described in the ORMF and performed pursuant to services agreements between ICC and ICE.

The Proposed Rule Change would amend Section II.A., ‘Business Continuity Planning and Disaster Recovery,’ to more clearly describe the steps in the collaboration process with respect to the business impact analysis (“BIA”) process. The proposed changes would reorder and restate the steps for completing BIA surveys used in creating test plans. Currently, the ORMF states that ICC ensures that it can recover from

a wide-scale disruption and collaborates with each department to complete BIA surveys—specifically to ensure that each critical business unit:

- Defines the Mission Critical Tasks (“MCT”) to be performed;
- Creates test plans to ensure recovery staff are properly trained;
- Performs periodic tests to validate recovery staff’s ability to perform MCT; and
- Reports the results of testing to document successes, and detail corrective actions.

As proposed, the first two bullet points would be deleted and replaced with:

- Identifies ICC business processes, as well as the associated criticality of these business process, by performing the BIA; [and]
- Creates Business Continuity Plans (BCPs) for those processes identified in the BIA.

The third and fourth bullet points would remain the same, except the third bullet point would specify that the periodic tests would be those of BCPs and that, since the MCT acronym would no longer apply, a reference would be made to mission critical tests.¹⁸

The Proposed Rule Change also would revise Section II.F. of the ORMF (previously Section II.E.), ‘Technology Control Functions,’ specifically to more accurately reflect the ICC Technology Department’s responsibilities. Section II.F. would be updated to specify that the ICC Technology Department is responsible for end-to-end design, development, testing, deployment, maintenance and day-to-day operations of all enterprise software systems needed for ICC core functions. Currently, the ORMF describes the Technology Department’s responsibilities as risk analysis and oversight of systems operations, systems development/quality assurance and capacity/performance planning. The ORMF would be revised to state that ICC’s Technology Department is responsible for end-to-end design, development, testing, deployment, maintenance, and day-to-day operations of enterprise software systems needed for ICC core functions of CDS clearing. In addition, the Proposed Rule Change would update an outdated reference to ICC’s Credit Technology Delivery Method (“CTDM”), which is a separate policy from the ORMF. Currently the ORMF references the ICC Project Delivery Policy, which is the former title of the CTDM. Those references would be updated to refer to the CTDM instead. Similarly, in connection with a

¹³ Currently, the BDOC is responsible for conducting a service provider risk assessment for each critical vendor, which includes:

- Profiling critical vendor and services performed;
- Reviewing performance activity to date, if applicable;
- Validating or enhancing the contingency plan in the event that a critical vendor cannot perform as expected;
- Ensuring an ongoing oversight program of the critical vendor;
- Assessing the varying risks posed by the critical vendor.

¹⁴ 17 CFR 240.17Ad–25(i)(1); *see also* Notice, 89 at 91444.

¹⁵ The ICC Compliance Committee is an internal ICC committee that oversees and manages ICC’s compliance program that establishes the framework for identifying, assessing, measuring, monitoring, mitigating, and reporting on compliance risks for ICC.

¹⁶ 17 CFR 240.17Ad–25(i).

¹⁷ *See* Notice, 89 at 91444.

¹⁸ *Id.*

discussion of how technology releases are assessed, the Proposed Rule Change would replace a current reference to the ICC technology director with a reference to the ICC Technology leadership team. This change would more accurately reflect that technology releases are assessed by the entire ICC Technology leadership team, not just the ICC technology director.

Next, the Proposed Rule Change would amend *Appendix 1* of the ORMF to include the titles of the relevant regulatory requirements while removing the existing summaries of such regulations. ICC indicated that the purpose of this change is to streamline the reference process to provide the reader with a more direct reference to all the applicable regulations and avoid the need to review and update summaries of applicable regulations as they are amended from time to time.¹⁹

Lastly, the Proposed Rule Change would update the 'Revision History' section of the ORMF to reflect the proposed changes described above, as well as to formalize a series of non-material updates previously made to the ORMF that were the output of the annual review of the ORMF conducted by the Compliance Committee, and that were reviewed and approved by the Board in 2021, 2022, and 2023.²⁰

III. Discussion

Section 19(b)(2)(C) of the Act directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that the Proposed Rule Change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to such organization.²¹ Under the Commission's Rules of Practice, the "burden to demonstrate that a proposed rule change is consistent with the Act and the rules and regulations issued thereunder . . . is on the self-regulatory organization ['SRO'] that proposed the rule change."²²

The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding,²³ and any failure of an SRO to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Act and the applicable rules and regulations.²⁴ Moreover, "unquestioning reliance" on an SRO's representations in a proposed rule change is not sufficient to justify Commission approval of a proposed rule change.²⁵

After carefully considering the Proposed Rule Change, the Commission finds that the Proposed Rule Change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to ICC. More specifically, for the reasons discussed below, the proposed rule change is consistent with Section 17A(b)(3)(F) of the Act²⁶ and Rules 17Ad-25(i),²⁷ 17Ad-22(e)(17)(i),²⁸ and 17Ad-22(e)(2)(i) and (v)²⁹ thereunder.

A. Consistency With Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act requires, among other things, that the rules of ICC be designed to promote the prompt and accurate clearance and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts, and transactions.³⁰ Based on a review of the record, and for the reasons discussed below, the proposed changes to the ORMF are consistent with the promotion of the prompt and accurate clearance and settlement of transactions at ICC.

Newly added Section II.B. of the ORMF—addressing ICC's management of risks from relationships with SPCS—and updated and renumbered Section II.C. of the ORMF—titled 'External Service Provider Assessments'—help facilitate ICC's ability to manage its relationships with SPCS and the inherent risks these relationships encompass. For instance, as discussed above, the Proposed Rule Change would

add Section II.B. to the ORMF, which would specify the requirements and procedures for ICC to manage the risks arising from ICC's relationships with SPCS. Such requirements and procedures would include, among other things, evaluating and documenting risks associated with a SPCS, submitting a risk evaluation to the ICC Board related to a relationship with a SPCS, establishing policies and procedures governing the relationship and risk-management of a SPCS relationship, and performing ongoing monitoring of a SPCS relationship for purposes of identifying and remediating changing risks.³¹ Together, Sections II.B. and II.C. of the ORMF also would provide greater clarity around the approval and maintenance of ICC's relationships with SPCS that are contractually obligated not only to supply services material to running ICC's business, such as staffing, finance, and accounting, but also to support ICC's clearance and settlement functionality. By promoting ICC's ability to manage relationships with SPCS, both internal and external, the Proposed Rule Change is thereby designed to promote ICC's capabilities in promptly and accurately clearing and settling securities transactions, and, to the extent applicable, derivative agreements, contracts, and transactions.

For the reasons stated above, the Commission finds that the Proposed Rule Change is consistent with Section 17A(b)(3)(F) of the Act.³²

B. Consistency With Rule 17Ad-25(i) Under the Act

Rule 17Ad-25(i) requires each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to (1) require senior management to evaluate and document the risks related to an agreement with a service provider for core services, including under changes to circumstances and potential disruptions, and whether the risks can be managed in a manner consistent with the clearing agency's risk management framework; (2) require senior management to submit to the board of directors for review and approval any agreement that would establish a relationship with a service provider for core services, along with such risk evaluation; (3) require senior management to be responsible for establishing the policies and procedures that govern relationships and manage

¹⁹ *Id.*

²⁰ For example, updates approved by the Board in 2021 included language in Section I.A. 'Risk Assessment,' clarifying that the Compliance Committee reviews risk assessments during their quarterly meetings. The 2021 updates also included minor clarifications to Section I.B. to clarify that one of the current responsibilities of the ICE Enterprise Risk Management ("ERM") function is to observe and review the incident management mitigation process and, if necessary, challenge corrective action plan decisions and priority levels. See Notice, 89 at 91444–45. ICC indicated that these changes were intended to clarify the description of current practices and the readability of the ORMF, and as such, do not change current practices. *Id.* For further examples, see Notice, 89 at 91444–45.

³⁰ 15 U.S.C. 78q-1(b)(3)(F).

³¹ The requirements outlined in Section II.B. directly reflect language in Rule 17Ad-25(i), which was approved by the Commission in 2023. See n. 5, *supra*.

³² *Id.*

risks related to such agreements with service providers for core services and require the board of directors to be responsible for reviewing and approving such policies and procedures; and (4) require senior management to perform ongoing monitoring of the relationship, and report to the board of directors for its evaluation of any action taken by senior management to remedy significant deterioration in performance or address changing risks or material issues identified through such monitoring; or if the risks or issues cannot be remedied, require senior management to assess and document weaknesses or deficiencies in the relationship with the service provider for submission to the board of directors.³³ In adopting Rule 17Ad–25(i), the Commission stated that the final rule would more clearly delineate the roles of senior management and the board so as not to require the board to undertake responsibilities reserved for senior management.³⁴

As described above, the Proposed Rule Change would help ensure that the ORMF codifies and implements policies and procedures designed to ensure that ICC appropriately manages relevant risks that arise from ICC's relationships with SPCS, including by increasing ORMF users' awareness of those risks, and ensuring that ICC identifies, assesses, measures, monitors, mitigates, and reports those risks. The ORMF also delineates the responsibilities between senior management and the Board regarding these risks. Specifically, the ORMF specifies that senior management provides the Board with information pertaining to relationships with SPCS, any relevant risk evaluations, and management's efforts to monitor, assess, document, and remedy risks associated with these relationships.

For these reasons, the Commission finds the Proposed Rule Change is consistent with Rule 17Ad–25(i).³⁵

C. Consistency With Rule 17Ad–22(e)(17)(i) Under the Act

Rule 17Ad–22(e)(17)(i) requires each covered clearing agency to establish, implement, maintain and enforce written policies and procedures reasonably designed to manage its operational risks by identifying the plausible sources of operational risk, both internal and external, and mitigating their impact through the use

of appropriate systems, policies, procedures, and controls.³⁶

As described above, the Proposed Rule Change would update the ORMF to provide additional and current details regarding ICC's management of SPCS and assure that both ICC's relationships with SPCS and the risks associated with those relationships are continuously being monitored. The processes specified in the ORMF are intended to enhance ICC's ability to identify relevant internal and external sources of operational risk. As such, the Proposed Rule Change will define processes and controls that will facilitate ICC's ability to mitigate the impact of such risks through the use of appropriate systems, policies, procedures, and controls, consistent with the requirements of Rule 17Ad–22(e)(17)(i).³⁷

For the reasons stated above, the Commission finds the Proposed Rule Change is consistent with Rule 17Ad–22(e)(17)(i).³⁸

D. Consistency With Rule 17Ad–22(e)(2)(i) and (v) Under the Act

Rule 17Ad–22(e)(2)(i) and (v) requires each covered clearing agency to establish, implement, maintain and enforce written policies and procedures reasonably designed to provide for governance arrangements that are clear and transparent, and specify clear and direct lines of responsibility.³⁹

As described above, by adding new Section II.B. to the ORMF, the Proposed Rule Change would codify the responsibilities of ICC's management and the Board when managing risks arising from ICC's relationships with SPCS. The proposed changes also would update the ORMF to clarify the description of the Compliance Committee and ERM responsibilities, and the general updates described in Section II.B. above, would help ensure that the ORMF is accurate and current. Taken together, these revisions to the ORMF will help ICC maintain clear and transparent governance arrangements and specify clear and direct lines of responsibility, which in turn will help improve the accuracy and transparency of ICC's governance arrangements and improve the clarity of the lines of responsibility.

For these reasons, the Commission finds the Proposed Rule Change is consistent with Rule 17Ad–22(e)(2)(i) and (v).⁴⁰

IV. Accelerated Approval of the Proposed Rule Change

Under Section 19(b)(2) of the Act,⁴¹ the Commission may approve a proposed rule change prior to the 30th day after the date of publication of notice of filing of the proposed rule change in the **Federal Register** if the Commission finds good cause for doing so.

The Commission finds good cause, pursuant to Section 19(b)(2) of the Exchange Act,⁴² to approve the Proposed Rule Change prior to the 30th day after the date of publication of notice of filing of the Proposed Rule Change in the **Federal Register**. Rule 17Ad–25(i) requires, among other things, that covered clearing agencies establish, implement, maintain, and enforce written policies and procedures reasonably designed to require that senior management (i) evaluate and document the risks related to an agreement with a SPCS; (ii) submit to the board of directors for review and approval any agreement that would establish a relationship with a SPCS (iii) be responsible for establishing the policies and procedures that govern relationships and manage risks related to such agreements with SPCS; and (iv) perform ongoing monitoring of the relationship, and report to the board of directors for its evaluation of any action taken by senior management to remedy significant deterioration in performance or address changing risks or material issues identified through such monitoring.⁴³ The proposed rule change would establish ICC's process for vetting and managing its relationships with SPCS, with specific processes for internal and external SPCS, consistent with Rule 17Ad–25(i).⁴⁴ Based on the foregoing, and as discussed above, the Proposed Rule Change is consistent with the requirements of Rule 17Ad–25(i) under the Act.⁴⁵

The compliance date for Rule 17Ad–25(i) generally is December 5, 2024.⁴⁶ Approving the Proposed Rule Change on an accelerated basis will allow ICC to establish its process for vetting and managing its relationships with SPCS by this compliance date. Accordingly, the Commission finds good cause to

approve the Proposed Rule Change on an accelerated basis prior to the 30th day after the date of publication of notice of filing of the Proposed Rule Change in the **Federal Register**, pursuant to Section 19(b)(2) of the Exchange Act.⁴⁷

V. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and in particular, with the requirements of Section 17A(b)(3)(F) of the Act⁴⁸ and Rules 17Ad-25(i),⁴⁹ 17Ad-22(e)(17)(i),⁵⁰ and 17Ad-22(e)(2)(i) and (v)⁵¹ thereunder.

It is therefore ordered pursuant to Section 19(b)(2) of the Act⁵² that the Proposed Rule Change (SR-ICC-2024-011), be, and hereby is, approved, on an accelerated basis.⁵³

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁴

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101826; File No. SR-BX-2024-053]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Equity 4, Rule 4759 Concerning Data Feeds Utilized

December 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 25, 2024, Nasdaq BX, Inc. (“BX” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit

comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Equity 4, Rule 4759 (Data Feeds Utilized) to change the primary and secondary source of quotation data of certain market centers in the list of proprietary and network processor feeds that the Exchange utilizes for the handling, routing, and execution of orders as well as regulatory compliance processes related to those functions.

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the data feeds table in Equity 4, Rule 4759, which sets forth on a market-by-market basis the specific proprietary and network processor feeds that the Exchange utilizes for the handling, routing, and execution of orders, and for performing the regulatory compliance processes related to each of those functions. Specifically, the table would be amended to reflect that the Exchange will receive a direct feed from the Long-Term Stock Exchange (“LTSE”) as its primary quotation data source and CQS/UQDF will become its secondary data source for the handling, routing and execution of orders and for performing regulatory compliance processes related to each of those functions. The change to the primary sources reflects the Exchange’s effort to include an additional source and the use of secondary sources in the event the

primary source is unable to provide data.

The operative date of the proposed rule change shall be November 25, 2024.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,³ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁴ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market because updating its data feeds table of market centers for which the exchange consumes quotation data through a direct feed will provide clarity to market participants. Additionally, it is necessary and consistent with the public interest and the protection of investors to update the Exchange’s table of market centers in Equity 4, Rule 4759 in order to provide transparency with respect to all the direct proprietary and network processor feeds from which the Exchange obtains market data.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, its purpose is to enhance transparency with respect to the operation of the Exchange and its use of market data feeds.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act⁵ and Rule 19b-4(f)(6) thereunder.⁶ Because the proposed rule change does not: (i)

³ 15 U.S.C. 78f(b).

⁴ 15 U.S.C. 78f(b)(5).

⁵ 15 U.S.C. 78s(b)(3)(A)(iii).

⁶ 17 CFR 240.19b-4(f)(6).

⁴⁷ 15 U.S.C. 78s(b)(2).

⁴⁸ 15 U.S.C. 78q-1(b)(3)(F).

⁴⁹ 17 CFR 240.17Ad-25(i).

⁵⁰ 17 CFR 240.17Ad-22(e)(17)(i).

⁵¹ 17 CFR 240.17Ad-22(e)(2)(i), (v).

⁵² 15 U.S.C. 78s(b)(2).

⁵³ In approving the proposed rule change, the Commission considered the proposal’s impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

⁵⁴ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁷ and Rule 19b-4(f)(6) thereunder.⁸

A proposed rule change filed under Rule 19b-4(f)(6)⁹ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁰ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative immediately. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because the proposal does not raise any novel regulatory issues and waiver will allow the Exchange to begin receiving and using a direct feed from LTSE as soon as possible. For this reason, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.¹¹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and

arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-BX-2024-053 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-BX-2024-053. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-BX-2024-053, and should be submitted on or before January 2, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹²

Sherry R. Haywood,

Assistant Secretary.

DEPARTMENT OF STATE

[Public Notice 12601]

60-Day Notice of Proposed Information Collection: Application/License for Permanent/Temporary Export or Temporary Import of Classified Defense Articles and Related Classified Technical Data

ACTION: Notice of request for public comment.

SUMMARY: The Department of State is seeking Office of Management and Budget (OMB) approval for the information collection described below. In accordance with the Paperwork Reduction Act of 1995, we are requesting comments on this collection from all interested individuals and organizations. The purpose of this notice is to allow 60 days for public comment preceding submission of the collection to OMB.

DATES: The Department will accept comments from the public up to *February 10, 2025*.

ADDRESSES:

You may submit comments by any of the following methods:

- **Web:** Persons with access to the internet may comment on this notice by going to www.Regulations.gov. You can search for the document by entering "Docket Number: DOS-2024-0046" in the Search field. Then click the "Comment Now" button and complete the comment form.

- **Email:** DDTCPublicComments@state.gov.

- **Regular Mail:** Send written comments to: Andrea Battista, SA-1, 12th Floor, Directorate of Defense Trade Controls, Bureau of Political Military Affairs, U.S. Department of State, Washington, DC 20522-0112.

You must include the DS form number (if applicable), information collection title, and the OMB control number in any correspondence.

FOR FURTHER INFORMATION CONTACT:

Direct requests for additional information regarding the collection listed in this notice, including requests for copies of the proposed collection instrument and supporting documents,

⁷ 15 U.S.C. 78s(b)(3)(A).

⁸ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires the Exchange to give the Commission written notice of the Exchange's intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

⁹ 17 CFR 240.19b-4(f)(6).

¹⁰ 17 CFR 240.19b-4(f)(6)(iii).

¹¹ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

¹² 17 CFR 200.30-3(a)(12), (59).

to Andrea Battista, SA-1, 12th Floor, Directorate of Defense Trade Controls, Bureau of Political Military Affairs, U.S. Department of State, Washington, DC 20522-0112, via phone at 202-992-0973, or via email at battistaal@state.gov.

SUPPLEMENTARY INFORMATION:

• *Title of Information Collection:* Application/License for Permanent/Temporary Export or Temporary Import of Classified Defense Articles and Related Classified Technical Data.

• *OMB Control Number:* 1405-0022.

• *Type of Request:* Renewal of a Currently Approved Collection.

• *Originating Office:* Bureau of Political-Military Affairs, Directorate of Defense Trade Controls, PM/DDTC.

• *Form Number:* DSP-85.

• *Respondents:* Business, Nonprofit Organizations, and Individuals.

• *Estimated Number of Respondents:* 74.

• *Estimated Number of Responses:* 74.

• *Average Time per Response:* 30 minutes.

• *Total Estimated Burden Time:* 37 hours.

• *Frequency:* On occasion.

• *Obligation to Respond:* Required to Obtain or Retain a Benefit.

