In order to give firms the ability to provide any context they thought necessary for an appropriate understanding of the reported metrics, the Board proposed that firms would be permitted, but not required, to provide a brief narrative disclosure (no more than 500 characters per metric) to accompany any, or all, of the firm-level and engagement-level metrics reported on Form FM or Form AP. While some commenters agreed with the proposal to provide firms with the ability to include an optional narrative to accompany the metrics, one commenter explicitly agreed with the proposed 500-character limit, one commenter asserted that the 500-character limit greatly limits the context that could be provided, and one commenter suggested revising the character limit to no more than 1,000 characters. Two commenters suggested increasing the character limit beyond 500 characters without suggesting an upper limit. Approximately half of the commenters suggested that there should be no character limit imposed on the optional narrative. A firm-related organization also suggested that the narrative be mandatory and not optional, while a firm suggested that the utility of metrics would be diminished without potentially extensive accompanying narrative.

One commenter suggested that firms can also provide a link in the narrative to their transparency reports and audit quality reports if they wish to provide further context to the metrics. One commenter stated that there should be guidelines such as the narratives being factual, directly relevant to the metric, and free from promotional or marketing language. Another commenter stated that it would provide the following narrative in Form FM, potentially with respect to every firm metric:

We do not believe any one metric or even a combination of metrics is necessarily indicative of audit quality, nor is it useful or productive to speculate on the questions reviewers of this information may have on each metric for every audit. We further discuss this metric in our Audit Quality Report, along with the measures we believe are better indications of our audit quality.⁹¹

Taking into consideration commenter feedback, the Board is retaining the option to provide narrative disclosure with each metric but expanding the character limit to 1,000 characters. The Board believes this character limit strikes the right balance between allowing firms the ability to provide any contextual information they believe is necessary to interpret the results of a particular metric while also managing the length of the forms and keeping them to a manageable size.⁹²

In addition, in an effort to assist firms in making the optional narrative disclosures as helpful and substantive as possible, to help remind firms of their responsibility under QC 1000 to produce and report information that is accurate and not misleading, and to reduce the possibility that users will find the narrative confusing or in conflict with the required metrics, the following provision has been added as a general instruction to Form FM and a note to Part VI of Form AP to provide additional direction to those firms electing to provide an optional narrative for any metric:

“When the Firm elects to provide a brief narrative to accompany any of the Items in [the part of the form in which metrics are reported], language should be concise and focused on the reported metrics, with a view to facilitating the reader’s understanding of the metrics.”

Firm and Engagement Metrics

1. General Comments

Investors and investor-group commenters were broadly supportive of the proposed metrics, saying that the metric areas would provide investors with decision-useful information about audit firms and audits. However, they expressed mixed views on certain specific metric areas. These commenters also suggested additional metric areas, including investments in both training audit professionals and in technology, and further details related to PCAOB inspection results (e.g., Part I.A deficiencies). The Board has addressed these comments in the discussion of

each metric area below. On the topic of implementation of the proposed metrics, one commenter requested analytical tools and research showing how investors might use metrics. The information disclosed on Form FM will be available in a searchable database on the Board’s website, similar to the Form AP database, and will provide users of the information the ability to perform comparisons across engagements.

Firms and firm-related groups were broadly supportive of some of the proposed firm-level metrics. However, they generally opposed public reporting of engagement-level metrics, asserting that no amount of context around engagement-level metrics would provide an appropriate basis for public reporting. These commenters suggested that the audit committee, being deeply familiar with the company, the audit, and the independent auditor, is the only party equipped to appropriately interpret the metrics. Instead of public reporting, they suggested several alternatives, including adding a requirement for communication to the audit committee under AS 1301; expanding SEC requirements for audit committee disclosures; encouraging voluntary reporting; issuing PCAOB Spotlights, practice alerts, or guidance; and performing further outreach before adopting any requirements. These alternatives are discussed in greater detail above. One commenter suggested that the PCAOB take a proactive role in educating all users as to the proper use of reported metrics, including the need for them to be interpreted in context and making users aware of potential dangers and drawbacks associated with a mere comparison of isolated metrics between firms. The Board discussed the forms and how the data can be accessed in more detail below.

Commenters generally expressed concern that proposed metrics were not all calculated from the same data sources. Some metrics were calculated on the basis of all audit engagements, others on the basis of issuer engagements, and engagement-level metrics on the basis of large accelerated and accelerated filer engagements. Some commenters suggested that calculating firm-level metrics based solely on total audit hours on large accelerated and accelerated filer engagements may result in more comparable data among firms. The Board discussed this in greater detail below.

Other commenters recommended that the PCAOB establish criteria for determining which metric areas warrant public disclosure, so as to build in flexibility over time and minimize the risk of misinterpretation. The following

⁹⁰ The proposed Audit Hours and Risk Areas metric is not included in the metric that the Board adopted, as discussed further below.

⁹¹ See Letter from PricewaterhouseCoopers LLP (June 7, 2024).

⁹² Nothing in PCAOB rules and forms, including Form FM and Form AP, provides for incorporation by reference of external documents or other materials.

criteria were among those suggested by these commenters:

- Is the metric's relation with audit quality unambiguous?
- Can the metric be appropriately interpreted on its own, without additional context (e.g., client mix or complexity—size, industry, international operations; firm's audit approach; etc.)?
- If disclosure of the metric results in behavioral change in audit firms, does research suggest the change will improve audit quality or, at least, not adversely impact audit quality?
- Will the metric require firms to develop systems, processes, and procedures that they do not already have and at a reasonable cost?
- Will the metric impose ongoing administrative burdens on engagement teams that result in a reallocation of effort away from audit quality enhancing activities?
- Will the metrics align with measures used in the system of quality control to manage the audit practice?
- Will the metrics meet the information needs of the users?
- Will the disclosure of metrics not result in the communication of proprietary information?

In responding to commenters and articulating the rationale for adopting the firm- and engagement-level metrics below, the Board considered the views of commenters, including these suggested evaluation criteria. The Board believes some of the suggested criteria would impose an unworkable framework that is inconsistent with the Board's regulatory objectives. For example, the Board does not think it is necessarily practicable to establish an "unambiguous" relationship to audit quality, as suggested, for any individual metric, nor would such an exercise be consistent with the intended uses of the metrics, which envisions their being considered as part of the total mix of information available to stakeholders. Moreover, the Board believes that imposing rigid criteria for each proposed metric imposes too high a burden and is not conducive to effective regulation. It does not permit the Board to account for facts and circumstances unique to individual metrics and their potential uses, nor does it account for the holistic manner in which the Board intends for the metrics to be used or developing information about the utility of the metrics over time.

A number of commenters recommended that the PCAOB engage in additional stakeholder outreach, sponsor pilot programs, or otherwise engage in further study and research before finalizing the metrics

requirements, or even withdraw the proposal. Based on the lengthy project history described in Section II, which includes repeated input over time from the Board's advisory groups, multiple rounds of public notice and comment, study of relevant academic literature, study of voluntary firm disclosures, and consideration of actions taken in other jurisdictions, the Board does not believe further study is necessary or that the Board's investor protection mission would be served by delaying adoption of the final rules. However, the Board will monitor and determine if further implementation resources or support is appropriate for users of these metrics.

2. Key Terms and Concepts

As described below, the Board developed certain key terms and concepts that were used in calculating the proposed metrics. Where practical and relevant, these key terms and concepts align with existing definitions in PCAOB standards and rules. In other cases, the Board has developed new definitions and new descriptions of terms specifically for use in the metrics, which are not intended to inform the interpretation of other rules, standards, or forms of the PCAOB. The Board provided the key terms and concepts along with formulas for calculating each metric to drive consistency among firms and engagement teams.

One investor-related group said that the units of account (e.g., hours, years of experience) or measurement used within the proposed metrics are sufficiently standardized and adaptable by firms as they are commonly used within audit practice or defined within the existing standards.

Some commenters raised concerns about the definitions and descriptions of the population used for various metrics or about not having a defined set of terms applicable to all standards and rules. Other commenters questioned whether the PCAOB had provided sufficient guidance to address potential variations in the interpretation and application of terminology used in the metrics or asserted that not having sufficient guidance would add complexity and challenges in calculating the metrics and understanding them or result in inconsistent reporting of metrics or lack of comparability across audit firms and audits engagements. Two of these commenters recommended that the PCAOB create a glossary of defined terms to support consistent use of terms throughout the standards and rules or conduct additional study to evaluate the defined terms in the proposal against terms already defined in other PCAOB

standards and rules. Another commenter raised a concern that defining terms and specifying computations for each metric undermines their comparability.

Some firms offered examples of areas where they suggested that clarification would be needed, which the Board discussed below in the context of the relevant metrics. In general, however, the Board continues to believe that the use of defined terms is critical to driving consistent calculation of the metrics.

Other firms questioned why different metrics are based on different underlying data (for example, total audit hours vs. total hours worked or engagement team vs. core engagement team). In general, the Board's choice of the data on which to base a metric is tailored to the intended objective of the metric, and also takes into account the practicality and potential costs associated with gathering data and calculating the metrics. The Board does not believe that metrics based on a single data set would be as clear or as informative.

The Board addresses specific concerns raised in the discussion of each metric below. The Board has clarified certain terms and concepts used or revised the descriptions of proposed terms and concepts after consideration of the specific comments received.

i. Populations Covered by the Metrics

a. Partners and Managers (Used in All Metric Areas Except for Allocation of Audit Hours and Restatement History); Staff (Used in Training Hours for Audit Personnel)

While some of the functional roles played by individuals involved in an audit are otherwise defined and used in the Board's standards (e.g., engagement partner⁹³ and EQR),⁹⁴ the Board proposed to clarify following additional functional roles referred to in the metrics to ensure consistent reporting by firms.

Partners—Partners or persons in an equivalent position (e.g., shareholders, members, or other principals) who participate in audits;⁹⁵

⁹³ See paragraph .A1 of AS 1201, *Supervision of the Audit Engagement* ("the member of the engagement team with primary responsibility for the audit").

⁹⁴ See AS 1220, *Engagement Quality Review*, for a description of the engagement quality reviewer's role.

⁹⁵ As noted in the proposing release, the Board believes this is consistent with the use of the term "partner" in the Board's auditing standards. Although the Board does not usually state expressly that partners are limited to those who participate

Managers—Accountants or other professional staff commonly referred to as managers or senior managers (or persons in an equivalent position) who participate in audits; and

Staff—Accountants or other professional staff who participate in audits and are not partners or managers.

Some engagement-level metrics differentiate between engagement partner and the other partners who participate in the audit. The Board believes the differences between the responsibilities borne by engagement partner and those of other participating partners justify presenting data for the two categories separately in those metrics. For firm-level metrics, “engagement partners” include all partners who served as the engagement partner on any audit the firm performed of an accelerated filer or large accelerated filer. Partners that are included in the metrics as an engagement partner are not included as an “other partner,” even if they served in a non-engagement partner role in other audits (in other words, partners are only counted once within any metric).

The Board adopted the definitions of partners, managers, and staff as proposed, with clarifications discussed below.

The Board solicited comment on whether the proposed definitions of partners, managers, and staff are clear and appropriate. Two commenters agreed that the proposed definitions for partners, managers, and staff are clear and appropriate, one saying that linking the definitions used in the metrics to existing definitions would help in preventing multiple definitions throughout the auditing standards. However, some commenters expressed concern that titles and roles are not consistent across firms or most firms have roles which do not clearly or obviously reconcile to the roles listed. One of these commenters also raised a concern about continuing emphasis on the engagement staffing model that currently exists, on the basis that artificial intelligence and other tools could affect the staffing of audit engagements in the future. This commenter recommended including “contractors” engaged by firms in the definition and clarifying whether the definitions are meant to be descriptions of the roles rather than legal interpretations of the roles. Another commenter recommended aligning the definitions of partners, managers and staff with the definition of engagement

in audits, as a practical matter the Board’s auditing standards apply only in those circumstances.

team, by using the phrase “who perform audit procedures” instead of “who participate in audits” to avoid inclusion of personnel who may participate in audits in an administrative or project management function, but who do not perform audit procedures. Another commenter expressed concern that audit effort associated with roles typically referred to as “national office” and “professional practice development,” especially for managers through partners, would be excluded from the definitions and calculations of the metrics.

For the definition of partners, one commenter questioned whether the definition is intended to have any alignment with ownership interests in a firm and requested clarification as to how a leadership level role such as a managing director would be classified because, in the commenter’s view, that role does not appear to meet the definition of either a partner or a manager.

For the definition of managers, the same commenter requested clarification on whether the manager title is based on the person’s general title in the firm because, for example, in certain cases an experienced supervisor may serve a manager capacity on a less complex engagement. Another commenter suggested adding a specific number of years of audit experience to the definition of managers because of the risk that firms could inflate percentage of audit hours incurred by managers by changing the titles of more junior professionals to increase the number of managers.

The Board adopted the definitions of partners, managers, and staff as proposed. Because there are differing legal structures and titles among firms, the Board is providing foundational definitions so that each firm can allocate its professionals in three levels: partners, managers, and staff. The Board believes that the vast majority of firms have these three levels, and that, although staffing models may change over time, these levels are likely to be retained for the foreseeable future. The Board also believes that other job titles, such as managing director, can be fit into the appropriate category based on the level of responsibility assigned to them. For example, in a firm where managing directors are given similar responsibilities as the firm’s principals (for example, signing authority on audit engagements), they would be treated as partners under the Board’s definition; otherwise, they would align with managers. Similarly, professionals in a firm that does not use the title “manager” would be reported as

managers if they are assigned the duties that are typically carried out by managers and senior managers at firms that do use those titles. Professionals who work under the firm’s direction and control and function as the firm’s employees, such as secondees and contractors, may or may not have these titles but would be reported based on their level of responsibility and decision-making authority. In all cases, the determination would be made based on the responsibilities, decision-making authority, and scope of duties of the person. If necessary, firms could utilize the optional narrative disclosure to describe how the firm aligned their categories of professionals with partners, managers, or staff levels.

The Board considered adding a specified minimum number of years of audit experience in the definition of manager but determined not to. Some managers qualify for promotion with fewer years of audit experience due to other relevant education or experience. The Board was concerned that building a minimum number of years of audit experience into the definition would result in people with the responsibilities and title of manager being required to be reported as staff, making the metrics less meaningful while increasing the administrative burden associated with reporting.

The Board did not use the phrase “who performed audit procedures” in the definitions of partners, managers, and staff because use of this term would exclude professionals who do not perform audit procedures—for example, partners who only conduct engagement quality reviews⁹⁶ or national office personnel in connection with certain types of consultations that are not audit procedures.

Because the definitions of managers and staff are limited to “accountants or other professional staff,” administrative personnel are not included.

In the Board’s proposal, the Board generally did not specify how to account for promotions within the reporting period from one level to another (e.g., from manager to partner),⁹⁷ although the Board noted that firms would be expected to be consistent in their approach across metrics. The only commenter to address this issue supported the flexibility

⁹⁶ Engagement quality review is not considered the performance of an audit procedure. See AS 1220.07 (The EQR “should not make decisions on behalf of the engagement team or assume any of the responsibilities of the engagement team.”).

⁹⁷ Note, however, that the Retention of Audit Personnel metric treats promotions as if they had occurred at the beginning of the year. See note to Item 4.6 of Form FM.

proposed with respect to the treatment of promotions. Consistent with the proposal, the final rules do not impose any prescriptive requirements regarding the reporting of professionals whose job title or responsibilities change during the reporting period. However, the Board believes that treating such transitions inconsistently, whether within a metric or across metrics, would be misleading and the Board expects firms to report such changes in a consistent way.

(1) Participate in Audits (Used in the Terms Partners, Managers, and Staff)

“Participate in audits” is a broad concept that would include the work of all professionals (partners, managers, and staff) that are involved in the firm’s audits, including tax personnel, information technology (“IT”) personnel, and employed specialists.

The Board proposed the phrase “participate in audits” rather than referring to the activities of individuals assigned to a specific business line, such as the firm’s audit practice, because some firms do not assign individuals to specific business lines. However, the Board solicited comment on whether the relevant population would be partners, managers, and staff of the firm’s audit practice, if the firm assigns its professionals to specific business lines.

Some commenters agreed with the phrase “participate in audits” as used in the proposal. One of these commenters suggested that, because firms have different structures, attempting to separate members of the engagement team based on a firm’s structure could lead to less comparability across metrics. One firm stated that it assigns individuals to specific business lines, and collecting data based on that assigned business line would be more practical to implement versus the proposal’s requirement to include all individuals participating in audits.

Some other commenters stated that firm-level metrics should look only to the firm’s audit practice because (i) the inclusion of other service lines in the metrics would impair comparability between firms due to the varying size and scope of non-assurance practices and (ii) the work of tax professionals and consultants would not improve the usefulness of these metrics for the purposes outlined in the Board’s proposal. Another commenter requested clarification on how to account for individuals who move between audit support roles and engagement-facing functions.

The final definitions of “partners,” “managers,” and “staff” include the

phrase, “who participate in audits,” as proposed. Because some firms do not assign partners and other professionals to a specific business line, the Board believes this approach is the best way to drive consistent reporting by firms with different organizational structures.

In the proposal, the Board clarified that members of the engagement team who participate in audits would include every partner and manager who worked on any aspect of the audit, even if their involvement was extremely limited. The Board proposed not to provide a participation threshold, such as a minimum number of hours, because the Board believes, based on the objectives of these metrics, that the metrics should capture all partners, managers, and staff who participate in audits in any capacity. However, the Board solicited comment on whether the concept should include a participation threshold.

One commenter agreed there was no need to create a minimum threshold for participation on the basis that it would increase the complexity and cost of calculating the metrics without a corresponding benefit. Another commenter recommended establishing a minimum threshold for participation because exclusion of professionals with certain firm roles (e.g., firm leadership, national office, or specialist line of service individuals with limited participation during the year in any specific engagement) would not reduce the reliability of the metric. This commenter further recommended creating a minimum threshold for purposes of firm-level metrics, such as individuals who spent more than 10% of their time participating on audit engagements, and engagement-level metrics (e.g., similar to the concept of core engagement team). This commenter and another commenter recommended the additional threshold as optional for firms to use due to cost-benefit considerations, particularly for smaller firms, and should only be considered if additional thresholds allow for simpler aggregation or preparation of the data.

The Board did not adopt additional thresholds to be used for firm-level or engagement-level metrics, except for the concept of core engagement team used in certain engagement-level metrics discussed below. The objectives of the five metrics that use “partners, managers, and staff of the firm” are to understand the firm’s professionals who participate in audits in totality, and the Board believes imposing a threshold on what counts as participation would defeat that objective.

(2) Partners, Managers, and Staff “of The Firm” (Used in Workload, Training Hours for Audit Personnel, Experience of Audit Personnel, Industry Experience, and Retention of Audit Personnel)

Because firm-level metrics provide information about the firm, in calculating some firm-level metrics, the Board proposed to include partners, managers, and staff “of the firm,” which refers to individuals participating in audits who work for the firm or work under the firm’s direction and control and function as the firm’s employees (e.g., secondees and contractors), regardless of whether the audits are performed under PCAOB standards or other auditing standards.⁹⁸ The Board believes including individuals in the firm-level metrics who participate on any firm audit is appropriate because these metrics would provide information about the firm and not about specific engagements (for example, in the area of firm-level industry experience, which would be relevant across a firm’s entire audit practice). The Board added a new section to Part III, Terminology in Form FM to clarify the meaning of these phrases. The Board also clarified that participation in audits means any involvement (including, for example, consultation on specific matters), and thus may include individuals outside the engagement team, such as national office personnel.

b. Engagement Team (Used in Partner and Manager Involvement)

The Board proposed to provide information about partners and managers on the engagement team, a term defined in AS 2101, *Audit Planning*.⁹⁹ The Board believes it is

⁹⁸ This should be interpreted consistently with “firm personnel,” as defined in QC 1000.A5.

⁹⁹ The “engagement team” is defined in AS 2101.A3 [as adopted by the Board in Planning and Supervision of Audits Involving Other Auditors and Dividing Responsibility for the Audit with Another Accounting Firm, PCAOB Rel. No. 2022–002 (June 21, 2022)], to take effect with respect to audits of fiscal years ending on or after December 15, 2024] as follows (footnotes omitted):

.A3 Engagement team—

a. Engagement team includes:

1. Partners, principals, and shareholders of, and accountants and other professional staff employed or engaged by, the lead auditor or other accounting firms who perform audit procedures on an audit or assist the engagement partner in fulfilling his or her planning or supervisory responsibilities on the audit pursuant to this standard or AS 1201, *Supervision of the Audit Engagement*; and

2. Specialists who, in connection with the audit, (i) are employed by the lead auditor or an other auditor participating in the audit and (ii) assist that auditor in obtaining or evaluating audit evidence

appropriate to provide metrics related specifically to the engagement team because this would provide investors and other stakeholders with relevant information related to the audit as a whole, who perform audit procedures on the audit or assist in planning or supervising the audit.

One commenter suggested clarifying whether “engagement team” for purposes of this rule includes internal specialists. Another commenter stated that the proposal appeared to provide an

alternative definition of partners and managers on the engagement team compared to AS 2101, which is aligned to other PCAOB standards, and recommended providing clarity as to the treatment of specialists. Another commenter expressed concern that the definition of “engagement team” under AS 2101 could have ramifications for the calculation of engagement-level metrics, but did not provide any indication of what those ramifications might be.

The Board adopted the AS 2101 term “engagement team,” as proposed. The definition of engagement team in AS 2101 includes specialists who, in connection with the audit, (i) are employed by the lead auditor or an other auditor participating in the audit and (ii) assist that auditor in obtaining or evaluating audit evidence with respect to a relevant assertion of a significant account or disclosure. It excludes engaged specialists.

Figure 2. Engagement Team Members

Examples of Engagement Team Members	Examples of Parties Who are NOT Engagement Team Members
- Engagement partner - Personnel from the engagement partner's firm who perform audit procedures on the audit - Personnel of accounting firms and individual accountants outside the engagement partner's firm who perform audit procedures on the audit supervised under AS 1201 - A firm professional in the national office or centralized group in the firm (including within the firm's network) who performs audit procedures on the audit or assists in planning or supervising the audit	- Auditor-engaged specialists¹⁰⁰ - Engagement quality reviewer and those assisting the reviewer¹⁰¹ - Service auditors of a third-party service organization¹⁰² - A firm professional who performs a contemporaneous quality control function (e.g., internal inspection or quality control review) but does not perform audit procedures or help plan or supervise the audit work - Individuals employed or engaged by the company being audited, such as a company's internal auditors, a company's specialists, and a company's consultants¹⁰³

with respect to a relevant assertion of a significant account or disclosure.

b. Engagement team does not include:

1. The engagement quality reviewer and those assisting the reviewer (to which AS 1220, *Engagement Quality Review*, applies);

2. Partners, principals, and shareholders of, and other individuals employed or engaged by, another accounting firm in situations in which the lead auditor divides responsibility for the audit with the other firm under AS 1206, *Dividing Responsibility for the Audit with Another Accounting Firm*; or

3. Engaged specialists.

c. Core Engagement Team (Used in Workload, Training Hours for Audit Personnel, Experience of Audit Personnel, and Industry Experience)^{100 101 102 103}

For some engagement-level metrics, the Board proposed to include information about members of the “core engagement team” rather than the full “engagement team,” so as to focus the metrics on the individuals who make the primary decisions regarding planning and performance of the audit and determine the final conclusions supporting the auditor’s opinion. With

the “core engagement team” concept, the Board intends to provide more meaningful and focused data by excluding information about certain partners and managers with lesser participation. The Board also simplifies the data collection effort by limiting these metrics to firm personnel.

The Board proposed that the core engagement team would include the engagement partner and members of the engagement team who are partners or employees of the firm issuing the audit report. In addition, under the proposal, core engagement team would include

either a partner (excluding the engagement partner as described above) who worked ten or more hours on the engagement or a manager or staff who worked on the engagement for 40 or more hours or, if less, 2% or more of the total hours.¹⁰⁴

Figure 3 illustrates how partners, managers, and staff used in the calculation of the metrics, relate to the firm, engagement team, and the core engagement team.

Figure 3. Relationship Between the Groups of Individuals Included in Metric Calculations

Partners, Managers, and Staff

The Board solicited comments on whether the proposed definition of core engagement team, and the proposed participation thresholds for inclusion in

the core engagement team, were appropriate.

One commenter agreed that at the engagement level, metrics related to only the core engagement team will be

more useful to investors and other stakeholders. Two commenters supported the proposed 10-hour minimum threshold for partners other than engagement partners. One of these

¹⁰⁰ See AS 1210, Using the Work of an Auditor-Engaged Specialist.

¹⁰¹ AS 1220 applies to those persons.

¹⁰² AS 2601, *Consideration of an Entity's Use of a Service Organization*, sets forth the auditor's responsibilities with respect to using the work of service auditors who issue reports on the controls of a third-party service organization.

¹⁰³ Because of their roles at the company, the work of individuals employed or engaged by the company is not subject to supervision under AS 1201; they are not considered members of the engagement team under the adopted definition. PCAOB standards include requirements regarding the auditor's use of work performed by some of these individuals. See, e.g., AS 1105, *Audit*

Evidence, Appendix A; AS 2201, *An Audit of Internal Control Over Financial Reporting That Is Integrated With An Audit of Financial Statements*; AS 2605, *Consideration of the Internal Audit Function*.

¹⁰⁴ See below for the discussion of “total audit hours.”

also supported the proposed threshold for managers and staff. This commenter suggested, however, that the Board includes only partners and employees of the lead audit firm and exclude component auditors.

One commenter suggested aligning the definition of “core engagement team” with the “lead auditor” definition in amended AS 1201 and AS 2101. Another commenter indicated that the creation of thresholds would conflict with other existing aspects of Form AP. This commenter further stated there would be challenges for firms to accumulate and report this data, specifically obtaining the data from firms that are not required to report on Form FM or Form AP and additional time may be needed for implementation of these metrics.

Another commenter recommended replacing the phrase “who worked” in the proposed definition to “who performed audit procedures” to be consistent with the definitions of engagement team because this commenter was concerned that wording inconsistencies may cause confusion as to whether the same criteria apply across the various definitions. One commenter indicated that it is not clear on what basis the proposed threshold is determined and further indicated that the concept of core engagement team suggests that certain work in the engagement would be either not important or optional and recommended further study.

The proposal also asked whether other individuals involved in the audit (e.g., individuals in the firm’s national office, the EQR, employees of shared service centers, or individuals involved in loaned staff arrangements and alternative practice structures) should be treated differently in the metrics and, if so, how they should be considered in the definition of core engagement team.

One commenter sought clarification as to whether shared service center employees should be included in the definition of core engagement team and recommended considering the nature and use of centralized services and how service centers continue to evolve across a changing professional landscape. Another commenter suggested including the EQR and specialists in the core engagement team but not treating them differently from other individuals involved in the audit. Two commenters recommended the definition to simply include all individuals who charged time to the engagement or whose cost was included within the engagement to minimize the cost of reporting the metrics, but one of the two commenters recommended excluding the quality functions such as the EQR to avoid any impression that they are part of the engagement team.

The Board adopted the proposed definition of core engagement team substantially as proposed:

1. The engagement partner and
2. Members of the engagement team who are:
 - a. Partners or employees of the registered public accounting firm issuing the audit report (or individuals who work under that firm’s direction and control and function as the firm’s employees); and
 - b. Either of the following:
 - i. A partner (excluding the engagement partner) who reported ten or more hours on the engagement; or
 - ii. Managers and staff who reported 40 or more hours on the engagement or, if less, 2% or more of the total audit hours.

As suggested by two commenters, the Board reformatted the presentation of core engagement team to clarify that the engagement partner is part of the core engagement team. In addition, the Board modified the descriptions of core

engagement team members by substituting “who reported” for “who worked” to make clear that the basis for determining whether hours thresholds have been reached is time reported in the firm’s timekeeping system. The Board did not align the definition of “core engagement team” with the “lead auditor” definition because including information from all of the partners and managers of the firm, rather than just those with significant participation in the engagement, would potentially skew or dilute the data, making the metrics less meaningful.

As the Board proposed and the Board adopted, the term core engagement team excludes other auditors. As a result, there will be no need to obtain data from other auditors, and the definition will not encompass firms that are not required to file Form AP. Under current reporting requirements for Form AP, the lead auditor has to accumulate all of the hours worked on issuer engagements.¹⁰⁵ While it will require some disaggregation of this data, the Board does not believe reporting the data for the engagement team for Partner and Manager Involvement and total audit hours for Allocation of Audit Hours will create a significant challenge for firms. Regarding individuals at shared service centers, if partners or managers employed by a shared service center meet the definition of core engagement team, they will be included. As further discussed below, the Board did not include the EQR in the definition of the “core engagement team”; the core engagement team is a subset of the engagement team, and the EQR is not a part of the engagement team.

Figure 4. Core Engagement Team Members

¹⁰⁵ See discussion of “total audit hours” used for Form AP reporting below.

Example firm-level calculation:Total audit hours of the firm's accelerated filer and large accelerated filer engagements

Accelerated filer and large accelerated filer engagements	Total Audit Hours	Total Audit Hours incurred by partners and managers on the engagement team
Company X	3,900	1,400
Company Y	2,500	625
Company Z	1,500	300
Total	7,900	2,325

Total audit hours incurred by partners and managers on the engagement team for all accelerated filer and large accelerated filer engagements / Total audit hours for all accelerated filer and large accelerated filer engagements

Calculation: $2,325 / 7,900 = 29\%$

Example firm-level reporting for Form FM:

Partner and Manager Involvement	Percentage of total audit hours for partners and managers for all accelerated filer and large accelerated filer engagements	29%

Example engagement-level calculation:Details for total audit hours of the accelerated filer or large accelerated filer engagement

- Lead auditor issues the audit report for Company X.
- Total audit hours for the engagement: **3,900**

Details for partners and managers

d. Engagement Quality Reviewer (Used in Experience of Audit Personnel and Industry Experience)

The objective of the EQR is to perform an evaluation of the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued, in order to determine whether to provide concurring approval of issuance.¹⁰⁷ The EQR must possess the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the engagement partner on the engagement under review.¹⁰⁸ While reporting on specific hours spent by the EQR or including the EQR's time in engagement-level metrics may have a negligible quantitative impact, the Board believes reporting on EQR's competency for two of the engagement-level metric areas will be important and valuable for stakeholders.

Because the EQR is not a member of the engagement team as defined in AS 2101, EQRs were not included in the proposed metrics when the proposed metrics required disclosure of the engagement team's information unless the disclosure of EQRs was specifically called out in the proposed metric area. Therefore, the Board solicited comment about whether EQRs should be added to any of the proposed metrics, separately or together with a group such as the engagement team.

Some commenters agreed that EQRs should be excluded from the engagement-level metrics. These commenters indicated not to add them as a separate category because the EQR is not a part of the engagement team as defined by AS 2101 and the inclusion of the EQR would be inconsistent with AS 2101.

One commenter suggested that the EQR should be included in the metrics but presented separately, to ensure that there is no impression that the EQR is not independent. One commenter recommended including EQR in firm-level metrics because firms generally do not assign partners to solely perform engagement quality reviews and firm-level metrics should include all partners with no requirement to allocate their time spent between the roles of an engagement partner and an EQR. Two investor-related commenters generally supported including EQR hours in the metrics. Another commenter questioned

the rationale for not including metrics relating specifically to engagement quality reviewers, despite the fact that they are not part of the engagement team.

In the final requirements, EQRs are included in the two experience-related metrics (Experience of Audit Personnel and Industry Experience), where the Board believes that the information would be significant to users. EQRs are not included in other metrics, primarily due to their quantitatively insignificant impact on the metrics and to avoid any confusion regarding whether they are part of the engagement team. For metrics that depend on total audit hours (*i.e.*, Partner and Manager Involvement and Allocation of Audit Hours), this approach also aligns with the reporting required for purposes of Form AP, from which EQRs are excluded.

ii. Total Audit Hours (Used in Partner and Manager Involvement and Allocation of Audit Hours)

For several metric areas, the Board proposed to use "total audit hours," which would be the same as the hours used to compute the extent of participation in an audit of other accounting firms in Form AP.¹⁰⁹ Total audit hours include hours attributable to: (1) the financial statement audit; (2) reviews pursuant to AS 4105, *Reviews of Interim Financial Information*; and (3) the audit of ICFR pursuant to AS 2201.¹¹⁰

Under the proposal, some firm-level metrics were based on total audit hours across all issuer engagements while others were based on specific subsets of total audit hours (*e.g.*, partner and manager hours). The Board also clarified that some engagement-level metrics would also use a subset of total audit hours (*e.g.*, those incurred by partners and managers, on certain areas of the audit, or within stated time periods before or after the issuer's year end).

The Board adopted the definition of total audit hours as proposed.

Two commenters criticized the use of hours in metrics. One expressed concern that basing metrics on hours

would encourage stakeholders to focus on time spent rather than on whether the work was effective, and potentially exacerbate the notion that auditors should reduce the hours spent on an engagement. The other, while generally not objecting to the use of the hours in specific metrics, asserted that many firms have moved away from the burden of time reporting and that there is no incentive to track time on fixed fee engagements. The Board continues to believe that basing certain metrics on audit hours is appropriate. It will allow firms to leverage systems already in place for purposes of Form AP reporting and human capital management. Moreover, the Board is not aware of any alternative method of tracking auditor work that is commonly accepted by firms and could be implemented without the creation of entirely new systems.

Commenters responding to the specific questions in the proposal on total audit hours generally expressed support for using Form AP hours for the total audit hours in the metrics. A few commenters recommended including engagement quality review hours in total audit hours. A commenter stated that hours from shared service centers should be excluded from both the partner and manager involvement metrics. A few commenters asked that the Board either include or exclude certain specialist hours in total audit hours. Two commenters suggested that hours spent on quarterly reviews should either be excluded or disaggregated, one stating that otherwise the metric area related to allocation of audit hours would generally show that most hours were incurred before year end. Another commenter requested clarification as to whether hours spent on quarterly reviews are included or excluded from total audit hours, stating that if excluded, firms may need to implement more detailed time tracking mechanisms or estimations of time between quarterly review and year-end audit procedures.

In general, as required for Form AP, total audit hours is comprised of the hours of the lead auditor, other accounting firms participating in the audit with whom the principal auditor does not divide responsibility for the audit, and nonaccounting firm participants that assist the principal auditor or other accounting firms. Consistent with the calculation of total audit hours for Form AP, total audit hours exclude hours incurred by certain persons and entities. In addition, existing Form AP includes reviews performed pursuant to AS 4105 because these reviews are an integral part of the overall audit process. The Board

¹⁰⁹ See Part IV of Form AP.

¹¹⁰ "Total audit hours" [as amended and adopted by the Board in PCAOB Rel. No. 2024-005, to take effect on December 15, 2025] exclude the hours incurred by: (1) the engagement quality reviewer; (2) specialists engaged, not employed, by the firm; (3) accounting firms in performing the audit of entities in which the issuer has an investment that is accounted for using the equity method; (4) internal auditors, other company personnel, or third parties working under the direction of management or the audit committee who provided direct assistance in the audit of internal control over financial reporting; and (5) internal auditors who provided direct assistance in the audit of the financial statements.

¹⁰⁷ See AS 1220.02.

¹⁰⁸ See AS 1220.05.

continues to believe that using total audit hours, as already defined by Form AP and collected by firms, will provide an appropriate and cost-effective basis for calculating metrics.

Commenters, mostly firms and firm-related groups, noted that several metric areas use total audit hours, which includes information from other auditors. According to these commenters, referring to such metrics as “firm-level metrics” is misleading, and they recommended the firm-level metrics be limited to data related solely to the firm filing the Form FM and exclude information from other accounting firms. The Board is retaining the label of “firm-level metrics” for the metric areas in question as the Board believes it is important to include all of the relevant information for the lead auditor’s engagements. In addition, the Board believes this information will provide key insights into the way that engagements are conducted by the firm that is the lead auditor.

iii. Terms Used in Metrics

In addition to the terms discussed above, many of the terms used in the metrics are defined elsewhere in the Board’s standards and rules. Other terms will be defined specifically for use in the metric calculations and may differ from the way such terms are used elsewhere in PCAOB rules and standards.¹¹¹ Terms that are used in only one metric are discussed in greater length below, in the context of discussing the relevant metric. The Board has italicized the terminology in the final calculations.

3. Metric Descriptions and Calculations

This section describes the firm-level and engagement-level performance metrics the Board adopted. The Appendix provides illustrative examples to show how metrics would be calculated based on specific facts and circumstances presented therein.

a. Partner and Manager Involvement

Partners and managers are responsible for oversight of the engagement team, which includes less experienced staff. Spending time to oversee the work of the audit staff is critical to the engagement. Included in this oversight is the engagement partner’s responsibility to exercise due professional care related to supervision

and review of the audit, including evaluating whether significant findings or issues are appropriately addressed and determining that the significant judgments and conclusions on which the auditor’s report is based are appropriate and supported by sufficient appropriate audit evidence.¹¹² Less extensive supervision raises the risk of less effective audit procedures. With a lower ratio of senior engagement team time to staff time, the risk may be greater that partners and managers may not be devoting sufficient time to supervise and review staff work and evaluate audit judgments. Academic research also suggests that greater partner or manager involvement in the audit is positively associated with proxies for the quality of the audit.¹¹³

The proposal set forth requirements for firms to calculate firm-level and engagement-level metrics for the percentage of total audit hours incurred by partners and managers. As described in the proposal, this metric area could provide users with information regarding each firm’s oversight of their engagements and the supervision of less experienced engagement team members. The Board adopted this metric area substantially as proposed, with one modification discussed in more detail below.

Commenters generally agreed with requiring public reporting of the proposed firm-level metrics for Partner and Manager Involvement. Investor-related commenters stated that disclosure of hours worked by senior

professionals relative to more junior staff across the firm and on the engagement is valuable. One investor-related group noted that information regarding the hours worked by senior professionals who have more experience in making judgments and evaluating estimates relative to more junior staff provides important insights into the oversight, supervision, and review of the engagement team. One commenter agreed that the proposed metrics would provide useful information to investors, audit committees, or other stakeholders because it would provide a salient indicator of audit quality. Another commenter agreed that the firm-level metric is clear and appropriate because it provides an indication of the level of involvement of partners and managers in the firm’s audit engagements. At the same time, a few commenters were concerned that the engagement-level metric could be misunderstood because the level of supervision and review should vary based on the nature of the company (e.g., size and complexity), the nature of the work assigned to engagement team members, the risks of material misstatement, and the knowledge, skill, and ability of each engagement team member. Further, a commenter stated that the engagement-level metric would not provide meaningful information without contextual information obtained through a discussion with the audit committee.

The Board solicited comment on whether data for partners and managers should be presented separately, including whether there should be a separate calculation for the engagement partner. Two commenters expressly supported this disaggregation, one stating that because the engagement partner is the person signing the opinion, it would appear to be more consistent to separate this data. The other commenters on this topic said that further disaggregation of the involvement of partners and managers is not warranted and could create unnecessary complexity. For example, a commenter stated that segregation of involvement by levels in the firm does not provide incremental value and would dilute or potentially mischaracterize what can be inferred from this metric (e.g., disaggregation of the engagement partner role is not likely to be meaningful due to the engagement partner’s ability to have assistance). Two commenters expressed concern that adding up partner and manager data and calculating these metrics for all issuer engagements could be very time consuming and unnecessarily increase

¹¹² See *General Responsibilities of the Auditor in Conducting an Audit and Amendments to PCAOB Standards*, PCAOB Rel. No. 2024-004 (May 13, 2024), as adopted by the Board and approved by the SEC, to take effect with respect to audits of fiscal years beginning on or after December 15, 2025, at 8-11 (describing responsibilities of engagement partners under existing PCAOB standards) and 17 (describing clarification for the existing responsibilities of engagement partners); see also, e.g., *In the Matter of Melissa K. Koepfel, CPA*, PCAOB File No. 105-2011-007, at 78 (Dec. 29, 2017) (concluding that, as the individual with final responsibility for the audit, the engagement partner must act with due professional care to ensure that the audit team performs all required audit procedures).

¹¹³ See, e.g., a research paper, Joshua Khavis, Mengtian Li, and Brandon Szerwo, *Manager Staffing Leverage at the Audit Office and Audit Quality*, available at https://papers.ssrn.com/sol3/cfm?abstract_id=4856541; a study using Korean data, Suyon Kim, *Does Engagement Partners’ Effort Affect Audit Quality? With a Focus on the Effects of Internal Control System*, 9 *Risks* 225, (2021); a study using Japanese data, Sarowar Hossain, Kenichi Yazawa, and Gary S. Monroe, *The Relationship Between Audit Team Composition, Audit Fees, and Quality*, 36 *AUDITING: A Journal of Practice and Theory* 115, (2017); and Agnes WY Lo, Kenny Z. Lin, and Raymond MK Wong, *Does Availability of Audit Partners Affect Audit Quality? Evidence from China*, 37 *Journal of Accounting, Auditing & Finance* 407, (2022).

¹¹¹ For example, the Board adopted the definition of “partner” to include only persons who participate in audits. While the Board believes that is consistent with the use of that term in the Board’s auditing standards (see footnote above), it is narrower than the use of the term in connection with registration and reporting requirements.

compliance costs. Another commenter expressed concern that further breakdown by role could lead to more inconsistencies in reporting across engagements (e.g., differences in how firms are structured, such as a managing director role). Commenters also recommended further study by the PCAOB.

The Board notes, in response to commenter concerns about the need for further study, there is extensive academic literature on this topic and widespread support among investor-related groups (see above discussion). The Board does not believe that adding up partner and manager data and calculating and reporting these metrics will unnecessarily increase compliance costs as firms are already required to track these hours in aggregate for purposes of Form AP reporting. While the Board acknowledges the importance of the engagement partner's role, as this person is primarily responsible for the engagement as evidenced by the fact that they sign the opinion and is required to be identified on Form AP, the Board continues to believe that the aggregation of partner and manager involvement and reporting of one percentage provides a more holistic picture of the overall supervision and review of the audit engagement. The Board agrees with most commenters who said that further disaggregation of the involvement of partners and managers is not warranted.

Some commenters, mostly firms and firm-related groups, suggested excluding hours from other accounting firms and focusing only on the involvement of partners and managers of the reporting firm. These commenters were concerned that in situations where accounting firms outside the lead auditor's network are involved, both the firm- and engagement-level metrics would require information from outside the lead auditor's system of quality control. Another commenter requested that firms should present partner and manager involvement across high-, medium-, and low-risk engagements. According to this commenter, it would enhance comparability across firms.

The Board believes the metric area on partner and manager involvement could be less informative or even potentially misleading if it were based only on the lead auditor, rather than the entire engagement team (including other auditors). Moreover, since relevant data in aggregated form is already collected for purposes of Form AP reporting, it is subject to existing quality controls over firm reporting. The Board does not believe the additional administrative burden of reporting partner and

manager hours will be significant. As to the suggestion to present partner and manager involvement across different engagement risk profiles, the Board notes there is no requirement in PCAOB standards or rules for such categorization and no established framework for differentiating among engagements in that way. Therefore, the Board does not believe this suggestion would yield comparable information. However, firms will have the ability to provide context in an optional narrative disclosure if they believe information as to relative risk profiles is helpful in interpreting the metric.

The Board adopted the firm- and engagement-level metrics for partner and manager involvement substantially as proposed. The Board believes they will provide useful information to assist in understanding hours worked by senior professionals relative to more junior staff and gauging the associated risks.

However, the final requirements have been modified in one respect, to narrow the population of engagements covered by firm-level reporting. Considering comments received expressing concern with the potential lack of comparability across different types of issuers, the Board has limited firm-level reporting to only engagements for accelerated filers and large accelerated filers—that is, the engagements for which engagement-level reporting is required—rather than all issuer engagements. The Board believes this narrower scope will yield better alignment between firm- and engagement-level metrics and more comparable information across engagements. Additionally, this modification should further reduce data collection and reduce the administrative burden associated with calculating and reporting these metrics.

(See Exhibit A, “Partner and Manager Involvement.”)

b. Workload

The Board believes that in general, the greater the workload, the greater the likelihood that members of the engagement team may have insufficient time to appropriately perform the necessary audit procedures and make the appropriate judgments that an audit requires.

Professionals may become less effective when working long hours,¹¹⁴

¹¹⁴ See, e.g., Julie S. Persellin, Jaime J. Schmidt, Scott D. Vandervelde, and Michael S. Wilkins, *Auditor Perceptions of Audit Workloads, Audit Quality, and Job Satisfaction*, 33 *Accounting Horizons* 95, 101 (2019) and Brant E. Christensen, Nathan J. Newton, and Michael S. Wilkins, *How Do Team Workloads and Team Staffing Affect the Audit? Archival Evidence from U.S. Audits*, 92

and such an environment may affect the level of due professional care they exercise. For example, a heavy workload may create pressure on the audit staff to focus too much on efficiency in executing auditing procedures rather than on ensuring the effectiveness of those procedures or on supervising less experienced engagement team members.

The Board believes heavy workloads could prevent an engagement partner from providing adequate and focused attention to an audit engagement. The information provided by the metrics at the engagement level may help audit committee members and other stakeholders understand the various activities competing for an engagement partner's time.

Studies find that excessive audit partner workloads can have negative impacts on audit effectiveness, although the literature also suggests that partners may be less affected than more junior staff.¹¹⁵

The proposal set forth requirements for firms to calculate firm-level and quarterly engagement-level workload metrics for (i) engagement partners and (ii) other partners, managers, and staff. The Board proposed separate reporting for engagement partners at both the firm and engagement level, as they have primary responsibility for the audit. At the engagement level, the Board proposed limiting reporting to the core engagement team, which the Board believes would be more useful to investors and other stakeholders than information regarding the entire engagement team (some of whom may have extremely limited participation in the audit).

The proposed calculations for workload at both the firm and engagement levels included all working hours incurred during the relevant periods: hours incurred on issuer and non-issuer engagements as well as on training, practice development, staff development, or other firm activities.¹¹⁶

The Board adopted this metric area substantially as proposed, with modifications discussed in more detail below.

Accounting, Organizations and Society 101225, (2021).

¹¹⁵ See, e.g., Seokyoung Hwang and Philip Keejae Hong, *Auditors' Workload and Audit Quality under Audit Hour Budget Pressure: Evidence from the Korean Audit Market*, 26 *International Journal of Auditing* 371, (2022); John Goodwin and Donghui Wu, *What is the Relationship Between Audit Partner Busyness and Audit Quality?*, 33 *Contemporary Accounting Research* 341, (2016); Persellin, et al., *Auditor Perceptions*.

¹¹⁶ Hours worked for purposes of the proposed metrics excluded hours that were not considered working hours (e.g., paid time off and holiday time).

Some commenters agreed with requiring firm- and engagement-level metrics in this area, stating that the proposed workload metrics ensure there is appropriate attention and focus on audit engagements. One commenter asserted that the proposed firm-level metric is significantly less complicated than the engagement-level metric and should be sufficient for assessing a firm's capacity to accept new clients. However, the same commenter expressed concern that the proposed engagement-level metric is very complicated and would take considerable effort for firms to compile and calculate for every engagement. Further, the commenter expressed concern that the cost of calculating this metric likely exceeds any benefit. Another commenter stated that just having higher workload during peak months does not necessarily impact audit quality.

While some firms and firm-related groups generally expressed support for public disclosure of the firm-level workload metrics, they also expressed concerns with the metrics or requested modifications be considered for firm-level workload calculations. Some firms and firm-related groups questioned what benefits stakeholders would gain from the information. Commenters suggested that alternative measures, such as an annual utilization metric as reported in firms' audit quality reports, may be more meaningful to reflect how a firm is measuring and monitoring the activities competing for their professionals' time.¹¹⁷ Further, some of these commenters expressed concern about the effort involved in collecting, analyzing, and reporting the data for average weekly hours on a quarterly basis.

The Board continues to believe that disclosing the firm-level workload metrics quarterly as opposed to annually will provide a comparative basis for the engagement-level metrics. At the engagement level, the Board believes that information for members of the core engagement team will be especially useful to investors and other stakeholders for the quarter in which the auditor's report is issued, usually the busiest time of the year for the auditor. The Board also believes that a workload metric based on actual hours worked (*i.e.*, productivity) versus a utilization metric based on a standard number of work hours (*e.g.*, a 40-hour

week, including time off) will provide more useful information.

The Board solicited comment on hours worked, including whether the proposed term should be changed. Some commenters expressed support for including all hours worked including time spent on audits and time spent on activities other than audits. One commenter expressed concern that many firms do not require detailed recording of "non-chargeable" time, so the disclosure of hours worked will be a rough estimate at best for some firms. This commenter expressed a view that the benefits of the workload metrics would not justify the burden of asking firm professionals to spend more time and energy tracking all of their "non-chargeable" time. Another commenter suggested that the Board break out training and development from the rest of the hours worked. Further, a commenter stated that a clearer definition of the proposed term "hours" is required if this metric is to be used. For example, firms may be inconsistent on how they report hours spent on travel for work purposes. A commenter stated the proposed metrics exclude time off, which is a key component of workload and may vary significantly between levels. By excluding time off or leaves of absences, this commenter expressed concern that the workload metric would not provide consistent and comparable information.

The Board continues to believe it is important to capture the sum of hours that are incurred on engagements and hours spent on training, practice development, personnel development, or other firm activities in the workload metrics, while excluding holiday or other paid time off (*i.e.*, when individuals would not be working). The Board believes the potential additional administrative burden of including "non-chargeable" time for partners and managers on issuer engagements (firm-level workload metric) will not be burdensome based on the Board's understanding that many firms track this time already. Disaggregating the hours worked, as suggested by one commenter, will further complicate the workload metrics. Finally, the Board believes the definition of hours worked is sufficiently clear and does not require further explanation for certain types of non-engagement hours.

Firms and firm-related groups stated that because the proposed workload metrics were based on the definitions of partner, manager, and staff, which determination is based on "participation in the audit," it was not clear whether and where certain individuals should be included in this metric as they move

between audit support and engagement-serving functions (*e.g.*, individuals who provide tax reporting and compliance services to other clients). One commenter stated that including these individuals would dilute the value that could be derived from metrics related to workload, as peak periods for these other services and activities would mask meaningful trends in the workload of other members of the engagement team whose primary responsibility is performing audit work.

At the engagement level, the Board does not believe the commenter's concern is relevant because the individuals in question are not likely to be part of the core engagement team (see above for discussion of the definition). At the firm level, the Board believes the workload of these individuals will still be relevant as they presumably shift between engagement work and non-engagement work as needed. Further, trying to figure out a systematic approach for excluding these individuals will only add to the administrative burden of gathering the data and calculating and reporting the metrics.

Other commenters requested that the Board reconsider the inclusion in the workload metrics of partners and professional staff who do not work on issuer audits. One expressed concern that comingling statistics associated with professionals who do not participate in any way on the firm's issuer audits would be contrary to the stated objective of "advancing investor protection and promoting the public interest by enabling stakeholders to make better-informed decisions . . ." Another stated that the metric as proposed would encompass individuals who work on engagements other than issuer audits (*e.g.*, audits of non-issuer employee benefit plans or governmental entities), who may have a different "busy season" than individuals working on issuer audits. As a result, this metric may show a relatively consistent average weekly hour throughout the year across the firm, even though specific individuals may have more variability in their schedules.

The Board streamlined the workload metrics in some respects, in part based on commenter input. To provide a more useful metric, the Board is limiting the firm-level metric to partners and managers who participate in accelerated filer and large-accelerated filer engagements for which the firm issued an audit report. The Board believes this will provide information that will be comparable to the engagement level information. The Board excluded staff from the firm- and engagement-level

¹¹⁷ One example of a utilization metric reported in firms' audit quality reports is "average annual hours worked by audit professionals over 40 hours per week."

calculations in order to focus the metric area on the more senior members of the engagement team—those individuals determining that the significant judgments and conclusions on which the auditor's report is based are appropriate. In addition, this will also lessen the administrative burden of gathering the data and calculating and reporting the metrics.

Some commenters found the proposed requirement to segregate engagement partners from other partners in the proposed calculations to be impractical to implement and not a meaningful distinction in the metric. A commenter pointed out that segregating the roles may create a practical challenge in calculating the metrics, as in practice a large portion of partners generally fill both roles. Another commenter asserted that because the proposal provided no justification for distinguishing between “engagement partners” and “other partners,” the distinction between engagement and non-engagement partners should be eliminated for purposes of calculating the firm-level workload metric.

The Board adopted a firm-level metric that does not require differentiating between engagement partners and other partners in reporting on workload because the Board questions whether useful information could be derived from that distinction, given that many partners serve in both capacities. In addition, the Board understands it may be a difficult and manual process to identify and track the distinction between the types of partners. As stated above, the Board continues to believe it is important for firms to disclose their engagement partners' workloads at the engagement level. Overall, the Board believes the modifications will improve or maintain the value of the information provided by this metric area compared to the proposal, while reducing the administrative burden associated with gathering data and calculating and reporting the metrics.

(See Exhibit A, “Workload.”)

c. Training Hours for Audit Personnel

The professional development training auditors receive should enhance their competence and therefore their ability to perform effective audits. Competence encompasses having the knowledge, skill, and ability to perform assigned activities in accordance with applicable professional and legal requirements and the firm's policies and procedures.¹¹⁸ Training is a critical

aspect of developing auditor competence.

Licensing requirements for continuing education for public accountants to obtain and retain certification speak to the relationship between quality and appropriate training and education.¹¹⁹ Additionally, QC 1000 mandates certain training requirements, including with respect to ethics and independence.¹²⁰

While the Board did not propose a training metric, the Board's proposal solicited comment on training as a potential additional metric. Commenters on the topic all agreed about the importance of training to the development of auditors. One commenter included training hours per professional as one of six metrics they believed would increase technical excellence, and other commenters suggested an alternative training metric focused on the percentage of revenue firms spend on training. Other commenters highlighted challenges to defining a training metric that would provide decision-useful information. One commenter stated that training is important for development and building awareness, but on-the-job training is invaluable, yet not measurable. One commenter suggested that training metrics may not be informative given they would be quantitative and not qualitative and also suggested that these concerns would be best addressed through the implementation of QC 1000 and related standards.

The Board believes there are benefits to having firms report information regarding training. Indeed, academic research provides evidence that certain proxies for auditor training are positively associated with some proxies for audit quality, although the results vary depending on the type of training.¹²¹ The Board also observes that almost all of the firms that provide voluntary reporting include their average training hours as well as information about their policies and procedures regarding training, which appears to emphasize the value those firms place on the development of their professionals as well as the potential informativeness of an hours-based

quantitative measure. The Board's research also indicates that at least eight other jurisdictions include training as a firm-level metric.¹²²

The Board recognizes that quantitative measures such as the number of professional development training hours cannot capture qualitative factors, such as the skill of trainers, the quality and relevance of training content, whether the training is in a specialized area specific to the trainee, and the degree of trainee engagement, that contribute to the effectiveness of training. However, the average number of training hours per audit professional provides an indication of the importance the firm places on the training of its professionals. In addition, given that the metrics are presented as a suite of metrics and are not expected to be considered in isolation, providing some visibility into firm's commitments and efforts to promote the development of their professionals through ensuring they receive adequate training will provide an additional data point for consideration in that context.

Metrics the Board considered in this area, both at the firm level and the engagement level, include (i) the average total number of CPE hours per professional; (ii) average number of CPE hours received by audit professionals in specified fields of study, such as (a) accounting and auditing and (b) ethics and independence; and (iii) CPE compliance rates at the firm or specific to engagement teams. In consideration of the importance of training to the development of audit professionals and the impracticality of measuring training through qualitative means, the Board adopted metrics for average annual professional development training hours¹²³ for audit partners, managers, and staff, both firm-wide and for the core engagement team. These metrics will create visibility into training at both the firm and engagement level, using

¹²² See Accountancy Europe Report at 6, 7, 8, 11, 12, 13, and 14 for IDW (Germany), Quattermasters (Netherlands), CMVM (Portugal), CPAB (Canada), ICAI (India), ACRA (Singapore), and IRBA (South Africa). See also FRC Feedback Statement, at 18.

¹²³ Professional development training hours are training hours for credit in support of obtaining or maintaining a professional accounting license in a jurisdiction in which the auditor is licensed or pursuing a license. For example, in the United States, professional development training hours would be synonymous with CPE credits as defined by the National Association of State Boards of Accountancy (NASBA). In some jurisdictions, including the United States, a training hour may be less than 60 minutes. If a jurisdiction does not impose training requirements in support of professional licensure, professional development training hours are hours of training associated with acquiring and maintaining professional competence.

¹¹⁸ See PCAOB Rel. No. 2024-004, at 8-9 (describing competence to perform an audit under existing PCAOB standards).

¹¹⁹ See paragraph .08 of AS 1000, *General Responsibilities of the Auditor in Conducting and Audit*.

¹²⁰ See QC 1000.50 (“The firm should design, implement, and maintain policies and procedures regarding licensure such that the firm and firm personnel hold licenses or other qualifications required by the relevant jurisdiction(s) under applicable professional and legal requirements.”). See also QC 1000.34(e) and PCAOB Rel. No. 2024-005, at 151-52 (describing mandatory training under PCAOB standards).

¹²¹ See below for additional discussion on the academic literature.

data that the Board believes will be readily accessible to firms.

The Board considered the suggested alternative of a training metric focused on the percentage of a firm's revenue invested in training. However, the Board believes that any approach based on the costs of training would be difficult to implement. For example, some firms develop their own training, some firms purchase training, and other firms may reimburse their professionals for third-party training. Also, firms may develop training for non-audit professionals within the organization and then subsequently provide that training to audit professionals, further adding to the complexity of suggested cost-based training metrics. By contrast, the Board expects that firms will generally already be tracking training hours as part of monitoring ongoing compliance with CPE requirements, which should ease implementation of the hours-based metrics the Board adopted. The Board believes that the difficulties associated with measuring costs would outweigh the advantages of a cost-based metric, as compared to the hours-based approach.

(See Exhibit A, "Training Hours for Audit Personnel.")

iv. Experience of Audit Personnel

The auditor's years of experience at a public accounting firm can provide useful information about how the auditor staffs the audit. Academic studies show that auditor experience is related to improved audit effort and skill, through both pre-client and client-specific experience,¹²⁴ and through behavioral adaptations associated with managing their clients.¹²⁵ At the firm level, an experience metric can provide information regarding the "bench depth" of firm personnel and the ability of the firm to staff its engagements. At the engagement level, the engagement team's years of experience can provide useful information about the depth of experience of the engagement team for that particular engagement.

The Board proposed firm-level reporting of the average years of experience at a public accounting firm of the firm's engagement partners, partners other than engagement partners, and managers; and engagement-level reporting of the years

of experience at a public accounting firm of the engagement partner and the EQR, as well as the average years of experience of other partners and managers on the core engagement team. Both metrics captured all experience at a public accounting firm, whether or not the firm was registered with the PCAOB, and included audits of issuers and non-issuers, as well as non-audit work.

Some commenters agreed in concept with firm- and engagement-level metrics for experience, stating that they agreed that auditor's years of experience at a public accounting firm may provide useful information about how the auditor staffs the audit. One of these commenters broadly supported both metrics but suggested a number of potential refinements, discussed below. One commenter suggested that an employee experience metric could identify firms that are more likely to have a firm culture that contributes to audit quality. Another commenter suggested that a metric depicting years of experience after CPA licensing would provide insight into whether a firm has more experienced professionals.

Several commenters generally supported the firm-level experience metric, while objecting to all proposed engagement-level metrics, including the experience metric. One of these commenters stated that the proposed firm-level metric met its criteria of being readily interpretable, aligning with measures used by the firm in its system of quality control, having broad linkage to audit quality, having minimal unintended consequences, and meeting the information needs of users.

Some commenters asserted that proposed experience metrics, both at the engagement and firm levels, were not useful or meaningful, saying that there is great potential for misunderstanding and misuse with little value to be derived. Another said that the emphasis on years of experience overlooks the centrality of technology in the future.

Some commenters raised questions about the professionals covered by the metrics. Two commenters suggested that the firm-level metric cover only individuals who have been assigned to issuer audits, one of whom said that firms may use different personnel on issuer audits than non-issuer audits, so a metric that includes personnel regardless of whether they work on issuer audits would not provide an accurate view of personnel that may be staffed on an issuer audit. One commenter questioned whether it was appropriate to provide engagement-level reporting regarding the experience of the EQR, because it might imply that the EQR was part of the engagement team.

Commenters also questioned the appropriate level of disaggregation for reporting. One commenter described the requirement to segregate engagement partners from other partners as impractical to implement and not a meaningful distinction in the metric. Another suggested further disaggregation, with partner and manager experience reported separately and data broken down by industry.

Commenters reacted to the proposal to count only experience in public accounting as relevant. One agreed that experience metrics should be limited to audit experience. Several others suggested that experience in addition to years worked at a public accounting firm, such as industry experience or time spent working at a relevant regulator, should be included. For example, one said that limiting relevant experience exclusively to auditing experience could potentially overlook the comprehensive skill set that individuals gain from various roles throughout their career. Two commenters said that context is needed to understand metrics depicting experience, as the depth of experience and whether it is current may differ considerably. Some commenters expressed concern about the challenges of gathering data regarding experience, particularly if the experience metric is not limited to time spent at the individual's current firm.

Commenters also raised issues with the calculation of the proposed metric. One remarked that the experience metrics provided an incentive to have a number of very experienced partners provide modest assistance in order for their experience to be included in, and significantly improve, the metric. This commenter suggested that requiring a weighted average for this metric would act as a deterrent. One commenter expressed that the calculation did not address how to treat personnel role changes at the firm level.

One commenter suggested that further outreach was needed to determine the ability to prepare such information and for investors and audit committees to understand how such firm-level metrics would be used in decision making.

After considering commenter input, the Board adopted the firm- and engagement-level metrics with the modifications described below. While the Board appreciates that there are limits to the information an experience metric can provide, the Board believes that it is and will continue to be a useful element in a suite of metrics, even in the context of technological advances and other changes in the audit market.

¹²⁴ See, e.g., Wuchun Chi, Linda A. Myers, Thomas C. Omer, and Hong Xie, *The Effects of Audit Partner Pre-Client and Client-Specific Experience on Audit Quality and on Perceptions of Audit Quality*, 22 *Review of Accounting Studies* 361, 363 (2016).

¹²⁵ See, e.g., G. Bradley Bennett and Richard C. Hatfield, *The Effect of the Social Mismatch Between Staff Auditors and Client Management on the Collection of Audit Evidence*, 88 *The Accounting Review* 31, (2012).

The Board considered whether, as some commenters suggested, the firm-level experience metric should be narrowed to cover only professionals who worked on an issuer audit in the most recent year. However, the Board does not believe that approach would increase the information value of the metric, because individuals may participate in issuer audits in some years but not others, so it would cover only a portion of the total talent pool. Such an approach would also add significant complexity to the calculation, as well as variability year over year. Accordingly, the Board concluded that it would be more appropriate for firms to report the experience of all audit professionals, as proposed.

The Board also considered whether to eliminate engagement-level reporting of the experience of the EQR, based on commenter concern that this could imply that the EQR is a member of the engagement team. However, the Board does not believe that concern is well founded. There is nothing in Form AP to support such an implication, and the Board's standards are clear that the EQR is not a member of the engagement team. Because of the significance of the EQR role, the Board continues to believe that EQR experience is important and should be separately reported.

The Board is eliminating the requirement to provide separate firm-level reporting of the experience of engagement partners. Instead, the final rules require firm-level reporting of (i) the average experience of all partners in aggregate, both those who serve as engagement partners and those who do not, and (ii) the average experience of all managers in aggregate. After considering commenter responses, the Board is concerned that separate reporting of engagement partner experience may not add significant information value but will increase the complexity and administrative burden associated with the metric. The Board believes these metrics, with all partners in aggregate, will also serve as a useful baseline for comparison of the engagement-level reporting of engagement partner and EQR experience. The Board has also separated the partner and manager experience metrics at the engagement level for consistency and comparability with the firm-level metrics.

The Board considered broadening the scope of relevant experience beyond public accounting but decided to adopt that aspect of the metric as proposed. The Board notes that the commenters who recommended a broader scope had inconsistent recommendations as to

what would constitute relevant experience (e.g., experience in a financial accounting role, previous experience at a regulator, etc.), reflecting the difficulty of arriving at an agreed-upon view of the non-audit experience that would be relevant and should be included. The Board believes a metric focused on experience in public accounting will be better focused and would avoid that difficulty.

Several commenters raised concerns about the ability to track the historical information called for by the metric, some implying that the experience metric should be limited to experience with the individual's current firm. The Board is concerned that such a limited metric could be misleading, as it would understate the experience of anyone who changed jobs. Moreover, the Board believes that firms could readily capture the information from current personnel and otherwise during the hiring and onboarding process, and the information would therefore generally be available to firms without a significant ongoing administrative burden.

The Board noted the questions commenters raised about how to calculate averages, including how to treat partial years of experience and whether the average at the engagement level should be calculated on a weighted basis to reflect the extent of participation in the audit. As to partial years of experience, firms will be free to report in whole years on a rounded basis or, if they wish, more precisely. While the Board appreciates that it may be possible to make staffing changes in an effort to manage this or other metrics, the Board believes that calculating the experience metric for the other partners and managers as a weighted average would add unnecessary complexity. The Board also considered that the risk of managing the engagement-level experience metrics is minimized by other considerations, such as industry or other specialized experience needs, that go into staffing decisions. In addition, the Board expects that comparisons of trends in the reported metrics over time will provide balance.

The Board also notes that, if a firm believed additional information or context would be required for a reader to understand the metrics provided, the firm could provide it as narrative.

(See Exhibit A, "Experience of Audit Personnel.")

v. Industry Experience

As part of the planning activities of an audit, auditors have a responsibility to gain an understanding of the company's business. These activities include gaining an understanding of matters

affecting the industry in which the company operates, such as financial reporting practices, economic conditions, laws and regulations, and technological changes.¹²⁶ Experience in a particular industry helps an auditor understand the industry's operating practices, the critical accounting issues confronting companies in that industry, the risks of material misstatement of the financial statements specific to industry factors, and any industry-specific audit procedures.

Understanding the experience of firms' audit personnel across industries is an important factor in assessing the firm's capacity and resources to perform audits of issuer engagements that benefit from specific industry knowledge. The Board believes industry experience metrics will assist in gaining that understanding.¹²⁷

Importantly, academic literature has long identified auditor industry specialization as related to the effectiveness of audits.¹²⁸ One study that examines the impact of auditor industry specialization on the assessment of audit risk and in audit planning found that auditors with industry-specific knowledge improved the auditor's assessment of differential audit risk and the quality of their audit planning decisions.¹²⁹

Investor-related commenters were generally supportive of industry experience metrics stating they believe that it is critical for auditors to have an elevated level of industry-specific knowledge. One investor-related group stated that experience in a particular industry helps an auditor understand that industry's operating practices, critical accounting issues faced in that industry, the risks of material misstatement of the financial statements specific to industry factors, and any industry specific audit procedures. Another commenter suggested that further guidance on the classification of

¹²⁶ See AS 2101.07.

¹²⁷ QC 1000.38a.(2)(d) requires firms to establish quality objectives that address the firm's judgments about the extent to which the firm has or can obtain resources to perform the engagement as part of its acceptance and continuance of engagements.

¹²⁸ See, e.g., W. Robert Knechel, Vic Naiker, and Gail Pacheco, *Does Auditor Industry Specialization Matter? Evidence from Market Reaction to Auditor Switches*, 26 *Auditing: A Journal of Practice and Theory* 19, (2007); Steven Balsam, Jagan Krishnan, and Joon S. Yang, *Auditor Industry Specialization and Earnings Quality*, 22 *Auditing: A Journal of Practice and Theory* 71, (2003); and Allen T. Craswell, Jere R. Francis, and Stephen L. Taylor, *Auditor Brand Name Reputations and Industry Specializations*, 20 *Journal of Accounting and Economics* 297 (1995).

¹²⁹ See Kin-Yew Low, *The Effects of Industry Specialization on Audit Risk Assessments and Audit-Planning Decisions*, 79 *The Accounting Review* 201, 202 and 214 (2004).

industries would be helpful and also suggested that weighting current experience should be considered. One commenter suggested that the metric be disaggregated between partners and managers.

While most firm and firm-related commenters opposed industry experience metrics, one firm commenter stated that they understand in principle why industry metrics may be perceived as meaningful. Some commenters stated that the proposed industry experience metrics were not useful due to issues with comparability and complexity. Some commenters believed that the industry metrics gave rise to the potential for confusion and misunderstanding, in part because any classification system could group together very different types of issuers that could result in inappropriate comparisons.

One commenter suggested that the proposed metric does not address the issue that not all audits require specific industry experience and that audit quality is enhanced when an engagement team includes personnel with diverse experiences. Another commenter stated that metrics depicting experience would need context to be meaningful.

After considering commenter input, the Board has retained industry experience metrics, but simplified them from the proposal. The changes include limiting the scope for reporting at the firm level and limiting the requirements for reporting at the engagement level to the engagement partner, the engagement quality reviewer and certain members of the core engagement team among other changes further discussed below. At a high level, the Board believes this addresses the concerns of commenters regarding complexity, certain data collection concerns, the potential for confusion and misunderstanding, and also provides for more comparable information.

a. Thresholds

The Board proposed that the metrics would count partners who have at least five years of experience throughout their careers in a particular industry and managers who have at least three years of such experience.¹³⁰ For determining

what counted as a year's experience, the Board proposed a minimum threshold of 250 hours, or 25% of hours worked, focused on an industry in a given year.

The proposed instructions for reporting the metric included qualitative considerations to assist in determining whether an individual had experience in a specific industry, including consideration that industry experience may be, but is not required to be, exclusive to experience on audit engagements, or exclusive to experience gained at a public accounting firm, but must be relevant, which includes experience in accounting or auditing roles and other specializations, such as experience that is related to fair value estimates in the industry. The instructions also clarified that industry experience may be acquired in non-consecutive years.

One commenter expressly agreed with the proposed requirement of 250 hours or 25% of the auditor's time as being a reasonable criterion for a year of qualifying industry experience. However, several other commenters criticized the proposed threshold. Some of the concerns raised included tracking the information throughout the career of professionals, particularly at the global network level; obtaining historical data; complying with the proposed 250 hour or 25% thresholds; and maintaining documentation to support the metrics. Another commenter expressed that the thresholds were not meaningful as different individuals may perform the same tasks in different amounts of time. This commenter also expressed that without research supporting the thresholds, it is not possible to recommend how much industry experience would be necessary. While one commenter acknowledged the proposal allowed self-reporting as an option, they had concerns about the ability of personnel to accurately determine whether they worked 250 hours or more in a specific industry going back many years, potentially decades, and encouraged qualitative thresholds for determining industry experience.

One commenter agreed with the proposed 3- and 5-year thresholds for measuring industry experience and also suggested adding an additional threshold of 10-years at the partner level. Other commenters raised other concerns with the proposed reporting requirements. Some commenters

disagreed with the proposal to count managers with three years of experience and partners with five years of experience. Among these commenters, some expressed that it would unfairly exclude some partners and managers, could be a disadvantage to smaller firms, could be time consuming to compile data to support, and should not include individuals with de minimis involvement. Commenters that responded to the question of whether industry experience should be limited to audit experience or rather should include all relevant experience agreed with the proposal to include all relevant experience. They also agreed that it need not be consecutive years.

Several additional commenters voiced concern about whether industry experience was required to be recent. Two commenters claimed that the Board's recently adopted quality control standard acknowledges that there is no right level of industry experience,¹³¹ and each audit may require different background and experience.

After considering commenter feedback, the Board retained the 3- and 5-year thresholds for determining whether partners and managers should be included in the industry experience metrics. The Board has also retained the threshold of 250 hours or 25% of hours worked as the baseline to determine whether a year qualifies as industry experience but recast it as a general expectation rather than a requirement to allow firms to exercise reasonable judgment. At the firm level, once the 3- or 5-year industry experience threshold has been attained, partners and managers should be included in the metrics until or unless a firm determines, in its reasonable judgment, that the particular industry experience is no longer relevant. At the engagement level the Board has simplified the reporting requirements by limiting the metrics to the years of experience of the engagement partner, the EQR, and members of the core engagement team. The metrics will not include a requirement to determine the industry experience of other partners and managers who participated in the audit who are not members of the core engagement team. The Board believes these changes will appropriately address commenter concerns about potential difficulties in gathering and verifying data while continuing to allow

¹³⁰ A note to the calculations clarifies that industry experience is accumulated throughout an individual's career (*i.e.*, aggregates experience obtained at all career levels). When determining whether an individual has experience in a specific industry the following may be taken into account: (i) industry experience may be, but is not required to be, exclusive to experience on audit engagements, or exclusive to experience gained at an accounting firm, but must be relevant, and (ii) industry experience can be acquired in non-

consecutive years. Relevant experience includes experience in accounting or auditing roles and other specializations, such as experience that is related to fair value estimates in the industry. See Note 2 to Item 4.5 of Form FM, Note 1 to Item 6.5 of Form AP.

¹³¹ QC 1000.47 requires firms to design, implement, and maintain policies and procedures such that their personnel obtain and maintain the competence to fulfill their respective assigned engagement roles, including an understanding of, among other things, the industry in which the company operates and its relevant characteristics.

firms to take into account matters like experience in related industries, the nature of non-audit experience, and whether experience is recent or remote in time. In addition, consistent with the proposal, the final rules do not specify how the relevant information should be accumulated. Because experience may be obtained in different ways at different points throughout a professional's career, there are many ways in which information could be accumulated to support the firm's judgment, including personnel self-reporting or a firm's own time-keeping system.

b. Industry Classification

The proposal set forth requirements for firms to provide information regarding partner and manager experience in particular industries. In order for firms to use a consistent approach to industry identification, the Board proposed the Industry Classification Benchmark (ICB), operated and managed by FTSE Russell. The ICB is used by global stock exchanges, including the London Stock Exchange, Euronext, and NASDAQ OMX, to categorize listed companies. Based on the ICB classification system, firms would have selected from among a total of 31 possible industry classifications.¹³²

Several commenters agreed that the proposed index was an appropriate reference for industry classification. One commenter acknowledged that there was a potential for imprecision when reporting on large conglomerate companies that operate in many different industries, but stated their belief that using the ICB rather than the legacy Standard Industrial Classification (SIC) codes is a better strategy from the outset of the creation of the metrics. This commenter also expressed their understanding that there could be some imprecision at the margins. On the other hand, several commenters stated that it would be inconsistent with other reporting required by the SEC using the SIC codes or the North American Industrial Classification system (NAICS). Some commenters stated that firms do not necessarily align with the industries proposed. One commenter pointed out that the ICB listing does not include public sector or government and asked whether these should be omitted from the reporting requirements.

Commenters responding to the proposal's question about whether reporting should be expanded to allow

for industries in addition to an issuer's primary industry stated that industry reporting for large issuers is complex, some stating that changes over time from mergers and other activities would add to the complexity. Some commenters also stated that the proposed industry metrics would provide challenges with respect to data collection.

In response to these concerns and after further considering recent voluntary public reporting by firms,¹³³ the Board has expanded the classification taxonomy and added flexibility. With respect to the proposed industry classification listing, the final requirements continue to provide a listing from which to select industries for reporting purposes, but have been revised to include certain additional industries such as agriculture and forestry and government and public services categories to facilitate reporting for firms that have large practices in these industries or sectors. In addition, for certain industry groupings, such as finance and health care, an "other" sub-grouping has been added to provide flexibility while maintaining a level of comparability at the overall industry level. Firms are also permitted to specify additional industries for reporting in the event that the listing does not include an industry that accurately represents the industries that they serve.

The taxonomy the Board adopted is as follows:

[Form FM and Form AP will provide drop-down menus for industry classifications]

Industry Classification

- 1 Agriculture and Forestry
 - 1.1 Agriculture and Forestry
- 2 Automotive
 - 2.1 Automotive: Manufacturing
 - 2.2 Automotive: Retail
- 3 Basic Resources
 - 3.1 Basic Resources: Chemicals
 - 3.2 Basic Resources: Industrial Materials
 - 3.3 Basic Resources: Industrial Metals and Mining
- 4 Construction and Materials
 - 4.1 Construction and Materials
- 5 Consumer Products and Services
 - 5.1 Consumer Products and Services
- 6 Energy
 - 6.1 Energy: Alternative Energy
 - 6.2 Energy: Oil, Gas, and Coal
 - 6.3 Energy: Other Energy and Transportation
- 7 Finance

- 7.1 Finance: Banks (Excluding Investment Banking and Brokerage Services)
- 7.2 Finance: Investment Banking and Brokerage Services
- 7.3 Finance: Finance and Credit Services
- 7.4 Finance: Insurance
- 7.5 Finance: Real Estate
- 7.6 Finance: Other
- 8 Government and Public Services
 - 8.1 Government and Public Services: Government
 - 8.2 Government and Public Services: Public Services
- 9 Health Care
 - 9.1 Health Care: Health Care Providers
 - 9.2 Health Care: Pharmaceuticals and Biotechnology
 - 9.3 Health Care: Medical Equipment and Services
 - 9.4 Health Care: Other
- 10 Industrial Goods and Services
 - 10.1 Industrial Goods and Services: Aerospace and Defense
 - 10.2 Industrial Goods and Services: General
- 11 Technology, Media, and Telecommunication
 - 11.1 Technology, Media, and Telecommunication: Media
 - 11.2 Technology, Media, and Telecommunication: Technology Hardware and Equipment
 - 11.3 Technology, Media, and Telecommunication: Telecommunication
 - 11.4 Technology, Media, and Telecommunication: Other
- 12 Trades and Services
 - 12.1 Trades and Services: Travel and Leisure
 - 12.2 Trades and Services: Retail
 - 12.3 Trades and Services: Wholesale
 - 12.4 Trades and Services: Other
- 13 Utilities
 - 13.1 Utilities: Electricity
 - 13.2 Utilities: Gas, Water, and Multi-utilities
 - 13.3 Utilities: Waste and Disposal Services
- 14 Other Industry [specify]
 - 14.1 [Industry]

The Board acknowledges that its taxonomy does not align with issuer reporting using SIC or NAICS codes. As discussed in the Board's proposal, the Board rejected those systems, as well as others, based on several considerations, including that the SIC system has not been updated since the 1980s, the NAICS system uses a production-oriented and North America-centric structure that would not be appropriate as applied to many issuers, and that none of the alternative systems the Board considered would provide a basis for a meaningful metric. For example,

¹³² See FTSE Russell Industry Classification Benchmark (ICB), available at <https://www.lseg.com/en/ftse-russell>.

¹³³ Consideration was given to recent Transparency Reports and information available on public firm websites.

the SIC code system, in addition to being dated, is highly fragmented, employing more than 440 different industry classifications as listed on the SEC's website.¹³⁴ The Board believes this fragmentation would dramatically impair the utility of the metrics, particularly because there is no logical hierarchy by which industries with a need for similar accounting or auditing specializations can be grouped together. By comparison, the Board believes that the curated taxonomy that the Board developed and refined in consideration of the ICB system most closely aligns with the industries that firms generally disclose in their transparency reporting and will provide the most relevant basis for comparison among firms.

c. Metrics

The firm-level metrics provide information related to the firm's industry specialization and the engagement-level metrics provide information related to experience in the issuer's primary industry of engagement partners and engagement quality reviewers. The following sections discuss the proposed metrics, comments received, responses to those comments, and the final requirements for firm- and engagement-level metrics.

(1) Firm-Level Metrics

At the firm level, having industry experience may provide a group of professionals who can both work on engagements and advise members of engagement teams when additional technical, industry-specific knowledge is needed. Firm-level industry experience may indicate that the firm has specific industry-based audit knowledge, industry-specific tools related to risk assessment, and industry-specialized methodologies for accounting and auditing. As a firm-level metric, the Board proposed that firms report, for each industry that represents at least 10% of the firm's revenue from audit services, the number of partners and managers who have accumulated five or more years or three or more years, respectively, of industry experience throughout their careers. The Board also proposed to allow firms to provide the same information for additional industries voluntarily. As discussed above, the proposed reporting instructions specified a minimum threshold number of years of industry experience for reporting and how those years were to be calculated.

Some commenters questioned the proposed 10% of revenue threshold for

identifying the firm's top industries. One commenter stating that considering both the proposed threshold and the fact that the proposed index is not inclusive of all industries in which the firm earned revenue from audit services, the calculation would be problematic or would result in the exclusion of those industries. Another commenter questioned what period the 10% was meant to be measured over and whether it was meant to be aligned with the firm's fiscal year or another period. One firm commenter expressed concern that the proposed metric would require it to compile data for industries in which it did not perform any issuer audits. This commenter, and another, suggested an alternative of calculating the metric based on 10% of a firm's issuer audit practice rather than its overall audit practice. Other commenters suggested that the metric be narrowed to a firm's issuer audit practice, particularly in light of the proposed 10% of the firm's revenue from audit services threshold. One of these commenters additionally suggested that the metric include only partners who serve on issuer audits.

In the Board's proposal, the Board solicited comment on alternatives to the 10% threshold, such as requiring firms to disclose their top five or top ten industries by revenue from audit services. One commenter stated that this approach would be more practical and clearer for stakeholders.

Some commenters suggested potential alternative approaches. One commenter suggested requiring public disclosure of industry expertise at the firm level based on the percentage of a firm's issuer clients according to the industry marked on those issuers' SEC filings. Another suggested reporting the number of entities under audit in a certain industry rather than partner and managers with years of experience. Other commenters suggested that, rather than focusing on the percentage of revenue and using the ICB listing, each firm should be allowed to list the industries, presumably not limited to the proposed ICB listing, and to choose the number of industries, for which they have specific expertise and report on those.

Several commenters suggested that further study or outreach was needed to determine the ability to prepare such information and for investors and audit committees to understand how such firm-level metrics would be used in decision-making.

After considering the comments received, the Board simplified firm-level reporting of industry experience in several ways:

- The Board is limiting reporting requirements to firms that issued five or more audit reports for accelerated filers and large accelerated filers during the reporting period, combined. The Board believes this will reduce the chances that a firm's top industries will not include the industries represented in its issuer audit practice, resulting in a more meaningful data set, while also alleviating compliance burdens on firms with a small issuer practice.¹³⁵

- Rather than requiring reporting with respect to industries that account for at least 10% of the firm's revenue from audit services, the Board is requiring firms to report the top five industry sectors based on such revenue, regardless of the percentage of revenue they represent. The Board believes this will address commenter concerns regarding potential complexities of the calculation. The Board has also clarified the instructions to provide that the determination is based on revenue for the firm's most recently completed fiscal year. While this means that the top five industries will be measured over a different period than the years of experience, the Board believes that consequences of that misalignment are likely to be immaterial, while it will simplify data collection and align it with the firm's business cycle. The Board has also provided the ability for firms to report additional industries if the Board's list does not include an appropriate industry grouping.

While the Board considered commenter suggestions to limit the metric to firm revenue from issuer audits rather than revenue from all audit services, the Board continues to believe that the metric is more relevant if it includes all audit services. The information it provides offers a user of the information a view to the firm's entire audit practice, not just its issuer audit practice, which informs users of the depth of industry experience of the firm's people. The Board believes this information is more relevant than the number of issuers a firm audits in a particular industry because, in absence of an understanding of the specific issuer population, that data may be less easily interpreted.

(2) Engagement-level Metrics

At the engagement level, industry experience provides professionals with

¹³⁴ See <https://www.sec.gov/search-filings/standard-industrial-classification-sic-code-list>.

¹³⁵ Based on PCAOB staff's analysis performed on the data obtained from Audit Analytics, Standard & Poor's, and publicly available data from the PCAOB's Registration, Annual and Special Reporting (RASR), available at <https://rasr.pcaobus.org>. For the two-year period ended September 30, 2023, the Board expects that approximately 50 firms will be required to report this metric each year.

an understanding of risks unique to the industry and industry-specific auditing and accounting considerations. The proposed engagement-level metrics required disclosure of the years of experience in the issuer's primary industry for the engagement partner and the engagement quality reviewer. In addition, the Board proposed that the number of partners (excluding the engagement partner) and managers on the engagement team with experience in the issuer's primary industry also be disclosed.

Commenters raised questions with respect to personnel to be included in the engagement-level industry metrics. One commenter suggested that industry experience metrics be limited to the core engagement team, suggesting that including the EQR implies that the EQR is part of the engagement team, when they are not. This commenter, and some others, suggested that industry experience should be limited to recent experience. A commenter stated that these metrics should be limited to the engagement partner and the EQR, while another commenter stated that partners, other than the engagement partner, and managers, should be disaggregated.

As discussed above, many commenters had concerns with the calculations, including the thresholds to be used in the calculations. In response to these concerns, the Board has limited reporting to the engagement partner and the engagement quality reviewer, and other partners (excluding the engagement partner) and managers on the core engagement team. The Board has eliminated the proposed reporting for other firm partners and managers who are not members of the core engagement team. The Board believes, given the key roles played by the engagement partner and the EQR, and other partners and managers on the core engagement team that this will focus the metric on the most salient information.

(See Exhibit A, "Industry Experience.")

vi. Retention of Audit Personnel

The retention rate and the headcount change inform the overall readiness, availability, and ability of the firm to conduct effective and efficient audits. While some turnover is expected within audit firms,¹³⁶ a comparatively high rate of turnover or higher-than-expected turnover could adversely affect audits.¹³⁷ It could diminish the

available pool of talent who have the appropriate competency. It may take time and resources for the firm to replace the competency lost, likely through effective recruiting and further training. Academic literature consistently finds the same conclusion: turnover negatively affects audit quality, more so at longer-tenured engagements than newer engagements.¹³⁸

The proposal set forth requirements for firms to calculate the average annual retention rate and the average annual headcount change of partners and managers both at the firm- and engagement-level.

At the firm level, the Board also proposed to require disclosing the average number of partners and managers to provide context for the retention and headcount change metrics. For example, a 67% retention rate at a larger firm (200 departures out of 600 professionals) would involve a different level of employee continuity and hence imply a different magnitude of possible impact on the firm's human resource management, than at a smaller firm (e.g., one departure out of three professionals) because this larger firm will likely need to replace 200 professionals while the smaller firm will only need to replace one professional assuming all things are consistent.

At the engagement level, the Board also proposed to require disclosing the average tenure on the engagement for partners and managers to quantify the overall continuity of the engagement team members. Average annual retention rate is a year-over-year metric, but tenure would provide overall engagement-level experience as an important component to understand the experience of the engagement team on the specific audit.

a. Firm-Level Reporting

The annual retention rate measures the percentage of firm personnel continuously employed for the reporting period to demonstrate the continuity of firm personnel. The average annual headcount change measures changes in the firm's overall headcount of

managers or partners, giving an indication of the firm's success in replacing professionals who left roles performing audits and the overall availability of firm personnel. The annual retention rate and the annual headcount change are closely related; however, the annual retention rate would measure the "same people" within the firm, while the annual headcount change would measure the "same number of people." The annual retention rate measures whether the same individuals are still holding their positions at the firm while the annual headcount change is focused on the change in the number of individuals serving in those positions. Changes in annual headcount over time could result from a variety of reasons, for example, changes in a firm's human resource strategy (e.g., greater use of technological resources, shifting more work to shared service centers), or a downturn in the economy.

Commenters generally supported the proposed firm-level metrics. Some said they were sufficiently objective or straightforward and easy to interpret. One of these commenters also indicated that some firms already published similar metrics in firm audit quality reports and another commenter indicated that these metrics allow for some comparisons and may help a user in better understanding a firm. Two investor-related groups agreed with the proposal that a comparatively high rate of turnover or higher-than-expected turnover could adversely affect the audit, while another commenter indicated that staff turnover reporting is directionally supporting audit quality improvement through better continuity year-over-year. One of these commenters also stated that retention metrics will add to the mix of information provided in the final metrics without drawing a specific inference as to an "ideal" retention rate, considering the need to strike a balance between maintaining continuity of the engagement team members and introducing new personnel who will take a "fresh look" at the audit. Another commenter stated that a benefit of the headcount change metric is that it will provide context for the retention metric. A commenter stated if a firm reports favorable employee retention metric, the firm's culture is ideal to contribute to higher audit quality. One commenter supported the firm-level metrics and acknowledged the importance of assessing the readiness and availability of the firm for conducting effective audits, but requested the Board determine how the metrics correlate

with audit quality before requiring public reporting.

One commenter supported firm-level reporting of this metric area, but expressed concern that users could misinterpret the average annual headcount change metric due to unfamiliarity with the distinction between the turnover rate and headcount change. This commenter urged the PCAOB to host a roundtable discussion or pilot test to determine how audit committees or investors may interpret and use this information. Another commenter agreed that the turnover at various levels could have an impact on audit quality.

Two commenters did not support the firm-level reporting of these metrics. While one commenter agreed with the proposed calculation and description of the metrics, this commenter was concerned that it could be misconstrued and present firms with a competitive disadvantage for recruiting talent without providing context (e.g., turnover due to changes in firm structure, shifting industry concentration, performance, ethical, or independence issues). Another commenter claimed the metric was convoluted and would be at the risk of misinterpretation.

Additionally, two other commenters raised a concern; one of them questioned whether these metrics would be meaningful or of value to investors and whether firms would be sufficiently consistent in calculating the metrics to make them worthwhile and another questioned that the inclusion of all the firm's managers and partners may make this metric meaningless for firms whose issuer audit practice is small in relation to the total practice and recommended more outreach regarding the usefulness for stakeholders.

Regarding the description and calculation of these metrics, several commenters asked questions or suggested refinements. One commenter questioned how the metrics would be calculated in a case of voluntary partner rotation. Another commenter recommended clarifying whether "other service lines within the firm" includes "other accounting services" as defined by PCAOB Rule 1001(o)(i). Additionally, one commenter recommended renaming the description of the average annual headcount change to align with the calculation to avoid confusion; as proposed, it would provide current year headcount as a percent of the prior year headcount, not a change as a percent of the prior year. This commenter also suggested clarifying the meaning of "holding the same position," used in the retention

calculation and "transferred out of audit practice," and "continuously employed during the 12-month period" used in the illustrative example of the firm's average annual retention rate calculation. One commenter suggested disaggregating partners and managers.

Three commenters did not support separately reporting senior or all staff level annual retention and annual headcount change metrics.

Taking into account commenter feedback, the Board adopted the retention metric as proposed and adopted the headcount change metric with some modifications.

As noted above, academic literature consistently supports that turnover negatively affects audit quality. The Board believes the retention metric is objective, provides important data, and is already publicly reported by a number of firms in their audit quality or other reports. This metric was also generally supported by commenters from the different constituencies, including firm, firm-related groups, investor-related groups, and others. Since this or similar metrics are already reported by firms, the Board does not believe there will be a disadvantage in recruiting, difficulty in consistently reporting of this metric, or a risk of misinterpretation. Firms could also use the expanded narrative disclosures to provide context, if necessary.

The Board also continues to believe the inclusion of all partners and managers who participate in audits, not a subset of partners and managers who serve issuer engagements, is appropriate because the retention rate and the headcount change inform the overall readiness, availability, and ability of the firm to conduct an effective and efficient audit. While this metric area provides historical information, the Board believes historical data signals impact on the firm's near-future staffing needs and ability to conduct effective audits due to the time it takes to hire and train additional resources. Firms with sufficient overall headcount could reallocate staffing due to a possible staffing shortage on issuer engagements.

The Board does not believe that partner rotation, whether mandatory or voluntary, is likely to affect firm-level reporting of this metric, as the rotating partner will likely continue to participate in audits in the subsequent year (albeit on different engagements). The term used in the calculation "holding the same position" means that a partner remains as a partner and a manager remains as a manager of the firm during the reporting period. The term "continuously employed within the 12 months" means the individual is

continuously employed by the firm throughout the 12 months, without departing to another employment.

The Board revised the average annual headcount change calculation to address concerns raised by commenters, specifically that users may misunderstand this metric as a turnover rate and that the calculation should align with the title. The Board believes that the revision will help a user's understanding of the metric and align with the title of this metric by reporting the headcount change as a percentage of prior year. For example, using the illustrative example in the proposal,

Firm A had 204 managers and 200 managers as of October 1, 20X0 and September 30, 20X1, respectively. Under the revised calculation, the average annual headcount change will be -2% based on $(200-204)/204 = -1.96\%$.

The Board believes this change will help users understand that the average annual headcount change of -2% means a 2% decrease in headcount from prior reporting year end to current reporting year end. This information is often used as a human resource management metric.

Lastly, regarding the description and the calculation of the proposed average number of the firm's partners and managers, one commenter indicated that they are clear and appropriate. Another commenter indicated that it would help to provide context for the retention metric but use a simple average of the count at the beginning and end of the year. This commenter also agreed with treating the promotions to another level of seniority as if they occurred at the beginning of the year.

Based on commenters' feedback on firm-level reporting of average number of managers and partners, the Board adopted this metric as proposed because comments received agreed with the proposed description and calculation and this metric will help provide context for retention and headcount change metrics. The proposed calculation provided a simple average of the number of partners or managers as of the previous reporting period end and the current reporting period end so that the numbers at the end of each reporting period will be used consistently in the calculation. Because the proposed calculation was not significantly different from using the simple average of the count at the beginning and end of the year, as suggested by a commenter, the Board adopted the calculation as proposed.

b. Engagement-Level Reporting

For the engagement-level reporting, commenters generally did not support metrics in this area, while several commenters supported both firm- and engagement-level reporting. Many commenters who did not support such metrics cited the lack of context in the metrics itself or difficulties in explaining a wide range of factors that caused the engagement-level turnover (e.g., mandatory partner rotation, personal issues (i.e., family or medical leave, or relocations), firm's strategic resources management (i.e., scheduling conflicts, resource constraints, independence issues, or need for additional expertise)). Some commenters also cited the difficulty in interpreting the information, the risk of misinterpretation, misuse and misleading users, and even potentially being punitive to engagement teams and issuers. Others offered further reasons for not including this metric, which included difficulty in tracking and having consistent reporting on Form AP to make these metrics worthwhile. One commenter indicated the possibility of being detrimental to audit quality if these metrics incentivize firms to manage to achieve certain metrics, based on the commenter's view that engagement staffing should be based on identified risks of material misstatement of the issuer. This commenter and another commenter further expressed concerns that the engagement-level retention rate for smaller engagement teams will be significantly more sensitive to any turnover relative to the retention rate for larger engagement teams because the size of engagement teams tends to vary with the size of the engagement.

Two commenters also indicated that this metric is unnecessary because engagement resource management is already covered by the firm's quality control system. One commenter indicated that the engagement partner is responsible for determining the sufficiency and appropriateness of engagement resources and prior year information will not be relevant in evaluating the quality of an engagement team in the current year. Another commenter emphasized that properly managed turnover will increase audit quality to reduce familiarity biases.

Some commenters believe these metrics will be more relevant to the audit committee or audit committee and management or should be provided only to the audit committee to allow for robust discussions. One commenter only supported disclosure of the engagement-level tenure metric to the

audit committee because it will provide meaningful information to assist audit committees in exercising their duties to oversee the auditor; however, this commenter did not support other retention metrics as the engagement team staffing is a firm-level decision with factors that are not engagement specific or local laws and regulations that the firms may not be able to disclose.

One commenter indicated that these metrics should be considered in conjunction with other metrics reported rather than presuming a specific correlation with audit quality or auditor's independence, indicating as an example that there are specific legal and ethical mandatory rotation of key audit partners requirements in Europe. Another commenter asked various questions in the calculation of the engagement-level metrics for inclusion or exclusion of certain specific conditions (e.g., whether there is a time limit in how far back a partner or manager's tenure to be included).

Based on comments received, the Board did not adopt the engagement-level reporting of these metrics at this time, primarily due to some of the challenges described by commenters including difficulty in providing context (including some information that is not permitted for public disclosure), consistent reporting, and interpreting this metric area at the engagement level, due to, for example, sensitivity of engagement-level turnover on smaller engagements compared to larger engagements because turnover will have more direct and significant impact to engagement-level reporting due to the relatively smaller size of the managers and partners involved in each engagement.

(See Exhibit A, "Retention of Audit Personnel.")

vii. Allocation of Audit Hours

At the engagement level, the Board believes performing audit procedures prior to the issuer's year end will allow the engagement team to identify significant issues in a timely manner and provide the engagement team with the opportunity to address those issues earlier. The Board also believes it will enable engagement teams to have the resources available to appropriately respond to significant issues identified after year end. Discussing this metric with the audit committee could provide the audit committee with information regarding aspects of the engagement's performance. Academic literature suggests that allocation of a greater proportion of total hours to earlier audit phases, prior to a company's year end,

is associated with a lower likelihood of restatements¹³⁹ and late Form 10-K filings and also decreased total audit hours.¹⁴⁰

As proposed, the firm-level and engagement-level metrics related to allocation of audit hours would have required firms to report the percentage of total audit hours incurred both prior to the issuer's year end and following the issuer's year end, separately.

Several commenters supported the reporting of this metric as proposed (i.e., at both the firm and engagement level), while some commenters only supported required reporting of this metric at the firm level. Of those commenters that supported reporting this metric at only the firm level, two commenters requested the following clarifications regarding various elements of the calculation:

- Whether the period being reported at the firm level should be based on audit reports dated from 10/1—9/30 or based on engagements with a fiscal year-end from 10/1—9/30. This commenter expressed concern that if the proposal's intention was the latter, significant challenges with the proposed 11/30 reporting period for Form FM should be anticipated.

- How this metric would be applied to an initial public offering ("IPO") engagement where the audit covers up to three years where often the work doesn't follow the traditional audit cycle or timeline.

A commenter expressed concern that because the reporting period for Form FM is different than the engagement period for which total audit hours are calculated for Form AP, this will create a challenge with data collection and validation for different periods. This commenter also expressed concern that this metric requires the use of total audit hours, which relies on information from other auditors. The commenter recommended that the Board consider whether the use of other auditor information is necessary to meet the Board's objective. One commenter expressed concern that the firm-level metric would not be comparable due to changes in circumstances of specific issuers because while individual issuer circumstances may not be significant enough to move the metrics for larger

¹³⁹ Daniel Aobdia, Preeti Choudhary, and Noah Newberger, *The Economics of Audit Production: What Matters for Audit Quality? An Empirical Analysis of the Role of Midlevel Managers within the Audit Firm*, *The Accounting Review* (2024).

¹⁴⁰ Brant E. Christensen, Nathan J. Newton, Michael S. Wilkins, *Archival Evidence on the Audit Process: Determinants and Consequences of Interim Effort*, 38 *Contemporary Accounting Research* 2 (2021).

firms, for smaller firms individual issuer circumstances could impact the overall results. As an example, for a smaller firm with an issuer that had a large acquisition during the fourth quarter, that would lead to a significant shift of hours after the end of the year.

As described above, the reporting period for firm-level metrics reported on Form FM will generally be the 12-month period ended September 30 in each year. When reporting this metric, the firm could use the information reported at the engagement level on Form AP for this metric to calculate the firm-level metric for reporting on Form FM. For multi-year audit engagements, including IPO engagements, because the audited financial statements would be included in one auditor's report, it is not possible to identify one particular year-end that a firm should use that would not skew the reported metric. Therefore, the Board excluded multi-year audits from the required reporting of this metric. Given the commenter concerns raised around the collection and data validation of this metric for all issuer engagements, the Board has modified the firm-level description and calculation of this metric area to include only those accelerated filer and large accelerated engagements that will be reported at the engagement level. The Board believes this narrower scope will yield better alignment between firm- and engagement-level metrics and more comparable information across engagements. Related to commenter concerns about the collection of information from other auditors, Form AP currently requires firms to collect information regarding the hours of other auditors in calculating total audit hours. Total audit hours collected for Form AP already includes hours related to the quarterly reviews, so those hours would also be included in the numerator and denominator for this metric, see also discussion above.

Some commenters stressed the importance of providing narrative context in relation to the reporting of this metric, for example:

- One commenter (that only supported reporting at the firm level) asserted that reported metrics may be misleading without proper narrative disclosure to provide the necessary context to users. This commenter elaborated that circumstances beyond the auditor's control may influence the allocation of overall audit hours, and users should be cautioned against making presumptions that a higher proportion of hours after the issuers' year ends is a signal of lower quality.
- One commenter expressed the view that comparability of these metrics can

be highly dependent on factors such as industry, type of audit (*i.e.*, financial statement audit or integrated audit), and transaction timing and volume, among others and that stakeholders will need appropriate context to interpret the significance of these metrics. This commenter also stated that there is a risk that stakeholders may be biased towards inferring that a quantitative metric for allocation of audit hours is a proxy for audit quality, which further supports the need for sufficient appropriate context to interpret the results.

The Board agrees that allowing firms to provide a narrative disclosure will be important in certain situations to help users understand the context of a specific metric. See additional discussion related to this optional narrative disclosure above.

Several commenters, firms and firm-related groups, disagreed with the proposal to report this metric at the engagement level publicly and instead suggested that this metric would be more effectively addressed via dialogue with the audit committee. These commenters expressed the following views:

- For the engagement-level metrics to achieve the Board's stated objectives, such metrics would best be delivered through effective two-way communication between the auditor and the audit committee to provide the relevant and necessary context.
- Even if offered the opportunity to provide narrative context, auditors may not be inclined to provide a full explanation as to why hours allocation may have skewed to after year end for a particular issuer, as doing so might disclose confidential information about the issuer's preparedness for the audit or other facts, which might result in disputes.

• There are a variety of factors that influence the allocation of hours before or after the entity's year-end which are beyond the control of the auditor and may drive a disproportionate allocation of hours before or after the entity's year-end in a given audit, including those related to the entity entering into transactions and changes in the entity's operations or systems.

Other commenters disagreed with the proposal to report this metric entirely. These commenters expressed the following concerns:

- The timing of audit procedures (and resulting hours) is primarily a function of audit strategy decisions based on the assessment of a company's ICFR and inadequate ICFR may require most hours to be incurred after the balance sheet date. This commenter stated that

more hours incurred after the balance sheet date may, in fact, indicate a proper evaluation of ICFR and higher audit quality and therefore this metric would provide little insight into audit quality.

- This metric is not directly related to audit quality. The timing of the engagement procedures depends on many variables, including the nature of the audit areas, specific risks on an engagement, the effectiveness of interim and roll-forward procedures, the availability of staff, when the client is available, the client's specific financial reporting systems, and internal controls. This commenter stated that this information could potentially be misleading or misinterpreted.

- This metric seems somewhat arbitrary and may provide misleading information for those smaller engagements where a higher proportion of the work is performed post-year end.

- It is unclear whether the metric is meaningful because it might be impacted by among other factors, macro-economic trends, company controls and activities, and use of shared service centers and more generally, may require too much explanation to provide meaningful comparisons.

- This metric would not be comparable between larger firms and other firms and could have unintended consequences. In an audit of a smaller reporting company, it is frequently impracticable to perform much work prior to an issuer's year end, both out of concerns for efficiency and because small companies, who might have an outsourced finance function, cannot support significant interim work.

- Since most companies have a calendar year end, firms have strong incentives to perform work as of an interim date to move hours outside of the traditional busy season. A firm's ability to shift work to an interim period is dependent upon a variety of factors, many of which are unrelated to audit quality.

The Board considered commenter feedback, and in particular commenter concerns related to the fact that particular facts and circumstances surrounding an engagement could significantly skew a firm's reported metric when compared to other firms that may have a different portfolio of issuer engagements. While the Board understands that each engagement is affected by the specific facts and circumstances, the Board continues to believe that users of this information will benefit from understanding how audit hours are allocated on engagements, supplemented by

narrative disclosure to provide context, as needed.

At the engagement level, it may be more relevant for a firm to provide a narrative disclosure to explain the particular facts and circumstances related to the current reporting period's metric for this area. One firm stated that "Pulling work forward, where feasible and appropriate, enables engagement teams more time to focus on areas of highest risk in the audit." Based on the Board's oversight activities, the Board agrees with this statement, and the Board believes that this information will be beneficial to users at both the firm level and the engagement level. As with all the metrics, the Board encourages the auditor and audit committee to have a robust dialogue.

The proposal asked whether a different, more granular, metric would be more appropriate, for example allocation of audit hours devoted to each phase of the audit—planning, quarterly reviews, interim field work, final field work up until report release date, and post-report release date until audit documentation completion date. Most commenters who commented on this question did not agree that a different, more granular, metric would be more appropriate. Views provided by these commenters included the following:

- A more granular metric devoted to different phases of an engagement would be very challenging to measure and interpret as the audit is an iterative process. In addition, audit procedures may be performed to meet more than one specific objective and thus may relate for instance to both planning and execution phases of the engagement.
- It will be costly to assemble the information to report and such additional time spent on data reporting diverts very important time during the audit and creates an unnecessary dilemma for engagement teams as to whether it is more important to comply with audit quality standards or reporting requirement rules.

The Board agrees with these commenters that a more granular metric is not necessary to achieve the objectives of this metric and did not modify the proposed metric to make it more granular.

Other than clarifying that multiyear audits are outside the scope of the reporting requirement and revising the scoping of the firm level metric to limit it to only those accelerated filers and large accelerated filers of the firm, the Board adopted this metric as proposed.

(See Exhibit A, "Allocation of Audit Hours.")

viii. Restatement History

Restatements for errors (e.g., not for changes in accounting principles) are generally considered a signal of potential difficulties in at least parts of a firm's audit practice. Academic literature suggests that restatements provide the cleanest empirical measure of audit failure.¹⁴¹ Overall, the Board believes the academic literature supports a measure that accumulates the pattern of restatements for firms, as this would provide a strong measure against which other metrics may be identified in the future.

The proposed firm-level metric set forth requirements for firms to report information related to restatements,¹⁴² including both revision restatements (sometimes referred to as "little r" restatements)¹⁴³ and reissuance restatements (sometimes referred to as "Big R" restatements)¹⁴⁴ of audited financial statements for all issuer engagements of the firm. The proposal also included reporting of reissuance restatements of management's report on ICFR.¹⁴⁵ The Board adopted this metric area with several modifications discussed in more detail below.

The proposal asked whether the proposed descriptions of revision restatement and reissuance restatement were clear and appropriate. The two commenters on this question agreed that the proposed descriptions were clear

¹⁴¹ See, e.g., DeFond and Zhang, *A Review of Archival Auditing Research*.

¹⁴² The term "restatements" has the same meaning as defined in the FASB Accounting Standards Codification ("FASB ASC") Topic 250, *Accounting Changes and Error Corrections*; see also, "retrospective restatement" as defined in IFRS Accounting Standard (IAS) 8, *Accounting Policies, Changes in Accounting Estimates and Errors*. The phrase "error in previously issued financial statements" has the same meaning as defined in the FASB ASC 250; see also "prior period errors" as defined in IAS 8.

¹⁴³ A "revision restatement" of audited financial statements was described in the proposal as "when an immaterial error in previously-issued audited financial statements, that is material to the current period financial statements, is corrected by an issuer in the current period comparative financial statements by restating the prior period information and disclosing the revision."

¹⁴⁴ A "reissuance restatement" of audited financial statements was described in the proposal as "when a material error in previously-issued audited financial statements, report on management's assessment of the effectiveness of ICFR, or both, is identified and disclosed by an issuer in a filing with the SEC (e.g., on Form 8-K Item 4.02, Non-Reliance on Previously Issued Financial Statements or a Related Audit Report or Completed Interim Review)."

¹⁴⁵ A "reissuance restatement of management's report on ICFR" was described in the proposal as "When a material error in a previously-issued report on management's assessment of the effectiveness of internal control over financial reporting is identified and disclosed by an issuer in a filing with the SEC."

and appropriate. The descriptions were adopted with modifications: (i) in addition to referring to restatements identified and disclosed by the issuer in a filing with the SEC, the final description of reissuance restatement also refers to circumstances in which the firm is required to file a notice pursuant to Item 2.1 of Form 3,¹⁴⁶ and (ii) the final description of revision restatement was revised to improve the alignment with the description used by the SEC in its adopting release for exchange listing "clawback" rules¹⁴⁷ and to clarify that the restated financial information and the disclosure appear in a filing with the SEC. The revisions to the description of reissuance restatement ensure that the data set is complete because it captures circumstances where the issuer fails to comply with its reporting obligations. The revisions to the description of revision restatement avoid potential misalignment with the SEC's characterization of little r restatements and also provide a clear trigger (SEC filing) for when a restatement is included in the metrics.

Accordingly, the descriptions of reissuance restatement and revision restatement in the final rules provide as follows (footnotes omitted):

Reissuance restatement: When a material error in previously-issued financial statements is identified and disclosed by an issuer in a filing with the SEC (e.g., on Form 8-K Item 4.02, Non-Reliance on Previously Issued Financial Statements or a Related Audit Report or Completed Interim Review) or the firm is required to file a notice pursuant to Item 2.1 of Form 3.

Revision restatement: When an error in previously-issued financial statements that did not result in a reissuance restatement, but would give rise to a material misstatement if (a) the error was left uncorrected in the current report or (b) the error correction was recognized in the current period, is corrected and disclosed by an issuer in a filing with the SEC.

¹⁴⁶ Item 2.1 applies when a firm:

has withdrawn an audit report on an issuer's financial statements, or withdrawn its consent to the use of its name in a report, document, or written communication containing an issuer's financial statements, and the issuer has failed to comply with a Commission requirement to make a report concerning the matter pursuant to Item 4.02 of Commission Form 8-K.

¹⁴⁷ See *Listing Standards for Recovery of Erroneously Awarded Compensation*, SEC Rel. No. 34-96159 (Oct. 26, 2022) at 28 ("restatements that correct errors that are not material to previously issued financial statements, but would result in a material misstatement if (a) the errors were left uncorrected in the current report or (b) the error correction was recognized in the current period").

The proposed metric included only restatements that related to corrections of errors and excluded all other restatements, including those resulting from changes in accounting principles. The proposed metric also excluded corrections in the current period financial statements of errors that were not material to the previously-issued financial statements and are not material to the current period financial statements (e.g., a voluntary restatement or an out-of-period adjustment), because these are not restatements as described in this rulemaking. One commenter suggested that the metric should explicitly exclude restatements resulting from stock splits and similar activities that result in non-error restatements. As proposed, the metric addressed only restatements for errors, and the Board does not believe it is necessary to list specific types of non-error restatements.

Commenters generally supported the reporting of a restatement metric, including all of the investors and investor-related groups that addressed the topic. Some pointed out that firm transparency or audit quality reports often include a similar metric.

However, two commenters questioned the usefulness of the proposed metric and asserted that such a metric alone could provide only limited insight into the quality of public oversight over issuers and auditors. One commenter stated that this information was already publicly available, and it did not appear necessary to require firms to report it but if it were reported, a streamlined metric that merely reported on the total number of restatements for the year would be preferable. One commenter, who generally supported the proposed metric, stated that it should only include those audits where the auditor withdrew and amended the opinion.

Some commenters generally supported the proposed metric but suggested changes to various elements discussed in more detail below, including:

- Removing revision restatements from the proposed required reporting.
- Counting multi-year restatements as one restatement, not separately.
- Reducing the number of reporting periods to be reported from five to three.
- Not requiring engagement-level reporting.

One aspect of the proposal that did not draw comment, and which the Board adopted as proposed, was the proposed reporting of reissuance restatements of management's report on ICFR, together with reporting of the number of issuer engagements for which the firm initially issued an audit report

expressing an opinion on ICFR.¹⁴⁸ Firms are required to report those reissuance restatements of management's report on ICFR that disclose an additional material weakness or additional elements to a previously disclosed material weakness for all issuer engagements.

a. Revision and Reissuance Restatements

The proposed metric set forth requirements for firms to include information related to both reissuance restatements and revision restatements for all issuer engagements of the firm in the firm's required reporting. Three commenters agreed specifically with this aspect of the required reporting with one commenter stating that providing information related to revision restatements gives a holistic picture of the firm's audit performance, reliability of the financial statements, and transparency from the fact that all restatements are reported and not just reissuance restatements.

The other commenters on this aspect of the proposal, all firms or firm-related groups, disagreed with the proposed requirement to include revision restatements in the metric. They expressed the following concerns:

- Such restatements are not material to the prior periods and to report them suggests an inappropriate level of importance to information deemed immaterial.
- These types of restatements are not currently separately tracked by some smaller firms, given that revision restatements are not material to the year to which they relate, thus are not necessary or useful to decision-making.
- Requiring the disclosure of these instances in the same context as reissuance restatements could inappropriately suggest that there are potential implications for the quality of the audit performed.

The Board continues to believe that the restatement history metric should include all restatements for errors, both revision restatements and reissuance restatements. As noted above, several commenters were supportive of the Board's proposed scope, including all the investors and investor-related groups that addressed the issue. The Board believes that this scope will provide a more complete picture of the extent to which financial statements

audited by the firm contain errors that subsequently have to be corrected.

The Board also believes that its reporting requirements should not distinguish between revision restatements and reissuance restatements in a way that may create inappropriate incentives for auditors and issuers as they make materiality determinations with respect to previous period errors. The SEC addressed this concern in its rulemaking regarding exchange listing "clawback" rules, which also apply to both revision restatements and reissuance restatements.¹⁴⁹

The Board understands that revision restatements and reissuance restatements do not necessarily convey the same information, particularly as to the performance of the auditor. As the Board proposed, revision restatements will be reported on a separate line from reissuance restatements, which will enable users to analyze the two different types separately.

In the final metric, both revision restatements and reissuance restatements will be measured based on disclosure in an SEC filing. Reissuance restatements will also include circumstances in which the issuer is required to make an SEC filing under Form 8-K Item 4.02¹⁵⁰ and fails to do so, which triggers a requirement for the firm to file a notice pursuant to Item 2.1 of PCAOB Form 3. Disclosure in an SEC filing could take a variety of forms, such as checking the box on the cover page of Form 10-K and Form 20-F to indicate correction of error in a previously issued financial statement, as one commenter suggested; filing a Form 8-K in response to Item 4.02; or simply including restated prior period information in a periodic report or registration statement. The Board believes that measuring restatements based on SEC filings will provide an objective point of reference that will enable firms to track the relevant data.

¹⁴⁹ See SEC Rel. No. 34-96159 at 35-6 (in connection with including both revision restatements and reissuance restatements in its clawback rules, stating that "this construction of the statutory language addresses concerns that issuers could manipulate materiality and restatement determinations to avoid application of the compensation recovery policy"). See also *Assessing Materiality: Focusing on the Reasonable Investor When Evaluating Errors* (Mar. 9, 2022), available at <https://www.sec.gov/newsroom/speeches-statements/munter-statement-assessing-materiality-030922>, (observing that some materiality analyses appear to be biased toward supporting an outcome that an error is not material to previously-issued financial statements, resulting in "little r" revision restatements).

¹⁵⁰ See Form 8-K Item 4.02, *Non-Reliance on Previously Issued Financial Statements or a Related Audit Report or Completed Interim Review*.

¹⁴⁸ Under Sarbanes-Oxley, the auditor is required to attest to management's assessment of the effectiveness of the company's internal control only for companies that qualify as "large accelerated filers" or "accelerated filers," other than "emerging growth companies." See Section 404 of Sarbanes-Oxley, 15 U.S.C. 7262.

The Board notes that one commenter asserted that some smaller firms do not currently track revision restatements. As mentioned above, under QC 1000 firms are required to track restatement data (i.e., both types of restatements) in order to design engagement monitoring activities and determine whether engagement deficiencies exist. In addition, given the public availability of the data and the ease with which the SEC's electronic data gathering analysis and retrieval ("EDGAR") database can be searched, the Board does not believe that gathering the data will be overly burdensome, regardless of whether it is a firm's current practice to do so.

b. Multi-Year Audit Restatements

The proposal contemplated that, in the case of multi-year audits where one auditor's report covers the audits of multiple years of financial statements, the metric would treat every year that is restated as a separate restatement. While one commenter supported the proposed treatment of these types of audit restatements, firms and firm-related groups stated that multi-year restatements should be based only on the initial year audited, and should not be counted separately for each year. These commenters expressed concern that, as proposed, the metric would reduce understandability and comparability as it would misalign with how the audit was classified when reporting the metrics in the initial year the audit report was issued, creating the potential for a misleading multiplier effect. One firm stated that some restatements may be triggered by a distinct issue in one year, which may or may not be material to other years presented, but those other years are still corrected in the restatement process. Another firm expressed concern about the potential complexity and difficulty of the proposed reporting. A firm-related group suggested that, as an alternative, the multi-year-audit restatements might instead be covered by providing total years impacted by restatements as a supplementary metric.

The Board considered commenter input on this issue, but the Board continues to believe that the most accurate and appropriate presentation of multi-year audit restatements is to count each year that is restated as a separate restatement when reporting this metric. If a firm has additional context related to a multi-year audit restatement that it believes will assist users in properly interpreting the metric, the firm could describe it as optional narrative accompanying the metric.

c. Number of Reporting Periods to Present

The proposal provided that this metric would be reported for the current reporting period and each of the preceding four years, for a total of five years.¹⁵¹ One firm agreed with the proposal, stating that the five-year period strikes a balance between providing sufficient historical context to identify trends and patterns in audit quality and restatements and it also maintains the current relevance.

The other commenters on this aspect of the metric, all firms and firm-related groups, disagreed with the proposal and instead suggested that firms be required to report the current period and each of the two preceding years, for a total of three years. These commenters offered the following rationales:

- Three years would be consistent with an issuer's reporting of periods in an annual report in accordance with SEC rules and regulations.
- It would be better to require firms to report three years because it will greatly reduce the burden on terminated firms to track the restatements of their former audit clients (e.g. newly implemented monitoring and communication protocols with successor audit firms and previously audited companies). Since issuers are required to present three years of income statements in the financial statements included in Form 10-K, they will need to obtain consents from former auditors for those prior periods. As a result, terminated firms will be made aware of any restatements when requested to provide consents.
- Five years is unnecessarily long given this information is readily available via the SEC's EDGAR system.

The Board considered the comments received and determined to limit the metric to three years, rather than the five years initially proposed. As commenters have pointed out, this will better align with SEC requirements regarding financial statement presentation and may therefore reduce any potential efforts or costs associated with implementation. While the change may result in some reissuance restatements falling outside the reporting period, the Board believes that focusing on more current information will provide users with a more relevant metric.

¹⁵¹ Based on an internal evaluation of restatement patterns covering the period from Q1 2008 to Q2 2018 by the PCAOB's Office of Economic Risk and Analysis, 98% of restatements during this period were announced with a delay of approximately five years or less and about 80% of the restatements were announced with a delay of three years or less.

d. Engagement-level Reporting

The proposal stated that since restatements are disclosed in the financial statements, the Board was not proposing to require that firms report this metric at the engagement level. Commenters who expressed views on this aspect of the proposal agreed with this view stating that this information is already publicly available from the SEC. One firm supported engagement-level reporting of this metric explaining that it could lead to deeper accountability to assess the performance of audit teams by linking the restatements to the responsible engagement team, and it would result in promoting higher standards of audit quality. Taking into account commenter feedback, the Board continues to believe that reporting restatement information at the engagement level is unnecessary because it is already publicly available in a searchable format for any particular issuer through the SEC's EDGAR filing system. Conversely, for users to aggregate restatement information for all of a firm's issuer engagements could require significant time and effort, which is why the Board only adopted this metric at the firm level. Engagement-level reporting is not required under the final rules.

e. Other Commenter Feedback

Other commenter suggestions included:

- *Predecessor and successor auditor.* Under the proposal, the restatement metric would apply with respect to audit reports "initially issued by the firm." As a result, restatements would be included in the metric of the firm that issued the original audit report on the financial statements or on the audit of ICFR, regardless of whether the firm had itself identified the error or continued to serve as the issuer's auditor. Firms, in particular those that resign from the engagement or are otherwise replaced, would need to monitor whether previously-issued audited financial statements, reports on management's assessment of the effectiveness of ICFR, or both, are subsequently restated for at least three years. Two commenters that addressed this aspect of the metric agreed with the treatment provided under the proposal, and the Board adopted it as proposed.

- *Prospective reporting upon effective date.* Several commenters suggested that if the Board proceeded with the proposal to include revision restatements in the required reporting for this metric, prospective reporting upon implementation would be more practicable. As discussed above, under

QC 1000 firms are required to track restatement data in order to design engagement monitoring activities and determine whether engagement deficiencies exist, therefore firms will already have been tracking this information upon the effective date of the requirements in this rulemaking.

(See Exhibit A, “Restatement History.”)

Reporting

1. Thresholds for Required Reporting

The Board proposed to apply the same threshold for both firm-level and engagement-level reporting, focused on auditors and audit engagements for issuers that qualify as accelerated filers or large accelerated filers under SEC rules. The Board proposed that firm-level reporting would be required of every firm that audits at least one company that has self-identified as an accelerated filer or large accelerated filer by checking the box on an SEC filing (or, because Form 40–F does not contain such a check box, at least one Form 40–F filer that meets the criteria to be an accelerated filer or large accelerated filer under SEC rules)¹⁵² during the reporting period. The Board also proposed that engagement-level reporting would be required for every audit of such an accelerated or large accelerated filer.

The Board believes the proposed threshold would focus the reporting requirements on the firms and engagements in which investors and other stakeholders have the greatest interest in additional information, and that establishing the same threshold for firm- and engagement-level reporting would foster comparability across both issuers and firms and provide richer context for the evaluation of engagement-level information. The proposal also contemplated that firms that were not subject to the reporting requirements could choose to report voluntarily.

This approach excludes engagement-level information about audits of non-issuers, including broker-dealers, and of issuers that are not accelerated filers or large accelerated filers under SEC rules. These include, for example, investment

companies;¹⁵³ employee stock purchase, savings, and similar plans that are required to file reports with the SEC on Form 11–K;¹⁵⁴ and many smaller reporting companies.¹⁵⁵ It also excludes firm-level information about firms whose PCAOB practice was limited to such audits.¹⁵⁶

i. Firm- and Engagement-Level Reporting Thresholds

The Board solicited comment on whether the proposed reporting thresholds for firm- and engagement-level were appropriate. Investors and investor-related groups generally supported the proposed thresholds for both firm- and engagement-level reporting. They agreed that the proposed requirements would appropriately apply to the audits, and auditors, of companies that account for the majority of the U.S. public company market capitalization, and would capture the situations where investment and proxy voting decisions would be most likely to benefit from additional information about the audit and auditor. One firm-related group broadly agreed with the thresholds for both firm- and engagement-level reporting because it believes different reporting requirements are not warranted. Another firm-related group also agreed with the proposed reporting thresholds as appropriately targeting the largest companies having a significant impact on the market capitalization of issuers. Two commenters recommended extending the reporting requirements to all PCAOB-registered firms, either immediately or over time.

¹⁵³ Section 3(a)(1) of the Investment Company Act of 1940, 15 U.S.C. 80a–3(a)(1), defines an “investment company” as an issuer which (A) is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting, or trading in securities; (B) is engaged or proposes to engage in the business of issuing face-amount certificates of the installment type, or has been engaged in such business and has any such certificate outstanding; or (C) is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 per centum of the value of such issuer’s total assets (exclusive of Government securities and cash items) on an unconsolidated basis. Audits of business development companies (BDCs) that met the criteria to be an accelerated filer or large accelerated filer would be included.

¹⁵⁴ See Exchange Act Rule 15d–21, 17 CFR 240.15d–21.

¹⁵⁵ See Regulation S–K, Item 10(f)(1), 17 CFR 229.10(f)(1).

¹⁵⁶ Firms that do themselves not serve as lead auditor for an accelerated filer or large accelerated filer but play a substantial role in audits led by other firms would also not be subject to the proposed reporting requirements. See PCAOB Rule 1001(p)(ii) for the definition of “play a substantial role in the preparation or furnishing of an audit report.”

On the other hand, all firms and a firm-related group that commented on the firm-level reporting threshold objected to it, generally suggesting instead that firm-level reporting should be required of firms that are annually inspected by the PCAOB, with some recommending voluntary reporting by smaller firms. One commenter suggested reporting only for annually inspected firms that audit at least one accelerated filer or large accelerated filer. Another commenter recommended that firm-level reporting should be required only of firms with 25 or more large accelerated and accelerated filer engagements, saying that firms with a small number of large accelerated and accelerated filer engagements would not produce meaningful metrics with sufficient anonymity as their metrics can be unduly influenced by a single engagement. Some of these commenters asserted that requiring reporting only from annually-inspected firms would balance scalability concerns with the need for investor protection, as it would still capture a large majority of the U.S. public company market capitalization. One commenter stated that the issuer portfolio at firms with less than 100 issuers is not sufficiently like those firms inspected by the PCAOB annually to provide valuable comparisons and another commenter expressed concern about issuers that frequently move above or below the accelerated or large accelerated filer thresholds.¹⁵⁷ One commenter added that there is precedent to use an alternative threshold based on firms that issue audit reports for more than 100 issuers, such as PCAOB’s annual inspection and QC 1000.18 requirements.

Several commenters also raised concerns about the cost of metrics reporting and stated that requiring reporting only from annually-inspected firms will better support the cost to comply with the proposed requirements and alleviate related unintended consequences, particularly greatly reducing the burden for smaller firms and firms in foreign jurisdictions.

Another commenter supported requiring reporting only from annually-inspected firms because it would alleviate concerns about privacy and confidentiality, particularly for firms

¹⁵⁷ Based on the PCAOB staff’s analysis performed on the data obtained from Audit Analytics, Standard & Poor’s, and publicly available data from the RASR, available at <https://rasr.pcaobus.org>. In the four-year period ended September 30, 2022, on average, approximately 4% of filers that reported on Form 10–K and Form 20–F and had not previously self-identified as either a large accelerated filer or accelerated filer newly self-identified as either a large accelerated or accelerated filer each year.

¹⁵² See Exchange Act Rule 12b–2, 17 CFR 240.12b–2. Generally, under Rule 12b–2, a large accelerated filer is an issuer that meets certain reporting conditions and has a public float (aggregate worldwide market value of voting and non-voting common equity held by nonaffiliates) of \$700 million or more. An accelerated filer is generally an issuer that meets the same reporting conditions; has a public float of \$75 million or more, but less than \$700 million; and had revenue of \$100 million or more in the most recent fiscal year for which audited financial statements are available.

outside the United States that issue a limited number of large accelerated or accelerated filer auditor reports annually and are subject to laws and regulations in those areas, because firm-level metrics may effectively result in the disclosure of engagement-level information. They further noted that such a threshold may avoid redundant reporting burdens for these firms and disclosure of confidential information of specific issuers, but still achieve the objectives of reporting firm level metrics as “firm-level reporting would consist only of summary data” as proposed.

For the engagement-level reporting threshold, because firms objected to any public reporting of engagement-level metrics, most firms did not comment further on the threshold for engagement-level reporting except for offering some other suggestions. See below for other comments received.

The Board adopted the thresholds for both firm-level and engagement-level reporting with one change. Firm-level reporting will be required of every firm that audits at least one company that has self-identified as an “accelerated filer” or “large accelerated filer” by checking the box on an SEC filing during the reporting period. Engagement-level reporting will be required for every audit of such an accelerated or large accelerated filer.

The final threshold does not refer to Form 40–F filers that meet the definition of “accelerated filer” or “large accelerated filer” under SEC rules, which were included in the proposal, based on the Board’s understanding that such companies are not regarded as accelerated filers or large accelerated filers. Companies that file both Form 40–F and another SEC annual reporting form, and that check the box to self-identify as an accelerated filer or large accelerated filer on that other form, will still be included.

The Board continues to believe that requiring reporting for auditors and audits of large accelerated filers and accelerated filers is the most appropriate approach. As stated in the proposal, the Board estimated that the firm-level reporting requirements will apply to approximately 210 firms,¹⁵⁸ including 22 of the top 25 U.S. firms by total firm

revenue,¹⁵⁹ and all of the 2022 PCAOB annually inspected firms that continue to audit issuers,¹⁶⁰ and that the proposed engagement-level reporting requirements would apply to approximately 3,400 issuer audits, representing 99% of the total market capitalization of issuers reporting on Form 10–K and Form 20–F.¹⁶¹

The Board analyzed the other reporting thresholds suggested by commenters based on the same data. Coverage would be significantly reduced if the Board required reporting only from annually inspected firms: 13 firms,¹⁶² including 12 of the top 25 U.S. firms by total revenue compared to 22 firms.¹⁶³ Similarly, if only annually inspected firms were required to provide engagement-level reporting, it would apply to approximately 2,700 issuer audits, representing 83% of the total market capitalization of issuers reporting on Form 10–K and Form 20–F. If only firms with 25 or more large accelerated or accelerated filers were required to report, then firm-level reporting would apply to 11 firms, including 9 of the top 25 U.S. firms by total revenue, and engagement-level reporting would apply to approximately 2,800 issuer audits, representing 84% of the total market capitalization of issuers reporting on Form 10–K and Form 20–F.

In addition to the significant coverage decreases, limiting metrics reporting to annually inspected firms would exclude

¹⁵⁹ See Accounting Today, *2024 Top 100 Firms + Accounting’s Regional Leaders* (March 2024), for a listing of the top 25 U.S. Firms. Based on staff analysis, the three firms in the top 25 firms that would be excluded from the reporting requirements are Aprio, LLP; Carr, Riggs & Ingram LLC; and Citrin Cooperman & Company, LLP.

¹⁶⁰ See the 14 firms listed as 2022 Annually Inspected Firms, available at <https://pcaobus.org/inspections/basics-of-inspections>. B F Borgers CPA PC was removed for the purpose of this analysis as its registration withdrawal is currently pending.

¹⁶¹ The data was obtained from Audit Analytics, Standard & Poor’s, and publicly available data from the RASR, available at <https://rasr.pcaobus.org>. Large accelerated filers and accelerated filers were included in this number. Large accelerated filer or accelerated filer status was based on the most recent quarterly or annual filing as of February 10, 2024. Market capitalization was calculated as of December 31, 2023. Because in some instances multiple audit reports were issued in the same year, the total number of audit reports issued during the same time period using the same data source would be approximately 3,500.

¹⁶² From the 14 firms listed as 2022 Annually Inspected Firms as described above, B F Borgers CPA PC was removed for the purpose of this analysis as its registration withdrawal is currently pending.

¹⁶³ See Accounting Today, *2024 Top 100 Firms + Accounting’s Regional Leaders* (March 2024), for a listing of the top 25 Firms. Based on staff analysis, two annually inspected firms (B F Borgers CPA PC and Cohen & Company, Ltd.) were not included in the top 25 firms.

non-US firms that audit a small number of non-US based issuers with substantial market capitalizations. If the Board ranks firms based on the market capitalization of the issuers they audit, the top 30 firms audited 94% of the total market capitalization of accelerated filer and large accelerated filer issuers. However, only five of these top 30 firms are annually inspected. The remaining 25 firms are all non-U.S., and all but one of them audited large accelerated filers averaging at least \$10 billion in market capitalization. Similarly, limiting metrics reporting to firms with 25 or more large accelerated or accelerated filers would result in only six of the top 30 firms (ranked based on the total market capitalization of the issuers firms audit) reporting the metrics, and would exclude most non-U.S. firms that audit non-U.S. based issuers with substantial market capitalizations.

The Board considered applying the reporting requirements to all registered firms, as one commenter suggested. However, the Board continues to believe that investors and other stakeholders have the greatest interest in additional information regarding large accelerated and accelerated filers and the firms that audit them, and the comments supporting the proposal that the Board received from investors and investor-related groups tend to confirm that view. For that reason, the Board believes that requiring metrics reporting for all registered firms could impose costs that are not justified in light of the anticipated benefits.

Regarding the concerns of privacy or possibly disclosing confidential or otherwise protected information, particularly for firms outside the United States, the Board is not aware of any specific issues and no commenter identified any particular requirements that would conflict with the disclosure of the metrics the Board adopted. See below for further discussion of privacy and confidentiality issues.

ii. Other Commenter Feedback

The Board solicited comment on whether smaller firms should have different reporting requirements than larger firms. In addition to comments described above, several commenters recommended having different reporting requirements for smaller firms than for larger firms.

In addition, two firms requested clarification or application guidance regarding the treatment of issuers that change filer status into an accelerated or large accelerated filer during the reporting period. These commenters recommended allowing these issuers to have one full year of implementation

¹⁵⁸ The data was obtained from Audit Analytics, Standard & Poor’s, and publicly available data from the RASR, available at <https://rasr.pcaobus.org>. Firms that issued audit opinions for issuers that met the large accelerated or accelerated filer definition in the 12 months ended September 30, 2023, were included in this number. Large accelerated filer or accelerated filer status was based on the most recently filed quarterly or annual report as of February 10, 2024.

period after the changes in filer status. The Board notes that firm-level reporting will be required of all firms that issued an audit report for at least one large accelerated filer or accelerated filer during the reporting period, and that engagement-level reporting will be required in connection with each audit report issued for a large accelerated filer or accelerated filer. Accordingly, the relevant date to determine large accelerated filer or accelerated filer status will be the date the audit report is issued. Because SEC requirements regarding becoming a large accelerated filer or accelerated filer include at least six months lag time,¹⁶⁴ the Board does not believe that an additional transition period would be necessary under the Board's rules.

The Board solicited comment on whether the Board should require engagement-level metrics for audits of investment companies (other than BDCs that are accelerated filers or large accelerated filers) or non-accelerated filers. Several commenters supported excluding one or more categories of such entities from metrics reporting because the proposed metrics would be less likely to assist in investment and voting decisions. On the other hand, one commenter recommended including publicly traded "closed end" investment companies, registered open end investment companies, and broker-dealers that are publicly traded on the basis that some mutual fund investors ratify the appointment of the auditor and audit committees presumably approve for the auditor for these companies.

As proposed, the Board is not requiring engagement-level reporting on these investment companies and non-accelerated filers. For audits of investment companies, the Board continues to believe that the arguments underpinning requests for additional information about audits and auditors will not apply, or apply with the same force, in these situations, where shareholder ratification of the appointment of the auditor may not be

typical and the metrics would be less likely to assist in investment and voting decisions. Regarding the reporting of non-accelerated filers, as discussed above, these issuers have significantly smaller market capitalization per issuer on average, and the Board is concerned that the benefits associated with such reporting would not justify the costs.

2. Reporting of Firm-Level Metrics (Form FM)

The Board proposed that firms report their firm-level metrics annually on a new Form FM, *Firm Metrics*. Of those commenters that support reporting firm-level metrics, some also explicitly expressed support for reporting annually on Form FM. One commenter recommended that Form FM be amended to explicitly include the definitions of the metrics and metric formulas to provide pertinent information to enhance the context and understandability for users.

The proposal asked whether, rather than reporting on Form FM, firms should report firm-level metrics, as of March 31 on Form 2, which is due on June 30. One commenter stated that the firm-level metrics could be reported on Form 2 to simplify the reporting for firms and consolidate the information. One commenter did not support reporting firm-level metrics on Form 2 stating that between issuer filings through March 31 and the performance of procedures on the first quarter filings through May, firms are exceptionally busy through the middle of May each calendar year. Another commenter questioned whether the information, being reported only annually, would be too old to assist decision-making.

Taking into account commenter feedback, the Board continues to believe that reporting firm-level metrics publicly on a new Form FM filed by November 30 will provide investors and other stakeholders with timely and useful information about auditors and will provide a basis of comparison for the engagement-level metrics, where applicable. The Board does not believe that Form 2 would be the appropriate place to report the firm-level metrics because the due date of Form 2, June 30, falls after the general timing of shareholder meetings (typically April through June for issuers with a calendar fiscal year) and this information would generally arrive too late to be considered in deciding how to vote on ratification of the appointment of the auditor. The Board believes audit committees would also benefit from having this information earlier, since it could be useful when determining whether to

reappoint the auditor.¹⁶⁵ While firm metrics would be reported only once a year, the Board believes that the information they convey would still be useful, both to investors (who otherwise have access to extremely limited information about the auditor) and to audit committees (who may benefit from standardized firm-wide information that helps put their engagement in context).

The information disclosed on Form FM will be available in a searchable database on the Board's website, similar to the Form AP database. As noted above, in addition to the required firm-level metrics, firms will have the option to provide a brief narrative to accompany each metric. In response to the commenter that emphasized the importance of including all definitions and metric formulas in Form FM, the Board has expanded Part III of Form FM, *Terminology*, to include all of the definitions used in the metrics, not just those used in multiple metrics. As proposed, the formula for each required metric is included in Part IV, *Metric Calculations, Reporting and Discussion* of Form FM.

The proposal provided that the reporting period for Form FM would generally be the 12-month period ended September 30 in each year¹⁶⁶ and filed on or before November 30, 61 days after the end of the reporting period.

Some commenters expressed support for the proposed reporting period ending on September 30. One of these commenters also suggested that consideration be given to allowing firms to pick a reporting period based on their firm's cycles. A few commenters expressed concern with the reporting date of September 30 and instead suggested firms be permitted to choose their own timing for Form FM. These commenters expressed the following views:

¹⁶⁵ See Letter from Center for Audit Quality (Aug. 1, 2024) at 3 ("The majority [59%] of audit committee members surveyed agree some standard information about auditors should be considered when making their selection and performing their oversight responsibilities").

¹⁶⁶ Exceptions to the proposed reporting period of firm-level metrics reported on Form FM included the proposed metrics for Quality Performance Ratings and Compensation and Audit Firms' Internal Monitoring. The proposal stated that "[these] proposed firm-level metrics relate to activities for which firms may already have defined periods or cycles that may not align with [the Board's] proposed reporting date. In these cases, [the Board] proposes that the time period covered by the metrics may be tailored to a firm's existing processes and procedures." Neither of these metrics are included in the metrics the Board adopted. However, the Board adopted a metric related to the Training Hours for Audit Personnel metric which will permit firms to use an already-established training calendar cycle for calculation and reporting of this metric, which may not align with the Form FM reporting period.

¹⁶⁴ Under the SEC definitions of "large accelerated filer" and "accelerated filer," the determination that an issuer has become a large accelerated filer or accelerated filer is generally based on the public float as of the end of the issuer's second fiscal quarter, to take effect as of the end of the fiscal year. See Exchange Act Rule 12b-2(3), 17 CFR 240.12b-2(3). The Board notes that issuers that are eligible to use the requirements for smaller reporting companies under the revenue test in paragraph (2) or (3)(iii)(B) of the SEC's "smaller reporting company" definition could cease to be accelerated filers based on a determination made at or after the fiscal year end. However, since metrics requirements would not apply in such a case, the Board does not believe any transition period is necessary.

- The reporting date for firm-level metrics should not matter to investors, therefore the PCAOB should consider firm input as to the date that best aligns with their internal processes.

- Concern about the amount of work firms will be required to do on this new form along with the QC 1000 requirements and the relationship with information reported on Form 2 on a different time period. This commenter suggested that the Board should undertake a comprehensive review of all reporting requirements, systems, reporting, and dates.

- Concern that small- and mid-sized firms will be particularly burdened with having to evaluate the quality control system under the newly adopted quality control standard, support the annual inspection, and assemble data for reporting in Form FM all at the same time.

The Board does not believe that permitting firms to choose their own timing for Form FM would ultimately serve the users of the metrics, because of the enhanced comparability that a common measurement date and measurement period provide. In particular, audit committees, who may seek to consider comparative metrics when determining which audit firm to appoint, would not be served by using potentially outdated or non-comparable data from a firm. The proposed reporting date aligns with the date the firm is required to evaluate its QC system under QC 1000, which was adopted by the Board and approved by the SEC on September 9, 2024. While the Board understands that this date will cause some firms to have additional PCAOB reporting responsibilities simultaneously, the Board continues to believe that this timing is preferable since it is prior to the calendar year end and the traditional busy period for many firms, which the Board believes would reduce potential resource or time constraints and further benefit firms.

Two commenters supported the proposed November 30 due date of Form FM. One commenter, who supported the proposed November 30 due date, specifically found it helpful that the date aligned with QC 1000. Some firms expressed concern that the proposed due date would create challenges going forward for firms to support their annual inspections, evaluate the quality control system, and assemble data for reporting in Form FM all at the same time. One commenter suggested that the due date for Form FM should be three months from the end of the reporting period, or December 31. Another commenter expressed concern that a 61-day period may not be

sufficient to allow firms to accurately and completely collect, assemble, and report the metrics and instead suggested that firms should be permitted to choose their own filing date. One commenter, who supported the proposed reporting date of September 30, suggested the PCAOB consider a longer period of time in which to submit Form FM in the initial years after the effective date.

The Board believes the 61-day period will provide sufficient time for firms to accumulate data and calculate the metrics and report to the PCAOB. In addition, as discussed above, the Board has reduced the scope of the following metric areas in particular: (i) Partner and Manager Involvement, Workload, and Allocation of Audit Hours, to include only large accelerated filer and accelerated filer engagements; and (ii) Industry Experience, to limit the reporting to those firms that issued five or more audit reports for accelerated filers and large accelerated filers, combined, during the reporting period. All of these changes should further reduce the reporting effort and help to address commenter concerns. A benefit of aligning the Form FM reporting period and filing deadline with QC 1000 is that some firms, if they choose, could also use these metrics in their monitoring and remediation process as part of the QC system, enabling the firm to use comparable information underlying both reporting obligations for Form QC and Form FM. Under the final rules, as proposed, reporting on Form FM is due on or before November 30, 61 days after the end of the reporting period. In addition, see discussion of the effective date below.

Form FM was adopted with the following modifications:

- Making conforming revisions to reflect the changes to metrics discussed above.
- Related to the optional narrative, (i) expanding the character limit to 1,000 characters and (ii) adding additional instructions for firms that elect to provide the optional narrative (discussed above).
- Rearranging instructional language within the form and expanding Part III of Form FM to include all terminology used in the metrics (discussed above).
- Removing references to 40-F filers (see above).

Together with new Form FM, the Board also proposed a new reporting rule, PCAOB Rule 2203C, which did not draw comment and was adopted substantially as proposed, and making conforming changes to Rules 2205 and 2206. The text of PCAOB Rule 2203C; Form FM, together with the form

instructions; and the conforming amendments are included below.

3. Reporting of Engagement-Level Metrics (Form AP)

The Board proposed to require firms to report engagement-level metrics on Form AP, along with the already required disclosure of the name of the engagement partner and information about other firms involved in the audit.¹⁶⁷ The Board believes that Form AP provides an established mechanism for conveying engagement-level information that is familiar to investors and other stakeholders.¹⁶⁸ Reporting on Form AP will allow access to the engagement-level metrics in a centralized location and will allow for the dissemination of the metrics through already established data channels. Form AP is also downloadable, which will provide users of the information the ability to perform comparisons across engagements, including analyses of the entire Form AP data set.

The Board proposed adding a new section to Form AP for firms to report the required metrics. As noted above, in addition to the specific engagement-level metrics, the Board proposed that the firm would be able to provide an optional narrative description to accompany each metric. As proposed, the firm would have been able to provide up to 500 characters as part of their narrative description to provide context to facilitate the reader's understanding of the metric. To reflect Form AP's broader content, the Board also proposed to rename it "Audit Participants and Metrics." The text of the Form AP amendments and the form instructions are included below.

Commenters who supported public reporting of engagement-level metrics generally agreed with reporting on Form AP. However, several commenters

¹⁶⁷ See PCAOB Rule 3211. PCAOB Rule 3211 requires the filing of a report on Form AP regarding an audit report the first time the audit report is included in a document filed with the SEC. In the event of any change to the audit report, including any change in the dating of the report, PCAOB Rule 3211 requires the filing of a new Form AP the first time the revised audit report is included in a document filed with the SEC. If the auditor's report is reissued and dual-dated, the firm is required to file a new Form AP that would reflect the most updated information of the proposed engagement-level metrics (e.g., total audit hours as of the latest audit report date based on the cumulative total audit hours). For most audits, Form AP is due within 35 days after an audit report is first included in an issuer SEC filing. The entire Form AP data set (updated daily) and data dictionary are available to download in CSV format under the section, "Download the entire data set," at <https://pcaobus.org/resources/auditorsearch>.

¹⁶⁸ Information related to usage statistics can be found on the PCAOB's website (<https://org/auditorsearch>).

disagreed with public reporting of engagement-level metrics. The Board has addressed these comments above. One commenter suggested that the reporting date should be changed to November to align to the audit committee's considerations of reapproving a firm and when considering the following year's audit plan. Additionally, one commenter voiced their concern that there is mixed evidence on the influence of Form AP disclosures on decision-making.

The Board adopted the requirement as set forth in the proposal to report engagement-level metrics on Form AP and rename the form Audit Participants and Metrics. Correspondingly, the Board has retitled PCAOB Rule 3211 as *Audit Participants and Metrics* and made a conforming amendment to AS 3101.20. The Board made certain amendments to the requirements for reporting on Form AP as follows:

- Conforming revisions to reflect the changes to include the metrics discussed above.
- Related to the optional narrative, (i) expanding the character limit to 1,000 characters and (ii) adding additional instructions for firms that elect to provide the optional narrative.

Form AP's deadline of 35 days after the issuance of the auditor's report already takes into account the timing of the proxy vote for most issuers.

4. Amendments to Form FM and Form AP

As is required for other PCAOB forms, the Board proposed that firms be required to amend Form FM or Form AP to correct inaccurate information or provide omitted information that should have been included.¹⁶⁹

Some commenters requested that the Board consider adopting some level of materiality or de minimis threshold for the proposed metrics reporting and specifically address how firms should consider whether to amend their reporting when differences arise. These commenters expressed the following views:

- Although a materiality concept, on its own, will not eliminate the challenges currently identified and those that are unknown, it may help reduce confusion to investors and other stakeholders resulting from the need to report amendments caused by

immaterial changes in estimates and unintentional errors and to help avoid unnecessary penalties for materially correct reporting.

- The risk of enforcement for minor, unintentional errors in reporting may also play a role in public accounting firms' decision to cease auditing public companies.

- Guidance would be essential for implementing any final standard effectively to balance the costs of compiling and reporting the information and this guidance should extend to the evaluation of differences that may arise in the disclosure of participating firms on Form AP.

- The proposal should be amended for the application of materiality thresholds based on reasonable assurance.

- The Board should consider revisions to PCAOB Rule 3211 to add materiality thresholds based on reasonable assurance and clarify whether the current guidance regarding amendments would extend to all metrics as well as how routine corrections and re-allocations of time entries and other matters affecting metrics reported on Forms FM are expected to be handled.

- If the PCAOB does not adopt a materiality threshold for Form FM, firms may need to consider which controls need to operate at a level of absolute assurance, which the firm stated would add significant effort and cost.

- The final rule should include a safe harbor for reporting that includes unintentional and immaterial deviations from an otherwise accurate reflection of a metric.

- The amendments should include a mechanism for revisions and a statute of limitations, such as reporting of time, should be included in the final rule. The Board believes that the reference to statute of limitations is intended to request a specified period after filing beyond which no amendments would be required for corrections.

One investor-related group indicated that they would not object if the PCAOB established a de minimis threshold for unintentional inaccuracy in reporting metrics. Another commenter recommended that the PCAOB establish a de minimis threshold for unintentional inaccuracy that applies to all firm reporting, not just in relation to the proposal.

The Board did not adopt a materiality or de minimis threshold in connection with the obligation to amend forms to correct information that was incorrect at the time the report was filed or to provide information that was omitted

from the report and was required to be provided at the time the report was filed. Historically, the Board has not established, and has not found necessary, materiality or de minimis thresholds in connection with form amendments. As a commenter acknowledged, a materiality or de minimis threshold will not necessarily eliminate challenges commenters have identified or those that have yet to be identified in connection with potential corrections. Indeed, the Board believes that implementing a materiality or de minimis threshold would introduce unnecessary complexity and uncertainty to the form amendment process and, further, would potentially threaten, or be perceived to threaten, the accuracy and reliability of reported information, thereby undermining the intended purpose of the amendments.

Similarly, the Board has not historically provided, or believed necessary, a safe harbor provision for unintentional errors and such a provision would potentially compromise the accuracy and reliability of reported information. Likewise, the Board has not historically provided, or believed necessary, a "statute of limitations" to limit the time period for which amendments would be necessary, and such a provision could potentially compromise the value of the forms in conducting historical research. In the inspection and enforcement context, the Board can exercise its discretion on a case-by-case basis.

Consistent with existing Form AP guidance, no amendments to Form FM or Form AP would be needed solely to reflect changes in the metrics that would result from differences between reasonably estimated data and actual data, in the event such information becomes available after the filing deadlines of the forms. As discussed above, in calculating both firm- and engagement-level metrics, actual data is required to be used, if available. If actual data is unavailable, firms may use a reasonable method to estimate such data. For example, if a firm used a reasonable method to estimate hours worked by partners and managers at the end of a reporting period, and those partners and managers subsequently submit timesheets for that period that include additional hours worked above the estimate used by the firm on Form FM or Form AP, the firm would not be expected to file an amended report for any deviations.

At present, the Board believes applying the existing Form AP guidance is appropriate and sufficient for the final rules. The Board will monitor for issues connected to form amendments and

¹⁶⁹ The requirements for amendment of Form FM are similar to those that apply to Form 2. See https://pcaobus.org/about/rules-rulemaking/rules/form_2; see also, e.g., Staff Questions and Answers Annual Reporting on Form 2, at Q34, available at https://assets.pcaobus.org/pcaob-dev/docs/default-source/registration/rasr/documents/staff_qa-annual_reporting.pdf?sfvrsn=5e7259ff_0.

consider updates to implementation guidance as appropriate. Addressing issues as they arise through implementation guidance—as opposed to establishing a materiality or de minimis threshold in the adopting release or through a rule amendment—will help ensure that any guidance is informed by, and better tailored to, issues raised by experience under the final rules rather than speculative concerns. The Board believes monitoring for the need for guidance is a better solution than implementing a materiality or de minimis threshold in the adopting release or through rule amendment.

Lastly, regarding the comment that the amendments should include a “mechanism for revisions,” the Board is not aware of any deficiencies in the current mechanism for amending forms and believes it suffices.

5. Inclusion of Metrics in the Audit Report

In addition to the proposed reporting on Form FM and Form AP, the Board solicited comment on whether some or all of the firm-level and engagement-level metrics, together with any additional narrative that the firm may choose to provide, should also be included in the audit reports the firm issues for audits of large accelerated filers and accelerated filers. While some commenters supported inclusion of the metrics in the audit report, many commenters disagreed with this approach citing that, for example, it could potentially detract from the clarity and purpose of the report, could result in delays in the issuance of audit reports, and amendments to the audit report for corrections to metrics could create unnecessary burden for issuers and confusion for investors.

Taking into account commenter feedback, including both the potential benefits and unintended consequences, the Board did not require inclusion of the metrics in the audit report at this time.

6. Confidential Treatment and Conflicts With Non-U.S. Law

i. Requests for Confidential Treatment Not Permitted

The primary objective of the Board’s rulemaking is to enhance public transparency regarding audits and auditors, which inherently involves the disclosure of new information. The Board did not propose to allow firms to request confidential treatment for the proposed metrics but requested comment on this approach and specifically requested that commenters

identify any laws that realistically might prevent a firm from disclosing the information required by the metrics. In response, firms and firm-related groups expressed general concern about the potential for conflicts or focused on the proposed disclosure of engagement-level metrics, such as hours worked per week on an engagement, engagement team tenure, and experience by industry, and the percentage of hours contributed by specialists and shared service centers. However, the Board disagrees with the assertion that all previously undisclosed information should be considered sensitive by default. The information called for by the metrics does not pertain to proprietary methodologies or operational strategies that could give competitive advantages if disclosed. Rather, the information called for is descriptive of the audit process itself. The Board believes that general claims of sensitivity, absent specific legal prohibitions or clear practical ramifications, are not sufficient to outweigh the benefits of increased transparency. The Board’s rulemaking is guided by the goal of deepening the public’s understanding of audit practices in audits of issuers, consistent with the Board’s statutory responsibilities.

Some firms and firm-related groups raised concerns regarding the potential antitrust implications of disclosing detailed metrics about engagement staffing and workload allocations. One of these commenters referenced the Supreme Court’s ruling in *United States v. Container Corporation of America*,¹⁷⁰ which highlights the competitive risks associated with the exchange of confidential information among competitors, particularly in concentrated industries. However, it is important to distinguish between the exchange of information directly among competitors—which may indeed raise antitrust issues—and this rulemaking’s mandate for public disclosure. The information that the PCAOB is requiring firms to disclose is not shared privately among competing firms but is made publicly available to all stakeholders, including investors, audit committees, and the general public. This type of disclosure is fundamentally different from the scenarios associated with anti-competitive behavior under antitrust laws.¹⁷¹ In light of these factors, the

Board believes the metrics do not contravene the antitrust laws, and the public benefit of these disclosures outweighs any theoretical competitive risks suggested by the commenters.

Two commenters raised concerns regarding Section 105(b)(5) of Sarbanes-Oxley, which protects information prepared or received by or specifically for the Board in connection with a PCAOB inspection or investigation. It is important to note that Section 105(b)(5) specifically protects only information that is prepared or received by or specifically for the Board in connection with a PCAOB inspection or investigation. The metrics the Board has required, however, are not prepared or received under such confidential circumstances. These metrics are intended for public disclosure to enhance transparency across the audits of issuers and to provide stakeholders—including investors, audit committees, and the general public—with important insights into audit practices. Therefore, requiring the public disclosure of these metrics does not violate the provisions of Section 105(b)(5).

Additionally, one firm and a firm-related group raised concerns regarding the AICPA Code of Professional Conduct,¹⁷² which provides that a member in public practice shall not disclose confidential client information without the specific consent of the client. It is important to differentiate the information required by the metrics from the client-specific confidential information covered under the AICPA Code. The metrics require information such as workload data, staffing allocations, and experience levels of personnel involved in audits of issuers. This information does not include confidential client information or specific details about client engagements that would be protected under the AICPA Code. Instead, it focuses on the operational aspects of registered firms and the audits they perform that are important for the public to understand and assess the audits of issuers. The objective of this rulemaking is to enhance transparency and accountability within the audits of

rather than to facilitate or enable competitive positioning among firms. Furthermore, the disclosure of such information by a regulatory authority for the purposes of transparency and accountability does not fall under the purview of antitrust concerns, as it does not facilitate collusion or the sharing of competitively secret information in a manner that would distort market dynamics. Instead, it ensures that all market participants and stakeholders have access to the same information.

¹⁷² See, e.g., AICPA Code of Professional Conduct 1.700.001 (“A member in public practice shall not disclose any confidential client information without the specific consent of the client”).

¹⁷⁰ 393 U.S. 333 (1969).

¹⁷¹ The purpose of these disclosures is to enhance transparency and accountability in the audits of issuers, allowing investors and other stakeholders to make informed decisions and hold auditors accountable. This aligns with the Board’s statutory mission to protect investors and the public interest,

issuers, and the information required by the metrics supports this goal without requiring auditors to breach their confidentiality obligations to clients.¹⁷³

Finally, although some firms raised generalized concerns about potential conflicts with foreign laws, they did not provide specific examples that would justify prohibiting the public disclosure of the information in the metrics or warranting its confidential treatment. As discussed more fully below, the Board does not believe that any law, whether foreign or domestic, provides a reasonable basis for withholding the information in the metrics from public disclosure.

As such, the Board did not permit firms to request confidential treatment for the metrics. This approach is consistent with the Board's belief that these metrics will provide valuable additional information, context, and perspective on audit firms and audit engagements, which can be used by investors, audit committees, and other stakeholders.

However, the Board is mindful of the Board's obligation to protect information that is confidential under applicable laws relating to the confidentiality of proprietary, personal, or other sensitive information. To balance these concerns, the final metrics have been specifically designed to exclude information that could reasonably qualify for confidential treatment protection, such as personally identifiable, methodological, or client-specific information. Additionally, the Board provides firms the option to include a narrative description with each metric to explain or contextualize the disclosures, allowing firms to clarify any potentially misleading information that could be viewed as sensitive.

By adopting this approach, the Board believes that prohibiting confidential treatment requests on Forms FM and AP will further the public interest while adhering to the Board's obligation to protect certain categories of firm information.

In light of the objectives of this rulemaking, the Board decided not to permit confidential treatment for the metrics required on Forms FM and AP.

ii. Assertions of Conflicts With Non-U.S. Law

The Board did not propose to allow firms the opportunity to assert conflicts with non-U.S. laws on either proposed Form FM or Form AP, as proposed to be amended. The proposal acknowledged that there may be certain limitations with respect to the data or information about a firm, its personnel, or the performance of the firm's engagements that a firm may communicate publicly because it may conflict with a non-U.S. law, and asked commenters to describe any such laws and the proposed metrics to which it was realistically foreseeable that they would apply.

Some commenters disagreed with the proposal not to allow firms to assert conflicts. One commenter strongly urged the Board to maintain the well-established rulemaking history that recognizes and respects non-U.S. firms' distinct legal obligations and preserves the right for firms to assert a conflict of law. The Board is committed to cooperation and reasonable accommodation in its oversight of registered non-U.S. firms, and in the past has generally provided non-U.S. firms the opportunity to at least preliminarily withhold some information from its existing forms on the basis of an asserted conflict with non-U.S. laws. However, the Board has not provided for firms to assert such a conflict with respect to all information required by those PCAOB forms. Moreover, the Board notes that the Board has never permitted such withholding of information for Form AP. In addition, even where the Board has allowed registered firms to assert legal conflicts in connection with other forms, that accommodation does not entail a right for a firm to continue to withhold the information if it is sufficiently important.¹⁷⁴

Other commenters suggested there were potential conflicts between reporting of the proposed metrics and current laws:

- One commenter strongly recommended the Board consult with others, including the International Forum of Independent Audit Regulators

(IFIAR), to determine whether any law would prohibit a firm from providing information requested in the proposal and further diminish comparability (or increase the risk of misuse) of affected metrics.

- A commenter also asserted that there are laws in various jurisdictions (e.g., France and Switzerland) that could have a significant impact on cross-border transfer of data and the comparability of such data.

- Other commenters stated that firms with a small number of relevant issuer engagements, for example, disclosure of certain engagement-level metrics may lead to breach of confidentiality for client information, issues with disclosure of commercially sensitive information (e.g., time spent) or disclosure of personal data in breach of regulations, and potentially violate laws and regulations within some non-U.S. jurisdictions. (e.g., General Data Protection Regulation ("GDPR")).¹⁷⁵

- A commenter stated that based on their understanding from non-U.S. firms (although the commenter firm itself is not a non-U.S. firm) some of the proposed new required disclosures go beyond what non-U.S. regulators require and may lead to violations of local laws resulting from disclosure of information that non-U.S. auditors are required to keep confidential under professional secrecy obligations and/or laws and regulations governing disclosure of personal information.

- Another commenter stated that the proposed expansion of mandatory disclosures directly increases the likelihood that a non-U.S. firm may be legally barred from providing the relevant information.

One commenter encouraged the Board to include a specific provision that acknowledges that any required disclosure by a firm would need to comply with applicable local laws and regulations, while another stated that allowing firms to assert conflicts with non-U.S. laws would still require those firms to obtain legal opinions to support withholding the information.

One of those commenters stated that information published where only one engagement is performed will be clearly identifiable to an individual engagement, which they asserted may breach personal data requirements

¹⁷³ Similarly, some firms raised concerns about optional narrative disclosures, particularly regarding the need to maintain client confidentiality and protect commercially sensitive information. The Board has carefully designed the required metrics to avoid such issues. The Board expects firms to tailor their optional narrative responses in a similar manner, should they choose to provide them. This will enable firms to meet the transparency objectives of Forms FM and AP without compromising client confidentiality or disclosing sensitive commercial information.

¹⁷⁴ See *Improving the Transparency of Audits: Rules to Require Disclosure of Certain Audit Participants on a New PCAOB Form and Related Amendments to Auditing Standards*, PCAOB Rel. No. 2015-008 at 37; PCAOB Rel. No. 2008-004 at 37-38 n.38 ("Rule 2207(e) preserves the Board's authority to obtain information by preserving the possibility that, in an appropriate case involving sufficiently important information that is not otherwise forthcoming (e.g., through cooperation with non-U.S. regulators), the Board can ultimately put the firm to the choice of providing the information or being subject to a sanction for violating the Board's rules.").

¹⁷⁵ See Regulation (EU) 2016/679. The GDPR was passed by the European Union and became effective on May 25, 2018. The complete text of the regulation is available at <https://eur-lex.europa.eu/eli/reg/2016/679/oj>. Section 1 of Article 2 of the GDPR applies to "processing of personal data wholly or partly by automated means and to the processing other than by automated means of personal data which form part of a filing system or are intended to form part of a filing system."

under legislation such as GDPR. However, neither this commenter nor any other articulated how any of the required metrics could reveal information allowing any individual to be directly or indirectly identified in contravention of GDPR or similar laws.

In considering whether to allow the opportunity to assert conflicts, the Board considered both whether it is realistically foreseeable that any law would prohibit providing the required information and, even if it were realistically foreseeable, whether allowing a firm preliminarily to withhold the information is consistent with the Board's broader responsibilities and the particular regulatory objective.¹⁷⁶ The comments provided on this subject have not identified with sufficient specificity a realistically foreseeable likelihood that a law would prohibit providing the required information. The concerns that were mentioned were expressed in very general and hypothetical terms. Moreover, with respect to the suggestion that the Board consult with IFIAR, the Board notes that PCAOB staff did advise a number of its non-U.S. counterparts regarding the proposal with a view to facilitating their participation in the Board's notice and comment process if they so chose, and none submitted comment letters.

In addition, the Board continues to believe that allowing a firm preliminarily to withhold the required information is inconsistent with the Board's broader responsibilities and the particular regulatory objective of this rulemaking, namely public transparency.¹⁷⁷ This is the case notwithstanding that firms, as a commenter observed, have to provide a legal opinion regarding a conflict of law under the Board's rules relating to asserted conflicts. Accordingly, the Board did not permit assertions of conflicts for Form AP or Form FM in the final amendments.¹⁷⁸

With respect to the commenter suggestion that the Board includes a specific provision that acknowledges that any required disclosure by a firm would need to comply with applicable local laws and regulations, the Board believes such a provision could be construed as tacit permission to

withhold information without complying even with the existing requirements under the Board's rules related to the assertion of conflicts. Given that this would be an even more permissive framework than currently exists for withholding information where assertions of conflicts are permitted under the Board's rules, the same analysis applies with more force to this suggestion.

The Board believes its notice and comment process, together with its oversight experience, sufficiently inform this policy choice.

7. Structure of Metrics Data

Several commenters suggested that data on Form AP and Form FM be filed using eXtensible Business Reporting Language ("XBRL") to be consistent with SEC registrant filings. The Board notes that the data on Form AP will continue to be downloadable and machine-readable. However, making a change to require reporting using XBRL would introduce additional costs for all firms that file Form AP. Therefore, reporting on Form AP and Form FM will be done using the same platform as the Board's other reporting forms (currently, the Board's web-based RASR system which uses XML and, in the future, potentially new means of information exchanges as the PCAOB continues to modernize its reporting technology aimed at simplifying and automating data collection, processing, and interoperability).

Documentation

For firm- and engagement-level metrics, the Board proposed that the firm would be required to retain documentation in sufficient detail to enable an experienced auditor, having no previous connection with the determination of the metrics, to understand the calculations, the data on which they are based, and the method used to estimate data when actual amounts were unavailable. This is similar to the "experienced auditor" threshold specified in AS 1215, *Audit Documentation*.

The Board solicited comment on whether the proposed documentation requirement was clear and appropriate. One commenter agreed that the documentation requirement was clear and appropriate, while another commenter recommended further clarifications. The commenter recommended explicitly referring to AS 1215 as the commenter believed there were no explicit documentation requirements within Proposed Rule 2203C and Form FM instructions related to firm-level metrics.

The Board adopted the proposed documentation requirement as proposed. The Board described the documentation requirement for Form FM in General Instruction 7 that the firm should retain documentation in sufficient detail to enable an experienced auditor, having no previous connection with the determination of the metrics, to understand the computations of amounts, the amounts on which they are based, and the method(s) used to estimate the amounts when actual amounts were unavailable.¹⁷⁹ The Board believes this is sufficient to introduce the concept of "experienced auditor" into the documentation requirement for Form FM, similar to the "experienced auditor" threshold specified in AS 1215. Existing Form AP included a similar documentation requirement and under the amendments to Form AP that the Board has adopted, this requirement appears in General Instruction 10, as amended.

Additional Firm and Engagement Metrics Considered

In addition to the firm and engagement metrics the Board adopted, the Board considered and solicited comment on a number of (i) proposed metrics included in Section III.B.2 of the proposal and (ii) potential additional metrics included in Section III.E of the proposal. The Board determined not to adopt these additional firm and engagement metrics at this time. The additional metrics are discussed below.

1. Proposed Firm and Engagement Metrics

i. Audit Resources—Use of Auditor's Specialists and Shared Service Centers

The proposal included metrics relating to the use of auditor's specialists¹⁸⁰ and shared service centers ("SSCs"),¹⁸¹ which were intended to

¹⁷⁹ Rule 2203C requires that firms file Form FM by following the instructions on Form FM.

¹⁸⁰ A specialist, as used in this context, includes both auditor-employed specialists, as defined in AS 1201.C1, and auditor-engaged specialists, as described in AS 1210.01. Under those definitions, a specialist is a person possessing special skill or knowledge in a particular field other than accounting or auditing. Specialists would generally not include members of the engagement team whose specialization is in the fields of either IT or income taxes (tax) because IT and tax are specialized areas of auditing and accounting. However, if IT or tax specialists are employed or engaged in a capacity other than specialized auditing and accounting as part of the issuer engagement, it may be appropriate to include them as specialists.

¹⁸¹ A shared service center is described as an associated entity of a firm, set up by a network of accounting firms, that, among other things, supplies those firms with personnel to assist in the performance of audits, and that is not itself an other

¹⁷⁶ See PCAOB Rel. No. 2015-008 at 37; PCAOB Rel. No. 2008-004 at 36.

¹⁷⁷ *Id.*

¹⁷⁸ If an actual conflict were to materialize, the Board would have tools to address it. For example, Section 106(c) of Sarbanes-Oxley authorizes the Board to, subject to the approval of the Commission, exempt any foreign public accounting firm, or any class of such firms, from any provision of the rules of the Board.

help users gain a greater understanding of the use of these audit resources, including the frequency with which firms use specialists and SSCs on their engagements at the firm level generally and, at the engagement level, to provide the context required to understand the extent of the use of auditor's specialists and SSCs on a particular issuer engagement.

At the firm level, the proposal set forth requirements for firms to provide the percentages of issuer engagements that used auditor's specialists and shared service centers, respectively. At the engagement level, the proposal provided that firms would report the percentage of total audit hours provided by auditor's specialists and by shared service centers for each audit the firm performed of an accelerated filer and large accelerated filer.

Commenters on the proposed use of audit resources metrics who generally opposed the disclosure of the metrics stated that the information was unlikely to be readily interpretable or useful because of comparability challenges. In contrast, one commenter found the proposed descriptions for the resource metrics to be appropriate. Some commenters who supported these metrics noted that challenges with comparability might be able to be overcome through use of the proposed voluntary narrative. Some commenters, who were not generally supportive of the proposed Audit Resources metrics, suggested that if they were adopted they should be limited to firms' issuer audit practices.

a. Use of Auditor's Specialists

Some commenters were generally supportive of the firm-level metric for specialists. One commenter stated it would be supportive of disclosure of the specialist metrics with modifications to disclose the percentage of hours incurred by specialists on issuer audit engagements. Another commenter suggested disaggregating time among independent specialists, auditor-affiliated specialists, and management-affiliated specialists, and breaking down the specialist metrics by industry.

Among the commenters that were not supportive of the specialist metrics, several concerns were raised including

concerns with the proposed method for calculating auditor-engaged specialists' hours when actual hours were not available, the lack of visibility to the hours incurred by specialists, the need to rely on information from other auditors, challenges with comparability and data collection, and the overall complexity of the proposed metrics. One commenter suggested that the engagement-level metric for specialists would be inconsistent with other Form AP instructions and may be misleading. Some commenters responded that the amount of specialist involvement on an engagement and overall at the firm level is highly contextual and the relationship to audit quality is not one dimensional. One commenter refuted the objective of providing investors a basis for discussion with management with respect to the use of specialists, stating that investors almost never take advantage of the opportunity to ask questions.

Alternative approaches for specialist metrics were also suggested by commenters. One suggested an alternative approach for engagement-level specialist metrics such as utilization metrics and qualitative descriptions, supported by narrative disclosures to provide necessary context and clarity. This commenter also suggested an alternative firm-level metric for specialists based on the average percentage of usage of specialists across all of the firm's engagements, potentially covering only engagements where specialist hours exceeded a minimum percentage of total audit hours. Two commenters suggested the Board add an additional metric disclosing the percentage of audit hours incurred by specialists on issuer audit engagements (as a percentage of the total audit hours on issuers). Another commenter also suggested that using hours worked rather than the number of engagements as the basis for the calculation would provide more useful information at the firm level. This commenter also suggested disclosure of the use of specialists, and their hours on a CAM-by-CAM basis, as well as overall.

Two commenters responded to the question in the Board's proposal about including thresholds for resource metrics. One stated that including de minimis amounts would result in implementation challenges. The second, however, made the opposite argument, stating that including all specialist and SSC hours in audit resource metrics without a threshold would ensure that the metric remains straightforward and inclusive of all relevant contributions and provide a more complete picture of a firm's audit processes and resource

utilization. Most commenters that responded to the question as to whether resource metrics should be further disaggregated, e.g., by industry, replied that this would be overly burdensome without added value. However, another commented that use of auditor specialists would be more helpful if broken down by industry.

b. Use of Shared Service Centers

Some commenters were supportive of SSC metrics. One of them stated that the use of SSCs was growing but not well understood, and that narrative context would be necessary.

Other commenters raised multiple questions with respect to SSCs. Several of these were in relation to the definition of an SSC, which was proposed to be consistent with the definition used in Form AP, stating that there are many different approaches to the use of other resources than what is encompassed in that definition, which could lead to misunderstanding and lack of comparability. One of these commenters stated that the work of SSCs is dependent on the structure and resources of each firm and its SSCs and the specific needs of the individual engagement. Another commenter stated that the definition proposed a shared service center encompassed only those centers that are set up by a "network" of accounting firms and would not encompass an outsourcing center set up by a single firm. This commenter suggested the definition be revised to encompass all services that are not under the direct supervision of the engagement partner. Some commenters were concerned that SSC metrics would be misinterpreted as indicating that greater SSC hours indicated lower quality. Some commenters supported evaluation of the use of SSCs at the engagement level, but did not support publicly disclosing this information. Another commenter said that, given that engagement team members routinely work remotely, there should not be a difference between that arrangement and SSCs and, as a result, the metric would not be meaningful. This commenter also stated that it would not be meaningful to provide an explanation of work performed at an SSC because it is all ultimately the responsibility of the audit partner.

The Board has taken commenter input, as well as observations from PCAOB oversight activities and the relevant academic literature, into account, and have determined not to adopt the proposed firm- and engagement-level audit resources metrics at this time. In doing so, the Board recognized, as discussed above,

accounting firm. See PCAOB, *Staff Guidance: Form AP, Auditor Reporting of Certain Audit Participants, and Related Voluntary Audit Report Disclosure Under AS 3101, The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion*, (updated July 1, 2024) ("Staff Guidance on Form AP"), at n. 24, available at https://assets.pcaobus.org/pcaob-dev/docs/default-source/standards/documents/07-01-2024-transparency-implementation-guidance.pdf?sfvrsn=b9753eb_2.

that several commenters suggested there would be challenges relative to comparability and data collection, and there would also be the potential for misunderstanding by users of the information. As the Board stated in the proposal, these are highly contextual measurements because the use of the work of specialists is generally performed to satisfy needs specific to an industry or issuer and the use of the work of SSCs is dependent on the structure and resources of both the firm and the SSC, as well as the specific needs of individual engagement teams. The Board acknowledges that the nature and uses of SSCs continue to expand. As they do, the Board expects to continue to study and focus inquiries in this area to better understand the impact of SSCs on audit quality, firm economics, and engagement staffing models. The Board anticipates these efforts will inform future consideration of whether additional guidance or other regulatory action is warranted.

ii. Audit Hours and Risk Areas

The proposed engagement-level metric would have required firms to calculate the time incurred by all partners and managers on the engagement team in auditing the areas of significant risks,¹⁸² critical accounting policies and practices,¹⁸³ and critical accounting estimates,¹⁸⁴ in aggregate, as a percentage of total audit hours incurred by partners and managers on the engagement team. Because a firm-level metric would have been heavily influenced by the mix of companies that a firm audits, the Board did not propose to require firms to report this metric at the firm level.