We are soliciting public comments to permit the Department to:

• Evaluate whether the proposed information collection is necessary for the proper functions of the Department.

• Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.

• Enhance the quality, utility, and clarity of the information to be collected.

• Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

In accordance with part 123 of the ITAR, any person who intends to permanently export, temporarily export, or temporarily import classified defense articles, including classified technical data must first obtain DDTC authorization. The "Application/License for Permanent/Temporary

Export or Temporary Import of Classified Defense Articles and Related Classified Technical Data" (Form DSP-85) is used to obtain permission for the permanent export, temporary export, or temporary import of classified defense articles, including classified technical data, covered by the U.S. Munitions List (USML). This form is an application that, when completed and approved by the Bureau of Political Military Affairs, Directorate of Defense Trade Controls (PM/DDTC), Department of State, constitutes the official record and authorization for all classified commercial defense trade transactions, pursuant to the Arms Export Control Act and the International Traffic in Arms Regulations.

Methodology: This information collection may be sent to the Directorate of Defense Trade Controls via the following methods: electronically or mail.

Michael Vaccaro,

Deputy Assistant Secretary, Bureau of Political and Military Affairs, Department of State.

BILLING CODE 4710-25-P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Determination of Trade Surplus in Certain Sugar and Syrup Goods and Sugar-Containing Products of Chile, Morocco, Costa Rica, the Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua, Peru, Colombia, and Panama

AGENCY: Office of the United States Trade Representative (USTR).

ACTION: Notice.

SUMMARY: In accordance with the Harmonized Tariff Schedule of the United States (HTSUS), USTR is providing notice of its determination of the trade surplus in certain sugar and syrup goods and sugar-containing products of Chile, Morocco, Costa Rica, the Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua, Peru, Colombia, and Panama. The level of a country's trade surplus in these goods relates to the quantity of sugar and syrup goods and sugar-containing products for which the United States grants preferential tariff treatment under the United States-Chile Free Trade Agreement (Chile FTA), the United States-Morocco Free Trade Agreement (Morocco FTA), the Dominican Republic-Central America-United States Free Trade Agreement (CAFTA-DR FTA), the United States-Peru Trade

Promotion Agreement (Peru TPA), the United States-Colombia Trade Promotion Agreement (Colombia TPA), and the United States-Panama Trade Promotion Agreement (Panama TPA).

DATES: This notice is applicable on January 1, 2025.

FOR FURTHER INFORMATION CONTACT: Erin H. Nicholson, Office of Agricultural Affairs, 202.395.9419 or Erin.H.Nicholson@ustr.eop.gov.

SUPPLEMENTARY INFORMATION:

I. Chile FTA

Pursuant to section 201 of the Chile FTA Implementation Act (Pub. L. 108-77; 19 U.S.C. 3805 note), Presidential Proclamation No. 7746 of December 30, 2003 (68 FR 75789) implemented the Chile FTA on behalf of the United States and modified the HTSUS to reflect the tariff treatment provided for in the Chile FTA.

Note 3(a) to subchapter XXII of HTSUS chapter 98 requires USTR annually to publish a determination of the amount of Chile's trade surplus, by volume, with all sources for goods in Harmonized System (HS) subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.20, 1702.30, 1702.40, 1702.60, 1702.90, 1806.10, 2101.12, 2101.20, and 2106.90, except that Chile's imports of goods classified under HS subheadings 1702.40 and 1702.60 that qualify for preferential tariff treatment under the Chile FTA are not included in the calculation of Chile's trade surplus.

Note 3(b) to subchapter XXII of HTSUS chapter 98 provides duty-free treatment for certain sugar and syrup goods and sugar-containing products of Chile entered under subheading 9822.02.01 in any calendar year (CY) (beginning in CY2016) in the quantity of goods equal to the amount of Chile's trade surplus in subdivision (a) of the note. During CY2023, the most recent year for which data is available, Chile's imports of the sugar and syrup goods and sugar-containing products described above exceeded its exports of those goods by 662,341 metric tons according to data published by its customs authority, the *Servicio Nacional de Aduana*. Based on this data, USTR has determined that Chile has a negative trade surplus. Therefore, in accordance with U.S. Note 3(b) to subchapter XXII of HTSUS chapter 98, goods of Chile are not eligible to enter the United States duty-free under subheading 9822.02.01 in CY2025.

II. Morocco FTA

Pursuant to section 201 of the Morocco FTA Implementation Act (Pub.

L. 108–302; 19 U.S.C. 3805 note), Presidential Proclamation No. 7971 of December 22, 2005 (70 FR 76651) implemented the Morocco FTA on behalf of the United States and modified the HTSUS to reflect the tariff treatment provided for in the Morocco FTA. Note 6(a) to subchapter XXII of HTSUS chapter 98 requires USTR annually to publish a determination of the amount of Morocco's trade surplus, by volume, with all sources for goods in HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.40, and 1702.60, except that Morocco's imports of U.S. goods classified under HS subheadings 1702.40 and 1702.60 that qualify for preferential tariff treatment under the Morocco FTA are not included in the calculation of Morocco's trade surplus.

Note 6(b) to subchapter XXII of HTSUS chapter 98 provides duty-free treatment for certain sugar and syrup goods and sugar-containing products of Morocco entered under subheading 9822.03.01 in any CY in the quantity of goods equal to the amount of Morocco's trade surplus in subdivision (a) of the note.

During CY2023, the most recent year for which data is available, Morocco's imports of the sugar and syrup goods and sugar-containing products described above exceeded its exports of those goods by 1,086,639 metric tons according to data published by its customs authority, the *Office des Changes*. Based on this data, USTR has determined that Morocco has a negative trade surplus. Therefore, in accordance with U.S. Note 6(b) to subchapter XXII of HTSUS chapter 98, goods of Morocco are not eligible to enter the United States duty-free under subheading 9822.03.01 in CY 2025.

III. CAFTA-DR FTA

Pursuant to section 201 of the CAFTA-DR FTA Implementation Act (Pub. L. 109–53; 19 U.S.C. 4031), Presidential Proclamation No. 7987 of February 28, 2006 (71 FR 10827), Presidential Proclamation No. 7991 of March 24, 2006 (71 FR 16009), Presidential Proclamation No. 7996 of March 31, 2006 (71 FR 16971), Presidential Proclamation No. 8034 of June 30, 2006 (71 FR 38509), Presidential Proclamation No. 8111 of February 28, 2007 (72 FR 10025), Presidential Proclamation No. 8331 of December 23, 2008 (73 FR 79585), and Presidential Proclamation No. 8536 of June 12, 2010 (75 FR 34311), implemented the CAFTA-DR FTA on behalf of the United States and modified the HTSUS to reflect the tariff treatment provided for in the CAFTA-DR FTA.

Note 25(b)(i) to subchapter XXII of HTSUS chapter 98 requires USTR annually to publish a determination of the amount of each CAFTA-DR country's trade surplus, by volume, with all sources for goods in HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.40, and 1702.60, except that each CAFTA-DR country's exports to the United States of goods classified under HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, and 1701.99 and its imports of goods classified under HS subheadings 1702.40 and 1702.60 that qualify for preferential tariff treatment under the CAFTA-DR FTA are not included in the calculation of that country's trade surplus.

U.S. Note 25(b)(ii) to subchapter XXII of HTSUS chapter 98 provides duty-free treatment for certain sugar and syrup goods and sugar-containing products of each CAFTA-DR country entered under subheading 9822.05.20 in an amount equal to the lesser of that country's trade surplus or the specific quantity set out in that note for that country and that calendar year. In each successive year after CY2021, the aggregate quantity for each country increases, from the aggregate quantity permitted in the prior calendar year, by the quantity set out in that note.

Costa Rica

During CY2023, the most recent year for which data is available, Costa Rica's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 30,086 metric tons according to data published by the *Costa Rican Customs Department, Ministry of Finance*. Based on this data, USTR has determined that Costa Rica's trade surplus is 30,086 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTSUS chapter 98 for Costa Rica for CY2025 is 15,180 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Costa Rica that may be entered duty-free under subheading 9822.05.20 in CY2025 is 15,180 metric tons (*i.e.*, the amount that is the lesser of Costa Rica's trade surplus and the specific quantity set out in that note for Costa Rica for CY2025).

Dominican Republic

During CY2023, the most recent year for which data is available, the Dominican Republic's imports of the sugar and syrup goods and sugar-containing products described above exceeded its exports of those goods by 97,159 metric tons according to data published by the *General Directorate of Customs (DGA)*. Based on this data,

USTR has determined that the Dominican Republic has a negative trade surplus. Therefore, in accordance with U.S. Note 25(b)(ii) to subchapter XXII of HTSUS chapter 98, goods of the Dominican Republic are not eligible to enter the United States duty-free under subheading 9822.05.20 in CY2025.

El Salvador

During CY2023, the most recent year for which data is available, El Salvador's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 369,856 metric tons according to data published by the *Central Bank of El Salvador*. Based on this data, USTR has determined that El Salvador's trade surplus is 369,856 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTSUS chapter 98 for El Salvador for CY2025 is 39,440 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of El Salvador that may be entered duty-free under subheading 9822.05.20 in CY2025 is 39,440 metric tons (*i.e.*, the amount that is the lesser of El Salvador's trade surplus and the specific quantity set out in that note for El Salvador for CY 2025).

Guatemala

During CY2023, the most recent year for which data is available, Guatemala's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 983,553 metric tons according to data published by the *Guatemalan Sugar Association (ASAZGUA) and Bank of Guatemala*. Based on this data, USTR has determined that Guatemala's trade surplus is 983,553 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTSUS chapter 98 for Guatemala for CY2025 is 54,520 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Guatemala that may be entered duty-free under subheading 9822.05.20 in CY 2025 is 54,520 metric tons (*i.e.*, the amount that is the lesser of Guatemala's trade surplus and the specific quantity set out in that note for Guatemala for CY2025).

Honduras

During CY2023, the most recent year for which data is available, Honduras' exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 158,791 metric tons according to data published by the *Central Bank of Honduras*. Based on

this data, USTR has determined that Honduras' trade surplus is 158,791 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTSUS chapter 98 for Honduras for CY2025 is 11,040 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Honduras that may be entered duty-free under subheading 9822.05.20 in CY2025 is 11,040 metric tons (*i.e.*, the amount that is the lesser of Honduras' trade surplus and the specific quantity set out in that note for Honduras for CY2025).

Nicaragua

During CY2023, the most recent year for which data is available, Nicaragua's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 349,119 metric tons according to data published by the *National Committee of Sugar Producers (CNPA)*. Based on this data, USTR has determined that Nicaragua's trade surplus is 349,119 metric tons. The specific quantity set out in U.S. Note 25(b)(ii) to subchapter XXII of HTSUS chapter 98 for Nicaragua for CY2025 is 30,360 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Nicaragua that may be entered duty-free under subheading 9822.05.20 in CY2025 is 30,360 metric tons (*i.e.*, the amount that is the lesser of Nicaragua's trade surplus and the specific quantity set out in that note for Nicaragua for CY2025).

IV. Peru TPA

Pursuant to section 201 of the Peru TPA Implementation Act (Pub. L. 110–138; 19 U.S.C. 3805 note), Presidential Proclamation No. 8341 of January 16, 2009 (74 FR 4105) implemented the Peru TPA on behalf of the United States and modified the HTSUS to reflect the tariff treatment provided for in the Peru TPA.

Note 28(c) to subchapter XXII of HTSUS chapter 98 requires USTR annually to publish a determination of the amount of Peru's trade surplus, by volume, with all sources for goods in HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.40, and 1702.60, except that Peru's imports of U.S. goods classified under HS subheadings 1702.40 and 1702.60 that are originating goods under the Peru TPA and Peru's exports to the United States of goods classified under HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, and 1701.99 are not included in the calculation of Peru's trade surplus.

Note 28(d) to subchapter XXII of HTSUS chapter 98 provides duty-free treatment for certain sugar goods of Peru

entered under subheading 9822.06.10 in an amount equal to the lesser of Peru's trade surplus or the specific quantity set out in that note for that calendar year.

During CY2023, the most recent year for which data is available, Peru's imports of the sugar and syrup goods and sugar-containing products described above exceeded its exports of those goods by 249,090 metric tons according to data published by the *National Superintendence of Customs and Tax Administration (SUNAT)*. Based on this data, USTR has determined that Peru has a negative trade surplus. Therefore, in accordance with U.S. Note 28(d) to subchapter XXII of HTSUS chapter 98, goods of Peru are not eligible to enter the United States duty-free under subheading 9822.06.10 in CY2025.

V. Colombia TPA

Pursuant to section 201 of the Colombia TPA Implementation Act (Pub. L. 112–42; 19 U.S.C. 3805 note), Presidential Proclamation No. 8818 of May 14, 2012 (77 FR 29519) implemented the Colombia TPA on behalf of the United States and modified the HTSUS to reflect the tariff treatment provided for in the Colombia TPA.

Note 32(b) to subchapter XXII of HTSUS chapter 98 requires USTR to publish annually a determination of the amount of Colombia's trade surplus, by volume, with all sources for goods in HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.40 and 1702.60, except that Colombia's imports of U.S. goods classified under subheadings 1702.40 and 1702.60 that are originating goods under the Colombia TPA and Colombia's exports to the United States of goods classified under subheadings 1701.12, 1701.13, 1701.14, 1701.91 and 1701.99 are not included in the calculation of Colombia's trade surplus.

Note 32(c)(i) to subchapter XXII of HTSUS chapter 98 provides duty-free treatment for certain sugar goods of Colombia entered under subheading 9822.08.01 in an amount equal to the lesser of Colombia's trade surplus or the specific quantity set out in that note for that calendar year.

During CY2023, the most recent year for which data is available, Colombia's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 219,080 metric tons according to data published by the *Colombian National Tax and Customs Directorate (DIAN)*. Based on this data, USTR has determined that Colombia's trade surplus is 219,080 metric tons. The specific quantity set out in U.S. Note 32(c)(i) to subchapter XXII of

HTSUS chapter 98 for Colombia for CY2025 is 59,750 metric tons. Therefore, in accordance with that note, the aggregate quantity of goods of Colombia that may be entered duty-free under subheading 9822.08.01 in CY2025 is 59,750 metric tons (*i.e.*, the amount that is the lesser of Colombia's trade surplus and the specific quantity set out in that note for Colombia for CY2025).

VI. Panama TPA

Pursuant to section 201 of the Panama TPA Implementation Act (Pub. L. 112–43; 19 U.S.C. 3805 note), Presidential Proclamation No. 8894 of October 29, 2012 (77 FR 66505) implemented the Panama TPA on behalf of the United States and modified the HTSUS to reflect the tariff treatment provided for in the Panama TPA.

Note 35(a) to subchapter XXII of HTSUS chapter 98 requires USTR annually to publish a determination of the amount of Panama's trade surplus, by volume, with all sources for goods in HS subheadings 1701.12, 1701.13, 1701.14, 1701.91, 1701.99, 1702.40 and 1702.60, except that Panama's imports of U.S. goods classified under subheadings 1702.40 and 1702.60 that are originating goods under the Panama TPA and Panama's exports to the United States of goods classified under subheadings 1701.12, 1701.13, 1701.14, 1701.91 and 1701.99 are not included in the calculation of Panama's trade surplus.

Note 35(c) to subchapter XXII of HTSUS chapter 98 provides duty-free treatment for certain sugar goods of Panama entered under subheading 9822.09.17 in an amount equal to the lesser of Panama's trade surplus or the specific quantity set out in that note for that calendar year.

During CY2023, the most recent year for which data is available, Panama's exports of the sugar and syrup goods and sugar-containing products described above exceeded its imports of those goods by 2,071 metric tons according to data published by the *National Institute of Statistics and Census, Office of the General Comptroller of Panama; and the Ministry of Commerce and Industry of Panama*. Based on this data, USTR has determined that Panama's trade surplus is 2,071 metric tons. The specific quantity set out in U.S. Note 35(c) to subchapter XXII of HTS chapter 98 for Panama for CY2025 is 570 metric tons. Therefore, in accordance with that Note, the aggregate quantity of goods of Panama that may be entered duty-free under subheading 9822.09.17 in CY2025 is 570 metric tons (*i.e.*, the amount that is the lesser of Panama's trade surplus

and the specific quantity set out in that Note for Panama for CY2025).

BILLING CODE 3390–F4–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

2025 Tariff Rate Quota Quantity Limitations Under the U.S.-Australia Free Trade Agreement

AGENCY: Office of the United States Trade Representative (USTR).

ACTION: Notice.

SUMMARY: In accordance with the U.S.-Australia Free Trade Agreement entered into by the United States and the Commonwealth of Australia, USTR is providing notice of tariff-rate quota quantity limitations of certain tariff subheadings for calendar year 2025.

DATES: The changes made by this notice are applicable on January 1, 2025.

FOR FURTHER INFORMATION CONTACT:

Sarah Fasano, Office of Agricultural Affairs, 202.395.6127 or Sarah.E.Fasano@ustr.eop.gov.

SUPPLEMENTARY INFORMATION: Pursuant to section 201 of the United States-Australia Free Trade Agreement Implementation Act (Pub. L. 108–286; 118 Stat. 919) (19 U.S.C. 3805 note), Presidential Proclamation No. 7857 of December 20, 2004, and subchapter XXII of chapter 98 of the Harmonized Tariff Schedule of the United States (HTSUS), the attached Annex provides the quantitative limitations in calendar year 2025 of originating goods of Australia entering the United States under certain subheadings.

Annex

Effective with respect to originating goods of Australia, entered under the terms of general note 28 to the HTSUS and under subchapter XXII of chapter 98, on or after January 1, 2025, and through the close of December 31, 2025:

1. For purposes of subdivision (a) of U.S. note 8 to subchapter XXII of chapter 98 of the HTSUS and in accordance with paragraph 4(b) of Section C of Annex 3–A to Chapter 3 of the United States-Australia Free Trade Agreement (Price-Based Safeguard for Beef), the aggregate quantity of originating goods of Australia is 71,268 metric tons for calendar year 2025.

2. For purposes of U.S. note 9 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of

originating goods of Australia entered under subheading 9822.04.05 shall not exceed 24,054,000 liters for calendar year 2025.

3. For purposes of U.S. note 10 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.10 shall not exceed 2,709 metric tons for calendar year 2025.

4. For purposes of U.S. note 11 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.15 shall not exceed 181 metric tons for calendar year 2025.

5. For purposes of U.S. note 12 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.20 shall not exceed 8,764 metric tons for calendar year 2025.

6. For purposes of U.S. note 13 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.25 shall not exceed 4,811 metric tons for calendar year 2025.

7. For purposes of U.S. note 14 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.30 shall not exceed 9,621 metric tons for calendar year 2025.

8. For purposes of U.S. note 15 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.35 shall not exceed 9,287 metric tons for calendar year 2025.

9. For purposes of U.S. note 16 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.40 shall not exceed 5,307 metric tons for calendar year 2025.

10. For purposes of U.S. note 17 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.45 shall not exceed 1,355,423 metric tons for calendar year 2025.

11. For purposes of U.S. note 18 to subchapter XXII of chapter 98 of the HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.50 shall not exceed 903 metric tons for calendar year 2025.

12. For purposes of U.S. note 19 to subchapter XXII of chapter 98 of the

HTSUS, the aggregate quantity of originating goods of Australia entered under subheading 9822.04.65 shall not exceed 1,327 metric tons for calendar year 2025.

Douglas McKalip,

Chief Agricultural Negotiator, Office of the United States Trade Representative.