Two commenters supported this metric as proposed, while several other commenters generally supported this metric with revisions; suggestions included reporting the absolute number of audit hours as well as the percentage, and adding time spent on performing

fraud procedures. Another commenter, an investor-related group, supported this metric as proposed, but further suggested reporting the total audit hours incurred by staff on the engagement team in the areas of significant risks, critical accounting policies and practices, and critical accounting estimates because these areas are considered the most significant for the audit. This commenter also suggested reporting hours by specialists, senior professionals, and staff in connection with critical audit matters.

Many other commenters criticized the proposed metric. These commenters provided the following reasons as the basis for their decision not to support this metric:

- The metric does not consider the evolving role of technology in the audit and the use of technology can significantly contribute to audit effort.
- Risk assessment is an iterative process throughout the audit which means that identifying significant risks and critical accounting policies, practices, and accounting estimates may change during an audit, resulting in changes in how auditors track their time for reporting under this metric.
- An individual's hours charged to auditing a particular account balance may include work performed that is unrelated to an identified significant risk.
- The nature of the audit procedures performed could include overlap with other areas of the audit depending on discussions held and procedures performed.
- Tracking time at the granular level needed to accurately capture hours for significant risks and critical accounting policies, practices, and accounting estimates would require additional resources, including time and costs, that are not directly associated with audit quality.

- Reporting this information would require coordination across firms for audits involving other auditors, who may be using different systems to track the underlying information.

- Since the risk of management override of controls is a presumed risk in all audits, how should it be considered since the response is pervasive to the audit.

Several commenters, including firms, stated that firms are not currently tracking this information, or they believe that firms are not currently tracking this information. One commenter added that although they do not believe firms are currently tracking this information, it should be possible to extract this data from internal

monitoring systems with considerable time and complexity.

Commenter views were divided on whether the metric should be revised to also include engaged specialist hours given that, under the proposal, the definition of engagement team includes employed specialists, but not engaged specialists. Some commenters agreed that this metric should include engaged specialist hours, while other commenters did not.

Taking into account commenter feedback as well as the fact that firms' approach to identifying and classifying significant risks can vary greatly, the Board was concerned that the potential for misinterpretation of this metric and the costs associated with establishing systems to collect the necessary data may not be justified. The Board did not adopt the metric related to audit hours and risk areas at this time.

iii. Quality Performance Ratings and Compensation

The proposal set forth firm-level reporting requirements for firms to calculate (i) the distribution of quality performance ratings across partners and (ii) a comparison of average annual compensation adjustments (as a percentage of the average adjustment received by the highest rated group) for partners in each quality performance rating category over a one-year period.

Overall, some commenters supported this metric area, agreeing with the proposed rationale that comparing the relationship between internal firm quality performance ratings and changes in compensation levels could provide evidence of the extent of any correlation between quality performance ratings and compensation, and thereby provide an important signal of the value of a quality commitment for the firm.

However, other commenters did not support this metric area or expressed concerns because of the number of difficulties in reporting and using the metric. Commenters raised the possibility of a lack of comparability or consistency (e.g., differences in firm's structure, strategies and systems used in performance evaluations, and definition of compensation, and inclusion of non-equity partner and directors in the calculation), resulting in potential misuse of the metrics or providing no or limited value to stakeholders. Many also pointed to variability in firms' quality performance rating systems both across firms and within the firm over time. Some commenters also indicated that there are many factors that firms consider in determining compensation, and that firms use mechanisms to drive accountability of partners that would

¹⁸² As defined in paragraph .A5 of AS 2110, *Identifying and Assessing Risks of Material Misstatement* ("risk of material misstatement that requires special audit consideration").

¹⁸³ As defined in AS 1301.A4 ("A company's accounting policies and practices that are both most important to the portrayal of the company's financial condition and results, and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain.").

¹⁸⁴ As defined in AS 1301.A3 ("An accounting estimate where (a) the nature of the estimate is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change and (b) the impact of the estimate on financial condition or operating performance is material.").

not be taken into account in the metrics calculation, resulting in no direct one-on-one relationship between the compensation adjustments and performance ratings. Some commenters expressed a number of concerns about the definition of compensation, as well as the treatment of non-equity partners.

Several commenters expressed concerns about confidential information. One commenter specifically cited the risk of disclosing confidential business information that is proprietary and protected from disclosure under Sarbanes-Oxley Section 102(e). Another commenter indicated (i) the possibility of identifying specific partners' compensation at smaller firms and (ii) the disclosure of this metric area may be prohibited by laws and regulations outside of the United States. A commenter also said that PCAOB registered firms are for-profit entities that should have flexibility in designing a compensation strategy that is tailored to their business model and needs.

Instead of the proposed metrics, several commenters suggested disclosing firms' policies related to partner compensation and performance ratings, including how partner audit quality is measured and how that measurement influences compensation. Some of these commenters said that disclosing these policies would demonstrate the firms' quality commitment and the value it places on quality while alleviating the comparability and confidentiality concerns and meeting the objective of this proposed metric. Some commenters stated that qualitative disclosures related to performance management and compensation policies are already disclosed in the firms' annual transparency reports. One commenter indicated the complexity of the performance measurement goes beyond mechanical calculation. Another commenter indicated that the metric is not useful as it is an unambiguous indicator of audit quality and likely focuses on matters unrelated to audit quality.

Two commenters explicitly supported the exemption granted to firms that are not within the scope of the SEC's partner rotation rule. One commenter questioned whether this metric would relate to all issuer audit engagements or all audit engagements and another indicated that combining issuer and non-issuer information would conflict with proposed PCAOB Rule 2400. Furthermore, a commenter indicated that this metric encompasses all partners of the firm and would not be useful when the issuer audit practice is

a small portion of the overall firm operations.

While there was some support from commenters, the Board did not adopt this metric area at this time, primarily due to the challenges described by commenters (e.g., lack of comparability and variability in establishing a firm's quality rating system) and the ambiguity in relation to audit quality, which may be difficult to overcome for this metric area to be meaningful for stakeholders. Because this rulemaking project is focused on requiring certain firms to report certain quantitative metrics that will foster comparability, the Board is also did not adopt the alternatives suggested by various commenters that the firms disclose policies regarding the partner compensation and performance ratings.

iv. Audit Firms' Internal Monitoring

The proposal set forth firm-level requirements for firms to calculate the percentage of issuer engagements that were selected for internal monitoring in the firm's most recently completed cycle (i.e., the number of completed issuer engagements internally monitored, divided by the number of total issuer engagements) and the percentage of those issuer engagements with engagement deficiencies.¹⁸⁵

At the engagement level, the proposal set forth requirements for firms to disclose whether a previous engagement was selected for internal monitoring in the most recently completed monitoring cycle, the year-end date of the engagement subject to review, whether any engagement deficiencies were identified, and the nature of those deficiencies. The nature of the engagement deficiencies would be one of the following: (i) financial statement line item, (ii) disclosure, or (iii) other noncompliance with applicable professional or legal requirements.¹⁸⁶ The Board also proposed that certain details be provided about the engagement deficiency, including the area of noncompliance and the type of deficiency.

Some commenters, primarily investor-related, expressed support for both the proposed firm- and engagement-level metrics. One investor-related commenter suggested that Part I.A

deficiencies be included separately in addition to the proposed requirements. Other commenters stated the proposed metrics would provide useful information into understanding firms' monitoring procedures and outcomes, facilitating comparisons regarding the quantity and types of engagement deficiencies detected, while one commenter stated that the monitoring and remediation process was an essential component of firms' quality management systems and agreed that providing a certain level of transparency in this area could be useful for interested stakeholders.

The firm-level metric was generally supported by some firm and firm-related commenters. One noted that it reports certain of this information in its transparency reports. Another highlighted that its internal monitoring was broader in scope, including targeted monitoring of its team's use of certain tools or technologies, adding that may be inconsistent with the PCAOB's intent with respect to firm-level reporting. Some of these commenters suggested reducing the scope by requiring reporting of only PCAOB Inspection Report Part I.A inspection findings. Another suggested reporting the percentage of compliant internal reviews rather than deficient engagements.

Conversely, several firm commenters were opposed to the proposed internal monitoring metrics at the firm level. The concerns raised by these commenters included noting that differences in monitoring programs would render the information provided inconsistent and uninformative and also that it could be disadvantageous to smaller firms that may have more variability in their internal monitoring year over year. In addition, several firm and firm-related commenters disagreed with the deficiencies required to be disclosed in the proposed firm-level metrics being aligned to QC 1000. One stated that presentation of such a broad range of deficiencies into a single metric without distinction could lead a user to inappropriately conclude that the firm had significant quality issues, which could in turn negatively impact their confidence in the reliability of the firm's audit reports. Another commenter expressed their belief that firm-level public reporting of internal inspection findings could be a disincentive for finding deficiencies. This commenter also stated that firms should be allowed to request confidential treatment for metrics related to internal monitoring.

At the engagement level, virtually all firm commenters objected to the proposed internal monitoring metrics.

¹⁸⁵ The term "engagement deficiency" as used in the proposal is defined in QC 1000.A4 ("An instance of noncompliance with applicable professional and legal requirements by the firm, firm personnel, or other participants with respect to an engagement of the firm, or by the firm or firm personnel with respect to an engagement of another firm").

¹⁸⁶ The term "applicable professional and legal requirements," as used in this rulemaking, has the same meaning as defined in QC 1000.A2.

Specific objections raised included those related to confidentiality concerns, comparability challenges, and the potential for confusion or misunderstanding. Several commenters expressed concerns that the proposed metrics risked undermining internal inspection programs if they cause firms to move from broad monitoring processes to align more closely with PCAOB inspections in response to the proposed requirements. One commenter stated that once these metrics become public, firms could come under pressure from various constituencies to report results that are within a perceived acceptable range. Another commenter voiced concern that firms could be incentivized to alter their internal monitoring processes in a manner inconsistent with the objectives of the proposal. Some commenters suggested that an alternative could be to require communication with an issuer's audit committee.

Taking commenter input into account, the Board determined not to adopt the proposed firm- and engagement-level internal monitoring metrics at this time.

2. Potential Additional Firm and Engagement Metrics

In the Board's proposal, it discussed three particular areas—training, access to technical resources, and investment in audit infrastructure—that it did not propose to require for reporting but, in light of the significance of these areas, for which the Board solicited specific commenter input.

All of these potential metrics related to aspects of a firm's ongoing investment in audit quality, which the Board believes is critically important. However, in working to develop metrics in these areas, the Board encountered challenges in defining what to measure and how to measure it, questions about whether metrics would be informative and appropriately free from bias, and concerns about potential unintended consequences. After considering commenter feedback, the Board adopted a modified metric related to training, which is discussed in detail above. However, the Board did not adopt metrics in the areas of access to technical resources or investments in audit infrastructure, as discussed further below.

In addition to the metrics the Board considered, as noted above, some commenters on the proposal suggested a metric for PCAOB Part I.A deficiencies. The Board's response to this suggestion is discussed further below.

i. Access to Technical Resources

The Board solicited comment on possible firm-level metrics relating to the relative size of a firm's central personnel (or other resources engaged by the firm) available to provide engagement teams with advice on complex, unusual, or unfamiliar issues and the extent to which such resources were used in the firms' engagements. Metrics that were considered at the engagement level focused on consultations that were performed with professionals outside of the engagement team on difficult or contentious matters.

Commenters who responded to questions about the potential metric for access to technical resources largely agreed with the considerations and conclusions in the proposal. Some of those commenters replied that the metrics would not be useful, be difficult to measure, not be comparable, and could be seen as being biased towards larger firms. One commenter mentioned that arguments could be made for or against many metrics, but they broadly agreed access to [technical] resources should be dropped. One commenter expressed that it would be difficult to define national office in a way that was meaningful.

After considering these comments, and in light of the Board's original analysis, the Board did not adopt a metric related to access to technical resources.

ii. Investment in Audit Infrastructure

Metrics the Board considered in relation to investment in audit infrastructure were primarily at the firm level and were focused on the expenditures that firms self-identified as being in support of audit quality either in total or on a per headcount basis.

Commenters generally stated that such a metric would be very facts and circumstances dependent, such that meaningful comparisons could not be made. One commenter suggested that investment in infrastructure was best discussed with an in-depth understanding of the circumstances to obtain appropriate context. Another suggested that the data would be stale by the time it was reported, adding to its lack of usefulness. One commenter mentioned that arguments could be made for or against many metrics, but they broadly agreed investment in audit infrastructure should be dropped. However, one commenter stated that they would support a metric that provides the percentage of firm revenues invested in technology accessible by audit teams. Similarly, another commenter supported including

a metric that provides the percentage of firm revenues invested in technology and stated they believe this metric could offer useful information to investors about the firm's ability to adapt to future challenges.

After considering commenter feedback, the Board did not adopt a requirement to disclose a metric on investment in audit infrastructure.

The Board considered the commenters that supported a metric related to revenue invested in technology, but weighing the challenges presented by doing so, specifically with respect to comparability and concerns in potential bias with respect to smaller firms, the Board continues to believe the unintended consequences and the costs would not be justified by the benefits such a metric might provide.

iii. PCAOB Part I.A Deficiencies

Some commenters recommended requiring a metric which the Board did not include as a potential additional metric in the proposal—a percentage of the PCAOB Part I.A deficiencies relative to “the total inspections.” The commenters acknowledged that this information is already publicly available. However, they suggested that including this percentage with other required metrics would highlight its importance and provide valuable information. One of the commenters went on to state that increasing the visibility of the PCAOB's inspection results would increase the importance of the results of the inspection process to audit firms, which they believe will lead to an improvement in overall audit quality.

After considering commenter feedback, the Board did not adopt a requirement to disclose a metric for PCAOB Part I.A deficiencies. Principally, the Board has concerns that the time lag implicit in such a metric would be potentially confusing. The other metrics would report as of September 30 or for the 12 months then ended, but a metric based on PCAOB inspection results would relate to audits conducted one or more years previously and may reflect issues that have long since been remediated.¹⁸⁷ In the Board's view, presenting data on inspection findings from previous years together with a suite of other metrics that all relate to the current period may confuse users. Of course, inspection reports, including discussion of Part I.A.

¹⁸⁷ The PCAOB inspects audits completed in the prior year, and the ensuing reports have historically been released a year or more after the inspection is completed.

deficiencies, will continue to be available on the PCAOB website.¹⁸⁸

Effective Date

For firm-level metrics, the Board proposed an effective date beginning October 1 of the year after approval by the SEC, with the first reporting period ending the following September 30. The Board also proposed a phased implementation period:

- Firms that issued audit reports with respect to more than 100 issuers in the calendar year preceding the effective date would begin reporting firm-level metrics in the first year; and
- All other firms would begin reporting firm-level metrics one year later.

For engagement-level metrics, the Board also proposed a phased implementation period:

- Firms that issued audit reports with respect to more than 100 issuers in the calendar year preceding the effective date—for audits of companies with fiscal years beginning on or after October 1 of the year after the year in which SEC approval is obtained; and
- All other firms—for audits of companies with fiscal years beginning on or after October 1 two years after the year in which SEC approval is obtained.

The Board solicited comment on whether the proposed effective date would provide challenges for auditors and how these challenges should be addressed. The Board also solicited comment on whether the phased implementation period would be appropriate and whether the phased implementation should be based on the number of issuer audit reports issued or some other basis.

One investor-related group suggested that extending the implementation period would allow smaller firms to adapt incrementally, ensuring they are not disproportionately affected by the new requirements. This commenter further suggested that the Board could identify and make certain metrics optional for smaller firms without making all the metrics optional.

Primarily, firms and firm-related groups recommended extending the proposed effective date. While many firms did not provide a specific implementation time period, other than stating that more time is needed, other firms recommended an effective date at least three years after the SEC's approval, and others recommended at least two years after the SEC's approval. Some commenters specifically stated that additional time (*i.e.*, one more year) would be needed for smaller firms. Another commenter recommended an effective date of at least three years after the SEC's approval, if adopted as proposed, or shorter if engagement-level metrics will be communicated to the audit committee, rather than reported publicly, as proposed. These commenters provided reasons for extending the implementation period including more time to implement systems or system changes, develop processes, train professionals, and accumulate and test data and calculations. Some commenters specifically emphasized the need for more time to make changes in the global network firms or other firms who are participating in the audit that may or may not have the same systems or policies. Other commenters stated that more time would be needed to implement this rulemaking because of other recently adopted standards.

The Board considered these comments and provided additional time before the reporting rules become effective. The final rules will become effective beginning October 1 of two years after approval by the SEC, with the first reporting period ending the following September 30 with a phased implementation period:

- Firms that issued audit reports with respect to more than 100 issuers in the calendar year in which the effective date occurs will begin reporting firm-level metrics in the first year reporting is required; and
- All other firms would begin reporting firm-level metrics one year later.

If approved by the SEC, the effective date of the firm-level metrics will be October 1, 2027. For firms that issued audit reports with respect to more than 100 issuers in 2027, the first reporting period would end on September 30, 2028, with the first Form FM due by November 30, 2028. For all other firms, the first reporting period would end on September 30, 2029, with the first Form FM due by November 30, 2029.

For engagement-level metrics, the Board is also adopting a phased implementation period:

- Firms that issued audit reports with respect to more than 100 issuers in the calendar year preceding the effective date—for audits of companies with fiscal years beginning on or after October 1 of two years after the approval by the SEC; and

- All other firms—for audits of companies with fiscal years beginning on or after October 1 of three years after the approval by the SEC.

If approved by the SEC, reporting of engagement-level metrics would start for firms that issue audit reports with respect to more than 100 issuers in 2026 for the audits of companies with fiscal years beginning on or after October 1, 2027. For other firms, it will start with audits of companies with fiscal years beginning on or after October 1, 2028. The reporting will be on Form AP, which is generally due 35 days after the issuance of the auditor's report.

As discussed in earlier sections, the Board adopted a smaller number of firm- and engagement-level metrics than proposed. Specifically, the Board adopted [ten] eight metrics areas (as opposed to 11 proposed metric areas), which should reduce the administrative burden and cost of calculating and reporting the metrics. Therefore, the Board believes that the smaller number of metrics, the extension of the effective date, and the phased implementation should provide sufficient time for firms, including smaller firms, to implement new or enhanced systems and processes, train professionals, and conduct internal testing and reporting before reporting of the metrics.

D. Economic Considerations and Application to Audits of Emerging Growth Companies

The Board is mindful of the economic impacts of its standard setting. This economic analysis describes the economic baseline, need, and expected economic impacts of the final rules, as well as alternative approaches considered. Because there are limited data to quantitatively estimate the economic impacts of the final rules, much of the Board's economic analysis is qualitative. However, where feasible, the economic analysis incorporates quantitative information, including analysis of internal PCAOB data, publicly available data, and results from academic literature.

Baseline

This section establishes the economic baseline against which the impact of the final rules can be considered. Important components of the baseline, specifically a discussion of current firm- and engagement-level disclosure

¹⁸⁸ See, e.g., PCAOB charts illustrating much of the data in the U.S. global network firms ("GNFs") and U.S. annual non-affiliated firms ("NAFs") inspection reports, available at <https://pcaobus.org/oversight/inspections/global-network-firms-inspection-data> and <https://pcaobus.org/oversight/inspections/non-affiliated-firms-inspection-data>, respectively. GNPs are the member firms of the six global accounting firm networks (BDO International Ltd., Deloitte Touche Tohmatsu Ltd., Ernst & Young Global Ltd., Grant Thornton International Ltd., KPMG International Ltd., and PricewaterhouseCoopers International Ltd.). NAFs are both U.S. and non-U.S. accounting firms registered with the Board that are not GNPs. Some of the NAFs belong to international networks.

requirements, voluntary reporting practices, and actions in other jurisdictions relevant to the final rules are described above. Below, the Board highlights information presented above most relevant to the economic baseline and provides additional academic references and statistics.

Current PCAOB rules and standards do not require registered firms to publicly disclose firm or engagement-level information like the final metrics. As discussed above, firms are currently required to publicly disclose some information related to the firm and its engagements in a variety of PCAOB forms (e.g., Form AP, Form 2).¹⁸⁹ Usage statistics suggest that the public actively seeks out the information contained in these forms. For example, PCAOB usage statistics show that during calendar year 2023, there were close to 7.4 million page views, and just over 23,000 unique visitors, for PCAOB's RASR Web service that provides public access to firm filings, including Forms 1, 2, 3, 4, and AP.¹⁹⁰ Additionally, in 2023 there were over 333,000 unique searches performed on AuditorSearch, the PCAOB's online search tool, and the Form AP data set was downloaded over 2,000 times.¹⁹¹

In addition to the information that the firm makes public through required form filings, the PCAOB provides firm-level public disclosure through firm inspection reports.¹⁹² For the 2023 calendar year, firm inspection reports were downloaded approximately 113,000 times. Academic research suggests that audit committees use the information contained in PCAOB inspection reports.¹⁹³ Additionally, some academic research suggests that PCAOB inspection reports provide useful information to investors.¹⁹⁴

However, some research suggests that institutional investors may not be aware of or find value in PCAOB inspection reports.¹⁹⁵ One commenter noted that the proposal did not provide information on who was accessing the website information or why they were accessing it. The PCAOB does not collect information on who is accessing the website information (e.g., IP addresses) or why they are accessing it.

In addition to PCAOB information, investors and audit committees may be able to obtain information related to audit quality from auditor legal proceedings—e.g., pursuant to SEC enforcement actions.¹⁹⁶ However, due to the investigation and litigation process, engagement-specific information may be publicly available only after a substantial lag. Furthermore, academic researchers have also used a variety of publicly available firm and engagement-level proxies for audit quality including audit firm size, issuer restatements, and industry specialization.¹⁹⁷ One commenter noted that the auditor's tenure with the company is available in the auditor's report and audit fee information is available in the company's proxy statement.

As discussed above, some large U.S. audit firms voluntarily publicly disclose

certain firm-level information through their firm transparency reports—e.g., general discussions of turnover rates, independence policies and practices, or aggregated staff headcounts. PCAOB staff reviewed the most recent audit quality report for each of the eight firms considered in the CAQ Report. As these firms' audit quality reports generally do not provide quantitative engagement-level information, the PCAOB staff's analysis focused on whether they provide quantitative firm-level information substantially similar to the final firm-level metrics.

Overall, the PCAOB staff's analysis indicates that voluntary firm reporting addresses many of the areas included in the final metrics, though in most instances more narrowly. The reports generally provide quantitative information related to staff training and retention, which the Board believes is substantially similar to the final metrics for Training Hours for Audit Personnel and Retention of Audit Personnel, respectively. However, the Board notes that the reports that include a retention metric define it in different ways and report it at different levels of aggregation. The reports generally provide quantitative information related to staffing leverage. However, the quantitative information is generally at the head-count level and no report accounts for audit hours, as the final Partner and Manager Involvement metrics require. Half of the reports provide quantitative information related to the frequency of restatements which are similar to the final Restatement History metric. However, in these cases, the reports do not indicate whether the reported restatements include reissuance restatements, revision restatements, or both. Some other reports provide quantitative information related to the frequency of restatements associated with PCAOB-inspected engagements only. Half of the reports provide quantitative information related to years of experience. However, the quantitative information does not include managers' experience as the final Experience of Audit Personnel metric requires. Some reports provide metrics similar to the final Workload metric. However, in these cases, the calculations may differ from the final Workload metric in important ways (e.g., they are limited to the busy season only or include more staff than required) and it is unclear whether the calculations include the same types of hours required under the final rules (e.g., PTO hours). The reports generally do not provide quantitative information related to the allocation of audit hours

¹⁸⁹ The Board concurrently adopted new reporting requirements for registered firms. See PCAOB Rel. No. 2024–013.

¹⁹⁰ The RASR database can be found on the PCAOB's website (<https://rasr.pcaobus.org.aspx>). The usage statistics underestimate actual public interest because investors, researchers, auditors, audit committees, and issuer management may source PCAOB information through external third-party data service providers—such as Ideagen's Audit Analytics. However, they also overestimate actual public interest to some extent because the usage statistics include internal PCAOB users.

¹⁹¹ Information related to usage statistics can be found on the PCAOB's website (<https://pcaobus.org/resources/auditorsearch/>).

¹⁹² Firm inspection reports can be found on the PCAOB's website (<https://pcaobus.org/oversight/inspections/firm-inspection-reports/>).

¹⁹³ See, e.g., Daniel Aobdia, *The Impact of the PCAOB Individual Engagement Inspection Process—Preliminary Evidence*, 93 *The Accounting Review* 53 (2018) (finding that “the client is more likely to switch auditor” when offices or partners receive a Part I auditing deficiency).

¹⁹⁴ See, e.g., Andrew Acito, Amir Amel-Zadeh, James Anderson, William L. Anderson, Daniel

Aobdia, Francois Brochet, Huaizhi Chen, Jonathan T. Fluharty-Jaidee, Martin Schmalz, Manyun Tang, and Scott Jinzhiyang Wang, *Market-Based Incentives for Optimal Audit Quality*, SSRN Electronic Journal (2024) (finding that when PCAOB inspection reports can be easily linked to the issuer being audited, issuers whose audit was not found to be deficient significantly outperform issuers whose audit was found to be deficient); Nemit Shroff, *Real Effects of PCAOB International Inspections*, 95 *The Accounting Review* 399 (2020) (finding, using a sample of foreign companies, that companies enjoy greater access to capital when their auditor's PCAOB inspection report does not include Part I deficiencies). The Board notes that SSRN does not peer review its submissions.

¹⁹⁵ See, e.g., Center for Audit Quality, *Perspectives on Corporate Reporting, the Audit, and Regulatory Environment Institutional Investor Research Findings*, (Nov. 2023) (“CAQ 2023 Survey”) (finding that most institutional investors interviewed were unaware of PCAOB inspections reports, and to the extent investors were aware, found the report results to be expected) and Clive Lennox and Jeffrey Pittman, *Auditing the Auditors: Evidence on the Recent Reforms to the External Monitoring of Audit Firms*, 49 *Journal of Accounting and Economics* 84 (2010) (finding that companies do not perceive that the PCAOB's disclosed inspection reports are valuable for signaling audit quality).

¹⁹⁶ See, e.g., the SEC's *Accounting and Auditing Enforcement Releases* available at <https://www.sec.gov/divisions/enforce/friactions>.

¹⁹⁷ See, e.g., Daniel Aobdia, Do Practitioner Assessments Agree with Academic Proxies for Audit Quality? Evidence from PCAOB and Internal Inspections, 67 *Journal of Accounting and Economics* 144 (2019); Jere R. Francis, A Framework for Understanding and Researching Audit Quality, 30 *AUDITING: A Journal of Practice & Theory* 125 (2011); and DeFond and Zhang, A Review of Archival Auditing Research.

and no report provides quantitative information related to industry experience. However, the Board notes that these firms generally provide information related to the industries they serve on their websites which is similar to the component of the firm-level industry expertise metric that identifies the five top industries of the firm's audit practice.

One commenter said that, though only a small portion of firms voluntarily disclose metrics, these firms cover most U.S. public companies. The Board acknowledges that this point implies that most audit committees and investors have some information about topics covered by the final metrics. However, PCAOB staff found that the existing disclosures are not uniform or comparable across firms. Furthermore, PCAOB staff found that firms generally do not voluntarily publicly report engagement-level metrics and one investor group said that the firms' transparency reports are seen as marketing material rather than investor information. One commenter emphasized that firms already publish transparency reports and urged the PCAOB to analyze firms' current transparency reporting practices and solicit feedback from investors, audit committees, and other stakeholders on their contents. The Board performed such an analysis as described above and has addressed comments on the economic baseline that the Board received from stakeholders as part of the Board's notice and comment process. The limitations of voluntary firm transparency reports, along with the related academic literature, are further discussed below.

Audit committees can receive other information through sources not available to the public. Auditing standards and PCAOB and SEC rules require specific communications from auditors to audit committees regarding a variety of matters related to the audit engagement. For example, under AS 1301, the auditor is required to communicate to the audit committee *inter alia* (i) all critical accounting policies and practices to be used; (ii) a description of the process management used to develop critical accounting estimates; and (iii) significant risks identified during the auditor's risk assessment process.¹⁹⁸ Moreover, audit committees may obtain information under other disclosure requirements—e.g., reporting under Section 10A of the

Exchange Act, where the auditor must report to the issuer's board of directors, in certain situations, related to illegal acts at an issuer.¹⁹⁹ In exercising their oversight responsibilities, audit committees may also request more firm- or engagement-specific information from their auditor. For example, audit committees may seek information from the auditor about PCAOB inspections, including information not contained in the PCAOB's public inspection reports.²⁰⁰ Audit committees may also request information from other audit firms as part of a request for proposal if they are considering engaging a new auditor.

Audit firms, partners, and engagement teams have developed reputations based on the public and non-public information discussed above, as well as audit committees' direct experience with them. Through surveys and interviews with audit committee members, one study concluded that the firm's reputation for industry experience and the audit partner's accessibility, ability to address accounting issues on a timely basis, and ability to liaise with the firm's national office are the key characteristics that audit committees consider when selecting an auditor.²⁰¹ This finding suggests that audit committees currently receive and use information like some of the final metrics (e.g., Industry Experience and Workload).

The Board believes many firms internally track some information related to the final metrics. One commenter on the Concept Release stated that they believe that many firms are using the 28 AQIs identified in the Concept Release at some level to (i) manage the firm and (ii) manage the quality of audits at the office level and at the engagement level. Three U.S. GNFs stated in their comments on the Concept Release that they track some of the proposed metrics discussed in the Concept Release for monitoring purposes. Information gathered by PCAOB staff in 2018 and 2019 pursuant to PCAOB oversight activities indicate that U.S. GNFs generally had identified and were tracking performance metrics at both the firm and engagement level. At the firm level, U.S. GNFs generally tracked PCAOB inspection history, restatements, voluntary turnover rates/

retention rates, partner to staff ratios/ professionals by level, average partner workload, and investment in audit quality. At the engagement level, U.S. GNFs generally tracked distribution of engagement hours during the year, partner workload and utilization, partner years of experience (by industry, level, or issuer), engagement leverage, engagement milestone compliance, involvement in pre-issuance review programs, and use of IT and other specialists. One firm tracked audit hours performed at SSCs. However, several commenters representing firms and firm-related groups explained that they do not currently track information in a form that will be required for several of the metrics. For example, one commenter said that firms have no internal tracking of personnel's total experience prior to joining the firm. One commenter said that smaller and medium-sized firms do not track the industry experience of audit personnel. Though this information suggests that a significant amount of information is collected by the U.S. GNFs at both the firm and engagement levels, one academic study suggests that partners seldom use metrics related to audit quality when evaluating the quality of their work or the work of their colleagues.²⁰²

Commenters noted that the PCAOB already has access to information about audit firms. One commenter suggested that the Board describe the information currently requested from firms. The PCAOB requests a variety of information from firms to inform its inspections process, which focuses on evaluating whether firms are in compliance with PCAOB standards. Some of the information is related to some of the final metrics. However, the information is generally not comparable across firms, engagements, and time; the quality of the information is inconsistent; and the information is generally not available for all firms and engagements.²⁰³

To better understand the adequacy of currently available information or need for additional disclosures, one commenter suggested that the Board consider data on: (i) attendance at annual shareholder meetings; (ii) votes on auditor ratification; or (iii) passive

²⁰² See, Marion Brivot, Mélanie Roussy, and Maryse Mayer, *Conventions of Audit Quality: The Perspective of Public and Private Company Audit Partners*, 37 *Auditing: A Journal of Practice & Theory* 51, 68 (2018).

²⁰³ The Board believes this is driven, in part, by variation in firms' approaches to quality control and how they record information. The Board notes that, under Section 105(b)(5) of Sarbanes-Oxley, this information is only available for PCAOB regulatory use.

¹⁹⁸ See above for additional discussion related to auditor communications with audit committees. See also Section 10A(k) of the Exchange Act, 15 U.S.C. 78j-1(k) and 17 CFR 210.2-07.

¹⁹⁹ See, e.g., Section 10A of the Exchange Act, 15 U.S.C. 78j-1.

²⁰⁰ See Information for Audit Committees About The PCAOB Inspection Process, PCAOB Rel. No. 2012-003 (Aug. 1, 2012).

²⁰¹ See Elizabeth D. Almer, Donna R. Philbrick, and Kathleen H. Rupley, *What Drives Auditor Selection?*, 8 *Current Issues in Auditing* A26, A27 (2014).

versus active investors. The Board was unable to identify any data sources regarding attendance at annual meetings. However, the Board notes that shareholder votes are typically cast electronically by proxy and not in-person at annual meetings.²⁰⁴ Moreover, anecdotal evidence suggests that attendance, particularly among retail investors, is generally low.²⁰⁵ This may reflect the fact that material information relevant to investor decision-making is typically provided through the proxy statement and annual report, rather than being newly disclosed at the annual meeting. The Board does not believe this provides strong evidence for or against the adequacy of currently available data or investors' information preferences. Regarding votes on auditor ratification, the Board's economic analysis is informed by and cites several academic studies on shareholder voting to ratify the appointment of the auditor. Additionally, data from Audit Analytics suggests that the proportion of investors opposing ratification, while still infrequent, has been increasing.²⁰⁶ Overall, the research suggests that investors, primarily institutional investors, use information related to audit performance. In cases where they do not, the Board believes this is more likely driven by the costs of gathering and understanding the information rather than a lack of demand.²⁰⁷ Regarding passive versus active investors, research suggests that household direct holdings comprise roughly 50% of U.S. equity capital with the remaining 50% held by ETFs, passive mutual funds, active mutual funds, or hedge funds.²⁰⁸ Among funds, roughly 50% are actively managed.²⁰⁹ Based on the Board's review of academic literature and the Board's consideration of costs, the Board

believes that individual retail investors will be less likely to use the final metrics than institutional investors.²¹⁰ Therefore, this research suggests that investors who are more likely to use the final metrics will use the final metrics to inform their capital allocation decision-making own or manage roughly 25% of U.S. equity capital. However, the Board notes that, by investing in proportion to the market value of a company, passive investors freeride on the decisions of the active investors, thus amplifying the effects of improved decision-making of the more active investors who are more likely to use the final metrics.²¹¹ Also, one audit committee chair said at the September 26, 2024 IAG meeting ("September 2024 IAG meeting") that passive investors take corporate governance very seriously. Similarly, an investor group commenter said that passive portfolio managers' stewardship counterparts will use the information in their voting decisions. As such, in contrast to capital allocation decision-making, the final metrics may inform passive funds' governance-related decision-making.

One commenter suggested that the prevalence of Part I.A deficiencies is an important reason for the proposal and recommended that the Board provide an analysis of the causes of Part I.A deficiencies to help stakeholders assess the benefits of the final rules. Part I.A deficiency trends are available in PCAOB Rel. No. 2024-005.²¹² Firms have recently indicated to PCAOB staff that unusually high staff turnover and use of less experienced staff may have contributed to rising auditing deficiencies. PCAOB inspection staff also found that utilization of individuals with specialized skill or knowledge and significant, timely, and detailed supervision and review were good practices.²¹³ The final metrics will reflect several of these aspects of the audit (e.g., Partner and Manager Involvement). However, based in part on other comments the Board received on the proposal, the Board is not

adopting metrics related to the use of specialists.²¹⁴

One commenter said that to the extent investors need additional information to inform their voting decisions, the audit committee has the ability to provide that information in their report in the proxy statement, including a summary of the metrics they used to assess the auditor. However, another commenter said that proxy statements provide little information to shareholders on which they can base their decision to ratify the appointment of the auditor and no information related to the quality of the audit or the audit firm is required to be disclosed on the proxy statement.

One commenter said that several Form AP studies were excluded from the Board's baseline.²¹⁵ The Board recognizes that some of these analyses detect little impact of prior PCAOB disclosure rules. The Board notes that Section IV.C.1.i. of the proposal described how the benefits of prior PCAOB disclosure rules vary by rule and analysis. Referring to an academic article, the same commenter suggested that the baseline section had not provided ample research to show that investors would use the proposed metrics.²¹⁶ The proposal and the discussion below refer to the article cited by the commenter as well as several others regarding how investors may respond to the metrics.

Lastly, as discussed above, PCAOB staff estimates that approximately 210 firms will be subject to the final firm-level disclosure requirements, including 22 of the top 25 U.S. firms by 2023 total firm revenue and all of the 2022 annually inspected firms that continue to audit issuers. Approximately 50 firms will be required to report the final firm-level Industry Experience metrics. Approximately 3,400 issuer audits will be subject to the final engagement-level disclosures, covering approximately 99% of the total market capitalization of issuers reporting on Form 10-K and Form 20-F.

Need

This section discusses the economic problem to be addressed and explains how the final rules address it. In general, two observations suggest that there is an economic need for the final rules:

²¹⁴ See above for additional discussion on the Board's decision not to adopt the proposed use of auditor's specialists metric.

²¹⁵ The Board discussed this comment including the studies referred to below.

²¹⁶ See J. Owen Brown and Velina K. Popova, *How Do Investors Respond to Disclosure of Audit Quality Indicators?*, 38 AUDITING: A Journal of Practice & Theory 31, 47 (2019).

²⁰⁴ See, e.g., Broadridge, *2023 Proxy Season Key Stats and Performance Ratings*, (2023) (reporting that, of the votes Broadridge processed, 97% of shares were voted electronically by retail and institutional shareholders).

²⁰⁵ See, e.g., Yaron Nili and Megan Wischmeier Shaner, *Virtual Annual Meetings: A Path Toward Shareholder Democracy and Stakeholder Engagement*, SSRN Electronic Journal (2022) (discussing how "[m]eaningful participation at the yearly gathering of corporate shareholders has become a relic of the mid-twentieth century" and "[l]ow retail investor attendance and participation is a well-documented problem in public corporations") and cites therein. The Board notes that SSRN does not peer review its submissions.

Ringgenberg, *On Index Investing*, 145 Journal of Financial Economics 665 (2022) (discussing how "[p]assive investors are necessarily freeriding on the research and effort exerted by active managers") and Ruggero Jappelli, *Dynamic Asset Pricing with Passive Investing*, unpublished working paper (2024) (finding that "the effect of standardized unexpected earnings on abnormal returns is significantly amplified by the wealth passively tracking the stock").

²¹² See PCAOB Rel. No. 2024-005, at 315.

²¹³ See Spotlight: Staff Update and Preview of 2022 Inspection Observations (July 2023) ("2022 Inspection Observations Preview"), at 4, available at <https://pcaobus.org/resources/staff-publications>.

• Investors and audit committees cannot easily observe the services performed by auditors. This restricts (i) audit committees' ability to more efficiently and effectively monitor and select auditors as well as (ii) investors' ability to more efficiently and effectively ratify the appointment of the auditor and allocate capital. As a result, there is a risk that auditors will not supply an efficient level of assurance to the market.²¹⁷

• Furthermore, there are currently insufficient incentives for firms to fully meet the market demand for accurate, standardized, and decision-relevant information.²¹⁸ There is also a challenge coordinating firms on a system of comparable disclosures. As a result of the lack of incentives and coordination challenges, the Board believes auditors are not supplying the market with additional information even when doing so would be efficient. Indeed, information about audit engagements and firms that would allow (i) audit committees to more efficiently and effectively monitor and select auditors and (ii) investors to more efficiently and effectively ratify the appointment of the auditor and allocate capital, as sought by the market, is often limited or difficult to obtain.

The final rules will help address these problems in two primary ways:

• First, the final rules will require certain firms to publicly report specified metrics relating to certain audits and their audit practices. Through this disclosure, the final metrics will aid investor and audit committee decision-making.

• Second, the final rules will impose standardized calculations and require regular public reporting of those metrics. The resulting comparability will further aid investor and audit committee decision-making.

Importantly, the Board notes that the final metrics are not intended to be used in isolation to ascertain audit quality at an audit firm or for an audit engagement because audit quality is driven by a complex array of factors beyond those that can be addressed by metrics. The Board believes investors' and audit committees' ability to use the metrics is likely to increase over time as users are

able to aggregate multiple data points, make comparisons, and observe trends.

1. Problem To Be Addressed

i. Allocative Inefficiency in the Market for Audit Services

The auditor has a responsibility to obtain reasonable assurance about whether the issuer's financial statements are free of material misstatement. Reliable financial statements help investors evaluate issuers' performance and monitor management's stewardship of investor capital. However, because audits possess many of the attributes of a credence good, investors find it challenging to evaluate the quality of the services provided by auditors.²¹⁹ As a result, the lack of transparency into the audit process could enable auditors to act on their private incentives and under-audit (*i.e.*, deploy insufficient auditor resources) or over-audit (*i.e.*, undertake procedures that do not efficiently contribute to forming an opinion on the financial statements).²²⁰ In effect, there is a risk that auditors will not supply an efficient level of service to the market. While the Board acknowledges that audit quality is difficult to observe, the PCAOB is able to obtain insights into audit quality through inspection of firms' compliance with auditing standards. The results of recent PCAOB inspections indicate that room for improvement exists.²²¹

²¹⁹ See Daniel Aobdia, Saad Siddiqui, and Andres Vinelli, *Heterogeneity in Expertise in a Credence Goods Setting: Evidence from Audit Partners*, 26 Review of Accounting Studies 693 (2021) (finding evidence consistent with audits being credence goods).

²²⁰ See, *e.g.*, Monika Causholli and W. Robert Knechel, *An Examination of the Credence Attributes of an Audit*, 26 Accounting Horizons 631, 632, 633 (2012) (discussing how audits have attributes of a credence good, namely the outcome of an audit is unobservable and the auditor is best informed regarding how much effort is necessary to perform the audit).

²²¹ See, *e.g.*, *Spotlight Staff Update and Preview of 2022 Inspection Observations* (July 2023), available at <https://pcaobus.org/resources/staff-publications> (discussing the "concerning trend" in "the percentage of audit engagements reviewed that are expected to be included in Part I.A of an inspection report"). One commenter said that many audit quality studies reveal that audit quality is improving, deficiencies are narrowly focused, and financial statement restatements are down. The Board notes that the commenter did not provide support for these assertions. By contrast, and as stated here and in the proposal, the PCAOB has pointed to a concerning trend in auditing deficiencies. Indeed, the trend appears to be continuing in the aggregate. See, *e.g.*, *Spotlight Staff Update on 2023 Inspection Activities* (Aug. 2024), available at <https://pcaobus.org/resources/staff-publications>. Furthermore, while the incidence of restatements has been decreasing since 2013, there was an uptick in 2022. See, *e.g.*, Center for Audit Quality, *Financial Restatement Trends in the United States: 2013–2022*, (June 2024). The Board

One commenter agreed with the characterization of the audit as a credence good. Several commenters agreed that investors and other stakeholders cannot easily observe services performed by auditors, which limits their ability to make informed decisions about investing capital, ratifying the selection of auditors, and voting for members of the board of directors, including directors who serve on the audit committee. Several commenters said that the audit has become commodified and that firms compete primarily on cost due to a lack of information on audit quality. One commenter said that this results in audit firms "squeezing" professional staff for productivity.

The issuer's board of directors is generally required to establish an audit committee that is statutorily entrusted to appoint, compensate, and oversee the work of the auditor.²²² One commenter said that audit committees of accelerated and large accelerated filers are composed entirely of independent directors.²²³ However, similar to investors—though to a lesser degree—audit committees cannot easily observe the services performed by auditors. Moreover, audit committees may focus on the interests of current shareholders rather than the broader public interest (*e.g.*, market confidence, potential future shareholders, or investors in other issuers). Furthermore, there are risks that the audit committee may not monitor the auditor effectively. For example, the auditor may seek to satisfy the interests of management rather than investors if management is able to exercise influence over the audit committee's supervision of the auditor.²²⁴ One commenter said that

notes that the uptick in restatements could increase further because some financial statements that have not yet restated may do so in the future.

²²² Companies whose securities are listed on national securities exchanges are generally required to constitute an audit committee. See Section 301 of Sarbanes-Oxley; Section 10A(m)(2) of the Exchange Act. As an additional safeguard, the auditor is also required to be independent of the audit client. See 17 CFR 210.2–01; see also PCAOB Rule 3520, *Auditor Independence*.

²²³ Pursuant to Exchange Act Section 10A(m)(1) and Exchange Act Rule 10A–3, the listing rules of national securities exchanges generally require that all members of a listed company's audit committee be independent. See, *e.g.*, New York Stock Exchange Listing Manual Section 303a.06; Nasdaq Rule 5605(c). Companies that do not have securities listed on an exchange are not subject to such a requirement.

²²⁴ See, *e.g.*, Joshua Ronen, *Corporate Audits and How to Fix Them*, 24 Journal of Economic Perspectives 189 (2010) (explaining that audit committee members are paid by the company and can be dependent on top company management for a variety of benefits, including referrals as a possible member on the board of directors and audit

Continued

²¹⁷ An efficient allocation of resources occurs when total surplus is maximized. Total surplus is maximized when the good or service in question is supplied until the marginal benefit is equal to the marginal cost. See N. Gregory Mankiw, *Principles of Economics* 146–148 (6th edition 2008).

²¹⁸ Given the considerations discussed below, it appears reasonable to assume that this lack of incentive for firms to provide such information is likely to cause the apparent undersupply of information, rather than the cost of providing the information being greater than the social benefit.

audit committee members are incentivized to ingratiate themselves to management and that this does not serve investors who need to hold the audit committee accountable. Such circumstances can lead to a *de facto* principal-agent relationship between company management and the auditor. Also, as one panelist said during the September 2024 IAG, there is a wide range of financial expertise among audit committees and audit committee chairs.

As a result, investors have an important, albeit indirect, role overseeing the work of both the auditor and the audit committee. Indeed, while

the audit committee more directly oversees the auditor, most publicly traded companies allow investors to vote to ratify the appointment of the auditor. This mechanism allows investors to voice their preferences on auditor selection.²²⁵ At the September 2024 IAG meeting, one investor said that shareholders have an important role holding both auditors and audit committees to account. By contrast, another IAG member said that investors should not oversee the audit because that is the role of the audit committee and one commenter said that the proposal would challenge the legal

structure of corporate governance. However, a lack of transparency into the audit process may leave investors unable to make well-informed decisions when voting on selections made by the audit committee or on re-election of audit committee members to the board of directors.²²⁶ Figure 5 illustrates oversight relationships pertinent to the final rules. The dotted line indicates that investors' oversight relationship with the auditor is less direct than the audit committee's oversight relationship.

Figure 5. Oversight Relationships Pertinent to the Final Rules

committees of other companies); Liesbeth Bruynseels and Eddy Cardinaels, *The Audit Committee: Management Watchdog or Personal Friend of the CEO?*, 89 *The Accounting Review* 113 (2014) (finding that companies whose audit committees have “friendship” ties to the CEO purchase fewer audit services and engage more in earnings management); Cory A. Cassell, Linda A. Myers, Roy Schmardebeck, and Jian Zhou, *The Monitoring Effectiveness of Co-Opted Audit Committees*, 35 *Contemporary Accounting Research* 1732 (2018) (finding that the likelihood of a financial statement misstatement is higher and that absolute discretionary accruals are larger when audit committee co-option, as measured by the proportion of audit committees who joined the board of directors after the current CEO’s appointment, is higher); and Nathan Berglund, Michelle Draeger, and Mikhail Sterin, *Management’s Undue Influence over Audit Committee Members: Evidence from Auditor Reporting and Opinion Shopping*, 41 *AUDITING: A Journal of Practice & Theory* 49 (2022) (finding that greater management influence over audit committee members is associated with a lower propensity of the auditor to issue a modified going concern opinion to a distressed company under audit and with increased opinion shopping behavior).

²²⁵ Shareholder ratification of the appointment of the auditor is not statutorily required in the U.S.

and in many cases the ratification vote is non-binding. One commenter agreed with this point. The commenter also suggested that it is rare for shareholders to not ratify the audit committee’s selection. However, according to Audit Analytics, accessed on Mar. 1, 2024, in 2023, ratification votes were held by 2,802 distinct companies included in the Russell 3000 index, which comports with other estimates that indicate between 80 and 95 percent of companies hold votes on ratification proposals as part of their proxy voting process. *See also* ACAP Final Report, at VIII.20 (finding that 95 percent of S&P 500 companies and 70–80 percent of smaller companies put ratification proposals to an annual shareholder vote) and Lauren M. Cunningham, *Auditor Ratification: Can’t Get No (Dis)Satisfaction*, 31 *Accounting Horizons* 159, 161 (2017) (finding that more than 90 percent of a sample of Russell 3000 companies voluntarily include a ratification vote on the ballot). The Board notes that broker discretionary voting is permitted on ratification proposals and ratification proposals may be used as a mechanism by some companies to achieve a quorum to conduct an annual meeting as a result of brokers exercising discretionary votes. Although the ratification vote is in many cases non-binding, it can still be impactful as it sends a signal of shareholder views. Academic studies show that non-binding votes in other settings can pressure boards to reconsider its policies and are considered

by proxy advisors in setting their recommendation for board members. *See, e.g.,* Yonca Ertimur, Fabrizio Ferri, and Stephen R. Stubben, *Board of Directors’ Responsiveness to Shareholders: Evidence from Shareholder Proposals*, 16 *Journal of Corporate Finance* 53 (2010) (finding a “positive relation between the percentage of votes cast in favor of the [non-binding] proposal and the likelihood of implementation.”); and Aiysha Dey, Austin Starkweather, and Joshua White, *Proxy Advisory Firms and Corporate Shareholder Engagement*, 37 *Review of Financial Studies* (3877 (2024) (showing that when non-binding Say-On-Pay voting support falls below 70 percent, managers respond by increasing shareholder engagement). The ability to vote on ratification of the appointment of the auditor is recognized by investor groups as an important element of corporate governance. *See, e.g.,* Council of Institutional Investors, *Policies on Corporate Governance*, (Sept. 11, 2023) at 2.13f available at https://www.cii.org/corp_gov_policies.

²²⁶ The IAG indicated in their comment letter regarding proposed QC 1000 that investors need information to make better decisions when voting to ratify the appointment of the auditor and the election to the board of directors of the Chair or members of the audit committee.

ii. The Market for Information Related to Auditors and Their Engagements is Inefficient

Supply-Side Problems

Some basic economic theories suggest that high-quality firms should have an incentive to voluntarily disclose information to the extent it allows them to differentiate themselves from low-quality competitors.²²⁷ However, economic theory also suggests that there may be countervailing incentives that limit voluntary disclosure in practice. For example, firms may be deterred by the costs they would incur privately, such as how their competitors could leverage the disclosures to capture market share.²²⁸ There may also be no mechanism for firms to credibly disclose certain non-verifiable or difficult to verify information, which can lead to the failure of such information markets to exist entirely.²²⁹ There could also be a status-quo bias whereby a firm prefers to continue a non-disclosure policy despite investors' calls for additional information.²³⁰ Limited competition for the largest issuers could also reduce the largest firms' incentives to voluntarily disclose information. Finally, firms may tend to underprovide information due to: (i) the positive externalities²³¹ conferred by comparable and uniform public disclosures (i.e., firms may not directly benefit from some of the value provided to investors and audit committees); and (ii) the challenges of coordinating on a single comparable and uniform reporting framework.²³²

²²⁷ See, e.g., Kip W. Viscusi, *A Note on "Lemons" Markets with Quality Certification*, 9 *The Bell Journal of Economics* 277 (1978).

²²⁸ See, e.g., *id.*; Oliver Board, *Competition and Disclosure*, 57 *The Journal of Industrial Economics* 197 (2009) (finding that companies may be reluctant to voluntarily disclose in competitive markets); and Daniel A. Bens, Philip G. Berger, and Steven J. Monahan, *Discretionary Disclosure in Financial Reporting: An Examination Comparing Internal Firm Data to Externally Reported Segment Data*, 86 *The Accounting Review* 417 (2011) (finding that companies provide fewer segment disclosures due to proprietary costs or competitive concerns).

²²⁹ See Akerlof, *The Market for "Lemons."*

²³⁰ There are a variety of reasons why individuals may choose the *status quo* outcome in lieu of an unknown outcome, including aversion to the uncertainty inherent in moving from the *status quo* to another option. For additional discussion on status quo bias, see William Samuelson and Richard Zeckhauser, *Status Quo Bias in Decision Making*, 1 *Journal of Risk and Uncertainty* 7 (1988).

²³¹ See Mankiw, *Principles of Economics* 196 ("An externality arises when a person engages in an activity that influences the well-being of a bystander but neither pays nor receives any compensation for that effect If it is beneficial, it is called a positive externality.").

²³² See, e.g., Anat R. Admati and Paul Pfleiderer, *Forcing Firms to Talk: Financial Disclosure Regulation and Externalities*, 13 *The Review of Financial Studies* 479 (2000) (discussing how

Auditors could in principle supply information to investors and audit committees individually depending on their unique preferences. However, the costs to the firm to do so would grow with the number of interested investors and audit committees and the extent of information they would request. By contrast, under the final rules, the costs to produce the final metrics will not grow with the number of interested users.

Demand-Side Problems

While investors may seek to acquire information from the issuer, they could incur significant private costs in doing so.²³³ At the September 2024 IAG meeting, one investor said that her asset management firm is generally denied meetings with audit committee chairs of U.S. issuers. Further, the company may need to publicly disclose information provided on a selective basis.²³⁴ Indeed, at the September 2024 IAG meeting, several audit committee chairs said audit committees are reluctant to meet with shareholders individually due to the risk of violating disclosure laws. Hence the potential benefits of the information to an individual investor would be dissipated because all other investors would have the same information and any informational advantage would be lost. This would further reduce individual investors' incentives to obtain the information. A free-rider problem thus exists among investors in which the costs incurred by one or more investors to convince firms to disclose information would not be shared by all investors who benefit from the disclosure.²³⁵ As a result, economic theory suggests there should be an under-provision of such information relevant to investors.

As discussed above, audit committees are already privy to certain information about their auditors beyond what is publicly available. In particular, audit committees could request the final metrics from their auditors or other tendering auditors. However, that

individual firms "internalize less than fully the social value of the information they release") and George Loewenstein, Cass R. Sunstein, and Russell Golman, *Disclosure: Psychology Changes Everything*, 6 *Annual Review of Economics* 391, 397 (2014).

²³³ See, e.g., Nikolay Gantchev, *The Costs of Shareholder Activism: Evidence from a Sequential Decision Model*, 107 *Journal of Financial Economics* 610 (2013).

²³⁴ See Regulation Fair Disclosure, 17 CFR 243.100(b)(1)(iv).

²³⁵ See Mankiw, *Principles of Economics* 220 and 222 ("A free rider is a person who receives the benefit of a good but avoids paying for it A free-rider problem arises when the number of beneficiaries is large and exclusion of any one of them is impossible.").

information would not necessarily be comparable with other engagements or other firms. Requesting comparable information from multiple auditors could be burdensome or even impracticable. As a result, while the audit committee can use information from their auditor to better understand their current engagements, the audit committee likely has a limited view as to how other engagements—such as those of their peers—might be conducted. Furthermore, less effective audit committees may not be aware of the information and therefore would not request it in the first instance. If audit committees were aware of the information and made such a request, some audit firms may resist providing it to avoid the costs of gathering the information and potential negative reputational effects. Firms could also manipulate the information. As one commenter said, the audit committee's principal tool is that of inquiry, not observation, and inquiry, in audit parlance, is the weakest form of audit evidence.

Evidence

Due in part to the problems discussed above, there is currently limited information available to investors specifically related to audit engagements. Indeed, investors know the least about the audit engagement, as they are less involved in the issuer's operations compared to management, the board of directors, and the audit committee—and are even further removed from the audit process. Over the last decade and a half, there have been sustained requests from investors for increased transparency into the audit process. As discussed above, investor-related groups have requested increased disclosures at the firm and engagement levels—notably in the form of easily accessible and quantifiable metrics, potentially with accompanying context provided by the auditor. Furthermore, the ACAP Final Report recommended that the PCAOB, in consultation with auditors, investors, public companies, audit committees, boards of directors, academics, and others, "determine the feasibility of developing key indicators of audit quality and effectiveness and requiring auditing firms to publicly disclose those indicators." ²³⁶

There would likely be a significant cost to investors to conduct an exhaustive search of all existing publicly available information related to audit performance. For example, gathering the information could require an investor to process various types of

²³⁶ See ACAP Final Report, at VIII:14.

data from various sources. Only the largest institutional investors likely have the economies of scale to profitably gather this information.²³⁷ Further still, the presence of significant block holdings by diversified, passive investment-style funds, which often do not hold board seats, means that such information may not be provided by audit firms to a significant control group in cases where the fund managers do not hold a board seat.²³⁸ Even proxy advisors rely upon relatively limited publicly available information in making voting recommendations, which investors may then rely upon in their own decision-making.²³⁹ Due to the lack of information currently available, it may be several financial reporting cycles before audit committees and investors accumulate enough information (e.g., through restatements, CAMs, audit committee communications, other public events bearing on the auditor's reputation) to be able to effectively judge the auditor's performance and act accordingly. Compared to investors, audit committees are better able to accumulate information in less time due to their ability to more easily request and receive information from their auditor.

As described in the baseline, a small group of auditors voluntarily disclose some firm-level information through firm transparency reports.²⁴⁰ However, many smaller firms do not voluntarily release transparency reports and for those that do provide such information, the metrics are not uniform or comparable across firms.²⁴¹ One

commenter provided several examples of how firms' voluntary reporting is not comparable across firms. Furthermore, PCAOB staff found that firms generally do not voluntarily report engagement-level metrics publicly. Some research on audit firm transparency reporting in foreign jurisdictions suggests that the information is not useful while other research finds that disclosure requirements improve audit quality for impacted firms.²⁴² Some academic studies find that, because the information contained in transparency reports is relatively unregulated, the disclosures and contextual discussion lack uniformity and comparability across or within audit firms.²⁴³ Pointedly, audit firms could alter the methodology and construction of any metric they voluntarily choose to disclose. A lack of uniformity means that the voluntary disclosures have limited comparative value, inhibiting their usefulness in allowing investors to evaluate the efficacy of their auditors.

Two commenters said that the proposal cited no studies demonstrating that there is a lack of information about auditors and their engagements or evidence that the market is seeking additional information. One commenter said that without sufficient dialogue with investors, audit committees, and firms, it is unclear whether there are information gaps in what is already provided and whether there is any opportunity to expand or enhance what is already done today to meet their expectations. The proposal discussed

disclosures are required. See, e.g., Thomas Bourveau, Maliha Chowdhury, Anthony Le, and Ethan Rouen, *Human Capital Disclosures*, SSRN Electronic Journal (2023) (finding that, after the SEC adopted principles-based human capital disclosure requirements in 2020, the resulting human-capital disclosures lacked comparability). The Board notes that SSRN does not peer review its submissions.

²⁴² See, e.g., FRC, *Transparency Reporting: AQR Thematic Review*, (Sept. 2019) (finding that surveyed investors and audit committee chairs are either unaware of or perceive limited use in audit firm transparency reporting in the U.K.) Rogier Deumes, Caren Schelleman, Heidi V. Bauwhede, and Ann Vanstraelen, *Audit Firm Governance: Do Transparency Reports Reveal Audit Quality?*, 31 AUDITING: A Journal of Practice & Theory 193, 194 (2012) (finding that EU audit firm transparency reporting is not associated with proxies for audit quality); and Shireenjit K. Johl, Mohammad Badrul Muttakin, Dessalegn Getie Mihret, Samuel Chung, and Nathan Gioffre, *Audit Firm Transparency Disclosures and Audit Quality*, 25 International Journal of Auditing 508 (2021) (finding that a requirement for audit firm transparency reporting in Australia led to an improvement in audit quality for the impacted entities).

²⁴³ See, e.g., Sakshi Girdhar and Kim Klarskov Jeppesen, *Practice Variation in Big-4 Transparency Reports*, 31 Accounting, Auditing & Accountability Journal 261 (2018) (finding that "the content of transparency reports is inconsistent and the transparency reporting practice is not uniform within the Big-4 networks").

evidence related to the lack of information despite a market demand, including several studies related to the decision-relevance of current voluntary firm transparency reporting.²⁴⁴ The proposal also discussed the demand from various investor groups for additional information related to the quality of firms and their engagements.²⁴⁵ Investor-related groups' support for the proposal provides additional evidence that there is an information gap and demand for information like the final metrics. Indeed, one commenter said that existing information, including firms' transparency reports, is insufficient and largely unused by the investment community because it is seen as marketing material rather than substantive, actionable data. According to the commenter, the lack of information leads audit committee members to prefer Big 4 auditors to protect or validate their decision-making in an environment where the audit and auditor are credence goods. The Board notes that transparency reports may also be unused because the information lacks standardization.

One commenter said that the proposal appeared to acknowledge that there is a lack of market demand for the proposed metrics. To the contrary, as discussed in the proposal and again above, given the considerations of benefits discussed below, the Board believes the lack of incentive for firms to provide such information is likely the cause of the apparent undersupply of information rather than a lack of market demand.²⁴⁶ That is, the Board believes the limited availability of information is more likely due to the supply and demand-side problems discussed above rather than a lack of market demand. By contrast, two commenters agreed that certain aspects of the market create limited incentives to provide sufficient information to users of the financial statements regarding audit quality. One commenter said that some research suggests that investors want more information on the inputs to audit production.²⁴⁷

2. How the Final Rules Address the Need

i. Mandatory Disclosure of Metrics

The final rules address the need by requiring mandatory public disclosure of metrics relating to auditors and audit

²⁴⁴ See Proposing Release at 132–134.

²⁴⁵ See Proposing Release at Section IV.B.1.

²⁴⁶ See Proposing Release at n. 212.

²⁴⁷ See Brant E. Christensen, Steven M. Glover, Thomas C. Omer, and Marjorie K. Shelley, *Understanding Audit Quality: Insights from Audit Professionals and Investors*, 33 Contemporary Accounting Research 1648 (2016).

²³⁷ Some research suggests that institutional investors are better-informed than retail investors. See, e.g., Cory A. Cassell, Tyler J. Kleppe, and Jonathan E. Shipman, *Retail Shareholders and the Efficacy of Proxy Voting: Evidence from Auditor Ratification*, Review of Accounting Studies 75 (2022) and cites therein.

²³⁸ See, e.g., Amir Amel-Zadeh, Fiona Kasperk, and Martin C. Schmalz, *Mavericks, Universal, and Common Owners—The Largest Shareholders of U.S. Public Firms*, SSRN Electronic Journal, (2022). The Board notes that SSRN does not peer review its submissions.

²³⁹ See, e.g., Cunningham, Auditor Ratification 163.

²⁴⁰ Audit firm transparency reports are voluntary and unregulated disclosures, as they are not required by PCAOB standards or applicable U.S. law. Consequently, audit firms can disclose metrics of their own choosing and construction. In practice, as discussed in above, audit firms that do publish transparency reports include the disclosure of metrics that are required in reports pursuant to disclosure rules in other jurisdictions, such as in the European Union (i.e., EU—No 537/2014 Article 13), or similarly adopted domestic requirements in the U.K. under the FRC's authority (i.e., the Companies Act of 2006, and Statutory Auditors and Third Country Auditors Regulations of 2016).

²⁴¹ Some research suggests that lack of comparability can be a problem even when

engagements. Under the final rules, auditors will have the opportunity to discuss the context of their metrics. The final rules could thus reduce opacity in the audit market and reduce frictions in the information market, thereby enhancing (i) audit committees' ability to efficiently and effectively monitor and select auditors as well as (ii) investors' ability to efficiently and effectively make decisions about ratifying the appointment of their auditors and allocating capital. The final metrics will quantify various aspects of firms' audit practice as a whole and engagements performed. As described above, the collective history of these final metrics will be publicly available. Moreover, as noted above, the final metrics will be subject to requirements designed to ensure their accuracy, including certification by the firm and specific quality control requirements.

Investors and audit committees could use the final metrics to better understand how their auditor has conducted their engagement and how that compares to how other engagements were conducted.²⁴⁸ This should improve their decision-making. Some commenters agreed that the information about auditors and their engagements required by the metrics would provide value to the decision-making process for stakeholders. For example, the final metrics should help audit committees engage in active discussions with their current auditors regarding the audit process and interview candidate auditors when or if a replacement auditor is desired.²⁴⁹ Audit committee disclosures indicate that some audit committees consider a variety of public and nonpublic information when engaging their auditor.²⁵⁰ The Board believes the information could also inform investors' auditor appointment ratification decisions. Research finds that investors are more likely to challenge auditor appointments when they have access to information that calls into question the quality or independence of the firm, which suggests that, in some cases,

investors will use standardized information across firms and over time to make better decisions.²⁵¹ Referring to academic research, one commenter said that investors do react to audit outcomes, audit behavior, and regulatory-induced disclosures in the audit report. However, the commenter also noted that: (i) the results are nuanced and context-specific; and (ii) mixed for non-professional investors.²⁵²

²⁵¹ See, e.g., Paul Tanyi, Dasaratha Rama, and Kannan Raghunandan, *Shareholder Ratification of Auditors after PCAOB Censures*, SSRN Electronic Journal (2021) (finding that first-time PCAOB censures of the largest accounting firms are associated with a higher percentage of shareholders not voting to ratify the appointment of the firm after the censure); Suchismita Mishra, K. Raghunandan, and Dasaratha V. Rama, *Do Investors' Perceptions Vary with Types of Nonaudit Fees? Evidence from Auditor Ratification Voting*, 24 *Auditing: A Journal of Practice and Theory* 9 (2005) (finding that the SEC's requirement for companies to disclose partitioned information about tax and other non-audit fees paid to a company's independent audit firm had a positive association with the proportion of votes against ratifying the appointment of the firm in 2003); Paul N. Tanyi, Dasaratha V. Rama, and K. Raghunandan, *Auditor Tenure Disclosure and Shareholder Ratification Voting*, 35 *Accounting Horizons* 167 (2021) (finding that in the case of companies with long [short] auditor tenure, the proportion of shareholder votes against ratifying the appointment of the auditor increased [decreased] after PCAOB mandated public disclosure of auditor tenure). The Board notes that research also indicates that retail investors may not necessarily use information regarding an audit firm in their decisions to vote on a proposal to ratify the appointment of the firm. See, e.g., Cassell, et al., *Retail Shareholders* (finding that, on average, shareholder votes against ratifying the appointment of the firm are not associated with audit failures but are associated with investment performance). However, the same study also suggests that non-retail investors are relatively better informed. One commenter said it would be useful to know whether the PCAOB had found any evidence of shareholders responding to the persistently high rates of Part I.A deficiencies. One study finds some evidence that shareholders vote against auditor ratification when their auditors receive unfavorable PCAOB inspection reports. However, the study finds the relationship only for the subset of companies where corporate governance is weak. See Myungsoo Son, Hakjoo Song, and Youngkyun Park, *PCAOB Inspection Reports and Shareholder Ratification of the Auditor*, 17 *Accounting and the Public Interest* 107 (2017). The Board notes that SSRN does not peer review its submissions.

Hobson, and Brian J. White, *Earnings Metrics, Information Processing, and Price Efficiency in Laboratory Markets*, 53 *Journal of Accounting Research* 555 (2015); Christensen, et al., *Understanding Audit Quality*; Eric T. Rapley, Jesse C. Robertson, and Jason L. Smith, *The Effects of Disclosing Critical Audit Matters and Auditor Tenure on Nonprofessional Investors' Judgments*,

Furthermore, investor-related groups have indicated that they use the information contained in Form AP. This suggests that they are familiar with Form AP and may be interested in reviewing additional information provided there. However, citing academic research, one commenter noted that the influence of Form AP on investor decision-making is mixed.²⁵³

By making the final metrics public and therefore available to all potential beneficiaries, the final rules should help ameliorate the positive externality problem associated with public disclosure.²⁵⁴ Moreover, because these final metrics will be public, the increased reputational risk they bring for auditors may, in turn, create incremental incentives for auditors that will be subject to the final requirements to maintain their reputation, or face a loss of business, thereby increasing accountability.²⁵⁵ Public disclosure also addresses investors' free-rider problem by eliminating the need for a private actor to force firms to disclose.²⁵⁶ One commenter said there are several mechanisms already in place to hold auditors accountable and questioned whether accountability could be further improved. The Board acknowledges that such mechanisms are in place (e.g., PCAOB inspections). However, the Board believes the final rules will complement existing accountability mechanisms. For example, the final rules may enhance the PCAOB inspections approach.²⁵⁷ Another

²⁵⁴ See discussion above.

²⁵⁵ Two investor groups generally agreed with this benefit.

²⁵⁶ For additional discussion of the role of mandatory disclosure as a regulatory tool, see, e.g., Admati and Pfleiderer, *Forcing Firms to Talk*; and John C. Coffee, Jr., *Market Failure and the Economic Case for a Mandatory Disclosure System*, 70 *Virginia Law Review* 717 (1984).

²⁵⁷ See below for additional discussion on the benefits to the PCAOB's inspection program.

²⁴⁸ See, e.g., Christensen, et al. *Understanding Audit Quality* (finding that surveyed investors believe information similar to several of the final metrics [i.e., the sufficiency of engagement team staffing, having well-trained auditors on the engagement team, having auditors on the engagement team with appropriate expertise, and the lack of financial statement restatements] impacts audit quality).

²⁴⁹ See, e.g., AICPA, *Hiring a Quality Auditor* 9, (2018) (discussing how audit committees should obtain all necessary information from the auditor).

²⁵⁰ See, e.g., CAQ, *2023 Audit Committee Transparency Barometer*, 15–18 (2023) (presenting examples of audit committee disclosures that summarize the information the audit committee considered when appointing the auditor).

commenter suggested that the Board consider firm incentives related to legal liability, damage to reputation through restatement and deficiencies, and PCAOB sanctions. The Board acknowledges that these forces create some incentive for firms to keep audit quality above a certain threshold. However, restatements are relatively rare events and PCAOB sanctions are sporadic. Furthermore, PCAOB inspections are constrained by existing PCAOB rules and standards. One commenter said that while enforcement actions and inspection reports provide valuable data, their extended delays often diminish their relevance for key stakeholders.

Several commenters said that investors are not making use of existing information that is similar to the proposed metrics, suggesting that they would not make use of the proposed metrics either. As support, two commenters referred to comments made during the November 2, 2022 meeting of the PCAOB SEIAG.²⁵⁸ Citing a survey of institutional investors, another commenter said that most institutional investors are either unfamiliar with or unaware of firms' current audit quality reports.²⁵⁹ Another commenter questioned whether investors who are not fully utilizing the information contained in inspection reports would also not use the proposed metrics. Citing a market research report, one commenter noted that shareholders play a limited role in practice when ratifying the appointment of the auditor.²⁶⁰ At the September 2024 IAG meeting, one investor said that the average investor is not engaging with the audit process or audit committees.

The Board appreciates these statements and research findings and notes that they are consistent with some of the research cited in the proposal and

above.²⁶¹ However, the Board notes that the CAQ 2023 Survey also finds that almost all surveyed institutional investors assess audit quality by considering the firm's reputation, years of experience, people, and technological resources. Apart from technological resources, the final metrics will provide investors with related information.²⁶² The surveyed institutional investors also expressed an interest in learning more about auditor communications to audit committees through disclosures. The Board believes audit committee members likely do occasionally request information like the final metrics from their auditor. Indeed, one audit committee chair said at the September 2024 IAG meeting that he requested information on industry specialization from his auditor. A majority of the surveyed institutional investors indicated that metrics related to the lead engagement partner's background, engagement team tenure, and specialist experience or related information would be useful. The survey also states that engagement-level metrics were of greater interest to the surveyed institutional investors than firm-level metrics because they are specific to a company, objective, and measurable. The final metrics will provide investors with engagement-level metrics. Collectively, the Board believes this information supports the Board's view that investors, particularly institutional investors, will find the final metrics useful and indeed an improvement in the quality of information over the limited information currently available.

One commenter suggested that the PCAOB consider how much information investors will have about auditors compared to the amount of information they will have about issuers. The Board does not believe that such a comparison is relevant to the economic analysis and the commenter did not explain how it would be relevant. The Board acknowledges that, in some cases, the final metrics could provide investors information about certain aspects of audit firms and their engagements that they might not have about issuers. However, the Board notes that, on balance, there is considerably more public disclosure available regarding issuers than audit firms.

Many commenters representing firm or industry groups were skeptical that investors could effectively use the information. One commenter said that publication of metrics alone does not

guarantee that investors will use or be aware of them. Two commenters said that the metrics' relationship to audit quality may not be clear. Several commenters noted that, unlike audit committees, investors would not be able to have a two-way conversation directly with auditors to appreciate the full context of the firm and its audit. One commenter questioned whether investors or audit committees would find the information useful. One commenter noted some of the proposed firm-level metrics (e.g., Partner and Manager Involvement, Workload) would be useful to audit committees but expressed doubt that others (e.g., Use of Auditor's Specialists, Allocation of Audit Hours, Experience of Audit Personnel) would be useful. However, the commenter believed some of the proposed metrics (e.g., Experience of Audit Personnel, Industry Experience) could be useful at the engagement level. Several commenters suggested that some or all of the proposed metrics would be useless without context. Citing academic research that was also cited in the proposal, one commenter said that retail investors would rely on the proposed metrics only if they were clearly trending over time.²⁶³ One commenter expressed concern that investors and audit committees could have trouble utilizing the proposed metrics because there is a lack of benchmarks, and it will be unclear to them how the proposed metrics relate to audit quality. Two commenters said that tracking metrics would become a compliance exercise and therefore would not transmit useful information for stakeholders. One commenter said that there are qualitative benefits of being a part of a GNF that cannot be properly captured or measured through the proposed metrics.

While most investors will not have the same context as audit committees, the Board believes that many investors, particularly institutional investors, do have sufficient context to make effective use of the final metrics. Indeed, investors have access to much of the contextual information that some commenters felt was critical, such as the firm's size, the issuer's size, network membership, or the issuer's industry. Many companies have robust shareholder engagement programs, where managers and/or board members communicate directly with shareholders.²⁶⁴ These programs could

²⁵⁸ One commenter referred to a discussant on the panel who made the following statement: "My experience has been that investors don't read the firm-level [PCAOB inspection] report. A lot of them don't know they necessarily exist, right." Another commenter did not refer to a specific discussant and referred to the Nov. 2, 2023 meeting of the PCAOB SEIAG. However, the Board believes the commenter intended to refer to the Nov. 2, 2022 PCAOB SEIAG meeting because firm and engagement metrics were not a topic of discussion during the Nov. 2, 2023 meeting.

²⁵⁹ See CAQ 2023 Survey. The survey was comprised in interviews with 38 institutional investors working at companies with a minimum of \$500M in assets under management. The participants were portfolio managers or investment analysts at buy side firms or research directors or similar roles at sell side firms. The survey did not describe how the participants were found or the questions that were asked.

²⁶⁰ See Glass Lewis, *2024 Benchmark Policy Guidelines—United States*, (2024).

²⁶¹ See Proposing Release at Section IV.B.2.

²⁶² See below for a discussion of alternative metrics considered related to the use of technical resources.

²⁶³ See Brown and Popova, *How do Investors Respond*.

²⁶⁴ See, e.g., Ali Kakhbod, Uliana Loginova, Andrey Malenko, and Nadya Malenko, *Advising the Management: A Theory of Shareholder*

raise investors' awareness of the metrics, provide an opportunity for two-way conversation, and encourage them to vote on corporate governance matters or raise concerns outside of the voting process. Furthermore, even if investors decline to participate in outreach efforts or no shareholder engagement program exists, proxy advisory firms can use the information to inform their voting recommendations on both auditor ratification and audit committee members.²⁶⁵ Thus, the final metrics can still inform shareholder voting.²⁶⁶ Two investor groups agreed with the Board's view that investors would use the proposed metrics to make better decisions about ratifying the appointment of their audit firm and allocating capital. Several other commenters said that the metrics would be beneficial to investors and other users of the audit report.

The Board also notes that auditors will be able to provide investors with context through optional narrative disclosure. Commenters had mixed views on the usefulness of the proposed narrative disclosure. Some commenters believed the narrative disclosure would allow firms to provide context necessary for appropriate understanding and would allow firms to communicate critical context that may be beneficial. However, several commenters believed it would not be sufficient. The Board recognizes that the optional narrative disclosures may not capture all relevant context. In such cases, firms could provide additional voluntary disclosure (e.g., through their transparency or quality reports).²⁶⁷

One commenter suggested the Board had ignored significant work conducted by the CAQ over the past decade regarding AQIs. The commenter referred specifically to three reports published by the CAQ (the "2014 CAQ Report," "2016 CAQ Report," and "2023 CAQ

Report").²⁶⁸ The Board has reviewed each report. The 2014 CAQ Report and 2016 CAQ Report summarize the results of stakeholder outreach and therefore inform the Board's understanding of the need for standard setting and how the final metrics address the need. The 2023 CAQ Report opines on transparency reporting best practices.

Based on outreach to various stakeholders, the 2014 CAQ Report expresses optimism that AQIs can be useful to audit committees and help promote audit quality. For example, the report concludes that communication of engagement-level AQIs can help the audit committee evaluate the actions taken or untaken by their auditor and help maintain or increase audit quality. This is consistent with the benefits related to audit committee monitoring of their auditor discussed below. It also emphasizes the importance of context, which the Board acknowledged in the proposal and discuss below in this subsection. The report suggests a flexible approach to the communication of metrics. The Board acknowledges this suggestion is in tension with the adopted approach that specifies calculations for each metric.²⁶⁹ However, for the reasons discussed in this subsection and highlighted below, the Board believes that the current voluntary or flexible approach would not sufficiently address the need for comparable information.

In the 2016 CAQ Report, the CAQ expressed a belief that reliable, quantitative metrics related to the audit can: (i) inform audit committees about matters that may contribute to the quality of an audit and (ii) help audit committees make decisions related to auditor appointment or reappointment as well as the selection of lead engagement partners. Based on the result of a pilot study with audit committees, and in addition to the findings summarized by the commenter, the report found that participants: (i)

generally supported discussion of AQIs with the engagement team; (ii) felt that key aspects of audit quality cannot be quantified such as professional skepticism; (iii) acknowledge growing interest from investors regarding how audit committees are fulfilling their responsibilities; and (iv) recognized that AQIs can help audit committees oversee the quality of the external audit.

The Board's economic analysis is largely consistent with these views, in particular the Board's discussion of improved monitoring of both the auditor and the audit committees below. However, participants in the CAQ's pilot study also: (i) expressed a preference for a flexible approach to AQI communication; (ii) noted that they already have access to the information they need; and (iii) cautioned that public disclosure of engagement-level metrics could lead to unintended consequences such as benchmarking behavior or excessive focus on measurable metrics. The Board acknowledges that there may be some benefits to a more flexible approach to audit committee communications. However, the Board believes a completely flexible approach could result in audit committees having insufficient information or information with limited utility, limit PCAOB oversight, limit comparability of metrics, and exacerbate other unintended effects (e.g., manipulation of the metrics).²⁷⁰ The proposal acknowledged that audit committees can already seek to obtain information like the final metrics from their incumbent auditors and the Board acknowledges this again below. Several commenters agreed that audit committees already have access to information about auditors and their engagements. Finally, the Board notes that the proposal also discussed the potential unintended consequences raised by participants in the pilot study, and the Board discussed them again below.

Two factors limit the relevance of the 2014 CAQ Report and 2016 CAQ Report. First, the reports contemplate voluntary communications by auditors to audit committees rather than mandatory public disclosure. Second, the auditing environment has evolved significantly since then. For example, investors and audit committees now have access to Form AP information and CAMs.

One commenter suggested that audit committees have access to relevant

Engagement, 36 Review of Financial Studies 1319 4 (2023) and cites therein (discussing how communication between management and shareholders has become increasingly prevalent).

²⁶⁵ Proxy voting guidelines do not currently appear to reference audit quality, but do refer to poor accounting practices. See, e.g., ISS, *United States Proxy Voting Guidelines Benchmark Policy Recommendations*, (Jan. 2024), 16 (listing "poor accounting practices" as a factor influencing its voting recommendations on members of the audit committee.)

²⁶⁶ Research shows that proxy advisor recommendations influence shareholder voting outcomes. See, e.g., Nadya Malenko, and Yao Shen, *The Role of Proxy Advisory Firms: Evidence from a Regression-Discontinuity Design*, 29 Review of Financial Studies 3394 (2016) (finding "that the recommendations of proxy advisory firms are a major factor affecting shareholder votes.").

²⁶⁷ See above for a discussion on the optional narrative disclosure, including commenters' views and how the final rules address commenters' views.

²⁶⁸ See Center for Audit Quality, *Approaches to Audit Quality Indicators*, (Apr. 2014) ("2014 CAQ Report"); Center for Audit Quality, *Audit Quality Indicators: The Journey and Path Ahead*, (Jan. 2016) ("2016 CAQ Report"); and Center for Audit Quality, *Audit Quality Disclosure Framework (Update)*, (June 2023) ("2023 CAQ Report"). By "AQI," the 2014 CAQ Report and 2016 CAQ Report are referring to measures that may provide further insight into audit quality, as outlined in a PCAOB briefing paper presented to the PCAOB's Standing Advisory Group Meeting on May 15–16, 2013. See PCAOB, *Discussion—Audit Quality Indicators* (May 15–16, 2013), available at https://pcaobus.org/news/events/documents/05152013_sagmeeting/audit_quality_indicators.pdf. Most of the final metrics are very similar to an AQI discussed therein.

²⁶⁹ See below for additional discussion on the Board's decision to standardize the calculation of the metrics.

²⁷⁰ See below for additional discussions on the Board's decision to standardize the calculation of the metrics and on the potential for auditors to manipulate their metrics.

comparable data by reference to information firms are already currently required to disclose pursuant to PCAOB rules (e.g., Form 2). The proposal acknowledged the availability of this information and the Board acknowledges it again above. However, as described above and discussed further below, the final metrics will make new relevant information available in a way that is much more accessible and comparable than existing information sources. The commenter also said that audit committees can seek relevant data from potential new audit firms. The proposal acknowledged this and the Board discussed this topic again below. Importantly, the Board notes that audit committees may have trouble obtaining comparable information from potential new auditors. One commenter suggested that audit committees would likely prefer to obtain information through conversation with their auditor directly rather than refer to a database of metrics. Under the final rules, audit committees will be free to request the final metrics or any other related information from their auditor directly.

One commenter performed a survey of audit committee chairs of large U.S. public companies. The commenter did not indicate the number of participants, how participants were selected, demographic information, or the questions they were asked. The participants said that they already receive or have access to most of the information in the proposal as part of the audit process and any other information would likely not be valuable to them. The Board discussed this limitation along with important caveats in the proposal and discusses it again below. The Board also notes that, at the same time, participants also expressed desire for additional information on artificial intelligence.²⁷¹ Participants also opined on the extent to which investors would use the information. First, some participants said information like the proposed metrics is rarely requested by or discussed with investors. The Board discussed in the proposal and above the challenges investors face obtaining information through this channel. The Board also discussed above how investors may be less vocal because they do not believe it is possible to obtain useful information in the current environment. The Board also notes that commenters representing a broad array of investors, investment managers,

investor advocates, and other financial reporting experts said that the metrics would be useful. Second, some participants noted that the information would only be available to investors annually and therefore would be stale. The Board acknowledges that investors will have access to the metrics on an annual basis. The Board believes that requiring firms to disclose the metrics on a more continuous basis would require a significantly greater investment in time and resources by the firms. The Board also notes that a broad range of commenters generally agreed that audit committees will find most or all of the information useful, especially engagement-level metrics.

One commenter representing a firm-related group performed a survey of audit committee members by way of its member firms. The same commenter also commissioned a third party to perform an investor survey.²⁷² Each survey provides information related to the need for and potential benefit of the proposed metrics. The Board discussed each survey below.

The audit committee members survey involved 242 participants. The participating audit committee members sit on audit committees of a range of companies by size and industry sector. The commenter did not completely describe the basis on which audit committees were invited to participate in the survey. The commenter did provide the survey questions. Fifty-nine percent of participants said the information available to them to fulfill their external auditor oversight responsibilities meets all of their needs. Thirty-six percent said the information meets most of their needs and the remaining 5% said the information meets less than most of their needs. These results suggest that most audit committees believe the current information environment is sufficient. However, the results do not imply that additional information cannot be useful to audit committee members. Indeed, 27% of the surveyed audit committee members seek more information about how their audit engagement is being performed, about the audit firm, or about other audit firms. Furthermore, some participants may have been reluctant to say that the information available to them to fulfill their responsibilities does not meet most or all of their needs because it would imply they are not fulfilling their responsibilities. Other results of the survey are largely consistent with

information presented in the proposal and above. For example, 78% of participants agreed that there could be unintended consequences and 73% said there would be challenges interpreting the proposed metrics. Eighty-two percent of participants said they had concerns about data specific to their audit being available publicly; however, the specific concerns were not raised and, by contrast, only 40% were concerned that the proposed mandatory reporting could increase director liability. Fifty-nine percent of participants agreed that some standard information about auditors should be considered. Eighty percent of participants said they rarely or never use PCAOB Form AP and 78% said they rarely or never use PCAOB registrations data; rather, the quality of conversation with the auditor is the top way audit committees evaluate the quality and reliability of the audit. Finally, 90% of participants said that PCAOB standards and rules are well-suited or have mostly kept up with change. Use of technology in the audit was more commonly ranked than firm and engagement metrics as an area where the audit committee would like to see the PCAOB modernize its auditing standards. The Board notes that the PCAOB recently adopted amendments to auditing standards related to auditors' use of technology-assisted analysis and recently proposed a standard related to auditors' use of substantive analytical procedures.²⁷³ The Board also notes that, while informative to the PCAOB generally, such comparisons are less relevant to the economic analysis of the final rules.

The investor survey involved 100 participants. Participants were screened to ensure they are professional institutional investors employed at companies that manage at least \$500 million in assets and have at least five years of experience and serve at the director level or higher. Besides these requirements, the participating investors cover a variety of job levels, experience levels, and ages, cover both genders, and primarily (80%) focus on both large accelerated filers and accelerated filers. The commenter did not completely describe the basis on which investors were invited to participate in the

²⁷³ See *Amendments Related to Aspects of Designing and Performing Audit Procedures that Involve Technology-Assisted Analysis of Information in Electronic Form*, PCAOB Rel. No. 2024-007 (June 12, 2024); *Proposed Auditing Standard—Designing and Performing Substantive Analytical Procedures and Amendments to Other PCAOB Standards*, PCAOB Rel. No. 2024-006 (June 12, 2024). The SEC approved the PCAOB's amendments to auditing standards related to auditors' use of technology-assisted analysis on Aug. 20, 2024.

²⁷¹ The Board's decision not to include a metric related to the use of technical resources is explained in Section IV.D.3.iv.d of the proposal and below.

²⁷² See Letter from Center for Audit Quality (Aug. 1, 2024) available at <https://pcaobus.org/about/rules-rulemaking/rulemaking-dockets/docket-041>.

survey. The commenter did provide the survey questions. Eighty-six percent of the participants work for banks or credit unions, 13% for other types of funds, and 1% for family offices.

Fifty-three percent of participating investors indicate they trust the audit of public company financial statements completely and 40% trust them a great deal. Furthermore, 57% of participating investors feel the information available to assess the quality of the audit meets all their needs and 35% feel it meets most of their needs. However, the Board believes the respondents may be focusing on whether information currently available permits them to fulfill their fiduciary responsibilities narrowly defined, similar to the audit committee members. First, just 17% of participating investors said they do not want to see any additional information about the audit to evaluate its quality. All others wanted additional information about the auditing process, team specifics, qualifications, and more generally, other information. The final metrics will provide such information. Second, almost all of the proposed metrics were indicated as being extremely helpful by between 30% and 50% of participated investors. The commenter did not indicate whether the survey allowed less favorable responses and, if so, what the participants' responses were.

The commenter noted that there were variances between these percentages and the portion of participating investors who said they would likely seek out the information on the PCAOB website. The commenter interpreted these variances as being consistent with their view that understanding how investors would use the information is necessary. The Board agrees that understanding how investors would use the information is important. Indeed, the Board discussed through the economic analysis how the Board believes investors will use the information. However, the Board believes these variances are difficult to interpret because it is unclear what the practical difference is between finding a metric helpful and being likely to proactively seek it out. Therefore, the variances may be driven by confusion among respondents.

Notably, despite broad agreement that engagement-level metrics would be helpful and 83% wanting some additional information about audit quality in the companies they invest in, 83% of surveyed investors somewhat or strongly agreed with the statement that mandated public disclosure of engagement-level performance metrics could lead to unintended consequences

and as such should be voluntary. The survey did not indicate what unintended consequences the surveyed investors thought might occur or whether they were aware that the final rules would permit firms to provide an optional narrative disclosure along with each metric.²⁷⁴

Other results of the investor survey are largely consistent with information presented in the proposal and above. For example, investors use a variety of publicly available information to assess audit quality (e.g., audit quality reports, inspection reports, reputation and the auditor's opinion and ICFR evaluation, PCAOB website). Investors also agree that context would be important for understanding the proposed metrics.

The Board notes that the views of participating investors were different from the views of audit committee members in two important ways. First, investors are more optimistic that the proposed metrics would be useful to audit committees. Indeed, 30% of participating investors strongly agree that audit committees lack access to the information they need to make informed decisions about selecting an auditor (39% somewhat agree) and 34% strongly agree that mandatory and standardized firm and engagement metrics are necessary for company management and audit committees to uphold fiduciary responsibilities to shareholders (47% somewhat agree). Second, investors more strongly believe that PCAOB standards and rules are in need of updating. Where 90% of surveyed audit committee members said that PCAOB standards and rules are well-suited or have mostly kept pace with change, just 26% of surveyed investors said PCAOB standards and regulations are well-suited for their intended purpose and 42% believed they had mostly kept up with change. More specifically, where 17% of surveyed audit committee chairs cited firm and engagement areas among the top three areas they would like to see the PCAOB modernize auditing standards, 28% of surveyed investors cited it among their top three areas.

A commenter representing an investor-related group pointed to another survey of investors.²⁷⁵ This survey was conducted by the commenter in July 2017. The survey was limited to members of the commenter's group and targeted

primarily buy-side portfolio managers and research analysts, sell-side analysts, credit analysts, and corporate financial analysts. There were 284 initial respondents. The commenter did not completely describe the basis on which investors were invited to participate in the survey. The commenter did provide the questions asked. The survey's finding, as highlighted by the commenter, underscores that (i) the quality of information communicated to investors, including AQIs, is very important to how investors perceive the value of an audit and (ii) developing and monitoring AQIs is a high standard-setting priority for investors.²⁷⁶ According to the commenter, the results of the survey suggest that firm and engagement metrics are a priority for investors, a viewpoint with which the Board agrees and that accords with other investor feedback the Board has received over the course of this project. The Board notes that survey respondents rated information like the final metrics (e.g., restatement of company financials, industry expertise of audit personnel, training and accreditation of audit personnel, tenure of engagement partner, number of audit staff per audit partner, audit firm recruitment and retention practices) between 2.71 and 3.66 in importance (one being "not important" and four being "very important.").

While the Board believes the final metrics will help reduce opacity in the audit market and reduce frictions in the information market, the Board notes that the final metrics will not be direct measures of audit quality. Audit quality is an abstract concept, and there is no single comprehensive measure of audit quality. Audit quality is a concept designed to describe the characteristics of, and participants in, audit engagements in which the auditors are more likely to identify and report material misstatements. Or, more broadly, audit quality reflects all of the components of the audit that align with desirable outcomes.²⁷⁷ The desired outcomes of the framework depend (to some extent) upon the stakeholders involved, even if there are certain consistent areas of focus. As a result, the final metrics cannot directly measure audit quality. And they are not intended to do so, as—without additional context—it is unlikely they can be interpreted directly as measurements of audit quality. The final metrics are not

²⁷⁴ See above for a discussion on the limitations of voluntary auditor reporting.

²⁷⁵ See CFA Institute, *CFA Institute Member Survey Report: Audit Value, Quality, and Priorities*, (July 2017) ("2017 CFA Institute Survey"), available at <https://rpc.cfainstitute.org/en/research/surveys/audit-value-quality-priorities-survey-report>.

²⁷⁶ *Id.* at Table 1. The Board notes that the 2017 CFA Institute Survey did not define "AQI."

²⁷⁷ For a review of various definitions and discussions of the latent attributes of audit quality, see, Knechel, et al., *Audit Quality*.

intended to imply that an increase (decrease) in a particular metric, or a group of metrics, necessarily relates to an increase (decrease) in audit quality. Lastly, the Board does not believe that the final metrics, individually or taken together, could be appropriately used in isolation to ascertain audit quality at an audit firm or for an audit engagement. For example, some of the most important elements of a high-quality audit, such as application of due care and professional skepticism, are not capable of being entirely measured and quantified directly.

Two commenters agreed that no single metric can be viewed as having a causal relationship to audit quality. Several other commenters agreed that the correlation between the proposed metrics and audit quality is far from perfect. However, two commenters interpreted this caveat regarding the relationship between the proposed metrics and audit quality to imply that the proposed metrics cannot be decision-relevant to investors and audit committees. The Board does not believe this to be the case. The Board continues to believe that certain aspects of audit quality cannot be measured. However, the Board does not believe this implies that the final metrics will be irrelevant to investors and audit committees. To the contrary, as said by one commenter, the Board believes certain aspects of the audit can be measured.

One commenter said that the purpose and use of the metrics are not consistently correlated with stakeholders' needs because the proposal lacked an explicit definition of audit quality. The Board does not believe a definition of audit quality is necessary for the metrics to be correlated with stakeholders' needs. Investors' and audit committees' information needs are explicitly stated above. The Board believes the arguments made in this subsection, in conjunction with the discussion of benefits below, establish a correlation between the final metrics and stakeholders' needs.

ii. Uniform and Comparable Metrics

In addition to mandating disclosure, the final rules will also specify the data sources and calculations for each final metric and require their disclosure in PCAOB forms in an electronic, structured data format. Collecting and reporting information in this manner will likely enhance the usefulness of the information to investors and audit committees by allowing them to more easily access the information and compare firms and engagements. Regular annual reporting should also

allow investors and audit committees to form judgments regarding the quality of their auditor sooner (e.g., compared to restatements which may take several years to occur or PCAOB inspection reports which may be released several years after an audit engagement was performed).

Commenters' views on comparability are discussed above. Overall, commenters questioned whether the engagement-level metrics would be comparable due to the importance of company-specific context, which in their view is necessary for understanding the metrics. Two commenters suggested that even firm-level metrics are not comparable. One commenter said that differences in the centralization or complexity of issuers' IT infrastructures could be a reason for cross-sectional differences in the engagement-level metrics rather than differences in the audit. One commenter suggested that comparability would improve if the metrics would account for firm size, issuer size, and industry. One commenter suggested that the standardized calculations, rather than facilitate comparability, could reduce it because they would not be appropriate for every firm. Several commenters suggested that the standardized calculations would not be flexible enough to evolve over time as the auditing environment changes. Relatedly, one commenter suggested that the PCAOB revisit in the future the appropriate calculations. One commenter said the proposed metrics would be meaningless without sufficient context. By contrast, one commenter said that investors are aware that the metrics will not be perfectly comparable and that they are trained to analyze this type of information.

The Board agrees that context could be important to understanding any individual metrics. As discussed above in this subsection, the Board believes that no set of metrics, individually or collectively, can completely measure audit quality. Accordingly, the Board has provided auditors the opportunity to disclose additional context for each metric. The Board acknowledges that firm size, issuer size, and industry could be important context when interpreting a metric. However, the Board notes that this information about issuers is already available to the public, and the Board believes that stakeholders will be better served by a rule that permits them to consider this information alongside the metrics as they see fit rather than by prescribing how they should be accounted for. The Board also notes that, under the final rules, firms will be free to provide additional information

voluntarily to their stakeholders (e.g. through audit quality or firm transparency reporting) that they believe better captures the changing environment. The Board recognizes that the standardized calculations will not explicitly account for all relevant facts and circumstances for each firm.

However, notwithstanding the potential importance of context for understanding any individual metric, the comparability of information about firms and their engagements will be improved overall compared to the current largely voluntary state by mandating specific metrics and calculations. The Board discussed a potential post-implementation review (PIR) below.

Economic Impacts

This section discusses the expected benefits, costs, and potential unintended consequences of the final rules. The magnitudes of the benefits and costs are likely to be affected by the degree to which firms have already voluntarily adopted disclosure practices that are similar to those required under the final rules or produce similar metrics for non-public purposes. As discussed above, as of the 2018 and 2019 inspection years, the U.S. GNFs already track some metrics like those being adopted. Though their practices may have evolved since then, the Board believes they will need to gather additional information or adjust their calculations. The magnitude of the impacts may also vary by stakeholder depending on how useful the metrics are for the decisions they face. Stakeholders who find the final metrics more useful will be more likely to incur the costs and benefits of integrating the final metrics into their decision-making. The Board believes the final rules will have a greater impact on smaller firms which likely have less developed practices in this area.

Several commenters suggested that the PCAOB should consider the cumulative effects of the reporting requirements in this rulemaking along with other rules and standards that have recently been proposed or adopted. One commenter reported results of a survey of audit committee member respondents in which 76 percent of 145 respondents indicated concern about the cumulative impact of PCAOB standard-setting and rulemaking on audit quality and 24 percent indicated no concern.²⁷⁸ Consistent with long-standing practice and the PCAOB's staff guidance on economic analysis, the Board's economic analysis for each rulemaking

²⁷⁸ The survey is discussed in greater detail above.

considers the incremental benefit and costs for the specific rule—*i.e.*, the benefits and costs stemming from that rule compared with the baseline.²⁷⁹ There could be implementation activities for certain provisions of other rules and standards that overlap in time with implementation of the final rules, which may impose costs on resource constrained firms affected by multiple rules. This may be particularly true for smaller and mid-sized firms with more limited resources. In determining effective dates and implementation periods, the Board considered the benefits of rules as well as the costs of delayed implementation periods and potential overlapping implementation periods. The Board also considered that in some cases, overlapping implementation periods may have benefits because firms will not need to revise or redo previous process or system changes where rules interact with each other. For example, firms could benefit in this regard by implementing the final rules while also implementing QC 1000 and, if approved by the SEC, the PCAOB's Firm Reporting rules because all three rulemakings address external reporting.

Several investor group commenters stated they believe the benefits of the proposal would exceed the costs. In contrast, other commenters stated they believe the costs of the proposed metrics will not be proportionate to the benefits. One commenter said there was a lack of academic evidence about whether the benefits exceed the costs. One reason that academic evidence related directly to whether the benefits of the proposal exceed the costs is limited is likely that, for the reasons discussed above, the necessary data do not exist. However, the economic analysis incorporates where appropriate academic evidence related to certain impacts of the proposal. Furthermore, as described above, the Board has quantified certain impacts to the extent feasible. One commenter suggested that a more complete economic analysis of the proposal would reveal that the costs exceed the potential benefits. The commenter did not indicate a data source or methodology that would allow for a quantitative analysis of all benefits and costs. The commenter also did not indicate how they know what the results of such an analysis would be. One commenter suggested that the PCAOB expand the proposal to consider

whether the benefits outweigh the costs. Another commenter said that they saw no indication that the Board had addressed whether investors and other stakeholders would place greater weight on the asserted benefits against increased audit fees. The economic analysis separately analyzes benefits and costs, and as stated above, the Board is not able to quantify all relevant benefits and costs due to data limitations. However, the Board notes that one commenter representing an investor-related group said that investors recognize they ultimately bear the cost of creating such information and metrics and are generally willing to pay for information and metrics.

1. Benefits

As discussed above, the final metrics could enhance (i) audit committees' ability to efficiently and effectively monitor and select auditors as well as (ii) investors' ability to efficiently and effectively make decisions about ratifying the appointment of their auditors and allocating capital. Moreover, there will likely be improvements to the PCAOB's oversight programs (*i.e.*, selection of firms, engagements, and focus areas for review), as well as to policy research. As an important indirect benefit, the final rules could further spur competition to the benefit of investors. Thus, while the metrics do not represent a comprehensive measure of audit quality, stakeholders may use the metrics in ways that could improve audit quality.²⁸⁰ Several investor-related groups generally agreed with these benefits. One commenter said that reporting of proposed metrics would improve audit quality across the profession.

Auditors have a responsibility to obtain reasonable assurance about whether the financial statements are free of material misstatement. If use of the metrics leads to higher audit quality, it could increase the likelihood that the auditor will discover a material misstatement or will qualify its audit opinion when a material misstatement exists and is not corrected by management.

²⁸⁰ While some of the most important elements of high-quality audit, such as the application of due care and professional skepticism, cannot be fully measured or quantified, the final metrics provide proxies for certain aspects of audit quality, such as years of experience, auditor workload, and the percentage of audit hours attributable to senior members of the audit team. These proxies, while not a complete measure of audit quality, offer important information about auditors and the engagements they lead, which stakeholders can use to inform their decisions.

The SEC does not consider the requirements for audited or certified financial statements in Rule 2–02(b) of Regulation S–X to be met when the auditor's report is qualified. Furthermore, a qualified audit opinion may evoke negative market reactions. For these reasons, higher audit quality could incentivize issuers to take steps to ensure their financial statements are free of material misstatement. Issuers could take these steps proactively, prior to the audit, or in response to adjustments requested by the auditor. Financial statements that are free of material misstatement are of higher quality and more useful to investors.²⁸¹ An investor-related group said that investors demand high-quality audits because reliable audited financial statement are critical to investors in making informed decisions.

In the following discussion, the Board discussed the direct benefits related to enhancing the information available to investors, audit committees, and other stakeholders and follow up with a discussion of the potential indirect benefits. The Board then reviews the extant literature related to the final metrics and examine how each final metric could contribute to achieving the final rules' intended benefits.

i. Direct Benefits to Investors, Audit Committees, and the PCAOB

The direct benefits of the final rules relate to (i) improved investor and audit committee monitoring, (ii) improved

²⁸¹ The Board notes several caveats. First, some theoretical research finds that changes to auditing standards can have counterintuitive effects on audit quality. For example, some research finds that increased precision in auditing standards can reduce audit quality. See Marleen Willekens and Dan A. Simunic, *Precision in Auditing Standards: Effects on Auditor and Director Liability and the Supply and Demand for Audit Services*, 37 Accounting and Business Research 217 (2007). Other research finds that setting a higher minimum bar can reduce audit quality. See Pingyang Gao and Gaoqing Zhang, *Auditing Standards, Professional Judgment, and Audit Quality*, 94 The Accounting Review 201 (2019). The Board acknowledges that these studies examine the impacts of audit performance standards. By contrast, the Board adopted a disclosure standard. This may limit the relevance of these studies to the final rules. The Board is also unaware of empirical evidence that directly tests these theories. Second, the conclusion that financial statements that are free of material misstatement are more useful to investors hinges on the assumption that investors value compliance with the applicable financial reporting framework (*e.g.*, U.S. GAAP). The various market reactions to restatements that have been documented in academic literature suggests that this is the case. Third, the conclusion that improved audit quality would improve financial reporting quality assumes that issuers would not switch to sufficiently lower quality auditors in sufficient number as a result of the final rules. Finally, one commenter said, and the Board agrees, that the proposed metrics cannot be viewed as the only proxy for measuring financial reporting quality.

²⁷⁹ See Staff Guidance on Economic Analysis in PCAOB Standard-Setting (Feb. 14, 2024) ("Staff Guidance on Economic Analysis"), available at https://pcaobus.org/oversight/standards/economic-analysis/05152014_guidance.

auditor selection, and (iii) improved PCAOB oversight and scholarly auditing research. The Board believes these benefits will arise because the final metrics will significantly augment the information set available to stakeholders and thereby enhance their decision-making.

Each of the final metrics and how they would enhance decision-making is discussed in detail above. To summarize, the final metrics relate broadly to audit personnel, allocation of audit hours, and audit outcomes. The final metrics related to audit personnel will provide information on the audit team's involvement and workload (*i.e.*, Partner and Manager Involvement, and Workload), turnover (*i.e.*, Retention of Audit Personnel), experience (*i.e.*, Experience of Audit Personnel), industry specialization (*i.e.*, Industry Experience), and training (*i.e.*, Training Hours for Audit Personnel). The final metrics related to the allocation of audit hours will provide information on the allocation of audit hours prior to the issuer's year end (*i.e.*, Allocation of Audit Hours). The final metrics related to outcomes will provide information on restatement trends (*i.e.*, Restatement History).

These metrics could enhance decision-making by helping stakeholders assess whether auditors are appropriately staffing their engagements, budgeting their time, and achieving desirable outcomes. As the following examples illustrate, stakeholders will likely make these judgments based primarily on their experience and by comparison to similar firms or engagements and in conjunction with other information available to them (*e.g.*, the other metrics, issuer's unique facts and circumstances, or research).²⁸² These examples are meant as illustrations only; investors and audit committee members may interpret the final metrics differently depending on specific circumstances.

- An investor may observe that one issuer's auditor has more industry experience than a comparable issuer's auditor. Depending on the magnitude of the difference and other information available to the investor, the investor may take this as a sign regarding the relative reliability of the audit and, consequently, the issuer's financial statements. This could influence the investor's voting or capital allocation decisions.

- An audit committee member may observe that an engagement's partners

and managers were more involved than the audit committee member expected based on their experience. While the audit committee member may believe partner and manager involvement is, as a general matter, a sign of good quality control, the audit committee member may, depending on the facts and circumstances, suspect there was a problem that required the partner's attention. As a result, the audit committee member may request additional information from the auditor.

- An investor may observe that the auditor's retention metric is a low outlier compared to prior years. This may lead the investor to question the auditor's ability to gather sufficient appropriate audit evidence and, depending on other information available, may inform the investor's vote on ratification of the auditor or re-election of audit committee members to the board of directors.

- An audit committee member may observe that the auditor's allocation of audit hours prior to the year's end indicates, based on academic research, an elevated risk of audit deficiency and restatement. As a result, the audit committee member may work with the auditor to find ways to improve the planning of a future audit.

The Board notes that the benefits of mandatory disclosure are well-studied and have been measured in other markets such as credit ratings, health care, and financial reporting.²⁸³

²⁸³ For example, in the context of credit ratings, research has found that the introduction of additional credit ratings information into the market leads relatively higher quality borrowers to obtain lower borrowing costs by 20 basis points. See Tony Tang, *Information Asymmetry and Firms' Credit Market Access: Evidence from Moody's Credit Rating Format Refinement*, 92 *Journal of Financial Economics* 325 (2009). The Board notes that the relevance of this finding is limited by the fact that the studied disclosure relates to the quantity of information provided by the credit rating agency rather than the quality of service provided by the credit ratings agency. In the context of nursing home care, one study finds that mandatory disclosure of quality indices leads to improvement in two of the five indices. See Dana B. Mukamel, David L. Weimer, William D. Spector, Heather Ladd, and Jacqueline S. Zinn, *Publication of Quality Report Cards and Trends in Reported Quality Measures in Nursing Homes*, 43 *Health Services Research* 1244 (2008). For a discussion of potential benefits of mandatory financial reporting quality as well as potential unintended consequences, see Christian Leuz and Peter D. Wysocki, *The Economics of Disclosure and Financial Reporting Regulation: Evidence and Suggestions for Future Research*, 54 *Journal of Accounting Research* 525 (2016) and cites therein. However, some research also finds that mandatory disclosure can have little effect. For example, in the context of HMOs, one study finds that, following the introduction of public disclosure of six quality scores, only one—customer satisfaction—subsequently drove HMO market share and the effect was most pronounced in markets where true quality varied the most. See Leemore Dafny and

Likewise, the benefits of comparable information have been observed in financial reporting.²⁸⁴ There are important similarities between the markets for credit ratings, health care, and financial reporting and the audit market. For example, credit ratings services, like audit services, are opaque and operate under an "issuer-pays" business model. Therefore, the impacts of disclosure observed in those markets provide some indication of the potential impacts the final rules could have on the audit market. However, there are also significant differences. For example, the quality of health care services may, in some cases, be more visible than the quality of audit services. These differences limit the relevance of these studies. The disclosures studied in these markets may also not be directly comparable to the final metrics and therefore are less relevant.

The Board also notes that the benefits of prior PCAOB disclosure rules vary by rule and analysis.²⁸⁵ Citing academic research, one commenter said studies show that, while the information contained in Form AP may improve the perception of auditors and financial reporting, Form AP is not influencing investors' decision-making. Referring to research discussed above and in the

David Dranove, *Do Report Cards Tell Consumers Anything They Don't Already Know? The Case of Medicare HMOs*, 39 *The Rand Journal of Economics* 790 (2008).

²⁸⁴ See, *e.g.*, Mark L. DeFond, Xuesong Hu, Mingyu Hung, and Siqi Li, *The Impact of Mandatory IFRS Adoption on Foreign Mutual Fund Ownership: The Role of Comparability*, 51 *Journal of Accounting and Economics* 240, 241 (2011) (finding that greater financial reporting comparability leads to greater investment); Luigi Zingales, *The Future of Securities Regulation*, 47 *Journal of Accounting Research* 395 (2009) (concluding that a more subtle benefit of disclosure regulation is the standardization it entails); and Bingyi Chen, Ahmet C. Kurt, and Irene Gunnan Wang, *Accounting Comparability and the Value Relevance of Earnings and Book Value*, 31 *Journal of Corporate Accounting & Finance* 82 (2020) (finding that "accounting comparability increases the value relevance of earnings, but not book value").

²⁸⁵ See, *e.g.*, Michael J. Gurbutt and Wei-Kang Shih, *Staff White Paper: Econometric Analysis on the Initial Implementation of CAM Requirements*, Public Company Accounting Oversight Board 4 (2020) (discussing how PCAOB staff did not find "systematic evidence that investors respond to the information contents in CAMs" but nevertheless did find that "some investors are reading CAMs and find the information beneficial."); Kose John and Min Liu, *Does the Disclosure of an Audit Engagement Partner's Name Improve the Audit Quality? A Difference-in-difference Analysis*, 14 *Journal of Risk and Financial Management* 1 (2021) (suggesting that there was an increase in audit quality and audits costs as a result of PCAOB Rule 3211); and Cunningham, et al., *What's in a Name?* (finding evidence that any immediate impact of PCAOB Rule 3211 on audit quality or audit fees is limited to specific dimensions of audit quality, specific control groups, and/or specific company characteristics).

²⁸² Academic literature on how various proxies for the final metrics relate to various proxies for audit quality is summarized below.

proposal, the commenter also said that CAMs are not driving decision-making by investors.²⁸⁶ By contrast, a recent survey finds that institutional investors generally rely on CAMs when making investment decisions and read the CAMs section in the Form 10-K.²⁸⁷ Approximately half said that additional information would be even more beneficial. There are important similarities between these disclosure rules and the final rules. For example, CAM reporting and Form AP reporting requirements were significant changes in auditor reporting and the final engagement-level disclosures will be reported on Form AP. Therefore, the results of these studies provide some indication of how the final metrics could impact the audit market. However, there are also significant differences between prior PCAOB disclosure rules and the final rules. For example, the final rules will likely require firms to gather more engagement-level information than CAM and Form AP reporting requirements do. These differences limit the relevance of these studies.

One commenter suggested that the benefits of the proposed metrics would be limited by the fact that they are focused on the past and therefore may have limited value predicting future performance. The Board recognizes that the metrics will be computed using historic data and the Board believes this is a natural limit. The Board also disagrees with the premise that historic information, by definition, cannot have value predicting future performance. Historical metrics can inform future-oriented decisions by increasing the reliability of the data investors and audit committees use to form their expectations.

One commenter suggested that benefits would only accrue to data aggregators, the plaintiff's bar, and academics and not to investors. The Board agrees that data aggregators may aggregate and resell the information. However, the Board notes that the existence of such a market would be evidence that there is a market demand

for the final metrics. Data aggregators may also allow retail investors to benefit more from the final metrics by making them even more accessible. Similarly, to the extent there is future reliance on the metrics by academics and plaintiffs' lawyers, it would serve as evidence of their information value and, by extension, their relevance to investors. Pointing to pages 135 and 168 of the proposal, the same commenter stated that the proposal acknowledged that the required metrics are not likely to be decision-useful to retail investors. In fact, the proposal states on page 135 that "[r]esearch also indicates that retail investors may not necessarily use information regarding an audit firm in their decisions to vote on a proposal to ratify the appointment of the firm." The proposal states at p. 168 that "[d]ue to economies of scale, the Board believes institutional investors would be more likely to incur these costs than retail investors." To be clear, the Board believes that institutional investors are more likely to use the final metrics than retail investors.

One commenter suggested that all the metrics must help retail investors make informed decisions. The Board considered the benefits and costs to all stakeholders, not just retail investors. As such, the Board does not believe that a metric should be excluded on the basis that it may not help retail investors make informed decisions because doing so could deprive other stakeholders of useful information. Subject to this caveat, the Board believes some retail investors will use the metrics, albeit likely less so than institutional investors. Furthermore, as discussed in above, the Board believes more passive retail investors may indirectly benefit from the improved decision-making of more active institutional investors.

a. Improved Monitoring

The final rules will increase the set of information available to audit committees and investors regarding their auditor. This should improve both investors' and audit committees' ability to monitor their auditors.²⁸⁸ For example, an audit committee could engage in more meaningful discussions with their auditor regarding the

auditor's performance.²⁸⁹ In response to improved monitoring, auditors may improve audit efficiency as well as audit outcomes as they become more responsive to investors' and audit committees' audit service needs.²⁹⁰ The final rules could also reduce costs related to information gathering that are incurred by investors and audit committees when monitoring their auditor. Some of the cost reductions could reflect reductions in duplicative work to the extent that various investors or audit committees collect the same information.

One commenter suggested that the PCAOB should not focus on over-auditing or audit inefficiencies. Another commenter was concerned by the suggestion that investors should be expected to ratify auditor selection or make decisions related to capital allocation on the basis of auditor efficiency (e.g., by reviewing auditors' allocation of time or resources). Consistent with the PCAOB's staff guidance on economic analysis, the Board considered the most likely impacts. As discussed in the proposal, the Board believes that some reduction in over-auditing or some improvement in auditing efficiency could result from

²⁸⁹ One study reviewed the comment letters to the Concept Release and found that audit firms agreed with the notion that audit committees may benefit from enhanced dialog between the auditor and the audit committee. See Kathleen M. Harris, and L. Tyler Williams, *Audit Quality Indicators: Perspectives from Non-Big Four Audit Firms and Small Company Audit Committees*, 50 *Advances in Accounting* 1 (2020).

²⁹⁰ See, e.g., Bengt Holmström, *Moral Hazard and Observability*, *The Bell Journal of Economics* 74 (1979) (finding that efficiency improves when contractible information about an agent's performance is available to the agent's principal) and Mai Dao, K. Raghunandan, and Dasaratha V. Rama, *Shareholder Voting on Auditor Selection, Audit Fees, and Audit Quality*, 87 *The Accounting Review* 168 (2012) (finding evidence that shareholder involvement in firm selection is associated with higher audit fees and improved audit quality). Some research suggests that audit committees with financial expertise are more effective monitors (i.e., financial reporting quality improves). To the extent that providing additional information to audit committees is analogous to increasing their expertise, this suggests that the final rules could lead to more effective audit committee monitoring. See Dina El Mahdy, Jia Hao, and Yu Cong, *Audit Committee Financial Expertise and Information Asymmetry*, *Journal of Financial Reporting and Accounting* (2022). In principle, improved monitoring could lead to a reduction in the overall quality of audit services. For example, some issuers may seek lower audit fees at the expense of audit quality. As the final disclosures will be public, the Board believes, in most cases, this would be less likely. See Section below for additional discussion. Some issuers may have very strong financial reporting quality independent of their auditor (e.g., they have a lender with strong oversight). In these cases, the most suitable auditor may not necessarily be the "highest quality" auditor and over-auditing may be more of a concern than under-auditing.

²⁸⁶ See Doxey, et al., *Do Investors Care; Candice T. Hux, How Does Disclosure of Component Auditor Use Affect Nonprofessional Investors' Perceptions and Behavior?*, 40 *Auditing: A Journal of Practice & Theory* 35 (2021); Gurbutt and Shih, *Econometric Analysis on the Initial Implementation of CAM Requirements*; Jenna J. Burke, Rani Hoitash, Udi Hoitash, and Summer Xiao, *The Disclosure and Consequences of US Critical Audit Matters*, 98 *The Accounting Review* 59 (2023). Referring to a U.K. auditor disclosure requirement similar to CAMs, another commenter said that the extent and quality of dialogue between investors and audit committees was not as expected.

²⁸⁷ See Center for Audit Quality, *Critical Audit Matters Survey* (July 2024).

²⁸⁸ For a discussion of the same principle, but in the context of issuer financial reporting, see, e.g., Leuz and Wysocki, *The Economics of Disclosure and Financial Reporting Regulation* (explaining that the disclosure of operating performance and governance arrangements by public companies can lower the cost of monitoring by providing investors with useful benchmarks that help investors evaluate other companies' managerial efficiency or potential agency conflicts).

the final rules. However, the Board does not believe they will be central benefits and the Board has emphasized other benefits accordingly.

Two caveats could limit the extent to which improved investor and audit committee monitoring and reduced monitoring costs will lead to improved audit performance. First, the Board notes that improvements in audit performance will be limited by the fact that audit committees are able to request information like the final metrics from their auditor. Indeed, one survey of audit committee members from smaller public companies, including audit committee members of accelerated filers, reports that most of the survey participants believed there were no “gaps” in the information they were receiving from their audit firms.²⁹¹ Furthermore, at the September 2024 IAG meeting, one audit committee chair said that he has unfettered access to his auditor, has requested information related to industry expertise from his auditor in the past, and has never been denied access to information requested. As discussed above, one commenter provided a survey suggesting that most audit committees believe the current information environment is sufficient. However, the Board believes that, by making these disclosures mandatory and standardized across firms and engagements, the final rules will increase the accessibility, reliability, and comparability of information about auditors and their engagements. For example, audit committees will be better able to compare their auditors to peers. Moreover, at the September 2024 IAG meeting one audit committee chair described how their auditor can be reluctant to provide information deemed confidential by the auditor. Second, the benefit of improved monitoring of auditors could also vary depending on the abilities of the audit committee. As one IAG member said, audit committee members that do not have a background in accounting may not know what questions to ask their auditor. For example, more proactive audit committees with greater financial or audit expertise may be able to make better use of the final metrics than other audit committees. However, under the final rules, investors considering votes for election to the board of audit committee members could consider whether they expect candidates to be able to effectively use the final metrics when executing their oversight responsibilities.

In addition to helping investors monitor the auditor’s performance, the final metrics may assist investors in monitoring and evaluating the performance of the audit committee. For example, investors could observe audit committee performance and express any potential concerns through open dialogues with the board of directors or election of board and audit committee members. The audit committee is responsible for overseeing the auditor and the final metrics may assist investors in determining whether the audit committee was effective in this capacity (e.g., whether the audit committee continues to delay replacing the auditor despite the presence of metrics that suggest potential concerns about audit performance).²⁹² This improved monitoring could improve audit committee effectiveness (e.g., more effective monitoring of the auditors, better selection of auditors, etc.)²⁹³

One commenter supported the view that the metrics will help investors hold audit committees accountable. However, another commenter suggested that audit

committees that currently execute their statutory mandate with an insufficient level of interest and attention will continue to do so despite the availability of the final metrics. Another commenter suggested that metrics were an inappropriate way for investors to oversee audit committees and would override the gatekeeping function of audit committees. The Board acknowledges that the final rules’ impact may vary by audit committee. However, for the reasons discussed above, the Board believes that the final rules will, on average, lead to a valuable improvement in investors’ ability to monitor audit committees and, by extension, audit committee performance. The Board does not believe the final rules will supplant audit committees’ gatekeeper function. Rather, audit committees will continue to play a critical corporate governance function. Indeed, by enabling investors to better monitor and evaluate audit committees, the Board believes the final metrics will enhance the audit committee’s role and reinforce its effectiveness in overseeing auditors.

One commenter suggested that interaction between investors and directors is unlikely and directed us to industry research suggesting that engagement between directors of large issuers and their investors is decreasing.²⁹⁴ The Board acknowledges that direct interaction may occur more for institutional investors. However, the Board notes that the survey cited by the commenter notes that the decline between 2022 and 2023 was “slight” overall but larger for the largest companies (75% to 58%). The cited survey also says that “directors are regularly engaging with shareholders and the vast majority consider those interactions ‘productive.’” Moreover, as discussed in greater detail above, the Board notes that many public companies have robust investor outreach programs, some of which target retail investors. Academic research on the frequency of shareholder outreach programs shows they are increasing over time.²⁹⁵ Therefore, the Board believes there is no strong evidence supporting the comment that director engagement with shareholders is unlikely to occur.

Mandatory disclosure of the final metrics could also improve audit firms’ internal monitoring of their (i) audit

²⁹² See above for a discussion on how the final metrics could assist decision-making.

²⁹³ Some academic research suggests that audit committee effectiveness is associated with audit committee incentives. See, e.g., Jeffrey Cohen, Ganesh Krishnamoorthy, and Arnold M. Wright, *The Corporate Governance Mosaic and Financial Reporting Quality*, 23 *Journal of Accounting Literature* 87 (2004) and cites therein. Some research suggests that investors are willing to pay for audit committee effectiveness and hold audit committees accountable for negative audit quality. See, e.g., Ellen Engel, Rachel M. Hayes, and Xue Wang, *Audit Committee Compensation and the Demand for Monitoring of the Financial Reporting Process*, 49 *Journal of Accounting and Economics* 136, 138 (2010) (suggesting a willingness by companies to deviate from the historically prevalent one-size-fits-all approach to director pay in response to increased demands on audit committees and differential director expertise) and Suraj Srinivasan, *Consequences of Financial Reporting Failure for Outside Directors: Evidence from Accounting Restatements and Audit Committee Members*, 43 *Journal of Accounting Research* 291 (2005) (concluding that audit committee members bear reputational costs for financial reporting failure). Some research suggests that audit committee members without Big 4 audit experience are more likely to favor auditors that are rated as “attractive.” See, e.g., Baugh, Matthew, Nicholas J. Hallman, and Steven J. Kachelmeier, *A Matter of Appearances: How Does Auditing Expertise Benefit Audit Committees When Selecting Auditors?*, 39 *Contemporary Accounting Research* 234 (2022). Together, this research suggests that audit committee effectiveness could respond to improved investor monitoring. Other research suggests that audit committee effectiveness is positively associated with proxies for audit quality. See, e.g., Brian Bratten, Monika Causholli, and Valbona Sulcaj, *Overseeing the External Audit Function: Evidence from Audit Committees’ Reported Activities*, 41 *Auditing: A Journal of Practice & Theory* 1 (2022) (finding that the strength of audit committee oversight, as implied by audit committee disclosures, is positively associated with proxies for audit quality).

²⁹⁴ See PriceWaterhouseCoopers, *2023 Annual Corporate Directors Survey*.

²⁹⁵ See Dey et al., *Proxy Advisory Firms and Corporate Shareholder Engagement*, Figure 2 (showing a monotonic increase in the proportion of sampled firms reporting shareholder engagement in their proxy statement from 5.5% in 2011 to 36.3% in 2019.)

²⁹¹ See Harris and Williams, *Audit Quality Indicators* Table 6.

practices and related system of quality control, and (ii) individual engagements. This could improve governance, accountability, and overall quality control within the audit firm. The final metrics may also help auditors identify efficiencies or room for improvement in their audit approach by comparing their final metrics to their competitors. One commenter noted that the proposal recognized that firms may not find the certain metrics useful in monitoring their quality control systems. While the Board continues to believe that the final metrics could improve audit firms' internal monitoring, the Board acknowledges that some firms, due to their unique facts and circumstances, may find some metrics less useful than others.

b. Improved Selection

The final rules may also enhance auditor selection to the extent that the rules improve the ability of investors and audit committees to compare their current auditor to an alternative auditor.²⁹⁶ When considering an alternative auditor, audit committees may find the auditor's engagement-level metrics for similar engagements (e.g., an issuer of similar size and/or within the same industry to the audit committee's issuer) most useful. As discussed above, investors and audit committees could electronically search for firm-level metrics and download engagement-level metrics when constructing rosters of candidate auditors. Moreover, audit committees will benefit to the extent that they are able to engage in more meaningful discussions and interviews with candidate auditors during the selection process—improving the efficiency of auditor-issuer matching.²⁹⁷ For example, the final metrics (e.g., Industry Experience and Workload) could help audit committees select an auditor that has the capacity to perform the audit.²⁹⁸ Requiring mandatory,

comparable, and uniform disclosure of the final metrics—across engagement teams and audit firms, and over time—should further enhance this benefit by helping audit committees to compare auditors on a common basis.²⁹⁹ The final rules may also improve investors' decision-making regarding auditor ratification and appointment of board members.³⁰⁰ For instance, investors may decide that a particular final metric is especially important to their views on the auditor's efficacy and the quality of the financial statements.³⁰¹ Investors that rely on proxy advisors for these decisions may also benefit from the final disclosures because proxy advisors could use the information in their recommendations.

Improved auditor selection could improve audit efficiency as well as audit outcomes as incoming auditors may be better equipped to meet investors' and audit committees' audit service needs.³⁰² The final rules could also reduce costs related to information gathering incurred by audit committees when selecting their auditor and by investors when voting to ratify the appointment of the auditor.³⁰³ Some of the cost reductions could reflect reductions in duplicative work to the extent that various investors or audit committees collect the same information. Improved investor decision-making regarding voting for members of the board of directors, including directors who serve on the

audit committee, could improve audit committee performance as incoming board members may be better equipped to meet investors' expectations regarding auditor oversight. One commenter said that the proposed metrics have the capacity to make investors' vote on ratification of the auditor and the vote on audit committee members substantially more meaningful.

Two caveats could limit the potential benefit of improved auditor selection and the reduction in the associated information gathering costs. First, the Board notes that the impact will be limited by the fact that audit committees could in principle request information like the final metrics from alternative auditors. However, auditors may not be willing to voluntarily provide an audit committee with engagement-level metrics regarding their engagements with other issuers, information that may be particularly useful to audit committees in selecting an auditor. Furthermore, while audit committees can currently request tailored metrics, this approach imposes substantial collective costs and limits comparability across firms. The Board believes that, by making these disclosures mandatory and standardized, the final rules will increase the accessibility, reliability, and comparability of information available and therefore help audit committees. Second, the Board notes that, to the extent that benefits are derived from the ability to readily switch between auditors based on an evaluation of the auditors' metrics, those benefits could be limited due to stickiness in existing auditor-audited company relationships which creates switching costs. Furthermore, large multinational issuers may, as a practical matter, need a GNF auditor, which limits the pool of available alternatives—which may be in turn further limited by auditor geographic/industry specialization (e.g., a need for financial services expertise in a particular office/city), or by auditor independence rules (e.g., the existence of an independence-impairing financial or consulting relationship between the issuer and a potential alternative auditor).³⁰⁴ Therefore, the benefit of improved auditor selection could be more limited for the largest issuers. However, the Board believes that the final metrics could also help the audit committees of the largest issuers select

Auditing: A Journal of Practice & Theory 119 (2013).

²⁹⁹ See above for discussion of academic literature related to the benefits of comparability in financial reporting.

³⁰⁰ Some research suggests that more informed shareholders make better audit ratification decisions (e.g., auditor ratification decisions are more closely associated with public signals of audit failure). See, e.g., Cassell, et al., *Retail Shareholders* and cites therein.

³⁰¹ Some experimental research suggests that investors are less likely to support auditor ratification if metrics like those discussed in the Concept Release are trending downward. See, e.g., Brown and Popova, *How do Investors Respond*.

³⁰² In principle, improved auditor selection could lead to a reduction in the overall quality of audit services. For example, some issuers may seek lower audit fees at the expense of audit quality. Due to the fact that the final disclosures will be public, the Board believes, in most cases, this would be less likely. See below for additional discussion. Some issuers may have very strong financial reporting quality independent of their auditor (e.g., they have a lender with strong oversight). In these cases, the most suitable auditor may not necessarily be the "highest quality."

³⁰³ Although investor voting on auditor ratification is non-binding, it could be a meaningful mechanism for expressing views on audit-related issues. If investors are dissatisfied with auditor selection, they can also vote against the re-election of board members, including those who serve on the audit committee, to potentially influence future auditor oversight.

²⁹⁶ One recent experimental study finds that participants playing the role of CFO, director, or individual investors strongly prefer auditors that have stronger metrics and are willing to pay more for those auditors. See Dennis Ahn, Radhika Lunawat, and Patricia Wellmeyer, *Firm and Engagement Performance Metrics and Auditor Contracting Decisions*, SSRN Electronic Journal, at Table 1 and Table 2 (2024). The Board notes that SSRN does not peer review its submissions.

²⁹⁷ See, e.g., Gene M. Grossman and Carl Shapiro, *Informative Advertising with Differentiated Products*, 51 The Review of Economic Studies 63 (1984) (finding that reduced information frictions (i.e., decreased informational advertising costs) could result in improved matching between sellers and buyers).

²⁹⁸ Some academic research finds that audit committees do select auditors based on observable aspects of the quality of their services. See, e.g., Vivek Mande and Myungsoo Son, *Do Financial Restatements Lead to Auditor Changes?*, 32

³⁰⁴ See United States Government Accountability Office, *Continued Concentration in Audit Market for Large Public Companies Does Not Call for Immediate Action* 21 (Jan. 8, 2008).

specific engagement partners within the larger audit firms.

c. Benefits to the PCAOB's Inspection and Enforcement Programs and Scholarly Auditing Research

The final metrics are expected to provide direct benefits to the PCAOB's internal operating effectiveness. In the PCAOB's oversight capacity, it engages in inspection and enforcement activities for audits of issuers and, in the course of doing so, it uses data from issuers and audit firms. The final metrics will expand the basis on which selections may be made. For example, the final metrics could improve the selection models used to aid in predicting negative audit outcomes, such as restatements or the potential for audit deficiencies. As discussed above, QC 1000 will help to ensure that the final metrics will be reliable. Greater insight into audit risks could improve the PCAOB's ability to select potential enforcement matters. Overall, improved PCAOB oversight may give auditors additional incentive to comply with PCAOB professional standards and rules.³⁰⁵

Moreover, the PCAOB actively engages in policy research related to the market for assurance services to further the PCAOB's mission by informing the standard-setting and rulemaking agendas among other purposes. The additional data provided by the final rules could enhance the PCAOB's ability to produce impactful research and recirculate that gained knowledge into improved standards and rules. Relatedly, the additional data could also provide valuable information sources for the public, including academic research. Commenters agreed that academics could benefit from the metrics. Improved research quality is an important element of the PCAOB's standard-setting and rulemaking projects.

One commenter said it was unclear how the PCAOB would use the information. As described in the proposal and above, the Board expects that the metrics will at least inform the PCAOB selection of engagements and focus areas for review and future academic research that utilizes the metrics could inform PCAOB rulemaking projects. Several

commenters agreed that the information would be useful to the PCAOB.

One commenter suggested that the PCAOB should be able to articulate which of the final metrics provide critical insights for effective monitoring by inspection teams using information obtained through PCAOB inspections. The PCAOB uses information like the final metric in various ways as part of its inspections approach. However, the Board believes the final metrics will on the whole provide additional value because they will be more comparable across firms, engagements, and time and the engagement-level metrics will be available to PCAOB staff at an earlier point in time than engagement-specific information provided pursuant to the review of an engagement. The same commenter said that public disclosure of the proposed metrics would not be necessary for the PCAOB to benefit from them. The Board agrees that some of the benefits to the PCAOB do not derive specifically from the public nature of the reporting. However, the PCAOB expects that it will benefit from academic research that the Board believes will be conducted using the publicly reported final metrics and broader stakeholder engagement. Public availability of the final metrics could also improve the quality of other stakeholder input received by the PCAOB (e.g., public comment or roundtable discussions).

One commenter suggested that reliance on the metrics by PCAOB oversight could create a risk of enforcement for minor, unintentional errors in reporting. The commenter said this risk could manifest as a cost to smaller and mid-sized firms. The Board believes the commenter may have misinterpreted the benefit to PCAOB oversight as a suggestion that the PCAOB intends to make reporting of the final metrics an inspection focus area. While PCAOB inspectors may do so in the future, the Board is not suggesting this will benefit PCAOB oversight per se. Rather, the Board are suggesting that the final metrics themselves may help PCAOB inspections staff select firms, engagements, or focus areas for review. However, the Board acknowledges that, by relying on the final metrics, potential deficiencies in how firms are reporting them may become apparent to PCAOB staff. To the extent PCAOB oversight does consider firms' compliance with the final rules, the Board believes the PCAOB would exercise appropriate discretion.

Overall, the benefit to the PCAOB is difficult to quantify, as the social and economic benefits of enhanced regulatory oversight that is more

efficient in its allocation of resources are difficult to monetize. The benefits of additional scholarly research are also difficult to quantify because there are a broad set of beneficiaries.

ii. Indirect Benefits Linked to Competition

Capital Market Effects

Assuming that the additional information, context, and perspective on auditors and audit engagements helps investors assess audit performance, it may help investors assess financial reporting quality.³⁰⁶ For example, investors may incorporate the metrics into their portfolio selection decisions.³⁰⁷ One commenter said that the final metrics were necessary for auditors to have their work judged as something other than a commodity (i.e., competition on price alone).

Issuers audited by auditors whose metrics capital markets associate with greater financial reporting quality may experience reduced cost of capital or other capital market benefits and investors may reallocate their capital accordingly. Taken in isolation, this would tend to result in a reallocation of capital from issuers with less reliable financial reporting quality to issuers with higher financial reporting quality. These capital market reactions could provide audit committees with a stronger incentive to appoint an auditor whose final metrics capital markets associate with greater financial reporting quality. These effects could lead to changes in audit fees as auditors respond to changing demand for their services. Facing capacity constraints, some audit firms may turn down engagements or recruit additional staff to expand capacity.

Auditor Competition

Against the backdrop of capital market reactions to the final metrics and as auditors become better able to

³⁰⁶ The IAG indicated in their comment letter regarding proposed QC 1000 that information related to audit quality would provide investors with "a level of confidence in the financial statements of companies in which they invest. Their level of confidence in the financial statements has a bearing on the prices they will be willing to pay or demand for investments." The comment letters received in response to proposed QC 1000 are available on the Board's website in Docket 046. See comment No. 4 on the proposed rule from the IAG, available at https://assets.pcaobus.org/pcaob-dev/docs/default-source/rulemaking/docket046/4_iag.pdf?sfvrsn=1941e7c0_4. See above for a discussion on the association between audit quality and financial reporting quality.

³⁰⁷ There is an extensive body of academic literature suggesting that financial markets incorporate information into securities prices. See, e.g., Eugene F. Fama, *Efficient Capital Markets: A Review of Theory and Empirical Work*, 25 The Journal of Finance 383 (1970).

³⁰⁵ Some academic research suggests that PCAOB oversight is beneficial. For example, one study of audit firms in foreign jurisdictions finds that PCAOB inspections access is positively associated with proxies for audit quality. See Phillip T. Lamoreaux, *Does PCAOB inspection Access Improve Audit Quality? An Examination of Foreign Firms Listed in the United States*, 61 Journal of Accounting and Economics 313 (2016).

monetize their reputations, auditors could have an incentive to compete on the final metrics.³⁰⁸ For example, to win engagements, auditors may seek to manage their final metrics by redeploying staff resources or providing additional training. This competitive dynamic could improve audit quality and, by extension, financial reporting quality.³⁰⁹ Reduced search costs could increase auditor competition.³¹⁰ In addition to facilitating issuers' selection of a preferred auditor, the increase in competition could potentially reduce audit fees.³¹¹

The Board notes that the benefits linked to competition between audit firms could be reduced for the larger issuer segment of the market because larger issuers have fewer audit firms available to choose from that are able to perform large, complex audits, without violating independence rules and other constraints. However, the final metrics could help promote competition between partners within the larger

³⁰⁸ Improved competition following mandatory disclosure regimes has been observed in other markets. See above for additional discussion. One study finds that non-U.S. auditors inspected by the PCAOB gain market share from competing auditors after PCAOB inspection reports are made public, more so when the PCAOB inspection report has fewer engagement-level deficiencies. See Daniel Aobdia and Nemit Shroff, *Regulatory Oversight and Auditor Market Share*, 63 *Journal of Accounting and Economics* 262, (2017).

³⁰⁹ See above for a discussion on the relationship between audit quality and financial reporting quality.

³¹⁰ Economic theory suggests that a reduction in search costs helps to make markets more competitive. See, e.g., Helmut Bester, *Bargaining, Search Costs and Equilibrium Price Distributions*, 55 *The Review of Economic Studies* 201 (1988). There is an extensive literature in industrial organization economics studying the impact of search and advertising costs on competition. For example, Jean Tirole, *The Theory of Industrial Organization*, MIT Press 294 (1988) studies informative advertising (i.e., costs borne by sellers to inform buyers of the seller's existence, product quality, and pricing) in a model involving differentiated sellers, and finds that prices fall as information costs fall. See also Grossman and Shapiro, *Informative Advertising*; and Glenn Ellison and Alexander Wolitzky, *A Search Cost Model of Obfuscation*, 43 *The RAND Journal of Economics* 417 (2012). Glenn Ellison and Sarah F. Ellison, *Search, Obfuscation, and Price Elasticities on the Internet*, 77 *Econometrica* 427 (2009) also show that reductions in search costs increase the price-sensitivity of demand, resulting in decreased prices for near-substitute goods, and that sellers may attempt to engage in obfuscation strategies to reduce competitive pressure.

³¹¹ The positive relationship between increased competition and lower audit fees is well-established, see, e.g., Wietke Numan and Marleen Willekens, *An Empirical Test of Spatial Competition in the Audit Market*, 53 *Journal of Accounting and Economics* 450 (2012); and Andrew R. Kitto, *The Effects of Non-Big 4 Mergers on Audit Efficiency and Audit Market Competition*, 77 *Journal of Accounting and Economics* 101618 (2024). Other potential unintended impacts the proposal may have on competition are discussed below.

firms.³¹² One commenter suggested that the ability of the proposed metrics to spark competition between firms is an important condition for rulemaking and one which the proposal abandons because the proposed metrics are divorced from audit quality and excessively burdensome. The Board agrees that the effect on competition is an important impact for the Board to consider, but the Board disagrees with the commenter's assertions that the proposal abandoned it. To the contrary, the Board's economic analysis considered all potential impacts of the final rules, competition among them. Indeed, based on the Board's careful consideration of academic research, public comment, and the Board's experience, the Board believes the final metrics could enhance competition and the Board's economic analysis reflects this view.

One commenter questioned whether firms' management of their metrics to win market share would improve audit quality. As discussed in the proposal and below, the Board acknowledges that management of the final metrics may not always lead firms to improve their audit approach. However, economic theory suggests that if management of the metrics is entirely manipulatory, then users of the information will entirely discount it as "cheap talk." ³¹³ The Board believes this extreme "cheap talk" outcome is unlikely, in part, because the final rules will be subject to PCAOB oversight as well as firms' QC systems, which are in turn subject to QC 1000.³¹⁴

iii. Indirect Benefits of Improved Financial Reporting Quality

As described above, to the extent the final rules improve audit performance, the final rules will also improve financial reporting quality. More reliable financial information would allow investors to improve the efficiency of their capital allocation decisions (e.g., investors may more accurately identify companies with the strongest prospects for generating future risk-adjusted returns and reallocate their

capital accordingly).³¹⁵ Investors may also perceive less risk in capital markets generally, leading to an increase in the supply of capital.³¹⁶ An increase in the supply of capital could increase capital formation while also reducing the cost of capital to companies.³¹⁷ A reduction in the cost of capital reflects a welfare gain because it implies investors perceive less risk in the capital markets.

The Board is unaware of any literature that would provide a basis for quantifying the magnitude of financial reporting quality improvement associated with the final rules. However, academic literature has attempted to quantify the impact of improved financial reporting quality on cost of capital by measuring the association between various quantitative proxies for financial reporting quality and cost of capital after controlling for other potential drivers of cost of capital. Subject to the caveats discussed below, this literature suggests, overall, that even small improvements in financial reporting quality can result in reductions in issuers' cost of capital of multiple basis points in magnitude. Due to the size of the U.S. capital markets, even a single basis point reduction in the cost of capital implies substantial welfare gains.

Some studies examine the relationship between improved

³¹⁵ See, e.g., Acito, et al., *Market-Based Incentives for Optimal Audit Quality*.

³¹⁶ See, e.g., Hanwen Chen, Jeff Zeyun Chen, Gerald J. Lobo, and Yanyan Wang, *Effects of Audit Quality on Earnings Management and Cost of Equity Capital: Evidence from China*, 28 *Contemporary Accounting Research* 892 (2011); Richard Lambert, Christian Leuz, and Robert E. Verrecchia, *Accounting Information, Disclosure, and the Cost of Capital*, 45 *Journal of Accounting Research* 385 (2007) (concluding that improving the quality of accounting disclosures can influence the cost of capital and under certain conditions can unambiguously lower the cost of capital).

³¹⁷ Cost of capital is the rate of return investors require to compensate them for the lost opportunity to deploy their capital elsewhere. Equivalently, cost of capital is the discount rate investors apply to future cash flows. Cost of capital depends, among others, on the riskiness of the underlying investment. Accordingly, the rate of return required by equity holders—cost of equity capital—and the rate of return required by debt holders—cost of debt capital—may differ to the extent equity and debt securities expose investors to different levels of risks. In the context of a particular company or portfolio of companies, the weighted average cost of capital is the average of the cost of equity capital and the cost of debt capital, weighted by the market values of the underlying equity and debt securities, respectively. See, e.g., R. A. Brealey, S. C. Myers, and F. Allen, *Principles of Corporate Finance*, 10th Edition McGraw-Hill 8, 90, and Chapter 7, (2011). For theoretical discussion on the link between financial reporting quality and cost of capital, see, e.g., Richard A. Lambert, Christian Leuz, and Robert E. Verrecchia, *Information Asymmetry, Information Precision, and the Cost of Capital*, 16 *Review of Finance* 1, 16–18 (2012); and David Easley and Maureen O'Hara, *Information and the Cost of Capital*, 59 *Journal of Finance* 1553, 1571 (2005).

³¹² See Ahum Choi, Sunhwa Choi, and Jaeyoon Yu, *Does Internal Competition among Audit Partners Affect Audit Pricing Decisions?*, *Auditing: A Journal of Practice & Theory* 1 (2024) (finding that U.S. audit partners compete for clients with other partners within their office who perform audits in the same industry).

³¹³ See Vincent P. Crawford and Joel Sobel, *Strategic Information Transmission*, *Econometrica: Journal of the Econometric Society* 1431 (1982).

³¹⁴ See below for additional discussion on how PCAOB oversight would mitigate potential manipulation of the final metrics.

financial reporting quality and companies' cost of equity capital. For example, one study quantified the relationship between earnings transparency and cost of equity capital.³¹⁸ The study found that, compared to a baseline of no transparency, companies with an average level of earnings transparency had between 1.7 and 3.4 percentage points lower cost of equity capital, depending on the estimation methodology. Using restatements as a proxy for financial reporting quality, another study found that a restatement increases the cost of equity capital by between six and 15 percent in the longer term.³¹⁹ Assuming a 10 percent cost of capital, this result corresponds to between a 60 and 150 basis point increase in the cost of equity capital. One study found that companies with the highest accruals quality had a 210 basis point lower cost of equity capital compared to companies with the lowest accruals quality.³²⁰ Using disclosure quality ratings (determined by an index prepared by analysts) as a proxy for financial reporting quality, another study found that companies with the highest disclosure quality ratings had roughly a 0.7 percentage point lower cost of equity capital compared to companies with the lowest.³²¹ From an international perspective, one study found that companies in countries in the 75th percentile of strength of disclosure rules and associated enforcement had roughly a 200 basis point lower costs of equity capital than countries at the 25th percentile (*i.e.*, countries with weaker disclosure rules and enforcement).³²² Another study found that, compared to companies in countries at the 75th percentile of earnings opacity, the cost of equity capital for companies in the 25th percentile (*i.e.*, countries with less

opaque earnings) had a 2.8 percentage point lower cost of equity capital.³²³

While the above studies examine the impact of improved financial reporting quality on companies' cost of equity capital, several studies examine instead the impact of improved financial reporting quality on companies' cost of debt capital. For example, one study found that companies with the highest disclosure quality ratings (determined by an index prepared by analysts) have roughly 1.1 percentage points lower cost of debt capital than companies with the lowest disclosure quality ratings.³²⁴ Another study found that companies in the highest decile of accruals quality had a 126-basis point lower cost of debt capital than companies in the lowest decile of accruals quality.³²⁵

While the Board believes these studies are indicative of the potential impacts improved financial reporting quality may have on capital markets, the Board acknowledges that the studies are subject to certain caveats.³²⁶ First, the studies do not indicate the degree to which the disclosure of firm and engagement metrics could impact financial reporting quality in the first instance. Therefore, the magnitudes must be treated as illustrative examples, rather than point estimates, of the potential benefits of the final rules.

Second, some of the studies may be subject to some endogeneity bias.³²⁷ For example, companies with high financial reporting quality may also be well-managed, a form of omitted variable bias. Similarly, companies that voluntarily provide higher quality information may do so because they are in a stronger financial position already, a form of self-selection bias. Due to these potential biases, some of the studies may overestimate the extent to which improved financial reporting quality reduces companies' cost of capital. Controlling for endogeneity bias is challenging and the results of any one methodology may be sensitive to the

methodology's assumptions.³²⁸ Indeed, after attempting to statistically control for endogeneity bias, one study found that the association between financial reporting quality and cost of equity capital remains while another found that it disappears.³²⁹

Third, while most research tends to find positive associations between financial reporting quality and the cost of capital, some studies have found counterintuitive or unexpected associations. For example, one study found that the timeliness of disclosures is negatively associated with the cost of equity capital.³³⁰ The results of another study suggest that the association between improved financial reporting quality and reduced cost of capital may apply only to companies with low analyst following.³³¹

Despite these caveats, the Board believes that the academic literature suggests overall that improved financial reporting quality results in lower costs of capital and, moreover, that even small improvements can reduce the cost of capital by one or more basis points. The studies discussed above found multiple percentage point reductions in cost of capital when companies (or countries) with the weakest financial reporting proxies are compared to the companies (or countries) with the strongest financial reporting proxies. As such, just one hundredth of the improvement in those measures could result in reductions in the cost of capital by multiple basis points. Due to the size of U.S. capital markets, even small reductions in the cost of capital, on the order of multiple basis points, can generate significant welfare gains. For example, using recent data on the size of the U.S. equity and debt capital markets, a single basis point reduction in the weighted average cost of capital

would imply at least \$99.0 billion in welfare gains.³³²

One commenter suggested that a review of the academic literature on cost of capital should allow the Board to quantify the impact of the final metrics on cost of capital decisions. The proposal provided a review of academic literature on cost of capital. That review appears here in essentially the same form. As discussed above, the Board believes this literature does provide evidence of the quantitative benefits of improved financial reporting quality generally. However, the Board is unaware of any literature that would provide a basis for quantifying the magnitude of financial reporting quality improvement (and thus the magnitude of cost of capital reduction) associated with the final rules and the commenter did not identify such literature.

One commenter said that the proposal assumed that investors have homogenized interests when in fact there will always be a buyer and a seller with conflicting objectives. The Board recognizes that, with respect to secondary trading of issuer securities, buyers and sellers have conflicting objectives. To the extent the final metrics inform traders' perceptions of the value of issuer securities or otherwise improve financial reporting quality, the final metrics could in the short run benefit one trading counterparty at the expense of the other. However, for the reasons discussed above, the Board believes that more

reliable financial reporting quality benefits capital markets overall in the long run.

iv. Academic Literature and Comments Related to Specific Final Firm and Engagement Metrics

In the following discussion the Board reviews the extant literature related to the final metrics. In doing so, the Board separates the final metrics into three categories: (i) metrics related to audit personnel; (ii) metrics related to the allocation of audit hours; and (iii) metrics related to audit outcomes.

The Board notes three important caveats. First, as most of the final metrics are not currently publicly available, academic studies principally rely on information obtained from audit firms directly, surveys, or foreign jurisdictions. Their relevance is thus limited by the fact that the metrics they study are not equivalent to the final metrics and their results may not be directly applicable to the U.S. audit market more generally. Second, while the extant literature may draw conclusions regarding a particular metric's relationship to publicly available proxies for audit quality, this does not imply that a final metric will provide any new insights to investors and audit committees incremental to the insights already provided by the publicly available proxies for audit quality. Finally, those relationships may be non-linear or difficult to fully evaluate.

One commenter said that some studies cited in the proposal feature investors or investor groups who may not be representative of the broader population of investors. The commenter did not refer to any specific study. The Board acknowledges that the samples featured in some of the empirical studies discussed below may not be perfectly representative of the population of stakeholders that will be impacted by the final rules. While this fact limits their relevance, the Board believes their samples are similar enough to the impacted population that their results inform the economic analysis of the final rules. Consistent with the PCAOB's staff guidance on economic analysis, the Board highlighted key aspects of the studies (e.g., the representativeness of their data sample) that may limit their relevance.

Several commenters suggested that the PCAOB should, as a starting point, demonstrate that any final metric has an unambiguous impact on audit quality. One commenter suggested that the PCAOB obtain research suggesting that any behavioral change produced by a final metric should not harm audit

quality. The commenter also suggested that the univariate disclosures should provide a complete picture of the engagement and firm. As the commenter acknowledged, the Board performed an extensive literature review, the substance of which the commenter did not dispute. The Board also considered all academic research provided by commenters. While the Board considered the potential effects of the metrics on audit quality and auditor behavior, the Board does not believe that the rigid criteria suggested by commenters are necessary or appropriate. As the Board stated above, and as many commenters affirmed including this commenter, audit quality is complex and requires significant context to fully appreciate. As such, no metric taken in isolation can provide a complete picture of a firm and its engagements and thus have an unambiguous impact on audit quality. Furthermore, research cannot prove that any future behavioral changes would not harm audit quality. However, in selecting each of the final metrics, the Board considered whether the evidence on its relationship to the quality of firms and their engagements, which the Board believes reflects the spirit of the selection approach suggested by the commenter.

The same commenter also suggested that the Board consider whether the disclosures would meet the SEC's goals for required disclosures. The SEC's goals on required disclosures have traditionally focused on corporate disclosure, although they may include auditor disclosure in certain contexts. The Board has carefully considered whether the required disclosures would help the PCAOB achieve its objectives in furtherance of its statutory mandate.

The same commenter also questioned whether many of the academic studies surveyed in the academic literature review supported the proposal because they use statistical methods to identify causal relationship that hold other elements of the audit process fixed. The Board assumes that the commenter intended to contrast this standard statistical approach with the fact that, in practice, investors and audit committees will be comparing firms and engagements where other elements of the audit process are not fixed. The Board agrees that no single academic study that the Board reviewed provides dispositive proof that investors or audit committees will be able to interpret any individual metric in practice without also understanding the full context. Indeed, the Board has acknowledged that no individual metric can measure audit quality and a fuller appreciation of

³³² $(1 \text{ basis point} / (8\% \text{ average cost of capital} - 1 \text{ basis point})) \times (\$68.1 \text{ trillion in equity market capitalization} + \$11.0 \text{ trillion in debt market capitalization}) = \$99.0 \text{ billion}$. Source: S&P Capital IQ and SIFMA. The debt market capitalization figure reflects U.S. corporate bonds outstanding as of 2024 Q2. It does not include private debt. The Board notes several key assumptions and limitations of the calculation. The calculation assumes that debt and equity capital comprise all forms of capital (i.e., the calculation disregards other potential forms of capital) and that their total value is equal to the sum of all future cash flows discounted by the weighted average cost of capital. It assumes a weighted average cost of capital of 8% based on historic averages for the Russell 3000. See Michael J. Mauboussin and Dan Callahan, *Cost of Capital: A Practical Guide to Measuring Opportunity Cost*, Morgan Stanley Investment Management Counterpoint Global Insights, Exhibit 16 (2023). The calculation does not account for the potential beneficial impact of changes in the quantity of capital supplied nor does it account for potential general equilibrium effects in other markets. As discussed above, the calculation pertains to weighted average cost of capital reductions only. It does not capture potential increases in total market capitalization arising from improved management or improved capital allocation. The Board acknowledges that some issuers that contribute to the Board's market capitalization figures are not audited by firms that will be subject to the final requirements and therefore will not be impacted by the final requirements. However, the Board believes they make up a small share of total market capitalization.

audit quality requires consideration of a broad array of factors, many of which are unquantifiable (e.g., professional skepticism). However, the Board does not believe this implies that the academic studies surveyed provide no support for the final rules.

One commenter said that the proposal did not provide sufficient evidence that public disclosure of the proposed metrics would meaningfully impact audit quality. Given that data using the specific final metrics is not currently available, evidence of their effects on audit quality is necessarily limited. Nevertheless, the Board believes the academic literature discussed below and the analysis discussed throughout this section provide evidence that the final metrics, taken as a whole, could have meaningful impacts to audit quality, which the Board believes could lead to significant benefits to investors, audit committees, and other stakeholders.

a. Metrics Related to Audit Personnel

The Partner and Manager Involvement metrics will indicate the hours worked by senior professionals relative to more junior staff across the firm's large accelerated and accelerated filer engagements and on the specific engagement. Investors and audit committees could use this information to evaluate whether partners and managers are giving their engagement appropriate attention. Although the academic literature related to audit partner and manager involvement is limited, one study using Korean data suggests that audit partner involvement is positively associated with audit quality.³³³ Another study finds that the offices of U.S. Big 4 audit firms with relatively more CPAs tend to provide higher audit quality.³³⁴ While the number of staff with CPAs is not equivalent to the share of senior staff hours reflected in the metric, the finding does suggest that greater involvement of experienced staff is beneficial to audit quality.³³⁵ Another study using Chinese data finds that a greater partner to staff ratio is positively associated with audit quality.³³⁶ However, using U.S. data, another study finds partner time spent

concurrently on other audits is not associated with audit quality.³³⁷

The Workload metrics will indicate the average weekly hours worked on a quarterly basis by senior professionals, including time attributable to engagements, administrative duties, and all other matters, both firm-wide and on the core engagement team. Investors and audit committees could use this information to evaluate whether partners and managers are overworked or potentially distracted by other responsibilities. In certain circumstances, higher workloads could indicate that partners and managers are working longer to ensure audit quality is high. While there is no established optimal workload level for audit teams or their staffing components, academic literature suggests that auditors have high workloads, particularly during the busy season.³³⁸ Furthermore, several academic studies, primarily using international data, find that high workload levels (e.g., workloads that exceed 60 hours per week), particularly during the busy season, negatively impact audit quality.³³⁹ Auditors that work on multiple engagements in different environments and scopes may also experience issues with memory-related errors.³⁴⁰ However, the impacts of workload may depend on the auditor's ability to handle such normal workloads.³⁴¹ Furthermore, one study finds that audit partner busyness is not related to audit quality under equilibrium market conditions.³⁴²

³³⁷ See, e.g., Christensen, et al., *Team Workloads*.

³³⁸ See, e.g., Persellin, et al., *Auditor Perceptions* Table 2; Dana R. Hermanson, Richard W. Houston, Chad M. Stefaniak, and Anne M. Wilkins, *The Work Environment in Large Audit Firms: Current Perceptions*, 10 *Current Issues in Auditing* A38 (2016); and John T. Sweeney and Scott L. Summers, *The Effect of the Busy Season Workload on Public Accountants' Job Burnout*, 14 *Behavioral Research in Accounting* 223 (2002).

³³⁹ See, e.g., Christensen, et al., *Team Workloads*; Jun Chen, Wang Dong, Hongling Han, and Nan Zhou, *Does Audit Partner Workload Compression Affect Audit Quality?*, 29 *European Accounting Review* 1021 (2020); Jin Suk Heo, Soo Young Kwon, and Hun-Tong Tan, *Auditors' Responses to Workload Imbalance and the Impact on Audit Quality*, 38 *Contemporary Accounting Research* 338 (2021); Hwang and Hong, *Auditors' Workload*; Dennis M. Lopez and Gary F. Peters, *The Effect of Workload Compression on Audit Quality*, 31 *Auditing: A Journal of Practice & Theory* 139 (2012); Persellin, et al., *Auditor Perceptions*; and Ferdinand A. Gul, Shuai Mark Ma, and Karen Lai, *Busy Auditors, Partner-Client Tenure, and Audit Quality: Evidence from an Emerging Market*, 16 *Journal of International Accounting Research* 83 (2017).

³⁴⁰ See, e.g., Sudip Bhattacharjee, Mario J. Maletta, and Kimberly K. Moreno, *The Cascading of Contrast Effects on Auditors' Judgments in Multiple Client Audit Environments*, 82 *The Accounting Review* 1097 (2007).

³⁴¹ See Persellin, et al., *Auditor Perceptions*.

³⁴² See Goodwin and Wu, *What is the Relationship*.

The Retention of Audit Personnel metrics will indicate the continuity of senior professionals (through departures, reassignments, etc.) across the firm. Discontinuity of senior professionals at the firm could be a signal of dysfunction within the firm and a loss of valuable issuer and firm-specific human capital. Some research suggests that excessive levels of turnover, particularly at the staff level, could lead to a deterioration in audit quality.³⁴³ One study finds that auditor turnover at U.S. Big 4 firms has a significant negative effect on audit quality as measured by the prevalence of restatements.³⁴⁴ Using Belgian data collected from private and public companies, another study finds that abnormal turnover is more likely to affect audit quality than expected (i.e., normal or average) levels of turnover, and the negative consequences of turnover impact existing clients more than new clients.³⁴⁵ Firms with larger internal labor pools may be better positioned to mitigate the negative consequences of turnover. For example, using data from Chinese audit firms on auditor departure from public accounting, one study finds that the negative effect of departure on audit quality is stronger for non-Big 4 firms.³⁴⁶

The Experience of Audit Personnel metrics will indicate the average number of years worked at a public accounting firm (whether or not PCAOB-registered) by senior professionals across the firm and on the engagement. Greater experience of audit personnel metrics may indicate to investors and audit committee members that senior professionals are more effective and efficient auditors. The extant academic literature shows mixed results regarding the association between auditor experience and audit quality. One study of U.S. audit partners finds that absolute discretionary accruals, a proxy for audit quality, is increasing (decreasing) in the number of years the partner has been a CPA

³⁴³ See, e.g., Khavis and Szerwo, *Audit-Employee Turnover, Audit Quality, and the Auditor-Client Relationship* 27; and Christensen, et al., *Team Workloads*.

³³⁴ See, e.g., Albert L. Nagy, Matthew G. Sherwood, and Aleksandra B. Zimmerman, *CPAs and Big 4 Office Audit Quality*, 42 *Journal of Accounting and Public Policy* 107018 (2023).

³³⁵ Another study using Japanese data finds that the number of CPA holders staffed to an audit engagement is positively associated with audit quality while the number of non-CPA holders is not. See Hossain, et al., *The Relationship*.

³³⁶ See, e.g., Lo, et al., *Does Availability of Audit Partners*.

licensee early (late) in their career.³⁴⁷ One experimental study from the United States found that less-experienced auditors may be less willing to request additional evidence from company controllers.³⁴⁸ However, another U.S. study finds that audit partner experience is not associated with audit quality.³⁴⁹ Using data from Taiwan, one study finds that an auditor's experience is positively associated with proxies for audit quality.³⁵⁰ One study on Chinese audit firms finds that the number of years that the partner has been engaged in audit work is negatively associated with absolute discretionary accruals, a proxy for audit quality.³⁵¹ However, another study using data from Chinese audit firms finds that an auditor's birth year, a proxy for total experience, is not associated with several proxies for audit quality.³⁵²

The Industry Experience metrics will indicate the average years of career experience of senior professionals in key industries audited by the firm at the firm level and the audited company's primary industry at the engagement level. The academic literature shows that industry experience, primarily using market share proxies, are related to audit quality.³⁵³ One study of U.S.

Big 4 firms finds that audit quality is positively associated with the number of years that the auditor is an industry specialist (*i.e.*, it has the largest market share in an industry and at least 10% more market share than the next-largest competitor).³⁵⁴ One experimental study finds that auditor participants that have experience in an industry are more likely to understand the specific financial reporting requirements and risks that issuers in those industries face.³⁵⁵ However, some research suggests that the impact of industry specialization on audit quality may depend on other contextual factors (*e.g.*, whether the auditor is local to the client or the difficulty of the audit).³⁵⁶ The Board also notes that some studies indicate that research on experience and industry specialization may be sensitive to design, proxy, and stratification level (*i.e.*, office-level and national-level). However, as one of the studies notes, the Board believes these findings do not imply that industry expertise is unrelated to audit quality.³⁵⁷

The Training Hours for Audit Personnel metrics would indicate average annual training hours for partners, managers, and staff of the firm, combined, both firm-wide and on the core engagement team. Overall, the academic literature provides mixed evidence regarding how auditor training relates to audit quality, but provides some evidence to support the association between specialized training and audit quality. Some studies find that certain proxies for auditor training are positively associated with some proxies for audit quality. For example,

one survey of junior auditors at large U.S. public accounting firms found that the perceived effectiveness of training was associated with lower turnover intentions.³⁵⁸ A study on Norwegian audit partners found that CPE hours were positively associated with audit effort and going concern opinion accuracy.³⁵⁹ A survey of auditors working in small audit firms in Sweden found that participation in four or more training activities or 50 or more hours of education per year were negatively associated with self-reported "dysfunctional" behaviors.³⁶⁰ However, other studies suggest that the benefits of training are driven primarily by specialized training. For example, one study on the Spanish audit market found that only partners' specialized, or non-generic audit knowledge (as proxied by industry-specific experience), was significantly positively associated with audit quality.³⁶¹ An older experimental study found that specialized indirect experience (*i.e.*, training), resulted in a stronger understanding for the auditor, but had a greater impact of knowledge unrelated to financial statement errors.³⁶² Another experimental study found that specialized training and experience were more strongly associated with improved audit outcomes than general knowledge.³⁶³

By requiring auditors to disclose these personnel related metrics, investors and audit committees could, for example, identify auditors with sustainable workloads, with the implicit outcome that sustainable workloads could improve auditor attentiveness and reduce error rates. Additionally, investors and audit committees may find the final metrics to be useful in evaluating the risk that the auditor has overlooked errors or material misstatements due to overworked partners or managers or that the engagement team was not sufficiently qualified or specialized. Moreover, investors may find the final metrics beneficial in understanding whether the engagement, and therefore the issuer, had significant risks or the issuer's operations were particularly complex compared to peer issuers. For example, if there was a significantly higher workload across partners, managers, and staff—or excessive turnover—compared to another investment opportunity of similar issuer size, the investor may then infer that the issuer had unique risks that necessitated increased audit effort. Such a signal may be particularly useful if the investor could ascertain whether peer issuers were more, or less, complex compared to the issuer under consideration. The investor may also be reasonably assured if there were positive audit outcomes as it may signal to the investor that the auditor exerted considerable or appropriate effort in obtaining a reasonable level of assurance on the issuer's financial statements in the context of their peers for that issuer's complexity and risk level.

Audit committees may also find these final metrics to be beneficial, as the audit committee may view them as confirming that the auditor is appropriately staffing the engagement. In addition, during the selection process for a new auditor, the audit committee may review the final metrics of potential candidate auditors in the context of peer-group engagements, thereby using the final metrics to make auditor selection decisions more effectively. By selecting an auditor based on their experience or industry-specific knowledge, audit committees could be better able to choose the preferred candidate auditor for their engagement—thereby improving the matching efficiency of human capital within and across firms by helping to align the demand for resources with the supply.

Audit firms may find the final metrics beneficial as they may be better able to monitor whether they are unintentionally over- or under-auditing,

as they will be able to compare their audit personnel metrics to other firms' metrics. Audit firms may also benefit from identifying lead industry-specialist auditors and improve their own audit services to compete with these industry specialists on the quality of those services. Importantly, incumbent auditors (*i.e.*, current auditors of an issuer) know more about the issuer's operations than rival competitor auditors.³⁶⁴ The disclosure of the final metrics could provide these competitor auditors with the ability to observe signals regarding the effort and experience required on the engagement, and those auditors may be able to use that information to compete against the incumbent auditor for the issuer's prospective engagement more effectively.³⁶⁵

The final metrics related to audit personnel and commenters' views are discussed and summarized above. Here the Board highlighted the comments that are most relevant to the economic analysis. Citing academic research, one commenter said that human capital inputs to audit production are crucial to audit quality.³⁶⁶ The same comment letter referred to a working paper written by the letter's authors which finds the manager-to-employee ratio at the audit office level is positively associated with audit quality.³⁶⁷ The commenter cited two academic studies that suggest audit offices are core functional units.³⁶⁸ Several commenters expressed concern that the benefits to reporting partner and manager involvement may be dampened by the fact that greater partner and manager involvement is not necessarily correlated with greater audit quality. Some of these commenters pointed out that partner and manager involvement is likely to vary with the complexity of the audit. For example, one commenter suggested that a less complex audit may require little additional supervision

³⁶⁴ See, *e.g.*, Monika Causholli, W. Robert Knechel, and Haijin Lin, and David E. M. Sappington, *Competitive Procurement of Auditing Services with Limited Information*, 22 *European Accounting Review* 573, 576–578 (2013).

Schroeder, *Audit Personnel Salaries and Audit Quality*, 23 *Review of Accounting Studies* 1096 (2018); Brandon Gipper, Luzi Hail, and Christian Leuz, *On the Economics of Mandatory Audit Partner Rotation and Tenure: Evidence from PCAOB Data*, 96 *The Accounting Review* 303 (2021); Christensen, et al., *Team Workloads*.

³⁶⁷ See Joshua Khavis et al., *Manager Staffing Leverage*.

³⁶⁸ See Kenneth L. Bills, Quinn T. Swanquist, and Robert L. Whited, *Growing Pains: Audit Quality and Office Growth*, 33 *Contemporary Accounting Research* 288 (2016); Christensen, et al., *Team Workloads*.

while a more complicated audit may require more supervision. One commenter said that the firm-level workload metric would not be comparable across firms due to variation in the size of each firm's issuer practice. Another commenter suggested that presenting firm-level average experience will be difficult to interpret because the distribution of personnel experience varies vastly. Several commenters agreed that defining a training metric that would provide decision-useful information would be challenging. One commenter said they think training increases technical competence. Another said that training builds awareness and on-the-job training is invaluable. However, the same commenter said that on-the-job-training could not be quantified. Another commenter supported a training metric but preferred an alternative calculation.

The Board acknowledges that the final metrics are imperfect proxies for audit quality.³⁶⁹ For example, the Board recognizes that average experience only partially describes the distribution of experience within a firm and, by extension, two firms with the same average experience could have quite different experience distributions. However, the Board believes that the final metrics will, on average, improve investors' decision-making.³⁷⁰ The Board agrees that the partner and manager involvement metric may vary with the complexity of the audit. The Board also agrees that the firm-level workload metric may vary by the size of the firm's issuer practice. However, the size of the firm's issuer practice and other proxies for the complexity of the audit are public information so stakeholders can adjust for any systematic variation in the partner and manager involvement and workload metrics. The Board also agrees that stakeholders may misinterpret the experience of audit personnel or training metrics. While some misunderstanding may reduce the usefulness of the final metrics, the Board believes that reporting the experience of audit personnel and training metrics will likely still be beneficial to investors.³⁷¹

³⁶⁹ See above for a more general discussion of commenters' concerns regarding comparability of the final metrics.

³⁷⁰ See above for a more general discussion of commenters' concerns regarding the relationship between the proposed metrics and audit quality.

³⁷¹ See below for a more general discussion of commenters' concerns regarding potential misinterpretation by investors, audit committees, and auditors.

b. Metrics Related to the Allocation of Audit Hours

The Allocation of Audit Hours metric would indicate the percentage of hours incurred prior to and following an issuer's year end across the firm's large accelerated and accelerated filer engagements and on the specific engagement. This metric may provide insight into whether the audit team is being efficiently and effectively deployed. Generally, the academic literature related to the allocation of audit hours is limited, as information pertinent to studying this topic is non-public. However, one recent study used PCAOB inspections data and found that audit engagements in which relatively more audit effort was spent prior to the issuer's fiscal year end had overall improvements in audit effectiveness and a lower likelihood of negative audit outcomes.³⁷² As noted in that study, other researchers have identified that work conducted earlier in the audit process may lead to an earlier identification of issues that could improve the possibility those issues would then be corrected.³⁷³ Another study, using data from one global accounting firm, also finds that a greater proportion of audit work performed earlier in the audit is associated with improved audit outcomes.³⁷⁴

The final Allocation of Audit Hours metric could allow investors and audit committees to better evaluate how their auditor plans its audit and compare their audit and auditor to peers. For example, it could indicate that their auditor has left substantial issues to the end of the engagement. The effective deployment of resources is of critical importance to a well-planned audit.³⁷⁵ The final metric may also help auditors understand whether they are effectively planning their audit. Auditors may compare their allocations of audit hours to those of other firms and adjust accordingly. The final Allocation of Audits Hours metric could also provide supplemental value to the final Workload and Partner and Manager Involvement metrics.

The final metrics related to allocation of audit hours and summarizes commenters' views are discussed above. Here the Board highlighted the comments that are most relevant to the economic analysis. Several commenters

cautioned that allocation of audit hours may not be a useful signal of audit quality because circumstances outside of the auditor's control may influence it (e.g., significant unusual, and unanticipated, transactions near the balance sheet date, going concern issues that arise after the balance sheet date, other unforeseen company delays). One commenter said that for the largest firms, individual issuer circumstances may not be significant enough to move the firm-level metric, but for smaller firms, individual issuer circumstances could impact the overall results. The Board recognizes that the allocation of audit hours will be an imperfect proxy for audit quality. However, the Board believes the academic literature provides evidence that the final metrics will likely be associated with audit effectiveness and audit outcomes and thus aid decision-making.³⁷⁶

c. Metrics Related to Audit Outcomes

The Restatement History metrics will summarize restatements of financial statements and management reports on internal control over financial reporting ("ICFR") that were audited by the firm over the past three years. In the academic literature, restatements are widely regarded as the strongest indicator of poor audit quality.³⁷⁷ Restatements have been shown to result in auditor dismissal or increased resources committed by the auditor to the issuer.³⁷⁸ Using data from Japanese audit firms, one study finds that auditors devote additional resources to companies the year they restate their

financial statements.³⁷⁹ However, it is important to note that restatements are often observed after a significant lag following the restatement event—which causes a reduction in the informativeness of the restatement event, if such information is viewed as stale by investors and audit committees. Furthermore, the absence of a restatement does not imply audit quality was high and the occurrence of a restatement identified by a successor auditor may signal improved audit quality when the auditor increases audit effort to identify errors in the work of prior auditors.³⁸⁰ The Board acknowledges that the incremental value of the final metric will be limited by the fact that restatements are public information already (e.g., U.S. issuers must file Form 8-K when they materially restate their financial statements and the public financial statements themselves indicate when a restatement has occurred). However, the Board believes that there is value in having the restatements aggregated and presented along with the other metrics.

The final metrics related to restatement history and commenters' views are discussed and summarized above. Overall, commenters were supportive of the proposed metrics related to restatement history. Two non-U.S. firm-related groups suggested that financial reporting quality is complex, and restatements are not a perfect proxy for audit quality. The Board agrees that it is not a perfect indicator. However, as the Board noted in the proposal, restatements are a widely-used proxy for audit quality. The Board agrees that context will be important to understand the final metrics, including the final Restatement History metric.³⁸¹ Two commenters said that restatements are already publicly available and therefore the metric would not be useful. The Board noted this in the proposal. The Board continues to believe that providing information on restatement history in Form FM would make the information more accessible to stakeholders.