BILLING CODE 3390–F4–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2024–1191]

Agency Information Collection

Activities: Requests for Comments; Clearance of a New Approval of Information Collection: International Traveler Information Card

AGENCY: Federal Aviation Administration (FAA), Department of Transportation.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval for a new information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 1, 2024, and no comments were received. The collection involves obtaining information from FAA employees and contractors who will travel overseas on official business. The information to be collected will be used in the event an FAA employee and/or contractor is isolated overseas and requires lifesaving assistance. This information is necessary to comply with Federal law, which require Federal agencies to have personnel information on file in case of an isolating event overseas.

DATES: Written comments should be submitted by January 10, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Michael S. Raby, Division Manager, FAA Office of Investigations and

Professional Responsibility (AXI-500) by email at: michael.raby@faa.gov; phone: (202) 604-2419.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information.

OMB Control Number: 2120-XXXX.

Title: International Traveler Information Card.

Form Numbers: There are no FAA forms associated with this information collection.

Type of Review: New information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 1, 2024 (89 FR 35298). The International Traveler Information Card (ITIC) is an electronic form that FAA employees and contractors will complete prior to international travel on official business. The purpose of the form is to collect pertinent data to be used in the event a FAA employee and/or contractor are isolated overseas and require lifesaving assistance. This data will assist in the government's ability to properly identify individuals and provide, if necessary, medical support and personal items to FAA employees and contractors should they be isolated overseas.

The authority for this collection resides in Presidential Policy Directive (PPD)/PPD-30, 22 U.S.C. 4802 and 22 U.S.C. 3927. The duty of an agency with employees in foreign countries is to ensure they fully comply with all applicable directives of the Chief of Mission. In order to protect FAA personnel on official duty abroad, the ITIC documents the Personally Identifiable Information (PII) of FAA employees and contractors to help aid in their authentication and recovery. The ITIC requests the following PII: Name, Date of Birth, Gender, Height, Weight, Hair and Eye Color, Clothing and Shoe Size, Race/Ethnic Group, Blood Type, Scars/Marks/Tattoos, Known Medical Conditions, Current Medical Prescriptions, Allergies, Contact Information, Specialized Training, Language(s) Spoken, as well as information about their Emergency Contact. The traveler will also create a

Duress Word and Personal Authenticator Statements to aid in the identification.

This information will not be available to the public, and will be managed in accordance with applicable Records Management and Privacy Act policies. Only two International Travel Security Program Managers and the Senior Watch Officer of the Washington Operations Center can retrieve ITICs to aid employees and/or contractors during an isolating event, as determined by the Chief of Mission. The Chief of Mission, relying on situational factors, will make the ultimate decision on who this information is shared with, such as, but not limited to, the Department of Defense, in the event of a personnel recovery event.

Respondents: The FAA estimates that there will be 35 respondents based on the average number of contractors who travelled internationally on official business in fiscal years 2023-2024.

Frequency: As needed.

Estimated Average Burden per

Response: 0.5 hours.

Estimated Total Annual Burden: 17.5 hours for all responses.

Issued in Washington, DC, on November 8, 2024.

Michelle Salter,

Executive Director, FAA, Office of Investigations and Professional Responsibility.

[FR Doc. 2024-26852 Filed 12-10-24; 8:45 am]

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No: FAA-2025-2674]

Deadline for Notification of Intent To Use the Airport Improvement Program (AIP) Primary, Cargo, Nonprimary Entitlement Funds, and Discretionary Funds Available to Date for Fiscal Year 2025

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Federal Register Notice.

SUMMARY: This action announces April 1, 2025, as the deadline for each airport sponsor to notify the FAA if it will use its Fiscal Year (FY) 2025 entitlement funds (referred to as apportionments) to accomplish Airport Improvement Program (AIP) eligible projects. Each sponsor has previously identified to the FAA such projects through the Airports Capital Improvement Plan (ACIP) process. This action also announces April 28, 2025, as the deadline for an airport sponsor to submit a final grant

application, based on bids, for grants that will be funded with FY 2025 entitlement funds only.

FOR FURTHER INFORMATION CONTACT: David F. Cushing, Manager, Airports Financial Assistance Division, APP-500, at (202) 267-8827.

SUPPLEMENTARY INFORMATION: Title 49 U.S.C. 47105(f) provides that the sponsor of an airport for which entitlement funds are apportioned shall notify the Secretary, by such time and in a form as prescribed by the Secretary, of the airport sponsor's intent to submit a grant application for its available entitlement funds. Therefore, the FAA is hereby notifying such airport sponsors of the steps required to ensure that the FAA has sufficient time to carry over and convert remaining entitlement funds.

The AIP grant program is authorized by Public Law 118-63, the "Federal Aviation Administration Reauthorization Act, 2024," enacted on May 16, 2024, which permits the FAA to make grants for planning and airport development and airport noise compatibility under the AIP through September 30, 2028. As of this notice, the funds allocated to the FAA to fund the AIP grant program are appropriated through December 20, 2024, by Public Law 118-83, the "Continuing Appropriations and Extensions Act, 2025," enacted on September 26, 2024. Apportioned funds will be subject to allocation formulas prescribed by 49 U.S.C. 47114 and any other applicable legislative text.

This notice applies only to sponsors of airports that have entitlement funds appropriated for FY 2025 to use on eligible and justified projects. State aviation agencies participating in the FAA's State Block Grant Program, as prescribed by 49 U.S.C. 47128, are responsible for notifying the FAA which covered nonprimary airports in their programs will be using their entitlement funds for eligible and justified projects.

An airport sponsor intending to apply any of its available entitlement funds, including those unused, but still available in accordance with 49 U.S.C. 47117 from prior years, must notify the FAA of its intent to submit a grant application by 12:00 p.m. prevailing local time on April 1, 2025.

This notice must be in writing and stipulate the total amount the sponsor intends to use for eligible and justified projects during FY 2025, including those entitlement funds not obligated from prior years that remain available in accordance with 49 U.S.C. 47117 (also known as protected carryover). These notifications are critical to ensure

efficient planning and administration of the AIP. Absent the notification of intent to submit a grant application by the above-mentioned deadline, the FAA will carry over the available entitlement funds on May 16, 2025. These funds will not be available again to the airport sponsor until the beginning of FY 2026.

The final grant application deadline for entitlement funds only is Monday, April 28, 2025. The final grant application funding requests should be based on bids, not estimates. Dates are subject to possible adjustment based on future legislation. As of the publication of this notice, the appropriations and the authorization legislation for the FAA expire on December 20, 2024, and September 30, 2028, respectively.

Sponsors wishing to be considered for AIP discretionary funding throughout FY 2025 should submit applications as soon as possible to FAA Regional or Airport District Offices. The FAA considers all applications submitted if they meet all existing laws, Federal regulations, and FAA policy.

The FAA considers applications on a rolling basis. The final deadline to submit grant applications competing for discretionary funding, in addition to entitlement funding, is June 16, 2025, by 11:59 p.m. Eastern Daylight Time. Under 49 U.S.C. 47115, the FAA considers projects that are the most appropriate to carry out the statute at any time prior to September 30, 2025.

The FAA has determined these deadlines will expedite and facilitate the FY 2025 grant-making process.

Issued in Washington, DC on December 5, 2024.

David F. Cushing,

Manager, Airports Financial Assistance Division.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2010-0044]

Trinity Railway Express's Request To Amend Its Positive Train Control Safety Plan and Positive Train Control System

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of availability and request for comments.

SUMMARY: This document provides the public with notice that, on October 30, 2024, Trinity Railway Express (TRE) submitted its Positive Train Control

Safety Plan (PTCSP), Version 2.0, dated October 30, 2024, to FRA's Secure Information Repository. TRE asks FRA to approve its updated PTCSP and certify TRE's Interoperable Electronic Train Management System (I-ETMS) as a "mixed" positive train control (PTC) system. As this RFA may involve a request for FRA's approval of proposed material modifications to an FRA-certified PTC system, FRA is publishing this notice and inviting public comment on TRE's RFA to its PTCSP.

DATES: FRA will consider comments received by February 10, 2025 before taking final action on the PTCSP. FRA may consider comments received after that date to the extent practicable and without delaying implementation of valuable or necessary modifications to a PTC system.

ADDRESSES:

Comments: Comments may be submitted by going to <https://www.regulations.gov> and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and the applicable docket number. The relevant PTC docket number for this railroad is Docket No. FRA-2010-0044. For convenience, all active PTC dockets are hyperlinked on FRA's website at <https://railroads.dot.gov/research-development/program-areas/train-control/ptc/railroads-ptc-dockets>. All comments received will be posted without change to <https://www.regulations.gov>; this includes any personal information.

FOR FURTHER INFORMATION CONTACT:

Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, telephone: 816-516-7168, email: Gabe.Neal@dot.gov.

SUPPLEMENTARY INFORMATION: In general, title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad's PTC system complies with title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC system or the associated FRA-approved PTCSP, a host railroad must submit, and obtain FRA's approval of, an RFA to its PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA's regulations provide that FRA will publish a notice in the **Federal Register** and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that, on

October 30, 2024, TRE submitted an RFA to its PTCSP for its I-ETMS PTC system which seeks FRA's approval to change the classification of its PTC system to a Mixed PTC system. In its PTCSP, TRE asserts that the I-ETMS PTC system it is implementing is a mixed PTC system as defined in title 49 Code of Federal Regulations (CFR) 236.1015(e). The PTCSP describes TRE's I-ETMS implementation and the associated I-ETMS safety processes, safety analyses, and test, validation, and verification processes used during the development of I-ETMS. The PTCSP also contains TRE's operational and support requirements and procedures. That RFA is available in Docket No. FRA-2010-0044.

Interested parties are invited to comment on TRE's RFA to its PTCSP by submitting written comments or data. During FRA's review of TRE's RFA, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. *See* 49 CFR 236.1021; *see also* 49 CFR 236.1011(e). However, FRA may elect not to respond to any particular comment, and under 49 CFR 236.1009(d)(3), FRA maintains the authority to approve or disapprove the PTCSP at its sole discretion.

Privacy Act Notice

In accordance with 49 CFR 211.3, FRA solicits comments from the public to better inform its decisions. DOT posts these comments, without edit, including any personal information the commenter provides, to <https://www.regulations.gov>, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at <https://www.transportation.gov/privacy>. *See* <https://www.regulations.gov/privacy-notice> for the privacy notice of regulations.gov. To facilitate comment tracking, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. If you wish to provide comments containing proprietary or confidential information, please contact FRA for alternate submission instructions.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION**[Docket No. DOT–OST–2011–0177]****Notice of Submission of Proposed Information Collections to OMB; Agency Request for Reinstatement of Previously Approved Information Collections: Nondiscrimination on the Basis of Disability in Air Travel**

AGENCY: Office of the Secretary (OST), Department of Transportation (Department or DOT).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the *Paperwork Reduction Act of 1995* (44 U.S.C. Chapter 35, as amended) this notice announces the Department's intention to reinstate Office of Management and Budget (OMB) control number 2105–0571 for certain information collections. The collections involve requirements in part 382 of title 14, Code of Federal Regulations (CFR), for carriers to provide a mechanism on their websites for passengers to provide online notification of their requests for disability accommodation services and for carriers to ensure that a disclaimer is activated when a user clicks a link on a primary website to embedded third-party software or an external website. The disclaimer must inform the user that the software/website is not within the carrier's control and may not follow the same accessibility policies.

DATES: Written comments should be submitted by February 10, 2025.

ADDRESSES: You may submit comments identified by Docket No. DOT–OST–2011–0177 through one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590.

- *Hand Delivery:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays. The telephone number is 202–366–9329.

- *Instructions:* You must include the agency name and a docket number DOT–OST–2011–0177 at the beginning of your comment. All comments received will be posted without change to <https://www.regulations.gov>, including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Beth Brodsky, Office of the General Counsel, Office of the Secretary, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, (202) 366–7592 (Voice) or beth.brodsky@dot.gov (Email). You may also contact John C. Wood, Office of the General Counsel, Office of the Secretary, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC, 20590, (202) 366–9342 (Voice), (202) 366–7152 (Fax), or john.wood@dot.gov (Email). Arrangements to receive this document in an alternative format may be made by contacting the above-named individuals.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2105–0571.

Title: Nondiscrimination on the Basis of Disability in Air Travel.

Type of Request: Reinstatement of information collections.

Background: This notice covers two information collection requirements in the Department's Air Carrier Access Act (ACAA) implementing regulation, 14 CFR part 382 (part 382), Nondiscrimination on the Basis of Disability in Air Travel. Specifically, pursuant to section 382.43(d), covered carriers must provide an online mechanism for passengers to request disability accommodation services (*e.g.*, enplaning/deplaning assistance, deaf/hard of hearing communication assistance, escort to service animal relief area, etc.) for a particular flight. Pursuant to section 382.43(e), covered carriers must also ensure that when a user activates a link on a carrier's primary website to embedded third-party software or to an external website, a disclaimer is displayed notifying the user that the application or website may not be accessible. These requirements became effective on December 12, 2015, and December 12, 2016, respectively. Covered carriers are U.S. and foreign air carriers that operate at least one aircraft having a designed seating capacity of more than 60 passengers and own or control a primary website that markets

passenger air transportation or a tour, or tour component that must be purchased with air transportation, to the general public in the United States.¹

DOT is publishing this notice to announce its intent to request reinstatement of the previously approved information collections described above under OMB Control Number 2105–0571. The Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to monetary penalty for failing to comply with a collection of information if the collection of information does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

The title, a description of the information collection and respondents, and the periodic reporting burden are set forth below for each of the information collections:

1. Requirement to make a disability accommodation service request function available on the primary website. (14 CFR 382.43(d)).

Each covered carrier must provide a mechanism on its website for passengers to request a disability accommodation service for a future flight and provide advance notice of their request. Carriers may, but need not, require passengers to include contact information on the form to follow-up and request more specific information about the passengers' accommodation needs. Carriers may also use the aggregate data from the online service requests to understand and better plan for the volume and types of service requests they receive across

¹ The Department estimates that 170 is the maximum number of entities that are covered by the requirements addressed in this notice. 170 represents the number of U.S. and foreign air carriers that submitted an annual report on disability-related complaints to the Department under 14 CFR 382.157 for the reporting cycle in Calendar Year 2023. Because the requirement to file a report under section 382.157 applies to U.S. and foreign air carriers that conduct passenger-carrying service to, from, or in the United States with at least one aircraft having a designed seating capacity of more than 60 seats, the Department assumes the number of carriers that file the annual report on disability-related complaints is similar to the number of carriers covered under the requirements described in this notice.

time periods and routes, but also are not required to do so.

While the content and design of the online service request form is up to the carriers, the Department anticipates that each covered U.S. and foreign carrier that markets scheduled air transportation to the general public in the United States would incur initial costs associated with developing and reviewing a design and implementation plan for the request form, developing, coding, and integrating the form into the website, as well as testing, debugging, and connecting the form with a backend database to store the information. The final regulatory analysis (FRA) for the final rule titled Nondiscrimination on the Basis of Disability in Air Travel: Accessibility of websites and Automated Kiosks at U.S. Airports estimated that it will take an average of 32 labor hours per carrier to develop, implement, integrate, connect, and test the online request form. Initial costs are reduced for carriers that rely on a request form developed by another entity. There are no recordkeeping or reporting requirements. However, carriers should use the service request information to facilitate appropriate, timely assistance to their passengers.

Respondents: Certificated U.S. and foreign air carriers operating to, from, and within the United States that operate at least one aircraft having a seating capacity of more than 60 passengers and own or control a primary website that markets air transportation to the general public in the United States.

Estimated Number of Respondents: 170 U.S. and foreign carriers, of which the Department expects all to have achieved compliance with the requirement in a prior year. The Department estimates that each year there will be 14 new respondent carriers.

Estimated Annual Burden on Respondents: 0 hours per carrier compliant in a prior year, unless the carrier voluntarily elects to modify or improve its form, and 32 hours per carrier creating an online request form.

Estimated Total Annual Burden: 448 hours. This estimate was calculated by multiplying the total number of labor hours per year that a carrier is estimated to spend to develop, implement, integrate, connect, and test the online request form (32) by the estimated number of new respondent carriers each year (14).

Frequency: One-time requirement.

2. Requirement to provide a disclaimer notice to users when clicking a link on a primary website to an

embedded third-party software or an external website. (14 CFR 382.43(e)).

Carriers must provide a disclaimer notice for each link on their primary website that enables a user to access software or an external website that is not in the carrier's control. The disclaimer notice must be activated the first time a user clicks the link and must notify the user that the application/website is not within the carrier's control and may not follow the same accessibility policies as the primary website. The Department anticipates that each covered U.S. and foreign carrier will incur costs associated with identifying all links on their websites that may require a disclaimer such as developing and reviewing the design and language for the disclaimer notice, as well as developing, testing, and deploying the code to the appropriate web pages.

The incremental labor hours associated with providing the required disclaimer may vary depending on the number of links on the website to which this requirement applies. The FRA estimated that it will take an average of 6 labor hours per carrier to identify the links and then develop, test, and deploy the disclaimer notice on the website. We also estimate that it will take less than 30 minutes per year for a carrier to associate the notice with any new links to external websites or third-party software added to their websites.

Respondents: Certificated U.S. and foreign air carriers operating to, from, and within the United States that operate at least one aircraft having a seating capacity of more than 60 passengers and own or control a primary website that markets air transportation to the general public in the United States.

Estimated Number of Respondents: 170 U.S. and foreign carriers, of which the Department expects all to have achieved compliance with the requirement in a prior year. The Department estimates that each year there will be 14 new respondent carriers.

Estimated Annual Burden on Respondents: 6 hours for carriers to create, test, and deploy the disclaimer. 30 minutes for carriers compliant in prior years to associate the notice with new links and third-party software.

Estimated Total Annual Burden: 169 hours. This estimate was calculated by multiplying the total number of labor hours per year that a carrier is estimated to spend to develop, test, and deploy the online request form (6) by the estimated number of new respondent carriers each year (14). To that total we added the product of the number of hours that we

estimated carriers may spend associating the notice with new weblinks (.5 hours) and the number of carriers that are expected to have achieved compliance in a prior year (170).

Frequency: One-time and recurrent requirements.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (a) whether the proposed collection of information is necessary for the Department's performance; (b) the accuracy of the estimated burden; (c) ways for the Department to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.26, 1.27, 1.48 and 1.49; DOT Order 1351.29.

Issued in Washington, DC.

Liv Vaughn Chapman Jr.,

Deputy Assistant General Counsel, Office of Aviation Consumer Protection.

BILLING CODE 4910-9X-P

DEPARTMENT OF VETERANS AFFAIRS

Monetary Allowance for Outer Burial Receptacles

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Department of Veterans Affairs (VA) is providing notice of the monetary allowance amount payable for outer burial receptacles (OBR) for qualifying interments in a VA national cemetery or in a VA grant-funded veterans cemetery that occur during calendar year (CY) 2025. The allowance is equal to the average cost of Government-furnished graveliners less any administrative costs associated with processing and paying the allowance. The purpose of this notice is to inform interested parties of the average cost of Government-furnished graveliners, associated administrative costs, and the allowance amount payable for qualifying interments that occur in CY 2025.

DATES: This allowance amount is effective on January 1, 2025.

FOR FURTHER INFORMATION CONTACT: William Carter, Chief of Budget

Execution Division, National Cemetery Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, telephone: 202-461-9764 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Section 2306(e) of title 38, United States Code, authorizes VA to provide an OBR for each new grave used for casketed remains in an open VA national cemetery or in a cemetery that is the subject of a grant to a State or Tribal Organization under 38 U.S.C. 2408. Section 2306(e)(4) authorizes VA to administer this benefit using a voucher system or other system of reimbursement in situations where an OBR is purchased or provided in lieu of a Government-furnished graveliner. VA administers the OBR monetary allowance in accordance with 38 CFR 38.629, which specifies when payment of the monetary allowance is authorized and how the allowance amount is determined each year and requires VA to post the amount of the allowance in the Notices section of the **Federal Register**. This notice serves the purpose of meeting that requirement for CY 2025.