³⁷⁶ See above for a more general discussion of commenters' concerns regarding the relationship between the proposed metrics and audit quality.

³⁷⁷ See, e.g., DeFond and Zhang, *A Review of Archival Auditing Research* (specifically, the discussion marked Section 2.3.1 Output-based audit quality measures). The Board notes that "little r" restatements are a less-widely used proxy for audit quality than "Big R" restatements. See Jayanthi Krishnan and Mengtian Li, *Are Referred-to Auditors Associated with Lower Audit Quality and Efficiency?*, 42 *Auditing: A Journal of Practice & Theory* 101 (2023) for one study that uses "little r" restatements as a proxy for audit quality. By contrast to "Big R" restatements, one study found muted or absent market reactions to "little r" restatements. 2. Costs

In the following discussion, the Board considered direct and indirect costs related to the final rules. The Board has attempted to quantify certain costs where possible. However, most of the costs are intractable to quantify, particularly the indirect costs.

- First, auditors may incur direct costs building an appropriate reporting infrastructure or updating existing infrastructure.
- Second, auditors may incur direct costs producing the firm and engagement metrics.
- Third, auditors, investors, and audit committees may incur indirect costs understanding and integrating the final metrics into their current decision-making frameworks.
- Fourth, auditors may incur indirect costs revising their audit approaches.
- Fifth, investors, audit committees, and auditors may incur indirect costs to the extent that issuers switch auditors more frequently as a result of the final rules.
- Sixth, issuers and investors may bear indirect costs to the extent that costs incurred by auditors are passed on in the form of higher audit fees.

Larger firms should be able to take advantage of economies of scale by distributing any fixed costs over a higher number of audit engagements. Smaller firms will likely distribute any fixed costs over a lower number of audit engagements, which, taking fixed costs as given, would make implementation relatively more costly for smaller firms.³⁸² Many commenters agreed that smaller firms, including non-U.S. firms, could be disproportionately impacted. However, the fixed costs may also be less for smaller firms than for larger firms (e.g., they may not require significant IT systems if they need to track only a few engagements).³⁸³

Referring to research from the SEC, one commenter noted that 99.9% of businesses are small businesses, 43.5% of the U.S. GDP is created by small businesses, and 63% of net new jobs are created by small businesses.³⁸⁴ The

commenter did not discuss what portion of these figures would be impacted by the proposal. The Board notes that the final rules will apply only to the auditors and audits of accelerated filers and large accelerated filers. However, the Board recognizes that some accelerated filers and larger accelerated filers may not be audited by the largest audit firms. For example, 24.0% of accelerated filers (representing 19.3% of total accelerated filer market capitalization) and 4.5% of large accelerated filers (representing 0.3% of total large accelerated filer market capitalization) are audited by non-affiliated firms.³⁸⁵

Several commenters said that the proposal did not fully consider the costs and complexities associated with complying with the proposed rules. Two commenters said that the proposal's economic analysis largely disregards costs and does not attempt to quantify the related costs of some requirements. To the contrary, the proposal's economic analysis included both a discussion of the available evidence about costs and PCAOB staff's attempt to quantify costs of the proposal to the extent feasible. The Board has carefully reviewed stakeholders' input regarding the potential costs of the proposal. Based on outreach to audit firms, one commenter agreed that firms' processes and systems would need to be established or updated.

One commenter suggested that the PCAOB should, as a starting point, consider whether the metrics would require additional systems, processes, or procedures. The Board considered these costs and quantified several of them in the proposal and, with modification to account for stakeholder feedback, address them again below.

One commenter suggested that it would be helpful if the Board could match each cost to each benefit. The Board does not believe such an analysis is feasible or reasonable. For example, it is not possible to match fixed costs (e.g., IT investments) to a particular benefit because they do not drive the benefit alone. Furthermore, the variable cost categories (e.g., gathering, calculating, and disclosing the metrics) cannot be matched to specific benefit categories (e.g., competition). Rather, these

Business Capital Formation, *Annual Report Fiscal Year 2023*.

³⁸⁵ Source: S&P and Audit Analytics. The Board's calculations use market capitalization data as of the second quarter of 2024. "Non-affiliated firms" are firms not affiliated with BDO International Limited, Deloitte Touche Tohmatsu Limited, Ernst & Young Global Limited, Grant Thornton International Limited, KPMG International Cooperative, or PricewaterhouseCoopers International Limited.

variable cost categories are each associated with producing the metrics, while disclosing the metrics drives all the benefits. Where feasible and reasonable, the Board highlighted in the proposal and below connections between certain qualitative cost categories and certain qualitative benefit categories. For example, the Board has highlighted that audit switching costs may arise from improved competition. The Board also acknowledges how certain metrics may be more costly or beneficial than others to allow the Board and commenters to consider each metric individually (e.g., by surveying academic literature by metric and highlighting challenges gathering data required for certain metrics).

One commenter noted that the use of data analytics at firms should enable them to more efficiently implement the final rules. The Board has observed that firms are increasingly using data analytics in their audits.³⁸⁶ However, the extent to which these capabilities lend themselves to regulatory compliance and management of the audit practice itself is less clear.

i. Direct Costs To Comply With the Final Rules

a. Modifying or Building a System To Produce the Final Metrics

Auditors may incur certain initial fixed costs (i.e., costs that are generally independent of the number of audits performed) related to modifying existing systems or building new systems that could collect the relevant data that is needed to generate the final metrics and produce compliant filings. The Board believes most firms will likely modify existing systems rather than build entirely new systems. These costs may include acquiring necessary IT infrastructure, establishing an appropriate system of controls, creating system documentation, and conducting system testing (e.g., with historical data or by conducting dry runs before the effective date of the final requirements). There could also be costs related to training personnel in how to use the new or modified system. This could include training: (i) engagement-level personnel on how to collect and document information relevant to the final metrics; (ii) centralized personnel on how to aggregate and produce the final metrics; and (iii) administrative personnel on how to create filings and ensure proper control over the system; all in compliance with QC 1000.³⁸⁷

³⁸⁶ See PCAOB Rel. No. 2024-007, 35 and cites therein for additional discussion on this topic.

³⁸⁷ See Michael J. Gurbutt, Wei-Kang Shih, Carrie von Bose, and Tasneem Raihan, *Staff White Paper*:

³⁸² See, e.g., Michael Minnis and Nemit Shroff, *Why Regulate Private Firm Disclosure and Auditing?*, 47 *Accounting and Business Research* 473, 498-499 (2017) (explaining that increased financial reporting regulation is disproportionately costly for smaller companies because complying with regulation has large fixed costs, and unlike larger companies, smaller companies do not benefit from economies of scale).

³⁸³ Among the firms that will be impacted by the final rules approximately 41%, 19%, and 11% had a total of one, two, or three accelerated filer or large accelerated filer engagements, respectively, during the 12-month period ending September 30, 2023.

³⁸⁴ See U.S. Securities and Exchange Commission, Office of the Advocate for Small

The fixed costs associated with these efforts will likely depend on the extent to which firms already have automated systems in place that may be adapted to comply with the final requirements. As discussed above, the Board believes many firms track much of the information that would be required to calculate the final metrics. In particular, information gathered by PCAOB staff in 2018 and 2019 pursuant to PCAOB oversight activities indicates that U.S. GNFs generally track some metrics similar to the final metrics and voluntarily provide quantitative information that is similar to many of the final metrics. With respect to roughly half of the engagements that will be subject to the final engagement-level reporting requirements, firms are already gathering total audit hours information from other auditors pursuant to Form AP reporting requirements. Furthermore, firms should be tracking CPE credits pursuant to licensing requirements and restatements pursuant to QC 1000. The Board believes firms likely have systems in place to help them track this information. As a result, these firms may be able to leverage their existing internal systems to comply with the final rules. Moreover, firms may be able to leverage existing systems related to their compliance with other PCAOB reporting requirements (e.g., QC 1000 and Form AP). Indeed, one GNF commenter, in response to the Concept Release, noted that some of the metrics discussed therein and included in the final rules would be “easy to compute.”

However, the Board has also considered that existing systems may not be functionally joined together, and that systems designed and operated for internal monitoring or informal reporting purposes may need to be enhanced to meet the needs of public reporting. There are, therefore, likely to be costs associated with integrating the various reporting systems and enhancing or updating current systems to comply with the final requirements. One GNF commenter on the Concept Release suggested that this would likely be especially true for NAFs. The required changes would depend on a firm’s size and the nature of their engagements.

Depending on their facts and circumstances, some firms may avoid the costs associated with modifying or building an automated system by opting for a more manual approach. Larger firms are more likely to build automated

systems, or increase automation in existing systems, given the scale of their operations and the scope of data that will need to be collected to calculate the final metrics (i.e., they have a larger number of employees and engagements). Smaller firms may choose to build or expand upon existing manual systems (e.g., collecting information in spreadsheets or simple databases) because, for these firms, the scope of information to be collected and processed may be effectively collated in a spreadsheet-based tool. Firms may also opt for automated systems to the extent that the final metrics will require a larger number of individual components, a broader pool of individuals, or more complicated calculations (e.g., the final metrics related to audit-team retention, auditor experience, or industry expertise). The fixed costs to build or modify existing automated systems are likely to be greater than manual systems. However, automated systems should reduce variable costs in the long run.

The Board is unaware of any data or research relevant to the potential costs of modifying firms’ existing automated systems, which the Board believes would be the most likely scenario for many firms, particularly the largest firms which audit a significant majority of the audit market.³⁸⁸ However, the costs to build an automated system from the ground up—that is, if a firm did not have any existing systems that track the inputs to the final metrics—could be comparable to the costs to implement an enterprise resources planning (ERP) system (but such costs are not exactly analogous). Using surveys of companies that have implemented ERP systems, some studies find that ERP system implementation costs scale with the company’s revenues and staff count. Using audit fees as a proxy for revenue and number of accountants as a proxy for staff count, an illustrative calculation suggests that the total costs (e.g., adding over all impacted firms), if every such firm were to implement an automated system from the ground up, could range from approximately \$371 million to \$512 million.³⁸⁹ This would

represent a one-time cost of approximately 2% to 3% of audit fees paid by issuers to covered firms in a year. However, as discussed in more detail below, the fixed costs associated with modifying or building a system to produce the final metrics are likely to be a fraction of this amount given that the Board expects most firms would modify existing systems rather than build entirely new systems. For this reason, this range likely represents an upper bound of the potential costs.

There are several reasons to expect the implementation costs will be substantially less than the cost of building a new ERP system. First, as noted above, the Board believes it is likely that firms, particularly the largest firms with the greatest market share, are already gathering much of the information that would be required to calculate the final metrics. For example, roughly half of the engagements that will be subject to the final engagement-level reporting requirements are already gathering total audit hours information from other auditors pursuant to Form AP reporting requirements. Furthermore, firms should be tracking CPE credits pursuant to licensing requirements and restatements pursuant to QC 1000. Second, the Board believes most larger firms have automated systems in place that could be leveraged to comply with the final rules. Third, smaller firms could opt for a manual approach. Indeed, firms are only expected to invest in an automated system if it would be efficient to do so.

ERP Report, Third-Stage Consulting Group, (2020)). Each of the U.S. Big 4 firms had over \$1 billion of revenue for the 2023 issuer fiscal year, while all other firms that will be impacted had less than \$1 billion. Using the midpoint of the ranges, 2.5% for U.S. Big 4 firms and 4% for all other firms, implementation costs related to building a new system to produce the final metrics will be approximately $\$12.7 \text{ billion} \times 2.5\% + \$4.8 \text{ billion} \times 4\% = \$512 \text{ million}$. The Board notes that 13 firms, which had a combined \$22 million in audit fees in 2022, had zero audit fees in 2023. Using information on client implementation projects active between January 2021 and December 2021, another consulting firm reported that companies having over 500, between 50 and 499, or less than 50 employees project spent \$11,000, \$9,000, or \$8,571 per ERP system user over a 5-year ERP implementation period and that 7.27%, 20.13%, and 34.8% of employees used the ERP system, respectively (2022 ERP Software Report, Software Path, (2022)). Information provided by registered firms that will be impacted by the final requirements on Form 2 indicates that, for the 2023 reporting year, 130, 58, and 19 firms employed over 500, between 50 and 499, or less than 50 accountants, employing a total of 431,680, 14,274, and 474 accountants, respectively. Using the number of accountants employed by a registered firm as a proxy for the number of employees, implementation costs related to building a new system to produce the final metrics would be approximately $430,074 \times 7.27\% \times \$11,000 + 14,142 \times 20.13\% \times \$9,000 + 444 \times 34.8\% \times \$8,571 = \$371 \text{ million}$. Source: Audit Analytics and RASR.

³⁸⁸ See, e.g., Ideagen Audit Analytics, *20-Year Review of Audit Fee Trends 2003–2022*, (July 2023) at 2.

³⁸⁹ The Board identified two publicly available reports related to the costs of implementing ERP systems. Referring to the experiences of over 1,000 client and non-client companies that had implemented a digital transformation effort in the past twenty years, one consulting firm estimated that implementation costs for companies with revenues under \$1 billion were approximately 3–5% of annual revenue, and implementation costs for companies with revenues over \$1 billion were approximately 2–3% of annual revenue (*The 2020*

Fourth, ERP systems possess many features that would not be necessary in an automated system for compliance. Finally, audit firms are likely to need to make similar investments in their internal systems in the near term, owing to the rapid pace of technological advancement and other rules and standards currently being adopted, thus potentially reducing the incremental costs attributable to the final rules. However, at the same time, and as suggested by commenters, the Board recognizes that implementing new systems may be especially costly for audit firms if staff resources are strained due to the need to comply with other standards being implemented in the same time period, such as QC 1000.³⁹⁰ The Board's estimate does not account for these capacity constraints. Overall, for these reasons, the Board believes these figures likely reflect an upper bound on the potential implementation costs and the actual implementation costs will likely be significantly less.

One commenter suggested that the Board's cost estimates are strawmen because they have too many caveats. The PCAOB's staff guidance on economic analysis recommends quantifying impacts to the extent feasible. However, it also notes that reliably quantifying impacts can be difficult. The SEC's current guidance on economic analysis in SEC rulemakings recommends "identify[ing] and discuss[ing] uncertainties underlying the estimates of benefits and costs."³⁹¹ Consistent with these recommendations, the Board has provided an exhaustive discussion of uncertainties in the Board's cost estimates because the Board believes it provides commenters with important context necessary to understand the economic analysis.

One commenter apportioned the Board's quantitative estimate of the cost to implement an automated system from the ground up to their firm by market share. Using this approach, the commenter estimated the cost would be between \$7 million and \$10 million. The commenter said that they believe their estimate is low because larger firms have greater economies of scale. The commenter also said that this cost could increase the audit fees they charge their issuer clients by between \$50,000

and \$70,000 per issuer assuming they pass through the entire implementation cost and raise each issuer's audit fee by the same amount. The Board notes some limitations to applying its numerical illustration in this way. First, as discussed in the proposal and again above, the Board's methodology assumes costs are a non-linear function of revenue which the commenter did not account for. Second, the Board notes that the commenter's estimate is subject to the same caveats described above regarding the Board's quantification methodology. Finally, the Board also notes it would not expect that the cost of implementing a new system would be passed through to issuers in the form of a permanent audit fee increase, both because it is a one-time cost and because it is a fixed rather than a variable cost. It also overestimates the true pass through to the extent the commenter is unable to pass through 100% of the implementation cost.

One commenter provided academic research that finds the costs to implement new systems is proportionally lower for larger firms.³⁹² The Board agrees, and the Board's quantification methodology reflects this. The same commenter also noted that the press has reported that larger firms have already invested significantly into their IT systems. As discussed above, the Board recognizes that larger firms likely already have systems in place that they would be able to leverage when implementing the final rules.

Finally, the Board also notes the implementation costs could be offset in part by benefits to auditors. For example, technological enhancements to auditors' systems may, in the long run, increase operational efficiency and profitability.

b. Producing the Final Metrics

Auditors may incur engagement-level and firm-level variable costs related to producing the final metrics. For example, the final rules may lead auditors to spend additional time recording, collating, and reporting information for relevant engagement-level, and then aggregated firm-level, metrics. As discussed above, the final rules do not impose new performance requirements other than the calculation

and disclosure of metrics. In addition, reviews by others, such as the engagement quality reviewer or the national office, may result in additional recurring costs. Audit firms are also likely to experience costs, or administrative time, related to legal review and quality control for the final metrics.

Specifically, variable costs may arise from the following activities related to producing the final metrics:

Recording & Collecting Information

Audit firms may incur variable costs recording the necessary information and collecting it in a centralized location. The magnitude of the costs will likely depend on the extent to which existing practice differs from the final requirements. As discussed above, the Board believes many firms already internally track information related to the final metrics. This will reduce the variable costs attributable to the final rules.

The magnitude of the variable costs may also depend on the size of the firm. As discussed, based on information obtained through inspections and oversight activities, the Board believes that the final rules will likely affect engagements performed by all firms but may have a greater impact on engagements performed by NAFs. However, NAFs that choose to use a manual recording system may face recurring costs associated with the continued collection of data and reporting of the final metrics. These costs likely will vary with the size of the audit team.

Finally, the magnitude of the variable costs to record and collect information may depend on the final metric. For example, collecting the information needed to calculate the final Workload metrics will likely be relatively straightforward as such information is likely already stored in firms' extant timekeeping systems. One commenter said that the proposed engagement-level Workload metric would take considerable effort to compile and calculate. The commenter did not articulate a basis for their conclusion. To the contrary, the Board believes the final Workload metric area will not be burdensome to calculate for several reasons. First, based on commenters' views, the Board decided to exclude staff from the final Workload metric calculations. The Board believes this should reduce the effort required by firms to compile and calculate the metrics. Second, firms that use other auditors or serve as an other auditor should already be tracking partner and manager hours in order to calculate total

³⁹⁰ Commenters' concerns about the cumulative impacts of multiple PCAOB standards and rules with overlapping implementation periods including potential benefits are discussed above.

³⁹¹ See Memorandum from Division of Risk, Strategy, and Financial Innovation (now, Division of Economic and Risk Analysis) and Office of the General Counsel to Staff of the Rulewriting Divisions and Offices re: Current Guidance on Economic Analysis in SEC Rulemakings (Mar. 16, 2012) (SEC Staff Guidance), 12.

³⁹² See Kathleen M. Bakarich and Patrick E. O'Brien, *The Robots are Coming . . . But Aren't Here Yet: The Use of Artificial Intelligence Technologies in the Public Accounting Profession*, 18 *Journal of Emerging Technologies in Accounting* 27, (2021) and Dereck Barr-Pulliam and Amanda Carlson, *Breaking Barriers to Change: The COVID-19 Pandemic's Impact on Attitudes Toward and Willingness to Pay for Audit Innovation*, SSRN Electronic Journal (2024). The Board notes that SSRN does not peer review its submissions.

audit hours pursuant to Form AP reporting. PCAOB staff analysis of AuditorSearch data finds that approximately 48% of audits of accelerated filers or large accelerated filers involved other auditors. Third, firms that track time electronically should be able to access hours information by staffing level and time period and make the required calculations electronically. The Board believes most larger firms track their time electronically already. However, the Board recognizes that some of the smaller firms may not. Indeed, one commenter said that many firms have moved away from the burden of time reporting. As discussed above, some of these smaller firms may choose to build a system that would track the information needed to efficiently produce the final metrics, including in the final Workload metric area. Finally, the Board also notes that firms will be permitted to use a reasonable method to estimate the components of a calculation when actual amounts are unavailable.

One commenter said that there could be costs associated with coordinating data collection efforts across firms. The Board recognizes that such costs would likely arise. However, the Board notes that the adjustments the Board has made to the set of required metrics and their calculations should alleviate this burden. Furthermore, firms should generally already be coordinating data collection efforts for Form AP reporting purposes and this data will be subject to quality controls over firm reporting. To the extent such coordination is necessary, academic research finds that 94% of component auditors identified on Form AP are associated with the lead auditor.³⁹³ This provides additional evidence there is a strong existing relationship between these firms which should facilitate any additional transfer of information required to implement the final rules.

Aggregating & Calculating Firm and Engagement Metrics

Once the information is collected, it will need to be aggregated and the final metrics will need to be derived following the calculation requirements discussed above. Costs will likely be incurred to make those calculations and to make and validate the filing. Moreover, these costs will be greater for

firms that will use manual systems than firms that will use automated systems.

Making the Filing

Once collected, aggregated, and calculated, the final metrics will then need to be filed with the PCAOB. There will be costs associated with developing the filing, validating the information, and drafting any voluntary textual disclosures. This could entail administrative costs such as legal review of the textual disclosures. Firms may also need to extend their existing quality control processes around PCAOB filings to cover these new filings.

Overall, it is difficult to estimate the potential costs that audit firms will incur to produce the final metrics owing in part to the variability in firms' current systems (e.g., automated versus manual) and the extent to which firms already produce similar metrics for internal reporting to national offices or external reporting in firm transparency reports. However, the Board may extrapolate from the economic impacts of prior PCAOB disclosure rules. For example, as a result of the implementation of AS 3101 in 2019, the largest four audit firms surveyed through the PCAOB's outreach activities indicated they incurred, on average, 23,000 hours to develop the processes and procedures to support the implementation of CAMs. The PCAOB staff monetized the economic impact to those largest four audit firms to be approximately \$4.4 million dollars each.³⁹⁴ Those audit firms also each reported 14,600 hours of training, estimated at \$2.1 million dollars. The next four largest audit firms reportedly incurred 3,700 hours, on average, to develop processes and procedures, and 3,100 hours in training their personnel to support the implementation of CAMs—estimated at \$610,000 and \$435,000, respectively, on average for each firm.³⁹⁵ As estimated through April 2021, the smallest of audit firms, after excluding outliers, reported only 400 hours implementing the CAM requirements, with 600 hours associated with CAM related training. The average implementation costs for these smallest of firms was estimated to be approximately \$185,000 per firm.³⁹⁶

³⁹⁴ See, e.g., Michael J. Gurbutt, Wei-Kang Shih, Carrie von Bose, Staff White Paper: Stakeholder Outreach on the Initial Implementation of CAM Requirements, PCAOB 1, 8 (2020).

³⁹⁵ Id. The "next four largest firms" refers to BDO USA LLP, Crowe LLP, Grant Thornton LLP, and RSM US LLP. See Gurbutt et al., *Stakeholder Outreach* at n. 4.

³⁹⁶ See Gurbutt, et al., *Staff White Paper: Second Stakeholder Outreach on the Initial Implementation*

Extrapolating these data points to the population of firms expected to be impacted by the final requirements implies a total cost of approximately \$67 million.³⁹⁷

Following the implementation of processes, procedures, and training, surveyed audit partners report that 1% of total audit engagement hours were spent identifying, developing, and communicating CAMs.³⁹⁸ PCAOB staff research found no systematic evidence of increased engagement hours for audits of large accelerated filers³⁹⁹ and a statistically significant 6.6% increase in engagement hours for audits of non-large accelerated filers.⁴⁰⁰ The findings suggest that there could potentially be variable costs associated with the final requirements that persist after the implementation phase.

Auditors of large accelerated filers realized efficiencies in developing and communicating critical audit matters in the second year of implementation, reporting that they generally spent the same or less time on critical audit matters compared to the initial year of implementation.⁴⁰¹ Accordingly, the Board expects that the costs to produce the final metrics will be most significant for the initial filings under the final rules because firm personnel will need to familiarize themselves with new reporting requirements and forms. In subsequent reporting periods, the Board anticipates that firms will incur lower costs as personnel become more familiar with the reporting requirements.

As noted above, AS 3101 and the final rules are different in ways that may

of CAM Requirements 1, 13. "Smaller audit firms" refers to Marcum LLP; Moss Adams LLP; Baker Tilly US LLP; BKD LLP; CohnReznick LLP; Dixon Hughes Goodman LLP (DHG); EisnerAmper LLP; Mayer Hoffman McCann P.C. (MHM); Plante & Moran, PLLC; and WithumSmith + Brown, PC.

³⁹⁷ As an example, aggregating these costs across active firms in the market implies roughly \$6.5 million in procedures and training for the largest four audit firms (\$4.4 million for processes and procedures and \$2.1 million for training), \$1.045 million for the next four largest firms, and \$185,000 for 202 smaller impacted firms, would amount to a combined \$67.0 million in costs to produce the final metrics outside of implementation costs associated with the systems (\$6.5 million × 4 larger firms + \$1.045 million × 4 next-largest firms + \$0.185 × 199 smaller firms = \$67.0 million).

⁴⁰¹ See, e.g., *Interim Analysis Report: Further Evidence on the Initial Impact of Critical Audit Matter Requirements*, PCAOB Rel. No. 2022-007 (Dec. 7, 2022).

³⁹³ See William M. Docimo, Joshua L. Gunn, Chan Li, and Paul N. Nicholas, *Do Foreign Component Auditors Harm Financial Reporting Quality? A Subsidiary-Level Analysis of Foreign Component Auditor Use*, 38 *Contemporary Accounting Research* 3113 (2021).

limit the relevance of the costs of AS 3101 to the potential costs of the final rules. For example, as discussed above, the final metrics will require the collection of a broader array of engagement-level information whereas CAM requirements focus more on narrative description. However, the processes, procedures, and training aspects are likely more comparable.

One commenter agreed with the Board's caveat that the CAMs requirements are not a perfect analogy for the proposed metrics. More specifically, the commenter said that the proposal would require significantly more effort to implement than AS 3101 due, in part, to the need to update QC policies and procedures. Furthermore, commenters pointed to specific facts and circumstances that could exacerbate the costs of the final metrics (*e.g.*, coincidence with other new PCAOB standards). One commenter asserted, incorrectly, that the proposal included no quantification of costs associated with reporting.

One commenter suggested that the Board perform further analysis of the firms' current data collection efforts and the data collection efforts that will be required under the final requirements. As part of the Board's economic analysis, the Board considered all relevant information available to the Board including information gathered through the Board's oversight activities, academic research, and comments received on the proposing release.

Commenters agreed that firms will incur some costs to report the final metrics. Two commenters said validating personnel's total experience prior to joining the firm will be challenging and expensive because firms do not generally track this information. Another commenter said that reporting industry experience of audit personnel would be costly because sufficient information to report this metric is not usually held in the human resources administration of firms. One commenter said the proposed engagement-level Workload metrics were very complicated and would take considerable effort to prepare. One commenter said that many firms do not track non-chargeable hours.

Commenters also said that they do not usually track restatements of former clients' financial statements. The Board considered these costs and have made several modifications to the required calculations which the Board believes will help mitigate them. The Board also notes that, under the final rules, firms would be permitted to use a reasonable method to estimate the components of a

calculation for which data are unavailable.

One commenter said that producing some of the proposed firm-level metrics (*e.g.*, Partner and Manager Involvement and Allocation of Audit Hours) would be challenging because it would require aggregation of engagement-level data, including data from other auditors, for a period different from that required for the corresponding proposed engagement-level metrics. The Board agrees there could be some incremental costs associated with collecting and validating data from other auditors. However, when producing the final firm-level metrics, firms would be able to leverage the audit hours information they already collected and validated pursuant to Form AP reporting for audit reports issued during the 12-month period ended September 30. Therefore, the Board does not believe the difference between the period covered by the firm-level metric and the period covered by Form AP presents unique challenges. To the contrary, the Board believes that adopted approach is an efficient way to provide information to stakeholders while minimizing costs to firms. The adjustments the Board has made to the calculations (*e.g.*, reducing the scope of the Partner and Management Involvement, Workload, and Allocation of Audit Hours calculation to large accelerated and accelerated filers only) and the Board's decision not to adopt the proposed Use of Shared Service Centers metric should attenuate any concerns like those raised by this commenter.

Several commenters said that there could be costs associated with correcting immaterial errors, particularly with regard to engagement-level metric reporting on Form AP. The Board agrees cost related to this aspect of the final rules could arise, either through extra up-front quality control costs or costs associated with amending an inaccurate Form AP. However, the Board believes investors and audit committees need reliable information, and correction of errors is an important part of ensuring the reliability of the information.

ii. Indirect Costs Arising From Market Reactions to the Final Metrics

The Board also reviewed and considered costs that could arise from how investors, audit committees, and auditors may react to the final metrics. For example, improved decision-making on the part of audit committees could lead to costs from switching auditors. Most of these costs are not feasible to quantify. However, they are likely to be incurred only to the extent that they are

deemed reasonable from a business perspective.

a. Understanding the Final Metrics

Investors that use the metrics will incur costs to understand the final metrics and incorporate them into their decision-making. Investors will choose to bear these costs only if they anticipate that the costs are outweighed by the benefits of using the metrics. Due to economies of scale, the Board believes institutional investors will be more likely to incur these costs than retail investors. Audit committees may incur costs to understand the final metrics because their fiduciary duties may prompt them to do so. Moreover, audit committees may spend additional time discussing the final metrics with their auditor, which would require both audit committees' and auditors' time.⁴⁰² Auditors may spend time and resources developing materials to explain or contextualize their metrics for the audit committee (*e.g.*, presentations and decision aids).

Furthermore, investors and audit committees may incur costs in monitoring the final metrics and learning to extract decision-making information from them. Investors may incur costs incorporating the final metrics into their investment decisions or exercising oversight over issuers and audit committees. Audit committees may incur costs to review the final metrics in support of their auditor oversight responsibilities.

There may also be costs associated with interpreting certain final metrics in relation to final metrics across other firms and engagements. For example, partner and manager involvement on an engagement may be more informative when considered in the context of the firm's overall partner and manager involvement or other firms' partner and manager involvement metrics. Moreover, investors and audit committees may spend time researching the state of the market for assurance services to provide more context to the final metrics.⁴⁰³

Auditors may also incur costs to monitor how their final metrics compare to those of their competitors. GNPs, in particular, could deploy significant resources in this way. NAFs may have less ability to fully evaluate the information contained in the final

⁴⁰² See below for additional discussion of attention diversion of audit committees.

⁴⁰³ For example, some literature suggests that the implications of staff turnover are better understood in the context of accounting labor supply. See Khavis and Szerwo, *Audit-Employee Turnover, Audit Quality, and the Auditor-Client Relationship* 2.

metrics and choose instead to retain outside experts to provide such research. Firms may also use the final engagement-level metrics to inform their acceptance and continuance policies (e.g., by considering industry experience).

Referring to academic research on information processing costs, one commenter incorrectly stated that the Board had not considered the costs incurred understanding the proposed metrics.⁴⁰⁴ The commenter also said there would be costs associated with misunderstanding the metrics. The Board discussed such costs in the proposal and again below.

b. Revising Audit Approaches

Armed with the new information discussed above, audit committees may question their auditor's audit approach. This may prompt auditors to make changes to their audit approaches. For example, an audit committee may come to the belief that the audit partners have too many other duties and may express this concern to the auditor. This may prompt auditors to adjust how they are staffing the audit. Similarly, audit firms could incur costs making those changes. Some of these costs may be greater than others. For example, reducing excessive turnover and workloads, to the extent they exist, could require a significant investment in resources.

As discussed above, the final rules may lead audit firms to compete on the final metrics. This could lead some firms to update their audit approaches, provide additional training, or increase their specialization. For example, auditors may increase training in industry-specific areas or hire additional individuals with specialized knowledge. As another example, to the extent issuer preferences show an increased demand for auditors with lower workloads, firms may increase staffing. Such an increase in human-capital investment will likely increase labor and overhead costs for audit firms. Auditors may also increase the quality review of their work to reduce the likelihood of restatements or enhance their audit procedures to compete on the basis of higher-quality audit services.

c. Switching Auditors

As discussed above, the final rules could result in increased auditor switching as investors and audit committees compare and evaluate current and alternative auditors. Should

audit committees ultimately choose to change auditors, there may be switching costs, both to the issuer and the auditor. For example, an auditor's work may be less efficient or less effective in the first years of auditing a new issuer as the auditor works to build an understanding of the issuer's business and financial reporting risks. There would likely be a transitory period of increased auditor switching, after which auditor switching would stabilize as the audit market reaches a new equilibrium.

iii. Other Indirect Costs

Economic theory suggests that auditors may pass on to issuers costs incurred as a result of the final rules in the form of higher audit fees.⁴⁰⁵ In addition, the degree to which increases in variable costs, such as certain firm compliance costs, are expected to be passed on will vary based on how widespread the costs are across competitors. Increases in variable costs that impact all sellers in an imperfectly competitive market are more likely to be passed on than cost increases that impact only a subset of sellers.⁴⁰⁶ If compliance costs have a greater impact on a subset of firms, such as smaller firms, those firms may be less inclined to pass on the incremental costs in order to stay competitive with larger firms. Accelerated filers and large accelerated filers may be disproportionately impacted by a cost passthrough because (i) auditors that do not audit accelerated filers or large accelerated filers would be out of scope and (ii) accelerated filer and large accelerated filer engagements would require additional data collection efforts.

Evidence from the PCAOB's PIR of AS 3101 suggests that there was no statistically significant increase in audit fees for the audits of large accelerated filers but a statistically significant 3.0% increase for the audits of non-large accelerated filers.⁴⁰⁷ Financial statement preparers and audit committees interviewed during the PCAOB's investor outreach efforts indicated that there were minimal or immaterial

costs.⁴⁰⁸ One academic study found a small, statistically insignificant audit fee increases as a result of PCAOB Rule 3211.⁴⁰⁹ Another study found that audit fees increased by a statistically significant 7.9 percentage points.⁴¹⁰

One commenter noted that the proposal failed to consider impacts on entities that are neither issuers nor broker dealers but are required or may be required under SEC rules to use a PCAOB-registered and inspected firm. The Board notes that the commenter provided just two examples of such SEC rules. One rule was recently vacated and the other is a proposal.⁴¹¹ The Board acknowledges that, to the extent any such entities are required under SEC rules to obtain an audit from a PCAOB-registered firm, they could be indirectly impacted by the final rules if their auditor is both (i) subject to the final requirements and either (ii) chooses to pass on to these entities any part of the costs associated with the final rules or (iii) exits the market as a result of final rules.⁴¹² Any passthrough of cost will likely be limited by the fact that the engagement-level reporting requirements will not apply to the audits of these entities and most of the firm-level metrics will not require information from their audits. This means that the final rules should have little or no effect on the cost of their audits. Furthermore, the Board notes that any costs to such entities could be offset by benefits. For example, stakeholders in the audit of these entities may use the final metrics to inform their decision-making.

⁴⁰⁸ See Gurbutt, et al., *Staff White Paper: Second Stakeholder Outreach on the Initial Implementation of CAM Requirements* 21.

⁴⁰⁹ See Cunningham, et al., *What's in a Name?* 141 and 156 (finding no statistically significant increase in fees following the implementation of AS 3211, Form AP, in 2017).

⁴¹⁰ See, e.g., John and Liu, *Disclosure of an Audit Engagement Partner's Name*.

⁴¹¹ See *SEC Final Rules on Private Fund Advisers: Documentation of Registered Investment Advisers Compliance Reviews*, SEC Rel. No. IA-6383 (Aug. 23, 2023). See also *SEC Proposed Rule on Safeguarding Advisory Client Assets*, SEC Rel. IA-6384 (Mar. 9, 2023).

⁴¹² SEC rules require the use of PCAOB-registered or PCAOB-registered and inspected audit firms by entities other than issuers and registered broker-dealers, including certain investment advisers, pooled investment vehicles, security-based swap data repositories, and clearing agencies. See, e.g., 17 CFR 275.206(4)-2 (custody of funds or securities of clients by investment advisers); 17 CFR 240.13n-11 (chief compliance officer of security-based swap data repository; compliance reports and financial reports); 17 CFR 240.17ad-22 (standards and clearing agencies); 17 CFR 240.15c3-1g (conditions for ultimate holding companies of certain brokers and dealers, Appendix G to 17 CFR 240.15c3-1); and 17 CFR 240.18a-1 (net capital requirements for security-based swap dealers for which there is not a prudential regulator).

⁴⁰⁴ See, e.g., Charles M.C. Lee and Qinlin Zhong, *Shall We Talk? The Role of Interactive Investor Platforms in Corporate Communication*, 74 *Journal of Accounting and Economics* 101524 (2022).

⁴⁰⁵ Economic theory suggests that fixed costs are less likely to be passed on. Only changes to variable costs are generally expected to impact sellers' pricing decisions. See, e.g., Mankiw, *Principles of Economics* 284 and 307 (showing that the profit-maximizing price is a function of marginal cost rather than fixed costs).

⁴⁰⁶ See, e.g., Erich Muehlegger and Richard L. Sweeney, *Pass-Through of Own and Rival Cost Shocks: Evidence from the U.S. Fracking Boom*, 104 *Review of Economics & Statistics* 1361 (2022).

⁴⁰⁷ See Gurbutt and Shih, *Econometric Analysis on the Initial Implementation of CAM Requirements*; and Fluharty-Jaidee, et al., *Staff White Paper: Second Econometric Analysis on the Initial Implementation of CAM Requirements*.

3. Unintended Consequences

In addition to the benefits and costs discussed above, the final rules could have unintended consequences. The following discussion describes potential unintended consequences the Board considered and, where applicable, any mitigating or countervailing factors.

i. Auditors May Exit the Market for Accelerated Filers and Large Accelerated Filers Due to Increased Competition and Costs

The final rules may lead auditors to compete on the final metrics. The Board believes this new competitive dynamic will be beneficial.⁴¹³ However, firms that are less able to compete on the final metrics could lose market share or be forced to lower their audit fees, resulting in strains on their profitability. Profitability could also be negatively impacted by the costs of the final rules. In some cases, these auditors may exit the public audit market for accelerated filer and large accelerated filer audits. This could reduce the number of potential auditors some accelerated filers or large accelerated filers may consider thereby reducing competition. One commenter noted that (i) the Big 4 firms already audit over 88% of the large accelerated filers and (ii) research shows that the population of firms with less than 100 clients has decreased by over 50% in recent years.⁴¹⁴

Many commenters said that the proposal could lead smaller firms to exit the market for accelerated filer or large accelerated filer audits and increase concentration. One commenter said that the proposed reporting requirements would be particularly onerous on non-U.S. firms that carry out only one or a small number of relevant PCAOB engagements. One commenter suggested that smaller firms may exit the public company audit market as a result of the proposed requirements, in conjunction with other standards recently issued and proposed by the PCAOB, and this could negatively impact smaller public companies that are seeking a smaller audit firm. The commenter referred to a

working paper on smaller firm exits to support their view. However, the cited paper finds the opposite result, namely that changes in PCAOB regulations play little if any role in a firm's decision to deregister.⁴¹⁵ One commenter noted that smaller firm exit could also reduce the benefits associated with firms competing on the proposed metrics. One mid-sized firm said that smaller firms would have fewer issuers to spread their fixed costs over. The same commenter said the proposal would put considerable strain on firms that provide audit services to the 40% of issuers that represent the remaining, at most, 2% of capital markets. The commenter did not indicate how they believe these issuers would be impacted by the proposal.

One commenter who represents CPAs said that the costs of the proposal could disproportionately impact smaller firms which could lead to the exit of some of the smaller firms. The commenter provided additional comments based on the results of a survey of small and mid-sized firms administered by the commenter. The commenter's survey was distributed to the 500 largest CPA firms in the United States. Eighty-eight firms responded. The respondent firms' revenues range from less than \$10 million to greater than \$500 million. The commenter provided the survey questions. All respondents that perform U.S. public company audits reported that the proposal would require a very heavy or substantial effort and would strain resources, driven in part by economies of scale. The Board notes that this data point is based on 36 survey participants, some of whom do not perform audits of accelerated filers or large accelerated filers and therefore would not be subject to the final requirements. The survey reports that 23% of respondents (approximately eight or nine respondents) would definitely or strongly consider exiting the public company audit market entirely.⁴¹⁶ However, the survey provides no information that would help the Board assess the significance of these firms to the overall audit market or whether they even audit accelerated filers or large accelerated filers, and therefore would be impacted by the

final requirements. The survey also reports that another 25% of respondents (9 respondents) that perform U.S. public company audits would eliminate or manage their client base of accelerated filers. However, in addition to the lack of information that would help the Board assess the significance of these firms to the overall audit market, the relevance of this result is obscured by the conflation of "elimination" and "management" of accelerated filers. Finally, the commenter provided little detail on how the survey was performed (e.g., how the proposal was described to the survey participants).

The potential negative consequences of firm exit could be mitigated by several factors. First, exit may be limited primarily to the smaller firms among those that would be impacted by the final rules, since smaller firms may be disproportionately impacted by the fixed costs of complying with the final rules. Reduced competition will thus tend to impact smaller accelerated filers rather than larger large accelerated filers, which typically require larger auditors. Second, there is little reason to expect exit from the market for non-accelerated filer audits. In fact, competition may increase in the non-accelerated filer issuer audit market to the extent firms exiting the accelerated filer and large accelerated filer issuer markets redeploy capacity to the non-accelerated filer issuer audit market. Finally, firms that remain profitable in the accelerated filer and large accelerated filer issuer audit markets could expand their market share, perhaps by acquiring additional capacity from exiting firms.

One commenter provided research suggesting that firms that exited the market following the Sarbanes-Oxley Act were not of lower quality than firms that remained.⁴¹⁷ The Board believes the commenter implied that issuers or broker-dealers may not necessarily obtain a higher quality audit after switching to a new auditor that has remained in the market. The study acknowledged that prior research using other audit quality proxies finds the opposite result, namely, that exiting firms indeed have lower audit quality.⁴¹⁸ Firm size is a widely accepted proxy for audit quality.⁴¹⁹ The

⁴¹³ See above for a discussion on the benefits linked to competition.

Lennox, *The Effect of SOX on Small Auditor Exits and Audit Quality*, 52 *Journal of Accounting and Economics* 21 (2011); Vincent Rylan, *The Big Four Continue to Dominate Auditing: Weekly Stat*, CFO Magazine, (June 29, 2022) available at <https://www.cfo.com/news/the-big-four-continue-to-dominate-auditing-weekly-stat/>; Brant Christensen, Kecia Williams Smith, Dechun Wang, and Devin Williams, *The Audit Quality Effects of Small Audit Firm Mergers in the United States*, 42 *Auditing: A Journal of Practice & Theory* 75 (2023).

⁴¹⁵ See Michael Ettredge, Juan Mao, and Mary S. Stone, *Small Audit Firm De-Registrations From the PCAOB-Regulated Audit Market: Strategic Considerations and Consequences*.

⁴¹⁶ Citing the result of the survey provided by this commenter, another commenter said that nearly 75% of respondents would consider eliminating their public company audit process as a result of the proposal. However, this is not what the survey found. Rather, the survey found that 50% of respondents would at least consider getting out of the public company market.

⁴¹⁷ See Neil L. Fargher, Alicia Jiang, and Yangxin Yu, *Further Evidence on the Effect of Regulation on the Exit of Small Auditors from the Audit Market and Resulting Audit Quality*, 37 *Auditing: A Journal of Practice & Theory* 95 (2018).

⁴¹⁸ See DeFond and Lennox, *The Effect of SOX on Small Auditor Exits and Audit Quality*.

⁴¹⁹ See DeFond and Zhang, *A Review of Archival Auditing Research*. Though firm size is widely accepted as a proxy for audit quality, it is not a

Board's oversight activities indicate that noncompliance with auditing standards is higher among smaller firms.⁴²⁰ Therefore, to the extent smaller firms tend to exit rather than larger firms, as commenters contended, then audit quality could improve on average as issuers switch to larger firms. The Board recognizes there is currently some debate on the extent to which the large-firm audit quality effect is driven by correlated issuer characteristics rather than auditor effects.⁴²¹ The Board believes compliance with auditing standards is less sensitive to issuer characteristics than other audit quality proxies (e.g., absolute discretionary accruals). After assessing the available evidence, the Board believes it is likely that the firms that any issuers or broker-dealers would switch to would likely not provide lower quality audits.

Two commenters said that the final rules would disproportionately impact smaller firms, leading them to increase their audit fees. Several commenters suggested that regulatory burdens incentivize companies to go or remain private. Referring to the SEC Office of the Advocate for Small Business Capital Formation Fiscal Year 2023 annual report as support ("SEC Small Business Advocate Annual Report"), one commenter highlighted that: (i) in 2022, the number of exchange-listed IPOs dropped to its lowest point since 2009; (ii) small exchange-listed companies accounted for the vast majority of the decline; and (iii) smaller companies are disproportionately impacted by regulatory costs because a large portion of regulatory costs are fixed.⁴²² The Board agrees that the final rules could disproportionately impact the smaller in-scope firms. However, smaller issuers—those that the commenter contended are most sensitive to regulatory burden and at greatest risk of

eschewing the capital markets—would be minimally impacted by the final rules for several reasons. First, firms that do not audit accelerated filers or large accelerated filers (that is, all but approximately 207 firms) would be out of scope and therefore there would be no effect on audit fees for their non-accelerated filer issuers. Second, to the extent in-scope firms choose to pass through all or part of the cost of the final rules, they would be less likely to do so for their non-accelerated filer issuers because their audits will not be subject to the engagement-level reporting requirements. Third, the Board does not believe issuers will incur any significant fixed costs, which the commenter asserted disproportionately impact smaller companies. Therefore, any disincentive among smaller companies to participate in capital markets arising from increased audit fees would likely be minimal. Among accelerated filer and large accelerated filer issuers, the Board notes that audit fees, on average, comprise roughly 0.15% to 0.2% of issuer revenue and any increase in audit fees attributable to the final rules would be a fraction of this.⁴²³ Therefore, any disincentive among larger companies to participate in capital markets arising from increased audit fees would also likely be minimal. Fourth, while the SEC Small Business Advocate Annual Report demonstrates that smaller exchange-listed companies accounted for the vast majority of the decline in exchange-listed companies, the report also cites a paper that concludes regulatory cost itself is unlikely to explain the full magnitude of IPO decline in the United States over the past two decades.⁴²⁴ Indeed, PCAOB staff analysis finds that accounting fees typically comprise roughly 4.5% of the costs of an initial public offering (0.3% of the proceeds).⁴²⁵ With respect to the

recurring costs of remaining a public company, one market research report indicates that accounting fees comprise 32% of the costs.⁴²⁶ Any incremental costs associated with IPOs or remaining a public company attributable to the final rules would be a fraction of these costs.

In connection with their concerns regarding potential disproportionate costs to smaller firms, one commenter said the PCAOB should evaluate and identify the characteristics of investors in smaller companies and determine if the needs of investors in those companies are the same as the potential needs of investors in large companies. The Board notes that one recent working paper finds that institutional ownership is, on average, lower for smaller companies.⁴²⁷ Since institutional investors may be more likely to use the metrics, these data suggest that investors in smaller public companies may, on average, be less likely to use the metrics. However, the Board believes that investors in smaller companies could still benefit from the metrics because: (i) retail investors could benefit from the improved accessibility and comparability of information about firms and their engagements; and (ii) institutional ownership in smaller companies, though less than larger companies, is not trivial (41.6% for the lowest quintile of companies by market capitalization).⁴²⁸ Furthermore, as the Board discussed below, financial reporting quality may be relatively more important for smaller companies. Finally, the Board notes that the final rules require engagement-level reporting only for accelerated filers and large accelerated filers and firm-level reporting only for firms that audit at least one accelerated filer or large accelerated filer. This should help mitigate any concern that investors in smaller companies do not have a need for the final metrics.

notes that the accounting fee share of proceeds is decreasing in deal proceeds. PCAOB staff calculated the accounting fee share of IPO costs as the ratio of all accounting fees to all IPO costs across all deals in the Board's sample. The PCAOB staff's analysis assumes IPO costs are equal to the sum of accounting, legal, and investment bank underwriting fees. The PwC market research report indicates that there are other IPO cost categories, but they are relatively small.

⁴²⁶ See PwC, *Considering an IPO?*

⁴²⁸ *Id.*

perfect predictor of audit quality. Some large firms may provide low quality audits and some small firms may provide high quality audits.

⁴²⁰ See, e.g., *Spotlight Staff Update on 2023 Inspection Activities* (Aug. 2024), available at <https://pcaobus.org/resources/staff-publications> and PCAOB Rel. No. 2024-005 at Figure 1.

⁴²¹ See Alastair Lawrence, Miguel Minutti-Meza, and Ping Zhang, *Can Big 4 Versus non-Big 4 Differences in Audit-Quality Proxies be Attributed to Client Characteristics?*, 86 *The Accounting Review* 259 (2011); Mark DeFond, David H. Erkens, and Jieying Zhang, *Do Client Characteristics Really Drive the Big N Audit Quality Effect? New Evidence from Propensity Score Matching*, 63 *Management Science* 3628 (2017).

⁴²² See U.S. Securities and Exchange Commission, Office of the Advocate for Small Business Capital Formation, *Annual Report Fiscal Year 2023* citing an earlier working paper version of Michael Ewens, Kairong Xiao, and Ting Xu, *Regulatory Costs of Being Public: Evidence from Bunching Estimation*, 153 *Journal of Financial Economics* 103775 (2024).

⁴²³ See Ideagen Audit Analytics, *20-Year Review of Audit Fee Trends 2003–2022*, (July 2023) at 16.

⁴²⁴ See Ewens, et al., *Regulatory Costs of Being Public* (explaining that non-regulatory factors—such as decline in business dynamism, shifting investment to intangibles, abundant private equity financing, changing economies of scale and scope, and changing acquisition behavior—are likely to play a more important role than regulatory cost in the decline of IPOs).

⁴²⁵ PCAOB staff obtained data on accounting fees and legal fees from Audit Analytics and investment bank underwriting fees from a PwC market research report. See PwC, *Considering an IPO? First, Understand the Costs*, available at <https://www.pwc.com/us/en/services/consulting/deals/library/cost-of-an-ipo.html> and Audit Analytics, *2018–2019 IPO Accounting and Legal Fees*, (Feb. 20, 2020). PCAOB staff calculated deal proceeds by multiplying the quantity of shares issued by their price at issue. PCAOB staff calculated the accounting fee share of proceeds as the proceeds-weighted average accounting fee share of proceeds across all deals in the Board's sample. The Board

ii. Some Auditors May Strategically Manage Their Issuer Portfolios

As discussed above, auditors that do not audit accelerated filers or large accelerated filers will not be subject to the final reporting requirements. Some auditors may strategically seek to audit only non-accelerated filers to avoid disclosure of the final metrics, either to avoid costs of complying or out of concern that disclosing the metrics could potentially damage their reputation.⁴²⁹ As a result, there could be a separating equilibrium in the audit market.⁴³⁰ One commenter agreed that smaller firms may manage their engagement portfolios to avoid being required to comply with the final requirements and one commenter provided the results of a survey indicating that some firms may eliminate or manage their client base of accelerated filers. Assuming that lower-quality auditors are more likely to avoid accelerated filers in this way, this would increase the supply of low-quality auditors to non-accelerated filers and decrease the supply of low-quality auditors to accelerated filers. For non-accelerated filers, this supply shock could increase competition among audit firms for non-accelerated filers and therefore reduce audit fees. However, because the supply shock would consist primarily of low-quality auditors, it could also lower audit quality for non-accelerated filers. For accelerated filers, the opposite would occur. Reduced availability of auditors would tend to reduce competition and therefore increase audit fees. However, because higher-quality auditors would remain, audit quality could increase. As a result of these complex and countervailing influences, it is unclear whether this unintended consequence would have a net positive or negative impact.

Auditors may also attempt to manage their metrics via their acceptance and

continuance policies. Reputation risks to the auditor associated with individual engagements may start to play a greater role in firms' acceptance and continuance decisions as well as their audit fee decisions because new engagements could impact firms' metrics and hence their ability to charge audit fees on existing engagements. For example, a prospective issuer engagement may present a higher risk of restatement. Since restatements will be reported on Form FM in a uniform and comparable way, auditors may require a fee premium for this issuer to offset any negative effect the issuer may have on the auditor's metrics. In extreme cases, risky issuers may not be able to find an auditor, may be forced to hire a low-quality auditor, or may be forced to delist.

To avoid such adverse outcomes, issuers may take steps to reduce their contribution to audit risk.⁴³¹ For example, issuers may become more forthcoming with information or opt for less aggressive financial reporting. This potential unintended consequence would also be mitigated to the extent capital markets recognize that an auditor's metrics are driven in part by the riskiness of the auditor's client portfolio rather than the quality of the auditor.⁴³² Indeed, auditors will have the opportunity to explain important context like this in the qualitative portion of the final disclosures.

iii. Investors, Audit Committees, and Auditors May Misinterpret or Misuse the Final Metrics

As discussed above, it is possible that the final metrics may not relate to audit quality in a straightforward way. As a result, there is a risk that investors, audit committees, and auditors could misinterpret, or misuse, the final metrics (e.g., by assuming they are strongly related to audit quality). The outcomes of misinterpretation or misuse are difficult to predict because they would be rooted in complex aspects of human psychology.⁴³³ As one example, investors and audit committees could rely too heavily on a final metric (e.g., when making capital allocation or auditor selection decisions). In response

to market forces or requests from audit committees, some auditors could make changes to their audit approach that could negatively impact audit quality. As another example, auditors could mistakenly attribute other firms' competitiveness to one final metric and adjust their audit approach in a way that compromises the quality of their services.

Many commenters agreed that there would be a risk that users, particularly investors, of the proposed metrics would misunderstand the metrics. One commenter said the proposed metrics would be misinterpreted. The commenter suggested that this may undermine the benefits of the proposal. Another commenter said that users would not understand some of the proposed metrics. One commenter suggested that this potential unintended consequence should be acknowledged as a cost because the negative effects would be borne by investors. One commenter performed a survey of audit committee chairs.⁴³⁴ Some survey participants agreed that the proposed metrics could lead to inappropriate conclusions. One commenter said that the risk of misusing the proposed metrics by audit committees could lead to increased director insurance costs. One commenter said investors or other stakeholders could pressure audit committees to only appoint auditors whose metrics fall within a certain range without considering other aspects of the firm's audit quality. One commenter said that overemphasis on metrics by auditors could commoditize the profession and reduce incentives to innovate the audit approach.

The Board agrees that, as with other financial information made available to investors, some investors may misunderstand the metrics and make poor decisions as a result. If so, this could negatively impact them. However, the Board believes that the final metrics will likely, on average, improve investors' decision-making and therefore have chosen to acknowledge improved decision-making as a benefit. The Board acknowledges that some misunderstanding could also reduce the magnitude of this benefit. However, the Board believes this unintended consequence, should it arise, would diminish over time as investors learn how to effectively integrate the final metrics into their decision-making. Though the Board believes the metrics will spur competition on quality by allowing firms to credibly differentiate themselves, the Board recognizes it is possible that some firms would

⁴²⁹ Commenters on proposed QC 1000 said that mid-sized firms would deliberately manage their portfolios to avoid the proposed scalability requirements that apply only to annually inspected firms. Therefore, the Board believes that such portfolio management is possible in relation to the final rules. Among the firms that will be impacted by the final rules, approximately 41%, 19%, and 11% had one, two, or three accelerated filer or large accelerated filer engagements during the 12-month period ending September 30, 2023.

⁴³⁰ Contextually, a separating equilibrium occurs when incentives cause a division in the market in which one type of auditor gravitates towards a particular market segment. See, e.g., Michael Rothschild and Joseph E. Stiglitz, *Equilibrium in Competitive Insurance Markets: An Essay on the Economics of Imperfect Information*, 90 *The Quarterly Journal of Economics* 629, 634 (1976) (specifically, the discussion marked *I.6 Imperfect Information: Equilibrium with Two Classes of Customers*).

⁴³¹ Economic theory suggests that private negotiations yield efficient allocations of decision rights. See Ronald Coase, *The Problem of Social Cost*, 3 *The Journal of Law and Economics* 1 (1960).

⁴³² Some research finds that poor financial reporting outcomes are attributable to client risk rather than poor audit quality. See Minutti-Meza, *Does Auditor Industry Specialization Improve Audit Quality?*

⁴³³ See, e.g., Loewenstein et al., *Disclosure* (discussing how "[p]sychological factors severely complicate the standard arguments for the efficacy of disclosure requirements.").

⁴³⁴ See above for more discussion on the survey.

coordinate their metrics. The Board discussed this potential unintended consequence below.

Commenters described specific ways the proposed metrics could create confusion. Several commenters said that some of the definitions in the proposal conflict with other definitions in PCAOB standards or otherwise lead to confusion. The Board does not believe there are any direct conflicts with other PCAOB standards. The Board has attempted to draft the definitions in the proposal as precisely and clearly as possible. Commenters suggest that the ICB industry classification used for the industry specialization metric could create confusion because the SEC uses the SIC system. One commenter agreed that it is appropriate to use the ICB for industry classification. The Board acknowledges that a taxonomy based on the ICB industry classification could create some confusion. However, crosswalks between the ICB system, the SIC system, and other industry classification systems are available. The Board describes in the proposal and above why the Board based the taxonomy on the ICB system rather than the SIC system. One commenter said that the proposed restatements metrics would be difficult to compare with public data because Audit Analytics categorizes restatements in a different way than the proposed requirements would require firms to categorize them. The commenter did not explain what Audit Analytics categorization they are referring to. The Board does not believe a user of the final metrics who is also familiar with Audit Analytics data and wishes to reconcile the two data sources would find it challenging to do so.

One commenter pointed to research that suggests more information, including via mandatory financial disclosure, is not always better for investors.⁴³⁵ Several other commenters

also suggested information overload would be a concern. The Board appreciates this research and agrees that there will be opportunity costs to understand the final metrics. However, the Board notes that investors will be free to disregard the final metrics if they find the costs to understand them exceed their benefits. Furthermore, the Board agrees with one commenter who said that technology would obviate this potential unintended consequence.

Several commenters were concerned that certain calculations would drive misinterpretation. These comments are discussed above. For example, one commenter suggested that users may misinterpret the proposed headcount changes as turnover. One commenter said industry experience of audit personnel could be misleading because it does not distinguish between recent and past experience. The Board also acknowledges that some investors may misunderstand this metric and make poor decisions as a result that will negatively impact them. However, the Board believes that the final requirements would, on average, improve investors' decision-making and therefore have chosen to acknowledge improved decision-making as a benefit. In the final rules, the Board has modified some of the scoping and calculations, which likely will reduce some of the potential for confusion.

iv. Auditors May Attempt To Manipulate the Final Metrics

As discussed above, the final rules could lead firms to compete on the final metrics. As a result, the Board believes some firms will take steps to provide higher service quality. However, it is possible that some firms could instead manipulate the final metrics in ways that create an impression of providing higher service quality when in fact this

is not the case. For example, firms could increase training hours by introducing training that has little benefit for audit quality, or could adjust staffing in ways that they believe make their metrics look better but that do not improve audit quality. This unintended consequence will be analogous, in some regards, to earnings management by financial statement preparers.⁴³⁶

Some final metrics will be more difficult to manage than others. To the extent firms are able to manage a final metric, management of the final metric will tend to reduce the overall informativeness of the corresponding disclosures and could lead investors and audit committees to doubt the quality of other firms' disclosures as well. This could degrade existing empirical relationships between the final metrics and audit quality that have been found in the literature discussed above.⁴³⁷

Referring to academic research, one commenter agreed that firms could try to manipulate their metrics, comparing this incentive to the incentive companies face to manage earnings.⁴³⁸ The same commenter agreed that firms' attempts to manipulate could be detrimental to audit quality. The commenter also suggested that oversight by the PCAOB would create an incentive to intentionally manage the

⁴³⁶ See, e.g., Graham, John R., Campbell R. Harvey, and Shiva Rajgopal, *The Economic Implications of Corporate Financial Reporting*, 40 *Journal of Accounting and Economics* 3, 4 (discussing how "[a] surprising 78% of the Board's sample admits to sacrificing long-term value to smooth earnings"). Firms could manipulate the final metrics in ways analogous to both accounting-based earnings management and real earnings management. For example, they might adjust training hours or reported experience levels without substantive improvements (analogous to accounting-based earnings management) or make operational changes, such as altering client portfolios, solely to improve metrics (analogous to real earnings management).

⁴³⁷ Such behavior can be ascribed to Goodhart's law in that, once the final metrics are disclosed and market participants act upon them, previously defined relationships change, and the final metrics may become unrelated to the alignments previously discussed.

⁴³⁸ See Mark S. Beasley, Joseph V. Carcello, Dana R. Hermanson, *Fraudulent Financial Reporting: 1987–1997: An Analysis of US Public Companies*, Committee of Sponsoring Organizations of the Treadway Commission (1999); Mark S. Beasley, Dana R. Steele, *The Information Content of Mandatory Risk Factor Disclosures in Corporate Filings*, 19 *Review of Accounting Studies* 396 (2014).

metrics. While the Board agrees that PCAOB oversight could put pressure on firms, the Board notes that, in addition to informing the Board's selection of firms, engagements, and focus areas for review, PCAOB oversight will be focused on compliance with the final rules which should deter any efforts to manipulate the final metrics. The commenter also suggested that disclosure of the metrics may change behavior in ways that are harmful to audit quality. The commenter provided specific examples of how this could occur for the proposed internal monitoring and compensation metrics. The Board is not adopting these metrics. As discussed above, the Board believes behavioral responses to the metrics by firms would be largely beneficial.

Referring to the evolution of CAMs, one commenter suggested that the metrics could become boilerplate. The Board agrees that the narrative discussion could potentially become boilerplate to some extent. However, as the quantitative calculations are not boilerplate, the Board believes the corresponding optional narrative discussion will be less susceptible to boilerplate.

In general, QC 1000 should help mitigate this potential unintended consequence by explicitly subjecting the final metrics to firms' QC systems. Furthermore, firms' QC systems and their disclosure practices, including compliance with the final rules, will be subject to PCAOB oversight.⁴³⁹ The required documentation will also constrain firms' ability to manipulate their metrics because it will allow PCAOB inspections staff to understand how the metrics were calculated.⁴⁴⁰ The Board believes the PCAOB will exercise appropriate discretion in its oversight. Furthermore, firms will also be constrained by the fact that manipulations may be detected by comparison to peers. Indeed, academic research on earnings management suggests that peer comparisons help stakeholders identify deceptive reporting practices, serving as a disincentive to manage earnings.⁴⁴¹ Finally, the final rules require that any optional narrative disclosure should be concise and focused on the reported metrics, with a view to facilitating the

reader's understanding of the metrics. The Board believes this should help mitigate the risk that auditors would use the optional narrative disclosure to manipulate users' perceptions of the metrics.

Firms may attempt to improve their metrics by shifting resources from non-accelerated filer engagements to accelerated filer or large accelerated filer engagements. This could reduce the quality of service on non-accelerated filer engagements. However, subject to the audit labor market concerns discussed below, firms would be able to mitigate this effect by acquiring additional resources for their accelerated filer and large accelerated filer engagements (e.g., hiring additional staff). Furthermore, the effect would be mitigated by the fact that non-accelerated filers have additional time to file their financial statements with the SEC compared to accelerated and large accelerated filers. Firms may also attempt to improve certain metrics by shifting resources within an engagement. For example, a firm may attempt to reduce its workload metrics by shifting manager audit hours to more junior staff. However, attempting to do so may not be beneficial to firms because it could at the same time degrade other metrics. For example, if a firm attempted to reduce its workload metrics by shifting manager audit hours to more junior staff, it would at the same time reduce their partner and manager involvement metrics. Furthermore, the firm's QC system operates over all its PCAOB engagements and should limit the extent to which resources can be diverted.

v. Audit Labor Market Impacts

The final metrics could lead to increased public scrutiny of firms and their engagements. This could negatively impact the issuer audit labor market if individual auditors believe the increased public scrutiny negatively impacts their personal reputations or otherwise increases their work pressures. Some commenters agreed that the proposed requirements could make the audit market less attractive to auditors.⁴⁴² One commenter suggested

that the potential negative impact on individual auditors could lead individual auditors to exit the labor market which would in turn drive up labor costs to audit firms. The commenter suggested this could potentially increase labor costs for issuers as well to the extent audit firms seek to hire individuals from issuers that have relevant industry experience.⁴⁴³ Based on discussions with audit committee chairs, one commenter said that survey participants were "very concerned" that the proposal could render the profession less appealing to new auditors.⁴⁴⁴

Referring to a survey commissioned by the commenter's parent organization, one commenter reported that, among undergraduate accounting majors not pursuing or undecided on CPA licensure, 94% cite the regulatory environment as either a major or partial reason.⁴⁴⁵ The Board notes that this statistic ignores the facts that: (i) undergraduate accounting majors not pursuing or undecided on CPA licensure reflect just 20% of the participants in the survey (80% of the participants in the survey are planning to pursue a CPA); and (ii) respondents to the question were allowed to select multiple reasons. Indeed, 10 out of 14 of the possible reasons were cited by over 85% of the respondents as a major or partial reason for not pursuing or being undecided on CPA licensure. Thus, the findings suggest, at most, that the regulatory environment is one of many factors discouraging some students from pursuing a CPA. Furthermore, one commenter suggested that, rather than the regulatory environment, the 150-credit hour requirement to apply for a CPA license and work-life balance concerns are the key reasons college graduates are discouraged from becoming auditors. The commenter said that the challenges finding qualified auditors are especially pronounced for smaller firms.

The Board notes that individual auditors could also use the final metrics to gain insights into workplace conditions and find firms more suitable

⁴³⁹ Some research finds that SEC oversight reduces some forms of earnings management. See, e.g., Lauren M. Cunningham, Bret A. Johnson, E. Scott Johnson, and Ling Lei Liscic, *The Switch-Up: An Examination of Changes in Earnings Management after Receiving SEC Comment Letters*, 37 Contemporary Accounting Research 917 (2020).

⁴⁴⁰ See above for a discussion on the final documentation requirements.

⁴⁴¹ See, e.g., Dichev, et al., *Earnings Quality: Evidence from the Field*.

⁴⁴² One commenter referred to a market research report that finds downwards trends in the number of accounting graduates and the number of hires but upwards trends in the number of new CPA candidates. See Association of International Certified Professional Accountants, *2021 Trends: A Report on Accounting Education, the CPA Exam and Public Accounting Firms' Hiring of Recent Graduates*, (2022). The commenter also referred to an article discussing the perceived talent shortage, firms' efforts to address it, and commentators views. See Stephen Foley, *Accountants Work to Shed 'Boring' Tag Amid Hiring Crisis*, Financial Times (Oct 3. 2022).

⁴⁴³ In the context of this comment, the commenter referred to an academic article where discussion on dysfunctional manager and investor behavior in response to differential audit quality could be found. The Board is unsure how such a discussion or the article itself are relevant to the topic at hand. See Patrick J. Hurley, Brian W. Mayhew, Kara M. Obermire, and Amy C. Tegeler, *The Impact of Risk and the Potential for Loss on Managers' Demand for Audit Quality*, 38 Contemporary Accounting Research 2795 (2021).

⁴⁴⁴ See above for more discussion on the survey.

⁴⁴⁵ See Center for Audit Quality, *Increasing Diversity in the Accounting Profession Pipeline: Challenges and Opportunities*, (July 2023).

to their skillsets and workplace preferences. This may lead firms to compete for labor by improving their workplace conditions. One commenter explained that the industry's challenges attracting staff may be driven in part by the commodification of the audit, which the proposal would help reduce by providing transparency around the quality of the audit. The same commenter agreed that the proposed metrics could empower potential employees when shopping for a potential audit firm employer.

One commenter said that the firm-level retention metric could present firms with a competitive disadvantage for recruiting talent if high turnover rates are provided without sufficient context (e.g., changes in firm structure, shifting industry concentrations, eliminating personnel due to performance or ethical concerns, independence issues resulting in the departure of firm personnel, etc.). The retention metric may result in additional recruiting costs to some firms. However, the Board believes that auditors will benefit from using this metric to shop for employers. Firms would also be able to provide additional context through the optional narrative disclosure.

Some commenters said that the costs would be increased by the need to implement multiple significant PCAOB standards at the same time.⁴⁴⁶ Relatedly, one commenter said that the costs would be exacerbated by the proposed timing for Form FM, which would fall during the same time as PCAOB inspections and the QC system evaluation. The Board acknowledges that the issuer audit labor market may be relatively inelastic in the short run, particularly so given recent concerns about inadequate labor supply, which could increase the cost implications of the additional staffing that would be required to implement multiple PCAOB standards in relatively quick succession. This could exacerbate the costs of the final rules or lead to improper implementation.

vi. Litigation and Reputations Risks

Two commenters suggested that the proposed rules would exacerbate audit firm litigation and reputation risks. One commenter performed a survey of audit committee chairs.⁴⁴⁷ Some participants in the survey agreed that the proposal could create litigation and reputation risk. Regarding litigation risk, the Board

agrees that plaintiffs' lawyers may use the final metrics to support their cases. Supporting this view, some research finds that PCAOB inspection reports with audit deficiencies are positively associated with the number of lawsuits subsequently filed against the inspected auditor.⁴⁴⁸ However, while the Board acknowledges this could encourage some frivolous lawsuits, the Board believes it would largely contribute positively to audit quality as it would create an incentive for firms to produce high quality audits. Indeed, the Board believes it would help drive more competition on audit quality, a criterion that the same commenter urged the Board to consider. Regarding reputation risk, the Board believes that the impact on reputation is central to the intended impacts of the final rules.

vii. Tacit Collusion

Some commenters suggested that the proposal could have anticompetitive effects. One commenter analogized the proposed metrics to (i) the sharing of compensation practices in the poultry-processing market; (ii) information sharing in healthcare; and (iii) information benchmarking in the meat-packing market. Relatedly, several commenters suggested that the proposed metrics could reveal competitively sensitive information. The Board acknowledges commenters' concerns about potential anticompetitive effects which, if obtained, could reduce quality or increase price. For example, in addition to the largely procompetitive effects discussed in the proposal and above, there could be an offsetting negative effect on competition to the extent the final metrics facilitate tacit collusion among audit firms.⁴⁴⁹ Some research suggests that public disclosure can negatively impact competition. For example, one academic study suggests that U.S. public companies opportunistically use their public financial disclosures to tacitly collude.⁴⁵⁰ Another academic study

shows that public disclosure of transaction-level pricing data by Danish antitrust authorities led to an increase in prices for ready-mix concrete.⁴⁵¹ Similarly, another academic study shows that legacy airlines use their earnings calls to coordinate capacity reductions on competitive routes.⁴⁵² However, this research may not necessarily apply to the audit market. For example, the relationship between competition and audit quality is ambiguous with some research suggesting that increased competition is negatively associated with audit quality.⁴⁵³ As a result, to the extent the final rules facilitate tacit collusion, this effect could either raise or lower audit quality in certain segments of the market. By contrast, the Board believes the procompetitive effects of the final rules described above will be significant due to the dearth of information currently available to audit committees and investors. Furthermore, competition in the audit market is limited by the presence of switching costs, reducing firms' incentives to tacitly collude.

viii. Opportunistic Behavior by Preparers

One commenter suggested that financial statement preparers may be able to use the proposed metrics to evade their auditor's scrutiny.⁴⁵⁴ The Board agrees that preparers might be able to exploit some of the final metrics in this way (e.g., partner and manager involvement) but for others it will be

detailed information in their financial disclosure about their customers, contracts, and products. This new information potentially benefits peers by helping to tacitly coordinate actions in product markets.").

⁴⁵¹ See Svend Albæk, Peter Møllgaard, and Per B. Overgaard, *Government-Assisted Oligopoly Coordination? A Concrete Case*, 45 *The Journal of Industrial Economics* 429 (1997).

⁴⁵² See Gaurab Aryal, Federico Ciliberto, and Benjamin T. Leyden, *Coordinated Capacity Reductions and Public Communication in the Airline Industry*, 89 *Review of Economic Studies* 3055 (2022).

⁴⁵³ See, e.g., Yue Pan, Nemit Shroff, and Pengdong Zhang, *The Dark Side of Audit Market Competition*, 75 *Journal of Accounting and Economics* 101520 (2023) (explaining how greater competition can, on one hand, "foster audit process innovation" and, on the other hand, lead auditors to "focus on appeasing clients by reducing professional skepticism and allowing clients excessive financial reporting discretion") and cites therein. The Board notes that controlling for all potential drivers of audit quality and fees is challenging. As such, the results obtained by these studies may be affected by omitted variable biases.

⁴⁵⁴ The commenter referred to two articles about "the fraud diamond," a heuristic that approximates the conditions under which fraud may occur. See David T. Wolfe and Dana R. Hermanson, *The Fraud Diamond: A 20-year Retrospective*, *The CPA Journal* 16 (2024) and David T. Wolfe and Dana R. Hermanson, *The Fraud Diamond: Considering the Four Elements of Fraud*, *The CPA Journal* 38 (2004).

⁴⁴⁶ Commenters' concerns about the cumulative impacts of multiple PCAOB standards and rules with overlapping implementation periods including potential benefits are discussed above.

⁴⁴⁷ See above for more discussion on the survey.

⁴⁴⁸ See, e.g., Brant E. Christensen, Nathan G. Lundstrom, and Nathan J. Newton, *Does the Disclosure of PCAOB Inspection Findings Increase Audit Firms' Litigation Exposure?*, 96 *The Accounting Review* 191, (2021).

⁴⁴⁹ Tacit collusion refers to coordinated action among competitors intended to raise profits that does not involve explicit communication. See, e.g., Rama Cont and Wei Xiong, *Dynamics of Market Making Algorithms in Dealer Markets: Learning and Tacit Collusion*, 34 *Mathematical Finance* 467 (2024). The concentrated nature of the audit market may enhance the possibility of tacit collusion.

⁴⁵⁰ See Thomas Bourveau, Guoman She, and Alminas Zaldokas, *Corporate Disclosure as a Tacit Coordination Mechanism: Evidence from Cartel Enforcement Regulations*, 58 *Journal of Accounting Research* 295 (2020) (finding that "after a rise in cartel enforcement, U.S. firms start sharing more

less likely (e.g., restatements). The effect will be limited by the fact that preparers already have some familiarity with their auditor's processes. For example, auditors are required to provide a variety of audit committee communications which preparers may be privy to.⁴⁵⁵ Indeed, one key premise of the economic analysis is that auditors and preparers have better information than investors and audit committees do about the audit process and outcomes.

The same commenter suggested that financial statement preparers could use the proposed metrics to shop for a lower quality auditor. The Board agrees this will be possible but, as the Board discussed in the proposal and above, the Board believes that the public nature of the metrics will tend to suppress this. More specifically, the broader financial statement user community will be able to observe how auditor switches correlate with company characteristics and firms' metrics and judge the company's financial reporting quality, and the audit committee's execution of its auditor oversight responsibilities, accordingly. However, the Board acknowledges that, because companies will be better informed about the nuances of the audit process, the final metrics could make it easier for some companies to shop for a lower quality auditor without significant negative consequence.

ix. Attention Diversion

One commenter suggested that the proposed rules could reduce audit quality by diverting engagement teams' attention away from other activities. Another commenter suggested that this risk would be greater for smaller audit firms and provided numerous research articles suggesting that auditors are overburdened.⁴⁵⁶ The same commenter suggested that the PCAOB should, as a starting point, consider whether the proposed metrics place burdens on engagement teams that would distract them from audit quality. Several commenters suggested that the time required to prepare the proposed metrics would necessarily divert attention from audit work and thus reduce audit quality. One commenter suggested that strains on the audit labor market could increase audit deficiencies. Another commenter suggested that the proposed metrics

would distract audit committees from their oversight responsibilities.

The Board acknowledges that the final rules could require some engagement team members' time. For example, some engagement team members may be tasked with gathering information from the engagement team and forwarding it to the national office (e.g., experience, hours). Subject to the audit labor market concerns discussed above, firms will be able to relieve some of this burden by hiring additional staff or by centralizing or automating certain aspects of the implementation effort.⁴⁵⁷ The Board also rejects the premise that the presence of any engagement-level burden should automatically disqualify a metric. Such a criterion ignores the metric's associated benefits. Regarding audit committees, as discussed in the proposal and again above, the Board recognizes that audit committees could incur costs understanding the metrics. One type of cost could be the opportunity cost associated with spending less time on other oversight activities to the extent audit committees choose to do so. However, the Board notes that audit committees could minimize this opportunity cost by spending more total time overseeing the audit. Also, the various ways the final metrics would improve audit committee oversight is discussed above.

x. Non-PCAOB Registered Firms

One commenter suggested the proposed metrics could have cost implications for non-PCAOB registered firms. The Board agrees. For example, non-substantial role firms may incur costs providing information to firms subject to the final requirements. However, they already should be providing total audit hours for Form AP reporting purposes. Also, any incremental cost will be limited to the Partner and Manager Involvement and Allocation of Audit Hours final metrics.

xi. Unintentional Engagement-Level Disclosures

Several commenters said that, for firms that issue a limited number of audit reports for accelerated filers and large accelerated filers, many of the firm-level metrics could result in the disclosure of engagement-level information.⁴⁵⁸ One commenter cited the internal monitoring metric as an example. However, for most of the final firm-level metrics, corresponding

engagement-level information will also be publicly available independent of the public disclosure of the firm-level metric itself. The Board does not believe that the possibility of making engagement-level inferences from the final metrics that are required only at the firm level would impose costs on firms. Furthermore, the Board notes that the proposed internal monitoring metric is not among the final metrics.

Alternatives Considered

The development of the final rules involved considering alternative approaches to address the problems described above. This section explains: (i) why standard setting is preferable to other policy-making approaches, such as providing interpretive guidance or enhancing inspection or enforcement efforts, (ii) other standard-setting approaches that were considered, and (iii) key policy choices made in determining the details of the final standard-setting approach.

1. Why Standard Setting Is Preferable to Another Approach

As potential alternatives to standard setting, the Board considered whether interpretive guidance or greater focus on inspections or enforcement could better address the need described above. One commenter suggested the PCAOB could communicate to stakeholders observations related to audit quality based on the outcomes of its inspections and its enforcement actions, noting that the PCAOB has unique access to information and people and has the context to understand quality risks. The Board determined that, despite long-term requests by investors to disclose additional metrics, similar initiatives by other standard setters, and the apparent ability of firms to voluntarily disclose metrics, the fact that most auditors have not voluntarily acted to disclose effective metrics on a uniform basis at the firm and engagement level points to the need for regulatory intervention through standard setting.

Increased focus on inspections or enforcement is unlikely to incentivize audit firms to voluntarily disclose the final metrics. Likewise, interpretive guidance is unlikely to address audit firms' lack of incentives to voluntarily disclose the final metrics. While some firms may choose to disclose information similar to the final metrics voluntarily, the lack of a standardized approach would result in inconsistencies that prevent effective comparisons across the profession. Similarly, standardization without mandated disclosure is not sufficient to ensure the availability of comparable

⁴⁵⁵ See AS 1301.

⁴⁵⁶ See Kimberly D. Westermann, Jeffrey Cohen, and Greg Trompeter, *PCAOB Inspections: Public Accounting Firms on "Trial"*, 36 *Contemporary Accounting Research* 694 (2019); Persellin, et al., *Audit Perceptions*.

⁴⁵⁷ See above.

⁴⁵⁸ Among the firms that will be impacted by the final rules, approximately 41%, 19%, and 11% had a total of one, two, or three accelerated filer or large accelerated filer engagements, respectively, during the 12-month period ending September 30, 2023.

public reporting of metrics.⁴⁵⁹ As discussed above, required mandatory and uniform reporting will help audit committees make more informed decisions in retaining and monitoring auditors, and investors make more informed decisions when ratifying auditor appointments, electing board members (including those who serve on the audit committee), and allocating capital. The Board believes that standard setting addresses the problem in the most effective way.

One commenter said that the commenter's experienced implementing the Form AP amendments proved to them that calculations require a robust implementation support infrastructure. Several commenters suggested that guidance regarding the final amendments would reduce the complexity and challenges associated with calculating the metrics. One commenter said that guidance would be essential to balance the costs of compiling and reporting the information and this guidance should extend to the evaluation of differences that may arise in the disclosure of participating firms on Form AP. Another commenter said that the Board should clarify whether the current Form AP Staff Guidance regarding amendments would extend to all metrics as well as how routine corrections and re-allocations of time entries and other matters affecting metrics reported on Forms FM are expected to be handled.⁴⁶⁰ The Board acknowledges that guidance could help reduce the complexity and costs associated with implementing the final rule. As discussed above, the Board will monitor for issues and consider updates to implementation guidance as appropriate.

2. Other Standard-Setting Alternatives Considered

During the development of the final rules, the Board considered two alternatives to the current disclosure rules: (i) publishing benchmarks on the final firm and engagement metrics, and (ii) requiring additional audit committee communications.

First, the Board considered collecting the final metrics from the firms on a non-public basis and then publicly publishing benchmarks based on those metrics. This approach would benefit the Board in the ways described above. However, the Board believes that investors and audit committees will be able to effectively interpret the final

metrics in their disaggregated form when made directly available to the public. Therefore, public transparency will be important. Moreover, as discussed above, benchmarking could even have potentially harmful unintended consequences.

Second, the Board considered requiring auditors to communicate the final metrics just to their audit committees and not to members of the public. One commenter suggested that the benefits of the proposal would be the same under this alternative. However, such a policy choice would not directly benefit the decision-making capabilities of investors and other stakeholders in the public securities markets. Moreover, it would limit audit committees' ability to compare the final metrics across different firms and engagements and thus impair their decision-making (e.g., auditor selection) by depriving audit committees of the broader context needed to make informed choices.

One commenter suggested that the Board adopt a specific plan to conduct a PIR. The Board has an established PIR program under which staff of the Office of Economic and Risk Analysis (OERA) conduct an analysis of the overall effect of new rules or amendments on key stakeholders in the audit process, including whether the rules or amendments are accomplishing their intended purpose and identifying benefits, costs, and unintended consequences flowing from them. In determining whether to conduct a PIR, PCAOB staff will consider the nature of the rules or amendments (including the magnitude of and degree of uncertainty around the key economic effects), the feasibility (including research design and data availability), and the potential utility to the Board (including whether the PIR might identify a demand for additional guidance or amendments). Under the established PIR program, the Board expects that OERA staff will consider whether, based on these factors, a PIR might be warranted and, if so, OERA staff will recommend that the Board determine to conduct one. In other words, this deliberation should take place without any commitment. By contrast, a commitment to conduct a PIR can be counter-productive if OERA staff would otherwise determine that a PIR is not warranted or feasible. In addition, a well-designed PIR is one that is itself based on some early experience (even if only anecdotal), and thus, the Board believes having a specific plan of PIR at this stage may be premature. The Board believes having an established PIR program tends to increase the net expected value of the PCAOB's adopted

rules and standards. Should future PIRs lead to potential modification or revision of these rules and standards, this dynamic approach to assessing the impact of the PCAOB's rules and standards compares favorably with a static analysis of costs and benefits.⁴⁶¹

Several commenters that opposed aspects of the rulemaking suggested that the Board should pilot test the final rules. One commenter suggested pilot testing would allow the PCAOB to obtain feedback on the nature, timing, extent, and usefulness of reporting. The commenter referred to a pilot program planned by another regulator. Another commenter said that pilot testing should occur prior to adoption of the final rules to confirm whether the final metrics can be consistently collected and reported by firms and whether they would be useful to stakeholders. One commenter suggested that pilot testing would provide the Board with data to quantitatively estimate the economic impacts of the proposal.

The Board agrees that a pilot study could theoretically provide useful preliminary compliance data.⁴⁶² For example, a pilot study could provide insights on the impacts of the proposed requirements or alternative approaches. However, the Board believes several concerns would challenge the utility of such an approach. First, participation in a pilot study would likely be voluntary, potentially with a limited group of participating firms, which may not be representative of all firms. This could skew results and would limit the applicability of any findings to a broader set of firms. Second, the impacts of the metrics on competition and capital allocation in the markets are complex and may require analysis across a broad set of firms and market conditions. A pilot study would not capture this diversity or the broader impacts on competition and capital markets, potentially leading to

⁴⁶¹ See, e.g., Yoon-Ho Alex Lee, *An Options-Approach to Agency Rulemaking*, 65 *Administrative Law Review* 881 (2013); see also OMB Circular A-4 at 69 ("The assessment of real options allows you to monetize the benefits and costs of changing the timing of regulatory effects in light of the value of information about potential states of the world that can be learned over time."). In short, when a policy is reversible (as in the case with the final rules) and the policy outcome is probabilistically determined between an efficient outcome and an inefficient outcome, a case can be made for moving forward with the policy even when the net expected benefit under the static cost-benefit analysis is negative because of the option of repealing the policy in the future in case the inefficient outcome is realized.

⁴⁶² See Admin. Conf. of the U.S., Recommendation 2017-6, *Learning from Regulatory Experience*, 82 FR 61738 (Dec. 29, 2017), available at <https://www.acus.gov/recommendation/learning-regulatory-experience>.

⁴⁵⁹ See, e.g., Patrick Bolton and Marcin T. Kacperczyk, *Firm Commitments*, SSRN Electronic Journal (2024). The Board notes that SSRN does not peer review its submissions.

⁴⁶⁰ See PCAOB Staff Guidance on Form AP.

incomplete or misleading conclusions. Third, the full implications of the metrics on competition and capital formation might take several years to manifest, as stakeholders would need time to adapt to and fully integrate the final metrics effectively. This delay could postpone the benefits expected from the final rules, especially if the pilot study would need to run for multiple years to capture the necessary information and trends. Finally, as stakeholders (including firms, issuers, investors, and others) adapt to the new metrics, their behaviors and the resulting data might change over time, potentially rendering early data from a pilot study less relevant or useful for long-term policy decisions. For these reasons, a pilot study, while potentially yielding some initial insights, would have limited overall benefits in this case. It would not offer a comprehensive view of the metrics' implications across the entire spectrum of firms and could unduly delay the transparency objectives of the rulemaking. The Board notes that the proposal considered the work of other regulators, including the planned pilot study referred to by one of the commenters.⁴⁶³ That discussion appears above in substantially the same form.

3. Key Policy Choices

During the development of the final rules, the Board considered different approaches to addressing key policy issues.

i. Definitions and Calculations of the Final Metrics

The Board considered a variety of alternative definitions and calculations of the final metrics, including several suggested by commenters and those initially proposed. *See* above for a discussion of these considerations.

ii. Applicability

The conditions under which firms will be required to comply with the final engagement and firm-level reporting requirements are described above. During the development of the final rules, the Board considered limiting applicability to firms that met a certain aggregate issuer market capitalization threshold. The Board also considered broadening the set of applicable filer statuses.

The Board noted that compared to the proposed approach, an aggregate issuer market capitalization threshold could help focus the final rules on auditors

and engagements that investors are most interested in.

Commenters during the development of QC 1000 indicated that a threshold based on market capitalization was perhaps preferable to a threshold based on issuer count because many auditors audit numerous small engagements with limited operations (e.g., special purpose acquisition companies). However, such an approach could present challenges. As one commenter noted, thresholds based on market capitalization may be subject to the volatility of the market. During a review of the potential methodologies, the Board found that such a threshold would also be sensitive to auditor switches, particularly if the switching issuer had a large market capitalization. Some auditors near the threshold could move back and forth between applicability and non-applicability. The Board also considered alternative transition thresholds for market capitalizations, or a phase-out period in attempting to mitigate the negative aspects of these options. Ultimately, the Board has determined that there was limited benefit to using these alternative applicability thresholds.⁴⁶⁴

The Board also considered broadening the applicability of the final firm-level metrics to include all firms that audited at least one operating company. This would increase the number of firms impacted by the final firm-level metrics by approximately 160 and increase the number of engagements and market capitalization covered by the final firm-level metrics by approximately 16% and less than 0.1%, respectively.⁴⁶⁵ Expanding the scope to cover all firms that audit at least one operating company could reduce any potential negative stigma associated with smaller firms for not being required to disclose the final metrics. However, these firms tend to be smaller and hence may lack the infrastructure and economies of scale to efficiently implement the final rules. Furthermore, the gain of information to audit committees and investors would be limited by the fact that these firms tend to have smaller or fewer issuers on average. It also could create confusion to have different thresholds for the final firm-level reporting requirements and the final engagement-level reporting requirements. Finally, firms that will not be subject to the final firm-level

disclosure requirements could voluntarily disclose the final metrics.

The Board also considered broadening applicability of the final engagement-level metrics to include non-accelerated filer issuers. While the importance of audit quality may be more significant for smaller issuers,⁴⁶⁶ PCAOB staff analysis finds that non-accelerated filers are proportionately smaller—at the median—than accelerated filer and large accelerated filers in terms of audit fees and total assets.⁴⁶⁷ One survey of audit committees of smaller public companies found that five of the 28 metrics discussed in the Concept Release were evaluated by more than half of the audit committees surveyed.⁴⁶⁸ PCAOB staff also reviewed the relative trading volume associated with these filer status groups and found that non-accelerated filer issuers have higher average daily (unit) volume than accelerated filer issuers but lower average daily (unit) volume than large accelerated filers.⁴⁶⁹

⁴⁶⁶ See below for additional discussion.

⁴⁶⁷ Based on 2023 fiscal year data sourced through Audit Analytics' Web service, non-accelerated filers paid median audit fees of \$320,000 and had median total assets of \$66 million. Comparatively, accelerated filers paid median fees of \$1,300,000 and had median total assets of \$765 million. Large accelerated filers paid median fees of \$3,010,000 and had median total assets of \$5,509 million. Only issuers filing pursuant to the Exchange Act (a.k.a. Act-34 filers) were retained in the sample.

⁴⁶⁸ See, e.g., Harris and Williams, *Audit Quality Indicators*.

⁴⁶⁹ Sourcing data across the University of Chicago's Center for Research and Security Prices (CRSP) Annual flat-file to collect annual volume, along with Compustat, and Audit Analytics, the Board identified, using filer statuses reported by Audit Analytics, that the median average daily volume (the quantity of share units traded per year divided by 252 trading days) for large accelerated filers in 2020 and 2021 was roughly 867,000 units per day and 762,000 units per day, respectively. For accelerated filers, the average daily volume was 183,000 and 168,000 respectively. For non-accelerated filers, the average daily volume was 528,000 and 756,000, units per day, for 2020 and 2021. One reason for this is possibly the relatively lower share price non-accelerated filer issuers have, resulting in a higher unit-volume (per trade lot) compared to accelerated filer issuers. The Board maintains share codes 10, 11 (i.e., U.S. issuers), and 12 (foreign issuers trading on U.S. exchanges) in the Board's analysis, and remove American depository receipts, shares of beneficial interest, real estate investment trusts, SBIs, REITs, and closed-end funds. Additionally, the Board retains only Exchange Act 1934 filers and volumes related to the first audit opinion filed with the SEC for a given fiscal year. Filer status, as sourced through Audit Analytics, may be an imperfect proxy of the true filer status of the entity-issuer due to errors in reporting and or collection. Furthermore, the Board retains only observations in which there is recorded to be complete volume for the entire annual period. There were 1,350 large accelerated filer issuers in the Board's sample in 2020, and 1,358 in 2021. For accelerated filers there are 337 and 329 issuers in each 2020 and 2021 that remain in the Board's sample, and for non-accelerated filers there are 121 and 134 issuers, respectively. The Board attempts to remove issuers additionally classified as Small

⁴⁶³ See FRC, *Consultation Document: Firm-level Audit Quality Indicators*.

⁴⁶⁴ See above for a discussion of phased implementation.

⁴⁶⁵ See above for discussion on data sourcing. The Board excludes firms that filed an audit opinion during the sample period but whose registration has since been withdrawn, revoked, or is pending withdrawal.

Neither issuer group, in general, was “thinly traded,” as measured by average daily volume.⁴⁷⁰ Given these differences, the costs of the final rules associated with non-accelerated filer issuer engagements could be proportionally higher than the costs associated with accelerated filer or large accelerated filer issuers engagements. As a result, the Board has restricted the applicability of the final engagement-level metrics to accelerated filer and large accelerated filer engagements. Firms that will not be subject to the final engagement-level disclosure requirements could voluntarily disclose the final metrics.

The Board also considered whether the scope for engagement-level reporting should be extended to non-operating company issuers whose financial statements are required under SEC rules to be audited under PCAOB standards (*i.e.*, investment companies, employee stock plans) and broker-dealers. While these additional disclosures could be informative, commenters indicated that the proposed metrics would be less beneficial for these entities compared to accelerated filers and large accelerated filers.⁴⁷¹ The Board agrees, and therefore are not requiring disclosure of these metrics for issuers that are not accelerated filers or large accelerated filers under the final rules.

iii. Reporting

Several commenters suggested that the Board could alleviate the burden on smaller firms by raising the reporting threshold. One commenter said that firms that issue audit reports for 100 issuers or more are the firms whose metrics investor-related groups would be most interested in reviewing, given these firms audit a significant majority of the market capitalization of issuers reporting on Form 10-K, Form 20-F, and Form 40-F. Another commenter suggested a threshold of 25 or more large accelerated filer and accelerated filer issuer engagements combined. The same commenter said that metrics of firms with few engagements could be unduly influenced by a single

engagement. By contrast, one commenter suggested making the reporting requirements apply to all PCAOB-registered firms. As discussed in the proposal and above, the Board recognizes the potential disproportionate cost to smaller firms and have considered this in the Board’s decision to scope in all firms that audit at least one accelerated filer or large accelerated filer.⁴⁷² The Board believes audit committees and investors will benefit from information related to the audits of accelerated filers and large accelerated filers and the firms that perform these audits. Two commenters agreed that the proposed scope captures situations where investment and proxy voting decisions would be most likely to benefit from additional information about the audit and the auditor.

As discussed above, firms subject to the final engagement-level reporting requirements will be required to disclose the final engagement-level metrics in Form AP, to be filed by the 35th day (for most audits) after the date the audit report is first included in a document filed with the SEC. Firms subject to the final firm-level reporting requirements will also be required to disclose the final firm-level metrics in the newly created Form FM.

As contemplated above, the Board considered requiring that the final metrics be included in the audit report in addition to on Form AP and Form FM. Under this alternative, costs incurred by investors and audit committees when gathering information to inform their decision-making could be further reduced. Investors would be able to look down from the auditor’s opinion and immediately review the final metrics. Moreover, this would serve as a prime opportunity for the firm to communicate critical context through narratives that might be beneficial for investors in reviewing the final metrics.

The disclosure of the proposed metrics in the audit report would not impair the usefulness of their disclosure through Form AP and Form FM. Indeed, such additional reporting may enhance their usefulness by setting the proposed metrics within the full context of the issuer’s financial reporting. However, some investors and audit committees may prefer to obtain the information from Form AP and Form FM, or from other sources (*e.g.*, a subscription-based data provider), and hence may find little use for metrics in the audit report. There likely would not be appreciable costs associated with this additional reporting, outside of costs to include the

report in the filing of the audit opinion. Firms will already be required to collate information and compute the final metrics for reporting to the PCAOB in their relevant forms.

Many commenters disagreed with this approach citing that, for example, it could potentially detract from the clarity and purpose of the report, could result in delays in the issuance of audit reports, and amendments to the audit report for corrections to metrics could create unnecessary burden for issuers and confusion for investors. One commenter suggested the proposed metrics would be better placed in audit committee reports in company proxy statements. One commenter said that the proposed metrics: (i) would create a misimpression that the metrics are indicative of audit quality; (ii) would be impractical to implement in a timely manner; and (iii) could distract auditors. However, several commenters, primarily investor-related groups, were supportive of reporting in the auditor’s report. One commenter said that the proposed engagement performance metrics are as important to understanding audit risks as CAMs and thus merit inclusion in the auditor’s report. The Board is persuaded by commenter feedback that this alternative would be burdensome and could diminish the value of the auditor’s report. Therefore, the Board is not adopting this alternative at this time.

The Board also considered requiring firms subject to the final firm-level reporting requirements to disclose the firm-level metrics on Form 2 rather than Form FM. This approach could benefit some investors or audit committees because the firm-level metrics would appear in the context of other firm-level information. It could also reduce compliance costs for firms because firms are already familiar with Form 2. However, information reported on Form 2 is currently not downloadable as a structured data set. This could reduce the accessibility of the final firm-level metrics to investors and audit committees. Furthermore, the final firm-level metrics use terms that have different meanings in the context of Form 2 (*e.g.*, “Partners”). This could lead some investors or audit committees to misunderstand the final firm-level metrics or lead some firms to mistakenly provide incorrect information in Form 2. Finally, the due date of Form 2, June 30, falls after the general timing of shareholder meanings and therefore would generally arrive too late to inform shareholders’ voting decisions. This alternative and commenter feedback are discussed above. Overall, the Board is persuaded by commenters’ concerns

Reporting Companies from the reported statistics. Lastly, not all issuers, particularly smaller issuers, trade on exchanges observed in the CRSP data set—as a result the Board’s sample may be biased towards larger issuers, or issuers that trade on exchanges observed by CRSP.

⁴⁷⁰ For a discussion of “thinly traded” markets, see *Division of Trading and Markets: Background Paper on the Market Structure for Thinly Traded Securities*, Roundtable on Market Structure for Thinly Traded Securities (April 23, 2018), available at <https://www.sec.gov/rules/policy/2019/thinly-traded-securities-tm-background-paper.pdf>.

⁴⁷¹ See above for additional discussion on commenters’ views on this alternative.

⁴⁷² See above for additional discussion on this policy alternative.

that this alternative would place burdens on firms during their busy season. Therefore, the Board is not adopting this alternative at this time.

While several commenters suggested that the Board limit the disclosure of engagement-level metrics to audit committees—citing audit committees' ability to engage in dialogue with the auditor and to understand the context of the metrics—the Board believes public disclosure will provide the benefits associated with investor decision-making as well as some benefits related to improved audit committee decision-making. For example, public disclosure allows investors to make more informed decisions regarding board directors (including audit committee members), and auditor ratification. It also will provide audit committees with comparative information about other firms and engagements which may improve their auditor selection and oversight decisions. Furthermore, the Board believes that the public nature of the metrics will be a key driver of the pro-competitive effects in the auditing market, by making it easier to compare an existing auditor's metrics to the same metrics for other potential auditors. The Board therefore believes public transparency will foster a competitive auditing environment and support robust governance by providing all stakeholders, not just audit committees, with information to make well-informed decisions.

Two commenters suggested the Board refer to work performed by the SEC when it considered requiring additional audit committee disclosures.⁴⁷³ One commenter suggested that the 2015 SEC Concept Release could inform the Board's consideration of requiring auditors to disclose engagement-level metrics to audit committees only. Staff reviewed the 2015 Concept Release. The 2015 SEC Concept Release sought comment on, among other things, whether the reporting of additional information by the audit committee with respect to its oversight of the audit may provide useful information to investors as they evaluate the audit committee's performance in connection with, among other things, their vote for or against directors who are members of the audit committee, the ratification of the auditor, or their investment decisions. The Board believes this request for comment is consistent with the questions included in the Board's proposal, the feedback from investor-

related groups the Board received, and the Board's view that investors need more information to: (i) evaluate the performance of auditors and audit committees; (ii) vote for or against directors who are members of the audit committee; (iii) ratify the appointment of the auditor; and (iv) invest capital. The 2015 SEC Concept Release also stated that to the extent the audit committee uses indicators or metrics in assessing the quality of the auditor and the audit, disclosure about the use and consideration of such metrics may provide useful information about the audit committee's process for assessing the auditor. The Board notes that the relevance of the 2015 SEC Concept Release is limited by the fact that it: (i) contemplates public disclosures by audit committees rather than by auditors; and (ii) aims to solicit feedback rather than provide a cost-benefit analysis. As explained previously, the Board believes that restricting the disclosure of these metrics solely to audit committees would cause investors and other stakeholders to forgo the benefits of disclosure.

Some commenters suggested a more flexible approach to engagement-level reporting, such as voluntary disclosure. One commenter suggested that competition among auditors should be the primary source of practice enhancements as opposed to regulatory control. One commenter suggested that voluntary disclosure allows for refinements and innovation in response to the evolving auditing environment. Another commenter suggested that voluntary disclosure could facilitate a market for enhanced disclosures. Relatedly, referring academic research, one commenter said that relevant metrics could evolve over time and that many metrics could be useful.⁴⁷⁴ Also citing academic research, another commenter recommended a principles-based approach.⁴⁷⁵ The Board recognizes that a purely voluntary or

principles-based approach could foster innovation. However, for reasons discussed above the Board believes the benefits associated with a mandatory approach, with clearly articulated calculations relative to the current practice baseline of voluntary disclosure, are substantial. For example, as discussed above, the Board believes that the market does not provide sufficient incentives for auditors to disclose information akin to the metrics voluntarily. Furthermore, even under the mandatory framework the Board is adopting, firms would still have the freedom to innovate beyond the required metrics through additional voluntary disclosures.

One commenter suggested that an analysis of analogous initiatives in foreign jurisdictions would inform the PCAOB of potential alternatives to the final rules that may be less costly or present less risk of unintended consequences. One commenter suggested that the Board more carefully consider the context in which those metrics are used, emphasizing their voluntary nature. As discussed in the proposal, PCAOB staff reviewed initiatives in foreign jurisdictions and noted their generally less prescriptive approaches compared to the metrics the Board is adopting. While these international approaches may involve lower costs and possibly fewer unintended consequences, 'they are also likely to mean that metrics are less comparable and less comprehensively available, implying less-substantial benefits. The Board believes that the Board's approach, although potentially more prescriptive, is necessary to achieve the desired level of transparency and oversight in audit practices.

Two commenters representing investor groups suggested that, if the Board adopts the final rules, the PCAOB could amplify the value of the final metrics by providing tools, research, or periodic reviews of the information. The Board will consider these suggestions. However, the Board notes that, under the final rules, users will be able to analyze the data using tools of their choice. Additionally, the PCAOB plans to have programs to sponsor research which may consider the final metrics. The Board will be alert to how the metrics are utilized and their impact.

iv. Alternative Firm and Engagement Metrics Considered

The Board considered but at this time are not adopting metrics related to: (i) auditor proficiency testing; surveys of firms and audit committees; and auditor absenteeism; (ii) legal proceedings

⁴⁷⁴ See Gillian Rose Barnes and Dana R. Hermanson, *Fraud Brainstorming Sessions and Interviews in a Remote World: Initial Evidence*, 15 *Journal of Forensic and Investigative Accounting* 248 (2023); Lazarus Elad Fotoh and Johan Ingemar Lorentzon, *Audit Digitalization and its Consequences on the Audit Expectation Gap: A Critical Perspective*, 37 *Accounting Horizons* 43 (2023); Jean C. Bedard, Karla M. Johnstone, and Edward F. Smith, *Audit Quality Indicators: A Status Update on Possible Public Disclosures and Insights from Audit Practice*, 4 *Current Issues in Auditing* C12 (2010); Knechel, et al., *Audit Quality*; and Christensen et al., *Understanding Audit Quality*.

⁴⁷⁵ See Arianna S. Pinello, Ara G. Volkan, Justin Franklin, Michael Levatino, and Kimberlee Tiernan, *The PCAOB Audit Quality Indicator Framework Project: Feedback from Stakeholders*, 16 *Journal of Business & Economics Research* 1 (2019).

⁴⁷³ See *SEC Concept Release on Possible Revisions to Audit Committee Disclosures*, SEC Rel. No. 33-9862 (July 1, 2015) ("2015 SEC Concept Release").

against audit firms and firm ownership structures; (iii) engagement-level PCAOB deficiencies; (iv) access to national office or other technical resources and staff and investments in infrastructure to support audit quality; (v) auditor independence and financial reporting quality; (vi) timely issuance of internal controls weaknesses and going concern opinions and fraud or other financial reporting misconduct; (vii) audit fees, effort, and client risk; (viii) audit personnel; (ix) allocation of audit hours; and (x) internal monitoring and incentives. In the following discussion the Board briefly describes and evaluates the literature on these metrics and provides the Board's rationale for not adopting them.

a. Metrics Related to Auditor Proficiency Testing, Surveys of Firms and Audit Committees, and Auditor Absenteeism

Metrics related to proficiency testing, surveys of firms and audit committees, and auditor absenteeism would generally speak to the "Tone at the Top" or workplace culture of the audit firm. There is a lack of literature covering the economic impacts that disclosure of these metrics might engender. While some academic literature suggests strong work culture and a "Tone at the Top" is associated with audit quality,⁴⁷⁶ it is unclear how an informative metric could be constructed. Similarly, while some academic literature suggests competence is associated with audit quality, there is limited research related to proficiency testing per se and it is unclear how an informative metric on proficiency testing could be constructed.⁴⁷⁷ Finally, the Board is unaware of any literature related to auditor absenteeism. At this time, the Board is not requiring disclosure of these metrics under the final rules.

b. Metrics Related to Legal Proceedings Against Audit Firms and Firm Ownership Structures

Some academic literature suggests there may be no relationship between the quality of audit services or the auditor's provision of reasonable assurance and the likelihood that an

auditor could be sued, have a case settled, or be taken through court.⁴⁷⁸ Many cases brought against auditors fail to meet the threshold of fault required to show the auditor is liable for the damages incurred by investors. Information related to legal proceedings may also be confidential or otherwise sensitive. Furthermore, the incidence of lawsuits against auditors has declined in recent years.⁴⁷⁹ One investor survey finds that investors perceive private litigation as being unrelated to audit quality.⁴⁸⁰ Additionally, information regarding proceedings initiated by government entities against firms and certain of their personnel is already reported on PCAOB Form 3. Metrics related to firm ownership structure are being considered by the PCAOB's Firm Reporting rulemaking project. At this time, the Board is not requiring disclosure of these metrics under the final rules.

c. Metrics Related to Engagement-Level PCAOB Deficiencies

The Board's considerations regarding potential metrics related to engagement-level PCAOB deficiencies are discussed above. Several commenters suggested the Board include metrics related to deficiencies identified during PCAOB inspections. Several commenters suggested the Board require firms to report the percentage of their reviewed audits that received Part I.A deficiencies in their PCAOB inspection reports. These commenters highlighted the critical nature of Part I.A deficiencies and suggested that requiring this information to be disclosed along with the other final metrics would increase its prominence. While the Board acknowledges the significance of Part I.A deficiencies—indicating deficiencies that were of such significance that the Board believes the firm, at the time it issued its audit report, had not obtained sufficient appropriate audit evidence to support its opinion on the issuer's financial statements and/or ICFR—the Board notes that this information is already publicly available and stakeholders already utilize this information, compiling it in their analyses.

One commenter suggested that the Board consider requiring auditors to disclose which of their audits had Part I.A deficiencies included in their

PCAOB inspection reports. The commenter suggested that this disclosure would obviate need for most, if not all, of the proposed firm- and engagement-level metrics. The Board acknowledges that information on engagement deficiencies identified through PCAOB inspection could provide investors and other stakeholders with additional insight on audit quality. However, PCAOB inspection reports are typically published well after the reporting deadlines for engagement-level metrics on Form AP, making it impractical to include such inspection results in that form. The Board also disagrees that disclosure of PCAOB inspection findings would obviate the need for the metrics. The final metrics will be available for the full population of accelerated filer and large accelerated filer issuers, whereas the presence of Part I.A deficiencies are available for the much more limited sample of inspected firm engagements. Furthermore, the Board believes the final metrics would provide information on aspects of audit quality not entirely captured by Part I.A deficiencies. While academic literature suggests that engagement-level PCAOB auditing deficiencies are indicative of low audit quality, Sarbanes-Oxley already provides a robust framework for making PCAOB inspection findings and sanctions public.⁴⁸¹ At this time, the Board is not requiring the disclosure of engagement-level PCAOB auditing deficiencies under the final rules.

d. Metrics Related to Access to the National Office or Other Technical Resources and Staff and Investments in Infrastructure To Support Audit Quality

The Board's considerations regarding potential metrics related to access to technical resources is discussed above. Overall, metrics related to audit teams' access to such technical resources and staff could indicate how accessible individuals, decision aids, or technical audit-process manuals are to audit teams. For example, in larger firms, individuals in the national office may provide consultation on complex, unusual, or unfamiliar issues. One study using PCAOB data found that national office consultations are common among PCAOB-inspected engagements and that national office consultation use is associated with engagement characteristics and proxies for audit quality.⁴⁸² Smaller firms may retain

⁴⁷⁶ See, e.g., Stephen Perreault, James Wainberg, and Benjamin L. Luippold, *The Impact of Client Error-Management Climate and the Nature of the Auditor-Client Relationship on External Auditor Reporting Decisions*, 29 Behavioral Research in Accounting 37 (2017) and Donna D. Bobek, Derek W. Dalton, Brian E. Daugherty, Amy M. Hageman, Robin R. Radtke, *An Investigation of Ethical Environments of CPAs: Public Accounting versus Industry*, 29 Behavioral Research in Accounting 43 (2017).

⁴⁷⁷ See, e.g., Christensen et al., *Understanding Audit Quality*.

⁴⁷⁸ See, e.g., Colleen Honigsberg, Shivaram Rajgopal, and Suraj Srinivasan, *The Changing Landscape of Auditors' Liability*, 63 The Journal of Law and Economics 367 (2020).

⁴⁷⁹ See Honigsberg et al., *The Changing Landscape*.

⁴⁸⁰ See Christensen et al., *Understanding Audit Quality*.

⁴⁸¹ See, e.g., Aobdia et al., *Practitioner Assessments*.

⁴⁸² See, e.g., Matthew G. Sherwood, Miguel Minutti-Meza, and Aleksandra B. Zimmerman, *Auditors' National Office Consultations*, SSRN

individuals with such expertise from outside the firm. Metrics related to infrastructure that supports audit quality could provide information on resources audit teams have available to them that could support audit quality. However, due to the variety of ways firms provide technical resources and infrastructure to support audit quality, the Board believes that metrics related to these areas would likely not be informative or comparable for all firms. Furthermore, disclosures related to network relationships currently being considered as part of the PCAOB's Firm Reporting rulemaking project would provide some information to investors and audit committees regarding firms' access to technical resources. At this time, the Board is not requiring disclosure of metrics related to access to technical resources under the final rules.

The Board's considerations regarding potential metrics related to investment in audit infrastructure is discussed above. In particular, one commenter suggested that the Board consider requiring firms to report the percentage of the firm's revenues invested in technology accessible by audit teams. The Board believes the broad range of what constitutes "technology" and how it is used across different firms could lead to inconsistencies in how such a metric is calculated and reported. Overall, the Board does not believe such a metric would be informative and comparable. At this time, the Board is not requiring disclosure of metrics related to access to investment in audit infrastructure under the final rules.

e. Metrics Related to Auditor Independence and Financial Reporting Quality

Disclosures related to audit fees and non-audit fees are being considered as part of the PCAOB's Firm Reporting rulemaking project. Furthermore, the final rules already include a metric for restatements, a well-accepted proxy for financial reporting quality. Therefore, the Board does not think there is a need to expand disclosures related to this information under the final rules.

f. Metrics Related to the Timely Issuance of Internal Controls Weaknesses and Going Concern Opinions, and Fraud or Other Financial Reporting Misconduct

Academic research suggests that (i) markets react to going concern reporting and (ii) timely reporting of a going concern opinion is an indicator of audit

quality.⁴⁸³ However, there is a lack of academic research related to timely reporting of internal control weaknesses. The final rules include metrics related to restatement history, which the Board believes will provide a clearer signal of audit quality. Firms' reporting of internal control weaknesses and their inclusion of going concern explanatory paragraphs in the audit report are also publicly available already, as are indicators of auditors' timeliness (e.g., subsequent restatements or bankruptcies). Additionally, the Board is considering other standard-setting opportunities related to the reporting of fraud or other financial reporting misconduct as well as the auditor's going concern evaluation. At this time, the Board does not think there is a need to require disclosure of these metrics under the final rules.

g. Metrics Related to Audit Fees, Effort, and Client Risk

Regarding audit fees, the Board notes that engagement-level audit fees are already publicly available and firm-level audit fees may be constructed by summing engagement-level audit fees. Regarding audit effort, the Board notes that, while some academic research finds that proxies for audit effort are associated with audit quality, the level of association diminishes in certain settings when considered jointly with other information correlated with audit effort.⁴⁸⁴ Indeed, stakeholders will have access to information correlated to audit effort. For example, engagement-level audit hours, a commonly used proxy for audit effort, are highly correlated with engagement-level audit fees which are publicly available.⁴⁸⁵ Additionally, the final metrics related to Partner and Manager Involvement, Workload, Training Hours for Audit Personnel, and Allocation of Audit Hours will provide information related to audit effort. Regarding client risk, the Board has observed through the Board's oversight activities that firms classify clients as

high risk in various ways. At this time, the Board is not requiring disclosure of these metrics under the final rules.

h. Metrics Related To Audit Personnel

The Board proposed but are not adopting engagement-level metrics related to turnover (i.e., Retention and Tenure). Academic literature related to turnover generally and commenters' views on the proposed metric are discussed above. Overall, commenters generally did not support engagement-level metrics in this area. Several commenters said that mandatory partner rotation, personal issues, and strategic resource management concerns could drive the proposed engagement-level metric related to turnover. Commenters said that for these and other reasons the metrics would be especially difficult for stakeholders to interpret and would need to be considered in conjunction with other metrics. After considering these comments, and in light of the Board's original analysis, the Board is not adopting the proposed engagement-level Retention and Tenure metric under the final rules.

i. Certain Metrics Related to the Allocation of Audit Hours

The Board proposed but is not adopting several metrics related to the allocation of audit hours (i.e., Audit Hours and Risk Areas, Audit Resources—Use of Auditor's Specialists and Shared Service Centers). These proposed metrics predominantly focus on whether the audit team is being efficiently and effectively deployed. The proposed metrics were intended to improve transparency into the audit process and help investors and audit committees to review: (i) whether the auditor is effectively allocating hours in response to areas of significant risk, (ii) whether the auditor is efficiently and effectively deploying individuals with expertise to address areas that require their specialized knowledge; and (iii) whether the auditor is efficiently and effectively using SSCs. Section IV.C.1.iv.b of the proposal provides additional discussion on the potential benefits of these metrics and relevant academic literature. Comments related to the discussion of academic literature are addressed above. The Board addresses below more specific comments related to the impacts of these metrics.

Commenters' views on the proposed Audit Hours and Risk Areas metric including alternative approaches suggested are discussed above. Overall, many commenters did not support the proposed metric and said that it would be challenging to calculate. Several

⁴⁸³ See DeFond and Zhang, *A Review of Archival Auditing Research*.

⁴⁸⁴ See, e.g., Aobdia et al., *The Economics of Audit Production*, Table 3 and Table 4 (finding that audit effort is not related to various proxies for audit quality after holding other factors constant); Constantinou Caramanis and Clive Lennox, *Audit Effort and Earnings Management*, 45 *Journal of Accounting and Economics* 116 (2008) (studying Greek audit firms, finding that lower audit hours are associated with decreases in various proxies for audit quality) and Dafydd Mali and Hyoung-Joo Lim, *Can Audit Effort (Hours) Reduce a Firm's Cost of Capital? Evidence from South Korea*, 45 *Accounting Forum* 171 (2020) (finding, using data on Korean audit firms, that audit effort is negatively associated with weighted average cost of capital).

⁴⁸⁵ See, e.g., Aobdia, *Practitioner Assessments*, Table 4.

commenters said that, because risk assessment is an iterative process, high-risk areas could change over the course of the audit, leading to challenges tracking the required hours information. Several commenters also said that calculating the proposed metric would require extensive coordination among other auditors. Several commenters also said that hours charged to particular accounts may include work that is unrelated to an identified significant risk. After considering these comments, and in light of the Board's original analysis, the Board is not adopting the proposed Audit Hours and Risk Areas metric under the final rules.

Commenters' views on the proposed Audit Resources metrics including alternative approaches suggested are discussed above. Overall, commenters generally opposed these metrics. For example, one commenter said that the use of auditor's specialists would not be comparable across firms of different sizes without sufficient context. The same commenter said that smaller firms are more likely to engage outside specialists compared to larger firms with in-house specialists. One commenter said firms are already required to communicate their use of specialists to audit committees on an engagement. One commenter said that the use of specialists is highly contextual. One commenter said it would be difficult to obtain the hours information to calculate the proposed use of specialists metric. Referring to several academic articles, one commenter suggests that smaller firms and larger firms' metrics related to the use of specialists would not be comparable because smaller firms feel regulatory pressure to use specialists and typically retain outside specialists.⁴⁸⁶ One commenter said that the SSC metric would be misinterpreted as indicating that greater SSC hours indicated lower quality. After considering these comments, and in light of the Board's original analysis, the

Board is not adopting the proposed Audit Resources metrics under the final rules.

j. Metrics Related to Internal Monitoring and Incentives

The Board proposed but is not adopting metrics related to internal audit quality review (*i.e.* Audit Firms' Internal Monitoring) and incentive alignment (*i.e.*, Quality Performance Ratings and Compensation). Metrics related to internal audit quality review and incentive alignment focus on the positive and negative incentives auditors face. Unlike the final metrics related to audit personnel and allocation of audit hours, which would provide additional transparency into the inner workings and characteristics of the audit team, the disclosure of these proposed metrics would provide information related to audit outcomes and the incentives that led to those results. Section IV.C.1.iv.c of the proposal provides additional discussion on the potential benefits of these metrics and relevant academic literature. Comments related to the discussion of academic literature are addressed above. The Board addresses below more specific comments related to the impacts of these metrics.

Commenters' views on these proposed metrics including alternative approaches raised are discussed above. Two commenters agreed that the proposed metrics related to firms' internal monitoring would be useful for stakeholders. One firm reported that it provides similar firm-level information in its transparency report. However, others expressed several concerns, particularly regarding the engagement-level metrics. By way of background, survey research cited in the proposal finds that internal monitoring programs are valued by audit partners for their focus on the firm's audit methodology, their timeliness, and the quality of the feedback.⁴⁸⁷ Pointing to this research, one commenter suggested that the proposed internal monitoring metric would undermine the efficacy of audit firm internal inspection programs and audit quality. Some commenters said that the information would not be comparable due to differences in firms' monitoring programs. One commenter said that smaller firms would be disadvantaged because the results of their monitoring programs tend to be more variable. Regarding incentive alignment, some commenters supported

a metric for incentive alignment and agreed with the Board's rationale for proposing it. One commenter said that investors routinely evaluate executive compensation packages and understand that compensation may be driven by a variety of factors which could be discussed in the voluntary narrative discussion. However, other commenters said it would lack comparability, would not capture other important drivers of compensation, and would raise confidentiality concerns. After considering these comments, and in light of the Board's original analysis, the Board did not adopt these metrics under the final rules.

Special Considerations for Audits of Emerging Growth Companies

Section 104 of the Jumpstart Our Business Startups ("JOBS") Act imposes certain limitations to the application of the Board's standards to audits of Emerging Growth Companies ("EGCs"), as defined in Section 3(a)(80) of the Exchange Act. Under Section 104, the JOBS Act provides that any additional rules adopted by the Board subsequent to April 5, 2012, "shall not apply to an audit of any [EGC] unless the Commission determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action would promote efficiency, competition, and capital formation."⁴⁸⁸ As a result, the final rules are subject to a separate determination by the SEC regarding their applicability to audits of EGCs.⁴⁸⁹

To inform consideration of the application of PCAOB standards and rules to audits of EGCs, the PCAOB staff publishes a white paper annually that provides general information about characteristics of EGCs. The data on EGCs outlined in the most recent white paper, released in February 2024, remains generally consistent with the data outlined in prior EGC white

⁴⁸⁶ See J. Efrim Boritz, Natalia Kochetova-Kozloski, and Linda Robinson, *Are Fraud Specialists Relatively More Effective Than Auditors at Modifying Audit Programs in the Presence of Fraud Risk?*, 90 *The Accounting Review* 881 (2015); Candice T. Hux, *Use of Specialists on Audit Engagements: A Research Synthesis and Directions for Future Research*, 39 *Journal of Accounting Literature* 23 (2017); Zimmerman, et al., *Auditor's Use; Dereck Barr-Pulliam, Stephani Mason, and Kerri Ann Sanderson, The Joint Effects of Work Content and Work Context on Valuation Specialists' Perceptions of Organizational-Professional Conflict*, SSRN Electronic Journal (2022); Aleksandra B. Zimmerman, Dereck Barr-Pulliam, Joon-Suk Lee, and Miguel Minutti-Mezza, *Auditors' Use of In-House Specialists*, 61 *Journal of Accounting Research* 1363 (2023). The Board notes that SSRN does not peer review its submissions.

⁴⁸⁷ See Richard W. Houston and Chad M. Stefaniak, *Audit Partner Perceptions of Post-Audit Review Mechanisms: An Examination of Internal Quality Reviews and PCAOB Inspections*, 27 *Accounting Horizons* 23, (2013).

⁴⁸⁸ See Pub. L. 112–106 (Apr. 5, 2012). Section 103(a)(3)(C) of Sarbanes-Oxley, as added by Section 104 of the JOBS Act. Section 104 of the JOBS Act also provides that any rules of the Board requiring (1) mandatory audit firm rotation or (2) a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer (auditor discussion and analysis) shall not apply to an audit of an EGC. The final mandatory disclosure rules do not fall within either of these two categories.

⁴⁸⁹ The Board provided this analysis of the impact on EGCs to assist the SEC in making the determination required under Section 104 to the extent that the requirements apply to "the audit of any emerging growth company" within the meaning of Section 104 of the JOBS Act.

papers.⁴⁹⁰ As of the November 15, 2022, measurement date, PCAOB staff identified 3,031 companies that self-identified with the SEC as EGCs and filed with the SEC audited financial statements in the 18 months preceding the measurement date.⁴⁹¹

The discussion of benefits, costs, and unintended consequences of the final rules above is generally applicable to all audits performed pursuant to PCAOB standards, including audits of EGCs. The economic impacts of the final rules on an individual EGC audit will depend on factors such as the auditor's ability to distribute implementation costs across its audit engagements and whether the auditor has already incorporated the final metrics into its audit approach. One survey of audit committees of smaller public companies found that five of the 28 metrics discussed in the Concept Release were evaluated by more than half of the audit committees surveyed.⁴⁹² EGCs are more likely to be newer companies, which are typically smaller in size and receive lower analyst coverage.⁴⁹³ For example, smaller companies have very little, if any, analyst coverage, which reduces the amount of information made available to financial statement users and therefore makes markets less efficient.⁴⁹⁴ These factors may increase the importance to investors of the higher audit quality expected to result from the final rules, as high-quality audits generally enhance the credibility of management disclosures.⁴⁹⁵ The costs of the final rules may disproportionately impact smaller audit firms, and in so much as smaller audit firms tend to audit smaller issuers, pass through of these costs may disproportionately impact EGCs.⁴⁹⁶

However, two important caveats will limit the impact of the final rules on EGCs. First, the vast majority of EGC engagements will not be subject to the final engagement-level reporting requirements because an EGC cannot be a large accelerated filer and few accelerated filers maintain the EGC status.⁴⁹⁷ The Board believes these EGCs will therefore not be impacted by the final engagement-level reporting requirements. Second, approximately 23% of EGC engagements (712 out of 3,031) will not be included in any final firm-level reporting because they are not audited by a firm that will be subject to the final firm-level reporting requirements. The Board believes these EGCs will therefore not be impacted by the final firm-level reporting requirements.

Overall, among the impacted EGCs, the final rules are expected to enhance the quality of EGC audits and financial reporting quality.⁴⁹⁸ To the extent the final rules will improve EGCs' financial reporting quality, it may also improve the efficiency of capital allocation, lower the cost of capital, and enhance capital formation. For example, investors may improve their capital allocation by more accurately identifying EGCs with the strongest prospects for generating future risk-adjusted returns and reallocating their capital accordingly. Investors may also perceive less risk in the impacted EGC capital markets generally, leading to an increase in the supply of capital to the impacted EGCs. This may increase capital formation and reduce the cost of capital to impacted EGCs. The final rules could reduce competition in an EGC's product market if the indirect costs to audited companies

disproportionately impact EGCs relative to their competitors.

As discussed above, the Board considered broadening the applicability of the final rules to include information from audits of EGCs generally. However, for the reasons described there, the Board is not doing so at this time. In particular, non-accelerated filer EGCs may be disproportionately impacted by cost passthrough and tend to be smaller than in-scope issuers. Comments related to this alternative are discussed above. There were no comments related to the EGC analysis specifically.

Accordingly, and for the reasons explained above, the Board recommends that the Commission determine that it is necessary or appropriate in the public interest, after considering the protection of investors and whether the action will promote efficiency, competition, and capital formation, to apply the final rules to audits of EGCs.

Appendix—Illustrative Examples of Metric Calculations

The examples below are based on hypothetical situations and have been prepared for illustrative purposes only, to show how metrics would be calculated based on the facts presented. They are not intended to provide guidance or suggestions regarding what the numerical values of the metrics themselves, or of the inputs on which they are based, are likely to be or should be. They are qualified in their entirety by reference to Rule 2203C, *Firm Metrics*, Rule 3211, *Audit Participants and Metrics*, Form FM, *Firm Metrics*, and Form AP, *Audit Participants and Metrics*.

I. Partner and Manager Involvement

⁴⁹⁰ See PCAOB, *White Paper on Characteristics of Emerging Growth Companies and Their Audit Firms* at November 15, 2022 (Feb. 20, 2024), available at <https://pcaobus.org/resources/other-research-projects> ("EGC White Paper").

⁴⁹¹ The EGC White Paper uses a lagging 18-month window to identify companies as EGCs. Please refer to the "Current Methodology" section in the EGC White Paper for details. Using an 18-month window enables PCAOB staff to analyze the characteristics of a fuller population in the EGC White Paper, but may tend to result in a larger number of EGCs being included for purposes of the present EGC analysis than would alternative methodologies. For example, an estimate using a lagging 12-month window would exclude some EGCs that are delinquent in making periodic filings. An estimate as of the measurement date would exclude EGCs that have terminated their registration, or that have exceeded the eligibility or time limits. See *id.*

⁴⁹² See, e.g., Harris and Williams, *Audit Quality Indicators*.

⁴⁹³ See EGC White Paper at Figure 9 and Figure 12 (indicating that exchange-listed EGCs have less market capitalization and revenue than exchange-listed non-EGCs).

⁴⁹⁴ See SEC, *Final Report of the Advisory Committee on Smaller Public Companies to the U.S. Securities and Exchange Commission* (Apr. 23, 2006) at 73.

⁴⁹⁵ Researchers have developed a number of proxies that are thought to be correlated with information asymmetry, including small issuer size, lower analyst coverage, larger insider holdings, and higher research and development costs. To the extent that EGCs exhibit one or more of these properties, there may be a greater degree of information asymmetry for EGCs than for the broader population of companies, which increases the importance to investors of the external audit to enhance the credibility of management disclosures. See, e.g., Steven A. Dennis and Ian G. Sharpe, *Firm Size Dependence in the Determinants of Bank Term Loan Maturity*, 32 *Journal of Business Finance and Accounting* 31 (2005); Michael J. Brennan and Avandhar Subrahmanyam, *Investment Analysis and Price Formation in Securities Markets*, 38 *Journal of Financial Economics* 361 (1995); David Aboody and Baruch Lev, *Information Asymmetry, R&D, and Insider Gains*, 55 *Journal of Finance* 2747 (2000); Raymond Chiang and P. C. Venkatesh, *Insider Holdings and Perceptions of Information*

Asymmetry: A Note, 43 *Journal of Finance* 1041 (1988); and Molly Mercer, *How Do Investors Assess the Credibility of Management Disclosures?*, 18 *Accounting Horizons* 185 (2004).

⁴⁹⁶ PCAOB staff analysis indicates that, compared to exchange-listed non-EGCs, exchange-listed EGCs are approximately 2.6 times as likely to be audited by an NAF and approximately 1.3 times as likely to be audited by a triennially inspected firm. Source: EGC White Paper and S&P.

⁴⁹⁷ As of November 15, 2022, among the 2,562 EGCs for which "accelerated filer" status information is available, just 163 identified as accelerated filers. See EGC White Paper at 26.

⁴⁹⁸ See above for a discussion on the link between audit quality and financial reporting quality.

⁴⁹⁹ As noted in Form FM and Form AP, hours worked are the sum of hours that are incurred on issuer and non-issuer engagements and include hours spent on training, practice development, personnel development, or other firm activities. Hours worked exclude hours that are not considered working hours (e.g., paid time off and holiday time).

Example firm-level calculation:Total audit hours of the firm's accelerated filer and large accelerated filer engagements

Accelerated filer and large accelerated filer engagements	Total Audit Hours	Total Audit Hours incurred by partners and managers on the engagement team
Company X	3,900	1,400
Company Y	2,500	625
Company Z	1,500	300
Total	7,900	2,325

Total audit hours incurred by partners and managers on the engagement team for all accelerated filer and large accelerated filer engagements / Total audit hours for all accelerated filer and large accelerated filer engagements

Calculation: $2,325 / 7,900 = 29\%$

Example firm-level reporting for Form FM:

Partner and Manager Involvement	Percentage of total audit hours for partners and managers for all accelerated filer and large accelerated filer engagements	29%

Example engagement-level calculation:Details for total audit hours of the accelerated filer or large accelerated filer engagement

- Lead auditor issues the audit report for Company X.
- Total audit hours for the engagement: **3,900**

Details for partners and managers

Company X	Total audit hours incurred by partners and managers on the engagement team
Engagement Partner	300
U.S. (partners other than the engagement partner and managers)	700
France (partners and managers)	150
Germany (managers)	125
Italy (managers)	60
China (managers)	15
India shared service center (managers)	50
Total	1,400

Total audit hours incurred by partners and managers on the engagement team / Total audit hours for the engagement

Calculation: 1,400/3,900 = **36%**

Example engagement-level reporting for Form AP:

Partner and Manager Involvement	Percentage of total audit hours for partners and managers	36%

II. Workload

Example firm-level calculations:

Details for hours worked⁴⁹⁹ by the firm's partners who worked on accelerated filer and large accelerated filer engagements

Quarter	Total hours worked for the quarter	Number of partners who incurred hours on accelerated filer and large accelerated filer engagements	Average number of hours worked in the quarter	Weeks in the quarter	Average weekly workload
Sep 30, 2024	5,400	10	540	13	42
Jun 30, 2024	5,300	10	530	13	41
Mar 31, 2024	6,700	10	670	13	52
Dec 31, 2023	5,750	10	575	13	44

Average number of hours worked by *partners* who incurred hours on accelerated filer and large accelerated filer engagements in the calendar quarter / Number of weeks in the calendar quarter

Calculation (September 30, 2024): $540/13 = 42$

Details for hours worked by the firm's managers who worked on accelerated filer and large accelerated filer engagements

Quarter	Total hours worked for the quarter	Number of managers who incurred hours on accelerated filer and large	Average number of hours	Weeks in the quarter	Average weekly workload

		accelerated filer engagements	worked in the quarter		
Sep 30, 2024	14,000	25	560	13	43
Jun 30, 2024	13,750	25	550	13	42
Mar 31, 2024	18,000	25	720	13	55
Dec 31, 2023	14,750	25	590	13	45

Average number of hours worked by *managers* who incurred hours on accelerated filer and large accelerated filer engagements in the calendar quarter / Number of weeks in the calendar quarter

Calculation (September 30, 2024): 560/13 = **43**

Example firm-level reporting for Form FM:

Workload		Average weekly hours worked	
	Quarter ended	Partners	Managers
	Sep 30, 2024	42	43
	Jun 30, 2024	41	42
	Mar 31, 2024	52	55
	Dec 31, 2023	44	45

Example engagement-level calculations:

Company A has a fiscal year end of December 31. The audit report was issued on March 1, 2024 and the firm filed Form AP on March 15, 2024.

Details for hours worked by the engagement partner

Quarter	Number of hours worked in the quarter	Number of weeks in the quarter	Average weekly workload

Jun 30, 2023	546	13	42
Sep 30, 2023	559	13	43
Dec 31, 2023	585	13	45
Mar 1, 2024 ⁵⁰⁰	468	8.6	54

Number of hours worked by the *engagement partner* in the fiscal quarter / Number of weeks in the fiscal quarter

Calculation (September 30, 2023): $559/13 = 43$

Details for hours worked by partners (excluding engagement partner) and managers on the core engagement team

Quarter	Total hours worked for the quarter	Number of partners (excluding the engagement partner) and managers on the core engagement team	Average number of hours worked in the quarter	Weeks in the quarter	Average weekly workload
Jun 30, 2023	2,260	4	565	13	43
Sep 30, 2023	2,300	4	575	13	44
Dec 31, 2023	2,400	4	600	13	46
Mar 1, 2024	1,975	4	494	8.65	57

Average number of hours worked by *partners* (excluding the *engagement partner*) and *managers* who are on the *core engagement team* in the fiscal quarter / Number of weeks in the fiscal quarter

Calculation (September 30, 2023): $575/13 = 44$

⁵⁰⁰ The number of weeks for the quarter ended March 1, 2024, represents the number of weeks through the issuance of the audit report.

Example engagement-level reporting for Form AP:

Workload		Average weekly hours worked during the engagement	
	Period ended	Engagement Partner	Partners (excluding the engagement partner) and Managers
	Jun 30, 2023	42	43
	Sep 30, 2023	43	44
	Dec 31, 2023	45	46
	March 1, 2024	54	57

III. Training Hours for Audit Personnel⁵⁰¹***Example firm-level calculation:*****Details for total professional development training hours**

The firm tracks its annual partner and staff training based on the calendar year.⁵⁰¹ The firm has a combined headcount of partners, managers, and staff of 1,400. Total professional development training hours recorded from January 1, 2024, through December 31, 2024, were 68,600. The hours were distributed as follows:

	Total Professional Development Training Hours	Total Audit Personnel
Partners	4,100	100
Managers	17,200	400
Staff	47,300	900
Total	68,600	1,400

Total professional development training hours incurred by *partners, managers* and *staff* of the firm / Total number of *partners, managers*, and *staff* of the firm

Calculation: $68,600/1,400 = 49$

Example reporting for Form FM:

Training Hours for Audit Personnel	Average annual professional development training hours	49

Example engagement-level calculation:**Details for total professional development training hours**

The firm tracks its annual partner and staff training based on the calendar year. The core engagement team has a combined headcount of partners, managers, and staff of 12. Total professional development training hours for all members of the core engagement team recorded from January 1, 2024, through December 31, 2024, were 564. The hours were distributed as follows:

⁵⁰¹ As noted in Form FM and Form AP, training metrics should be calculated for the same 12-month period, either ended September 30, or based on the firm's training calendar.

	Total Professional Development Training Hours	Total Audit Personnel
Partners	96	2
Managers	168	3
Staff	300	7
Total	564	12

Total professional development training hours incurred by *partners, managers* and *staff* on the *core engagement team* / Total number of *partners, managers*, and *staff* on the *core engagement team*

Calculation: 564/12 = 47

Example reporting for Form AP:

Training Hours for Audit Personnel	Average annual professional development training hours	47

IV. Experience of Audit Personnel

Example firm-level calculations:

- The Firm has 100 partners and 500 managers.

	Number	Years of experience
Partners	100	2,000
Managers	500	4,000

- (i) Average experience at a public accounting firm of the firm's partners:

Total experience at a public accounting firm of all *partners* / Total number of *partners*

Calculation: $2,000/100 = 20$

- (ii) Average experience at a public accounting firm of the firm's managers:

Total experience at a public accounting firm of *managers* / Total number of *managers*

Calculation: $4,000/500 = 8$

Example firm-level reporting for Form FM:

		Partners	Managers
Experience of Audit Personnel	Average years of experience at a public accounting firm	20	8

Example engagement-level calculations:

	Number	Total experience at a public accounting firm
Engagement Partner	1	23
Engagement Quality Reviewer	1	19
Core engagement team partners (excluding the engagement partner)	3	45

Core engagement team managers	8	80

(i) Total experience at a public accounting firm of the engagement partner:

Total experience at a public accounting firm of the *engagement partner*

Calculation: **23**

(ii) Total experience at a public accounting firm of the engagement quality reviewer:

Total experience at a public accounting firm of the *engagement quality reviewer*

Calculation: **19**

(iii) Average experience at a public accounting firm of the core engagement team members who are partners (excluding the engagement partner):

Total experience at a public accounting firm of the *core engagement team* members who are *partners* (excluding the *engagement partner*) / Total number of people on the *core engagement team* who are *partners* (excluding the *engagement partner*)

Calculation: $45/3 = 15$

(iv) Average experience at a public accounting firm of the core engagement team members who are managers:

Total experience at a public accounting firm of the *core engagement team* members who are *managers* / Total number of people on the *core engagement team* who are *managers*

Calculation: $80/8 = 10$

Example engagement-level reporting for Form AP:

Experience of Audit Personnel	Years of experience at a public accounting firm of the Engagement Partner	Years of experience at a public accounting firm of the Engagement Quality Reviewer	Average years of experience of Partners (excluding the engagement partner) on the Core Engagement Team	Average years of experience of Managers on the Core Engagement Team
	23	19	15	10

V. Industry Experience

Example firm-level calculation:

The top five industries based on revenue from audit services for the most recently completed fiscal year are the following:

- Consumer products and services,
- Banks,
- Health care providers,
- Industrial goods and services, and
- Government services

The firm took into account a number of factors in determining career industry experience, such as the extent to which non-audit experience and experience in auditing companies in adjacent industries could reasonably be considered as industry experience. The firm determined there were several partners and managers that had career industry experience of five or more years for partners and three or more years for managers in its top five industries.

Industry	% of firm revenue from audit services	1. Number of partners with 5 or more years of career industry experience	2. Number of managers with 3 or more years of career industry experience
Consumer products and services	18%	15	45
Banks	11%	10	30
Health care providers	9%	12	43
Industrial goods and services	8%	5	13
Government services	4%	4	6

Note: While not required, a firm may choose to report on additional industries that are not among its top five by revenue from audit services.

Example firm-level reporting for Form FM:

Industry Experience	Top five industries based on the firm's revenue from audit services	Number of Partners with 5 or more years of career industry experience	Number of Managers with 3 or more years of career industry experience
	Consumer products and services	15	45
	Finance: Banks	10	30
	Health care: Health Care Providers	12	43
	Industrial Goods and Services: General	5	13
	Government and Public Services: Government	4	6

Example engagement-level calculation:

The company's primary industry is Banks.

The engagement partner and the EQR have 16 and 24 years, respectively, of career industry experience. The core engagement team also has several other partners and managers who work on different aspects of the audit throughout the year, including those who have focused on other industries and have not yet met the five- and three-year requirements. The following table depicts their career industry experience:

	Bank career industry experience
Engagement partner	16 years
Engagement quality reviewer	24 years
IT partner	Does not meet criteria for five years
Tax partner	Meets criteria for 5 years
Actuarial partner	Does not meet criteria for five years
Other assisting partner	Meets criteria for five years
Audit lead senior manager	Meets criteria for three years
Manager 2	Meets criteria for three years

Manager 3	Meets criteria for three years
Manager 4	Does not meet criteria for three years
Manager 5	Does not meet criteria for three years
Tax senior manager	Meets criteria for three years
IT manager	Does not meet criteria for three years

Example engagement-level reporting for Form AP:

Industry Experience	Issuer's Primary Industry	Financial Services: Banks	
	Years of Career Industry Experience	Engagement Partner	Engagement Quality Reviewer
		16	24
	Number of core engagement team members with industry experience	Partners (excluding the engagement partner)	Managers
		2	4

VI. Retention of Audit Personnel^{502 503}

Example calculations (only manager calculations provided):

Firm A had 204 managers, 204 managers, and 200 managers as of September 30, 2023, October 1, 2023 and September 30, 2024, respectively. During the 12-month period, 38 managers left the firm, 2 managers did not participate in audits, 5 managers were promoted to partner, 37 staff were promoted to manager, and 4 managers were newly hired or served on audits and did not in the prior year.

- Average number of managers* – The total number of managers as of October 1, 2023 was 204 and the total number of managers as of September 30, 2024 was 200.

The number of [partners/managers] as of October 1 (Year 1) + the number of [partners/managers] as of September 30 (Year 2) / 2

Calculation: (204+200) / 2 = **202**

- Average annual retention rate*

Calculation of the numerator – Calculate the total number of managers who were continuously employed and held the same position from October 1, 2023 to September 30, 2024

Calculation of the numerator	
Managers as of October 1, 2023	204
Adjust for managers who were not continuously employed and holding the same position throughout the period	
Left the firm	(38)
Did not participate in audits	(2)
Promoted to partner	(5)
Staff promoted to manager ¹	37
	196

Because the 4 managers who were newly hired or transferred into the audit practice were not included in the beginning number of 204, no specific adjustment to the numerator relating to these 4 is necessary.²

⁵⁰² As provided in the Note to Item 4.6 of Form FM, promotion is treated as if it had occurred at the beginning of the period for the calculation of retention of audit personnel metric.

⁵⁰³ As noted in Form FM, only partners and managers with one or more years of service and who were employed continuously during the 12-month period are included in the numerator.

Calculation of the denominator – Adjust the number of managers as of October 1, 2023 (204 managers) for the promotions as if they had occurred at the beginning of the period (the denominator).

Calculation of the denominator	
Managers as of October 1, 2023	204
<i>Adjust for managers who did not continuously hold the same position</i>	
Promoted to partner	(5)
Staff promoted to manager	37
	236

The number of [*partners/managers*] continuously holding the same position from October 1 (Year 1) to September 30 (Year 2) / Number of [*partners/managers*] as of October 1 (Year 1)

Calculation: $196 / 236 = 83\%$

- *Average annual headcount change* --- The total number of current year-end managers was 200 and the total number of prior year managers was 204.

Number of [*partners/managers*] as of September 30 (Year 2) – Number of [*partners/managers*] as of September 30 (Year 1) / Number of [*partners/managers*] as of September 30 (Year 1)

Calculation: $(200-204) / 204 = -2\%$

Example firm-level reporting for Form FM:

Retention of Audit Personnel		Partners	Managers
	Average number	85	202
	Average annual retention rate	96%	83%
	Average annual headcount change	-1%	-2%

VII. Allocation of Audit Hours⁵⁰⁴

⁵⁰⁴ As noted in Form FM and Form AP, multi-year audits are excluded from both the firm- and engagement-level calculations.

Example firm-level calculations:

The firm issued audit reports with respect to eight accelerated filer or large accelerated filer engagements with various year ends during the reporting period ended September 30, 2024. The hours incurred by the engagement teams during the audits were:

	Issuer year end	Hours incurred prior to issuer year end	Hours incurred following issuer year end
Issuer A	December 31, 2023	20,415	12,056
Issuer B	December 31, 2023	7,856	3,020
Issuer C	March 31, 2024	10,583	8,023
Issuer D	June 30, 2024	5,570	3,502
Issuer E	March 31, 2024	4,508	3,752
Issuer F	December 31, 2023	1,575	1,208
Issuer G	December 31, 2023	3,301	1,833
Issuer H (Initial public offering engagement)	December 31, 2023, December 31, 2022, and December 31, 2021	- ¹	-
Total		53,808	33,394

Total audit hours incurred prior to *issuers'* year ends for all accelerated filer and large accelerated filer engagements / *Total audit hours* for all accelerated filer and large accelerated filer engagements

Calculation: $53,808 / (53,808 + 33,394) = 62\%$

Total audit hours incurred following *issuers'* year ends for all accelerated filer and large accelerated filer engagements / *Total audit hours* for all accelerated filer and large accelerated filer engagements

Calculation: $33,394 / (53,808 + 33,394) = 38\%$

Example firm-level reporting for Form FM:

Allocation of Audit Hours	Percentage of audit hours incurred prior to issuers' year ends for all accelerated filer and large accelerated filer engagements	62%
	Percentage of audit hours incurred following issuers' year ends for all accelerated filer and large accelerated filer engagements	38%

Example engagement-level calculations:

The firm audits Issuer G with a December 31 year end. The hours incurred by the engagement team during the audit were:

	Hours incurred prior to and including December 31	Hours incurred following December 31
U.S. (lead auditor)	2,015	1,350
Germany	682	265
China	452	163
South Africa	152	55
Total	3,301	1,833

Total audit hours incurred prior to the issuer's year end / Total audit hours

Calculation: $3,301 / (3,301 + 1,833) = 64\%$

Total audit hours incurred following the issuer's year end / Total audit hours

Calculation: $1,833 / (3,301 + 1,833) = 36\%$

Example engagement-level reporting for Form AP:

Allocation of Audit Hours	Percentage of total audit hours incurred prior to the issuer's year end	64%
	Percentage of total audit hours incurred following the issuer's year end	36%

Example calculation:

The following is true for Firm X's audit practice for the 12-month periods ended September 30 for the last three years:

- For 09/30/2022, Firm X issued 110 audit reports for its issuer engagements, 40 of which were integrated audits.
- For 09/30/2023, Firm X issued 105 audit reports for its issuer engagements, 35 of which were integrated audits.
- For 09/30/2024, Firm X issued 100 audit reports for its issuer engagements, 30 of which were integrated audits.

During the 12-month period ended September 30, 2024, Firm X had the following restatements for its issuer engagements:

- 9 revision restatements. These restatements relate to audit reports initially issued during the following reporting periods:
 - 2022 – 6
 - 2023 – 3
 - 2024 – 0*
- 4 reissuance restatements relate to the financial statements. These restatements relate to audit reports initially issued during the following reporting periods:
 - 2022 – 2
 - 2023 – 1
 - 2024 – 1
- 2 reissuance restatements of management's report on ICFR. These restatements relate to audit reports on ICFR initially issued during the following reporting periods:
 - 2022 – 1
 - 2023 – 1
 - 2024 – 0*

* Note that for the 12-month period ended September 30, 2024, there were no restatements of this type of audit report issued during that 12-month period.

Example reporting for Form FM:

		Audit Report Initially Issued		
		2024	2023	2022
Restatement History	Revision restatements of the financial statements for errors	0	3	6
	Reissuance restatements of the financial statements for errors	1	1	2
	Reissuance restatements of management's report on ICFR	0	1	1
	Total issuer engagements	100	105	110
	Total issuer engagements with audits of ICFR	30	35	40

III. Date of Effectiveness of the Proposed Rules and Timing for Commission*Action*

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Board consents, the Commission will:

(A) By order approve or disapprove such proposed rules; or

(B) Institute proceedings to determine whether the proposed rules should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rules are consistent with the requirements of Title I of the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/pcaob/>); or
- Send an email to rule-comments@sec.gov. Please include PCAOB-2024-06 on the subject line.

Paper Comments

- Send paper comments in triplicate to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to PCAOB–2024–06. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (<https://www.sec.gov/rules/pcaob>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rules that are filed with the Commission, and all written communications relating to the proposed rules between the Commission

and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission’s Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the PCAOB. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in

part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to PCAOB–2024–06 and should be submitted on or before January 2, 2025.

For the Commission, by the Office of the Chief Accountant.⁵⁰⁵

Vanessa A. Countryman,
Secretary.

Part III

Environmental Protection Agency

40 CFR Part 62

Federal Plan Requirements for Commercial and Industrial Solid Waste Incineration Units That Commenced Construction On or Before June 4, 2010 and Have Not Been Modified or Reconstructed Since August 7, 2013; Final Rule

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 62****[EPA-HQ-OAR-2016-0664; FRL-5960-02-OAR]****RIN 2060-AT28****Federal Plan Requirements for Commercial and Industrial Solid Waste Incineration Units That Commenced Construction On or Before June 4, 2010 and Have Not Been Modified or Reconstructed Since August 7, 2013****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Final rule.

SUMMARY: This action finalizes the Federal plan for existing commercial and industrial solid waste incineration units (CISWI). This final action implements the U.S. Environmental Protection Agency's (EPA) emission guidelines adopted on February 7, 2013, as amended on June 23, 2016, and on April 16, 2019, in states that do not have an approved state plan implementing the emission guidelines in place by the effective date of this Federal plan. The implementation of the emission guidelines will result in emissions reductions of the regulated pollutants including cadmium, hydrogen chloride, lead, mercury, carbon monoxide, nitrogen oxides, particulate matter, and sulfur dioxide from the affected CISWI. This final action is also revising the definition of "small, remote incinerator" to reflect new statutory prohibitions on the implementation of CISWI standards to units in the State of Alaska.

DATES: This final rule is effective January 10, 2025. The incorporation by reference of certain publications listed in the regulation is approved by the Director of the Federal Register as of January 10, 2025.

ADDRESSES: The EPA has established a docket for this rulemaking under Docket ID No. EPA-HQ-OAR-2016-0664. All documents in the docket are listed on the <https://www.regulations.gov/> website. Although listed, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically through <https://www.regulations.gov/>.

FOR FURTHER INFORMATION CONTACT: Dr. Felica Davis, Sector Policies and

Programs Division (E14305), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, 109 T.W. Alexander Drive, P.O. Box 12055, Research Triangle Park, North Carolina 27711; telephone number: (919) 541-4857; and email address: davis.felica@epa.gov.

SUPPLEMENTARY INFORMATION: Preamble acronyms and abbreviations.

Throughout this document the use of "we," "us," or "our" is intended to refer to the EPA. We use multiple acronyms and terms in this preamble. While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

AG Attorney General
CAA Clean Air Act
CBI Confidential business information
Cd Cadmium
CFR Code of Federal Regulations
CISWI Commercial and industrial solid waste incineration units
CMS Continuous monitoring system
CO Carbon monoxide
EG Emission Guidelines
EPA U.S. Environmental Protection Agency

I. General Information**A. Does the action apply to me?**

Regulated entities. Owners or operators of existing CISWI that are

subject to the existing Federal plan implementing the December 1, 2000, emission guidelines (EG), and units not already subject to an EPA-approved and effective state plan implementing the February 7, 2013, EG (and subsequent 2016 and 2019 amendments made to the

EG), may be regulated by this final action. Existing CISWI are those that commenced construction on or before June 4, 2010, or that commenced modification or reconstruction after June 4, 2010, but no later than August 7, 2013. Regulated categories and

entities include those that operate CISWI. Although there is no specific North American Industry Classification System (NAICS) code for CISWI, these units may be operated by the categories of sources listed in table 1 of this preamble.

TABLE 1—EXAMPLES OF POTENTIALLY REGULATED ENTITIES

Category	NAICS code	Examples of potentially regulated entities
Any industrial or commercial facility using a solid waste incinerator.	211, 212, 486	Mining; oil and gas exploration operations; pipeline operators.
	221	Utility providers.
	321, 322, 337	Manufacturers of wood products; manufacturers of pulp, paper and paperboard; manufacturers of furniture and related products.
	325, 326	Manufacturers of chemicals and allied products; manufacturers of plastics and rubber products.
	327	Manufacturers of cement; nonmetallic mineral product manufacturing.
	333, 336	Manufacturers of machinery; manufacturers of transportation equipment.
	423, 44	Merchant wholesalers, durable goods; retail trade.

This table is not intended to be exhaustive, but rather provides a general guide for identifying entities likely to be affected by this action. To determine whether a facility would be affected by this action, please examine the applicability criteria in 40 Code of Federal Regulations (CFR) 62.14510 through 62.14525 (now at 40 CFR 62.14510a through 62.14530a) of subpart III (now subpart IIIa). Questions regarding the applicability of this action to a particular entity should be directed to the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

B. What action is the EPA taking?

In this action, the EPA is finalizing the Federal plan for existing CISWI in states that do not have an approved state plan implementing the CISWI EG. The CISWI Federal plan was proposed on January 11, 2017 (82 FR 3554), and received 13 public comments, some of which led to revisions that were made to this final rule. The comments on the proposal and changes the EPA made to finalize this Federal plan are discussed in more detail in section III. of this preamble.

C. How do I obtain a copy of this document and other related information?

The docket number for this final action regarding the CISWI Federal plan (40 CFR part 62, subpart IIIa) is Docket ID No. EPA-HQ-OAR-2016-0664. In addition to being available in the docket, an electronic copy of this final action is available on the internet at [https://www.epa.gov/stationary-sources-air-pollution/commercial-and-](https://www.epa.gov/stationary-sources-air-pollution/commercial-and-industrial-solid-waste-incineration-units-ciswi-new)

industrial-solid-waste-incineration-units-ciswi-new. Following publication in the **Federal Register**, the EPA will post the **Federal Register** version of the final rule and key technical documents on this same website.

D. Judicial Review

Under the Clean Air Act (CAA) section 307(b)(1), judicial review of this final rule is available only by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit (the Court) by February 10, 2025. Under CAA section 307(d)(7)(B), “[o]nly an objection to a rule or procedure which was raised with reasonable specificity during the period for public comment (including any public hearing) may be raised during judicial review.” This section also provides a mechanism for the EPA to convene a proceeding for reconsideration, “[i]f the person raising an objection can demonstrate to the EPA that it was impracticable to raise such objection within [the period for public comment] or if the grounds for such objection arose after the period for public comment (but within the time specified for judicial review) and if such objection is of central relevance to the outcome of the rule.” Any person seeking to make such a demonstration to us should submit a Petition for Reconsideration to the Office of the Administrator, U.S. Environmental Protection Agency, Room 3000, WJC West Building, 1200 Pennsylvania Ave. NW, Washington, DC 20460, with a copy to both the person(s) listed in the preceding **FOR FURTHER INFORMATION CONTACT** section, and the Associate

General Counsel for the Air and Radiation Law Office, Office of General Counsel (Mail Code 2344A), U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

E. What are the incremental costs and benefits of this action?

This Federal plan implements the CISWI EG that were promulgated on February 7, 2013, and amended on June 23, 2016, and April 16, 2019 (see the background discussion in section II.A. of this preamble for more detail), for the states (see table 2 of this preamble) that do not have approved state plans implementing the CISWI EG. Therefore, any costs and benefits associated with this Federal plan have already been quantified and attributed to the CISWI EG (*i.e.*, CISWI EG benefits and costs equal those for units covered by approved state plans plus those units covered by this Federal plan—see section II.C. of this preamble for more detailed discussion). Because the Consolidated Appropriations Act of 2024, H.R. 4366, section 432, precludes the EPA from expending funds to implement or enforce the EG codified under 40 CFR part 60, subpart DDDD, with respect to units in the State of Alaska that are defined as “small remote incinerators” (SRI) until a subsequent regulation is issued, neither costs nor emission reductions from SRIs located in Alaska are included in the portion of CISWI EG costs and emissions reduction expected due to the Federal plan implementation.

Incineration of solid waste at commercial and industrial facilities

causes the release of a wide array of air pollutants, some of which exist in the waste feed material and are released unchanged during combustion, and some of which are generated as a result of the combustion process itself.¹ The EPA estimated in the 2013 rule that once the state plans and the Federal plan become effective, a total emissions reduction of the regulated pollutants would occur as follows: acid gases (*i.e.*, hydrogen chloride (HCl) and sulfur dioxide (SO₂), about 7,046 tons per year (tpy); particulate matter (PM) about 2,401 tpy; non-Hg metals (*i.e.*, lead (Pb) and cadmium (Cd)) about 4.5 tpy; carbon monoxide (CO) about 20,000 tpy; nitrogen oxides (NO_x) about 5,399 tpy; and mercury (Hg) about 688 pounds per year. The EPA also estimated that air pollution control devices installed to comply with the 2013 rule would also effectively reduce emissions of pollutants such as 7-polycyclic aromatic hydrocarbons and polychlorinated biphenyls (PCB).²

II. Background Information

A. What is the statutory authority for this action?

Sections 111(b) and 129(a) of the CAA address emissions from new units (*i.e.*, New Source Performance Standards (NSPS)), and CAA sections 111(d) and 129(b) address emissions from existing units (*i.e.*, EG). The NSPS are Federal regulations which are directly enforceable upon CISWI, and, under CAA section 129(f)(1), become effective 6 months after promulgation. Unlike the NSPS, the EG provide direction for developing state plans, and are not themselves directly enforceable. For the EG to be enforceable, it must be implemented through either an EPA-approved state or tribal³ plan or through an EPA adopted Federal plan. The Federal plan regulates CISWI in states that do not have approved plans in effect to implement the EG. Although Congress required the EPA to promulgate a Federal plan for states that fail to submit approvable state plans, states may submit approvable state plans after promulgation of the Federal plan and become subject to the approved state plans. Congress established CAA sections 111 and 129 with the intent that the state and local agencies take the primary responsibility

for ensuring that the emissions limitations and other requirements in the EG are achieved.

CAA section 129(b)(2) directs states with existing CISWI(s) subject to the EG to submit plans to the EPA that implement and enforce the EG. The deadline for states to submit state plans to the EPA for review was February 7, 2014 (see 78 FR 9121–2, February 7, 2013).⁴ CAA sections 111 and 129(b)(3) and 40 CFR 60.27(c) and (d) require the EPA to develop, implement and enforce a Federal plan for CISWI in any state which has not submitted an approvable state plan within 2 years after promulgation of the EG. On January 11, 2017, the EPA proposed a Federal plan that would apply to any CISWI located in any state without an approved state plan as of the compliance date for existing CISWI (*i.e.*, 5 years after promulgation of the emission guidelines). The EPA did not reopen the underlying CISWI rule for public comment in this current action and the Agency does not address comments on the underlying CISWI rule.⁵

CAA section 129, titled “Solid Waste Combustion,” requires the EPA to develop and adopt standards for solid waste incineration units pursuant to CAA sections 111 and 129. On March 21, 2011, the EPA promulgated revised NSPS and EG for CISWI. At that time, the Administrator also announced that it identified certain issues that warranted further opportunity for public comment and that the Agency was planning to reconsider the CISWI rule. The EPA also received petitions for reconsideration of the final CISWI rule. On December 23, 2011, the EPA proposed revisions to the March 2011 final CISWI rule and requested comment on proposed changes to the NSPS and EG for CISWI (76 FR 80452).

On February 7, 2013, the EPA promulgated the final reconsideration of the 2011 NSPS and EG for CISWI (78 FR 9112). The 2013 final rule made some revisions to the December 2011 proposed reconsideration rule in response to comments and additional information received. Following that action, the EPA received petitions for reconsideration of the 2013 final rule. These petitions stated certain provisions should be reconsidered and that the

public lacked sufficient opportunity to comment on some of the provisions contained in the final 2013 CISWI rule. On January 21, 2015, the EPA reconsidered and requested comment on four provisions of the 2013 final NSPS and EG for CISWI. Additionally, the EPA proposed clarifying changes and corrections to the 2013 final rule, some of which were raised in petitions for reconsideration. On June 23, 2016, the EPA promulgated the final reconsideration of the 2013 NSPS and EG for CISWI (81 FR 40956) (2016 CISWI rule).

Following promulgation of the 2016 CISWI rule, the EPA received requests from industry interested parties and implementing agencies to clarify various issues with implementation of the standards. In addition, the EPA identified certain procedural issues, including testing and monitoring issues and inconsistencies within the rules,⁶ that required further clarification or correction. On June 15, 2018, the EPA proposed amendments to several provisions of the 2016 CISWI rule to address these issues (83 FR 28068). In addition, the EPA identified additional regulatory provisions, beyond those raised by the requests from industry interested parties and implementing agencies, that required clarification and editorial correction to address inconsistencies and errors in the final rule. The EPA promulgated these technical amendments on April 16, 2019 (84 FR 15846).

B. What is the purpose of this action?

CAA section 129(b)(2) requires states to implement the EG for existing solid waste incineration units, including CISWI. States with existing CISWI were required to submit to the EPA, within one year following promulgation of the EG (by February 7, 2014), state plans that are at least as protective as the EG. CAA sections 111 and 129 and 40 CFR 60.27(c) and (d) require the EPA to develop, implement, and enforce a Federal plan in states that have not submitted an approvable plan. The EPA is promulgating this CISWI Federal plan to be effective in any state that failed to provide an approvable state plan, thus ensuring implementation and enforcement of the final CISWI EG.

The regulations required states without any existing CISWI to submit to the Administrator a letter of negative

¹ See 78 FR 9131–9133 to reference the impacts of the EG adopted on February 7, 2013.

² See 75 FR 31970 (June 4, 2010), where polycyclic organic matter (POM) and polychlorinated biphenyl (PCB) emission reductions are discussed.

³ The EPA is not aware of any CISWI units owned or operated by Indian tribal governments at the time of the publication of this document.

⁴ Five states did not submit a draft or final state plan or negative declaration and one state indicated intent to submit a state plan to the EPA.

⁵ Many aspects of the CISWI rule were challenged in the United States Court of Appeals for the District of Columbia Circuit (D.C. Circuit or Court) in *American Forest and Paper Association (AFPA) v. EPA*, and the Court rejected all challenges to the standards and other provisions being implemented in this Federal plan. See *AFPA v. EPA*, 830 F.3d 579 (D.C. Cir. 2016).

⁶ The 2019 technical amendments addressed certain implementation issues and inconsistencies that required further clarification or correction to the 2016 EG. The technical amendments were not substantive and did not introduce any analytical changes to the emission guidelines; therefore, a supplemental proposal was not required.

declaration certifying that there are no CISWI in the state (see 40 CFR 62.06). No plan was required for states that do not have any CISWI. CISWI located in states that mistakenly submitted a letter of negative declaration are subject to the Federal plan, once effective, until a state plan regulating those CISWI is approved. State plans that have been submitted to implement the final CISWI EG,⁷ have either been approved or are currently undergoing EPA review. This CISWI Federal plan implements the final CISWI EG in those states that do

not have an approved state plan in place by January 10, 2025. If a state plan is approved in part, the Federal plan will apply to the affected CISWI in lieu of the disapproved portions of the state plan until the state addresses the deficiencies in the state or tribal plan and the revised state plan is approved by the EPA.

C. What is the status of state plan submittals?

The EPA anticipates that facilities in ten states and three U.S. territories⁸ will

be subject to the CISWI Federal plan. Table 2 of this preamble lists the status of state plans as of the signature date of this action. Additionally, table 2 of this preamble lists states and local agencies that submitted negative declarations and those that have indicated that they intend to take delegation of the Federal plan to directly implement and enforce the guidelines (see mechanisms for transferring authority discussion in section VI.B.2. of this preamble for more detail).

TABLE 2—STATUS OF STATE AND TERRITORY PLANS

Status	States
I. EPA-Approved State Plans	Alabama; Colorado; Louisiana; North Dakota; Oklahoma; Puerto Rico; Tennessee; Virginia; West Virginia.
II. Indicated intent to Submit Negative Declarations to the EPA.	
III. Negative Declaration Submitted to the EPA	Arkansas; Arizona; Connecticut; Delaware; District of Columbia; Idaho; Indiana; Kansas; Kentucky; Maine; Maryland; Massachusetts; Minnesota; Mississippi; Missouri; Montana; Nebraska; New Hampshire; New Jersey; New Mexico; New York; Nevada; Pennsylvania AMS; Rhode Island; South Dakota; Utah; Vermont; Virgin Islands; Wyoming.
IV. Final State Plans Submitted to the EPA	Florida; Georgia; Iowa; South Carolina; Texas.
V. Draft State Plans Submitted to the EPA	
VI. EPA Has Not Received a Draft or Final State Plan or Negative Declaration.	California; Hawaii; Michigan; Oregon; Washington.
VII. Indicated Intent to Submit State Plan to the EPA.	North Carolina.
VIII. Indicated Intent to Accept Delegation of Federal Plan	
IX. Indicated Intent to Accept Federal Plan Implementation by the EPA.	Alaska; American Samoa; Guam; Illinois; Northern Mariana Islands; Ohio; Wisconsin.

As the EPA Regional offices approve state plans, they will also, in the same action, amend the appropriate subpart of 40 CFR part 62 to codify their approvals. If the EPA approves a state plan after the Federal plan is

promulgated, the Federal plan will no longer apply to the CISWI covered by the state plan, upon the effective date of the state plan.

CISWI owners or operators can also contact the EPA Regional office for the state in which their CISWI are located

to determine whether there is an EPA-approved state plan in place. Table 3 of this preamble lists the names, email addresses, and telephone numbers of the EPA Regional office contacts and the states and territories that they cover.

TABLE 3—REGIONAL OFFICE CONTACTS

Region	Regional contact	Phone	States and territories
Region I	Jessica Kilpatrick, <i>kilpatrick.jessica@epa.gov</i> .	(617) 918–1652	Connecticut, Massachusetts, Maine, New Hampshire, Rhode Island, Vermont.

⁷ The “final CISWI EG” means the provision of 40 CFR part 60, subpart DDDD, including the revisions published on June 23, 2016 (81 FR 40956), and April 16, 2019 (84 FR 15846). As noted in the June 23, 2016, preamble, the final CISWI EG action granted reconsideration and addressed certain aspects of the February 7, 2013, rule, which itself

was issued to grant reconsideration of aspects of the March 21, 2011, rule. The April 16, 2019, technical amendments included clarifying revisions and general editorial corrections. See section II.A. of this preamble for more discussion on the background of the final CISWI EG.

⁸ 42 U.S.C. 7602. Definitions (d) The term “State” means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa and includes the Commonwealth of the Northern Mariana Islands.

III. Summary of Changes Since Proposal and Response to Comments

Based on our review of comments received on the 2017 proposed Federal plan and statutory prohibitions on the implementation of CISWI standards to units in the State of Alaska, the EPA is finalizing the Federal plan as proposed with a few minor exceptions, albeit we are finalizing the amendments as a new subpart IIIa. We are establishing the final compliance date for existing sources, implementing the 2019 technical amendments to the CISWI EG, and modifying the applicability of subpart DDDD to only apply to small, remote incinerators (SRIs) located outside the State of Alaska, and modifying equation 7 at 40 CFR 62.14670(y) (now at 40 CFR 62.14640a(y)) for waste-burning kilns that is used to calculate kiln-specific emission limit when kiln emissions are emitted through multiple stacks.

Since proposal of amendments to subpart III, the EPA determined that creating a new subpart will lessen confusion for affected sources and implementing agencies. Therefore, we have created a new subpart IIIa, which will replace subpart III once effective, which is January 10, 2025. By incorporating these amendments as a new subpart IIIa, we hope to alleviate any confusion that could be caused by making significant amendments to the current subpart III regulatory text. For one, subpart III only applies to incinerators but the emission guidelines that subpart IIIa will implement includes subcategories for incinerators, energy recovery units, waste-burning kilns, and small remote incinerators, with unique requirements and standards for each subcategory. Additionally, in creating a new subpart IIIa, we can omit transitional regulatory requirement language and make a “clean split” on a single date where subpart III ends effectiveness by January 10, 2025, and subpart IIIa begins effectiveness from that date onward. Finally, to better accommodate any potential future updates to the CISWI Federal plan, in subpart IIIa we are establishing section numbering increments of 5 so that there

is adequate numeric spacing to revise or add new regulatory text sections if needed in the future.

As noted above, the EPA is establishing the final compliance date to be the effective date of this final action, which is January 10, 2025. The CAA provides that owners or operators of affected CISWI must comply no later than 5 years after the effective date of the final CISWI EG (*i.e.*, February 7, 2018) or within 3 years from state plan approval (or promulgation of a Federal plan), whichever is earlier. The final compliance date remains as proposed as there is no statutory authority under CAA section 129 for providing compliance extensions (*i.e.*, allowing compliance after the compliance date). We believe that sources have had ample notification of this final compliance date and that they were aware of what measures they must take in order to comply.

Based on reviews of permits for units potentially subject to this Federal plan, the EPA has determined that sources in states and territories that would be subject to the Federal plan have either ceased burning waste or have made control device retrofits in the period of time since the 2017 proposed Federal plan was published. Furthermore, no adverse comments were received requesting additional time for compliance beyond the proposed February 7, 2018, final compliance date. Thus, the EPA has determined that no additional time is necessary for sources to comply with the standards.

We are also finalizing other provisions to be consistent with the 2019 technical amendments to the CISWI EG (84 FR 15848). Although these provisions were not included in the original proposed Federal plan, the EPA subsequently solicited comments on these modifications to the EG in the 2019 CISWI rulemaking. Therefore, the public had adequate opportunity to comment on these changes and had notice that sources subject to the Federal plan would be subject to these revised provisions. The technical amendments provided meaningful burden reduction by allowing regulated facilities additional time to complete

initial compliance demonstrations and adding production-based emission limits in lieu of the concentration-based limits in the 2016 CISWI rule. The requirement in 40 CFR 62.14535(a)(4) (now at 40 CFR 62.14535a(b)(4)) to perform the initial performance test within 90 days of the final compliance date has been revised to be within 180 days of the final compliance date, consistent with §§ 62.14665(a) and 62.14820(b) (now at §§ 62.14630a(a) and 62.14760a(b), respectively).

The Waste Management Plan (WMP) submittal due date has been changed from November 7, 2017, to the final compliance date, January 10, 2025, to be consistent with the EG (40 CFR part 60, subpart DDDD). The WMP is a component of compliance, and therefore it may be submitted together with operating procedures, operator training, and initial compliance testing to demonstrate initial compliance.

The EPA is finalizing revisions to 40 CFR 62.14755(b) (now at § 62.14730a(b)) to clarify that results of performance testing and CEMS performance evaluations occurring over multiple days may be submitted together up to 60 days after all performance evaluations are completed. The EPA is also finalizing the addition of an alternative equivalent emission limit for Hg for the waste-burning kiln subcategory to be consistent with the 2019 CISWI EG technical amendments (84 FR 15848). Specifically, the EPA is adding, to the Federal plan, a 58 lb/million (MM) ton clinker emission limit for Hg for the waste-burning kiln subcategory as an alternative equivalent emission limit to the 0.011 mg/dscm standard.

Consistent with the 2019 rule, the EPA is also finalizing clarifications regarding the Agency’s intent to allow CEMS for demonstrating initial compliance for any pollutant and clarification of continuous parameter monitoring requirements when CEMS are used for direct pollutant emissions monitoring. The EPA is also finalizing additional minor technical amendments consistent with the 2019 rule: Clarifications of other CEMS requirements; clarification of continuous opacity monitoring system

(COMS) requirements; clarification of reduced testing requirements; clarification of deviation reporting requirements for continuous monitoring data; and clarification of activated carbon injection (ACI) requirements.

The EPA is finalizing a revised definition of “small, remote incinerator” to reflect new prohibitions on the implementation of CISWI standards to units in the State of Alaska that were implemented by Congress after the EPA proposed the Federal plan. As specified in the Consolidated Appropriations Act of 2024, H.R. 4366, section 432,⁹ the EPA is precluded from “expending funds to implement or enforce 40 CFR part 60 subpart DDDD [the 2011 EG currently in effect] with respect to units in the state of Alaska that are defined as small remote incinerator until a subsequent regulation is issued.”

In the 2000 CISWI EG (65 FR 75351), we excluded combustion units at commercial or industrial facilities with a capacity less than 35 tons per day that combust more than 30 percent MSW from the rule. SRI means an incinerator that combusts solid waste (as that term is defined by the Administrator in 40 CFR part 241) and combusts 3 tons per day or less solid waste and is more than 25 miles driving distance to the nearest

municipal solid waste landfill. The SRIs were found to qualify for an exemption from CISWI based on their burning at least 30 percent MSW. In the 2011 CISWI EG we removed this exemption to ensure that any CISWI combustor any solid waste is subject to these standards. Therefore, commercial and industrial units that were previously exempt pursuant to this provision would be required to meet the emission limits and operating requirements of the rule. In this final action, we have revised the definition of “small, remote incinerator” consistent with the prohibition in the appropriations rider to mean “an incinerator located *outside the state of Alaska* that combusts solid waste (as that term is defined by the Administrator in 40 CFR part 241) and combusts 3 tons per day or less solid waste and is more than 25 miles driving distance to the nearest municipal solid waste landfill” (emphasis added).

Finally, based on review of the initial and continuous compliance requirements, the EPA has modified equation 7, used to calculate kiln-specific emission limit when kiln emissions are emitted through multiple stacks, at 40 CFR 62.14670(y) (now at 40 CFR 62.14640a(y)). When kiln emissions are emitted through multiple stacks

(e.g., there is an alkali bypass and/or an in-line coal mill that exhaust emissions through a separate stack(s)), the combined emissions are subject to the emission limits applicable to waste-burning kilns in table 8. At proposal, equation 7 only reflected a single configuration of emissions, a single alkali bypass and in-line coal mill, it did not reflect the multiple different stack configurations currently in use. Therefore, equation 7 has been modified to generalize the number and type of stacks and allow all configurations of sources to correctly calculate the kiln stack concentration limit for continuing compliance, irrespective of the number and type of emission points.

Public comments on the proposed rulemaking and the EPA’s responses to these comments are addressed in a separate response to comment document, available in docket EPA–HQ–OAR–2016–0664.