The allowance for qualified interments that occur during CY 2025 is equal to the average cost of Government-furnished graveliners in fiscal year (FY) 2024, less the administrative cost incurred by VA in processing and paying the allowance in lieu of the Government-furnished graveliner.

The average cost of Government-furnished graveliners is determined by taking VA's total cost during a fiscal year for single-depth graveliners that were procured for placement at the time of interment and dividing it by the total number of such graveliners procured by VA during that fiscal year. The calculation excludes both graveliners pre-placed in gravesites as part of cemetery gravesite development projects and all double-depth graveliners. Using this method of computation, the average cost was determined to be \$439.00 for FY 2024.

The administrative cost is based on the costs incurred by VA during CY 2024 that relate to processing and paying an allowance in lieu of the Government-furnished graveliner. This cost has been determined to be \$9.00.

The allowance payable for qualifying interments occurring during CY 2025, therefore, is \$430.00.

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved and signed this document on December 5, 2024, and authorized the undersigned to sign

and submit the document to the Office of the Federal Register for publication

electronically as an official document of the Department of Veterans Affairs.

Luvenia Potts,

Regulation Development Coordinator, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

BILLING CODE 8320–01–P

FEDERAL REGISTER

Vol. 89

Wednesday,

No. 238

December 11, 2024

Part II

Securities and Exchange Commission

Public Company Accounting Oversight Board; Notice of Filing of Proposed Rules on Firm and Engagement Metrics and Related Amendments to PCAOB Standards; Notice

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101724; File No. PCAOB–2024–06]

Public Company Accounting Oversight Board; Notice of Filing of Proposed Rules on Firm and Engagement Metrics and Related Amendments to PCAOB Standards

November 25, 2024.

Pursuant to Section 107(b) of the Sarbanes-Oxley Act of 2002 (the “Act”), notice is hereby given that on November 22, 2024, the Public Company Accounting Oversight Board (the “Board” or the “PCAOB”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rules described in items I and II below, which items have been prepared by the Board. The Commission is publishing this notice to solicit comments on the proposed rules from interested persons.

I. Board’s Statement of the Terms of Substance of the Proposed Rules

On November 21, 2024, the Board adopted *Firm and Engagement Metrics* and related amendments to its rules and forms (collectively, the “proposed rules”). The text of the proposed rules appears in Exhibit A to the SEC Filing Form 19b–4 and is available on the Board’s website at <https://pcaobus.org/about/rules-rulemaking/rulemaking-dockets/docket-041>, and at the Commission’s Public Reference Room.

II. Board’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rules

In its filing with the Commission, the Board included statements concerning the purpose of, and basis for, the proposed rules and discussed any comments it received on the proposed rules. The text of these statements may be examined at the places specified in Item IV below. The Board has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements. In addition, the Board is requesting that the Commission approve the proposed rules, pursuant to Section 103(a)(3)(C) of the Sarbanes-Oxley Act, for application to audits of emerging growth companies (“EGCs”), as that term is defined in Section 3(a)(80) of the Securities Exchange Act of 1934 (“Exchange Act”). The Board’s request is set forth in section D.

A. Board’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rules

(a) Purpose

The Board has adopted a set of firm- and engagement-level metrics (the “final rules” or “final metrics”) that certain registered public accounting firms (“firms” or “audit firms”) will be required to publicly report relating to their audit practices and the audits they lead. The Board believes these metrics will provide valuable additional information, context, and perspective on auditors and audit engagements, which can be used by investors, audit committees, and other stakeholders, and which will further the Board’s oversight activities. The Board believes this will advance investor protection and promote the public interest by enabling stakeholders to make better-informed decisions, promoting auditor accountability, and ultimately enhancing capital allocation and confidence in our capital markets. The new reporting requirements will apply to firms that audit at least one company that is an “accelerated filer” or “large accelerated filer” (as those terms are defined in SEC rules).¹

Lack of Consistent, Comparable Data About Audits and Auditors

Investors and audit committees cannot easily observe the services performed by auditors. This can limit investors’ ability to make informed decisions about investing their capital, ratifying the selection of auditors, and voting for members of the board of directors, including directors who serve on the audit committee, and audit committees’ ability to choose among and monitor the performance of auditors. At the same time, there is a lack of incentive for firms, acting on their own or collectively, to provide accurate, standardized, and decision-relevant information about their firms and the engagements they perform. In response to these challenges, the Board has studied ways to measure audit firm and audit engagement performance, primarily with a view to providing information useful to investors in their investment and proxy voting decisions, but also recognizing that metrics could potentially be informative to other stakeholders. In addition, the Board itself would benefit from having additional tools to use in its oversight activities, including its inspections program, standard-setting initiatives, and research activities.

The Board has observed that many of the firms that issue audit reports for more than 100 issuers annually and audit companies that account for the majority of U.S. public company market capitalization already publicly disclose certain firm-level metrics through audit quality reports, transparency reports, or similar documents. However, these disclosures generally do not contain engagement-level information, which investors have indicated would be the most useful to them, and are inconsistent across firms and year to year, with no common definitions or calculations that would allow for meaningful comparisons. Moreover, most of the disclosures are voluntary, so firms are free to revise or discontinue such reporting at any time.

In the Board’s view, the current voluntary reporting regime cannot provide consistent, comparable information that stakeholders can rely on to inform their decisions over time. And it would appear that firms’ attempts at voluntary reporting have not, in fact, satisfactorily addressed investor desire for additional information about audits and auditors. On the contrary, support from investors and investor-related groups for this rulemaking initiative has been consistent throughout its history, even as the practice of firm voluntary reporting has evolved and spread.

Metrics at Firm and Engagement Level

The final rules require reporting of metrics at both the firm and the engagement levels. Firm-level metrics relate to aspects of the firm’s audit practice (e.g., average experience at a public accounting firm of the firm’s partners) and engagement-level metrics relate to individual audit engagements (e.g., experience at a public accounting firm of the engagement partner and the engagement quality reviewer (“EQR”) and average experience of certain other engagement team members). The Board is requiring firm-level metrics because it believes information relevant to the firm will be beneficial in providing context for engagement-level metrics and in evaluating the firm’s audit practice and its related system of quality control. The Board is requiring engagement-level metrics because it believes that information will be useful in gaining a richer understanding of a particular audit and because investors have stressed the importance to them of engagement-level information to assist them in evaluating the performance of the auditor and the audit committee. Most metrics will be reported at both firm- and engagement-level. However, the final rules require reporting at only

¹ See 17 CFR 240.12b–2 (“Rule 12b–2”).

the firm level in cases where the Board believes engagement-level data would not be meaningful or would be disproportionately challenging to collect in relation to the incremental benefit.

Final Metrics

The Board adopted metrics in the following eight areas:

Partner and Manager Involvement. Hours worked by senior professionals relative to more junior staff across the firm's large accelerated and accelerated filer engagements and on the specific engagement.

Workload. Average weekly hours worked on a quarterly basis by senior professionals who incurred hours on large accelerated and accelerated filer engagements, including time attributable to engagements, administrative duties, and all other matters, both firm-wide and on the core engagement team.

Training Hours for Audit Personnel. Average annual training hours for partners, managers, and staff of the firm, combined, both firm-wide and on the core engagement team.

Experience of Audit Personnel. Average number of years worked at a public accounting firm (whether or not PCAOB-registered) by senior professionals across the firm and on the engagement.

Industry Experience. Average years of career experience of senior professionals in key industries audited by the firm at the firm level and the audited company's primary industry at the engagement level.

Retention of Audit Personnel (firm-level only). Continuity of senior professionals (through departures, reassignments, etc.) across the firm.

Allocation of Audit Hours. Percentage of hours incurred prior to and following an issuer's year end across the firm's large accelerated and accelerated filer engagements and on the specific engagement.

Restatement History (firm-level only). Restatements of financial statements and management reports on internal control over financial reporting ("ICFR") that were audited by the firm over the past three years.

Firms are permitted, but not required, to accompany the metrics with narrative disclosure to provide additional context.

The final suite of metrics focuses primarily on information about audit personnel. The Board believes these metrics will provide new insights into how engagements are staffed, including the extent of involvement of senior personnel; auditors' overall workload; retention of personnel across the firm; and levels of training, audit experience,

and industry-specific expertise. The final metrics will also provide information about the extent of audit work completed prior to the issuer's year-end, an aspect of the audit process that the Board believes is associated with improved audit outcomes, and about the firm's history of restatements, a key measure of audit outcomes.

This new information will allow users to draw inferences about audits and audit forms that are not possible today. Some may relate to specific metrics. For example, a heavy workload for a particular engagement team relative to the firm average or compared to peer firms may raise questions about the quality of the work performed. Conversely, a relatively high level of industry experience, particularly for an engagement in an industry that benefits from specific accounting and auditing expertise, would be a positive signal. Other inferences may relate to combinations of metrics. For example, the personnel-related metrics, taken together, give an overall sense of how an engagement is staffed that can be compared to firm averages and to engagements for similar issuers. It is possible that the precise numerical values of metrics may be important in some cases but, in general, the Board believes the metrics will be more useful to convey a sense of whether a particular engagement or firm appears fairly typical or is an outlier in one or more respects. This should provide a richer context for understanding the work of the auditor than the current environment of almost no publicly available information.

The Board also believes that gathering data and calculating the final metrics, given the subjects they address, will not be overly costly, time-consuming, or burdensome. Based on the Board's oversight activities, it appears that the largest firms are already tracking data in many of these areas. Many of the metrics are based on data that firms already track or will be required to track for purposes of other PCAOB requirements. For example, Partner and Manager Involvement and Allocation of Audit Hours are based on the same time reporting required for Form AP purposes. Training hours will reflect the same information that firms track to ensure proper licensing of their personnel. Restatement data, to the extent firms are not already tracking it, is required to be tracked under QC 1000. In addition to required data, many firms track the experience of their personnel, as well as industry experience, for use in marketing materials and for inclusion in requests for proposals, and some firms already track staff retention and

turnover metrics as part of their human capital management. Firms should be able to generate other data required by the final metrics, such as Workload, from their existing timekeeping systems with minimal additional effort.

Responding to Commenter Concerns

After considering commenter input, the Board has made a number of changes from the proposal. The final rules eliminate four proposed metrics areas (Audit Resources—Use of Specialists and Shared Service Centers, Audit Hours and Risk Areas, Quality Performance Ratings and Compensation, and Audit Firms' Internal Monitoring) and add one new metric area (Training Hours for Audit Personnel). In addition, only firm-level reporting will be required for one area (Retention of Audit Personnel) that was proposed to be reported at both the firm and engagement level. The Board has also made revisions to simplify and clarify some of the other metrics and exempted firms with a small issuer practice from reporting on their industry experience. In addition, the Board has expanded the optional narrative disclosure from 500 to 1,000 characters and has provided additional direction that the narrative should be concise and focused on the reported metrics, with a view to facilitating the reader's understanding of the metrics. The Board believes that these changes will address commenter concerns about challenges of data collection, potential sensitivity of data, and potential ambiguity of the metrics, and that the final suite of metrics will provide consistent, comparable information on auditors and audit engagements, giving investors, audit committees, and other stakeholders valuable new context and perspective.

The Board considered comments questioning the value of metrics, whether they will be used by investors and other stakeholders or would represent only a "check the box" compliance exercise, and whether they might contribute to information overload or have other negative consequences. Based on the other stakeholder input received, the Board does not share those views. In comments provided in the Board's rulemaking process and surveys conducted by a firm-related group, investors and investor-related groups have repeatedly indicated that the metrics will be useful. As one investor-related group noted:

Auditors say they want to be seen or evaluated as something other than a commodity business evaluated based upon price. For this to happen, auditors need to provide investors with information such that

they can value the work of the auditor—just as they evaluate and value the business and the work of management.²

The Board also notes that similar objections—that the new information would not be used or would be confusing or misleading—were raised by many of the same commenters in connection with its last two rulemakings requiring disclosure of additional information about audits and auditors: Form AP reporting of the name of the engagement partner and information about other firms participating in the audit, and auditor communication of critical audit matters (“CAMs”). In both cases, these commenter concerns appear unsubstantiated. The Form AP data set is now one of the most frequently visited areas of the PCAOB’s website.³ As for CAMs, while academic studies have shown mixed results about the impact of CAMs, in a recent investor survey conducted by a firm-related group, over 90% of the respondents indicated that CAMs play an important role in their investment decision-making.⁴ In addition, data aggregators, such as Audit Analytics, compile and make available data on CAMs, which suggests market demand for that information. The Board’s experience therefore suggests that, contrary to concerns about irrelevance and information overload, stakeholders seek out additional information about auditors and audit engagements when it is available.

Filing Requirements

Under the Board’s final rules, firm-level reporting is required of every firm that audits at least one “accelerated filer” or “large accelerated filer” under SEC rules during the reporting period. Engagement-level reporting will be required for every audit of an accelerated or large accelerated filer. The thresholds will apply to the audits, and auditors, of companies that account for the majority of U.S. public company market capitalization, and the Board believes they will capture the situations where investment and proxy voting decisions will be most likely to benefit from additional information about the audit and the auditor.

The final rules:

- Require reporting of firm-level metrics annually on a new Form FM, *Firm Metrics*, pursuant to a new Rule 2203C, *Firm Metrics*, for firms that issued an audit report with respect to at least one accelerated filer or large accelerated filer during the reporting period;
- Require reporting of engagement-level metrics for audits of accelerated filers and large accelerated filers on a revised Form AP, renamed “Audit Participants and Metrics”; and
- Allow, but not require, limited narrative disclosures on both Form FM and Form AP to provide context and explanation for the required metrics.

Background

The final rules build on other actions the Board has taken to provide stakeholders with additional information about registered firms and the audits they perform, including information about firms available through its registration and reporting forms, information about auditors and engagements on Form AP, and communication of critical audit matters and auditor tenure in the auditor’s report. The Board concurrently adopted other changes to firm reporting requirements.⁵ The Board believes the final rules will complement these efforts by providing investors, audit committees, and other stakeholders with additional information in a consistent format and compiled with sufficient rigor to assist them in making decisions. For example, the metrics could inform investors’ decision-making regarding whether to ratify the audit committee’s selection of an auditor or to vote for members of the board of directors, including directors who serve on the audit committee, as well as potentially assisting in audit committee oversight, supporting continuous improvement of firms’ quality control systems, and facilitating the Board’s own oversight and rulemaking efforts. The Board further believes that the value of these metrics will likely increase over time as firm reporting practices develop and trends become observable.

As in its proposal, the Board uses the term “firm and engagement metrics” rather than “audit quality indicators” (“AQIs”) to describe the metrics that it adopted. The Board believes this avoids the potential misimpression that any set of metrics can comprehensively measure audit quality and emphasizes the Board’s goal of promoting informed

decision-making through robust disclosure requirements. Some commenters were critical of that change in terminology, suggesting that it evidenced that the Board is no longer focused on audit quality. It is simply a clarification. Because some of the most important elements of a high-quality audit, such as application of due care and professional skepticism, cannot be measured and quantified directly, the metrics employ proxies, such as years of experience, auditor workloads, and percentage of audit hours attributable to more senior members of the engagement team, which can only partially capture these concepts. Even though these proxies cannot provide a complete picture of audit quality, the Board believes they will nevertheless convey important information about auditors and the engagements they lead that stakeholders will find relevant and useful. The Board believes that consideration of the metrics in combination, together with any additional context a firm may choose to provide, will help users interpret the data, and that the metrics, analyzed across firms and over time, will yield important, currently unavailable information that will assist investors, audit committees, and other stakeholders in their decision-making, oversight, and evaluation related to audits.

The Board developed the proposal after considering input from numerous sources, including the recommendations of the U.S. Department of Treasury’s Advisory Committee on the Auditing Profession (“ACAP”), including the October 6, 2008 *Final Report of the Advisory Committee on the Auditing Profession to the U.S. Department of the Treasury* (“ACAP Final Report”); the *Concept Release on Audit Quality Indicators*, PCAOB Rel. No. 2015–005 (July 1, 2015) (“Concept Release”), and the comments received; the voluntary practices of firms; recommendations from the PCAOB’s Investor Advisory Group (“IAG”); and the initiatives of international regulators. The Board has carefully considered this input and believes that the final amendments strike an appropriate balance between the expected benefits of the new reporting requirements and the associated costs of implementation and compliance.

Effective Dates

If the Commission approves the final rules and final metrics, both firm-level and engagement-level reporting will be required for periods beginning October 1, 2027. The Board also adopted a phased implementation period for both

firm- and engagement-level reporting, where firms that issue audit reports for more than 100 issuers will begin reporting in the first year that reporting is required and other firms beginning one year later.

(b) Statutory Basis

The statutory basis for the proposed rules is Title I of the Act.

B. Board's Statement on Burden on Competition

Not applicable. The Board's consideration of the economic impacts of the proposed rules is discussed in section D below.

C. Board's Statement on Comments on the Proposed Rules Received From Members, Participants or Others

The Board released the proposed rules for public comment in PCAOB Release No. 2024-002 on April 9, 2024. Previously, the Board issued a concept release for public comment in PCAOB Release No. 2015-055 on July 1, 2015. The Board received over 45 comment letters in response to the proposing release and 50 letters in response to the concept release. *See* Exhibits 2(a)(B) and 2(a)(C). The Board has carefully considered all comments received. The Board's response to the comments it received and the changes made to the rules in response to the comments received are discussed below.

Background

Project History

1. Importance and Potential Benefits of Increased Information About Audit Firms and Engagements

With the passage of the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley") and the establishment of the PCAOB, Congress acknowledged and re-emphasized the auditor's important gatekeeping role.⁶ Reflecting that importance, the Board believes requiring audit firms to provide additional information about the firm and the engagements it performs will advance investor protection and promote the public interest by enabling investors to make better-informed decisions. As discussed in more detail below, the Board has also heard from investors and other stakeholders that they believe such information will be beneficial.

Sarbanes-Oxley also mandated new exchange requirements regarding the responsibilities of audit committees of listed companies, including requiring

that audit committees be charged with responsibility for the appointment, compensation, and oversight of the auditor.⁷ The Board believes that making information available to audit committees regarding both the specific audit and auditor they oversee and the audits and auditors of their peer companies will assist them in carrying out this statutory mandate.

Over the years, the Board has received significant input on the importance and potential benefits to stakeholders of additional information about audits and auditors. The key elements of that input are summarized below.

i. ACAP Recommendations

In 2007, the U.S. Treasury constituted the ACAP to consider and develop recommendations relating to the sustainability of the auditing profession.⁸ On October 6, 2008, ACAP published a report detailing recommendations intended to enhance the sustainability of a strong and vibrant public company auditing profession.⁹ One of the ACAP recommendations was that the PCAOB, in consultation with auditors, investors, public companies, audit committees, boards of directors, academics, and others, "determine the feasibility of developing key indicators of audit quality and effectiveness and requiring auditing firms to publicly disclose those indicators"¹⁰ and, assuming that development and disclosure of indicators of audit quality are feasible, that the PCAOB be required to monitor these indicators.

ii. 2013 and 2017 PCAOB Investor Advisory Group Recommendations

At its October 2013 IAG Meeting,¹¹ the IAG working group on AQIs made recommendations for the PCAOB to prescribe informative, forward-looking disclosures and indicators intended to measure the quality of audits and enhance auditor accountability. They emphasized that investors and audit committees generally care more about the quality and credibility of audit work on specific engagements—the

companies in which they have invested or were considering investing, or the company on whose board of directors they served—rather than firms' more general efforts to improve quality. Accordingly, in addition to disclosures and metrics to be reported at the firm level, they also recommended disclosures and metrics to be reported at the engagement level.