IV. Summary of Final CISWI Federal Plan Requirements

The CISWI Federal plan requirements are described below. Table 4 of this preamble lists each element and identifies where it is located or codified.

TABLE 4—ELEMENTS OF THE CISWI FEDERAL PLAN

Element of the CISWI Federal plan	Location
Legal authority and enforcement mechanism	Sections 129(b)(3), 111(d), 301(a), and 301(d)(4) of the CAA.
Inventory of affected CISWI	Docket ID No. EPA–HQ–OAR–2016–0664.
Inventory of emissions	Docket ID No. EPA–HQ–OAR–2016–0664.
Compliance schedules	40 CFR 62.14535 through 62.14575 (now at 40 CFR 62.14535a through 62.14545a).
Emissions limits and operating limits	40 CFR 62.14630 through 62.14645 (now at 40 CFR 62.14600a through 62.14610a).
Operator training and qualification	40 CFR 62.14595 through 62.14625 (now at 40 CFR 62.14565a through 62.14595a).
Testing, monitoring, recordkeeping and reporting.	40 CFR 62.14650 through 62.14760 (now at 40 CFR 62.14615a through 62.14735a).
Record of public hearings	Docket ID No. EPA–HQ–OAR–2016–0664.

A. What are the final applicability requirements?

The Federal plan applicability reflects the final CISWI EG. The Federal plan applies in whole or in part to existing CISWI meeting the applicability of 40 CFR 62.14510 (now at 40 CFR 62.14510a) that are located in any state, with the exception of SRIs located in Alaska, that does not currently have a fully approved state plan in place. Existing CISWI are all CISWI, including air curtain incinerators (ACIs), for which construction commenced on or before June 4, 2010, or that commenced modification or reconstruction after June 4, 2010, but no later than August

7, 2013. The Federal plan requirements apply to owners and/or operators of existing incineration units combusting solid waste (as defined under the Resource Conservation and Recovery Act (RCRA) and located at commercial or industrial facilities (*i.e.*, CISWI (as defined in 40 CFR 62.14840 now at 40 CFR 62.14780a). Four subcategories are defined for existing units: incinerators (*i.e.*, units designed to burn discarded waste materials for the purpose of disposal); SRIs; energy recovery units (ERU) (*i.e.*, units that would be boilers or process heaters if they did not combust solid waste); and waste burning kilns (*i.e.*, units that would be cement kilns if they did not combust

solid waste). The final CISWI EG further subcategorize ERUs into 3 subcategories and waste burning kilns into 2 subcategories.

The final CISWI EG establishes opacity limitations for ACI that burn 100 percent wood waste; 100 percent clean lumber; or a 100 percent mixture of only wood waste, clean lumber, and/or yard waste. If an ACI begins burning solid waste as defined in the Non Hazardous Secondary Materials rule (see 40 CFR part 241) in addition to, or instead of, wood waste, clean lumber, or a mixture of wood waste, clean lumber, and/or yard waste, it is a solid waste incineration unit that is subject to the

⁹ Consolidated Appropriations Act, 2024. Public Law 118–42 (2024, March 8). [https://](https://www.congress.gov/bill/118th-congress/house-bill/4366/text)

www.congress.gov/bill/118th-congress/house-bill/4366/text.

applicable numerical emission standards contained in CISWI.

B. What are the final compliance schedules?

The Federal plan requires owners or operators of CISWI to come into compliance by January 10, 2025. Although the final CISWI EG included increments of progress in the compliance schedule, the EPA is not including increments of progress as a compliance pathway for the final Federal plan. Increments of progress were included in the EG to establish obligations that would apply to sources planning to take more than one year from approval of the state plan to comply. The increments would help ensure that sources planning to take more than one year to comply would make some incremental progress toward compliance after the first year. The increments did not require any additional action within one year of approval of a state plan (or promulgation of a Federal plan). Because the increments of progress contained in the final EG do not require

any additional action within one year of promulgation of a Federal plan, including the increments of progress in this Federal plan would serve no meaningful purpose and may create confusion. For this reason, the EPA did not include increments of progress in the proposed Federal plan, and we are not including them in this final action.

If a CISWI does not achieve final compliance by January 10, 2025, the final Federal plan requires the CISWI to shut down by January 10, 2025, complete the retrofit while not operating, and be in compliance upon restarting. A CISWI that operates out of compliance after the final compliance date would be in violation of the Federal plan and subject to enforcement action.

C. What emissions and operating limits is the EPA incorporating into the final Federal plan?

The EPA is incorporating the EG emissions and operating limits from the final CISWI EG, 40 CFR part 60, subpart DDDD, into this final CISWI Federal plan. Table 5 of this preamble

summarizes the emissions limits that we are finalizing in the final Federal plan. Table 5 also includes the 2000 CISWI Federal plan emission limits (which applied only to units in the existing incinerator subcategory) for comparison. These standards apply at all times. Existing sources may comply with either the Polychlorinated dibenzo-p-dioxins/Polychlorinated dibenzofurans (PCDD/PCDF) toxicity equivalence or total mass balance emission limits.

Facilities will be required to establish site-specific operating limits derived from the results of performance testing. The site-specific operating limits are established as the minimum (or maximum, as appropriate) operating parameter value measured during the performance test. These operating limits will result in achievable operating ranges that will ensure that the control devices used for compliance will be operated to achieve continuous compliance with the emissions limits. Further discussion on performance testing can be found in section IV.D. of this preamble.

TABLE 5—SUMMARY OF EMISSIONS LIMITS PROMULGATED FOR EXISTING CISWI

Pollutant (units) ¹	Incinerators (2,000 CISWI limit)	CISWI subcategories				
		Incinerators	ERUs—solids	ERUs— liquid/gas	Waste-burning kilns	SRIs
HCl (parts per million by volume (ppmv))	62	29	0.20 (biomass units)/58 (coal units).	14	3.0	300
CO (ppmv)	157	17	260 (biomass units)/95 (coal units).	35	110 (long kilns)/790 (preheater/precalciner).	64
Pb (mg/dscm)	0.04	0.015	0.014 (biomass units)/0.057 (coal units).	0.096	0.014	2.1
Cd (mg/dscm)	0.004	0.0026	0.0014 (biomass units)/0.0017 (coal units).	0.023	0.0014	0.95
Hg (mg/dscm)	0.47	0.0048	0.0022 (biomass units)/0.013 (coal units).	0.0024	0.011 ²	0.0053
PM, filterable (mg/dscm)	70	34	11 (biomass units)/130 (coal units).	110	13.5	270
Dioxin, furans, total (ng/dscm)	(no limit)	4.6	0.52 (biomass units)/5.1 (coal units).	2.9	1.3	4,400
Dioxins and furans, TEQ (nanograms per dry standard cubic meter (ng/dscm)).	0.41	0.13	0.12 (biomass units)/0.075 (coal units).	0.32	0.075	180
NO _x (ppmv)	388	53	290 (biomass units)/460 (coal units).	76	630	190
SO ₂ (ppmv)	20	11	7.3 (biomass units)/850 (coal units).	720	600	150

¹ All emission limits are expressed as concentrations corrected to 7 percent O₂.

² Or alternative limit of 58 lb/MM ton clinker.

D. What are the final performance testing and monitoring requirements?

The EPA is finalizing several performance testing and monitoring provision amendments to the current 2003 CISWI Federal plan (see 68 FR 57518, October 3, 2003) that are consistent with the requirements of the final CISWI EG. The following paragraphs list a number of testing and monitoring requirements in the final CISWI EG that the EPA is including in the final CISWI Federal plan.

1. Performance Testing and Monitoring

The final Federal plan requires all CISWI to demonstrate initial and continuous compliance with the final emission limits. These provisions require initial and annual performance tests and initial and annual inspections of scrubbers, fabric filters (FF), and other air pollution control devices that are used to meet the emission limits. In addition, a Method 22 (40 CFR part 60, appendix A–7) visible emissions test of the ash handling operations is required

during the initial and annual compliance test for all subcategories except waste-burning kilns, which do not have ash handling systems. Furthermore, for any CISWI that operates a FF air pollution control device, we are requiring that a bag leak detection system be installed to monitor the device.

This Federal plan continues to require parametric monitoring of all other add-on air pollution control devices, such as wet scrubbers, dry scrubbers and

activated carbon injection. CISWI that install selective non-catalytic reduction technology to reduce NO_x emissions are required to monitor the reagent (*e.g.*, ammonia or urea) injection rate and secondary chamber temperature (if applicable to the CISWI). This final Federal plan also requires subcategory-specific monitoring requirements in addition to the aforementioned inspection, bag leak detection, and parametric monitoring requirements that are applicable to all CISWI. Existing incinerators, SRIs, and ERUs are required to have annual emissions testing for all 9 pollutants: PM, SO₂, HCl, NO_x, CO, Pb, Cd, Hg, and dioxins and furans. Waste-burning kilns are required to monitor Hg and HCl (if no

scrubber) emissions using a continuous emissions monitoring system, monitor PM emissions using a PM continuous parameter monitoring system (PM CPMS), and perform annual testing for the remaining pollutants.

The final Federal plan provides reduced annual testing requirements for all 9 pollutants when testing results are shown to be well below the limits. If an ERU has a design capacity greater than 250 Million British Thermal units per hour, we are requiring a PM CPMS for PM monitoring for these units. For the PM CPMS, the EPA is further requiring that a site-specific parametric operating limit be established during the performance test, that there be continuous monitoring of that parametric limit using a PM CPMS, and

that 4 deviations within a 12-month operating period constitutes a violation and triggers immediate corrective action and a Method 5 performance test within 30 days with an additional 15 days to reestablish a site-specific operating limit. Consistent with the final CISWI EG, all operating parameter averaging for ERU units must be on a 30-day rolling average and allow the sorbent injection parameter to be adjusted based on the ERU's load. These testing and monitoring provisions reflect those in the final CISWI EG.

The final Federal plan incorporates by reference two alternatives to the EPA reference test methods, and one EPA guidance document, as shown in table 6 below.

TABLE 6—LIST OF INCORPORATION BY REFERENCE (IBR)

Test method	Publisher	IBR in 40 CFR part 62, subpart IIIa
ANSI/ASME PTC 19.10–1981, Flue and Exhaust Gas Analyses [Part 10, Instruments and Apparatus], Issued August 31, 1981.	Available for purchase from the American Society of Mechanical Engineers (ASME), Two Park Avenue, New York, NY 10016–5990, (800) 843–2763, https://www.asme.org/ .	§ 62.14640a(s)(1)(i) and (ii), (t)(1)(ii), (t)(4)(i), and (z)(1)(i) and tables 4, 5, 6, and 7 to subpart IIIa of part 62.
ASTM D6784–24 Standard Test Method for Elemental, Oxidized, Particle-Bound and Total Mercury in Flue Gas Generated from Coal-Fired Stationary Sources (Ontario Hydro Method), approved March 1, 2024.	Available for purchase from at least one of the following addresses: American Society for Testing and Materials (ASTM), 100 Barr Harbor Drive, Post Office Box C700, West Conshohocken, PA 19428–2959; or ProQuest, 300 North Zeeb Road, Ann Arbor, MI 48106, (877) 909–2786, https://www.astm.org/ .	§ 62.14665a(j) and tables 4, 5, and 7 to subpart IIIa of part 62.
Fabric Filter Bag Leak Detection Guidance, EPA–454/R–98–015, September 1997.	Available from the U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW, Washington, DC 20460, (202) 272–0167, https://www.epa.gov/ or https://www3.epa.gov/ttnemc01/cem/tribo.pdf .	§ 62.14640a(r)(3) and (z)(2)(i).

These tests are discussed further in section VIII.I. of this preamble, titled “National Technology Transfer and Advancement Act (NTTAA) and 1 CFR part 51.”

2. Electronic Data Submittal

To increase the ease and efficiency of data submittal and data accessibility, the final Federal plan requires that owners and operators of CISWI submit electronic copies of required performance test, performance evaluation, initial, annual, and deviation reports through the EPA's Central Data Exchange (CDX) using the Compliance and Emissions Data Reporting Interface (CEDRI). This mirrors the final CISWI EG for CISWI. A description of the electronic data submission process is provided in the memorandum *Electronic Reporting Requirements for New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) Rules*, available in the docket for this

action. The final rule requires that performance test and performance evaluation results be submitted in the format generated through the use of the ERT or an electronic file consistent with the xml schema on the ERT website for initial, deviation, and annual reports, the final rule requires that owners and operators use the appropriate spreadsheet template to submit information to CEDRI. The final version of the templates for these reports will be located on the CEDRI website.¹⁰

Furthermore, the EPA is finalizing provisions that allow owners and operators the ability to seek extensions for submitting electronic reports for circumstances beyond the control of the facility, *i.e.*, for a possible outage in CDX or CEDRI or for a force majeure event, in the time just prior to a report's due date, as well as the process to assert such a claim. Examples of force majeure events are acts of nature, acts of war or

terrorism, or equipment failure or safety hazards beyond the control of the facility. The EPA is providing these potential extensions to protect owners and operators from noncompliance in cases where they cannot successfully submit a report by the reporting deadline for reasons outside of their control. In both circumstances, the decision to accept the claim of needing additional time to report is within the discretion of the Administrator, and reporting should occur as soon as possible. This also mirrors the final CISWI EG for CISWI.

E. What are the final recordkeeping and reporting requirements?

The EPA is finalizing requirements that reflect those promulgated in the final CISWI EG. The Federal plan requires that records of all initial and all subsequent performance tests, CEMS performance evaluations, deviation reports, operating parameter data, continuous monitoring data, maintenance and inspections of air

¹⁰ <https://www.epa.gov/electronic-reporting-air-emissions/cedri>.

pollution control devices, monitoring plan, and operator training and qualification must be maintained for 5 years. Any incident of deviation, resumed operation following shutdown, force majeure, intent to stop or start use of Continuous Monitoring Systems (CMS), and intent of conducting or rescheduling a performance test are required to be reported to the Administrator. Furthermore, final compliance reports are required following the completion of each requirement and identifying any missed requirement. See section IV.B. of this preamble for a more detailed discussion of the compliance schedules.

F. What are the other final requirements?

We are finalizing requirements for the Federal plan to make it consistent with the final CISWI EG, including technical amendments promulgated on April 16, 2019. For example, the final CISWI Federal plan includes the requirement for owners or operators of existing CISWI to meet operator training and qualification requirements, which include: ensuring that at least one operator or supervisor per facility complete the operator training course, that qualified operator(s) or supervisor(s) complete an annual review or refresher course specified in the regulation, and that they maintain plant-specific information, updated annually, regarding training.

Owners or operators of existing CISWI are also required to submit a monitoring plan for any CMS or bag leak detection system used to comply with the rule.

V. CISWI That Have or Will Shut Down

A. Units That Plan To Close

The final Federal plan establishes that if owners or operators plan to permanently close currently operating CISWI, they must do so and submit a closure notification to the Administrator by January 10, 2025. The final requirements for closing a CISWI are set forth at 40 CFR 62.14570 (subpart III) (now at 40 CFR 62.14540 (subpart IIIa)). Conversely, the CISWI requirements do apply to a “mothballed unit” or inactive unit, where a unit does not operate, but it is not rendered inoperable. Until such time as a unit is permanently closed, it must comply with any applicable requirements of the Federal plan. In addition, while still in operation, the CISWI is subject to the same requirements for title V operating permits that apply to units that will continue to operate.

B. Inoperable Units

The Federal plan provides that in cases where a CISWI has already shut down permanently and has been rendered inoperable (e.g., waste charge door is welded shut, stack is removed, combustion air blowers removed, burners or fuel supply equipment are removed), the CISWI may be left off the source inventory in a state plan or this final Federal plan. A CISWI that has been rendered inoperable would not be covered by the Federal plan.

C. CISWI That Have Shut Down

The unit inventory for this Federal plan includes any CISWI known to have already shut down (but not known to be inoperable).

1. Restarting Before the Final Compliance Date

If the owner or operator of an inactive CISWI plans to restart before the final compliance date, the owner or operator must achieve final compliance by January 10, 2025.

2. Restarting After the Final Compliance Date

Under the final Federal plan, if the owner or operator of a CISWI closes the CISWI, but restarts the unit after the final compliance date of January 10, 2025, the owner or operator must complete emission control retrofits and meet the emissions and operating limits on the date the CISWI restarts operation. Within 6 months of the unit startup, operator(s) of these CISWI would have to complete the operator training and qualification requirements. Within 60 days of installing an air pollution control device, operator(s) must conduct a unit inspection. Performance testing to demonstrate initial compliance would also be required as described at 40 CFR 62.14650 (now at 40 CFR 62.14615a). A CISWI may not use the provisions to close the CISWI and restart after the compliance date to gain an effective “extension” of the operator training and qualification requirements or initial compliance requirements. A CISWI that operates out of compliance after the final compliance date will be in violation of the Federal plan and subject to enforcement action.

VI. Implementation of the Federal Plan and Delegation

A. Background of Authority

Under sections 111(d) and 129(b) of the CAA, the EPA is required to adopt EG that are applicable to existing solid waste incineration units. These EG are implemented when the EPA approves a state plan or adopts a Federal plan that

implements and enforces the EG. As discussed above, the Federal plan regulates CISWI in states that do not have fully approved plans in effect to implement the EG.

Congress has determined that the primary responsibility for air pollution prevention and control rests with state and local agencies. (See section 101(a)(3) of the CAA.) Consistent with that overall determination, Congress established sections 111 and 129 of the CAA with the intent that the state and local agencies take the primary responsibility for ensuring that the emissions limitations and other requirements in the EG are achieved. Also, in section 111(d) of the CAA, Congress explicitly required that the EPA establish procedures that are similar to those under CAA section 110(c) for state implementation plans. Although Congress required the EPA to propose and promulgate a Federal plan for states that fail to submit approvable state plans on time, states may submit plans at any time that may replace the CISWI Federal plan. The EPA strongly encourages states that are unable to submit approvable plans to request delegation of the Federal plan so that they can have primary responsibility for implementing the final CISWI EG, consistent with the intent of Congress.

The preferred outcome under the statute and the regulations results when the state, tribal, and local agencies implement the EPA approved state (or tribal) plan because state, tribal, and local agencies not only have the responsibility to implement the final CISWI EG, but also have the practical knowledge and enforcement resources critical to achieving the highest rate of compliance. In cases where states are unable to develop and submit approvable state plans, it is still preferable for the state and local agencies to be the implementing agency. For these reasons, the EPA will do all that it can to expedite delegation of the Federal plan to state, tribal, and local agencies, whenever possible, in cases where states are unable to develop and submit approvable state plans. The EPA will also continue to review and act on state plans after promulgation of the CISWI Federal plan.

B. Mechanisms for Transferring Authority

There are 2 mechanisms for transferring implementation authority to state, tribal, and local agencies: (1) The EPA approval of a state plan after the Federal plan is in effect; and (2) if a state does not submit or obtain approval of its own plan, the EPA delegation to a state, tribe, or local agency with the authority

to implement certain portions of this Federal plan to the extent appropriate and if allowed by state law. Both of these options are described in more detail below.

1. Federal Plan Becomes Effective Prior to Approval of a State Plan

After a CISWI in a state without an approved state plan becomes subject to the Federal plan, the state or tribal agency may still adopt and submit a state or tribal plan to the EPA. If the EPA determines that the state or tribal plan is as protective as the final CISWI EG, the EPA will approve the state or tribal plan. If the EPA determines that the plan is not as protective as the final CISWI EG, the EPA may approve the portions of the plan that are consistent with the final CISWI EG. If a state or tribal plan is approved in part, the Federal plan will apply to the affected CISWI in lieu of the disapproved portions of the state plan until the state or tribe addresses the deficiencies in the state plan and the revised state plan is approved by the EPA. Prior to any disapproval, the EPA will work with states and tribes to attempt to reconcile areas of the plan that remain inconsistent with the EG.

Upon the effective date of a state or tribal plan, the Federal plan would no longer apply to CISWI covered by such a plan and the state, tribe, territory, or local agency would implement and enforce the state plan in lieu of the Federal plan. When an EPA regional office approves a state or tribal plan, it will amend the appropriate subpart of 40 CFR part 62 to indicate such approval.

2. State, Tribe, Territory, or Local Agency Taking Delegation of the Federal Plan

The EPA, in its discretion, may delegate to state, tribe, territorial, or local agencies the authority to implement this Federal plan. As discussed above, the EPA has concluded that it is advantageous and the best use of resources for states, tribes, territories, or local agencies to agree to undertake, on the EPA's behalf, administrative and substantive roles in implementing the Federal plan to the extent appropriate and where authorized by Federal, state, tribal, territorial, or local law. If a state, tribe, territory, or local agency requests delegation, the EPA will generally delegate the entire Federal plan to the state, tribe, territory, or local agency. These functions include administration and oversight of compliance, and reporting and recordkeeping requirements, CISWI inspections and preparation of draft notices of violation,

but will not include any authorities retained by the EPA. Agencies that have taken delegation, as well as the EPA, will have responsibility for bringing enforcement actions against sources violating Federal plan provisions.

C. Implementing Authority

The EPA Regional Administrators have been delegated the authority for implementing the CISWI Federal plan. All reports required by the Federal plan should be submitted to the appropriate Regional Administrator. Section II.C. of this preamble includes table 3 that lists names and addresses of the EPA regional office contacts and the states they cover.

D. Delegation of the Federal Plan and Retained Authorities

If a state, tribe, territory, or local agency intends to take delegation of the Federal plan, the state, tribe, territory, or local agency should submit to the appropriate EPA regional office a written request for delegation of authority. The state, tribe, territory, or local agency should explain how it meets the criteria for delegation. See generally "Good Practices Manual for Delegation of NSPS and NESHAP" (U.S. EPA, February 1983).¹¹ The letter requesting delegation of authority to implement the Federal plan should: (1) demonstrate that the state, tribe, territory, or local agency has adequate resources, as well as the legal authority to administer and enforce the program, (2) include an inventory of affected CISWI, which includes those that have ceased operation, but have not been dismantled or rendered inoperable, and an inventory of the affected units' air emissions and a provision for state progress reports to the EPA, (3) certify that a public hearing was held on the state, tribe, territory, or local agency delegation request, and (4) include a memorandum of agreement between the state, tribe, territory, or local agency and the EPA that sets forth the terms and conditions of the delegation, the effective date of the agreement and the mechanism to transfer authority. Upon signature of the agreement, the appropriate EPA Regional office would publish an approval document in the **Federal Register**, thereby incorporating the delegation of authority into the appropriate subpart of 40 CFR part 62.

If authority is not delegated to a state, tribe, territory, or local agency, the EPA will implement the Federal plan. Also,

¹¹ "Good Practices Manual for Delegation of NSPS and NESHAPS." U.S. EPA, Office of Air Quality Planning and Standards (February 1983). https://www.epa.gov/sites/default/files/2015-05/documents/epa_good_pract_man_ch1-5.pdf.

if a state, tribe, territory, or local agency fails to properly implement a delegated portion of the Federal plan, the EPA will assume direct implementation and enforcement of that portion. The EPA will continue to hold enforcement authority along with the state, tribe, territory, or local agency even when the agency has received delegation of the Federal plan. In all cases where the Federal plan is delegated, the EPA will retain and will not transfer authority to a state, tribe, or local agency to approve the items in 40 CFR 62.14838 (now at 40 CFR 62.14775) promulgated in the final CISWI EG. CISWI owners or operators who wish to petition the Agency for any alternative requirement should submit a request to the Regional Administrator with a copy sent to the appropriate state.

VII. Title V Operating Permits

All existing CISWI located at commercial or industrial facilities and regulated under state, tribal, or Federal plans implementing the final CISWI EG must operate in a manner consistent with a title V operating permit that assures compliance with all federally applicable requirements for any regulated CISWI, including all applicable CAA section 129 requirements.¹²

The permit application deadline for a CAA section 129 source applying for a title V operating permit depends on when the source first becomes subject to the relevant title V permit program. Because existing major sources are subject to title V,¹³ major source facilities that contain existing CISWI should already have a title V permit. In such cases, the source must comply with the title V permit revision provisions of the relevant state title V program instead of applying for a title V permit. In contrast, the application deadline would apply to CISWI at facilities that are not subject to the title V permit program for other reasons. Such sources with an existing CISWI or air curtain incinerator subject to this Federal plan must submit a complete title V permit application by the earliest of the following dates:

- Twelve (12) months after the effective date of any applicable EPA-approved CAA sections 111(d)/129 plan (*i.e.*, approved state or tribal plan that implements the final CISWI EG); or
- Twelve (12) months after the effective date of any applicable Federal plan; or

¹² 40 CFR 70.2, 70.6(a)(1), 71.2, and 71.6(a)(1).

¹³ CAA section 503(c) and 40 CFR 70.3(a) and (b), 70.5(a)(1)(i), 71.3(a) and (b), and 71.5(a)(1)(i).

• Thirty-six (36) months after promulgation of 40 CFR part 60, subpart DDDD (*i.e.*, February 7, 2016).

For any existing CISWI not subject to an earlier permit application deadline, the application deadline of February 7, 2016, which is in the past, applies regardless of whether or when any applicable Federal plan is effective, or whether or when any applicable CAA sections 111(d)/129 plan is approved by the EPA and becomes effective. (See CAA sections 129(e), 503(c), 503(d), 502(a), and 40 CFR 70.5(a)(1)(i) and 71.5(a)(1)(i).)

For more background information on the interface between CAA section 129 and title V, including the EPA's interpretation of CAA section 129(e), see the final Federal plan for Commercial and Industrial Solid Waste Incinerators, October 3, 2003 (68 FR 57518, 57532). See also the final Federal plan for Hospital Medical Infectious Waste Incinerators, August 15, 2000 (65 FR 49868, 49877).

Title V and Delegation of a Federal Plan

As noted previously, issuance of a title V permit is not itself equivalent to the approval of a state or tribal plan or delegation of a Federal plan.¹⁴ Legally, delegation of a standard or requirement results in a delegated state, local, or tribal agency standing in for the EPA as a matter of Federal law. This means that obligations a source may have to the EPA under a federally promulgated standard become obligations to a state, tribal, or local agency (except for functions that the EPA retains for itself) upon delegation.¹⁵ Although a state, local, or tribal agency must have the authority under state, local, or tribal law to incorporate CAA section 111/129 requirements into its title V permits, and implement and enforce these requirements in these permits without first taking delegation of the CAA section 111/129 Federal plan, the state, local, or tribal agency is not standing in for the EPA as a matter of Federal law in this situation. Where a state, local, or tribal agency does not take delegation of a section 111/129 Federal plan, obligations that a source has to the EPA under the Federal plan continue after a title V permit is issued to the source. As a result, the EPA maintains that an

approved 40 CFR part 70 operating permits program alone cannot be used as a mechanism to transfer the authority to implement and enforce the Federal plan from the EPA to a state, local, or tribal agency.

As mentioned above, a state, local, or tribal agency title V program necessarily includes the authority to incorporate CAA section 111/129 requirements into its title V permits, and implement and enforce these requirements in that context without first taking delegation of the CAA section 111/129 Federal plan.¹⁶ Some states, local governments, or tribes, however, may not be able to implement and enforce a CAA section 111/129 standard in a title V permit under state, local, or tribal law until the CAA section 111/129 standard has been delegated. In these situations, a state, local, or tribal agency should not issue a 40 CFR part 70 permit to a source subject to a Federal plan before taking delegation of the section 111/129 Federal plan.

However, if a state or tribe can provide an Attorney General's (AG) opinion delineating its authority to incorporate CAA section 111/129 requirements into its title V permits, and then implement and enforce these requirements through its title V permits without first taking delegation of the requirements, then a state, local, or tribal agency does not need to take delegation of the CAA section 111/129 requirements for purposes of title V permitting.¹⁷ In practical terms, without approval of a state or tribal plan, delegation of a Federal plan, or an adequate AG's opinion, states, local governments, and tribes with approved 40 CFR part 70 permitting programs open themselves up to potential questions regarding their authority to issue permits containing CAA section 111/129 requirements and to assure compliance with these requirements. Such questions could lead to the issuance of a notice of deficiency for a state's or tribe's 40 CFR part 70 program. As a result, prior to a state, local, or tribal permitting authority drafting a

part 70 permit for a source subject to a CAA section 111/129 Federal plan, the state, local government, or tribe, the EPA regional office and the source in question are advised to ensure that delegation of the relevant Federal plan has taken place or that the permitting authority has provided an adequate AG's opinion to the EPA Regional office.

In addition, if a permitting authority chooses to rely on an AG's opinion and not take delegation of a Federal plan, a CAA section 111/129 source subject to the Federal plan in that state must simultaneously submit to both the EPA and the state, local government, or tribe all reports required by the standard to be submitted to the EPA. Given that these reports are necessary to implement and enforce the CAA section 111/129 requirements when they have been included in title V permits, the permitting authority needs to receive these reports at the same time as the EPA.

In the situation where a permitting authority chooses to rely on an AG's opinion and not take delegation of a Federal plan, the EPA regional offices will be responsible for implementing and enforcing CAA section 111/129 requirements outside of any title V permits. Moreover, in this situation, the EPA regional offices will continue to be responsible for developing progress reports and conducting any other administrative functions required under this Federal plan or any other CAA section 111/129 Federal plan. See section IV.B of this preamble, titled "What are the final compliance schedules?"

It is important to note that the EPA is not using its authority under 40 CFR 70.4(i)(3) to request that all states, local governments, and tribes that do not take delegation of this Federal plan submit supplemental AG's opinions at this time. However, the EPA regional offices shall request, and permitting authorities shall provide, such opinions when the EPA questions a state's or tribe's authority to incorporate CAA section 111/129 requirements into a title V permit and implement and enforce these requirements in that context without delegation.

VIII. Statutory and Executive Order Reviews

Additional information about these statutes and Executive orders can be found at <https://www.epa.gov/laws-regulations/laws-and-executive-orders>.

¹⁴ See, *e.g.*, the "Title V and Delegation of a Federal Plan" section of the proposed Federal plan for CISWI, November 25, 2002 (67 FR 70640, 70652). The preamble language from this section in the proposed Federal plan for CISWI was reaffirmed in the final Federal plan for CISWI, October 3, 2003 (68 FR 57518, 57535).

¹⁵ If the Administrator chooses to retain certain authorities under a standard, those authorities cannot be delegated, *e.g.*, major alternatives to test alternative methods.

¹⁶ The EPA interprets the phrase "assure compliance" in CAA section 502(b)(5)(A) to mean that permitting authorities will implement and enforce each applicable standard, regulation, or requirement which must be included in the title V permits that the permitting authorities issue. See definition of "applicable requirement" in 40 CFR 70.2. See also 40 CFR 70.4(b)(3)(i) and 70.6(a)(1).

¹⁷ It is important to note that an AG's opinion submitted at the time of initial title V program approval is sufficient if it demonstrates that a state or tribe has adequate authority to incorporate CAA section 111/129 requirements into its title V permits and to implement and enforce these requirements through its title V permits without delegation and no subsequent state law or regulation has in some way limited that authority.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 14094: Modernizing Regulatory Review

This action is not a significant regulatory action as defined under section 3(f)(1) of Executive Order 12866, as amended by Executive Order 14094, and was therefore not subject to a requirement for Executive Order 12866 review.

B. Paperwork Reduction Act (PRA)

The information collection activities in this rule will be submitted for approval to the Office of Management and Budget (OMB) under the PRA. The Information Collection Request (ICR) document that the EPA prepared has been assigned EPA ICR number 2385.09. You can find a copy of the ICR in the docket for this rule, and it is briefly summarized here. The information collection requirements are not enforceable until OMB approves them.

This action finalizes the CISWI Federal plan to implement the EG adopted on February 7, 2013,¹⁸ for those states that do not have a fully approved state plan implementing the EG. While there were amendments to the 2013 rule on June 23, 2016, and April 16, 2019, neither of those final actions imposed any new information collection burden under the PRA (see 81 FR 40969 and 84 FR 15852, respectively). OMB has previously approved the information collection activities contained in the existing regulation and has assigned OMB Control number 2060–0664 for 40 CFR part 60, subpart DDDD. While this action is believed to result in no changes to the information collection requirements of the 2013 CISWI rule, it does implement the CISWI standards to a subset of existing units that will be regulated by implementing this final action. Therefore, in addition to the total burden, the EPA is presenting an estimate of the subset of the CISWI respondent universe and burden that will be subject to the CISWI Federal plan instead of being regulated under an approved state plan for the CISWI EG. These estimates are provided below.

Respondents/affected entities:

Owners and operators of existing CISWI.

Respondent's obligation to respond:

Mandatory (40 CFR part 60, subpart DDDD, and 40 CFR part 62, subpart III, now at 40 CFR part 62, subpart IIIa).

Estimated number of respondents:

The annual number of responding facilities complying with the requirements of the CISWI EG is 76. Of the total, 40 are subject to this final

rule's implementation of the CISWI EG per 40 CFR part 62, subpart III, now at 40 CFR part 62, subpart IIIa.

Frequency of response: Initially, annually, and semiannually.

Total estimated burden: The annual recordkeeping and reporting burden for responding facilities to comply with all of the requirements in the CISWI EG, averaged over the 3 years of this ICR, is estimated to be 8,660 hours. Of these, 4,420 hours (per year) is the portion of the burden to comply with this final rule's portion of implementing the CISWI EG. Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: The annual recordkeeping and reporting cost for responding facilities to comply with all of the requirements in the CISWI EG, averaged over the 3 years of this ICR, is estimated to be \$13,300,000 (per year), including \$12,300,000 annualized capital or operation and maintenance costs. Of the CISWI total, \$3,700,000 (per year) is the portion of the cost to comply with this final rule's portion of implementing the CISWI EG, including \$3,200,000 in annualized capital or operation and maintenance costs.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9. When OMB approves this ICR, the Agency will announce the approval in the **Federal Register** and publish a technical amendment to 40 CFR part 9 to display the OMB control number for the approved information collection activities contained in this final rule.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the EPA concludes that the impact of concern for this rule is any significant adverse economic impact on small entities. The agency is certifying that this rule will not have a significant economic impact on a substantial number of small entities because the rule implements the EG for owners of existing CISWI that were established by the February 7, 2013, final rule (78 FR 9112), and that rule was certified as not having a significant economic impact on a substantial number of small entities. This action establishes a Federal plan to implement and enforce those requirements in those states that do not have their own EPA-approved state plan for implementing and enforcing the requirements. We have, therefore,

concluded that this action will have no net regulatory burden for all directly regulated small entities beyond those considered for the CISWI EG.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the National Government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. The EPA is not aware of any CISWI owned or operated by Indian tribal governments at the time of the publication of this document. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive order.

Therefore, this action is not subject to Executive Order 13045 because it implements a previously promulgated emission guidelines.

Furthermore, the EPA's Policy on Children's Health does not apply to this action because it implements a technology-based standard and does not concern an environmental health risk or safety risk.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Orders 12866.

¹⁸ See 78 FR 9112, February 7, 2013.

I. National Technology Transfer and Advancement Act (NTTAA) and 1 CFR Part 51

This action involves technical standards. Please reference table 6 of this preamble for the locations where these standards are available. The EPA has decided to use ANSI/ASME PTC 19.10–1981, “Flue and Exhaust Gas Analyses,” for its manual methods of measuring the oxygen or carbon dioxide content of the exhaust gas. These parts of ASME PTC 19.10–1981 are acceptable alternatives to EPA Methods 6 and 7 for the manual procedures only. The manual method segment of the oxygen determination is performed through the absorption of oxygen. This method is available at the American National Standards Institute (ANSI), 1899 L Street NW, 11th Floor, Washington, DC 20036 and the American Society of Mechanical Engineers (ASME), Two Park Avenue, New York, NY 10016–5990. See <https://www.ansi.org> and <https://www.asme.org>. The standard is available to everyone at a cost determined by ANSI/ASME (\$80). ANSI/ASME also offer memberships or subscriptions for reduced costs. The cost of obtaining this method is not a significant financial burden, making the method reasonably available.

Another voluntary consensus standard (VCS), ASTM D6784–24, “Standard Test Method for Elemental, Oxidized, Particle-Bound and Total Mercury Gas Generated from Coal-Fired Stationary Sources (Ontario Hydro Method)”, for its manual method of measuring mercury is an acceptable alternative to Method 29 and 30B. Initially developed for the measurement of mercury in coal-fired power plants, this method has been used on other combustion sources such as the waste incinerators subject to this rule. This method is available for purchase from at least one of the following addresses: American Society for Testing and Materials (ASTM), 100 Barr Harbor Drive, Post Office Box C700, West Conshohocken, PA 19428–2959; or ProQuest, 300 North Zeeb Road, Ann Arbor, MI 48106, (877) 909–2786, <https://www.astm.org/>. The standard is available to everyone at a cost determined by ASTM (\$90). The cost of obtaining this method is not a significant financial burden, making the method reasonably available.

The EPA further determined to use Office of Air Quality Planning and Standards (OAQPS) Fabric Filter Bag Leak Detection Guidance, EPA–454/R–98–015, September 1997, for its guidance on the use of triboelectric monitors as bag leak detectors for a

fabric filter air pollution control device and monitoring system descriptions, selection, installation, set up, adjustment, operation, and quality assurance procedures. This standard is available from the U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW, Washington, DC 20460, (202) 272–0167, <https://www.epa.gov> or <https://www3.epa.gov/ttnemc01/cem/tribo.pdf>. The EPA determined that this standard is reasonably available because it is freely available from the EPA. Lastly, the EPA decided to use EPA Methods 5, 6, 6C, 7, 7E, 9, 10, 10A, 10B, 22, 23, 26A, 29, and 30B. No VCS were found for EPA Methods 9 and 22.

While the EPA has identified 23 VCS as being potentially applicable to the rule, we have decided not to use these VCS in this rulemaking. The use of these VCS would be impractical because they do not meet the objectives of the standards cited in this rule. See the docket for the final CISWI EG (Docket ID No. EPA–HQ–OAR–2003–0119), which are being implemented under this action, for further information.

Under 40 CFR 62.14838 (now at 40 CFR 62.14775a), the EPA Administrator retains the authority of approving alternate methods of demonstrating compliance as established under 40 CFR 60.8(b) and 60.13(i) (subpart A (NSPS General Provisions)). A source may apply to the EPA for permission to use alternative test methods or alternative monitoring requirements in place of any required EPA test methods, performance specifications, or procedures.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations and Executive Order 14096: Revitalizing Our Nation's Commitment to Environmental Justice for All

The EPA believes that it is not practicable to assess whether the human health or environmental conditions that exist prior to this action result in disproportionate and adverse effects on communities with environmental justice concerns. This action implements the final CISWI EG, which was published in 2013. At that time, no analysis was performed on the inventory of units and proximity to communities with existing environmental justice concerns.

The EPA believes that this action is not likely to result in new disproportionate and adverse effects on communities with environmental justice concerns.

The information supporting this Executive order review is contained in this preamble section, as well as the final CISWI EG discussion for Executive

Order 12898 (78 FR 9178, February 7, 2013). This Federal plan implements the final CISWI EG for states that do not have a fully approved state plan implementing the final CISWI EG. As discussed in the preamble to the 2013 CISWI rule, the final CISWI EG will not have disproportionately high and adverse human health or environmental effects on communities with EJ concerns because it increases the level of environmental protection for all affected populations without having any disproportionately high and adverse human health or environmental effects on any population, including any communities with EJ concerns.

The amendments finalized in 2013 (made to the 2011 CISWI final rule), as well as subsequent amendments made in 2016 and 2019, do not relax the control measures on sources regulated by the CISWI rule, and, therefore, will not cause emissions increases from these sources. The February 2013 final CISWI rule will reduce emissions of all the listed hazardous air pollutants (HAP) emitted from this source when implemented either through an approved state plan or this final Federal plan. This includes emissions of Cd, HCl, Pb, and Hg. Other emissions reductions include reductions of criteria pollutants such as CO, NO_x, PM (including particulate matter 2.5 microns or less), SO₂, and NO_x. SO₂ and NO_x are precursors for the formation of particulate matter (diameter less than or equal to 2.5 micrometers (PM_{2.5})) and NO_x is a precursor for ozone. Reducing these emissions will decrease the amount of such pollutants to which all affected populations are exposed.

K. Congressional Review Act (CRA)

This action is subject to the CRA and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 62

Environmental protection, Administrative practice and procedure, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements.

Michael S. Regan,
Administrator.

For the reasons stated in the preamble, title 40, chapter I, part 62 of the Code of Federal Regulations is amended as follows:

PART 62—APPROVAL AND PROMULGATION OF STATE PLANS FOR DESIGNATED FACILITIES AND POLLUTANTS

■ 1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart III—Federal Plan Requirements for Commercial and Industrial Solid Waste Incineration Units That Commenced Construction On or Before November 30, 1999

■ 2. Amend § 62.14510 by adding paragraph (d) to read as follows:

§ 62.14510 Am I subject to this subpart?

* * * * *

(d) On and after January 10, 2025, CISWI will no longer be subject to the requirements of this subpart and instead will be subject to the requirements of subpart IIIa of this part.

■ 3. Add subpart IIIa, consisting of §§ 62.14500a through 62.14780a, to read as follows:

Subpart IIIa—Federal Plan Requirements for Commercial and Industrial Solid Waste Incineration Units That Commenced Construction On or Before June 4, 2010, and Have Not Been Modified or Reconstructed Since August 7, 2013

Sec.

Introduction

62.14500a What is the purpose of this subpart?

62.14505a What are the principal components of this subpart?

Applicability

62.14510a Am I subject to this subpart?

62.14515a Can my CISWI be covered by both a state plan and this subpart?

62.14520a How do I determine if my CISWI is covered by an approved and effective state or tribal plan?

62.14525a If my CISWI is not listed in the Federal plan inventory, am I exempt from this subpart?

62.14530a Can my combustion unit be exempt from this subpart?

Compliance Schedule

62.14535a When must I comply with this subpart if I plan to continue operation of my CISWI?

62.14540a What must I do if I plan to permanently close my CISWI?

62.14545a What must I do if I close my CISWI and then restart it?

Waste Management Plan

62.14550a What is a waste management plan?

62.14555a When must I submit my waste management plan?

62.14560a What should I include in my waste management plan?

Operator Training and Qualification

62.14565a What are the operator training and qualification requirements?

62.14570a When must the operator training course be completed?

62.14575a How do I obtain my operator qualification?

62.14580a How do I maintain my operator qualification?

62.14585a How do I renew my lapsed operator qualification?

62.14590a What site-specific documentation is required?

62.14595a What if all the qualified operators are temporarily not accessible?

Emission Limitations and Operating Limits

62.14600a What emission limitations must I meet and by when?

62.14605a What operating limits must I meet and by when?

62.14610a What if I do not use a wet scrubber, fabric filter, activated carbon injection, selective noncatalytic reduction, an electrostatic precipitator, or a dry scrubber to comply with the emission limitations?

Performance Testing

62.14615a How do I conduct the initial and annual performance test?

62.14620a How are the performance test data used?

Initial Compliance Requirements

62.14625a How do I demonstrate initial compliance with the emission limitations and establish the operating limits?

62.14630a By what date must I conduct the initial performance test?

62.14635a By what date must I conduct the initial air pollution control device inspection?

Continuous Compliance Requirements

62.14640a How do I demonstrate continuous compliance with the emission limitations and the operating limits?

62.14645a By what date must I conduct the annual performance test?

62.14650a By what date must I conduct the annual air pollution control device inspection?

62.14655a May I conduct performance testing less often?

62.14660a May I conduct a repeat performance test to establish new operating limits?

Monitoring

62.14665a What monitoring equipment must I install and what parameters must I monitor?

62.14670a Is there a minimum amount of monitoring data I must obtain?

Recordkeeping and Reporting

62.14675a What records must I keep?

62.14680a Where and in what format must I keep my records?

62.14685a What reports must I submit?

62.14690a When must I submit my waste management plan?

62.14695a What information must I submit following my initial performance test?

62.14700a When must I submit my annual report?

62.14705a What information must I include in my annual report?

62.14710a What else must I report if I have a deviation from the operating limits or the emission limitations?

62.14715a What must I include in the deviation report?

62.14720a What else must I report if I have a deviation from the requirement to have a qualified operator accessible?

62.14725a Are there any other notifications or reports that I must submit?

62.14730a In what form can I submit my reports?

62.14735a Can reporting dates be changed?

Air Curtain Incinerators (ACIs)

62.14740a What is an air curtain incinerator?

62.14745a What must I do if I close my air curtain incinerator and then restart it?

62.14750a What must I do if I plan to permanently close my air curtain incinerator and not restart it?

62.14755a What are the emission limitations for air curtain incinerators?

62.14760a How must I monitor opacity for air curtain incinerators?

62.14765a What are the recordkeeping and reporting requirements for air curtain incinerators?

Title V Requirements

62.14770a Am I required to apply for and obtain a title V operating permit for my unit?

Delegation of Authority

62.14775a What authorities are withheld by the EPA Administrator?

Table 7 to Subpart IIIa of Part 62—Model Rule—Emission Limitations That Apply to Small, Remote Incinerators After January 10, 2025

Introduction

§ 62.14500a What is the purpose of this subpart?

(a) This subpart establishes emission requirements and compliance schedules for the control of emissions from commercial and industrial solid waste incineration units (CISWI) that are not

covered, or are only partially covered, by an EPA approved and currently effective state or tribal plan. The pollutants addressed by the emission requirements in this subpart are listed in tables 4 through 7 to this subpart. The emission requirements in this subpart were developed in accordance with sections 111 and 129 of the Clean Air Act and 40 CFR part 60, subpart B.

(b) In this subpart, “you” means the owner or operator of a CISWI.

§ 62.14505a What are the principal components of this subpart?

This subpart contains the ten major components listed in paragraphs (a) through (j) of this section.

- (a) Waste management plan.
- (b) Operator training and qualification.
- (c) Emission limitations and operating limits.
- (d) Performance testing.
- (e) Initial compliance requirements.
- (f) Continuous compliance requirements.
- (g) Monitoring.
- (h) Recordkeeping and reporting.
- (i) Definitions.
- (j) Tables.

Applicability

§ 62.14510a Am I subject to this subpart?

(a) You are subject to this subpart if you own or operate a CISWI as defined in § 62.14780a or an air curtain incinerator as defined in § 62.14780a and the CISWI or air curtain incinerator meets the criteria described in paragraphs (a)(1) through (3) of this section.

(1) Construction of your CISWI or air curtain incinerator commenced on or before June 4, 2010, and have not been modified or reconstructed since August 7, 2013.

(2) Your CISWI is not exempt under § 62.14530a.

(3) Your CISWI is not regulated by an EPA approved and currently effective state or tribal plan, or your CISWI is located in any state whose approved state or tribal plan is only approved in part. In the case of a state or tribal program that is approved in part, the Federal plan applies to affected CISWI in lieu of the disapproved portions of the state or tribal program until the state or tribe plan addresses the deficiencies and the revised plan is approved by the EPA.

(b) If changes to the CISWI are made after August 7, 2013, that meet the definition of modification or reconstruction in this subpart, your CISWI is subject to 40 CFR part 60, subpart CCCC, and this subpart no longer applies to that unit.

(c) If you make physical or operational changes to your existing CISWI primarily to comply with this subpart, then such changes do not qualify as modifications or reconstructions under 40 CFR part 60, subpart CCCC.

§ 62.14515a Can my CISWI be covered by both a state plan and this subpart?

(a) If your CISWI is located in a state that does not have an EPA-approved state plan or your state’s plan has not become effective, this subpart applies to your CISWI until the EPA approves a state plan that covers your CISWI and that state plan becomes effective. However, a state may enforce the requirements of a state regulation while your CISWI is still subject to this subpart.

(b) After the EPA fully approves a state plan covering your CISWI, and after that state plan becomes effective, you will no longer be subject to this subpart and will only be subject to the approved and effective state plan. If the state or tribal plan are only approved in part, you will remain subject to the Federal plan to the extent necessary to address the deficiencies in the disapproved portions of the state or tribal plan.

§ 62.14520a How do I determine if my CISWI is covered by an approved and effective state or tribal plan?

This part contains a list of state and tribal areas with approved Clean Air Act section 111(d) and section 129 plans along with the effective dates for such plans. The list is published annually. If this part does not indicate that your state or tribal area has an approved and effective plan, you should contact your state environmental agency’s air director or your EPA Regional Office to determine if the EPA has approved a state plan covering your CISWI since publication of the most recent version of this subpart.

§ 62.14525a If my CISWI is not listed in the Federal plan inventory, am I exempt from this subpart?

Any CISWI that meets the applicability criteria in § 62.14510a is required to comply with the applicable emissions guidelines even if the source is not listed in the Federal plan or otherwise applicable state or tribal plan inventory. CISWI subject to this subpart are not limited to the inventory of sources listed in Docket EPA–HQ–OAR–2016–0664 for the Federal plan. If your CISWI meets the applicability criteria in § 62.14510a, this subpart applies to you whether or not your CISWI is listed in the Federal plan inventory in the docket.

§ 62.14530a Can my combustion unit be exempt from this subpart?

This subpart exempts 11 types of units, described in paragraphs (a) through (k) of this section, from complying with the requirements of this subpart with the exception of the requirements specified in this section.

(a) *Pathological waste incineration units.* Incineration units burning 90 percent or more by weight (on a calendar quarter basis and excluding the weight of auxiliary fuel and combustion air) of pathological waste, low-level radioactive waste, and/or chemotherapeutic waste as defined in § 62.14785a are not subject to this subpart if you meet the two requirements specified in paragraphs (a)(1) and (2) of this section.

(1) Notify the Administrator that the unit meets the criteria in this paragraph (a).

(2) Keep records on a calendar quarter basis of the weight of pathological waste, low-level radioactive waste, and/or chemotherapeutic waste burned, and the weight of all other fuels and wastes burned in the unit.

(b) *Municipal waste combustion units.* Incineration units that are regulated under 40 CFR part 60, subpart Ea, Eb, Cb, AAAA, or BBBB or subpart JJJ of this part.

(c) *Medical waste incineration units.* Incineration units regulated under 40 CFR part 60, subparts Ec and Ce and subpart HHH of this part.

(d) *Small power production facilities.* Units that meet the four requirements specified in paragraphs (d)(1) through (4) of this section.

(1) The unit qualifies as a small power-production facility under section 3(17)(C) of the Federal Power Act (16 U.S.C. 796(17)(C)).

(2) The unit burns homogeneous waste (not including refuse-derived fuel) to produce electricity.

(3) You submit documentation to the Administrator notifying the Agency that the qualifying small power production facility is combusting homogenous waste.

(4) You must maintain the records specified in § 62.14675a(t).

(e) *Cogeneration facilities.* Units that meet the four requirements specified in paragraphs (e)(1) through (4) of this section.

(1) The unit qualifies as a cogeneration facility under section 3(18)(B) of the Federal Power Act (16 U.S.C. 796(18)(B)).

(2) The unit burns homogeneous waste (not including refuse-derived fuel) to produce electricity and steam or other forms of energy used for

industrial, commercial, heating, or cooling purposes.

(3) You submit documentation to the Administrator notifying the Agency that the qualifying cogeneration facility is combusting homogenous waste.

(4) You maintain the records specified in § 62.14675a(u).

(f) *Hazardous waste combustion units.* Units for which you are required to get a permit under section 3005 of the Solid Waste Disposal Act.

(g) *Materials recovery units.* Units that combust waste for the primary purpose of recovering metals, such as primary and secondary smelters.

(h) *Air curtain incinerators.* Air curtain incinerators that burn 100 percent wood waste; 100 percent clean lumber; or a 100 percent mixture of only wood waste, clean lumber, and/or yard waste; are required to meet only the requirements under §§ 62.14740a through 62.14765a and 62.14770a.

(i) *Sewage treatment plants.* Incineration units regulated under 40 CFR part 60, subpart O.

(j) *Sewage sludge incineration units.* Incineration units combusting sewage sludge for the purpose of reducing the volume of the sewage sludge by removing combustible matter that are subject to 40 CFR part 60, subpart LLLL or MMMM.

(k) *Other solid waste incineration units.* Incineration units that are subject to 40 CFR part 60, subpart EEEE or FFFF.

(l) *Small, remote incinerators.* Incineration units located in the State of Alaska are not subject to this subpart as specified in the Consolidated Appropriations Act of 2024, H.R. 4366, section 432.

Compliance Schedule

§ 62.14535a What must I do if I plan to continue operation of my CISWI?

(a) If you plan to continue operation of your CISWI, then you must follow the requirements in paragraph (b) of this section.

(b) If you plan to continue operation and come into compliance with the requirements of this subpart by January 10, 2025, then you must complete the requirements of paragraphs (b)(1) through (5) of this section.

(1) You must comply with the operator training and qualification requirements and inspection requirements (if applicable) of this subpart by January 10, 2025.

(2) You must submit a waste management plan no later than January 10, 2025.

(3) You must achieve final compliance by January 10, 2025. To

achieve final compliance, you must incorporate all process changes and complete retrofit construction of control devices, so that, if the affected CISWI is brought online, all necessary process changes and air pollution control devices would operate as designed.

(4) You must conduct the initial performance test within 180 days after the date when you are required to achieve final compliance under paragraph (b)(3) of this section.

(5) You must submit an initial report including the results of the initial performance test no later than 60 days following the initial performance test (see §§ 62.14675a through 62.14735a for complete reporting and recordkeeping requirements).

§ 62.14540a What must I do if I plan to permanently close my CISWI?

If you plan to permanently close your CISWI rather than comply with the Federal plan, you must submit a legally binding closure agreement, including the date of closure, to the Administrator by January 10, 2025, for sources that will not operate on or after the compliance date under this subpart.

§ 62.14545a What must I do if I close my CISWI and then restart it?

If you close your CISWI but restart it after January 10, 2025, for the purpose of continuing operation of the your CISWI, you must complete emission control retrofits and meet the emission limitations and operating limits on the date your unit restarts operation.

Waste Management Plan

§ 62.14550a What is a waste management plan?

A waste management plan is a written plan that identifies both the feasibility and the methods used to reduce or separate certain components of solid waste from the waste stream in order to reduce or eliminate toxic emissions from incinerated waste.

§ 62.14555a When must I submit my waste management plan?

You must submit a waste management plan no later than January 10, 2025, or six months prior to commencing or recommencing burning solid waste, whichever is later.

§ 62.14560a What should I include in my waste management plan?

A waste management plan must include consideration of the reduction or separation of waste-stream elements such as paper, cardboard, plastics, glass, batteries, or metals; or the use of recyclable materials. The plan must identify any additional waste management measures, and the source

must implement those measures considered practical and feasible, based on the effectiveness of waste management measures already in place, the costs of additional measures, the emissions reductions expected to be achieved, and any other environmental or energy impacts they might have.

Operator Training and Qualification

§ 62.14565a What are the operator training and qualification requirements?

(a) You must have a fully trained and qualified CISWI operator accessible at all times when the unit is in operation, either at your facility or able to be at your facility within one hour. The trained and qualified CISWI operator may operate the CISWI directly or be the direct supervisor of one or more other plant personnel who operate the unit. If all qualified CISWI operators are temporarily not accessible, you must follow the procedures in § 62.14595a.

(b) Operator training and qualification must be obtained through a state-approved program or by completing the requirements included in paragraph (c) of this section.

(c) Training must be obtained by completing an incinerator operator training course that includes, at a minimum, the three elements described in paragraphs (c)(1) through (3) of this section.

(1) Training on the eleven subjects listed in paragraphs (c)(1)(i) through (xi) of this section.

(i) Environmental concerns, including types of emissions.

(ii) Basic combustion principles, including products of combustion.

(iii) Operation of the specific type of incinerator to be used by the operator, including proper startup, waste charging, and shutdown procedures.

(iv) Combustion controls and monitoring.

(v) Operation of air pollution control equipment and factors affecting performance (where applicable).

(vi) Inspection and maintenance of the incinerator and air pollution control devices.

(vii) Actions to correct malfunctions or conditions that may lead to malfunction.

(viii) Bottom and fly ash characteristics and handling procedures.

(ix) Applicable Federal, state, and local regulations, including Occupational Safety and Health Administration workplace standards.

(x) Pollution prevention.

(xi) Waste management practices.

(2) An examination designed and administered by the instructor.

(3) Written material covering the training course topics that can serve as

reference material following completion of the course.

§ 62.14570a When must the operator training course be completed?

The operator training course must be completed by the later of the three dates specified in paragraphs (a) through (c) of this section.

(a) January 10, 2025.

(b) Six months after CISWI startup; or

(c) Six months after an employee assumes responsibility for operating the CISWI or assumes responsibility for supervising the operation of the CISWI.

§ 62.14575a How do I obtain my operator qualification?

(a) You must obtain operator qualification by completing a training course that satisfies the criteria under § 62.14565a(b).

(b) Qualification is valid from the date on which the training course is completed and the operator successfully passes the examination required under § 62.14565a(c)(2).

§ 62.14580a How do I maintain my operator qualification?

To maintain qualification, you must complete an annual review or refresher course covering, at a minimum, the five topics described in paragraphs (a) through (e) of this section.

(a) Update of regulations.

(b) Incinerator operation, including startup and shutdown procedures, waste charging, and ash handling.

(c) Inspection and maintenance.

(d) Responses to malfunctions or conditions that may lead to malfunction.

(e) Discussion of operating problems encountered by attendees.

§ 62.14585a How do I renew my lapsed operator qualification?

You must renew a lapsed operator qualification by one of the two methods specified in paragraphs (a) and (b) of this section.

(a) For a lapse of less than 3 years, you must complete a standard annual refresher course described in § 62.14580a.

(b) For a lapse of 3 years or more, you must repeat the initial qualification requirements in § 62.14575a(a).

§ 62.14590a What site-specific documentation is required?

(a) Documentation must be available at the facility and readily accessible for all CISWI operators that addresses the ten topics described in paragraphs (a)(1) through (10) of this section. You must maintain this information and the training records required by paragraph (c) of this section in a manner that they

can be readily accessed and are suitable for inspection upon request.

(1) Summary of the applicable standards under this subpart.

(2) Procedures for receiving, handling, and charging waste.

(3) Incinerator startup, shutdown, and malfunction procedures.

(4) Procedures for maintaining proper combustion air supply levels.

(5) Procedures for operating the incinerator and associated air pollution control systems within the standards established under this subpart.

(6) Monitoring procedures for demonstrating compliance with the incinerator operating limits.

(7) Reporting and recordkeeping procedures.

(8) The waste management plan required under §§ 62.14550a through 62.14560a.

(9) Procedures for handling ash.

(10) A list of the wastes burned during the performance test.

(b) You must establish a program for reviewing the information listed in paragraph (a) of this section with each employee who operates your incinerator.

(1) The initial review of the information listed in paragraph (a) of this section must be conducted by the later of the three dates specified in paragraphs (b)(1)(i) through (iii) of this section.

(i) January 10, 2025.

(ii) Six months after CISWI startup.

(iii) Six months after being assigned to operate the CISWI.

(2) Subsequent annual reviews of the information listed in paragraph (a) of this section must be conducted no later than 12 months following the previous review.

(c) You must also maintain the information specified in paragraphs (c)(1) through (3) of this section.

(1) Records showing the names of all plant personnel who operate your CISWI who have completed review of the information in paragraph (a) of this section as required by paragraph (b) of this section, including the date of the initial review and all subsequent annual reviews.

(2) Records showing the names of all plant personnel who operate your CISWI who have completed the operator training requirements under § 62.14565a, met the criteria for qualification under § 62.14575a, and maintained or renewed their qualification under § 62.14580a or § 62.14585a. Records must include documentation of training, the dates of the initial refresher training, and the dates of their qualification and all subsequent renewals of such qualifications.

(3) For each qualified operator, the phone and/or pager number at which they can be reached during operating hours.

§ 62.14595a What if all the qualified operators are temporarily not accessible?

If all qualified operators are temporarily not accessible (*i.e.*, not at the facility and not able to be at the facility within 1 hour), you must meet one of the two criteria specified in paragraphs (a) and (b) of this section, depending on the length of time that a qualified operator is not accessible.

(a) When all qualified operators are not accessible for more than 8 hours, but less than 2 weeks, the CISWI may be operated by other plant personnel familiar with the operation of the CISWI who have completed a review of the information specified in § 62.14590a(a) within the past 12 months. However, you must record the period when all qualified operators were not accessible and include this deviation in the annual report as specified under § 62.14705a.

(b) When all qualified operators are not accessible for 2 weeks or more, you must take the two actions that are described in paragraphs (b)(1) and (2) of this section.

(1) Notify the Administrator of this deviation in writing within 10 days. In the notice, state what caused this deviation, what you are doing to ensure that a qualified operator is accessible, and when you anticipate that a qualified operator will be accessible.

(2) Submit a status report to the Administrator every 4 weeks outlining what you are doing to ensure that a qualified operator is accessible, stating when you anticipate that a qualified operator will be accessible and requesting approval from the Administrator to continue operation of the CISWI. You must submit the first status report 4 weeks after you notify the Administrator of the deviation under paragraph (b)(1) of this section. If the Administrator notifies you that your request to continue operation of the CISWI is disapproved, the CISWI may continue operation for 90 days, then must cease operation. Operation of the unit may resume if you meet the two requirements in paragraphs (b)(2)(i) and (ii) of this section.

(i) A qualified operator is accessible as required under § 62.14565a(a).

(ii) You notify the Administrator that a qualified operator is accessible and that you are resuming operation.

Emission Limitations and Operating Limits

§ 62.14600a What emission limitations must I meet and by when?

(a) You must meet the emission limitations for each CISWI, including bypass stack or vent, specified in tables 4 through 7 to this subpart by January 10, 2025. The emission limitations apply at all times the unit is operating including and not limited to startup, shutdown, or malfunction.

(b) Units that do not use wet scrubbers must maintain opacity to less than or equal to the percent opacity (three 1-hour blocks consisting of ten 6-minute average opacity values) specified in table 4 to this subpart, as applicable.

§ 62.14605a What operating limits must I meet and by when?

(a) If you use a wet scrubber to comply with the emission limitations in § 62.14600a, you must establish operating limits for up to four operating parameters (as specified in table 1 to this subpart) as described in paragraphs (a)(1) through (4) of this section during the initial performance test.

(1) Maximum charge rate, calculated using one of the two different procedures in paragraph (a)(1)(i) or (ii) of this section, as appropriate.

(i) For continuous and intermittent units, maximum charge rate is 110 percent of the average charge rate measured during the most recent performance test demonstrating compliance with all applicable emission limitations.

(ii) For batch units, maximum charge rate is 110 percent of the daily charge rate measured during the most recent performance test demonstrating compliance with all applicable emission limitations.

(2) Minimum pressure drop across the wet particulate matter scrubber, which is calculated as the lowest 1-hour average pressure drop across the wet scrubber measured during the most recent performance test demonstrating compliance with the particulate matter emission limitations; or minimum amperage to the wet scrubber, which is calculated as the lowest 1-hour average amperage to the wet scrubber measured during the most recent performance test demonstrating compliance with the particulate matter emission limitations.

(3) Minimum scrubber liquor flow rate, which is calculated as the lowest 1-hour average liquor flow rate at the inlet to the wet acid gas or particulate matter scrubber measured during the most recent performance test demonstrating compliance with all applicable emission limitations.

(4) Minimum scrubber liquor pH, which is calculated as the lowest 1-hour average liquor pH at the inlet to the wet acid gas scrubber measured during the most recent performance test demonstrating compliance with the hydrogen chloride (HCl) emission limitation.

(b) You must meet the operating limits established on the date that the performance test report is submitted to the EPA's Central Data Exchange or postmarked, per the requirements of § 62.14730a(b).

(c) If you use a fabric filter to comply with the emission limitations in § 62.14600a and you do not use a particulate matter (PM) continuous parameter monitoring system (CPMS) for monitoring PM compliance, you must operate each fabric filter system such that the bag leak detection system alarm does not sound more than 5 percent of the operating time during any 6-month period. In calculating this operating time percentage, if inspection of the fabric filter demonstrates that no corrective action is required, no alarm time is counted. If corrective action is required, each alarm shall be counted as a minimum of 1 hour. If you take longer than 1 hour to initiate corrective action, the alarm time shall be counted as the actual amount of time taken by you to initiate corrective action.

(d) If you use an electrostatic precipitator (ESP) to comply with the emission limitations in § 62.14600a and you do not use a PM CPMS for monitoring PM compliance, you must measure the (secondary) voltage and amperage of the electrostatic precipitator collection plates during the particulate matter performance test. Calculate the average electric power value (secondary voltage $\times$ secondary current = secondary electric power) for each test run. The operating limit for the electrostatic precipitator is calculated as the lowest 1-hour average secondary electric power measured during the most recent performance test demonstrating compliance with the particulate matter emission limitations.

(e) If you use activated carbon sorbent injection to comply with the emission limitations in § 62.14600a, you must measure the sorbent flow rate during the performance testing. The operating limit for the carbon sorbent injection is calculated as the lowest 1-hour average sorbent flow rate measured during the most recent performance test demonstrating compliance with the mercury emission limitations. For energy recovery units (ERU), when your unit operates at lower loads, multiply your sorbent injection rate by the load fraction, as defined in this subpart, to

determine the required injection rate (e.g., for 50 percent load, multiply the injection rate operating limit by 0.5).

(f) If you use selective noncatalytic reduction to comply with the emission limitations in § 62.14600a, you must measure the charge rate, the secondary chamber temperature (if applicable to your CISWI), and the reagent flow rate during the nitrogen oxides (NO_x) performance testing. The operating limits for the selective noncatalytic reduction are calculated as the highest 1-hour average charge rate, lowest secondary chamber temperature, and lowest reagent flow rate measured during the most recent performance test demonstrating compliance with the nitrogen oxides emission limitations.

(g) If you use a dry scrubber to comply with the emission limitations in § 62.14600a, you must measure the injection rate of each sorbent during the performance testing. The operating limit for the injection rate of each sorbent is calculated as the lowest 1-hour average injection rate of each sorbent measured during the most recent performance test demonstrating compliance with the hydrogen chloride emission limitations. For energy recovery units, when your unit operates at lower loads, multiply your sorbent injection rate by the load fraction, as defined in this subpart, to determine the required injection rate (e.g., for 50 percent load, multiply the injection rate operating limit by 0.5).

(h) If you do not use a wet scrubber, electrostatic precipitator, or fabric filter to comply with the emission limitations in § 62.14600a, and if you do not determine compliance with your particulate matter emission limitation with either a particulate matter continuous emission monitoring system (CEMS) or a particulate matter CPMS, you must maintain opacity to less than or equal to ten percent opacity (1-hour block average).

(i) If you use a PM CPMS to demonstrate compliance with this subpart, you must establish your PM CPMS operating limit and determine compliance with it according to paragraphs (i)(1) through (5) of this section:

(1) During the initial performance test or any subsequent performance test that demonstrates compliance with the PM limit, record all hourly average output values (milliamps, or the digital signal equivalent) from the PM CPMS for the periods corresponding to the test runs (e.g., three 1-hour average PM CPMS output values for three 1-hour test runs):

(i) Your PM CPMS must provide a 4–20 milliamp output, or the digital signal equivalent, and the establishment of its relationship to manual reference

method measurements must be determined in units of milliamps or digital bits;

(ii) Your PM CPMS operating range must be capable of reading PM concentrations from zero to a level equivalent to at least two times your allowable emission limit. If your PM CPMS is an auto-ranging instrument capable of multiple scales, the primary range of the instrument must be capable of reading PM concentration from zero to a level equivalent to two times your allowable emission limit; and

(iii) During the initial performance test or any subsequent performance test that demonstrates compliance with the PM limit, record and average all milliamp output values, or their digital equivalent, from the PM CPMS for the periods corresponding to the compliance test runs (e.g., average all your PM CPMS output values for three corresponding 2-hour PM test runs under Method 5 of 40 CFR part 60,

appendix A–3, or Method 29 of 40 CFR part 60, appendix A–8).

(2) If the average of your three PM performance test runs are below 75 percent of your PM emission limit, you must calculate an operating limit by establishing a relationship of PM CPMS signal to PM concentration using the PM CPMS instrument zero, the average PM CPMS output values corresponding to the three compliance test runs, and the average PM concentration from the performance tests under Method 5 of 40 CFR part 60, appendix A–3, or Method 29 of 40 CFR part 60, appendix A–8, with the procedures in (i)(1) through (5) of this section:

(i) Determine your instrument zero output with one of the following procedures:

(A) Zero point data for *in-situ* instruments should be obtained by removing the instrument from the stack and monitoring ambient air on a test bench;

(B) Zero point data for extractive instruments should be obtained by removing the extractive probe from the stack and drawing in clean ambient air;

(C) The zero point can also be established by performing manual reference method measurements when the flue gas is free of PM emissions or contains very low PM concentrations (e.g., when your process is not operating, but the fans are operating or your source is combusting only natural gas) and plotting these with the compliance data to find the zero intercept; and

(D) If none of the steps in paragraphs (i)(2)(i)(A) through (C) of this section are possible, you must use a zero output value provided by the manufacturer.

(ii) Determine your PM CPMS instrument average in milliamps, or the digital equivalent, and the average of your corresponding three PM compliance test runs, using equation 1 to this paragraph (i)(2)(ii):

Equation 1 to Paragraph (i)(2)(ii)

$$\bar{x} = \frac{1}{n} \sum_{i=1}^n X_i, \bar{y} = \frac{1}{n} \sum_{i=1}^n Y_i \quad (\text{Eq. 1})$$

Where:

X_i = The PM CPMS output data points for the three runs constituting the performance test;

Y_i = The PM concentration value for the three runs constituting the performance test; and

n = The number of data points.

(iii) With your instrument zero expressed in milliamps, or the digital equivalent, your three run average PM CPMS milliamp value, or its digital equivalent, and your three run average

PM concentration from your three compliance tests, determine a relationship of mg/dscm per milliamp or digital signal equivalent, with equation 2 to this paragraph (i)(2)(iii):

Equation 2 to Paragraph (i)(2)(iii)

$$R = Z + \frac{Y_i}{(X_i - z)} \quad (\text{Eq. 2})$$

Where:

R = The relative mg/dscm per milliamp, or the digital equivalent, for your PM CPMS;

Y_i = The three run average mg/dscm PM concentration;

X_i = The three run average milliamp output, or the digital equivalent, from your PM CPMS; and

Z = The milliamp or digital signal equivalent of your instrument zero determined from paragraph (i)(2)(i) of this section.

(iv) Determine your source specific 30-day rolling average operating limit using the mg/dscm per milliamp value, or per digital signal equivalent from equation 2 to paragraph (i)(2)(iii) of this

section, in equation 3 to this paragraph (i)(2)(iv). This sets your operating limit at the PM CPMS output value corresponding to 75 percent of your emission limit:

Equation 3 to Paragraph (i)(2)(iv)

$$O_1 = Z + \frac{0.75(L)}{R} \quad (\text{Eq. 3})$$

Where:

O_1 = The operating limit for your PM CPMS on a 30-day rolling average, in milliamps or their digital signal equivalent;

L = Your source emission limit expressed in mg/dscm;

z = Your instrument zero in milliamps or digital equivalent, determined from paragraph (i)(2)(i) of this section; and

R = The relative mg/dscm per milliamp, or per digital signal output equivalent, for your PM CPMS, from equation 2 to paragraph (i)(2)(iii) of this section.

(3) If the average of your three PM compliance test runs is at or above 75 percent of your PM emission limit you must determine your operating limit by averaging the PM CPMS milliamp or

digital signal output corresponding to your three PM performance test runs that demonstrate compliance with the emission limit using equation 4 to this paragraph (i)(3) and you must submit all

compliance test and PM CPMS data according to the reporting requirements in paragraph (i)(5) of this section:

Equation 4 to Paragraph (i)(3)

$$O_h = \frac{1}{n} \sum_{i=1}^n X_i \quad (\text{Eq. 4})$$

Where:

X_i = The PM CPMS data points for all runs i ;

n = The number of data points; and

O_h = Your site specific operating limit, in milliamps or digital signal equivalent.

(4) To determine continuous compliance, you must record the PM CPMS output data for all periods when the process is operating and the PM CPMS is not out-of-control. You must demonstrate continuous compliance by using all quality-assured hourly average data collected by the PM CPMS for all operating hours to calculate the arithmetic average operating parameter in units of the operating limit (*e.g.*, milliamps or digital signal bits, PM concentration, raw data signal) on a 30-day rolling average basis.

(5) For PM performance test reports used to set a PM CPMS operating limit, the electronic submission of the test report must also include the make and model of the PM CPMS instrument, serial number of the instrument, analytical principle of the instrument (*e.g.*, beta attenuation), span of the instruments primary analytical range, milliamp or digital signal value equivalent to the instrument zero output, technique by which this zero value was determined, and the average milliamp or digital signals corresponding to each PM compliance test run.

§ 62.14610a What if I do not use a wet scrubber, fabric filter, activated carbon injection, selective noncatalytic reduction, an electrostatic precipitator, or a dry scrubber to comply with the emission limitations?

If you use an air pollution control device other than a wet scrubber, activated carbon injection, selective noncatalytic reduction, fabric filter, an electrostatic precipitator, or a dry scrubber or limit emissions in some other manner, including mass balances, to comply with the emission limitations under § 62.14600a, you must petition the EPA Administrator for specific operating limits to be established during the initial performance test and continuously monitored thereafter. You must submit the petition at least sixty days before the performance test is scheduled to begin. Your petition must

include the five items listed in paragraphs (a) through (e) of this section.

(a) Identification of the specific parameters you propose to use as additional operating limits.

(b) A discussion of the relationship between the parameters required by paragraph (a) of this section and emissions of regulated pollutants, identifying how emissions of regulated pollutants change with changes in the parameters, and how limits on the parameters will serve to limit emissions of regulated pollutants.

(c) A discussion of how you will establish the upper and/or lower values for the parameters required by paragraph (a) of this section that will establish the operating limits on the parameters.

(d) A discussion identifying the methods you will use to measure and the instruments you will use to monitor the parameters required by paragraph (a) of this section, as well as the relative accuracy and precision of these methods and instruments.

(e) A discussion identifying the frequency and methods for recalibrating the instruments you will use for monitoring the parameters required by paragraph (a) of this section.

Performance Testing

§ 62.14615a How do I conduct the initial and annual performance test?

(a) All performance tests must consist of a minimum of three test runs conducted under conditions representative of normal operations.

(b) You must document that the waste burned during the performance test is representative of the waste burned under normal operating conditions by maintaining a log of the quantity of waste burned (as required in § 62.14675a(b)(1)) and the types of waste burned during the performance test.

(c) All performance tests must be conducted using the minimum run duration specified in tables 4 through 7 to this subpart.

(d) Method 1 of 40 CFR part 60, appendix A–1, must be used to select the sampling location and number of traverse points.

(e) Method 3A of 40 CFR part 60, appendix A–1, must be used for gas

composition analysis, including measurement of oxygen concentration. Method 3A must be used simultaneously with each method (except when using Method 9 of 40 CFR part 60, appendix A–4, and Method 22 of 40 CFR part 60, appendix A–7).

(f) All pollutant concentrations, except for opacity, must be adjusted to 7 percent oxygen using equation 1 to this paragraph (f):

Equation 1 to Paragraph (f)

$$C_{adj} = C_{meas} (20.9 - 7) / (20.9 - \%O_2) \quad (\text{Eq. 1})$$

Where:

C_{adj} = Pollutant concentration adjusted to 7 percent oxygen;

C_{meas} = Pollutant concentration measured on a dry basis;

$(20.9 - 7)$ = 20.9 percent oxygen – 7 percent oxygen (defined oxygen correction basis);

20.9 = Oxygen concentration in air, percent; and

$\%O_2$ = Oxygen concentration measured on a dry basis, percent.

(g) You must determine dioxins/furans toxic equivalency by following the procedures in paragraphs (g)(1) through (4) of this section.

(1) Measure the concentration of each dioxin/furan (tetra- through octa-) isomer emitted using EPA Method 23 of 40 CFR part 60, appendix A–7.

(2) Quantify isomers meeting identification criteria in section 11.4.3.4 of Method 23 of 40 CFR part 60, appendix A–7, regardless of whether the isomers meet identification criteria in section 11.4.3.4.1 of Method 23. You must quantify the isomers per section 11.4.3.5 of Method 23. Note that you may reanalyze the sample aliquot or split to reduce the number of isomers not meeting identification criteria in section 11.4.3.4 of Method 23.

(3) For each dioxin/furan (tetra-through octa-chlorinated) isomer measured in accordance with paragraph (g)(1) and (2) of this section, multiply the isomer concentration by its corresponding toxic equivalency factor specified in table 2 to this subpart; and

(4) Sum the products calculated in accordance with paragraph (g)(3) of this section to obtain the total concentration

of dioxins/furans emitted in terms of toxic equivalency.

(h) Method 22 of 40 CFR part 60, appendix A–7, must be used to determine compliance with the fugitive ash emission limit in table 4, 5, or 7 to this subpart.

(i) If you have an applicable opacity operating limit, you must determine compliance with the opacity limit using Method 9 of 40 CFR part 60, appendix A–4, based on three 1-hour blocks consisting of ten 6-minute average opacity values, unless you are required to install a continuous opacity monitoring system, consistent with §§ 62.14640a and 62.14665a.

(j) You must determine dioxins/furans total mass basis by following the procedures in paragraphs (j)(1) through (3) of this section:

(1) Measure the concentration of each dioxin/furan tetra- through octa-chlorinated isomer emitted using EPA Method 23 of 40 CFR part 60, appendix A–7;

(2) Quantify isomers meeting identification criteria in section 11.4.3.4 of Method 23 of 40 CFR part 60, appendix A–7, regardless of whether the isomers meet identification criteria in section 11.4.3.4.1 of Method 23. Note that you may reanalyze the sample aliquot or split to reduce the number of isomers not meeting identification criteria in section 11.4.3.4 of Method 23; and

(3) Sum the quantities measured in accordance with paragraphs (j)(1) and (2) of this section to obtain the total concentration of dioxins/furans emitted in terms of total mass basis.

§ 62.14620a How are the performance test data used?

You use results of performance tests to demonstrate compliance with the emission limitations in tables 4 through 7 to this subpart.

Initial Compliance Requirements

§ 62.14625a How do I demonstrate initial compliance with the emission limitations and establish the operating limits?

(a) You must conduct an initial performance test to determine compliance with the emission limitations in tables 4 through 7 to this subpart, to establish compliance with any opacity operating limits in § 62.14605a(h), to establish the kiln-specific emission limit in § 62.14640a(y), as applicable, and to establish operating limits using the procedure in § 62.14605a or § 62.14610a. The initial performance test must be conducted using the test methods listed in tables 4 through 7 to this subpart and the procedures in

§ 62.14615a. The use of the bypass stack during a performance test shall invalidate the performance test.

(b) As an alternative to conducting a performance test, as required under §§ 62.14615a and 62.14600a, you may use a 30-day rolling average of the 1-hour arithmetic average CEMS data, including CEMS data during startup and shutdown as defined in this subpart, to determine compliance with the emission limitations in tables 4 through 7 to this subpart. You must conduct a performance evaluation of each continuous monitoring system within 180 days of installation of the monitoring system. The initial performance evaluation must be conducted prior to collecting CEMS data that will be used for the initial compliance demonstration.

§ 62.14630a By what date must I conduct the initial performance test?

(a) The initial performance test must be conducted no later than 180 days after your final compliance date. Your final compliance date is January 10, 2025, or the date you restart your CISWI if later than January 10, 2025.

(b) If you commence or recommence combusting a solid waste at an existing combustion unit at any commercial or industrial facility and you conducted a test consistent with the provisions of this subpart while combusting the given solid waste within the 6 months preceding the reintroduction of that solid waste in the combustion chamber, you do not need to retest until 6 months from the date you reintroduce that solid waste.

(c) If you commence or recommence combusting a solid waste at an existing combustion unit at any commercial or industrial facility and you have not conducted a performance test consistent with the provisions of this subpart while combusting the given solid waste within the 6 months preceding the reintroduction of that solid waste in the combustion chamber, you must conduct a performance test within 60 days from the date you reintroduce solid waste.

§ 62.14635a By what date must I conduct the initial air pollution control device inspection?

(a) The initial air pollution control device inspection must be conducted within 60 days after installation of the control device and the associated CISWI reaches the charge rate at which it will operate, but no later than 180 days after January 10, 2025.

(b) Within 10 operating days following an air pollution control device inspection, all necessary repairs must be completed unless the owner or operator

obtains written approval from the state agency establishing a date whereby all necessary repairs of the designated facility must be completed.

Continuous Compliance Requirements

§ 62.14640a How do I demonstrate continuous compliance with the emission limitations and the operating limits?

(a)(1) The emission standards and operating requirements set forth in this subpart apply at all times.

(2) If you cease combusting solid waste you may opt to remain subject to the provisions of this subpart. Consistent with the definition of CISWI in this subpart, you are subject to the requirements of this subpart at least 6 months following the last date of solid waste combustion. Solid waste combustion is ceased when solid waste is not in the combustion chamber (*i.e.*, the solid waste feed to the combustor has been cut off for a period of time not less than the solid waste residence time).

(3) If you cease combusting solid waste you must be in compliance with any newly applicable standards on the effective date of the waste-to-fuel switch. The effective date of the waste-to-fuel switch is a date selected by you, that must be at least 6 months from the date that you ceased combusting solid waste, consistent with paragraph (a)(2) of this section. Your source must remain in compliance with this subpart until the effective date of the waste-to-fuel switch.

(4) If you own or operate an existing commercial or industrial combustion unit that combusted a fuel or non-waste material, and you commence or recommence combustion of solid waste, you are subject to the provisions of this subpart as of the first day you introduce or reintroduce solid waste to the combustion chamber, and this date constitutes the effective date of the fuel-to-waste switch. You must complete all initial compliance demonstrations for any standards under section 112 of the Clean Air Act that are applicable to your facility before you commence or recommence combustion of solid waste. You must provide 30 days prior notice of the effective date of the waste-to-fuel switch. The notification must identify:

(i) The name of the owner or operator of the CISWI, the location of the source, the emissions unit(s) that will cease burning solid waste, and the date of the notice;

(ii) The currently applicable subcategory under this subpart, and any subpart and subcategory under 40 CFR part 63 that will be applicable after you cease combusting solid waste;

(iii) The fuel(s), non-waste material(s) and solid waste(s) the CISWI is currently combusting and has combusted over the past 6 months, and the fuel(s) or non-waste materials the unit will commence combusting;

(iv) The date on which you became subject to the currently applicable emission limits; and

(v) The date upon which you will cease combusting solid waste, and the date (if different) that you intend for any new requirements to become applicable (*i.e.*, the effective date of the waste-to-fuel switch), consistent with paragraphs (a)(2) and (3) of this section.

(5) All air pollution control equipment necessary for compliance with any newly applicable emissions limits which apply as a result of the cessation or commencement or recommencement of combusting solid waste must be installed and operational as of the effective date of the waste-to-fuel, or fuel-to-waste switch.

(6) All monitoring systems necessary for compliance with any newly applicable monitoring requirements which apply as a result of the cessation or commencement or recommencement of combusting solid waste must be installed and operational as of the effective date of the waste-to-fuel, or fuel-to-waste switch. All calibration and drift checks must be performed as of the effective date of the waste-to-fuel, or fuel-to-waste switch. Relative accuracy tests must be performed as of the performance test deadline for PM CEMS (if PM CEMS are elected to demonstrate continuous compliance with the particulate matter emission limits). Relative accuracy testing for other CEMS need not be repeated if that testing was previously performed consistent with monitoring requirements under section 112 of the Clean Air Act or monitoring requirements under this subpart.

(b) You must conduct an annual performance test for the pollutants listed in tables 4 through 7 to this subpart and opacity for each CISWI as required under § 62.14615a. The annual performance test must be conducted using the test methods listed in tables 4 through 7 to this subpart and the procedures in § 62.14615a. Opacity must be measured using EPA Reference Method 9 of 40 CFR part 60, appendix A-4. Annual performance tests are not required if you use CEMS or continuous opacity monitoring systems to determine compliance.

(c) You must continuously monitor the operating parameters specified in § 62.14605a or established under § 62.14610a. Operation above the established maximum or below the

established minimum operating limits constitutes a deviation from the established operating limits. Three-hour block average values are used to determine compliance (except for baghouse leak detection system alarms) unless a different averaging period is established under § 62.14610a or, for energy recovery units, where the averaging time for each operating parameter is a 30-day rolling average, calculated each hour as the average of the previous 720 operating hours. Operation above the established maximum, below the established minimum, or outside the allowable range of the operating limits specified in paragraph (a) of this section constitutes a deviation from your operating limits established under this subpart, except during performance tests conducted to determine compliance with the emission and operating limits or to establish new operating limits. Operating limits are confirmed or reestablished during performance tests.

(d) You must burn only the same types of waste and fuels used to establish subcategory applicability (for ERUs) and operating limits during the performance test.

(e) For energy recovery units, incinerators, and small remote units, you must perform annual visual emissions tests for ash handling.

(f) For energy recovery units, you must conduct an annual performance test for opacity using EPA Reference Method 9 of 40 CFR part 60, appendix A-4 (except where particulate matter continuous monitoring system or CPMS are used), and the pollutants listed in table 5 to this subpart.

(g) For facilities using a CEMS to demonstrate compliance with the carbon monoxide emission limit, compliance with the carbon monoxide emission limit may be demonstrated by using the CEMS, as described in § 62.14665a(o).

(h) Coal and liquid/gas energy recovery units with annual average heat input rates greater than 250 MMBtu/hr may elect to demonstrate continuous compliance with the particulate matter emissions limit using a particulate matter CEMS according to the procedures in § 62.14665a(n) instead of the CPMS specified in paragraph (i) of this section. Coal and liquid/gas energy recovery units with annual average heat input rates less than 250 MMBtu/hr, incinerators, and small, remote incinerators may also elect to demonstrate compliance using a particulate matter CEMS according to the procedures in § 62.14665a(n) instead of particulate matter testing with EPA Method 5 of 40 CFR part 60, appendix

A-3, and, if applicable, the continuous opacity monitoring requirements in paragraph (i) of this section.

(i) For energy recovery units with annual average heat input rates greater than or equal to 10 MMBtu/hr but less than 250 MMBtu/hr that do not use a wet scrubber, fabric filter with bag leak detection system, an electrostatic precipitator, particulate matter CEMS, or particulate matter CPMS, you must install, operate, certify, and maintain a continuous opacity monitoring system (COMS) according to the procedures in § 62.14665a(m).

(j) For waste-burning kilns, you must conduct an annual performance test for the pollutants (except mercury and hydrogen chloride if no acid gas wet scrubber or dry scrubber is used) listed in table 6 to this subpart, unless you choose to demonstrate initial and continuous compliance using CEMS, as allowed in paragraph (u) of this section. If you do not use an acid gas wet scrubber or dry scrubber, you must determine compliance with the hydrogen chloride emissions limit using a HCl CEMS according to the requirements in paragraph (j)(1) of this section. You must determine compliance with the mercury emissions limit using a mercury CEMS or an integrated sorbent trap monitoring system according to paragraph (j)(2) of this section. You must determine compliance with particulate matter using a PM CPMS according to paragraph (x) of this section.

(1) If you monitor compliance with the HCl emissions limit by operating an HCl CEMS, you must do so in accordance with Performance Specification 15 (PS 15) of 40 CFR part 60, appendix B, or, PS 18 of 40 CFR part 60, appendix B. You must operate, maintain, and quality assure a HCl CEMS installed and certified under PS 15 according to the quality assurance requirements in Procedure 1 of 40 CFR part 60, appendix F, except that the Relative Accuracy Test Audit requirements of Procedure 1 must be replaced with the validation requirements and criteria of sections 11.1.1 and 12.0 of PS 15. You must operate, maintain and quality assure a HCl CEMS installed and certified under PS 18 according to the quality assurance requirements in Procedure 6 of 40 CFR part 60, appendix F. For any performance specification that you use, you must use Method 321 of 40 CFR part 63, appendix A, as the reference test method for conducting relative accuracy testing. The span value and calibration requirements in paragraphs (j)(1)(i) and (ii) of this section apply to all HCl CEMS used under this subpart:

(i) You must use a measurement span value for any HCl CEMS of 0–10 ppmv unless the monitor is installed on a kiln without an inline raw mill. Kilns without an inline raw mill may use a higher span value sufficient to quantify all expected emissions concentrations. The HCl CEMS data recorder output range must include the full range of expected HCl concentration values which would include those expected during “mill off” conditions. The corresponding data recorder range shall be documented in the site-specific monitoring plan and associated records;

(ii) In order to quality assure data measured above the span value, you must use one of the three options in paragraphs (j)(1)(ii)(A) through (C) of this section:

(A) Include a second span that encompasses the HCl emission concentrations expected to be encountered during “mill off” conditions. This second span may be rounded to a multiple of 5 ppm of total HCl. The requirements of the appropriate HCl monitor performance specification shall be followed for this second span with the exception that a relative accuracy test audit (RATA) with the mill off is not required;

(B) Quality assure any data above the span value by proving instrument linearity beyond the span value established in paragraph (j)(1)(i) of this section using the following procedure. Conduct a weekly “above span linearity” calibration challenge of the monitoring system using a reference gas with a certified value greater than your highest expected hourly concentration or greater than 75 percent of the highest measured hourly concentration. The “above span” reference gas must meet the requirements of the applicable performance specification and must be

introduced to the measurement system at the probe. Record and report the results of this procedure as you would for a daily calibration. The “above span linearity” challenge is successful if the value measured by the HCl CEMS falls within 10 percent of the certified value of the reference gas. If the value measured by the HCl CEMS during the above span linearity challenge exceeds 10 percent of the certified value of the reference gas, the monitoring system must be evaluated and repaired and a new “above span linearity” challenge met before returning the HCl CEMS to service, or data above span from the HCl CEMS must be subject to the quality assurance procedures established in (j)(1)(ii)(D) of this section. In this manner values measured by the HCl CEMS during the above span linearity challenge exceeding ± 20 percent of the certified value of the reference gas must be normalized using equation 1 to paragraph (j)(1)(ii)(D)(1) of this section;

(C) Quality assure any data above the span value established in paragraph (j)(1)(i) of this section using the following procedure. Any time two consecutive one-hour average measured concentration of HCl exceeds the span value you must, within 24 hours before or after, introduce a higher, “above span” HCl reference gas standard to the HCl CEMS. The “above span” reference gas must meet the requirements of the applicable performance specification and target a concentration level between 50 and 150 percent of the highest expected hourly concentration measured during the period of measurements above span, and must be introduced at the probe. While this target represents a desired concentration range that is not always achievable in practice, it is expected that the intent to meet this range is demonstrated by the

value of the reference gas. Expected values may include above span calibrations done before or after the above-span measurement period. Record and report the results of this procedure as you would for a daily calibration. The “above span” calibration is successful if the value measured by the HCl CEMS is within 20 percent of the certified value of the reference gas. If the value measured by the HCl CEMS is not within 20 percent of the certified value of the reference gas, then you must normalize the stack gas values measured above span as described in paragraph (j)(1)(ii)(D) of this section. If the “above span” calibration is conducted during the period when measured emissions are above span and there is a failure to collect the one data point in an hour due to the calibration duration, then you must determine the emissions average for that missed hour as the average of hourly averages for the hour preceding the missed hour and the hour following the missed hour. In an hour where an “above span” calibration is being conducted and one or more data points are collected, the emissions average is represented by the average of all valid data points collected in that hour; and

(D)(1) In the event that the “above span” calibration is not successful (*i.e.*, the HCl CEMS measured value is not within 20 percent of the certified value of the reference gas), then you must normalize the one-hour average stack gas values measured above the span during the 24-hour period preceding or following the “above span” calibration for reporting based on the HCl CEMS response to the reference gas as shown in equation 1 to this paragraph (j)(1)(ii)(D)(1):

Equation 1 to paragraph (j)(1)(ii)(D)(1)

$$\frac{\text{Certified reference gas value}}{\text{Measured value of reference gas}} = \text{Measured stack gas} = \text{Normalized stack gas result (Eq. 1)}$$

(2) Only one “above span” calibration is needed per 24-hour period.

(2) Compliance with the mercury emissions limit must be determined using a mercury CEMS or integrated sorbent trap monitoring system according to the following requirements:

(i) You must operate a mercury CEMS in accordance with performance specification 12A of 40 CFR part 60, appendix B, or an integrated sorbent trap monitoring system in accordance with Performance Specification 12B of 40 CFR part 60, appendix B; these monitoring systems must be quality assured according to Procedure 5 of

appendix F to 40 CFR part 60. For the purposes of emissions calculations when using an integrated sorbent trap monitoring system, the mercury concentration determined for each sampling period must be assigned to each hour during the sampling period. If you choose to comply with the production-rate based mercury limit for your waste-burning kiln, you must also monitor hourly clinker production and determine the hourly mercury emissions rate in pounds per million ton of clinker produced. You must demonstrate compliance with the mercury emissions limit using a 30-day rolling average of

these 1-hour mercury concentrations or mass emissions rates, including CEMS data during startup and shutdown as defined in this subpart, calculated using equation 19–19 in section 12.4.1 of EPA Reference Method 19 of 40 CFR part 60, appendix A–7. CEMS data during startup and shutdown, as defined in this subpart, are not corrected to 7 percent oxygen, and are measured at stack oxygen content;

(ii) Owners or operators using a mercury CEMS or integrated sorbent trap monitoring system to determine mass emission rate must install, operate, calibrate and maintain an instrument for

continuously measuring and recording the mercury mass emissions rate to the atmosphere according to the requirements of Performance Specification 6 (PS 6) of 40 CFR part 60, appendix B, and conducting an annual relative accuracy test of the continuous emission rate monitoring system according to section 8.2 of PS 6; and

(iii) The owner or operator of a waste-burning kiln must demonstrate initial compliance by operating a mercury CEMS or integrated sorbent trap monitoring system while the raw mill of the in-line kiln/raw mill is operating under normal conditions and including at least one period when the raw mill is off.

(k) If you use an air pollution control device to meet the emission limitations in this subpart, you must conduct an initial and annual inspection of the air pollution control device. The inspection must include, at a minimum, the following:

(1) Inspect air pollution control device(s) for proper operation; and
(2) Develop a site-specific monitoring plan according to the requirements in paragraph (l) of this section. This requirement also applies to you if you petition the EPA Administrator for alternative monitoring parameters under § 60.13(i) of this chapter.

(l) For each CMS required in this section, you must develop and submit to the EPA Administrator for approval a site-specific monitoring plan according to the requirements of this paragraph (l) that addresses paragraphs (l)(1)(i) through (vi) of this section:

(1) You must submit this site-specific monitoring plan at least 60 days before your initial performance evaluation of your continuous monitoring system:

(i) Installation of the continuous monitoring system sampling probe or other interface at a measurement location relative to each affected process unit such that the measurement is representative of control of the exhaust emissions (e.g., on or downstream of the last control device);

(ii) Performance and equipment specifications for the sample interface, the pollutant concentration or parametric signal analyzer and the data collection and reduction systems;

(iii) Performance evaluation procedures and acceptance criteria (e.g., calibrations);

(iv) Ongoing operation and maintenance procedures in accordance with the general requirements of § 60.11(d) of this chapter;

(v) Ongoing data quality assurance procedures in accordance with the general requirements of § 60.13 of this chapter; and

(vi) Ongoing recordkeeping and reporting procedures in accordance with the general requirements of § 60.7(b), (c) introductory text, (c)(1) and (4), and (d) through (g) of this chapter.

(2) You must conduct a performance evaluation of each continuous monitoring system in accordance with your site-specific monitoring plan.

(3) You must operate and maintain the continuous monitoring system in continuous operation according to the site-specific monitoring plan.

(m) If you have an operating limit that requires the use of a flow monitoring system, you must meet the requirements in paragraphs (l) and (m)(1) through (4) of this section:

(1) Install the flow sensor and other necessary equipment in a position that provides a representative flow;

(2) Use a flow sensor with a measurement sensitivity at full scale of no greater than 2 percent;

(3) Minimize the effects of swirling flow or abnormal velocity distributions due to upstream and downstream disturbances; and

(4) Conduct a flow monitoring system performance evaluation in accordance with your monitoring plan at the time of each performance test but no less frequently than annually.

(n) If you have an operating limit that requires the use of a pressure monitoring system, you must meet the requirements in paragraphs (l) and (n)(1) through (6) of this section:

(1) Install the pressure sensor(s) in a position that provides a representative measurement of the pressure (e.g., PM scrubber pressure drop);

(2) Minimize or eliminate pulsating pressure, vibration, and internal and external corrosion;

(3) Use a pressure sensor with a minimum tolerance of 1.27 centimeters of water or a minimum tolerance of 1 percent of the pressure monitoring system operating range, whichever is less;

(4) Perform checks at the frequency outlined in your site-specific monitoring plan to ensure pressure measurements are not obstructed (e.g., check for pressure tap plugging daily);

(5) Conduct a performance evaluation of the pressure monitoring system in accordance with your monitoring plan at the time of each performance test but no less frequently than annually; and

(6) If at any time the measured pressure exceeds the manufacturer's specified maximum operating pressure range, conduct a performance evaluation of the pressure monitoring system in accordance with your monitoring plan and confirm that the pressure monitoring system continues to

meet the performance requirements in your monitoring plan. Alternatively, install and verify the operation of a new pressure sensor.

(o) If you have an operating limit that requires a pH monitoring system, you must meet the requirements in paragraphs (l) and (o)(1) through (4) of this section:

(1) Install the pH sensor in a position that provides a representative measurement of scrubber effluent pH;

(2) Ensure the sample is properly mixed and representative of the fluid to be measured;

(3) Conduct a performance evaluation of the pH monitoring system in accordance with your monitoring plan at least once each process operating day; and

(4) Conduct a performance evaluation (including a two-point calibration with one of the two buffer solutions having a pH within 1 of the pH of the operating limit) of the pH monitoring system in accordance with your monitoring plan at the time of each performance test but no less frequently than quarterly.

(p) If you have an operating limit that requires a secondary electric power monitoring system for an electrostatic precipitator, you must meet the requirements in paragraphs (l) and (p)(1) and (2) of this section:

(1) Install sensors to measure (secondary) voltage and current to the precipitator collection plates; and

(2) Conduct a performance evaluation of the electric power monitoring system in accordance with your monitoring plan at the time of each performance test but no less frequently than annually.

(q) If you have an operating limit that requires the use of a monitoring system to measure sorbent injection rate (e.g., weigh belt, weigh hopper, or hopper flow measurement device), you must meet the requirements in paragraphs (l) and (q)(1) and (2) of this section:

(1) Install the system in a position(s) that provides a representative measurement of the total sorbent injection rate; and

(2) Conduct a performance evaluation of the sorbent injection rate monitoring system in accordance with your monitoring plan at the time of each performance test but no less frequently than annually.

(r) If you elect to use a fabric filter bag leak detection system to comply with the requirements of this subpart, you must install, calibrate, maintain, and continuously operate a bag leak detection system as specified in paragraphs (l) and (r)(1) through (5) of this section:

(1) Install a bag leak detection sensor(s) in a position(s) that will be representative of the relative or absolute particulate matter loadings for each exhaust stack, roof vent, or compartment (e.g., for a positive pressure fabric filter) of the fabric filter;

(2) Use a bag leak detection system certified by the manufacturer to be capable of detecting particulate matter emissions at concentrations of 10 milligrams per actual cubic meter or less;

(3) Conduct a performance evaluation of the bag leak detection system in accordance with your monitoring plan and consistent with the guidance provided in OAQPS Fabric Filter Bag Leak Detection Guidance, EPA-454/R-98-015 (incorporated by reference, see paragraph (z) of this section).

(4) Use a bag leak detection system equipped with a device to continuously record the output signal from the sensor; and

(5) Use a bag leak detection system equipped with a system that will sound an alarm when an increase in relative particulate matter emissions over a preset level is detected. The alarm must be located where it is observed readily by plant operating personnel.

(s) For facilities using a CEMS to demonstrate initial and continuous compliance with the sulfur dioxide (SO₂) emission limit, compliance with the sulfur dioxide emission limit may be demonstrated by using the CEMS specified in § 62.14665a(l) to measure sulfur dioxide. The sulfur dioxide CEMS must follow the procedures and methods specified in this paragraph (s). For sources that have actual inlet emissions less than 100 parts per million dry volume, the relative accuracy criterion for inlet sulfur dioxide CEMS should be no greater than 20 percent of the mean value of the reference method test data in terms of the units of the emission standard, or 5 parts per million dry volume absolute value of the mean difference between the reference method and the CEMS, whichever is greater:

(1) During each relative accuracy test run of the CEMS required by Performance Specification 2 of 40 CFR part 60, appendix B, collect sulfur dioxide and oxygen (or carbon dioxide) data concurrently (or within a 30- to 60-minute period) with both the CEMS and the test methods specified in paragraphs (s)(1)(i) and (ii) of this section:

(i) For sulfur dioxide, EPA Reference Method 6 or 6C of 40 CFR part 60, appendix A-4, or as an alternative ANSI/ASME PTC 19.10-1981, Flue and Exhaust Gas Analyses [Part 10, Instruments and Apparatus] must be

used (incorporated by reference, see paragraph (z) of this section); and

(ii) For oxygen (or carbon dioxide), EPA Reference Method 3A of 40 CFR part 60, appendix A-2, or as an alternative ANSI/ASME PTC 19.10-1981, Flue and Exhaust Gas Analyses [Part 10, Instruments and Apparatus], as applicable, must be used (incorporated by reference, see paragraph (z) of this section).

(2) The span value of the CEMS at the inlet to the sulfur dioxide control device must be 125 percent of the maximum estimated hourly potential sulfur dioxide emissions of the unit subject to this subpart. The span value of the CEMS at the outlet of the sulfur dioxide control device must be 50 percent of the maximum estimated hourly potential sulfur dioxide emissions of the unit subject to this subpart.

(3) Conduct accuracy determinations quarterly and calibration drift tests daily in accordance with Procedure 1 of 40 CFR part 60, appendix F.

(t) For facilities using a CEMS to demonstrate initial and continuous compliance with the nitrogen oxides emission limit, compliance with the nitrogen oxides emission limit may be demonstrated by using the CEMS specified in § 62.14665a to measure nitrogen oxides. The nitrogen oxides CEMS must follow the procedures and methods specified in paragraphs (t)(1) through (4) of this section:

(1) During each relative accuracy test run of the CEMS required by Performance Specification 2 of 40 CFR part 60, appendix B, collect nitrogen oxides and oxygen (or carbon dioxide) data concurrently (or within a 30- to 60-minute period) with both the CEMS and the test methods specified in paragraphs (t)(1)(i) and (ii) of this section:

(i) For nitrogen oxides, EPA Reference Method 7 or 7E of 40 CFR part 60, appendix A-4, must be used; and

(ii) For oxygen (or carbon dioxide), EPA Reference Method 3A of 40 CFR part 60, appendix A-2, or as an alternative ANSI/ASME PTC 19.10-1981, Flue and Exhaust Gas Analyses [Part 10, Instruments and Apparatus], as applicable, must be used (incorporated by reference, see paragraph (z) of this section).

(2) The span value of the CEMS must be 125 percent of the maximum estimated hourly potential nitrogen oxide emissions of unit.

(3) Conduct accuracy determinations quarterly and calibration drift tests daily in accordance with Procedure 1 of 40 CFR part 60, appendix F.

(4) The owner or operator of an affected facility may request that compliance with the nitrogen oxides

emission limit be determined using carbon dioxide measurements corrected to an equivalent of 7 percent oxygen. If carbon dioxide is selected for use in diluent corrections, the relationship between oxygen and carbon dioxide levels must be established during the initial performance test according to the procedures and methods specified in paragraphs (t)(4)(i) through (iv) of this section. This relationship may be reestablished during performance compliance tests:

(i) The fuel factor equation in Method 3B of 40 CFR part 60, appendix A-2, must be used to determine the relationship between oxygen and carbon dioxide at a sampling location. Method 3A of 40 CFR part 60, appendix A-2, or as an alternative ANSI/ASME PTC 19.10-1981, Flue and Exhaust Gas Analyses [Part 10, Instruments and Apparatus], as applicable, must be used to determine the oxygen concentration at the same location as the carbon dioxide monitor (incorporated by reference, see paragraph (z) of this section);

(ii) Samples must be taken for at least 30 minutes in each hour;

(iii) Each sample must represent a 1-hour average; and

(iv) A minimum of 3 runs must be performed.

(u) For facilities using a CEMS or an integrated sorbent trap monitoring system for mercury to demonstrate initial and continuous compliance with any of the emission limits of this subpart, you must complete the following:

(1) Demonstrate compliance with the appropriate emission limit(s) using a 30-day rolling average of 1-hour arithmetic average emission concentrations, including CEMS or an integrated sorbent trap monitoring system data during startup and shutdown, as defined in this subpart, calculated using equation 19-19 in section 12.4.1 of EPA Reference Method 19 of 40 CFR part 60, appendix A-7. The 1-hour arithmetic averages for CEMS must be calculated using the data points required under § 60.13(e)(2) of this chapter. Except for CEMS or an integrated sorbent trap monitoring system data during startup and shutdown, the 1-hour arithmetic averages used to calculate the 30-day rolling average emission concentrations must be corrected to 7 percent oxygen (dry basis). Integrated sorbent trap monitoring system or CEMS data during startup and shutdown, as defined in this subpart, are not corrected to 7 percent oxygen, and are measured at stack oxygen content; and

(2) Operate all CEMS and integrated sorbent trap monitoring systems in

accordance with the applicable procedures under of 40 CFR part 60, appendices B and F.

(v) Use of the bypass stack at any time is an emissions standards deviation for PM, HCl, lead, cadmium, mercury, nitrogen oxides, sulfur dioxide, and dioxin/furans.

(w) For energy recovery units with a design heat input capacity of 100 MMBtu/hr or greater that do not use a carbon monoxide CEMS, you must install, operate, and maintain an oxygen analyzer system as defined in § 62.14785a according to the procedures in paragraphs (w)(1) through (4) of this section:

(1) The oxygen analyzer system must be installed by the initial performance test date specified in § 62.14605a;

(2) You must operate the oxygen trim system within compliance with paragraph (w)(3) of this section at all times;

(3) You must maintain the oxygen level such that the 30-day rolling average that is established as the operating limit for oxygen is not below the lowest hourly average oxygen concentration measured during the most recent carbon monoxide (CO) performance test; and

(4) You must calculate and record a 30-day rolling average oxygen concentration using equation 19–19 in section 12.4.1 of EPA Reference Method 19 of 40 CFR part 60, appendix A–7.

(x) For energy recovery units with annual average heat input rates greater than or equal to 250 MMBtu/hr and waste-burning kilns, you must install, calibrate, maintain, and operate a PM CPMS and record the output of the system as specified in paragraphs (x)(1) through (8) of this section. For other energy recovery units, you may elect to use PM CPMS operated in accordance with this section. PM CPMS are suitable in lieu of using other CMS for monitoring PM compliance (e.g., bag leak detectors, electrostatic precipitator secondary power, PM scrubber pressure):

(1) Install, calibrate, operate, and maintain your PM CPMS according to the procedures in your approved site-specific monitoring plan developed in accordance with paragraphs (l) and (x)(1)(i) through (iii) of this section:

(i) The operating principle of the PM CPMS must be based on in-stack or extractive light scatter, light scintillation, beta attenuation, or mass accumulation of the exhaust gas or representative sample. The reportable measurement output from the PM CPMS

must be expressed as milliamperes or the digital signal equivalent;

(ii) The PM CPMS must have a cycle time (i.e., period required to complete sampling, measurement, and reporting for each measurement) no longer than 60 minutes; and

(iii) The PM CPMS must be capable of detecting and responding to particulate matter concentrations increments no greater than 0.5 mg/actual cubic meter.

(2) During the initial performance test or any such subsequent performance test that demonstrates compliance with the PM limit, you must adjust the site-specific operating limit in accordance with the results of the performance test according to the procedures specified in § 62.14605a.

(3) Collect PM CPMS hourly average output data for all energy recovery unit or waste-burning kiln operating hours. Express the PM CPMS output as milliamperes or the digital signal equivalent.

(4) Calculate the arithmetic 30-day rolling average of all of the hourly average PM CPMS output collected during all energy recovery unit or waste-burning kiln operating hours data (milliamperes or their digital equivalent).

(5) You must collect data using the PM CPMS at all times the energy recovery unit or waste-burning kiln is operating and at the intervals specified in paragraph (x)(1)(ii) of this section, except for periods of monitoring system malfunctions, repairs associated with monitoring system malfunctions, required monitoring system quality assurance or quality control activities (including, as applicable, calibration checks and required zero and span adjustments), and any scheduled maintenance as defined in your site-specific monitoring plan.

(6) You must use all the data collected during all energy recovery unit or waste-burning kiln operating hours in assessing the compliance with your operating limit except:

(i) Any data collected during monitoring system malfunctions, repairs associated with monitoring system malfunctions, or required monitoring system quality assurance or quality control activities conducted during monitoring system malfunctions are not used in calculations (report any such periods in your annual deviation report);

(ii) Any data collected during periods when the monitoring system is out of control as specified in your site-specific monitoring plan, repairs associated with periods when the monitoring system is out of control, or required monitoring

system quality assurance or quality control activities conducted during out-of-control periods are not used in calculations (report emissions or operating levels and report any such periods in your annual deviation report); and

(iii) Any PM CPMS data recorded during periods of CEMS data during startup and shutdown, as defined in this subpart.

(7) You must record and make available upon request results of PM CPMS system performance audits, as well as the dates and duration of periods from when the PM CPMS is out of control until completion of the corrective actions necessary to return the PM CPMS to operation consistent with your site-specific monitoring plan.

(8) For any deviation of the 30-day rolling average PM CPMS average value from the established operating parameter limit, you must:

(i) Within 48 hours of the deviation, visually inspect the air pollution control device;

(ii) If inspection of the air pollution control device identifies the cause of the deviation, take corrective action as soon as possible and return the PM CPMS measurement to within the established value;

(iii) Within 30 days of the deviation or at the time of the annual compliance test, whichever comes first, conduct a PM emissions compliance test to determine compliance with the PM emissions limit. Within 45 days of the deviation, you must re-establish the CPMS operating limit. You are not required to conduct additional testing for any deviations that occur between the time of the original deviation and the PM emissions compliance test required under this paragraph (x); and

(iv) PM CPMS deviations leading to more than four required performance tests in a 12-month process operating period (rolling monthly) constitute a violation of this subpart.

(y) When kiln emissions are emitted through multiple stacks (e.g., there is an alkali bypass and/or an in-line coal mill that exhaust emissions through a separate stack(s)), the combined emissions are subject to the emission limits applicable to waste-burning kilns. To determine the kiln-specific emission limit for demonstrating compliance, you must:

(1) Calculate a kiln-specific emission limit using equation 2 to this paragraph (y)(1):

Equation 2 to paragraph (y)(1)

$$C_{ks} = \frac{(Emission\ Limit \times \sum_1^n Q_i) - \sum_1^m (Q_i \times C_i)}{Q_{ks}} \quad (\text{Eq. 2})$$

Where:

C_{ks} = Kiln stack concentration (ppmvd, mg/dscm, ng/dscm, depending on pollutant. Each corrected to 7% O₂).

Q_{ks} = Kiln stack flow rate (volume/hr).

Q_i = Flow rate of stack i (volume/hr).

n = Number of stacks kiln emissions are being emitted from including the kiln stack.

m = Number of stacks excluding the kiln stack that kiln emissions are being emitted from.

C_i = Concentration in stack i (ppmvd, mg/dscm, ng/dscm, depending on pollutant. Each corrected to 7% O₂).

(2) Particulate matter concentration must be measured downstream of the in-line coal mill. All other pollutant concentrations must be measured either upstream or downstream of the in-line coal mill.

(3) For purposes of determining the combined emissions from kilns equipped with an alkali bypass or that exhaust kiln gases to a coal mill that exhausts through a separate stack, instead of installing a CEMS or PM CPMS on the alkali bypass stack or in-line coal mill stack, the results of the initial and subsequent performance test can be used to demonstrate compliance with the relevant emissions limit. A performance test must be conducted on an annual basis (between 11 and 13 calendar months following the previous performance test).

(z) These standards are incorporated by reference into this section with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW, Washington, DC 20460, (202) 272-0167, <https://www.epa.gov>. You may also inspect a copy at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit <https://www.archives.gov/federal-register/cfr/ibr-locations.html> or email fr.inspection@nara.gov.

(ii) [Reserved]

§ 62.14645a By what date must I conduct the annual performance test?

You must conduct annual performance tests between 11 and 13 calendar months of the previous performance test.

§ 62.14650a By what date must I conduct the annual air pollution control device inspection?

On an annual basis (no more than 12 months following the previous annual air pollution control device inspection), you must complete the air pollution control device inspection as described in § 62.14635a.

§ 62.14655a May I conduct performance testing less often?

You must conduct annual performance tests according to the schedule specified in § 62.14645a, with the following exceptions:

(a) You may conduct a repeat performance test at any time to establish new values for the operating limits, as specified in § 62.14660a. New operating limits become effective on the date that the performance test report is submitted to the EPA's Central Data Exchange or postmarked, per the requirements of § 62.14730a(b). The Administrator may request a repeat performance test at any time;

(b) You must repeat the performance test within 60 days of a process change, as defined in § 62.14780a; and

(c) You can conduct performance tests less often if you meet the following conditions: your performance tests for the pollutant for at least 2 consecutive performance tests demonstrates that the emission level for the pollutant is no greater than the emission level specified in paragraph (c)(1) or (2) of this section, as applicable; there are no changes in the operation of the affected source or air pollution control equipment that could increase emissions; and you are not required to conduct a performance test for the pollutant in response to a request by the Administrator in paragraph (a) of this section or a process change in paragraph (b) of this section. In this case, you do not have to conduct a performance test for that pollutant for

the next 2 years. You must conduct a performance test for the pollutant no more than 37 months following the previous performance test for the pollutant. If the emission level for your CISWI continues to meet the emission level specified in paragraph (c)(1) or (2), as applicable, you may choose to conduct performance tests for the pollutant every third year, as long as there are no changes in the operation of the affected source or air pollution control equipment that could increase emissions. Each such performance test must be conducted no more than 37 months after the previous performance test.

(1) For particulate matter, hydrogen chloride, mercury, carbon monoxide, nitrogen oxides, sulfur dioxide, cadmium, lead, and dioxins/furans, the emission level equal to 75 percent of the applicable emission limit in tables 4 through 7 to this subpart, as applicable; and

(2) For fugitive emissions, visible emissions (of combustion ash from the ash conveying system) for 2 percent of the time during each of the three 1-hour observation periods.

(3) If you are conducting less frequent testing for a pollutant as provided in this paragraph (c) and a subsequent performance test for the pollutant indicates that your CISWI does not meet the emission level specified in paragraph (c)(1) or (2) of this section, as applicable, you must conduct annual performance tests for the pollutant according to the schedule specified in this section until you qualify for less frequent testing for the pollutant as specified in this paragraph (c).

§ 62.14660a May I conduct a repeat performance test to establish new operating limits?

(a) Yes. You may conduct a repeat performance test at any time to establish new values for the operating limits. The Administrator may request a repeat performance test at any time.

(b) You must repeat the performance test if your feed stream is different than the feed streams used during any performance test used to demonstrate compliance.

Monitoring

§ 62.14665a What monitoring equipment must I install and what parameters must I monitor?

(a) If you are using a wet scrubber to comply with the emission limitation

under § 62.14600a, you must install, calibrate (to manufacturers' specifications), maintain, and operate devices (or establish methods) for monitoring the value of the operating parameters used to determine compliance with the operating limits listed in table 1 to this subpart. These devices (or methods) must measure and record the values for these operating parameters at the frequencies indicated in table 1 to this subpart at all times except as specified in § 62.14670a(a).

(b) If you use a fabric filter to comply with the requirements of this subpart and you do not use a PM CPMS or PM CEMS for monitoring PM compliance, you must install, calibrate, maintain, and continuously operate a bag leak detection system as specified in paragraphs (b)(1) through (8) of this section.

(1) You must install and operate a bag leak detection system for each exhaust stack of the fabric filter.

(2) Each bag leak detection system must be installed, operated, calibrated, and maintained in a manner consistent with the manufacturer's written specifications and recommendations.

(3) The bag leak detection system must be certified by the manufacturer to be capable of detecting particulate matter emissions at concentrations of 10 milligrams per actual cubic meter or less.

(4) The bag leak detection system sensor must provide output of relative or absolute particulate matter loadings.

(5) The bag leak detection system must be equipped with a device to continuously record the output signal from the sensor.

(6) The bag leak detection system must be equipped with an alarm system that will alert automatically an operator when an increase in relative particulate matter emissions over a preset level is detected. The alarm must be located where it is observed easily by plant operating personnel.

(7) For positive pressure fabric filter systems, a bag leak detection system must be installed in each baghouse compartment or cell. For negative pressure or induced air fabric filters, the bag leak detector must be installed downstream of the fabric filter.

(8) Where multiple detectors are required, the system's instrumentation and alarm may be shared among detectors.

(c) If you are using something other than a wet scrubber, activated carbon, selective non-catalytic reduction, an electrostatic precipitator, or a dry scrubber to comply with the emission limitations under § 62.14600a, you must install, calibrate (to the manufacturers'

specifications), maintain, and operate the equipment necessary to monitor compliance with the site-specific operating limits established using the procedures in § 62.14610a.

(d) If you use activated carbon injection to comply with the emission limitations in this subpart, you must measure the minimum sorbent flow rate once per hour.

(e) If you use selective noncatalytic reduction to comply with the emission limitations in this subpart, you must complete the following:

(1) Following the date on which the initial performance test is completed or is required to be completed under § 62.14615a, whichever date comes first, ensure that the affected facility does not operate above the maximum charge rate, or below the minimum secondary chamber temperature (if applicable to your CISWI) or the minimum reagent flow rate measured as 3-hour block averages at all times; and

(2) Operation of the affected facility above the maximum charge rate, below the minimum secondary chamber temperature and below the minimum reagent flow rate simultaneously constitute a violation of the nitrogen oxides emissions limit.

(f) If you use an electrostatic precipitator to comply with the emission limits of this subpart and you do not use a PM CPMS for monitoring PM compliance, you must monitor the secondary power to the electrostatic precipitator collection plates and maintain the 3-hour block averages at or above the operating limits established during the mercury or particulate matter performance test.

(g) For waste-burning kilns not equipped with a wet scrubber or dry scrubber, you must install, calibrate, maintain, and operate a CEMS for monitoring hydrogen chloride emissions discharged to the atmosphere, as specified in § 62.14640a(j), and record the output of the system. You may substitute use of a HCl CEMS for conducting the HCl initial and annual testing with EPA Method 321 of 40 CFR part 63, appendix A. for units other than waste-burning kilns not equipped with a wet scrubber or dry scrubber, a facility may substitute use of a HCl CEMS for conducting the HCl initial and annual performance test. For units equipped with a HCl CEMS, you are not required to monitor the minimum hydrogen chloride sorbent flow rate, monitoring the minimum scrubber liquor pH, and monitoring minimum injection rate.

(h) To demonstrate continuous compliance with the particulate matter emissions limit in this subpart, a facility may substitute use of either a particulate

matter CEMS or a particulate matter CPMS for conducting the particulate matter annual performance test. For units equipped with a particulate matter CEMS, you are not required to use other CMS monitoring for PM compliance (e.g., bag leak detectors, electrostatic precipitator secondary power, PM scrubber pressure). A facility may also substitute use of a particulate matter CEMS for conducting the PM initial performance test.

(i) To demonstrate initial and continuous compliance with the dioxin/furan emissions limit in this subpart, a facility may substitute use of a continuous automated sampling system for the dioxin/furan initial and annual performance test. You must record the output of the system and analyze the sample according to EPA Method 23 of 40 CFR part 60, appendix A–7. This option to use a continuous automated sampling system takes effect on the date a final performance specification applicable to dioxin/furan from continuous monitors is published in the **Federal Register**. The owner or operator who elects to continuously sample dioxin/furan emissions instead of sampling and testing using EPA Method 23 must install, calibrate, maintain and operate a continuous automated sampling system and must comply with the requirements specified in § 60.58b(p) and (q) of this chapter. A facility may substitute continuous dioxin/furan monitoring for the minimum sorbent flow rate, if activated carbon sorbent injection is used solely for compliance with the dioxin/furan emission limit.

(j)(1) To demonstrate initial and continuous compliance with the mercury emissions limit in this subpart, a facility may substitute use of a mercury CEMS or and integrated sorbent trap monitoring system for the mercury initial and annual performance test. The owner or operator who elects to continuously sample mercury emissions instead of sampling and testing using EPA Method 29 or 30B of 40 CFR part 60, appendix A–8, ASTM D6784–24, Standard Test Method for Elemental, Oxidized, Particle-Bound and Total Mercury in Flue Gas Generated from Coal-Fired Stationary Sources (Ontario Hydro Method), approved March 1, 2024 (ASTM D6784–24), or an approved alternative method for measuring mercury emissions, must install, calibrate, maintain and operate the mercury CEMS or integrated sorbent trap monitoring system and must comply with Performance Specification 12A or 12B of 40 CFR part 60, appendix B, respectively, and quality assurance requirements of Procedure 5 of 40 CFR

part 60, appendix F. For the purposes of emissions calculations when using an integrated sorbent trap monitoring system, the mercury concentration determined for each sampling period must be assigned to each hour during the sampling period. For units equipped with a mercury CEMS or an integrated sorbent trap monitoring system, you are not required to monitor the minimum sorbent flow rate, if activated carbon sorbent injection is used solely for compliance with the mercury emission limit. Waste-burning kilns must install, calibrate, maintain, and operate a mercury CEMS or an integrated sorbent trap monitoring system as specified in § 62.14640a(j).

(2) ASTM D6784–24 is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. This material is available for inspection at the U.S. Environmental Protection Agency (EPA) and at the National Archives and Records Administration (NARA). Contact the EPA at: 1200 Pennsylvania Avenue NW, Washington, DC 20460, (202) 272–0167, <https://www.epa.gov>. For information on the availability of this material at NARA, visit <https://www.archives.gov/federal-register/cfr/ibr-locations> or email fr.inspection@nara.gov. This material may be obtained from ASTM International (ASTM) at: 100 Barr Harbor Drive, Post Office Box C700, West Conshohocken, PA 19428–2959; phone: +1–610–832–9500; website: <https://www.astm.org/>.

(k) To demonstrate initial and continuous compliance with the nitrogen oxides emissions limit in this subpart, a facility may substitute use of a CEMS for the nitrogen oxides initial and annual performance test to demonstrate compliance with the nitrogen oxides emissions limits. For units equipped with a nitrogen oxides CEMS, you are not required to monitor the charge rate, secondary chamber temperature and reagent flow for selective noncatalytic reduction, if applicable:

(1) Install, calibrate, maintain and operate a CEMS for measuring nitrogen oxides emissions discharged to the atmosphere and record the output of the system. The requirements under Performance Specification 2 of 40 CFR part 60, appendix B, the quality assurance requirements of Procedure 1 of 40 CFR part 60, appendix F, and the procedures under § 60.13 of this chapter must be followed for installation, evaluation and operation of the CEMS; and

(2) Compliance with the emission limit in this subpart for nitrogen oxides

must be determined based on the 30-day rolling average of the hourly emission concentrations using CEMS outlet data, as outlined in § 62.14640a(u).

(l) To demonstrate initial and continuous compliance with the sulfur dioxide emissions limit in this subpart, a facility may substitute use of a CEMS for the sulfur dioxide initial and annual performance test to demonstrate compliance with the sulfur dioxide emissions limits:

(1) Install, calibrate, maintain and operate a CEMS for measuring sulfur dioxide emissions discharged to the atmosphere and record the output of the system. The requirements under Performance Specification 2 of 40 CFR part 60, appendix B, the quality assurance requirements of Procedure 1 of 40 CFR part 60, appendix F, and the procedures under § 60.13 of this chapter must be followed for installation, evaluation and operation of the CEMS; and

(2) Compliance with the sulfur dioxide emission limit in this subpart shall be determined based on the 30-day rolling average of the hourly arithmetic average emission concentrations using CEMS outlet data, as outlined in § 62.14640a(u).

(m) For energy recovery units over 10 MMBtu/hr but less than 250 MMBtu/hr annual average heat input rates that do not use a wet scrubber, fabric filter with bag leak detection system, an electrostatic precipitator, particulate matter CEMS, or particulate matter CPMS, you must install, operate, certify and maintain a continuous opacity monitoring system according to the procedures in paragraphs (m)(1) through (5) of this section by the compliance date specified in § 62.14600a. Energy recovery units that use a particulate matter CEMS to demonstrate initial and continuing compliance according to the procedures in § 62.14665a(n) are not required to install a continuous opacity monitoring system and must perform the annual performance tests for opacity consistent with § 62.14640a(f):

(1) Install, operate and maintain each continuous opacity monitoring system according to Performance Specification 1 (PS 1) of 40 CFR part 60, appendix B;

(2) Conduct a performance evaluation of each continuous opacity monitoring system according to the requirements in § 60.13 of this chapter and according to PS 1 of 40 CFR part 60, appendix B;

(3) As specified in § 60.13(e)(1) of this chapter, each continuous opacity monitoring system must complete a minimum of one cycle of sampling and analyzing for each successive 10-second period and one cycle of data recording for each successive 6-minute period;

(4) Reduce the continuous opacity monitoring system data as specified in § 60.13(h)(1) of this chapter; and

(5) Determine and record all the 6-minute averages (and 1-hour block averages as applicable) collected.

(n) For coal and liquid/gas energy recovery units, incinerators, and small remote incinerators, an owner or operator may elect to install, calibrate, maintain and operate a CEMS for monitoring particulate matter emissions discharged to the atmosphere and record the output of the system. The owner or operator of an affected facility who continuously monitors particulate matter emissions instead of conducting performance testing using EPA Method 5 of 40 CFR part 60, appendix A–3, or monitoring with a particulate matter CPMS according to paragraph (r) of this section, must install, calibrate, maintain and operate a PM CEMS and must comply with the requirements specified in paragraphs (n)(1) through (10) of this section:

(1) The PM CEMS must be installed, evaluated, and operated in accordance with the requirements of Performance Specification 11 of 40 CFR part 60, appendix B, and quality assurance requirements of Procedure 2 of 40 CFR part 60, appendix F, and § 60.13 of this chapter;

(2) The initial performance evaluation must be completed no later than 180 days after January 10, 2025, as specified under § 62.14615a or within 180 days of notification to the Administrator of use of the continuous monitoring system if the owner or operator was previously determining compliance by Method 5 of 40 CFR part 60, appendix A–3, performance tests, whichever is later;

(3) The owner or operator of an affected facility may request that compliance with the particulate matter emission limit be determined using carbon dioxide measurements corrected to an equivalent of 7 percent oxygen. The relationship between oxygen and carbon dioxide levels for the affected facility must be established according to the procedures and methods specified in § 62.14640a(t)(4)(i) through (iv);

(4) The owner or operator of an affected facility must conduct an initial performance test for particulate matter emissions. If PM CEMS are elected for demonstrating compliance, and the initial performance test has not yet been conducted, then initial compliance must be determined by using the CEMS specified in this paragraph (n) to measure particulate matter. You must calculate a 30-day rolling average of 1-hour arithmetic average emission concentrations, including CEMS data during startup and shutdown, as

defined in this subpart, using equation 19–19 in section 12.4.1 of EPA Reference Method 19 of 40 CFR part 60, appendix A–7;

(5) Continuous compliance with the particulate matter emission limit must be determined based on the 30-day rolling average calculated using equation 19–19 in section 12.4.1 of EPA Reference Method 19 of 40 CFR part 60, appendix A–7, from the 1-hour arithmetic average of the CEMS outlet data;

(6) At a minimum, valid continuous monitoring system hourly averages must be obtained as specified § 62.14670a;

(7) The 1-hour arithmetic averages required under paragraph (n)(5) of this section must be expressed in milligrams per dry standard cubic meter (mg/dscm) corrected to 7 percent oxygen (or carbon dioxide)(dry basis) and must be used to calculate the 30-day rolling average emission concentrations. CEMS data during startup and shutdown, as defined in this subpart, are not corrected to 7 percent oxygen, and are measured at stack oxygen content. The 1-hour arithmetic averages must be calculated using the data points required under § 60.13(e)(2) of this chapter;

(8) All valid CEMS data must be used in calculating average emission concentrations even if the minimum CEMS data requirements of paragraph (n)(6) of this section are not met;

(9) The CEMS must be operated according to Performance Specification 11 of 40 CFR part 60, appendix B; and

(10) Quarterly and yearly accuracy audits and daily drift, system optics, and sample volume checks must be performed in accordance with Procedure 2 of 40 CFR part 60, appendix F.

(o) To demonstrate initial and continuous compliance with the carbon monoxide emissions limit in this subpart, a facility may substitute use of a CEMS for the carbon monoxide initial and annual performance test to demonstrate compliance with the carbon monoxide emissions limits:

(1) Install, calibrate, maintain, and operate a CEMS for measuring carbon monoxide emissions discharged to the atmosphere and record the output of the system. The requirements under Performance Specification 4A or 4B of 40 CFR part 60, appendix B, the quality assurance requirements of Procedure 1 of 40 CFR part 60, appendix F, and the procedures under § 60.13 of this chapter must be followed for installation, evaluation, and operation of the CEMS; and

(2) Compliance with the carbon monoxide emission limit shall be

determined based on the 30-day rolling average of the hourly arithmetic average emission concentrations, including CEMS data during startup and shutdown as defined in this subpart, using CEMS outlet data, as outlined in § 62.14640a(u).

(p) The owner/operator of an affected source with a bypass stack shall install, calibrate (to manufacturers' specifications), maintain and operate a device or method for measuring the use of the bypass stack including date, time and duration.

(q) For energy recovery units with a heat input capacity of 100 MMBtu/hr or greater that do not use a carbon monoxide CEMS, you must install, operate and maintain the continuous oxygen monitoring system as defined in § 62.14780a according to the procedures in paragraphs (q)(1) through (4) of this section:

(1) The oxygen analyzer system must be installed by the initial performance test date specified in § 62.14605a;

(2) You must operate the oxygen trim system within compliance with paragraph (q)(3) of this section at all times;

(3) You must maintain the oxygen level such that the 30-day rolling average that is established as the operating limit for oxygen according to paragraph (q)(4) of this section is not below the lowest hourly average oxygen concentration measured during the most recent CO performance test; and

(4) You must calculate and record a 30-day rolling average oxygen concentration using equation 19–19 in section 12.4.1 of EPA Reference Method 19 of 40 CFR part 60, appendix A–7.

(r) For energy recovery units with annual average heat input rates greater than or equal to 250 MMBtu/hr and waste-burning kilns, you must install, calibrate, maintain, and operate a PM CPMS and record the output of the system as specified in paragraphs (r)(1) through (8) of this section. For other energy recovery units, you may elect to use PM CPMS operated in accordance with this section. PM CPMS are suitable in lieu of using other CMS for monitoring PM compliance (e.g., bag leak detectors, electrostatic precipitator secondary power, PM scrubber pressure):

(1) Install, calibrate, operate, and maintain your PM CPMS according to the procedures in your approved site-specific monitoring plan developed in accordance with § 62.14640a(l) and (r)(1)(i) through (iii) of this section:

(i) The operating principle of the PM CPMS must be based on in-stack or extractive light scatter, light scintillation, beta attenuation, or mass

accumulation of the exhaust gas or representative sample. The reportable measurement output from the PM CPMS must be expressed as milliamps or the digital signal equivalent;

(ii) The PM CPMS must have a cycle time (i.e., period required to complete sampling, measurement, and reporting for each measurement) no longer than 60 minutes; and

(iii) The PM CPMS must be capable of detecting and responding to particulate matter concentrations increments no greater than 0.5 mg/actual cubic meter.

(2) During the initial performance test or any such subsequent performance test that demonstrates compliance with the PM limit in this subpart, you must adjust the site-specific operating limit in accordance with the results of the performance test according to the procedures specified in § 62.14605a.

(3) Collect PM CPMS hourly average output data for all energy recovery unit or waste-burning kiln operating hours. Express the PM CPMS output as milliamps or the digital signal equivalent.

(4) Calculate the arithmetic 30-day rolling average of all of the hourly average PM CPMS output collected during all energy recovery unit or waste-burning kiln operating hours data (milliamps or digital bits).

(5) You must collect data using the PM CPMS at all times the energy recovery unit or waste-burning kiln is operating and at the intervals specified in paragraph (r)(1)(ii) of this section, except for periods of monitoring system malfunctions, repairs associated with monitoring system malfunctions, required monitoring system quality assurance or quality control activities (including, as applicable, calibration checks and required zero and span adjustments), and any scheduled maintenance as defined in your site-specific monitoring plan.

(6) You must use all the data collected during all energy recovery unit or waste-burning kiln operating hours in assessing the compliance with your operating limit except:

(i) Any data collected during monitoring system malfunctions, repairs associated with monitoring system malfunctions, or required monitoring system quality assurance or quality control activities conducted during monitoring system malfunctions are not used in calculations (report any such periods in your annual deviation report);

(ii) Any data collected during periods when the monitoring system is out of control as specified in your site-specific monitoring plan, repairs associated with periods when the monitoring system is

out of control, or required monitoring system quality assurance or quality control activities conducted during out-of-control periods are not used in calculations (report emissions or operating levels and report any such periods in your annual deviation report); and

(iii) Any PM CPMS data recorded during periods of CEMS data during startup and shutdown, as defined in this subpart.

(7) You must record and make available upon request results of PM CPMS system performance audits, as well as the dates and duration of periods from when the PM CPMS is out of control until completion of the corrective actions necessary to return the PM CPMS to operation consistent with your site-specific monitoring plan.

(8) For any deviation of the 30-day rolling average PM CPMS average value from the established operating parameter limit, you must:

(i) Within 48 hours of the deviation, visually inspect the air pollution control device;

(ii) If inspection of the air pollution control device identifies the cause of the deviation, take corrective action as soon as possible and return the PM CPMS measurement to within the established value;

(iii) Within 30 days of the deviation or at the time of the annual compliance test, whichever comes first, conduct a PM emissions compliance test to determine compliance with the PM emissions limit in this subpart and to verify the operation of the emissions control device(s). Within 45 days of the deviation, you must re-establish the CPMS operating limit. You are not required to conduct additional testing for any deviations that occur between the time of the original deviation and the PM emissions compliance test required under this paragraph (r)(8)(iii); and

(iv) PM CPMS deviations leading to more than four required performance tests in a 12-month process operating period (rolling monthly) constitute a violation of this subpart.

(s) If you use a dry scrubber to comply with the emission limits of this subpart, you must monitor the injection rate of each sorbent and maintain the 3-hour block averages at or above the operating limits established during the hydrogen chloride performance test.

(t) If you are required to monitor clinker production because you comply with the production-rate based mercury limit in this subpart for your waste-burning kiln, you must:

(1) Determine hourly clinker production by one of two methods:

(i) Install, calibrate, maintain, and operate a permanent weigh scale system to measure and record weight rates in tons-mass per hour of the amount of clinker produced. The system of measuring hourly clinker production must be maintained within ± 5 percent accuracy; or

(ii) Install, calibrate, maintain, and operate a permanent weigh scale system to measure and record weight rates in tons-mass per hour of the amount of feed to the kiln. The system of measuring feed must be maintained within ± 5 percent accuracy. Calculate your hourly clinker production rate using a kiln-specific feed to clinker ratio based on reconciled clinker production determined for accounting purposes and recorded feed rates. Update this ratio monthly. Note that if this ratio changes at clinker reconciliation, you must use the new ratio going forward, but you do not have to retroactively change clinker production rates previously estimated.

(2) Determine the accuracy of the system of measuring hourly clinker production (or feed mass flow if applicable) before the final compliance date under this subpart and during each quarter of source operation.

(3) Conduct accuracy checks in accordance with the procedures outlined in your site-specific monitoring plan under § 62.14640a(l).

§ 62.14670a Is there a minimum amount of monitoring data I must obtain?

For each continuous monitoring system required or optionally allowed under § 62.14665a, you must monitor and collect data according to this section:

(a) You must operate the monitoring system and collect data at all required intervals at all times compliance is required except for periods of monitoring system malfunctions or out-of-control periods, repairs associated with monitoring system malfunctions or out-of-control periods (as specified in § 62.14705a(o)), and required monitoring system quality assurance or quality control activities including, as applicable, calibration checks and required zero and span adjustments. A monitoring system malfunction is any sudden, infrequent, not reasonably preventable failure of the monitoring system to provide valid data. Monitoring system failures that are caused in part by poor maintenance or careless operation are not malfunctions. You are required to effect monitoring system repairs in response to monitoring system malfunctions or out-of-control periods and to return the monitoring system to operation as expeditiously as practicable.

(b) You may not use data recorded during monitoring system malfunctions, repairs associated with monitoring system malfunctions or out-of-control periods, or required monitoring system quality assurance or control activities in calculations used to report emissions or operating levels. You must use all the data collected during all other periods, including data normalized for above scale readings, in assessing the operation of the control device and associated control system.

(c) Except for periods of monitoring system malfunctions or out-of-control periods, repairs associated with monitoring system malfunctions or out-of-control periods, and required monitoring system quality assurance or quality control activities including, as applicable, calibration checks and required zero and span adjustments, failure to collect required data is a deviation of the monitoring requirements.

Recordkeeping and Reporting

§ 62.14675a What records must I keep?

You must maintain the items (as applicable) as specified in paragraphs (a) through (c) of this section for a period of at least 5 years:

(a) Calendar date of each record.

(b) Records of the data described in paragraphs (b)(1) through (7) of this section:

(1) The CISWI charge dates, times, weights, and hourly charge rates;

(2) Liquor flow rate to the wet scrubber inlet every 15 minutes of operation, as applicable;

(3) Pressure drop across the wet scrubber system every 15 minutes of operation or amperage to the wet scrubber every 15 minutes of operation, as applicable; and

(4) Liquor pH as introduced to the wet scrubber every 15 minutes of operation, as applicable.

(5) For affected CISWI that establish operating limits for controls other than wet scrubbers under § 62.14610a, you must maintain data collected for all operating parameters used to determine compliance with the operating limits. For energy recovery units using activated carbon injection or a dry scrubber, you must also maintain records of the load fraction and corresponding sorbent injection rate records; and

(6) If a fabric filter is used to comply with the emission limitations, you must record the date, time, and duration of each alarm and the time corrective action was initiated and completed, and a brief description of the cause of the alarm and the corrective action taken.

You must also record the percent of operating time during each 6-month period that the alarm sounds, calculated as specified in § 62.14605a(c).

(7) If you monitor clinker production in accordance with § 62.14665a(t):

(i) Hourly clinker rate produced if clinker production is measured directly;

(ii) Hourly measured kiln feed rates and calculated clinker production rates if clinker production is not measured directly;

(iii) Thirty (30)-day rolling averages for mercury in pounds per million tons of clinker produced; and

(iv) The initial and quarterly accuracy of the system of measuring hourly clinker production (or feed mass flow).

(c) Identification of calendar dates and times for which data show a deviation from the operating limits in table 1 to this subpart or a deviation from other operating limits established under § 62.14605a(d) through (g) or § 62.14610a with a description of the deviations, reasons for such deviations, and a description of corrective actions taken.

(d) The results of the initial, annual, and any subsequent performance tests conducted to determine compliance with the emission limits and/or to establish operating limits, as applicable. Retain a copy of the complete test report including calculations.

(e) Records showing the names of CISWI operators who have completed review of the information in § 62.14590a(a) as required by § 62.14590a(b), including the date of the initial review and all subsequent annual reviews.

(f) Records showing the names of the CISWI operators who have completed the operator training requirements under § 62.14565a, met the criteria for qualification under § 62.14575a, and maintained or renewed their qualification under § 62.14580a or § 62.14585a. Records must include documentation of training, the dates of the initial and refresher training, and the dates of their qualification and all subsequent renewals of such qualifications.

(g) For each qualified operator, the phone and/or pager number at which they can be reached during operating hours.

(h) Records of calibration of any monitoring devices as required under § 62.14665a.

(i) Equipment vendor specifications and related operation and maintenance requirements for the incinerator, emission controls, and monitoring equipment.

(j) The information listed in § 62.14590a(a).

(k) On a daily basis, keep a log of the quantity of waste burned and the types of waste burned (always required).

(l) Maintain records of the annual air pollution control device inspections that are required for each CISWI subject to the emissions limits in tables 4 through 7 to this subpart, any required maintenance and any repairs not completed within 10 days of an inspection or the timeframe established by the state regulatory agency.

(m) For continuously monitored pollutants or parameters, you must document and keep a record of the following parameters measured using continuous monitoring systems. If you monitor emissions with a CEMS, you must indicate which data are CEMS data during startup and shutdown:

(1) All 6-minute average levels of opacity;

(2) All 1-hour average concentrations of sulfur dioxide emissions;

(3) All 1-hour average concentrations of nitrogen oxides emissions;

(4) All 1-hour average concentrations of carbon monoxide emissions;

(5) All 1-hour average concentrations of particulate matter emissions;

(6) All 1-hour average concentrations of mercury emissions;

(7) All 1-hour average concentrations of HCl CEMS outputs;

(8) All 1-hour average percent oxygen concentrations; and

(9) All 1-hour average PM CPMS readings or particulate matter CEMS outputs.

(n) Records indicating use of the bypass stack, including dates, times and durations.

(o) If you choose to stack test less frequently than annually, consistent with § 62.14655a, you must keep annual records that document that your emissions in the previous stack test(s) were less than 75 percent of the applicable emission limit and document that there was no change in source operations including fuel composition and operation of air pollution control equipment that would cause emissions of the relevant pollutant to increase within the past year.

(p) Records of the occurrence and duration of each malfunction of operation (*i.e.*, process equipment) or the air pollution control and monitoring equipment.

(q) Records of all required maintenance performed on the air pollution control and monitoring equipment.

(r) Records of actions taken during periods of malfunction to minimize emissions in accordance with § 60.11(d) of this chapter, including corrective actions to restore malfunctioning

process and air pollution control and monitoring equipment to its normal or usual manner of operation.

(s) For operating units that combust non-hazardous secondary materials that have been determined not to be solid waste pursuant to § 241.3(b)(1) of this chapter, you must keep a record which documents how the secondary material meets each of the legitimacy criteria under § 241.3(d)(1) of this chapter. If you combust a fuel that has been processed from a discarded non-hazardous secondary material pursuant to § 241.3(b)(4) of this chapter, you must keep records as to how the operations that produced the fuel satisfies the definition of processing in § 241.2 of this chapter and each of the legitimacy criteria in § 241.3(d)(1). If the fuel received a non-waste determination pursuant to the petition process submitted under § 241.3(c) of this chapter, you must keep a record that documents how the fuel satisfies the requirements of the petition process. For operating units that combust non-hazardous secondary materials as fuel per § 241.4 of this chapter, you must keep records documenting that the material is a listed non-waste under § 241.4(a) of this chapter.

(t) Records of the criteria used to establish that the unit qualifies as a small power production facility under section 3(17)(C) of the Federal Power Act (16 U.S.C. 796(17)(C)) and that the waste material the unit is proposed to burn is homogeneous.

(u) Records of the criteria used to establish that the unit qualifies as a cogeneration facility under section 3(18)(B) of the Federal Power Act (16 U.S.C. 796(18)(B)) and that the waste material the unit is proposed to burn is homogeneous.

§ 62.14680a Where and in what format must I keep my records?

All records must be available onsite in either paper copy or computer-readable format that can be printed upon request, unless an alternative format is approved by the Administrator.

§ 62.14685a What reports must I submit?

See table 3 to this subpart for a summary of the reporting requirements.

§ 62.14690a When must I submit my waste management plan?

You must submit a waste management plan no later than January 10, 2025, or the date you recommence burning solid waste, whichever is later.

§ 62.14695a What information must I submit following my initial performance test?

You must submit the information specified in paragraphs (a) through (c) of this section no later than 60 days following the initial performance test. All reports must be signed by the facilities manager:

- (a) The complete test report for the initial performance test results obtained under § 62.14625a, as applicable;
- (b) The values for the site-specific operating limits established in § 62.14605a or § 62.14610a; and
- (c) If you are using a fabric filter to comply with the emission limitations in this subpart, documentation that a bag leak detection system has been installed and is being operated, calibrated, and maintained as required by § 62.14665a(b).

§ 62.14700a When must I submit my annual report?

You must submit an annual report no later than 12 months following the submission of the information in § 62.14695a. You must submit subsequent reports no more than 12 months following the previous report. (If the unit is subject to permitting requirements under title V of the Clean Air Act, you may be required by the permit to submit these reports more frequently.)

§ 62.14705a What information must I include in my annual report?

The annual report required under § 62.14700a must include the items listed in paragraphs (a) through (p) of this section. If you have a deviation from the operating limits or the emission limitations in this subpart, you must also submit deviation reports as specified in §§ 62.14710a, 62.14715a, and 62.14720a.

- (a) Company name and address;
- (b) Statement by a responsible official, with that official's name, title, and signature, certifying the accuracy of the content of the report. If your report is submitted via the Compliance and Emissions Data Reporting Interface (CEDRI), the certifier's electronic signature during the submission process replaces this requirement;
- (c) Date of report and beginning and ending dates of the reporting period. You are no longer required to provide the date of the report when the report is submitted via CEDRI;
- (d) The values for the operating limits established pursuant to § 62.14605a or § 62.14610a;
- (e) If no deviation from any emission limitation or operating limit that applies to you has been reported, a statement

that there was no deviation from the emission limitations or operating limits during the reporting period;

- (f) The highest recorded 3-hour average and the lowest recorded 3-hour average (30-day average for energy recovery units), as applicable, for each operating parameter recorded for the calendar year being reported;
- (g) Information recorded under § 62.14675a(b)(6) and (c) through (e) for the calendar year being reported;
- (h) For each performance test conducted during the reporting period, if any performance test is conducted, the process unit(s) tested, the pollutant(s) tested and the date that such performance test was conducted. Submit, following the procedure specified in § 62.14730a(b)(1), the performance test report no later than the date that you submit the annual report;
- (i) If you met the requirements of § 62.14655a, and did not conduct a performance test during the reporting period, you must state that you met the requirements of § 62.14655a, and, therefore, you were not required to conduct a performance test during the reporting period;
- (j) The start date, start time, and duration (in hours) of periods when all qualified CISWI operators were unavailable for more than 8 hours, but less than 2 weeks;
- (k) If you had a malfunction during the reporting period, the compliance report must include the start date, start time, duration (in hours), and a brief description for each malfunction that occurred during the reporting period and that caused or may have caused any applicable emission limitation to be exceeded. The report must also include a description of actions taken by an owner or operator during a malfunction of an affected source to minimize emissions in accordance with § 60.11(d) of this chapter, including actions taken to correct a malfunction;
- (l) For each deviation from an emission or operating limitation that occurs for a CISWI for which you are not using a CMS to comply with the emission or operating limitations in this subpart, the annual report must contain the following information:
 - (1) The total operating time (in hours) of the CISWI at which the deviation occurred during the reporting period; and
 - (2) Information on the start date, start time, duration (in hours), and cause of deviations (including unknown cause, if applicable), as applicable, and the corrective action taken;
 - (m) If there were periods during which the continuous monitoring system, including the CEMS, was out of

control as specified in paragraph (o) of this section, the annual report must contain the following information for each deviation from an emission or operating limitation occurring for a CISWI for which you are using a continuous monitoring system to comply with the emission and operating limitations in this subpart:

- (1) The date and time that each malfunction started and stopped;
- (2) The start and end date and time and duration (in hours) that each CMS was inoperative, except for zero (low-level) and high-level checks;
- (3) The start and end date and time and duration (in hours) that each continuous monitoring system was out-of-control, and descriptions of corrective actions taken;
- (4) The date and time that each deviation started and stopped, and whether each deviation occurred during a period of malfunction or during another period;
- (5) A summary of the total duration (in hours) of the deviation during the reporting period, and the total duration as a percent of the total source operating time during that reporting period;
- (6) A breakdown of the total duration (in hours) of the deviations during the reporting period into those that are due to control equipment problems, process problems, other known causes, and other unknown causes;
- (7) A summary of the total duration (in hours) of continuous monitoring system downtime during the reporting period, and the total duration of continuous monitoring system downtime as a percent of the total operating time of the CISWI at which the continuous monitoring system downtime occurred during that reporting period;
- (8) An identification of each parameter and pollutant that was monitored at the CISWI;
- (9) A brief description of the CISWI;
- (10) A brief description of the continuous monitoring system;
- (11) The date of the latest continuous monitoring system certification or audit; and
- (12) A description of any changes in continuous monitoring system, processes, or controls since the last reporting period;
- (n) If there were periods during which the continuous monitoring system, including the CEMS, was not out of control as specified in paragraph (o) of this section, a statement that there were not periods during which the continuous monitoring system was out of control during the reporting period;

(o) A continuous monitoring system is out of control if any of the following occur:

(1) The zero (low-level), mid-level (if applicable), or high-level calibration drift exceeds two times the applicable calibration drift specification in the applicable performance specification or in the relevant standard;

(2) The continuous monitoring system fails a performance test audit (e.g., cylinder gas audit), relative accuracy audit, relative accuracy test audit, or linearity test audit; and

(3) The continuous opacity monitoring system calibration drift exceeds two times the limit in the applicable performance specification in the relevant standard; and

(p) For energy recovery units, include the annual heat input and average annual heat input rate of all fuels being burned in the unit to verify which subcategory of energy recovery unit applies.

§ 62.14710a What else must I report if I have a deviation from the operating limits or the emission limitations?

(a) You must submit a deviation report if any recorded 3-hour average (30-day average for energy recovery units or for PM CPMS) parameter level is above the maximum operating limit or below the minimum operating limit established under this subpart, if the bag leak detection system alarm sounds for more than 5 percent of the operating time for any 6-month reporting period, if a performance test was conducted that deviated from any emission limitation, or if a 30-day average measured using a CEMS deviated from any emission limitation.

(b) The deviation report must be submitted by August 1 of that year for data collected during the first half of the calendar year (January 1 to June 30), and by February 1 of the following year for data you collected during the second half of the calendar year (July 1 to December 31).

§ 62.14715a What must I include in the deviation report?

In each report required under § 62.14710a, for any pollutant or parameter that deviated from the emission limitations or operating limits specified in this subpart, include the four items described in paragraphs (a) through (d) of this section.

(a) The calendar dates and times your unit deviated from the emission limitations or operating limit requirements;

(b) The averaged and recorded data for the dates in paragraph (a) of this section;

(c) Duration and causes of the following;

(1) Each deviation from the emission limitations or operating limits and your corrective actions; and

(2) Bypass events and your corrective actions. Include the calendar date and start time of the bypass event; and

(d) A copy of the operating limit monitoring data during each deviation and, for any test report that documents the emission levels, the process unit(s) tested, the pollutant(s) tested and the date that the performance test was conducted. Submit, following the procedure specified in § 62.14730a(b)(1), the performance test report no later than the date that you submit the deviation report.

§ 62.14720a What else must I report if I have a deviation from the requirement to have a qualified operator accessible?

(a) If all qualified operators are not accessible for two weeks or more, you must take the two actions in paragraphs (a)(1) and (2) of this section.

(1) You must submit a notification of the deviation within 10 days that includes the three items in paragraphs (a)(1)(i) through (iii) of this section.

(i) A statement of what caused the deviation;

(ii) A description of what you are doing to ensure that a qualified operator is accessible; and

(iii) The date when you anticipate that a qualified operator will be available.

(2) Submit a status report to the Administrator every 4 weeks that includes the three items in paragraphs (a)(2)(i) through (iii) of this section.

(i) A description of what you are doing to ensure that a qualified operator is accessible;

(ii) The date when you anticipate that a qualified operator will be accessible; and

(iii) Request approval from the Administrator to continue operation of the CISWI.

(b) If your unit was shut down by the Administrator, under the provisions of § 62.14595a(b)(2), due to a failure to provide an accessible qualified operator, you must notify the Administrator that you are resuming operation once a qualified operator is accessible.

§ 62.14725a Are there any other notifications or reports that I must submit?

(a) Yes. You must submit notifications as provided by § 60.7 of this chapter.

(b) If you cease combusting solid waste but continue to operate, you must provide 30 days prior notice of the effective date of the waste-to-fuel switch, consistent with § 62.14640a(a). The notification must identify:

(1) The name of the owner or operator of the CISWI, the location of the source, the emissions unit(s) that will cease burning solid waste, and the date of the notice;

(2) The currently applicable subcategory under this subpart, and any subpart and subcategory under 40 CFR part 63 that will be applicable after you cease combusting solid waste;

(3) The fuel(s), non-waste material(s), and solid waste(s) the CISWI is currently combusting and has combusted over the past 6 months, and the fuel(s) or non-waste materials the unit will commence combusting;

(4) The date on which you became subject to the currently applicable emission limits; and

(5) The date upon which you will cease combusting solid waste, and the date (if different) that you intend for any new requirements to become applicable (i.e., the effective date of the waste-to-fuel switch), consistent with paragraphs (b)(2) and (3) of this section.

§ 62.14730a In what form can I submit my reports?

(a) Submit initial, annual, and deviation reports electronically or in paper format, postmarked on or before the submittal due dates. Beginning on January 10, 2025, or once the reporting form has been available in CEDRI for 1 year, whichever is later, you must submit subsequent reports on or before the submittal dates to the EPA via the CEDRI, which can be accessed through the EPA's Central Data Exchange (CDX) (<https://cdx.epa.gov>). Use the appropriate electronic report in CEDRI for this subpart or an alternate electronic file format consistent with the extensible markup language (XML) schema listed on the CEDRI website (<https://www.epa.gov/electronic-reporting-air-emissions/compliance-and-emissions-data-reporting-interface-cedri>). When the data forms become available in CEDRI, they will be listed on the CEDRI website. If the reporting form specific to this subpart is not available in CEDRI at the time that the report is due, submit the report to the Administrator at the appropriate address listed in § 60.4 of this chapter. Once the form has been available in CEDRI for 90 calendar days, you must begin submitting all subsequent reports via CEDRI. The reports must be submitted by the deadlines specified in this subpart, regardless of the method in which the report is submitted.

(b) Submit results of each performance test and CEMS performance evaluation required by this subpart as follows:

(1) Within 60 days after the date of completing each performance test (see § 60.8 of this chapter) required by this subpart, you must submit the results of the performance test following the procedure specified in either paragraph (b)(1)(i) or (ii) of this section:

(i) For data collected using test methods supported by the EPA's Electronic Reporting Tool (ERT) as listed on the EPA's ERT website (<https://www.epa.gov/electronic-reporting-air-emissions/electronic-reporting-tool-ert>) at the time of the test, you must submit the results of the performance test to the EPA via the CEDRI. CEDRI can be accessed through the EPA's CDX (<https://cdx.epa.gov>). Performance test data must be submitted in a file format generated through the use of the EPA's ERT or an alternate electronic file format consistent with the XML schema listed on the EPA's ERT website. If you claim that some of the performance test information being submitted is confidential business information (CBI), you must submit a complete file generated through the use of the EPA's ERT or an alternate electronic file consistent with the XML schema listed on the EPA's ERT website, including information claimed to be CBI, on a compact disc, flash drive, or other commonly used electronic storage media to the EPA. The electronic media must be clearly marked as CBI and mailed to U.S. EPA/OAQPS/CORE CBI Office, Attention: Group Leader, Measurement Policy Group, MD C404-02, 4930 Old Page Rd., Durham, NC 27703. The same ERT or alternate file with the CBI omitted must be submitted to the EPA via the EPA's CDX as described earlier in this paragraph (b)(1)(i); and

(ii) For data collected using test methods that are not supported by the EPA's ERT as listed on the EPA's ERT website at the time of the test, you must submit the results of the performance test to the Administrator at the appropriate address listed in § 60.4 of this chapter.

(2) Within 60 days after the date of completing each CEMS performance evaluation you must submit the results of the performance evaluation following the procedure specified in either paragraph (b)(2)(i) or (ii) of this section. In the situation where performance evaluations cover multiple days, the results may be submitted together up to 60 days after all performance evaluations are completed.

(i) For performance evaluations of continuous monitoring systems measuring RATA pollutants that are supported by the EPA's ERT as listed on the EPA's ERT website at the time of the

evaluation, you must submit the results of the performance evaluation to the EPA via the CEDRI. CEDRI can be accessed through the EPA's CDX. Performance evaluation data must be submitted in a file format generated through the use of the EPA's ERT or an alternate file format consistent with the XML schema listed on the EPA's ERT website. If you claim that some of the performance evaluation information being submitted is CBI, you must submit a complete file generated through the use of the EPA's ERT or an alternate electronic file consistent with the XML schema listed on the EPA's ERT website, including information claimed to be CBI, on a compact disc, flash drive, or other commonly used electronic storage media to the EPA. The electronic storage media must be clearly marked as CBI and mailed to U.S. EPA/OAQPS/CORE CBI Office, Attention: Group Leader, Measurement Policy Group, MD C404-02, 4930 Old Page Rd., Durham, NC 27703. The same ERT or alternate file with the CBI omitted must be submitted to the EPA via the EPA's CDX as described earlier in this paragraph (b)(2)(i); and

(ii) For any performance evaluations of continuous monitoring systems measuring RATA pollutants that are not supported by the EPA's ERT as listed on the EPA's ERT website at the time of the evaluation, you must submit the results of the performance evaluation to the Administrator at the appropriate address listed in § 60.4 of this chapter.

(c) If you are required to electronically submit a report through the CEDRI in the EPA's CDX, and due to a planned or actual outage of either the EPA's CEDRI or CDX systems within the period of time beginning 5 business days prior to the date that the submission is due, you will be or are precluded from accessing CEDRI or CDX and submitting a required report within the time prescribed, you may assert a claim of EPA system outage for failure to timely comply with the reporting requirement. You must submit notification to the Administrator in writing as soon as possible following the date you first knew, or through due diligence should have known, that the event may cause or caused a delay in reporting. You must provide to the Administrator a written description identifying the date, time, and length of the outage; a rationale for attributing the delay in reporting beyond the regulatory deadline to the EPA system outage; describe the measures taken or to be taken to minimize the delay in reporting; and identify a date by which you propose to report, or if you have already met the reporting requirement at the time of the

notification, the date you reported. In any circumstance, the report must be submitted electronically as soon as possible after the outage is resolved. The decision to accept the claim of EPA system outage and allow an extension to the reporting deadline is solely within the discretion of the Administrator.

(d) If you are required to electronically submit a report through CEDRI in the EPA's CDX and a force majeure event is about to occur, occurs, or has occurred or there are lingering effects from such an event within the period of time beginning 5 business days prior to the date the submission is due, the owner or operator may assert a claim of force majeure for failure to timely comply with the reporting requirement. For the purposes of this section, a force majeure event is defined as an event that will be or has been caused by circumstances beyond the control of the affected facility, its contractors, or any entity controlled by the affected facility that prevents you from complying with the requirement to submit a report electronically within the time period prescribed. Examples of such events are acts of nature (e.g., hurricanes, earthquakes, or floods), acts of war or terrorism, or equipment failure or safety hazard beyond the control of the affected facility (e.g., large scale power outage). If you intend to assert a claim of force majeure, you must submit notification to the Administrator in writing as soon as possible following the date you first knew, or through due diligence should have known, that the event may cause or caused a delay in reporting. You must provide to the Administrator a written description of the force majeure event and a rationale for attributing the delay in reporting beyond the regulatory deadline to the force majeure event; describe the measures taken or to be taken to minimize the delay in reporting; and identify a date by which you propose to report, or if you have already met the reporting requirement at the time of the notification, the date you reported. In any circumstance, the reporting must occur as soon as possible after the force majeure event occurs. The decision to accept the claim of force majeure and allow an extension to the reporting deadline is solely within the discretion of the Administrator.

§ 62.14735a Can reporting dates be changed?

If the Administrator agrees, you may change the semiannual or annual reporting dates. See § 60.19(c) of this chapter for procedures to seek approval to change your reporting date.

Air Curtain Incinerators (ACIs)**§ 62.14740a What is an air curtain incinerator?**

(a) An ACI operates by forcefully projecting a curtain of air across an open chamber or open pit in which combustion occurs. Incinerators of this type can be constructed above or below ground and with or without refractory walls and floor. Air curtain incinerators are not to be confused with conventional combustion devices with enclosed fireboxes and controlled air technology such as mass burn, modular, and fluidized bed combustors.

(b) Air curtain incinerators that burn only the materials listed in paragraphs (b)(1) through (3) of this section are only required to meet the requirements under § 62.14770a, this section, and §§ 62.14745a through 62.14765a:

- (1) One hundred (100) percent wood waste;
- (2) One hundred (100) percent clean lumber; and
- (3) One hundred (100) percent mixture of only wood waste, clean lumber, and/or yard waste.

§ 62.14745a What must I do if I close my air curtain incinerator and then restart it?

(a) If you close your incinerator but will reopen it prior to the final compliance date in this subpart, you must comply with the final standards in this subpart on January 10, 2025.

(b) If you close your incinerator but will restart it after January 10, 2025, you must complete emission control retrofits and meet the emission limitations under this subpart on the date your incinerator restarts operation.

§ 62.14750a What must I do if I plan to permanently close my air curtain incinerator and not restart it?

If you plan to permanently close your incinerator rather than comply with this subpart, submit a closure notification, including the date of closure, to the Administrator no later than six months prior to the date your operation will cease. The closure date cannot be later than January 10, 2025, for sources that will not operate on and after the compliance date under this subpart. In addition, while still in operation, your air curtain incinerator is subject to the same requirement to apply for and obtain an operating permit under title V of the Clean Air Act that applies to an air curtain incinerator that will not be permanently closing.

§ 62.14755a What are the emission limitations for air curtain incinerators?

After the date the initial test for opacity is required or completed (whichever is earlier), you must meet

the limitations in paragraphs (a) and (b) of this section.

(a) Maintain opacity to less than or equal to 10 percent opacity (as determined by the average of three 1-hour blocks consisting of ten 6-minute average opacity values), except as described in paragraph (b) of this section.

(b) Maintain opacity to less than or equal to 35 percent opacity (as determined by the average of three 1-hour blocks consisting of ten 6-minute average opacity values) during the startup period that is within the first 30 minutes of operation.

§ 62.14760a How must I monitor opacity for air curtain incinerators?

(a) Use Method 9 of 40 CFR part 60, appendix A–4, to determine compliance with the opacity limitation.

(b) Conduct an initial test for opacity as specified in § 60.8 of this chapter no later than 180 days after your final compliance date under this subpart.

(c) After the initial test for opacity, conduct annual tests no more than 12 calendar months following the date of your previous test.

§ 62.14765a What are the recordkeeping and reporting requirements for air curtain incinerators?

(a) Keep records of results of all initial and annual opacity tests onsite in either paper copy or electronic format, unless the Administrator approves another format, for at least 5 years.

(b) Make all records available for submittal to the Administrator or for an inspector's onsite review.

(c) Submit an initial report no later than 60 days following the initial opacity test that includes the information specified in paragraphs (c)(1) and (2) of this section.

(1) The types of materials you plan to combust in your ACI; and

(2) The results (as determined by the average of three 1-hour blocks consisting of ten 6-minute average opacity values) of the initial opacity tests.

(d) Submit annual opacity test results within 12 months following the previous report.

(e) Submit initial and annual opacity test reports as electronic or paper copy on or before the applicable submittal date and keep a copy onsite for a period of 5 years.

Title V Requirements**§ 62.14770a Am I required to apply for and obtain a title V operating permit for my unit?**

Yes. Each CISWI and ACI subject to standards under this subpart must

operate pursuant to a permit issued under section 129(e) and title V of the Clean Air Act.

Delegation of Authority**§ 62.14775a What authorities are withheld by the EPA Administrator?**

The following authorities are withheld by the EPA Administrator and not transferred to the state or tribe:

(a) Approval of alternatives to the emission limitations in tables 4 through 7 to this subpart and operating limits established under § 62.14605a and table 1 to this subpart.

(b) Approval of petitions submitted pursuant to the requirements of § 62.14610a establishing operating parameters when using controls other than a wet scrubber, fabric filter, activated carbon injection, selective noncatalytic reduction, or a dry scrubber to comply with the emission limitations in tables 4 through 7 to this subpart.

(c) Approval of major alternatives to test methods established under § 62.14615a and tables 4 through 7 to this subpart.

(d) Approval of major alternatives to monitoring requirements established under §§ 62.14665a and 62.14575a and table 1 to this subpart.

(e) Approval of major alternatives to recordkeeping and reporting requirements of this subpart.

(f) Approval of an alternative to any electronic reporting to the EPA required by this subpart.

(g) Approval of requests submitted pursuant to the requirements in § 62.14595a(b)(2).

(h) Approval of alternative opacity emission limits in § 62.14600a under § 60.11(e)(6) through (8) of this chapter.

(i) Performance test and data reduction waivers under § 62.14615a(j) and § 60.8(b)(4) and (5) of this chapter.

(j) Determination of whether a qualifying small power production facility or cogeneration facility under § 62.14530a(d) or (e) is combusting homogeneous waste.

Definitions**§ 62.14780a What definitions must I know?**

Terms used but not defined in this subpart are defined in the Clean Air Act, 40 CFR part 60, subparts A and B, and subpart A of this part.

30-day rolling average means the arithmetic mean of the previous 720 hours of valid operating data. Valid data excludes periods when this unit is not operating. The 720 hours should be consecutive, but not necessarily continuous if operations are intermittent.

Administrator means the Administrator of the U.S. Environmental Protection Agency or his/her authorized representative or Administrator of a State Air Pollution Control Agency.

Agricultural waste means vegetative agricultural materials such as nut and grain hulls and chaff (e.g., almond, walnut, peanut, rice, and wheat), bagasse, orchard prunings, corn stalks, coffee bean hulls and grounds, and other vegetative waste materials generated as a result of agricultural operations.

Air curtain incinerator (ACI) means an incinerator that operates by forcefully projecting a curtain of air across an open chamber or pit in which combustion occurs. Incinerators of this type can be constructed above or below ground and with or without refractory walls and floor. Air curtain incinerators are different from conventional combustion devices which typically have enclosed fireboxes and controlled air technology such as mass burn, modular, and fluidized bed combustors.

Annual heat input means the heat input for the 12 months preceding the compliance demonstration.

Auxiliary fuel means natural gas, liquefied petroleum gas, fuel oil, or diesel fuel.

Average annual heat input rate means annual heat input divided by the hours of operation for the 12 months preceding the compliance demonstration.

Bag leak detection system means an instrument that is capable of monitoring particulate matter loadings in the exhaust of a fabric filter (i.e., baghouse) in order to detect bag failures. A bag leak detection system includes, but is not limited to, an instrument that operates on triboelectric, light scattering, light transmittance, or other principle to monitor relative particulate matter loadings.

Burn-off oven means any rack reclamation unit, part reclamation unit, or drum reclamation unit. A burn-off oven is not an incinerator, waste-burning kiln, an energy recovery unit or a small, remote incinerator under this subpart.

Bypass stack means a device used for discharging combustion gases to avoid severe damage to the air pollution control device or other equipment.

Calendar quarter means 3 consecutive months (non-overlapping) beginning on: January 1, April 1, July 1, or October 1.

Calendar year means 365 consecutive days starting on January 1 and ending on December 31.

CEMS data during startup and shutdown means the following:

(1) For incinerators and small, remote incinerators: CEMS data collected during the first hours of operation of a CISWI startup from a cold start until waste is fed into the unit and the hours of operation following the cessation of waste material being fed to the CISWI during a unit shutdown. For each startup event, the length of time that CEMS data may be claimed as being CEMS data during startup must be 48 operating hours or less. For each shutdown event, the length of time that CEMS data may be claimed as being CEMS data during shutdown must be 24 operating hours or less;

(2) For energy recovery units: CEMS data collected during the startup or shutdown periods of operation. Startup begins with either the first-ever firing of fuel in a boiler or process heater for the purpose of supplying useful thermal energy (such as steam or heat) for heating, cooling, or process purposes, or producing electricity, or the firing of fuel in a boiler or process heater for any purpose after a shutdown event. Startup ends four hours after when the boiler or process heater makes useful thermal energy (such as heat or steam) for heating, cooling, or process purposes, or generates electricity, whichever is earlier. Shutdown begins when the boiler or process heater no longer makes useful thermal energy (such as heat or steam) for heating, cooling, or process purposes and/or generates electricity or when no fuel is being fed to the boiler or process heater, whichever is earlier. Shutdown ends when the boiler or process heater no longer makes useful thermal energy (such as steam or heat) for heating, cooling, or process purposes and/or generates electricity, and no fuel is being combusted in the boiler or process heater; and

(3) For waste-burning kilns: CEMS data collected during the periods of kiln operation that do not include normal operations. *Startup* means the time from when a shutdown kiln first begins firing fuel until it begins producing clinker. Startup begins when a shutdown kiln turns on the induced draft fan and begins firing fuel in the main burner. Startup ends when feed is being continuously introduced into the kiln for at least 120 minutes or when the feed rate exceeds 60 percent of the kiln design limitation rate, whichever occurs first. *Shutdown* means the cessation of kiln operation. Shutdown begins when feed to the kiln is halted and ends when continuous kiln rotation ceases.

Chemical recovery unit means combustion units burning materials to recover chemical constituents or to produce chemical compounds where there is an existing commercial market

for such recovered chemical constituents or compounds. A chemical recovery unit is not an incinerator, a waste-burning kiln, an energy recovery unit, or a small, remote incinerator under this subpart. The following seven types of units are considered chemical recovery units:

(1) Units burning only pulping liquors (i.e., black liquor) that are reclaimed in a pulping liquor recovery process and reused in the pulping process;

(2) Units burning only spent sulfuric acid used to produce virgin sulfuric acid;

(3) Units burning only wood or coal feedstock for the production of charcoal;

(4) Units burning only manufacturing byproduct streams/residue containing catalyst metals that are reclaimed and reused as catalysts or used to produce commercial grade catalysts;

(5) Units burning only coke to produce purified carbon monoxide that is used as an intermediate in the production of other chemical compounds;

(6) Units burning only hydrocarbon liquids or solids to produce hydrogen, carbon monoxide, synthesis gas, or other gases for use in other manufacturing processes; and

(7) Units burning only photographic film to recover silver.

Chemotherapeutic waste means waste material resulting from the production or use of antineoplastic agents used for the purpose of stopping or reversing the growth of malignant cells.

Clean lumber means wood or wood products that have been cut or shaped and include wet, air-dried, and kiln-dried wood products. Clean lumber does not include wood products that have been painted, pigment-stained, or pressure-treated by compounds such as chromate copper arsenate, pentachlorophenol, and cresosote.

Commercial and industrial solid waste incineration unit (CISWI) means any distinct operating unit of any commercial or industrial facility that combusts, or has combusted in the preceding 6 months, any solid waste as that term is defined in 40 CFR part 241. If the operating unit burns materials other than traditional fuels as defined in § 241.2 of this chapter that have been discarded, and you do not keep and produce records as required by § 62.14675a(s), the operating unit is a CISWI. While not all CISWI will include all of the following components, a CISWI includes, but is not limited to, the solid waste feed system, grate system, flue gas system, waste heat recovery equipment, if any, and bottom ash system. The CISWI does not include air pollution control equipment or the

stack. The CISWI boundary starts at the solid waste hopper (if applicable) and extends through two areas: The combustion unit flue gas system, which ends immediately after the last combustion chamber or after the waste heat recovery equipment, if any; and the combustion unit bottom ash system, which ends at the truck loading station or similar equipment that transfers the ash to final disposal. The CISWI includes all ash handling systems connected to the bottom ash handling system.

Contained gaseous material means gases that are in a container when that container is combusted.

Continuous emission monitoring system (CEMS) means the total equipment that may be required to meet the data acquisition and availability requirements of this subpart, used to sample, condition (if applicable), analyze, and provide a record of emissions.