At the October 2017 IAG meeting, an IAG working group discussed three topics: (i) why audit quality and AQIs matter to investors, (ii) the PCAOB's authority and efforts to date to enact AQIs, and (iii) audit quality initiatives in other jurisdictions.¹² The 2017 working group also endorsed the 2013 AQI working group's recommendations.

The recommendations provided by the 2013 and 2017 IAG working groups are reflected in many of the metrics the Board adopted.

2. PCAOB Initiatives

This section provides further background and expands on the history of PCAOB activities related to providing additional information about audit firms and audits, including firm and engagement metrics.

i. 2015 AQI Concept Release

In July 2015, the PCAOB issued the Concept Release and sought comment on 28 potential indicators. The indicators were organized into three groups:

- Audit professionals—Measures dealing with the availability, competence, and focus of those performing the audit.
- Audit process—Measures related to an audit firm's tone at the top and leadership, incentives, independence, attention to infrastructure, and record of monitoring and remediation.
- Audit results—Financial statements, internal control, going concern, communications between auditors and audit committees, and enforcement and litigation.

The Concept Release discussed (i) the nature of the potential indicators and potential calculations, (ii) the usefulness of the indicators, (iii) suggestions for other indicators, (iv) potential users of the indicators, and (v) the approach to implementation. In response to the Concept Release, the PCAOB received 50 comment letters.

Most commenters expressed support for the general idea that AQIs may be

useful.¹³ However, commenter views varied widely. Comments from firms and firm-related groups suggested that no standard group of indicators could advance a person's understanding of audit quality. These commenters suggested that AQIs should be voluntary, should be reported to audit committees through two-way discussions to provide context for the indicators, or should be required only at the firm level. Investors and investor-related groups recommended that indicators should be made public as they could be used to stimulate competition based on quality among audit firms, remedy the deficiency of information about audits, and give shareholders meaningful information to help them in voting on auditor selection. Some commenters suggested that engagement-level metrics are more useful than firm-level metrics. One commenter suggested that promoting competition around an implied variability in audit quality may not always be appropriate and in the public interest because audit quality should be nonnegotiable and a fundamental goal for all audits. Another commenter suggested that it was critical to define what AQIs do and do not represent so that they are used appropriately.

ii. PCAOB Rulemakings To Increase Audit Transparency: Identification of the Engagement Partner and Other Audit Participants on Form AP and Auditor Communication of Critical Audit Matters

In 2015, the PCAOB adopted rules requiring information on Form AP, *Auditor Reporting of Certain Audit Participants*, regarding the engagement partner and other accounting firms that participate in audits of issuers.¹⁴ The rulemaking was initially in response to the ACAP recommendation that the engagement partner should be required to sign the audit report.¹⁵ As the rulemaking evolved, it also took account of stakeholder input, including IAG recommendations to identify the engagement partner and the firms, other than the firm signing the audit report, that participate in audits.

The Board's intention was to make available information about the engagement partner and other firms that participated in the audit, saying that such information, even if not useful in every instance or meaningful to every investor, would make an overall

contribution to the information available to investors in making voting and investment decisions. The Board also asserted that increased transparency should promote increased accountability in the audit process. The Form AP reporting requirements became effective in 2017, and the data gathered via Form AP has many users; the Form AP data set is frequently searched through AuditorSearch, the PCAOB's online search tool, as well as downloaded by users performing more detailed analyses.¹⁶

In 2017, the PCAOB adopted AS 3101, *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, which includes requirements regarding the disclosure of auditor tenure and auditor determination and communication of "critical audit matters."¹⁷ This project was also initiated in response to ACAP's recommendation that the PCAOB undertake a standard-setting initiative to consider improvements to the auditor's standard reporting model.¹⁸ The rulemaking explored potential ways to increase the transparency and relevance of the auditor's report, including by requiring expanded auditor reporting regarding the audit and the company's financial statements.¹⁹ In the adopting release, the Board noted ACAP's statement that the complexity of financial reporting supports improving the content of the auditor's report beyond the then-current pass/fail model to include a more relevant discussion about the audit of the financial statements.

After multiple rounds of Board releases and stakeholder input, the requirements took effect in 2019 and 2020.

iii. Recent PCAOB Standard-Setting and Rulemaking Activities

At the November 2022 Standards and Emerging Issues Advisory Group (SEIAG) and the October 2022 and 2023 IAG meetings, several members continued to urge the Board to take action on firm and engagement metrics. Other members stated that some firms already publish similar metrics through transparency reports and audit quality reports. Some members of the IAG and

SEIAG have requested increased information at the firm and engagement levels through easily accessible and quantified metrics, potentially with accompanying context provided by the auditors.²⁰

In response to the Board's request for comment on the draft 2022–2026 Strategic Plan, some commenters encouraged the Board to continue to consider this topic.²¹ Additionally, in a January 2023 comment letter on the PCAOB's proposed quality control standard, members of the IAG advocated for "a minimum requirement of eight indicators."²² These eight indicators were (i) staffing leverage; (ii) partner workload; (iii) manager and staff workload; (iv) audit hours and risk areas; (v) quality ratings and compensation; (vi) audit fees, effort, and client risk; (vii) audit firm's internal quality review results; and (viii) PCAOB inspection results.

a. QC 1000: Requirements

The Board adopted a new quality control standard for firms, QC 1000, *A Firm's System of Quality Control* ("QC 1000"),²³ which contains provisions that are relevant to firm reporting of firm- and engagement-level metrics. QC 1000 will become effective in December 2025.

(1) Public Communication of Firm-Level or Engagement-Level Information

QC 1000 includes a quality objective that, if a firm communicates firm-level or engagement-level information with respect to the firm's audit practice, firm personnel, or engagements, such as firm or engagement metrics, to external parties, such information is accurate and not misleading and, with respect to any such metrics that are communicated

in writing, the communication explains in reasonable detail how the metrics were determined and, if applicable, how the method of determining them changed since the metrics were last communicated.²⁴ (With respect to metrics reported on Form FM and Form AP, the form itself provides the required explanation.) The final firm and engagement metrics include reporting elements that focus on the firm's responsibility to produce and report information that is accurate and not misleading, for example, an optional narrative to accompany the metrics. This element is discussed further below.

(2) Use of Metrics in Monitoring the Firm's QC System

Under QC 1000, in determining the nature, timing, and extent of QC system-level monitoring activities, the firm is required to take into account any metrics that the firm may use in its QC system.²⁵ QC 1000 does not require the use of any specific metrics; firms have the ability both to develop metrics on their own and to use any or all of the metrics required to be reported under Rule 2203C and Rule 3211 in their QC system, but that is not required. The Board believes these metrics would provide information that could be used in the firm's system of quality control. However, not all firms may find all metrics useful in operating or monitoring their QC system, and the Board is not mandating their use in connection with monitoring a firm's QC system at this time.

b. Firm Reporting

Concurrently with this rulemaking, the Board adopted certain updates to its annual and special reporting requirements to facilitate the disclosure of more complete, standardized, and timely information regarding audit firms. Among other new requirements, the updates will (i) require firms to disclose additional information on Form 2 about their fees, leadership and governance structure, and network arrangements; (ii) require, in connection with QC 1000, a one-time update to the statement on a firm's quality control policies and procedures on a new Form QCPP; and (iii) expand the scope of special reporting to include events that pose a material risk, or represent a material change, to the firm's organization, operations, liquidity or financial resources, in such a manner that it will affect the provision of audit

services, as well as new cybersecurity reporting requirements.²⁶

c. Proposed Firm and Engagement Metrics

In April 2024, the Board proposed amendments to the PCAOB's rules and reporting forms to require the reporting of specified firm-level metrics on new Form FM, *Firm Metrics*, and specified engagement-level metrics on an amended and renamed Form AP, *Audit Participants and Metrics*. In the Board's proposal, it proposed a set of firm-level and engagement-level metrics across 11 areas to be publicly reported for the firms that serve as lead auditor for at least one accelerated filer or large accelerated filer.

The Board received over 45 comment letters on the proposal.²⁷ Commenters included investor-related groups, firms, firm-related groups, academics, and others.

Some commenters expressed concerns about the speed of rulemaking by the Board. Some commenters asked the PCAOB for more than 60 days to respond to the proposal, citing overlapping comment proposal periods, the duration of comment periods, the length and complexity of various proposals, and overlapping SEC 19b-4 filing comment periods. On the other hand, a commenter urged the Board not to delay this rulemaking because investors need a relatively standardized data set to analyze and compare over time and across companies. The Board believes that 60 days was a sufficient period for commenting on the proposal. Despite that, the Board considered comment letters that were submitted after the 60-day period closed. The Board received robust comments on the proposal, which informed the final metrics or final rules.²⁸ These comments are addressed throughout this Exhibit 1 and in the Board's adopting release (Exhibit 3).

3. Overview of Existing Requirements

Under current PCAOB rules and standards, certain information about PCAOB-registered firms is already made available to investors, audit committees, and other stakeholders. The disclosure of firm- and engagement-level metrics would supplement this information. This section discusses the key PCAOB standards and rules that require certain

firm- and engagement-level information to be provided to various stakeholders.

i. Available Information Related to Firms

PCAOB rules require firms to file Form 2 (Annual Report Form) to report basic information about the firm and its audit practice and Form 3 (Special Reporting Form) after the occurrence of certain events.²⁹ In addition, the PCAOB makes portions of inspection reports publicly available for firms that are subject to annual or triennial PCAOB inspections.

a. Form 2 and Form 3

As required by Section 102(d) of Sarbanes-Oxley and PCAOB Rule 2200, each year registered firms must file an annual report with the Board. Under PCAOB rules, firms must do so by filing Form 2. The annual reporting period runs from April 1 to March 31, and the due date for filing is June 30.³⁰ In addition to basic identifying information about the firm,³¹ firms report on Form 2 general information about their audit practices and other business relationships. Information required to be provided on Form 2 includes:

- Whether the firm issued audit reports for issuers, brokers, or dealers or played a substantial role in issuer or broker-dealer audits;³²
- Percentage of total fees billed to issuers for audit services, other accounting services, tax services, and non-audit services;³³
- For each issuer or broker-dealer for which the firm issued an audit report, the issuer's or broker-dealer's name, its Central Index Key (CIK) number and Central Registration Depository (CRD) number (if any), and the date of the audit report, as well as the total number

²⁹ PCAOB Rule 2200, *Annual Report*; PCAOB Rule 2201, *Time for Filing of Annual Report*; PCAOB Rule 2203, *Special Reports*; Instructions to Form 2, available at https://pcaobus.org/about/rules-rulemaking/rules/form_2; Instructions to Form 3, available at https://pcaobus.org/about/rules-rulemaking/rules/form_3. Information reported on Forms 2 and 3 is publicly available unless a firm requests confidential treatment.

³⁰ PCAOB Rule 2201; General Instructions 3-4 to Form 2 (registered public accounting firm that has its application for registration approved by the Board in the period between and including April 1 and June 30 of any year not required to file an annual report in that year).

³¹ Instructions to Form 2, Item 1.1.

³² *Id.*, Item 3.1. The Board's release uses the terms "issuer," "broker," and "dealer" as those terms are defined under Sections 2(a)(7) and 110(3)-(4) of Sarbanes-Oxley. 15 U.S.C. 7201(a)(7), 7220(3)-(4). See also paragraphs (b)(iii), (d)(iii), and (i)(iii) of PCAOB Rule 1001, *Definitions of Terms Employed in Rules*. Entities that are brokers or dealers or both are sometimes referred to as "broker-dealers."

³³ Instructions to Form 2, Item 3.2.

²⁶ See PCAOB Rel. No. 2024-013.

²⁷ The comment letters received on the proposal are available at <https://pcaobus.org/about/rules-rulemaking/rulemaking-dockets/docket-041/comment-letters>.

of firm personnel who exercised authority to sign the firm's name to an audit report for an issuer or broker-dealer during the reporting period;³⁴

- Physical address (and, if different, mailing address) of each firm office;³⁵
- Whether the firm has any memberships, affiliations, or similar arrangements involving certain activities related to audit or accounting services (including use of name in connection with audit services, marketing of audit services, and employment or lease of personnel to perform audit services), and the entities with which the firm has those relationships;³⁶

- Total number of accountants, certified public accountants, and personnel;³⁷

- Relationships with certain individuals and entities with disciplinary or other histories (if not previously identified);³⁸ and

- Acquisitions of another public accounting firm or a substantial portion of another firm's personnel.³⁹

In addition to annual reporting on Form 2, firms are required to file Form 3 within 30 days after the occurrence of certain events, such as when the firm's legal name has changed while otherwise remaining the same legal entity, the firm has withdrawn an audit report on the financial statements of an issuer or has resigned, declined to stand for re-appointment, or been dismissed from an audit engagement as principal auditor, and the issuer has failed to comply with applicable Form 8-K reporting requirements for such events.⁴⁰

b. Firm Inspection Reports

Sarbanes-Oxley authorizes the PCAOB to inspect firms for the purpose of assessing compliance with certain laws, rules, and professional standards in connection with a firm's audit work for issuers, brokers, and dealers. Firms that issue audit reports for more than 100 issuers per year are inspected annually. Firms that issue 100 or fewer audit reports per year for issuers are generally inspected at least once every three years. The Board also inspects firms that play a substantial role in audits of issuers. Many firms registered with the Board perform no audit work for issuers or broker-dealers,⁴¹ or only participate in audits below the level of

a substantial role, and the Board has not historically inspected those firms. The PCAOB provides each inspected firm with a report summarizing any deficiencies identified through the inspections process. Portions of these inspection reports are publicly available on the PCAOB's website.⁴² Recently the PCAOB introduced enhanced search tools that enable investors and others to better access and understand data from PCAOB inspection reports.⁴³

ii. Available Information Related to Issuer Engagements

a. Auditor's Communications With Audit Committees

Investors and other financial statement users are the beneficiaries of the audit. Audit committees protect the interests of investors by assisting the board of directors in fulfilling its responsibility to oversee the integrity of the company's accounting and financial reporting processes, including the audit of the company's financial statements—and in carrying out that duty, they also benefit other financial statement users. To support the audit committee in this crucial role, PCAOB standards and rules and SEC rules require auditors to provide certain firm- and engagement-level information to audit committees.⁴⁴ AS 1301, *Communications with Audit Committees*, requires various communications to facilitate the audit committee's financial reporting oversight.⁴⁵ Among other things, AS 1301 requires the auditor to communicate: (i) significant risks;⁴⁶ (ii)

⁴² See <https://pcaobus.org/oversight/inspections> for inspection reports, basics of inspections, and inspection procedures. Sarbanes-Oxley provides that no portions of an inspection report that deal with criticisms of or potential defects in the quality control systems of the firm shall be made public if those criticisms or defects are addressed by the firm, to the satisfaction of the Board, no later than 12 months after the issuance of the inspection report. See Sarbanes-Oxley Section 104(g)(2). Full (expanded) inspection reports are publicly available on the PCAOB's website when a firm fails to satisfactorily remediate within 12 months.

⁴³ See <https://pcaobus.org/news-events/news-releases/news-release-detail/pcaob-launches-new-online-tools-to-help-users-find-and-compare-inspection-report-data> for a summary of the enhancements, including six new search filters, including Part I.A deficiency rate, to help users analyze and compare more than 3,700 inspection reports.

⁴⁴ See Auditing Standard No. 16, *Communications with Audit Committees; Related Amendments to PCAOB Standards; and Transitional Amendments to AU Sec. 380*, PCAOB Rel. No. 2012-004 (Aug. 15, 2012), at 2, available at https://assets.pcaobus.org/pcaob-dev/docs/default-source/rulemaking/docket030/release_2012-004.pdf?sfvrsn=7872effb_0.

⁴⁵ Id. ("Communications with the audit committee provide auditors with a forum separate from management to discuss matters about the audit and the company's financial reporting process.")

⁴⁶ See AS 1301.09.

critical accounting policies and practices, critical accounting estimates, and significant unusual transactions;⁴⁷ (iii) the auditor's evaluation of the quality of the company's financial reporting;⁴⁸ and (iv) other matters that are significant to the oversight of the company's financial reporting process.⁴⁹ In addition, other PCAOB standards and rules and SEC rules independently require certain audit committee communications.⁵⁰

b. Auditor's Public Communications of Certain Information

AS 3101 and Rule 3211 require firms to publicly disclose certain engagement-specific information in the auditor's report and on Form AP. In addition to specifying the requirements for an unqualified opinion on the financial statements, AS 3101 requires the auditor's report to describe (i) critical audit matters, which inform investors and other financial statement users of matters arising from the audit that required especially challenging, subjective, or complex auditor judgment; and (ii) how the auditor addressed those matters. AS 3101 further requires the auditor's report to include a statement disclosing the year in which the auditor began serving consecutively as the company's auditor. Other standards require additional information to be included in the auditor's report, including AS 2415, *Consideration of an Entity's Ability to Continue as a Going Concern*, which requires an explanatory paragraph when the auditor concludes that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.⁵¹

PCAOB Rule 3211 requires auditors to file Form AP, which, among other things, provides information to investors and other financial statement users about the engagement partner and other accounting firms participating in the audit of issuers. Disclosures on Form AP provide increased transparency about certain audit participants. The key provisions include annual disclosures of (a) the name of the engagement partner and (b) the name and extent of participation of other accounting firms in the audit.⁵²

⁴¹ See QC Adopting Release at 54.

The PCAOB makes the Form AP data set available on AuditorSearch, by which users can conduct live searches or download the entire data set in a searchable, machine-readable format.⁵³ Using this data, a user can determine, for example, the changes in engagement partner for any given issuer or obtain a list of all issuers for which an engagement partner is responsible. After identifying an engagement partner, a user can then compile information from other sources, including information about whether the partner is associated with restatements of financial statements, has been subject to public disciplinary proceedings, or has experience as an engagement partner for issuers of a particular size or in a particular industry. Similarly, starting from the Form AP data set, users may perform further research on the other accounting firms that participate in an audit, such as whether those firms are registered with the PCAOB, whether they have any publicly available disciplinary history, whether they have been inspected, and, if so, the results of those inspections.

4. Voluntary Firm Reporting

Since the Concept Release, many of the audit firms that issue audit reports for more than 100 issuers and audit the majority of the market capitalization for issuers have been publicly disclosing certain firm-level information discussed in the Concept Release through their audit quality reports, transparency reports, or other published reports. A firm-related group has published a framework to assist its members in these efforts.⁵⁴ Many firms may also be developing and monitoring certain firm

firms that participate in an audit depending on their level of participation. For other accounting firms with individually 5% or greater participation in the audit, the Form AP filer must disclose the legal name of the other accounting firm, the city and state (or, if outside the United States, the city and country) of that firm's headquarters, and the percentage of total audit hours (either as a single number or within a range provided on the form) attributable to each other accounting firm. For other accounting firms with individually less than 5% participation, the filer must disclose the total number of such other accounting firms and the aggregate percentage (either as a single number or within a range provided on the form) of total audit hours for all such firms.

⁵³ See AuditorSearch, available at <https://pcaobus.org/resources/auditorsearch>.