Continuous monitoring system (CMS) means the total equipment, required under the emission monitoring sections in applicable subparts, used to sample and condition (if applicable), to analyze, and to provide a permanent record of emissions or process parameters. A particulate matter continuous parameter monitoring system (PM CPMS) is a type of CMS.

Cyclonic burn barrel means a combustion device for waste materials that is attached to a 55 gallon, open-head drum. The device consists of a lid, which fits onto and encloses the drum, and a blower that forces combustion air into the drum in a cyclonic manner to enhance the mixing of waste material and air. A cyclonic burn barrel is not an incinerator, a waste-burning kiln, an energy recovery unit or a small, remote incinerator under this subpart.

Deviation means any instance in which an affected source subject to this subpart, or an owner or operator of such a source:

(1) Fails to meet any requirement or obligation established by this subpart, including but not limited to any emission limitation, operating limit, or operator qualification and accessibility requirements; and

(2) Fails to meet any term or condition that is adopted to implement an applicable requirement in this subpart and that is included in the operating permit for any affected source required to obtain such a permit.

Dioxins/furans means tetra-through octa-chlorinated dibenzo-p-dioxins and dibenzofurans.

Discard means, for purposes of this subpart and 40 CFR part 60, subpart

DDDD, only, burned in an incineration unit without energy recovery.

Drum reclamation unit means a unit that burns residues out of drums (e.g., 55 gallon drums) so that the drums can be reused.

Dry scrubber means an add-on air pollution control system that injects dry alkaline sorbent (dry injection) or sprays an alkaline sorbent (spray dryer) to react with and neutralize acid gas in the exhaust stream forming a dry powder material. Sorbent injection systems in fluidized bed boilers and process heaters are included in this definition. A dry scrubber is a dry control system.

Energy recovery means the process of recovering thermal energy from combustion for useful purposes such as steam generation or process heating.

Energy recovery unit means a combustion unit combusting solid waste (as defined by the Administrator in 40 CFR part 241) for energy recovery. Energy recovery units include units that would be considered boilers and process heaters if they did not combust solid waste.

Energy recovery unit designed to burn biomass (biomass) means an energy recovery unit that burns solid waste, biomass, and non-coal solid materials but less than 10 percent coal, on a heat input basis on an annual average, either alone or in combination with liquid waste, liquid fuel or gaseous fuels.

Energy recovery unit designed to burn coal (coal) means an energy recovery unit that burns solid waste and at least 10 percent coal on a heat input basis on an annual average, either alone or in combination with liquid waste, liquid fuel or gaseous fuels.

Energy recovery unit designed to burn liquid waste materials and gas (liquid/gas) means an energy recovery unit that burns a liquid waste with liquid or gaseous fuels not combined with any solid fuel or waste materials.

Energy recovery unit designed to burn solid materials (solids) includes energy recovery units designed to burn coal and energy recovery units designed to burn biomass.

Fabric filter means an add-on air pollution control device used to capture particulate matter by filtering gas streams through filter media, also known as a baghouse.

Foundry sand thermal reclamation unit means a type of part reclamation unit that removes coatings that are on foundry sand. A foundry sand thermal reclamation unit is not an incinerator, a waste-burning kiln, an energy recovery unit or a small, remote incinerator under this subpart.

Incinerator means any furnace used in the process of combusting solid waste

(as defined by the Administrator in 40 CFR part 241) for the purpose of reducing the volume of the waste by removing combustible matter.

Incinerator designs include single chamber and two-chamber.

In-line coal mill means those coal mills using kiln exhaust gases in their process. Coal mills with a heat source other than the kiln or coal mills using exhaust gases from the clinker cooler alone are not an in-line coal mill.

In-line kiln/raw mill means a system in a Portland Cement production process where a dry kiln system is integrated with the raw mill so that all or a portion of the kiln exhaust gases are used to perform the drying operation of the raw mill, with no auxiliary heat source used. In this system the kiln is capable of operating without the raw mill operating, but the raw mill cannot operate without the kiln gases, and consequently, the raw mill does not generate a separate exhaust gas stream.

Kiln means an oven or furnace, including any associated preheater or precalciner devices, in-line raw mills, in-line coal mills, or alkali bypasses used for processing a substance by burning, firing, or drying. Kilns include cement kilns that produce clinker by heating limestone and other materials for subsequent production of Portland Cement. Because the alkali bypass, in-line raw mill, and in-line coal mill are considered an integral part of the kiln, the kiln emissions limits also apply to the exhaust of the alkali bypass, in-line raw mill, and in-line coal mill.

Laboratory analysis unit means units that burn samples of materials for the purpose of chemical or physical analysis. A laboratory analysis unit is not an incinerator, waste-burning kiln, an energy recovery unit or a small, remote incinerator under this subpart.

Load fraction means the actual heat input of an energy recovery unit divided by heat input during the performance test that established the minimum sorbent injection rate or minimum activated carbon injection rate, expressed as a fraction (e.g., for 50 percent load the load fraction is 0.5).

Low-level radioactive waste means waste material which contains radioactive nuclides emitting primarily beta or gamma radiation, or both, in concentrations or quantities that exceed applicable Federal or state standards for unrestricted release. Low-level radioactive waste is not high-level radioactive waste, spent nuclear fuel, or by-product material as defined by the Atomic Energy Act of 1954 (42 U.S.C. 2014(e)(2)).

Malfunction means any sudden, infrequent, and not reasonably

preventable failure of air pollution control equipment, process equipment, or a process to operate in a normal or usual manner. Failures that are caused, in part, by poor maintenance or careless operation are not malfunctions.

Minimum voltage or amperage means 90 percent of the lowest test-run average voltage or amperage to the electrostatic precipitator measured during the most recent particulate matter or mercury performance test demonstrating compliance with the applicable emission limits.

Modification or modified CISWI means a CISWI you have changed later than August 7, 2013, and that meets one of two criteria:

(1) The cumulative cost of the changes over the life of the unit exceeds 50 percent of the original cost of building and installing the CISWI (not including the cost of land) updated to current costs (current dollars). To determine what systems are within the boundary of the CISWI used to calculate these costs, see the definition of CISWI; and

(2) Any physical change in the CISWI or change in the method of operating it that increases the amount of any air pollutant emitted for which section 129 or section 111 of the Clean Air Act has established standards.

Municipal solid waste or municipal-type solid waste means household, commercial/retail, or institutional waste. Household waste includes material discarded by residential dwellings, hotels, motels, and other similar permanent or temporary housing. Commercial/retail waste includes material discarded by stores, offices, restaurants, warehouses, nonmanufacturing activities at industrial facilities, and other similar establishments or facilities. Institutional waste includes materials discarded by schools, by hospitals (nonmedical), by nonmanufacturing activities at prisons and government facilities, and other similar establishments or facilities. Household, commercial/retail, and institutional waste does include yard waste and refuse-derived fuel. Household, commercial/retail, and institutional waste does not include used oil; sewage sludge; wood pallets; construction, renovation, and demolition wastes (which include railroad ties and telephone poles); clean wood; industrial process or manufacturing wastes; medical waste; or motor vehicles (including motor vehicle parts or vehicle fluff).

Opacity means the degree to which emissions reduce the transmission of light and obscure the view of an object in the background.

Operating day means a 24-hour period between 12 midnight and the following midnight during which any amount of solid waste is combusted at any time in the CISWI.

Oxygen analyzer system means all equipment required to determine the oxygen content of a gas stream and used to monitor oxygen in the boiler or process heater flue gas, boiler/process heater, firebox, or other appropriate location. This definition includes oxygen trim systems and certified oxygen CEMS. The source owner or operator is responsible to install, calibrate, maintain, and operate the oxygen analyzer system in accordance with the manufacturer's recommendations.

Oxygen trim system means a system of monitors that is used to maintain excess air at the desired level in a combustion device over its operating range. A typical system consists of a flue gas oxygen and/or carbon monoxide monitor that automatically provides a feedback signal to the combustion air controller or draft controller.

Part reclamation unit means a unit that burns coatings off parts (e.g., tools, equipment) so that the parts can be reconditioned and reused.

Particulate matter means total particulate matter emitted from CISWI as measured by Method 5 of 40 CFR part 60, appendix A-3, or Method 29 of 40 CFR part 60, appendix A-8.

Pathological waste means waste material consisting of only human or animal remains, anatomical parts, and/or tissue, the bags/containers used to collect and transport the waste material, and animal bedding (if applicable).

Performance evaluation means the conduct of relative accuracy testing, calibration error testing, and other measurements used in validating the continuous monitoring system data.

Performance test means the collection of data resulting from the execution of a test method (usually three emission test runs) used to demonstrate compliance with a relevant emission standard as specified in the performance test section of the relevant standard.

Process change means any of the following physical or operational changes:

(1) A physical change (maintenance activities excluded) to the CISWI which may increase the emission rate of any air pollutant to which a standard applies;

(2) An operational change to the CISWI where a new type of non-hazardous secondary material is being combusted;

(3) A physical change (maintenance activities excluded) to the air pollution

control devices used to comply with the emission limits for the CISWI (e.g., replacing an electrostatic precipitator with a fabric filter); and

(4) An operational change to the air pollution control devices used to comply with the emission limits for the affected CISWI (e.g., change in the sorbent injection rate used for activated carbon injection).

Rack reclamation unit means a unit that burns the coatings off racks used to hold small items for application of a coating. The unit burns the coating overspray off the rack so the rack can be reused.

Raw mill means a ball or tube mill, vertical roller mill, or other size reduction equipment, that is not part of an in-line kiln/raw mill, used to grind feed to the appropriate size. Moisture may be added or removed from the feed during the grinding operation. If the raw mill is used to remove moisture from feed materials, it is also, by definition, a raw material dryer. The raw mill also includes the air separator associated with the raw mill.

Reconstruction means rebuilding a CISWI and meeting two criteria:

(1) The reconstruction begins on or after August 7, 2013; and

(2) The cumulative cost of the construction over the life of the incineration unit exceeds 50 percent of the original cost of building and installing the CISWI (not including land) updated to current costs (current dollars). To determine what systems are within the boundary of the CISWI used to calculate these costs, see the definition of CISWI.

Refuse-derived fuel means a type of municipal solid waste produced by processing municipal solid waste through shredding and size classification. This includes all classes of refuse-derived fuel including two fuels:

(1) Low-density fluff refuse-derived fuel through densified refuse-derived fuel; and

(2) Pelletized refuse-derived fuel.

Responsible official means one of the following:

(1) For a corporation: A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one or more manufacturing, production, or operating facilities applying for or subject to a permit and either:

(i) The facilities employ more than 250 persons or have gross annual sales or expenditures exceeding \$25 million (in second quarter 1980 dollars); or

(ii) The delegation of authority to such representatives is approved in advance by the permitting authority;

(2) For a partnership or sole proprietorship: A general partner or the proprietor, respectively;

(3) For a municipality, state, Federal, or other public agency: Either a principal executive officer or ranking elected official. For the purposes of this subpart, a principal executive officer of a Federal agency includes the chief executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., a Regional Administrator of EPA); or

(4) For affected facilities:

(i) The designated representative insofar as actions, standards, requirements, or prohibitions under title IV of the Clean Air Act or 40 CFR parts 72 through 78 are concerned; or

(ii) The designated representative for any other purposes under 40 CFR part 60.

Shutdown means, for incinerators and small, remote incinerators, the period of time after all waste has been combusted in the primary chamber.

Small, remote incinerator means an incinerator that combusts solid waste (as defined by the Administrator in 40 CFR part 241) and combusts 3 tons per day or less solid waste and is more than 25 miles driving distance to the nearest municipal solid waste landfill.

Soil treatment unit means a unit that thermally treats petroleum-contaminated soils for the sole purpose of site remediation. A soil treatment unit may be direct-fired or indirect fired. A soil treatment unit is not an incinerator, a waste-burning kiln, an energy recovery unit or a small, remote incinerator under this subpart.

Solid waste means the term solid waste as defined in § 241.2 of this chapter.

Solid waste incineration unit means a distinct operating unit of any facility which combusts any solid waste (as defined by the Administrator in 40 CFR part 241) material from commercial or industrial establishments or the general public (including single and multiple residences, hotels, and motels). This definition does not include incinerators or other units required to have a permit under section 3005 of the Solid Waste Disposal Act. The term “solid waste incineration unit” does not include:

(1) Materials recovery facilities (including primary or secondary smelters) which combust waste for the primary purpose of recovering metals;

(2) Qualifying small power production facilities, as defined in section 3(17)(C) of the Federal Power Act (16 U.S.C. 769(17)(C)), or qualifying cogeneration facilities, as defined in section 3(18)(B) of the Federal Power Act (16 U.S.C. 796(18)(B)), which burn homogeneous waste (such as units which burn tires or used oil, but not including refuse-derived fuel) for the production of electric energy or in the case of qualifying cogeneration facilities which burn homogeneous waste for the production of electric energy and steam or forms of useful energy (such as heat) which are used for industrial, commercial, heating or cooling purposes; or

(3) Air curtain incinerators provided that such incinerators only burn wood wastes, yard wastes, and clean lumber and that such air curtain incinerators comply with opacity limitations to be established by the Administrator by rule.

Space heater means a unit that meets the requirements of § 279.23 of this chapter. A space heater is not an incinerator, a waste-burning kiln, an energy recovery unit or a small, remote incinerator under this subpart.

Standard conditions, when referring to units of measure, means a temperature of 68 °F (20 °C) and a pressure of 1 atmosphere (101.3 kilopascals).

Startup period means, for incinerators and small, remote incinerators, the period of time between the activation of the system and the first charge to the unit.

Useful Thermal Energy means energy (i.e., steam, hot water, or process heat) that meets the minimum operating temperature and/or pressure required by any energy use system that uses energy provided by the affected energy recovery unit.

Waste-burning kiln means a kiln that is heated, in whole or in part, by combusting solid waste (as defined by the Administrator in 40 CFR part 241). Secondary materials used in Portland cement kilns shall not be deemed to be combusted unless they are introduced into the flame zone in the hot end of the kiln or mixed with the precalciner fuel.

Wet scrubber means an add-on air pollution control device that utilizes an aqueous or alkaline scrubbing liquor to collect particulate matter (including non-vaporous metals and condensed organics) and/or to absorb and neutralize acid gases.

Wood waste means untreated wood and untreated wood products, including tree stumps (whole or chipped), trees, tree limbs (whole or chipped), bark, sawdust, chips, scraps, slabs, millings, and shavings. Wood waste does not include:

(1) Grass, grass clippings, bushes, shrubs, and clippings from bushes and shrubs from residential, commercial/retail, institutional, or industrial sources as part of maintaining yards or other private or public lands;

(2) Construction, renovation, or demolition wastes; or

(3) Clean lumber.

TABLE 1 TO SUBPART IIIA OF PART 62—OPERATING LIMITS FOR WET SCRUBBERS

For these operating parameters	You must establish these operating limits	And monitor using these minimum frequencies		
		Data measure- ment	Data recording	Averaging time
Charge rate	Maximum charge rate	Continuous	Every hour	1. Daily (batch units) 2. 3-hour rolling (continuous and intermittent units) ¹ . 3-hour rolling ¹ .
Pressure drop across the wet scrubber or amperage to wet scrubber.	Minimum pressure drop or amperage.	Continuous	Every 15 minutes	3-hour rolling ¹ .
Scrubber liquor flow rate	Minimum flow rate	Continuous	Every 15 minutes	3-hour rolling ¹ .
Scrubber liquor pH	Minimum pH	Continuous	Every 15 minutes	3-hour rolling ¹ .

¹ Calculated each hour as the average of the previous 3 operating hours.

TABLE 2 TO SUBPART IIIA OF PART 62—TOXIC EQUIVALENCY FACTORS

Dioxin/furan congener	Toxic equivalency factor
2,3,7,8-tetrachlorinated dibenzo-p-dioxin	1
1,2,3,7,8-pentachlorinated dibenzo-p-dioxin	0.5
1,2,3,4,7,8-hexachlorinated dibenzo-p-dioxin	0.1
1,2,3,7,8,9-hexachlorinated dibenzo-p-dioxin	0.1
1,2,3,6,7,8-hexachlorinated dibenzo-p-dioxin	0.1
1,2,3,4,6,7,8-heptachlorinated dibenzo-p-dioxin	0.01
octachlorinated dibenzo-p-dioxin	0.001
2,3,7,8-tetrachlorinated dibenzofuran	0.1
2,3,4,7,8-pentachlorinated dibenzofuran	0.5
1,2,3,7,8-pentachlorinated dibenzofuran	0.05
1,2,3,4,7,8-hexachlorinated dibenzofuran	0.1
1,2,3,6,7,8-hexachlorinated dibenzofuran	0.1
1,2,3,7,8,9-hexachlorinated dibenzofuran	0.1
2,3,4,6,7,8-hexachlorinated dibenzofuran	0.1
1,2,3,4,6,7,8-heptachlorinated dibenzofuran	0.01
1,2,3,4,7,8,9-heptachlorinated dibenzofuran	0.01
octachlorinated dibenzofuran	0.001

TABLE 3 TO SUBPART IIIA OF PART 62—SUMMARY OF REPORTING REQUIREMENTS ¹

Report	Due date	Contents	Reference
A. Waste Management Plan.	No later than January 10, 2025, or the date you recommence burning solid waste, whichever is later.	Waste management plan	§ 62.14690a.
B. Initial Test Report ..	No later than 60 days following the initial performance test.	1. Complete test report for the initial performance test 2. The values for the site-specific operating limits. 3. Installation of bag leak detection systems for fabric filters.	§ 62.14695a.
C. Annual report	No later than 12 months following the submission of the initial test report. Subsequent reports are to be submitted no more than 12 months following the previous report.	1. Name and address 2. Statement and signature by responsible official. 3. Date of report. 4. Values for the operating limits. 5. Highest recorded 3-hour average and the lowest 3-hour average, as applicable, (or 30-day average, if applicable) for each operating parameter recorded for the calendar year being reported. 6. If a performance test was conducted during the reporting period, the results of the test. 7. If a performance test was not conducted during the reporting period, a statement that the requirements of § 62.14655a(a) were met. 8. Documentation of periods when all qualified CISWI operators were unavailable for more than 8 hours but less than 2 weeks. 9. If you are conducting performance tests once every 3 years consistent with § 62.14655a(a), the date of the last 2 performance tests, a comparison of the emission level you achieved in the last 2 performance tests to the 75 percent emission limit threshold required in § 62.14655a(a) and a statement as to whether there have been any operational changes since the last performance test that could increase emissions. 10. Any malfunction, deviation, or continuous monitoring system out of control periods information as specified in § 62.14705a(k) through (o). 11. Fuel input information for energy recovery unit subcategory verification as specified in § 62.14705a(p).	§§ 62.14700a and 62.14705a. Subsequent reports are to be submitted no more than 12 months following the previous report.
D. Emission Limitation or Operating Limit Deviation Report.	By August 1 of that year for data collected during the first half of the calendar year. By February 1 of the following year for data collected during the second half of the calendar year.	1. Dates and times of deviations 2. Averaged and recorded data for these dates. 3. Duration and causes for each deviation and the corrective actions taken. 4. Copy of operating limit monitoring data and any test reports. 5. Dates, times, and causes for monitor downtime incidents.	§§ 62.14710a and 62.14715a.

TABLE 3 TO SUBPART IIIA OF PART 62—SUMMARY OF REPORTING REQUIREMENTS ¹—Continued

Report	Due date	Contents	Reference
E. Qualified Operator Deviation Notification.	Within 10 days of deviation.	1. Statement of cause of deviation 2. Description of efforts to have an accessible qualified operator. 3. The date a qualified operator will be accessible.	§ 62.14720a(a)(1)
F. Qualified Operator Deviation Status Report.	Every 4 weeks following deviation.	1. Description of efforts to have an accessible qualified operator 2. The date a qualified operator will be accessible. 3. Request for approval to continue operation.	§ 62.14720a(a)(2).
G. Qualified Operator Deviation Notification of Resumed Operation.	Prior to resuming operation.	Notification that you are resuming operation	§ 62.14720a(b).

¹ This table is only a summary, see the referenced sections of this part for the complete requirements.

TABLE 4 TO SUBPART IIIA OF PART 62—MODEL RULE—EMISSION LIMITATIONS THAT APPLY TO INCINERATORS ON AND AFTER JANUARY 10, 2025

For the air pollutant	You must meet this emission limitation ¹	Using this averaging time ²	And determining compliance using this method ²
Cadmium	0.0026 milligrams per dry standard cubic meter.	3-run average (collect a minimum volume of 2 dry standard cubic meters).	Performance test (Method 29 of appendix A–8 to 40 CFR part 60). Use inductively coupled plasma mass spectrometry (ICPMS) for the analytical finish.
Carbon monoxide	17 parts per million dry volume.	3-run average (1 hour minimum sample time per run).	Performance test (Method 10 of appendix A–4 to 40 CFR part 60).
Dioxins/furans (total mass basis).	4.6 nanograms per dry standard cubic meter.	3-run average (collect a minimum volume of 2 dry standard cubic meters).	Performance test (Method 23 of appendix A–7 to 40 CFR part 60).
Dioxins/furans (toxic equivalency basis).	0.13 nanograms per dry standard cubic meter.	3-run average (collect a minimum volume of 2 dry standard cubic meters).	Performance test (Method 23 of appendix A–7 to 40 CFR part 60).
Hydrogen chloride	29 parts per million dry volume.	3-run average (for Method 26 of appendix A–8 to 40 CFR part 60, collect a minimum volume of 60 liters per run; for Method 26A of appendix A–8 to 40 CFR part 60, collect a minimum volume of 1 dry standard cubic meter per run).	Performance test (Method 26 or 26A of appendix A–8 to 40 CFR part 60).
Lead	0.015 milligrams per dry standard cubic meter ² .	3-run average (collect a minimum volume of 2 dry standard cubic meters).	Performance test (Method 29 of appendix A–8 to 40 CFR part 60). Use ICPMS for the analytical finish.
Mercury	0.0048 milligrams per dry standard cubic meter.	3-run average (for Method 29 of appendix A–8 to 40 CFR part 60 an ASTM D6784–24, ³ collect a minimum volume of 2 dry standard cubic meters per run; for Method 30B of appendix A–8 to 40 CFR part 60, collect a minimum sample as specified in Method 30B).	Performance test (Method 29 or 30B of appendix A–8 to 40 CFR part 60) or ASTM D6784–24. ^{3,4}
Nitrogen oxides	53 parts per million dry volume.	3-run average (for Method 7E of appendix A–4 to 40 CFR part 60, 1 hour minimum sample time per run).	Performance test (Method 7 or 7E of appendix A–4 to 40 CFR part 60).
Particulate matter filterable.	34 milligrams per dry standard cubic meter.	3-run average (collect a minimum volume of 1 dry standard cubic meter).	Performance test (Method 5 of appendix A–3 to 40 CFR part 60 or Method 29 of appendix A–8 to 40 CFR part 60).
Sulfur dioxide	11 parts per million dry volume.	3-run average (1 hour minimum sample time per run).	Performance test (Method 6 or 6c of appendix A–4 to 40 CFR part 60) or ANSI/ASME PTC–19.10–1981. ^{3,5}
Fugitive ash	Visible emissions for no more than 5% of the hourly observation period.	Three 1-hour observation periods	Visible emission test (Method 22 of appendix A–7 to 40 CFR part 60).

¹ All emission limitations are measured at 7 percent oxygen, dry basis at standard conditions. For dioxins/furans, you must meet either the total mass basis limit or the toxic equivalency basis limit.

² In lieu of performance testing, you may use a CEMS or, for mercury, an integrated sorbent trap monitoring system, to demonstrate initial and continuing compliance with an emissions limit, as long as you comply with the CEMS or integrated sorbent trap monitoring system requirements applicable to the specific pollutant in §§ 62.14640a and 62.14665a. As prescribed in § 62.14640a(u), if you use a CEMS or integrated sorbent trap monitoring system to demonstrate compliance with an emissions limit, your averaging time is a 30-day rolling average of 1-hour arithmetic average emission concentrations.

³ The Director of the Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. ⁴ ASTM D6784–24 Standard Test Method for Elemental, Oxidized, Particle-Bound and Total Mercury in Flue Gas Generated from Coal-Fired Stationary Sources (Ontario Hydro Method), [approved March 1, 2024]. ASTM International, 100 Barr Harbor Drive, Post Office Box C700, West Conshohocken, PA 19428–2959; (Phone: 1–877–909–2786; website: <https://www.astm.org/>).

⁵ ANSI/ASME PTC 19.10–1981, Flue and Exhaust Gas Analyses [Part 10, Instruments and Apparatus]. American Society of Mechanical Engineers (ASME), Two Park Avenue, New York, NY 10016–5990 (Phone: 1–800–843–2763; website: <https://www.asme.org/>).

TABLE 5 TO SUBPART IIIA OF PART 62—MODEL RULE—EMISSION LIMITATIONS THAT APPLY TO ENERGY RECOVERY UNITS AFTER JANUARY 10, 2025

For the air pollutant	You must meet this emission limitation ¹		Using this averaging time ²	And determining compliance using this method ²
	Liquid/gas	Solids		
Cadmium	0.023 milligrams per dry standard cubic meter.	Biomass—0.0014 milligrams per dry standard cubic meter. Coal—0.0017 milligrams per dry standard cubic meter.	3-run average (collect a minimum volume of 2 dry standard cubic meters).	Performance test (Method 29 of appendix A–8 to 40 CFR part 60). Use ICPMS for the analytical finish.
Carbon monoxide ..	35 parts per million dry volume.	Biomass—260 parts per million dry volume. Coal—95 parts per million dry volume.	3-run average (1 hour minimum sample time per run).	Performance test (Method 10 of appendix A–4 to 40 CFR part 60).
Dioxins/furans (total mass basis).	2.9 nanograms per dry standard cubic meter.	Biomass—0.52 nanograms per dry standard cubic meter. ² Coal—5.1 nanograms per dry standard cubic meter.	3-run average (collect a minimum volume of 4 dry standard cubic meter).	Performance test (Method 23 of appendix A–7 to 40 CFR part 60).
Dioxins/furans (toxic equivalency basis).	0.32 nanograms per dry standard cubic meter.	Biomass—0.12 nanograms per dry standard cubic meter. Coal—0.075 nanograms per dry standard cubic meter. ²	3-run average (collect a minimum volume of 4 dry standard cubic meters).	Performance test (Method 23 of appendix A–7 to 40 CFR part 60).
Hydrogen chloride ..	14 parts per million dry volume.	Biomass—0.20 parts per million dry volume. Coal—58 parts per million dry volume.	3-run average (for Method 26 of appendix A–8 to 40 CFR part 60, collect a minimum of 120 liters; for Method 26A of appendix A–8 to 40 CFR part 60, collect a minimum volume of 1 dry standard cubic meter).	Performance test (Method 26 or 26A of appendix A–8 to 40 CFR part 60).
Lead	0.096 milligrams per dry standard cubic meter.	Biomass—0.014 milligrams per dry standard cubic meter. ² Coal—0.057 milligrams per dry standard cubic meter.	3-run average (collect a minimum volume of 2 dry standard cubic meters).	Performance test (Method 29 of appendix A–8 to 40 CFR part 60). Use ICPMS for the analytical finish.
Mercury	0.0024 milligrams per dry standard cubic meter.	Biomass—0.0022 milligrams per dry standard cubic meter. Coal—0.013 milligrams per dry standard cubic meter.	3-run average (for Method 29 of appendix A–8 to 40 CFR part 60 and ASTM D6784–24, ³ collect a minimum volume of 2 dry standard cubic meters per run; for Method 30B of appendix A–8 to 40 CFR part 60, collect a minimum sample as specified in Method 30B).	Performance test (Method 29 or 30B of appendix A–8 to 40 CFR part 60) or ASTM D6784–24. ^{3,4}
Nitrogen oxides	76 parts per million dry volume.	Biomass—290 parts per million dry volume. Coal—460 parts per million dry volume.	3-run average (for Method 7E of appendix A–4 to 40 CFR part 60, 1 hour minimum sample time per run).	Performance test (Method 7 or 7E of appendix A–4 to 40 CFR part 60).
Particulate matter filterable.	110 milligrams per dry standard cubic meter.	Biomass—11 milligrams per dry standard cubic meter. Coal—130 milligrams per dry standard cubic meter.	3-run average (collect a minimum volume of 1 dry standard cubic meter).	Performance test (Method 5 of appendix A–3 to 40 CFR part 60 or Method 29 of appendix A–8 to 40 CFR part 60) if the unit has an annual average heat input rate less than or equal to 250 MMBtu/hr; or PM CPMS (as specified in § 62.14670(x)) if the unit has an annual average heat input rate greater than 250 MMBtu/hr.
Sulfur dioxide	720 parts per million dry volume.	Biomass—7.3 parts per million dry volume. Coal—850 parts per million dry volume.	3-run average (1 hour minimum sample time per run).	Performance test (Method 6 or 6c of appendix A–4 to 40 CFR part 60); or ANSI/ASME PTC–19.10–1981. ^{3,5}
Fugitive ash	Visible emissions for no more than 5 percent of the hourly observation period.	Visible emissions for no more than 5 percent of the hourly observation period.	Three 1-hour observation periods	Visible emission test (Method 22 of appendix A–7 to 40 CFR part 60).

¹ All emission limitations (except for opacity) are measured at 7 percent oxygen, dry basis at standard conditions. For dioxins/furans, you must meet either the total mass basis limit or the toxic equivalency basis limit.

² In lieu of performance testing, you may use a CEMS or, for mercury, an integrated sorbent trap monitoring system, to demonstrate initial and continuing compliance with an emissions limit, as long as you comply with the CEMS or integrated sorbent trap monitoring system requirements applicable to the specific pollutant in §§ 62.14640a and 62.14665a. As prescribed in § 62.14640a(u), if you use a CEMS or integrated sorbent trap monitoring system to demonstrate compliance with an emissions limit, your averaging time is a 30-day rolling average of 1-hour arithmetic average emission concentrations.

³ The Director of the Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. TABLE 6 TO SUBPART IIIA OF PART 62—MODEL RULE—EMISSION LIMITATIONS THAT APPLY TO WASTE-BURNING KILNS AFTER JANUARY 10, 2025

For the air pollutant	You must meet this emission limitation ¹	Using this averaging time ²	And determining compliance using this method ^{2,3}
Cadmium	0.0014 milligrams per dry standard cubic meter ² .	3-run average (collect a minimum volume of 2 dry standard cubic meters).	Performance test (Method 29 of appendix A–8 to 40 CFR part 60).
Carbon monoxide	110 (long kilns)/790 (preheater/precalciner) parts per million dry volume.	3-run average (1 hour minimum sample time per run).	Performance test (Method 10 of appendix A–4 to 40 CFR part 60).
Dioxins/furans (total mass basis).	1.3 nanograms per dry standard cubic meter.	3-run average (collect a minimum volume of 4 dry standard cubic meters).	Performance test (Method 23 of appendix A–7 to 40 CFR part 60).
Dioxins/furans (toxic equivalency basis).	0.075 nanograms per dry standard cubic meter ² .	3-run average (collect a minimum volume of 4 dry standard cubic meters).	Performance test (Method 23 of appendix A–7 to 40 CFR part 60).
Hydrogen chloride	3.0 parts per million dry volume ² .	3-run average (collect a minimum volume of 1 dry standard cubic meter) or 30-day rolling average if HCl CEMS is being used.	If a wet scrubber or dry scrubber is used, performance test (Method 321 of appendix A to 40 CFR part 63). If a wet scrubber or dry scrubber is not used, HCl CEMS as specified in § 62.14670(j).
Lead	0.014 milligrams per dry standard cubic meter ² .	3-run average (collect a minimum volume of 2 dry standard cubic meters).	Performance test (Method 29 of appendix A–8 to 40 CFR part 60).
Mercury	0.011 milligrams per dry standard cubic meter. Or 58 pounds/million tons of clinker.	30-day rolling average	Mercury CEMS or integrated sorbent trap monitoring system (performance specification 12A or 12B, respectively, of appendix B to 40 CFR part 60 and procedure 5 of appendix F to 40 CFR part 60), as specified in § 62.14670(j).
Nitrogen oxides	630 parts per million dry volume.	3-run average (for Method 7E of appendix A–4 to 40 CFR part 60, 1 hour minimum sample time per run).	Performance test (Method 7 or 7E of appendix A–4 to 40 CFR part 60).
Particulate matter filterable.	13.5 milligrams per dry standard cubic meter.	30-day rolling average	PM CPMS (as specified in § 62.14670(x)).
Sulfur dioxide	600 parts per million dry volume.	3-run average (for Method 6 of appendix A–4 to 40 CFR part 60, collect a minimum of 20 liters; for Method 6C of appendix A–4 to 40 CFR part 60, 1 hour minimum sample time per run).	Performance test (Method 6 or 6c of appendix A–4 to 40 CFR part 60) or ANSI/ASME PTC–19.10–1981. ⁴

¹ All emission limitations are measured at 7 percent oxygen (except for CEMS and integrated sorbent trap monitoring system data during start-up and shutdown), dry basis at standard conditions. For dioxins/furans, you must meet either the total mass basis limit or the toxic equivalency basis limit.

² In lieu of performance testing, you may use a CEMS or, for mercury, an integrated sorbent trap monitoring system, to demonstrate initial and continuing compliance with an emissions limit, as long as you comply with the CEMS or integrated sorbent trap monitoring system requirements applicable to the specific pollutant in §§ 62.14640a and 62.14665a. As prescribed in § 62.14640a(u), if you use a CEMS or integrated sorbent trap monitoring system to demonstrate compliance with an emissions limit, your averaging time is a 30-day rolling average of 1-hour arithmetic average emission concentrations.

³ Alkali bypass and in-line coal mill stacks are subject to performance testing only, as specified in § 62.14640a(y)(3). They are not subject to the CEMS, integrated sorbent trap monitoring system, or CPMS requirements that otherwise may apply to the main kiln exhaust.

⁴ ANSI/ASME PTC 19.10–1981, Flue and Exhaust Gas Analyses [Part 10, Instruments and Apparatus] is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. TABLE 7 TO SUBPART IIIA OF PART 62—MODEL RULE—EMISSION LIMITATIONS THAT APPLY TO SMALL, REMOTE INCINERATORS AFTER JANUARY 10, 2025

For the air pollutant	You must meet this emission limitation ¹	Using this averaging time ²	And determining compliance using this method ²
Cadmium	0.95 milligrams per dry standard cubic meter.	3-run average (collect a minimum volume of 1 dry standard cubic meters per run).	Performance test (Method 29 of appendix A–8 to 40 CFR part 60).
Carbon monoxide	64 parts per million dry volume.	3-run average (1 hour minimum sample time per run).	Performance test (Method 10 of appendix A–4 to 40 CFR part 60).

TABLE 7 TO SUBPART IIIA OF PART 62—MODEL RULE—EMISSION LIMITATIONS THAT APPLY TO SMALL, REMOTE INCINERATORS AFTER JANUARY 10, 2025—Continued

For the air pollutant	You must meet this emission limitation ¹	Using this averaging time ²	And determining compliance using this method ²
Dioxins/furans (total mass basis).	4,400 nanograms per dry standard cubic meter.	3-run average (collect a minimum volume of 1 dry standard cubic meters per run).	Performance test (Method 23 of appendix A–7 to 40 CFR part 60).
Dioxins/furans (toxic equivalency basis).	180 nanograms per dry standard cubic meter.	3-run average (collect a minimum volume of 1 dry standard cubic meters).	Performance test (Method 23 of appendix A–7 to 40 CFR part 60).
Fugitive ash	Visible emissions for no more than 5 percent of the hourly observation period.	Three 1-hour observation periods	Visible emissions test (Method 22 of appendix A–7 to 40 CFR part 60).
Hydrogen chloride	300 parts per million dry volume.	3-run average (for Method 26 of appendix A–8 to 40 CFR part 60, collect a minimum volume of 120 liters per run; for Method 26A of appendix A–8 to 40 CFR part 60, collect a minimum volume of 1 dry standard cubic meter per run).	Performance test (Method 26 or 26A of appendix A–8 to 40 CFR part 60).
Lead	2.1 milligrams per dry standard cubic meter.	3-run average (collect a minimum volume of 1 dry standard cubic meters).	Performance test (Method 29 of appendix A–8 to 40 CFR part 60). Use ICPMS for the analytical finish.
Mercury	0.0053 milligrams per dry standard cubic meter.	3-run average (for Method 29 of appendix A–8 to 40 CFR part 60 and ASTM D6784–24, ³ collect a minimum volume of 2 dry standard cubic meters per run; for Method 30B of appendix A–8 to 40 CFR part 60, collect a minimum sample as specified in Method 30B).	Performance test (Method 29 or 30B of appendix A–8 to 40 CFR part 60) or ASTM D6784–24. ^{3,4}
Nitrogen oxides	190 parts per million dry volume.	3-run average (for Method 7E of appendix A–4 to 40 CFR part 60, 1 hour minimum sample time per run).	Performance test (Method 7 or 7E of appendix A–4 to 40 CFR part 60).
Particulate matter (filterable).	270 milligrams per dry standard cubic meter.	3-run average (collect a minimum volume of 1 dry standard cubic meters).	Performance test (Method 5 of appendix A–3 to 40 CFR part 60 or Method 29 of appendix A–8 to 40 CFR part 60).
Sulfur dioxide	150 parts per million dry volume.	3-run average (for Method 6 of appendix A–4 to 40 CFR part 60, collect a minimum of 20 liters per run; for Method 6C of appendix A–4 to 40 CFR part 60, 1 hour minimum sample time per run).	Performance test (Method 6 or 6c of appendix A–4 to 40 CFR part 60); or ANSI/ASME PTC–19.10–1981. ^{3,5}

¹ All emission limitations (except for opacity) are measured at 7 percent oxygen, dry basis at standard conditions. For dioxins/furans, you must meet either the total mass basis limit or the toxic equivalency basis limit.

² In lieu of performance testing, you may use a CEMS or, for mercury, an integrated sorbent trap monitoring system, to demonstrate initial and continuing compliance with an emissions limit, as long as you comply with the CEMS or integrated sorbent trap monitoring system requirements applicable to the specific pollutant in §§ 62.14640a and 62.14665a. As prescribed in § 62.14640a(u), if you use a CEMS or integrated sorbent trap monitoring system to demonstrate compliance with an emissions limit, your averaging time is a 30-day rolling average of 1-hour arithmetic average emission concentrations.

Part IV

Department of the Treasury

Internal Revenue Service

26 CFR Part 1

Taxable Income or Loss and Currency Gain or Loss With Respect to a
Qualified Business Unit; Final Rule

DEPARTMENT OF THE TREASURY**Internal Revenue Service****26 CFR Part 1**

[TD 10016]

RIN 1545–BO07

Taxable Income or Loss and Currency Gain or Loss With Respect to a Qualified Business Unit**AGENCY:** Internal Revenue Service (IRS), Treasury.**ACTION:** Final rule.

SUMMARY: This document contains final regulations relating to the determination of taxable income or loss and foreign currency gain or loss with respect to a qualified business unit. These final regulations include an election to treat all items of a qualified business unit as marked items (subject to a loss suspension rule), an election to recognize all foreign currency gain or loss with respect to a qualified business unit on an annual basis, and a new transition rule.

DATES: *Effective date:* The final regulations are effective December 10, 2024.

Applicability dates: For dates of applicability, see § 1.987–15.

FOR FURTHER INFORMATION CONTACT: Concerning the final regulations generally, Adam G. Province at (865) 329–4546; concerning the character and source of section 987 gain or loss, Larry Pounders at (202) 317–5465; concerning consolidated groups, Jeremy Aron-Dine at (202) 317–6847 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:**Authority**

This document contains additions and amendments to 26 CFR part 1 (Income Tax Regulations) addressing the application of section 987 of the Internal Revenue Code (Code) and related provisions (the “final regulations”). The additions and amendments are issued under sections 987, 989, and 1502, pursuant to the express delegations of authority provided under those sections. The express delegations relied upon are referenced in the Background section of this preamble and in the Summary of Comments and Explanation of Revisions describing the individual sections of the final regulations. The final regulations are also issued under the express delegation of authority under section 7805 of the Code.

Background

This document contains final regulations under section 987 of the Code and related provisions under sections 861, 985 through 989, and 1502 of the Code. Section 987 applies to any taxpayer that has a qualified business unit (“QBU”) with a functional currency other than the dollar. Section 987(1) and (2) provide rules for determining and translating taxable income or loss (“section 987 taxable income or loss”) with respect to the QBU. In addition, foreign currency gain or loss must be determined under section 987(3) (“section 987 gain or loss”), which requires proper adjustments (as prescribed by the Secretary) for transfers of property between QBUs of the taxpayer having different functional currencies.

Sections 987 and 989 provide several explicit grants of regulatory authority. Section 987(3) directs the Secretary to prescribe the proper adjustments needed to determine the taxable income of the owner of a section 987 QBU. Those adjustments include (but are not limited to) rules for sourcing section 987 gain or loss recognized under section 987(3)(B). Similarly, section 987(2) provides that the income of a QBU is translated at the “appropriate” exchange rate. Section 989(b)(4) provides that the appropriate exchange rate generally is the average rate for the taxable year, “except as provided in regulations.”

Section 989(c) directs the Secretary to “prescribe such regulations as may be necessary or appropriate to carry out the purposes of this subpart.”¹ The grant of authority in section 989(c) includes regulations limiting the recognition of foreign currency loss on certain remittances from QBUs, providing for the appropriate treatment of related party transactions (including transactions between QBUs of the same taxpayer), and setting forth procedures for determining the average exchange rate for any period. Section 989(c)(2), (5), and (6).

On December 8, 2016, the Department of the Treasury (“Treasury Department”) and the Internal Revenue Service (“IRS”) published Treasury Decision 9794, which contained final regulations under sections 861, 985, 987, 988, and 989 (the “2016 final regulations”), in the **Federal Register** (81 FR 88806). The same day, the Treasury Department and the IRS published Treasury Decision 9795, which contained temporary regulations under sections 987 and 988 (the “2016

temporary regulations”), in the **Federal Register** (81 FR 88854) and published a notice of proposed rulemaking (REG–128276–12, 81 FR 88882) (the “2016 proposed regulations”) in the **Federal Register** by cross-reference to the temporary regulations. On May 13, 2019, the Treasury Department and the IRS published Treasury Decision 9857, which contained final regulations under section 987 (the “2019 final regulations”), in the **Federal Register** (84 FR 20790).

On November 14, 2023, the Treasury Department and the IRS published proposed regulations (REG–132422–17) under sections 861, 985, 987, 988, 989, and 1502 of the Code (the “2023 proposed regulations”) in the **Federal Register** (88 FR 78134). The same day, the Treasury Department and the IRS also published a notice in the **Federal Register** (88 FR 77921) that reopened the comment period for the 2016 proposed regulations.

All written comments received in response to the 2016 proposed regulations and the 2023 proposed regulations are available at <https://www.regulations.gov> or upon request. A public hearing on the 2023 proposed regulations was not held because there were no requests to speak.

Concurrently with the publication of the final regulations, the Treasury Department and the IRS are publishing in the proposed rule section of this edition of the **Federal Register** (RIN 1545–BR37) a notice of proposed rulemaking providing additional proposed regulations under section 987 (REG–117213–24) (the “2024 proposed regulations”).

Summary of Comments and Explanation of Revisions**I. Overview**

The Treasury Department and the IRS received a number of written comments in response to the 2016 proposed regulations and the 2023 proposed regulations. The comments, and the revisions made in response to those comments, are summarized in this Summary of Comments and Explanation of Revisions.

The final regulations retain the basic approach and structure of the 2023 proposed regulations, with the revisions described in this Summary of Comments and Explanation of Revisions.

II. Comments and Changes to Proposed § 1.987–1: Scope, Definitions, and Special Rules

Proposed § 1.987–1 would provide rules regarding the scope of the

¹ The reference to “this subpart” refers to subpart J of part III of subchapter N of chapter 1 of the Code, which includes section 987.

regulations under section 987 (“section 987 regulations”), including which entities are subject to the regulations, rules relating to elections under section 987, and other rules.

A. Scope

Under proposed § 1.987–1(b)(1), the section 987 regulations would apply to all taxpayers, subject to a de minimis rule for pass-through entities with minimal U.S. ownership, but they would not apply to foreign individuals or foreign corporations that either are not controlled foreign corporations (“CFCs”) or are CFCs in which no United States shareholders (“U.S. shareholders”) own (within the meaning of section 958(a)) stock. In contrast to the 2016 final regulations, the 2023 proposed regulations would not provide an exception for banks, insurance companies, leasing companies, finance coordination centers, regulated investment companies, or real estate investment trusts (“specified entities”). The preamble to the 2023 proposed regulations explains that the current rate election and annual recognition election are expected to provide additional flexibility for specified entities to apply the section 987 regulations. 88 FR 78145. Taxpayers that make a current rate election would treat all assets and liabilities attributable to a section 987 QBU as marked items, and thus would not be required to track historic exchange rates. Taxpayers that make an annual recognition election would recognize all unrecognized section 987 gain or loss on an annual basis and would not be required to calculate the amount of a remittance with respect to a section 987 QBU under § 1.987–5. *See* parts II and IV of the Explanation of Provisions in the preamble to the 2023 proposed regulations. 88 FR 78138 through 78139, 78141 through 78143. In addition, including specified entities in the scope of the section 987 regulations is necessary to provide these entities with sufficient guidance under section 987 and to provide a consistent set of rules applicable to all taxpayers.

1. Specified Entities

Comments recommended that specified entities be excluded from the application of the section 987 regulations. The comments asserted that additional rules are needed to facilitate the application of the section 987 regulations to these entities. For example, according to the comments, it is unclear whether insurance reserves should be treated as marked items or historic items. A comment also noted that bank branches often engage in high volumes of intercompany transactions

that could be difficult to account for under the section 987 regulations.

The Treasury Department and the IRS have determined that the final regulations can be applied by specified entities in an administrable manner and that excluding specified entities from the scope of the section 987 regulations would not provide sufficient guidance to ensure that these entities are using an appropriate method to apply section 987. Moreover, section 987 and its legislative history give no indication that Congress intended for banks, insurance companies, and other specified entities to be treated differently from other taxpayers for this purpose. Accordingly, specified entities are subject to the final regulations. However, the final regulations contain modifications intended to facilitate application of the section 987 regulations to these entities. *See* parts II.B (rules relating to insurance companies), V.B (hedging transactions), and VI (modifications to annual remittance rules to reduce the burden of tracking disregarded transfers) of this Summary of Comments and Explanation of Revisions.

2. Partnerships and Certain Other Entities

One comment was received relating to the application of section 987 to partnerships, and the Treasury Department and the IRS continue to study this issue. The Treasury Department and the IRS have determined that, without additional guidance, the section 987 regulations in their entirety could not be applied to partnerships in an administrable way. Accordingly, the final regulations generally apply only with respect to corporations and individuals. However, as discussed in part VIII of this Summary of Comments and Explanation of Revisions, certain parts of the section 987 regulations (including the rules relating to suspension of section 987 loss and recognition of suspended section 987 loss) are applicable to partnerships and S corporations.

The section 987 regulations do not apply to trusts or estates (though trusts and estates can be subject to section 987) because additional guidance may be needed to apply section 987 to these entities. In particular, the Treasury Department and the IRS are studying whether specific rules are needed to address the apportionment of section 987 gain or loss between the estate or non-grantor trust and the beneficiaries or whether existing rules under section 643(a) (defining distributable net income of an estate or trust) sufficiently address this issue. In addition, specific

rules may be needed to address a beneficiary’s application of section 987 with respect to an estate or non-grantor trust that uses a different functional currency (which creates a separate layer of currency exposure). The Treasury Department and the IRS anticipate providing rules applicable to trusts and estates in future guidance.

3. Application to CFCs

The final regulations apply to individuals and corporations that are United States persons (“U.S. persons”) and to CFCs in which U.S. shareholders own stock (directly or indirectly within the meaning of section 958(a)). *See* § 1.987–1(b)(1). As explained in parts II.A.2 and VIII of this Summary of Comments and Explanation of Revisions, the Treasury Department and the IRS are continuing to study the appropriate rules for applying section 987 to partnerships.

A comment recommended that the scope of the section 987 regulations be limited to section 987 QBUs owned directly by U.S. persons or by partnerships with partners that are U.S. persons. According to the comment, this would reduce the compliance burden on taxpayers and prevent the selective recognition of section 987 losses. The comment further asserted that, based on the legislative history of section 987(3), the statute primarily was intended to address section 987 QBUs owned by U.S. persons.

The comment suggested that simplified mechanics under section 986(c) could be used to account for currency gain or loss arising between the time earnings are generated by a section 987 QBU and the time of distribution, but the comment did not explain how those mechanics would operate. Section 986(c) requires a U.S. shareholder to recognize foreign currency gain or loss with respect to distributions of previously taxed earnings and profits attributable to movements in exchange rates between the date of the income inclusion giving rise to the previously taxed earnings and profits and the distribution of the previously taxed earnings and profits.

The final regulations do not adopt the recommendations made by the comment. It is necessary to apply section 987(1) and (2) to foreign entities because many aspects of the income tax rules effectively require that the determination of a taxpayer’s items of income, gain, deduction, and loss be made in a single currency. In addition, it is not clear how a rule similar to section 986(c) could be applied to section 987 QBUs in lieu of section 987(3). Because a CFC’s earnings and

profits are determined in the CFC's functional currency under section 986(b), currency gain or loss on previously taxed earnings and profits arises under section 986(c) when a CFC's functional currency appreciates or depreciates against the U.S. dollar between the time the inclusion is computed and the time the CFC distributes the previously taxed earnings and profits. However, section 986(c) would not account for changes in value of a section 987 QBU's functional currency (measured against the functional currency of its CFC-owner or the U.S. shareholder) because earnings and profits are not tracked in the section 987 QBU's functional currency.

However, the Treasury Department and the IRS are studying whether there are instances in which it would be possible to simplify the application of section 987 by modifying the application of section 987(3) (and the related regulations, including §§ 1.987-4 through 1.987-6, 1.987-8, and 1.987-11 through 1.987-13) to certain entities. *See* part II.B of the Comments and Request for Public Hearing section in the preamble to the 2024 proposed regulations.

B. Special Rules for Insurance Companies

1. Insurance Reserves

A comment requested clarification as to whether insurance reserves are treated as marked items. The comment noted that the definition of a marked item under the proposed regulations is tied to the treatment of an asset or liability under section 988 and that the application of section 988 to insurance reserves is not clear. The Treasury Department and the IRS agree that treating insurance reserves as marked items would facilitate the application of section 987 to insurance companies and would be consistent with the treatment of liabilities outside the insurance context. Accordingly, § 1.987-1(d)(1)(iv) includes insurance reserves in the definition of marked items.

2. Assets That Support Variable Contracts

a. Background on Variable Contracts

In general, variable contracts are life insurance and annuity contracts under which the amount of the insurance company's obligation depends, at least in part, on the value of the assets held in a separate account that is segregated from the general asset accounts of the insurance company. Provided certain requirements are met, under section 817(c), an insurance company that issues variable contracts (as defined in

section 817(d)) must separately account for the various income, exclusion, deduction, asset, reserve, and other liability items properly attributable to such variable contracts.

As a general matter, section 807 provides that increases in the life insurance reserves of a life insurance company are deductible and decreases in the life insurance reserves are includible in income. However, section 817(a) provides that for purposes of determining the net decrease or increase in reserves under section 807(a) or (b), amounts subtracted from or added to separate account reserves by reason of the depreciation or appreciation of separate account assets (whether or not realized) are disregarded. Under section 817(a), deductions for items described in section 805(a)(1) and (6), which include claims and benefits accrued and losses incurred during the taxable year on insurance and annuity contracts, are similarly adjusted for the depreciation or appreciation of separate account assets. Additionally, section 817(b) provides that the basis of each separate account asset is decreased by the amount of depreciation, or increased by the amount of appreciation, of separate account assets (whether or not realized), to the extent separate account reserves are adjusted for such depreciation or appreciation under section 817(a). Generally, the result is a permanent elimination of any effects on company-level taxable income that would otherwise result from the change in the value of the separate account assets.

Sometimes, however, an insurance company may provide guarantees with respect to variable contracts with separate accounts that could require reserves to be held in a company's general account. Section 817(d)(3) recognizes this situation and states that "obligations under such guarantee which exceed obligations under the contract without regard to such guarantee shall be accounted for as part of the company's general account." Such guarantees might involve a limit on losses or guarantees of minimum crediting rates. These amounts are not liabilities of the separate account.

Similarly, CFCs generally must follow the Code and subchapter L rules in determining their insurance income, with minor modifications for determining: (i) whether a contract is a life insurance or annuity contract, and (ii) the amount of insurance reserves. For example, U.S. tax requirements in sections 72(s), 101(f), 817(h), and 7702 do not apply so long as no policyholder, annuitant, insured, or beneficiary under the contract is a United States person and the contract is regulated as a life

insurance or annuity contract in the issuer's home country. In addition, section 954(i) modifies the subchapter L computation of insurance reserves and its application to insurance contracts issued by CFCs. *See also* section 953(b)(3).

b. Treatment of Assets That Support Variable Contracts for Purposes of Section 987

A comment recommended that assets which support variable annuity and life insurance contracts be treated as marked items. The comment explained that these assets are required by law to be segregated from the general asset accounts of the insurance company in a separate account, and the related contracts reflect the investment return and market value of the separate account assets.

The comment asserted that both the separate account assets and the related insurance reserves should be treated as marked items in order to align the treatment of these assets and liabilities for purposes of section 987. Similarly, the comment recommended that these assets and liabilities should be treated as attributable to an eligible QBU if they are reflected on the books and records of the eligible QBU, even if they would otherwise be excluded under § 1.987-2(b)(2) (for example, if the separate account assets consist of stock or partnership interests).

The final regulations provide that separate account assets are treated as marked items. *See* § 1.987-1(d)(1)(v). In addition, the final regulations carve out separate account assets from the exclusions in § 1.987-2(b)(2), so that separate account assets reflected on the books and records of an eligible QBU generally will be attributable to the eligible QBU. *See* § 1.987-2(b)(2)(ii). These rules are expected to facilitate matching treatment of separate account assets and the related insurance contracts, consistent with the treatment of these items for statutory and financial accounting purposes and the nature of the issuer's economic obligations.

The final regulations define a separate account asset as an asset that is reflected on the books and records of an eligible QBU and is held in a separate account with respect to a separate account insurance contract. *See* § 1.987-1(h). A separate account insurance contract generally is defined as a contract that would be treated as an insurance contract for Federal income tax purposes for which the assets supporting the insurance reserves are required to be held in a separate account under the local insurance regulatory rules. In addition, the contract generally

must qualify as a variable contract under section 817(d). However, if the contract does not qualify as a variable contract under section 817(d) solely because it fails to meet one or more of the requirements in section 72(s), 101(f), 817(h), or 7702, the contract will be treated as a separate account insurance contract if it is regulated as a life insurance or annuity contract under foreign law, the contract reserves are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest (treating the reflection of the investment return and the market value of assets in the separate account as an assumed rate of interest), and no policyholder, annuitant, insured, or beneficiary under the contract is a United States person. These requirements are consistent with the requirements for life insurance or annuity contracts issued by CFCs.

3. Assets of an Insurance Company That Produce Financial Services Income

A comment recommended that assets of an insurance company that produce financial services income (within the meaning of section 904(d)(2)(D)(ii)(II) and (III)) should be treated as marked items. The comment asserted that the assets insurance companies hold to support insurance obligations are closely matched to those obligations and that concerns related to the selective recognition of large noneconomic losses under section 987 are not present for insurance companies.

The final regulations do not treat all assets that produce financial services income as marked assets. As a result, those assets are classified as marked or historic under the general rules of § 1.987-1(d) or (e). The definition of a marked item under § 1.987-1(d)(1) is intended to identify those items of a section 987 QBU that are directly exposed to changes in the value of a section 987 QBU's functional currency. This definition is designed to ensure that, in the absence of a current rate election, section 987 gain or loss recognized by the owner of a section 987 QBU represents bona fide economic gain or loss. To the extent that a section 987 QBU of an insurance company holds assets that are not directly exposed to exchange rate fluctuations (for example, publicly traded stock), and a current rate election is not in effect, those assets are properly characterized as historic items even if they generate financial services income.

4. Deferred Acquisition Costs

A comment recommended that the unamortized portion of specified policy acquisition expenses (as defined in

section 848) should be treated as marked items. These specified policy acquisition expenses are generally a specified portion of general deductions and represent deferred acquisition costs. The comment noted that specified policy acquisition expenses are akin to prepaid expenses and the amount and timing of the related deductions are determined under insurance-specific tax rules.

The final regulations do not treat the unamortized portion of specified policy acquisition expenses as marked items. Although certain prepaid expenses are treated as marked items under § 1.987-1(d)(1)(ii), that rule applies only to prepaid expenses with an original term of one year or less. The preamble to the 2016 final regulations explains that, because these prepaid expenses have a short duration and often are small in amount, treating them as marked items promotes administrability without creating significant distortions. 81 FR 88810. By contrast, specified policy acquisition expenses under section 848 generally are amortized over a period of 15 years and can be substantial in magnitude. Thus, if specified policy acquisition expenses were treated as marked items, they could give rise to significant amounts of non-economic section 987 gain or loss.

C. Elections

The 2023 proposed regulations would provide that a current rate election or an annual recognition election may not be revoked without consent for any taxable year beginning within 60 months of the first day of the taxable year for which it was made. Proposed § 1.987-1(g)(3)(ii)(B). Once revoked, a new current rate election or annual recognition election may not be made without consent for any taxable year beginning within 60 months of the first day of the taxable year for which it was revoked. *Id.*

A comment recommended that, during the first five years in which the section 987 regulations are applicable, taxpayers should be allowed to make or revoke a current rate election without waiting 60 months or requesting consent. The comment noted that taxpayers may need more flexibility to reassess their elections during this initial period because they do not yet have sufficient information or experience regarding the impact of making (or not making) a current rate election.

The final regulations retain the 60-month limitation for taxpayers that make a current rate election or an annual recognition election and apply a similar limitation for purposes of the

section 988 mark-to-market election (see part IV.C.1 of this Summary of Comments and Explanation of Revisions). Permitting taxpayers to make or revoke elections on a more frequent basis could increase the potential for manipulation and abuse. However, taxpayers that wish to change their elections without waiting 60 months can do so by requesting the Commissioner's consent, and the Commissioner may consider the need for additional flexibility on a case-by-case basis.

D. No Change in Method of Accounting

Proposed § 1.987-1(g)(4) provides that elections under section 987 are not governed by the general rules concerning changes in methods of accounting. In addition, the final regulations clarify that an election under section 987 is not treated as a method of accounting for purposes of section 446 or 481. See § 1.987-1(g)(4). Similarly, the final regulations provide that application of the transition rules under § 1.987-10 is not treated as a change in method of accounting. See § 1.987-10(k)(4). No inference is intended as to whether a change in section 987 methodology is considered a change in method of accounting before the final regulations become applicable (or with respect to partnerships or other entities that are not generally subject to the section 987 regulations).

III. Comments and Changes to Proposed § 1.987-2: Attribution of Items of an Eligible QBU, the Definition of a Transfer, and Related Rules

Proposed § 1.987-2 provides rules for attributing items to eligible QBUs and rules relating to transfers of assets or liabilities to or from eligible QBUs.

A. Attribution of Items to an Eligible QBU

Under the proposed regulations, items are attributable to an eligible QBU to the extent they are reflected on the eligible QBU's separate set of books and records. Proposed § 1.987-2(b)(1). The final regulations clarify that an item that is not taken into account for financial accounting purposes is attributed to an eligible QBU to the extent it would have been reflected on the eligible QBU's books and records if it were taken into account for financial accounting purposes (for example, amortization attributable to an item of intangible property that is recognized and taken into account for tax purposes due to a section 338 election, but is not recognized or taken into account for financial reporting purposes). See § 1.987-2(b)(1). Similarly, in preparing

an adjusted balance sheet for a section 987 QBU, the owner must make adjustments to reflect items that were not reflected on the section 987 QBU's books and records for the taxable year but should be so reflected under United States tax accounting principles. *See* § 1.987–1(h). No inference should be drawn from this clarification with respect to other similar rules that attribute items based on books and records including under § 1.904–4(f) (foreign branch category income) or § 1.1503(d)–5(c) (income or dual consolidated loss of a separate unit).

B. Disregarded Transactions

Under proposed § 1.987–2(c)(2)(i), an asset is treated as transferred to a section 987 QBU from its owner if, as a result of a disregarded transaction, the asset is reflected on the books and records of (or attributable to) the section 987 QBU. Similarly, an asset is treated as transferred from a section 987 QBU to its owner if, as a result of a disregarded transaction, the asset ceases to be reflected on (or attributable to) the books and records of the section 987 QBU. However, disregarded transactions do not give rise to items of income, gain, deduction, or loss that are taken into account in determining section 987 taxable income or loss under § 1.987–3. Proposed § 1.987–2(c)(2)(iii).

A comment recommended that interbranch loans made by banks and other regulated financial institutions should not be treated as transfers for purposes of determining the amount of a remittance under § 1.987–5(c). The comment asserted that an interbranch loan is not a permanent transfer because the borrower has an obligation to repay the lender. Another comment requested that the final regulations conform the treatment of disregarded transactions for purposes of section 987 with the reattribution rules provided in § 1.904–4(f)(2)(vi). Under this approach, disregarded payments would result in the reattribution of items of gross income between a section 987 QBU and its owner and between separate 987 QBUs of the same owner, and they would not be treated as transfers giving rise to the recognition of section 987 gain or loss. The comment noted that, under proposed § 1.987–2(c)(2), a disregarded payment for services or a sale of inventory (including a payment from one section 987 QBU to a different section 987 QBU with the same functional currency) could give rise to a remittance even though there is no net economic transfer of value. Further, because disregarded transactions do not give rise to section 987 taxable income or loss under proposed § 1.987–

2(c)(2)(iii), the comment asserted that the amount of section 987 taxable income or loss may be different from the amount of income that is economically attributable to the section 987 QBU.

The final regulations retain the disregarded transaction rules of proposed § 1.987–2(c). *See* § 1.987–2(c). These rules are needed to properly account for the effect of a disregarded transaction on the balance sheet of a section 987 QBU for purposes of determining the owner's net unrecognized section 987 gain or loss under § 1.987–4, the amount of a remittance under § 1.987–5(c), and to properly determine the owner's basis in transferred assets under § 1.987–5(f).

In the case of a disregarded lending transaction in which a section 987 QBU lends money to its owner, although the owner remains obligated to repay the borrowed funds, the disregarded loan is not an asset that can be attributed to the QBU for tax purposes. Accordingly, for tax purposes, the QBU-lender's balance sheet is diminished by the amount of the loan in the same way as any other transfer from the QBU to its owner. To the extent the loan is funded and repaid within the same taxable year, the two transfers will offset in computing the remittance amount under § 1.987–5(c). However, when a disregarded loan spans multiple taxable years, the owner must account for the effect of the transaction on the net equity of the section 987 QBU (as regarded for tax purposes).

In addition, the final regulations do not provide for reattribution of gross income between a section 987 QBU and its owner or between section 987 QBUs of the same owner for purposes of section 987. When a section 987 QBU makes a disregarded payment to its owner, the payment properly triggers the recognition of section 987 gain or loss because the transferred asset has been withdrawn from the QBU and is no longer accounted for in the section 987 QBU's functional currency. Even if the transaction does not reduce the economic value of the section 987 QBU on a net basis (for example, because the disregarded payment is made in exchange for services of equal value), it nonetheless results in a net withdrawal of asset basis from the functional currency environment of the section 987 QBU and is therefore properly treated as a remittance for purposes of section 987. Moreover, a rule determining the amount of a remittance based on the value of property transferred from a section 987 QBU would be difficult to administer and prone to manipulation.

Similarly, because disregarded transactions do not give rise to taxable

income or loss under general tax principles, they are not taken into account in determining section 987 taxable income or loss. *See* § 1.987–2(c)(2)(iii). Instead, the regarded income of an owner that is properly reflected on the books and records of (or attributable to) a section 987 QBU under § 1.987–2(b) is determined in the functional currency of the section 987 QBU and translated into the owner's functional currency under the rules of § 1.987–3. Disregarded payments do not serve to reattribute gross income between a section 987 QBU and its owner for purposes of determining section 987 taxable income or loss. Such a reattribution rule would add complexity to the section 987 regulations (for example, when income is reattributed in a taxable year following the taxable year in which the disregarded payment is made), and it would not serve any necessary function.

However, the final regulations contain targeted modifications that are intended to reduce the compliance burden of accounting for certain transfers between a section 987 QBU and its owner. *See* part VI of this Summary of Comments and Explanation of Revisions (describing modifications to the annual remittance rules to reduce the burden of tracking and translating disregarded transfers). Additionally, if an owner elects to group section 987 QBUs with the same functional currency under § 1.987–1(b)(3)(ii), transactions between the section 987 QBUs will not be treated as transfers between the section 987 QBUs and their owner for purposes of section 987.

IV. Comments and Changes to Proposed § 1.987–3: Determination of Section 987 Taxable Income or Loss of an Owner of a Section 987 QBU

Proposed § 1.987–3 would provide rules for determining taxable income or loss of a section 987 QBU, including section 988 transactions of a section 987 QBU. Additional rules relating to section 988 transactions would be provided in § 1.987–3 of the 2016 proposed regulations, for which the comment period was reopened in 2023.

A. Treatment of Section 988 Transactions Under the 2016 Proposed Regulations

The 2016 proposed regulations provide that the determination of whether a transaction is a section 988 transaction is made by reference to the section 987 QBU's functional currency. Thus, a transaction otherwise within the scope of section 988 that is denominated in a functional currency other than the section 987 QBU's

functional currency generally would be treated as a section 988 transaction. *See* § 1.987–3(b)(4)(i) of the 2016 proposed regulations. However, section 988 transactions of a section 987 QBU denominated in, or determined by reference to, the owner's functional currency ("specified owner functional currency transactions") would not be treated as section 988 transactions of the section 987 QBU. *See* § 1.987–3(b)(4)(ii) of the 2016 proposed regulations.

The 2016 proposed regulations would further provide that section 988 gain or loss of a section 987 QBU generally is determined by reference to the owner's functional currency. *See* § 1.987–3(b)(4)(i) of the 2016 proposed regulations. However, section 988 gain or loss with respect to certain short-term section 988 transactions ("qualified short-term section 988 transactions") accounted for under a mark-to-market method of accounting would be determined in the functional currency of the section 987 QBU, and not the functional currency of its owner. *See* § 1.987–3(b)(4)(iii) of the 2016 proposed regulations. The 2016 proposed regulations would provide an election under which taxpayers can apply a mark-to-market method of accounting with respect to all qualified short-term section 988 transactions. *See* § 1.987–3(b)(4)(iii)(C) of the 2016 proposed regulations.

Under the 2016 final regulations (and the 2023 proposed regulations), a transaction denominated in a currency other than the section 987 QBU's functional currency is treated as a historic item. *See* § 1.987–1(d) and (e). However, the 2016 proposed regulations provide an exception under which a qualified short-term section 988 transaction for which section 988 gain or loss is determined by reference to the functional currency of the section 987 QBU is a marked item. *See* § 1.987–1(d)(3) of the 2016 proposed regulations.

The preamble to the 2023 proposed regulations requested comments as to whether section 988 gain or loss on nonfunctional currency transactions of a section 987 QBU (including specified owner functional currency transactions) should be determined in the functional currency of the section 987 QBU when a current rate election or annual recognition election is in effect. 88 FR 78154. The preamble expressed concern that, if such a rule were adopted, specified owner functional currency transactions would give rise to offsetting positions in the functional currency of the section 987 QBU; this could create opportunities for taxpayers to recognize losses while deferring the offsetting gains. *Id.* For example, if a section 987

QBU held assets denominated in its owner's functional currency, and the section 987 QBU's functional currency weakened against that of its owner, the section 987 QBU would have unrecognized section 988 gain and the owner would have an inverse amount of unrecognized section 987 loss. The owner could cause the QBU to make a remittance triggering the recognition of section 987 loss, while deferring the section 988 gain.

B. Comments on the 2023 Proposed Regulations Regarding Section 988 Transactions of Section 987 QBUs

Comments asserted that the section 988 rules of the 2016 proposed regulations would impose a substantial compliance burden on taxpayers. The comments noted that for financial accounting purposes, foreign currency gain or loss on nonfunctional currency transactions of a QBU is measured by reference to the functional currency of the QBU. In addition, taxpayers typically hedge their exposure to nonfunctional currency transactions of a QBU by reference to the QBU's functional currency. One comment noted that it is common for section 987 QBUs of insurance companies to hold assets denominated in U.S. dollars for commercial reasons and that treating these assets as historic items would increase the compliance burden on insurance companies.

Comments suggested that the rules of the 2016 proposed regulations be modified to provide that: (i) section 988 gain or loss on nonfunctional currency transactions of a section 987 QBU is determined by reference to the functional currency of the section 987 QBU, (ii) specified owner functional currency transactions are treated as section 988 transactions, and (iii) section 988 transactions of a section 987 QBU are treated as marked items. Alternatively, comments requested that (if the default rules of the 2016 proposed regulations are retained) taxpayers should be permitted to elect this modified treatment.

According to the comments, the recommended modifications would achieve greater consistency with financial accounting standards and would ease the compliance burden on taxpayers. One comment stated that such an approach would also be more consistent with the statutory requirement to determine a section 987 QBU's taxable income or loss in the QBU's functional currency under sections 985 and 987. Comments noted that the opportunity for selective recognition of losses is limited to the extent the taxpayer makes a current rate

election (because section 987 losses will be subject to suspension) or an annual recognition election (because section 987 gain or loss is recognized annually without regard to whether a remittance is made). One comment asserted that, even if neither of these elections is in effect, it is difficult to selectively recognize material section 987 losses attributable to section 988 transactions because the remittance proportion under § 1.987–5 is determined with respect to all the assets of the section 987 QBU.

Other comments recommended providing an election under which taxpayers could recognize section 988 gain or loss with respect to all section 988 transactions of a section 987 QBU on a mark-to-market basis (effectively expanding the special rule for qualified short-term section 988 transactions to cover all section 988 transactions of a QBU). For example, one comment requested mark-to-market timing for section 988 transactions of a section 987 QBU that is subject to an annual recognition election. According to this comment, because mark-to-market timing would apply to both section 988 and section 987 gains and losses on a current basis, the potential for abuse or selective loss recognition would be limited. Another comment requested that the definition of a qualified short-term section 988 transaction under proposed § 1.987–3(b)(4)(iii)(B) be expanded to include long-term transactions that have been properly identified as a hedge for U.S. tax purposes.

Finally, a comment recommended that, if the rules of the 2016 proposed regulations relating to section 988 transactions are retained in the final regulations, the applicability date of the final regulations should be deferred until taxable years beginning after December 31, 2026, so that taxpayers have adequate time to update their internal accounting systems.

C. Treatment of Section 988 Transactions Under the Final Regulations

1. Section 988 Mark-To-Market Election

The final regulations provide that a taxpayer may elect to recognize section 988 gain or loss with respect to section 988 transactions of a section 987 QBU under a mark-to-market method of accounting (a "section 988 mark-to-market election"). *See* § 1.987–3(b)(4)(ii). This election is expected to result in consistent treatment of section 988 transactions for tax and financial reporting purposes and to reduce the potential for selective recognition of

losses relating to these transactions, as indicated by the comments. The section 988 mark-to-market election is subject to the same timing and consistency requirements as a current rate election or an annual recognition election. *See* § 1.987–1(g).

The section 988 mark-to-market election does not apply to a section 988 transaction that is contributed to a section 987 QBU with a built-in loss if the section 988 transaction was not subject to a mark-to-market method of accounting in the hands of the transferor. *See* § 1.987–3(b)(4)(ii)(B). This rule is intended to prevent taxpayers from accelerating the recognition of section 988 loss by contributing a section 988 transaction with a built-in loss to a section 987 QBU that is subject to the section 988 mark-to-market election.

2. Treatment of Section 988 Transactions of a Section 987 QBU Under the Final Regulations

The final regulations provide new rules for applying section 988 with respect to nonfunctional currency transactions of a section 987 QBU. In response to the comments summarized in part IV.B of this Summary of Comments and Explanation of Revisions, the Treasury Department and the IRS have determined that a different framework is appropriate in order to reduce the compliance burden and complexity of the section 987 regulations.

Under the final regulations, whether an asset or liability of a section 987 QBU is a section 988 transaction is determined by reference to the functional currency of the section 987 QBU (instead of the owner's functional currency). *See* § 1.987–3(b)(4)(i). The final regulations further provide that section 988 gain or loss with respect to section 988 transactions of a section 987 QBU (including transactions denominated in the owner's functional currency) is determined in the functional currency of the section 987 QBU, and section 988 transactions are treated as marked items. *See* §§ 1.987–1(d)(1)(iii) and 1.987–3(b)(4)(i). The final regulations do not provide an exception for specified owner functional currency transactions; thus, such transactions are treated as section 988 transactions of the section 987 QBU.

However, the final regulations provide an anti-abuse rule to prevent taxpayers from entering into section 988 transactions through an eligible QBU for the purpose of generating offsetting amounts of gain and loss that can selectively be recognized or deferred. Under § 1.987–2(b)(3)(iv), section 988

transactions will not be treated as attributable to an eligible QBU if they are entered into (or reflected on the eligible QBU's books and records) with a principal purpose of generating offsetting amounts of section 988 gain and section 987 loss or offsetting amounts of section 988 loss and section 987 gain. Section 988 transactions also are subject to the general anti-avoidance rules of § 1.987–2(b)(3)(i) through (iii).

V. Comments and Changes to Proposed § 1.987–4: Determination of Net Unrecognized Section 987 Gain or Loss of a Section 987 QBU

Proposed § 1.987–4 provides rules for computing net unrecognized section 987 gain or loss with respect to a section 987 QBU. In particular, proposed § 1.987–4(d) provides a ten-step formula for computing unrecognized section 987 gain or loss for the current taxable year. The first step of this formula is to compute the change in owner functional currency net value (“OFCNV”) for the taxable year. Proposed § 1.987–4(d)(1). The other steps make adjustments for changes to OFCNV that are not attributable to changes in the exchange rate. Steps 2 through 5 relate to transfers of assets and liabilities between a section 987 QBU and its owner, and steps 6 through 9 relate to income or loss of the section 987 QBU. Proposed § 1.987–4(d)(2) through (9). Step 10 is a residual adjustment for any increase or decrease to the section 987 QBU's balance sheet that is not otherwise accounted for. Proposed § 1.987–4(d)(10). If a current rate election is in effect, taxpayers are required to apply only steps 1 through 5 and step 10.

Under proposed § 1.987–4(e), OFCNV is determined by preparing a tax basis balance sheet reflecting the section 987 QBU's assets and liabilities. The basis of each asset and the amount of each liability is then translated into the owner's functional currency at the appropriate exchange rate. Under the default rules, marked items are translated at the year-end spot rate, while historic items are translated at the applicable historic rate. However, taxpayers that make a current rate election under § 1.987–1(d)(2) translate all items on the year-end balance sheet at the year-end spot rate.

A. Mechanics for Calculating Unrecognized Section 987 Gain or Loss for the Current Taxable Year

1. Earnings and Capital Method

The preamble to the 2023 proposed regulations notes that, under a current rate election, the total amount of section 987 gain or loss recognized by an owner

with respect to a section 987 QBU would be similar to the amount computed under the earnings and capital method, which was described in proposed regulations published in the **Federal Register** in 1991 (56 FR 48457, September 25, 1991) (the “1991 proposed regulations”). 88 FR 78138 through 78139. Under the earnings and capital method, the owner of a section 987 QBU computes section 987 gain or loss by maintaining an equity pool in the QBU's functional currency and a basis pool in the owner's functional currency. The equity and basis pools are increased by income of the section 987 QBU and contributions from the owner, and they are decreased by losses of the section 987 QBU and distributions from the section 987 QBU to the owner. The preamble to the 1991 proposed regulations explains that the equity pool generally represents the amount of branch equity (adjusted basis of assets net of liabilities), and the basis pool represents the owner's basis in branch equity. 56 FR 48458.

Comments requested that the final regulations include an election to apply the earnings and capital method of the 1991 proposed regulations in lieu of the current rate election. These comments indicated that, even if a current rate election is in effect, proposed § 1.987–4 imposes a heightened compliance burden (as compared to the earnings and capital method) because it requires taxpayers to prepare tax basis balance sheets for each of their section 987 QBUs on an annual basis. In addition, the comments asserted that taxpayers are already familiar with the earnings and capital method and would be less likely to make errors in applying that method because taxpayers track book-to-tax adjustments in computing taxable income but do not make book-to-tax adjustments to their balance sheets. One comment recommended allowing taxpayers to use the earnings and capital method only if a current rate election and an annual recognition election are both in effect.

The final regulations do not permit taxpayers to use the earnings and capital method. As explained in the preamble to the 2023 proposed regulations, such an election would allow different taxpayers to apply section 987 using fundamentally different methodologies, which would increase the overall complexity of the section 987 regulations and make them more difficult to administer. 88 FR 78138. For example, it would be difficult for taxpayers to transition from one method to another in an administrable way. Moreover, under the earnings and capital method, the amount of section

987 gain or loss recognized is determined based on the percentage of a section 987 QBU's net equity remitted (rather than the percentage of gross assets remitted, as required under § 1.987-5), which can inappropriately accelerate the recognition of section 987 gain or loss. If a section 987 QBU has negative net equity, section 987 gain or loss cannot be recognized under the earnings and capital method until the section 987 QBU terminates, which is inconsistent with the statutory requirement to recognize currency gain or loss on transfers of property from the section 987 QBU.

However, the final regulations modify the existing framework of § 1.987-4 to allow taxpayers that make a current rate election to use certain elements of the earnings and capital method in lieu of preparing a tax basis balance sheet.² These modifications are expected to minimize the compliance burden of transitioning from the 1991 proposed regulations to the final regulations. Under the final regulations, if a current rate election is in effect, OFCNV is computed by determining the aggregate basis of the QBU's assets, net of the QBU's liabilities, in the functional currency of the section 987 QBU ("QBU net value") and translating the QBU net value into the owner's functional currency at the year-end spot rate. *See* § 1.987-4(e)(2)(i) and (ii). The final regulations provide that QBU net value can be computed without a tax basis balance sheet using the formula provided in § 1.987-4(e)(2)(iii).

The formula provided in § 1.987-4(e)(2)(iii) is modeled on the formula used to track the equity pool under the 1991 proposed regulations, with certain modifications. Under this formula, the QBU net value on the last day of the taxable year is equal to the QBU net value at the end of the preceding taxable year, adjusted by transfers of assets and liabilities between the section 987 QBU and its owner and by income or loss of the section 987 QBU (each determined in the section 987 QBU's functional currency). If a taxpayer determines QBU net value under § 1.987-4(e)(2)(iii), the taxpayer must retain the information used to determine QBU net value for each taxable year in lieu of retaining adjusted balance sheets. *See* § 1.987-9(b)(2).

2. Cumulative Translation Adjustment

Comments requested that taxpayers be permitted to use the cumulative

translation adjustment ("CTA") determined under U.S. generally accepted accounting principles ("U.S. GAAP") to compute their unrecognized section 987 gain or loss. Alternatively, some comments recommended that taxpayers should be allowed to use the CTA for this purpose only with respect to small QBUs and subject to certain tax adjustments. One comment suggested that section 987 gain or loss with respect to small QBUs should be recognized when the CTA is included in income from continuing operations under U.S. GAAP.

The final regulations do not permit taxpayers to use the CTA to determine their net unrecognized section 987 gain or loss. As explained in the preamble to the 2023 proposed regulations, section 987(3) requires currency gain or loss to be recognized at the time of a remittance, rather than when the CTA is included in income for U.S. GAAP purposes. 88 FR 78141. Moreover, the Treasury Department and the IRS have determined that significant differences may arise between the computation of the CTA for financial accounting purposes and the determination of unrecognized section 987 gain or loss under § 1.987-4(d). For example, the CTA is unlikely to reflect the correct amount of currency gain or loss for tax purposes because of book-to-tax differences in the basis of assets or because certain items are disregarded for tax purposes but regarded for financial accounting purposes. If the comment's recommended approach were adopted, complex rules would be needed to adjust the CTA amount in order to derive the correct amount to be recognized for tax purposes.

3. Simplified Accounting for Disregarded Transactions

A comment recommended that taxpayers that make a current rate election should be permitted to determine unrecognized section 987 gain or loss for the taxable year by applying only two steps: step 1 (determining the change in OFCNV) and step 10 (reducing the amount determined in step 1 by the change in QBU net value, translated into the owner's functional currency at the yearly average exchange rate). The recommended rule would have the effect of accounting for all transfers between the owner and the section 987 QBU (which would otherwise be accounted for under steps 2 through 5) as part of step 10; consequently, the net amount of all transfers would be translated at the yearly average exchange rate. The comment posited that this approach would simplify the

computations for taxpayers with a high volume of disregarded intercompany transactions.

The final regulations retain the requirement to apply steps 2 through 5 when a current rate election is in effect. Under these steps, transfers of marked assets and liabilities between a section 987 QBU and its owner generally are translated at the spot rate applicable on the date of transfer. Because the applicable spot rate may differ significantly from the yearly average exchange rate, it would not be appropriate to account for all transfers between a section 987 QBU and its owner by translating them at the yearly average exchange rate under step 10. The Treasury Department and the IRS continue to study possible simplifications of § 1.987-4 relating to disregarded transactions between a section 987 QBU and its owner, including whether, in certain circumstances, unrecognized section 987 gain or loss for a taxable year could be computed using only steps 1 and 10. *See* § 1.987-2(f) of the 2024 proposed regulations for proposed rules containing an election under which certain disregarded transactions between a section 987 QBU and its owner would not be taken into account in computing unrecognized section 987 gain or loss.

B. Hedging Transactions

1. Comment on Matching Source and Character of Section 988 Gain or Loss From a Hedging Transaction With the Source and Character of Section 987 Gain or Loss

A comment recommended adoption of a hedging rule under which a taxpayer that hedges exchange rate risk with respect to its net investment in a section 987 QBU could match the source and character of the section 988 gain or loss arising from the hedging transaction with that of the section 987 gain or loss attributable to the hedged section 987 QBU. Alternatively, the comment suggested that the hedging transaction could be integrated with the section 987 QBU, such that section 988 gain or loss with respect to the hedging transaction would directly offset the section 987 QBU's unrecognized section 987 gain or loss. The comment asserted that implementing either of these recommended rules would mitigate the potential for adverse consequences (or windfalls) under section 987 when the owner's foreign currency exposure is economically hedged. The comment noted that these rules would be particularly beneficial for taxpayers that make a current rate election and an

² Taxpayers would still need to track the gross assets of a section 987 QBU for other purposes, including the denominator of the remittance proportion under § 1.987-5.

annual recognition election (and thus recognize section 987 gain or loss whether or not there is a remittance).

2. Treatment of Section 987 Hedging Transactions Under the Final Regulations

The Treasury Department and the IRS agree with the comment that it would be appropriate to permit symmetrical treatment of currency gain or loss with respect to a net investment hedge and the hedged section 987 QBU.³ Accordingly, § 1.987–14 of the final regulations provides new rules that apply to certain identified hedging transactions entered into by the owner of a section 987 QBU (“section 987 hedging transactions”).

Under § 1.987–14(d), section 988 gain or loss that would otherwise be recognized on a section 987 hedging transaction (“hedging gain or loss”) is instead taken into account in adjusting the owner’s unrecognized section 987 gain or loss for the taxable year (as determined under § 1.987–4(d)). For example, if the owner has unrecognized section 987 gain for the taxable year under § 1.987–4(d), the owner’s hedging loss reduces the unrecognized section 987 gain. However, hedging loss cannot reduce unrecognized section 987 gain for the taxable year below zero, and hedging gain cannot reduce unrecognized section 987 loss for the taxable year below zero. This limitation ensures that hedging gain or loss in excess of the currency exposure generated by the section 987 QBU for the taxable year is not taken into account under section 987.

3. Requirements To Qualify as a Section 987 Hedging Transaction

A section 987 hedging transaction generally is defined as a financial instrument (a “hedge”) entered into by the owner of a section 987 QBU for the purpose of managing exchange rate risk with respect to the owner’s net investment in the section 987 QBU as part of the normal course of the owner’s trade or business. The hedge may be entered into with an unrelated counterparty or with a related person. For example, a CFC that owns a section 987 QBU may enter into a hedge with

its U.S. parent, which has entered into a similar, offsetting, transaction with a third party.

Several requirements must be met in order for a hedge to qualify as a section 987 hedging transaction. First, the hedge must be identified as a section 987 hedging transaction with respect to the hedged QBU on or before the day the owner enters into the hedge. *See* § 1.987–14(b)(2)(i) and (c). A hedge cannot be identified as a section 987 hedging transaction with respect to more than one section 987 QBU.

However, if a grouping election is in effect under § 1.987–1(b)(3)(ii), all section 987 QBUs that have the same functional currency will be treated as a single section 987 QBU. The final regulations also provide a special rule for cases in which a taxpayer fails to properly identify a hedge due to inadvertent error. *See* § 1.987–14(c)(2).

Second, a current rate election must be in effect for the taxable year. *See* § 1.987–14(b)(2)(ii). In the absence of a current rate election, gain or loss on a net investment hedge is unlikely to be comparable in amount to the owner’s unrecognized section 987 gain or loss, and thus the rules of § 1.987–14 would not serve their intended function.

Third, the owner (and any members of the same controlled group that are parties to the hedge) must account for section 988 gain or loss with respect to the hedge under a mark-to-market method of accounting (for example, under section 1256 or in reliance on proposed § 1.988–7). *See* § 1.987–14(b)(2)(iii). As a result of this requirement, foreign currency gain or loss on the hedge will be taken into account in the taxable year in which the related currency gain or loss is determined under § 1.987–4(d)).

Fourth, under U.S. GAAP, foreign currency gain or loss on the hedge must be properly accounted for as a cumulative foreign currency translation adjustment to shareholders’ equity. *See* § 1.987–14(b)(2)(iv). This requirement helps to ensure that the hedge is economically related to the owner’s net investment in the section 987 QBU.

Fifth, the hedge must be entered into by the owner of the section 987 QBU, and not by a section 987 QBU of the owner (that is, the hedge cannot itself be an asset attributable to a section 987 QBU). *See* § 1.987–14(b)(2)(v).

Finally, an anti-abuse rule provides that a hedge does not qualify as a section 987 hedging transaction if the hedge or a related transaction is entered into with a principal purpose of converting section 987 gain or loss into section 988 gain or loss. *See* § 1.987–14(b)(3). For example, a taxpayer that

owns a section 987 QBU might enter into a hedging transaction with a related party without hedging the related party’s resulting exchange rate risk (effectively shifting the exchange rate risk without reducing the group’s overall foreign currency exposure) for the purpose of taking the related foreign currency gain or loss into account under section 988 (rather than section 987). Under the anti-abuse rule, the net investment hedge would not be treated as a section 987 hedging transaction.

4. Consolidated Groups

With regard to consolidated groups (as defined in § 1.1502–1(h)), § 1.987–14(b)(2)(v) of the final regulations requires that the same corporation be the owner of the QBU and enter into the section 987 hedging transaction with respect to that QBU (similar requirements apply when a member of a consolidated group engages in a section 988(d) hedging transaction under § 1.988–5(a)(5)(v) or (b)(2)(i)(F)). The Treasury Department and the IRS continue to study whether it would be possible to treat consolidated group members as a single corporation for purposes of § 1.987–14 and the section 988(d) hedging transaction rules without inappropriately shifting income among members of the group. *See also* TD 8400, 57 FR 9172, 9176 (soliciting comments on whether to permit the rules of § 1.988–5 to be applied by treating consolidated group members as a single corporation).

VI. Comments and Changes to Proposed § 1.987–5: Recognition of Section 987 Gain or Loss

Proposed § 1.987–5 provides rules for determining the amount of section 987 gain or loss recognized by the owner of a section 987 QBU.

Under proposed § 1.987–5(a), when a section 987 QBU makes a remittance, the owner recognizes section 987 gain or loss. In general, the amount recognized equals the section 987 QBU’s net unrecognized section 987 gain or loss multiplied by the owner’s remittance proportion. The remittance proportion is determined in the owner’s functional currency; it is equal to the amount of the remittance for the taxable year, divided by the aggregate basis of the section 987 QBU’s gross assets reflected on its year-end balance sheet (without reduction for the remittance). Proposed § 1.987–5(b). For a taxable year, the amount of a remittance equals the excess of (i) the aggregate of all amounts transferred from the section 987 QBU to the owner during the taxable year; over (ii) the aggregate of all amounts transferred from the owner to the section 987 QBU

³ The Treasury Department and the IRS previously published proposed regulations in the *Federal Register* on December 19, 2017 (82 FR 60135), which contained proposed rules relating to the treatment of a net investment hedge for purposes of the business needs exception to the definition of foreign personal holding company income under section 954(c)(1)(D) and § 1.954–2(g)(2)(ii). Those proposed regulations would apply only for purposes of the business needs exception and do not address the potential for mismatches in other contexts.

during the taxable year (each determined in the owner's functional currency). Proposed § 1.987–5(c).

A comment noted that, for taxpayers with a high volume of disregarded intercompany transactions, it can be difficult to track the amount of each transfer between the section 987 QBU and its owner and to translate the transfer into the owner's functional currency at the appropriate exchange rate. The comment recommended that the amount of a remittance should be deemed to be equal to the change in the QBU's net value (if negative) for the taxable year.

Despite compliance and administrative burdens that may result in certain cases from tracking disregarded transfers for purposes of determining the amount of a remittance, it would not be appropriate to determine the remittance amount based solely on the negative change in net value of a section 987 QBU. Such an approach would not properly account for distributions out of a section 987 QBU's current year earnings. For example, if a section 987 QBU distributed an amount exactly equal to its current year earnings, there would be no change in the QBU's net value (and thus, no remittance) under the comment's recommended approach, even if the QBU made a substantial distribution. Section 987(3) and its legislative history indicate that Congress intended for gain or loss to be recognized on any remittance from a section 987 QBU, without regard to whether the remittance is sourced from current year earnings, prior year earnings, or capital contributions.

Nonetheless, the final regulations provide two modifications that are intended to reduce the burden of tracking disregarded transfers for purposes of § 1.987–5 while preserving consistency with the text and purpose of section 987. First, the final regulations provide an alternative formula for computing the annual remittance that is based on the comment's recommended approach (and does not require tracking of individual transfers) but contains an adjustment to account for remittances out of current-year income. Under this formula, the remittance amount is equal to the negative change in net value of the section 987 QBU (determined in the QBU's functional currency), adjusted for income and loss of the section 987 QBU. See § 1.987–5(c)(2). Mathematically, this formula will produce an amount that is equal to the aggregate net transfer from the section 987 QBU to its owner for the taxable year.

Second, § 1.987–5(b) and (c) provide that the numerator and denominator of

the remittance proportion (that is, the amount of the remittance and the section 987 QBU's gross assets) are determined in the section 987 QBU's functional currency, rather than the owner's functional currency. As a result, it is not necessary to separately translate each transfer for purposes of determining the annual remittance.

VII. Comments and Changes to Proposed § 1.987–6: Character and Source of Section 987 Gain or Loss

A. Determining the Character and Source of Section 987 Gain or Loss

1. In General

Under proposed § 1.987–6, section 987 gain or loss is assigned to the statutory and residual groupings in two steps: an initial assignment under proposed § 1.987–6(b)(2)(i), followed by a reassignment described in proposed § 1.987–6(b)(2)(ii). The initial assignment is made using the asset method under §§ 1.861–9(g) and 1.861–9T(g). It is made after the application of the income attribution rules of § 1.904–4(f)(2)(vi) or § 1.951A–2(c)(7), but before expenses are allocated and apportioned to gross income and before the application of provisions that require a net income computation. Section 987 gain or loss may be reassigned if required after the application of provisions that require a net income computation. For example, if an item of section 987 gain is initially assigned to tentative tested income, it will be reassigned to tested income or residual income depending on whether the taxpayer has made the GILTI high-tax exclusion election and, if so, whether the item (described in proposed § 1.987–6(b)(2)(iii)) is subject to a high rate of tax.

2. Asset Method

The asset method under §§ 1.861–9 and 1.861–9T is intended to serve as an administrable proxy for a section 987 QBU's historical earnings, in line with the statutory requirement of section 987(3)(B) (which provides that section 987 gain or loss is sourced by reference to the source of the income giving rise to post-1986 accumulated earnings). As explained in the preamble to the 2016 final regulations, it would be complex and burdensome to source and characterize section 987 gain or loss with direct reference to post-1986 accumulated earnings, and the gross assets of a section 987 QBU provide a reasonable proxy for historical earnings that is relatively easy to administer. 81 FR 88814.

A comment recommended that CFCs which apportion interest expense using

the modified gross income method be permitted to use the same method to determine the character and source of section 987 gain or loss (rather than using the asset method under §§ 1.861–9(g) and 1.861–9T(g)). According to the comment, the asset method may not accurately reflect the income earned by the CFC for the taxable year, and section 987 losses often could be allocated to a subpart F income group in excess of the income recognized in that group for the taxable year. The comment noted that the use of the modified gross income method would be more administrable and would more readily allow section 987 losses to be used against gross income recognized in the current year, since the source and character of the section 987 loss would be determined by reference to the section 987 QBU's gross income for the current year.

The final regulations do not permit CFCs to use the modified gross income method to source and characterize section 987 gain or loss because the source and character of a section 987 QBU's gross income may vary significantly from year to year, including by reason of extraordinary events or as a result of tax planning. Accordingly, the gross income earned in a single year is not a sufficiently reliable proxy for historical earnings for purposes of section 987(3)(B).

3. Timing of Source and Character Determination

The 2023 proposed regulations provide that the initial assignment of section 987 gain or loss would generally be made in the taxable year in which the section 987 gain or loss is treated as recognized, deferred, or suspended. Proposed § 1.987–6(b)(1).

Comments requested that the character and source of suspended section 987 loss and deferred section 987 gain or loss be determined in the year in which it is recognized, rather than in the year in which it becomes suspended or deferred. The comments noted that the proposed rules would require extensive tracking of the source and character of section 987 gain or loss in multiple categories over multiple years. Comments also posited that the potential for distortion due to changes in the basis of a QBU's assets or shifts in the character of its income would be present whether the section 987 gain or loss is characterized in the taxable year in which it becomes suspended or deferred or in the taxable year in which it is recognized.

The final regulations retain the rules of proposed § 1.987–6(b)(1)(ii) and (iii), under which suspended section 987 loss and deferred section 987 gain or loss are

characterized in the year of suspension and deferral, respectively, for several reasons.

First, making an initial assignment in the taxable year of deferral or suspension provides parity in the timing of the characterization of gains and losses (that is, both gains and losses are characterized in the year of a remittance or termination).

Second, this rule is expected to produce source and character determinations that more closely align with the historical income of the section 987 QBU during the period in which the relevant section 987 gain or loss arose. Making an initial assignment in the taxable year of deferral or suspension means that source and character are determined by reference to the assets of the section 987 QBU

contemporaneously with the remittance or termination, while the affected assets are still taken into account for purposes of applying the asset method under §§ 1.861–9 and 1.861–9T. By contrast, waiting until the year of recognition would require deferred section 987 gain or loss and (in some cases) suspended section 987 loss to be characterized after the section 987 QBU has been terminated and its assets have been transferred to a related party, which could result in substantial distortions.

Third, the timing rule of § 1.987–6(b)(1)(ii) is needed to facilitate the separate application of the loss-to-the-extent-of-gain rule under § 1.987–11(e) to section 987 gain or loss in each recognition grouping. As explained in part X.B.3 of this Summary of Comments and Explanation of Revisions, in order to prevent taxpayers from avoiding the loss limitation through the selective recognition of section 987 gains that are subject to a low rate of tax (or are not subject to U.S. tax), § 1.987–11(e) provides that suspended section 987 loss in a recognition grouping is not recognized until section 987 gain in the same recognition grouping is recognized. For this rule to achieve its policy objective, suspended section 987 loss must be sourced and characterized before determining whether it can be recognized under § 1.987–11(e). If suspended section 987 loss were not characterized until the year of recognition, there would be no administrable way to identify suspended section 987 loss in the relevant recognition grouping for purposes of § 1.987–11(e) because the source and character of the suspended section 987 loss would not yet have been determined.

Finally, in response to comments regarding compliance burden generally,

the final regulations include a number of new rules intended to simplify the tracking of suspended section 987 loss or deferred section 987 gain or loss. For instance, the new de minimis rule (described in part X.A.1 of this Summary of Comments and Explanation of Revisions) is expected to reduce the burden of tracking suspended section 987 loss because section 987 loss will be suspended only if it exceeds the de minimis threshold (the lesser of \$3 million or two percent of gross income). See § 1.987–11(c)(2). In addition, taxpayers that make the annual recognition election generally would not be subject to the deferral and loss suspension rules (and thus would not need to track deferred section 987 gain or loss or suspended section 987 loss). The lookback rule (described in part X.B.1 of this Summary of Comments and Explanation of Revisions) will permit suspended section 987 loss to be recognized in the year of a remittance to the extent of gain recognized during the lookback period, which will limit the amount of suspended section 987 loss carried forward to future years. Additionally, the new rules relating to the characterization of section 987 gain or loss for purposes of subpart F (described in part VII.B of this Summary of Comments and Explanation of Revisions) provide taxpayers more flexibility in characterizing their section 987 gain and loss relating to subpart F income groups, including an election that will limit the number of subpart F income groups for which tracking is required.

B. Characterization of Section 987 Gain or Loss for Purposes of Subpart F

1. In General

Under proposed § 1.987–6(b)(2)(i)(C), section 987 gain or loss assigned to a subpart F income group is treated as foreign currency gain or loss attributable to section 988 transactions not directly related to the business needs of the CFC for purposes of section 954(c)(1)(D).

Some comments recommended that, for subpart F purposes, section 987 gain or loss should instead be assigned to the same subpart F income groups as the income generated by the section 987 QBU's assets. The comments noted that the recommended rule would better align the characterization of section 987 gain or loss with the underlying assets and income of the section 987 QBU and would permit broader utilization of section 987 loss because the loss could be netted against income in the same subpart F income groups. One comment asserted that the recommended rule would be more consistent with section

987(3)(B), which requires section 987 gain or loss to be sourced by reference to the source of the income giving rise to post-1986 accumulated earnings.

Other comments stated that section 987 gain or loss should not be treated as foreign personal holding company income described in section 954(c)(1)(D) because section 954(c)(1)(D) refers to foreign currency gains or losses under section 988 and makes no reference to gain or loss recognized under section 987(3). One comment questioned whether section 987 gain or loss should be assigned to any subpart F income group because section 954 does not explicitly identify section 987 gain as a category of subpart F income.

Another comment requested that, if proposed § 1.987–6(b)(2)(i)(C) is retained for taxpayers applying the default rules, a different rule should be provided for taxpayers that make a current rate election (under which all assets and liabilities of a section 987 QBU give rise to currency gain or loss). A comment also recommended that, if proposed § 1.987–6(b)(2)(i)(C) is retained, the final regulations should clarify that, for taxpayers predominantly engaged in the active conduct of a banking, insurance, financing, or similar business, section 987 gain or loss that is assigned to a subpart F income group is treated as financial services income within the meaning of section 904(d)(2)(C).

Other comments requested that, if section 987 gain or loss is treated as gain or loss from section 988 transactions not directly related to the business needs of the CFC, taxpayers should be permitted to use the elections available under § 1.954–2(g)(3) (characterizing section 988 gain or loss that arises from a specific category of subpart F income as gain or loss in that category) and § 1.954–2(g)(4) (treating all section 988 gain or loss as foreign personal holding company income). One comment recommended that, for purposes of the election under § 1.954–2(g)(3), section 987 gain or loss should be allocated to categories of foreign base company income on a proportionate basis without requiring direct tracing of section 987 gain or loss to specific transactions or assets.

The final regulations retain the approach in the 2023 proposed regulations and treat section 987 gain or loss as subpart F income to the extent that the assets of the section 987 QBU generate subpart F income under the asset method of §§ 1.861–9(g) and 1.861–9T(g). See § 1.987–6(b)(2)(i)(A). However, the Treasury Department and the IRS agree with the comments that assigning section 987 gain or loss to the

same subpart F income groups as the income generated by the section 987 QBU's assets is most consistent with the principles of section 987(3)(B) and is therefore the most appropriate exercise of authority under sections 987(3) and 989(c). Accordingly, under the final regulations, the characterization of section 987 gain or loss is determined under the general rule of § 1.987–6 using the asset method of §§ 1.861–9(g) and 1.861–9T(g), including by assigning section 987 gain or loss to subpart F income groups. Thus, for example, if a QBU's assets generate foreign base company sales income, the section 987 gain or loss will be characterized as foreign base company sales income.

The Treasury Department and the IRS do not agree with the suggestion that section 987 gain or loss cannot give rise to subpart F income merely because section 954 does not explicitly identify section 987 gain as a separate category of subpart F income. Section 987(3) requires “proper adjustments (as prescribed by the Secretary)” to taxable income of the owner of a section 987 QBU. Further regulatory authority is provided in section 989(c). The adjustments required under section 987(3) include sourcing gain or loss recognized on a remittance by reference to the QBU's historical earnings under section 987(3)(B). This sourcing rule serves to characterize the adjustments to income under section 987(3) in the same way as the QBU's underlying income. Similarly, when a QBU's income is taken into account in determining the owner's subpart F income, proper adjustments must necessarily include adjustments to that type of income. Therefore, section 987 gain or loss must be characterized as foreign personal holding company income or other types of income described in section 952(a), in appropriate circumstances, to effectuate the intent of Congress reflected in the broader statutory scheme.

2. Election To Treat Certain Section 987 Gain or Loss as Foreign Currency Gain or Loss Attributable to Section 988 Transactions

In the case of section 987 gain or loss that would otherwise be characterized as passive foreign personal holding company income, the final regulations provide an election to treat the section 987 gain or loss as foreign currency gain or loss of the CFC-owner that is attributable to section 988 transactions not directly related to the business needs of the CFC (the “section 988 characterization election”). See § 1.987–6(b)(2)(i)(C)(1). This election is intended to benefit taxpayers because it would generally allow section 987 gains and

losses assigned to passive foreign personal holding company income groups, which would otherwise be treated as separate items (or as allocable to separate items) of passive foreign personal holding company income under the rules in § 1.954–1(c)(1)(iii)(B), to be treated as part of (or allocable to) a single item of income. This would generally facilitate some netting of the CFC-owner's section 987 gains and losses (because they would be assigned to the same item of income) and would also generally permit a CFC-owner to net its foreign currency gains and losses from section 988 transactions with the section 987 gain or loss from its QBUs (to the extent both comprise passive foreign personal holding company income). Similarly, the section 988 characterization election should, in many cases, reduce the number of recognition groupings under § 1.987–11(f), thereby simplifying the application of the loss-to-the-extent-of-gain rule and minimizing the tracking burden with respect to any suspended losses.

Section 987 gain or loss subject to the section 988 characterization election is not eligible for the business needs exception under § 1.954–2(g)(2) because this election applies only to section 987 gain or loss that would otherwise be characterized by reference to assets that give rise to passive foreign personal holding company income. The business needs exception is available only for foreign currency gain or loss arising from a transaction or property that does not give rise to subpart F income (which includes foreign personal holding company income). See § 1.954–1(g)(2)(ii)(B)(1)(ii).

Similarly, section 987 gain or loss subject to the section 988 characterization election is not eligible for the election in § 1.954–2(g)(3) (election to characterize foreign currency gain or loss that arises from a specific category of subpart F income as gain or loss in that category). The § 1.954–2(g)(3) election applies only to gain or loss that is related to income categories described in the foreign base company income groups of § 1.954–1(c)(1)(iii)(A)(1) or (2) or the other subpart F income categories described in section 952(a); it does not apply to gain or loss related to passive foreign personal holding company income.⁴ By contrast, the section 988

characterization election applies only to section 987 gain or loss that would otherwise be characterized by reference to assets that give rise to passive foreign personal holding company income. Thus, the two elections are mutually exclusive by their terms.

Finally, section 987 gain or loss subject to the section 988 characterization election is not eligible for the election in § 1.954–2(g)(4) (election to treat all foreign currency gains or losses as foreign personal holding company income). Extending the § 1.954–2(g)(4) election to section 987 gain or loss could permit inappropriate use of section 987 losses and would be inconsistent with the limited purpose of the section 988 characterization election. Therefore, if an election is in effect under § 1.954–2(g)(3) or (4), the foreign currency gain or loss to which the election applies is simply determined without regard to the section 987 gain or loss treated as foreign currency gain or loss attributable to a section 988 transaction by reason of the section 988 characterization election.

C. GILTI High-Tax Exclusion

Under the 2023 proposed regulations, for purposes of applying the high-tax exclusion in § 1.951A–2(c)(7) (the “GILTI HTE”), all section 987 gain and loss in a tentative tested income group that is recognized by a CFC in a taxable year is treated as a single tentative tested income item that is treated as recognized by a tested unit separate from the CFC's other tested units. Proposed § 1.987–6(b)(2)(iii). As a result, section 987 gain or loss is not taken into account in applying the GILTI HTE with respect to the CFC's other items of tentative tested income. Instead, the GILTI HTE is applied separately to section 987 gain and loss and, as a result, section 987 gain or loss generally will not be eligible for the GILTI HTE unless the CFC is subject to foreign tax on currency gain recognized with respect to its interest in the QBU under the applicable foreign tax rules. See proposed § 1.987–6(b)(3).

Some comments noted that these rules would preclude the application of the GILTI HTE with respect to section 987 gain of a CFC even if the CFC's section 987 QBUs are operating in jurisdictions subject to a high foreign tax rate. Another comment noted that the proposed rules would treat section 987 gain or loss differently from currency gain or loss recognized under section 988 (for example, section 988 gain or loss on a net investment hedge with respect to the section 987 QBU) and would make it difficult to project a

⁴ While § 1.954–1(c)(1)(iii)(A)(1) includes categories of foreign personal holding company income, it expressly excludes passive foreign personal holding company income, which is described in § 1.954–1(c)(1)(iii)(B). Therefore, the two elections apply to mutually exclusive income groups.

taxpayer's effective tax rate due to the unpredictability of exchange rate fluctuations. This comment recommended that proposed § 1.987–6(b)(2)(iii) be modified to provide that (i) section 987 gain and loss is taken into account in determining the effective tax rate under § 1.951A–2(c)(7)(vi) and (ii) section 987 gain or loss associated with highly taxed tested units is excluded from the computation of tested income.

The final regulations retain the rule that section 987 gain or loss is treated as a single tentative tested income item that is separate from the CFC's other tested units. *See* § 1.987–6(b)(2)(iii). Although section 987 gain or loss is characterized by reference to the historical earnings of the section 987 QBU, which may correspond to one or more tested units, it is not equivalent to current year income or loss attributable to a tested unit. Section 987 gain or loss is not properly attributable to the tested unit that corresponds to the section 987 QBU or to the CFC tested unit, because in most cases neither the tested unit's country of residence nor the CFC's country of residence will take the section 987 gain or loss into account in determining foreign gross income. Therefore, attributing section 987 gain or loss to either tested unit would tend to be distortive and generally would not further the goals of the high-tax exclusion.⁵

In addition, treating section 987 gain or loss as a single item of tentative tested income, as if it were attributable to a separate tested unit (distinct from the section 987 QBU), is consistent with the determination that a branch comprises a separate tested unit, even if it is not a tax resident of the foreign country in which it is located, if the income of the branch is subject to an exclusion, exemption, or other similar relief (such as a preferential rate) in the CFC's country of tax residence. *See* § 1.951A–2(c)(7)(iv)(A)(3). Section 987 gain or loss is currency gain or loss of

the owner of the QBU, and these gains and losses are generally not subjected to residency-based taxation in either the country of the QBU or the country in which the CFC is a resident. Therefore, the section 987 gains and losses of the CFC are functionally equivalent to gain or loss of a branch that is not a tax resident in any country and whose income is not subject to residency-based taxation in the CFC's country of tax residence.

Accordingly, it is appropriate to test the effective rate of foreign tax on section 987 gains and losses as a separate item of tentative tested income. The alternative approach recommended by a comment (which would incorporate section 987 gain or loss in the tested units that correspond to the section 987 QBU) would distort the effective tax rate computation with respect to a CFC's other income because section 987 gain or loss typically is not subject to foreign tax. These distortions could be favorable or unfavorable to taxpayers, depending on the circumstances. Moreover, the comment's recommended approach would complicate the ordering rules and mechanics needed to apply the loss-to-the-extent-of-gain rule of § 1.987–11(e) with respect to section 987 gain or loss assigned to a tested income group, which would increase the administrative and compliance burden of the section 987 regulations.

The approach set forth in the proposed regulations is also most consistent with the policy underlying the determination of an appropriate "item" of income for purposes of applying the high-tax exception under section 954(b)(4) as is reflected in the legislative history to that section, which directs the Treasury Department and the IRS to allow reasonable groupings of items of income that are substantially taxed at the same rate in a single country. *See* H.R. Rept. No. 99–426, at 400–01 (1985) ("Although this rule applies separately with respect to each 'item of income' received by a [CFC], the committee expects that the Secretary will provide rules permitting reasonable groupings of items of income that bear substantially equal effective rates of tax in a given country. For example, all interest income received by a [CFC] from sources within its country of incorporation may reasonably be treated as a single item of income for purposes of this rule, if such interest is subject to uniform taxing rules in that country."). The Treasury Department and the IRS have determined that section 987 gains and losses are likely to be taxed at a different rate of tax than other income generally subject to tax either in the

country of the tested unit or in the country of residence of the CFC and therefore should reasonably be grouped and tested as a separate "item" of income for this purpose.

As noted in a comment, for purposes of the GILTI HTE, the final regulations treat section 987 gain or loss differently from section 988 gain or loss on a net investment hedge. However, the new hedging rule in § 1.987–14 will enable taxpayers to account for the hedge as an adjustment to unrecognized section 987 gain or loss, as described in part V.B of this Summary of Comments and Explanation of Revisions.

VIII. Comments and Changes to Proposed §§ 1.987–7A, 1.987–7B, and 1.987–7C—Partnerships

A. Partnership Rules Under the 2023 Proposed Regulations

The 2023 proposed regulations (and the 2016 final regulations) generally would apply aggregate theory to partnerships wholly owned by related persons ("section 987 aggregate partnerships"). *See* proposed § 1.987–7B. Under proposed § 1.987–1(b)(5)(ii), each partner in a section 987 aggregate partnership would be treated as an indirect owner of the partnership's eligible QBUs (and a section 987 aggregate partnership is not itself a QBU under section 989(a)). Thus, exchange gain or loss under section 987 would be measured from the perspective of the partners (rather than the partnership). The aggregate approach would serve to prevent a group of related parties from holding an eligible QBU through a partnership (rather than owning it directly) in order to change the section 987 treatment of the eligible QBU without meaningfully altering the group's economic position.

The 2023 proposed regulations would provide a different set of rules for partnerships that are not wholly owned by related partners. *See* proposed § 1.987–7A. For these partnerships, the 2023 proposed regulations would apply a hybrid approach to entity theory, under which unrecognized section 987 gain or loss of the partnership's eligible QBUs for a taxable year is determined at the partnership level and then allocated to the partners for purposes of computing the pool of net unrecognized section 987 gain or loss. Any section 987 gain or loss would be recognized and taken into account at the partner level.

The preamble to the 2023 proposed regulations notes that the Treasury Department and the IRS considered whether it would be appropriate to apply a hybrid approach to all

⁵ While the legislative history relating to the GILTI high-tax exclusion indicates that high-taxed income does not present base erosion concerns, the policy rationale underlying that view does not extend to excluding low-taxed income from GILTI merely because it may be earned by an entity that also earns high-taxed income. *See* S. Comm. on the Budget, Reconciliation Recommendations Pursuant to H. Con. Res. 71, S. Print. No. 115–20, at 371 (2017) ("The Committee believes that certain items of income earned by CFCs should be excluded from the GILTI [regime], either because they should be exempt from U.S. tax—as they are generally not the type of income that is the source of the base erosion concerns—or are already taxed currently by the United States. Items of income excluded from GILTI because they are exempt from U.S. tax under the bill include foreign oil and gas extraction income (which is generally immobile) and income subject to high levels of foreign tax.").

partnerships, regardless of whether the partners are related. 88 FR 78147 through 78148. The preamble explains that such an approach might reduce the complexity and compliance burden of the section 987 regulations, but that it could permit taxpayers to manipulate the application of section 987 by holding a section 987 QBU through a partnership rather than holding it directly. *Id.* at 78148.

The 2023 proposed regulations would not provide rules relating to a partner's application of section 987 with respect to a partnership that uses a different functional currency (which creates a separate layer of currency exposure). However, the preamble to the 2023 proposed regulations discusses alternative methodologies under which the partners could determine and recognize section 987 gain or loss with respect to their partnership interests. 88 FR 78148 through 78149.

B. Partnership Rules in the Final Regulations

1. In General

The Treasury Department and the IRS continue to study the appropriate treatment of partnerships for purposes of section 987 and, accordingly, the final regulations do not provide detailed rules concerning the determination of section 987 taxable income or loss and section 987 gain or loss in the case of a partnership. The final regulations also reserve on the treatment of a partnership as a QBU under section 989(a) and § 1.989(a)-1(b)(2)(i). *See* § 1.989(a)-1(b)(2)(i)(C).

Only one comment regarding partnerships was received in response to the 2023 proposed regulations. The portions of the comment that relate to partnership rules that are not included in the final regulations have not been adopted because they are outside the scope of these regulations. The Treasury Department and the IRS expect to address these issues in future guidance.

Pending future guidance, taxpayers must apply sections 987 and 989(a) with respect to partnerships using a reasonable method consistent with the statute. For example, if a domestic corporation owns an interest in a foreign partnership (which would use the euro as its functional currency if it is treated as a QBU under section 989(a)), and the partnership owns an eligible QBU that uses the Swiss franc as its functional currency, the domestic corporation may apply section 987 to the eligible QBU under an aggregate approach. Alternatively, under an entity approach, the partnership could be treated as a section 987 QBU of the domestic

corporation, and the eligible QBU could be treated as a section 987 QBU of the partnership. The domestic corporation could also apply a hybrid approach under the principles of the 2023 proposed regulations. However, taxpayers will not be considered to have applied a reasonable method unless they apply the same method consistently from year to year with respect to a particular partnership or eligible QBU. Members of a controlled group that are partners in the same partnership must apply the same method with respect to a particular partnership or eligible QBU, but unrelated partners are not subject to a consistency requirement. *See* § 1.987-7(b).

2. Application of the Final Regulations to Partnerships

Although section 987 applies to partnerships, only certain parts of the final regulations apply to partnerships. *See* § 1.987-7(b) and (c). In particular, the rules relating to suspended section 987 loss in §§ 1.987-11 and 1.987-13 apply to partnerships, and the deferral rules of § 1.987-12 continue to apply to partnerships, with certain modifications. *See* § 1.987-7(c)(2)(i) and (d). These rules are needed to prevent the selective recognition of losses. In addition, the final regulations provide that an annual recognition election and a section 988 mark-to-market election can be made with respect to a partnership (whether an aggregate or entity approach is applied). *See* § 1.987-7(c)(2)(ii) and (iii). These elections are expected to reduce the compliance burden of applying section 987 in the partnership context.

Similarly, the rules for determining the source and character of section 987 gain or loss under § 1.987-6 apply to partnerships, in order to facilitate application of the loss-to-the-extent-of-gain rule. *See* § 1.987-7(c)(2)(i). A comment suggested that special rules should apply to determine the source and character of section 987 gain or loss recognized in connection with the sale or redemption of a partnership interest under the principles of § 1.864(c)(8)-1. The final regulations do not adopt this approach because it would be inconsistent with section 987(3)(B) (under which section 987 gain or loss is sourced by reference to historical earnings) and could allow taxpayers to manipulate the source and character of section 987 gain or loss.

Because the section 987 regulations generally do not apply to partnerships, the general rules of the section 987 regulations must be adapted as necessary to apply § 1.987-7 and the

other applicable provisions to partnerships. *See* § 1.987-7(c)(3). The rules must also be applied in this manner to an S corporation, which is treated the same way as a partnership for purposes of the section 987 regulations. *See* § 1.987-7(f).

3. Loss Suspension Rule

Under the final regulations, the general loss suspension rule in § 1.987-11(c)(1) does not apply to partnerships. *See* § 1.987-7(d)(1)(i). Instead, section 987 loss generally will be suspended in the taxable year in which it would otherwise be recognized under the method used by the taxpayer to apply section 987 with respect to the partnership. *See* § 1.987-7(d)(1)(ii). The loss suspension rule of § 1.987-7(d)(1)(ii) applies to an eligible QBU that is directly owned by a partnership, regardless of whether an aggregate approach, an entity approach, or a hybrid approach is applied. *See* § 1.987-7(d)(1)(ii)(A). However, if a partnership is itself treated as a section 987 QBU of its partners under an entity approach, the loss suspension rule applies only if at least 95% of the capital and profits interests in the partnership are owned by related persons. *See* § 1.987-7(d)(1)(ii)(B). This limitation is intended to reduce the complexity and compliance burden of the section 987 regulations for partnerships owned by unrelated persons.

The final regulations provide several other exceptions to the loss suspension rule of § 1.987-7(d)(1)(ii). First, section 987 loss with respect to an eligible QBU owned by a partnership is not suspended if section 987 is consistently applied using a method under which section 987 gain or loss does not arise with respect to historic items (for example, a method that follows the principles of §§ 1.987-3 through 1.987-5, under which historic items are assigned a historic rate, such that their balance sheet value does not change in response to changes in the value of the section 987 QBU's functional currency). *See* § 1.987-7(d)(2)(i). Second, section 987 loss is not suspended if an annual recognition election is in effect. *See* § 1.987-7(d)(2)(ii). Finally, section 987 loss is not suspended if the de minimis rule in § 1.987-11(c)(2) applies (that is, if the amount of section 987 loss subject to suspension does not exceed the lesser of \$3 million or two percent of gross income, as described in part X.A.1 of this Summary of Comments and Explanation of Revisions). *See* § 1.987-7(d)(2)(iii). These rules generally align with the scope of the loss suspension rule in § 1.987-11(c)(1).

4. Adjustments to the Basis of a Partner's Interest in the Partnership

The proposed regulations would provide that a partner's basis in a partnership is adjusted when the partner recognizes section 987 gain or loss, defers section 987 gain or loss, or suspends section 987 loss attributable to the partnership. Proposed § 1.987-7A(e). This rule is intended to avoid duplication of section 987 gain or loss (for example, when the partnership interest is sold). The final regulations retain this rule for taxpayers that apply section 987 using a method that results in recognition, deferral, or suspension of section 987 gain or loss at the partner level. Under § 1.987-7(e), the partner's basis in its partnership interest is adjusted under the principles of section 705 as though the section 987 gain or loss was part of the partner's distributive share of partnership items. *See* § 1.987-7(e).

A commenter requested clarification concerning the interaction of this basis adjustment rule with section 704(d). Section 704(d)(1) provides that a partner's distributive share of partnership loss (including capital loss) shall be allowed only to the extent of the basis of that partner's interest in the partnership at the end of the partnership year in which such loss occurred. Section 704(d)(2) provides for the carryover of the excess of any loss over such basis to the next taxable year. To the extent that basis is available in the next taxable year, the partner is able to take the loss into account. Relatedly, the partner will decrease the adjusted basis in its partnership interest to the extent that any loss carryover is taken into account within the taxable year. *See* section 705(a)(2).

The final regulations clarify that the principles of section 704(d) are applied as though items of section 987 loss, deferred section 987 loss, or suspended section 987 loss were part of the partner's distributive share of partnership items. *See* § 1.987-7(e). The basis adjustment rule in § 1.987-7(e) is intended to replicate the basis adjustments that would occur if the relevant section 987 gain or loss was taken into account as part of the partner's distributive share of partnership income or loss (including the effects of section 704(d)).

5. Other Special Rules for Partnerships

The final regulations contain several other rules that facilitate the application of section 987 to partnerships. If a partner in a partnership is treated as the owner of a section 987 QBU directly owned by the partnership (for example,

under an aggregate approach), § 1.987-7(c)(3)(ii) provides a special rule that is used to determine the members of the owner's controlled group for purposes of §§ 1.987-12 and 1.987-13. Under this rule, any member of the partnership's controlled group is treated as a member of the partner's controlled group so long as the partner continues to be a partner in the partnership. Thus, for example, if the partnership contributes the section 987 QBU's assets to a wholly owned subsidiary of the partnership, the subsidiary will be treated as a member of the partner's controlled group and the contribution may be treated as a deferral event for purposes of § 1.987-12.

When a partnership is itself treated as a QBU of a partner that is subject to section 987, and the partnership is not engaged in any trade or business (for example, a partnership that functions as a holding company), the rules of § 1.987-13(b) through (d) do not apply. Those rules are designed to attribute suspended section 987 loss to a successor suspended loss QBU if the assets of a section 987 QBU continue to be used in the same trade or business by a member of the controlled group, and they trigger the recognition of suspended section 987 loss if the section 987 QBU terminates without a successor. However, when a QBU that has suspended section 987 loss is not engaged in any trade or business, the rules of § 1.987-13(b) through (d) would not result in the appropriate recognition of suspended section 987 loss and could be prone to manipulation. Accordingly, the suspended section 987 loss can be recognized only under the loss-to-the-extent-of-gain rule of § 1.987-11(e).

The transition rules in § 1.987-10 do not apply to partnerships. Instead, the applicable rules of the section 987 regulations take effect on the transition date with respect to section 987 gain or loss determined and recognized under the taxpayer's existing method. In addition, taxpayers may not apply the fresh start transition method with respect to a partnership. As explained in the preamble to the 2023 proposed regulations, the fresh start transition method is no longer available because that method results in the elimination of pretransition gain or loss, and (if it were available) it could be opportunistically used by taxpayers to eliminate their pretransition gain. 88 FR 78150 and 78156.

The final regulations also clarify that the rule in § 1.988-1(a)(10)(i), which provides that transactions between a taxpayer and its QBU generally are not section 988 transactions, applies only to disregarded transactions. Thus, a nonfunctional currency transaction

between a partner and a partnership could be treated as a section 988 transaction even though the partnership is treated as a QBU subject to section 987.

IX. Comments and Changes to Proposed § 1.987-10: Transition Rules

Proposed § 1.987-10 would provide transition rules for the first year in which the section 987 regulations are applicable. In particular, proposed § 1.987-10(e) would provide rules for determining and recognizing pretransition gain or loss with respect to each of a taxpayer's QBUs.

A. Computation of Pretransition Gain or Loss

1. Taxpayers That Applied Section 987 Using an Eligible Pretransition Method

Under the 2023 proposed regulations, the computation of pretransition gain or loss would differ depending on how the taxpayer applied section 987 before the transition date. If the taxpayer applied section 987 to a section 987 QBU using an eligible pretransition method (as described in part IX.B of this Summary of Comments and Explanation of Revisions), the owner would use that method to compute pretransition gain or loss. Proposed § 1.987-10(e)(2). The owner's pretransition gain or loss would be equal to the amount of section 987 gain or loss that it would have recognized under the eligible pretransition method if the QBU terminated on the day before the transition date, with certain adjustments. Proposed § 1.987-10(e)(2)(i)(A).

Under proposed § 1.987-10(e)(2)(i)(B), the amount of pretransition gain or loss would be increased or reduced by the owner functional currency net value adjustment ("OFCNV adjustment"), which reflects any change to the basis of the section 987 QBU's assets (net of liabilities) that occurs as a result of the transition. For example, if a taxpayer applied an earnings only method under which currency gain or loss on the QBU's capital was not recognized at the time of a remittance but was separately tracked and accounted for in determining the basis of distributed assets, the currency gain or loss on capital would be accounted for as part of the OFCNV adjustment.

Two comments were received relating to the OFCNV adjustment. One comment requested that taxpayers be permitted to use the CTA prepared for financial accounting purposes rather than making the OFCNV adjustment. The comment asserted that taxpayers applying an earnings only method might

not have the information necessary to compute the OFCNV adjustment.

The final regulations do not permit taxpayers to use the CTA in lieu of making the OFCNV adjustment. As explained in part V.A.2 of this Summary of Comments and Explanation of Revisions, the CTA amount may be substantially different from the amount of section 987 gain or loss that is properly taken into account for tax purposes. Moreover, it should not be unduly burdensome for a taxpayer to compute the OFCNV adjustment because the relevant information is already needed to apply the taxpayer's existing pretransition method.

Another comment recommended that, in the case of taxpayers applying an earnings only method, currency gain or loss with respect to the QBU's capital should not be taken into account in determining pretransition gain or loss (which is ultimately recognized as section 987 gain or loss after the transition date). The comment noted that taxpayers may have adopted the earnings only method to reduce the size of their section 987 gain or loss pools and that the earnings only method serves to mitigate the potential for selective recognition of large section 987 losses. Therefore, the comment requested that the OFCNV adjustment instead be taken into account as an adjustment to asset basis.

The Treasury Department and the IRS agree that, for taxpayers applying an earnings only method, accounting for the OFCNV adjustment in determining the basis of a section 987 QBU's assets would produce a reasonable result that is consistent with these taxpayers' pretransition method. Accordingly, under the final regulations, if a taxpayer applied an earnings only method before the transition date and does not make a current rate election for the taxable year beginning on the transition date, the historic rate assigned to the section 987 QBU's historic assets (other than inventory) is equal to the exchange rate that would have been used to translate those assets if they had been distributed to the owner on the day before the transition date (the "pretransition translation rate"). See § 1.987–10(d)(3)(ii). As a result, no OFCNV adjustment is made with respect to those assets, but currency gain or loss related to those assets will be accounted for as the assets are sold or depreciated under § 1.987–3. For taxpayers that make a current rate election (and thus will not take historic rates into account under § 1.987–3), currency gain or loss on the QBU's capital must be accounted for in determining pretransition gain or

loss. See § 1.987–10(d)(3)(i) and (e)(2)(i)(B).

A comment raised a question as to whether the delegation of regulatory authority under section 987(3) is self-executing. The comment suggested that, if section 987(3) is not self-executing, then it might not be appropriate to attribute pretransition gain or loss to taxpayers that have not accounted for section 987 gain or loss before the transition date. The Treasury Department and the IRS have concluded that section 987(3) is self-executing because it provides a mandatory delegation under which the Secretary is directed to determine how (rather than whether) the owner of a section 987 QBU should make proper adjustments in computing its taxable income. See, e.g., *15 W 17th St. LLC v. Commissioner*, 147 T.C. 557 (2016) (articulating standard for determining whether a statute is self-executing in the absence of regulations); *Est. of Neumann v. Commissioner*, 106 T.C. 216 (1996) (holding delegation was self-executing because it related to how, rather than whether, the statute applied). Therefore, taxpayers currently are obligated to determine section 987 gain or loss in a reasonable manner and must account for pretransition gain or loss once the regulations become applicable.

2. Taxpayers That Did Not Apply Section 987 Using an Eligible Pretransition Method

Under proposed § 1.987–10(e)(3), taxpayers that did not apply an eligible pretransition method would be required to determine pretransition gain or loss by applying a simplified version of the computation described in § 1.987–4(d) to determine unrecognized section 987 gain or loss ("annual unrecognized section 987 gain or loss") for each taxable year since the section 987 QBU's inception. Proposed § 1.987–10(e)(3)(iii). Pretransition gain or loss would be reduced by any section 987 gain or loss recognized before the transition date. Proposed § 1.987–10(e)(3)(ii)(B).

Comments asserted that the method provided in proposed § 1.987–10(e)(3) could be burdensome to apply and difficult to administer. Some comments recommended that taxpayers should not be required to compute annual unrecognized section 987 gain or loss for each taxable year since the QBU's inception. Instead, the comments suggested that the final regulations provide a reasonable cutoff date before which pretransition gain or loss would not be computed. Another comment requested that taxpayers be permitted to determine pretransition gain or loss

using the earnings and capital method described in the 1991 proposed regulations, as this would avoid the need to prepare tax basis balance sheets. A further comment recommended adoption of a de minimis rule for taxpayers with minimal pretransition gain or loss.

The Treasury Department and the IRS agree that, when a QBU has been operating for a long period, computing annual unrecognized section 987 gain or loss for all taxable years since the QBU's inception could be burdensome. Accordingly, the final regulations provide a cutoff date of September 7, 2006, which is the date on which proposed section 987 regulations were published in the **Federal Register** (71 FR 52876) (the "2006 proposed regulations"). Under the final regulations, taxpayers that did not apply an eligible pretransition method must compute pretransition gain or loss only for taxable years beginning on or after September 7, 2006. The publication date of the 2006 proposed regulations is an appropriate cutoff date for this purpose because the 2006 proposed regulations contained transition rules that were conditioned on the application of section 987 using a reasonable method. See § 1.987–10(a)(2) of the 2006 proposed regulations.

The final regulations also provide a de minimis rule to reduce the compliance burden on small businesses that own section 987 QBUs.⁶ Under the de minimis rule, a qualifying taxpayer may elect to treat all QBUs that fall below the de minimis threshold as having no pretransition gain or loss. To qualify for the de minimis rule, the owner of a section 987 QBU must have gross receipts that fall below the threshold for the small business exception in section 163(j)(3) (that is, the owner must have gross receipts of \$25 million or less, indexed to inflation and averaged over the prior 3-year period). If this test is met, the de minimis rule applies to any section 987 QBU with gross assets of less than \$10 million (averaged over the same 3-year period and taking into account the assets of all section 987 QBUs in the same country that are owned by the same owner or a member of its controlled group).

The final regulations do not permit taxpayers to apply an earnings and capital method in lieu of computing annual unrecognized section 987 gain or loss under § 1.987–10(e)(3). However, as explained in part V.A.1 of this Summary

⁶ Although taxpayers that own section 987 QBUs generally are not small businesses, this rule is intended to limit the compliance burden for small businesses that may be affected.

of Comments and Explanation of Revisions, the rules for computing unrecognized section 987 gain or loss for a taxable year under § 1.987–4(d) have been modified so that they can be applied without the need for tax basis balance sheets. As a result, the method provided in § 1.987–10(e)(3) can similarly be applied without tax basis balance sheets (that is, by computing QBU net value using the formula provided in § 1.987–4(e)(2)(iii)).

B. Definition of an Eligible Pretransition Method

Under the 2023 proposed regulations, an eligible pretransition method would be defined to include a reasonable application of the earnings and capital method described in the 1991 proposed regulations, any other reasonable method that produces the same total amount of income as the earnings and capital method over the life of the owner, or an earnings only method that does not produce the same total amount of lifetime income as an earnings and capital method (subject to certain restrictions, including a consistency requirement). Proposed § 1.987–10(e)(4)(i) through (iii). The owner must have applied the eligible pretransition method with respect to each taxable year beginning before the transition date in which it was the owner of the section 987 QBU. Proposed § 1.987–10(e)(4). For this purpose, a method under which the owner of a section 987 QBU defers the recognition of section 987 gain or loss until the section 987 QBU is terminated, sold, or liquidated is not a reasonable method. Proposed § 1.987–10(e)(4)(iv).

Comments requested clarification concerning the definition of an eligible pretransition method. The comments noted that some taxpayers have applied the 1991 proposed regulations with modifications; for example, some taxpayers apply an annual netting convention to determine the amount of a remittance or treat a group of QBUs with the same functional currency as a single QBU. Other comments indicated that taxpayers may not account for frequently recurring intercompany transactions in computing their section 987 gain or loss.

One comment suggested that taxpayers should be treated as having applied an eligible pretransition method so long as they made a good faith effort to apply section 987 using a reasonable method. Another comment recommended that taxpayers that have consistently relied on their CTA account as an estimate of unrealized section 987 gain or loss should be considered to have applied an eligible pretransition method (and thus should be permitted

to use their CTA account to determine the amount of pretransition gain or loss).

Another comment suggested that a CFC that has consistently applied a reasonable method since the enactment of the Tax Cuts and Jobs Act (“TCJA”), Public Law 115–97, 131 Stat. 2054 (2017), should be treated as having applied an eligible pretransition method, even if the method was not applied in previous taxable years. In particular, the comment recommended that an owner that began applying an earnings only method described in proposed § 1.987–10(e)(4)(iii) after the TCJA was enacted should be deemed to meet the consistency requirement of proposed § 1.987–10(e)(4)(iii)(B).

In response to these comments, the final regulations clarify and expand the definition of an eligible pretransition method under § 1.987–10(e)(4). The definition is intended broadly to include any method that complies with the statutory requirements of section 987 in a reasonable manner.⁷

1. Errors Made in Applying a Pretransition Method and Certain Consistent Practices That Are Not Treated as Errors

The final regulations provide that a taxpayer is treated as applying an eligible pretransition method even if the taxpayer made an error in the application of its method or did not apply the method in all taxable years in which it was the owner of the section 987 QBU. § 1.987–10(e)(4)(iv). However, taxpayers are required to compute pretransition gain or loss under § 1.987–10(e)(2) as though the eligible pretransition method had been applied without error for all prior taxable years. Thus, for example, if a taxpayer made an error in applying its method for a prior year, the deemed termination amount under § 1.987–10(e)(2)(i)(A) is equal to the amount of section 987 gain or loss the taxpayer would have recognized on termination if it had not made the error and its section 987 QBU terminated on the day before the transition date.

If a taxpayer consistently used a reasonable convention to apply section 987 before the transition date, the taxpayer must use the same convention in determining pretransition gain or loss under § 1.987–10(e)(2). See § 1.987–10(e)(4)(v)(B)(1). Thus, unlike a taxpayer that made an error in applying its pretransition method, a taxpayer that

used a reasonable convention would not be required to recompute pretransition gain or loss without regard to the convention. Similarly, if a taxpayer had a consistent practice under which it did not account for frequently recurring disregarded transactions in determining the amount of section 987 gain or loss recognized upon a remittance, this practice is not treated as an error. See § 1.987–10(e)(4)(v)(B)(2). However, this rule does not apply unless the taxpayer reasonably accounted for the disregarded transactions in determining the amount of unrecognized section 987 gain or loss with respect to the section 987 QBU (for example, in the case of a taxpayer applying the 1991 proposed regulations, by adjusting the equity and basis pools to reflect the amount of each transfer).

2. Timing for Application of an Eligible Pretransition Method

The final regulations provide that a method of applying section 987 is not an eligible pretransition method unless it was applied on at least one tax return filed before November 9, 2023 (when the 2023 proposed regulations were filed with the **Federal Register**). See § 1.987–10(e)(4). Thus, a taxpayer that first adopted a reasonable method in the first taxable year after the TCJA was enacted would be treated as applying an eligible pretransition method, but a method adopted after November 9, 2023, would not qualify. Similarly, the final regulations modify the consistency requirement for the earnings only method under § 1.987–10(e)(4)(iii)(B) to require consistent application for all taxable years since the first taxable year in which the owner applied an eligible pretransition method. As a result, an owner that began applying the earnings only method after the TCJA was enacted (and did not previously apply a different eligible pretransition method) would meet this requirement.

3. Reliance on the CTA

Under the final regulations, a method that relies on the CTA determined for financial accounting purposes would not qualify as an eligible pretransition method; thus, taxpayers relying on CTA computations must determine pretransition gain or loss using the method provided in § 1.987–10(e)(3). As discussed in part V.A.2 of this Summary of Comments and Explanation of Revisions, because the amount of the CTA can be substantially different from the amount of section 987 gain or loss properly computed for tax purposes, reliance on the CTA could result in the recognition of significant amounts of artificial pretransition gain or loss.

⁷ In certain instances, a method that does not constitute a reasonable application of section 987 is treated as an eligible pretransition method in order to reduce the compliance burden of transitioning onto the section 987 regulations.

C. Recognition of Pretransition Gain or Loss

In general, under the proposed regulations, pretransition gain is treated as net unrecognized section 987 gain, while pretransition loss is treated as suspended section 987 loss. Proposed § 1.987–10(e)(5)(i)(A) and (B). This rule is intended to prevent taxpayers from selectively recognizing pretransition loss while deferring pretransition gain until the year of a remittance. Alternatively, taxpayers could elect to amortize pretransition gain or loss over a period of ten years beginning on the transition date. Proposed § 1.987–10(e)(5)(ii).

A comment recommended that pretransition loss should not be treated as suspended section 987 loss in the first taxable year in which the section 987 regulations apply. Instead, the comment recommended that pretransition loss should be treated as net unrecognized section 987 loss upon transition, which would later become suspended in the year of a remittance. The comment noted that this would create parity between pretransition loss and pretransition gain, which is treated as net unrecognized section 987 gain in the first taxable year in which the regulations apply.

Another comment recommended that, instead of determining pretransition gain or loss separately with respect to each QBU, the total amount of pretransition gain or loss in each category should be aggregated and netted among all QBUs of the same owner, with the net amounts reallocated to each QBU on a pro rata basis. In the case of a consolidated group or a group of related CFCs, the comment suggested further netting between all members of the consolidated group or group of related CFCs, respectively.

With respect to the amortization election under proposed § 1.987–10(e)(5)(ii), a comment suggested that taxpayers should be allowed to elect a shorter amortization period in which to recognize pretransition gain or loss (either four or five years), which would better align with certain taxpayers' internal forecasting and planning windows. A comment also requested clarification as to how the amortization election applies with respect to a terminating QBU (that is, a section 987 QBU that terminated after November 9, 2023, and before the taxable year in which the section 987 regulations are generally applicable).

The final regulations provide that, if a current rate election is in effect in the taxable year beginning on the transition date (and an annual recognition election

is not in effect), pretransition gain or loss is treated as net unrecognized section 987 gain or loss. Thus, pretransition losses are treated the same way as pretransition gains. However, if a current rate election is not in effect (or an annual recognition election is in effect) in the taxable year beginning on the transition date, pretransition loss is treated as suspended section 987 loss upon transition. This rule is necessary to prevent pretransition loss from being recognized without limitation.

The final regulations do not permit aggregation and netting of pretransition gain or loss within the same category. Absent an amortization election, the source and character of pretransition gains and losses generally will not be assigned in the taxable year beginning on the transition date, so it would not be possible to net gains and losses separately within each recognition grouping. In addition, aggregation and netting would make the transition rules more complicated and would increase the burden of administering these rules. Finally, taxpayers that make the amortization election can, as a practical matter, achieve the effect of netting pretransition gains and losses, because those gains and losses will be recognized over the same ten-year period.

The final regulations retain the ten-year amortization period under § 1.987–10(e)(5)(ii) and do not permit taxpayers to elect a shorter amortization period. The Treasury Department and the IRS have determined that a uniform amortization period should apply to all electing taxpayers to prevent the potential for whipsaw that could result from taxpayers with losses electing shorter amortization periods than taxpayers with gains. In addition, a ten-year period is appropriate given the expected magnitude of the pretransition gains and losses that are subject to amortization. However, taxpayers that do not make the amortization election will retain some control over when gains and losses are recognized (by choosing whether or not to make remittances). The final regulations also expand the acceleration rule of § 1.987–10(e)(5)(ii)(B) to cover transactions entered into with a principal purpose of avoiding the recognition of pretransition gain that is subject to the amortization election. See § 1.987–10(e)(5)(ii)(B)(1).

In addition, the final regulations clarify the application of the amortization election in the case of a terminating QBU. Under § 1.987–10(e)(5)(ii)(C), any deferred section 987 gain or suspended section 987 loss with respect to a terminating QBU that has not been recognized before the first

taxable year in which the section 987 regulations are generally applicable is subject to amortization beginning in that year. However, the final regulations do not modify the treatment of section 987 gain or loss that has already been recognized before the transition date; thus, such section 987 gain or loss is not subject to amortization.

X. Comments and Changes to Proposed § 1.987–11: Suspended Section 987 Loss Relating to Certain Elections; Loss-to-the-Extent-of-Gain Rule

Proposed § 1.987–11 provides rules that suspend the recognition of section 987 loss in connection with certain elections and rules under which suspended section 987 loss is recognized to the extent of recognized section 987 gain (the “loss-to-the-extent-of-gain rule”).

A. Loss Suspension Rule

1. In General

Under proposed § 1.987–11(c), in a taxable year in which a current rate election is in effect (and an annual recognition election is not in effect), any section 987 loss that would otherwise be recognized as a result of a remittance or termination would be treated as suspended section 987 loss.

A comment requested that the loss suspension rule of § 1.987–11(c) be eliminated because it prevents taxpayers from recognizing section 987 losses in connection with legitimate commercial transactions. The comment noted that the recognition of section 987 loss often is not the primary factor in determining whether a taxpayer causes its branch to make a remittance.

The final regulations retain the loss suspension rule in § 1.987–11(c). Congress specifically authorized loss limitation rules to address the potential for selective recognition of losses. See section 989(c)(2). These rules are integral to the current rate election; without a loss limitation the current rate election would create opportunities for abuse. Although remittances are often made for non-tax reasons, taxpayers can cause section 987 QBUs to make otherwise disregarded transfers for the purpose of recognizing large section 987 losses, and taxpayers have the ability to structure transactions in ways that defer the recognition of section 987 gain.

However, the final regulations limit the scope of the loss suspension rule to cover transactions that would otherwise result in the recognition of substantial section 987 losses. Under § 1.987–11(c)(2), if a current rate election is in effect, section 987 loss is not suspended unless the amount of section 987 loss

subject to suspension in the taxable year exceeds the lesser of \$3 million or two percent of the controlled group's gross income. This threshold is applied collectively to the section 987 loss of the owner and all members of the owner's controlled group. This rule is expected to reduce the compliance burden of tracking suspended section 987 losses, particularly for taxpayers with small section 987 QBUs.

2. Exception for QBUs With De Minimis Historic Assets

Comments requested an exception from the loss suspension rule for section 987 QBUs with minimal historic assets (such as financial institutions and insurance companies). Alternatively, a comment recommended that the loss suspension rule should apply solely to section 987 loss associated with historic items.

The final regulations do not provide an exception to the loss suspension rule for taxpayers with a de minimis amount of historic assets. Such an exception would be difficult to administer because it would require long-term tracking to ensure that the de minimis threshold was met in all prior taxable years over which the pool of net unrecognized section 987 gain or loss accrued. Further, for taxpayers with minimal historic assets, the compliance burden of applying the default rules of the final regulations (that is, the rules that apply in the absence of a current rate election) is expected to be more limited. A taxpayer that does not make a current rate election generally would not be subject to the loss suspension rule.

Similarly, under the final regulations, the loss suspension rule of § 1.987-11(c) is not limited to section 987 loss associated with historic items. Under § 1.987-4, the pool of net unrecognized section 987 gain or loss is determined with respect to a section 987 QBU as a whole. Separate computations of unrecognized section 987 loss associated with marked and historic items, respectively, would add significant complexity. Moreover, concerns related to selective recognition of section 987 loss can arise with respect to both marked and historic items.

B. Loss-to-the-Extent-of-Gain Rule

Under proposed § 1.987-11(e), an owner of a section 987 QBU recognizes suspended section 987 loss to the extent that it recognizes section 987 gain in the same recognition grouping (that is, section 987 gain that has the same source and character as the suspended section 987 loss) in the same taxable year. As explained in the preamble to

the 2023 proposed regulations, this rule is intended to prevent taxpayers from selectively recognizing section 987 losses when a current rate election is in effect. 88 FR 78139.

1. Lookback Rule

The 2023 proposed regulations do not include a lookback rule under which suspended section 987 loss can be recognized to the extent of section 987 gain recognized in previous taxable years. The preamble to the 2023 proposed regulations expressed concern that taxpayers might exploit a lookback rule by selectively triggering the recognition of section 987 gain in a taxable year in which the gain could be offset by losses or in which a taxpayer had excess foreign tax credits. 88 FR 78139.

Several comments recommended adoption of a lookback rule. Alternatively, a comment recommended modifying proposed § 1.987-11(e) to permit taxpayers to carry back section 987 losses to earlier years. Comments posited that, even if section 987 gain recognized in a previous year is offset by a loss carryforward or other tax attribute, the section 987 gain would still have a net impact on U.S. tax because the attribute would no longer be available to be utilized in subsequent years. However, the same comment expressed a minority view that a lookback rule would afford some potential for abuse, and suggested consideration of an anti-abuse rule targeting remittances that do not have economic effect. One comment recommended that the lookback period for section 987 gains should include years ending before the transition date, while another comment suggested that the lookback period should include only post-transition years.

The Treasury Department and the IRS agree that a lookback rule would allow for more evenhanded treatment of section 987 gains and losses when section 987 gain is recognized in an earlier taxable year and that a lookback rule could be tailored to prevent abuse. Accordingly, the final regulations provide that suspended section 987 loss is recognized to the extent of net section 987 gain recognized in the current year and the three preceding taxable years. See § 1.987-11(e)(3). Taxable years beginning before the transition date are not included in the lookback period, given the substantial flexibility taxpayers have had in determining the timing, amount, and character of section 987 gain or loss recognized before the applicability date of the final regulations.

Under an anti-abuse rule, section 987 gain is disregarded for purposes of the loss-to-the-extent-of-gain rule if it is recognized with a principal purpose of reducing U.S. Federal income tax liability, including over multiple taxable years. See § 1.987-11(e)(3)(v). For example, this rule would apply if an owner recognizes section 987 gain in a taxable year ("year 1") in which the section 987 gain is offset by a tax attribute that would not otherwise be used, the section 987 gain is recognized with a principal purpose of releasing suspended section 987 loss in a subsequent taxable year ("year 2"), and the net effect of recognizing both the section 987 gain and the suspended section 987 loss would reduce the combined U.S. Federal income tax liability for years 1 and 2. In determining whether such a principal purpose exists, one relevant factor is the extent to which a remittance does not result in a sustained economic contraction of the section 987 QBU (over a period of at least 12 months). Thus, for example, if a section 987 QBU makes a remittance giving rise to the recognition of section 987 gain, and the owner makes an offsetting contribution to the section 987 QBU within 12 months of the remittance, the section 987 gain may be disregarded for purposes of the loss-to-the-extent-of-gain rule.

The lookback period generally is limited to three years, because a longer lookback period would require additional tracking of section 987 gains recognized in prior taxable years and would increase the compliance and administrative burden of the section 987 regulations. In addition, this rule is consistent with other Code provisions that limit loss carryforward or carryback periods to a fixed number of years. See, e.g., section 1212(a)(1) (generally permitting capital losses to be carried forward for five years and carried back for three years). Moreover, it may be difficult to enforce the anti-abuse rule in § 1.987-11(e)(3)(v) with respect to transactions occurring more than three years before the taxable year in which suspended section 987 loss is recognized.

The final regulations provide a different lookback period for taxpayers that make both an annual recognition election and a current rate election. For these taxpayers, the lookback period includes all taxable years in which both elections are continuously in effect. See § 1.987-11(e)(3)(iv)(B). As a result, for purposes of applying the loss-to-the-extent-of-gain rule, the total amount of section 987 gain recognized under the annual recognition election for all

taxable years in which both elections are continuously in effect is offset by the total amount of section 987 loss recognized under the annual recognition election for all taxable years in which both elections are continuously in effect. As explained in the preamble to the proposed regulations, the Treasury Department and the IRS are concerned that, in the absence of such a rule, taxpayers would be able to recognize net losses on a cumulative basis for the taxable years to which the annual recognition election applies. 88 FR 78140. In addition, the tracking burden in this context should be more limited because losses generally are not suspended in taxable years in which an annual recognition election is in effect.

In general, following a transaction described in section 381(a), section 987 gain recognized by the transferor corporation in the three years preceding the transaction is taken into account for purposes of the lookback rule. *See* § 1.987–11(e)(5)(i). However, this rule does not apply in the case of an inbound reorganization or liquidation. *See* § 1.987–11(e)(5)(ii). Thus, section 987 gain recognized by the foreign transferor corporation (which may have been subject to a lower effective tax rate) cannot be used to release suspended section 987 loss of the domestic acquiring corporation.

2. Application of the Loss-to-the-Extent-of-Gain Rule at the Owner Level

Under proposed § 1.987–11(e), the loss-to-extent-of-gain rule is applied separately to each owner with respect to all of its section 987 QBUs. Comments asserted that the loss-to-the-extent-of-gain rule could produce harsh results when one CFC recognizes section 987 gain and a related CFC has suspended section 987 loss. One comment noted that concerns about selective recognition of section 987 loss should be mitigated to the extent that a different CFC in the same group recognizes section 987 gain.

Another comment recommended that, with respect to section 987 gain or loss that is characterized as tested income, the loss-to-the-extent-of-gain rule should be applied at the level of the U.S. shareholder with respect to all section 987 QBUs of CFCs owned by the U.S. shareholder, consistent with the general framework of section 951A. Under this approach, the excess of the U.S. shareholder's pro rata share of section 987 losses of any CFC attributable to a tested income group over its pro rata share of section 987 gains attributable to the same tested income group would be suspended (and available for recognition to the extent of

the U.S. shareholder's pro rata share of section 987 gains recognized in future years). Another comment recommended that the loss-to-the-extent-of-gain rule should be applied to a group of related CFCs by treating the group as a single owner. Under this approach, one CFC could recognize suspended section 987 loss to the extent that another CFC recognized section 987 gain.

The final regulations generally apply the loss-to-the-extent-of-gain rule separately to each owner, taking into account section 987 gain or loss with respect to all of the owner's section 987 QBUs. The final regulations do not apply the loss-to-the-extent-of-gain rule at the level of the U.S. shareholder. Because section 987 gain or loss is a CFC-level income item that is taken into account in computing each CFC's taxable income and earnings and profits, a U.S. shareholder level loss limitation rule could reach inappropriate results for minority shareholders and would be difficult to administer. For example, if a CFC is owned by multiple U.S. shareholders, application of the loss-to-the-extent-of-gain rule at the U.S. shareholder level would require multiple separate computations to determine the suspended section 987 loss recognized by a single CFC.

Similarly, the final regulations do not treat a group of related CFCs as a single owner for purposes of the loss-to-the-extent-of-gain rule. A CFC grouping rule would make the loss-to-the-extent-of-gain rule more complex and more difficult to administer. Moreover, under a CFC grouping rule, a CFC could recognize suspended section 987 loss as a result of a different CFC's recognition of section 987 gain in the same recognition grouping in a taxable year in which the loss cannot be utilized.

3. Expansion of the Loss-to-the-Extent-of-Gain Rule

A comment recommended expansion of the loss-to-the-extent-of-gain rule so that suspended section 987 loss could be recognized to the extent of any income recognized by the owner (including but not limited to section 987 gain) that has the same source and character as the suspended section 987 loss. Another comment recommended that suspended section 987 loss should be recognized to the extent of any section 987 gain recognized by the owner, even if the section 987 gain is in a different recognition grouping. The comment suggested that the requirement for section 987 gain to be in the same recognition grouping as suspended section 987 loss does not serve the policy goals of section 987, and that concerns relating to mismatches

between the source and character of section 987 gains and losses are adequately policed by other provisions of the Code.

The final regulations do not expand the scope of the loss-to-the-extent-of-gain rule to cover taxable income other than section 987 gain. Taxable income other than section 987 gain does not release suspended section 987 loss under the loss-to-the-extent-of-gain rule because this rule is intended to target selective recognition of section 987 loss and deferral of section 987 gain.

In addition, the final regulations retain the rule that section 987 gain can only release suspended section 987 loss in the same recognition grouping. This rule ensures that the loss-to-the-extent-of-gain rule effectively limits selective recognition of losses pursuant to the authority provided in section 989(c)(2). In particular, it prevents taxpayers from avoiding the loss limitation by recognizing gains that are subject to a low rate of tax (or are not subject to U.S. tax).

As explained in part VII.B of this Summary of Comments and Explanation of Revisions, the final regulations allow section 987 gain or loss to be assigned to multiple subpart F income groups. Therefore, each separate subpart F income group (as defined in § 1.960–1(d)(2)(ii)(B)) constitutes a separate recognition grouping. *See* § 1.987–11(f)(2)(ii). However, as explained in part VII.B.2 of this Summary of Comments and Explanation of Revisions, taxpayers can reduce the number of subpart F recognition groupings by making the section 988 characterization election provided in § 1.987–6(b)(2)(i)(C).

4. Application to Terminating QBUs

A comment requested clarification concerning the application of the loss-to-the-extent-of-gain rule in the case of a terminating QBU. The final regulations clarify that, when a terminating QBU has suspended section 987 loss in a taxable year before the final regulations are generally applicable, section 987 gain with respect to a taxpayer's other section 987 QBUs is assigned to a recognition grouping under the method applied by the taxpayer before the transition date. The owner recognizes suspended section 987 loss with respect to a terminating QBU only to the extent of its net section 987 gain in the same recognition grouping for the taxable year.

5. SRLY Rule Relating to Suspended Section 987 Losses

When a corporation that is the owner of a section 987 QBU joins a consolidated group, the corporation may have suspended section 987 losses that arose in earlier years. As explained in the preamble to the 2023 proposed regulations, the regulations issued under the authority of section 1502 generally limit a consolidated group's ability to use tax attributes generated in separate return years (as defined in § 1.1502-1(e)). 88 FR 78154. The Treasury Department and the IRS requested comments on how rules similar to the rules of § 1.1502-21(c) (limiting the use of net operating losses) should apply to suspended and deferred section 987 losses. *Id.* No comments were received in response to this request.

To prevent inappropriate trafficking of section 987 losses, § 1.987-11(e)(6)(ii) of the final regulations provides that the separate return limitation year (SRLY) limitation principles of § 1.1502-21(c) apply to suspended section 987 losses that arose in separate return years. The rule in § 1.987-11(e)(6)(ii) is based on the SRLY rules for capital loss carryovers in § 1.1502-22(c). To simplify the administration of this rule, when a corporation that is the owner of a section 987 QBU joins a consolidated group, the SRLY limitation is not applied separately to each recognition grouping determined under § 1.987-11(f), but rather to the corporation's section 987 losses overall.

Because deferred section 987 losses under § 1.987-12 are not subject to a loss-to-the-extent-of-gain rule, but rather are treated similarly under the section 987 regulations to other unrecognized section 987 losses, the SRLY limitation in § 1.987-11(e)(6)(ii) does not apply to such losses.

XI. Comments and Changes to Proposed § 1.987-13: Suspended Section 987 Loss Upon Terminations

Proposed § 1.987-13 would provide suspended loss rules that apply in connection with certain transactions in which a section 987 QBU or a successor suspended loss QBU terminates.

A. Successor Rules

Under the 2023 proposed regulations, if an owner has suspended section 987 loss with respect to a section 987 QBU that terminates, an eligible QBU that holds the assets of the section 987 QBU after the termination would be treated as a successor suspended loss QBU if it meets three requirements. Proposed § 1.987-13(b)(1)(i). First, a significant

portion of the assets of the terminating section 987 QBU must be reflected on the books and records of the eligible QBU. Second, the eligible QBU must carry on a trade or business of the section 987 QBU. Finally, the eligible QBU must be owned by the owner of the section 987 QBU or by a member of its controlled group (the owner of the successor is referred to as the "successor suspended loss QBU owner"). Following a termination, if the terminated section 987 QBU has a successor, suspended section 987 loss with respect to the section 987 QBU would be attributed to the successor. Similar successor rules would apply upon termination of a successor suspended loss QBU. Proposed § 1.987-13(c)(1)(i).

If a section 987 QBU or successor suspended loss QBU terminates without a successor, the owner would recognize its cumulative suspended section 987 loss with respect to the QBU. Proposed § 1.987-13(b)(2) and (c)(2). Similarly, the cumulative suspended section 987 loss with respect to a successor suspended loss QBU would be recognized if the original suspended loss QBU owner ceases to be a member of the same controlled group as the successor suspended loss QBU owner due to the transfer of an ownership interest in the successor suspended loss QBU owner. Proposed § 1.987-13(d).

A comment recommended that the definition of a successor suspended loss QBU should be aligned with the definition of a successor deferral QBU as provided in proposed § 1.987-12(g)(2), so that the same definition would apply for both purposes. The final regulations generally retain the definition of a successor suspended loss QBU provided in the proposed regulations because this definition is needed to ensure that suspended section 987 loss can be recognized (in excess of section 987 gain) only when the trade or business of a section 987 QBU ceases to be operated by a member of the same controlled group. The successor rule in § 1.987-12(g)(2) (which requires the successor to itself be a section 987 QBU) would not serve this function, because it would require suspended section 987 loss to be recognized when a section 987 QBU is transferred to a related owner that has the same functional currency as the section 987 QBU.

B. Elimination or Limited Recognition of Suspended Section 987 Loss Following Certain Transactions

Proposed § 1.987-13(e), (f), and (g) would provide rules that eliminate or limit the recognition of suspended section 987 loss following certain

transactions. First, under proposed § 1.987-13(e), if the original suspended loss QBU owner ceases to be a member of the same controlled group as the successor suspended loss QBU owner due to the transfer of an ownership interest in the original suspended loss QBU owner, the original suspended loss QBU owner's suspended section 987 loss would cease to be attributable to any section 987 QBU or successor suspended loss QBU. After the transaction, the owner's suspended section 987 loss can be recognized under § 1.987-11(e) to the extent that the owner recognizes section 987 gain; however, the suspended section 987 loss cannot be recognized under proposed § 1.987-13(b)(2), (c)(2), or (d). This rule would prevent taxpayers from transferring the stock of the original suspended loss QBU owner out of its controlled group for the purpose of selectively recognizing suspended section 987 loss, while retaining the assets and activities of the section 987 QBU in the hands of a different controlled group member.

Proposed § 1.987-13(f) would provide that, if an original suspended loss QBU owner ceases to exist as a result of a transaction in which there is no successor described in section 381(a) (for example, as a result of a section 331 liquidation), then any suspended section 987 loss that is not recognized after applying the loss-to-the-extent-of-gain rule cannot be recognized and is eliminated. This rule is intended to prevent taxpayers from entering into section 331 liquidations in order to trigger the recognition of suspended section 987 loss.

Similarly, under proposed § 1.987-13(g), if an owner of a section 987 QBU with suspended section 987 loss, or an original suspended loss QBU owner, ceases to exist in an inbound section 332 liquidation or in an inbound reorganization described in section 381(a)(2), then any suspended section 987 loss of the owner or original suspended loss QBU owner that is not recognized after application of the loss-to-the-extent-of-gain rule under proposed § 1.987-11(e) would be eliminated. This rule would prevent suspended section 987 loss that was generated offshore from being imported into the United States.

Several comments requested that the rules of proposed § 1.987-13(e) through (g) be replaced with anti-abuse rules tied to the purpose for which a taxpayer enters into the relevant transaction. One comment noted that if a CFC liquidates into its U.S. shareholder and a current rate election is not in effect, the transaction results in a termination of

the CFC's section 987 QBUs under § 1.987–8, and the CFC recognizes its net unrecognized section 987 gain or loss immediately before the liquidation. The comment proposed that suspended section 987 loss should similarly be recognized in connection with an inbound liquidation.

Other comments recommended that, following a section 331 liquidation or inbound transaction, suspended section 987 loss should be amortized over a ten-year period or added to the acquiring corporation's outside stock basis. One comment suggested that the suspended section 987 loss should be allocated pro rata among the U.S. shareholder's other foreign entities that own section 987 QBUs. Another comment requested that § 1.987–13(f) be modified to provide that suspended section 987 loss is recognized to the extent of the owner's overall gain (not limited to section 987 gain) recognized in connection with the section 331 liquidation. One comment suggested that, in connection with an inbound transaction, suspended section 987 loss could be recognized to the extent of the inbound section 987 gain.

The Treasury Department and the IRS have determined that, in order to facilitate the current rate election (which can have the effect of enlarging the pools of unrecognized section 987 gain or loss), effective loss limitation rules are needed to prevent the selective recognition of section 987 losses by, for example, entering into a section 331 liquidation, inbound liquidation or reorganization, or a transfer of the original suspended loss QBU owner. Further, an anti-avoidance rule tied to the taxpayer's subjective purpose for entering into a particular transaction would be difficult to administer and, consequently, would not be an adequate safeguard against abuse given the critical function served by the loss limitation rules. A subjective anti-abuse rule would also provide less certainty for taxpayers and the IRS. Therefore, the final regulations generally retain the rules of proposed § 1.987–13(e) through (g).

The final regulations do not permit suspended section 987 loss to be amortized by the acquiring corporation over a ten-year period following an inbound transaction or section 331 liquidation because this would nevertheless facilitate loss importation (in the case of an inbound transaction), even though the benefit would only be recognized over time, or would allow for losses to be carried over to the acquirer in a transaction not described in section 381(a) (in the case of a section 331 liquidation). Similarly, reallocating

losses to foreign entities other than the acquiring corporation would be inconsistent with the principles of section 381 and would be unduly complex. Adding suspended section 987 loss of a CFC to the outside basis of a domestic acquiring corporation's stock would have the same effect as loss importation (because the increased basis could reduce the taxable income of the domestic corporation's shareholders upon a sale of stock) and would also shift losses in a manner that is contrary to general tax principles.

The final regulations also do not permit suspended section 987 loss to be recognized to the extent of gain (other than section 987 gain) recognized in connection with a section 331 liquidation. As explained in part X.B.3 of this Summary of Comments and Explanation of Revisions, the loss-to-the-extent-of-gain rule generally does not allow suspended section 987 loss to be recognized in excess of section 987 gain. If a different rule were adopted for section 331 liquidations, taxpayers could enter into a section 331 liquidation in order to step up the basis of their assets, with any gain recognized with respect to those assets being offset by the recognition of suspended section 987 loss.

However, consistent with the 2023 proposed regulations, the final regulations permit suspended section 987 loss to be recognized to the extent of section 987 gain recognized in connection with a transaction described in § 1.987–13(f) or (g). Because those transactions generally would be treated as terminations under § 1.987–8, any net unrecognized section 987 gain of the owner will be recognized immediately before the transaction and will be taken into account under the loss-to-the-extent-of-gain rule.

C. Clarification of § 1.987–13

A comment requested clarification as to the mechanics for recognizing suspended section 987 loss following a transaction described in § 1.987–13(e), in which an original suspended loss QBU owner is transferred outside the controlled group. The comment also suggested clarifying the interaction between the successor rules of § 1.987–13(b) and (c) and the inbound transaction rule in proposed § 1.987–13(g).

The final regulations clarify that, following a transaction described in § 1.987–13(e) (in which the original suspended loss QBU owner is transferred outside the controlled group), the original owner recognizes suspended section 987 loss to the extent that it recognizes section 987 gain in the

same recognition grouping. Further, in the case of a transaction described in § 1.987–13(e) (transfer of original suspended loss QBU owner), § 1.987–13(f) (section 331 liquidation), or § 1.987–13(g) (inbound transaction), suspended section 987 loss is not recognized or attributed to a successor suspended loss QBU under § 1.987–13(b) or (c). The final regulations also clarify that the rules of § 1.987–13(f) apply to a transaction (such as a section 331 liquidation) in which the owner of a section 987 QBU ceases to exist without having a successor (that is, this rule applies even if the section 987 QBU with respect to which the suspended section 987 loss arose had not previously been terminated, such that the owner was not an original suspended loss QBU owner).

XII. Comments and Changes to Proposed § 1.987–14: Applicability Date

Proposed § 1.987–14 would provide rules relating to the applicability date of the section 987 regulations.

In general, the 2023 proposed regulations are proposed to apply to taxable years beginning after December 31, 2024. Proposed § 1.987–14(a)(1). In the case of a terminating QBU (that is, a section 987 QBU that terminates after November 9, 2023, but before the section 987 regulations are generally applicable), the 2023 proposed regulations, as finalized, generally would apply immediately before the termination.

A comment requested that the general applicability date be delayed until taxable years beginning after December 31, 2025, to allow additional time for taxpayers to build systems and processes to comply with the final regulations. Another comment requested a deferred applicability date no earlier than the taxable year beginning on or after one year after the first day of the first taxable year following the date on which the final regulations are published.

One comment requested that the special rule for terminating QBUs be eliminated. The comment asserted that the existing deferral rules under § 1.987–12 are sufficient to prevent abuse.

Under § 1.987–15, the final regulations generally apply to taxable years beginning after December 31, 2024, consistent with the 2023 proposed regulations. See § 1.987–15(a)(1). See also §§ 1.861–9(g)(2)(v), 1.985–5(g), 1.988–1(i), 1.988–4(b)(2)(ii), 1.989(a)-1(b)(4) and (d)(4), and 1.1502–13(l)(10). The 2016 final regulations originally were applicable to taxable years beginning on or after one year after the

first day of the first taxable year following December 7, 2016 (thus, they would have been applicable in 2018 for calendar year taxpayers). Although the applicability date of those regulations was subsequently deferred, taxpayers have been on notice for many years concerning the general framework of the section 987 regulations. Final regulations are necessary to provide guidance to taxpayers regarding the proper determination of section 987 taxable income or loss and section 987 gain or loss and to provide a consistent set of rules applicable to all taxpayers. Accordingly, further deferral would not serve the interest of sound tax administration. The applicability date under § 1.987–15(a)(1) is consistent with the rule under section 7805(b) of the Code regarding retroactivity of regulations or rulings.

In addition, the final regulations retain the special applicability date providing that the section 987 regulations apply to terminating QBUs immediately before the termination. *See* § 1.987–15(a)(2). This rule is needed to prevent taxpayers from terminating a section 987 QBU before the section 987 regulations generally become applicable in order to avoid the rules of the section 987 regulations, including the loss suspension rules in §§ 1.987–10, 1.987–11, and 1.987–13.

XIII. Comments and Changes to Proposed § 1.1502–13: Intercompany Transactions

The 2023 proposed regulations would provide a new rule applicable to certain intercompany transactions (as defined in § 1.1502–13(b)(1)(i)) involving section 987 QBUs. *See* proposed § 1.1502–13(j)(9).

In general, § 1.1502–13 provides rules to clearly reflect the taxable income and tax liability of a consolidated group as a whole by preventing intercompany transactions from creating, accelerating, avoiding, or deferring consolidated taxable income or consolidated tax liability. *See* § 1.1502–13(a). Under § 1.1502–13, the selling member (S) and the buying member (B) are treated as separate entities for some purposes but as divisions of a single corporation for other purposes. The matching rule in § 1.1502–13(c) is one of the principal rules in § 1.1502–13 that produces the effect of transactions between divisions of a single corporation (single entity treatment). *See* § 1.1502–13(a)(6)(i).

To address potential mismatches that make it difficult to apply the rules of § 1.1502–13 to section 987 QBUs, the 2023 proposed regulations would apply a reattribution rule that treats all intercompany transactions involving a

section 987 QBU as attributable to a member's home office rather than to any section 987 QBU. As a result, an intercompany transaction between one member of a consolidated group and a section 987 QBU of another member of the same group is treated as a combination of (i) an intercompany transaction between the consolidated group members (that is, S and B), and (ii) transfers between the section 987 QBU and its owner as necessary to account for the effect of the transaction on the assets and liabilities of the section 987 QBU. This approach would ensure that consolidated taxable income includes the same amount of section 987 gain or loss as would be recognized if the members were divisions of a single corporation.

One comment requested that the proposed rule be removed, on the grounds that it would change the amount of currency gain or loss recognized by S and B with respect to intercompany transactions. For example, assume that S has a section 987 QBU with the euro as its functional currency, and the QBU makes a euro-denominated loan to B. The comment noted that, under the proposed rule, B's foreign currency exposure and S's foreign currency exposure offset for Federal income tax purposes (that is, if B recognizes any section 988 gain or loss on the interest payments, S will recognize an offsetting amount of section 988 loss or gain). The comment indicated that, for financial accounting purposes, B's foreign currency exposure would result in net income (it would not be offset by S's foreign currency exposure). According to the comment, B would typically enter into a separate hedging transaction (for example, a foreign currency forward contract) to hedge this exposure. However, under the proposed rule, because the section 988 gain or loss of B and S with respect to the loan will offset for tax purposes, the hedging transaction itself will generate net section 988 gain or loss. Therefore, the comment asserted that the proposed rule may have the practical effect of giving rise to income or loss for tax purposes for consolidated groups with respect to hedging transactions.

In other words, under the view expressed in the comment, if the taxpayer enters into a hedging transaction for U.S. GAAP purposes, B would have section 988 gain or loss on the loan absent the proposed rule, and such gain or loss would be offset by loss or gain on the hedging transaction; in contrast, under the proposed rule, B's section 988 gain or loss on the loan would be offset by S's section 988 loss

or gain, and loss or gain on the hedging transaction would not be offset.

The comment appears to reflect the view that, in the absence of the reattribution rule in proposed § 1.1502–13(j)(9), the matching rule of § 1.1502–13(c) does not apply to transactions involving section 987 QBUs, and as a result the tax treatment of S and B is determined independently. Therefore, the comment appears to assume that the Federal income tax treatment and the accounting treatment of transactions involving section 987 QBUs would be identical without the proposed rule.

The Treasury Department and the IRS disagree with the comment. The intercompany transaction rules in § 1.1502–13 apply to all intercompany transactions, including those that involve section 987 QBUs, and taxpayers must apply those rules to achieve single entity treatment. The reattribution rule of proposed § 1.1502–13(j)(9) merely reflects the application of the intercompany transaction rules to section 987 QBUs in a simpler and more administrable manner for taxpayers and the IRS. Therefore, removing the reattribution rule would not address the concerns expressed in the comment. Additionally, the approach discussed in the comment would be fundamentally inconsistent with the purposes of section 1502 and § 1.1502–13: it would not clearly reflect the income tax liability of the consolidated group, because it would allow intercompany transactions to accelerate or defer currency gains and losses. The proposed reattribution rule is therefore finalized without change.

Comments also requested clarification regarding Example 8 in proposed § 1.1502–13(j)(10)(viii). In response, the final regulations include additional facts in Example 8 as well as two alternative fact patterns involving (i) a member's disposition of an intercompany loan before its satisfaction, and (ii) a member ceasing to be a member of the consolidated group while an intercompany loan remains outstanding. The final regulations also include formatting changes to the examples under § 1.1502–13(j) that were proposed in REG–134420–10 (88 FR 52057).

XIV. Other Comments and Revisions

A comment recommended that the Treasury Department and the IRS consider the impact of section 987 gain or loss on the corporate alternative minimum tax ("CAMT") regime. The comment did not recommend specific rules to be implemented for this purpose. The final regulations do not address the application of the CAMT regime. Accordingly, this comment was

not adopted because it is outside the scope of the final regulations.

Similarly, comments requested that information relating to section 987 should continue to be reported on Form 8858, Schedule C–1, with modifications for taxpayers that do not make a current rate election. The development or modification of forms related to section 987 is outside the scope of the final regulations. Therefore, this comment was not adopted.

A comment was received in response to the 2016 proposed regulations during the initial comment period for those proposed regulations. The comment requested that the 2016 final regulations and the 2016 temporary regulations be repropounded with a deferred applicability date, which is consistent with the approach taken by the 2023 proposed regulations and these final regulations.

In addition to the provisions described in parts I through XIII of this Summary of Comments and Explanation of Revisions, the final regulations include other wording changes, additions, deletions, and organizational changes to the 2023 proposed regulations for purposes of clarification. For example, the rules in § 1.987–3(c)(3) relating to the adjustments required under the simplified inventory method have been clarified, and an example has been added to illustrate those rules. Similarly, the rules of § 1.985–5 have been modified to update cross-references to the section 987 regulations and to clarify the example in § 1.985–5(f).

Special Analyses

I. Regulatory Planning and Review–Economic Analysis

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under Executive Order 12866 (June 9, 2023), tax regulatory actions issued by the IRS are not subject to the requirements of section 6 of Executive Order 12866, as amended. Therefore, a regulatory impact assessment is not required.

II. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) (PRA) requires that a Federal agency obtain the approval of the Office of Management and Budget (OMB) before collecting information from the public, whether such collection of information is mandatory, voluntary, or required to obtain or retain a benefit. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it

displays a valid control number assigned by the OMB.

The collections of information in the final regulations with respect to section 987 are in §§ 1.987–1(g), 1.987–9, 1.987–10(k), and 1.987–14(c). The likely respondents are individuals who file a Form 1040 and businesses that file a Form 1065 or Form 1120. The final regulations do not apply to trusts and estates. See part II.A.2 of the Summary of Comments and Explanation of Revisions.

The collection of information provided by § 1.987–1(g) is required only when a taxpayer makes or revokes certain elections for purposes of calculating its section 987 taxable income or loss and section 987 gain or loss with respect to a section 987 QBU. In the first year in which the section 987 regulations apply to the taxpayer, or the taxpayer or a member of its consolidated group or section 987 electing group is the owner of a section 987 QBU, the taxpayer may make any section 987 election. Thereafter, the taxpayer may make or revoke a current rate election, annual recognition election, or section 988 mark-to-market election only every five years and may make or revoke other elections only with the consent of the Commissioner, which may be granted with a private letter ruling. When a taxpayer makes or revokes an election, the collection of information is mandatory. The collection of information required by § 1.987–1(g) will be used by the IRS for tax compliance purposes.

Section 1.987–9 is intended to specify how a taxpayer satisfies its recordkeeping obligations under section 6001 with respect to section 987. The recordkeeping requirements under § 1.987–9 are considered general tax records under § 1.6001–1(e). For PRA purposes, general tax records are already approved by OMB under 1545–0074 for individuals and under 1545–0123 for business entities. The IRS intends that the information collection requirements pursuant to § 1.987–9 will be satisfied by the taxpayer maintaining permanent books and records that are adequate to verify its section 987 gain or loss and section 987 taxable income or loss with respect to its section 987 QBU.

Specifically, with respect to each section 987 QBU, successor deferral QBU, and successor suspended loss QBU for a taxable year, as applicable, § 1.987–9 requires taxpayers to maintain books and records related to the amount of the items of income, gain, deduction, or loss attributed to the section 987 QBU in the functional currency of the section 987 QBU and its owner; the adjusted balance sheet of the section 987 QBU in

the functional currency of the section 987 QBU and its owner (or the information used to determine QBU net value under § 1.987–4(e)(2)(iii), as explained in part V.A.1 of the Summary of Comments and Explanation of Revisions); the exchange rates used to translate items of income, gain, deduction, or loss of the section 987 QBU into the owner's functional currency and, if a spot rate convention is used, the manner in which the convention is determined; the exchange rates used to translate the assets and liabilities of the section 987 QBU into the owner's functional currency and, if a spot rate convention is used, the manner in which the convention is determined; the amount of assets and liabilities transferred by the section 987 QBU to the owner determined in the functional currency of the owner and the section 987 QBU; the amount of the unrecognized section 987 gain or loss for the taxable year; the amount of the net accumulated unrecognized section 987 gain or loss for the taxable year; the amount of the remittance and the remittance proportion for the taxable year; the computations required under §§ 1.861–9(g) and 1.861–9T(g) for purposes of sourcing and characterizing section 987 gain or loss, deferred section 987 gain or loss, or suspended section 987 loss under § 1.987–6; the cumulative suspended section 987 loss in each recognition grouping; the outstanding deferred section 987 gain or loss in each recognition grouping; the transition information required to be determined under § 1.987–10(k); and the identification required under § 1.987–14(c) with respect to a section 987 hedging transaction. These records are required for the IRS to validate that section 987 gain or loss and section 987 taxable income or loss have been properly determined.

The Treasury Department and the IRS are adding a recordkeeping requirement under § 1.987–14(c) based on a public comment on the substantive rules of the 2023 proposed regulations which requested implementation of a section 987 hedging election. See part V.B.1 of the Summary of Comments and Explanation of Revisions. Under § 1.987–14(c), the final regulations require an identification statement to be kept in the taxpayers' books and records with respect to a section 987 hedging transaction described in § 1.987–14(b)(1).

The collection of information in § 1.987–10(k) is mandatory. Specifically, § 1.987–10(k) would require a taxpayer to file a “Section 987 Transition Information” statement with its return for the taxable year beginning on the

transition date (as defined in § 1.987–10(c)). The statement would contain information that is necessary for a taxpayer to transition to the final section 987 regulations. Specifically, the statement requires a taxpayer to provide information that is relevant to determining the taxpayer’s pretransition gain or loss with respect to its section 987 QBUs. The collection of information required by § 1.987–10(k) will be used by the IRS for tax compliance purposes.

The Treasury Department and the IRS intend that the information described in § 1.987–1(g) will be collected by attaching a statement to a taxpayer’s return (such as the appropriate Form 1040, Form 1120, Form 1065, or other appropriate form). With respect to § 1.987–10(k), the IRS also intends that the collection of information will be conducted by attaching a “Section 987 Transition Information” statement to a return. For purposes of the PRA, the reporting burden associated with those collections of information with respect to §§ 1.987–1(g) and 1.987–10(k) will be reflected in the PRA submissions associated with those forms. The OMB Control Numbers for the forms will be approved under 1545–0074 for individuals and under 1545–0123 for business entities.

To the extent that a taxpayer makes or revokes an election by obtaining a private letter ruling, the reporting burden associated with those collections of information will be reflected in the PRA submissions associated with revenue procedures governing private letter rulings. The OMB Control Number for the collection of information for those revenue procedures is control number 1545–1522. The final regulations would only require taxpayers to follow the procedures under Revenue Procedure 2024–1, IRB 2024–1 (or future revenue procedure governing private letter rulings) and would not change the collection requirements of the Revenue Procedure.

The attachment to a return used for making elections with respect to these final regulations will be used by those taxpayers making or revoking an election for the taxable year. The “Section 987 Transition Information” statement attached to a return will be used by all taxpayers, but generally only with respect to the taxable year in which the taxpayer transitions to these final regulations. In certain cases, if the taxpayer owns a QBU that terminates after November 9, 2023, and before the taxable year in which the taxpayer transitions to the final regulations, the “Section 987 Transition Information” statement must be filed for that taxable year too, but the statement would only

contain information with respect to the terminating QBU. The burden will be accounted for in 1545–0074 for individuals and in 1545–0123 for businesses.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any Internal Revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

III. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that this rulemaking will not have a significant economic impact on a substantial number of small entities within the meaning of section 601(6) of the Regulatory Flexibility Act. The final regulations affect taxpayers with foreign branch operations and taxpayers that own an interest in a foreign partnership (or a partnership with a foreign branch).

The number of small entities potentially affected by the final regulations is unknown; however, it is unlikely to be a substantial number because taxpayers with wholly owned foreign operations are typically larger businesses. The Treasury Department and the IRS estimate that the total number of corporations (other than S corporations) with a foreign branch subject to section 987 is approximately 2,000. This estimate is based on the number of corporations (other than S corporations) that filed a Form 8858 in 2022 that showed that the filer: (1) owned at least one disregarded entity or branch with a functional currency different from the functional currency of the owner, and (2) indicated that the disregarded entity or branch was a section 989 QBU. As shown in the following table, only a small percentage of those filers are small entities.

Total receipts/positive income (2022)	Percentage of filers
Under \$5 Million	7
\$5 Million to \$10 Million	2
\$10 Million to \$25 Million	4
Over \$25 Million	87

The number of affected corporations (other than S corporations) with total receipts of less than \$25 million represents 0.02% of all corporations (other than S corporations) with total receipts of less than \$25 million.

The Treasury Department and the IRS estimate that the total number of partnerships and S corporations with a foreign branch subject to section 987 is approximately 800. Approximately 50

percent of those filers have gross receipts of less than \$25 million, but the data does not indicate whether these partnerships are part of larger enterprises. The number of affected partnerships and S corporations with total receipts of less than \$25 million represents 0.004% of all partnerships and S corporations with total receipts of less than \$25 million. Small entities may also own partnership interests.

The primary rules that apply to partnerships (that is, the deferral rules in § 1.987–12 and the suspended loss rules in §§ 1.987–11 and 1.987–13) apply only in the case of a remittance or termination that would result in the recognition of a significant amount of section 987 gain or loss. Small entities typically will not recognize section 987 gain or loss in excess of the applicable thresholds.

These final regulations generally modify the rules that would otherwise apply under the 2016 final regulations by providing taxpayers with additional elections that reduce the compliance burden of applying section 987. Small entities generally would not be affected by these rules unless they choose to make one of the new elections in order to reduce their compliance burden. In addition, the final regulations contain several rules intended to limit their impact on small taxpayers. For example, the final regulations provide a de minimis rule under which section 987 loss is not suspended unless the amount of the loss exceeds the lesser of \$3 million or two percent of gross income, as described in part X.A.1 of the Summary of Comments and Explanation of Revisions. In addition, for purposes of the transition rules, the final regulations provide an election under which small businesses can treat small QBUs as having no pretransition gain or loss. See part IX.A.2 of the Summary of Comments and Explanation of Revisions.

A portion of the economic impact of the final regulations may derive from the collection of information requirements imposed under §§ 1.987–1(g), 1.987–10(k), and 1.987–14(c). The Treasury Department and the IRS have determined that the average burden is 1.95 hours per response. The IRS’s Research, Applied Analytics, and Statistics division estimates that the appropriate wage rate for this set of taxpayers is \$99.87 per hour. Thus, the annual burden per taxpayer from each collection of information requirement is \$194.75. The requirements of § 1.987–1(g) apply only if a taxpayer chooses to make or revoke an election (and only in the year of the election or revocation), the requirements of § 1.987–10(k) apply

only in the first taxable year in which the final regulations apply, and the requirements of § 1.987–14(c) apply only if a taxpayer identifies a hedge as a section 987 hedging transaction (which is unlikely to be relevant for small entities).

Another portion of the economic impact of the final regulations may derive from the recordkeeping requirements of § 1.987–9, which identify the records needed to satisfy the taxpayer's obligations under section 6001. The requirements of § 1.987–9 generally will be less burdensome for small entities than the requirements of the 2016 final regulations due to the modifications described in part V.A.1 of the Summary of Comments and Explanation of Revisions (which permit QBU net value to be computed without preparing a tax basis balance sheet).

IV. Section 7805(f)

Pursuant to section 7805(f) of the Code, the proposed regulations preceding these final regulations were submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business and no comments were received.

V. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a State, local, or Tribal government, in the aggregate, or by the private sector, of \$100 million in 1995 dollars, updated annually for inflation. The final regulations do not include any Federal mandate that may result in expenditures by State, local, or Tribal governments, or by the private sector in excess of that threshold.

VI. Executive Order 13132: Federalism

Executive Order 13132 (entitled “Federalism”) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State and local governments, and is not required by statute, or preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. The final regulations do not have federalism implications and do not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive order.

Statement of Availability of IRS Documents

IRS Revenue Procedures, Revenue Rulings, Notices, and other guidance cited in this document are published in the Internal Revenue Bulletin or Cumulative Bulletin and are available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at <https://www.irs.gov>.

Drafting Information

The principal authors of these final regulations are Adam G. Province and Raphael J. Cohen of the Office of Associate Chief Counsel (International); and Matthew N. Palucki and Jeremy Aron-Dine of the Office of Associate Chief Counsel (Corporate). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, the Treasury Department and the IRS amend 26 CFR part 1 as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by:

- a. Removing the entry for §§ 1.861–9 and 1.861–9T and §§ 1.861–8T through 1.861–14T;
 - b. Adding entries for §§ 1.861–8T, 1.861–9, 1.861–9T through 1.861–14T in numerical order;
 - c. Removing the entry for §§ 1.985–0 through 1.985–5;
 - d. Adding entries for §§ 1.985–0 through 1.985–5 in numerical order;
 - e. Removing the entry for §§ 1.987–1 through 1.987–5;
 - f. Adding entries for §§ 1.987–1 through 1.987–11 in numerical order;
 - g. Revising the entry for § 1.987–12;
 - h. Adding entries for §§ 1.987–13 through 1.987–15 in numerical order;
 - i. Removing the entry for §§ 1.988–0 through 1.988–5;
 - j. Adding entries for §§ 1.988–0 through 1.988–5 and 1.989(a)–1 in numerical order; and
 - k. Revising the entry for § 1.1502–13.
- The additions and revisions read as follows:

Section 1.988–4 also issued under 26 U.S.C. 988 and 989.

Section 1.988–5 also issued under 26 U.S.C. 988.

Section 1.989(a)–1 also issued under 26 U.S.C. 989.

Section 1.1502–13 also issued under 26 U.S.C. 250(c), 987, 989, and 1502.

■ **Par. 2.** Section 1.861–9 is amended by:

■ a. Revising paragraphs (g)(2)(ii)(A) introductory text, (g)(2)(ii)(A)(1), and (g)(2)(ii)(B); and

■ b. Adding paragraph (g)(2)(v).

The revisions and addition read as follows:

§ 1.861–9 Allocation and apportionment of interest expense and rules for asset-based apportionment.

* * * * *

(g) * * *
(2) * * *
(ii) * * *

(A) *Tax book value method.* In the case of taxpayers using the tax book value method of apportionment, the following rules apply to determine the value of the assets of a qualified business unit (QBU) (as defined in section 989(a)) of a domestic corporation with a functional currency other than the dollar.

(1) *Section 987 QBU.* In the case of a section 987 QBU (as defined in § 1.987–1(b)(3)), the tax book value is determined by applying the rules of paragraph (g)(2)(i) of this section and § 1.861–9T(g)(3) to the beginning-of-year and end-of-year owner functional currency amount of assets. The beginning-of-year owner functional currency amount of assets is determined by reference to the owner functional currency amount of assets computed under § 1.987–4(d)(1)(i)(B) and (e) on the last day of the preceding taxable year. The end-of-year owner functional currency amount of assets is determined by reference to the owner functional currency amount of assets computed under § 1.987–4(d)(1)(i)(A) and (e) on the last day of the current taxable year. The beginning-of-year and end-of-year owner functional currency amount of assets, as so determined within each grouping, are then averaged as provided in paragraph (g)(2)(i) of this section.

* * * * *

(B) *Fair market value method.* In the case of taxpayers using the fair market value method of apportionment, the beginning-of-year and end-of-year fair market values of branch assets within each grouping are computed in dollars and averaged as provided in this paragraph (g)(2) and § 1.861–9T(g)(2).

* * * * *

(v) *Applicability date.* Generally, paragraph (g)(2)(ii)(A)(1) of this section applies to taxable years beginning after December 31, 2024. However, if pursuant to § 1.987–15(b), a taxpayer chooses to apply §§ 1.987–1 through 1.987–15 to a taxable year before the first taxable year described in § 1.987–15(a)(1), then paragraph (g)(2)(ii)(A)(1) of this section applies to that taxable year and subsequent years.

* * * * *

§ 1.861–9T [Amended]

■ **Par. 3.** Section 1.861–9T is amended by removing and reserving paragraph (g)(2)(ii) and removing paragraph (g)(2)(vi).

■ **Par. 4.** Section 1.904–4 is amended by revising paragraph (c)(5)(iii)(B) to read as follows:

§ 1.904–4 Separate application of section 904 with respect to certain categories of income.

* * * * *

(c) * * *
(5) * * *
(iii) * * *

(B) *Section 987.* For special rules relating to the allocation and apportionment of foreign income taxes to section 987 items, see § 1.987–6(b)(3).

* * * * *

■ **Par. 5.** Add an undesignated center heading before § 1.985–0 to read as follows:

* * * * *

Foreign Currency Transactions

* * * * *

§ 1.985–1 [Amended]

■ **Par. 6.** Section 1.985–1 is amended by:

■ a. In paragraph (f) designating *Examples 1 through 12* as paragraphs (f)(1) through (12), respectively; and

■ b. Removing and reserving newly redesignated paragraphs (f)(9) through (11).

■ **Par. 7.** Section 1.985–5 is amended by:

■ a. In paragraph (a) removing the language “§ 1.987–1(b)(2)” and adding the language “§ 1.987–1(b)(3)” in its place;

■ b. In paragraph (d)(1)(i) removing the language “1.987–11” and adding the language “1.987–15” in its place;

■ c. Revising the last sentence of paragraph (d)(2);

■ d. Removing the second sentence of paragraph (e)(1);

■ e. Revising and republishing paragraphs (e)(4) and (f); and

■ f. Revising paragraph (g).

The revisions read as follows:

§ 1.985–5 Adjustments required upon change in functional currency.

* * * * *

(d) * * *

(2) * * * *See* §§ 1.987–5, 1.987–8, 1.987–12, and 1.987–13 for the effect of a termination of a section 987 QBU that is subject to §§ 1.987–1 through 1.987–15.

(e) * * *

(4) *Adjustments to a section 987 QBU's balance sheet and unrecognized section 987 gain or loss when an owner changes functional currency—*(i) *Owner changing to a functional currency other than the section 987 QBU's functional currency.* If an owner of a section 987 QBU, subject to §§ 1.987–1 through 1.987–15 pursuant to § 1.987–1(b)(1), changes to a functional currency other than the functional currency of the section 987 QBU, the adjustments described in paragraphs (e)(4)(i)(A) through (C) of this section are taken into account for purposes of section 987.

(A) *Determining new historic rates.* The historic rate (as defined in § 1.987–1(c)(3)) for the year of change and subsequent taxable years with respect to a historic item (as defined in § 1.987–1(e)) reflected on the balance sheet of the section 987 QBU immediately before the year of change is equal to the historic rate before the year of change (that is, a rate that translates the section 987 QBU's functional currency into the owner's old functional currency) divided by the spot rate for translating an amount denominated in the owner's new functional currency into the owner's old functional currency on the last day of the last taxable year ending before the year of change. For example, if a taxpayer that owns a section 987 QBU with a British pound functional currency changes from a U.S. dollar functional currency to a euro functional currency, and the historic rate for translating a specific item of the section 987 QBU from GBP to USD is 1.50 and the spot rate for translating EUR to USD on the last day of the last taxable year before the change is 1.10, then the new historic rate for translating this historic item from GBP to EUR is 1.36 (1.50/1.10).

(B) *Determining the owner functional currency net value of the section 987 QBU on the last day of the last taxable year ending before the year of change under § 1.987–4(d)(1)(i)(B).* For purposes of determining the change in the owner functional currency net value of the section 987 QBU on the last day of the last taxable year preceding the year of change under § 1.987–4(d)(1)(i)(B) and (e), the section 987 QBU's marked items are translated into the owner's new functional currency at the spot rate on

the last day of the last taxable year ending before the year of change.

(C) *Translation of unrecognized section 987 gain or loss.* Any net accumulated unrecognized section 987 gain or loss determined under § 1.987–4(c), cumulative suspended section 987 loss determined under § 1.987–11(b), or deferred section 987 gain or loss determined under § 1.987–12 is translated from the owner's old functional currency into the owner's new functional currency using the spot rate for translating an amount denominated in the owner's old functional currency into the owner's new functional currency on the last day of the last taxable year ending before the year of change.

(ii) *Taxpayer with the same functional currency as its QBU changing to a*

different functional currency. If a taxpayer with the same functional currency as its QBU changes to a new functional currency and as a result the taxpayer becomes an owner of a section 987 QBU (see § 1.987–1), the taxpayer and the section 987 QBU become subject to section 987 for the year of change and subsequent taxable years.

(iii) *Owner changing to the same functional currency as the section 987 QBU.* If an owner changes its functional currency to the functional currency of its section 987 QBU, the section 987 QBU is treated as if it terminated on the last day of the last taxable year ending before the year of change. See §§ 1.987–5, 1.987–8, 1.987–12, and 1.987–13 for the consequences of a termination of a

section 987 QBU that is subject to §§ 1.987–1 through 1.987–15.

(f) *Example.* The provisions of this section are illustrated by the following example:

(1) *Facts.* FC, a foreign corporation, is wholly owned by DC, a domestic corporation. The Commissioner granted permission to change FC's functional currency from the British pound to the euro beginning January 1, year 2. The EUR/GBP exchange rate on December 31, year 1, is €1:£0.50.

(2) *Analysis—(i) Determining new functional currency basis of property and liabilities.* The following table shows how FC must convert the items on its balance sheet from the British pound to the euro on December 31, year 1.

TABLE 1 TO PARAGRAPH (f)(2)(i) CONVERSION OF FC'S BALANCE SHEET ITEMS

	GBP	EUR
Assets:		
Cash on hand	£40,000	€80,000
Accounts Receivable	10,000	20,000
Inventory	100,000	200,000
100,000 Euro Bond (100,000 historical basis)	50,000	100,000
Fixed assets:		
Property	200,000	400,000
Plant	500,000	1,000,000
Accumulated Depreciation	(200,000)	(400,000)
Equipment	1,000,000	2,000,000
Accumulated Depreciation	(400,000)	(800,000)
Total Assets	1,300,000	2,600,000
Liabilities and Equity:		
Accounts Payable	50,000	100,000
Long-term Liabilities	400,000	800,000
Paid-in-Capital	800,000	1,600,000
Retained Earnings	50,000	100,000
Total Liabilities and Equity	1,300,000	2,600,000

(ii) *Exchange gain or loss on section 988 transactions.* Under paragraph (b) of this section, FC will recognize a £50,000 loss (£50,000 current value minus £100,000 historical basis) on the Euro Bond resulting from the change in functional currency because, after the change, the Euro Bond will no longer be an asset denominated in a non-functional currency. The amount of FC's retained earnings on its December 31, year 1, balance sheet reflects the £50,000 loss on the Euro Bond.

(g) *Applicability date.* Generally, this section applies to taxable years beginning after December 31, 2024. However, if pursuant to § 1.987–15(b), a taxpayer chooses to apply §§ 1.987–1 through 1.987–15 to a taxable year before the first taxable year described in § 1.987–15(a)(1), then this section applies to that taxable year and subsequent years.

■ **Par. 8.** Revise §§ 1.987–0 through 1.987–12 and add §§ 1.987.13 through 1.987–15 to read as follows:

Foreign Currency Transactions

* * * * *

§ 1.987–0 Table of contents.

This section lists the headings for §§ 1.987–1 through 1.987–15.

§ 1.987–1 *Scope, definitions and special rules.*

(a) In general.

(b) Scope of section 987 and certain rules relating to QBUs.

- (1) Persons subject to section 987.
 - (i) In general.
 - (ii) Inapplicability to certain entities.
- (2) Application of the section 987 regulations to earnings and profits.
 - (i) In general.
 - (ii) Timing.
 - (3) Definition of a section 987 QBU.
 - (i) In general.
 - (ii) Section 987 QBU grouping election.
 - (4) Definition of an eligible QBU.
 - (i) In general.
 - (ii) Qualified business unit.
 - (5) Definition of an owner.
 - (i) Direct ownership.
 - (ii) [Reserved]
 - (6) [Reserved]
 - (7) Examples illustrating paragraph (b) of this section.
 - (i) Example 1: Owner owns an eligible QBU and a DE holding company.
 - (ii) Example 2: Owner owns eligible QBUs through DEs.
 - (iii) Example 3: Section 987 grouping election.
 - (c) Exchange rates.
 - (1) Spot rate.
 - (i) In general.
 - (ii) Election to use a spot rate convention.
 - (2) Yearly average exchange rate.
 - (3) Historic rate.
 - (i) In general.
 - (ii) Date placed in service for depreciable or amortizable property.
 - (iii) Changed functional currency.
 - (d) Marked item.
 - (1) In general.
 - (2) Current rate election.
 - (e) Historic item.
 - (f) Example: Identification of marked and historic items.
 - (1) Facts.
 - (2) Analysis.
 - (g) Elections.
 - (1) Persons making the election.
 - (i) United States persons.
 - (ii) CFCs.
 - (iii) Consolidated groups.
 - (iv) Partnerships.
 - (2) Consistency rules.
 - (i) Consolidated groups.
 - (ii) CFCs and foreign partnerships.
 - (iii) Section 381(a) transactions.
 - (3) Manner of making or revoking elections.
 - (i) Statement must be attached to a return.
 - (ii) Election requirements.
 - (iii) Elections made under the 2016 and 2019 section 987 regulations.
 - (4) No change in method of accounting.
 - (5) Principles of § 1.964–1(c)(3) applicable to section 987 elections.
 - (h) Definitions.

§ 1.987–2 Attribution of items to eligible QBUs; definition of a transfer and related rules.

 - (a) In general.
 - (b) Attribution of items to an eligible QBU.
 - (1) General rules.
 - (2) Exceptions for non-portfolio stock, interests in partnerships, and certain acquisition indebtedness.
 - (i) In general.
 - (ii) Separate account assets.

(3) Adjustments to items reflected on the books and records.

- (i) General rule.
 - (ii) Factors indicating no tax avoidance.
 - (iii) Factors indicating tax avoidance.
 - (iv) Section 988 transactions.
- (c) Transfers to and from section 987 QBUs.
 - (1) In general.
 - (2) Disregarded transactions.
 - (i) General rule.
 - (ii) Definition of a disregarded transaction.
 - (iii) Items derived from disregarded transactions ignored.
 - (3) through (6) [Reserved]
 - (7) Application of general tax law principles.
 - (8) Interaction with § 1.988–1(a)(10).
 - (9) Certain disregarded transactions not treated as transfers.
 - (i) Combinations of section 987 QBUs.
 - (ii) Change in functional currency from a combination.
 - (iii) Separation of section 987 QBUs.
 - (iv) Special rules for successor suspended loss QBUs.
 - (10) Examples.
 - (i) Example 1: Loan to a section 987 QBU.
 - (ii) Example 2: Transfer between section 987 QBUs.
 - (iii) Example 3: Sale of property between two section 987 QBUs.
 - (iv) through (ix) [Reserved]
 - (x) Example 10: Contribution of a section 987 QBU's assets to a corporation.
 - (xi) Example 11: Circular transfers.
 - (xii) Example 12: Transfers without substance.
 - (xiii) Example 13: Offsetting positions in section 987 QBUs.
 - (xiv) Example 14: Offsetting positions with respect to a section 987 QBU and a section 988 transaction.
 - (xv) Example 15: Offsetting positions with respect to a section 987 QBU and a section 988 transaction.
 - (xvi) Example 16: Borrowing by section 987 QBU followed by immediate distribution to owner.
 - (xvii) Example 17: Payment of interest by section 987 QBU on obligation of owner.
 - (xviii) Example 18: Sale of the interests in a DE.
 - (d) Translation of items transferred to a section 987 QBU.
 - (1) Marked items.
 - (2) Historic items.
 - (e) Cross-reference.

§ 1.987–3 Determination of section 987 taxable income or loss of an owner of a section 987 QBU.

 - (a) In general.
 - (b) Determination of each item of income, gain, deduction, or loss in the section 987 QBU's functional currency.
 - (1) In general.
 - (2) Translation of items of income, gain, deduction, or loss that are denominated in a nonfunctional currency.
 - (3) [Reserved]
 - (4) Section 988 transactions.
 - (i) In general.
 - (ii) Section 988 mark-to-market election.
 - (c) Translation of items of income, gain, deduction, or loss of a section 987 QBU into the owner's functional currency.

(1) In general.

- (2) Exceptions.
 - (i) Recovery of basis with respect to historic assets.
 - (ii) through (iii) [Reserved]
 - (iv) Cost of goods sold computation.
 - (v) Translation of income to account for certain foreign income tax claimed as a credit.
 - (3) Adjustments to COGS required under the simplified inventory method.
 - (i) In general.
 - (ii) Adjustment for cost recovery deductions included in inventoriable costs.
 - (iii) Adjustment for beginning inventory for non-LIFO inventory.
 - (iv) Adjustment for year of LIFO liquidation.
 - (d) [Reserved]
 - (e) Examples.
 - (1) Example 1: Item of income denominated in nonfunctional currency.
 - (2) Example 2: Asset sold for nonfunctional currency.
 - (3) Example 3: Historic inventory method.
 - (i) Facts.
 - (ii) Analysis.
 - (4) Example 4: Simplified inventory method.
 - (i) Facts.
 - (ii) Analysis.
 - (5) Example 5: Depreciation expense that is not an inventoriable cost.
 - (6) Example 6: Translation of depreciation expense that is an inventoriable cost (historic inventory method).
 - (7) Example 7: Sale of land.
 - (8) Example 8: Current rate election.
 - (9) through (12) [Reserved]
 - (13) Example 13: Section 988 transaction.
 - (i) Facts.
 - (ii) Analysis.
 - (14) Example 14: Payment of foreign income tax.
 - (i) Facts.
 - (ii) Analysis.

§ 1.987–4 Determination of net unrecognized section 987 gain or loss of a section 987 QBU.

 - (a) In general.
 - (b) Calculation of net unrecognized section 987 gain or loss.
 - (c) Net accumulated unrecognized section 987 gain or loss for all prior taxable years.
 - (1) In general.
 - (2) Additional adjustments for certain taxable years beginning on or before December 31, 2024.
 - (d) Calculation of unrecognized section 987 gain or loss for a taxable year.
 - (1) Step 1: Determine the change in the owner functional currency net value of the section 987 QBU for the taxable year.
 - (i) In general.
 - (ii) Year section 987 QBU is terminated.
 - (iii) First taxable year of a section 987 QBU.
 - (iv) First year in which an election is in effect or ceases to be in effect.
 - (2) Step 2: Increase the amount determined in step 1 by the amount of assets transferred from the section 987 QBU to the owner.
 - (i) In general.
 - (ii) Assets transferred from the section 987 QBU to the owner during the taxable year.
 - (3) Step 3: Decrease the amount determined in steps 1 and 2 by the amount

of assets transferred from the owner to the section 987 QBU.

(i) In general.

(ii) Assets transferred from the owner to the section 987 QBU during the taxable year.

(4) Step 4: Decrease the amount determined in steps 1 through 3 by the amount of liabilities transferred from the section 987 QBU to the owner.

(i) In general.

(ii) Liabilities transferred from the owner to the section 987 QBU during the taxable year.

(5) Step 5: Increase the amount determined in steps 1 through 4 by the amount of liabilities transferred from the owner to the section 987 QBU.

(6) Step 6: Decrease or increase the amount determined in steps 1 through 5 by the section 987 taxable income or loss, respectively, of the section 987 QBU for the taxable year.

(7) Step 7: Increase the amount determined in steps 1 through 6 by certain expenses or losses that are not deductible in computing the section 987 taxable income or loss of the section 987 QBU for the taxable year.

(8) Step 8: Decrease the amount determined in steps 1 through 7 by the amount of certain income or gain that is not included in taxable income in computing the section 987 taxable income or loss of the section 987 QBU for the taxable year.

(9) Step 9: Increase or decrease the amount determined in steps 1 through 8 by any income or gain, or any deduction or loss, respectively, that does not impact the adjusted balance sheet.

(10) Step 10: Decrease or increase the amount determined in steps 1 through 9 by any increase or decrease, respectively, to the section 987 QBU's net assets that is not previously taken into account under steps 2 through 9.

(i) In general.

(ii) Determining the residual increase or decrease to net assets.

(iii) Modifications for taxable years to which a current rate election or an annual recognition election applies.

(e) Determination of the owner functional currency net value of a section 987 QBU.

(1) In general.

(i) Marked item.

(ii) Historic item.

(2) Current rate election.

(i) In general.

(ii) QBU net value.

(iii) Alternative calculation of QBU net value.

(f) Combinations and separations.

(1) Combinations.

(2) Separations.

(3) Examples.

(i) Example 1: Combination of two section 987 QBUs that have the same owner.

(ii) Example 2: Separation of two section 987 QBUs that have the same owner.

(g) Examples.

(1) Example 1: Determination of net unrecognized section 987 gain or loss.

(i) Facts.

(ii) Analysis.

(2) Example 2: Determination of net unrecognized section 987 gain or loss if a current rate election in effect.

(i) Facts.

(ii) Analysis.

(iii) Alternative computation of QBU net value.

(3) Example 3: Determination of net unrecognized section 987 gain or loss when a current rate election is revoked.

(i) Facts.

(ii) Analysis.

§ 1.987–5 Recognition of section 987 gain or loss.

(a) Recognition of section 987 gain or loss by the owner of a section 987 QBU.

(b) Remittance proportion.

(1) In general.

(2) Annual recognition election.

(c) Remittance.

(1) Definition.

(2) Alternative calculation.

(i) Step 1: Determine the change in QBU net value.

(ii) Step 2: Adjust the amount determined in step 1 for income or loss of the section 987 QBU.

(iii) Step 3: Multiply the amount determined in step 2 by negative one.

(3) Day when a remittance is determined.

(4) Termination.

(d) Aggregate of all amounts transferred from the section 987 QBU to the owner for the taxable year.

(e) Aggregate of all amounts transferred from the owner to the section 987 QBU for the taxable year.

(f) Determination of owner's adjusted basis in transferred assets and amount of transferred liabilities.

(1) In general.

(2) Marked items.

(3) Historic items.

(g) Example—Calculation of section 987 gain or loss recognized.

(1) Facts.

(i) In general.

(ii) Year 1 balance sheet.

(iii) Transfers and income in year 2.

(iv) Year 2 balance sheet.

(2) Analysis.

(i) Computation of amount of remittance.

(ii) Alternative computation of remittance amount.

(iii) Computation of section 987 QBU gross assets plus remittance.

(iv) Computation of remittance proportion.

(v) Computation of section 987 gain or loss.

(3) Annual recognition election.

§ 1.987–6 Character and source of section 987 gain or loss.

(a) Ordinary income or loss.

(b) Character and source of section 987 gain or loss.

(1) Timing of source and character determination.

(2) Method for determining the character and source section 987 gain or loss.

(i) Initial assignment

(ii) Reassignment of section 987 gain or loss.

(iii) Special rule for the application of the GILTI high-tax exclusion to section 987 gain or loss.

(3) Allocation and apportionment of foreign income tax to section 987 items under section 861.

(i) The foreign gross income is an item of foreign currency gain or loss.

(ii) The same event or events give rise to both the foreign gross income and the section 987 gain or loss.

(c) Examples.

(1) Example 1: Initial assignment and reassignment of section 987 gain or loss.

(i) Facts.

(ii) Analysis.

(2) Example 2: Effect of GILTI high-tax exclusion.

(i) Facts.

(ii) Analysis.

(3) Example 3: Section 987 gain or loss treated as attributable to section 988 transactions.

(i) Facts.

(ii) Analysis.

(4) Example 4: Section 987 gain or loss assigned to passive foreign personal holding company income.

(i) Facts.

(ii) Analysis.

§ 1.987–7 Application of the section 987 regulations to partnerships and S corporations.

(a) Overview.

(b) Section 987 regulations generally do not apply to partnerships.

(c) Provisions of the section 987 regulations that apply to partnerships.

(1) In general.

(i) Eligible QBU.

(ii) Partnership.

(2) Applicable provisions.

(i) In general.

(ii) Annual recognition election.

(iii) Section 988 mark-to-market election.

(3) Modifications to applicable provisions.

(i) In general.

(ii) Controlled group.

(4) Terminating QBUs.

(d) Suspended section 987 loss.

(1) In general.

(i) Rules of § 1.987–11(c) and (d)(2) do not apply.

(ii) Suspension of section 987 loss.

(2) Exceptions.

(i) Method under which historic items do not give rise to section 987 gain or loss.

(ii) Annual recognition election.

(iii) De minimis rule.

(3) Recognition of suspended section 987 loss.

(i) In general.

(ii) Partnership that is not engaged in a trade or business.

(iii) Application of the loss-to-the-extent-of-gain rule.

(e) Adjustments to the basis of a partner's interest in the partnership.

(f) S corporations treated as partnerships.

(g) Examples.

(1) Example 1: Aggregate approach to section 987.

(i) Facts.

(ii) Analysis.

(2) Example 2: Entity approach to section 987.

(i) Facts.

(ii) Analysis.

§ 1.987–8 Termination of a section 987 QBU.

(a) Scope.

(b) In general.

(1) Trade or business ceases.

(2) Substantially all assets transferred.
 (3) Owner no longer a CFC.
 (4) Owner ceases to exist.
 (5) Section 987 QBU ceases to be an eligible QBU with a functional currency different from its owner.

(6) Change in form of ownership.
 (c) Transactions described in section 381(a).

(1) Liquidations.
 (2) Reorganizations.
 (d) [Reserved]
 (e) Effect of terminations.
 (f) Examples.

(1) Example 1: Cessation of operations.
 (i) Facts.
 (ii) Analysis.
 (2) Example 2: Transfer of a section 987 QBU to a member of a consolidated group.

(i) Facts.
 (ii) Analysis.
 (3) Example 3: Cessation of controlled foreign corporation status.

(i) Facts.
 (ii) Analysis.
 (4) Example 4: Section 332 liquidation.
 (i) Facts.

(ii) Analysis.
 (5) [Reserved]
 (6) Example 6: Deemed transfers to a CFC upon a check-the-box election.

(i) Facts.
 (ii) Analysis.
 (7) Example 7: Sale of a section 987 QBU to a member of a consolidated group.
 (i) Facts.
 (ii) Analysis.

§ 1.987–9 Recordkeeping requirements.

(a) In general.
 (b) Supplemental information.
 (c) Retention of records.
 (d) Information on a dedicated section 987 form.

§ 1.987–10 Transition rules.

(a) Overview.
 (1) In general.
 (2) Terms defined under prior § 1.987–12.
 (b) Scope.
 (1) Owner of a section 987 QBU.
 (2) Deferral QBU owner and owner of outbound loss QBU.
 (c) Transition date.
 (1) In general.
 (2) Terminating QBU.
 (i) In general.
 (ii) Ordering rule.
 (d) Application of the section 987 regulations after the transition date.

(1) Owner functional currency net value on the last day of the preceding taxable year.
 (2) Determination of historic rate.
 (3) Transition exchange rate.
 (i) In general.
 (ii) Earnings only method.
 (e) Pretransition gain or loss.
 (1) In general.
 (2) Amount of pretransition gain or loss for an owner that applied an eligible pretransition method.

(i) Owner of a section 987 QBU
 (ii) Deferral QBU owner.
 (iii) Owner of an outbound loss QBU.
 (3) Amount of pretransition gain or loss for an owner that did not apply an eligible pretransition method.

(i) In general.
 (ii) Computation of pretransition gain or loss.
 (iii) Annual unrecognized section 987 gain or loss.

(iv) Deferral QBU owner.
 (v) Owner of an outbound loss QBU.
 (4) Eligible pretransition method.
 (i) Earnings and capital method.
 (ii) Other reasonable methods.
 (iii) Other earnings only methods.
 (iv) Error in the application of a section 987 method.

(v) Certain consistent practices not treated as errors.
 (vi) Deferral of section 987 gain or loss until termination is not reasonable.
 (vii) Anti-abuse rule.

(5) Recognition of pretransition gain or loss.
 (i) In general.
 (ii) Election to recognize pretransition section 987 gain or loss ratably over the transition period.

(6) Predecessor of an owner.
 (i) In general.
 (ii) Predecessor.
 (7) Small business election.

(i) Scope.
 (ii) Owner threshold.
 (iii) QBU threshold.
 (iv) Small business election.
 (f) QBUs to which the fresh start transition method was applied.

(1) In general.
 (2) Application of the section 987 regulations after the transition date.
 (i) Owner functional currency net value on the last day of the preceding taxable year.
 (ii) Determination of historic rate.
 (iii) Unrecognized section 987 gain or loss.
 (3) Taxpayers that are required to transition using the fresh start transition method.
 (g) [Reserved]
 (h) Determination of source and character.

(1) In general.
 (2) Deferral QBU or outbound loss QBU.
 (i) [Reserved]
 (j) Adjustments to avoid double counting or omissions.

(k) Reporting.
 (1) In general.
 (2) QBUs for which reporting is required.
 (i) In general.
 (ii) QBUs to which the fresh start transition method was applied.

(3) Attachments not required where information is reported on a form.
 (4) No change in method of accounting.
 (l) Examples.

(1) Example 1: Earnings and capital method.
 (i) Facts.
 (ii) Analysis.
 (2) Example 2: Earnings only method described in paragraph (e)(4)(ii) of this section.

(i) Facts.
 (ii) Analysis.
 (3) Example 3: Earnings only method described in paragraph (e)(4)(iii) of this section.

(i) Facts.
 (ii) Analysis.
 (4) Example 4: Owner did not apply section 987(3).

(i) Facts.
 (ii) Analysis.
 (5) Example 5: Error in application of method.

(i) Facts.
 (ii) Analysis.
 (6) Example 6: Consistent practice not treated as an error.
 (i) Facts.
 (ii) Analysis.

§ 1.987–11 Suspended section 987 loss relating to certain elections; loss to the extent of gain rule.

(a) In general.
 (b) Cumulative suspended section 987 loss in a recognition grouping.

(1) In general.
 (2) Combined QBU.
 (3) Separated QBU.
 (c) Suspension of section 987 loss for taxable years in which a current rate election is in effect and an annual recognition election is not in effect.

(1) In general.
 (2) De minimis rule.
 (3) Taxable year of controlled group members.

(i) In general.
 (ii) Owner is a CFC.
 (d) Suspension of net unrecognized section 987 loss upon making or revoking certain elections.

(1) Making an annual recognition election.
 (2) Revoking a current rate election.
 (e) Loss-to-the-extent of gain rule.

(1) In general.
 (2) Separate determination for each recognition grouping.

(3) Amount of suspended section 987 loss recognized.

(i) Current year gain amount.
 (ii) Lookback gain amount.
 (iii) Suspended section 987 loss not taken into account.

(iv) Lookback period.
 (v) Anti-abuse rule.
 (4) Suspended section 987 loss recognized with respect to each section 987 QBU and suspended section 987 loss QBU.

(5) Section 381(a) transactions.
 (i) In general.
 (ii) Limitation for inbound section 381(a) transactions.

(6) Consolidated group members.
 (i) In general.
 (ii) Suspended section 987 losses arising in separate return limitation years.

(f) Recognition groupings.
 (1) Sourcing and section 904 category.
 (2) Statutory and residual groupings for CFC owners.

(g) Examples.
 (1) Example 1: Suspension of section 987 loss and recognition of suspended section 987 loss.

(i) Facts.
 (ii) Analysis.
 (2) Example 2: Recognition of suspended section 987 loss by reason of gain recognized during the lookback period.

(i) Facts.
 (ii) Analysis.
 (iii) Alternative facts.
 (iv) Analysis of alternative facts.
 (3) Example 3: Suspension of section 987 loss when a current rate election is revoked.

(i) Facts.
(ii) Analysis.

§ 1.987–12 Deferral of section 987 gain or loss.

(a) Overview.
(1) Scope.
(2) Exceptions.
(i) Annual recognition election.
(ii) De minimis rule.
(b) Treatment of section 987 gain and loss in connection with a deferral event.
(1) Gain or loss recognized (or suspended) in the taxable year of a deferral event.
(2) Deferred section 987 gain or loss.
(i) In general.
(ii) Deferred section 987 gain or loss attributable to a successor deferral QBU.
(c) Recognition (or suspension) of deferred section 987 gain or loss following a deferral event.
(1) Recognition upon a subsequent remittance.
(i) In general.
(ii) Amount.
(iii) Deemed remittance by a successor deferral QBU.
(2) Deferral events and outbound loss events with respect to a successor deferral QBU.
(d) Successor deferral QBU becomes a successor suspended loss QBU.
(e) Anti-abuse rule.
(f) Combinations and separations of successor deferral QBUs.
(1) Combined QBU.
(2) Separated QBU.
(g) Definitions.
(1) Deferral event.
(i) Events.
(ii) Assets on books of successor deferral QBU.
(2) Successor deferral QBU.
(3) Original deferral QBU owner.
(4) Qualified successor.
(h) Examples.
(1) Example 1: Contribution of a section 987 QBU with net unrecognized section 987 gain to a member of the controlled group.
(i) Facts.
(ii) Analysis.
(2) Example 2: Contribution of a section 987 QBU with net unrecognized section 987 loss to a member of the controlled group when a current rate election is in effect.
(i) Facts.
(ii) Analysis.
(3) Example 3: Election to be classified as a corporation.
(i) Facts.
(ii) Analysis.
(4) Example 4: Partial recognition of deferred gain or loss.
(i) Facts.
(ii) Analysis.

§ 1.987–13 Suspended section 987 loss upon terminations.

(a) Overview.
(1) In general.
(2) Ordering rule.
(b) Termination of a section 987 QBU with suspended loss.
(1) Suspended section 987 loss becomes suspended section 987 loss with respect to a successor suspended loss QBU.
(i) Successor suspended loss QBU.

(ii) Attribution of suspended section 987 loss to successor suspended loss QBU.
(2) Recognition of suspended section 987 loss.
(c) Termination of a successor suspended loss QBU.
(1) Successor to the successor suspended loss QBU.
(i) Successor suspended loss QBU.
(ii) Attribution of suspended section 987 loss to successor suspended loss QBU.
(2) Recognition of suspended section 987 loss.
(d) Transfer of successor suspended loss QBU owner.
(e) Transfer of original suspended loss QBU owner.
(f) Owner ceases to exist.
(g) Inbound nonrecognition transactions—no carryover of suspended section 987 loss.
(h) Outbound transactions—recognition or suspension of net unrecognized section 987 loss.
(1) In general.
(2) Outbound loss event.
(3) Loss recognition upon an outbound loss event
(4) Loss suspension upon outbound loss event.
(i) [Reserved]
(j) Termination of a successor suspended loss QBU.
(k) Anti-abuse.
(l) Definitions.
(1) Original suspended loss QBU owner.
(i) In general.
(ii) Successors.
(2) Successor suspended loss QBU.
(3) Successor suspended loss QBU owner.
(4) Ownership interests.
(5) Significant portion.
(m) Examples.
(1) Example 1: Trade or business of a section 987 QBU ceases.
(i) Facts.
(ii) Analysis.
(2) Example 2: Trade or business of a section 987 QBU is sold to a third party.
(i) Facts.
(ii) Analysis.
(3) Example 3: Outbound loss event.
(i) Facts.
(ii) Analysis.

§ 1.987–14 Section 987 hedging transactions.

(a) Overview.
(b) Section 987 hedging transaction.
(1) In general.
(2) Requirements.
(i) Identification.
(ii) Current rate election.
(iii) Mark-to-market method of accounting.
(iv) Treatment under U.S. generally accepted accounting principles.
(v) Hedge entered into by owner of the hedged QBU.
(3) Anti-abuse rule.
(4) Partial termination of a section 987 hedging transaction.
(c) Identification requirements.
(1) In general.
(2) Inadvertent error.
(d) Taxation of section 987 hedging transactions.
(1) Hedging gain or loss with respect to a hedged QBU.

(2) Adjustment to unrecognized section 987 gain or loss for the taxable year.
(i) Hedging loss.
(ii) Hedging gain.
(3) Termination of a hedged QBU.
(e) Examples.
(1) Example 1: Section 987 hedging transaction.
(i) Facts.
(ii) Analysis.
(2) Example 2: Excess hedging gain from a section 987 hedging transaction.
(i) Facts.
(ii) Analysis.

§ 1.987–15 Applicability date.

(a) Applicability date of section 987 regulations.
(1) In general.
(2) Applicability date for a terminating QBU.
(b) Application of the section 987 regulations to taxable years beginning on or before December 31, 2024, and ending after November 9, 2023.
(c) Application of the 2016 and 2019 section 987 regulations.
(1) In general.
(2) Application to section 987 QBUs not owned on the transition date.
(3) Modifications of defined terms for purposes of this paragraph (c).
(i) Application of § 1.987–10 in lieu of prior § 1.987–10.
(ii) Partnerships not included in section 987 electing group.
(iii) Transition date.
(d) Prior § 1.987–12.

§ 1.987–1 Scope, definitions, and special rules.

(a) *In general.* Sections 1.987–1 through 1.987–15 (the *section 987 regulations*) provide rules for determining the taxable income or loss and earnings and profits of a taxpayer with respect to a qualified business unit (QBU) that is subject to section 987. Further, the section 987 regulations provide rules for determining the timing, amount, character, and source of section 987 gain or loss recognized with respect to a section 987 QBU. This section addresses the scope of the section 987 regulations and provides certain definitions, special rules, and procedures for making elections. Section 1.987–2 provides rules for attributing assets and liabilities and items of income, gain, deduction, and loss to an eligible QBU. It also provides rules regarding the translation of items transferred to a section 987 QBU. Section 1.987–3 provides rules for determining and translating the taxable income or loss of a taxpayer with respect to a section 987 QBU. Section 1.987–4 provides rules for determining net unrecognized section 987 gain or loss. Section 1.987–5 provides rules regarding the recognition of section 987 gain or loss. It also provides rules regarding the translation of items

transferred from a section 987 QBU to its owner. Section 1.987–6 provides rules regarding the character and source of section 987 gain or loss. Section 1.987–7 provides rules relating to the application of the section 987 regulations with respect to a partnership or S corporation. Section 1.987–8 provides rules regarding the termination of a section 987 QBU. Section 1.987–9 provides rules regarding the recordkeeping required under section 987. Section 1.987–10 provides transition rules. Section 1.987–11 provides rules relating to suspended losses in connection with certain elections and the loss-to-the-extent-of-gain rule. Section 1.987–12 provides rules regarding when section 987 gain or loss is deferred, as well as when such deferred amounts are recognized. Section 1.987–13 provides rules relating to suspended section 987 loss of an owner with respect to a section 987 QBU that terminates. Section 1.987–14 provides rules relating to section 987 hedging transactions. Section 1.987–15 provides the applicability date of the section 987 regulations.

(b) *Scope of section 987 and certain rules relating to QBUs*—(1) *Persons subject to section 987*—(i) *In general*. Except as provided in paragraphs (b)(1)(ii) and (b)(6) of this section, any individual or corporation is subject to the section 987 regulations. See § 1.987–7 for rules relating to the application of the section 987 regulations in the case of a partnership or S corporation.

(ii) *Inapplicability to certain entities*. Section 987(3) and the section 987 regulations do not apply to individuals who are not United States persons and foreign corporations that either are not controlled foreign corporations or that are controlled foreign corporations in which no United States shareholders own (within the meaning of section 958(a)) stock.

(2) *Application of the section 987 regulations to earnings and profits*—(i) *In general*. The rules and principles of the section 987 regulations also apply to the determination of earnings and profits, and any elections that apply pursuant to the section 987 regulations also apply for purposes of determining earnings and profits.

(ii) *Timing*. Earnings and profits are increased when section 987 gain is recognized and decreased when section 987 loss is recognized. As a result, converting net unrecognized section 987 gain or loss to deferred section 987 gain or loss or suspended section 987 loss does not affect earnings and profits because the amounts have not yet been recognized.

(3) *Definition of a section 987 QBU*—(i) *In general*. For purposes of section 987, a *section 987 QBU* is an eligible QBU that has a functional currency different from its owner. A section 987 QBU will continue to be treated as a section 987 QBU of the owner until a sale or other termination of the section 987 QBU as described in § 1.987–8(b) and (c). See § 1.985–1 for rules determining the functional currency of an eligible QBU.

(ii) *Section 987 QBU grouping election*—(A) *In general*. Solely for purposes of section 987, an owner may elect to treat all section 987 QBUs with the same functional currency as a single section 987 QBU except to the extent provided in paragraph (b)(2)(ii)(B) of this section. However, a QBU described in § 1.987–7(c)(1) may not be treated as part of the same QBU as a section 987 QBU that is not described in § 1.987–7(c)(1).

(B) [Reserved]

(4) *Definition of an eligible QBU*—(i) *In general*. For purposes of section 987, an *eligible QBU* means a qualified business unit that is not subject to the United States dollar approximate separate transactions method rules of § 1.985–3.

(ii) *Qualified business unit*. For purposes of this paragraph (b)(4), a qualified business unit is defined in § 1.989(a)–1(b), except that a corporation, partnership, trust, estate, or disregarded entity is not itself a qualified business unit, but the activities of such entity may be a qualified business unit if they meet the requirements of § 1.989(a)–1(b)(1) and (b)(2)(ii). For example, if a corporation is solely engaged in activities that constitute a trade or business, and the corporation maintains only one set of books and records, the activities (but not the corporation) are a qualified business unit.

(5) *Definition of an owner*. For purposes of section 987, an *owner* is any person having direct ownership in an eligible QBU (including ownership through DEs). The term *owner* does not include an eligible QBU. For example, a section 987 QBU (QBU1) is not an owner of another section 987 QBU (QBU2) even if QBU1 wholly owns the DE that owns QBU2. A person that is not subject to the section 987 regulations under paragraph (b)(1)(ii) of this section can meet the definition of an owner under this paragraph (b)(5) for purposes of applying the section 987 regulations to other persons.

(i) *Direct ownership*. A person is a direct owner of an eligible QBU if the person is the owner for Federal income

tax purposes of the assets and liabilities of the eligible QBU.

(ii) [Reserved]

(6) [Reserved]

(7) *Examples illustrating paragraph (b) of this section*. The following examples illustrate the principles of this paragraph (b). The following facts are assumed for purposes of the examples. U.S. Corp is a domestic corporation, has the U.S. dollar as its functional currency, and uses the calendar year as its taxable year. Except as otherwise provided: Business A and Business B are eligible QBUs and have the euro and the Japanese yen, respectively, as their functional currencies; and DE1 and DE2 are DEs, have no assets or liabilities, and conduct no activities.

(i) *Example 1: Owner owns an eligible QBU and a DE holding company*—(A) *Facts*. U.S. Corp owns Business A and all of the interests in DE1. DE1 maintains a separate set of books and records that are kept in British pounds. DE1 owns pounds and all of the stock of a foreign corporation, FC. DE1 is liable to a lender on a pound-denominated obligation that was incurred to acquire the stock of FC. The FC stock, the pounds, and the liability incurred to acquire the FC stock are recorded on DE1's separate books and records. DE1 has no other assets or liabilities and conducts no activities (other than holding the FC stock and pounds and servicing its liability).

(B) *Analysis*—(1) Pursuant to paragraph (b)(5) of this section, U.S. Corp is the owner of Business A because it has direct ownership of Business A, an eligible QBU. Because Business A is an eligible QBU with a functional currency that is different from the functional currency of its owner, U.S. Corp, Business A is a section 987 QBU under paragraph (b)(3)(i) of this section. As a result, U.S. Corp and its section 987 QBU, Business A, are subject to section 987.

(2) Holding the stock of FC and pounds and servicing a liability does not constitute a trade or business within the meaning of § 1.989(a)–1(c). Because the activities of DE1 do not constitute a trade or business within the meaning of § 1.989(a)–1(c), such activities are not an eligible QBU. In addition, pursuant to paragraph (b)(4)(ii) of this section, DE1 itself is not an eligible QBU. As a result, neither DE1 nor its activities qualify as a section 987 QBU of U.S. Corp. Therefore, neither the activities of DE1 nor DE1 itself is subject to section 987. For the foreign currency treatment of payments on DE1's pound-denominated liability, see § 1.988–2(b).

(ii) *Example 2: Owner owns eligible QBUs through DEs*—(A) *Facts*. U.S.

Corp owns all of the interests in DE1. DE1 owns Business A and all of the interests in DE2. The only activities of DE1 are Business A activities and holding the interests in DE2. DE2 owns Business B and Business C. For purposes of this example, Business B does not maintain books and records that are separate from DE2. Instead, the activities of Business B are reflected on the books and records of DE2, which are maintained in Japanese yen. In addition, Business C has the U.S. dollar as its functional currency, maintains books and records that are separate from the books and records of DE2, and is an eligible QBU.

(B) *Analysis*—(1) Pursuant to paragraph (b)(4)(ii) of this section, DE1 and DE2 are not eligible QBUs. Moreover, pursuant to paragraph (b)(5) of this section, DE1 is not the owner of the Business A, Business B, or Business C eligible QBUs, and neither Business A nor DE2 is the owner of the Business B or Business C eligible QBUs. Instead, pursuant to paragraph (b)(5) of this section, U.S. Corp is the owner of the Business A, Business B, and Business C eligible QBUs.

(2) Because Business A and Business B are eligible QBUs with functional currencies that are different than the functional currency of U.S. Corp, Business A and Business B are section 987 QBUs under paragraph (b)(3)(i) of this section.

(3) The Business C eligible QBU has the same functional currency as U.S. Corp, the U.S. dollar. Therefore, the Business C eligible QBU is not a section 987 QBU under paragraph (b)(3)(i) of this section.

(iii) *Example 3: Section 987 grouping election*—(A) *Facts*. U.S. Corp owns all of the interests in DE1. DE1 owns Business A and Business B. For purposes of this example, assume Business B has the euro as its functional currency.

(B) *Analysis*—(1) Pursuant to paragraph (b)(4)(ii) of this section, DE1 is not an eligible QBU. Moreover, pursuant to paragraph (b)(5) of this section, DE1 is not the owner of the Business A or Business B eligible QBUs. Instead, pursuant to paragraph (b)(5) of this section, U.S. Corp is the owner of the Business A and Business B eligible QBUs.

(2) Business A and Business B constitute two separate eligible QBUs, each with the euro as its functional currency. Accordingly, Business A and Business B are section 987 QBUs of U.S. Corp under paragraph (b)(3)(i) of this section. U.S. Corp may elect to treat Business A and Business B as a single section 987 QBU pursuant to paragraph

(b)(3)(ii) of this section. If such election is made, pursuant to paragraph (b)(5) of this section, U.S. Corp would be the owner of the Business AB section 987 QBU that would include the activities of both the Business A section 987 QBU and the Business B section 987 QBU. In addition, pursuant to paragraph (b)(5) of this section, DE1 would not be treated as the owner of the Business AB section 987 QBU.

(c) *Exchange rates*. Solely for purposes of section 987, the spot rate, the yearly average exchange rate, and the historic rate are determined as provided in paragraphs (c)(1) through (3) of this section.

(1) *Spot rate*—(i) *In general*. Except as otherwise provided in this section, the spot rate means the rate determined under the rules of § 1.988–1(d)(1), (2), and (4) on the relevant date.

(ii) *Election to use a spot rate convention*. An owner may elect to use a spot rate convention that reasonably approximates the spot rate determined in paragraph (c)(1)(i) of this section. A spot rate convention may be based on the spot rate at the beginning of a reasonable period, the spot rate at the end of a reasonable period, the average of spot rates for a reasonable period, or spot and forward rates for a reasonable period. For this purpose, a reasonable period may not exceed three months. For example, in lieu of the spot rate determined in paragraph (c)(1)(i) of this section, the spot rate for all transactions during a monthly period may be determined pursuant to one of the following conventions: the spot rate at the beginning of the current month or at the end of the preceding month; the monthly average of daily spot rates for the current or preceding month; or an average of the beginning and ending spot rates for the current or preceding month. Similarly, in lieu of the spot rate determined in paragraph (c)(1)(i) of this section, the spot rate may be determined pursuant to an average of the spot rate and the 30-day forward rate on a day of the preceding month. Use of a spot rate convention that is consistent with the convention used for financial accounting purposes is generally presumed to reasonably approximate the rate in paragraph (c)(1)(i) of this section. However, the Commissioner may prescribe the spot rate as determined in paragraph (c)(1)(i) of this section or an appropriate spot rate pursuant to this paragraph (c)(1)(ii) if the Commissioner determines that the use of the convention would not clearly reflect income based on the facts and circumstances available at the time of the election. The election or revocation of a spot rate convention does not

change the spot rate with respect to any day of a taxable year before the election or revocation becomes effective. See paragraph (g) of this section for rules relating to section 987 elections.

(2) *Yearly average exchange rate*. For purposes of section 987, the yearly average exchange rate is a rate that represents an average exchange rate for the taxable year (or, if the section 987 QBU existed for less than the full taxable year, the portion of the year during which the section 987 QBU existed) computed under any reasonable method. For example, an owner may determine the yearly average exchange rate based on a daily, monthly, or quarterly averaging convention, whether weighted or unweighted, and may take into account forward rates for a period not to exceed three months. Use of an averaging convention that is consistent with the convention used for financial accounting purposes is generally presumed to be a reasonable method. However, the Commissioner may prescribe an appropriate yearly average exchange rate if the Commissioner determines that the use of the convention would not have been expected to clearly reflect income based on the facts and circumstances available at the time of the election.

(3) *Historic rate*—(i) *In general*. Except as otherwise provided in the section 987 regulations, the historic rate is determined as described in paragraphs (c)(3)(i)(A) through (E) of this section.

(A) *Assets generally*. In the case of an asset other than inventory that is acquired by a section 987 QBU (or otherwise becomes attributable to a section 987 QBU, including through a transfer), the historic rate is the yearly average exchange rate applicable to the year of acquisition (or the year in which the asset otherwise becomes attributable to the section 987 QBU).

(B) *Inventory under the simplified inventory method*. If a taxpayer has not elected under § 1.987–3(c)(2)(iv)(B) to use the historic inventory method, the historic rate for inventory is determined under this paragraph (c)(3)(i)(B).

(1) *LIFO inventory*. The historic rate for LIFO inventory is the yearly average exchange rate applicable to the year in which the inventory's LIFO layer arose.

(2) *Non-LIFO inventory*. The historic rate for non-LIFO inventory is the yearly average exchange rate for the relevant taxable year. For example, in determining the owner functional currency net value of a section 987 QBU on the last day of the current taxable year under § 1.987–4(d)(1)(i)(A), the historic rate for non-LIFO inventory is the yearly average exchange rate for the

current taxable year. In determining the owner functional currency net value of a section 987 QBU on the last day of the preceding taxable year under § 1.987–4(d)(1)(i)(B), the historic rate for non-LIFO inventory is the yearly average exchange rate for the preceding taxable year.

(C) *Inventory under the historic inventory method.* If a taxpayer has elected under § 1.987–3(c)(2)(iv)(B) to use the historic inventory method, each inventoriable cost with respect to a section 987 QBU's inventory may have a different historic rate. The historic rate for each inventoriable cost is the exchange rate at which the cost would be translated under § 1.987–3 if it were not an inventoriable cost.

(D) *Liabilities generally.* In the case of a liability that is incurred or assumed by a section 987 QBU, the historic rate is the yearly average exchange rate applicable to the year the liability is incurred or assumed.

(E) *Determination of historic rates after revocation of current rate election.* If a current rate election is revoked or otherwise ceases to be in effect, the historic rate of all historic items (other than non-LIFO inventory subject to the simplified inventory method) that were attributable to a section 987 QBU on the last day of the last taxable year in which the current rate election was in effect is the spot rate applicable to that day. Similarly, except as provided in paragraph (c)(3)(i)(B)(2) of this section, if a marked item becomes a historic item (such as when an asset of an insurance company ceases to be a separate account asset), the historic rate for the historic item is equal to the spot rate applicable to the last day of the last taxable year in which it was treated as a marked item.

(ii) *Date placed in service for depreciable or amortizable property.* In the case of depreciable or amortizable property, an owner may determine the historic rate by reference to the date such property is placed in service by the section 987 QBU rather than the date the property was acquired, provided that this convention is consistently applied for all such property attributable to that section 987 QBU.

(iii) *Changed functional currency.* In the case of a section 987 QBU or an owner of a section 987 QBU that previously changed its functional currency, § 1.985–5(d)(1)(ii)(A) and (e)(4)(i)(A), respectively, are taken into account in determining the historic rate for an item reflected on the balance sheet of the section 987 QBU immediately before the year of change.

(d) *Marked item*—(1) *In general.* Except as provided in paragraph (d)(2)

of this section, a marked item is an asset (*marked asset*) or liability (*marked liability*) that is attributable to a section 987 QBU under § 1.987–2(b) and that—

(i) Is denominated in, or determined by reference to, the functional currency of the section 987 QBU and would be a section 988 transaction if such item were held or entered into directly by the owner of the section 987 QBU;

(ii) Is a prepaid expense or a liability for an advance payment of unearned income, in either case having an original term of one year or less on the date the prepaid expense or liability for an advance payment of unearned income arises;

(iii) Is a section 988 transaction of the section 987 QBU;

(iv) Is an insurance reserve; or

(v) Is a separate account asset.

(2) *Current rate election.* A taxpayer may elect to treat all assets and liabilities that are attributable to a section 987 QBU under § 1.987–2(b) as marked items (a *current rate election*). See § 1.987–11(c) for rules suspending section 987 loss if a current rate election is in effect.

(e) *Historic item.* A historic item is an asset (*historic asset*) or liability (*historic liability*) that is attributable to a section 987 QBU under § 1.987–2(b) and that is not a marked item.

(f) *Example: Identification of marked and historic items.* The following example illustrates the application of paragraphs (d) and (e) of this section.

(1) *Facts.* U.S. Corp is a domestic corporation with the U.S. dollar as its functional currency and is the owner of Business A, a section 987 QBU that has the pound as its functional currency. Items reflected on Business A's balance sheet include £10,000, \$1,000, a building with a basis of £100,000, a light general purpose truck with a basis of £30,000, a computer with a basis of £1,000, a 60-day receivable for ¥15,000, an account payable of £5,000, and a foreign currency contract within the meaning of section 1256(g)(2) that requires Business A to exchange £100 for \$125 in 90 days.

(2) *Analysis.* Under paragraph (d) of this section, the £10,000, the \$1,000, the ¥15,000 receivable, the £5,000 account payable, and the £/\$ section 1256 foreign currency contract are marked items. The other items are historic items under paragraph (e) of this section.

(g) *Elections.* This paragraph (g) provides rules for making and revoking elections under the section 987 regulations (the *section 987 elections*). A section 987 election is made for the owner and for a taxable year and applies to every section 987 QBU owned by the owner while the election is in effect.

Once made, a section 987 election remains in effect until revoked.

(1) *Persons making the election.* A section 987 election is made or revoked by the authorized person. The authorized person is described in paragraph (g)(1)(i), (ii), (iii), or (iv) of this section. If there are multiple controlling domestic shareholders, references to “the authorized person” refer to all authorized persons acting in concert.

(i) *United States persons.* Except as provided in paragraph (g)(1)(iii) or (iv) of this section, if the owner of a section 987 QBU is a United States person, the owner is the authorized person.

(ii) *CFCs.* If the owner of a section 987 QBU is a controlled foreign corporation, the controlling domestic shareholders (determined under § 1.964–1(c)(5)(i)) of the controlled foreign corporation are treated as the authorized person.

(iii) *Consolidated groups.* If the owner is a member of a consolidated group, see § 1.1502–77.

(iv) *Partnerships.* If the owner of a section 987 QBU is a partnership, the election is made or revoked by the partnership. For a partnership that is not otherwise required to file a partnership return, see § 1.6031(a)–1(b)(5) for elections that can only be made by a partnership under section 703.

(2) *Consistency rules*—(i) *Consolidated groups.* A section 987 election is made or revoked by a consolidated group and applies to all members of the group. Therefore, the same section 987 elections will be in effect for all members of a consolidated group at all times. If a corporation becomes a member of a consolidated group, it is deemed to make or revoke any section 987 election as necessary to be consistent with the consolidated group. If a corporation ceases to be a member of a consolidated group and does not join another group, its section 987 elections are unaffected by its departure from the group. All members of a consolidated group are treated as a single United States person for purposes of applying paragraph (g)(2)(ii) of this section.

(ii) *CFCs and foreign partnerships.* If the authorized person makes or revokes an election on behalf of any person (including the authorized person) described in paragraphs (g)(2)(ii)(A) through (C) of this section (the *section 987 electing group*), then the election must be made or revoked on behalf of all members of the section 987 electing group for the first taxable year of each entity that ends with or within the taxable year of the United States person described in paragraph (g)(2)(ii)(A) of

this section in which the election or revocation became effective. If an entity that was not previously a member of the section 987 electing group becomes a member (for example, upon formation or acquisition), it is deemed to make or revoke any section 987 election as necessary to be consistent with the other members (without regard to the requirements of paragraph (g)(3)(ii) of this section). The following persons are described in this paragraph (g)(2)(ii):

(A) A United States person (the *relevant United States person*).

(B) Each controlled foreign corporation in which the relevant United States person owns (within the meaning of section 958(a)) more than fifty percent of the stock (by vote or value).

(C) In the case of an election that can be made by or for a partnership, each foreign partnership in which the relevant United States person owns (directly or indirectly) more than fifty percent of the capital and profits interest.

(iii) *Section 381(a) transactions*. If a corporation (*acquiring corporation*) acquires the assets of another corporation in a transaction described in section 381(a), the acquiring corporation's election status applies to all section 987 QBUs owned by the acquiring corporation after the transaction.

(3) *Manner of making or revoking elections*. The section 987 elections must be made in accordance with this paragraph (g)(3), except as provided in forms and instructions or other guidance as provided by the Secretary.

(i) *Statement must be attached to a return*. An authorized person that makes or revokes a section 987 election in accordance with this paragraph (g) must attach to its return the statement described in this paragraph (g)(3)(i) (or must provide the information described in this paragraph (g)(3)(i) in the manner prescribed in forms or instructions or other guidance). Each statement must include an identification of the election that is made or revoked (including the section and paragraph of the regulations under which the election is made); the name, address, and functional currency of each owner (or if the owner is a member of a consolidated group, the common parent of the consolidated group) for which the election is made or revoked; and the name, address, functional currency, and owner of each section 987 QBU to which the election applies. The elections provided in § 1.987–10 are made by reporting the election on the statement described in § 1.987–10(k). An election to use a spot rate convention under paragraph

(c)(1)(ii) of this section must describe the convention.

(ii) *Election requirements*—(A) *Consent required*. Except as provided in paragraph (g)(3)(ii)(B) or (C) of this section, a section 987 election may not be made or revoked without the consent of the Commissioner. A copy of the consent must be attached to the statement described in paragraph (g)(3)(i) of this section. For purposes of this paragraph (g)(3)(ii), the Commissioner's consent may be obtained only with a ruling or administrative pronouncement. See Revenue Procedure 2024–1, I.R.B. 2024–1 (or superseding guidance).

(B) *Current rate election, annual recognition election, and section 988 mark-to-market election*. Except as provided in paragraph (g)(3)(ii)(C) of this section, the authorized person may make a current rate election, an annual recognition election, or a section 988 mark-to-market election without the Commissioner's consent by filing the statement prescribed in paragraph (g)(3)(i) of this section with the Internal Revenue Service in accordance with the prescribed form or its instructions (or other guidance) on or before the first day of the taxable year to which the election applies, and attaching a copy of the statement to its return. Once made, a current rate election, annual recognition election, or section 988 mark-to-market election may not be revoked without the Commissioner's consent for any taxable year beginning within 60 months of the first day of the taxable year for which it was made. Once revoked, a new current rate election, annual recognition election, or section 988 mark-to-market election may not be made without the Commissioner's consent for any taxable year beginning within 60 months of the first day of the taxable year for which it was revoked.

(C) *First year to which the section 987 regulations apply*. The authorized person may make a section 987 election without the consent of the Commissioner on its original, timely filed (including extensions) return for the first taxable year of an owner in which both—

(1) The section 987 regulations apply (other than by applying solely to one or more terminating QBUs pursuant to § 1.987–15(a)(2)); and

(2) Either the owner or any member of its consolidated group or section 987 electing group is the owner of a section 987 QBU.

(iii) *Elections made under the 2016 and 2019 section 987 regulations*. Each section 987 election must be made by the authorized person under the rules of

this section without regard to whether the election was in effect under the 2016 and 2019 final regulations or under prior § 1.987–8T. In the first taxable year in which the section 987 regulations apply, any elections made under the 2016 and 2019 final regulations cease to be effective.

(4) *No change in method of accounting*. An election under section 987 is not treated as a change in method of accounting for purposes of sections 446 and 481.

(5) *Principles of § 1.964–1(c)(3) applicable to section 987 elections*. Except as otherwise provided in this paragraph (g), if the authorized person makes or revokes a section 987 election on behalf of a controlled foreign corporation, the authorized person must make or revoke the section 987 election in accordance with the rules and principles of § 1.964–1(c)(3).

(h) *Definitions*. The definitions in this paragraph (h) apply for purposes of the section 987 regulations.

1991 proposed regulations. 1991 proposed regulations means proposed §§ 1.987–1 through 1.987–3 as contained in 56 FR 48457–01 (September 25, 1991).

2006 proposed regulations. 2006 proposed regulations means: proposed §§ 1.861–9T(g)(2)(ii)(A)(1) and (g)(2)(vi); 1.985–5; 1.987–1 through 1.987–11; 1.988–1(a)(3) and (4), (a)(10)(ii), and (i); 1.988–4(b)(2); and 1.989(a)–1(b)(2)(i), and (b)(4) as contained in 71 FR 52876–01 (September 7, 2006).

2016 and 2019 section 987 regulations. 2016 and 2019 section 987 regulations means the following regulations:

(i) Sections 1.861–9T(g)(2)(ii)(A)(1) and (g)(2)(vi); 1.985–5; 1.987–1 through 1.987–10; 1.988–1(a)(4), (a)(10)(ii), and (i); 1.988–4(b)(2); and 1.989(a)–1(b)(2)(i), (b)(4), (d)(3) and (4), as contained in 26 CFR in part 1 in effect on April 1, 2017.

(ii) Sections 1.987–2T(c)(9), 1.987–4T(c)(2) and (f), and 1.987–7T, as contained in 26 CFR in part 1 in effect on April 1, 2017 (until they were revoked on May 13, 2019).

(iii) Sections 1.987–2(c)(9) and 1.987–4(c)(2) and (f), as contained in 26 CFR in part 1 in effect on April 1, 2020 (beginning on May 13, 2019).

(iv) Sections 1.987–1T (other than §§ 1.987–1T(g)(2)(i)(B) and (g)(3)(i)(H)), 1.987–3T, 1.987–6T, 1.988–1T, and 1.988–2T(i), as contained in 26 CFR in part 1 in effect on April 1, 2017 (until they expired on December 6, 2019).

Adjusted balance sheet. Adjusted balance sheet means a tax basis balance sheet in the functional currency of the eligible QBU, determined by—

(i) Preparing a balance sheet for the relevant date from the section 987 QBU's books and records (within the meaning of § 1.989(a)–1(d)) recorded in the section 987 QBU's functional currency and showing all assets and liabilities attributable to the section 987 QBU under § 1.987–2(b) (the *preliminary balance sheet*); and

(ii) Making adjustments necessary to conform the items reflected on the preliminary balance sheet to United States tax accounting principles (including adjustments to reflect items that were not reflected on the preliminary balance sheet but should be reflected under United States tax accounting principles, and adjustments to eliminate items that are reflected on the preliminary balance sheet but should not be reflected under United States tax accounting principles).

Annual recognition election. *Annual recognition election* has the meaning provided in § 1.987–5(b)(2).

Authorized person. *Authorized person* has the meaning provided in paragraph (g)(1) of this section.

Combination. *Combination* has the meaning provided in § 1.987–2(c)(9)(i).

Combined QBU. *Combined QBU* has the meaning provided in § 1.987–2(c)(9)(i).

Combining QBU. *Combining QBU* has the meaning provided in § 1.987–2(c)(9)(i).

Consolidated group. *Consolidated group* has the meaning provided in § 1.1502–1(h).

Controlled foreign corporation. *Controlled foreign corporation* (or *CFC*) has the meaning provided in section 957 (or, if applicable, section 953(c)(1)(B)).

Controlled group. *A controlled group* means all persons with the relationships to each other specified in section 267(b) or section 707(b).

Cumulative suspended section 987 loss. *Cumulative suspended section 987 loss* has the meaning provided in § 1.987–11(b).

Current rate election. *Current rate election* has the meaning provided in paragraph (d)(2) of this section.

Current year gain amount. *Current year gain amount* has the meaning provided in § 1.987–11(e)(3)(i).

Deferral event. *Deferral event* has the meaning provided in § 1.987–12(g)(1).

Deferred section 987 gain or loss. *Deferred section 987 gain or loss* has the meaning provided in § 1.987–12(b)(2). *Deferred section 987 gain or loss* does not include net unrecognized section 987 gain or loss or suspended section 987 loss.

Disregarded entity. *Disregarded entity* (or *DE*) means an entity disregarded as an entity separate from its owner for

Federal income tax purposes, including an entity described in § 301.7701–2(c)(2) of this chapter, a qualified subchapter S subsidiary under section 1361(b)(3), a qualified REIT subsidiary within the meaning of section 856(i)(2), and a trust all of which is treated (under subpart E of part I of subchapter J of Chapter 1 of the Code) as owned by the grantor or another person.

Disregarded transactions. *Disregarded transactions* has the meaning provided in § 1.987–2(c)(2)(ii).

Earnings only method. *Earnings only method* means a method of applying section 987 before the transition date under which gain or loss under section 987(3) is determined only with respect to the earnings of a section 987 QBU.

ECI. *ECI* means income that is effectively connected with the conduct of a trade or business within the United States.

Eligible pretransition method. *Eligible pretransition method* has the meaning provided in § 1.987–10(e)(4).

Eligible QBU. *Eligible QBU* has the meaning provided in paragraph (b)(4) of this section.

Financial instrument. *Financial instrument* has the meaning provided in § 1.1275–6(b)(3). It includes a financial instrument entered into between related parties or unrelated parties.

Foreign source income. *Foreign source income* means income from sources without the United States.

Generally accepted accounting principles. *Generally accepted accounting principles* means United States generally accepted accounting principles described in standards established and made effective by the Financial Accounting Standards Board.

Hedge. *Hedge* has the meaning provided in § 1.987–14(b)(1).

Hedged QBU. *Hedged QBU* has the meaning provided in § 1.987–14(b)(1).

Hedging gain or loss. *Hedging gain or loss* has the meaning provided in § 1.987–14(d)(1).

Historic asset. *Historic asset* has the meaning provided in paragraph (e) of this section.

Historic item. *Historic item* has the meaning provided in paragraph (e) of this section.

Historic liability. *Historic liability* has the meaning provided in paragraph (e) of this section.

Historic rate. *Historic rate* has the meaning provided in paragraph (c)(3) of this section.

Insurance reserve. *Insurance reserve* means an item that is a reserve under section 807(c) or section 953(b) (as applicable).

LIFO. *LIFO* means the last-in, first-out inventory method (as described in section 472).

LIFO inventory. *LIFO inventory* means inventory accounted for under the LIFO inventory method.

Liability. *Liability* means the amount of a liability on the adjusted balance sheet (or the amount that would be on the adjusted balance sheet if an adjusted balance sheet were prepared for that day).

Lookback gain amount. *Lookback gain amount* has the meaning provided in § 1.987–11(e)(3)(ii).

Lookback period. *Lookback period* has the meaning provided in § 1.987–11(e)(3)(iv).

Loss-to-the-extent-of-gain rule. *Loss-to-the-extent-of-gain rule* has the meaning provided in § 1.987–11(e)(1).

Marked asset. *Marked asset* has the meaning provided in paragraph (d) of this section.

Marked item. *Marked item* has the meaning provided in paragraph (d) of this section.

Marked liability. *Marked liability* has the meaning provided in paragraph (d) of this section.

Net accumulated unrecognized section 987 gain or loss. *Net accumulated unrecognized section 987 gain or loss* has the meaning provided in § 1.987–4(c).

Net unrecognized section 987 gain or loss. *Net unrecognized section 987 gain or loss* has the meaning provided in § 1.987–4(b). *Net unrecognized section 987 gain or loss* does not include deferred section 987 gain or loss or suspended section 987 loss.

Non-LIFO inventory. *Non-LIFO inventory* means inventory that is not accounted for under the LIFO inventory method.

Original deferral QBU. *Original deferral QBU* has the meaning provided in § 1.987–12(b).

Original deferral QBU owner. *Original deferral QBU owner* has the meaning provided in § 1.987–12(g)(3).

Original suspended loss QBU owner. *Original suspended loss QBU owner* has the meaning provided in § 1.987–13(l)(1).

Outbound loss event. *Outbound loss event* has the meaning provided in § 1.987–13(h)(2).

Outbound loss QBU. *Outbound loss QBU* has the meaning provided in § 1.987–13(h)(1).

Outbound section 987 loss. *Outbound section 987 loss* has the meaning provided in § 1.987–13(h)(4).

Owner. *Owner* has the meaning provided in paragraph (b)(5) of this section.

Prior § 1.987–1. *Prior § 1.987–1* means § 1.987–1, as contained in 26 CFR part 1 in effect on April 1, 2017.

Prior § 1.987-4. Prior § 1.987-4 means § 1.987-4, as contained in 26 CFR in part 1 in effect on April 1, 2017.

Prior § 1.987-5. Prior § 1.987-5 means § 1.987-5, as contained in 26 CFR in part 1 in effect on April 1, 2017.

Prior § 1.987-8T. Prior § 1.987-8T means § 1.987-8T, as contained in 26 CFR in part 1 in effect on April 1, 2017.

Prior § 1.987-10. Prior § 1.987-10 means § 1.987-10, as contained in 26 CFR in part 1 in effect on April 1, 2017.

Prior § 1.987-12. Prior § 1.987-12 means § 1.987-12, as contained in 26 CFR in part 1 in effect on April 1, 2020.

Prior § 1.987-12T. Prior § 1.987-12T means § 1.987-12T, as contained in 26 CFR in part 1 in effect on April 1, 2017.

QBU net value. QBU net value has the meaning provided in § 1.987-4(e)(2)(ii).

Recognition grouping. Recognition grouping has the meaning provided in § 1.987-11(f).

Remittance. Remittance has the meaning provided in § 1.987-5(c).

S corporation. S corporation has the meaning provided in section 1361(a)(1).

Section 904 category. Section 904 category means a separate category of income described in § 1.904-5(a)(4)(v).

Section 987 electing group. Section 987 electing group has the meaning provided in paragraph (g)(2)(ii) of this section.

Section 987 elections. Section 987 elections has the meaning provided in paragraph (g) of this section.

Section 987 gain or loss. Section 987 gain or loss means gain or loss that is recognized under § 1.987-5, deferred section 987 gain or loss, suspended section 987 loss, and pretransition gain or loss that is recognized under § 1.987-10(e)(5)(ii).

Section 987 hedging transaction. Section 987 hedging transaction has the meaning provided in § 1.987-14(b).

Section 987 QBU. Section 987 QBU has the meaning provided in paragraph (b)(3) of this section.

Section 987 regulations. Section 987 regulations has the meaning provided in paragraph (a) of this section.

Section 987 taxable income or loss. Section 987 taxable income or loss has the meaning provided in § 1.987-3(a).

Section 988 mark-to-market election. Section 988 mark-to-market election has the meaning provided in § 1.987-3(b)(4)(ii).

Separate account. Separate account means a separate set of financial records maintained with respect to an insurance contract or group of contracts to report assets and liabilities for specific products that are separated from the insurer's general account, provided the following requirements are met—

(i) Any liability of the separate account is the liability only of that

account and not the liability of any other separate account or the general account;

(ii) The separate account is not part of the company's general account and is protected from the general creditors of the company; and

(iii) The value of each contract supported by the separate account is supported proportionately by each of the assets in such account.

Separate account asset. Separate account asset means an asset that is reflected on the books and records of an eligible QBU and held in a separate account with respect to a separate account insurance contract. A separate account asset does not include an asset held in the general account.

Separate account insurance contract. Separate account insurance contract means a contract that would be treated as an insurance contract for Federal income tax purposes (except to the extent provided in this definition with respect to the requirements in section 72(s), 101(f), 817(h), or 7702) for which some or all of the assets supporting the insurance reserves are required to be held in a separate account under the insurance regulatory rules of the jurisdiction in which the contract is issued, and either—

(i) The contract qualifies as a variable contract under section 817(d) (treating foreign law as a State law or regulation); or

(ii) The contract would qualify as a variable contract under section 817(d) (treating foreign law as a State law or regulation) but for its failure to meet one or more of the requirements in section 72(s), 101(f), 817(h), or 7702, provided that the following requirements are met—

(A) The contract is regulated as a life insurance or annuity contract in the foreign jurisdiction in which it is issued;

(B) The contract reserves are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest. For this purpose, the reflection of the investment return and the market value of assets in the separate account is considered an assumed rate of interest; and

(C) No policyholder, annuitant, insured, or beneficiary under the contract is a United States person.

Separated QBU. Separated QBU has the meaning provided in § 1.987-2(c)(9)(iii).

Separating QBU. Separating QBU has the meaning provided in § 1.987-2(c)(9)(iii).

Separation. Separation has the meaning provided in § 1.987-2(c)(9)(iii).

Separation fraction. In the case of a separated QBU, separation fraction means a fraction, the numerator of which is the aggregate adjusted basis of the gross assets attributable to the separated QBU immediately after the separation, and the denominator of which is the aggregate adjusted basis of the gross assets attributable to all separated QBUs immediately after the separation.

Spot rate. Spot rate has the meaning provided in paragraph (c)(1) of this section.

SRLY section 987 losses. SRLY section 987 losses has the meaning provided in § 1.987-11(e)(6)(ii).

Successor deferral QBU. Successor deferral QBU has the meaning provided in § 1.987-12(g)(2).

Successor deferral QBU owner. Successor deferral QBU owner has the meaning provided in § 1.987-12(c)(1).

Successor suspended loss QBU. Successor suspended loss QBU has the meaning provided in § 1.987-13(l)(2).

Successor suspended loss QBU owner. Successor suspended loss QBU owner has the meaning provided in § 1.987-13(l)(3).

Suspended section 987 loss.

Suspended section 987 loss means section 987 loss that is subject to the limitations on recognition described in § 1.987-11(e). See §§ 1.987-10(e)(5), 1.987-11(c) and (d), 1.987-12(c), and 1.987-13(h) for rules regarding when net unrecognized section 987 loss or deferred section 987 loss becomes suspended section 987 loss. Suspended section 987 loss does not include net unrecognized section 987 loss or deferred section 987 loss.

Tentative tested income group.

Tentative tested income group has the meaning provided in § 1.987-6(b)(2)(i)(D)(1).

Terminating QBU. Terminating QBU means a section 987 QBU, if both—

(i) The section 987 QBU terminates on any date on or after November 9, 2023, or the section 987 QBU terminates as a result of an entity classification election made under § 301.7701-3 of this chapter that is filed on or after November 9, 2023, and that is effective before November 9, 2023; and

(ii) When the section 987 QBU terminates, neither the section 987 regulations nor the 2016 and 2019 section 987 regulations would apply with respect to the section 987 QBU but for § 1.987-15(a)(2).

Termination. With respect to a section 987 QBU, termination has the meaning provided in § 1.987-8(b) and (c). With respect to a successor suspended loss QBU, the term *termination* has the meaning provided in § 1.987-13(j).

Trade or business. *Trade or business* has the meaning provided in § 1.989(a)–1(c).

Transfer. *Transfer* has the meaning provided in § 1.987–2(c).

Transition date. *Transition date* has the meaning provided in § 1.987–10(c).

United States person. *United States person* (or *U.S. person*) has the meaning provided in section 7701(a)(30).

United States shareholder. *United States shareholder* (or *U.S. shareholder*) has the meaning provided in section 951(b) (or, if applicable, section 953(c)(1)(A)).

U.S. source income. *U.S. source income* means income from sources within the United States.

Yearly average exchange rate. *Yearly average exchange rate* has the meaning provided in paragraph (c)(2) of this section.

§ 1.987–2 Attribution of items to eligible QBUs; definition of a transfer and related rules.

(a) *In general.* This section provides rules regarding when items are attributed to eligible QBUs and when they are treated as transferred to or from section 987 QBUs. Paragraph (b) of this section provides rules for attributing assets and liabilities, and items of income, gain, deduction, and loss, to an eligible QBU. Paragraph (c) of this section defines a transfer to or from a section 987 QBU. Paragraph (d) of this section provides translation rules for transfers to a section 987 QBU. Paragraph (e) of this section provides a cross-reference relating to the treatment of section 987 QBUs owned by consolidated groups.

(b) *Attribution of items to an eligible QBU—(1) General rules.* Except as provided in paragraphs (b)(2) and (3) of this section, items are attributable to an eligible QBU to the extent they are reflected on the separate set of books and records, as defined in § 1.989(a)–1(d)(1) and (2), of the eligible QBU. For purposes of this section, the term *item* refers to any asset or liability, and any item of income, gain, deduction, or loss. Items that are attributed to an eligible QBU pursuant to this section must be adjusted to conform to Federal income tax principles. An item that is not taken into account for financial accounting purposes, and therefore is not reflected on the separate set of books and records of an eligible QBU, is treated as reflected on the separate set of books and records of an eligible QBU to the extent it would have been so reflected if the item were taken into account for financial accounting purposes. Except as provided in § 1.989(a)–1(d)(3), these attribution rules apply solely for

purposes of section 987. For example, the allocation and apportionment of interest expense under section 864(e) is independent of these rules.

(2) *Exceptions for non-portfolio stock, interests in partnerships, and certain acquisition indebtedness.* (i) *In general.* Except as provided in paragraph (b)(2)(ii) of this section, the following items are not considered to be on the books and records of an eligible QBU:

(A) Stock of a corporation (whether domestic or foreign), other than stock of a corporation if the owner of the eligible QBU owns less than 10 percent of the total combined voting power of all classes of stock entitled to vote and less than 10 percent of the total value of all classes of stock of such corporation. For this purpose, section 958 (other than section 958(b)(1)) applies in determining ownership of a controlled foreign corporation and section 318(a) applies in determining ownership of other corporations, except that in applying section 318(a)(2)(C), the phrase “10 percent” is used instead of the phrase “50 percent.”

(B) An interest in a partnership (whether domestic or foreign).

(C) A liability that was incurred to acquire stock described in paragraph (b)(2)(i)(A) of this section or that was incurred to acquire a partnership interest described in paragraph (b)(2)(i)(B) of this section.

(D) Income, gain, deduction, or loss arising from the items described in paragraphs (b)(2)(i)(A) through (C) of this section. For example, if a dividend is received with respect to stock of a corporation described in paragraph (b)(2)(i)(A) of this section, the dividend is excluded from the income of the eligible QBU. *See also* paragraph (c)(2)(ii) of this section, treating the payment as received by the owner and contributed to the eligible QBU.

(ii) *Separate account assets.* Paragraph (b)(2)(i) of this section does not apply to separate account assets, liabilities related to separate account assets, or income, gain, deduction, or loss arising from those assets and liabilities.

(3) *Adjustments to items reflected on the books and records—(i) General rule.* If a principal purpose of recording (or not recording) an item on the books and records of an eligible QBU is the avoidance of Federal income tax under, or through the use of, section 987, the item must be allocated between or among the eligible QBU, the owner of such eligible QBU, and any other persons, entities (including DEs), or other QBUs within the meaning of § 1.989(a)–1(b) (including eligible QBUs) in a manner that reflects the

substance of the transaction. For purposes of this paragraph (b)(3)(i), relevant factors for determining whether such Federal income tax avoidance is a principal purpose of recording (or not recording) an item on the books and records of an eligible QBU include the factors set forth in paragraphs (b)(3)(ii) and (iii) of this section. The presence or absence of any factor or factors is not determinative. The weight given to any factor (whether or not set forth in paragraphs (b)(3)(ii) and (iii) of this section) depends on the facts and circumstances.

(ii) *Factors indicating no tax avoidance.* For purposes of paragraph (b)(3)(i) of this section, factors that may indicate that recording (or not recording) an item on the books and records of an eligible QBU did not have as a principal purpose the avoidance of Federal income tax under, or through the use of, section 987 include the recording (or not recording) of an item:

(A) For a significant and bona fide business purpose;

(B) In a manner that is consistent with the economics of the underlying transaction;

(C) In accordance with generally accepted accounting principles (or a similar comprehensive accounting standard);

(D) In a manner that is consistent with the treatment of similar items from year to year;

(E) In accordance with accepted conditions or practices in the particular trade or business of the eligible QBU;

(F) In a manner that is consistent with an explanation of existing internal accounting policies that is evidenced by documentation contemporaneous with the timely filing of a return for the taxable year; and

(G) As a result of a transaction between legal entities (for example, the transfer of an asset or the assumption of a liability), even if such transaction is not regarded for Federal income tax purposes (for example, a transaction between a DE and its owner).

(iii) *Factors indicating tax avoidance.* For purposes of paragraph (b)(3)(i) of this section, factors that may indicate that a principal purpose of recording (or not recording) an item on the books and records of an eligible QBU is the avoidance of Federal income tax under, or through the use of, section 987 include:

(A) The presence or absence of an item on the books and records that is the result of one or more transactions that are transitory, for example, due to a circular flow of cash or other property;

(B) The presence or absence of an item on the books and records that is the

result of one or more transactions that do not have substance; and

(C) The presence or absence of an item on the books and records that results in the taxpayer (or a person related to the taxpayer within the meaning of section 267(b) or section 707(b)) having offsetting positions with respect to the functional currency of a section 987 QBU.

(iv) *Section 988 transactions.* A section 988 transaction that is reflected on the books and records of an eligible QBU is not attributable to an eligible QBU if the transaction was entered into or was reflected on the eligible QBU's books and records with a principal purpose of generating fully or partially offsetting amounts of section 988 gain or loss and section 987 gain or loss (or if the taxpayer chose to denominate the section 988 transaction in a nonfunctional currency with such a principal purpose).

(c) *Transfers to and from section 987 QBUs—(1) In general.* The following rules apply for purposes of determining whether there is a transfer of an asset or a liability from an owner to a section 987 QBU, or from a section 987 QBU to an owner. These rules apply solely for purposes of section 987.

(2) *Disregarded transactions—(i) General rule.* An asset or liability is treated as transferred to a section 987 QBU from its owner if, as a result of a disregarded transaction, such asset or liability is reflected on the books and records of (or otherwise becomes attributable to) the section 987 QBU within the meaning of paragraph (b) of this section. Similarly, an asset or liability is treated as transferred from a section 987 QBU to its owner if, as a result of a disregarded transaction, such asset or liability is no longer reflected on the books and records of (or otherwise ceases to be attributable to) the section 987 QBU within the meaning of paragraph (b) of this section.

(ii) *Definition of a disregarded transaction.* For purposes of this section, a disregarded transaction means a transaction that is not regarded for Federal income tax purposes (for example, any transaction between separate section 987 QBUs of the same owner). For purposes of this paragraph (c), a disregarded transaction is treated as including events described in paragraphs (c)(2)(ii)(A) through (F) of this section.

(A) If the recording (or not recording) of an asset or liability on the books and records of a section 987 QBU of an owner is the result of such asset or liability being removed from (or included on) the books and records of the owner or another eligible QBU of the

owner, the asset or liability is treated as transferred to (or from) the section 987 QBU in a disregarded transaction.

(B) If an asset or liability that was previously attributable to a section 987 QBU of an owner begins to be attributable to the owner (or another eligible QBU of the owner) as a result of the application of paragraph (b)(2) or (3) of this section, the asset or liability is treated as having been transferred by the section 987 QBU in a disregarded transaction. If an asset or liability that was previously attributable to the owner (or another eligible QBU of the owner) begins to be attributable to the section 987 QBU as a result of the application of paragraph (b)(2) or (3) of this section, the asset or liability is treated as transferred to the section 987 QBU in a disregarded transaction.

(C) If an asset or liability that is attributable to a section 987 QBU is sold or exchanged (including in a nonrecognition transaction, such as an exchange under section 351) for an asset or liability that is not attributable to the section 987 QBU immediately after the sale or exchange, the sold or exchanged asset or liability that was attributable to the section 987 QBU immediately before the transaction is treated as transferred from the section 987 QBU to its owner in a disregarded transaction immediately before the sale or exchange for purposes of section 987 (including for purposes of recognizing section 987 gain or loss under § 1.987–5) and subsequently sold or exchanged by the owner.

(D) If an asset or liability of an owner of a section 987 QBU that is not attributable to a section 987 QBU is sold or exchanged (including in a nonrecognition transaction, such as an exchange under section 351) for an asset or liability that is attributable to the section 987 QBU immediately after the sale or exchange, the asset or liability that is attributable to the section 987 QBU immediately after the transaction is treated as received or assumed by the owner and transferred from the owner to the section 987 QBU in a disregarded transaction immediately after the sale or exchange for purposes of section 987 (including for purposes of recognizing section 987 gain or loss under § 1.987–5).

(E) If an asset or liability that is attributable to a section 987 QBU was received, transferred, assumed, or accrued in a regarded transaction (including the making or receiving of a payment) in which the related item of income, gain, deduction, or loss is not attributable to the section 987 QBU, the asset or liability is treated as though it was received, transferred, assumed, or

accrued by the owner or another eligible QBU and transferred to or from the section 987 QBU in a disregarded transaction. Similarly, if an asset or liability that is not attributable to a section 987 QBU was received, transferred, assumed, or accrued in a regarded transaction (including the making or receiving of a payment) in which the related item of income, gain, deduction, or loss is attributable to the section 987 QBU, the asset or liability is treated as though it was received, transferred, assumed, or accrued by the section 987 QBU and transferred to or from the section 987 QBU in a disregarded transaction. For example, if a section 987 QBU receives a dividend on an interest in stock that would be attributable to the section 987 QBU but for paragraph (b)(2)(i)(A) of this section, the owner is treated as receiving the dividend and transferring to the section 987 QBU the amount of the dividend in a disregarded transaction. Similarly, if a section 987 QBU pays interest on a liability that would be attributable to the section 987 QBU but for paragraph (b)(2)(i)(C) of this section, the section 987 QBU is treated as transferring to the owner the amount of the interest expense and the owner is treated as paying the interest expense in a disregarded transaction. *See also* paragraph (c)(7) of this section (application of general tax law principles).

(F) In the first taxable year in which an eligible QBU is treated as a section 987 QBU, all assets and liabilities attributable to the eligible QBU are treated as transferred from the owner to the section 987 QBU in a disregarded transaction on the first day on which the eligible QBU is treated as a section 987 QBU.

(iii) *Items derived from disregarded transactions ignored.* For purposes of section 987, disregarded transactions do not give rise to items of income, gain, deduction, or loss that are taken into account in determining section 987 taxable income or loss under § 1.987–3.

(3) through (6) [Reserved]

(7) *Application of general tax law principles.* General tax law principles, including the circular cash flow, step-transaction, economic substance, and substance-over-form doctrines, apply for purposes of determining whether there is a transfer of an asset or liability under this paragraph (c), including a transfer of an asset or liability pursuant to a disregarded transaction.

(8) *Interaction with § 1.988–1(a)(10).* See § 1.988–1(a)(10) for rules regarding the treatment of an intra-taxpayer transfer of a section 988 transaction.

(9) *Certain disregarded transactions not treated as transfers*—(i) *Combinations of section 987 QBUs.* The combination (a *combination*) of two or more separate section 987 QBUs (*combining QBUs*) that are directly owned by the same owner into one section 987 QBU (*combined QBU*) does not give rise to a transfer of any combining QBU's assets or liabilities to the owner under this paragraph (c). In addition, transactions between the combining QBUs occurring in the taxable year of the combination do not result in a transfer of the combining QBUs' assets or liabilities to the owner under this paragraph (c). For this purpose, a combination occurs when the assets and liabilities that were attributable to two or more combining QBUs begin to be attributable to a combined QBU and the separate existence of the combining QBUs ceases. A combination may result from any transaction or series of transactions in which the combining QBUs become a combined QBU. A combination may also result when an owner of two or more section 987 QBUs with the same functional currency becomes subject to a grouping election under § 1.987–1(b)(3)(ii) or when a section 987 QBU of an owner subject to a grouping election changes its functional currency to that of another section 987 QBU of the same owner. For purposes of determining net unrecognized section 987 gain or loss, deferred section 987 gain or loss, and cumulative suspended section 987 loss of a combined QBU, the combining QBUs are treated as having combined immediately before the beginning of the taxable year of combination. See §§ 1.987–4(f)(1), 1.987–11(b)(2), and 1.987–12(f)(1).

(ii) *Change in functional currency from a combination.* If, following a combination of section 987 QBUs described in paragraph (c)(9)(i) of this section, the combined section 987 QBU has a different functional currency than one or more of the combining section 987 QBUs, any such combining section 987 QBU is treated as changing its functional currency, and the owner of the combined section 987 QBU must comply with the regulations under section 985 regarding the change in functional currency. See §§ 1.985–1(c)(6) and 1.985–5.

(iii) *Separation of section 987 QBUs.* The separation (a *separation*) of a section 987 QBU (*separating QBU*) into two or more section 987 QBUs (*separated QBUs*) that, after the separation, are directly owned by the same owner does not result in a transfer of the separating QBU's assets or liabilities to the owner under this

paragraph (c). Additionally, transactions that occurred between the separating QBUs in the taxable year of the separation before the completion of the separation do not result in transfers for purposes of section 987. For this purpose, a separation occurs when the assets and liabilities that were attributable to a separating QBU begin to be attributable to two or more separated QBUs and each of the separated QBUs continues to perform a significant portion of the separating QBU's activities immediately after the separation. A separation may result from any transaction or series of transactions in which a separating QBU becomes two or more separated QBUs described in the preceding sentence. A separation may also result when a section 987 QBU that is subject to a grouping election under § 1.987–1(b)(3)(ii) changes its functional currency or when the grouping election is revoked. For purposes of determining net unrecognized section 987 gain or loss, deferred section 987 gain or loss, or cumulative suspended section 987 loss of a separated QBU, the separating QBU is treated as having separated immediately before the beginning of the taxable year of separation. See §§ 1.987–4(f)(2), 1.987–11(b)(3), and 1.987–12(f)(2).

(iv) *Special rules for successor suspended loss QBUs.* For purposes of determining whether a combination or separation has occurred with respect to a successor suspended loss QBU, the rules of paragraphs (c)(9)(i) and (iii) of this section are applied without regard to whether any of the combining QBUs, the combined QBU, the separating QBU, or the separated QBUs are section 987 QBUs. A combined QBU is a successor suspended loss QBU if either combining QBU was a successor suspended loss QBU, and a separated QBU is a successor suspended loss QBU if the separating QBU was a successor suspended loss QBU.

(10) *Examples.* The following examples illustrate the principles of this paragraph (c). For purposes of the examples, X and Y are domestic corporations, have the U.S. dollar as their functional currencies, and use the calendar year as their taxable years. Furthermore, except as otherwise provided, Business A and Business B are eligible QBUs that have the euro and the Japanese yen, respectively, as their functional currencies, and DE1 and DE2 are DEs. For purposes of determining whether any of the transfers in these examples result in remittances, see § 1.987–5.

(i) *Example 1: Loan to a section 987 QBU*—(A) *Facts.* X owns all of the

interests in DE1. DE1 owns Business A, which is a section 987 QBU of X. X owns €100 that are not reflected on the books and records of Business A. Business A is in need of additional capital and, as a result, X lends the €100 to DE1 for use in Business A in exchange for a note.

(B) *Analysis*—(1) The loan from X to DE1 is not regarded for Federal income tax purposes (because it is an interbranch transaction) and therefore is a disregarded transaction (as defined in paragraph (c)(2)(ii) of this section). Because DE1 is a DE, the DE1 note held by X and the liability of DE1 under the note are not taken into account under this section.

(2) As a result of the disregarded transaction, the €100 is reflected on the books and records of Business A and is attributable to Business A under paragraph (b) of this section. Therefore, X is treated as transferring €100 to its Business A section 987 QBU for purposes of section 987. This transfer is taken into account in determining the amount of any remittance for the taxable year under § 1.987–5(c). See § 1.988–1(a)(10)(ii) for the application of section 988 to X as a result of the transfer of nonfunctional currency to its section 987 QBU.

(ii) *Example 2: Transfer between section 987 QBUs*—(A) *Facts.* X owns Business A and Business B, both of which are section 987 QBUs of X. X owns equipment that is used in Business A and is reflected on the books and records of Business A. Because Business A has excess manufacturing capacity and X intends to expand the manufacturing capacity of Business B, the equipment formerly used in Business A is transferred to Business B for use by Business B. As a result of the transfer, the equipment is removed from the books and records of Business A and is recorded on the books and records of Business B.

(B) *Analysis.* The transfer of the equipment from the books and records of Business A to the books and records of Business B is not regarded for Federal income tax purposes (because it is an interbranch transaction) and therefore is a disregarded transaction (as defined in paragraph (c)(2)(ii) of this section). Therefore, for purposes of section 987, the Business A section 987 QBU is treated as transferring the equipment to X, and X is subsequently treated as transferring the equipment to the Business B section 987 QBU. These transfers are taken into account in determining the amount of any remittance for the taxable year under § 1.987–5(c).

(iii) *Example 3: Sale of property between two section 987 QBUs*—(A) *Facts.* X owns all of the interests in DE1 and DE2. DE1 and DE2 own Business A and Business B, respectively, both of which are section 987 QBUs of X. DE1 owns equipment that is used in Business A and is reflected on the books and records of Business A. For business reasons, DE1 sells a portion of the equipment used in Business A to DE2 in exchange for a fair market value amount of Japanese yen. The yen used by DE2 to acquire the equipment was generated by Business B and was reflected on Business B's books and records. Following the sale, the yen and the equipment will be used in Business A and Business B, respectively. As a result of such sale, the equipment is removed from the books and records of Business A and is recorded on the books and records of Business B. Similarly, as a result of the sale, the yen is removed from the books and records of Business B and is recorded on the books and records of Business A.

(B) *Analysis*—(1) The sale of equipment between DE1 and DE2 is a transaction that is not regarded for Federal income tax purposes (because it is an interbranch transaction) and therefore the transaction is a disregarded transaction (as defined in paragraph (c)(2)(ii) of this section). Pursuant to paragraph (c)(2)(iii) of this section, the sale does not give rise to an item of income, gain, deduction, or loss for purposes of determining section 987 taxable income or loss under § 1.987-3. However, the yen and equipment exchanged by DE1 and DE2 in connection with the sale must be taken into account as a transfer under paragraph (c)(2)(i) of this section.

(2) As a result of the disregarded transaction, the equipment ceases to be reflected on the books and records of Business A and becomes reflected on the books and records of Business B. Therefore, the Business A section 987 QBU is treated as transferring the equipment to X, and X is subsequently treated as transferring the equipment to the Business B section 987 QBU.

(3) Additionally, as a result of the disregarded transaction, the yen currency ceases to be reflected on the books and records of Business B and becomes reflected on the books and records of Business A. Therefore, the Business B section 987 QBU is treated as transferring the yen to X, and X is subsequently treated as transferring the yen from X to the Business A section 987 QBU. The transfers among Business A, Business B and X are taken into account in determining the amount of

any remittance for the taxable year under § 1.987-5(c).

(iv) through (ix) [Reserved]
(x) *Example 10: Contribution of a section 987 QBU's assets to a corporation*—(A) *Facts.* X owns Business A. X forms Z, a domestic corporation, contributing 50 percent of its Business A assets and liabilities to Z in exchange for all of the stock of Z. X and Z do not file a consolidated tax return.

(B) *Analysis.* Pursuant to paragraph (b)(2) of this section, the Z stock received in exchange for 50 percent of Business A's assets and liabilities is not reflected on the books and records of, and therefore is not attributable to, Business A for purposes of section 987 immediately after the exchange. As a result, pursuant to paragraphs (c)(2)(i) and (ii) of this section, 50 percent of the assets and liabilities of Business A are treated as transferred from Business A to X in a disregarded transaction immediately before the exchange. See § 1.1502-13(j)(9) if X and Z file a consolidated return.

(xi) *Example 11: Circular transfers*—(A) *Facts.* X owns Business A. On December 30, year 1, Business A purports to transfer €100 to X. On January 2, year 2, X purports to transfer €50 to Business A. On January 4, year 2, X purports to transfer another €50 to Business A. As of the end of year 1, X has net unrecognized section 987 loss with respect to Business A, such that a remittance, if respected, would result in recognition of a foreign currency loss under section 987.

(B) *Analysis.* Because the transfer by Business A to X is offset by the transfers from X to Business A that occurred in close temporal proximity, the purported transfers to and from Business A may be disregarded for purposes of section 987 pursuant to general tax principles under paragraph (c)(7) of this section.

(xii) *Example 12: Transfers without substance*—(A) *Facts.* X owns Business A and Business B. On January 1, year 1, Business A purports to transfer €100 to X. On January 4, year 1, X purports to transfer €100 to Business B. The account in which Business B deposited the €100 is used to pay the operating expenses and other costs of Business A. As of the end of year 1, X has net unrecognized section 987 loss with respect to Business A, such that a remittance, if respected, would result in recognition of a foreign currency loss under section 987.

(B) *Analysis.* Because Business A continues to have use of the transferred property, the €100 purported transfer from Business A to X may be disregarded for purposes of section 987

pursuant to general tax principles under paragraph (c)(7) of this section.

(xiii) *Example 13: Offsetting positions in section 987 QBUs*—(A) *Facts.* X owns Business A and Business B. Business A and Business B each have the euro as their functional currency. X has not made a grouping election under § 1.987-1(b)(3)(ii). On January 1, year 1, X borrows €1,000 from a third-party lender, records the liability with respect to the borrowing on the books and records of Business A, and records the borrowed €1,000 on the books and records of Business B. On December 31, year 2, when Business A has \$100 of net unrecognized section 987 loss and Business B has \$100 of net unrecognized section 987 gain resulting from the change in exchange rates with respect to the liability and the €1,000, X terminates the Business A section 987 QBU.

(B) *Analysis.* Under paragraph (b)(3) of this section, the fact that Business A and Business B have offsetting positions in the euro is a factor indicating that a principal purpose of recording the euro-denominated liability on the books and records of Business A and the borrowed euros on the books and records of Business B was the avoidance of tax under section 987. If such a principal purpose is present, the items must be reallocated (that is, the euros and the euro-denominated liability) between Business A, Business B, and X under paragraph (b)(3) of this section to reflect the substance of the transaction.

(xiv) *Example 14: Offsetting positions with respect to a section 987 QBU and a section 988 transaction*—(A) *Facts.* X owns all of the interests in DE1, and DE1 owns Business A. On January 1, year 1, X borrows €1,000 from a third-party lender and records the liability with respect to the borrowing on its books and records. X contributes the €1,000 loan proceeds to DE1 and the €1,000 are reflected on the books and records of Business A. On December 31, year 2, when Business A has \$100 of net unrecognized section 987 loss resulting from the change in exchange rates with respect to the €1,000 received from the borrowing, and when the euro-denominated borrowing, if repaid, would result in \$100 of gain under section 988, X terminates the Business A section 987 QBU.

(B) *Analysis.* Under paragraph (b)(3) of this section, the fact that X and Business A have offsetting positions in the euro is a factor indicating that a principal purpose of recording the borrowed euros on the books and records of Business A, or not recording the corresponding euro-denominated liability on the books and records of

Business A, was the avoidance of tax under section 987. If such a principal purpose is present, the items (that is, the euros and the euro-denominated liability) must be reallocated between Business A and X under paragraph (b)(3) of this section to reflect the substance of the transaction.

(xv) *Example 15: Offsetting positions with respect to a section 987 QBU and a section 988 transaction—(A) Facts.* X owns all of the stock of Y and all of the interests in DE1. DE1 owns Business A. X and Y do not file a consolidated return. On January 1, year 1, DE1 lends €1,000 to Y. X records the receivable with respect to the loan on Business A's books and records. On December 31, year 2, when Business A has \$100 of net unrecognized section 987 gain resulting from the loan, Y repays the €1,000 liability. The repayment of the euro-denominated borrowing results in \$100 of loss to Y under section 988. Business A does not make any remittances to X in year 2, so the offsetting gain with respect to the loan receivable has not been recognized by X.

(B) *Analysis.* Under paragraph (b)(3) of this section, the fact that Y (a related party to X) and Business A have offsetting positions in the euro is a factor indicating that a principal purpose of recording the euro-denominated receivable on the books and records of Business A, rather than on the books and records of X, was to avoid Federal income tax under, or through the use of, section 987. If such a principal purpose is present, the euro-denominated receivable must be reallocated between Business A and X under paragraph (b)(3) of this section to reflect the substance of the transaction. Other provisions (for example, section 267) may also apply to defer or disallow the loss. See § 1.1502–13(j)(9) if X and Y file a consolidated return.

(xvi) *Example 16: Borrowing by section 987 QBU followed by immediate distribution to owner—(A) Facts.* X owns all of the interests in DE1. DE1 owns Business A. On January 1, year 1, Business A borrows €1,000 from a bank. On January 2, year 1, Business A distributes the €1,000 it received from the bank to X. There are no other transfers between X and Business A during the year. At the end of the year, X has net unrecognized section 987 loss with respect to Business A such that a remittance would result in the recognition of foreign currency loss under section 987.

(B) *Analysis.* Under paragraph (b)(3) of this section, if a principal purpose of recording of the loan on the books and records of Business A, rather than on the books and records of X, was to avoid

Federal income tax under, or through the use of, section 987, the items must be reallocated to reflect the substance of the transaction (for example, by moving the loan onto the books of X, resulting in the transfer not being taken into account for purposes of section 987).

(xvii) *Example 17: Payment of interest by section 987 QBU on obligation of owner—(A) Facts.* X owns all of the interests in DE1. DE1 owns Business A. On January 1, X borrows €1,000 from a bank. On July 1, DE1 pays €20 in interest on X's €1,000 obligation to the bank, which is treated as a payment by Business A.

(B) *Analysis.* Under general tax law principles as provided in paragraph (c)(7) of this section, on July 1, year 1, Business A is treated for purposes of section 987 as making a transfer of €20 to X, and X is treated as making a €20 interest payment to the bank. See also paragraph (c)(2)(ii)(E) of this section for interest payments on loans that are not attributable to a section 987 QBU pursuant to paragraph (b)(2) or (3) of this section.

(xviii) *Example 18: Sale of the interests in a DE—(A) Facts.* X owns all of the interests in DE1, a disregarded entity. DE1 owns Business A, which is a section 987 QBU of X. X has made a current rate election under § 1.987–1(d)(2) but not an annual recognition election under § 1.987–5(b)(2). On December 31, year 1, X sells all of the interests in DE1 to FC, an unrelated foreign corporation, for \$150,000, when the exchange rate is €1 = \$1.2. The sale proceeds are reflected on X's books and records after the sale. At the time of the sale, all of DE1's assets are used in Business A and are reflected on the books and records of Business A. The assets have a basis of €100,000 and Business A has no liabilities. In year 1, X has net unrecognized section 987 gain with respect to Business A of \$20,000.

(B) *Analysis—(1)* Under paragraph (c)(2)(ii)(C) of this section, if an asset that is attributable to a section 987 QBU is sold or exchanged for an asset that is not attributable to the section 987 QBU immediately after the sale or exchange, the sold or exchanged asset is treated as transferred from the section 987 QBU to its owner in a disregarded transaction immediately before the sale or exchange and subsequently sold or exchanged by the owner. The sale of DE1 is treated as a sale of the assets of Business A in exchange for cash that is not reflected on the books and records of the Business A section 987 QBU. Therefore, the assets of Business A are treated as transferred from the Business A section 987 QBU to X, and X is treated as selling the assets to FC.

(2) The deemed transfer of all of Business A's assets to X results in a termination of the Business A section 987 QBU under § 1.987–8(b)(2) (substantially all assets transferred). Under § 1.987–5(c)(3) and § 1.987–8(e), a termination of a section 987 QBU is treated as a remittance of all the gross assets of the section 987 QBU to the owner on the date of the termination. Therefore, the owner's remittance proportion is one, and X recognizes all of its net unrecognized section 987 gain with respect to Business A, or \$20,000.

(3) Because a current rate election was in effect, all of the assets of Business A are marked items. Therefore, under § 1.987–5(f)(2), X's basis in the assets transferred from Business A is determined by translating Business A's functional currency basis in the assets into X's functional currency at the spot rate applicable to the date of the transfer, €1 = \$1.2. Consequently, immediately before the sale of the interests in DE1, X's functional currency basis in Business A's assets (which Business A held with a basis of €100,000) is \$120,000. X recognizes \$30,000 of gain under section 1001(a) on the sale of DE1.

(d) *Translation of items transferred to a section 987 QBU—(1) Marked items.* The adjusted basis of a marked asset, or the amount of a marked liability, transferred to a section 987 QBU is translated into the section 987 QBU's functional currency at the spot rate applicable to the date of transfer. If, and to the extent that, exchange gain or loss is recognized on the asset or liability transferred under § 1.988–1(a)(10)(ii), the adjusted basis of the marked asset, or the amount of the marked liability, is adjusted to take into account the exchange gain or loss recognized.

(2) *Historic items.* The adjusted basis of a historic asset, or the amount of a historic liability, transferred to a section 987 QBU is translated into the section 987 QBU's functional currency at the rate provided in § 1.987–1(c)(3).

(e) *Cross-reference.* See also § 1.1502–13(j)(9) regarding the treatment of intercompany transactions involving section 987 QBUs owned by a member of a consolidated group.

§ 1.987–3 Determination of section 987 taxable income or loss of an owner of a section 987 QBU.

(a) *In general.* This section provides rules for determining the taxable income or loss of an owner of a section 987 QBU (*section 987 taxable income or loss*). Paragraph (b) of this section provides rules for determining items of income, gain, deduction, and loss in the section 987 QBU's functional currency.

Paragraph (c) of this section provides rules for translating each item determined under paragraph (b) of this section into the functional currency of the owner of the section 987 QBU. Paragraph (d) of this section is reserved. Paragraph (e) of this section provides examples illustrating the application of the rules of this section.

(b) *Determination of each item of income, gain, deduction, or loss in the section 987 QBU's functional currency*—(1) *In general.* The owner of a section 987 QBU must determine each item of income, gain, deduction, or loss attributable to the section 987 QBU in the section 987 QBU's functional currency under Federal income tax principles.

(2) *Translation of items of income, gain, deduction, or loss that are denominated in a nonfunctional currency.* Except as otherwise provided in paragraph (b)(4) of this section, an item of income, gain, deduction, or loss (or the item's components and related items, such as gross receipts and amount realized) that is denominated in (or determined by reference to) a nonfunctional currency (including the functional currency of the owner) is translated into the section 987 QBU's functional currency at the spot rate on the date such item is properly taken into account. Paragraphs (e)(1) and (2) of this section (*Examples 1 and 2*) illustrate the application of this paragraph (b)(2).

(3) [Reserved]

(4) *Section 988 transactions*—(i) *In general.* Section 988 and the regulations under section 988 apply to section 988 transactions of a section 987 QBU. The determination of whether an asset or liability of a section 987 QBU is a section 988 transaction is determined by reference to the functional currency of the section 987 QBU. Section 988 gain or loss is determined in, and by reference to, the functional currency of the section 987 QBU. The amount of section 988 gain or loss determined under this paragraph (b)(4)(i) is translated into the owner's functional currency under paragraph (c) of this section.

(ii) *Section 988 mark-to-market election*—(A) *In general.* A taxpayer may elect to apply the section 988 mark-to-market method of accounting described in this paragraph (b)(4)(ii) with respect to all section 988 transactions that are properly attributable to a section 987 QBU and that are not otherwise accounted for under a mark-to-market method of accounting under section 475 or section 1256 (other than a section 988 transaction described in paragraph (b)(4)(ii)(B) of this section). Under the

section 988 mark-to-market method of accounting, the timing of section 988 gain or loss on section 988 transactions described in the preceding sentence is determined under the principles of section 1256. Only section 988 gain or loss is taken into account under the foreign currency mark-to-market method of accounting. Appropriate adjustments must be made to prevent the section 988 gain or loss from being taken into account again after it is recognized under this paragraph (b)(4)(ii). A section 988 transaction subject to the foreign currency mark-to-market method of accounting is not subject to the netting rule of section 988(b) and § 1.988-2(b)(8) (under which exchange gain or loss is limited to overall gain or loss realized in a transaction) in taxable years before the taxable year in which section 988 gain or loss would be recognized with respect to the section 988 transaction but for this election.

(B) *Built-in loss transactions contributed to a section 987 QBU.* Paragraph (b)(4)(ii)(A) of this section does not apply to a section 988 transaction if—

(1) The transaction was transferred to the section 987 QBU from its owner (or from another eligible QBU of the owner);

(2) Immediately before the transfer, the transaction was a section 988 transaction in the hands of the owner (or other eligible QBU of the owner) and was not subject to a mark-to-market method of accounting;

(3) If the owner (or other eligible QBU) had disposed of the section 988 transaction immediately before the transfer (and § 1.988-2(b)(8) did not apply), the owner would have recognized section 988 loss; and

(4) Section 988 loss was not recognized in connection with the transfer under § 1.988-1(a)(10).

(c) *Translation of items of income, gain, deduction, or loss of a section 987 QBU into the owner's functional currency*—(1) *In general.* Except as otherwise provided in this section, the exchange rate to be used by an owner in translating an item of income, gain, deduction, or loss attributable to a section 987 QBU (or the item's components and related items, such as gross receipts, amount realized, basis, and cost of goods sold) into the owner's functional currency, if necessary, is the yearly average exchange rate for the taxable year.

(2) *Exceptions.* Except as otherwise provided in paragraph (c)(2)(v) of this section, this paragraph (c)(2) applies only to taxable years for which neither the annual recognition election nor the current rate election is in effect.

(i) *Recovery of basis with respect to historic assets.* Except as otherwise provided in this paragraph (c)(2), the exchange rate to be used by the owner in translating any recovery of basis (whether through a sale or exchange; deemed sale or exchange; cost recovery deduction such as depreciation, depletion or amortization; or otherwise) with respect to a historic asset is the historic rate for the property to which such recovery of basis is attributable.

(ii) through (iii) [Reserved]

(iv) *Cost of goods sold computation*—(A) *General rule—simplified inventory method.* Except as otherwise provided in paragraph (c)(2)(iv)(B) of this section, cost of goods sold (COGS) for a taxable year is translated into the functional currency of the owner at the yearly average exchange rate for the taxable year in which the sale of inventory occurs (or the COGS is otherwise taken into account in computing taxable income) and adjusted as provided in paragraph (c)(3) of this section.

(B) *Election to use the historic inventory method.* In lieu of using the simplified inventory method described in paragraph (c)(2)(iv)(A) of this section, the owner of a section 987 QBU may elect under this paragraph (c)(2)(iv)(B) to translate inventoriable costs (including current-year inventoriable costs and costs that were capitalized into inventory in prior years) that are included in COGS at the historic rate for each such cost.

(v) *Translation of income to account for certain foreign income tax claimed as a credit.* The owner of a section 987 QBU claiming a credit under section 901 for foreign income taxes, other than foreign income taxes deemed paid under section 960, that are properly reflected on the books and records of the section 987 QBU (the creditable tax amount) must determine section 987 taxable income or loss attributable to the section 987 QBU by reducing the amount of section 987 taxable income or loss that otherwise would be determined under this section by an amount equal to the creditable tax amount, translated into U.S. dollars using the yearly average exchange rate for the taxable year in which the creditable tax is accrued, and by increasing the resulting amount by an amount equal to the creditable tax amount, translated using the same exchange rate that is used to translate the creditable taxes into U.S. dollars under section 986(a). This paragraph (c)(2)(v) applies whether or not a current rate election or an annual recognition election is in effect. See paragraph (e)(14) of this section (*Example 14*) for an illustration of this rule.

(3) *Adjustments to COGS required under the simplified inventory method.* This paragraph (c)(3) applies only to taxable years for which neither the annual recognition election nor the current rate election is in effect.

(i) *In general.* An owner of a section 987 QBU that uses the simplified inventory method described in paragraph (c)(2)(iv)(A) of this section must make the adjustment described in paragraph (c)(3)(ii) of this section. In addition, the owner must make the adjustment described in paragraph (c)(3)(iii) of this section with respect to any inventory for which the section 987 QBU does not use the LIFO inventory method and must make the adjustment described in paragraph (c)(3)(iv) of this section with respect to any inventory for which the section 987 QBU uses the LIFO inventory method. An owner of a section 987 QBU that uses the simplified inventory method must make all of the applicable adjustments described in paragraphs (c)(3)(ii) through (iv) of this section with respect to the section 987 QBU even in taxable years in which the amount of COGS is zero.

(ii) *Adjustment for cost recovery deductions included in inventoriable costs—(A) In general.* The translated COGS amount computed under paragraph (c)(2)(iv)(A) of this section is increased or decreased (as appropriate) by the amount described in paragraph (c)(3)(ii)(B) of this section. The adjustment is included as an adjustment to translated COGS computed under paragraph (c)(2)(iv)(A) of this section in full in the year to which the adjustment relates and is not allocated between COGS and ending inventory.

(B) *Amount of adjustment.* With respect to each cost recovery deduction attributable to a historic asset that is included in inventoriable costs for a taxable year, the adjustment is equal to—

(1) The amount of the cost recovery deduction included in inventoriable costs, translated at the historic rate for the property to which the deduction is attributable; less

(2) The amount of the cost recovery deduction included in inventoriable costs, translated at the yearly average exchange rate for the current taxable year.

(iii) *Adjustment for beginning inventory for non-LIFO inventory—(A) In general.* In the case of non-LIFO

inventory, the translated COGS amount computed under paragraph (c)(2)(iv)(A) of this section is increased or decreased (as appropriate) by the amount described in paragraph (c)(3)(iii)(B) of this section.

(B) *Amount of adjustment.* The adjustment is equal to—

(1) The ending non-LIFO inventory included on the closing balance sheet for the preceding taxable year, translated at the exchange rate described in paragraph (c)(3)(iii)(C) of this section (which is generally the yearly average exchange rate for the preceding taxable year); less

(2) The ending non-LIFO inventory included on the closing balance sheet for the preceding taxable year, translated at the yearly average exchange rate for the current taxable year.

(C) *Exchange rate—(1) In general.* Except as provided in paragraph (c)(3)(iii)(C)(2) of this section, the exchange rate used to translate non-LIFO inventory under paragraph (c)(3)(iii)(B)(1) of this section is the yearly average exchange rate for the preceding taxable year.

(2) *Revocation of current rate election or taxable year beginning on the transition date.* In the first taxable year in which a current rate election is revoked or otherwise ceases to be in effect (or in the taxable year beginning on the transition date), the exchange rate used to translate non-LIFO inventory under paragraph (c)(3)(iii)(B)(1) of this section is the spot rate applicable to the last day of the preceding taxable year.

(iv) *Adjustment for year of LIFO liquidation—(A) In general.* In the case of inventory with respect to which a section 987 QBU uses the LIFO inventory method, the translated COGS amount computed under paragraph (c)(2)(iv)(A) of this section is increased or decreased (as appropriate) by the amount described in paragraph (c)(3)(iv)(B) of this section.

(B) *Amount of adjustment.* With respect to each LIFO layer liquidated in whole or in part during the taxable year, the adjustment is equal to:

(1) The amount of the LIFO layer liquidated during the taxable year, translated at the historic rate that is used for translating the LIFO layer (which is generally the yearly average exchange rate for the year the LIFO layer arose); less

(2) The amount of the LIFO layer liquidated during the taxable year, translated at the yearly average exchange rate for the taxable year.

(d) [Reserved]

(e) *Examples.* The following examples illustrate the application of this section. For purposes of the examples, U.S. Corp is a domestic corporation that uses the calendar year as its taxable year and has the U.S. dollar as its functional currency. Except as otherwise indicated, U.S. Corp is the owner of Business A, a section 987 QBU with the euro as its functional currency, and U.S. Corp elects under paragraph (c)(2)(iv)(B) of this section to use the historic inventory method with respect to Business A but does not make any other elections.

(1) *Example 1: Item of income denominated in nonfunctional currency.* Business A accrues £100 of income from the provision of services. Under paragraph (b)(2) of this section, the £100 is translated into €90 at the spot rate on the date of accrual, without the use of a spot rate convention. In determining U.S. Corp's taxable income, the €90 of income is translated into dollars at the yearly average exchange rate under paragraph (c)(1) of this section.

(2) *Example 2: Asset sold for nonfunctional currency.* Business A sells a historic asset consisting of non-inventory property for £100. Under paragraph (b)(2) of this section, the £100 amount realized is translated into €85 at the spot rate on the sale date without the use of a spot rate convention. In determining U.S. Corp's taxable income, the €85 is translated into dollars at the yearly average exchange rate under paragraph (c)(1) of this section. The euro basis of the property is translated into dollars at the historic rate under paragraph (c)(2)(i) of this section.

(3) *Example 3: Historic inventory method—(i) Facts.* Business A uses a first-in, first-out (FIFO) method of accounting for inventory. Business A sells 1,200 units of inventory in year 2 for €3 per unit. The yearly average exchange rate is €1 = \$1.02 for year 1 and €1 = \$1.05 for year 2.

(ii) *Analysis—(A) Gross sales.* Business A's gross sales are translated under paragraph (c)(1) of this section at the yearly average exchange rate for the year of the sale. Business A's dollar gross sales will be computed as follows:

TABLE 1 TO PARAGRAPH (e)(3)(ii)(A)—GROSS SALES
[Year 2]

Month	Number of units	Amount in €	€/ \$ yearly average rate	Amount in \$
Jan	100	€ 300	€1 = \$1.05	\$315.00
Feb	200	600	€1 = \$1.05	630.00
March	0	0	€1 = \$1.05	0.00
April	200	600	€1 = \$1.05	630.00
May	100	300	€1 = \$1.05	315.00
June	0	0	€1 = \$1.05	0.00
July	100	300	€1 = \$1.05	315.00
Aug	100	300	€1 = \$1.05	315.00
Sept	0	0	€1 = \$1.05	0.00
Oct	0	0	€1 = \$1.05	0.00
Nov	100	300	€1 = \$1.05	315.00
Dec	300	900	€1 = \$1.05	945.00
	1,200			3,780.00

(B) *Translated basis of inventory.* The purchase price for each inventory unit was €1.50. Under § 1.987–1(c)(3)(i) and

paragraph (c)(2)(iv)(B) of this section, the basis of each item of inventory is translated into dollars at the yearly

average exchange rate for the year the inventory was acquired.

TABLE 2 TO PARAGRAPH (e)(3)(ii)(B)—OPENING INVENTORY AND PURCHASES
[Year 2]

Month	Number of units	Amount in €	€/ \$ yearly average rate	Amount in \$
Opening inventory (purchased in Dec. year 1)	100	€150	€1 = \$1.02	\$153.00
Purchases in year 2				
Jan	300	€ 450	€1 = \$1.05	\$472.50
Feb	0	0	€1 = \$1.05	0
March	0	0	€1 = \$1.05	0
April	300	450	€1 = \$1.05	472.50
May	0	0	€1 = \$1.05	0
June	0	0	€1 = \$1.05	0
July	300	450	€1 = \$1.05	472.50
Aug	0	0	€1 = \$1.05	0
Sept	0	0	€1 = \$1.05	0
Oct	0	0	€1 = \$1.05	0
Nov	300	450	€1 = \$1.05	472.50
Dec	0	0	€1 = \$1.05	0
	1,200			1,890.00

(C) *COGS.* Because Business A uses a FIFO method for inventory, Business A is considered to have sold in year 2 the 100 units of opening inventory purchased in year 1 (\$153.00), the 300 units purchased in January year 2 (\$472.50), the 300 units purchased in April year 2 (\$472.50), the 300 units purchased in July year 2 (\$472.50), and 200 of the 300 units purchased in November year 2 (\$315.00). Accordingly, Business A's translated dollar COGS for year 2 is \$1,885.50. Business A's opening inventory for year 3 is 100 units of inventory with a translated dollar basis of \$157.50.

(D) *Gross sales income.* Accordingly, for purposes of section 987, Business A has gross income in dollars of \$1,894.50

(\$3,780.00 – \$1,885.50) from the sale of inventory in year 2.

(4) *Example 4: Simplified inventory method—(i) Facts.* The facts are the same as in paragraph (e)(3) of this section (*Example 3*), except that U.S. Corp does not elect to use the historic inventory method with respect to Business A.

(ii) *Analysis.* Because U.S. Corp does not elect to use the historic inventory method, the simplified inventory method under paragraph (c)(2)(iv)(A) of this section applies.

(A) *Gross sales.* Business A's dollar gross sales will be computed as described in paragraph (e)(3)(ii)(A) of this section (*Example 3*). Therefore, Business A has gross sales of \$3,780.

(B) *COGS.* Business A sold 1,200 units of inventory in year 2, and the purchase price for each unit was €1.50. The total purchase price for the inventory sold in year 2 was €1,800. Under the simplified inventory method provided in paragraph (c)(2)(iv)(A) of this section, COGS for a taxable year is translated into the functional currency of the owner at the yearly average exchange rate for the taxable year in which the sale of inventory occurs. Therefore, before making the adjustments required under paragraph (c)(3) of this section, Business A's dollar COGS for year 2 is equal to \$1,890 (the purchase price for the inventory sold in year 2 (€1,800), translated at the yearly average exchange rate of €1 = \$1.05).

(C) *Adjustments required.* Because the simplified inventory method applies, Business A's COGS must be adjusted under paragraph (c)(3) of this section. No adjustment is required under paragraph (c)(3)(ii) of this section because no cost recovery deduction attributable to a historic asset is included in inventoriable costs for year 2. However, an adjustment for beginning inventory is required under paragraph (c)(3)(iii)(A) of this section because Business A uses a FIFO method of accounting for inventory.

(D) *Adjustment for beginning inventory.* The adjustment required under paragraph (c)(3)(iii)(A) of this section is equal to: the ending non-LIFO inventory included on Business A's closing balance sheet for the preceding taxable year (€150), translated at the yearly average exchange rate for year 1 (€1 = \$1.02), which is \$153; less the ending non-LIFO inventory included on Business A's closing balance sheet for the preceding taxable year (€150), translated at the yearly average exchange rate for year 2 (€1 = \$1.05), which is \$157.50. Therefore, there is a negative adjustment to COGS of \$4.50. Business A's COGS for year 2 is reduced from \$1,890 to \$1,885.50.

(E) *Gross sales income.* Accordingly, for purposes of section 987, Business A has gross income in dollars of \$1,894.50 (\$3,780.00 – \$1,885.50) from the sale of inventory in year 2.

(5) *Example 5: Depreciation expense that is not an inventoriable cost.* The facts are the same as in paragraph (e)(3) of this section (*Example 3*) except that during year 2, Business A incurred €100 of depreciation expense with respect to a truck. No portion of the depreciation expense is an inventoriable cost. The truck was purchased on January 15, year 1. The yearly average exchange rate for year 1 was €1 = \$1.02. Under paragraph (c)(2)(i) of this section, the €100 of depreciation is translated into dollars at the historic rate. The historic rate is the yearly average exchange rate for year 1. Accordingly, U.S. Corp takes into account depreciation of \$102 with respect to Business A in year 2.

(6) *Example 6: Translation of depreciation expense that is an inventoriable cost (historic inventory method).* The facts are the same as in paragraph (e)(5) of this section (*Example 5*) except that the €100 of depreciation expense incurred during year 2 with respect to the truck is an inventoriable cost. As a result, the depreciation expense is capitalized into the 1,200 units of inventory purchased by Business A in year 2. Of those 1,200 units, 1,100 units are sold during the year, and 100 units become ending

inventory. The portion of depreciation expense capitalized into inventory that is sold during year 2 is reflected in Business A's euro COGS and is translated at the €1 = \$1.02 yearly average exchange rate for year 1, the year in which the truck was purchased. The portion of the depreciation expense capitalized into the 100 units of ending inventory is not taken into account in year 2 but rather, will be taken into account in the year the ending inventory is sold, translated at the €1 = \$1.02 yearly average exchange rate for year 1.

(7) *Example 7: Sale of land.* Business A purchased raw land on October 16, year 1, for €8,000 and sold the land on November 1, year 2, for €10,000. The yearly average exchange rate was €1 = \$1.02 for year 1 and €1 = \$1.05 for year 2. Under paragraph (c)(1) of this section, the amount realized is translated into dollars at the yearly average exchange rate for year 2 (€10,000 × \$1.05 = \$10,500). Under paragraph (c)(2)(i) of this section, the basis is translated at the historic rate for year 1, which is the yearly average exchange rate under section 1.987–1(c)(3)(i) (€8,000 × \$1.02 = \$8,160). Accordingly, the amount of gain reported by U.S. Corp on the sale of the land is \$2,340 (\$10,500 – \$8,160).

(8) *Example 8: Current rate election.* The facts are the same as in paragraph (e)(7) of this section (*Example 7*), except that U.S. Corp makes a current rate election under § 1.987–1(d)(2). Under paragraph (c)(2) of this section, the exceptions to paragraph (c)(1) of this section generally do not apply in a taxable year for which an annual recognition election or a current rate election is in effect. As a result, all items of income, gain, deduction, and loss with respect to Business A are translated into U.S. Corp's functional currency at the yearly average exchange rate under paragraph (c)(1) of this section. Business A's gain on the sale of the land is determined in its functional currency and is equal to €2,000 (amount realized of €10,000 less basis of €8,000). This gain is translated at the yearly average exchange rate for year 2 of €1 = \$1.05, and the amount of gain reported by U.S. Corp on the sale of the land is \$2,100. The result would be the same if U.S. Corp made an annual recognition election under § 1.987–5(b)(2) (and did not make a current rate election).

(9) through (12) [Reserved]

(13) *Example 13: Section 988 transaction—(i) Facts.* Business A receives and accrues \$100 of income from the provision of services on January 1, 2021. Business A continues to hold the \$100 as a U.S. dollar-denominated demand deposit at a bank

on December 31, 2021. U.S. Corp has made a section 988 mark-to-market election under paragraph (b)(4)(ii) of this section. The euro-dollar spot rate without the use of a spot rate convention is €1 = \$1 on January 1, 2021, and €1 = \$2 on December 31, 2021, and the yearly average exchange rate for 2021 is €1 = \$1.50.

(ii) *Analysis—(A)* Under paragraph (b)(2) of this section, the \$100 earned by Business A is translated into €100 at the spot rate on January 1, 2021, as defined in § 1.987–1(c)(1) without the use of a spot rate convention. In determining U.S. Corp's taxable income, the €100 of services income is translated into \$150 at the yearly average exchange rate for 2021, as provided in paragraph (c)(1) of this section.

(B) Under paragraph (b)(4)(i) of this section, section 988 gain or loss for Business A's section 988 transactions is determined in, and by reference to, the euro, the functional currency of Business A. Accordingly, section 988 gain or loss must be determined on Business A's holding of the \$100 demand deposit in, and by reference to, the euro. Under § 1.988–2(a)(2), Business A is treated as having an amount realized of €50 when the \$100 is marked to market at the end of 2021 under paragraph (b)(4)(ii) of this section. Marking the dollars to market gives rise to a section 988 loss of €50 (€50 amount realized, less Business A's €100 basis in the \$100). In determining U.S. Corp's taxable income, that €50 loss is translated into a \$75 loss at the yearly average exchange rate for 2021, as provided in paragraph (c)(1) of this section.

(14) *Example 14: Payment of foreign income tax—(i) Facts.* Business A earns €100 of revenue from the provision of services and incurs €30 of general expenses and €10 of depreciation expense during 2021. Except as otherwise provided, U.S. Corp uses the yearly average exchange rate described in § 1.987–1(c)(2) to translate items of income, gain, deduction, and loss of Business A. Business A is subject to income tax in Country X at a 25 percent rate. U.S. Corp claims a credit with respect to Business A's foreign income taxes and elects under section 986(a)(1)(D) to translate the foreign income taxes at the spot rate on the date the taxes were paid. The yearly average exchange rate for 2021 is €1 = \$1.50. The historic rate used to translate the depreciation expense is €1 = \$1.00. The spot rate on the date that Business A paid its foreign income taxes was €1 = \$1.60.

(ii) *Analysis.* Because U.S. Corp has elected to translate foreign income taxes

at the spot rate on the date such taxes were paid rather than at the yearly average exchange rate, U.S. Corp must make the adjustments described in paragraph (c)(2)(v) of this section. Accordingly, U.S. Corp determines its section 987 taxable income or loss by

reducing the section 987 taxable income or loss that otherwise would be determined under this section by €15, translated into U.S. dollars at the yearly average exchange rate (€1 = \$1.50), and increasing the resulting amount by €15, translated using the same exchange rate

that is used to translate the creditable taxes into U.S. dollars under section 986(a) (€1 = \$1.60). Following these adjustments, Business A's section 987 taxable income for 2021 is \$96.50, computed as follows:

TABLE 3 TO PARAGRAPH (E)(14)(II)

	Amount in €	Translation rate	Amount in \$
Revenue	€100	€1 = \$1.50	\$150.00
General Expenses	(30)	€1 = \$1.50	(45.00)
Depreciation	(10)	€1 = \$1.00	(10.00)
Tentative section 987 taxable income	€60		\$95.00
Adjustments under paragraph (c)(2)(v) of this section:			
Decrease by €15 tax translated at yearly average exchange rate (€1 = \$1.50)			(22.50)
Increase by €15 tax translated at spot rate on payment date (€1 = \$1.60)			24.00
Section 987 taxable income			\$96.50

§ 1.987-4 Determination of net unrecognized section 987 gain or loss of a section 987 QBU.

(a) *In general.* The net unrecognized section 987 gain or loss of a section 987 QBU is determined by the owner annually as provided in paragraph (b) of this section in the owner's functional currency. Only assets and liabilities attributable to the section 987 QBU are taken into account.

(b) *Calculation of net unrecognized section 987 gain or loss.* Net unrecognized section 987 gain or loss of a section 987 QBU for a taxable year equals the sum of:

(1) The section 987 QBU's net accumulated unrecognized section 987 gain or loss for all prior taxable years as determined in paragraph (c) of this section; and

(2) The section 987 QBU's unrecognized section 987 gain or loss for the current taxable year as determined in paragraph (d) of this section and § 1.987-14.

(c) *Net accumulated unrecognized section 987 gain or loss for all prior taxable years—*(1) *In general.* A section 987 QBU's net accumulated unrecognized section 987 gain or loss for all prior taxable years is the aggregate of the amounts determined under paragraph (d) of this section for all prior taxable years to which this section applies, reduced by amounts recognized under § 1.987-5(a), amounts treated as deferred section 987 gain or loss, and amounts treated as suspended section 987 loss for all prior taxable years to which this section applies. Accordingly, net accumulated unrecognized section 987 gain or loss is not reduced under this paragraph (c)(1) when deferred section 987 gain or loss is recognized (or suspended) under

§ 1.987-12 or when suspended section 987 loss is recognized under § 1.987-11 or § 1.987-13.

(2) *Additional adjustments for certain taxable years beginning on or before December 31, 2024.* For any section 987 QBU in existence before the transition date, *see* § 1.987-10(e)(5) and (f)(2) for additional adjustments to the section 987 QBU's net accumulated unrecognized section 987 gain or loss.

(d) *Calculation of unrecognized section 987 gain or loss for a taxable year.* The unrecognized section 987 gain or loss of a section 987 QBU for a taxable year is generally determined under paragraphs (d)(1) through (10) of this section. However, for taxable years in which a current rate election or an annual recognition election is in effect, the unrecognized section 987 gain or loss of a section 987 QBU for a taxable year is determined by applying only paragraphs (d)(1) through (5) and (10) of this section. *See* § 1.987-14 for additional adjustments that must be made to the unrecognized section 987 gain or loss of a section 987 QBU for a taxable year in connection with a section 987 hedging transaction.

(1) *Step 1: Determine the change in the owner functional currency net value of the section 987 QBU for the taxable year—*(i) *In general.* The change in the owner functional currency net value of the section 987 QBU for the taxable year equals—

(A) The owner functional currency net value of the section 987 QBU, determined in the functional currency of the owner under paragraph (e) of this section, on the last day of the taxable year; less

(B) The owner functional currency net value of the section 987 QBU, determined in the functional currency

of the owner under paragraph (e) of this section, on the last day of the preceding taxable year.

(ii) *Year section 987 QBU is terminated.* If a section 987 QBU is terminated within the meaning of § 1.987-8 during an owner's taxable year, the termination date is treated as the last day of the taxable year for purposes of this section.

(iii) *First taxable year of a section 987 QBU.* If the owner's taxable year is the first taxable year of a section 987 QBU, the owner functional currency net value of the section 987 QBU described in paragraph (d)(1)(i)(B) of this section is zero.

(iv) *First year in which an election is in effect or ceases to be in effect.* Except as otherwise provided, the owner functional currency net value of the section 987 QBU described in paragraph (d)(1)(i)(B) of this section is determined based on the elections that were (or were not) in effect on the last day of the preceding taxable year.

(2) *Step 2: Increase the amount determined in step 1 by the amount of assets transferred from the section 987 QBU to the owner—*(i) *In general.* The amount determined in paragraph (d)(1) of this section is increased by the total amount of assets transferred from the section 987 QBU to the owner during the taxable year translated into the functional currency of the owner as provided in paragraph (d)(2)(ii) of this section.

(ii) *Assets transferred from the section 987 QBU to the owner during the taxable year.* The total amount of assets transferred from the section 987 QBU to the owner for the taxable year translated into the functional currency of the owner equals the sum of:

(A) The amount of the functional currency of the section 987 QBU and the aggregate adjusted basis of all other marked assets, after taking into account § 1.988–1(a)(10), transferred to the owner during the taxable year determined in the functional currency of the section 987 QBU and translated into the functional currency of the owner at the spot rate applicable to the date of transfer; and

(B) The aggregate adjusted basis of all historic assets transferred to the owner during the taxable year determined in the functional currency of the section 987 QBU and translated into the functional currency of the owner at the historic rate for each such asset.

(3) *Step 3: Decrease the amount determined in steps 1 and 2 by the amount of assets transferred from the owner to the section 987 QBU*—(i) *In general.* The aggregate amount determined in paragraphs (d)(1) and (2) of this section is decreased by the total amount of assets transferred from the owner to the section 987 QBU during the taxable year determined in the functional currency of the owner as provided in paragraph (d)(3)(ii) of this section.

(ii) *Assets transferred from the owner to the section 987 QBU during the taxable year.* The total amount of assets transferred from the owner to the section 987 QBU for the taxable year equals the sum of:

(A) The amount of functional currency of the owner transferred to the section 987 QBU during the taxable year; and

(B) The aggregate adjusted basis of all other assets, after taking into account § 1.988–1(a)(10), transferred to the section 987 QBU during the taxable year determined in the functional currency of the owner immediately before the transfer.

(4) *Step 4: Decrease the amount determined in steps 1 through 3 by the amount of liabilities transferred from the section 987 QBU to the owner*—(i) *In general.* The aggregate amount determined in paragraphs (d)(1) through (3) of this section is decreased by the total amount of liabilities transferred from the section 987 QBU to the owner during the taxable year translated into the functional currency of the owner as provided in paragraph (d)(4)(ii) of this section.

(ii) *Liabilities transferred from the section 987 QBU to the owner during the taxable year.* The total amount of liabilities transferred from the section 987 QBU to the owner for the taxable year equals the sum of:

(A) The amount of marked liabilities, after taking into account § 1.988–

1(a)(10), transferred to the owner during the taxable year determined in the functional currency of the section 987 QBU and translated into the functional currency of the owner at the spot rate applicable to the date of transfer; and

(B) The amount of historic liabilities transferred to the owner during the taxable year determined in the functional currency of the section 987 QBU and translated into the functional currency of the owner at the historic rate for each such liability.

(5) *Step 5: Increase the amount determined in steps 1 through 4 by the amount of liabilities transferred from the owner to the section 987 QBU.* The aggregate amount determined in paragraphs (d)(1) through (4) of this section is increased by the total amount of liabilities, after taking into account § 1.988–1(a)(10), transferred from the owner to the section 987 QBU during the taxable year determined in the functional currency of the owner immediately before the transfer.

(6) *Step 6: Decrease or increase the amount determined in steps 1 through 5 by the section 987 taxable income or loss, respectively, of the section 987 QBU for the taxable year.* The aggregate amount determined in paragraphs (d)(1) through (5) of this section is decreased or increased by the section 987 taxable income or loss, respectively, computed under § 1.987–3 for the taxable year.

(7) *Step 7: Increase the amount determined in steps 1 through 6 by certain expenses or losses that are not deductible in computing the section 987 taxable income or loss of the section 987 QBU for the taxable year.* The aggregate amount determined under paragraphs (d)(1) through (6) of this section is increased by the amount of any expense or loss that reduces the basis of assets or increases the amount of liabilities attributable to the section 987 QBU for the taxable year but is not deductible in computing the section 987 QBU's taxable income or loss for the taxable year (such as business interest expense that is not deductible under section 163(j)). Items of expense or loss described in the preceding sentence are translated into the functional currency of the owner using the exchange rate that would apply under § 1.987–3(c) if they were deductible in computing the section 987 QBU's taxable income or loss for the taxable year. However, any foreign income taxes incurred by the section 987 QBU with respect to which the owner claims a credit are translated at the same rate at which such taxes were translated under section 986(a).

(8) *Step 8: Decrease the amount determined in steps 1 through 7 by the amount of certain income or gain that*

is not included in taxable income in computing the section 987 taxable income or loss of the section 987 QBU for the taxable year. The aggregate amount determined under paragraphs (d)(1) through (7) of this section is decreased by the amount of any income or gain that increases the basis of assets or reduces the amount of liabilities attributable to the section 987 QBU for the taxable year but is not included in taxable income in computing the section 987 QBU's taxable income or loss for the taxable year. Items of income or gain described in the preceding sentence are translated into the functional currency of the owner using the exchange rate that would apply under § 1.987–3(c) if they were included in taxable income in computing the section 987 QBU's taxable income or loss for the taxable year.

(9) *Step 9: Increase or decrease the amount determined in steps 1 through 8 by any income or gain, or any deduction or loss, respectively, that does not impact the adjusted balance sheet.* The aggregate amount determined under paragraphs (d)(1) through (8) of this section is increased by any items of income or gain taken into account in paragraph (d)(6) of this section (step 6) that do not increase the basis of assets or reduce the amount of liabilities attributable to the section 987 QBU for the taxable year, and decreased by any items of deduction or loss taken into account in paragraph (d)(6) of this section (step 6) that do not reduce the basis of assets or increase the amount of liabilities attributable to the section 987 QBU for the taxable year. Items of income, gain, deduction, or loss described in the preceding sentence are translated into the functional currency of the owner using the exchange rate that applied under § 1.987–3(c) in computing the section 987 QBU's taxable income or loss for the taxable year.

(10) *Step 10: Decrease or increase the amount determined in steps 1 through 9 by any increase or decrease, respectively, to the section 987 QBU's net assets that is not previously taken into account under steps 2 through 9*—(i) *In general.* Except as provided in paragraph (d)(10)(iii) of this section, the aggregate amount determined under paragraphs (d)(1) through (9) of this section is—

(A) Decreased by the residual increase to net assets (as defined in paragraph (d)(10)(ii) of this section), translated into the owner's functional currency at the yearly average exchange rate for the taxable year; or

(B) Increased by the residual decrease to net assets (as defined in paragraph

(d)(10)(ii) of this section), translated into the owner's functional currency at the yearly average exchange rate for the taxable year.

(ii) *Determining the residual increase or decrease to net assets*—(A) *In general.* The residual increase to net assets is the positive amount, if any, that would be determined under paragraphs (d)(1) through (9) of this section in the functional currency of the section 987 QBU if such amounts were determined in the functional currency of the section 987 QBU. The residual decrease to net assets is the negative amount, if any, that would be determined under paragraphs (d)(1) through (9) of this section in the functional currency of the section 987 QBU if such amounts were determined in the functional currency of the section 987 QBU.

(B) *Application of step 1 in the functional currency of the section 987 QBU if a current rate election is in effect.* In a taxable year in which a current rate election is in effect, for purposes of applying step 1 (paragraph (d)(1) of this section) in the functional currency of the section 987 QBU, the change in the net value of the section 987 QBU is determined by reference to the QBU net value described in paragraph (e)(2)(ii) of this section.

(C) *Application of steps 3 and 5 in the functional currency of the section 987 QBU.* For purposes of applying steps 3 and 5 (paragraphs (d)(3) and (5) of this section) in the functional currency of the section 987 QBU, the amount of assets and liabilities transferred from an owner to a section 987 QBU is determined by translating the basis of the assets and the amount of the liabilities under § 1.987–2(d).

(iii) *Modifications for taxable years to which a current rate election or an annual recognition election applies.* For any taxable year to which a current rate election or an annual recognition election applies, paragraphs (d)(10)(i) and (ii) of this section are applied by replacing “paragraphs (d)(1) through (9) of this section” with “paragraphs (d)(1) through (5) of this section.”

(e) *Determination of the owner functional currency net value of a section 987 QBU*—(1) *In general.* Except as provided in paragraph (e)(2) of this section, the owner functional currency net value of a section 987 QBU on the last day of a taxable year is equal to the aggregate amount of functional currency and the adjusted basis of each other asset on the section 987 QBU's adjusted balance sheet on that day, less the aggregate amount of each liability on the section 987 QBU's adjusted balance sheet on that day, in each case translated into the owner's functional

currency as provided in paragraphs (e)(1)(i) and (ii) of this section.

(i) *Marked item.* A marked item is translated into the owner's functional currency at the spot rate applicable to the last day of the relevant taxable year.

(ii) *Historic item.* A historic item is translated into the owner's functional currency at the historic rate.

(2) *Current rate election*—(i) *In general.* If a current rate election is in effect, the owner functional currency net value of a section 987 QBU on the last day of a taxable year is equal to the QBU net value described in paragraph (e)(2)(ii) of this section, translated into the owner's functional currency at the spot rate applicable to that day.

(ii) *QBU net value.* The QBU net value of a section 987 QBU on the last day of a taxable year is determined in the functional currency of the section 987 QBU and is equal to the aggregate amount of functional currency and the adjusted basis of each other asset that is attributable to the section 987 QBU on that day, less the aggregate amount of each liability that is attributable to the section 987 QBU on that day. The QBU net value of a section 987 QBU on the last day of a taxable year may be determined either by preparing an adjusted balance sheet or by following the steps described in paragraph (e)(2)(iii) of this section (provided that the calculation is made consistently for all years in which a current rate election is in effect). However, in the first taxable year in which a current rate election ceases to be in effect, the owner functional currency net value of the section 987 QBU for the preceding taxable year must be determined by preparing an adjusted balance sheet.

(iii) *Alternative calculation of QBU net value.* The QBU net value of a section 987 QBU on the last day of a taxable year can be computed using the following steps (each applied in the functional currency of the section 987 QBU). See paragraph (g)(2)(iii) of this section (*Example 2*) for an example illustrating this rule.

(A) *Step 1: Determine the QBU net value on the last day of the preceding taxable year.* Determine the QBU net value on the last day of the preceding taxable year under this paragraph (e)(2). If the owner's taxable year is the first taxable year of a section 987 QBU, the QBU net value on the last day of the preceding taxable year is zero. In the first taxable year in which a current rate election is in effect (other than the taxable year beginning on the transition date or the first taxable year of a section 987 QBU), the QBU net value on the last day of the preceding taxable year is determined by preparing an adjusted

balance sheet. In the taxable year beginning on the transition date (other than the first taxable year of a section 987 QBU), the QBU net value on the last day of the preceding taxable year may be determined either by preparing an adjusted balance sheet or by applying the steps described in this paragraph (e)(2)(iii) for each taxable year beginning with the first taxable year of the section 987 QBU.

(B) *Step 2: Adjust for transfers between the section 987 QBU and its owner.* The amount determined in paragraph (e)(2)(iii)(A) of this section is increased by the amount of each transfer described in paragraph (d)(3) or (4) of this section and decreased by the amount of each transfer described in paragraph (d)(2) or (5) of this section (in each case, after adjustment for gain or loss recognized under § 1.988–1(a)(10)). For this purpose, the amount of assets and liabilities transferred from an owner to a section 987 QBU is determined by translating the basis of the assets and the amount of the liabilities under § 1.987–2(d)(1).

(C) *Step 3: Adjust for income or loss of the section 987 QBU.* The amount determined in paragraph (e)(2)(iii)(B) of this section is increased by items of income and gain attributable to the section 987 QBU (including tax-exempt income described in paragraph (d)(8) of this section) for the taxable year and reduced by items of deduction and loss attributable to the section 987 QBU (including non-deductible expenses described in paragraph (d)(7) of this section) for the taxable year. However, no adjustment is made under the preceding sentence for any item of income, gain, deduction, or loss described in paragraph (d)(9) of this section.

(f) *Combinations and separations*—(1) *Combinations.* The net accumulated unrecognized section 987 gain or loss of a combined QBU for a taxable year is equal to the sum of the combining QBUs' net accumulated unrecognized section 987 gain or loss. See paragraph (f)(3)(i) of this section (*Example 1*) for an illustration of this rule.

(2) *Separations.* The net accumulated unrecognized section 987 gain or loss of a separated QBU for a taxable year is equal to the separating QBU's net accumulated unrecognized section 987 gain or loss multiplied by the separation fraction. For purposes of determining the owner functional currency net value and QBU net value of the separated QBUs on the last day of the taxable year preceding the taxable year of separation under paragraphs (d)(1)(i)(B) and (e) of this section, the assets and liabilities attributable to the separating QBU on

that day are deemed to be attributable to the separated QBUs on that day, and are apportioned between the separated QBUs in a reasonable manner that takes into account the assets and liabilities attributable to the separated QBUs immediately after the separation. See paragraph (f)(3)(ii) of this section (*Example 2*) for an illustration of this rule.

(3) *Examples.* The following examples illustrate the rules of paragraphs (f)(1) and (2) of this section. For purposes of these examples, assume that no section 987 elections are in effect.

(i) *Example 1: Combination of two section 987 QBUs that have the same owner—(A) Facts.* DC1, a domestic corporation, owns Entity A, a DE. Entity A conducts a manufacturing business that constitutes a section 987 QBU (*Manufacturing QBU*) that has the euro as its functional currency. Manufacturing QBU has a net accumulated unrecognized section 987 loss of \$100. DC1 also owns Entity B, a DE. Entity B conducts a sales business that constitutes a section 987 QBU (*Sales QBU*) that has the euro as its functional currency. Sales QBU has a net accumulated unrecognized section 987 gain of \$110. During the taxable year, Entity A merges into Entity B under local law pursuant to which Entity A ceases to exist, Entity B survives, and Entity B acquires all the assets and liabilities of Entity A. As a result, the books and records of Manufacturing QBU and Sales QBU are combined into a new single set of books and records. The combined entity has the euro as its functional currency.

(B) *Analysis.* Pursuant to § 1.987–2(c)(9)(i), Manufacturing QBU and Sales QBU are combining QBUs, and their combination does not give rise to a transfer that is taken into account in determining the amount of a remittance (as defined in § 1.987–5(c)). For purposes of computing net unrecognized section 987 gain or loss under this section for the year of the combination, the combination is deemed to have occurred on the last day of the owner's prior taxable year, such that the owner functional currency net value of the combined section 987 QBU at the end of that taxable year described under paragraph (d)(1)(i)(B) of this section takes into account items attributable to both Manufacturing QBU and Sales QBU at that time. Additionally, any transactions between Manufacturing QBU and Sales QBU occurring during the year of the merger will not result in transfers to or from a section 987 QBU. Pursuant to paragraph (f)(1) of this section, the combined QBU will have a net accumulated

unrecognized section 987 gain of \$10 (the \$100 loss from Manufacturing QBU plus the \$110 gain from Sales QBU).

(ii) *Example 2: Separation of two section 987 QBUs that have the same owner—(A) Facts.* DC1, a domestic corporation, owns Entity A, a DE. Entity A conducts a business in the Netherlands that constitutes a section 987 QBU (*Dutch QBU*) that has the euro as its functional currency. The business of Dutch QBU consists of manufacturing and selling bicycles and scooters and is recorded on a single set of books and records. On the last day of year 1, the adjusted basis of the gross assets of Dutch QBU is €1,000. In year 2, the net accumulated unrecognized section 987 loss of Dutch QBU from all prior taxable years is \$200. During year 2, Entity A separates the bicycle and scooter business such that each business begins to have its own books and records and to meet the definition of a section 987 QBU under § 1.987–1(b)(3) (hereafter, “bicycle QBU” and “scooter QBU”). There are no transfers between DC1 and Dutch QBU before the separation. After the separation, the aggregate adjusted basis of bicycle QBU's assets is €600 and the aggregate adjusted basis of scooter QBU's assets is €400. Each section 987 QBU continues to have the euro as its functional currency.

(B) *Analysis.* Pursuant to § 1.987–2(c)(9)(iii), bicycle QBU and scooter QBU are separated QBUs, and the separation of Dutch QBU, a separating QBU, does not give rise to a transfer taken into account in determining the amount of a remittance. For purposes of computing net unrecognized section 987 gain or loss under this section for year 2, the separation will be deemed to have occurred on the last day of the owner's prior taxable year, year 1. Pursuant to paragraph (f)(2) of this section and § 1.987–1(h), bicycle QBU will have a separation fraction of €600/€1,000 and net accumulated unrecognized section 987 loss of \$120 (€600/€1,000 × \$200), and scooter QBU will have a separation fraction of €400/€1,000 and net accumulated unrecognized section 987 loss of \$80 (€400/€1,000 × \$200).

(g) *Examples.* The following examples illustrate the provisions of this section. For purposes of the examples, U.S. Corp is a domestic corporation that uses the calendar year as its taxable year and has the dollar as its functional currency. Except as otherwise indicated, no section 987 elections are in effect. The examples are not intended to demonstrate when activities constitute a trade or business within the meaning of § 1.989(a)–1(b)(2)(ii)(A) and (c) and therefore whether a section 987 QBU is considered to exist.

(1) *Example 1: Determination of net unrecognized section 987 gain or loss—(i) Facts.* On July 1, year 1, U.S. Corp establishes Japan Branch, a section 987 QBU that has the yen as its functional currency, and U.S. Corp transfers to Japan Branch ¥100,000 with a basis of \$1,000 and raw land with a basis of \$500. On the same day, Japan Branch borrows ¥10,000 from a bank. In year 1, Japan Branch earns ¥12,000 for providing services and incurs ¥2,000 of related expenses. Japan Branch thus earns ¥10,000 of net income in year 1. The spot rate on July 1, year 1, is \$1 = ¥100; the spot rate on December 31, year 1, is \$1 = ¥120; and the average rate for the period of July 1, year 1, to December 31, year 1, is \$1 = ¥110. Thus, the ¥12,000 of services revenue when translated under § 1.987–3(c)(1) at the yearly average exchange rate equals \$109.09 (¥12,000 × (\$1/¥110)) = \$109.09. The ¥2,000 of expenses translated at the same yearly average exchange rate equals \$18.18 (¥2,000 × (\$1/¥110) = \$18.18). Thus, Japan Branch's net income translated into dollars equals \$90.91 (\$109.09 – \$18.18 = \$90.91).

(ii) *Analysis.* Under paragraph (a) of this section, U.S. Corp must compute the net unrecognized section 987 gain or loss of Japan Branch for year 1. Because this is Japan Branch's first taxable year, the net unrecognized section 987 gain or loss (as defined under paragraph (b) of this section) is equal to the branch's unrecognized section 987 gain or loss for year 1 as determined in paragraph (d) of this section. The calculations under paragraph (d) of this section are made as follows:

(A) *Step 1.* Under paragraph (d)(1) of this section (step 1), U.S. Corp must determine the change in the owner functional currency net value (OFCNV) of Japan Branch for year 1 in dollars. The change in the OFCNV of Japan Branch for year 1 is equal to the OFCNV of Japan Branch determined in dollars on the last day of year 1, less the OFCNV of Japan Branch determined in dollars on the last day of the preceding taxable year.

(1) The OFCNV of Japan Branch on December 31, year 1 is determined under paragraph (e) of this section as the sum of the basis of each asset on Japan Branch's adjusted balance sheet on December 31, year 1, less the sum of each liability on Japan Branch's adjusted balance sheet on that date, translated into dollars as provided in paragraphs (e)(1)(i) and (ii) of this section.

(2) For this purpose, Japan Branch will show the following assets and liabilities on its adjusted balance sheet

for December 31, year 1: cash of ¥120,000; raw land with a basis of ¥55,000 (\$500 translated under § 1.987–2(d)(2) at the historic rate of \$1 = ¥110); and liabilities of ¥10,000.

(3) Under paragraphs (e)(1)(i) and (ii) of this section, U.S. Corp will translate these items as follows. The ¥120,000 is a marked asset and the ¥10,000 liability

is a marked liability. These items are translated into dollars on December 31, year 1, using the spot rate on December 31, year 1, of \$1 = ¥120. The raw land is a historic asset and is translated into dollars under paragraph (e)(1)(ii) of this section at the historic rate, which under § 1.987–1(c)(3)(i)(A) is the yearly average exchange rate of \$1 = ¥110

applicable to the year the land was transferred to the QBU.

(4) The OFCNV of Japan Branch on December 31, year 1, in dollars is \$1,416.67. The determination of the OFCNV of Japan Branch on December 31, year 1, is shown below in dollars together with the corresponding amounts in yen.

TABLE 1 TO PARAGRAPH (g)(1)(ii)(A)(4)—OFCNV—END OF YEAR 1

	Amount in ¥	Translation rate	Amount in \$
Assets			
Yen	120,000	\$1 = ¥120 (spot rate-12/31/year 1)	\$1,000.00
Land	55,000	\$1 = ¥110 (historic rate-yearly average rate-year 1) ...	500.00
Total assets	175,000		1,500.00
Liabilities			
Bank loan	10,000	\$1 = ¥120 (spot rate-12/31/year 1)	83.33
Total liabilities	10,000		83.33
Year 1 ending net value	165,000		1,416.67

(5) Under paragraph (d)(1) of this section, the change in OFCNV of Japan Branch for year 1 is equal to the OFCNV of the branch determined in dollars on December 31, year 1, (which is \$1,416.67) less the OFCNV of the branch determined in dollars on the last day of the preceding taxable year. Because this is the first taxable year of Japan Branch, the OFCNV of Japan Branch determined in dollars on the last day of the preceding taxable year is zero under paragraph (d)(1)(iii) of this section. Accordingly, the change in OFCNV of Japan Branch for year 1 is \$1,416.67.

(B) *Step 2 (no adjustment)*. No adjustment is made under paragraph (d)(2) of this section (step 2) because no assets were transferred by Japan Branch to U.S. Corp during the taxable year.

(C) *Step 3*. On July 1, year 1, U.S. Corp transferred to Japan Branch ¥100,000 with a basis of \$1,000.00 and raw land with a basis of \$500.00 (equal to ¥55,000, translated under § 1.987–2(d)(2) at the historic rate of \$1 = ¥110). The total amount of assets transferred from U.S. Corp to Japan Branch in dollars is \$1,500, and the total amount of the transfer in yen is ¥155,000.

Therefore, under paragraph (d)(3) of this section (step 3), the amount determined in previous steps is reduced by \$1,500.00, from \$1,416.67 to negative \$83.33.

(D) *Steps 4 and 5 (no adjustment)*. No adjustment is made under paragraphs (d)(4) and (5) of this section (steps 4 and 5) because no liabilities were transferred by U.S. Corp to Japan Branch or by Japan Branch to U.S. Corp during the taxable year.

(E) *Step 6*. Under paragraph (d)(6) of this section (step 6), the amount determined in previous steps is decreased by the section 987 taxable income of Japan Branch of \$90.91, from negative \$83.33 to negative \$174.24.

(F) *Steps 7 through 9 (no adjustment)*. No adjustment is made under paragraphs (d)(7) through (9) of this section (steps 7 through 9) because all of Japan Branch's items of income or deduction for the taxable year impact the basis of Japan Branch's assets or the amount of its liabilities and are taken into account in computing taxable income.

(G) *Step 10 (no adjustment)—(1) Calculation of residual increase or decrease to net assets*. Under paragraph

(d)(10)(ii) of this section, the residual increase (or decrease) to net assets is the positive (or negative) amount, if any, that would be determined under paragraphs (d)(1) through (9) of this section (steps 1 through 9) in the functional currency of the section 987 QBU if such amounts were determined in the functional currency of the section 987 QBU. In year 1, the relevant steps that must be applied in the functional currency of Japan Branch (the yen) are paragraphs (d)(1), (3), and (6) of this section (steps 1, 3, and 6). For purposes of applying paragraph (d)(1) of this section (step 1) in yen, the change in the net value of Japan Branch is ¥165,000. See paragraph (g)(1)(ii)(A)(4) of this section. For purposes of applying paragraph (d)(3) of this section (step 3) in yen, the amount of assets transferred from U.S. Corp to Japan Branch is ¥155,000. See paragraph (g)(1)(ii)(C) of this section. For purposes of applying paragraph (d)(6) of this section (step 6) in yen, Japan Branch earned ¥10,000 of net income in year 1. The application of these steps results in no residual increase or decrease to the adjusted balance sheet, as shown below:

TABLE 2 TO PARAGRAPH (g)(1)(ii)(G)(1)—APPLICATION OF RELEVANT STEPS IN YEN

Change in net value in yen (step 1)	¥165,000
Subtract amount determined in yen under step 3 (transfers from owner to section 987 QBU)	(¥155,000)
Subtract amount determined in yen under step 6 (section 987 taxable income or loss)	(¥10,000)
Residual increase or decrease to the adjusted balance sheet	¥0

(2) *No residual increase or decrease to the adjusted balance sheet*. As explained in paragraph (g)(1)(ii)(G)(1) of this section, there is no residual

increase or decrease to the adjusted balance sheet of Japan Branch in year 1. Therefore, no adjustment is made under paragraph (d)(10) of this section (step

10). Accordingly, the unrecognized section 987 loss of Japan Branch for year 1 is \$174.24.

(2) *Example 2: Determination of net unrecognized section 987 gain or loss if a current rate election is in effect—(i) Facts.* The facts are the same as in paragraph (g)(1) of this section (*Example 1*), except that U.S. Corp makes a current rate election under § 1.987–1(d)(2) for year 1.

(ii) *Analysis.* Because a current rate election is in effect for year 1, the unrecognized section 987 gain or loss for year 1 is determined by applying only paragraphs (d)(1) through (5) and (10) of this section (steps 1 through 5 and step 10). The calculations under paragraph (d) of this section are made as follows:

(A) *Step 1.* The change in the OFCNV of Japan Branch for year 1 is equal to the OFCNV of Japan Branch determined in dollars on the last day of year 1, less the OFCNV of Japan Branch determined in dollars on the last day of the preceding taxable year.

(1) For this purpose, Japan Branch will show the same assets and liabilities on its adjusted balance sheet for December 31, year 1 as are described in paragraph (g)(1)(ii)(A)(2) of this section (*Example 1*), but the land is treated as a marked asset as a result of the current rate election. The adjusted balance sheet reflects cash of ¥120,000, raw land with a basis of ¥50,000 (\$500 translated under § 1.987–2(d)(1) at the July 1, year 1 spot rate of \$1 = ¥100), and liabilities of ¥10,000.

(2) Under paragraph (e)(2)(ii) of this section, because a current rate election is in effect, the OFCNV of Japan Branch at the end of year 1 is equal to the QBU net value, translated into U.S. dollars at the applicable spot rate on the last day of the taxable year. The QBU net value of Japan Branch at the end of year 1 is

¥160,000, as shown below. The OFCNV of Japan Branch is \$1,333.33, which is equal to the QBU net value of ¥160,000, translated at the applicable spot rate on December 31, year 1 of \$1 = ¥120.

TABLE 3 TO PARAGRAPH (g)(2)(ii)(A)(2)—QBU NET VALUE—YEAR 1

	Amount in ¥
Assets:	
Yen	120,000
Land	50,000
Total assets	170,000
Liabilities:	
Bank loan	10,000
Total liabilities	10,000
Year 1 QBU net value	160,000

(3) Under paragraph (d)(1) of this section, the change in OFCNV of Japan Branch for year 1 is equal to the OFCNV of the branch determined in dollars on December 31, year 1, (which is \$1,333.33) less the OFCNV of the branch determined in dollars on the last day of the preceding taxable year. Because this is the first taxable year of Japan Branch, the OFCNV of Japan Branch determined in dollars on the last day of the preceding taxable year is zero under paragraph (d)(1)(iii) of this section. Accordingly, the change in OFCNV of Japan Branch for year 1 is \$1,333.33.

(B) *Step 2 (no adjustment).* No adjustment is made under paragraph (d)(2) of this section (step 2) because no assets were transferred by Japan Branch to U.S. Corp during the taxable year.

(C) *Step 3.* On July 1, year 1, U.S. Corp transferred to Japan Branch ¥100,000 with a basis of \$1,000.00 and raw land with a basis of \$500.00 (equal

to ¥50,000, translated under § 1.987–2(d)(1) at the spot rate on July 31, year 1 of \$1 = ¥100). The total amount of assets transferred in dollars is \$1,500.00, and the amount of assets transferred in yen is ¥150,000. Therefore, under paragraph (d)(3) of this section (step 3), the amount determined in previous steps is reduced by \$1,500, from \$1,333.33 to negative \$166.67.