⁵⁴ CAQ, *Audit Quality Disclosure Framework (Update)* (June 2023). The framework provides that metrics "may provide those overseeing the audit and other stakeholders with information and additional transparency into the firm's systems and processes that impact audit quality. However, the CAQ believes that a combination of metrics—taken as a whole and supplemented with robust discussion—may provide those overseeing the audit and other stakeholders with information and additional transparency into the firm's systems and processes that impact audit quality." *Id.* at 4.

and engagement metrics to be used internally by the firm. In 2023, the same firm-related group published a summary analysis of the most recent audit quality reports issued by the eight firms represented on the group's governing board.⁵⁵ The report indicated that firms were reporting similar firm-level quantitative metrics related to several areas, including audit firm inspections; training; use of auditor's specialists; audit report reissuances and financial statement restatements; measures of experience, such as tenure with the firm; and personnel turnover. The report further noted that some firms disclosed qualitative as well as quantitative information, including information relating to audit methodology and execution, people and firm culture, quality management and inspections, and technology and innovation.

The Board has observed the firms that report firm-level metrics generally do not report engagement-level metrics.⁵⁶ Where firm-level metrics are reported, the firms report different metrics, calculated in different ways, and using different definitions, thereby preventing users from making comparisons across firms.

One commenter on the Concept Release stated that many firms are using the 28 AQIs identified in the Concept Release at some level to (i) manage the firm and (ii) manage the quality of audits at the office level and at the engagement level. Another commenter specifically indicated that its audit committee reviewed the engagement-level AQIs identified in the Concept Release that were provided by their auditor.

One commenter on the proposal asserted that the voluntary reporting firms already do through transparency and audit quality reports includes firm-level metrics, as well as explanations of how they are calculated, including changes in the calculation that could

⁵⁵ See CAQ *Audit Quality Reports Analysis: A Year in Review* (Mar. 2023), available at <https://www.thecaq.org/aqr-analysis-yir> ("CAQ Report"). The eight firms on the CAQ's governing board are BDO USA, LLP, Crowe LLP, Deloitte & Touche LLP, Ernst & Young LLP, Grant Thornton LLP, KPMG LLP, PricewaterhouseCoopers LLP, and RSM US LLP.

⁵⁶ In connection with the Nov. 2022 SEIAG meeting, the Board staff researched various reports issued during the prior three years by the top 20 accounting firms (by 2022 revenue) and identified nine firms that disclosed firm-level metrics. See Firm and Engagement Performance Metrics Briefing Paper and Related Attachments from Nov. 2022 SEIAG meeting, available at <https://pcaobus.org/news-events/events/event-details/pcaob-standards-and-emerging-issues-advisory-group-meeting-2022>. For each firm-level metric reported by those nine firms, the PCAOB staff included examples of how firms calculated the metric as well as the number of firms reporting that metric.

affect comparability, as well as context necessary for understanding the metrics, and would be preferable to the mandatory metrics that the Board proposed. On the other hand, an investor-related group presented an analysis of firm transparency and audit quality reports, finding that the measures used in transparency reports and audit quality reports by different firms are not consistent or comparable across firms in their computations, presentation and inclusion, and are not provided at the engagement level, which the commenter believes is the level at which they would be most useful. This commenter stated that having both firm- and engagement-level metrics enhances the metrics' usefulness because it provides broader context for understanding at both levels.

Actions in Other Jurisdictions

Some jurisdictions outside the United States have moved forward with mandatory or voluntary initiatives related to the monitoring and disclosure of metrics. In May 2022, Accountancy Europe published a factsheet about recent related initiatives in Europe and elsewhere.⁵⁷ The Accountancy Europe Report described initiatives conducted in 10 countries (including the United Kingdom (U.K.), South Africa and Canada) by various organizations, including audit oversight bodies (including the U.K.'s Financial Reporting Council (FRC), Portugal's Securities Market Commission (CMVM), South Africa's Independent Regulatory Board for Auditors (IRBA), and the Canadian Public Accountability Board (CPAB)),⁵⁸ professional organizations,⁵⁹ a group of independent experts,⁶⁰ and the CAQ. Additionally, the FRC in the U.K. issued a consultation document and a feedback statement in 2022 on publishing AQIs for the largest U.K. audit firms,⁶¹ the IRBA in South Africa

⁵⁷ See Accountancy Europe, *Factsheet, Audit Quality Indicators—A Global Overview of Initiatives* (May 2022), available at <https://www.accountancyeurope.eu/wp-content/uploads/220401-Factsheet-Audit-Quality-Indicators.pdf> ("Accountancy Europe Report").

⁵⁸ *Id.* Other oversight bodies in the Accountancy Europe Report include the Federal Audit Oversight Authority (FAOA) in Switzerland and the Accounting and Corporate Regulatory Authority (ACRA) in Singapore.

⁵⁹ *Id.* Professional organizations in the Accountancy Europe Report include the Institute of Public Auditors (IDW), Germany and The Institute of Chartered Accountants (ICAI), India.

⁶⁰ *Id.* Quartermasters, Netherlands.

⁶¹ See FRC, *Consultation Document: Firm-level Audit Quality Indicators* (June 2022), available at https://media.frc.org.uk/documents/FRC_AQI_Consultation.pdf. See FRC, *Feedback Statement: Firm-level Audit Quality Indicators Consultation* (Dec. 2022), available at <https://www.frc.org.uk/>

requested firms auditing listed companies to submit AQI-related information to the IRBA,⁶² and the CPAB launched an exploratory pilot project to solicit feedback on AQIs' usefulness in support of broader national and international discussions.⁶³ The primary users of the metrics from these initiatives were audit committees, oversight bodies, and professional organizations. Although many of the metrics in these initiatives were nonpublic, public reporting was encouraged or anticipated in the future for half of the initiatives.⁶⁴ The Accountancy Europe Report suggested that several factors should be considered when selecting, evaluating, and reporting metrics and recommended that a combination of metrics would provide "profound insight into audit quality."

In January 2023, Accountancy Europe published a position paper.⁶⁵ The position paper defined key concepts related to audit quality, presented considerations for developing AQIs, and explained what, in its view, can and cannot be achieved by reporting such indicators (for example, the paper pointed out that all metrics have limitations, that metrics are not a proxy for financial reporting quality, and that user expectations should be managed to make them aware that metrics do not provide definitive results). The paper stated as part of its conclusion that "[AQIs] should not be considered as an end in themselves but could be a useful tool to drive audit quality" and reiterated that a combination of metrics would provide insight into audit quality.

Some commenters noted that initiatives in other jurisdictions do not currently require public disclosure.

Others suggested that the requirements that the Board proposed were more onerous than other jurisdictions and may cause reporting of different calculations for similar metrics in different jurisdictions. One commenter provided examples in other jurisdictions including providing optional guidance, allowing engagement-level metrics to be shared confidentially with audited entities, and allowing for voluntary adoption. Another commenter expressed its belief that the Board is attempting to justify individual metrics based on certain jurisdictions' use but have not fully considered the context in how they are being used or the process that has been undertaken in those jurisdictions. An additional commenter stated that the comparability problem between jurisdictions could be solved by allowing firms to voluntarily disclose the metrics as defined. One commenter expressed the hope that audit regulators globally will seek to align requirements relating to the reporting of metrics.

While other jurisdictions have not historically required public reporting, the U.K. FRC has announced that it will begin to require public reporting in 2025.⁶⁶

The Board considered the actions taken in other jurisdictions in developing the final metrics. While substantially all the final metrics are the same as, or similar to, metrics used in some other jurisdictions, the Board acknowledges that no other jurisdiction has embraced either the full set of metrics or the public reporting requirements the Board has adopted. However, the Board's objective in understanding actions in other jurisdictions was not to conform to what they have done but rather to consider those actions in the context of the Board's own rulemaking, which is addressed further below. The Board believes that its approach to evaluating and determining which metrics should be disclosed is appropriate in light of its statutory investor-protection mission.

Discussion of the Final Rules

Overview

As noted above, the Board considered ways to measure audit firm and audit performance, primarily with a view to providing information that investors can

use in making decisions regarding their investments, such as ratifying the selection of the auditor and voting for members of the board of directors, including directors who serve on the audit committee. The Board also believes that firm and engagement metrics will benefit other stakeholders. For audit committees, metrics will provide additional context, including consistent comparative information that is not currently available, that can be used when deciding whether to select or retain a firm and when overseeing the auditor's performance. For audit firms, metrics will provide standardized information about themselves and their peers that can be used in designing, implementing, monitoring, and remediating their systems of quality control. The Board will also benefit from having additional tools to use in its inspections program and standard-setting initiatives.

This rulemaking addresses the need for information by requiring consistent, comparable disclosures that the Board believes will provide insight into aspects of the firm and the engagement team conducting the audit, including information relating to workloads, retention, allocation of audit hours, experience, and restatements.

1. Purpose of the Metrics

Investors and other stakeholders lack information that is available to company management. The federal securities laws seek to reduce this information asymmetry through various disclosure, internal control, and other requirements, including requirements for public companies to prepare and disclose financial statements accompanied by audit reports issued by an independent public accounting firm. Investors and other stakeholders also lack information available to the auditor and cannot observe the auditor's work or other aspects of a public company audit. Instead, they must rely on the audit committee, which is charged with overseeing the external auditor, and on other available public information, such as the reputation of the firm issuing the audit report or the name of the engagement partner. These difficulties in evaluating the audit and the auditor may lead to reduced accountability for auditors and an inefficient allocation of audit effort. Such allocations allow audit risk to remain insufficiently evaluated, ultimately risking suboptimal investment decisions, hampering the efficient functioning of the audit profession, and negatively affecting the

⁶⁶ See <https://www.frc.org.uk/consultations/aqis-consultation>. In June 2025, the FRC is requiring firms that audit 20 or more public interest entities to publicly report ten firm-level metrics across five areas. These areas include (i) Performance monitoring and remediation, (ii) Quality monitoring, (iii) Resource planning and people management, (iv) Information and communication, and (v) Governance and leadership.

capital markets.⁶⁷ Furthermore, while the audit committee has more information regarding the specific auditor it oversees, it lacks insight into other audit engagements and other firms; such comparable information would assist the audit committee in more effectively selecting and monitoring the auditor.

Investors and other stakeholders may seek to reduce these information disparities by gathering additional information about the firm responsible for the audit and the relevant audit engagement. As discussed above, the PCAOB has previously sought to facilitate those efforts through rules and standards requiring the disclosure of such information. From its inception, the Board's registration and reporting program has yielded important information about registered firms. Annual updates on Form 2 include information such as the issuers audited by the firm, a breakdown of fees charged to issuers, and network affiliations, and current reporting on Form 3 discloses significant events such as the withdrawal of an audit report and certain legal actions involving the firm or its professionals. The Board concurrently adopted amendments to both of those reporting forms to mandate the disclosure of standardized and timely information by firms.⁶⁸ Firms are required to disclose on Form AP the name of the engagement partner and certain audit participants.⁶⁹ The Board also made the auditor's report more relevant and informative by, among other things, requiring communication of critical audit matters and the tenure of the auditor.⁷⁰ The Board intends the firm and engagement metrics to complement these other initiatives and to add to the mix of information available to investors and other stakeholders when evaluating the auditor and the audit.⁷¹

The Board's oversight activities have revealed that there are identifiable performance differences across firms and among engagement teams within

the same firm, including variations among firms belonging to global networks. The Board considered such differences when performing regulatory functions. For example, the Division of Registration and Inspections uses, among other factors, information about the firm and the engagement to identify audit engagements for risk-based selections in the Board's inspections program.

Mandating public disclosure of firm- and engagement-level metrics will provide investors, audit committees, and other stakeholders with comparable information that is not currently available and will otherwise be difficult or impossible to obtain. These stakeholders will be able to learn about both specific engagements and specific firms and have a basis to compare them to other engagements and other firms. The firms themselves could also benefit from access to information about their peers, both in gaining new perspective on how their practices compare and in potentially gaining new opportunities for competition based on markers that users come to associate with quality. Required disclosures will facilitate development of standardized data for consistent comparison and analysis over time, which the Board believes will be more valuable than the ad hoc, individualized disclosures that some firms have made on a voluntary basis. Mandatory public disclosure will also ensure that the information will be accessible to all stakeholders, so that any decision-useful information can be readily evaluated. The Board believes this information will enable investors, audit committees, and other stakeholders to make better-informed decisions.⁷²

The Board believes the metrics will also assist the PCAOB in a variety of ways. Metrics will help to inform the Board's inspection activities, including in the selection of firms, engagements, and focus areas for review. For example, the final metrics could refine the selection models used to aid in predicting negative audit outcomes, enhancing the Board's risk-based

inspections. They could also enrich the discussions the Board has with audit committee chairs as part of the Board's inspections process. Metrics may also inform future standard-setting activities by helping the Board to identify areas where regulatory action is needed and suggesting potential approaches. In addition, the Board expects metrics to enhance the PCAOB's ability to produce impactful research and to provide valuable information sources for the public, including academic research, helping to create new insights into the audit.

The Board's discussion of the potential benefits of the final metrics in greater detail below.

2. Public Reporting of Metrics

Many commenters on the proposal addressed the fundamental question of whether there was value in mandating a set of publicly reported metrics, expressing conflicting views. Investors and investor-related groups were generally supportive. Many other commenters, primarily firms and firm-related groups criticized the proposal. These commenters either supported public reporting of some firm-level metrics but not others while generally opposing any public reporting of engagement-level metrics, or opposed all public reporting of metrics at both the firm and engagement levels.

Among the commenters that supported the metrics proposal, several stressed the benefits of increased transparency for key stakeholders and the public overall. Several commenters generally agreed with the PCAOB's rationale for the metrics, including increasing competition among audit firms, including on the basis of audit quality; promoting auditor accountability, which will lead to greater audit quality; and providing investors with decision-useful comparable information that will assist them in making decisions about audit-related matters (e.g., ratifying the appointment of the auditor or voting for reelection of Board members that serve on the audit committee). Two of these commenters asserted that investors currently lack information to make an independent and informed decision regarding ratification of the appointment of the auditor and to hold audit committee members to account in the performance of their duties. In that context, one of these commenters pointed out that most failures to ratify the appointment of the auditor occur after a financial reporting failure, and argued that metrics would provide information allowing investors to make

⁶⁷ There is a long stream of research regarding the effects that information asymmetry about product features, such as quality, and disclosure have on markets. See, e.g., George A. Akerlof, *The Market for "Lemons": Quality Uncertainty and the Market Mechanism*, 84 *The Quarterly Journal of Economics* 488 passim (1970); and Robert E. Verrecchia, *Essays on Disclosure*, 32 *Journal of Accounting and Economics* 97 (2001).

⁶⁸ See PCAOB Rel. No. 2024-013.

⁶⁹ See PCAOB Rule 3211.

⁷⁰ See AS 3101.10.b, .11-16.

⁷¹ In addition to disclosures on Form AP and in the audit report, the Board previously required information on periodic and special reports to be publicly available. See *Rules on Periodic Reporting by Registered Public Accounting Firms*, PCAOB Rel. No. 2008-004 (June 10, 2008), 28-32.

⁷² Under Section 102 of Sarbanes-Oxley, the Board may require registered public accounting firms to submit periodic and special reports containing financial or other information as is "necessary or appropriate in the public interest or for the protection of investors." 15 U.S.C. 7212(d). Section 103 of Sarbanes-Oxley tasks the Board with adopting quality control and other standards to be used by registered firms "in the preparation and issuance of audit reports . . . as may be necessary or appropriate in the public interest or for the protection of investors." 15 U.S.C. 7213(a)(1). See also 15 U.S.C. 7211(a), (c)(5), 7213(a)(2)(B). The Board believes the proposed metrics would further the public interest and would protect investors in accordance with these provisions.

an ex ante, rather than ex post, evaluation of the auditor's work.

Two commenters particularly favored engagement-level metrics. One said it would enable the compilation of engagement-level data for all public company audit engagements within a specific office to compare data for competing offices within the same geographic area. In this commenter's view, metrics such as workload would provide great value to prospective employees and would improve the talent pipeline issue because firms' workload need to be competitive in the eyes of prospective employees. Another argued that engagement-level metrics are most useful to investors, using firm-level metrics to provide context. This commenter also emphasized the importance of firm-level metrics, which will provide context in evaluating engagement-level metrics and a firm's audit practice and its related system of quality control.

Several commenters said that the benefits of metrics would likely evolve over time, for example, as users are able to aggregate multiple data points, make comparisons, and observe trends. The Board agrees and believes that analyzing the metrics over time, across engagements and across firms, in the context of known good practices and indicators of audit failure, will enable the PCAOB, as well as academics and users of the metrics, to gain a new perspective on the audit and potentially deeper insights into some of the drivers of audit quality.

Many larger firms generally supported certain firm-level metrics. These commenters generally agreed that firm-level reporting could provide stakeholders with relevant information through consistent disclosure by all firms required to report. While some of the commenters raised concerns about the usefulness, comparability, and risk of misinterpretation of certain firm-level metrics; the risk that standardization of metrics limits their adaptability to change in the business and auditing environment; and more generally concerns that the costs may outweigh the benefits, commenters agreed that the proposed firm-level metrics are generally consistent with voluntary disclosures that some firms are already making in firm transparency and audit quality reports. A discussion of the comments made with regard to particular metrics is provided below.

However, firms and firm-related groups generally opposed engagement-level metrics. Some questioned whether investors would use the metrics. Others expressed concern that publicly available metrics could contribute to

information overload. Many said that it would not be possible to provide sufficient context to enable users to understand the metrics, even with the firm-level metrics or narrative disclosures. Some commenters asserted that, because the underlying circumstances of engagement-level metrics are not homogeneous and users would not have necessary context, engagement-level metrics would not be comparable.⁷³ Others focused on the significance of qualitative factors such as professional judgment and the duty to exercise due care, including professional skepticism, saying that metrics were inappropriately "one size fits all" or not decision-useful because they do not capture these key concepts.

Many commenters expressed concern that users would not find metrics meaningful and may even misunderstand them and reach inappropriate conclusions. Absent providing substantial context and understanding how stakeholders would use the metrics, in one commenter's view, investors may make capital allocation decisions based on a misinterpretation of a metric, resulting in a new element of volatility in the capital markets. Two commenters raised a concern that the proposal does not provide a tie between assessing audit quality and the proposed metrics. Some commenters went on to say that providing metrics in isolation without context and effective two-way communication would have very minimal, or even negative, impact on audit quality. Another commenter stated that most of the data points required as part of the proposal are currently available to the PCAOB.

One commenter expressed concern that overemphasis on metrics could lead firms to focus on consistency of the metrics to avoid the implication of weak auditing or other potential misinterpretations, which in the commenter's view could lead to commoditization of the audit and reduce incentives to innovate the audit approach. On the other hand, several other commenters argued that metrics would support more robust competition based on quality, making the audit less of a commodity.

Some commenters said that the metrics seemed particularly focused on

larger firms or would be especially burdensome for smaller firms. The Board believes the final metrics call for data that will be relevant to and obtainable by firms regardless of size. The potential differential cost impacts are discussed below.

Some commenters questioned whether public reporting of metrics would undermine the authority of the audit committee. For example, one expressed concern that there would be public pressure on the audit committee to appoint auditors whose metrics were perceived to be within some acceptable range, even if the committee was satisfied with the work of the current auditor. Another commenter asserted that it is not investors' responsibility to oversee the auditor, and raised a concern that public reporting of metrics could undermine confidence in audit committees and the PCAOB, both of which have responsibilities for direct oversight of audits and audit firms and have the context to properly understand these metrics. However, an investor-related group specifically disagreed with this reasoning and asserted that this rulemaking exhibits commitment to faithfully executing the PCAOB's responsibilities and working to improve audit quality and trust in the audit market.