(D) *Steps 4 and 5 (no adjustment).* No adjustment is made under paragraphs (d)(4) and (5) of this section (steps 4 and 5) because no liabilities were transferred by U.S. Corp to Japan Branch or by Japan Branch to U.S. Corp during the taxable year.

(E) *Steps 6 through 9 do not apply.* Under paragraph (d) of this section, paragraphs (d)(6) through (9) of this section (steps 6 through 9) do not apply because a current rate election is in effect.

(F) *Step 10—(1) Application of relevant steps in Japan Branch's functional currency.* Under paragraph (d)(10)(iii) of this section, because a current rate election is in effect, the residual increase or decrease to net assets is determined by applying paragraphs (d)(1) through (5) of this section (steps 1 through 5) in the functional currency of the section 987 QBU. The relevant steps that must be applied under paragraph (d)(10) of this section in the functional currency of Japan Branch are paragraphs (d)(1) and (3) of this section (steps 1 and 3). Under paragraph (d)(10)(ii)(B) of this section, step 1 is applied by reference to Japan Branch's QBU net value. See paragraphs (g)(2)(ii)(A) and (C) of this section for amounts determined in yen. The residual increase to net assets is determined as follows:

TABLE 4 TO PARAGRAPH (g)(2)(ii)(F)(1)—APPLICATION OF RELEVANT STEPS IN YEN

Step 1: Change in net value	¥160,000
Step 3: Subtract amount of transfers from owner to section 987 QBU	(¥150,000)
Residual increase or decrease to the adjusted balance sheet	¥10,000

(2) *Residual increase or decrease to net assets.* As explained in paragraph (g)(2)(ii)(F)(1) of this section, the residual increase to Japan Branch's net assets in year 1 is ¥10,000. This amount, translated at the yearly average exchange rate of \$1 = ¥110, equals \$90.91. Therefore, the amount determined in previous steps is reduced by \$90.91, from negative \$166.67 to negative \$257.58. Accordingly, the unrecognized section 987 loss of Japan Branch for year 1 is \$257.58.

(iii) *Alternative computation of QBU net value.* Alternatively, for purposes of applying steps 1 and 10 (paragraphs (d)(1) and (10) of this section), U.S. Corp can determine QBU net value using the following steps under paragraph (e)(2)(iii) of this section.

(A) *Step 1: Determine QBU net value at the end of the preceding taxable year.* Because year 1 is the first taxable year in which Japan Branch exists, the QBU net value at the end of the preceding taxable year is zero.

(B) *Step 2: Adjust for transfers between the section 987 QBU and its owner.* During year 1, U.S. Corp transferred assets to Japan Branch with an aggregate basis of ¥150,000, as described in paragraph (g)(2)(ii)(C) of this section. Therefore, the amount determined in step 1 is increased from zero to ¥150,000.

(C) *Step 3: Adjust for income or loss of the section 987 QBU.* During year 1, Japan Branch earned ¥10,000 of net income. Therefore, the amount

determined in step 2 is increased from ¥150,000 to ¥160,000.

(D) *QBU net value.* Japan Branch's QBU net value at the end of the preceding taxable year is zero. This amount is increased by the transfer from U.S. Corp of ¥150,000 and by Japan Branch's taxable income of ¥10,000. Japan Branch did not have any tax-exempt income or non-deductible expenses in year 1. Accordingly, Japan Branch's QBU net value at the end of year 1 is ¥160,000.

(3) *Example 3: Determination of net unrecognized section 987 gain or loss when a current rate election is revoked—(i) Facts—(A) Background.* The facts in year 1 are the same as in paragraph (g)(2) of this section (*Example 2*). In year 9, a current rate election remains in effect, U.S. Corp has net unrecognized section 987 loss of \$1,000 with respect to Japan Branch, and Japan Branch does not make a remittance. On December 31, year 9, the adjusted balance sheet of Japan Branch shows the following assets and liabilities: cash of ¥120,000; raw land with a basis of ¥50,000; and liabilities of ¥10,000. Effective for year 10, U.S. Corp revokes the current rate election.

(B) *Operations in year 10.* In year 10, Japan Branch earns ¥12,000 for providing services and incurs ¥2,000 of related expenses. Japan Branch thus earns ¥10,000 of net income in year 10. On December 31, year 10, the adjusted balance sheet of Japan Branch shows the following assets and liabilities: cash of ¥130,000; raw land with a basis of ¥50,000; and liabilities of ¥10,000.

Assume that the spot rate on December 31, year 9, is \$1 = ¥120; the spot rate on December 31, year 10, is \$1 = ¥130; and the yearly average exchange rate for year 10 is \$1 = ¥125. Thus, the ¥12,000 of services revenue when properly translated under § 1.987–3(c)(1) at the yearly average exchange rate equals \$96.00 ($¥12,000 \times (\$1/¥125) = \$96.00$). The ¥2,000 of expenses translated at the same yearly average exchange rate equals \$16.00 ($¥2,000 \times (\$1/¥125) = \$16.00$). Thus, Japan Branch's net income translated into dollars equals \$80. There are no transfers of assets or liabilities between U.S. Corp and Japan Branch in year 10.

(ii) *Analysis—(A) Determination of OFCNV for year 9.* Under paragraph (d)(1)(iv) of this section, the OFCNV of a section 987 QBU on the last day of the preceding taxable year is determined based on the elections that were (or were not) in effect on the last day of that taxable year. In year 9, a current rate election was in effect. Therefore, in determining the OFCNV of Japan Branch for year 9, all assets and liabilities of Japan Branch (including the land) are treated as marked items. Under paragraph (e)(2)(ii) of this section, because a current rate election was in effect for year 9, the OFCNV of Japan Branch at the end of year 9 is equal to the QBU net value, translated into U.S. dollars at the applicable spot rate on the last day of the taxable year. The QBU net value of Japan Branch at the end of year 9 is ¥160,000, as shown below. The OFCNV of Japan Branch is \$1,333.33,

which is equal to the QBU net value of ¥160,000, translated at the applicable spot rate on December 31, year 9 of \$1 = ¥120.

TABLE 5 TO PARAGRAPH (g)(3)(ii)(A)—
QBU NET VALUE—END OF YEAR 9

	Amount in ¥
Assets:	
Yen	120,000
Land	50,000
Total assets	170,000
Liabilities:	
Bank loan	10,000
Total liabilities	10,000
Year 9 ending net value	160,000

(B) *Determination of OFCNV for year 10.* In year 10, a current rate election is not in effect. Therefore, in determining the OFCNV of Japan Branch for year 10, the land owned by Japan Branch is treated as a historic item. Under § 1.987–1(c)(3)(i)(E), the historic rate applicable to historic items that were attributable to Japan Branch on the last day of the last taxable year in which a current rate election was in effect (December 31, year 9) generally is equal to the spot rate applicable to that day. Therefore, the historic rate applicable to the land is the spot rate on December 31, year 9. The OFCNV of Japan Branch for year 10 is \$1,339.74, determined under paragraph (e) of this section as follows (together with the corresponding amounts in yen):

TABLE 6 TO PARAGRAPH (g)(3)(ii)(B)—OFCNV—END OF YEAR 10

	Amount in ¥	Translation rate	Amount in \$
Assets:			
Yen	¥130,000	\$1 = ¥130 (spot rate-12/31/year 10)	\$1,000.00
Land	50,000	\$1 = ¥120 (historic rate-spot rate-12/31/year 9)	416.67
Total assets	180,000		1,416.67
Liabilities:			
Bank loan	10,000	\$1 = ¥130 (spot rate-12/31/year 10)	76.92
Total liabilities	10,000		76.92
Year 10 ending net value	170,000		1,339.74

(C) *Determination of unrecognized section 987 gain or loss for year 10.* The unrecognized section 987 gain or loss of Japan Branch for year 10 is determined under paragraph (d) of this section as follows:

(1) *Step 1.* The change in the OFCNV of Japan Branch for year 10 is equal to the OFCNV of Japan Branch determined in dollars on the last day of year 10, less the OFCNV of Japan Branch determined in dollars on the last day of year 9.

Therefore, the change in OFCNV is equal to \$6.41 (\$1,339.74—\$1,333.33).

(2) *Steps 2 through 5 (no adjustment).* No adjustment is made under paragraphs (d)(2) through (5) of this section (steps 2 through 5) because no assets or liabilities were transferred by U.S. Corp to Japan Branch or by Japan Branch to U.S. Corp during the taxable year.

(3) *Step 6.* Under paragraph (d)(6) of this section (step 6), the amount

determined in previous steps is decreased by the section 987 taxable income of Japan Branch of \$80.00, from \$6.41 to negative \$73.59.

(4) *Steps 7 through 10 (no adjustment).* No adjustment is made under paragraphs (d)(7) through (10) of this section (steps 7 through 10) because all of Japan Branch's items of income or deduction for the taxable year impact the basis of Japan Branch's assets or the amount of its liabilities and are taken

into account in computing taxable income. In addition, Japan Branch does not have a residual increase or decrease to net assets (because the change in net value of ¥10,000 is equal to the amount of Japan Branch's net income in year 10). Accordingly, the unrecognized section 987 loss of Japan Branch for year 10 is negative \$73.59.

(D) *Determination of net unrecognized section 987 gain or loss.* In year 10, Japan Branch has net accumulated section 987 loss of \$1,000. Because U.S. Corp revoked the current rate election for year 10, the net accumulated section 987 loss of \$1,000 becomes suspended section 987 loss under § 1.987–11(d)(2) and Japan Branch's net accumulated section 987 loss is reduced to zero. Therefore, in year 10, Japan Branch's net unrecognized section 987 loss is equal to \$73.59, its unrecognized section 987 loss for year 10.

§ 1.987–5 Recognition of section 987 gain or loss.

(a) *Recognition of section 987 gain or loss by the owner of a section 987 QBU.* The taxable income of an owner of a section 987 QBU includes the owner's section 987 gain or loss recognized with respect to the section 987 QBU for the taxable year. Except as otherwise provided in the section 987 regulations (including § 1.987–11(c), § 1.987–12(b) or (e), or § 1.987–13(h) or (k)), for any taxable year the owner's section 987 gain or loss recognized with respect to a section 987 QBU is equal to:

(1) The owner's net unrecognized section 987 gain or loss with respect to the section 987 QBU determined under § 1.987–4 on the last day of such taxable year (or, if earlier, on the day the section 987 QBU is terminated under § 1.987–8); multiplied by

(2) The owner's remittance proportion for the taxable year, as determined under paragraph (b) of this section.

(b) *Remittance proportion*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, the owner's remittance proportion with respect to a section 987 QBU for a taxable year is equal to:

(i) The amount of the remittance, as determined under paragraph (c) of this section, to the owner from the section 987 QBU for such taxable year; divided by

(ii) The sum of:

(A) The aggregate adjusted basis of the gross assets that are attributable to the section 987 QBU as of the end of the taxable year, determined in the functional currency of the section 987 QBU; and

(B) The amount of the remittance, as determined under paragraph (c) of this section.

(2) *Annual recognition election.* A taxpayer may elect to recognize its net unrecognized section 987 gain or loss with respect to the section 987 QBU on an annual basis (*annual recognition election*). For any taxable year in which the annual recognition election is in effect, the owner's remittance proportion with respect to a section 987 QBU is one. See paragraph (g) of this section for an example illustrating this rule. Additionally, for any taxable year of an original deferral QBU owner in which an annual recognition election is in effect, the remittance proportion with respect to any successor deferral QBU is one.

(c) *Remittance*—(1) *Definition.* A remittance is determined in the section 987 QBU's functional currency and equals the excess, if any, of:

(i) The aggregate of all amounts transferred from the section 987 QBU to the owner during the taxable year, as determined in paragraph (d) of this section; over

(ii) The aggregate of all amounts transferred from the owner to the section 987 QBU during the taxable year, as determined in paragraph (e) of this section.

(2) *Alternative calculation.* The amount of a remittance described in paragraph (c)(1) of this section may alternatively be determined under the following steps (each applied in the functional currency of the section 987 QBU). If the amount determined under this paragraph (c)(2) is negative, the amount of the remittance is zero.

(i) *Step 1: Determine the change in QBU net value.* The change in QBU net value is equal to the QBU net value on the date provided in paragraph (c)(3) of this section, less the QBU net value on the last day of the preceding taxable year. In the first taxable year in which the section 987 QBU exists, the QBU net value on the last day of the preceding taxable year is zero.

(ii) *Step 2: Adjust the amount determined in step 1 for income or loss of the section 987 QBU.* The amount determined in paragraph (c)(2)(i) of this section is reduced (including below zero) by items of income and gain attributable to the section 987 QBU (including tax-exempt income described in § 1.987–4(d)(8)) for the taxable year and increased by items of deduction and loss attributable to the section 987 QBU (including non-deductible expenses described in § 1.987–4(d)(7)) for the taxable year. However, no adjustment is made under the preceding sentence for any item of income, gain, deduction, or

loss described in § 1.987–4(d)(9) (items that do not impact the adjusted balance sheet).

(iii) *Step 3: Multiply the amount determined in step 2 by negative one.* The amount of a remittance is equal to the amount determined in paragraph (c)(2)(ii) of this section multiplied by negative one.

(3) *Day when a remittance is determined.* An owner's remittance from a section 987 QBU for a taxable year is determined on the last day of the taxable year (or, if earlier, on the day of the taxable year when the section 987 QBU is terminated under § 1.987–8).

(4) *Termination.* A termination of a section 987 QBU as determined under § 1.987–8 is treated as a remittance of all the gross assets of the section 987 QBU to the owner on the date of such termination. See § 1.987–8(e). Accordingly, for purposes of paragraph (b) of this section, the remittance proportion in the case of a termination is one.

(d) *Aggregate of all amounts transferred from the section 987 QBU to the owner for the taxable year.* For purposes of paragraph (c)(1)(i) of this section, the aggregate of all amounts transferred from the section 987 QBU to the owner for the taxable year is the aggregate amount of functional currency and the aggregate adjusted basis of the other assets transferred (after taking into account § 1.988–1(a)(10)), determined in the section 987 QBU's functional currency. Solely for this purpose, the amount of liabilities transferred from the owner to the section 987 QBU (determined in the section 987 QBU's functional currency under § 1.987–2(d) after taking into account § 1.988–1(a)(10)) is treated as a transfer of assets from the section 987 QBU to the owner with an adjusted basis equal to the amount of such liabilities.

(e) *Aggregate of all amounts transferred from the owner to the section 987 QBU for the taxable year.* For purposes of paragraph (c)(1)(ii) of this section, the aggregate of all amounts transferred from the owner to the section 987 QBU for the taxable year is the aggregate amount of functional currency and the aggregate adjusted basis of the assets transferred (determined in the section 987 QBU's functional currency under § 1.987–2(d) after taking into account § 1.988–1(a)(10)). Solely for this purpose, the amount of liabilities transferred from the section 987 QBU to the owner (determined in the section 987 QBU's functional currency after taking into account § 1.988–1(a)(10)) is treated as a transfer of assets from the owner to the

section 987 QBU with an adjusted basis equal to the amount of such liabilities.

(f) *Determination of owner's adjusted basis in transferred assets and amount of transferred liabilities*—(1) *In general.* The owner's adjusted basis in an asset or the amount of a liability received in a transfer from a section 987 QBU (whether or not such transfer is made in connection with a remittance) is determined in the owner's functional currency under the rules prescribed in paragraphs (f)(2) and (3) of this section.

(2) *Marked items.* The basis of a marked asset or amount of a marked liability is the amount determined by translating the section 987 QBU's functional currency basis of the asset or amount of the liability, after taking into account § 1.988–1(a)(10), into the owner's functional currency at the spot rate applicable to the date of transfer.

(3) *Historic items.* The basis of a historic asset or amount of a historic liability is the amount determined by translating the section 987 QBU's functional currency basis of the asset or amount of the liability into the owner's functional currency at the historic rate for the asset or liability.

(g) *Example—Calculation of section 987 gain or loss recognized.* The following example illustrates the calculation of section 987 gain or loss under this section. For purposes of this example, except as otherwise indicated, assume that no section 987 elections are in effect. Depreciation is ignored for purposes of this example.

(1) *Facts*—(i) *In general.* U.S. Corp, a domestic corporation with the dollar as its functional currency, operates in the United Kingdom through Business A, a section 987 QBU with the pound as its functional currency. The net unrecognized section 987 gain for Business A as determined under § 1.987–4 as of the last day of year 2 is \$80.

(ii) *Year 1 balance sheet.* At the end of year 1, the following assets are attributable to Business A: cash of £3,350; a computer with an adjusted basis of £500; and a machine with an adjusted basis of £500. Thus, the aggregate basis of Business A's assets is £4,350. Business A has no liabilities.

(iii) *Transfers and income in year 2.* During year 2, Business A earned income of £1,500. In addition, the following transfers took place between U.S. Corp and Business A in year 2. On January 5, year 2, U.S. Corp transferred to Business A £300 (acquired by U.S. Corp immediately before the transfer). On March 5, year 2, Business A transferred a machine (with an adjusted basis of £500) to U.S. Corp. On November 1, year 2, Business A

transferred £2,300 to U.S. Corp. On December 7, year 2, U.S. Corp transferred a truck to Business A. The adjusted basis of the truck, when properly translated into pounds under § 1.987–2(d), is £2,000.

(iv) *Year 2 balance sheet.* At the end of year 2, the following assets are attributable to Business A: cash of £2,850, a computer with a pound adjusted basis of £500, and a truck with a pound adjusted basis of £2,000. Thus, the aggregate basis of Business A's assets is £5,350. Business A has no liabilities.

(2) *Analysis.* U.S. Corp's section 987 gain with respect to Business A is determined as follows:

(i) *Computation of amount of remittance.* Under paragraphs (c)(1) and (2) of this section, U.S. Corp must determine the amount of the remittance for year 2 in the QBU's functional currency (pounds) on the last day of year 2. The amount of the remittance for year 2 is £500, determined as follows:

TABLE 1 TO PARAGRAPH (g)(2)(i)

Transfers from Business A to U.S. Corp in pounds	
Machine	£500
Pounds	£2,300
Aggregate transfers from Business A to U.S. Corp	£2,800
Transfers from U.S. Corp to Business A in pounds	
Truck	£2,000
Pounds	£300
Aggregate transfers from U.S. Corp to Business A	£2,300
Computation of amount of remittance:	
Aggregate transfers from Business A to U.S. Corp	£2,800
Less: aggregate transfers from U.S. Corp to Business A	(£2,300)
Total remittance	£500

(ii) *Alternative computation of remittance amount.* Under paragraph (c)(2) of this section, U.S. Corp can compute the amount of the remittance for year 2 using the following steps.

(A) *Step 1: Change in QBU net value.* The change in Business A's QBU net value is equal to £1,000 (£5,350—£4,350).

(B) *Step 2: Adjustment for income or loss.* The amount determined in step 1 (£1,000) is reduced by Business A's

income for year 2 of £1,500, to negative £500.

(C) *Step 3: Multiply by negative one.* The amount determined in step 2 (negative £500) is multiplied by negative one. The remittance for year 2 is equal to £500.

(iii) *Computation of section 987 QBU gross assets plus remittance.* Under paragraph (b)(1)(ii) of this section, Business A must determine the aggregate basis of its gross assets and must increase this amount by the amount of the remittance.

TABLE 2 TO PARAGRAPH (g)(2)(iii)

Computer	£500
Pounds	£2,850
Truck	£2,000
Aggregate gross assets	£5,350
Remittance	£500
Aggregate basis of Business A's gross assets at end of year 2, increased by amount of remittance	£5,850

(iv) *Computation of remittance proportion.* Under paragraph (b) of this section, Business A must compute the remittance proportion by dividing the £500 remittance amount by the £5,850 sum of the aggregate basis of Business A's gross assets and the amount of the remittance. The resulting remittance proportion is 0.085.

(v) *Computation of section 987 gain or loss.* The amount of U.S. Corp's section 987 gain or loss that is recognized with respect to Business A is determined under paragraph (a) of this section by multiplying the 0.085 remittance proportion by the \$80 of net unrecognized section 987 gain. U.S. Corp's resulting recognized section 987 gain for year 2 is \$6.80.

(3) *Annual recognition election.* If an annual recognition election under paragraph (b)(2) of this section were in effect for year 2, U.S. Corp's remittance proportion would be one. Accordingly, U.S. Corp would recognize all \$80 of the net unrecognized section 987 gain with respect to Business A.

§ 1.987–6 Character and source of section 987 gain or loss.

(a) *Ordinary income or loss.* Section 987 gain or loss is ordinary income or loss for Federal income tax purposes.

(b) *Character and source of section 987 gain or loss.* With respect to each section 987 QBU, the character and source of section 987 gain or loss is determined under this paragraph (b) for all purposes of the Internal Revenue Code, including sections 904(d), 907, and 954.

(1) *Timing of character and source determination.* The character and source of section 987 gain or loss is determined

based on the initial assignment pursuant to paragraph (b)(2)(i) of this section and may be reassigned in the year in which the section 987 gain or loss is recognized pursuant to paragraph (b)(2)(ii) of this section. The initial assignment is made in the earliest of the taxable years described in paragraphs (b)(1)(i) through (iv) of this section.

(i) The taxable year in which net unrecognized section 987 gain or loss is recognized.

(ii) The taxable year in which net unrecognized section 987 loss or pretransition loss becomes suspended section 987 loss.

(iii) The taxable year in which net unrecognized section 987 gain or loss becomes deferred section 987 gain or loss.

(iv) In the case of pretransition gain or loss that is recognized ratably over the transition period pursuant to the election under § 1.987–10(e)(5)(ii), the taxable year that includes the transition date.

(2) *Method for determining the character and source of section 987 gain or loss*—(i) *Initial assignment*—(A) *In general*. In the taxable year of the initial assignment, determined under paragraph (b)(1) of this section, the owner assigns gross section 987 gain or loss to the statutory and residual groupings in the same proportions as the proportions in which the tax book value of the assets of the section 987 QBU are assigned to the groupings under the asset method in §§ 1.861–9(g) and 1.861–9T(g), as modified by this paragraph (b)(2)(i). For purposes of applying the asset method, the owner takes into account only the assets that are attributable to the section 987 QBU under § 1.987–2(b). See § 1.987–11(e) and (f) (grouping of section 987 gain and loss and applying the loss-to-the-extent-of-gain rule on basis of the initial assignment of section 987 gain and loss under this paragraph (b)(2)(i)).

(B) *Special rules for applying the asset method to assign section 987 gain or loss*. For purposes of assigning gross section 987 gain or loss to the statutory and residual groupings under paragraph (b)(2)(i)(A) of this section, the proportions in which the tax book value of the assets of the section 987 QBU are assigned to the groupings described in paragraph (b)(2)(i)(A) of this section are determined without regard to section 987 gain or loss. Further, the section 987 gain or loss is assigned after any reattribution of gross income required under § 1.904–4(f)(2)(vi) or § 1.951A–2(c)(7)(ii)(B)(2) (or the principles thereof, as applicable), but before the allocation and apportionment of expenses or the application of

provisions that are based on a net income computation, such as the high-tax exception to passive category income in § 1.904–4(c), the high-tax exception to foreign base company income in § 1.954–1(d), and the high-tax exclusion from tested income in § 1.951A–2(c)(7).

(C) *Election to treat section 987 gain or loss that is assigned to subpart F income groups relating to foreign personal holding company income as attributable to section 988 transactions*—(1) *In general*. If an election is made under this paragraph (b)(2)(i)(C)(1), section 987 gain or loss assigned under paragraphs (b)(2)(i)(A) and (B) of this section to any grouping of passive foreign personal holding company income, as described in § 1.960–1(d)(2)(ii)(B)(2)(i), is treated as foreign currency gain of the owner

attributable to section 988 transactions not directly related to the business needs of the controlled foreign corporation, or as loss allocated and apportioned to such foreign currency gain. See § 1.987–1(g) for rules that apply to section 987 elections.

(2) *Coordination with § 1.954–2(g)*. The rules of § 1.954–2(g)(2), (3) and (4) apply without regard to any section 987 gain treated as gain from section 988 transactions, or loss allocated and apportioned to such gain, by reason of an election under paragraph (b)(2)(i)(C)(1) of this section.

(D) *Section 987 gain or loss assigned to tentative tested income rather than tested income*—(1) *In general*. In the case of a controlled foreign corporation, section 987 gain or loss is initially assigned to tentative tested income within a section 904 category (a *tentative tested income group*) under paragraphs (b)(2)(i)(A) and (B) of this section as though the election described in § 1.951A–2(c)(7)(viii) is in effect for the taxable year. As a result, section 987 gain or loss that would have initially been characterized as tested income if no election under § 1.951A–2(c)(7)(viii) was in effect is initially characterized as tentative tested income.

(2) *For purposes of the GILTI high-tax exclusion, section 987 gain or loss is not attributable to any tested unit*. In the case of a controlled foreign corporation, the initial assignment of section 987 gain or loss is made as though the section 987 gain or loss was not attributable to any tested unit for purposes of applying § 1.951A–2(c)(7) (GILTI high-tax exclusion). See paragraph (b)(2)(iii) of this section (applying the GILTI high-tax exclusion by treating all section 987 gain or loss in the same tentative tested income

group as composing a single tentative tested income item).

(ii) *Reassignment of section 987 gain or loss*. In the taxable year in which section 987 gain or loss is recognized (determined by taking into account §§ 1.987–5, 1.987–11(e), 1.987–12(c), and 1.987–13(b) through (d), if applicable), the section 987 gain or loss is sourced and characterized based on the initial assignment in paragraph (b)(2)(i) of this section, but with appropriate changes to account for the application of provisions that apply to the section 987 gain or loss based on a net income computation such as the high-tax exception to passive category income in § 1.904–4(c), the high-tax exception to foreign base company income in § 1.954–1(d), and the high-tax exclusion to tested income in § 1.951A–2(c)(7). Thus, for example, if an election under § 1.951A–2(c)(7)(viii) is in effect for the taxable year, section 987 gain or loss initially assigned to a tentative tested income group will be reassigned to a tested income group (as defined in § 1.960–1(d)(2)(ii)(C)) or to the residual income group (as defined in § 1.960–1(d)(2)(ii)(D)), as applicable, depending on whether the item of income (as described in paragraph (b)(2)(iii) of this section) is subject to a high rate of tax (as determined under § 1.951A–2(c)(7)(vi)). If no election is made under § 1.951A–2(c)(7)(viii) for a taxable year, all of the section 987 gain or loss that is recognized in the taxable year that was initially assigned to tentative tested income under paragraph (b)(2)(i) of this section, is reassigned to the appropriate tested income group (as defined in § 1.960–1(d)(2)(ii)(C)).

(iii) *Special rule for the application of the GILTI high-tax exclusion to section 987 gain or loss*. Section 987 gain in a tentative tested income group that is recognized by a controlled foreign corporation in a taxable year comprises a single tentative gross tested income item (as if it were allocable to its own tested unit) within the meaning of § 1.951A–2(c)(7)(ii), and section 987 loss in a tentative tested income group that is recognized by a controlled foreign corporation in the taxable year is allocated and apportioned to the corresponding tentative gross tested income item for purposes of calculating the tentative tested income item within the meaning of § 1.951A–2(c)(7)(iii). Thus, for purposes of applying the high-tax exclusion in § 1.951A–2(c)(7), all of the section 987 gain and loss in a tentative tested income group that is recognized by the controlled foreign corporation in a taxable year is a single tentative tested income item.

(3) *Allocation and apportionment of foreign income tax to section 987 items under section 861.* For purposes of applying the definition of a corresponding U.S. item in § 1.861–20(b), an item of foreign gross income and an item of section 987 gain or loss are treated as arising from the same transaction or other realization event only if the requirements in both paragraphs (b)(3)(i) and (ii) of this section are satisfied.

(i) *The foreign gross income is an item of foreign currency gain or loss.* The owner of the section 987 QBU, original deferral QBU owner, or original suspended loss QBU owner includes the foreign gross income under the laws of the foreign country in which it is a tax resident because under that foreign law it is required to recognize foreign currency gain or loss with respect to its interest in the section 987 QBU or with respect to a successor deferral QBU or successor suspended loss QBU.

(ii) *The same event or events give rise to both the foreign gross income and the section 987 gain or loss.* The remittance under § 1.987–5(c) that gave rise to the item of section 987 gain or loss comprises one or more of the events that gave rise to the item of foreign gross income described in paragraph (b)(3)(i) of this section.

(c) *Examples.* The following examples illustrate the application of this section. For purposes of the examples, except as otherwise indicated, assume that no section 987 elections are in effect.

(1) *Example 1: Initial assignment and reassignment of section 987 gain or loss—(i) Facts.* CFC is a controlled foreign corporation with the Swiss franc (Sf) as its functional currency. CFC is the owner of Business A, a section 987 QBU that has the euro as its functional currency. For year 1, CFC does not have an election described in § 1.951A–2(c)(7)(viii) in effect but is subject to an election under paragraph (b)(2)(i)(C) of this section. CFC recognizes section 987 gain of Sf10,000 under § 1.987–5. Business A has average total assets of Sf1,000,000 in year 1, which generate income (other than section 987 gain) as follows: Sf750,000 of assets that produce gross income in the statutory grouping for foreign source general category tested income under sections 904(d)(1)(A) and 951A; and Sf250,000 of assets that produce foreign source passive gross income in one of the groupings described in §§ 1.960–1(d)(2)(ii)(B)(2)(i) and 1.954–1(c)(1)(iii)(B) (subpart F income groups relating to passive foreign personal holding company income).

(ii) *Analysis.* Under paragraphs (b)(2)(i)(A), (B), and (D) of this section,

Sf7,500 (Sf750,000/Sf1,000,000 × Sf10,000) of the section 987 gain is initially assigned to the statutory grouping of foreign source general category tentative tested income. Because an election under § 1.951A–2(c)(7)(viii) is not in effect for the taxable year in which the section 987 gain is recognized, the section 987 gain is reassigned under paragraph (b)(2)(ii) of this section to foreign source general category tested income. The remaining Sf2,500 (Sf250,000/Sf1,000,000 × Sf10,000) is characterized under paragraphs (b)(2)(i)(A) and (B) of this section by reference to assets that give rise to foreign source passive gross income in one of the groupings described in § 1.960–1(d)(2)(ii)(B)(2)(i) (subpart F income groups relating to passive foreign personal holding company income) and is therefore generally treated under the election in paragraph (b)(2)(i)(C) of this section as foreign source foreign currency gain of CFC attributable to section 988 transactions not directly related to the business needs of the controlled foreign corporation. All of the section 987 gain is treated as ordinary income under paragraph (a) of this section.

(2) *Example 2: Effect of GILTI high-tax exclusion—(i) Facts.* The facts are the same as in paragraph (c)(1) of this section (*Example 1*) except that CFC does have an election described in § 1.951A–2(c)(7)(viii) in effect. Without regard to the section 987 gain or loss, CFC has two tentative gross tested income items: Sf100,000 of gross tentative tested income attributable to a CFC tested unit (the CFC item) and Sf5,000,000 of gross tentative tested income attributable to a Business A tested unit (the Business A item). CFC accrues Sf1,010,000 of current year taxes and has no other current year deductions. CFC is not required by its country of tax residence to include in foreign gross income foreign currency gain or loss with respect to its interest in a foreign QBU. For purposes of § 1.951A–2(c)(7)(iii)(A), Sf1,000,000 of current year tax is allocated and apportioned to the Business A item and Sf10,000 is allocated and apportioned to the CFC item. At all relevant times Sf1 = \$1.

(ii) *Analysis.* As in paragraph (c)(1)(ii) of this section (*Example 1*), Sf7,500 of section 987 gain is initially assigned to the statutory grouping of foreign source general category tentative tested income. Under paragraph (b)(2)(iii) of this section, the section 987 gain comprises a single tentative gross tested income item of the CFC (the section 987 item). Therefore, the CFC has three tentative gross tested income items: the section

987 item, the CFC item, and the Business A item. No tax is allocated and apportioned to the section 987 item. See paragraph (b)(3) of this section. Applying § 1.951A–2(c)(7)(vi), the effective tax rate of the section 987 item is 0% (\$0/\$7,500), the effective tax rate of the CFC item is 10% (\$10,000/\$100,000), and the effective tax rate of the Business A item is 20% (\$1,000,000/\$5,000,000). An election under § 1.951A–2(c)(7)(viii) is in effect; therefore, the section 987 gain is reassigned based on the application of § 1.951A–2(c)(7). Because the section 987 item was not subject to an effective tax rate of greater than 90 percent of the maximum rate of tax specified in section 11, it is reassigned under paragraph (b)(2) of this section to foreign source general category tested income. The remaining Sf2,500 of section 987 gain is foreign source foreign currency gain of CFC attributable to section 988 transactions not directly related to the business needs of the controlled foreign corporation for the reasons stated in paragraph (c)(1)(ii) of this section (*Example 1*).

(3) *Example 3: Section 987 gain or loss treated as attributable to section 988 transactions—(i) Facts.* The facts are the same as in paragraph (c)(1) of this section (*Example 1*) except that CFC recognizes section 987 loss of Sf40,000, Sf5,000 of which is characterized under paragraphs (b)(2)(i)(A) and (B) of this section by reference to assets that give rise to foreign source passive gross income in a separate subpart F income group for non-related party interest income of Business A and Sf5,000 of which is characterized by reference to assets that give rise to foreign source passive gross income in a separate subpart F income group for gains from certain property transactions of Business A not derived from the active conduct of a trade or business. CFC otherwise has Sf12,000 of net foreign currency gain determined under § 1.954–2(g) that is taken into account in determining the excess of foreign currency gain over foreign currency losses characterized as foreign personal holding company income under section 954(c)(1)(D).

(ii) *Analysis.* Under paragraph (b)(2)(i)(C) of this section, the Sf10,000 total section 987 loss characterized by reference to assets that give rise to foreign source passive gross income in one of the groupings described in §§ 1.960–1(d)(2)(ii)(B)(2)(i) and 1.954–1(c)(1)(iii)(B) (subpart F income groups relating to passive foreign personal holding company income) is treated as foreign source foreign currency loss of

CFC attributable to section 988 transactions. Accordingly, CFC will aggregate the \$10,000 section 987 loss with the \$12,000 net foreign currency gain and will have \$2,000 of net foreign currency gain characterized as passive foreign personal holding company income under section 954(c)(1)(D).

(4) *Example 4: Section 987 gain or loss assigned to passive foreign personal holding company income*—(i) *Facts*. The facts are the same as in paragraph (c)(3) of this section (*Example 3*) except that CFC is not subject to an election under paragraph (b)(2)(i)(C) of this section.

(ii) *Analysis*. As the CFC is not subject to an election under paragraph (b)(2)(i)(C) of this section, \$5,000 of section 987 loss is initially assigned to the statutory grouping for foreign source passive gross income in a separate subpart F income group for non-related party interest income of Business A, and \$5,000 is initially assigned to the statutory grouping for foreign source passive gross income in a separate subpart F income group for gains from certain property transactions of Business A not derived from the active conduct of a trade or business. The \$12,000 net foreign currency gain is foreign source passive gross income in a separate subpart F income group for foreign currency gain of CFC attributable to section 988 transactions of CFC. As a result, if the net income in a subpart F income group to which either section 987 loss is assigned is less than zero, that loss will not reduce any other category of subpart F income, including CFC's foreign currency gain from section 988 transactions, except by reason of the earnings and profit limitation in section 952(c)(1). See § 1.954-1(c)(1)(ii).

§ 1.987-7 Application of the section 987 regulations to partnerships and S corporations.

(a) *Overview*. This section provides rules relating to the application of the section 987 regulations to partnerships and S corporations. Paragraph (b) of this section provides the general rule that the section 987 regulations do not apply to partnerships. Paragraph (c) of this section identifies certain provisions of the section 987 regulations that are applicable to partnerships, subject to certain modifications. Paragraph (d) of this section provides special rules relating to suspended section 987 loss. Paragraph (e) of this section provides rules for adjusting a partner's basis in its partnership interest. Paragraph (f) of this section provides that S corporations are treated in the same manner as partnerships for purposes of the section

987 regulations. Paragraph (g) of this section provides examples that illustrate the rules of this section.

(b) *Section 987 regulations generally do not apply to partnerships*. Except as otherwise provided in this section, the section 987 regulations do not apply to a partnership, and the section 987 regulations do not apply to an eligible QBU if a partnership is the owner for Federal income tax purposes of the eligible QBU's assets and liabilities. However, a taxpayer must apply sections 987 and 989(a) to partnerships and eligible QBUs of partnerships in a reasonable manner using a method that is applied consistently from year to year with respect to a particular partnership or eligible QBU. In addition, all members of the same controlled group must apply the same method consistently with respect to a particular partnership or eligible QBU.

(c) *Provisions of the section 987 regulations that apply to partnerships*—(1) *In general*—(i) *Eligible QBU*. The rules described in paragraph (c)(2) of this section apply to an eligible QBU if a partnership is the owner for Federal income tax purposes of the eligible QBU's assets and liabilities and either—

(A) The partnership (or a partner) treats the eligible QBU as a qualified business unit of the partnership that is subject to section 987 (for example, under an entity approach); or

(B) A partner in the partnership treats all or a portion of the eligible QBU as a qualified business unit of the partner that is subject to section 987 (for example, under an aggregate approach).

(ii) *Partnership*. The rules described in paragraph (c)(2) of this section apply to a partnership if a partner in the partnership treats the partnership itself (or an interest in the partnership) as a qualified business unit that is subject to section 987 (for example, under an entity approach).

(2) *Applicable provisions*—(i) *In general*. Sections 1.987-6 (character and source of section 987 gain or loss), 1.987-9(d) (information on a dedicated section 987 form), §§ 1.987-11 through 1.987-13 (suspended section 987 loss, deferral of section 987 gain or loss, and suspended section 987 loss upon terminations, respectively), and § 1.987-15 (applicability dates) apply to a QBU described in paragraph (c)(1) of this section, subject to the modifications described in this paragraph (c) and in paragraph (d) of this section.

(ii) *Annual recognition election*. An annual recognition election under § 1.987-5(b)(2) applies to a QBU described in paragraph (c)(1) of this section, subject to the modifications described in this paragraph (c). In each

taxable year of the owner of a QBU described in paragraph (c)(1) of this section in which an annual recognition election is in effect, the owner recognizes any unrecognized gain or loss with respect to the QBU under section 987(3) (other than suspended section 987 loss) as though the QBU terminated on the last day of the taxable year. Appropriate adjustments must be made to prevent the gain or loss from being taken into account again after it is recognized under this paragraph (c)(2)(ii) (for example, in the case of a taxpayer applying the 1991 proposed regulations, by adjusting the equity and basis pools to reflect the gain or loss recognized). The rules of § 1.987-1(g) apply with respect to an annual recognition election that is made by or for an owner of a QBU described in paragraph (c)(1) of this section.

(iii) *Section 988 mark-to-market election*. A section 988 mark-to-market election under § 1.987-3(b)(4)(ii) applies to a QBU described in paragraph (c)(1) of this section. The rules of § 1.987-1(g) apply with respect to a section 988 mark-to-market election that is made by or for an owner of a QBU described in paragraph (c)(1) of this section.

(3) *Modifications to applicable provisions*—(i) *In general*. An owner of a QBU described in paragraph (c)(1) of this section must adapt the rules described in paragraph (c)(2) of this section as necessary to recognize section 987 gain or loss in a manner that is consistent with the principles of those rules. For purposes of applying this section and the rules described in paragraph (c)(2) of this section to a QBU described in paragraph (c)(1) of this section, the definitions provided in the section 987 regulations apply with appropriate modifications. For example, in the case of a QBU described in paragraph (c)(1) of this section, the term section 987 gain or loss means gain or loss recognized under section 987(3), the term owner means the person that recognizes gain or loss under section 987(3), and the term section 987 QBU means any qualified business unit subject to section 987 (including a QBU described in paragraph (c)(1) of this section). In addition, references to other rules of the section 987 regulations must be adapted as necessary to apply section 987 in a manner that is consistent with the principles of this section and the rules described in paragraphs (c)(2) of this section. For example, references to the recognition of section 987 gain or loss under § 1.987-5 encompass any recognition of gain or loss under section 987(3).

(ii) *Controlled group*. For purposes of applying §§ 1.987-12 and 1.987-13, if a

partner in a partnership is treated as the owner of an eligible QBU described in paragraph (c)(1)(i) of this section (for example, under an aggregate approach) before the QBU terminates, each member of the partnership's controlled group is treated as a member of the partner's controlled group at any time that the partner (or any member of the partner's controlled group, determined without regard to this paragraph (c)(3)(ii)) continues to be a direct or indirect partner in the partnership. This paragraph (c)(3)(ii) does not apply for purposes of the de minimis rule in § 1.987-11(c)(2).

(4) *Terminating QBUs.* In the case of a terminating QBU described in paragraph (c)(1) of this section, the rules of this section and the rules described in paragraph (c)(2) of this section apply immediately before the termination, but § 1.987-10 does not apply because § 1.987-10 is not applicable to a QBU described in paragraph (c)(1) of this section.

(d) *Suspended section 987 loss—(1) In general—(i) Rules of § 1.987-11(c) and (d)(2) do not apply.* The rules of § 1.987-11(c) and (d)(2) do not apply to a QBU described in paragraph (c)(1) of this section.

(ii) *Suspension of section 987 loss.* Except as provided in paragraph (d)(2) of this section, any loss that would otherwise be recognized under section 987(3) (after applying § 1.987-12) with respect to a QBU described in paragraph (d)(1)(ii)(A) or (B) of this section is not recognized and becomes suspended section 987 loss.

(A) *Eligible QBU.* This paragraph (d)(1)(ii) applies to an eligible QBU described in paragraph (c)(1)(i) of this section.

(B) *Partnership.* This paragraph (d)(1)(ii) applies to a partnership (or a partnership interest) described in paragraph (c)(1)(ii) of this section if at least 95 percent of the interests in partnership capital and profits are owned, directly or indirectly, by persons related to each other within the meaning of section 267(b) or section 707(b). For this purpose, ownership of an interest in partnership capital or profits is determined in accordance with the rules for constructive ownership provided in section 267(c), other than section 267(c)(3).

(2) *Exceptions—(i) Method under which historic items do not give rise to section 987 gain or loss.* Paragraph (d)(1)(ii) of this section does not apply to an eligible QBU described in paragraph (d)(1)(ii)(A) of this section if section 987 is consistently applied to the QBU using a method under which historic items of the QBU do not give

rise to section 987 gain or loss (for example, a method that follows the principles of §§ 1.987-3 through 1.987-5).

(ii) *Annual recognition election.* Paragraph (d)(1)(ii) of this section does not apply in a taxable year in which an annual recognition election is in effect.

(iii) *De minimis rule.* Paragraph (d)(1)(ii) of this section does not apply in a taxable year described in § 1.987-11(c)(2).

(3) *Recognition of suspended section 987 loss—(i) In general.* Except as provided in paragraph (d)(3)(ii) of this section, suspended section 987 loss with respect to a QBU described in paragraph (d)(1)(ii)(A) or (B) of this section is recognized under the rules of §§ 1.987-11(e) and 1.987-13.

(ii) *Partnership that is not engaged in a trade or business.* In the case of a partnership described in paragraph (d)(1)(ii)(B) of this section that is not engaged in a trade or business, suspended section 987 loss cannot be recognized under § 1.987-13(b) through (d) (and thus can only be recognized under § 1.987-11(e)).

(iii) *Application of the loss-to-the-extent-of-gain rule.* If a partner in a partnership is the owner of a section 987 QBU described in paragraph (c)(1) of this section and also owns one or more section 987 QBUs that are not described in paragraph (c)(1) of this section, the loss-to-the-extent-of-gain rule of § 1.987-11(e) is applied by taking into account all of the owner's section 987 gain and suspended section 987 loss in each recognition grouping with respect to all of its section 987 QBUs (whether or not they are described in paragraph (c)(1) of this section).

(e) *Adjustments to the basis of a partner's interest in the partnership.* When, and to the extent that, a partner recognizes section 987 gain or loss, defers section 987 gain or loss, or suspends section 987 loss at the partner level with respect to a partnership described in paragraph (c)(1)(ii) of this section or an eligible QBU of the partnership described in paragraph (c)(1)(i) of this section, the principles of sections 704(d) and 705 apply as though the item of income or loss was part of the partner's distributive share of partnership items. Thus, proper adjustments must be made to the partner's adjusted basis in the partnership under the principles of section 705, taking into account the principles of section 704(d).

(f) *S corporations treated as partnerships.* For purposes of the section 987 regulations, S corporations are treated in the same manner as partnerships and shareholders of S

corporations are treated in the same manner as partners of partnerships.

(g) *Examples.* The following examples illustrate the principles of this section. For purposes of these examples, DC1 and DC2 are domestic corporations, and P is a foreign partnership. P is also the owner for Federal income tax purposes of the assets and liabilities of Business A, an eligible QBU that has the pound as its functional currency. DC1 and DC2 each own 50% of the capital and profits interests in P. If P is treated as a qualified business unit under section 989(a), P would have the euro as its functional currency due to activities unrelated to Business A.

(1) *Example 1: Aggregate approach to section 987—(i) Facts.* DC1 and DC2 each apply section 987 using an aggregate approach, under which each partner's indirect interest in Business A is treated as a section 987 QBU of the partner. DC1 and DC2 each use the earnings and capital method described in the 1991 proposed regulations to apply section 987 with respect to Business A. Neither DC1 nor DC2 has made an annual recognition election. Under the earnings and capital method, but for the application of paragraph (d)(1)(ii) of this section, DC1 and DC2 each would recognize section 987 loss of \$10 million in year 1 with respect to Business A.

(ii) *Analysis—(A) Application of loss suspension rule to Business A.* Business A is an eligible QBU described in paragraph (c)(1)(i) of this section because a partnership (P) is the owner of Business A's assets and liabilities for federal income tax purposes and P's partners treat Business A as a section 987 QBU. Therefore, under paragraph (d)(1)(ii) of this section, the section 987 loss of DC1 and DC2 that would otherwise be recognized in year 1 becomes suspended section 987 loss, which DC1 and DC2 may recognize in year 1 or in future taxable years under §§ 1.987-11(e) and 1.987-13(b) through (d).

(B) *Annual recognition election.* If DC1 and DC2 were subject to an annual recognition election in year 1, they would recognize section 987 gain or loss with respect to Business A as though Business A terminated at the end of year 1, and the loss suspension rule of paragraph (d)(1)(ii) of this section would not apply.

(C) *FEET method.* If DC1 and DC2 applied section 987 to Business A under the principles of §§ 1.987-3 through 1.987-5, such that historic items of Business A did not give rise to section 987 gain or loss, the loss suspension rule of paragraph (d)(1)(ii) of this section would not apply.

(2) *Example 2: Entity approach to section 987*—(i) *Facts*. P applies section 987 to Business A using an entity approach, under which Business A is treated as a section 987 QBU of P. P is treated as a qualified business unit under section 989(a) and uses the euro as its functional currency. P uses the earnings and capital method described in the 1991 proposed regulations to apply section 987 with respect to Business A. Under the earnings and capital method, but for the application of paragraph (d)(1)(ii) of this section, P would recognize section 987 loss of \$10 million in year 1 with respect to Business A. In addition, DC1 and DC2 apply section 987 to P using an entity approach, treating each partner's interest in P as a section 987 QBU. DC1 and DC2 each use the earnings and capital method described in the 1991 proposed regulations to apply section 987 with respect to P. Under the earnings and capital method, but for the application of paragraph (d)(1)(ii) of this section, DC1 and DC2 each would recognize section 987 loss of \$10 million in year 1 with respect to P. Neither DC1 nor DC2 has made an annual recognition election.

(ii) *Analysis*—(A) *Business A treated as a QBU subject to section 987*. Business A is an eligible QBU described in paragraph (c)(1)(i) of this section because a partnership (P) is the owner of Business A's assets and liabilities for Federal income tax purposes, and P treats Business A as a QBU subject to section 987. Therefore, the loss suspension rule in paragraph (d)(1)(ii) of this section applies to suspend P's recognition of section 987 loss with respect to Business A.

(B) *Treatment of P as a section 987 QBU*. P is a partnership described in paragraph (c)(1)(ii) of this section because DC1 and DC2 each treat their interest in P as a section 987 QBU. Under paragraph (d)(1)(ii)(B) of this section, if DC1 and DC2 are related within the meaning of section 267(b) or section 707(b), the loss suspension rule in paragraph (d)(1)(ii) of this section applies to suspend DC1's and DC2's recognition of section 987 loss with respect to their interest in P. However, if DC1 and DC2 are unrelated, the loss suspension rule in paragraph (d)(1)(ii) of this section does not apply.

§ 1.987–8 Termination of a section 987 QBU.

(a) *Scope*. This section provides rules regarding the termination of a section 987 QBU. Paragraph (b) of this section provides general rules for determining when a termination occurs. Paragraph (c) of this section provides exceptions to

the general termination rules for certain transactions described in section 381(a). Paragraph (d) of this section is reserved. Paragraph (e) of this section describes certain effects of terminations. Paragraph (f) of this section contains examples that illustrate the principles of this section.

(b) *In general*. Except as provided in paragraph (c) of this section, a section 987 QBU terminates if the conditions described in any one of paragraphs (b)(1) through (6) of this section are satisfied.

(1) *Trade or business ceases*. A section 987 QBU ceases its trade or business. When a section 987 QBU ceases its trade or business is determined based on all the facts and circumstances, provided that an owner may continue to treat a section 987 QBU as a section 987 QBU for a reasonable period during the winding up of such trade or business, which period may in no event exceed two years from the date on which such QBU ceases its activities carried on for profit. See paragraph (f)(1) of this section (*Example 1*).

(2) *Substantially all assets transferred*. The section 987 QBU transfers substantially all (within the meaning of section 368(a)(1)(C)) of its assets to its owner. For purposes of this paragraph (b)(2), the amount of assets transferred from the section 987 QBU to its owner as a result of a transaction is reduced by the amount of assets transferred from the owner to the section 987 QBU pursuant to the same transaction. See paragraphs (f)(2), (6), and (7) of this section (*Examples 2, 6, and 7*).

(3) *Owner no longer a CFC*. A foreign corporation that is a controlled foreign corporation that is the owner of a section 987 QBU ceases to be a controlled foreign corporation as a result of a transaction or series of transactions after which persons that were related to the corporation within the meaning of section 267(b) immediately before the transaction or series of transactions collectively own sufficient interests in the corporation such that the corporation would continue to be considered a controlled foreign corporation if such persons were United States shareholders within the meaning of section 951(b). See paragraph (f)(3) of this section (*Example 3*).

(4) *Owner ceases to exist*. The owner of the section 987 QBU ceases to exist (including in connection with a transaction described in section 381(a)). See paragraph (f)(4) of this section (*Example 4*).

(5) *Section 987 QBU ceases to be an eligible QBU with a functional currency different from its owner*. The section 987

QBU ceases to be an eligible QBU that has a functional currency different from its owner. See § 1.985–5(d)(2) and (e)(4)(iii) (providing that a termination resulting from a change in functional currency occurs on the last day of the last taxable year ending before the year of change).

(6) *Change in form of ownership*. An individual or corporation that was the direct owner of a section 987 QBU ceases to be the direct owner of the section 987 QBU (for example, because the assets of the section 987 QBU are transferred to a partnership).

(c) *Transactions described in section 381(a)*—(1) *Liquidations*.

Notwithstanding paragraph (b) of this section, a termination does not occur when the owner (*distributor*) of a section 987 QBU ceases to exist in a liquidation described in section 332 pursuant to which it transfers the section 987 QBU to another corporation (*distributee*), except in the following cases:

(i) The distributor is a domestic corporation and the distributee is a foreign corporation.

(ii) The distributor is a foreign corporation and the distributee is a domestic corporation.

(iii) The distributor and the distributee are both foreign corporations and the functional currency of the distributee is the same as the functional currency of the distributor's section 987 QBU.

(2) *Reorganizations*. Notwithstanding paragraph (b) of this section, a termination does not occur when the owner (*transferor*) of the section 987 QBU ceases to exist in a reorganization described in section 381(a)(2) pursuant to which it transfers the section 987 QBU to another corporation (*acquiring corporation*), except in the following cases:

(i) The transferor is a domestic corporation and the acquiring corporation is a foreign corporation.

(ii) The transferor is a foreign corporation and the acquiring corporation is a domestic corporation.

(iii) The transferor is a controlled foreign corporation immediately before the transfer, the acquiring corporation is a foreign corporation that is not a controlled foreign corporation immediately after the transfer, and the acquiring corporation was related to the transferor within the meaning of section 267(b) immediately before the transfer.

(iv) The transferor and the acquiring corporation are foreign corporations and the functional currency of the acquiring corporation is the same as the functional currency of the transferor's section 987 QBU.

(d) [Reserved]

(e) *Effect of terminations.* A termination of a section 987 QBU as determined in this section is treated as a remittance of all the gross assets of the section 987 QBU to its owner immediately before the section 987 QBU terminates. Thus, except as otherwise provided in the section 987 regulations, a termination generally results in the recognition of any net unrecognized section 987 gain or loss of the section 987 QBU (unless it is treated as deferred section 987 gain or loss or suspended section 987 loss). See § 1.987–5(c)(3) (generally recognizing section 987 gain or loss on a termination) and §§ 1.987–11 through 1.987–13 (suspending section 987 gain or loss and deferring section 987 loss in certain instances).

(f) *Examples.* The following examples illustrate the principles of this section. Except as otherwise provided, U.S. Corp is a domestic corporation that has the U.S. dollar as its functional currency, and Business A is a section 987 QBU.

(1) *Example 1: Cessation of operations*—(i) *Facts.* U.S. Corp is the owner of Business A, a sales office of U.S. Corp in Country X. Business A ceases sales activities on December 31, year 1. During year 2, Business A sells all of the assets used in its sales activities and winds up its business, settling outstanding accounts.

(ii) *Analysis.* Business A's trade or business ceases on December 31, year 1. The cessation of Business A's trade or business causes a termination of the Business A section 987 QBU under paragraph (b)(1) of this section on December 31, year 1, unless U.S. Corp chooses to continue to treat Business A as a section 987 QBU until completion of the wind-up activities in year 2. If U.S. Corp chooses to continue to treat Business A as a section 987 QBU during the wind-up of Business A, the Business A section 987 QBU would terminate under paragraph (b)(1) of this section upon completion of the wind-up in year 2.

(2) *Example 2: Transfer of a section 987 QBU to a member of a consolidated group*—(i) *Facts.* U.S. Corp, the owner of Business A, transfers all the assets and liabilities of Business A to DS, a domestic corporation all of the stock of which is owned by U.S. Corp, in a transaction qualifying under section 351. U.S. Corp and DS are members of the same consolidated group.

(ii) *Analysis.* Pursuant to § 1.987–2(c)(2)(i) and (ii), as a result of the deemed exchange of the assets and liabilities of Business A for DS stock in a section 351 transaction, Business A is treated as transferring its assets and liabilities to U.S. Corp immediately

before the transfer by U.S. Corp of the assets and liabilities to DS. Because a section 351 transaction is not a transaction described in section 381(a)(2), the transfer of all of the assets of Business A to U.S. Corp causes a termination of the Business A section 987 QBU under paragraph (b)(2) of this section.

(3) *Example 3: Cessation of controlled foreign corporation status*—(i) *Facts.* Foreign parent (FP) is a foreign corporation that owns all the stock of U.S. Corp, a domestic corporation. U.S. Corp owns all of the stock of FC, a controlled foreign corporation as defined in section 957. FC is the owner of Business A. U.S. Corp liquidates into FP. FC no longer constitutes a controlled foreign corporation after the liquidation.

(ii) *Analysis.* Because FC ceases to qualify as a controlled foreign corporation as a result of a transaction after which persons that were related to FC within the meaning of section 267(b) immediately before the transaction collectively own sufficient interests in FC such that FC would continue to be considered a controlled foreign corporation if such persons were United States shareholders within the meaning of section 951(b), the Business A section 987 QBU terminates pursuant to paragraph (b)(3) of this section.

(4) *Example 4: Section 332 liquidation*—(i) *Facts.* U.S. Corp owns all of the stock of FC, a foreign corporation. FC is the owner of Business A. Pursuant to a liquidation described in section 332, FC distributes all of its assets and liabilities to U.S. Corp.

(ii) *Analysis.* FC's liquidation causes a termination of the Business A section 987 QBU as provided in paragraph (b)(4) of this section because FC ceases to exist as a result of the liquidation. The exception for certain section 332 liquidations provided under paragraph (c)(1) of this section does not apply because U.S. Corp is a domestic corporation and FC is a foreign corporation. See paragraph (c)(1)(ii) of this section.

(5) [Reserved]

(6) *Example 6: Deemed transfers to a CFC upon a check-the-box election*—(i) *Facts.* In year 1, U.S. Corp forms an entity in a foreign country, Entity A. Entity A owns Business A, which has the pound as its functional currency. Entity A forms Entity B in another foreign country. Entity B owns Business B, a section 987 QBU that has the euro as its functional currency. At the time of formation, Entity A and Entity B elect to be DEs. In year 6, Entity A files an election on Form 8832 to be classified as a corporation under § 301.7701–

3(g)(1)(iv) of this chapter and becomes a CFC (FC) owned directly by U.S. Corp. FC has the pound as its functional currency.

(ii) *Analysis*—(A) Under § 1.987–1(b)(5), U.S. Corp is the owner of Business A and Business B. In year 6, when Entity A elects to be classified as a corporation, U.S. Corp is deemed to contribute the assets and liabilities of Business A and Business B to FC under section 351 in exchange for FC stock. Pursuant to § 1.987–2(c)(2)(i) and (ii), as a result of the deemed exchange of the assets and liabilities of Business A and Business B for FC stock in a section 351 transaction, Business A and Business B are each treated as transferring their assets and liabilities to U.S. Corp immediately before U.S. Corp's transfer of such assets and liabilities to FC. The transfer of assets from Business A and Business B to U.S. Corp causes terminations of those section 987 QBUs under paragraph (b)(2) of this section. The assets and liabilities of Business A and Business B are now owned by FC, but because FC and Business A have the same functional currency, only Business B qualifies as a section 987 QBU to which section 987 applies.

(B) Terminations also would have occurred in year 6 if U.S. Corp had contributed Entity A and Entity B to an existing foreign corporation owned by U.S. Corp or to a newly created foreign corporation owned by U.S. Corp pursuant to a section 351 exchange because the transfer of all of the assets of Business A and Business B would cause terminations of those section 987 QBUs under paragraph (b)(2) of this section.

(7) *Example 7: Sale of a section 987 QBU to a member of a consolidated group*—(i) *Facts.* U.S. Corp, the owner of Business A, sells all of the assets and liabilities of Business A to DS, a domestic corporation, in exchange for cash. U.S. Corp and DS are members of the same consolidated group. The cash received on the sale is recorded on the books of U.S. Corp.

(ii) *Analysis.* Pursuant to § 1.987–2(c)(2)(i) and (ii), Business A is treated as transferring all of its assets and liabilities to U.S. Corp immediately before the sale by U.S. Corp to DS. As a result of this deemed transfer from Business A to U.S. Corp, the Business A section 987 QBU terminates under paragraph (b)(2) of this section.

§ 1.987–9 Recordkeeping requirements.

(a) *In general.* An owner (or the authorized person on behalf of an owner) must keep a copy of the statement described in § 1.987–1(g)(3)(i) for each section 987 election made by or

on behalf of the owner (if not required to be made on a form published by the Commissioner) and reasonable records sufficient to establish section 987 taxable income or loss and section 987 gain or loss with respect to each section 987 QBU, successor deferral QBU, and successor suspended loss QBU, as applicable, for each taxable year.

(b) *Supplemental information.* A person's obligation to maintain records under section 6001 and paragraph (a) of this section is not satisfied unless the following information is maintained in those records with respect to each section 987 QBU, successor deferral QBU, and successor suspended loss QBU for each taxable year:

(1) The amount of the items of income, gain, deduction, or loss attributed to the section 987 QBU in the functional currency of the section 987 QBU and its owner.

(2) The adjusted balance sheet of the section 987 QBU in the functional currency of the section 987 QBU and its owner. If a current rate election is in effect and the owner computes QBU net value under § 1.987-4(e)(2)(iii) without preparing an adjusted balance sheet, the information needed to apply § 1.987-4(e)(2)(iii) must be maintained in lieu of an adjusted balance sheet.

(3) The exchange rates used to translate items of income, gain, deduction, or loss of the section 987 QBU into the owner's functional currency and, if a spot rate convention is used, the manner in which the convention is determined.

(4) The exchange rates used to translate the assets and liabilities of the section 987 QBU into the owner's functional currency and, if a spot rate convention is used, the manner in which the convention is determined.

(5) The amount of assets and liabilities transferred by the owner to the section 987 QBU determined in the functional currency of the owner and the section 987 QBU.

(6) The amount of assets and liabilities transferred by the section 987 QBU to the owner determined in the functional currency of the owner and the section 987 QBU.

(7) The amount of the unrecognized section 987 gain or loss for the taxable year determined under § 1.987-4(d).

(8) The amount of the net accumulated unrecognized section 987 gain or loss for the taxable year determined under § 1.987-4(c).

(9) The amount of the remittance and the remittance proportion for the taxable year.

(10) The computations required under §§ 1.861-9(g) and 1.861-9T(g) for purposes of sourcing and characterizing

section 987 gain or loss, deferred section 987 gain or loss, suspended section 987 loss, or pretransition gain or loss under § 1.987-6.

(11) The cumulative suspended section 987 loss in each recognition grouping.

(12) The outstanding deferred section 987 gain or loss in each recognition grouping.

(13) The transition information required to be determined under § 1.987-10(k).

(14) The identification required under § 1.987-14(c) with respect to a section 987 hedging transaction.

(c) *Retention of records.* The records required by this section, or records that support the information required on a form published by the Commissioner regarding section 987, must be maintained and kept available for inspection by the Internal Revenue Service for so long as the contents thereof may become relevant in the administration of the Internal Revenue Code.

(d) *Information on a dedicated section 987 form.* Information necessary to determine section 987 gain or loss and section 987 taxable income or loss must be reported on a form prescribed for that purpose (or, until that form is published, on Form 8858 or its successor) in accordance with the applicable forms and instructions. A taxpayer satisfies its obligation described in paragraphs (a) and (b) of this section to the extent that the taxpayer provides the specific information required on Form 8858 (or its successor) or other form prescribed for this purpose (including the information required by the instructions accompanying those forms).

§ 1.987-10 Transition rules.

(a) *Overview—(1) In general.* This section provides transition rules for the first taxable year in which the section 987 regulations apply. Paragraph (b) of this section describes the scope of this section's application. Paragraph (c) of this section provides rules for determining the transition date. Paragraph (d) of this section provides rules relating to the application of the section 987 regulations after the transition date. Paragraph (e) of this section provides rules relating to the determination and recognition of pretransition gain or loss. Paragraph (f) of this section provides special rules for section 987 QBUs to which the fresh start transition method was applied. Paragraph (g) of this section is reserved. Paragraph (h) of this section provides rules relating to the source and character of pretransition gain or loss.

Paragraph (i) of this section is reserved. Paragraph (j) of this section provides adjustments to avoid double counting or omissions. Paragraph (k) of this section provides reporting requirements that apply in the taxable year beginning on the transition date. Paragraph (l) of this section provides examples illustrating the rules of this section.

(2) *Terms defined under prior § 1.987-12.* For purposes of this section, the terms *deferral QBU*, *deferral QBU owner*, *successor QBU*, *outbound loss QBU*, *outbound section 987 loss*, and *qualified successor* have the meaning provided in prior § 1.987-12.

(b) *Scope—(1) Owner of a section 987 QBU.* Except as provided in paragraph (f) of this section, any person that is an owner of a section 987 QBU on the applicable transition date and any person that is the owner of a terminating QBU on the termination date must apply the rules of this section with respect to the section 987 QBU.

(2) *Deferral QBU owner and owner of outbound loss QBU.* Except as provided in paragraph (f) of this section, a deferral QBU owner or the owner of an outbound loss QBU must apply the rules of this section with respect to the deferral QBU or outbound loss QBU if the deferral event or outbound loss event occurred before the applicable transition date. This paragraph (b)(2) does not apply to the owner of a terminating QBU.

(c) *Transition date—(1) In general.* Except as provided in paragraph (c)(2) of this section, the transition date for a section 987 QBU, deferral QBU, or outbound loss QBU is the first day of the first taxable year described in § 1.987-15(a)(1), (b), or (c) to which this section applies.

(2) *Terminating QBU—(i) In general.* With respect to a terminating QBU, the transition date is the day after the termination date. Until the transition date described in paragraph (c)(1) of this section, the owner of the terminating QBU must apply the section 987 regulations with respect to the terminating QBU, and any section 987 gain or loss attributable thereto, without regard to any section 987 elections (other than the election described in § 1.987-6(b)(2)(i)(C)).

(ii) *Ordering rule.* In the case of a terminating QBU, the transition rules of this section are applied immediately before the termination, and the consequences of the termination are determined under the section 987 regulations after applying this section.

(d) *Application of the section 987 regulations after the transition date—(1) Owner functional currency net value on the last day of the preceding taxable*

year. Except as provided in paragraph (f) of this section, for purposes of applying § 1.987–4 in the taxable year beginning on the transition date, the owner functional currency net value of a section 987 QBU on the last day of the preceding taxable year under § 1.987–4(d)(1)(i)(B) is determined by translating the assets and liabilities that are attributable to the section 987 QBU on the day before the transition date into the owner's functional currency at the transition exchange rate described in paragraph (d)(3) of this section.

(2) *Determination of historic rate.* If a current rate election is not in effect for the taxable year beginning on the transition date, the historic rate for historic items that are attributable to a section 987 QBU on the day before the transition date (other than non-LIFO inventory subject to the simplified inventory method under § 1.987–3(c)(2)(iv)(A)) is the transition exchange rate described in paragraph (d)(3) of this section.

(3) *Transition exchange rate—(i) In general.* Except as provided in paragraph (d)(3)(ii) of this section, the transition exchange rate is the spot rate applicable to the day before the transition date.

(ii) *Earnings only method.* If an earnings only method described in paragraph (e)(4)(ii) of this section was applied with respect to a section 987 QBU before the transition date, and a current rate election is not in effect in the taxable year beginning on the transition date, the transition exchange rate for each historic item (other than inventory subject to the simplified inventory method under § 1.987–3(c)(2)(iv)(A)) is the pretransition translation rate described in paragraph (e)(2)(i)(C) of this section. This paragraph (d)(3)(ii) does not apply with respect to a terminating QBU.

(e) *Pretransition gain or loss—(1) In general.* Except as provided in paragraph (f) of this section, pretransition gain or loss is determined and recognized under this paragraph (e).

(2) *Amount of pretransition gain or loss for an owner that applied an eligible pretransition method—(i) Owner of a section 987 QBU.* If an owner of a section 987 QBU described in paragraph (b)(1) of this section applied an eligible pretransition method with respect to the section 987 QBU, the amount of pretransition gain or loss with respect to the section 987 QBU is equal to the sum of the deemed termination amount described in paragraph (e)(2)(i)(A) of this section and the owner functional currency net value adjustment described in paragraph (e)(2)(i)(B) of this section. See paragraphs (l)(1) through (3) of this

section (*Examples 1 through 3*) for an illustration of this rule.

(A) *Deemed termination amount.* The deemed termination amount is the amount of section 987 gain or loss that would have been recognized by the owner under the eligible pretransition method if the section 987 QBU terminated and transferred all of its assets and liabilities to the owner on the day before the transition date and §§ 1.987–12 and 1.987–13 and prior § 1.987–12 did not apply.

(B) *Owner functional currency net value adjustment.* The owner functional currency net value adjustment may be either positive or negative and is equal to the amount described in paragraph (e)(2)(i)(B)(1) of this section reduced by the amount described in paragraph (e)(2)(i)(B)(2) of this section.

(1) The basis of the assets, reduced by the amount of liabilities, that are attributable to the section 987 QBU on the day before the transition date, translated into the owner's functional currency at the transition exchange rate.

(2) The basis of the assets, reduced by the amount of liabilities, that are attributable to the section 987 QBU on the day before the transition date, translated into the owner's functional currency at the pretransition translation rate.

(C) *Pretransition translation rate.* The pretransition translation rate is the rate that would be used under the eligible pretransition method to determine the basis of an asset or the amount of a liability in the hands of the owner of a section 987 QBU if the section 987 QBU transferred all of its assets and liabilities to the owner on the day before the transition date.

(ii) *Deferral QBU owner.* If a deferral QBU owner described in paragraph (b)(2) of this section applied an eligible pretransition method with respect to the deferral QBU, the amount of pretransition gain or loss with respect to the deferral QBU is equal to the deferred section 987 gain or loss (determined under prior § 1.987–12) that was not recognized before the transition date with respect to the deferral QBU.

(iii) *Owner of an outbound loss QBU.* If the owner of an outbound loss QBU described in paragraph (b)(2) of this section applied an eligible pretransition method with respect to the outbound loss QBU, the pretransition loss with respect to the outbound loss QBU is equal to the outbound section 987 loss that was not added to the basis of stock or recognized under prior § 1.987–12 before the transition date with respect to the outbound loss QBU.

(3) *Amount of pretransition gain or loss for an owner that did not apply an*

eligible pretransition method—(i) In general. If the owner of a section 987 QBU described in paragraph (b)(1) of this section did not apply an eligible pretransition method with respect to the section 987 QBU, the amount of pretransition gain or loss with respect to the section 987 QBU is determined under paragraph (e)(3)(ii) of this section. See paragraph (l)(4) of this section (*Example 4*) for an illustration of this rule.

(ii) *Computation of pretransition gain or loss.* With respect to a section 987 QBU described in paragraph (e)(3)(i) of this section, pretransition gain or loss is equal to the amount described in paragraph (e)(3)(ii)(A) of this section reduced by the amount described in paragraph (e)(3)(ii)(B) of this section.

(A) The sum of the owner's annual unrecognized section 987 gain or loss determined under paragraph (e)(3)(iii) of this section with respect to the section 987 QBU for all taxable years ending before the transition date and beginning after September 7, 2006, in which it was the owner of the section 987 QBU.

(B) The total net amount of section 987 gain or loss recognized by the owner with respect to the section 987 QBU in all taxable years ending before the transition date and beginning after September 7, 2006.

(iii) *Annual unrecognized section 987 gain or loss.* An owner of a section 987 QBU described in paragraph (e)(3)(i) of this section determines annual unrecognized section 987 gain or loss with respect to a section 987 QBU under the rules of § 1.987–4(d), applied as though a current rate election was in effect for all relevant taxable years, and subject to the following modifications—

(A) Only § 1.987–4(d)(1) and (10)

(steps 1 and 10) are applied; and
(B) Section 1.987–4(d)(10) is applied by replacing “paragraphs (d)(1) through (9) of this section” with “paragraph (d)(1) of this section.”

(iv) *Deferral QBU owner.* If a deferral QBU owner described in paragraph (b)(2) of this section did not apply an eligible pretransition method with respect to the deferral QBU, the pretransition gain or loss with respect to the deferral QBU is equal to the amount that would be determined under paragraph (e)(3)(ii) of this section with respect to the deferral QBU if the transition date was the day of the deferral event, reduced by the amount of deferred section 987 gain or loss (determined under prior § 1.987–12) recognized before the actual transition date.

(v) *Owner of an outbound loss QBU.* If the owner of an outbound loss QBU

described in paragraph (b)(2) of this section did not apply an eligible pretransition method with respect to the outbound loss QBU, the pretransition loss with respect to the outbound loss QBU is equal to the amount that would be determined under paragraph (e)(3)(ii) of this section with respect to the outbound loss QBU if the transition date was the day of the outbound loss event, reduced by any outbound section 987 loss recognized or added to the basis of stock under prior § 1.987–12 before the actual transition date.

(4) *Eligible pretransition method.* An eligible pretransition method means a method of applying section 987 before the transition date that is described in paragraphs (e)(4)(i) through (iii) of this section. An owner is treated as applying an eligible pretransition method with respect to a section 987 QBU only if it applied an eligible pretransition method with respect to the QBU on a return filed before November 9, 2023.

(i) *Earnings and capital method.* An earnings and capital method is an eligible pretransition method if it is applied in a reasonable manner. For purposes of this paragraph (e)(4)(i), an earnings and capital method means a method of applying section 987 that requires section 987 gain or loss to be determined and recognized with respect to both the earnings of the section 987 QBU and capital contributed to the section 987 QBU (for example, the method prescribed in the 1991 proposed regulations under section 987). See paragraph (l)(1) of this section (*Example 1*) for an illustration of this rule.

(ii) *Other reasonable methods.* Any reasonable method of applying section 987 is an eligible pretransition method if it produces the same total amount of income over the life of the owner of a section 987 QBU as the method described in paragraph (e)(4)(i) of this section (taking into account the aggregate of section 987 gain or loss, section 987 taxable income or loss, and income or loss recognized by the owner of the section 987 QBU with respect to property transferred between the section 987 QBU and the owner or any QBU of the owner). See paragraph (l)(2) of this section (*Example 2*) for an illustration of this rule.

(iii) *Other earnings only methods.* An earnings only method that does not meet the requirements of paragraph (e)(4)(ii) of this section is an eligible pretransition method, provided that—

(A) The earnings only method was first applied by the owner on a return filed before November 9, 2023;

(B) The earnings only method was applied consistently to all section 987 QBUs of the owner since the first

taxable year in which the owner applied an eligible pretransition method; and

(C) The owner of the section 987 QBU otherwise applied section 987 in a reasonable manner. See paragraph (l)(3) of this section (*Example 3*) for an illustration of this rule.

(iv) *Error in the application of a section 987 method.* If an owner generally applied section 987 with respect to a section 987 QBU before the transition date under a method described in paragraph (e)(4)(i), (ii), or (iii) of this section but made errors in the application of the method or failed to apply the method to every taxable year since the QBU's inception, the owner is considered to have applied an eligible pretransition method with respect to the QBU. However, pretransition gain or loss must be determined under paragraph (e)(2) of this section as though the eligible pretransition method was applied without error since the section 987 QBU's inception. See paragraph (l)(5) of this section (*Example 5*) for an illustration of this rule.

(v) *Certain consistent practices not treated as errors—(A) In general.* If an owner generally applied section 987 with respect to a section 987 QBU before the transition date under a method described in paragraph (e)(4)(i), (ii), or (iii) of this section and used a consistent practice described in paragraph (e)(4)(v)(B) of this section for purposes of applying that method, the owner is considered to have applied an eligible pretransition method with respect to the QBU. In addition, the consistent practice is not treated as an error under paragraph (e)(4)(iv) of this section. Therefore, the owner must take the consistent practice into account in determining pretransition gain or loss under paragraph (e)(2) of this section. See paragraph (l)(6) of this section (*Example 6*) for an illustration of this rule.

(B) *Practices not treated as errors—(1) Reasonable conventions.* The use of a reasonable convention (for example, the use of a yearly average exchange rate rather than the applicable spot rate to translate frequently recurring transfers) is a practice described in this paragraph (e)(4)(v)(B).

(2) *Disregarded transactions.* If, in determining the amount of a remittance that requires the recognition of gain or loss under section 987(3), an owner of a QBU consistently disregarded certain transfers to or from the QBU (other than transfers from the QBU to the owner that would be treated as distributions if the QBU were treated as a separate corporation), the owner is considered to have applied a practice described in this

paragraph (e)(4)(v)(B) with respect to the QBU, provided that the owner otherwise accounts for the disregarded transfers in a reasonable manner (for example, under the method described in the 1991 proposed regulations, by taking the disregarded transfers into account in computing equity and basis pools so as to properly reflect the owner's net equity in the QBU and its functional currency basis in the QBU).

(vi) *Deferral of section 987 gain or loss until termination is not reasonable.* For purposes of this paragraph (e)(4), a method under which the owner of a section 987 QBU defers the recognition of section 987 gain or loss until the section 987 QBU is terminated, sold, or liquidated is not a reasonable method.

(vii) *Anti-abuse rule.* If an owner changes its pretransition method of applying section 987 with a principal purpose of reducing its pretransition gain or increasing its pretransition loss, the Commissioner may redetermine pretransition gain or loss based on the owner's original method of applying section 987 or by treating the owner as not applying an eligible pretransition method.

(5) *Recognition of pretransition gain or loss—(i) In general.* Except as provided in paragraph (e)(5)(ii) of this section, pretransition gain is recognized under paragraph (e)(5)(i)(A) of this section and pretransition loss is recognized under paragraph (e)(5)(i)(B) of this section.

(A) *Pretransition gain.* Pretransition gain with respect to a section 987 QBU is treated as net accumulated unrecognized section 987 gain (within the meaning of § 1.987–4(c)). Pretransition gain with respect to a deferral QBU is treated as deferred section 987 gain and is attributed to one or more successor deferral QBUs under the principles of § 1.987–12(b)(2) and (c)(2).

(B) *Pretransition loss—(1) In general.* Except as provided in paragraph (e)(5)(i)(B)(2) of this section, pretransition loss with respect to a section 987 QBU, a deferral QBU, or an outbound loss QBU is treated as suspended section 987 loss with respect to the section 987 QBU, the deferral QBU, or the outbound loss QBU. In the case of a deferral QBU or outbound loss QBU, suspended section 987 loss is attributed to one or more successor suspended loss QBUs under the principles of § 1.987–13(b)(1) and (c)(1).

(2) *Current rate election.* If a current rate election is in effect (and an annual recognition election is not in effect) in the taxable year beginning on the transition date, pretransition loss with respect to a section 987 QBU (other than

a terminating QBU) is treated as net accumulated unrecognized section 987 loss (within the meaning of § 1.987–4(c)), and pretransition loss with respect to a deferral QBU is treated as deferred section 987 loss and is attributed to one or more successor deferral QBUs under the principles of § 1.987–12(b)(2) and (c)(2).

(ii) *Election to recognize pretransition section 987 gain or loss ratably over the transition period*—(A) *In general.* A taxpayer may elect to recognize pretransition gain or loss ratably over the transition period. If an election is made to recognize pretransition gain or loss ratably over the transition period, then paragraph (e)(5)(i) of this section does not apply, and each owner to which the election applies recognizes one tenth of its pretransition gain or loss with respect to each section 987 QBU, original deferral QBU, and outbound loss QBU in each taxable year for ten taxable years beginning with the taxable year that begins on the transition date described in paragraph (c)(1) of this section. See § 1.987–1(g) for rules relating to section 987 elections (including consistency rules).

(B) *Special rules for certain transactions*—(1) *Scope.* This paragraph (e)(5)(ii)(B) applies if a corporation (*acquiring corporation*) acquires the assets of an owner that is subject to an election under paragraph (e)(5)(ii)(A) of this section in a transaction described in section 381(a), and either the owner is a foreign corporation and the acquiring corporation is a domestic corporation or the owner is a domestic corporation and the acquiring corporation is a foreign corporation. This paragraph (e)(5)(ii)(B) also applies to any transaction entered into with a principal purpose of avoiding the recognition of pretransition gain under paragraph (e)(5)(ii)(A) of this section.

(2) *Recognition of pretransition gain or loss.* In the case of a transaction described in paragraph (e)(5)(ii)(B)(1) of this section, pretransition gain or loss that has not been recognized under paragraph (e)(5)(ii)(A) of this section ceases to be subject to the election to be recognized ratably over the transition period. Any unrecognized pretransition gain is recognized immediately before the transaction, and any unrecognized pretransition loss becomes suspended section 987 loss immediately before the transaction. As a result, the suspended section 987 loss may be recognized to the extent of section 987 gain recognized in the same recognition grouping pursuant to § 1.987–11(e). See also § 1.987–13(g) (providing that any remaining suspended section 987 loss does not carry over to the acquiring

corporation upon an inbound transaction to which section 381(a) applies).

(C) *Terminating QBU.* This paragraph (e)(5)(ii)(C) applies with respect to a terminating QBU if, in the taxable year beginning on the transition date described in paragraph (c)(1) of this section, the owner of the terminating QBU elects to recognize pretransition gain or loss ratably over the transition period. Any deferred section 987 gain or loss or suspended section 987 loss with respect to the terminating QBU that was not recognized before the transition date described in paragraph (c)(1) of this section is treated as pretransition gain or loss for purposes of this paragraph (e)(5)(ii) (and ceases to be treated as deferred section 987 gain or loss or suspended section 987 loss). The pretransition gain or loss is recognized ratably over ten taxable years beginning with the taxable year that begins on the transition date described in paragraph (c)(1) of this section.

(6) *Predecessor of an owner*—(i) *In general.* For purposes of this paragraph (e), references to an owner of a section 987 QBU, a deferral QBU owner, and the owner of an outbound loss QBU include a predecessor described in paragraph (e)(6)(ii) of this section.

(ii) *Predecessor.* If a corporation (*acquiring corporation*) becomes the owner of a section 987 QBU in a transaction described in section 381(a) in which the section 987 QBU does not terminate, the corporation that was the owner of the section 987 QBU immediately before the transaction is a predecessor of the acquiring corporation. If a corporation (*acquiring corporation*) becomes a qualified successor of a deferral QBU owner or the owner of an outbound loss QBU (each, a *transferor corporation*), the transferor corporation is a predecessor of the acquiring corporation. A predecessor of a corporation includes the predecessor of a predecessor of the corporation.

(7) *Small business election*—(i) *Scope.* This paragraph (e)(7) applies if the owner of a QBU meets the threshold described in paragraph (e)(7)(ii) of this section and the QBU meets the threshold described in paragraph (e)(7)(iii) of this section. This paragraph (e)(7) does not apply with respect to a terminating QBU.

(ii) *Owner threshold.* An owner of a QBU meets the requirements of this paragraph (e)(7)(ii) if the owner would qualify for the small business exemption provided in section 163(j)(3) for the taxable year beginning on the transition date described in paragraph (c)(1) of this section.

(iii) *QBU threshold.* A QBU meets the requirements of this paragraph (e)(7)(iii) if the assets attributable to the QBU have an adjusted basis (translated at the spot rate applicable to the last day of each taxable year) of \$10 million or less at the end of each of the three taxable years of the owner ending before the transition date described in paragraph (c)(1) of this section (or, if the QBU was not in existence for three taxable years, each taxable year ending before the transition date in which the QBU existed). For this purpose, all QBUs owned by members of the same controlled group that have the same country of residence (as defined in section 988(a)(3)(B)) are treated as a single QBU. Solely for purposes of applying this paragraph (e)(7)(iii) in the case of a deferral QBU or outbound loss QBU described in paragraph (b)(2) of this section, the termination date is treated as the transition date.

(iv) *Small business election.* If the owner of a QBU meets the requirements of paragraph (e)(7)(ii) of this section, the owner may elect to treat all QBUs that meet the requirements of paragraph (e)(7)(iii) of this section as having no pretransition gain or loss.

(f) *QBUs to which the fresh start transition method was applied*—(1) *In general.* Paragraphs (d) and (e) of this section do not apply with respect to any section 987 QBU, deferral QBU, or outbound loss QBU with respect to which the taxpayer applied the rules of prior § 1.987–10 (or applied § 1.987–10 of the 2006 proposed regulations in a reasonable manner) on a return filed before November 9, 2023 or pursuant to paragraph (f)(3) of this section.

(2) *Application of the section 987 regulations after the transition date*—(i) *Owner functional currency net value on the last day of the preceding taxable year.* For purposes of applying § 1.987–4 with respect to a section 987 QBU described in paragraph (f)(1) of this section for the taxable year beginning on the transition date, the owner functional currency net value of the section 987 QBU on the last day of the preceding taxable year under § 1.987–4(d)(1)(i)(B) is the amount that was determined for the preceding taxable year under prior § 1.987–4(d)(1)(A) or § 1.987–4(d)(1)(A) of the 2006 proposed section 987 regulations, as applicable.

(ii) *Determination of historic rate.* For purposes of applying the section 987 regulations with respect to historic items (other than inventory subject to the simplified inventory method under § 1.987–3(c)(2)(iv)(A)) that are attributable to the section 987 QBU on the day before the transition date, a taxpayer must use the same historic

rates as were used under the taxpayer's application of the 2016 and 2019 section 987 regulations or the 2006 proposed section 987 regulations, as applicable, in place of the historic rates that otherwise would be determined under § 1.987–1(c)(3).

(iii) *Unrecognized section 987 gain or loss—(A) Net accumulated unrecognized section 987 gain or loss of a section 987 QBU.* In taxable years beginning on or after the transition date, for purposes of calculating the net accumulated unrecognized section 987 gain or loss of a section 987 QBU described in paragraph (f)(1) of this section under § 1.987–4(c)—

(1) Amounts determined under prior § 1.987–4(d) or under § 1.987–4(d) or § 1.987–10 of the 2006 proposed section 987 regulations, as applicable, are included in amounts determined under § 1.987–4(d) for all prior taxable years; and

(2) Amounts taken into account under prior § 1.987–5(a) or under § 1.987–5(a) of the 2006 proposed section 987 regulations, as applicable, are included in amounts recognized under § 1.987–5(a) for all prior taxable years. For this purpose, amounts taken into account under prior § 1.987–5(a) or under § 1.987–5(a) of the 2006 proposed section 987 regulations, as applicable, are determined without regard to prior § 1.987–12 or prior § 1.987–12T.

(B) *Deferred section 987 gain or loss attributable to a successor deferral QBU.* In the taxable year beginning on the transition date, the outstanding deferred section 987 gain or loss (as determined under prior § 1.987–12) of a deferral QBU described in paragraph (f)(1) of this section becomes deferred section 987 gain or loss (within the meaning of § 1.987–12). The deferred section 987 gain or loss is attributed to one or more successor deferral QBUs under the principles of § 1.987–12(b)(2) and (c)(2).

(C) *Outbound section 987 loss attributable to a successor suspended loss QBU.* In the taxable year beginning on the transition date, outbound section 987 loss of an outbound loss QBU described in paragraph (f)(1) of this section that has not been recognized or added to the basis of stock under prior § 1.987–12 becomes suspended section 987 loss. The suspended section 987 loss is attributed to one or more successor suspended loss QBUs under the principles of § 1.987–13(b)(1) and (c)(1).

(3) *Taxpayers that are required to transition using the fresh start transition method.* If a taxpayer is subject to a consent agreement under which it is required to apply the fresh start transition method with respect to a

section 987 QBU, then the taxpayer must apply the transition rules of prior § 1.987–10 to that section 987 QBU for the taxable year beginning on the transition date and immediately before the taxpayer applies this section. In applying this section, the taxpayer is treated as having applied prior § 1.987–10 to the section 987 QBU.

(g) [Reserved]

(h) *Determination of source and character—(1) In general.* Except as provided in paragraph (h)(2) of this section, the source and character of pretransition gain or loss is determined under the rules of § 1.987–6. *See* § 1.987–6(b)(1) (timing of source and character determination).

(2) *Deferral QBU or outbound loss QBU.* Notwithstanding paragraph (h)(1) of this section and § 1.987–6, the source and character of pretransition gain or loss with respect to a deferral QBU or an outbound loss QBU described in paragraph (b)(2) of this section is the same as the source and character of the outstanding deferred section 987 gain or loss (determined under prior § 1.987–12) of the deferral QBU or the outbound section 987 loss of the outbound loss QBU (determined under prior § 1.987–12(e)).

(i) [Reserved]

(j) *Adjustments to avoid double counting or omissions.* If a difference between the treatment of any item under the section 987 regulations and the treatment of the item under the taxpayer's prior section 987 method would result in income, gain, deduction, or loss (including section 988 gain or loss) being taken into account more than once or not being taken into account, then pretransition gain or loss, as determined under paragraphs (e)(2) and (3) of this section, is adjusted to account for the difference. In case of a QBU described in paragraph (f)(1) of this section, appropriate adjustments must be made under the principles of paragraph (e)(5) of this section. In the case of a terminating QBU, the determination as to whether an adjustment is required under this paragraph (j) is made after taking into account section 988 gain or loss recognized in connection with the termination.

(k) *Reporting—(1) In general.* Except as otherwise provided in this paragraph (k), a statement titled “Section 987 Transition Information” must be attached to an owner's timely filed (including extensions) return for the taxable year beginning on the transition date providing the following information for each QBU described in paragraph (k)(2) of this section:

(i) A description of each QBU, the QBU's principal place of business, and a description of the prior method used by the taxpayer to determine its section 987 gain or loss, deferred section 987 gain or loss, or outbound section 987 loss with respect to the QBU, including an explanation as to whether such method was an eligible pretransition method.

(ii) The pretransition gain or loss with respect to each QBU and the computations used to determine pretransition gain or loss.

(iii) Whether the authorized person has elected to recognize pretransition gain or loss ratably over the transition period pursuant to paragraph (e)(5)(ii) of this section.

(iv) Whether the authorized person has made a small business election under paragraph (e)(7) of this section and the computations used to determine eligibility for the election.

(v) With respect to each QBU for which any adjustment is made under paragraph (j) of this section, a description of each adjustment and the basis for computing the adjustment.

(vi) A list of the QBUs described in paragraph (f)(1) of this section, or a statement that no QBUs are described in paragraph (f)(1) of this section.

(2) *QBUs for which reporting is required—(i) In general.* Except as provided in paragraph (k)(2)(ii) of this section, the information described in paragraph (k)(1) of this section must be provided with respect to—

(A) Each section 987 QBU described in paragraph (b)(1) of this section;

(B) Each deferral QBU described in paragraph (b)(2) of this section and each of its successor deferral QBUs; and

(C) Each outbound loss QBU described in paragraph (b)(2) of this section and each of its successor suspended loss QBUs.

(ii) *QBUs to which the fresh start transition method was applied.* A taxpayer is not required to provide the information described in paragraphs (k)(1)(i) through (iv) of this section with respect to a QBU described in paragraph (f)(1) of this section.

(3) *Attachments not required where information is reported on a form.* This paragraph (k) does not apply to the extent provided on a form or instructions published by the Commissioner.

(4) *No change in method of accounting.* The application of this section is not treated as a change in method of accounting for purposes of sections 446 and 481.

(l) *Examples.* The following examples illustrate the application of this section. For purposes of the examples, DC is a

domestic corporation with the U.S. dollar as its functional currency and Branch is a section 987 QBU with the euro as its functional currency. DC has a taxable year ending December 31, and the transition date is January 1, year 4. For purposes of the examples, except as otherwise indicated, assume that no section 987 elections are in effect.

(1) *Example 1: Earnings and capital method*—(i) *Facts*—(A) *Formation of Branch and Branch's operations*. DC formed Branch on November 30, year 1, with a contribution of €150. In year 1, Branch purchased a parcel of unimproved land for €100. In year 2, Branch earned €25. In year 3, Branch again earned €25. On June 30, year 3, Branch distributed €100 cash to DC, and DC immediately exchanged the €100 for \$135.

(B) *Exchange rates*. The relevant exchange rates are shown below.

TABLE 1 TO PARAGRAPH (I)(1)(i)(B)—EXCHANGE RATES

	Spot rate	Yearly average exchange rate
November 30, Year 1	€1 = \$1.	
December 31, Year 1	€1 = \$1.10.	
December 31, Year 2	€1 = \$1.20.	
June 30, Year 3	€1 = \$1.35.	
December 31, Year 3	€1 = \$1.40.	
Year 1		€1 = \$1.05.
Year 2		€1 = \$1.15.

TABLE 1 TO PARAGRAPH (I)(1)(i)(B)—EXCHANGE RATES—Continued

	Spot rate	Yearly average exchange rate
Year 3		€1 = \$1.25.

(C) *Pretransition method*. DC used the method prescribed in the 1991 proposed regulations under section 987 with respect to Branch before the transition date. Under this method, DC maintains an equity pool in euros (Branch's functional currency) and a basis pool in U.S. dollars (DC's functional currency). When Branch makes a remittance (whether out of earnings or capital), DC recognizes section 987 gain or loss equal to the difference between the amount of the remittance (translated into U.S. dollars at the spot rate on the date of the remittance) and the portion of the basis pool attributable to the remittance. DC's basis in assets distributed from Branch is equal to Branch's basis in the assets, translated into U.S. dollars at the spot rate on the date of the remittance. Branch's earnings are translated into U.S. dollars at the average exchange rate for the taxable year. DC otherwise applies section 987 in a reasonable manner.

(D) *Application of the pretransition method before the transition date*. For

purposes of determining section 987 gain or loss recognized as a result of the June 30, year 3, remittance, DC was required to determine the amount in Branch's equity and basis pools. Branch's equity pool was equal to €200, and its basis pool was equal to \$210, as shown in the table below. Because the remittance was equal to 50% of the equity pool (€100), 50% of the basis pool, or \$105, was attributable to the remittance. The amount of the remittance was \$135 (€100 translated at the spot rate on June 30, year 3, of €1 = \$1.35). Therefore, in year 3, DC recognized section 987 gain of \$30, equal to the difference between the amount of the remittance (\$135) and the portion of the basis pool attributable to the remittance (\$105). As a result of the remittance, the equity pool was reduced by the amount distributed (€100), and the basis pool was reduced by the portion of the basis pool attributable to the remittance (\$105). Therefore, after the remittance, the equity pool was equal to €100, and the basis pool was equal to \$105. In the hands of DC, the euros distributed had a basis of \$135 (equal to the €100 distribution translated at the spot rate on June 30, year 3, of €1 = \$1.35). DC did not recognize section 988 gain or loss when it exchanged the euros for \$135.

TABLE 2 TO PARAGRAPH (I)(1)(i)(D)—YEAR 3 EQUITY AND BASIS POOLS

	Equity pool	Translation rate	Basis pool
Contribution (11/30/Year 1)	€150	€1 = \$1	\$150
Year 2 Earnings	€25	€1 = \$1.15	28.75
Year 3 Earnings	€25	€1 = \$1.25	31.25
Total	€200		210

(ii) *Analysis*—(A) *DC's method is an eligible pretransition method*. Before the transition date, DC followed the method prescribed in the 1991 proposed regulations under section 987 with respect to Branch. This method is an eligible pretransition method under paragraph (e)(4)(i) of this section. Therefore, DC determines its pretransition gain or loss with respect to Branch under paragraph (e)(2) of this section.

(B) *Pretransition gain or loss*. Under paragraph (e)(2) of this section, DC's pretransition gain or loss with respect to Branch is equal to the sum of the deemed termination amount described in paragraph (e)(2)(i)(A) of this section and the owner functional currency net value adjustment described in paragraph (e)(2)(i)(B) of this section. As explained in paragraphs (I)(1)(ii)(B)(1) and (2) of this section (*Example 1*), DC's

deemed termination amount is \$35 and its owner functional currency net value adjustment is zero. Therefore, DC has \$35 of pretransition gain with respect to Branch. Under paragraph (e)(5)(i)(A) of this section, the pretransition gain is treated as Branch's net accumulated unrecognized section 987 gain. However, if DC elects to recognize its pretransition gain ratably over the transition period under paragraph (e)(5)(ii) of this section, the pretransition gain is not treated as net accumulated unrecognized section 987 gain. Instead, DC recognizes \$3.50 (one tenth of its pretransition gain) for each of the ten taxable years from year 4 through year 13.

(1) *Deemed termination amount*. Under paragraph (e)(2)(i)(A) of this section, the deemed termination amount is the amount of section 987 gain or loss that would have been recognized by DC

under the eligible pretransition method if Branch terminated and transferred all its assets and liabilities to DC (the land with a basis of €100) on December 31, year 3. Under DC's eligible pretransition method, DC would have recognized section 987 gain of \$35, determined by subtracting the remaining basis pool of \$105 from the amount of the remittance of \$140 (€100 translated at the spot rate on December 31, year 3, of €1 = \$1.40). Therefore, the deemed termination amount is \$35.

(2) *Owner functional currency net value adjustment*. On December 31, year 3, Branch had no liabilities and only one asset: land with a basis of €100. Under paragraph (e)(2)(i)(B) of this section, the owner functional currency net value adjustment is equal to the basis of the land, translated into U.S. dollars at the transition exchange rate, reduced by the basis of the land,

translated into U.S. dollars at the pretransition translation rate. Under paragraph (d)(3)(i) of this section, the transition exchange rate is the spot rate applicable to December 31, year 3. Under paragraph (e)(2)(i)(C) of this section, the pretransition translation rate is the rate that would be used under DC's eligible pretransition method to determine the basis of the land in the hands of DC if Branch transferred the land to DC on December 31, year 3. Under DC's eligible pretransition method, if Branch transferred the land to DC, DC's basis in the land would be equal to Branch's basis (€100) translated at the spot rate on the date of the remittance. Therefore, the pretransition translation rate on December 31, year 3, is equal to the spot rate on December 31, year 3. Consequently, the owner functional currency net value adjustment is zero.

(C) *Determination of unrecognized section 987 gain or loss in year 4.* For purposes of determining unrecognized section 987 gain or loss in year 4 under § 1.987-4(d), the owner functional currency net value of Branch on the last day of year 3 is determined by translating the €100 basis of the land at the transition exchange rate, which is the spot rate on December 31, year 3 (€1 = \$1.40). Therefore, the owner functional currency net value of Branch on the last day of year 3 is \$140.

(2) *Example 2: Earnings only method described in paragraph (e)(4)(ii) of this*

section—(i) Facts—(A) In general. The facts and exchange rates are the same as in paragraph (l)(1) of this section (*Example 1*), except that DC uses an earnings only method with respect to Branch before the transition date, as described in paragraph (l)(2)(i)(B) of this section. In addition, a current rate election is in effect for Year 4.

(B) *Pretransition method.* Under the earnings only method, DC maintains an equity pool in euros (Branch's functional currency) and a basis pool in U.S. dollars (DC's functional currency) with respect to Branch's earnings. DC also maintains separate equity and basis pools with respect to Branch's capital. Distributions are treated as being made first out of earnings and then out of capital. When Branch makes a remittance out of earnings, DC recognizes section 987 gain or loss equal to the difference between the amount of the remittance (translated into U.S. dollars at the spot rate on the date of the remittance) and the portion of the earnings basis pool attributable to the remittance. No section 987 gain or loss is recognized on a distribution out of capital. DC's basis in assets distributed out of Branch's earnings is equal to Branch's basis in the assets translated at the spot rate on the date of the remittance. DC's basis in assets distributed out of Branch's capital is equal to the portion of the capital basis pool attributable to the distribution. Branch's earnings are translated into

U.S. dollars at the average exchange rate for the taxable year. DC otherwise applies section 987 in a reasonable manner.

(C) *Application of the pretransition method before the transition date.* On June 30, year 3, Branch distributed €100 cash to DC. Of this amount, €50 represented a remittance out of earnings, and €50 represented a distribution out of capital.

(1) *Remittance out of earnings.* For purposes of determining section 987 gain or loss recognized on the remittance, Branch's earnings equity pool was equal to €50, and its earnings basis pool was equal to \$60, as shown in the table below. Because Branch remitted 100% of the earnings equity pool (€50), the entire earnings basis pool, or \$60, was attributable to the remittance. The value of the remittance was \$67.50 (€50 translated at the spot rate on June 30, year 3, of €1 = \$1.35). Therefore, in year 3, DC recognized section 987 gain of \$7.50, equal to the difference between the value of the remittance (\$67.50) and the portion of the basis pool attributable to the remittance (\$60). As a result of the remittance, the earnings equity pool and the earnings basis pool were each reduced to zero. In the hands of DC, the €50 distributed out of earnings had a basis of \$67.50 (€50 translated at the spot rate on June 30, year 3, of €1 = \$1.35).

TABLE 3 TO PARAGRAPH (l)(2)(i)(C)(1)—EARNINGS EQUITY AND BASIS POOLS

	Equity pool	Translation rate	Basis pool
Year 2 Earnings	€25	€1 = \$1.15	\$28.75
Year 3 Earnings	€25	€1 = \$1.25	31.25
Total	€50		60

(2) *Distribution out of capital.* The basis of the €50 distributed out of capital was equal to the portion of the capital basis pool attributable to the distribution. For this purpose, the capital equity pool was equal to €150,

and the capital basis pool was equal to \$150, as shown in the table below. Because Branch distributed 33% of the capital equity pool, or €50, 33% of the capital basis pool, or \$50, was attributable to the distribution. In the

hands of DC, the €50 distributed out of capital had a basis of \$50. As a result of the capital distribution, the capital equity pool was reduced to €100 and the capital basis pool was reduced to \$100.

TABLE 4 TO PARAGRAPH (l)(2)(i)(C)(2)—CAPITAL EQUITY AND BASIS POOLS

	Equity pool	Translation rate	Basis pool
Contribution (11/30/Year 1)	€150	€1 = \$1	\$150
Total	€150		150

(3) *Section 988 gain recognized.* On June 30, year 3, DC exchanged €100 with an aggregate basis of \$117.50 (equal to the sum of the \$67.50 basis of

the remittance out of earnings and the \$50 basis of the distribution out of capital) for \$135. Therefore, DC

recognized \$17.50 of gain under section 988.

(ii) *Analysis—(A) DC's method is an eligible pretransition method.* Before the

transition date, DC followed a reasonable method of applying section 987 that would result in the same total amount of income over the life of DC (\$125) as an earnings and capital method, as explained in paragraphs (l)(2)(ii)(A)(1) and (2) of this section (*Example 2*). Therefore, this method is an eligible pretransition method under paragraph (e)(4)(ii) of this section. Consequently, DC determines its pretransition gain or loss with respect to Branch under paragraph (e)(2) of this section.

(1) *DC's total amount of income under its pretransition method.* Under DC's pretransition method, DC recognized \$7.50 of section 987 gain and \$17.50 of section 988 gain in year 3. In addition, on December 31, year 3, DC had \$40 of embedded gain in its capital equity and basis pools (equal to the difference between its capital equity pool of €100, translated at the spot rate on December 31, year 3, of €1 = \$1.40, and its capital basis pool of \$100) which will be taken into account in the future (when Branch distributes property out of capital and the property is sold). DC also recognized \$60 of earnings with respect to Branch (\$28.75 in year 2 and \$31.25 in year 3). Thus, DC's total income (recognized and unrecognized) with respect to Branch is \$125.

(2) *DC's total amount of income under an earnings and capital method.* If DC had instead applied an earnings and capital method, as described in paragraph (l)(1)(i)(C) of this section (*Example 1*), DC would have recognized section 987 gain of \$30 in year 3 and would not have recognized section 988 gain in year 3, as explained in paragraph (l)(1)(i)(D) of this section. On December 31, year 3, DC would have unrecognized section 987 gain in its equity and basis pools of \$35 (see paragraph (l)(1)(ii)(B)(1) of this section (*Example 1*)). DC would also have recognized \$60 of earnings with respect to Branch (\$28.75 in year 2 and \$31.25 in year 3). Thus, DC's total income (recognized and unrecognized) with respect to Branch is \$125.

(B) *Pretransition gain or loss.* Under paragraph (e)(2) of this section, DC's pretransition gain or loss with respect to Branch is equal to sum of the deemed termination amount described in paragraph (e)(2)(i)(A) of this section and the owner functional currency net value adjustment described in paragraph (e)(2)(i)(B) of this section. As explained in paragraphs (l)(2)(ii)(B)(1) and (2) of this section (*Example 2*), the deemed termination amount is zero and the owner functional currency net value adjustment is \$40. Therefore, DC has \$40 of pretransition gain with respect to

Branch. Under paragraph (e)(5)(i)(A) of this section, the pretransition gain is treated as Branch's net accumulated unrecognized section 987 gain. However, if DC elects to recognize its pretransition gain ratably over the transition period under paragraph (e)(5)(ii) of this section, the pretransition gain is not treated as net accumulated unrecognized section 987 gain. Instead, DC recognizes \$4 (one tenth of its pretransition gain) for each of the ten taxable years from year 4 through year 13.

(1) *Deemed termination amount.* Under paragraph (e)(2)(i)(A) of this section, the deemed termination amount is the amount of section 987 gain or loss that would have been recognized by DC under the eligible pretransition method if Branch terminated and transferred all of its assets and liabilities to DC on December 31, year 3. Under DC's eligible pretransition method, if Branch had transferred all of its assets and liabilities to DC, this would have been treated as a distribution out of capital. Under its eligible pretransition method, DC would not have recognized section 987 gain or loss on a distribution out of capital. Therefore, the deemed termination amount is zero.

(2) *Owner functional currency net value adjustment.* On December 31, year 3, Branch had no liabilities and only one asset: land with a basis of €100. Under paragraph (e)(2)(i)(B) of this section, the owner functional currency net value adjustment is equal to the basis of Branch's land, translated into U.S. dollars at the transition exchange rate, reduced by the basis of Branch's land, translated into U.S. dollars at the pretransition translation rate on December 31, year 3. Under paragraph (e)(2)(i)(C) of this section, the pretransition translation rate is the rate that would be used under the eligible pretransition method to determine the basis of the land in the hands of DC if Branch transferred the land to DC. Under DC's eligible pretransition method, DC's basis in assets distributed from Branch is equal to the portion of the capital basis pool attributable to the distribution. If Branch transferred the land with a basis of €100 to DC on December 31, year 3, its remaining capital basis pool of \$100 would be attributable to the distribution, and the land would have a basis of \$100 in the hands of DC. Because the land had a basis of €100 in the hands of Branch, and would have a basis of \$100 in the hands of DC if it were distributed on December 31, year 3, the pretransition translation rate is €1 = \$1. Under paragraph (d)(3)(i) of this section, because a current rate election is in

effect for year 4, the transition exchange rate is the spot rate applicable to December 31, year 3. The €100 basis of Branch's land, translated at the spot rate on December 31, year 3 of €1 = \$1.40 is equal to \$140. The €100 basis of Branch's land, translated at the pretransition translation rate on December 31, year 3 of €1 = \$1 is equal to \$100. Therefore, the owner functional currency net value adjustment is equal to \$40 (\$140 – \$100).

(C) *Determination of unrecognized section 987 gain or loss in year 4.* For purposes of determining unrecognized section 987 gain or loss in year 4 under § 1.987–4(d), the owner functional currency net value of Branch on the last day of year 3 is determined by translating the €100 basis of the land at the transition exchange rate, which is the spot rate on December 31, year 3 (€1 = \$1.40). Therefore, the owner functional currency net value of Branch on the last day of year 3 is \$140.

(iii) *Alternative facts—(A) No current rate election.* Assume the facts are the same as described in paragraph (l)(2)(i) of this section (*Example 2*), except that a current rate election is not in effect for year 4.

(B) *Analysis.* As explained in paragraph (l)(2)(ii)(A) of this section (*Example 2*), DC determines its pretransition gain or loss with respect to Branch under paragraph (e)(2) of this section. Because a current rate election is not in effect, the transition exchange rate is determined under paragraph (d)(3)(ii) of this section.

(1) *Transition exchange rate.* DC applied an earnings only method described in paragraph (e)(4)(ii) of this section before the transition date. Under paragraph (d)(3)(ii) of this section, because a current rate election is not in effect for year 4, the transition exchange rate for Branch's land is equal to the pretransition translation rate. As explained in paragraph (l)(2)(ii)(B)(2) of this section (*Example 2*), the pretransition translation rate is €1 = \$1.

(2) *Pretransition gain or loss.* Because the transition exchange rate for the land (Branch's sole asset) is equal to the pretransition translation rate, the owner functional currency net value adjustment is zero. As explained in paragraph (l)(2)(ii)(B)(1) of this section (*Example 2*), the deemed termination amount is also zero. Therefore, DC has no pretransition gain or loss with respect to Branch.

(3) *Determination of unrecognized section 987 gain or loss in year 4.* For purposes of determining unrecognized section 987 gain or loss in year 4 under § 1.987–4(d), the owner functional currency net value of Branch on the last

day of year 3 is determined by translating the €100 basis of the land at the transition exchange rate, which is the pretransition translation rate of €1 = \$1. Therefore, the owner functional currency net value of Branch on the last day of year 3 is \$100.

(3) *Example 3: Earnings only method described in paragraph (e)(4)(iii) of this section—(i) Facts—(A) In general.* The facts and exchange rates are the same as in paragraph (l)(1) of this section (*Example 1*), except that DC used an earnings only method with respect to Branch before the transition date, as described in paragraph (l)(3)(i)(B) of this section.

(B) *Pretransition method.* Under the earnings only method, DC maintains an equity pool in euros (Branch’s functional currency) and a basis pool in U.S. dollars (DC’s functional currency) with respect to Branch’s earnings. However, DC does not maintain separate equity and basis pools with respect to Branch’s capital. Distributions are treated as being made first out of

earnings and then out of capital. When Branch makes a remittance out of earnings, DC recognizes section 987 gain or loss equal to the difference between the amount of the remittance (translated into U.S. dollars at the spot rate on the date of the remittance) and the portion of the earnings basis pool attributable to the remittance. No section 987 gain or loss is recognized on a distribution out of capital. Under DC’s pretransition method, DC’s basis in assets distributed by Branch (whether out of earnings or capital) is equal to Branch’s basis in the assets translated at the spot rate on the date of the distribution. Branch’s earnings are translated into U.S. dollars at the average exchange rate for the taxable year. DC first applied its earnings only method on a return filed before November 9, 2023. In addition, DC applied its earnings only method consistently to all of its section 987 QBUs and otherwise applied section 987 in a reasonable manner.

(C) *Application of the pretransition method before the transition date.* On

June 30, year 3, Branch distributed €100 cash to DC. Of this amount, €50 represented a remittance out of earnings, and €50 represented a distribution out of capital.

(1) *Remittance out of earnings.* For purposes of determining section 987 gain or loss recognized on the remittance, Branch’s earnings equity pool was equal to €50, and its earnings basis pool was equal to \$60, as shown in the table below. Because Branch remitted 100% of the earnings equity pool (€50), the entire earnings basis pool, or \$60, was attributable to the remittance. The value of the remittance was \$67.50 (€50 translated at the spot rate on June 30, year 3, of €1 = \$1.35). Therefore, in year 3, DC recognized section 987 gain of \$7.50, equal to the difference between the value of the remittance (\$67.50) and the portion of the basis pool attributable to the remittance (\$60). As a result of the remittance, the earnings equity pool and the earnings basis pool were each reduced to zero.

TABLE 5 TO PARAGRAPH (l)(3)(i)(C)(1)—EARNINGS EQUITY AND BASIS POOLS

	Equity pool	Translation rate	Basis pool
Year 2 Earnings	€25	€1 = \$1.15	\$28.75
Year 3 Earnings	€25	€1 = \$1.25	31.25
Total	€50		60

(2) *Basis of euros distributed.* In the hands of DC, the €100 distributed had a basis of \$135 (€100 translated at the spot rate on June 30, year 3, of €1 = \$1.35). DC did not recognize gain or loss under section 988 when it exchanged the €100 for \$135.

(ii) *Analysis—(A) DC’s method is an eligible pretransition method.* Unlike in paragraph (l)(2) of this section (*Example 2*), DC’s earnings only method would not result in the same total amount of income over the life of DC as an earnings and capital method described in paragraph (e)(4)(i) of this section because DC does not maintain capital basis and equity pools and DC translates the basis of all property distributed from Branch at the spot rate on the distribution date. However, this method is an eligible pretransition method under paragraph (e)(4)(iii) of this section because DC first applied its earnings only method on a return filed before November 9, 2023, DC applied its earnings only method consistently to all of its section 987 QBUs, and DC otherwise applied section 987 in a reasonable manner. Consequently, DC determines its pretransition gain or loss with respect to Branch under paragraph (e)(2) of this section.

(B) *Pretransition gain or loss.* Under paragraph (e)(2) of this section, DC’s pretransition gain or loss with respect to Branch is equal to the sum of the deemed termination amount described in paragraph (e)(2)(i)(A) of this section and the owner functional currency net value adjustment described in paragraph (e)(2)(i)(B) of this section. As explained in paragraphs (l)(3)(ii)(B)(1) and (2) of this section (*Example 3*), the deemed termination amount is zero and the owner functional currency net value adjustment is zero. Therefore, DC has no pretransition gain or loss with respect to Branch.

(1) *Deemed termination amount.* Under paragraph (e)(2)(i)(A) of this section, the deemed termination amount is the amount of section 987 gain or loss that would have been recognized by DC under the eligible pretransition method if Branch terminated and transferred all of its assets and liabilities to DC on December 31, year 3. Under DC’s eligible pretransition method, if Branch had transferred all of its assets and liabilities to DC, it would have been treated as a distribution out of capital. Under its eligible pretransition method, DC would not have recognized section 987 gain or loss on a distribution out of

capital. Therefore, the deemed termination amount is zero.

(2) *Owner functional currency net value adjustment.* On December 31, year 3, Branch has no liabilities and only one asset: land with a basis of €100. Under paragraph (e)(2)(i)(B) of this section, the owner functional currency net value adjustment is equal to the basis of the land, translated into U.S. dollars at the transition exchange rate, reduced by the basis of the land, translated into U.S. dollars at the pretransition translation rate. Under paragraph (d)(3)(i) of this section, the transition exchange rate is the spot rate applicable to December 31, year 3. Under paragraph (e)(2)(i)(C) of this section, the pretransition translation rate is the rate that would be used under DC’s eligible pretransition method to determine the basis of the land in the hands of DC if Branch transferred the land to DC on December 31, year 3. Under DC’s eligible pretransition method, if Branch transferred the land to DC, DC’s basis in the land would be equal to Branch’s basis (€100) translated at the spot rate on the date of the distribution. Therefore, the pretransition translation rate on December 31, year 3, is equal to the spot rate on December 31, year 3.

Consequently, the owner functional currency net value adjustment is zero.

(C) *Determination of unrecognized section 987 gain or loss in year 4.* For purposes of determining unrecognized section 987 gain or loss in year 4 under § 1.987–4(d), the owner functional currency net value of Branch on the last day of year 3 is determined by translating the €100 basis of the land at the spot rate on December 31, year 3 (€1 = \$1.40). Therefore, the owner functional currency net value of Branch on the last day of year 3 is \$140.

(4) *Example 4: Owner did not apply section 987(3)*—(i) *Facts.* The facts and exchange rates are the same as in paragraph (l)(1) of this section (*Example 1*), except that DC did not apply section 987(3) with respect to Branch and did not recognize section 987 gain or loss with respect to Branch before the transition date.

(ii) *Analysis*—(A) *DC's method is not an eligible pretransition method.* Because DC did not apply section 987(3) with respect to Branch before the transition date, DC did not apply an eligible pretransition method under paragraph (e)(4) of this section. Therefore, DC determines pretransition gain or loss under paragraph (e)(3) of this section.

(B) *Pretransition gain or loss.* Under paragraph (e)(3) of this section, DC's pretransition gain or loss with respect to Branch is equal to the annual unrecognized section 987 gain or loss with respect to Branch for all taxable years ending before the transition date in which DC was the owner of Branch (that is, years 1 through 3), reduced by section 987 gain or loss recognized by DC before the transition date. As explained in paragraphs (l)(4)(ii)(C) through (E) of this section (*Example 4*), DC's annual unrecognized section 987 gain for year 1 is \$7.50, DC's annual unrecognized section 987 gain for year 2 is \$16.25, and DC's annual unrecognized section 987 gain for year 3 is \$23.75. DC did not recognize any section 987 gain or loss with respect to Branch before the transition date. Therefore, DC has \$47.50 of pretransition gain with respect to Branch. Under paragraph (e)(5)(i)(A) of this section, the pretransition gain is treated as Branch's net accumulated unrecognized section 987 gain. However, if DC elects to recognize its pretransition gain ratably over the transition period under paragraph (e)(5)(ii) of this section, the pretransition gain is not treated as net accumulated unrecognized section 987 gain. Instead, DC recognizes \$4.75 (one tenth of its pretransition gain) for each of the ten

taxable years from year 4 through year 13.

(C) *Annual unrecognized section 987 gain or loss for year 1.* Under paragraph (e)(3)(iii) of this section, annual unrecognized section 987 gain or loss with respect to a section 987 QBU is determined under the rules of § 1.987–4(d), applied as though a current rate election was in effect for all relevant taxable years (such that all items are treated as marked items), but modified so that only §§ 1.987–4(d)(1) (change in owner functional currency net value) and 1.987–4(d)(10) (adjustment for residual increase or decrease to net assets) are applied. As explained in paragraphs (l)(4)(ii)(C)(1) and (2) of this section (*Example 4*), in year 1, the change in owner functional currency net value under § 1.987–4(d)(1) is an increase of \$165, and there is a negative adjustment of \$157.50 under § 1.987–4(d)(10). Therefore, DC's annual unrecognized section 987 gain for year 1 is \$7.50.

(1) *Change in owner functional currency net value for year 1.* On December 31, year 1, Branch held land with a basis of €100 and €50 cash. Therefore, on the last day of year 1, Branch's owner functional currency net value is \$165 (150 euros translated at the spot rate on December 31, year 1, of €1 = \$1.10). Because Branch was formed in year 1, its owner functional currency net value on the last day of the preceding taxable year is zero. See § 1.987–4(d)(1)(iii). Therefore, the change in owner functional currency net value is an increase of \$165.

(2) *Residual increase to net assets for year 1.* Under § 1.987–4(d)(10), unrecognized section 987 gain or loss for a taxable year is decreased by any residual increase to net assets (and increased by any residual decrease to net assets), translated into the owner's functional currency at the yearly average exchange rate for the taxable year. For this purpose, the residual increase (or decrease) to net assets is equal to the change in net value of the section 987 QBU, determined in the section 987 QBU's functional currency (that is, the QBU net value). See § 1.987–4(d)(10)(ii)(B) and (e)(2)(ii). On December 31, year 1, Branch held land with a basis of €100 euros and €50 cash. Therefore, on the last day of year 1, Branch has a QBU net value of €150. Because Branch was formed in year 1, its QBU net value on the last day of the preceding taxable year is zero. See § 1.987–4(d)(1)(iii). Therefore, the residual increase to net assets is €150. This results in a negative adjustment to annual unrecognized section 987 gain or loss of \$157.50 for year 1 (equal to €150

translated at the yearly average exchange rate for year 1 of €1 = \$1.05).

(D) *Annual unrecognized section 987 gain or loss for year 2.* As explained in paragraphs (l)(4)(ii)(D)(1) and (2) of this section (*Example 4*), in year 2, the change in owner functional currency net value under § 1.987–4(d)(1) is an increase of \$45, and there is a negative adjustment of \$28.75 under § 1.987–4(d)(10). Therefore, DC's annual unrecognized section 987 gain for year 2 is \$16.25.

(1) *Change in owner functional currency net value for year 2.* On December 31, year 2, Branch held land with a basis of €100 and €75 cash. Therefore, on the last day of year 2, Branch's owner functional currency net value is \$210 (175 euros translated at the spot rate on December 31, year 2, of €1 = \$1.20). As explained in paragraph (l)(4)(ii)(C)(1) of this section (*Example 4*), Branch's owner functional currency net value on the last day of year 1 was \$165. Therefore, the change in owner functional currency net value is an increase of \$45.

(2) *Residual increase to net assets for year 2.* On December 31, year 2, Branch held land with a basis of €100 and €75 cash. Therefore, on the last day of year 2, Branch has a QBU net value of €175. As explained in paragraph (l)(4)(ii)(C)(2) of this section (*Example 4*), Branch had a QBU net value of €150 on December 31, year 1. Therefore, the residual increase to net assets is €25. This results in a negative adjustment to annual unrecognized section 987 gain or loss of \$28.75 for year 2 (equal to a reduction of €25, translated at the yearly average exchange rate for year 2 of €1 = \$1.15).

(E) *Annual unrecognized section 987 gain or loss for year 3.* As explained in paragraphs (l)(4)(ii)(E)(1) and (2) of this section (*Example 4*), in year 3, the change in owner functional currency net value under § 1.987–4(d)(1) is a decrease of \$70, and there is a positive adjustment of \$93.75 under § 1.987–4(d)(10). Therefore, DC's annual unrecognized section 987 gain for year 3 is \$23.75.

(1) *Change in owner functional currency net value for year 3.* On December 31, year 3, Branch held land with a basis of €100. Therefore, on the last day of year 3, Branch's owner functional currency net value is \$140 (100 euros translated at the spot rate on December 31, year 3, of €1 = \$1.40). As explained in paragraph (l)(4)(ii)(D)(1) of this section (*Example 4*), Branch's owner functional currency net value on the last day of year 2 was \$210. Therefore, the change in owner functional currency net value is a decrease of \$70.

(2) *Residual decrease to net assets for year 3.* On December 31, year 3, Branch held land with a basis of €100. Therefore, on the last day of year 3, Branch has a QBU net value of €100. As explained in paragraph (l)(4)(ii)(D)(2) of this section (*Example 4*), Branch had a QBU net value of €175 on December 31, year 2. Therefore, the residual decrease to net assets is €75. This results in a positive adjustment to annual unrecognized section 987 gain or loss of \$93.75 for year 3 (equal to €75, translated at the yearly average exchange rate for year 3 of €1 = \$1.25).

(F) *Determination of unrecognized section 987 gain or loss in year 4.* For purposes of determining unrecognized section 987 gain or loss in year 4 under § 1.987-4(d), the owner functional currency net value of Branch on the last day of year 3 is determined by translating the €100 basis of the land at the spot rate on December 31, year 3 (€1 = \$1.40). Therefore, the owner functional currency net value of Branch on the last day of year 3 is \$140.

(5) *Example 5: Error in application of method—(i) Facts.* The facts are the same as described in paragraph (l)(1)(i) of this section (*Example 1*), except that DC inadvertently miscalculated the amount of the June 30, year 3, remittance as being €90 rather than €100. This reduced the amount of section 987 gain recognized by DC in year 3.

(ii) *Analysis.* DC committed an error in its application of the earnings and capital method to Branch. Under paragraph (e)(4)(iv)(A) of this section, DC is nonetheless treated as having applied an eligible pretransition method. However, under paragraph (e)(4)(iv)(B) of this section, DC must determine its pretransition gain or loss as though the error had not been made. Therefore, DC computes its pretransition gain or loss as described in paragraph (l)(1)(ii)(B) of this section (*Example 1*). DC has \$35 of pretransition gain with respect to Branch.

(6) *Example 6: Consistent practice not treated as an error—(i) Facts.* Before the transition date, DC used the earnings and capital method described in the 1991 proposed regulations under section 987 with respect to Branch, as described in paragraph (l)(1)(i) of this section (*Example 1*). In years 1, 2, and 3, Branch made recurring purchases of inventory from Owner, which Branch sold to unrelated customers. In connection with the purchase transactions, Branch transferred cash to Owner, and Owner transferred inventory to Branch. Owner did not take these transfers into account in determining the amount of any

remittance and, accordingly, did not recognize section 987 gain or loss with respect to these transfers. However, Owner consistently adjusted Branch's equity and basis pools in a reasonable manner to reflect all transfers between Owner and Branch; for this purpose, the amount of each transfer made in connection with the purchase transactions was translated using the average rate for the relevant taxable year. Owner also adjusted Branch's equity and basis pools to account for Branch's income from the sale of inventory.

(ii) *Analysis—(A) DC's method is an eligible pretransition method.* Before the transition date, DC followed the earnings and capital method described in the 1991 proposed regulations under section 987 with respect to Branch. This method is an eligible pretransition method under paragraph (e)(4)(i) of this section. Therefore, DC determines its pretransition gain or loss with respect to Branch under paragraph (e)(2) of this section.

(B) *Effect of consistent practice.* Before the transition date, Owner engaged in a consistent practice under which Owner did not account for inventory purchase transactions in determining the amount of a remittance requiring the recognition of gain or loss under section 987(3). However, Owner consistently accounted for the disregarded transfers in a reasonable manner for purposes of computing its equity and basis pools. Under paragraph (e)(4)(v) of this section, this consistent practice is not treated as an error in the application of a pretransition method and does not preclude Owner's method from being treated as an eligible pretransition method. Therefore, Owner must take this consistent practice into account in determining pretransition gain or loss under paragraph (e)(2) of this section. In particular, Owner must use the equity and basis pools computed under its consistent practice (rather than the equity and basis pools it would have computed if it had historically taken the disregarded transfers into account in determining the amount of remittances) to determine the deemed termination amount under paragraph (e)(2)(i)(A) of this section.

§ 1.987-11 Suspended section 987 loss relating to certain elections; loss-to-the-extent-of-gain rule.

(a) *In general.* This section provides rules relating to suspended section 987 loss. Paragraph (b) of this section provides rules for computing the cumulative suspended section 987 loss with respect to a section 987 QBU or successor suspended loss QBU.

Paragraph (c) of this section provides rules that suspend section 987 loss that would otherwise be recognized when a current rate election is in effect. Paragraph (d) of this section provides rules that treat net unrecognized section 987 loss and deferred section 987 loss as suspended section 987 loss when an annual recognition election is made or a current rate election is revoked. Paragraph (e) of this section describes the extent to which suspended section 987 loss is recognized under a loss-to-the-extent-of-gain rule. Paragraph (f) of this section provides rules for determining recognition groupings based on the source and character of section 987 gain or loss. Paragraph (g) of this section provides examples illustrating the rules of this section.

(b) *Cumulative suspended section 987 loss in a recognition grouping—(1) In general.* The cumulative suspended section 987 loss in a recognition grouping with respect to a section 987 QBU or a successor suspended loss QBU for the current taxable year is equal to the cumulative suspended section 987 loss in the recognition grouping for the prior taxable year, decreased by the amount of suspended section 987 loss in the recognition grouping that was recognized with respect to the QBU under paragraph (e) of this section or under § 1.987-13(b) through (d) in the prior taxable year, and increased by the amount that becomes suspended section 987 loss in the recognition grouping with respect to the QBU in the current taxable year (including under § 1.987-10(e)(5)(i)(B)(1)). If the taxable year is the first taxable year of the section 987 QBU (or the first taxable year in which the section 987 regulations apply), the cumulative suspended section 987 loss for the prior taxable year is zero. An owner's (or original suspended loss QBU owner's) total cumulative suspended section 987 loss in a recognition grouping is equal to the sum of its cumulative suspended section 987 gain or loss with respect to each section 987 QBU and successor suspended loss QBU.

(2) *Combined QBU.* For purposes of paragraph (b)(1) of this section, in the taxable year of a combination, the cumulative suspended section 987 loss in a recognition grouping with respect to a combined QBU for the prior taxable year is equal to the sum of the cumulative suspended section 987 loss in the recognition grouping with respect to each combining QBU for the prior taxable year; the suspended section 987 loss in a recognition grouping with respect to a combined QBU that was recognized in the prior taxable year is equal to sum of the suspended section

987 loss in the recognition grouping with respect to each combining QBU that was recognized in the prior taxable year.

(3) *Separated QBU.* For purposes of paragraph (b)(1) of this section, in the taxable year of a separation, the cumulative suspended section 987 loss in a recognition grouping with respect to a separated QBU for the prior taxable year is equal to the cumulative suspended section 987 loss in the recognition grouping with respect to the separating QBU for the prior taxable year multiplied by the separation fraction; the suspended section 987 loss in a recognition grouping with respect to a separated QBU that was recognized in the prior taxable year is equal to the suspended section 987 loss in the recognition grouping with respect to the separating QBU that was recognized in the prior taxable year multiplied by the separation fraction.

(c) *Suspension of section 987 loss for taxable years in which a current rate election is in effect and an annual recognition election is not in effect—(1) In general.* Except as provided in paragraph (c)(2) of this section, in a taxable year in which a current rate election is in effect and an annual recognition election is not in effect, to the extent that an owner's net unrecognized section 987 loss with respect to a section 987 QBU would otherwise be recognized under § 1.987–5 (including pursuant to § 1.987–12(b)), or its deferred section 987 loss would otherwise be recognized under § 1.987–12(c), the net unrecognized section 987 loss or deferred section 987 loss is not recognized by the owner and instead becomes suspended section 987 loss. See paragraph (g)(1) of this section (*Example 1*) for an illustration of this rule.

(2) *De minimis rule.* Paragraph (c)(1) of this section does not apply in a taxable year of an owner in which the total amount of net unrecognized section 987 loss or deferred section 987 loss of the owner and all members of the owner's controlled group that would (but for the application of this paragraph (c)(2) and § 1.987–7(d)(2)(iii)) become suspended section 987 loss under paragraph (c)(1) of this section or § 1.987–7(d) does not exceed the lesser of—

- (i) \$3 million; or
- (ii) Two percent of the total amount of gross income of the owner and all members of the owner's controlled group for the taxable year.

(3) *Taxable year of controlled group members—(i) In general.* Except as provided in paragraph (c)(3)(ii) of this section, for purposes of applying

paragraph (c)(2) of this section with respect to an owner, suspended section 987 loss and gross income of a member of the owner's controlled group is determined by reference to the member's suspended section 987 loss and gross income for its taxable year ending with or within the owner's taxable year.

(ii) *Owner is a CFC.* For purposes of applying paragraph (c)(2) of this section with respect to an owner that is a CFC, suspended section 987 loss and gross income of a member of the owner's controlled group is determined by reference to the member's suspended section 987 loss and gross income for its taxable year ending with or within the owner's required year described in section 898(c)(1), without regard to section 898(c)(2).

(d) *Suspension of net unrecognized section 987 loss upon making or revoking certain elections—(1) Making an annual recognition election.* At the beginning of the first taxable year for which an annual recognition election is in effect, an owner's net accumulated unrecognized section 987 loss and deferred section 987 loss are converted into suspended section 987 loss if either—

(i) A current rate election was in effect for the immediately preceding taxable year; or

(ii) A current rate election was not in effect for the immediately preceding taxable year and, as of the beginning of the taxable year, the sum of the owner's net accumulated unrecognized section 987 loss and deferred section 987 loss exceeds the sum of the owner's net accumulated unrecognized section 987 gain and deferred section 987 gain by more than \$5 million.

(2) *Revoking a current rate election.* At the beginning of the first taxable year in which a current rate election ceases to be in effect, an owner's net accumulated unrecognized section 987 loss and deferred section 987 loss are converted into suspended section 987 loss. See paragraph (g)(3) of this section (*Example 3*) for an illustration of this rule.

(e) *Loss-to-the-extent-of-gain rule—(1) In general.* An owner of a section 987 QBU (or an original suspended loss QBU owner) only recognizes suspended section 987 loss to the extent described in this paragraph (e) (the *loss-to-the-extent-of-gain rule*). See § 1.987–13(b) through (d) for rules requiring the recognition of additional suspended section 987 loss (after the application of the loss-to-the-extent-of-gain rule) in connection with certain transactions.

(2) *Separate determination for each recognition grouping.* The amount of

suspended section 987 loss recognized is determined separately for the suspended section 987 loss in each recognition grouping. Because the recognition groupings generally are determined on the basis of the initial assignment of section 987 gain or loss under § 1.987–6(b)(2)(i), the loss-to-the-extent-of-gain rule generally is applied on the basis of the initial assignment of section 987 gain or loss.

(3) *Amount of suspended section 987 loss recognized.* Except as provided in paragraph (e)(5) or (6) of this section, the amount of suspended section 987 loss in each recognition grouping that an owner recognizes in a taxable year is equal to the sum (if positive) of the current year gain amount described in paragraph (e)(3)(i) of this section and the lookback gain amount described in paragraph (e)(3)(ii) of this section, but may not exceed the owner's total cumulative suspended section 987 loss in the recognition grouping. If the sum of the current year gain amount and the lookback gain amount is negative, then the amount of suspended section 987 loss recognized under this paragraph (e) is zero. See paragraphs (g)(1) and (2) of this section (*Examples 1 and 2*) for an illustration of this rule.

(i) *Current year gain amount.* The current year gain amount described in this paragraph (e)(3)(i) is equal to the section 987 gain in the recognition grouping that is recognized by the owner in the taxable year, reduced (including below zero) by section 987 loss (other than suspended section 987 loss) in the recognition grouping that is recognized by the owner in the taxable year.

(ii) *Lookback gain amount.* The lookback gain amount described in this paragraph (e)(3)(ii) is equal to the section 987 gain in the recognition grouping that was recognized by the owner in the lookback period, reduced (including below zero) by section 987 loss (other than suspended section 987 loss described in paragraph (e)(3)(iii) of this section) in the recognition grouping that was recognized by the owner in the lookback period. The total amount of suspended section 987 loss recognized by reason of the recognition of an amount of section 987 gain cannot, in any event, exceed the amount of section 987 gain recognized.

(iii) *Suspended section 987 loss not taken into account—(A) In general.* For purposes of applying paragraph (e)(3)(ii) of this section in a taxable year (the *current taxable year*), suspended section 987 loss recognized during the lookback period is not taken into account if it was recognized under this paragraph (e) by reason of the recognition of section 987

gain that was recognized before the lookback period for the current taxable year.

(B) *Ordering rule.* For purposes of this paragraph (e)(3)(iii), suspended section 987 loss is treated as recognized by reason of the most recently recognized section 987 gain in the same recognition grouping. See paragraph (g)(2) of this section (*Example 2*) for an illustration of this rule.

(iv) *Lookback period*—(A) *In general.* Except as provided in paragraph (e)(3)(iv)(B) of this section, the lookback period with respect to a taxable year of an owner means the three preceding taxable years of the owner (or, if the owner was not in existence for three preceding taxable years, each taxable year in which the owner existed), but it does not include any taxable year beginning before the transition date described in § 1.987–10(c)(1).

(B) *Taxable years in which both a current rate election and an annual recognition election are in effect.* In a taxable year of an owner in which both a current rate election and an annual recognition election are in effect, the lookback period includes all prior taxable years of the owner in which both a current rate election and an annual recognition election were continuously in effect.

(v) *Anti-abuse rule.* If an owner recognizes section 987 gain with a principal purpose of reducing the Federal income tax liability of the owner (or its U.S. shareholders or partners, as applicable), including over multiple taxable years, the section 987 gain is disregarded for purposes of this paragraph (e)(3). For example, this paragraph (e)(3)(v) may apply if an owner that is a CFC recognizes section 987 gain that is offset by a tax attribute of one of the CFC's U.S. shareholders that would not otherwise be used (such as excess foreign tax credits with respect to section 951A category income, or a tested loss). In determining whether a principal purpose described in this paragraph (e)(3)(v) exists, all relevant facts and circumstances are considered, including the extent to which the transaction giving rise to the recognition of section 987 gain resulted in a sustained economic contraction of the section 987 QBU over a period of at least twelve months.

(4) *Suspended section 987 loss recognized with respect to each section 987 QBU and suspended section 987 loss QBU.* The amount of suspended section 987 loss in a recognition grouping that is recognized by an owner in a taxable year is treated as attributable to each section 987 QBU or successor suspended loss QBU in

proportion to the QBU's suspended section 987 loss in that recognition grouping.

(5) *Section 381(a) transactions*—(i) *In general.* Except as provided in paragraph (e)(5)(ii) of this section (or to the extent that other limitations apply), if one corporation (acquiring corporation) acquires the assets of another corporation (transferor corporation) in a transaction described in section 381(a), section 987 gain or loss recognized by the transferor corporation during the lookback period is taken into account in determining the lookback gain amount of the acquiring corporation in taxable years ending after the transaction under paragraph (e)(3)(ii) of this section. If the lookback period for a taxable year of the acquiring corporation is determined under paragraph (e)(3)(iv)(A) of this section, the lookback period includes each taxable year of the transferor corporation ending with or within the current taxable year of the acquiring corporation or during the acquiring corporation's lookback period. If the lookback period for a taxable year of the acquiring corporation is determined under paragraph (e)(3)(iv)(B) of this section, the lookback period includes only taxable years of the transferor corporation in which both an annual recognition election and a current rate election were continuously in effect before the transaction (and only if both elections were continuously in effect from the date of the transaction through the current taxable year).

(ii) *Limitation for inbound nonrecognition transactions.* If a foreign corporation ceases to exist in a transaction described in § 1.987–8(c)(1)(ii) (inbound section 332 liquidation) or § 1.987–8(c)(2)(ii) (inbound reorganization), section 987 gain recognized by the foreign corporation before the transaction is disregarded for purposes of applying paragraph (e)(3) of this section in taxable years ending after the transaction.

(6) *Consolidated group members*—(i) *In general.* All members of a consolidated group are treated as a single owner for purposes of applying this paragraph (e).

(ii) *Suspended section 987 losses arising in separate return limitation years.* This paragraph (e)(6)(ii) applies to suspended section 987 losses arising in a separate return limitation year (SRLY, as defined in § 1.1502–1(f)) or treated as arising in a SRLY under the principles of § 1.1502–21(c) (*SRLY section 987 losses*). The aggregate of a member's SRLY section 987 losses that are included in the determination of

consolidated taxable income for all consolidated return years of the group may not exceed the aggregate consolidated net income for all consolidated return years of the group determined by reference to only the member's items of section 987 gain or loss, including the member's section 987 losses actually absorbed by the group in the taxable year (whether or not absorbed by the member). For purposes of applying this paragraph (e)(6)(ii), the principles of § 1.1502–21(c) (including the SRLY subgroup principles of § 1.1502–21(c)(2)) apply with appropriate adjustments.

(f) *Recognition groupings.* The term *recognition grouping* means the section 987 gain or loss (including section 987 gain or loss that is recognized under § 1.987–5, deferred section 987 gain or loss, suspended section 987 loss, or pretransition gain or loss that is recognized under § 1.987–10(e)(5)(ii)) described in paragraph (f)(1) or (2) of this section, as applicable. If an owner has suspended section 987 loss with respect to a terminating QBU in a taxable year ending before the transition date described in § 1.987–10(c)(1), section 987 gain or loss of the owner (other than section 987 gain or loss with respect to the terminating QBU) is assigned to a recognition grouping based on the method that is used to determine the source and character of section 987 gain or loss for that taxable year.

(1) *Sourcing and section 904 category.* Except as provided in paragraph (f)(2) of this section, a recognition grouping includes only section 987 gain or loss that is initially assigned to one of the following statutory and residual groupings—

- (i) U.S. source income; or
- (ii) Foreign source income in a single section 904 category.

(2) *Statutory and residual groupings for CFC owners.* In the case of an owner that is a controlled foreign corporation, a recognition grouping includes only section 987 gain or loss that is initially assigned to one of the statutory and residual groupings described in paragraph (f)(1) of this section and that is also initially assigned to one of the following statutory and residual groupings—

- (i) Tentative tested income;
- (ii) Each separate subpart F income group (as defined in § 1.960–1(d)(2)(ii)(B));
- (iii) Income described in section 952(b) (ECI that is excluded from subpart F income); or
- (iv) Income not described in paragraphs (f)(2)(i) through (iii) of this section.

(g) *Examples.* The following examples illustrate the application of this section.

(1) *Example 1: Suspension of section 987 loss and recognition of suspended section 987 loss—(i) Facts.* CFC is a controlled foreign corporation that has the U.S. dollar as its functional currency. CFC owns three section 987 QBUs, QBU1, QBU2, and QBU3. QBU1 has the euro as its functional currency, QBU2 has the pound as its functional currency, and QBU3 has the yen as its functional currency. CFC is subject to a current rate election but not an annual recognition election. CFC is also subject to an election under § 1.987–6(b)(2)(i)(C) (treating section 987 gain or loss relating to passive foreign personal holding company income as attributable to section 988 transactions). An election has not been made under § 1.951A–2(c)(7)(viii) (GILTI high-tax exclusion) with respect to CFC. In year 1, CFC did not have cumulative suspended section 987 loss with respect to any of its QBUs and did not have outstanding deferred section 987 gain or loss. In the three years before year 2, CFC did not recognize any section 987 gain or loss. In year 2, CFC has net unrecognized section 987 loss of \$200 with respect to QBU1, net unrecognized section 987 loss of \$1,000 with respect to QBU2, and net unrecognized section 987 gain of \$1,000 with respect to QBU3. In year 2, each QBU makes a remittance, and CFC's remittance proportion (determined under § 1.987–5(b)(1)) is 25% with respect to QBU1, 15% with respect to QBU2, and 10% with respect to QBU3. For purposes of § 1.987–6(b)(2)(i), all of QBU1's assets generate foreign source passive category income that corresponds to one or more subpart F income groups described in § 1.960–1(d)(2)(ii)(B)(2)(i) through (v), and all of QBU2's and QBU3's assets generate foreign source general category tested income. Another member of CFC's controlled group owns a section 987 QBU with respect to which \$10 million of net unrecognized section 987 loss becomes suspended section 987 loss under paragraph (c)(1) of this section in year 2.

(ii) *Analysis—(A) Application of §§ 1.987–5 and 1.987–6 and paragraph (c) of this section.* In year 2, CFC recognizes \$100 of section 987 gain with respect to QBU3 (10% of \$1,000) under § 1.987–5(a). Under § 1.987–6(b)(2)(i)(A), (B), and (D), the section 987 gain is initially characterized as foreign source general category tentative tested income. If a current rate election was not in effect, in year 2 CFC would recognize \$50 of section 987 loss with respect to QBU1 (25% of \$200) and \$150 of section 987 loss with respect to

QBU2 (15% of \$1,000). However, under paragraph (c) of this section, these amounts instead become suspended section 987 loss. The de minimis rule under paragraph (c)(2) of this section does not apply because a member of CFC's controlled group has more than \$3 million of section 987 loss that is suspended in year 2 under paragraph (c)(1) of this section. Under § 1.987–6(b)(2)(i)(A) and (B), the \$50 of suspended section 987 loss with respect to QBU1 is initially characterized as foreign source passive category income assigned to a subpart F income group described in § 1.960–1(d)(2)(ii)(B)(2)(i) through (v), and is treated as foreign currency loss of the CFC attributable to section 988 transactions not directly related to the business needs of the CFC because an election under § 1.987–6(b)(2)(i)(C) is in effect. Under § 1.987–6(b)(2)(i)(A), (B), and (D), the \$150 of suspended section 987 loss with respect to QBU2 is initially characterized as foreign source general category tentative tested income.

(B) *Cumulative suspended section 987 loss.* Under paragraph (b) of this section, in year 2, CFC's cumulative suspended section 987 loss in the recognition grouping of foreign source passive category income in a separate subpart F income group for foreign currency gains of CFC with respect to QBU1 is \$50, the amount that became suspended section 987 loss in the recognition grouping in year 2. In addition, CFC's total cumulative suspended section 987 loss in that recognition grouping is \$50. Similarly, CFC's cumulative suspended section 987 loss in the recognition grouping of foreign source general category tentative tested income with respect to QBU2 is \$150, the amount that became suspended section 987 loss in the recognition grouping in year 2. In addition, CFC's total cumulative suspended section 987 loss in that recognition grouping is \$150.

(C) *Current year gain amount and lookback gain amount.* Under paragraph (e)(3) of this section, in year 2, CFC recognizes suspended section 987 loss in a recognition grouping to the extent of the sum of the current year gain amount described in paragraph (e)(3)(i) of this section and the lookback gain amount described in paragraph (e)(3)(ii) of this section. In the recognition grouping of foreign source general category tentative tested income, the current year gain amount described in paragraph (e)(3)(i) of this section is equal to the section 987 gain of \$100 recognized by CFC in year 2 with respect to QBU3. The current year gain amount for all other recognition groupings is zero. During the lookback

period (the three years before year 2), CFC did not recognize any section 987 gain or loss. Therefore, the lookback gain amount described in paragraph (e)(3)(ii) of this section is zero for all recognition groupings.

(D) *Recognition of suspended section 987 loss.* In year 2, CFC has \$50 of total cumulative suspended section 987 loss in the recognition grouping of foreign source passive category income in a separate subpart F income group for foreign currency gains of CFC and \$150 of total cumulative suspended section 987 loss in the recognition grouping of foreign source general category tentative tested income. In the recognition grouping of foreign source general category tentative tested income, CFC has a current year gain amount of \$100 and a lookback gain amount of zero (\$100 in total). Therefore, CFC recognizes \$100 of suspended section 987 loss in that recognition grouping. Under paragraph (e)(4) of this section, the cumulative suspended section 987 loss that is recognized by CFC is attributable to QBU2, because QBU2 is CFC's only QBU with cumulative suspended section 987 loss in the recognition grouping of foreign source general category tentative tested income. Because no election under § 1.951A–2(c)(7) applies in year 2, both the \$100 of recognized section 987 gain and the \$100 of recognized section 987 loss are allocated to foreign source general category tested income. See § 1.987–6(b)(2)(ii). The amounts of suspended section 987 loss not recognized (that is, \$50 of suspended section 987 loss assigned to foreign source passive category income in the subpart F income group for foreign currency gains of CFC with respect to QBU1 and \$50 of suspended section 987 loss assigned to foreign source general category tentative tested income with respect to QBU2) remain suspended.

(2) *Example 2: Recognition of suspended section 987 loss by reason of gain recognized during the lookback period—(i) Facts.* CFC is a controlled foreign corporation that has the U.S. dollar as its functional currency. CFC owns QBU1, a section 987 QBU with the euro as its functional currency, and CFC has no other QBUs. Assume that all section 987 gain or loss (including suspended section 987 loss) is assigned to the same recognition grouping. CFC is subject to a current rate election but not an annual recognition election. Before year 1, QBU1 does not have cumulative suspended section 987 loss. In year 1, CFC recognizes section 987 gain of \$10 million with respect to QBU1. In year 3, CFC recognizes section 987 gain of \$15 million with respect to

QBU1. In year 4, QBU1 has net unrecognized section 987 loss, and \$10 million of the net unrecognized section 987 loss becomes suspended section 987 loss under paragraph (c) of this section. In year 6, an additional \$10 million of net unrecognized section 987 loss with respect to QBU1 becomes suspended section 987 loss under paragraph (c) of this section.

(ii) *Analysis*—(A) *Recognition of suspended section 987 loss in year 4.* In year 4, CFC's total cumulative suspended section 987 loss is \$10 million (that is, the loss that becomes suspended in year 4). The current year gain amount under paragraph (e)(3)(i) of this section is zero, because CFC does not recognize section 987 gain in year 4. The lookback period under paragraph (e)(3)(iv)(A) of this section is three years (years 1 through 3). The lookback gain amount under paragraph (e)(3)(ii) of this section is \$25 million (the sum of the \$10 million of section 987 gain recognized in year 1 and the \$15 million of section 987 gain recognized in year 3). Therefore, under paragraph (e)(3) of this section, CFC recognizes suspended section 987 loss of \$10 million. Under paragraph (e)(3)(iii)(B) of this section, the suspended section 987 loss is considered to be recognized by reason of the section 987 gain recognized in year 3, which is the most recent taxable year in which section 987 gain was recognized.

(B) *Recognition of suspended section 987 loss in year 6.* In year 6, CFC's total cumulative suspended section 987 loss is \$10 million (that is, the loss that becomes suspended in year 6). The current year gain amount under paragraph (e)(3)(i) of this section is zero, because CFC does not recognize section 987 gain in year 6. The lookback period under paragraph (e)(3)(iv)(A) of this section is three years (years 3 through 5). The lookback gain amount under paragraph (e)(3)(ii) of this section is \$5 million (the sum of the section 987 gain of \$15 million recognized in year 3 and the suspended section 987 loss of \$10 million recognized in year 4 by reason of the section 987 gain recognized in year 3). Therefore, under paragraph (e)(3) of this section, CFC recognizes \$5 million of suspended section 987 loss in year 6.

(iii) *Alternative facts.* Assume the facts are the same as described in paragraph (g)(2)(i) of this section, with the following modifications. In year 1, CFC recognizes section 987 gain of \$10 million with respect to QBU1. CFC does not recognize section 987 gain in year 3. In year 4, \$10 million of net unrecognized section 987 loss with respect to QBU1 becomes suspended

section 987 loss under paragraph (c) of this section. In year 5, CFC recognizes section 987 gain of \$15 million with respect to QBU1. In year 6, \$10 million of net unrecognized section 987 loss with respect to QBU1 becomes suspended section 987 loss under paragraph (c) of this section.

(iv) *Analysis of alternative facts*—(A) *Recognition of suspended section 987 loss in year 4.* In year 4, CFC's total cumulative suspended section 987 loss is \$10 million (that is, the loss that becomes suspended in year 4). The current year gain amount under paragraph (e)(3)(i) of this section is zero, because CFC does not recognize section 987 gain in year 4. The lookback period under paragraph (e)(3)(iv)(A) of this section is three years (years 1 through 3). The lookback gain amount under paragraph (e)(3)(ii) of this section is \$10 million (equal to the \$10 million of section 987 gain recognized in year 1). Therefore, under paragraph (e)(3) of this section, CFC recognizes suspended section 987 loss of \$10 million in year 4. Under paragraph (e)(3)(iii)(B) of this section, the suspended section 987 loss is considered to be recognized by reason of the section 987 gain recognized in year 1, which is the most recent taxable year in which section 987 gain was recognized.

(B) *Recognition of suspended section 987 loss in year 6.* In year 6, CFC's total cumulative suspended section 987 loss is \$10 million (that is, the loss that becomes suspended in year 6). The current year gain amount under paragraph (e)(3)(i) of this section is zero because CFC does not recognize section 987 gain in year 6. The lookback period under paragraph (e)(3)(iv)(A) of this section is three years (years 3 through 5). The lookback gain amount under paragraph (e)(3)(ii) of this section is \$15 million (equal to the section 987 gain of \$15 million recognized in year 5). Under paragraph (e)(3)(iii)(A) of this section, the suspended section 987 loss recognized in year 4 is not taken into account in determining the lookback gain amount, because it was recognized by reason of the section 987 gain recognized in year 1 (before the beginning of the lookback period for year 6). Therefore, under paragraph (e)(3) of this section, CFC recognizes \$10 million of suspended section 987 loss in year 6.

(3) *Example 3: Suspension of section 987 loss when a current rate election is revoked*—(i) *Facts.* U.S. Corp is a domestic corporation that owns all of the interests in DE1. DE1 owns Business A, which is a section 987 QBU of U.S. Corp. In year 1, U.S. Corp made a current rate election but not an annual

recognition election. In year 9, U.S. Corp has net unrecognized section 987 loss of \$2 million with respect to Business A, which is not recognized or suspended in year 9. U.S. Corp revokes its current rate election effective for year 10. In year 10, before the application of this section, U.S. Corp has net accumulated unrecognized section 987 loss of \$2 million.

(ii) *Analysis.* Under paragraph (d)(2) of this section, U.S. Corp's net accumulated unrecognized section 987 loss of \$2 million with respect to Business A is converted into suspended section 987 loss at the beginning of year 10, the first taxable year in which the current rate election ceases to be in effect.

§ 1.987–12 Deferral of section 987 gain or loss.

(a) *Overview*—(1) *Scope.* This section provides rules that defer the recognition of section 987 gain or loss and rules for recognizing (or suspending) deferred section 987 gain or loss. This paragraph (a) provides an overview of this section and certain instances when this section does not apply. Paragraph (b) of this section describes the extent to which net unrecognized section 987 gain or loss is recognized under § 1.987–5 (or in certain cases, suspended) or becomes deferred section 987 gain or loss in connection with a deferral event. Paragraph (c) of this section describes the extent to which deferred section 987 gain or loss is recognized (or in certain cases, suspended) upon the occurrence of subsequent events. Paragraph (d) of this section provides a rule relating to the treatment of a successor deferral QBU when deferred section 987 loss becomes suspended section 987 loss. Paragraph (e) of this section provides an anti-abuse rule. Paragraph (f) of this section provides rules for determining the deferred section 987 gain or loss of combined and separated QBUs. Paragraph (g) of this section provides definitions. Paragraph (h) of this section provides examples illustrating the rules of this section.

(2) *Exceptions*—(i) *Annual recognition election.* This section does not apply to a termination of a section 987 QBU in a taxable year in which an annual recognition election is in effect.

(ii) *De minimis rule.* This section does not apply in a taxable year if the aggregate amount of net unrecognized section 987 gain or loss of the owner with respect to all of its section 987 QBUs that would become deferred section 987 gain or loss under this section does not exceed \$5 million.

(b) *Treatment of section 987 gain and loss in connection with a deferral event.*

Notwithstanding § 1.987–5 (general rule requiring recognition of section 987 gain or loss in the taxable year of a remittance), the owner of a section 987 QBU with respect to which a deferral event occurs (an *original deferral QBU*) includes in taxable income section 987 gain or loss in connection with the deferral event only to the extent provided in this paragraph (b).

(1) *Gain or loss recognized (or suspended) in the taxable year of a deferral event.* In the taxable year of a deferral event with respect to an original deferral QBU, the owner of the original deferral QBU recognizes section 987 gain or loss under § 1.987–5, except that, solely for purposes of applying § 1.987–5, all assets and liabilities of the original deferral QBU that, immediately after the deferral event, are reflected on the books and records of a successor deferral QBU are treated as not having been transferred and therefore as remaining on the books and records of the original deferral QBU notwithstanding the deferral event. Notwithstanding the prior sentence, any section 987 loss that would otherwise be recognized under this paragraph (b)(1) and § 1.987–5 may instead become suspended loss under § 1.987–11(c) if a current rate election is in effect, or under § 1.987–13(h) if the deferral event also constitutes an outbound loss event.

(2) *Deferred section 987 gain or loss—*(i) *In general.* In the taxable year of a deferral event with respect to an original deferral QBU, any net unrecognized section 987 gain or loss that is not recognized or suspended in the taxable year of the deferral event becomes deferred section 987 gain or loss of the original deferral QBU owner. Suspended section 987 loss does not become deferred section 987 loss under this paragraph (b)(2).

(ii) *Deferred section 987 gain or loss attributable to a successor deferral QBU.* A portion of the deferred section 987 gain or loss described in paragraph (b)(2)(i) of this section becomes deferred section 987 gain or loss with respect to each successor deferral QBU. Such portion is equal to the deferred section 987 gain or loss multiplied by a fraction, the numerator of which is the aggregate adjusted basis of the gross assets transferred to the successor deferral QBU in connection with the deferral event and the denominator of which is the aggregate adjusted basis of the gross assets transferred to all successor deferral QBUs in connection with the deferral event.

(c) *Recognition (or suspension) of deferred section 987 gain or loss following a deferral event.* An original deferral QBU owner recognizes deferred

section 987 gain or loss with respect to a successor deferral QBU in the taxable year of the deferral event and in subsequent taxable years as provided in this paragraph (c).

(1) *Recognition upon a subsequent remittance—*(i) *In general.* Except as provided in paragraph (c)(2) of this section, an original deferral QBU owner recognizes deferred section 987 gain or loss in the taxable year of the deferral event, and in subsequent taxable years, upon a remittance from a successor deferral QBU to the owner of the successor deferral QBU (*successor deferral QBU owner*) in the amount described in paragraph (c)(1)(ii) of this section. Notwithstanding the prior sentence, any deferred section 987 loss that would otherwise be recognized under this paragraph (c)(1) may instead become suspended section 987 loss under § 1.987–11(c) (if a current rate election is in effect with respect to the original deferral QBU owner) or under § 1.987–7(d)(1)(ii) (in the case of a partnership).

(ii) *Amount.* The amount of deferred section 987 gain or loss that is recognized (or suspended) pursuant to this paragraph (c)(1) in a taxable year of the original deferral QBU owner is the original deferral QBU owner's outstanding deferred section 987 gain or loss (that is, the amount of deferred section 987 gain or loss not previously recognized or suspended) with respect to the successor deferral QBU multiplied by the remittance proportion of the successor deferral QBU owner with respect to the successor deferral QBU for the taxable year ending with or within the taxable year of the original deferral QBU owner, as determined under § 1.987–5(b) without regard to any annual recognition election of the successor deferral QBU owner. See paragraph (h)(4) of this section (*Example 4*) for an illustration of this rule.

(iii) *Deemed remittance by a successor deferral QBU.* For purposes of this paragraph (c)(1), in a taxable year of the original deferral QBU owner in which a successor deferral QBU ceases to be owned by a member of the controlled group that includes the original deferral QBU owner, the successor deferral QBU is treated as having a remittance proportion of one. Accordingly, if a successor deferral QBU ceases to be owned by a member of the controlled group that includes the original deferral QBU owner, the original deferral QBU owner's outstanding deferred section 987 gain or loss with respect to that successor deferral QBU will be recognized (or suspended). For purposes of this

paragraph (c)(1), if the original deferral QBU owner goes out of existence and there is no qualified successor, in the last taxable year of the original deferral QBU owner, each successor deferral QBU is treated as having a remittance proportion of one. This paragraph (c)(1)(iii) does not affect the application of the section 987 regulations to the successor deferral QBU owner with respect to its ownership of the successor deferral QBU.

(2) *Deferral events and outbound loss events with respect to a successor deferral QBU.* Notwithstanding paragraph (c)(1) of this section, if assets of the successor deferral QBU (*transferred assets*) are transferred (or deemed transferred) in a transaction that would constitute a deferral event or an outbound loss event if the original deferral QBU owner owned the successor deferral QBU directly and the original deferral QBU owner had net unrecognized section 987 gain or loss with respect to the successor deferral QBU equal to its outstanding deferred section 987 gain or loss with respect to the successor deferral QBU (the *deemed transaction*), then, in accordance with the rules of this section and § 1.987–13(h)—

(i) The original deferral QBU owner recognizes its outstanding deferred section 987 gain or loss, or suspends its outstanding deferred section 987 loss, to the extent it would have recognized or suspended net unrecognized section 987 gain or loss as a result of the deemed transaction; and

(ii) Each section 987 QBU is a successor deferral QBU to the extent it would have been after the deemed transaction and the original deferral QBU owner has deferred section 987 gain or loss with respect to the successor deferral QBU to the extent it would have after the deemed transaction;

(iii) Each eligible QBU is a successor suspended loss QBU to the extent it would have been after the deemed transaction and the original deferral QBU owner has suspended section 987 loss with respect to the suspended loss QBU to the extent it would have after the deemed transaction.

(d) *Successor deferral QBU becomes a successor suspended loss QBU.* A successor deferral QBU becomes a successor suspended loss QBU, and an original deferral QBU owner becomes an original suspended loss QBU owner, if any of the original deferral QBU owner's deferred section 987 loss with respect to the successor deferral QBU becomes suspended section 987 loss. An eligible QBU may be both a successor deferral QBU and a successor suspended loss

QBU and the original deferral QBU owner may also be an original suspended loss QBU owner.

(e) *Anti-abuse rule.* No section 987 loss is recognized under this section, § 1.987–5 or § 1.987–13 in connection with a transaction or series of transactions that are undertaken with a principal purpose of avoiding the purposes of this section.

(f) *Combinations and separations of successor deferral QBUs.* A combined QBU is a successor deferral QBU if either combining QBU was a successor deferral QBU. A separated QBU is a successor deferral QBU if the separating QBU was a successor deferral QBU.

(1) *Combined QBU.* The outstanding deferred section 987 gain or loss of a combined QBU in each recognition grouping for a taxable year is equal to the sum of the combining QBUs' outstanding deferred section 987 gain or loss in that recognition grouping.

(2) *Separated QBU.* The outstanding deferred section 987 gain or loss of a separated QBU in each recognition grouping for a taxable year is equal to the separating QBU's outstanding deferred section 987 gain or loss in each recognition grouping multiplied by the separation fraction.

(g) *Definitions.* The following definitions apply for purposes of this section.

(1) *Deferral event.* A deferral event with respect to a section 987 QBU means any transaction or series of transactions that satisfy the conditions described in both paragraphs (g)(1)(i) and (ii) of this section.

(i) *Events.* The transaction or series of transactions constitutes:

(A) A termination of the section 987 QBU under § 1.987–8(b)(2) (substantially all the assets transferred to the owner), § 1.987–8(b)(5) (section 987 QBU ceases to be a section 987 QBU), or § 1.987–8(b)(6) (individual or corporation ceases to be a direct owner of a section 987 QBU); or

(B) [Reserved]

(ii) *Assets on books of successor deferral QBU.* Immediately after the transaction or series of transactions, assets of the section 987 QBU are reflected on the books and records of a successor deferral QBU.

(2) *Successor deferral QBU.* A section 987 QBU (*potential successor deferral QBU*) is a successor deferral QBU with respect to a section 987 QBU referred to in paragraph (g)(1)(i) of this section if, immediately after the transaction or series of transactions described in that paragraph, the potential successor deferral QBU satisfies all of the conditions described in paragraphs (g)(2)(i) through (iii) of this section.

(i) The books and records of the potential successor deferral QBU reflect assets that, immediately before the transaction or series of transactions described in paragraph (g)(1)(i) of this section, were reflected on the books and records of the section 987 QBU referred to in paragraph (g)(1)(i) of this section.

(ii) The owner of the potential successor deferral QBU and the owner of the section 987 QBU referred to in paragraph (g)(1)(i) of this section immediately before the transaction or series of transactions described in paragraph (g)(1)(i) of this section are members of the same controlled group.

(iii) If the owner of the section 987 QBU referred to in paragraph (g)(1)(i) of this section immediately before the transaction or series of transactions described in paragraph (g)(1)(i) of this section was a U.S. person, the potential successor deferral QBU is owned by a U.S. person.

(3) *Original deferral QBU owner.* An original deferral QBU owner means, with respect to an original deferral QBU, the owner of the original deferral QBU immediately before the deferral event, or the owner's qualified successor.

(4) *Qualified successor.* A qualified successor with respect to a corporation (*transferor corporation*) means another corporation that acquires the assets of the transferor corporation in a transaction described in section 381(a) (*acquiring corporation*), provided that the acquiring corporation is a domestic corporation and the transferor corporation was a domestic corporation, or the acquiring corporation is a controlled foreign corporation and the transferor corporation was a controlled foreign corporation. A qualified successor of a person includes the qualified successor of a qualified successor.

(h) *Examples.* The following examples illustrate the application of this section. For purposes of the examples, DC1 is a domestic corporation that owns all of the stock of DC2, which is also a domestic corporation, and CFC1, a controlled foreign corporation. In addition, DC1, DC2, and CFC1 are members of a controlled group, and the de minimis rule of paragraph (a)(2)(ii) of this section is not applicable. Finally, except as otherwise provided, Business A is a section 987 QBU with the euro as its functional currency, there are no transfers between Business A and its owner, and Business A's assets are not depreciable or amortizable.

(1) *Example 1: Contribution of a section 987 QBU with net unrecognized section 987 gain to a member of the controlled group—(i) Facts.* DC1 owns Business A. The adjusted balance sheet

of Business A reflects assets with an aggregate adjusted basis of €1,000x and no liabilities. DC1 contributes €900x of Business A's assets to DC2 in exchange for DC2 stock in a transaction to which section 351 applies. Immediately after the contribution, the remaining €100x of Business A's assets are no longer reflected on the books and records of a section 987 QBU (but are instead reflected on the books and records of DC1's home office). DC2, which has the U.S. dollar as its functional currency, uses the Business A assets in a business (*Business B*) that constitutes a section 987 QBU. At the time of the contribution, Business A has net unrecognized section 987 gain of \$100x.

(ii) *Analysis—(A)* Under § 1.987–2(c)(2)(ii), DC1's contribution of €900x of Business A's assets to DC2 is treated as a transfer of all of the assets of Business A to DC1, immediately followed by DC1's contribution of €900x of Business A's assets to DC2. The contribution of Business A's assets is a deferral event within the meaning of paragraph (g)(1) of this section because:

(1) The transfer from Business A to DC1 is a transfer of substantially all of Business A's assets to DC1, resulting in a termination of the Business A QBU under § 1.987–8(b)(2); and

(2) Immediately after the transaction, assets of Business A are reflected on the books and records of Business B, a section 987 QBU owned by a member of DC1's controlled group and a successor deferral QBU within the meaning of paragraph (g)(2) of this section.

Accordingly, Business A is an original deferral QBU within the meaning of paragraph (b) of this section, and DC1 is an original deferral QBU owner of Business A within the meaning of paragraph (g)(3) of this section.

(B) Under paragraph (b)(1) of this section, DC1's taxable income in the taxable year of the deferral event includes DC1's section 987 gain or loss determined with respect to Business A under § 1.987–5, except that, for purposes of applying § 1.987–5, all assets of Business A that are reflected on the books and records of Business B immediately after Business A's termination are treated as not having been transferred and therefore as though they remained on Business A's books and records (notwithstanding the deemed transfer of those assets under § 1.987–8(e)). Accordingly, in the taxable year of the deferral event, Business A is treated as making a remittance of €100x, corresponding to the assets of Business A that are no longer reflected on the books and records of a section 987 QBU, and is treated as having a remittance

proportion with respect to Business A of 0.1, determined by dividing the €100x remittance by the sum of the remittance and the €900x aggregate adjusted basis of the gross assets deemed to remain on Business A's books and records at the end of the taxable year. Thus, DC1 recognizes \$10x of section 987 gain in the taxable year of the deferral event. DC1's deferred section 987 gain equals \$90x, which is the amount of its net unrecognized section 987 gain (which is \$100x) less the amount of section 987 gain recognized by DC1 under § 1.987–5 and this section (which is \$10x).

(2) *Example 2: Contribution of a section 987 QBU with net unrecognized section 987 loss to a member of the controlled group when a current rate election is in effect—(i) Facts.* The facts are the same as in paragraph (h)(1) of this section (*Example 1*) except that a current rate election is in effect for the taxable year (and an annual recognition election is not in effect) and, at the time of the contribution, Business A has net unrecognized section 987 loss of \$100x. Business A is engaged in the business of manufacturing Product X before the contribution, and Business B is engaged in the same business after the contribution. After the contribution, the €100x of assets that are reflected on the books and records of DC1's home office are not used in the business of manufacturing Product X.

(ii) *Analysis—(A)* For the reasons described in paragraph (h)(1) of this section (*Example 1*), the contribution results in a termination of the Business A QBU and a deferral event with respect to the Business A QBU, an original deferral QBU; DC1 is an original deferral QBU owner within the meaning of paragraph (g)(3) of this section; Business B is a successor deferral QBU with respect to Business A; and DC2 is a successor deferral QBU owner.

(B) Under paragraph (b)(1) of this section, for purposes of applying § 1.987–5, all the assets of Business A that are reflected on the books and records of Business B immediately after Business A's termination are treated as not having been transferred and therefore as though they remained on Business A's books and records (notwithstanding the deemed transfer of those assets under § 1.987–8(e)). Accordingly, in the taxable year of the deferral event, Business A is treated as making a remittance of €100x, corresponding to the assets of Business A that are no longer reflected on the books and records of a section 987 QBU, and DC1 is treated as having a remittance proportion with respect to Business A of 0.1, determined by dividing the €100x remittance by the

sum of the remittance and the €900x aggregate adjusted basis of the gross assets deemed to remain on Business A's books and records at the end of the taxable year. Thus, but for the application of § 1.987–11(c), DC1 would recognize \$10x of section 987 loss in the taxable year of the deferral event. Under § 1.987–11(c), because a current rate election is in effect (and an annual recognition election is not in effect), the loss is instead treated as suspended section 987 loss. DC1's deferred section 987 loss equals \$90x, which is the amount of its net unrecognized section 987 loss less the amount of section 987 loss suspended under § 1.987–11(c) (which is \$10x).

(C) Under § 1.987–13(b)(1)(i), Business B is a successor suspended loss QBU because, immediately after the termination of the Business A section 987 QBU, a significant portion of the assets of Business A was reflected on the books and records of Business B (an eligible QBU), Business B continued to carry on the trade or business of Business A, and Business B was owned by DC2, a member of the same controlled group as DC1 (which is the original suspended loss QBU owner under § 1.987–13(l)(1)). Therefore, under § 1.987–13(b)(1)(ii), all of Business A's cumulative suspended section 987 loss (including the suspended section 987 loss resulting from the termination of Business A) becomes suspended section 987 loss with respect to Business B. After the transaction, DC1 may recognize its suspended section 987 loss with respect to Business B under § 1.987–11(e) or § 1.987–13(b) through (d), as applicable.

(3) *Example 3: Election to be classified as a corporation—(i) Facts.* DC1 owns all of the interests in Entity A, a DE. Entity A conducts Business A, which has net unrecognized section 987 gain of \$500x. Entity A elects to be classified as a corporation under § 301.7701–3(c) of this chapter. As a result of the election and pursuant to § 301.7701–3(g)(1)(iv) of this chapter, DC1 is treated as contributing all of the assets and liabilities of Business A to newly-formed CFC1, which has the euro as its functional currency. Immediately after the contribution, the assets and liabilities of Business A are reflected on CFC1's books and records.

(ii) *Analysis.* Under § 1.987–2(c)(2)(ii), DC1's deemed contribution of all of the assets and liabilities of Business A to CFC1 is treated as a transfer of all of the assets and liabilities of Business A to DC1, followed immediately by DC1's contribution of those assets and liabilities to CFC1. Because the deemed transfer from Business A to DC1 is a

transfer of substantially all of Business A's assets to DC1, the Business A QBU terminates under § 1.987–8(b)(2). The contribution of Business A's assets is not a deferral event within the meaning of paragraph (b) of this section because, immediately after the transaction, no assets of Business A are reflected on the books and records of a successor deferral QBU within the meaning of paragraph (g)(2) of this section due to the fact that the assets of Business A are not reflected on the books and records of a section 987 QBU immediately after the termination. In addition, the requirement of paragraph (g)(2)(iii) of this section is not met because Business A was owned by a U.S. person and the potential successor deferral QBU, which is owned by CFC1, is not owned by a U.S. person. Accordingly, DC1 recognizes section 987 gain of \$500x with respect to Business A under § 1.987–5 without regard to this section. Because the requirement of paragraph (g)(2)(iii) of this section is not met, the result would be the same even if the assets of Business A were transferred in a section 351 exchange to an existing foreign corporation that had a different functional currency than Business A.

(4) *Example 4: Partial recognition of deferred gain or loss—(i) Facts.* DC1 owns all of the interests in Entity A, a DE that conducts Business A in Country X. During year 1, DC1 contributes all of its interests in Entity A to DC2 in an exchange to which section 351 applies. At the time of the contribution, Business A has net unrecognized section 987 gain of \$100x and cumulative suspended section 987 loss of \$50x. After the contribution, Entity A continues to conduct the same trade or business in Country X (*Business B*). In year 3, as a result of a net transfer of property from Business B to DC2, DC2's remittance proportion with respect to Business B, as determined under § 1.987–5, is 0.25.

(ii) *Analysis—(A)* For the reasons described in paragraph (h)(1) of this section (*Example 1*), the contribution of all the interests in Entity A by DC1 to DC2 results in a termination of the Business A QBU and a deferral event with respect to the Business A QBU, an original deferral QBU; DC1 is an original deferral QBU owner within the meaning of paragraph (g)(3) of this section; Business B is a successor deferral QBU with respect to Business A; DC2 is a successor deferral QBU owner; and the \$100x of net unrecognized section 987 gain with respect to Business A becomes deferred section 987 gain as a result of the deferral event.

(B) Under § 1.987–13(b)(1)(i), Business B is a successor suspended loss QBU because, immediately after the

termination of the Business A section 987 QBU, a significant portion of the assets of Business A was reflected on the books and records of Business B (an eligible QBU), Business B continued to carry on the trade or business of Business A, and Business B was owned by DC2, a member of the same controlled group as DC1 (which is the original suspended loss QBU owner under § 1.987–13(l)(1)). Therefore, under § 1.987–13(b)(1)(ii), all of DC1's cumulative suspended section 987 loss with respect to Business A becomes suspended section 987 loss of DC1 with respect to Business B.

(C) Under paragraph (c)(1)(i) of this section, DC1 recognizes deferred section 987 gain in year 3 as a result of the remittance from Business B to DC2. Under paragraph (c)(1)(ii) of this section, the amount of deferred section 987 gain that DC1 recognizes is \$25x, which is DC1's outstanding deferred section 987 gain of \$100x with respect to Business A multiplied by the remittance proportion of 0.25 of DC2 with respect to Business B for the taxable year as determined under § 1.987–5(b). In addition, under § 1.987–11(e), DC1 recognizes its cumulative suspended section 987 loss to the extent of the deferred section 987 gain recognized in the same recognition grouping.

§ 1.987–13 Suspended section 987 loss upon terminations.