Several commenters opposed both firm- and engagement-level metrics. One asserted that the proposal did not provide sufficient evidence that public disclosure of the proposed metrics will have any meaningful impact on the quality of audit services. Another commenter said that the metrics were not grounded in or intended to have any nexus with audit quality, focusing instead on auditor accountability, and on that basis went beyond the PCAOB's remit. The commenter asserted that the proposed metrics would overload audit committees and investors with a large set of complex data that was not sought, needed, meaningful, or obviously usable by them, suggesting that the current voluntary approach should be maintained instead. Another expressed concern that public disclosure of the information specified in the proposals could do more harm than good, particularly in relation to an increase in litigation and reputational risk and potentially furthering the talent crisis in the profession. That commenter particularly questioned the potential value of metrics for audit committees, saying that they already have access to most of the information that would be mandated and that annual reporting would be unhelpful since evaluation of the auditor is a continuous process. One commenter who advocated delay and

⁷³ Commenters listed various types of contexts that in their view would be necessary for proper understanding of the engagement-level metrics, including variations across firms (e.g., differences in operations, structures, methodologies, and resources), the unique circumstances of each engagement (e.g., differences in risk areas, team compositions, and timelines), and the unique circumstances of each issuer (e.g., differences in policies and resources).

further study before the Board takes further action on the metrics expressed skepticism that metrics would influence shareholder votes on ratification of the appointment of the auditor or benefit most investors, because metrics are only indirectly related to audit quality and there would not be sufficient incentive for users to engage with them.

Most of the commenters who objected to public reporting of metrics recommended alternatives, including mandatory or voluntary communication with the audit committee, particularly for engagement-level metrics. Many commenters asserted that the audit committee is the appropriate party to whom engagement-level metrics should be communicated, because the audit committee has the statutory responsibility to appoint, compensate, and replace the external auditor and is sufficiently informed to understand the context of the company, the audit, and the auditor. Commenters said that audit committees could engage in dialog with the auditor, enabling them to understand the metrics in the context of the specific audit, promoting accountability in the performance of the audit on behalf of investors. Another commenter asserted that providing information to, and allowing the assessment by, audit committees would be more likely to provide greater benefits to investors and the capital markets than public reporting, while minimizing unintended consequences (such as users reaching inappropriate conclusions), and would be consistent with the PCAOB's objective to improve audit quality. Another commenter, who questioned the value of metrics for most investors, said metrics had the potential to be quite useful for audit committees, who could use their direct access to the auditor to gain valuable context and would have the opportunity, using metrics, to communicate more about the audit process in their audit committee report. On the other hand, an investor-related group pointed out that audit committees are reliant on communications from the auditor regarding the company's audit issues and the quality of the audit; their principal tool is inquiry, not observation, which, in audit parlance, is the weakest form of audit evidence.

Many commenters that objected to publicly available metrics like the ones the Board proposed advocated a non-prescriptive, principles-based approach, whereby auditors and audit committees would discuss potential metrics and the audit committee would determine which metrics and other information it finds meaningful and when it wants to receive and evaluate them. This

approach, the commenters said, would encourage more tailored metrics that could be appropriately discussed in context and could change over time, adapting to changes in the audit environment, regulation, technology and audit processes, and the information needs of audit committees and investors and would prioritize relevance rather than consistency. Some commenters specifically recommended amending AS 1301 to mandate such a discussion (for example, initially in connection with audit planning and later as part of reporting on audit results). However, one investor-related group disagreed with this principles-based approach, asserting that it would not promote comparability or accountability because a set of principles would inevitably result in qualitative rather than quantitative disclosure and the information would not be comparable between firms and engagements and over time. This commenter asserted that the standardized metrics the Board proposed would be more useful to investors.

This commenter also provided analysis of audit quality reports published by the Big 4 firms, observing that elements of the proposed firm-level metrics are already presented in those reports under a principles-based approach whereby each firm has developed its own metrics.⁷⁴ The commenter noted that some of these metrics are qualitative, some are quantitative, some use different definitions, and some unfavorable metrics or facts may be excluded. This commenter also asserted that because metrics voluntarily published by firms are self-defined and principles-based and are only at the firm level and not at the engagement level, they are largely unused by the investment community; they are regarded as marketing materials rather than investor information. This commenter emphasized that investors need more standardized information contextualized at the engagement-level to the company they are investing in and that are anchored to the firm-level standardized information.

Several commenters noted that it would be possible for audit committees to provide additional public disclosure via the audit committee report in the issuer's proxy statement,⁷⁵ which

⁷⁴ This commenter provided several examples of inconsistencies in reporting metrics. For example, it stated while all Big 4 firms provide data on turnover or attrition, they are defined and calculated in different ways and any comparison among the firms is stymied.

⁷⁵ See Schedule 14A, *Information required in proxy statement*, 17 CFR 240.14a-101. If action is

investors could consider in deciding whether to ratify the audit committee's selection of auditor and whether to vote for the board members who serve on the audit committee. Some of these suggested that the SEC could take action instead of, or along with, the PCAOB. Two argued that expanded audit committee disclosure would result in more relevant and decision-useful information for investors than the proposed metrics or would be a more direct way to address the information asymmetry than through this rulemaking. The other suggested that the SEC, together with the New York Stock Exchange and Nasdaq, should require inclusion of the metrics in the proxy statement to provide context for existing fee disclosures and to make investors aware of the metrics without having to search for them separately.

One firm suggested that the PCAOB gather the information underlying the metrics via inspection. However, this would defeat the objective of enhancing transparency to enable better informed decision-making by stakeholders.

Another firm expressed concern that engagement-level metrics may not be useful because they will become available only once a year, with a delay of up to 35 days after the audit is completed until Form AP is filed. However, an investor-related group disagreed with this argument indicating that the financial results for companies are delivered with the same, or a more significant delay, to investors and usefulness of the information is not simply its immediate discrete disclosure but the trends in the information within and between companies over time.

In addition, commenters raised general concerns about metrics requirements, including

- the risk that publishing metrics would involve releasing confidential or nonpublic information, which may violate confidentiality obligations imposed by the American Institute of CPAs ("AICPA") Code of Professional Conduct or conflict with non-US laws and regulations;
- diverting the attention of the engagement team and firm resources away from performing quality audits;
- lessening competition by releasing competitively sensitive information and reducing the number of registered public accounting firms, particularly in foreign jurisdictions, that would be available to play a substantial role in a large multinational group audit;

to be taken at a shareholders' meeting with respect to the election of directors, Item 7 of Schedule 14A requires the proxy statement to contain a report of the audit committee as specified in Item 407 of Regulation S-K, 17 CFR 229.407.

- being burdensome and costly to compile data for each individual engagement;

- becoming a “check the box” or compliance exercise that may not improve audit quality or provide meaningful transparency to stakeholders; and

- implying that audit committees have a legal duty to consider metrics even though the PCAOB has no authority over audit committees.

The Board adopted requirements for firms to provide both firm- and engagement-level metrics, with changes from its proposal as described in further detail below. The Board continues to believe that public reporting of a mandated set of firm- and engagement-level metrics will provide stakeholders with comparable information that is not currently available, would otherwise be difficult or impossible to obtain, and will position them to make better-informed decisions. Further, the Board believes that required public disclosures will facilitate development of standardized data for consistent comparison and analysis over time, which will be more valuable than the ad hoc, individualized disclosures that some firms have made on a voluntary basis or the information that could be provided by individual firms to audit committees or investors without any basis for cross-firm comparisons. The Board believes the new data points, when analyzed together with the audited financial statements, critical audit matters, auditor tenure, and other information about the firm and the engagement on Form 2 and Form AP, will provide more information about the audit and, therefore, the reliability of the auditor’s report.

The Board considered comments questioning the value of metrics, whether they will be used by investors and other stakeholders or would represent only a “check the box” compliance exercise, and whether they might contribute to information overload or have other negative consequences. Based on comments received from investors and other data provided, among other factors, the Board does not share those concerns. Investors and investor-related groups have commented throughout the course of this rulemaking that the metrics will be useful. A firm-related group commented that, in a recent investor survey it conducted, almost all of the metrics the Board proposed were regarded as “extremely helpful” by between 30% and 50% of participating investors. (The commenter did not indicate whether the survey allowed positive responses other than

“extremely helpful”—for example, “helpful” or “somewhat helpful”—and, if so, what the results were inclusive of those responses.) By contrast, the Board understands—including from one commenter that argues that the voluntary approach should be maintained—that voluntarily provided metrics have not proven useful to investors. The Board believes that the value of voluntary metrics is undermined by a lack of the consistency and comparability, as well as enhanced credibility, that can be achieved through common definitions and calculations and required reporting.

The Board also noted that similar objections—that the new information would not be used or would be confusing or misleading—were raised by many of the same commenters in connection with the Board’s last two rulemakings requiring disclosure of additional information about audits and auditors: Form AP reporting of the name of the engagement partner and information about other firms participating in the audit, and auditor communication of critical audit matters. In both cases, these commenter concerns appear unsubstantiated. The Form AP data set is now one of the most frequently visited areas of the PCAOB website.⁷⁶ Indeed, in an investor survey conducted by one commenter, 79% of respondents indicated that they often or very often navigate to AuditorSearch, the search tool for Form AP data on the PCAOB website. As for CAMs, in a recent investor survey conducted by the same commenter, over 90% of the respondents indicated that CAMs play an important role in their investment decision-making.⁷⁷ In addition, data aggregators, such as Audit Analytics, compile and make available data on CAMs, which suggests market demand for that information. The Board’s experience suggests that contrary to concerns about irrelevance and information overload, stakeholders seek out additional information about auditors and audit engagements when it is available.

In lieu of public reporting, the Board considered the alternative of encouraging or mandating communication of engagement-level metrics to the audit committee, as many commenters suggested. However, such an approach would not achieve the

Board’s goals of increasing the information about audit engagements and audit firms available to investors and other stakeholders, and fostering comparability of data through mandated reporting based on common definitions and specified calculations. The Board also believes that a non-prescriptive, principles-based approach, whereby firms would potentially develop and discuss different metrics for different audit committees, drawn from different data and based on different definitions and calculations and changing over time, could itself create significant costs and challenges for firms without necessarily contributing to the audit committee’s ability to understand the audit it oversees in a broader context.

Of course, under the Board’s final requirements auditors and audit committees will be free to discuss performance metrics—whether the metrics required under the Board’s rules or additional or alternative metrics they develop themselves—through the kinds of discussions the commenters recommend. The Board is not requiring that auditors make metrics-specific communications at this time. However, where matters addressed by the metrics are the subject of an otherwise required communication, discussion of the metrics may be a useful part of the communication.

The Board appreciates that the audit committee is charged by statute with responsibility for oversight of the auditor, and the Board cannot, and do not purport to, impose any obligations on audit committees or imply that audit committees have any specific duties in relation to metrics. The Board assumes that audit committees will fulfill their responsibilities as they see fit; whether that entails, for example, discussion of metrics with auditors or proxy statement disclosure regarding their consideration of metrics will be for them to determine.

But the Board also notes that investors—including many investors that are themselves fiduciaries for others—have their own investment and voting decisions that they are called upon to make, like decisions about electing members of the board of directors, including those who serve on the audit committee, and ratifying the appointment of the auditor. And in the current environment, they have extremely limited access to information about the auditor’s work—work that, after all, is undertaken for their benefit. By requiring public reporting of metrics, the Board is not suggesting that investors will have the ability or the responsibility to oversee the work of the auditor. However, they will have the

⁷⁶ In 2023, there were over 333,000 unique searches performed on AuditorSearch and the Form AP data set was downloaded over 2,000 times. Information related to usage statistics can be found on the PCAOB’s website (<https://pcaobus.org/resources/auditorsearch>).

⁷⁷ The Center for Audit Quality Critical Audit Matters Survey (July 2024) at 9.

opportunity to gain new perspective to inform their decision-making. The Board agrees with a commenter that, far from undermining investor trust, this new transparency should enhance that trust by helping investors better understand the audit and the audit committee's oversight of it.

The Board has determined to go forward with published metrics so that investors and other stakeholders will have direct access to the metrics and so that comparative data can be accumulated that will allow comparisons to be made across different firms and different engagements. As discussed below, the Board believes it has addressed many of the challenges associated with potential lack of comparability by narrowing the metrics to a group that it believes will send relatively clear, comprehensible signals that users will be able to interpret when taken together with the other information about the issuer and the auditor that is available to them. In the Board's view, public reporting is the most practical way for comparative data to be created and disseminated. While two commenters suggested that audit committees could obtain comparative data when they consider changing auditors, the Board's understanding is that is a relatively infrequent occurrence, and in any case is not a route available to other stakeholders.

The Board also believes that gathering data and calculating the final metrics, given the subjects they address, will not be overly time-consuming or burdensome, and will not entail disclosure of confidential or otherwise protected information, as discussed below.

Regarding the concerns of possibly disclosing confidential information and competition lessening effect due to public reporting of metrics; unintended consequences, including attention diversion, litigation and reputation risks, competition lessening effect, and audit labor market impacts; and costs, see discussions below.

3. Legal Authority

Some commenters questioned the Board's statutory authority to require all or some of the proposed firm and engagement metrics. In addition, one commenter stated that the statement in the proposal that "this [rulemaking] would advance investor protection and promote the public interest by enabling stakeholders to make better informed decisions, promoting auditor accountability and ultimately enhancing capital allocation and confidence in our capital markets" is beyond the Board's rulemaking authority. Other

commenters questioned the Board's authority with respect to specific aspects of the rulemaking. Two commenters questioned how the requirements could extend beyond the accounting firms' issuer and broker-dealer audit practices. One of these commenters stated that it believes including non-issuer information could be misleading to stakeholders who may mistake such disclosures as being within the PCAOB's purview and that including the non-issuer portion of a firm's audit practice appears contradictory to the Board's pursuit of clarity through its proposed PCAOB Rule 2400, *Proposals Regarding False or Misleading Statements Concerning PCAOB Registration and Oversight and Constructive Requests to Withdraw from Registration*. This commenter suggested that if the Board intends to make clear what lies within and outside its purview through proposed PCAOB Rule 2400, the rulemaking related to firm- and engagement-level metrics should reflect similar principles.⁷⁸ Another commenter suggested that several new requirements seem to require public production of information that is confidential or otherwise outside of or unnecessary for the Board's oversight function.

In accordance with Sarbanes-Oxley, the PCAOB is endowed with regulatory powers designed to ensure transparency, uphold high professional standards, and protect investors in the auditing process. This discussion outlines the statutory basis for this rulemaking as outlined in Sections 101, 102, and 103 of Sarbanes-Oxley. In particular, here and throughout the release, the Board discussed how the final rules will increase transparency regarding audit practices, increase the comparability and accessibility of information available to investors and others, and enhance investors' ability to efficiently and effectively make investment and voting decisions, in line with the Board's statutory mandate.

Section 102 of Sarbanes-Oxley mandates that each registered firm must submit an annual report to the Board. Beyond this, Section 102 grants to the Board the authority to require more frequent and detailed reporting, empowering the Board to require registered firms to report "such additional information as the Board or the Commission may specify."⁷⁹ This authority must be exercised through PCAOB rulemaking that deems the information "necessary or appropriate

in the public interest or for the protection of investors."⁸⁰ This statutory language supports the Board's authority to adapt its reporting requirements to the evolving needs of audit oversight, thereby enhancing investor protection and public confidence in the financial markets.

The metrics the Board adopted in its release are important for increasing transparency regarding the practices of registered firms, particularly in their audits of issuers. By mandating the disclosure of this information, the PCAOB will enable investors and other market participants to have a clearer and more comprehensive view of the operational practices of the registered firms that audit issuers. This enhanced transparency will allow investors and other market participants to make more informed decisions, contributing to the integrity and reliability of financial reporting and audit practices.

Additionally, Section 103 of Sarbanes-Oxley grants the Board authority to establish auditing standards and quality control standards "to be used by registered public accounting firms in the preparation and issuance of audit reports" as "may be necessary or appropriate in the public interest or for the protection of investors."⁸¹ Although the information the PCAOB requires from registered firms does not appear directly within audit reports, it is comfortably within the ambit of the Board's rulemaking mandate under Section 103—especially given the flexibility inherent in the statutory language.⁸² In brief, this mandate involves establishing the procedures and practices of registered firms that promote the quality and accuracy of audit reports, which extends to

⁸⁰ 15 U.S.C. 7212(b)(2)(H).

⁸¹ 15 U.S.C. 7213(a)(1).

⁸² See *Loper Bright Enters. v. Raimondo*, 144 S. Ct. 2244, 2263 (2024) (the term "appropriate" "leaves agencies with flexibility" (citation and quotation marks omitted)); *Kisor v. Wilkie*, 588 U.S. 558, 632 (2019) (Kavanaugh, J., concurring in the judgment) (the word "appropriate" "afford[s] agencies broad policy discretion"); *Metropoulos Telecomms'ns, Inc. v. Global Crossing Telecomms'ns, Inc.*, 423 F.3d 1056, 1068 (9th Cir. 2005) ("Given the reach of the [FCC's] rulemaking authority under 201(b)"—which granted to the FCC the "broad power to enact such 'rules and regulations as may be necessary in the public interest to carry out the provisions of this Act'"—"it would be strange to hold that Congress narrowly limited the Commission's power to deem a practice 'unjust or unreasonable.'"); *Brown v. Azar*, 497 F. Supp. 3d 1270, 1281 (N.D. Ga. 2020) ("[W]hen an agency is authorized to 'prescribe such rules and regulations as may be necessary in the public interest to carry out the provisions of the Act,' Congress' intent to give an agency broad power is clear."); *appeal dismissed as moot*, 20 F.4th 1385 (11th Cir. 2021) (mem.).

⁷⁸ To date, the Board has not adopted proposed PCAOB Rule 2400.

⁷⁹ 15 U.S.C. 7212(d).

overseeing how firms report their operational conduct.

In alignment with Section 103 of Sarbanes-Oxley, the PCAOB views the rule, form, and associated amendments requiring the metrics as fundamental auditing and quality control standards at their core. The information required by the metrics relates to practices of the firm that directly bear on the conduct of audits and ultimately the quality and accuracy of audit reports. By mandating the submission of this information to the PCAOB, the Board provides deeper transparency into the auditing practices that support issuer audits. The information required by the metrics will also support the Board's oversight and enhance the reliability of audit performance.⁸³

Finally, the Board notes that Section 101 of Sarbanes-Oxley provides ancillary authority that supports the Board's primary powers in Sections 102 and 103.⁸⁴ This provision enables the PCAOB to develop standards that protect investors and serve the public interest.

Some firms and firm-related groups questioned the Board's statutory authority to require the reporting of the proposed metrics on the basis that the Board's rulemaking authority should correspond directly with the type of information outlined in Sarbanes-Oxley Section 102(b)(2) for the contents of registration applications. However, this interpretation significantly misreads the reporting provisions of Sarbanes-Oxley. Sections 102(b)(2)(H) and 102(d) clearly grant to the Board broad authority to require additional information in periodic reports that it finds necessary or appropriate to serve the public interest or protect investors.

Section 102(b)(2) generally details baseline requirements for reported information and Section 102(b)(2)(H) primarily details requirements for any additional information the Board

requires, providing that additional information in reports must be deemed "necessary or appropriate in the public interest." It is incorrect to construe those provisions as imposing a rigid limitation that restricts the content of reports exclusively to the types of information specified in Section 102(b)(2)(A)–(G) for initial registration applications. Indeed, Section 102(b)(2)(H) expressly contemplates the provision of "other information" the Board may require through rulemaking. This provision shows that Congress intended to provide the Board authority to require additional information beyond that enumerated in Section 102(b).⁸⁵ By referencing this provision, Section 102(d) applies this broader authority to periodic reports that the Board finds necessary or appropriate to serve the public interest or protect investors. The Board's release has outlined how the disclosures mandated by the metrics will enhance transparency and bolster the PCAOB's oversight capabilities. Such enhancements are designed to ultimately improve audit quality. For example, as discussed more completely below, the final metrics will enhance (i) audit committees' ability to efficiently and effectively monitor and select auditors as well as (ii) investors' ability to efficiently and effectively make decisions about ratifying the appointment of their auditors and allocating capital. In addition, as an important indirect benefit, the final rules could further spur competition to the benefit of investors. Thus, the final rules align with the overarching objectives of Sarbanes-Oxley, and therefore are appropriate exercises of the Board's authority under Section 102.

In response to the concerns raised by firm commenters regarding the Board's use of Sarbanes-Oxley's relevant "necessary and appropriate" clauses, it is important to clarify that the Board has not claimed any implicitly delegated authority beyond the regulatory

parameters established by Congress. The use of the Section 101, 102, and 103 authorities in this rulemaking is firmly grounded within the explicit mandates provided by Sarbanes-Oxley, and is consistent with the statutory limitations and directives outlined in those provisions. The Board's application of these authorities has been specifically aimed at enhancing the transparency and quality of audits of issuers and broker-dealers, which directly aligns with the Board's core mission to protect investors and the public interest. The Board has utilized the tools provided by Sarbanes-Oxley to carry out the responsibilities entrusted to it.

Other commenters raised concerns about the Board's authority to include metrics extending beyond a registered firm's issuer and broker-dealer audit practice. One of these commenters asserted that including non-issuer information could be misleading to stakeholders who may mistake such disclosures as being within the PCAOB's regulatory purview. The Board disagrees with these comments. The metrics the Board is requiring are designed to provide information that directly relates to firms' audits of issuers, and will be important for such matters as assessing auditor performance and resource allocation as it relates to issuer audits. For instance, in the Workload metric, firms are required to report not only the hours worked dedicated to issuer engagements but the entire workload of the personnel involved. This includes hours spent on non-issuer engagements, training, practice development, staff development, or other firm activities. A narrower focus, which only accounts for hours worked on issuer engagements, could provide an incomplete picture. It would fail to reflect the true extent of the auditor's commitments and how these may impact their capacity and focus on tasks in issuer audit work. Without this comprehensive view, investors and other stakeholders would lack important information to assess the potential risks over overcommitment on audit quality and auditor performance in audits of issuers. By requiring firms to report certain narrowly tailored information regarding their audit engagements and audit practices, the Board is not seeking to extend its purview to regulate those aspects of the firm's operations. Rather, in line with the Board's statutory authority, it is enhancing the transparency and the depth of information available to investors and other stakeholders concerning firms' audits of issuers.

⁸³ See, e.g., Mark DeFond and Jieying Zhang, *A Review of Archival Auditing Research*, 58 *Journal of Accounting and Economics* 275, (2014) (asserting that audit quality improves financial reporting quality by increasing the credibility of the financial reports).

⁸⁴ For example, Section 101(c)(5) empowers the Board to perform additional duties or functions that are "necessary or appropriate to promote high professional standards among, and improve the quality of audit services offered by" registered firms and their associated persons. 15 U.S.C. 7211(c)(5). This provision empowers the PCAOB to implement measures that enhance the integrity and efficacy of the auditing profession. In addition, Section 101(g)(1) provides rulemaking authority to the Board, specifying that the Board's rules, subject to the approval of the Commission, are to "provide for the operation and administration of the Board, the exercise of its authority, and the performance of its responsibilities under" Sarbanes-Oxley. 15 U.S.C. 7211(g)(1).

⁸⁵ See *Navajo Nation v. Dalley*, 896 F.3d 1196, 1212–13 (10th Cir. 2018) ("Congress expressed its scope in broad terms, to encompass 'any other subjects that are directly related to the operation of gaming activities.' But the key word here is 'other.' . . . And applying the ordinary and everyday meaning of the word 'other' . . . , it becomes patent that Congress did not intend for that clause to address the 'subjects' covered in the preceding clauses of subsection (C).") (citation omitted); see also, e.g., *Madison v. Virginia*, 474 F.3d 118, 133 (4th Cir. 2006) ("other Federal statute prohibiting discrimination" is a "catch-all provision"); *Meehan v. Atl. Mut. Ins. Co.*, 2008 WL 268805, at *7 (E.D.N.Y. Jan. 30, 2008) ("The term 'other policies' now accomplishes the task of including all governmental activity and becomes a catch-all phrase including all other policies not already implied[.]" (citations and quotation marks omitted)).

4. Summary of the Metrics

The Board adopted a set of firm-level and engagement-level metrics across eight areas. Firm-level metrics will provide a basis for drawing comparisons between firms as well as a baseline for evaluating engagement-level metrics. Engagement-level metrics will elicit more granular information and will enable comparisons over time and across engagements both within the firm and across other firms.

Firm-level metrics will be disclosed on a new Form FM, *Firm Metrics*, and engagement-level metrics will be disclosed on a revised and renamed Form AP, together with the other engagement-specific information currently required (the name of the engagement partner and information regarding other firms participating in the audit).

Most of the metrics the Board has adopted will be presented at both the firm and the engagement level. However, two metrics will be reported

only at the firm level, because the Board believes aggregated data will be most meaningful or appropriate.

The metrics are:

- *Partner and Manager Involvement.*

Hours worked by senior professionals relative to more junior staff across the firm's large accelerated and accelerated filer engagements and on the specific engagement.

- *Workload.* For senior professionals who incurred hours on large accelerated and accelerated filer engagements, average weekly hours worked on a quarterly basis, including time attributable to all engagements, administrative tasks, training, and all other matters.

- *Training Hours for Audit Personnel.*

Average annual training hours for partners, managers, and staff of the firm, combined, across the firm and on the engagement.

- *Experience of Audit Personnel.*

Average number of years worked at a public accounting firm (whether or not PCAOB-registered) by senior

professionals across the firm and on the engagement.

- *Industry Experience.* Average years of career experience of senior professionals in key industries audited by the firm at the firm level and the audited company's primary industry at the engagement level.

- *Retention of Audit Personnel (firm-level only).* Continuity of senior professionals (through departures, reassignments, etc.) across the firm.

- *Allocation of Audit Hours.*

Percentage of hours incurred prior to and following an issuer's year end across the firm's large accelerated and accelerated filer engagements and on the specific engagement.

- *Restatement History (firm-level only).* Restatements of financial statements and management reports on ICFR that were audited by the firm over the past three years.

Figure 1. Firm and Engagement Metrics Reporting

Firm and engagement metrics reporting	Firm-level	Engagement-level
Partner and Manager Involvement	✓	✓
Workload	✓	✓
Training Hours for Audit Personnel	✓	✓
Experience of Audit Personnel	✓	✓
Industry Experience	✓	✓
Retention of Audit Personnel	✓	X
Allocation of Audit Hours	✓	✓
Restatement History	✓	X

The final suite of metrics focuses primarily on information about audit personnel. The Board believes these metrics will provide new insights into how engagements are staffed, including the extent of involvement of senior personnel; auditors' overall workload; retention of personnel across the firm; and levels of training, audit experience, and industry-specific expertise. The final metrics will also provide information about the extent of audit work completed prior to the issuer's year end, an aspect of the audit process that the Board believes is associated with improved audit outcomes, and about the firm's history of restatements, a key measure of audit outcomes.

This new information will allow users to draw inferences about audits and audit firms that are not possible today. Some may relate to specific metrics. For example, a heavy workload for a particular engagement team relative to the firm average or compared to peer firms may raise questions about the quality of the work performed. Conversely, a relatively high level of industry-specific experience,

particularly for an engagement in an industry requiring specific accounting and auditing expertise, would be a positive signal. Other inferences may relate to combinations of metrics. For example, the personnel-related metrics, taken together, give an overall sense of how an engagement is staffed that can be compared to firm averages and to engagements for similar issuers. It is possible that the precise numerical values of metrics may be important in some cases, but in general the Board believes the metrics will be more useful to convey a sense of whether a particular engagement or firm appears fairly typical or is an outlier in one or more respects. This should provide a richer context for understanding the work of the auditor than the current environment of almost no publicly available information.

Based on the Board's oversight activities, it appears that the largest firms are already tracking data in many of these areas,⁸⁶ and the Board believes that all firms should be able to capture

the data required by the metrics without undue burden. Many of the metrics are based on data that firms already track or will be required to track for purposes of other PCAOB requirements. For example, Partner and Manager Involvement and Allocation of Audit Hours are based on the same "total audit hours" that firms are already required to track for Form AP reporting. Training hours will reflect the same information that firms track to ensure proper licensing of their personnel. Restatement data, to the extent firms are not already tracking it, is required to be tracked under QC 1000.⁸⁷ In addition to required data, many firms track the experience of their personnel, as well as industry experience, for use in marketing materials and for inclusion in requests for proposals, and some firms already track staff retention and turnover metrics as part of their human capital management. Firms should be able to generate other data required by the final metrics, such as Workload,

⁸⁶ This point is discussed more fully below.

⁸⁷ See QC 1000.64g, Note to QC 1000.67e.

from their existing timekeeping systems with minimal additional effort.

Below, the Board provides a detailed discussion of key terms and concepts used in the metrics, as well as a description of each final metric and its calculations.

5. Comparability

Developing comparable data regarding firms and engagements has been one of the Board's key objectives throughout this rulemaking. As noted previously, the information currently provided in firm transparency reports is not based on common definitions or methods of calculation, which prevents users from being able to make comparisons across firms or over time. The Board believes that an important benefit of mandatory reporting will be the ability of investors and other stakeholders to compare the metrics, within the same firm over time, among firms, and among engagements.

The basic approach of the Board's final rules—a required set of metrics, derived from specified calculations incorporating consistently defined terms and concepts—is designed to generate comparable data with respect to firms and engagements that are subject to the reporting requirements. One investor-related group agreed that standardized and contextualized metrics will provide investors with a consistent data set for analysis over time and for comparison between companies and firms and a set of standardized data is more valuable than the ad hoc individual measures that some firms have made on a voluntary basis.

In some cases, considering the importance of scalability, the Board has also designed the proposed metrics as percentages (e.g., relative to total audit hours) or averages where the Board believes that will provide more comparability across firms and engagements than methods based on absolute amounts.

Several firms and firm-related groups expressed skepticism about whether the metrics could generate comparable data because of inherent differences across firms and engagements, either with regard to any metrics or engagement-level metrics specifically. For example, one commenter said that differences between firms and among engagements will create heterogeneity in the underlying data, so that cross-sectional differences and changes over time will be unclear and challenging to interpret, and will cause confusion. Another commenter emphasized the importance of comparability between larger and smaller firms so that investors and audit committees can interpret them appropriately.

Two commenters stated that if context, including qualitative aspects of data, is necessary to understand the metrics, that would suggest that the data are not comparable, which could mean that the metrics are not decision-useful and are at risk of misinterpretation. One commenter expressed the opposite concern, that metrics would become homogenized over time due to peer comparisons, making them considerably less useful to investors.

One commenter asserted that the Board's choices in defining terms and specifying calculations undermine the comparability of the metrics—for example, because some metrics include issuers other than accelerated or large accelerated filers, the Board's proposed industry classification taxonomy differs from the one used by the SEC, and its proposed period for measuring restatements differs from the period used by a commonly-used data provider. These issues are addressed below in the discussion of the final metrics.

With regard to firm-level metrics, several commenters expressed concern that some or all of the metrics would not be comparable across firms. They cited factors such as the size of the firm (including the number of issuer and non-issuer engagements), specialization of the firm's audit practice, strategies, priorities, investments, organizational structure and quality control system of the firm, and size of the issuer (which affects, among other things, whether an integrated audit is required).

Several commenters expressed particular concern about comparability between U.S. and non-U.S. firms because non-U.S. firms tend to have structural, jurisdictional, and cultural aspects that differ from U.S. firms. In addition, non-U.S. firms may have a relatively smaller issuer audit practice, which could skew metrics that are based on the entire practice because there may be significant differences between issuer audits and the rest of the firm's audit practice, and could increase the volatility of metrics based on the issuer practice because of its small size. One of these commenters also criticized the application of metrics to non-U.S. firms because they would not capture the qualitative benefits of being a part of a global network (e.g., use of consistent policies and procedures that drive use of training, technology, consultation and other centrally available support across the network). Another commenter also noted that some non-U.S. firms may publicly report firm-level metrics on similar topics, such as workload, using different calculation methods under PCAOB and local reporting

requirements, which would be costly for these firms and potentially confusing to the users.

Many commenters expressed concern that engagement-level metrics are inherently incomparable. Commenters suggested a number of factors that could affect the comparability of engagement-level metrics, some relating to the firm (e.g., the firm's organizational structure, IT systems, resources, and audit methodologies), some to the individual audit engagement (e.g., selected audit approaches including substantive analytical procedures or test of details, audit findings including internal control deficiencies, use of technology, first year or recurring engagement, and risk of material misstatement), and some to the issuer (e.g., business structure (including the extent of centralization or decentralization and number of business units), complexity of the organizational structure and IT infrastructures, number of significant unusual transactions, and business and industry risks affecting the issuer). In addition, one commenter noted that there are significant developments (e.g., in delivery models, technology, and professional rules and standards) that affect the way audits are performed each year.

The Board solicited comment on whether comparability could be enhanced by further segmenting firm-level reporting (for example, on the basis of the size of the firm or the size of the issuer) or engagement-level reporting (for example, on the basis of industry sector, region, or whether it is a first-year audit). One commenter stated that all stakeholders would benefit from a consistent calculation methodology and comparable presentation format of firm-level reporting. Several commenters indicated that more disaggregated data for engagement- or office-level reporting could be useful, though one acknowledged that this benefit would need to be weighed with the cost of requiring this data. Other commenters cited challenges associated with providing subsets of information, including that firm and issuer sizes change over time and that smaller firms' metrics could disclose individual client information. One of these asserted, however, that the reported data could be disaggregated and compared without additional data fields being collected.

The Board determined not to collect additional data fields or require additional segmentation of the metrics at this time because of the potential cost and complexity it would add to the process of compiling and reporting the metrics. Stakeholders that want to perform more detailed analysis (for

example, segmenting data based on size of the issuer, size of the firm, region, or industry sector) will be able to do so using information that is already publicly available in combination with the metrics.

The Board understands that firms differ from each other in the number and types of audits they perform and in their resources, such as the number, experience, and degree of specialization of their people as well as their access to technological resources and resources provided by networks. The Board also understands that engagements differ based on factors such as the size of the engagement, the industry of the company, the risks related to the company and the audit, whether it is a new engagement for the firm or the engagement partner.

However, the Board does not believe that such differences make useful, comparable metrics impossible. As one commenter noted, investors are experienced in using a wide array of performance metrics, such as non-GAAP measures and key performance indicators, and are able to analyze them despite a lack of perfect comparability between companies or over time. Indeed, the commenter argued that, due to the nature of the audit process and audit firms, the proposed firm and engagement metrics have a greater propensity for comparability than many companies whose financial results investors already analyze.

The Board believes it has also addressed many of the challenges associated with potential lack of comparability by narrowing the metrics to a group that should send relatively clear, comprehensible signals in a variety of different contexts. Metrics on workload, training hours, experience in public accounting, retention of personnel, and restatement history should send a clear signal, regardless of the circumstances of the firm and the engagement. Metrics on partner and management involvement and allocation of audit hours may be more influenced by those circumstances. For example, unusually high involvement by senior professionals could signal an especially complex audit or one that encountered unexpected problems; a relatively low percentage of audit hours incurred before year end could signal a poorly planned audit or simply that, due to the nature and scope of a company's business, it was unnecessary or impractical to perform many audit procedures prior to year end. The Board has limited the scope of the Partner and Manager Involvement, Workload, and Allocation of Audit Hours metrics to large accelerated filer and accelerated

filer engagements to enhance the comparability of the underlying data. The metric on relevant industry experience may also be influenced by the circumstances of the firm and the engagement in that industry experience may be more important in some industries than others. However, the Board believes users will be able to interpret this metric when taken together with the other information about the issuer and the auditor that is available to them. Common definitions and consistent methodology will also contribute to comparability. Taken together, the metrics should enable users to make both broad comparisons across the full population of reporting firms and accelerated filer and large accelerated filer audits, and more targeted comparisons across smaller subgroups of similar firms and engagements, and will be a very significant improvement over the information that is currently available—ad hoc reporting by the largest firms at the firm level, and essentially no information at the engagement level.

Of course, any additional context that firms believe is necessary for proper understanding can be provided as narrative disclosure. While narrative disclosure will not make the metrics comparable, it will balance the comparability of standardized metrics disclosure with the ability to provide further context if needed. For example, a firm could provide an explanation for why a metric changed significantly from what was reported in the prior year.

6. Time Period Covered by the Metrics

Firm-level metrics are reported as of September 30, generally covering the period from October 1 of the previous year through September 30.⁸⁸ Specific commenter feedback regarding the reporting period is discussed in detail below. Firms are required to file Form FM on or before November 30, 61 days after the end of the reporting period, also discussed below.

Related to the Training Hours for Audit Personnel metric, the Board understands that many firms already have defined periods or cycles that may not align with the final reporting date (e.g., for which the firm tracks training data in order to comply with state continuing professional education (“CPE”) reporting requirements). Therefore, the firm is permitted to use its already-established training calendar

cycle for calculation and reporting of this metric, provided that the cycle covers a 12-month period (which is expected to be consistently applied). The Board does not believe that the data will be especially sensitive related to any particular 12-month period. The Board believes allowing firms flexibility to use their internally established dates for this metric is appropriate and still provides the comparability discussed above since all firms would be reporting this metric based on a 12-month period.

For engagement-level metrics, which will be reported on Form AP, the data and information underlying the reported metrics will generally be based on the most recent period's audit. However, some engagement-level metrics relate to information about personnel on the engagement, such as Experience of Audit Personnel, and these metrics will reflect information that may not be directly related to the most recent period's audit. Specific commenter feedback regarding the reporting period and filing date of Form AP is discussed in detail below.

In addition, the time period covered by each metric also is discussed in more detail below.

7. Rounding and Use of Estimates

Many of the metrics involve the calculation of a numerical value that may result in very small fractional parts. Consistent with the proposal, firms are required to report metrics that are rounded to the nearest whole number, except where additional decimal places (no more than two) are needed to properly interpret the result or to enable comparison to prior periods.

In calculating the firm- and engagement-level metrics, actual amounts should be used, if available. However, if actual amounts are unavailable, firms are permitted to use a reasonable method to estimate the components of a calculation. This approach is consistent with existing Form AP, which allows firms to use a reasonable method to estimate certain information required in the calculation of total audit hours.⁸⁹ Firms are also required to document in their files the method(s) used to estimate amounts when actual amounts are unavailable.

Commenters generally agreed with the proposed approaches, with one commenter agreeing that rounding and estimation should be permitted for all metrics. Other commenters stated that rounding and estimation will be

⁸⁸ For two of the metrics areas the Board proposed, Quality Performance Ratings and Compensation and Audit Firms' Internal Monitoring, firms would have reported based on their own internally established cycles. Neither of these is included in the metrics the Board adopted.

⁸⁹ See Instructions to Part IV of Form AP as currently in effect. Under the amendments to Form AP adopted by the Board, this appears in General Instruction 9, as amended.

especially important for metrics related to the reporting of hours, with two of these pointing to the subjectivity involved with the proposed metrics that would require allocation of hours to specific audit areas.⁹⁰ One commenter stated that the PCAOB should not restrict the number of decimal places. However, the Board believes that limiting reporting to hundredths will allow for the presentation of an appropriate level of detail while ensuring comparability of presentation and avoiding the technical issues that could arise with unlimited digits.

8. Operational Narrative Disclosure