(a) *Overview*—(1) *In general*. This section provides rules relating to suspended section 987 loss of an owner with respect to a section 987 QBU or successor suspended loss QBU that terminates. Paragraph (b) of this section provides rules treating suspended section 987 loss as recognized or attributable to a successor when a section 987 QBU terminates. Paragraph (c) of this section provides rules treating suspended section 987 loss as recognized or attributable to a subsequent successor when a successor suspended loss QBU terminates. Paragraph (d) of this section provides rules regarding the recognition of suspended section 987 loss when interests in a successor suspended loss QBU owner are transferred. Paragraph (e) of this section provides rules that apply when interests in an original suspended loss QBU owner are transferred. Paragraph (f) of this section provides rules that apply when an original suspended loss QBU owner ceases to exist. Paragraph (g) of this section provides rules preventing the carryover of suspended section 987 loss in connection with certain inbound transactions. Paragraph (h) of this

section provides rules that suspend section 987 loss in connection with certain outbound transactions. Paragraph (i) of this section is reserved. Paragraph (j) of this section provides rules relating to the termination of a successor suspended loss QBU. Paragraph (k) of this section provides an anti-abuse rule. Paragraph (l) of this section provides definitions that apply for purposes of this section. Paragraph (m) of this section provides examples illustrating the rules of this section.

(2) *Ordering rule*. Paragraphs (b) through (d) of this section are applied after the application of § 1.987–11(e) (loss-to-the-extent-of-gain rule).

(b) *Termination of a section 987 QBU with suspended loss*. If a section 987 QBU terminates, and at the time of termination, the owner has suspended section 987 loss with respect to the section 987 QBU (including because the termination was an outbound loss event or because net unrecognized section 987 loss became suspended section 987 loss upon termination as a result of a current rate election), then either paragraph (b)(1) or (2) of this section applies. However, this paragraph (b) does not apply to a termination that occurs in connection with a transaction described in paragraph (f) or (g) of this section.

(1) *Suspended section 987 loss becomes suspended section 987 loss with respect to a successor suspended loss QBU*—(i) *Successor suspended loss QBU*. If, immediately after the termination, a significant portion of the assets of the terminating section 987 QBU are reflected on the books and records of an eligible QBU that carries on a trade or business of the section 987 QBU and is owned by the owner of the section 987 QBU or a member of its controlled group (determined immediately after the transaction), then the eligible QBU is a successor suspended loss QBU and the rules provided in paragraph (b)(1)(ii) of this section apply.

(ii) *Attribution of suspended section 987 loss to successor suspended loss QBU*. A portion of the cumulative suspended section 987 loss with respect to the terminating section 987 QBU that is not recognized in the taxable year of the termination under § 1.987–11(e) becomes suspended section 987 loss with respect to each successor suspended loss QBU. Such portion is equal to the suspended section 987 loss described in the preceding sentence, multiplied by a fraction, the numerator of which is the aggregate adjusted basis of the gross assets transferred to the successor suspended loss QBU in connection with the termination, and the denominator of which is the

aggregate adjusted basis of the gross assets transferred to all successor suspended loss QBUs in connection with the termination.

(2) *Recognition of suspended section 987 loss*. If, immediately after the termination of the section 987 QBU, there is no successor suspended loss QBU under paragraph (b)(1) of this section, then the owner recognizes the cumulative suspended section 987 loss with respect to the section 987 QBU that is not recognized in the taxable year of the termination under § 1.987–11(e).

(c) *Termination of a successor suspended loss QBU*. If a successor suspended loss QBU terminates (as described in paragraph (j) of this section), then either paragraph (c)(1) or (2) of this section applies. However, this paragraph (c) does not apply to a termination that occurs in connection with a transaction described in paragraph (e), (f), or (g) of this section.

(1) *Successor to the successor suspended loss QBU*—(i) *Successor suspended loss QBU*. If, immediately after the termination, a significant portion of the assets of the terminating successor suspended loss QBU (*initial successor*) are reflected on the books and records of an eligible QBU (*subsequent successor*) that carries on a trade or business of the initial successor and is owned by the original suspended loss QBU owner or a member of its controlled group (determined immediately after the transaction), then the subsequent successor is a successor suspended loss QBU and the rules provided in paragraph (c)(1)(ii) of this section apply.

(ii) *Attribution of suspended section 987 loss to successor suspended loss QBU*. A portion of the cumulative suspended section 987 loss with respect to the initial successor that is not recognized in the taxable year of the termination under § 1.987–11(e) becomes suspended section 987 loss with respect to each subsequent successor. Such portion is equal to the suspended section 987 loss described in the preceding sentence, multiplied by a fraction, the numerator of which is the aggregate adjusted basis of the gross assets transferred to the subsequent successor in connection with the termination, and the denominator of which is the aggregate adjusted basis of the gross assets transferred to all subsequent successors in connection with the termination.

(2) *Recognition of suspended section 987 loss*. If, immediately after the termination of the initial successor, there is no subsequent successor that is a successor suspended loss QBU under paragraph (c)(1) of this section, then the

original suspended loss QBU owner recognizes the cumulative suspended section 987 loss with respect to the initial successor that is not recognized in the taxable year of the termination under § 1.987–11(e).

(d) *Transfer of successor suspended loss QBU owner.* If a successor suspended loss QBU ceases to be owned by a member of the original suspended loss QBU owner's controlled group as a result of a direct or indirect transfer, or an issuance or redemption, of an ownership interest in the successor suspended loss QBU owner, then the original suspended loss QBU owner recognizes the cumulative suspended section 987 loss with respect to the successor suspended loss QBU that is not recognized in the taxable year under § 1.987–11(e).

(e) *Transfer of original suspended loss QBU owner.* If an original suspended loss QBU owner ceases to be a member of the successor suspended loss QBU owner's controlled group as a result of a direct or indirect transfer, or an issuance or redemption, of an ownership interest in the original suspended loss QBU owner, the original suspended loss QBU owner's suspended section 987 loss ceases to be attributable to any successor suspended loss QBU (but it continues to be suspended section 987 loss of the original suspended loss QBU owner). As a result, the suspended section 987 loss can be recognized by the original suspended loss QBU owner under § 1.987–11(e) but cannot be recognized under paragraph (b)(2), (c)(2), or (d) of this section.

(f) *Owner ceases to exist.* If the owner of a section 987 QBU with suspended section 987 loss or an original suspended loss QBU owner ceases to exist and there is no successor under paragraph (l)(1)(ii) of this section (for example, as a result of a section 331 liquidation), then any suspended section 987 loss of the owner that is not recognized after application of the loss-to-the-extent-of-gain rule in § 1.987–11(e) is eliminated and cannot be recognized.

(g) *Inbound nonrecognition transactions—no carryover of suspended section 987 loss.* If an owner of a section 987 QBU with suspended section 987 loss, or an original suspended loss QBU owner, ceases to exist in a transaction described in § 1.987–8(c)(1)(ii) (inbound section 332 liquidation) or § 1.987–8(c)(2)(ii) (inbound reorganization), then any suspended section 987 loss of the owner or original suspended loss QBU owner that is not recognized after application of the loss-to-the-extent-of-gain rule in

§ 1.987–11(e) is eliminated and cannot be recognized. As a result, the distributee or acquiring corporation does not succeed to or take into account any suspended section 987 loss of the owner or original suspended loss QBU owner under section 381.

(h) *Outbound transactions—recognition or suspension of net unrecognized section 987 loss.* This paragraph (h) applies to taxable years in which neither a current rate election nor an annual recognition election is in effect.

(1) *In general.* Notwithstanding § 1.987–5, if an outbound loss event occurs with respect to a section 987 QBU (an *outbound loss QBU*), the original owner of the section 987 QBU includes in taxable income in the taxable year of the outbound loss event section 987 loss with respect to the outbound loss QBU only to the extent provided in paragraph (h)(3) of this section.

(2) *Outbound loss event.* An outbound loss event means, with respect to a section 987 QBU:

(i) Any termination of the section 987 QBU as a result of a transfer by a U.S. person of assets of the section 987 QBU to a foreign person that is a member of the same controlled group as the U.S. person immediately before the transaction or, if the transferee did not exist immediately before the transaction, immediately after the transaction (*related foreign person*), provided that the termination would result in the recognition of section 987 loss with respect to the section 987 QBU under § 1.987–5 but for this paragraph (h); or

(ii) [Reserved]

(3) *Loss recognition upon an outbound loss event.* In the taxable year of an outbound loss event with respect to an outbound loss QBU, the owner of the outbound loss QBU recognizes section 987 loss as determined under §§ 1.987–5 and 1.987–12(b), except that, solely for purposes of applying § 1.987–5, assets and liabilities of the outbound loss QBU that, immediately after the outbound loss event, are reflected on the books and records of an eligible QBU owned by the related foreign person described in paragraph (h)(2) of this section are treated as not having been transferred and therefore as remaining on the books and records of the outbound loss QBU notwithstanding the outbound loss event.

(4) *Loss suspension upon outbound loss event.* Net unrecognized section 987 loss or deferred section 987 loss that, as a result of this paragraph (h), is not recognized in the taxable year of the outbound loss event (*outbound section*

987 loss) under § 1.987–5 becomes suspended section 987 loss.

(i) [Reserved]

(j) *Termination of a successor suspended loss QBU.* For purposes of applying paragraph (c) of this section, a successor suspended loss QBU terminates if it ceases to be an eligible QBU of its owner.

(k) *Anti-abuse.* No section 987 loss is recognized under this section, § 1.987–5, or § 1.987–12 in connection with a transaction or series of transactions that are undertaken with a principal purpose of avoiding the purposes of this section.

(l) *Definitions.* The following definitions apply for purposes of this section.

(1) *Original suspended loss QBU owner—*(i) *In general.* An *original suspended loss QBU owner* is the person that was the owner of a section 987 QBU before its termination in a transaction to which paragraph (b)(1) of this section applies.

(ii) *Successors.* If an original suspended loss QBU owner is a corporation (*transferor corporation*) and another corporation acquires the assets of the transferor corporation in a transaction described in section 381(a), then the acquiring corporation becomes the original suspended loss QBU owner.

(2) *Successor suspended loss QBU.* See paragraphs (b)(1) and (c)(1) of this section and § 1.987–12(d) for rules regarding when an eligible QBU is a successor suspended loss QBU.

(3) *Successor suspended loss QBU owner.* A *successor suspended loss QBU owner* is the owner of the assets and liabilities of a successor suspended loss QBU.

(4) *Ownership interests.* The term *ownership interests* means stock in a corporation and partnership interests in a partnership.

(5) *Significant portion.* With respect to the assets of an eligible QBU, the term *significant portion* means a significant portion of the operating assets, determined based on all the facts and circumstances, provided that more than 30 percent of the operating assets will constitute a significant portion in all cases and less than 10 percent of the operating assets will not constitute a significant portion in all cases.

(m) *Examples.* The following examples illustrate the application of this section. For purposes of the examples, DC1 is a domestic corporation that owns all of the interests in Entity A, a DE. Entity A conducts Business A, a section 987 QBU that is engaged in the business of selling Product X. Business A has the euro as its functional currency.

(1) *Example 1: Trade or business of a section 987 QBU ceases*—(i) *Facts*. Entity A's trade or business of selling Product X ceases, resulting in a termination of the Business A section 987 QBU under § 1.987–8(b)(1). After the trade or business is wound up, the remaining assets are transferred to DC1 and are not used in the trade or business of selling Product X immediately following the termination. Business A has cumulative suspended section 987 loss under § 1.987–11(b) of \$500x.

(ii) *Analysis*. Immediately after the termination of the Business A section 987 QBU, a significant portion of Business A's assets is not reflected on the books and records of an eligible QBU that carries on a trade or business of Business A and is owned by DC1 or a member of its controlled group. Therefore, Business A has no successor suspended loss QBU under paragraph (b)(1) of this section. Consequently, DC1 recognizes the cumulative suspended section 987 loss with respect to the Business A section 987 QBU under paragraph (b)(2) of this section.

(2) *Example 2: Trade or business of a section 987 QBU is sold to a third party*—(i) *Facts*. DC1 sells all the interests in Entity A to a third party for cash. Business A has cumulative suspended section 987 loss under § 1.987–11(b) of \$500x.

(ii) *Analysis*. Under § 1.987–2(c)(2)(ii), the sale of the Business A assets and liabilities for cash that is reflected on the books of DC1 is treated as a transfer of all of the assets and liabilities of Business A to DC1, followed immediately by DC1's sale of those assets and liabilities. Because the deemed transfer from Business A to DC1 is a transfer of substantially all of Business A's assets to DC1, the Business A section 987 QBU terminates under § 1.987–8(b)(2). Immediately after the termination of the Business A section 987 QBU, a significant portion of Business A's assets is not reflected on the books and records of an eligible QBU that carries on a trade or business of Business A and is owned by DC1 or a member of its controlled group. Therefore, Business A has no successor suspended loss QBU under paragraph (b)(1) of this section. Consequently, DC1 recognizes the cumulative suspended section 987 loss with respect to the Business A section 987 QBU under paragraph (b)(2) of this section.

(3) *Example 3: Outbound loss event*—(i) *Facts*. Entity A elects to be classified as a corporation under § 301.7701–3(c) of this chapter. As a result of the election and pursuant to § 301.7701–3(g)(1)(iv) of this chapter, DC1 is treated as contributing all of the assets and

liabilities of Business A to newly formed CFC1, which has the euro as its functional currency. Immediately after the contribution, the assets and liabilities of Business A are reflected on CFC1's books and records (which are the only books and records maintained by CFC1). CFC1 continues to use those assets in the same trade or business after the contribution (*Business B*). Neither a current rate election nor an annual recognition election is in effect. Business A has net unrecognized section 987 loss of \$500x.

(ii) *Analysis*—(A) Under § 1.987–2(c)(2)(ii), DC1's contribution of all of the assets and liabilities of Business A to CFC1 is treated as a transfer of all of the assets and liabilities of Business A to DC1, followed immediately by DC1's contribution of those assets and liabilities to CFC1. Because the deemed transfer from Business A to DC1 is a transfer of substantially all of Business A's assets to DC1, the Business A section 987 QBU terminates under § 1.987–8(b)(2). The contribution of Business A's assets to CFC1 is not a deferral event within the meaning of § 1.987–12(g)(1) because, immediately after the transaction, no assets of Business A are reflected on the books and records of a successor deferral QBU within the meaning of § 1.987–12(g)(2) due to the fact that the assets of Business A are not reflected on the books and records of a section 987 QBU immediately after the termination, as well as the fact that the requirement of § 1.987–12(g)(2)(iii) is not met because Business A was owned by a U.S. person and the potential successor deferral QBU (*Business B*) is not owned by a U.S. person. The termination of the Business A section 987 QBU as a result of the transfer of the assets of Business A by a U.S. person (DC1) to a foreign person (CFC1) that is a member of DC1's controlled group is an outbound loss event described in paragraph (h)(2) of this section.

(B) Under paragraphs (h)(1) and (3) of this section, in the taxable year of the outbound loss event, DC1 includes in taxable income section 987 loss recognized with respect to Business A as determined under § 1.987–5, except that, for purposes of applying § 1.987–5, all assets and liabilities of Business A that are reflected on the books and records of CFC1, a related foreign person described in paragraph (h)(2) of this section, are treated as not having been transferred. Accordingly, DC1's remittance proportion with respect to Business A is 0, and DC1 recognizes no section 987 loss with respect to Business A. DC1's outbound section 987 loss is \$500x, which is the amount of

section 987 loss that DC1 would have recognized under § 1.987–5 without regard to paragraph (h) of this section (\$500x), less the amount of section 987 loss recognized by DC1 under paragraph (h)(3) of this section (\$0). Under paragraph (h)(4) of this section, the \$500x of outbound section 987 loss becomes suspended section 987 loss.

(C) Under paragraph (b)(1)(i) of this section, Business B is a successor suspended loss QBU because, immediately after the termination of the Business A section 987 QBU, the Business A assets are reflected on the books and records of Business B (which is the only set of books and records maintained by CFC1). Business B was an eligible QBU that continued to carry on the same trade or business as Business A did before the contribution, and Business B was owned by CFC1, a member of the same controlled group as DC (which is the original suspended loss QBU owner under paragraph (l)(1) of this section). See § 1.987–1(b)(4)(ii) (providing that, if a corporation is solely engaged in activities that constitute a trade or business, and the corporation maintains only one set of books and records, the activities (but not the corporation) are a qualified business unit). Therefore, under paragraph (b)(1)(ii) of this section, all of Business A's suspended section 987 loss (including the suspended section 987 loss resulting from the termination of Business A) is treated as suspended section 987 loss of DC1 with respect to Business B.

§ 1.987–14 Section 987 hedging transactions.

(a) *Overview*. This section provides rules relating to section 987 hedging transactions. Paragraph (b) of this section provides the definition of a section 987 hedging transaction. Paragraph (c) of this section provides identification requirements for section 987 hedging transactions. Paragraph (d) of this section provides rules relating to the taxation of section 987 hedging transactions. Paragraph (e) of this section provides examples illustrating the rules of this section.

(b) *Section 987 hedging transaction*—(1) *In general*. A section 987 hedging transaction is a financial instrument or a combination or series of financial instruments (a *hedge*), that is entered into by the owner of a section 987 QBU as part of the normal course of the owner's trade or business for the purpose of managing exchange rate risk with respect to all or part of the owner's net investment in the section 987 QBU (the *hedged QBU*), provided that the requirements of paragraph (b)(2) of this

section are met. If only part of a financial instrument (or combination or series of financial instruments) is described in the preceding sentence, that part is treated as a section 987 hedging transaction for purposes of this section.

(2) *Requirements.* A transaction is a section 987 hedging transaction described in paragraph (b)(1) of this section for a taxable year only if the following requirements are met.

(i) *Identification.* The hedge must be identified as a section 987 hedging transaction with respect to the hedged QBU under paragraph (c) of this section. The financial instrument or instruments that comprise the hedge must not be identified as a section 987 hedging transaction with respect to any other section 987 QBU. If only part of a financial instrument (or combination or series of financial instruments) is a section 987 hedging transaction, that part must be clearly identified.

(ii) *Current rate election.* A current rate election must be in effect for the taxable year.

(iii) *Mark-to-market method of accounting.* Section 988 gain or loss of the owner with respect to the hedge must be accounted for under a mark-to-market method of accounting (for example, under section 1256). In addition, if a member of the owner's controlled group is a party to the hedge, any section 988 gain or loss of the controlled group member with respect to the hedge must be accounted for under a mark-to-market method of accounting.

(iv) *Treatment under U.S. generally accepted accounting principles.* Foreign currency gain or loss on the hedge must be properly accounted for under generally accepted accounting principles as a cumulative foreign currency translation adjustment to shareholders' equity.

(v) *Hedge entered into by owner of the hedged QBU.* The hedge must be entered into by the owner of the hedged QBU (and not by a section 987 QBU of the owner). In the case of a hedged QBU that is owned by a member of a consolidated group, the hedge must be entered into by the member that owns the hedged QBU.

(3) *Anti-abuse rule.* If a taxpayer enters into a hedge or a related transaction with a principal purpose of effectively converting section 987 gain or loss into section 988 gain or loss (or another type of income or loss) of the owner or a related party, the hedge is not treated as a section 987 hedging transaction.

(4) *Partial termination of a section 987 hedging transaction.* If only part of

a financial instrument is a section 987 hedging transaction, and a part of the financial instrument is terminated or disposed of, a proportionate part of the section 987 hedging transaction is treated as terminated or disposed of.

(c) *Identification requirements—(1) In general.* The owner of a hedged QBU must clearly identify the hedge as a section 987 hedging transaction with respect to the hedged QBU in its books and records on or before the close of the day on which the owner entered into the hedge. The identification must meet the requirements of § 1.1221–2(f)(4) and must include the following information—

(i) The date on which the hedge is entered into by the owner of the hedged QBU and the date on which the hedge is identified as a section 987 hedging transaction;

(ii) A description of the hedge; and

(iii) Identification of the hedged QBU.

(2) *Inadvertent error.* If a hedge is not identified under paragraph (c)(1) of this section, but the hedge would otherwise qualify as a section 987 hedging transaction with respect to a hedged QBU within the meaning of paragraph (b) of this section and the taxpayer can demonstrate to the satisfaction of the Commissioner that its failure to identify the hedge was due to inadvertent error, the taxpayer may treat the hedge as a section 987 hedging transaction if all of the owner's hedges described in paragraph (b) of this section in all open years are being treated on either original or, if necessary, amended returns as section 987 hedging transactions subject to the rules of paragraph (d) of this section.

(d) *Taxation of section 987 hedging transactions—(1) Hedging gain or loss with respect to a hedged QBU.* If the owner of a section 987 QBU has entered into a section 987 hedging transaction with respect to the section 987 QBU, the owner's hedging gain or loss with respect to the hedged QBU for a taxable year is equal to the gain or loss that the owner would (but for the application of this paragraph (d)) recognize under section 988 with respect to the section 987 hedging transaction in the taxable year under the mark-to-market method of accounting described in paragraph (b)(2)(iii) of this section (including gain or loss that would be recognized in connection with a complete or partial disposition or termination of the section 987 hedging transaction). If only part of a financial instrument is a section 987 hedging transaction, a proportionate part of the gain or loss that would (but for the application of this paragraph (d)) be recognized under section 988 with respect to the financial instrument in

the taxable year is treated as hedging gain or loss with respect to the hedged QBU. See paragraph (d)(3) of this section for rules relating to the determination of hedging gain or loss in the taxable year in which the hedged QBU terminates.

(2) *Adjustment to unrecognized section 987 gain or loss for the taxable year—(i) Hedging loss.* In a taxable year in which an owner has hedging loss with respect to a hedged QBU and has unrecognized section 987 gain for the taxable year with respect to the hedged QBU (as determined under § 1.987–4(d), without regard to this paragraph (d)), the unrecognized section 987 gain for the taxable year is reduced (but not below zero) by the amount of the hedging loss. The amount of hedging loss that reduces unrecognized section 987 gain under this paragraph (d)(2)(i) is not recognized under section 988. Any hedging loss that does not reduce unrecognized section 987 gain under this paragraph (d)(2)(i) is recognized under section 988.

(ii) *Hedging gain.* In a taxable year in which an owner has hedging gain with respect to a hedged QBU and has unrecognized section 987 loss for the taxable year with respect to the hedged QBU (as determined under § 1.987–4(d), without regard to this paragraph (d)), the unrecognized section 987 loss for the taxable year is reduced (but not below zero) by the amount of the hedging gain. The amount of hedging gain that reduces unrecognized section 987 loss under this paragraph (d)(2)(ii) is not recognized under section 988. Any hedging gain that does not reduce unrecognized section 987 loss under this paragraph (d)(2)(ii) is recognized under section 988.

(3) *Termination of a hedged QBU.* If the owner of a section 987 QBU has entered into a section 987 hedging transaction with respect to the section 987 QBU and the hedged QBU terminates, the owner's hedging gain or loss with respect to the hedged QBU for the taxable year is equal to the hedging gain or loss that the owner would (but for the application of this paragraph (d)) recognize with respect to the section 987 hedging transaction under the mark-to-market method of accounting described in paragraph (b)(2)(iii) of this section if the taxable year ended on the termination date. Appropriate adjustments must be made to prevent the section 988 gain or loss from being taken into account again after it is applied to reduce unrecognized section 987 gain or loss under this paragraph (d).

(e) *Examples.* The following examples illustrate the application of this section.

For purposes of the examples, DC1 is a domestic corporation that owns Business A, a section 987 QBU that has the euro as its functional currency. A current rate election is in effect for years 1 and 2, but no other elections are in effect. In year 1, DC1 had net unrecognized section 987 loss (determined under § 1.987–4(b)) of \$1,000x with respect to Business A, and Business A did not make a remittance in year 1. As a result, in year 2, DC1's net accumulated unrecognized section 987 loss from prior taxable years (determined under § 1.987–4(c)) was \$1,000x. In year 2, DC1 had unrecognized section 987 loss for the taxable year (determined under § 1.987–4(d) before the application of paragraph (d) of this section) of \$500x.

(1) *Example 1: Section 987 hedging transaction*—(i) *Facts*. In year 2, DC1 entered into a six-month foreign currency forward contract with an unrelated bank in the normal course of DC1's trade or business for the purpose of managing exchange rate risk with respect to DC1's net investment in Business A. On the same day, DC1 identified the forward contract as a section 987 hedging transaction with respect to Business A under paragraph (c) of this section. Under generally accepted accounting principles, currency gain or loss from the forward contract is accounted for as a cumulative translation adjustment to shareholder's equity. For Federal income tax purposes, DC1 accounts for section 988 gain or loss with respect to the forward contract under a mark-to-market method of accounting. But for the application of paragraph (d) of this section, DC1 would recognize \$400x of section 988 gain with respect to the forward contract.

(ii) *Analysis*—(A) *Qualification of the hedge as a section 987 hedging transaction*. The forward contract qualifies as a section 987 hedging transaction under paragraph (b) of this section because it is a financial instrument that manages DC1's exchange rate risk with respect to Business A (the hedged QBU) as part of the normal course of DC1's trade or business, and the hedge meets the requirements of paragraph (b)(2) of this section.

(B) *Treatment of the section 987 hedging transaction*. But for the application of paragraph (d) of this section, DC1 would recognize \$400x of section 988 gain with respect to the forward contract in year 2. Therefore, DC1 has \$400x of hedging gain in year 2. In year 2, DC1 had unrecognized section 987 loss of \$500x for the taxable year (determined under § 1.987–4(d)

before the application of paragraph (d) of this section). Therefore, under paragraph (d)(2)(ii) of this section, DC1's unrecognized section 987 loss for the taxable year of \$500x is reduced by the \$400x of hedging gain. Accordingly, DC1 has unrecognized section 987 loss of \$100x for the taxable year with respect to Business A. Under § 1.987–4(b), DC1 has \$1,100x of net unrecognized section 987 loss in year 2 (equal to the sum of its net accumulated section 987 loss of \$1,000x from prior taxable years and its unrecognized section 987 loss for the taxable year of \$100x). DC1 does not recognize its hedging gain under section 988 because all of the hedging gain reduces unrecognized section 987 loss for the taxable year.

(2) *Example 2: Excess hedging gain from a section 987 hedging transaction*—(i) *Facts*. The facts are the same as in paragraph (e)(1) of this section (*Example 1*) except that, but for the application of paragraph (d) of this section, DC1 would recognize \$600x of section 988 gain with respect to the forward contract.

(ii) *Analysis*. Under paragraph (d)(2)(ii) of this section, DC1's unrecognized section 987 loss for the taxable year of \$500x is reduced by the hedging gain, but not below zero. Accordingly, \$500x of the hedging gain is applied to reduce DC1's unrecognized section 987 loss for the taxable year to zero. DC1 has \$1,000x of net unrecognized section 987 loss in year 2 under § 1.987–4(b) (equal to its net accumulated section 987 loss of \$1,000x from prior taxable years). The \$500x hedging gain that reduces unrecognized section 987 loss for the taxable year is not recognized under section 988. The excess amount of hedging gain (\$100x) is recognized by DC1 under section 988.

§ 1.987–15 Applicability date.

(a) *Applicability date of the section 987 regulations*—(1) *In general*. Except as provided in this section, the section 987 regulations apply to taxable years beginning after December 31, 2024.

(2) *Applicability date for a terminating QBU*. The section 987 regulations apply to the owner of a terminating QBU immediately before the section 987 QBU terminates, but only with respect to the section 987 QBU, any successor deferral QBUs or successor suspended loss QBUs (in their capacity as such), and any net unrecognized section 987 gain or loss, deferred section 987 gain or loss, or suspended section 987 loss with respect thereto. See § 1.987–1(h) for the definition of a terminating QBU.

(b) *Application of the section 987 regulations to taxable years beginning on or before December 31, 2024, and ending after November 9, 2023*. A taxpayer (including a taxpayer that has applied the 2016 and 2019 section 987 regulations to a prior taxable year under paragraph (c) of this section) may choose to apply the section 987 regulations to a taxable year beginning on or before December 31, 2024, and ending after November 9, 2023, provided the taxpayer and each member of its consolidated group and section 987 electing group:

(1) Consistently apply the section 987 regulations in their entirety to the taxable year and all subsequent taxable years beginning on or before December 31, 2024; and

(2) Apply the section 987 regulations on their original timely filed (including extensions) returns for the first taxable year to which the taxpayer chooses to apply the section 987 regulations.

(c) *Application of the 2016 and 2019 section 987 regulations*—(1) *In general*. A taxpayer may choose to apply the 2016 and 2019 section 987 regulations to a taxable year beginning after December 7, 2016, and beginning on or before December 31, 2024, provided the taxpayer and each member of its consolidated group and section 987 electing group:

(i) First apply the 2016 and 2019 section 987 regulations to a taxable year ending before November 9, 2023;

(ii) Consistently apply the 2016 and 2019 section 987 regulations in their entirety to all section 987 QBUs (within the meaning of prior § 1.987–1(b)(2)) directly or indirectly owned (within the meaning of prior § 1.987–1(b)(4)) by the taxpayer and each member of its consolidated group and section 987 electing group on the transition date for that taxable year and all subsequent taxable years before the taxable year in which the taxpayer and each member of its consolidated group and section 987 electing group apply the section 987 regulations pursuant to paragraph (a) or (b) of this section; and

(iii) Either—

(A) First applied the 2016 and 2019 section 987 regulations on their returns filed before November 9, 2023; or

(B) First apply the 2016 and 2019 section 987 regulations on their returns filed on or after November 9, 2023 and apply § 1.987–10 in lieu of prior § 1.987–10.

(2) *Application to section 987 QBUs not owned on the transition date*. For any taxable year in which a taxpayer applies the 2016 and 2019 section 987 regulations pursuant to paragraph (c)(1) of this section, the taxpayer may choose

to apply the 2016 and 2019 section 987 regulations to any section 987 QBU (within the meaning of prior § 1.987–1(b)(2)) that the taxpayer did not directly or indirectly own (within the meaning of prior § 1.987–1(b)(4)) on the transition date, provided the taxpayer applies the 2016 and 2019 section 987 regulations consistently to that QBU for that taxable year and all subsequent taxable years before the taxable year in which the taxpayer applies the section 987 regulations pursuant to paragraph (a) or (b) of this section and the taxpayer either—

(i) First applied the 2016 and 2019 section 987 regulations to the section 987 QBU on its return filed before November 9, 2023; or

(ii) First applies the 2016 and 2019 section 987 regulations to the section 987 QBU on its return filed on or after November 9, 2023, and applies § 1.987–10 in lieu of prior § 1.987–10.

(3) *Modifications of defined terms for purposes of this paragraph (c).* Solely for purposes of this paragraph (c)—

(i) *Application of § 1.987–10 in lieu of prior § 1.987–10.* For any taxpayer to which paragraph (c)(1)(iii)(B) or (c)(2)(ii) of this section applies, the term *2016 and 2019 section 987 regulations* includes § 1.987–10 and not prior § 1.987–10.

(ii) *Partnerships not included in section 987 electing group.* The term *section 987 electing group* does not include foreign partnerships.

(iii) *Transition date.* The term *transition date* has the meaning provided in prior § 1.987–10.

(d) *Prior § 1.987–12.* For the applicability dates of prior § 1.987–12, see prior § 1.987–12(j). Prior § 1.987–12 applies through the end of the taxable year immediately preceding the first taxable year in which a taxpayer applies § 1.987–12 pursuant to paragraph (a) or (b) of this section.

■ **Par. 9.** Section 1.988–1 is amended by:

■ a. Removing and reserving paragraph (a)(4);

■ b. Revising paragraph (a)(10)(i);

■ c. Removing the language “1988” in the fourth sentence of paragraph (a)(1)(iii) and adding the language “2025” in its place; and

■ d. Revising paragraph (i).

The revisions read as follows:

§ 1.988–1 Certain definitions and special rules.

(a) * * *

(10) * * *

(i) *In general.* Except as provided in paragraph (a)(10)(ii) of this section, disregarded transactions between or among the taxpayer and/or qualified

business units of that taxpayer (“intra-taxpayer transactions”) are not section 988 transactions. See section 987 and the regulations thereunder.

* * * * *

(i) *Applicability date—(1) In general.* Except as otherwise provided in this section, this section applies to taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section.

(2) *Paragraph (a)(10)(ii).* Generally, paragraph (a)(10)(ii) of this section applies to taxable years beginning after December 31, 2024. However, if pursuant to § 1.987–15(b), a taxpayer chooses to apply §§ 1.987–1 through 1.987–15 to a taxable year before the first taxable year described in § 1.987–15(a)(1), then paragraph (a)(10)(ii) of this section applies to that taxable year. See § 1.988–1(i), as contained in 26 CFR in part 1 in effect on April 1, 2024, for a prior applicability date for paragraph (a)(10)(ii) of this section.

■ **Par. 10.** Section 1.988–4 is amended by revising paragraph (b)(2) to read as follows:

§ 1.988–4 Source of gain or loss realized on a section 988 transfer.

* * * * *

(b) * * *

(2) *Proper reflection on the books of the taxpayer or qualified business unit—(i) In general.* For purposes of paragraph (b)(1) of this section, the principles of § 1.987–2(b) apply in determining whether an asset, liability, or item of income, gain, deduction, or loss is reflected on the books and records of a qualified business unit.

(ii) *Applicability date.* Generally, paragraph (b)(2)(i) of this section applies to taxable years beginning after December 31, 2024. However, if pursuant to § 1.987–15(b), a taxpayer chooses to apply §§ 1.987–1 through 1.987–15 to a taxable year before the first taxable year described in § 1.987–15(a)(1), then paragraph (b)(2)(i) of this section applies to that taxable year.

* * * * *

■ **Par. 11.** Section 1.989(a)–1 is amended by:

■ a. Removing and reserving paragraph (b)(2)(i)(C).

■ b. Revising paragraphs (b)(4), (d)(3) and (4).

The revisions read as follows:

§ 1.989(a)–1 Definition of a qualified business unit.

* * * * *

(b) * * *

(4) *Applicability date.* Generally, paragraph (b)(2)(i) of this section applies to taxable years beginning after December 31, 2024. However, if pursuant to § 1.987–15(b), a taxpayer chooses to apply §§ 1.987–1 through 1.987–15 to a taxable year before the first taxable year described in § 1.987–15(a)(1), then paragraph (b)(2)(i) of this section applies to that taxable year. See § 1.989(a)–1(b)(4), as contained in 26 CFR in part 1 in effect on April 1, 2024, for a prior applicability date for paragraph (b)(2)(i) of this section.

* * * * *

(d) * * *

(3) *Proper reflection on the books of the taxpayer or qualified business unit.* The principles of § 1.987–2(b) apply in determining whether an asset, liability, or item of income, gain, deduction, or loss is reflected on the books of a qualified business unit (and therefore is attributable to such unit).

(4) *Applicability date.* Generally, paragraph (d)(3) of this section applies to taxable years beginning after December 31, 2024. However, if pursuant to § 1.987–15(b), a taxpayer applies §§ 1.987–1 through 1.987–15 to a taxable year before the first taxable year described in § 1.987–15(a)(1), then paragraph (d)(3) of this section applies to that taxable year. See § 1.989(a)–1(d)(4), as contained in 26 CFR in part 1 in effect on April 1, 2024, for a prior applicability date for paragraph (d)(3) of this section.

* * * * *

■ **Par. 12.** Section 1.1502–13 is amended by revising paragraph (j)(9) and adding paragraphs (j)(10) and (l)(7) to read as follows:

§ 1.1502–13 Intercompany transactions.

* * * * *

(j) * * *

(9) *Section 987 QBUs.* No intercompany transaction is attributable to a section 987 QBU (within the meaning of § 1.987–2(b)). That is, in order to produce single entity treatment, an intercompany transaction that otherwise would involve the section 987 QBU(s) of one or more members is treated instead as occurring directly between the members (without the involvement of any section 987 QBUs), and transfers are deemed to take place between each section 987 QBU and its owner (see § 1.987–2(c)(2)(ii)). For example, if a member (M1) lends money to the section 987 QBU of another member (M2), this intercompany transaction is treated as a loan from M1 to M2 and a contribution from M2 to its section 987 QBU.

(10) *Examples.* The operating rules of this paragraph (j) are illustrated generally throughout this section, and by the following examples.

(i) *Example 1. Intercompany sale followed by section 351 transfer to member—(A) Facts.* S holds land for investment with a basis of \$70. On January 1 of Year 1, S sells the land to M for \$100. M also holds the land for investment. On July 1 of Year 3, M transfers the land to B in exchange for all of B's stock in a transaction to which section 351 applies. Under section 358, M's basis in the B stock is \$100. B holds the land for sale to customers in the ordinary course of business and, under section 362(b), B's basis in the land is \$100. On December 1 of Year 5, M sells 20% of the B stock to X for \$22. In an unrelated transaction on July 1 of Year 8, B sells 20% of the land for \$22.

(B) *Definitions.* Under paragraph (b)(1) of this section, S's sale of the land to M and M's transfer of the land to B are both intercompany transactions. S is the selling member and M is the buying member in the first intercompany transaction, and M is the selling member and B is the buying member in the second intercompany transaction. M has no intercompany items under paragraph (b)(2) of this section. Because B acquired the land in an intercompany transaction, B's items from the land are corresponding items to be taken into account under this section. Under the successor asset rule of paragraph (j)(1) of this section, references to the land include references to M's B stock. Under the successor person rule of paragraph (j)(2) of this section, references to M include references to B with respect to the land.

(C) *Timing and attributes resulting from the stock sale.* Under paragraph (c)(3) of this section, M is treated as owning and selling B's stock for purposes of the matching rule even though, as divisions, M could not own and sell stock in B. Under paragraph (j)(3) of this section, both M's B stock and B's land can cause S's intercompany gain to be taken into account under the matching rule. Thus, S takes \$6 of its gain into account in Year 5 to reflect the \$6 difference between M's \$2 gain taken into account from its sale of B stock and the \$8 recomputed gain. Under paragraph (j)(4) of this section, the attributes of this gain are determined by treating S, M, and B as divisions of a single corporation. Under paragraph (c)(1) of this section, S's \$6 gain and M's \$2 gain are treated as long-term capital gain. The gain would be capital on a separate entity basis (assuming that section 341 does not apply), and this treatment is not

inconsistent with treating S, M, and B as divisions of a single corporation because the stock sale and subsequent land sale are unrelated transactions and B remains a member following the sale.

(D) *Timing and attributes resulting from the land sale.* Under paragraph (j)(3) of this section, S takes \$6 of its gain into account in Year 8 under the matching rule to reflect the \$6 difference between B's \$2 gain taken into account from its sale of an interest in the land and the \$8 recomputed gain. Under paragraph (j)(4) of this section, the attributes of this gain are determined by treating S, M, and B as divisions of a single corporation and taking into account the activities of S, M, and B with respect to the land. Thus, both S's gain and B's gain might be ordinary income as a result of B's activities. (If B subsequently sells the balance of the land, S's gain taken into account is limited to its remaining \$18 of intercompany gain.)

(E) *Sale of successor stock resulting in deconsolidation.* The facts are the same as in paragraph (j)(10)(i)(A) of this section (*Example 1*), except that M sells 60% of the B stock to X for \$66 on December 1 of Year 5 and B becomes a nonmember. Under the matching rule, M's sale of B stock results in \$18 of S's gain being taken into account (to reflect the difference between M's \$6 gain taken into account and the \$24 recomputed gain). Under the acceleration rule, however, the entire \$30 gain is taken into account (to reflect B becoming a nonmember, because its basis in the land reflects M's \$100 cost basis from the prior intercompany transaction). Under paragraph (j)(4) of this section, the attributes of S's gain are determined by treating S, M, and B as divisions of a single corporation. Because M's cost basis in the land will be reflected by B as a nonmember, all of S's gain is treated as from the land (rather than a portion being from B's stock), and B's activities with respect to the land might therefore result in S's gain being ordinary income.

(ii) *Example 2. Intercompany sale of member stock followed by recapitalization—(A) Facts.* Before becoming a member of the P group, S owns P stock with a basis of \$70. On January 1 of Year 1, P buys all of S's stock. On July 1 of Year 3, S sells the P stock to M for \$100. On December 1 of Year 5, P acquires M's original P stock in exchange for new P stock in a recapitalization described in section 368(a)(1)(E).

(B) *Timing and attributes.* Although P's basis in the stock acquired from M is eliminated under paragraph (f)(4) of this section, the new P stock received by

M is exchanged basis property (within the meaning of section 7701(a)(44)) having a basis under section 358 equal to M's basis in the original P stock. Under the successor asset rule of paragraph (j)(1) of this section, references to M's original P stock include references to M's new P stock. Because it is still possible to take S's intercompany item into account under the matching rule with respect to the successor asset, S's gain is not taken into account under the acceleration rule as a result of the basis elimination under paragraph (f)(4) of this section. Instead, the gain is taken into account based on subsequent events with respect to M's new P stock (for example, a subsequent distribution or redemption of the new stock).

(iii) *Example 3. Back-to-back intercompany transactions—matching—(A) Facts.* S holds land for investment with a basis of \$70. On January 1 of Year 1, S sells the land to M for \$90. M also holds the land for investment. On July 1 of Year 3, M sells the land for \$100 to B, and B holds the land for sale to customers in the ordinary course of business. During Year 5, B sells all of the land to customers for \$105.

(B) *Timing.* Under paragraph (b)(1) of this section, S's sale of the land to M and M's sale of the land to B are both intercompany transactions. S is the selling member and M is the buying member in the first intercompany transaction, and M is the selling member and B is the buying member in the second intercompany transaction. Under paragraph (j)(4) of this section, S, M and B are treated as divisions of a single corporation for purposes of determining the timing of their items from the intercompany transactions. See also paragraph (j)(2) of this section (B is treated as a successor to M for purposes of taking S's intercompany gain into account). Thus, S's \$20 gain and M's \$10 gain are both taken into account in Year 5 to reflect the difference between B's \$5 gain taken into account with respect to the land and the \$35 recomputed gain (the gain that B would have taken into account if the intercompany sales had been transfers between divisions of a single corporation, and B succeeded to S's \$70 basis).

(C) *Attributes.* Under paragraph (j)(4) of this section, the attributes of the intercompany items and corresponding items of S, M, and B are also determined by treating S, M, and B as divisions of a single corporation. For example, the attributes of S's and M's intercompany items are determined by taking B's activities into account.

(iv) *Example 4. Back-to-back intercompany transactions—acceleration*—(A) *Facts*. During Year 1, S performs services for M in exchange for \$10 from M. S incurs \$8 of employee expenses. M capitalizes the \$10 cost of S's services under section 263 as part of M's cost to acquire real property from X. Under its separate entity method of accounting, S would take its income and expenses into account in Year 1. M holds the real property for investment and, on July 1 of Year 5, M sells it to B at a gain. B also holds the real property for investment. On December 1 of Year 8, while B still owns the real property, P sells all of M's stock to X and M becomes a nonmember.

(B) *M's items*. M takes its gain into account immediately before it becomes a nonmember. Because the real property stays in the group, the acceleration rule redetermines the attributes of M's gain under the principles of the matching rule as if B sold the real property to an affiliated corporation that is not a member of the group for a cash payment equal to B's adjusted basis in the real property, and S, M, and B were divisions of a single corporation. Thus, M's gain is capital gain.

(C) *S's items*. Under paragraph (b)(2)(ii) of this section, S includes the \$8 of expenses in determining its \$2 intercompany income. In Year 1, S takes into account \$8 of income and \$8 of expenses. Under paragraph (j)(4) of this section, appropriate adjustments must be made to treat both S's performance of services for M and M's sale to B as occurring between divisions of a single corporation. Thus, S's \$2 of intercompany income is not taken into account as a result of M becoming a nonmember, but instead will be taken into account based on subsequent events (e.g., under the matching rule based on B's sale of the real property to a nonmember, or under the acceleration rule based on P's sale of the stock of S or B to a nonmember). See the successor person rules of paragraph (j)(2) of this section (B is treated as a successor to M for purposes of taking S's intercompany income into account).

(D) *Sale of S's stock*. The facts are the same as in paragraph (j)(9)(iv)(A) of this section (*Example 4*), except that P sells all of S's stock (rather than M's stock) and S becomes a nonmember on July 1 of Year 5. S's remaining \$2 of intercompany income is taken into account immediately before S becomes a nonmember. Because S's intercompany income is not from an intercompany sale, exchange, or distribution of property, the attributes of the intercompany income are determined on a separate entity basis.

Thus, S's \$2 of intercompany income is ordinary income. M does not take any of its intercompany gain into account as a result of S becoming a nonmember.

(E) *Intercompany income followed by intercompany loss*. The facts are the same as in paragraph (j)(9)(iv)(A) of this section (*Example 4*), except that M sells the real property to B at a \$1 loss (rather than a gain). M takes its \$1 loss into account under the acceleration rule immediately before M becomes a nonmember. But see § 1.267(f)-1 (which might further defer M's loss if M and B remain in a controlled group relationship after M becomes a nonmember). Under paragraph (j)(4) of this section appropriate adjustments must be made to treat the group as if both intercompany transactions occurred between divisions of a single corporation. Accordingly, P's sale of M stock also results in S taking into account \$1 of intercompany income as capital gain to offset M's \$1 of corresponding capital loss. The remaining \$1 of S's intercompany income is taken into account based on subsequent events.

(v) *Example 5. Successor group*—(A) *Facts*. On January 1 of Year 1, B borrows \$100 from S in return for B's note providing for \$10 of interest annually at the end of each year, and repayment of \$100 at the end of Year 20. As of January 1 of Year 3, B has paid the interest accruing under the note. On that date, X acquires all of P's stock and the former P group members become members of the X consolidated group.

(B) *Successor*. Under paragraph (j)(5) of this section, although B's note ceases to be an intercompany obligation of the P group, the note is not treated as satisfied and reissued under paragraph (g) of this section as a result of X's acquisition of P stock. Instead, the X consolidated group succeeds to the treatment of the P group for purposes of paragraph (g) of this section, and B's note is treated as an intercompany obligation of the X consolidated group.

(vi) *Example 6. Liquidation—80% distributee*—(A) *Facts*. X has had preferred stock described in section 1504(a)(4) outstanding for several years. On January 1 of Year 1, S buys all of X's common stock for \$60, and B buys all of X's preferred stock for \$40. X's assets have a \$0 basis and \$100 value. On July 1 of Year 3, X distributes all of its assets to S and B in a complete liquidation. Under § 1.1502-34, section 332 applies to both S and B. Under section 337, X has no gain or loss from its liquidating distribution to S. Under sections 336 and 337(c), X has a \$40 gain from its liquidating distribution to B. B has a \$40 basis under section 334(a) in the assets

received from X, and S has a \$0 basis under section 334(b) in the assets received from X.

(B) *Intercompany items from the liquidation*. Under the matching rule, X's \$40 gain from its liquidating distribution to B is not taken into account under this section as a result of the liquidation (and therefore is not yet reflected under §§ 1.1502-32 and 1.1502-33). Under the successor person rule of paragraph (j)(2)(i) of this section, S and B are both successors to X. Under section 337(c), X recognizes gain or loss only with respect to the assets distributed to B. Under paragraph (j)(2)(ii) of this section, to be consistent with the purposes of this section, S succeeds to X's \$40 intercompany gain. The gain will be taken into account by S under the matching and acceleration rules of this section based on subsequent events. (The allocation of the intercompany gain to S does not govern the allocation of any other attributes.)

(vi) *Example 7. Liquidation—no 80% distributee*—(A) *Facts*. X has only common stock outstanding. On January 1 of Year 1, S buys 60% of X's stock for \$60, and B buys 40% of X's stock for \$40. X's assets have a \$0 basis and \$100 value. On July 1 of Year 3, X distributes all of its assets to S and B in a complete liquidation. Under § 1.1502-34, section 332 applies to both S and B. Under sections 336 and 337(c), X has a \$100 gain from its liquidating distributions to S and B. Under section 334(b), S has a \$60 basis in the assets received from X and B has a \$40 basis in the assets received from X.

(B) *Intercompany items from the liquidation*. Under the matching rule, X's \$100 intercompany gain from its liquidating distributions to S and B is not taken into account under this section as a result of the liquidation (and therefore is not yet reflected under §§ 1.1502-32 and 1.1502-33). Under the successor person rule of paragraph (j)(2)(i) of this section, S and B are both successors to X. Under paragraph (j)(2)(ii) of this section, to be consistent with the purposes of this section, S succeeds to X's \$40 intercompany gain with respect to the assets distributed to B, and B succeeds to X's \$60 intercompany gain with respect to the assets distributed to S. The gain will be taken into account by S and B under the matching and acceleration rules of this section based on subsequent events. (The allocation of the intercompany gain does not govern the allocation of any other attributes.)

(viii) *Example 8: Loan by section 987 QBU*—(A) *Facts*. S owns all the interests in DE1, a disregarded entity operating a

business that is a section 987 QBU (S QBU) whose functional currency is the euro. S has net unrecognized section 987 gain with respect to S QBU. In year 1, S QBU lends €100 to B with interest due annually. B makes interest payments on the loan to S QBU in years 1 through 3. In year 3, B repays the loan and recognizes section 988 loss of \$12 on the loan repayment. All payments are made in euros, and B recognizes no section 988 gain or loss on the euros it uses to pay the interest and principal. B is never insolvent within the meaning of section 108(d)(3). Other than with respect to the loan, there are no transfers between S and S QBU during years 1 through 3, and neither S nor B had any other foreign currency gain or loss. Neither S nor B has made an election under section 988 or the section 988 regulations.

(B) *Analysis—(1) Loan.* Under paragraph (j)(9) of this section, the loan is treated as a transfer from S QBU to S and a loan directly between S and B. Specifically, S is treated as receiving a transfer of €100 from S QBU in year 1; S is then treated as lending €100 directly to B. For purposes of § 1.987–2, the loan is attributable to S, not to S QBU. As an intercompany loan, S's loan to B is subject to the rules of this section. Because there is a remittance from S QBU to S in year 1, S recognizes section 987 gain under § 1.987–5.

(2) *Interest payments.* While the loan is outstanding, each of B's interest payments to S QBU is treated as an interest payment from B to S, followed by a transfer from S to S QBU. Under the matching rule in paragraph (c) of this section, S's intercompany interest income offsets B's corresponding interest expense. See paragraph (g)(7)(ii)(A)(2) of this section (*Example 1*). Since the functional currency of both S and B is the dollar, if B recognizes any section 988 gain or loss on the interest payments, S will recognize an offsetting amount of section 988 loss or gain. Because the only transfer between S and S QBU in year 2 is from S to S QBU, there is no remittance from S QBU to S and S does not recognize section 987 gain under § 1.987–5.

(3) *Repayment.* Upon the year 3 repayment of the loan, B is treated as repaying €100 to S, and S is treated as transferring €100 to S QBU. Since the functional currency of both S and B is the dollar, and B recognizes section 988 loss of \$12 on the loan repayment, S will recognize an offsetting section 988 gain of \$12. Because the only transfers between S and S QBU in year 3 are from S to S QBU, there is no remittance from

S QBU to S and S does not recognize section 987 gain under § 1.987–5.

(4) *Summary.* Overall, the group's taxable income includes S's section 987 gain in year 1 (the section 988 inclusions offset). This result is consistent with the treatment of a single corporation that borrows from its section 987 QBU.

(C) *Loan sold to non-member.* The facts are the same as in paragraph (j)(10)(viii)(A) of this section, except that, in year 3, S QBU sells the loan to unrelated X for €90, reflecting an increase in prevailing market interest rates. Up until the sale, the analysis is the same as in paragraphs (j)(10)(viii)(B)(1) and (2) of this section. Because the loan is attributable to S (see paragraphs (j)(9) and (j)(10)(viii)(B)(1) of this section), the sale is treated as a sale by S. Under paragraph (g)(3) of this section, immediately before the sale, B is deemed to satisfy and reissue the loan for its fair market value of €90. As a result, B takes into account cancellation of indebtedness income, and S takes into account an offsetting amount of ordinary loss. See paragraph (g)(7)(ii) (*Example 2*) of this section. If there is currency gain or loss, S and B take into account offsetting amounts of gain and loss under section 988 (subject to the limitation of § 1.988–2(b)(8)). Because S has a basis of €90 in the new loan, S recognizes no gain or loss on the sale to X. S is then treated as transferring the €90 to S QBU.

(D) *Party becomes a nonmember.* The facts are the same as in paragraph (j)(10)(viii)(A) of this section, except that, in year 3, B becomes a nonmember. Up until B leaves the group, the analysis is the same as in paragraphs (j)(10)(viii)(B)(1) and (2) of this section. Immediately before B becomes a nonmember, B is deemed to satisfy and reissue the loan for its fair market value under paragraph (g)(3) of this section, with the same consequences as described in paragraph (j)(10)(viii)(C) of this section. When B becomes a nonmember, the loan (which is no longer an intercompany obligation) ceases to be subject to paragraph (j)(9) of this section. If the loan is attributable to S QBU under § 1.987–2, S is treated as transferring the loan to S QBU.

(ix) *Example 9: Sale of property by section 987 QBU—(A) Facts.* M1 owns all the interests in DE1, a disregarded entity operating a business that is a section 987 QBU (M1 QBU) whose functional currency is the euro. M1 has net unrecognized section 987 gain with respect to M1 QBU. M1 QBU sells property to M2 for €100 in year 1.

(B) *Analysis—(1) In general.* Under paragraph (j)(9) of this section, the sale of property is treated as a transfer of the property from M1 QBU to M1, followed by an exchange of the property for €100 directly between M1 and M2, and a transfer of the €100 from M1 to M1 QBU.

(2) *Distribution.* M1 QBU is treated as transferring the property to M1.

(3) *Exchange.* M1 is then treated as selling the property to M2 for €100. M1 takes into account its intercompany gain or loss on the property under the rules of this section. M2 recognizes intercompany section 988 gain or loss on its exchange of €100 for the property. See paragraph (b)(1)(iii) of this section for property exchanges between members.

(4) *Contribution.* Finally, M1 is treated as transferring the €100 to M1 QBU. Because M1's basis in the €100 equals its fair market value, M1 has a corresponding section 988 gain or loss of zero upon the contribution. See § 1.988–1(a)(10). Both the transfer of the property from M1 QBU to M1 and the transfer of the €100 from M1 to M1 QBU are taken into account in determining whether there is a remittance from M1 QBU to M1 in year 1 and whether M1 recognizes section 987 gain under § 1.987–5.

(5) *Summary.* Overall, in year 1, M1 may take into account section 987 gain if the transfers between M1 and M1 QBU result in a remittance, and M2 takes into account section 988 gain or loss on the €100. This result is consistent with the treatment of a single corporation that purchases property from its section 987 QBU.

(I) * * *

(7) *Applicability date.* Generally, paragraph (j)(9) of this section applies to taxable years beginning after December 31, 2024, for which the original Federal income tax return is due (without extensions) after December 11, 2024. However, if pursuant to § 1.987–15(b), a taxpayer chooses to apply §§ 1.987–1 through 1.987–15 to a taxable year before the first taxable year described in § 1.987–15(a)(1), then paragraph (j)(9) of this section applies to that taxable year and subsequent years.

Douglas W. O'Donnell,
Deputy Commissioner.

Approved: November 20, 2024

Aviva R. Aron-Dine,
Deputy Assistant Secretary of the Treasury
(Tax Policy).

25 CFR Part 1000

Self-Governance PROGRESS Act Regulations; Final Rule

DEPARTMENT OF THE INTERIOR**Bureau of Indian Affairs****25 CFR Part 1000**

[Docket No. BIA–2024–0001; 256A2100DD/AAK001030/A0A501010.999900]

RIN 1076–AF62

Self-Governance PROGRESS Act Regulations

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule.

SUMMARY: The U.S. Department of the Interior (Department), Office of the Assistant Secretary for Indian Affairs, is issuing revisions to the regulations that implement Tribal Self-Governance, as authorized by title IV of the Indian Self Determination and Education Assistance Act. This final rule has been negotiated among representatives of Self-Governance and non-Self Governance Tribes and the Department. **DATES:** This final rule is effective on January 10, 2025.

- **Information Collection**

Requirements: If you wish to comment on the information collection requirements in this final rule, please note that the Office of Management and Budget (OMB) is required to make a decision concerning the collection of information contained in this final rule between 30 and 60 days after publication in the **Federal Register**. Therefore, comments should be submitted to OMB (see “Information Collection Requirements” section below under **ADDRESSES**) by January 10, 2025.

ADDRESSES: The Department has established a docket for the information collection action associated with this rule available at <https://www.regulations.gov> and by searching for Docket No. “BIA–2024–0001” or RIN “1076–AF62.”

- **Information Collection**

Requirements: Written comments and recommendations for the information collection request (ICR) should be sent within 30 days of publication of this notice to the OMB through https://www.reginfo.gov/public/do/PRA/ICRPublicCommentRequest?ref_nbr=202410-1076-001 or by visiting <https://www.reginfo.gov/public/do/PRAMain> and selecting “Currently under Review—Open for Public Comments” and then scrolling down to the “Department of the Interior.” Please provide a copy of your comments to the Department by email to consultation@bia.gov with “OMB Control Number 1076–0143” in the email’s subject line.

FOR FURTHER INFORMATION CONTACT:

Oliver Whaley, Director, Office of Regulatory Affairs and Collaborative Action (RACA), Office of the Assistant Secretary—Indian Affairs, Department of the Interior, telephone (202) 738–6065, RACA@bia.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: This final rule is published in exercise of authority delegated by the Secretary of the Interior (Secretary) to the Assistant Secretary—Indian Affairs (Assistant Secretary; AS–IA) by 209 Department Manual 8 (209 DM 8).

M. Clarity of This Regulation

I. Background**A. Statutory Authority**

On October 21, 2020, the Practical Reforms & Other Goals to Reinforce the Effectiveness of Self Governance & Self Determination for Indian Tribes Act (PROGRESS Act) was signed into law. See, Public Law 116–180. The PROGRESS Act amends subchapter I of the Indian Self-Determination and Education Assistance Act (ISDEAA), 25 U.S.C. 5301, which addresses Indian Self-Determination, and subchapter IV of the ISDEAA, which addresses the Department’s Tribal Self-Governance Program.

Section 413 of Public Law 116–180, 25 U.S.C. 5363 directs the Secretary to promulgate regulations using the negotiated rulemaking process to carry out subchapter IV of the ISDEAA, the Department’s Tribal Self-Governance Program. Section 413(a)(3) of Public Law 116–180 establishes expiration of authority for the promulgation of such regulations. The Self-Governance PROGRESS Act Negotiated Rulemaking Committee (“Committee”) was established and commenced with the negotiated rulemaking process for this final rule. On April 20, 2023, the Committee’s authority to promulgate regulations to meet the directive of the PROGRESS Act expired under section 413(a)(3) of the same statute, thus leaving the Committee with no authority to continue the negotiated rulemaking for this rule. Congress, however, on September 30, 2023, extended the Committee’s authority until December 21, 2024. Public Law 118–15 at section 2102.

B. Executive Summary

This final rule updates the regulations implementing Tribal Self-Governance at the Department. While the final rule does incorporate terms and processes that may be common to self-governance at the Department of Health and Human Services (HHS) authorized by title V of the ISDEAA, and the Department of Transportation (DOT) authorized by 23 U.S.C. 207, it is not the intent of this final rule to define or regulate any term or process that is applicable to HHS or DOT, even where such terms or processes are common between the agencies. The final rule should not be construed to bind HHS or DOT to any particular interpretation of a term or process.

Since the Department promulgated its title IV regulations in 2000, and Indian

Health Service (IHS) promulgated its title V regulations in 2005, the agencies implement their ISDEAA self-governance programs differently due to the unique nature of the Programs, Services, Functions, and Activities (PSFA) they manage, the needs of their beneficiaries, and intentional policy choices. In many instances, this rule maintains those implementations and procedural differences because the Department is honoring the Committee's preference for maintaining past procedures, even where those procedures may differ from other agencies. Although the ISDEAA provides such discretion to the Secretary, given the longevity of these practices, the Committee's preference to maintain them, and the Department's desire not to unsettle expectations, the final rule continues some procedures that may differ from IHS.

This final rule has been negotiated by representatives of Self-Governance and non-Self-Governance Tribes, and the Department (the "Committee"). The effect of the final rule is to transfer to participating Tribes control of, funding for, and decision making concerning certain Federal programs, consistent with updates contained in the PROGRESS Act. This final rule will have a negligible cost burden for Tribes currently participating in Self-Governance, some startup costs for Tribes not currently participating in Self-Governance, and some negligible new costs to the Federal Government.

C. Negotiated Rulemaking Process

The PROGRESS Act directed the Secretary to adapt negotiated rulemaking procedures regarding the unique context of self-governance and the government-to-government relationship between the United States and Indian Tribes. The PROGRESS Act also called for a negotiated rulemaking Committee to be established under 5 U.S.C. 565, with membership comprised only of representatives of Federal agencies and Tribal governments, with the Office of Self-Governance (OSG) serving as the lead agency for the Department. The Secretary charged the Committee with developing proposed regulations for the Secretary's implementation of the PROGRESS Act's provisions regarding the Department's Self-Governance Program.

The Department published a **Federal Register** notice on February 1, 2021, 86 FR 7656, announcing the intent to establish a committee and soliciting nominations for membership on the Committee. The Department published a **Federal Register** notice on May 18, 2022, 87 FR 30256, announcing the

formation of the Committee and identifying 14 Tribal representatives, and 12 Federal representatives.

To fulfill the requirements for negotiated rulemaking and the Federal Advisory Committee Act, representatives reflect those currently participating in the Tribal Self-Governance Program and those that are not currently participating in, but are interested in, the Tribal Self-Governance Program. Additionally, Tribal representatives reflect a balance in terms of geographical location and size of the Tribe. Membership consists only of representatives of Federal and Tribal governments, with OSG serving as the lead agency.

The Committee met fifteen times to negotiate the proposed regulations, resulting in the proposed rule that was published on July 15, 2024, 89 FR 57524. The Committee members and technical advisors organized themselves into two subcommittees and used the scheduled subcommittee meetings to develop draft materials and exchange information. The Committee's meeting minutes, and any materials approved by the full Committee, were made a part of the official record.

After the proposed rule was published on July 15, 2024, 89 FR 57524, the Committee received written and verbal comments through consultation, which are summarized below. After consultation was completed, the Drafting Subcommittee of the Committee, met on multiple occasions to review comments received, discuss options to address interagency feedback, and attempt to reach consensus on recommendations to the Committee. The Committee met an additional two times (for a total of 17 meetings) and reached consensus in response to many of the issues as outlined in Section III, "Summary of Comments Received."

II. Public Engagement and Consultation

The Department hosted three in-person consultation sessions on July 15, 17, and 19, and one virtual Tribal consultation session on July 22, on its proposed rule implementing the PROGRESS Act. Each session lasted approximately 2 hours. The Department received 492 individualized comments¹ from 27 Tribes; 8 national and inter-Tribal organizations and Tribal entities;

¹ An individualized comment is a comment on a discrete issue or concern, raised by a commentator in response to the proposed rule, whether in writing or orally. For example, a written comment letter could have addressed several different issues or concerns. Also, during the consultations and listening session, a commentator could have orally discussed several different issues or concerns in their address.

and national law firms representing multiple Tribes and Tribal consortia exercising Tribal self-governance for their respective communities. Both the verbal and written comments support the Tribal positions on the non-consensus issues, detailed in the Committee Report dated April 12, 2024 (Committee Report). The main themes addressed in the comments were:

- The PROGRESS Act's rules of construction;
- What contents compacts and funding agreements should include;
- How inherent federal functions ("IFFs") should be negotiated and determined;
- Tribal authority to make final determinations under the Nation Environmental Policy Act ("NEPA"), the National Historic Preservation Act ("NHPA"), and other related laws;
- How contract support costs ("CSCs") are calculated for non-BIA programs;
- What types of appeals are available to Indian Tribes participating in self-governance under title IV;
- Suggested language and deletions to the proposed rule; and
- Other comments more general in nature or relating to other areas of the proposed rule.

III. Summary of Comments Received

A. General Comments

Many of these comments are general in nature: describing the unique histories of the commenting Tribes and their relationship to the Tribal self-governance program; asking the Department to reconsider its position on the non-consensus issues; comments thanking the Department for its work; and expressing appreciation for considering Tribal comments.

Comments on Inherent Federal Function

The Department will decide what functions are inherently Federal on a uniform case-by-case basis after consultation with the Office of the Solicitor. For current guidance on IFF determinations, please see Solicitor's memorandum dated May 17, 1996. The memorandum is available from the Office of Self-Governance upon request. The Department shall provide information on why specific functions have been determined inherently Federal to Tribes and Consortia in accordance with this part.

The Department recognizes that title V of the ISDEAA delegates to Indian Tribes authority for final environmental determinations for construction projects. In negotiating with a Tribe/Consortium to include a construction

project under this part, and how a Tribe/Consortium may assume some Federal responsibilities under 25 U.S.C. 5367(b), the Department will address the differences between title V (25 U.S.C. 5389(a)) and title IV (25 U.S.C. 5367(b)) of the ISDEAA through discussions with the Office of the Solicitor and in accordance with section 5(f) of Executive Order No. 14112, and the PROGRESS Act's rules of construction and interpretation.

Many comments expressed concerns regarding what criteria the Department must consider when determining what are IFFs under title IV, as amended by the PROGRESS Act, and whether the issue of what is an "IFF" is a proper topic of negotiation between the Department and a Tribe/Consortium participating in self-governance. The Department acknowledges these comments.

Several Tribes described past experiences negotiating with federal officials about IFFs, and noted their belief that the Department, in negotiation of self-governance agreements, often takes an overly expansive interpretation regarding what functions are inherently Federal and, therefore, not eligible for inclusion in a funding agreement. These commenters state that this approach comes at the expense of Tribal autonomy and self-governance objectives of the PROGRESS Act. Many commenters urged the Department to incorporate language from the long-standing Department Solicitor guidance to clarify all determinations of IFFs. The Department addressed the issue of which functions may be considered "inherently Federal" for purposes of 25 U.S.C. 5363(k) as one of the four issues of disagreement between the Department and Tribes/Consortia in the final rule.

Many commenters requested that the Department establish criteria for determining when a function is inherently federal and referenced suggested provisions that incorporate long-standing agency guidance from the 1996 Solicitor memorandum ("Leshy Memorandum"), IFFs under the Tribal Self-Governance Act, at 12 (May 17, 1996) ("The more a delegated function relates to tribal sovereignty over members and territory, the more likely it is that the inherently Federal exception of section 403(k) does not apply."). Tribal commenters argue consistent and transparent criteria must be implemented on how IFF determinations will be made under title IV. Without such criteria, they suggest, the Department may fail to liberally construe each provision of title IV and each provision of a compact and

funding agreement for the benefit of the Indian Tribe participating in self-governance, with any ambiguity to be resolved in favor of the Indian Tribe, and could instead assert inherent federal characteristics over many types of functions that the relevant bureau simply may not want to compact or contract. In these instances, the Tribal commentors assert that threshold criteria would help ensure consistent determinations across all relevant bureaus and offices within the Department.

As the Tribal narrative articulates, the Department issued guidance in the Leshy Memorandum stating that any determination about the "inherently federal restriction can only be applied on a case-by-case basis." The Department re-affirmed this position in a November 2022 Report on authorities that can support Tribal stewardship and co-stewardship. The federal position is that the Leshy Memorandum provides a framework for bureaus and offices of the Department to utilize when making a determination. The federal position is that particular phrases of that framework should not be codified in regulation in isolation but instead within the full context of the document.

The Department expressed caution in creating a regulatory process that could, in practice, ask the Department to take a position on whether a "delegated PSFA relates to Tribal sovereignty." As a matter of administrative law, this process could create unintended consequences or roadblocks to Tribes exercising their sovereignty by subjecting that potential exercise to a federal determination. The Department does not wish to create an administrative process that might result in an outcome detrimental to Tribal sovereignty. The Department, in establishing the final rule took significant actions to define a consistent and transparent procedure that it will follow when identifying IFFs and then calculating eligible tribal shares in turn. The Department feels that these portions of the final rule address the core concerns of many commenters and will better ensure consistency and transparency in determining eligible funds and that activities captured as inherently federal will be based on valid legal authority.

Comments on Executive Order 13175, Executive Order 14112, and Secretarial Order 3403

Executive Order 13175 (E.O. 13175), also known as "Consultation and Coordination with Indian Tribal Governments," establishes policies and principles for how the federal

government should interact with Indian Tribal governments. Executive Order 14112 (E.O. 14112), also known as "Reforming Federal Funding and Support for Tribal Nations to Better Embrace Our Trust Responsibilities and Promote the Next Era of Tribal Self Determination," directs agencies to reform their programs so that Tribal Nations have greater autonomy over how Tribal Nations invest federal funding, and to make federal funding less burdensome and more accessible for Tribal Nations. E.O. 14112 states that Tribal governments must be treated as permanent, equal, and vital parts of America's overlapping system of governments. Secretarial Order 3403 (S.O. 3403), also known as "Joint Secretarial Order on Fulfilling the Trust Responsibility to Indian Tribes in the Stewardship of Federal Lands and Waters," ensures that the U.S. Department of Agriculture (USDA) and the Department and their component Bureaus and Offices are managing Federal lands and waters in a manner that seeks to protect the treaty, religious, subsistence, and cultural interests of federally recognized Indian Tribes; that such management is consistent with the nation-to-nation relationship between the United States and federally recognized Indian Tribes; and, that such management fulfills the United States' unique trust obligation to federally recognized Indian Tribes and their citizens.

Throughout many of the comments, commentors reminded the Department of its trust and treaty obligations under the Constitution of the United States, E.O. 13175, E.O. 14112, and S.O. 3403. Many commentors reminded the Department that as it completes the rulemaking process that the Department implement E.O. 13175 and E.O. 14112, and the Presidential Memorandum dated January 26, 2023, which represent the Administration's respect for sovereignty, and commitment to ushering in the next era of Tribal self-determination by ensuring that Tribal Nations have greater autonomy in all aspects of self-governance. One commentor stated that these policies will have no meaning without accompanying meaningful and respectful actions, including in the PROGRESS Act rulemaking that requires the Department to act in good faith and fully uphold the right of Tribes/Consortia to self-govern.

One Commentor noted that recognition of the importance of Indigenous Knowledge by Federal agencies is an express requirement of E.O. 14112. One commentor stated that the Department's position concerning

IFFs is untenable given the goals and objectives outlined in E.O. 14112 and S.O. 3403, noting that in the commentor's experience, negotiating transferrable programs and activities is the lengthiest portion of the process due to the fact that agencies are often unwilling to acknowledge or accept Tribal or consortia capacity and traditional ecological knowledge. Another commentor stated that Tribal traditional ecological knowledge has been left out of the regulations.

Many commentors noted that the PROGRESS Act was the direct result of Congress acknowledging that there needed to be an overhaul of title IV to correct bureaucratic processes and procedures that the Department imposed that either discouraged or hindered negotiations between Tribes and the Department. Many commentors asserted that the Indian canons of construction should be applied during Tribal consultation activities, and any ambiguities in law or policy should be interpreted in favor of Tribes in accordance with E.O. 13175, Sec. 6, and E.O. 14112, section 5. Commentors urged the Department to take these directives into account when developing the final rule. One commentor noted that Department negotiators often take an expansive interpretation of what functions are Inherently Federal with the objective to preserve work and jobs for Federal employees at the expense of Tribal autonomy and self-governance objectives. Another commentor noted that E.O. 14112 aims to increase flexibility by reducing administrative burdens and facilitating access to federal funding and resources.

Many commentors stated that the Tribal representatives' position that the PROGRESS Act permits Tribes/Consortium to make final determinations under NEPA and related environmental laws are firmly grounded in E.O. 14112. A commentor stated that the Tribal position concerning environmental determinations under NEPA is consistent with CEQ's revised regulations, 40 CFR part 1500 *et seq.*, that went into effect on July 1, 2024. A commentor noted that the Department's position is a step back for self-governance and fundamentally at odds with the most basic tenets of Tribal self-governance policy. A commentor stated that sound policy considerations by the Department, including adherence to E.O. 14112, can lead the Department to issue a final rule that decreases litigation risk and the attendant ramifications.

Throughout the comments, there were repeated instances where Tribes

suggested improvements to the language of the proposed rule that would further implement the intent of E.O. 13175, E.O. 14112, and S.O. 3403. The Committee considered all the comments and implemented many of the suggestions. The Committee made changes to the final rule to define when and how Indigenous Knowledge can be used (§ 1000.20 and § 1000.1390), significant updates to the appeals process to give Tribes more options subpart R (Appeals), updates to how Public Law 102–477 is referenced, and changes to subpart G (Funding Agreements for Non-BIA Programs) related to clarifying CSCs.

There were also areas where commentors made suggestions to change the proposed rule, citing E.O. 14112, but after review by the Committee those changes were not implemented. This includes proposed changes related to clarifying whether IFFs can be negotiated (§ 1000.695) and requests to add additional sections to subpart K (Construction). The Department acknowledges these comments and further explains below why the changes were not implemented.

The Department is committed to upholding the federal government's trust and treaty obligations as reiterated in E.O. 13175, E.O. 14112, and S.O. 3403. The Department is dedicated to ensuring that Tribes are able to exercise sovereignty through self-governance and self-determination by ensuring that Federal programs, to the maximum extent possible and practicable under Federal law, provide Tribal Nations with the flexibility to improve economic growth, address the specific needs of their communities, and realize their vision for their future.

The Department is appreciative of the work of the Tribal members on the negotiated rulemaking committee as well as all of the Tribal engagement throughout the rulemaking process. This final rule reflects the good faith collaboration between the federal government and Tribal governments.

Comments on the Rules of Construction

Many Tribal commentors underscored the rules of construction within the PROGRESS Act, at sections 406 and 409. Tribal commenters read those sections to require liberal interpretation of the language in the statute, and therefore the contents of its regulations. Specifically, they note that ambiguities should be resolved in favor of the compacting Tribes/Consortiums and that the PROGRESS Act must be implemented in a manner that facilitates inclusion of programs in the Tribal Self-Governance program.

The liberal interpretation comments are intended to be overarching and suggest that, with respect to the non-consensus issues, the Department should bend towards the Tribal positions where there is ambiguity. According to the Tribal commenters, Congress said so in the PROGRESS Act, as evidenced in sections 406 and 409.

The comments further noted concern that the Department was ignoring the clear directives from Congress in the PROGRESS Act and cherry-picked statutory provisions to undermine the Tribal efforts to resolve differences. The comments asked the Department to reconsider the Department's position on non-consensus issues as negotiations continued to consider the long-standing Indian canons of construction.

The Department acknowledges these comments, using the comments and feedback to inform the final rule.

Comment on Clean Energy Promotion

One comment requested a focus on clean energy through biomass, woody byproducts, or cogeneration.

The Committee acknowledges the comment. The Department agrees that the use of clean energy can be an important component of projects implemented under this rule.

Comment on Co-Management

One comment requested that co-management be included in the final rule in response to including Indigenous Knowledge. The example provided is to assist Tribal communities who deal with forest fires and working with the U.S. Forest Service to coordinate and create an economic plan to develop restoration projects and allowing Tribal communities to implement traditional ecological knowledge into the plan as part of co-management.

The Committee acknowledges the comment to allow Tribes and Tribal Consortia the maximum flexibility and discretion necessary to meet the needs of their communities consistent with their diverse demographic, geographic, economic, cultural, health, social, religious, and institutional needs. This includes recognition of and support for Indigenous Knowledge to be included into the final rule. This rule does not apply to the U. S. Forest Service.

Comment on Committee Consensus

One comment indicated support for the regulations developed in consensus with the Committee.

The Department acknowledges the comment.

Comment on the Federal Regulations

One comment suggested revisiting federal regulations to allow Tribes the ability to develop infrastructure within their lands, which has aged and needs replacement with modernized equipment to meet future demands and avoid potential impact on the Tribe's public safety and health.

The Committee acknowledges the comment. Under subpart K (Construction), this final rule provides that the Secretary may accept funds from other departments for construction projects or programs, subject to an interagency agreement, between the Secretaries, with Tribal concurrence.

Comments in General

Numerous commentors thanked the Committee for their work in coming to consensus on most of the areas at issue in the PROGRESS Act. However, they noted a desire for the Department to lean towards the Tribal positions on areas of non-consensus to advance Tribal self-governance and comply with the intent of the PROGRESS Act.

The Department acknowledges these comments as federal members committed themselves to participate in good faith during all negotiations and discussions.

Comments on the Publication of Final Rule

Numerous comments asked the Department to ensure that the rule be published before the sunset date of December 21, 2024.

The Department is committed to publishing the final rule before this deadline.

Comments on the Department's Handling of Trust Responsibility

A few comments noted that the Department does not always handle well the conflicts of interest that exist between its bureaus and its trust responsibility to Tribes and their members. Despite the PROGRESS Act's clear mandate that the Secretary does not waive, modify, or diminish, in any way, the trust responsibility to Tribes and individual Indians, and its obligation to empower Tribes, too often the interest of non-BIA bureaus take precedence over the ever-growing needs of Indigenous peoples.

The Department acknowledges these comments. The Department is committed to ensuring that the trust and treaty responsibilities owed to Tribes is met. The effect of this final rule is to transfer to participating Tribes control of, funding for, and decision making concerning certain Federal programs,

consistent with updates contained in the PROGRESS Act.

B. Subpart Comments

Subpart A—General Provisions

Comments on § 1000.10—What is the purpose and scope of this part?

A few comments were received that these provisions of title IV do not govern any other program of self-governance other than under title IV and do not bind any other cabinet Secretary or agency other than the Secretary of the Interior.

While the rule does incorporate terms and processes that may be common to self-governance at HHS authorized by title V of the ISDEAA, and DOT authorized by 23 U.S.C. 207, it is not the intent of this rule to define or regulate any term or process that is applicable to HHS or DOT, even where such terms or processes are common between the agencies. The rule should not be construed to bind HHS or DOT to any particular interpretation of a term or process.

Comments on § 1000.15—What is the congressional policy statement of this part?

The Committee received comments concerning the congressional policy statement. After deliberations by the Committee, it was the consensus of the Committee to revise § 1000.15(c)(2) to replace the phrase “create consistency and administrative efficiencies between title IV and title V of Public Law 93–638” with the phrase “create similarities and administrative efficiencies between title IV and title V of Public Law 93–638” to more accurately reflect the content of the final rule.

Comments on § 1000.20—What is the Secretarial policy of this part?

Several comments were received that the final rule at § 1000.20 should fully implement the rules of construction required by the PROGRESS Act. While § 1000.20 incorporates elements of these provisions, section 406(i), of the PROGRESS Act, 25 U.S.C. 5366(i), directs that, subject to section 101(a) of the PROGRESS Act, 25 U.S.C. 5361(a) note, “each provision of this subchapter [title IV] and each provision of a compact or funding agreement shall be liberally construed [by the Secretary] for the benefit of the Indian Tribe participating in self-governance, and any ambiguity shall be resolved in favor of the Indian Tribe.” This interpretation is not set out with clarity in § 1000.20.

The Committee agreed with the comments and accepted most of the language offered in the final rule. This

will support the Department in its efforts to maximize implementation of the Self-Governance Policy and carry out title IV.

Comments on § 1000.35—What happens if a court holds any provisions of these regulations in this part invalid?

The Department added a new section § 1000.35 on severability. While this rule is intended to create streamlined and consistent processes for Self-Governance under title IV, if a court holds any provision of one part of this rule as finalized invalid, it should not impact the other parts of the rule, which would remain in force. The intent of this rule is to implement the Department's Self-Governance program, but the rule is not an interdependent whole—other provisions of the rule would implement that intent even if a court declared certain provisions invalid.

Subpart B—Selection of Additional Tribes for Participation in Tribal Self-Governance

Comment on § 1000.178—[Section Does Not Exist in the Proposed Rule]

See comment on subpart H (Negotiation Process)—§ 1000.1075—When does the funding agreement become effective?

Subpart C—Planning and Negotiation Grants for BIA Programs

Comments on § 1000.301—[Section Does Not Exist in the Proposed Rule]

See comment on subpart K (Construction)—§ 1000.1301—What key construction terms do I need to know?

Subpart D—Financial Assistance for Planning and Negotiation Activities for Non-BIA Bureau Programs

The Committee did not receive comments related to this subpart.

Subpart E—Compacts

Comments on § 1000.510—What is included in a self-governance compact? And § 1000.515—What provisions must be included in either a compact or funding agreement?

The Committee did not come to agreement on § 1000.510(e) and § 1000.515. The central focus of the concerns regarded satisfying the requirements of 25 U.S.C. 5365(a), which provides that “[a]n Indian Tribe and the Secretary shall include in any compact or funding agreement provisions that reflect the requirements of this title,” *i.e.*, title IV of the ISDEAA, addressing Tribal Self-Governance. The view of the Tribal team and many Tribal comments is that simplified Tribal

assurances included in a compact and/or funding agreement that provide that the Tribe/Consortium will comply with the requirements of title IV is sufficient to satisfy the statutory requirement in 25 U.S.C. 5365(a). Many Tribal comments stated that the Department's interpretation of 25 U.S.C. 5365 undermines compact negotiations and is contrary to the PROGRESS Act and the intent of Congress in the PROGRESS Act to streamline regulations and the content of compacts and funding agreements.

The Tribal view is that the requirements of title IV can be better reflected through regulatory language that states that the Tribe/Consortium, in either their compact or funding agreement, will attest to compliance with title IV, or otherwise state that they will carry out the compact or funding agreement "in accordance with the requirements of title IV." The Tribal view is that § 1000.510(e) and § 1000.515 are excessive and not properly tailored to reflect the requirements of title IV.

Several Tribal comments objected to § 1000.510(e) and § 1000.515, and recommended those provisions be deleted. These comments considered detailed compliance provisions in a compact or funding agreement to be overburdensome, unnecessary, excessive, unproductive to the good-faith negotiation process, and likely to cause delays. These comments similarly noted the potential of these provisions to lead to dispute resolution or litigation. Instead, the Tribal comments recommended that compacts or funding agreements contain an attestation affirming compliance in accordance with the requirements of the PROGRESS Act. The Tribal comments recommended such attestation to streamline negotiation and administrative processes and to comply with the PROGRESS Act's rules of construction and liberal interpretation, and with the Paperwork Reduction Act.

The Department view is that relevant provisions of the PROGRESS Act indicate certain provisions or language must be included in a funding agreement or a compact. For example, 25 U.S.C. 5366(b)(1) directs that "[a] compact or funding agreement shall include provisions for the Secretary to reassume a program and associated funding if there is specific finding relating to that program. . . ." As another example, 25 U.S.C. 5363(e)(2) authorizes the parties to specify an effective date for retrocession to ". . . become effective on the date specified by the parties in the compact or funding agreement."

The Department view is informed by experience when encountering a problem in the execution of a compact or funding agreement. In such situation, a primary question involves clarifying the agreed upon terms of the compact or funding agreement as to a particular outcome. For example, in a dispute about retrocession, the first area reviewed is what does the compact or funding agreement say about retrocession. Also, non-parties with an interest to the compact or funding agreement, such as auditors, inspectors, courts of jurisdiction, other federal agencies, etc., would benefit from clearly stated provisions rather than from a general attestation. The Department believes that clearly specifying terms in a compact and funding agreement best addresses the expectations and interests of both parties. The Department does not anticipate that the requirements in § 1000.510(e) and § 1000.515 will require new edits to most existing compacts or funding agreements. The Federal team expects that most existing compacts and funding agreements satisfy the requirements in § 1000.510(e) and § 1000.515 if those compacts or funding agreements restate applicable statutory requirements for the specified topics referenced in § 1000.515. The Committee did not reach consensus on the language in § 1000.510(e) and § 1000.515 because the Tribal committee members did not agree with the Department's underlying interpretation of 25 U.S.C. 5365(a). The final rule reflects the Federal view on this matter.

Subpart F—Funding Agreements for BIA Programs

Comments on § 1000.610—What must be included in a funding agreement?

See the comments, discussion, and response above in subpart E (Compacts). The Committee did not agree on this matter and the final rule reflects the Federal view at § 1000.610(b).

Comments on § 1000.690—How does BIA determine the funding amount to carry out inherent Federal functions?

Commentors stated their support for the proposed language in § 1000.690(f)(1), reiterated the importance of consistency and uniformity within BIA Regions, and referenced previous situations in which Tribes feel that BIA took an expansive interpretation of IFFs and the associated programs funds to fulfill them and thus reduced the amount of contractable or compactable funds available to Tribes/Consortium.

The Committee acknowledges these comments as the language in proposed rule addresses this concern by requiring "uniformity and consistency in the identification of inherent Federal functions."

Comments on § 1000.695—Is the amount of funds withheld by the Secretary to cover the cost of inherent Federal functions subject to negotiation?

Several commentors supported the views and regulatory text articulated in the Committee's Report on proposed § 1000.695, further requesting changes to the proposed rule, to state generally that IFFs are a permissible topic of discussion during the negotiation process.

The Committee acknowledges these comments and declines to make the requested changes. The Department believes that the breadth of negotiation topics is adequately set out in the final rule.

Subpart G—Funding Agreements for Non-BIA Programs

Comments on § 1000.845—Are there any non-BIA programs that may not be included in a funding agreement?

Tribal comments urged the Department to revise proposed § 1000.845 to include a core principle of the Leshy Memorandum. Many commentors agreed and asserted that providing transparent guidance would aid negotiators of non-BIA agreements and reflect compliance with the Supreme Court opinion in *U.S. v Mazurie*, 419 U.S. 544 (1975). Commentors asserted that inclusion in the regulations of this basic principle would help provide parity between Tribal and Federal representatives when negotiating agreements and would advance fundamental Self-Governance objectives.

The Department acknowledges the comments and did not accept the recommendation to revise § 1000.845. The Department will apply the principles of the Leshy Memorandum on a case-by-case basis when determining whether a function requested for inclusion in the funding agreement by a participating Tribe/Consortium is an IFF. The section references the PROGRESS Act's definition of IFF, 25 U.S.C. 5361(6), and the requirement in 25 U.S.C. 5363(k) that directs how the Department evaluates such issues.

Some Tribal commentors expressed previous difficulties in negotiating IFFs with particular agencies. Another Tribal comment disagreed with the federal assessment that formal adoption of the

Leshy Memorandum would result in additional administrative process.

The Committee acknowledges these comments as § 1000.845 addresses what may not be included in a funding agreement.

Two comments on specific agency decisions on IFF positions do not go to the regulation. These comments were forwarded to the relevant agency to consider.

Comments on § 1000.885—What funds are included in a non-BIA funding agreement?

Many commentors urged the Department to revise proposed § 1000.885(b)(iii) to ensure that Tribes/Consortia receive full CSCs under section 106(a) of the PROGRESS Act, 25 U.S.C. 5325, including direct CSCs. Commentors requested the Department to insert the citation in the proposed section and strike the reference to congressional appropriations. The Department acknowledges the comments. As concerns section 403(c) programs, 25 U.S.C. 5363(c), eligible for inclusion in a funding agreement under the PROGRESS Act, the proposed section stated that the funding agreement will include the following: (i) amounts equal to the direct program or project costs the bureau would have incurred were it to operate that program at the level of work mutually agreed to in the funding agreement; (ii) allowable indirect costs; and (iii) such amounts as the Tribe/Consortium and the Secretary may negotiate for pre-award, start-up, and direct contract support costs, or upon appropriations by Congress.

Many commentors took issue with the phrase “or upon appropriations of such funds by Congress” reflected in proposed § 1000.885(b)(1)(iii). Commentors believed that the reference to Congressional appropriations will deprive Tribes/Consortia of their full CSC funds, place a financial burden on Tribes/Consortia, and serve as a deterrent to their negotiating the inclusion of such programs in compacts and funding agreements.

After review of the comments and further deliberations by the Committee, the Department accepts the recommendation. The final rule § 1000.885(b)(1)(iii) states that non-BIA bureaus determine the amount of funding to be included in the funding agreement using the following principles: (iii) Such amounts as the Tribe/Consortium and the Secretary may negotiate for pre-award, start-up, and direct CSCs.

Comment on § 1000.895—How does the Secretary determine the amount of indirect costs?

A comment was received asking the Committee to clarify this question by adding non-BIA funding to the question and initial part of the response and by adding “and making other adjustments required by the PROGRESS Act” to the end of § 1000.895(a).

The Committee agreed with this comment and implemented the proposed change into the final rule.

Subpart H—Negotiation Process

Comment on § 1000.1075—When does the funding agreement become effective?

One comment referenced § 1000.178. This comment addressed eliminating the 2001 prior rule for self-governance at § 1000.178 that required once a funding agreement is signed, the effective date would be 90 days after it is submitted to the House Subcommittee on Native Americans and Insular Affairs and the Senate Committee on Indian Affairs. This requirement to submit the funding agreement to the Congressional committees was eliminated in the PROGRESS Act and therefore not addressed in this rule. The final rule at § 1000.1075 makes a funding agreement effective on the date it is executed or otherwise begins according to the agreement terms.

The Committee acknowledges the comment with no further changes to this subpart.

Subpart I—Final Offer

The Committee did not receive comments related to this subpart.

Subpart J—Waiver of Regulations

Comments on § 1000.1240—When must the Secretary make a decision on a waiver request?

Two commentors pointed out that the Department has two statutory provisions that authorize Tribes to request waivers using a set timeline for the Secretary’s consideration of the waiver, 25 U.S.C. 5363(i)(2)(A) (provides 60-day review period) and 25 U.S.C. 5369(b) (provides 120-day review period). The comment pointed out that the proposed regulations do not reference either statutory provision, and the process calls for a 120-day review period, which tracks with the language at 25 U.S.C. 5369(b).

The final rule describes the timeline for the Secretary to make a waiver decision for Tribes in § 1000.1240 as the 120-day decision review period. The Committee determined to select the 120-day timeline to follow, as it was most

closely applicable to title IV. The Committee assumed that the conflict in the statutory provisions was a drafting mistake that occurred when the PROGRESS Act was developed. The Committee believes this issue can be addressed at a later date through a technical correction or an amendment that affirms the correct statutory provision is 25 U.S.C. 5369(b)(2).

Subpart K—Construction

Several comments expressed the view that making final determinations under NEPA is not an inherently federal function and should be contractable by Tribes/Consortia that comply with 25 U.S.C. 5367(b). These views referred to section 5367(b) that, subject to an agreement with the Secretary as limited by 25 U.S.C. 5367(c), requires a Tribe/Consortium electing to assume some Federal responsibilities under NEPA, the NHPA and related provisions of other laws and regulations to designate a certifying Tribal officer to represent the Tribe/Consortium and “to assume the status of a responsible Federal official under those Acts, laws, or regulations.” Under the statute, the Tribe/Consortium must also “accept the jurisdiction of the United States courts for the purpose of enforcing the responsibilities of the certifying Tribal officer assuming the status of a responsible Federal official under those Acts, laws, or regulations.”

The comments stated that when these provisions are combined with the Department’s definition of a “responsible official” (43 CFR 46.30) as the individual designated “to make and implement a decision on a proposed action and is responsible for ensuring compliance with NEPA,” the Council on Environmental Quality’s (CEQ) revised NEPA regulations at 40 CFR part 1508 (May 1, 2024), that define the term “Federal agency” to include States, units of general local government, and “Tribal governments assuming NEPA responsibilities from a Federal agency pursuant to statute,” and the PROGRESS Act’s “rules of construction” at 25 U.S.C. 5366(i) directing that each provision of the PROGRESS Act “be liberally construed for the benefit of the Indian tribes and any ambiguity shall be resolved in favor of the Indian tribe,” there is compelling support for the Tribes’ position.

The comments further noted that the Department should give full expression to all the terms of the PROGRESS Act and Congressional intent to further empower Tribes to make final determinations under NEPA, the NHPA, and related environmental laws, citing to 25 U.S.C. 5369(a) providing that “the

Secretary shall interpret each Federal law and regulation in a manner that facilitates the inclusion of programs in funding agreements and the implementation of funding agreements.” The comments stated that this lends further support for a favorable interpretation of CEQ and Department NEPA regulations to delegate the authority for making a final determination and cited that the PROGRESS Act revised the definition of the term “construction program; construction project” to mean a “Tribal undertaking” that includes “environmental determination.” 25 U.S.C. 5361(2).

Additional comments noted that the PROGRESS Act was intended to conform title IV of the PROGRESS Act with title V of the ISDEAA that requires Tribes and Tribal Consortia to assume Federal responsibilities for all NEPA functions, including final determinations, as a condition for assuming a construction program. Commentors stated that “some” means something different than “all,” but the Department’s insistence that “some” must therefore mean “not final determinations” ignores the plain language of the word “some,” which simply means “at least one.” *See, e.g. “some”* (www.merriam-webster.com/dictionary/some).

The Department acknowledges the comments and notes as a threshold matter that while title V of the ISDEAA at 25 U.S.C. 5389(a) mandates that Tribes take responsibility for “all Federal responsibilities” for NEPA functions as a condition of assuming a construction program or project, the PROGRESS Act does not impose the same requirement and uses different terminology at 25 U.S.C. 5367(b), providing for a “Tribal Option to Carry Out Certain Federal Environmental Activities,” including “some Federal responsibilities” involving NEPA and related functions, under an “agreement by the Secretary,” as limited by 25 U.S.C. 5367(c).

The Department will decide what functions are inherently Federal on a case-by-case basis after consultation with the Office of the Solicitor. For current guidance on inherently Federal functions (IFF) determinations, please see Solicitor’s memorandum dated May 17, 1996. The Memorandum is available from the Office of Self-Governance upon request. The Department shall provide information on why specific functions have been determined to be inherently Federal to Tribes and Consortia in accordance with this part.

The Department recognizes that title V of the ISDEAA delegates to Indian

Tribes authority for final environmental determinations for construction projects. In negotiating with a Tribe/Consortium to include a construction project under this subpart, and how a Tribe/Consortium may assume some Federal responsibilities under 25 U.S.C. 5367(b), the Department will address the differences between title V (25 U.S.C. 5389(a)) and title IV (25 U.S.C. 5367(b) of the ISDEAA through discussions with the Office of the Solicitor and in accordance with section 5(f) of E.O. 14112, and the PROGRESS Act’s rules of construction and interpretation.

Comment on § 1000.1301—What key construction terms do I need to know?

There were comments received that referenced § 1000.301. However, the comment addresses § 1000.1301 in subpart K (Construction) in the proposed rule that the final rule should include a definition of “Categorical Exclusion” to be defined as the same definition found in the Department of Health and Human Services construction definitions found at 42 CFR 137.280. The Department should consider including in the final rule the definition set out in CEQ’s revised 40 CFR 1508 regulations issued on May 1, 2024.

The Department acknowledges these comments, and the Committee declined to add the definition. First, it is established by another agency and could change over time, potentially resulting in unnecessary confusion. Additionally, the potential scope of projects requiring NEPA compliance under these regulations encompasses multiple bureaus within the Department, as opposed to the limited scope of projects at the Department of Health and Human Services. Finally, each Departmental bureau maintains a list of categorical exclusions relevant to projects it oversees and these change over time, as well. *See* Department of the Interior Manual (at Part 516).

Subpart L—Federal Tort Claims

The Committee did not receive comments related to this subpart.

Subpart M—Reassumption

The Committee did not receive comments related to this subpart.

Subpart N—Retrocession

The Committee did not receive comments related to this subpart.

Subpart O—Trust Evaluation

The Committee did not receive comments related to this subpart.

Subpart P—Reports

The Committee did not receive comments related to this subpart.

Subpart Q—Operational Provisions

The Committee received one comment related to this subpart. In § 1000.2130, the rule sets forth how much time the Federal Government has to make a claim against a Tribe/Consortium related to the disallowance of cost, based on an audit. The comment suggested the audit be particular to a title IV audit. The Committee agreed and title IV was inserted before the word audit to clarify this provision applies to title IV audits.

Subpart R—Appeals

This subpart prescribes the process Tribes/Consortia may use to resolve disputes with the Department arising before or after execution of a funding agreement or compact and certain other disputes related to self-governance.

Three Tribal comments requested greater flexibility in the appeals process generally.

Several Tribal comments offered draft language to the regulatory text that would provide Tribes/Consortia with the option to file an administrative appeal with either the Interior Board of Indian Appeals (IBIA) or an appropriate bureau head or Assistant Secretary of disputes with the Department arising before execution of a funding agreement, amendment to a funding agreement, or compact and certain other disputes related to self-governance. Specifically, comments proposed deleting § 1000.2302 (“What does ‘title-I eligible programs’ mean in this subpart?”) to remove any reference to “title-I eligible programs” within the subpart, and to strike and replace § 1000.2351 (“To Whom May a Tribe/Consortium Appeal a Decision under § 1000.2345?”) with language allowing for Tribes/Consortia to file an eligible appeal under the subpart with either the IBIA or an appropriate bureau head/Assistant Secretary. The comments noted that adopting this position would address current delays under the IBIA system and the negative impacts from such delays. Comments noted that the Department should adopt this change and resolve this issue of non-consensus in the finalized rule to comply with E.O. 14112 and the PROGRESS Act’s rules of construction. Some comments also recommended these revisions to the final rule to build capacity for an administrative appeals process with the bureau head/Assistant Secretary level to promote predictability, reduce uncertainty, and use the least

burdensome tools to achieve regulatory ends as set out in E.O. 12866, as supplemented by E.O. 13563.

The Committee agreed to revise the subpart to provide that Tribes/Consortia may elect to file an appeal of eligible pre-award disputes with an appropriate bureau head or Assistant Secretary through the following revisions to the subpart's current language: (1) deleting § 1000.2302 to remove any references to "title-I eligible programs" within the subpart; (2) revising § 1000.2351(b) to add the term "initial" in the phrase "the bureau head will decide initial appeals relating to these pre-award matters;" and (3) striking the language in § 1000.2351(b)(i), "Programs that are not PSFAs that the Secretary provides for the benefit of Indians because of their status as Indians without regard to the agency or office of the Department within which the PSFAs have been performed."

The Committee added a new § 1000.2357 ("Which official is the appropriate bureau head or Assistant Secretary for purposes of subpart R?"). Section 1000.2357(a) provides a chart indicating the relevant official to whom a Tribe/Consortium may file its initial request for appeal when exercising its appeal rights to the bureau head/Assistant Secretary under § 1000.2351 for any BIA Program. Section 1000.2357(b) states that the Assistant Secretary for Indian Affairs is the appropriate Assistant Secretary for reviewing appeals for BIA Programs in accordance with § 1000.2370. Finally, § 1000.2357(c) identifies the appropriate bureau head/Assistant Secretary for non-BIA Program appeals pursuant to § 1000.2351. In accordance with § 1000.2355, the Department will identify the appropriate bureau head/Assistant Secretary in any required information.

Subpart S—Conflicts of Interest

The Committee did not receive comments related to this subpart.

Subpart T—Tribal Consultation Process

The Committee did not receive comments related to this subpart.

C. Use of Received Feedback

The Committee used all received feedback to inform this final rule and made changes to this final rule based on received feedback.

VI. Summary of Changes by Subpart Into the Final Rule

The following summary describes each subpart of the Department's final regulations to implement the PROGRESS Act. The Department's

amendments incorporated comments on the proposed rule received during Tribal consultation, as discussed above in Section III, "Summary of Comments Received," as well as received during the E.O. 12866 interagency review process. The Department, in negotiation with the Committee makes these changes in the final rule.

A. Subpart A—General Provisions

This subpart contains the authority, purpose and scope of the final rule, and the Congressional and Secretarial policies that will guide the implementation of the ISDEAA, as amended by the PROGRESS Act, by the Secretary and the various bureaus of the Department. The subpart also defines terms used throughout the final rule consistent with the PROGRESS Act.

This subpart further clarifies the effect of 25 CFR part 1000 on existing Tribal rights, including Tribal sovereign immunity from suit, the United States' trust responsibility, a Tribe's choice to participate in self-governance, or the issuance of awards by other departments or agencies to Tribes. Additionally, this subpart identifies the application of any agency circular, policy, manual, guidance, or rule adopted by the Department on self-governance Tribes/Consortia. This subpart identifies when and how to implement Indigenous Knowledge in projects. Finally, this subpart provides that should a court hold any provision of one part of this rule as finalized invalid, it should not impact the other parts of the rule.

Amendments to § 1000.15—What is the congressional policy statement of this part?

The Committee revised the phrase "create consistency and administrative efficiencies between title IV and title V of Pub. L. 93–638" with the phrase "create similarities and administrative efficiencies between title IV and title V of Public Law 93–638" to more accurately reflect the content of the final rule.

Amendments to § 1000.20 What is the Secretarial policy of this part?

The Committee added language to the Secretarial policy of this part to assure that this part be interpreted to facilitate inclusion of programs in funding agreements and the implementation of funding agreements. The proposed edits include language that is added to maximize implementation of the secretarial policy in all bureaus of the Department, and to ensure that where provisions of funding agreements and compacts are ambiguous that the

ambiguity be resolved in favor of the Tribe or Consortium. The Committee also added a provision to include, recognize, and support Indigenous Knowledge to be applied when performing PSFAs. The edits were made to improve clarity and respond to comments received during the government-to-government consultation.

Amendments to add § 1000.35—What happens if a court holds any provisions of these regulations in this part invalid?

The Department added a new section to make explicit its intent that if a court were to hold any provisions of the final rule invalid, that provision would be severable and the remaining provisions of the rule should remain in force. As noted in the Preamble, the intent of this rule is to implement the Department's Self-Governance program, and the several provisions of this rule can continue to effectuate that intent even if one or more of those provisions were declared to be invalid by a court.

B. Subpart B—Selection of Additional Tribes for Participation in Tribal Self-Governance

This subpart describes the steps a Tribe/Consortium must take to participate in Tribal self-governance and the selection process and eligibility criteria that the Secretary will use to decide whether a Tribe/Consortium may participate. Under the PROGRESS Act, a Tribe/Consortium is eligible to participate in self-governance if it submits documentation to OSG demonstrating: (1) successful completion of a planning phase; (2) a request to participate in self-governance by a Tribal resolution and/or final official action; and (3) financial stability and financial management capability through evidence of having no uncorrected significant and material audit exceptions in the required annual audit of its self-determination or self-governance agreements with any Federal agency for the three fiscal years preceding the date on which the Tribe/Consortium requests participation. When a Tribe/Consortium submits documentation to participate in self-governance, this final rule requires the OSG within 45 days to: (1) select and notify the Tribe/Consortium to participate in self-governance; or (2) notify the Tribe/Consortium that the documentation submitted to participate in self-governance is incomplete.

The OSG Director may select up to 50 eligible Tribes or Consortia for negotiation. If there are more Tribes selected to negotiate in any given year, this final rule provides that the first 50

Tribes/Consortia who apply, and are determined to be eligible, will have the option to participate.

This final rule also stipulates that a Tribe/Consortium may be selected to negotiate a funding agreement for non-BIA programs that are otherwise available to Tribes without first negotiating a funding agreement for BIA programs. However, to negotiate for a non-BIA program under 25 U.S.C. 5363(c) for which the Tribe/Consortium has only a geographic, cultural, or historical connection, the ISDEAA requires that the Tribe/Consortium must first have a funding agreement with the BIA under 25 U.S.C. 5363(b)(1) or any non-BIA bureau under 25 U.S.C. 5363(b)(2). The term “programs” as used in this final rule refers to complete or partial PSFAs.

This subpart also describes what happens when a Tribe wishes to withdraw from a Consortium’s funding agreement. In such instances, the withdrawing Tribe must notify the Consortium, appropriate Department bureau, and OSG of its intent to withdraw 180 days before the effective date of the next funding agreement. Unless otherwise agreed to, the effective date of the withdrawal will be the earlier date of one year after the date of submission of the request, or when the current agreement expires.

In completing the withdrawal, the Consortium’s funding agreement must be reduced by that portion of funds attributable to the withdrawing Tribe on the same basis or methodology upon which the funds were included in the Consortium’s funding agreement. If such a basis or methodology does not exist, then the Tribe, the Consortium, appropriate Department bureau, and OSG must negotiate an appropriate amount.

The Committee did not implement changes to subpart B.

C. Subpart C—Planning and Negotiation Grants

This subpart describes the criteria and procedures for awarding various self-governance negotiation and planning grants. These grants are discretionary and will be awarded by the OSG Director. The award amount and number of grants depends upon Congressional appropriations. If funding in any year is insufficient to meet total requests for grants and financial assistance, priority will be given first to negotiation grants and second to planning grants.

Negotiation grants are non-competitive. To receive a negotiation grant, a Tribe/Consortium must first be selected to join self-governance and

then submit a letter affirming its readiness to negotiate and requesting a negotiation grant. This subpart further provides that a Tribe/Consortium may elect to negotiate a self-governance agreement if selected without applying for or receiving a negotiation grant. Planning grants will be awarded to Tribes/Consortia requesting financial assistance to complete the planning phase requirement for joining self-governance.

Amendments to § 1000.335—What are the Secretary’s responsibilities upon a decision not to award a planning or negotiation grant?

The Committee implemented a change in the wording in § 1000.335 to address the Secretary’s decision regarding the denial of a planning or negotiation grant from “declining to award” to “denying” a planning or negotiation grant. This was merely to clarify that provision.

D. Subpart D—Financial Assistance for Planning and Negotiations Activities for Non-BIA Bureau Programs

This subpart describes the additional requirements and criteria applicable to receiving financial assistance to assist Tribes/Consortia with planning and negotiating for funding agreements involving non-BIA programs. This financial assistance is available to any Tribe/Consortium that:

- (a) Applied to participate in self-governance;
- (b) Has been selected to participate in self-governance; or
- (c) Has negotiated and entered into an existing funding agreement.

Subject to the availability of funds, this subpart requires the Secretary to publish a notice in the **Federal Register** that includes the number of available grants, application process, award criteria, and designated point-of-contact for each non-BIA bureau. This financial assistance will support information gathering, analysis, and planning activities that may involve consulting with appropriate non-BIA bureaus, and negotiation activities. This subpart also provides requirements for communicating award decisions to applying Tribes/Consortia.

The Committee did not implement changes to subpart D.

E. Subpart E—Compacts

The prior rule at 25 CFR part 1000 that became effective on January 16, 2001 (“2001 prior rule”), included provisions addressing compacts at §§ 1000.161 through 1000.165. The Committee amends and moves those sections to the new subpart E

(Compacts) and includes additional sections. This new subpart is inserted before the respective subparts for funding agreements because compacts are applicable to funding agreements both for BIA programs and for non-BIA programs.

The 2001 prior rule included a model format for a compact at Appendix A. The Committee decided not to include a model format for a compact and Appendix A in this final rule. The rationale is the model was no longer needed in the rule and a sample could be posted on an OSG website to provide assistance for Tribes joining self-governance and updated as circumstances change.

This subpart also describes self-governance compacts and the minimum content requirements of a self-governance compact. Unlike a funding agreement, parts of a compact apply to all bureaus within the Department rather than a single bureau. Therefore, a Tribe/Consortium needs only to negotiate and execute one self-governance compact to participate in self-governance.

This subpart also establishes a compact’s effective term and addresses how a compact may be amended. Further, this subpart clarifies that a Tribe/Consortium who executed a compact prior to the enactment of the PROGRESS Act has the option to either retain its existing compact, in whole or in part, to the extent that the provisions are not directly contrary to any express provisions of the PROGRESS Act or negotiate a new compact.

The Committee implements this change from the 2001 prior rule in the final rule with additional clarifying edits to improve readability.

F. Subpart F—Funding Agreements for BIA Programs

This subpart describes the components of a funding agreement for BIA programs. The 2001 prior rule includes “Subpart E—Annual Funding Agreements for Bureau of Indian Affairs Programs.” The final rule amends the title of the subpart and moves it within this rule. The title of the subpart is amended to “Funding Agreements for BIA Programs” because title IV now excludes the term “Annual Funding Agreements” and uses in its place, “Funding Agreements.” The acronym “BIA” is proposed in lieu of “Bureau of Indian Affairs” because BIA is now a defined term within subpart A (General Provisions). The final rule relocates the subpart from subpart E of the 2001 prior rule to become subpart F of the final rule because a new subpart E for compacts is inserted.

A funding agreement is a legally binding and mutually enforceable written agreement between a Tribe/Consortium and the Secretary. Funding agreements must include at a minimum, but are not limited to, provisions specifying the programs transferred to the Tribe/Consortium, providing for the Secretary to monitor the performance of trust functions administered by the Tribe/Consortium, providing the funding amount(s), providing a stable base budget, and specifying the funding agreement's effective date.

Parties to a funding agreement can mutually agree to include additional provisions and/or include and incorporate by reference additional documents such as funding tables or construction project agreements. Additionally, Tribes/Consortia may elect to negotiate a funding agreement with a term that exceeds one year, subject to the availability of appropriations.

This subpart also provides that a Tribe/Consortium with a funding agreement executed before the enactment of the PROGRESS Act has the option to either retain that funding agreement, in whole or in part, to the extent that the provisions are not directly contrary to any express provisions of the PROGRESS Act or negotiate a new funding agreement.

This subpart establishes that a funding agreement shall remain in full force and effect following the end of its term until a subsequent funding agreement is executed. When a subsequent funding agreement is executed, its terms will be retroactive to the term of the preceding funding agreement for purposes of calculating the amount of funding for the Tribe/Consortium.

This subpart states that a Tribe/Consortium may include BIA-administered programs in its funding agreement regardless of the BIA agency or office performing the program. The Secretary must provide to the Tribe/Consortium:

(a) Funds equal to what the Tribe/Consortium would have received under contracts and grants under title I of Public Law 93–638 (25 U.S.C. 5321, *et seq.*);

(b) Any funds specifically or functionally related to providing services to the Tribe/Consortium by the Secretary; and

(c) Any funds that are otherwise available to Indian Tribes for which appropriations are made to other agencies other than the Department and transferred to the Department as directed by law, an Interagency Agreement, or other means.

Except for construction programs or projects governed by subpart K (Construction), or where a statute contains specific limitations on the use of funds, a Tribe/Consortium may redesign or consolidate programs and reallocate funds in any manner the Tribe/Consortium deems to be in the best interest of the Indian community being served without the Secretary's approval except for programs described in 25 U.S.C. 5363(b)(2) or (c), or that involve a request to waive a Department regulation. However, a redesign or consolidation may not have the effect of denying eligibility for services to population groups otherwise eligible to be served under applicable Federal law.

In determining the funding amount available to a Tribe/Consortium, this subpart identifies funds that are used to carry out IFFs² that cannot be included in a funding agreement. This subpart also establishes the process for determining the funding amount to carry out IFFs and clarifies that the amount withheld to carry out IFFs can be negotiated between the Secretary and a Tribe/Consortium.

This subpart defines Tribal shares as the amount determined for that Tribe/Consortium that supports any program within the BIA, the Bureau of Indian Education (BIE), the Bureau of Trust Funds Administration (BTFA), or the Office of the Assistant Secretary for Indian Affairs and are not required by the Secretary for the performance of an IFF. Tribal share amounts may be determined by either:

(a) A formula that has a reasonable basis in the function or service performed by the BIA office and is consistently applied to all Tribes served by the area and agency offices; or

(b) On a Tribe-by-Tribe basis, such as competitive grant awards or special project funding.

Funding amounts may be modified during the term of a funding agreement to adjust for certain Congressional actions, correct a mistake, or if there is mutual agreement to do so.

This subpart also defines stable base budgets as the amount of recurring funding to be transferred to the Tribe/Consortium for a period specified in the funding agreement. Stable base budgets are derived from:

(a) A Tribe/Consortium's Public Law 93–638 contract amounts;

² The Department notes that 25 U.S.C. 5363(k) uses the phrase “inherently Federal” while 25 U.S.C. 5367(c) uses the phrase “inherent Federal.” It is unclear why Congress used differing phrases, but the proposed rule generally uses the phrase “inherent Federal,” except where a provision directly follows statutory language. The Department does not view the difference between the two phrases as meaningful.

(b) Negotiated amounts of agency, area, and central office funding;
(c) Other recurring funding;
(d) Special projects, if applicable;
(e) Programmatic shortfall;
(f) Tribal priority allocation increases and decreases;
(g) Pay costs and retirement cost adjustments; and
(h) Any other inflationary cost adjustments.

Stable base budgets do not include any non-recurring program funds, construction and wildland firefighting accounts, Congressional earmarks, or other funds specifically excluded by Congress.

A stable base budget is established at the request of the Tribe/Consortium and will be included in BIA's budget justification for the following year, subject to Congressional appropriation. Once stable base budgets are established, a Tribe/Consortium need not renegotiate these amounts unless it wants to. If the Tribe/Consortium wishes to renegotiate, it also would be required to renegotiate all funding included in the funding agreement on the same basis as all other Tribes and is eligible for funding amounts of new programs or available programs not previously included in the funding agreement on the same basis as other Tribes. Stable base budgets must be adjusted for certain Congressional actions, to correct a mistake, or if there is mutual agreement.

Amendments to § 1000.690—How does BIA determine the funding amount to carry out inherent Federal functions?

The Committee implemented two changes to this section from the proposed rule to the final rule. The first change corrected an unintentional omission of “Consortium” in subsection (d). The final rule is now consistent with other parts of the section to state “Tribes/Consortium.” The second change addresses a situation where funds are properly suballocated to another program to perform a function essential to the program under negotiation. By revising subsection (g), there is reduced potential for disagreement in a situation where funds are appropriately utilized across program lines.

G. Subpart G—Funding Agreements for Non-BIA Programs

This subpart describes program eligibility, funding for, and terms and conditions relating to self-governance funding agreements covering non-BIA programs that can help further Secretarial co-stewardship objectives as

set forth in Joint S.O. 3403. This section was renamed from subpart F.

Funding agreements for non-BIA programs are legally binding and mutually enforceable agreements between a bureau and a Tribe/Consortium participating in self-governance that contain a description of that portion or portions of a bureau program that are to be performed by the Tribe/Consortium; and associated funding, terms and conditions under which the Tribe/Consortium will assume a program, or portion of a program. Funding agreements may include Federal PSFAs administered by the Department other than through the BIA that are otherwise available to Indian Tribes or Indians and may also include other PSFAs, or portions thereof, which are of special geographic, historical, or cultural significance to the participating Indian Tribe requesting a compact. This subpart contains a definition of which functions may be considered “inherently Federal” for purposes of 25 U.S.C. 5363(k) and a provision making non-mandatory CSCs associated with administration of the PSFAs that are transferred in non-BIA agreements.

Amendments to § 1000.885—What funds are included in a non-BIA funding agreement?

Pursuant to changes that urged the Department to revise proposed § 1000.885(b)(iii) to ensure that Tribes/Consortia receive full CSCs under section 106(a) the PROGRESS Act, 25 U.S.C. 5325, including direct CSCs, the Committee accepted the recommendations an amended the proposed rule.

The final rule § 1000.885(b)(1)(iii) states that non-BIA bureaus determine the amount of funding to be included in the funding agreement using the following principles: “(iii) Such amounts as the Tribe/Consortium and the Secretary may negotiate for pre-award, start-up and direct contract support costs.”

Amendments to § 1000.895—How does the Secretary determine the amount of indirect costs?

The Committee clarified § 1000.895 by adding the phrase “non-BIA funding” to the question and initial part of the response and discussed the recommendation of adding “and making other adjustments required by the PROGRESS Act” to the end of (a). The Committee accepted the first edited but rejected the latter suggestion.

H. Subpart H—Negotiation Process

The 2001 prior rule includes “Subpart G—Negotiation Process for Annual Funding Agreements.” The final rule amends the title of this subpart and moves it within this final rule. The subpart title is amended to “Negotiation Process” because the amended subpart addresses the process for negotiating compacts and funding agreements. The location of the subpart within this final rule is to be moved from subpart G of the 2001 prior rule to become subpart H because a new subpart E for compacts is inserted. Items addressed in subpart H of the 2001 prior rule are to be addressed in new subpart Q (Operational Provisions).

Sections 1000.161 through 1000.165 of the 2001 prior rule, addresses the negotiation of compacts and are amended and moved to the new subpart E (Compacts).

This subpart establishes the process and timelines for negotiating a self-governance compact with the Secretary and a funding agreement with any Departmental bureau. Under this subpart, the negotiation process consists of two phases, an information phase and a negotiation phase.

In the information phase, any Tribe/Consortium that has been selected to participate in the self-governance program may submit a written request clearly identified as a “Request to Initiate the Information Phase,” which notifies the Secretary of a Tribe/Consortium’s interest in negotiating for a program(s) and requesting information about the program(s). Although this phase is not mandatory, it is expected to facilitate successful negotiations by providing for a timely exchange of information on the requested programs. This subpart establishes the information a Tribe/Consortium is encouraged to include in its Request to Initiate the Information Phase and the steps a bureau must take after receiving a request.

The negotiation phase establishes detailed timelines and procedures for conducting negotiations with Tribes that have been selected into the self-governance program, including the minimum issues that must be addressed at negotiation meetings. A Tribe/Consortium initiates this phase by submitting a Request to Initiate the Negotiation Phase. This subpart also establishes the required response that the Secretary must provide a Tribe/Consortium after receipt of a Request to Initiate the Negotiation Phase, including identifying the lead Federal negotiator. Further, this subpart establishes the process for finalizing and executing a

compact and/or funding agreement when the parties agree on such terms and conditions following the completion of negotiations.

This subpart also establishes rules for the negotiation process for subsequent funding agreements. A subsequent funding agreement is a funding agreement negotiated with a particular bureau after an existing agreement with that bureau. The process for negotiating a subsequent agreement is the same as the process provided in this subpart for funding agreements. The subsequent funding agreements will build upon the prior funding agreements. As such, most provisions of the funding agreement will carry forward and not require renegotiation. This will result in an expedited and simplified negotiation process.

Amendments to § 1000.1035—What steps does the bureau take after a Request to Initiate the Information Phase is submitted by a Tribe/Consortium?

The Committee clarified this provision by using the term “applicable laws” to capture information requests that implicate the Privacy Act, Freedom of Information Act, Health Insurance Portability and Accountability Act, and other laws that address the release of sensitive information. In addition, the Freedom of Information Act includes a number of items for possible dissemination, and the Committee decided to identify records that would encompass the numerous possible types of information.

I. Subpart I—Final Offer

The final rule inserts this new subpart to implement section 406(c) of title IV, as amended by the PROGRESS Act, 25 U.S.C. 5366(c), that prescribes the process to be followed if the Secretary and the participating Tribe/Consortium are unable to come to agreement, in whole or in part, on the terms of a compact or funding agreement during negotiations. The previous version of title IV included no such provisions, nor does the 2001 prior rule.

The new subpart is inserted at this location to immediately follow the amended subpart H (Negotiation Process). Doing so allows the reader to move sequentially from the negotiation process to determine options for next steps if those negotiation efforts do not result in agreement.

This subpart explains the final offer process provided by the PROGRESS Act for resolving disputes when the Secretary and a Tribe/Consortium are unable to agree, in whole or in part, on the terms of a compact or funding

agreement (including funding levels) during a negotiation. Under this subpart a Tribe/Consortium may submit a final offer to resolve these disputes. A final offer must be emailed to the email address listed in the final rule or mailed to the Director at OSG's headquarters.

A final offer under this subpart must contain a description of the disagreement, the Tribe/Consortium's final proposal to resolve the disagreement (including any proposed terms for a compact, funding agreement, or amendment), and the name and contact information for the Tribe's/Consortium's authorized official.

In accordance with 25 U.S.C. 5366(c)(6), the Secretary may reject all or part of a final offer for one of six specified reasons. If the Secretary does not act on a final offer within 60 days, the final offer is accepted automatically by operation of law for any compact or funding agreement except as to its application to a program described under section 403(c) of title IV. Final offers with respect to any program described under section 403(c) of title IV that the Secretary does not act on within 60 days are rejected automatically by operation of law. This subpart also addresses what happens if the Secretary rejects all or part of a final offer, including provision of technical assistance to overcome a rejection, the ability to appeal a rejection, and the portions of a final offer not in dispute taking effect.

The Committee did not implement changes to subpart I.

J. Subpart J—Waiver of Regulations

This subpart implements 25 U.S.C. 5363(i)(2)(A) that authorizes the Secretary to waive all Department regulations governing programs included in a funding agreement, as identified by the Tribe/Consortium.

This subpart also provides timelines, explains how a Tribe/Consortium applies for a waiver, the basis for granting or denying a waiver request, the documentation requirements for a decision, and establishes a process for resubmittal of a Tribe/Consortium's request in the event of the Secretary's denial of a waiver request.

The basis for the Secretary's denial of a waiver request must be predicated on a prohibition of Federal law.

The Committee did not implement changes to subpart J.

K. Subpart K—Construction

This subpart applies to all construction programs and projects, both BIA and non-BIA. The subpart identifies construction program activities that are subject to subpart K,

such as design, construction management services, actual construction; and those that are not, such as planning services, operation and maintenance activities, and certain construction programs that cost less than \$100,000. All final rule provisions apply to this subpart except where they are inconsistent; in those instances, the provisions of this subpart will govern.

This subpart specifies the roles and responsibilities of the Tribe/Consortium and the Secretary in construction programs, including environmental determinations, performance, changes, monitoring, inspections, and reassumption. This subpart details the process by which a Tribe/Consortium, at its election and with the approval of the Secretary, designates a certifying Tribal officer to represent the Tribe/Consortium and to assume the status of a responsible Federal official under National Environmental Policy Act (NEPA), the National Historic Preservation Act (NHPA), and related provisions of other laws and regulations and accepts the jurisdiction of the United States courts for the purpose of enforcing the responsibilities of the certifying Tribal officer assuming the status of a responsible Federal official under those Acts, laws, or regulations.

Federal Acquisition Regulations provisions are specifically not incorporated into this final rule; however, they may be negotiated by the parties in the funding agreement. Construction project agreements, made part of a funding agreement, must address applicable Federal laws, program statutes, and regulations. In addition to requirements for all funding agreements referenced in subpart F (Funding Agreements for BIA Programs), other provisions are added for construction project agreements and programs and funding agreements that include a construction project or program to implement the requirements of the PROGRESS Act, including health and safety standards, brief progress reports, financial reports, and suspension of work when appropriate. Building codes appropriate for the project must be used and the Federal agency must notify the Tribe when Federal standards are appropriate for any project.

Lastly, this subpart provides that the Secretary may accept funds from other departments for construction projects or programs, subject to an interagency agreement, or "IAA," between the Secretaries, with Tribal concurrence.

Subsequent to the Committee approving its report to the Secretary, including non-consensus issues in this subpart, the Council on Environmental

Quality (CEQ) revised its NEPA implementing regulations, 40 CFR parts 1500 through 1508, which are effective July 1, 2024.³ The Department invited comment on whether to revise the proposed regulatory text in any final rule for consistency with NEPA and the NEPA implementing regulations. For example, (1) updating proposed § 1000.1390 to incorporate text from and for consistency with 42 U.S.C. 4332(2)(E) and 40 CFR 1506.6(a), which direct agencies to make use of "high-quality information, including reliable data and resources;" (2) updating proposed § 1000.1385(a)(2) to incorporate text making clear that NEPA requires agencies to assess "reasonably foreseeable environmental effects" of a proposed agency action, not all potential effects, for consistency with 42 U.S.C. 4332(2)(C)(i) and the definition of "effects" in 40 CFR 1508.1(i); and (3) updating § 1000.1385(a)(5) to state that in applying a categorical exclusion under NEPA, evaluate whether extraordinary circumstances exist, in which a normally excluded project may have a significant effect, and therefore requires preparation of an environmental assessment or environmental impact statement, for consistency with 40 CFR 1501.4.

Amendments to § 1000.1305—What construction projects and programs included in a funding agreement or construction project agreement are subject to this subpart?

The Committee clarified the provision in subsection (b)(5) based on consultation recommendations by clarifying the exemption involving Public Law 102.477 funded projects and deleting "Child Care Development Fund."

Amendments to § 1000.1385—What is the typical environmental review process for construction projects?

The Committee revised text based on recommendations of the Council on Environmental Quality involving documenting assessment of "reasonably foreseeable" environmental effects in § 1000.1385(a)(2) and deleting the term "potential" from the subsection. The Committee also revised the text on § 1000.1385(a)(5) to clarify when applying a categorical exclusion under NEPA and the required preparation of an environmental assessment or environmental impact statement.

³ See Council on Environmental Quality (CEQ), NEPA Implementing Regulations Revisions Phase 2, Final Rule, 88 FR 35442 (May 1, 2024).

Amendments to § 1000.1390—Is the Secretary required to take into account the Indigenous Knowledge of Tribes/Consortia when preparing environmental studies under NEPA, NHPA, and related provisions of other law and regulations?

The Committee added language in the preamble and revised the provision to be consistent with terminology in the recently updated CEQ regulations concerning “reliable data sources.”

Amendments to § 1000.1445—May the Secretary suspend construction activities under the terms of a funding agreement or construction project agreement under title IV of the ISDEAA?

The Committee revised text based on recommendations to distinguish the provisions as applying only to the ISDEAA title IV construction projects in the title, subsection (a) and (b).

Amendments to § 1000.1455—What happens when a Tribe/Consortium, suspended under § 1000.1445 for substantial failure to carry out the terms of a funding agreement that includes a construction project or program or a construction project agreement under title IV of the ISDEAA without good cause, does not correct the failure during the suspension?

The Committee revised text based on recommendations to distinguish the provisions as applying only to the ISDEAA title IV construction projects.

L. Subpart L—Federal Tort Claims

This subpart explains the applicability of the Federal Tort Claims Act.

Amendments to § 1000.1650—What employees are covered by FTCA for claims arising out of a Tribe's/Consortia's performance of a compact or funding agreement?

The Committee reviewed the applicability of Federal tort claim coverage for “permanent and temporary employees” and implemented qualifying language to clarify that these employees would need to be employees of a Tribe/Consortium.

M. Subpart M—Reassumption

Reassumption is the federally initiated action of reassuming control of Federal programs formerly performed by a Tribe/Consortium. This subpart explains the types of reassumptions authorized under title IV, as amended by the PROGRESS Act, including the rights of a Consortium member, the types of circumstances necessitating reassumption, and Secretarial responsibilities including prior notice

requirements and other procedures. The subpart explains what is meant by imminent jeopardy to trust assets, natural resources, and public health and safety that may be grounds for reassumption.

This subpart also describes the hearing rights a Tribe/Consortium has before or after reassumption by the Secretary, the PROGRESS Activities to be performed after reassumption has been completed, and the effect of reassumption on other provisions of a funding agreement.

The Committee did not implement changes to subpart M.

N. Subpart N—Retrocession

Retrocession is the Tribally-initiated voluntary action of returning control of certain programs to the Federal Government. This subpart defines retrocession, including how Tribes/Consortia may retrocede, the effect of retrocession on future funding agreement negotiations, and Tribal/Consortium obligations regarding the return of Federal property to the Secretary after retrocession.

The Committee did not implement changes to subpart N.

O. Subpart O—Trust Evaluation

This subpart establishes a procedural framework for the Secretary's annual trust evaluation mandated by the PROGRESS Act. The purpose of the Secretary's annual trust evaluation is to ensure that trust functions assumed by Tribes/Consortia are performed in a manner that does not place trust assets in imminent jeopardy.

Imminent jeopardy of a physical trust asset or natural resource (or their intended benefits) exists where there is an immediate threat and likelihood of significant devaluation, degradation, or loss to such asset. Imminent jeopardy to public health and safety means an immediate and significant threat of serious harm to human well-being, including conditions that may result in serious injury, or death, caused by Tribal action or inaction or as otherwise provided in a funding agreement.

This subpart requires the Secretary's designated representative to prepare a written report for each funding agreement under which trust functions are performed by a Tribe. This final rule also authorizes a review of Federal performance of residual and nondelegable trust functions affecting trust resources. The name of this subpart has been changed from “Trust Evaluation Review” to “Trust Evaluation.” It was redundant to have both evaluation and review in the title.

The Committee did not implement changes to subpart O.

P. Subpart P—Reports

This subpart describes the report on self-governance that the Secretary prepares annually for transmittal to Congress. It also includes the requirements for the annual report that Tribes/Consortia submit to the Secretary and other data requirements the Secretary may request of Tribes/Consortia. The issue related to the inclusion of BIE in the BIA programs for purposes of the reporting requirements surfaces in this subpart and is addressed in subpart A (General Provisions).

The Committee did not implement changes to subpart P.

Q. Subpart Q—Operational Provisions

The 2001 prior rule includes “Subpart Q—Miscellaneous Provisions.” The final rule amends the title of this subpart to “Operational Provisions” to be more descriptive and instructive to the reader and to bring consistency with regulations promulgated at 42 CFR subchapter M part 137—Tribal Self-Governance under the Indian Health Service as authorized by title V of the ISDEAA, as amended.

The changes to this subpart address many facets of self-governance not covered in the other subparts. Issues covered include the applicability of various laws such as the Freedom of Information Act, the Privacy Act, the Prompt Payment Act, and the Single Agency Audit Act, applicable provisions of OMB circulars, how funds are handled in various situations, including carryover of funds, savings from programs, and the use of funds to meet matching or cost participant requirements under other laws.

Certain provisions of this subpart are amended to comply with the PROGRESS Act, and with applicable regulations promulgated by OMB at 2 CFR part 200. References to outdated OMB circulars within this subpart are updated throughout. New sections within this subpart address new provisions within the PROGRESS Act, as amended, such as § 1000.2130 that addresses claims against a Tribe/Consortium in relation to disallowance of costs, and limitation of costs.

Amendments to § 1000.2130—How much time does the Federal Government have to make a claim against a Tribe/Consortium relating to any disallowance of costs, based on an audit?

The Committee agreed to respond to the comment by adding that the audit

referred to in this section would be an audit under title IV.

R. Subpart R—Appeals

This subpart prescribes the process Tribes/Consortia may use to resolve disputes with the Department arising before or after execution of a funding agreement or compact and certain other disputes related to self-governance.

The Committee revised the subpart to provide that that Tribes/Consortia may elect to file an appeal of eligible pre-award disputes with an appropriate bureau head or Assistant Secretary through the following revisions to the subpart's current language. The Committee institutes these revisions to address comments received requesting that Tribes/Consortia have the option to file an appeal of a pre-award dispute with an appropriate bureau head/Assistant Secretary or the IBIA in order to provide flexibility and predictability for Tribes/Consortia in initiating pre-award appeals under this subpart.

Amendments to § 1000.2302—What does “title-I eligible programs” mean in this subpart?

The Committee deleted this section to remove any references to “title-I eligible programs” within the subpart to eliminate the distinction between title-I eligible programs and non-Title-I eligible programs so that Tribes/Consortia may file an appeal of all pre-award disputes covered under this subpart with an appropriate bureau head/Assistant Secretary or the IBIA.

Amendments to § 1000.2351—To Whom may a Tribe/Consortia appeal a decision made before the funding agreement, amendment to the funding agreement, or compact is signed?

The Committee implemented a change in the wording of § 1000.2351(b) to add the term “initial” in the phrase “the bureau head will decide initial appeals relating to these pre-award matters,” and strike the language in § 1000.2351(b)(i), “Programs that are not PSFAs that the Secretary provides for the benefit of Indians because of their status as Indians without regard to the agency or office of the Department within which the PSFAs have been performed” to revise the subpart so that Tribes/Consortia may file appeals of pre-award disputes with an appropriate bureau head/Assistant Secretary.

Amendments to add § 1000.2357—Which official is the appropriate bureau head or Assistant Secretary for purposes of subpart R?

The Committee added a new section providing a chart indicating the relevant

official to whom a Tribe/Consortium may file its initial request for appeal when exercising its appeal rights to the bureau head/Assistant Secretary under § 1000.2351 for any BIA Program. This section provides that the Assistant Secretary for Indian Affairs is the appropriate Assistant Secretary for reviewing appeals for BIA Programs in accordance with § 1000.2370. Finally, the section identifies the appropriate bureau head/Assistant Secretary for non-BIA Program appeals pursuant to § 1000.2351. The Committee implemented this section to provide clarity regarding the relevant official for any BIA Program to whom a Tribe/Consortia would file an appeal.

S. Subpart S—Conflicts of Interest

This subpart sets out the minimum requirements a Tribe/Consortium must have in place, pursuant to Tribal law and procedures, to address conflicts of interest, including organizational and personal conflicts.

The Committee did not implement changes to subpart S.

T. Subpart T—Tribal Consultation Process

This subpart describes the process for engaging in consultations related to self-governance with Tribes/Consortia. The 2001 prior rule includes “Subpart I—Public Consultation Process.” The final rule removes and renames this subpart to reflect that the subpart applies to Tribal consultation, and to conform to more recent Federal and Department policy on Tribal consultation. Under this subpart, consultations related to self-governance commenced after this rule's effective date will comply with the Tribal consultation process outlined in the revised version of this subpart, and such previous regulations governing public consultation shall be superseded.

This subpart establishes when the Secretary shall consult on matters related to self-governance and identifies that consultation will occur: (1) to determine eligible programs for inclusion in a funding agreement; (2) to establish programmatic targets for the inclusion of non-BIA programs in funding agreements; and (3) on any secretarial action with Tribal implications on matters related to self-governance. This subpart also establishes the applicable process for engaging in Tribal consultations, which is inspired by the President's November 30, 2022, Memorandum on Uniform Standards for Tribal Consultation, and the Department's current Departmental Manuals.

This subpart also establishes guiding principles applicable to Tribal

consultation related to self-governance. Additionally, this subpart requires the Secretary to provide notice of upcoming consultations to Tribes/Consortia, allow written comments, and develop a record reflecting a Tribal consultation. Finally, this subpart establishes how the Secretary will handle confidential or sensitive information provided by a Tribe/Consortium during a consultation.

The Committee agreed to require at least 30 days' notice to Tribes/Consortia prior to any planned consultation sessions. However, the Committee recognizes that situations may occur that require the need for Tribal consultation on an expedited basis to address urgent issues. Therefore, the Committee expects that the Secretary may waive applicable notice requirements at the request of a Tribe/Consortium pursuant to subpart J (Waiver of Regulations) in such urgent situations.

The Committee did not implement changes to subpart T.

V. Procedural Requirements

A. Regulatory Planning and Review (E.O. 12866, 14094 and E.O. 13563)

E.O. 12866, as amended by E.O. 14094, provides that the Office of Information and Regulatory Affairs (OIRA) in OMB will review all significant regulatory actions. OIRA has determined that this rule is a significant regulatory action.

E.O. 14094 amends E.O. 12866 and reaffirms the principles of E.O. 12866 and E.O. 13563 and states that regulatory analysis should facilitate agency efforts to develop regulations that serve the public interest, advance statutory objectives, and be consistent with E.O. 12866, E.O. 13563, and the Presidential Memorandum of January 20, 2021 (Modernizing Regulatory Review). Regulatory analysis, as practicable and appropriate, shall recognize distributive impacts and equity, to the extent permitted by law.

E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for

public participation and an open exchange of ideas. The Department has developed this final rule in a manner consistent with these requirements.

E.O. 12866 Interagency Feedback Received on Proposed Rule

The Department new regulations will update the manner in which it implements self-governance at the Department. This Notice discussed the rationale for the changes that should have no major impacts on regulations or programs administered by other agencies. Overall, the proposed rule was expected to apply only to those Tribes/Consortia that enter into a self-governance compact with the Department and conclude a funding agreement under that compact.

During OIRA's E.O. 12866 review, the Department received comments expressing concerns about how the Department's proposed rule might intersect with another agency's self-governance regulations and program. The Department sought information to describe the manner, if any, in which its self-governance regulations might affect self-governance compacts and funding agreements between Tribes/Consortia and agencies other than the Department.

Throughout the E.O. 12866 interagency process, the Department worked collaboratively with OMB, OIRA, and the agencies providing comment. Prior to the publication of the proposed rule, 89 FR 57524, the Department communicated regularly with the relevant agencies regarding legal and policy interests that the other agencies had about the proposed rule, 89 FR 57524. These robust discussions continued after the publication of the proposed rule, 89 FR 57524. The Department provided information on the nature of the rulemaking process to the relevant agencies and engaged in a good faith effort to make concessions and compromise where possible. Multiple drafts of proposed language were exchanged. Regular communication between the Committee, the Department leadership, and relevant agency were able to reach consensus and compromise on the language of the final rule.

B. Regulatory Flexibility Act

The Department certifies that this final rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* The Department has evaluated the effects of this final rule on small entities, such as local governments and businesses.

On October 21, 2020, the Practical Reforms & Other Goals to Reinforce the

Effectiveness of Self Governance & Self Determination for Indian Tribes Act (PROGRESS Act) was signed into law. See Public Law 116–180. Section 413 of Public Law 116–180, 25 U.S.C. 5363 directs the Secretary to promulgate regulations using the negotiated rulemaking process to carry out subchapter IV of the ISDEAA, the Tribal Self-Governance Program.

As stated in the Preamble to the Rule, “this rule [will] update regulations implementing Tribal Self-Governance. This final rule has been negotiated by representatives of Self-Governance and non-Self-Governance Tribes, and the Department. The intended effect is to transfer to participating Tribes’ control of, funding for, and decision making concerning certain Federal programs, consistent with updates contained in the PROGRESS Act. The Department anticipates this final rule will have a negligible cost burden for Tribes currently participating in Self-Governance, nominal startup costs for Tribes not currently participating in Self-Governance, and some possible negligible new costs to the Federal government absorbed by internal transfers.”

The scope of the final rule provides regulatory implementation of legislative amendments to title IV of Public Law 93–638, the Tribal Self-Governance Program. The final rule implements the more accommodating selection and eligibility criteria for Indian Tribes and Tribal organizations that wish to join the Tribal Self-Governance Program. The final rule supports the authority for continuing existing funding agreements, reduces effort for subsequent funding agreements, and provides administrative process for final offers when the parties are unable to reach agreement when negotiating a compact or funding agreement. The final rule applies the amended statute’s new standard for the Department’s burden of proof for certain decisions and appeal processes, it allows Tribes to use the prudent investment standard, and it updates the rules for construction programs and projects awarded through self-governance funding agreements. Rather than by executive order, the final rule introduces in regulation a regulatory process for consultation with self-governance Tribes on self-governance matters within the Department.

Based on the evaluation, the Department anticipates that this action will not have a significant economic impact on small entities. The Department only foresees this final rule having an impact on the Federal Government and Indian Tribes, which

are not considered to be small entities for purposes of this Act.

C. Congressional Review Act (CRA)

This final rule does not meet the criteria in 5 U.S.C. 804(2). Specifically, it:

(a) Would not have an annual effect on the economy of \$100 million or more.

(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

(c) Would not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

D. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement analyzing and estimating anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and Tribal Governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. See 2 U.S.C. 1532. The PROGRESS Act further requires that the agency publish a summary of such a statement with the agency’s proposed and final rules.

This final rule does not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than \$100 million per year. The final rule does not have a significant or unique effect on State, local, or Tribal governments or the private sector because this final rule affects only individual Indians and Tribal governments that petition the Department to take land into trust for their benefit. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

E. Takings (E.O. 12630)

This final rule does not affect a taking of private property or otherwise have taking implications under E.O. 12630. A takings implication assessment is not required.

F. Federalism (E.O. 13132)

Under the criteria in section 1 of E.O. 13132, this final rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. A federalism summary impact statement is not required.

G. Civil Justice Reform (E.O. 12988)

This final rule complies with the requirements of E.O. 12988.

Specifically, this final rule:

- (a) meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and
- (b) meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

H. Reforming Federal Funding and Support for Tribal Nations (E.O. 14112)

E.O. 14112 restates that it is the policy of the United States to design and administer Federal funding and support programs for Tribal Nations, consistent with applicable law and to the extent practicable, in a manner that better recognizes and supports Tribal sovereignty and self-determination. This policy is in keeping with the government's trust and treaty obligations to Tribal Nations, and the commitment to advancing Tribal sovereignty.

E.O. 14112(5) requires agencies to take steps "to increase the accessibility, equity, flexibility, and utility of Federal funding and support programs for Tribal Nations, while increasing the transparency and efficiency of Federal funding processes to better live up to the Federal Government's trust responsibilities and support Tribal self-determination," by "increase[ing] the accessibility, equity, flexibility, and utility of Federal funding and support programs for Tribal Nations, while increasing the transparency and efficiency of Federal funding processes to better live up to the Federal Government's trust responsibilities and support Tribal self-determination." Further, "implementation efforts shall appropriately maintain or enhance protections afforded under existing Federal law and policy, including those related to treaty rights and trust obligations, Tribal sovereignty and jurisdiction, civil rights, civil liberties, privacy, confidentiality, Indigenous Knowledge, and information access and security."

Throughout the negotiated rulemaking process, the Department remained committed to the obligations required under E.O. 14112, trust and treaty obligations to Tribes, and advancing self-governance and Tribal sovereignty.

I. Consultation With Indian Tribes (E.O. 13175)

The Department strives to strengthen its government-to-government

relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. The Department evaluated this final rule under its consultation policy and under the criteria in E.O. 13175 and has hosted consultation with federally recognized Indian Tribes in preparation of this final rule, including through a Dear Tribal Leader letter delivered to every federally recognized Tribe in the country, and through four consultation sessions held on July 15, 17, 19, and 22, 2024. Following the consultation sessions, the Department accepted written comments until August 14, 2024.

The Department developed this rule through a negotiated rulemaking process, with both Tribal and Federal representatives, which the Department asserts fulfills its obligations to consult on the text of this final rule. The Tribal and Federal representatives reached consensus on the final rule text, except for the few areas of disagreement discussed above.

J. Paperwork Reduction Act

This final rule contains a revision to a collection of information which is currently approved under the Office of Management and Budget (OMB) Control Number 1076–0143 through February 29, 2026. The revisions have been submitted to OMB for review and approval under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

Abstract: The Self-Governance program is authorized by the Tribal Self-Governance Act of 1994, 25 U.S.C. 5301, Public Law 103–413, as amended. Tribes interested in entering into Self-Governance must submit certain information as required by the PROGRESS Act. In addition, those Tribes and Consortia that have entered into Self-Governance funding agreements will be requested to submit certain information as described in this final rule.

For this ICR Reference No. 202410–1076–001, associated with final rule, the Department modified burden estimates within five (5) ICRs and added seven (7) ICRs to the information collection. There were ten (10) ICRs within this information collection that remained unchanged. The following revision to the existing information collections require approval by OMB.

- *Summary of Requested Revision:* Projected increase in respondent

participation and total number of annual respondents. Estimates have been increased to accurately reflect the amount of work associated with the total annual reporting and recordkeeping burden. This information will be used to justify a budget request submission on their behalf and to comport with section 405 of the PROGRESS Act that calls for the Secretary to submit an annual report to the Congress. For this ICR Reference No. 202410–1076–001, associated with Final Rule, RIN 1076–AF62, OSG made modifications to the burden estimates within six (6) ICRs. In addition, OSG added seven (7) ICRs to this information collection. Finally, there were nine (9) ICRs within this information collection that remained unchanged.

- *Modified ICRs:*

- Subpart B: Planning report
- Subpart C: Planning and Negotiation Grants
- Subpart D: Financial Assistance for Planning and Negotiations
- Subpart E: Compacts
- Subpart K: Construction
- Subparts M and N: Notice to retrocede; and Reassumption

- *New ICRs:*

- Subpart F: Funding Agreements for BIA Programs
- Subpart G: Funding Agreements for Non-BIA Programs
- Subpart L: Federal Tort Claims
- Subpart O: Trust Evaluation
- Subpart Q: Operational Provisions
- Subpart R: Appeals
- Subpart T: Tribal Consultation Process
- *Unchanged ICRs:*
- Subpart B: Admission to applicant pool
- Subpart B: Withdrawal from consortium FA
- Subpart B: Withdrawal from consortium to become member of applicant pool
- Subpart H: Letter of interest and supporting documents for FA
- Subpart H: Request to negotiate a FA
- Subpart H: Request to negotiate successor FA
- Subpart I: Final Offer
- Subpart J: Request for waiver
- Subpart P: Annual self-governance report

- *Title of Collection:* Tribal Self-Governance Program.

- *OMB Control Number:* 1076–0143.

- *Form Number:* Annual Self-Governance Report Form.

- *Type of Review:* Revision of a currently approved collection.

- *Respondents/Affected Public:* Federally recognized Indian Tribes and

Tribal Consortia participating in or wishing to enter into Tribal Self-Governance.

- *Total Estimated Number of Annual Respondents*: 492.

- *Total Estimated Number of Annual Responses*: 588.

- *Estimated Completion Time per Response*: Varies from 1 to 400 hours.

- *Total Estimated Number of Annual Burden Hours*: 11,276 hours.

- *Respondent's Obligation*: Required to obtain a benefit.

- *Frequency of Collection*: On occasion or annually.

- *Total Estimated Annual Non-hour Burden Cost*: \$20,800 for cost associated with attending training and hiring consultants to provide services for entering the Self-Governance Program.
- *Annual Costs to Federal Government*: \$1,725,535.

As part of our continuing effort to reduce paperwork and respondents' burdens, we invite the public and other Federal agencies to comment on any aspect of this information collection including:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of response.

Send your written comments and suggestions on this information collection to OIRA listed in **ADDRESSES** by the date indicated in **DATES**. Please also send a copy to consultation@bia.gov and reference "OMB Control Number 1076-0143" in the subject line of your comments. You may also view the ICR at <https://www.reginfo.gov/public/Forward?SearchTarget=PRA&textfield=1076-0143>.

K. National Environmental Policy Act (NEPA)

This rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 is not required because the rule is covered by

a categorical exclusion under 43 CFR 46.210(i): "Policies, directives, regulations, and guidelines: that are of an administrative, financial, legal, technical, or procedural nature; or whose environmental effects are too broad, speculative, or conjectural to lend themselves to meaningful analysis and will later be subject to the NEPA process, either collectively or case-by-case." The Department also determined that the rule does not involve any of the extraordinary circumstances listed in 43 CFR 46.215 that would require further analysis under the National Environmental Policy Act.

L. Energy Effects (E.O. 13211)

This final rule is not a significant energy action under the definition in E.O. 13211; the rule is not likely to have a significant adverse effect on the supply, distribution, or use of energy, and the rule has not otherwise been designated by the Administrator of OIRA as a significant energy action. A Statement of Energy Effects is not required.

M. Clarity of This Regulation

The Department is required by E.O. 12866 (section 1(b)(12)), 12988 (section 3(b)(1)(B)), and E.O. 13563 (section 1(a)), and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This final rule meets the criteria of:

- (a) Be logically organized;
- (b) Use the PROGRESS Active voice to address readers directly;
- (c) Use common, everyday words and clear language rather than jargon;
- (d) Be divided into short sections and sentences; and
- (e) Use lists and tables wherever possible.

List of Subjects in 25 CFR Part 1000

Administrative practice and procedure, Grant programs—Indians, Indians, Indian Tribes, Reporting and recordkeeping requirements, Tribal Consortium.

■ For the reasons set forth in the preamble above, the Department of the Interior, Assistant Secretary—Indian Affairs, revises 25 CFR part 1000 to read as follows:

PART 1000—ANNUAL FUNDING AGREEMENTS UNDER THE TRIBAL SELF-GOVERNMENT ACT AMENDMENTS TO THE INDIAN SELF-DETERMINATION AND EDUCATION ACT

Subpart A—General Provisions

Sec.

1000.1 What is the authority of this part?

1000.5 What key terms do I need to know?

1000.10 What is the purpose and scope of this part?

1000.15 What is the congressional policy statement of this part?

1000.20 What is the Secretarial policy of this part?

1000.25 What is the effect on existing Tribal rights?

1000.30 What is the effect of these regulations on Federal program guidelines, manual, or policy directives?

1000.35 What happens if a court holds any provisions of these regulations in this part invalid?

Subpart B—Selection of Additional Tribes for Participation in Tribal Self-Governance

Sec.

Purpose and Definitions

1000.101 What is the purpose of this subpart?

1000.105 What is a "signatory"?

1000.110 What is a "nonsignatory Tribe"?

Eligibility

1000.115 Who may participate in Tribal self-governance?

1000.120 How many additional Tribes/Consortia may participate in self-governance per year?

1000.125 What must a Tribe/Consortium submit to be selected to participate in Self-Governance?

1000.130 What additional information may be submitted to the Secretary to facilitate negotiations?

1000.135 May a Consortium member Tribe withdraw from the Consortium and be selected to participate in Self-Governance?

1000.140 What is required during the "planning phase"?

1000.145 When does a Tribe/Consortium have an uncorrected "significant and material audit exception"?

1000.150 What are the consequences of having an uncorrected significant and material audit exception?

1000.155 Is the Secretary required to provide technical assistance to improve a Tribe's/Consortium's internal controls?

Selection To Participate in Self-Governance

1000.160 How is a Tribe/Consortium selected to participate in Self-Governance?

1000.165 When does OSG accept requests to participate in Self-Governance?

1000.170 Are there any time frames to negotiate an initial compact or funding agreement for a Tribe not presently participating in self-governance?

1000.175 How does a Tribe/Consortium withdraw its request to participate in Self-Governance?

1000.180 What if more than 50 Tribes/Consortium apply to participate in Self-Governance?

1000.185 What happens if a request is not complete?

1000.190 What happens if a Tribe/Consortium is selected to participate but does not execute a compact and a funding agreement?

- 1000.195 May a Tribe/Consortium be selected to negotiate a funding agreement under section 403(b)(2) of the Act without having or negotiating a funding agreement under 25 U.S.C. 5363(b)(1)?
- 1000.200 May a Tribe/Consortium be selected to negotiate a funding agreement under section 403(c) (25 U.S.C. 5363(c)) without negotiating a funding agreement under 25 U.S.C. 5363(b)(1) and/or section 403(b)(2) (25 U.S.C. 5363(b)(2))?

Withdrawal From a Consortium Funding Agreement

- 1000.205 What happens when a Tribe wishes to withdraw from a Consortium funding agreement?
- 1000.210 How are funds redistributed when a withdrawing Tribe fully or partially withdraws from a compact and funding agreement and enters a new contract or compact?
- 1000.215 If the withdrawing Tribe elects to operate a program carried out under a compact and funding agreement under title IV through a contract under title I, is the resulting contract considered a mature contract under 25 U.S.C. 5304(h)?
- 1000.220 How are funds distributed when a withdrawing Tribe fully or partially withdraws from a Consortium's compact and funding agreement and the withdrawing Tribe does not enter a new contract or compact?
- 1000.225 What amount of funding is to be removed from the Consortium's funding agreement for the withdrawing Tribe?
- 1000.230 What happens if there is a dispute between the Consortium and the withdrawing Tribe?
- 1000.235 When a Tribe withdraws from a Consortium, is the Secretary required to award to the withdrawing Tribe a portion of funds associated with a construction project if the withdrawing Tribe so requests?

Subpart C—Planning and Negotiation Grants for BIA Programs

- Sec.
- 1000.301 What is the purpose of this subpart?
- 1000.305 Are there grants available to assist Tribes/Consortia to meet the requirements to participate in self-governance?
- 1000.310 What is required to request planning and negotiation grants?
- 1000.315 Are planning and negotiation grants available?
- 1000.320 Must a Tribe/Consortium receive a planning or negotiation grant to be eligible to participate in self-governance?
- 1000.325 What happens if there are insufficient funds to award all of the requests for planning and negotiation grants in any given year?
- 1000.330 May a Tribe/Consortium that has received a planning grant also receive a negotiation grant?
- 1000.335 What are the Secretary's responsibilities upon a decision not to award a planning or negotiation grant?
- 1000.340 May a Tribe/Consortium administratively appeal the Secretary's decision to not award a grant under this subpart?

Subpart D—Financial Assistance for Planning and Negotiation Activities for Non-BIA Bureau Programs

- Sec.
- 1000.401 What is the purpose of this subpart?
- 1000.405 What funds are available to Tribes/Consortium for planning and negotiating activities with non-BIA bureaus?
- 1000.410 What kinds of planning and negotiation activities for non-BIA programs does financial assistance from non-BIA bureaus support?
- 1000.415 Who can apply to a non-BIA bureau for financial assistance to plan and negotiate non-BIA programs?
- 1000.420 Under what circumstances may financial assistance for planning and negotiation activities with non-BIA bureaus be awarded to Tribes/Consortia?
- 1000.425 How does the Tribe/Consortium know when and how to apply for financial assistance for planning and negotiation activities for a non-BIA program?
- 1000.430 What must be included in the application for financial assistance for planning and negotiation activities for a non-BIA program?
- 1000.435 How will the non-BIA bureau director/commissioner award financial assistance for planning and negotiation activities for a non-BIA program?
- 1000.440 May non-BIA bureaus provide technical assistance to a Tribe/Consortium in drafting its application?
- 1000.445 What are the non-BIA bureau director's/commissioner's responsibilities upon a decision to decline financial assistance?
- 1000.450 Can an applicant administratively appeal a decision not to award financial assistance?
- 1000.455 May a Tribe/Consortium reapply through a future planning and negotiation application if it has been previously denied?
- 1000.460 Will the non-BIA bureau notify Tribes/Consortium of the results of the selection process?

Subpart E—Compacts

- Sec.
- 1000.501 What is a self-governance compact?
- 1000.505 Which DOI office negotiates self-governance compacts?
- 1000.510 What is included in a self-governance compact?
- 1000.515 What provisions must be included in either a compact or funding agreement?
- 1000.520 Is a compact required to participate in self-governance?
- 1000.525 Can a Tribe/Consortium negotiate other terms and conditions?
- 1000.530 What is the duration of a compact?
- 1000.535 May a compact be amended?
- 1000.540 Can a Tribe/Consortium have a funding agreement without having negotiated a compact?
- 1000.545 May a participating Tribe/Consortium retain its existing compact which was executed prior to the enactment of Public Law 116–180?

- 1000.550 What happens if the Tribe/Consortium and Secretary fail to reach an agreement on a compact?

Subpart F—Funding Agreements for BIA Programs

- Sec.
- 1000.601 What is the purpose of this subpart?
- 1000.605 What is a funding agreement?
- Contents and Scope of Funding Agreements*
- 1000.610 What must be included in a funding agreement?
- 1000.615 Can additional provisions be included in a funding agreement?
- 1000.620 Does a Tribe/Consortium have the right to include provisions of title I of Public Law 93–638 in a funding agreement?
- 1000.625 What is the term of a funding agreement?
- 1000.630 Can a Tribe/Consortium negotiate a funding agreement with a term that exceeds one year?
- 1000.635 Does a funding agreement remain in effect after the end of its term?
- 1000.640 May a participating Tribe/Consortium retain its existing funding agreement which was executed prior to the enactment of Public Law 116–180?

Determining What Programs May Be Included in a Funding Agreement

- 1000.645 What PSFAs may be included in a funding agreement?
- 1000.650 How does the funding agreement specify the services provided, functions performed, and responsibilities assumed by the Tribe/Consortium and those retained by the Secretary?
- 1000.655 May a Tribe/Consortium redesign or consolidate the programs that are included in a funding agreement and reallocate funds for such programs?
- 1000.660 Do Tribes/Consortium need Secretarial approval to redesign BIA programs that the Tribe/Consortium administers under a funding agreement?
- 1000.665 Can the terms and conditions in a funding agreement be amended during the year it is in effect?

Determining Funding Agreement Amounts

- 1000.670 What funds must be transferred to a Tribe/Consortium under a funding agreement?
- 1000.675 What funds may not be included in a funding agreement?
- 1000.680 May the Secretary place any requirements on programs and funds that are otherwise available to Tribes/Consortium or Indians for which appropriations are made to agencies other than DOI?
- 1000.685 What funds are used to carry out inherent Federal functions?
- 1000.690 How does BIA determine the funding amount to carry out inherent Federal functions?
- 1000.695 Is the amount of funds withheld by the Secretary to cover the cost of inherent Federal functions subject to negotiation?
- 1000.700 May a Tribe/Consortium continue to negotiate a funding agreement pending an appeal of funding amounts?

associated with inherent Federal functions?

- 1000.705 What is a Tribal share?
- 1000.710 How does BIA determine a Tribe's/Consortium's share of funds to be included in a funding agreement?
- 1000.715 Can a Tribe/Consortium negotiate a Tribal share for programs outside its region/agency?
- 1000.720 May a Tribe/Consortium obtain discretionary or competitive funding that is distributed on a discretionary or competitive basis?
- 1000.725 Are all funds identified as Tribal shares always paid to the Tribe/Consortium under a funding agreement?
- 1000.730 How are savings that result from downsizing allocated?
- 1000.735 Do Tribes/Consortium need Secretarial approval to reallocate funds between programs that the Tribe/Consortium administers under the funding agreement?
- 1000.740 Can funding amounts negotiated in a funding agreement be adjusted during the year it is in effect?

Establishing Self-Governance Stable Base Budgets

- 1000.745 What are self-governance stable base budgets?
- 1000.750 Once a Tribe/Consortium establishes a stable base budget, are funding amounts renegotiated each year?
- 1000.755 How are self-governance stable base budgets established?
- 1000.760 How are self-governance stable base budgets adjusted?

Subpart G—Funding Agreements for Non-BIA Programs

- Sec.
- 1000.801 What is the purpose of this subpart?
- 1000.805 What is a funding agreement for a non-BIA program?
- 1000.810 What non-BIA programs are eligible for inclusion in a funding agreement?
- 1000.815 Are there non-BIA programs for which the Secretary must negotiate for inclusion in a funding agreement subject to such terms as the parties may negotiate?
- 1000.820 What programs are included under section 403(b)(2) (25 U.S.C. 5363(b)(2))?
- 1000.825 What programs are included under section 403(c) (25 U.S.C. 5363(c))?
- 1000.830 What does “special geographic, historical or cultural” mean?
- 1000.835 Under section 403(b)(2) (25 U.S.C. 5363(b)(2)), when must programs be awarded non-competitively?
- 1000.840 May a non-BIA bureau include in a funding agreement, on a non-competitive basis, programs of special geographic, historical, or cultural significance?
- 1000.845 Are there any non-BIA programs that may not be included in a funding agreement?
- 1000.850 Does a Tribe/Consortium need to be identified in an authorizing statute in order for a program or element of a program to be included in a non-BIA funding agreement?

- 1000.855 Will Tribes/Consortia participate in the Secretary's determination of what is to be included on the annual list of available programs?
- 1000.860 How will the Secretary consult with Tribes/Consortia in developing the list of available programs?
- 1000.865 What else is on the list in addition to eligible programs?
- 1000.870 May a bureau negotiate with a Tribe/Consortium for programs not specifically included on the annual list pursuant to 25 U.S.C. 5372(c)?
- 1000.875 How will a bureau negotiate a funding agreement for a program of special geographic, historical, or cultural significance to more than one Tribe/Consortium?
- 1000.880 When will this determination be made?
- 1000.885 What funds are included in a non-BIA funding agreement?
- 1000.890 How are indirect cost rates determined?
- 1000.895 How does the Secretary determine the amount of indirect costs for a non-BIA funding agreement?
- 1000.900 May the bureaus negotiate terms to be included in a funding agreement for non-BIA programs?
- 1000.905 Can a Tribe/Consortium reallocate, consolidate, and redesign funds for a non-BIA program?
- 1000.910 Do Tribes/Consortia need Secretarial approval to reallocate funds between title I eligible programs that the Tribe/Consortium administers under a non-BIA funding agreement?
- 1000.915 Can a Tribe/Consortium negotiate a funding agreement with a non-BIA bureau for which the performance period exceeds one year?
- 1000.920 Can the terms and conditions in a non-BIA funding agreement be amended during the year it is in effect?
- 1000.925 What happens if a funding agreement expires before the effective date of the successor Funding Agreement?

Subpart H—Negotiation Process

- Sec.
- 1000.1001 What is the purpose of this subpart?
- 1000.1005 What are the phases of the negotiation process?
- 1000.1010 Who may initiate the information phase?
- 1000.1015 Is it mandatory to go through the information phase before initiating the negotiation phase?
- 1000.1020 How does a Tribe/Consortium initiate the information phase?
- 1000.1025 What information is a Tribe/Consortium encouraged to include in a Request to Initiate the Information Phase?
- 1000.1030 When should a Tribe/Consortium submit a Request to Initiate the Information Phase to the Secretary?
- 1000.1035 What steps does the bureau take after a Request to Initiate the Information Phase is submitted by a Tribe/Consortium?
- 1000.1040 How does a Tribe/Consortium initiate the negotiation phase?

- 1000.1045 How and when does the Secretary respond to a request to negotiate a compact or BIA funding agreement?
- 1000.1050 How and when does the Secretary respond to a request to negotiate a non-BIA funding agreement?
- 1000.1055 What is the process for conducting the negotiation phase?
- 1000.1060 What issues must the bureau and the Tribe/Consortium address at negotiation meetings?
- 1000.1065 What happens when a compact or funding agreement is signed?
- 1000.1070 What happens if the Tribe/Consortium and bureau negotiators fail to reach an agreement on a compact or funding agreement?
- 1000.1075 When does the funding agreement become effective?
- 1000.1080 What is a subsequent funding agreement?
- 1000.1085 How is the negotiation of a subsequent funding agreement initiated?
- 1000.1090 What is the process for negotiating a subsequent funding agreement?

Subpart I—Final Offer

- Sec.
- 1000.1101 What is the purpose of this subpart?
- 1000.1105 When should a final offer be submitted?
- 1000.1110 How does a Tribe/Consortium submit a final offer?
- 1000.1115 What does a final offer contain?
- 1000.1120 When does the 60-day review period begin?
- 1000.1125 How does the Department acknowledge receipt of final offer?
- 1000.1130 May the Secretary request and obtain an extension of time of the 60-day review period?
- 1000.1135 What happens if the Secretary takes no action within the 60-day period (or any extensions thereof)?
- 1000.1140 Once the Tribe/Consortium's final offer has been accepted or accepted by operation of law, what is the next step?
- 1000.1145 On what basis may the Secretary reject a final offer?
- 1000.1150 How does the Secretary reject a final offer?
- 1000.1155 What is the “significant danger” or “risk” to the public health or safety, to natural resources, or to trust resources?
- 1000.1160 Is technical assistance available to a Tribe/Consortium to overcome the objections stated in the Secretary's rejection of a final offer?
- 1000.1165 If the Secretary rejects all or part of a final offer, is the Tribe/Consortium entitled to an appeal?
- 1000.1170 Do those portions of the compact, funding agreement, or amendment not in dispute go into effect?
- 1000.1175 Does appealing the final offer decision prevent the Secretary and the Tribe/Consortium from entering into any accepted compact, funding agreement or amendment provisions that are not in dispute?
- 1000.1180 What is the burden of proof in an appeal of a rejection of a final offer?

Subpart J—Waiver of Regulations

Sec.

- 1000.1201 What regulations apply to Tribes/Consortia?
- 1000.1205 Can the Secretary grant a waiver of regulations to a Tribe/Consortium?
- 1000.1210 When can a Tribe/Consortium request a waiver of a regulation?
- 1000.1215 How does a Tribe/Consortium obtain a waiver?
- 1000.1220 How does a Tribe/Consortium operating a Public Law 102–477 Plan obtain a waiver?
- 1000.1225 May a Tribe/Consortium request an optional meeting or other informal discussion to discuss a waiver request?
- 1000.1230 Is a bureau required to provide technical assistance to a Tribe/Consortium concerning waivers?
- 1000.1235 How does the Secretary respond to a waiver request?
- 1000.1240 When must the Secretary make a decision on a waiver request?
- 1000.1245 How does the Secretary make a decision on the waiver request?
- 1000.1250 What happens if the Secretary neither approves nor denies a waiver request within the time specified in § 1000.1240?
- 1000.1255 May a Tribe/Consortium appeal the Secretary's decision to deny its request for a waiver of a regulation?
- 1000.1260 What is the term of a waiver?
- 1000.1265 May a Tribe/Consortium withdraw a waiver request?
- 1000.1270 May a Tribe/Consortium have more than one waiver request pending before the Secretary at the same time?
- 1000.1275 May a Tribe/Consortium continue to negotiate a funding agreement pending final decision on a waiver request?
- 1000.1280 How is a waiver decision documented for the record?

Subpart K—Construction*Construction Definitions*

Sec.

- 1000.1301 What key construction terms do I need to know?

Purpose and Scope

- 1000.1305 What construction projects and programs included in a funding agreement or construction project agreement are subject to this subpart?
- 1000.1306 May a program or project-specific grant or contracting mechanism involving construction and related activities satisfy the requirements of this subpart?
- 1000.1307 May the Secretary accept funds from another Department for a program or project involving construction and related activities for transfer to the Tribe/Consortium under its funding agreement or construction project agreement?
- 1000.1310 What alternatives are available for a Tribe/Consortium to perform a construction program or project?
- 1000.1315 Does this subpart create an agency relationship?

Notification and Project Assumption

- 1000.1320 Is the Secretary required to consult with affected Tribes/Consortia

concerning construction projects and programs?

- 1000.1325 When does the Secretary confer with a Tribe/Consortium concerning Tribal preferences as to size, location, type, and other characteristics of a project?
- 1000.1330 What does a Tribe/Consortium do if it wants to perform a construction project or program under 25 U.S.C. 5367?
- 1000.1335 What must a Tribal proposal for a construction program or project contain?
- 1000.1340 May multiple projects be included in a single construction project agreement or funding agreement that includes a construction project?
- 1000.1345 Must a construction project proposal incorporate provisions of Federal construction guidelines and manuals?
- 1000.1350 What provisions relating to a construction project or program may be included in a funding agreement or construction project agreement?
- 1000.1355 What provisions must a Tribe/Consortium include in a construction project agreement or funding agreement that contains a construction project or program?

Requirements and Standards

- 1000.1360 What codes, standards and architects and engineers must a Tribe/Consortium use when performing a construction project under this part?

NEPA Process

- 1000.1365 Are Tribes/Consortia required to carry out activities involving NEPA in order to enter into a construction project agreement?
- 1000.1370 How may a Tribe/Consortium elect to assume some Federal responsibilities under NEPA?
- 1000.1375 How may a Tribe/Consortium carry out activities involving NEPA without assuming some Federal responsibilities?
- 1000.1379 Are Tribes/Consortia required to adopt a separate resolution or take equivalent Tribal action to assume some environmental responsibilities of the Secretary under NEPA, NHPA, and related laws and regulations for each construction project?
- 1000.1380 What additional provisions of law are related to NEPA and NHPA?
- 1000.1385 What is the typical environmental review process for construction projects?
- 1000.1390 Is the Secretary required to take into account the Indigenous Knowledge of Tribes/Consortia when preparing environmental studies under NEPA, NHPA, and related provisions of other laws and regulations?
- 1000.1395 May a Tribe/Consortium act as a cooperating agency or joint lead agency for environmental review purposes regardless of whether it exercises its option under § 1000.1370(a)(1)?
- 1000.1400 How does a Tribe/Consortium comply with NEPA and NHPA?
- 1000.1405 If a Tribe/Consortium adopts the environmental review procedures of a

Federal agency, is the Tribe/Consortium responsible for ensuring the agency's policies and procedures meet the requirements of NEPA, NHPA, and related environmental laws?

- 1000.1410 Are Federal funds available to cover the cost of Tribes/Consortia carrying out environmental responsibilities?
- 1000.1415 How are project and program environmental review costs identified?
- 1000.1420 What costs may be included in the budget for a construction project or program?
- 1000.1425 May the Secretary reject a Tribe's/Consortium's final offer of a construction project proposal submitted under subpart I based on a determination of Tribal capacity or capability?
- 1000.1430 On what basis may the Secretary reject a final offer of a construction project proposal made by a Tribe/Consortium?

Role of the Secretary

- 1000.1435 What is the Secretary's role in a construction project performed under this subpart?
- 1000.1440 What constitutes a "significant change" in the original scope of work?
- 1000.1445 May the Secretary suspend construction activities under the terms of a funding agreement or construction project agreement under title IV of the ISDEAA?
- 1000.1450 How are property and funding returned if there is a reassumption for substantial failure to carry out a construction project?
- 1000.1455 What happens when a Tribe/Consortium, suspended under § 1000.1445 for substantial failure to carry out the terms of a funding agreement that includes a construction project or program or a construction project agreement under title IV of the ISDEAA without good cause, does not correct the failure during the suspension?
- 1000.1460 How does the Secretary make advance payments to a Tribe/Consortium under a funding agreement or construction project agreement?
- 1000.1465 Is a facility built under this subpart eligible for annual operation and maintenance funding?

Role of the Tribe/Consortium

- 1000.1470 What is the Tribe's/Consortium's role in a construction project included in a funding agreement or construction project agreement under this subpart?
- 1000.1475 Is a Tribe/Consortium required to submit construction project progress and financial reports for construction projects?

Other

- 1000.1480 May a Tribe/Consortium continue work with construction funds remaining in a funding agreement or construction project agreement at the end of the funding year?
- 1000.1485 Must a construction project agreement or funding agreement that contains a construction project or

activity incorporate provisions of Federal construction standards?

- 1000.1490 May the Secretary require design provisions and other terms and conditions for construction projects or programs included in a funding agreement or construction project agreement under section 403(c) (25 U.S.C. 5363(c))?
- 1000.1495 Do all provisions of other subparts apply to construction portions of a funding agreement or construction project agreement?
- 1000.1500 When a Tribe withdraws from a Consortium, is the Secretary required to award to the withdrawing Tribe a portion of funds associated with a construction project if the withdrawing Tribe so requests?
- 1000.1505 May a Tribe/Consortium reallocate funds from a construction program to a non-construction program?
- 1000.1510 May a Tribe/Consortium reallocate funds among construction programs?
- 1000.1515 Must the Secretary retain project funds to ensure proper health and safety standards in construction projects?
- 1000.1520 What funding must the Secretary provide in a construction project agreement or funding agreement that includes a construction project or program?
- 1000.1525 Must Federal funds from other DOI sources be incorporated into a construction project agreement or funding agreement that includes a construction project or program?
- 1000.1530 May a Tribe/Consortium contribute funding to a project?

Subpart L—Federal Tort Claims

- Sec.
- 1000.1601 What is the purpose of this subpart?
- 1000.1605 What other statutes and regulations apply to FTCA coverage?
- 1000.1610 Do Tribes/Consortia need to be aware of areas which FTCA does not cover?
- 1000.1615 Is there a deadline for filing FTCA claims?
- 1000.1620 How long does the Federal Government have to process a FTCA claim after the claim is received by the Federal agency, before a lawsuit may be filed?
- 1000.1625 Is it necessary for a compact or funding agreement to include any clauses about FTCA coverage?
- 1000.1630 Does FTCA apply to a compact and funding agreement if FTCA is not referenced in the compact or funding agreement?
- 1000.1635 To what extent shall the Tribe/Consortium cooperate with the Federal Government in connection with tort claims arising out of the Tribe's/Consortium's performance of a compact, funding agreement, or subcontract?
- 1000.1640 Does this coverage extend to subcontractors of compacts and funding agreements?
- 1000.1645 Is FTCA the exclusive remedy for a tort claim, including a claim concerning personal injury or death,

resulting from the performance of a compact or funding agreement?

- 1000.1650 What employees are covered by FTCA for claims arising out of a Tribe's/Consortia's performance of a compact or funding agreement?
- 1000.1655 Does FTCA cover employees of the Tribe/Consortium who are paid by the Tribe/Consortium from funds other than those provided through the funding agreement?
- 1000.1660 May persons who are not Indians or Alaska Natives assert claims under FTCA arising out of the performance of a compact or funding agreement by a Tribe/Consortium?
- 1000.1665 If the Tribe/Consortium or Tribe's/Consortium's employee receives a summons and/or a complaint alleging a tort covered by FTCA and arising out of the performance of a compact or funding agreement, what should the Tribe/Consortium do?

Subpart M—Reassumption

- Sec.
- 1000.1701 What is the purpose of this subpart?
- 1000.1705 What does reassumption mean?
- 1000.1710 Under what circumstances may the Secretary reassume a program operated by a Tribe/Consortium under a funding agreement?
- 1000.1715 What is "imminent jeopardy" to a trust asset?
- 1000.1720 What is "imminent jeopardy" to natural resources?
- 1000.1725 What is "imminent jeopardy" to public health and safety?
- 1000.1730 What steps must the Secretary take prior to reassumption becoming effective?
- 1000.1735 Does the Tribe/Consortium have a right to a hearing prior to a non-immediate reassumption becoming effective?
- 1000.1740 What happens if the Secretary determines that the Tribe/Consortium has not corrected the conditions that the Secretary identified in the written notice?
- 1000.1745 What is the earliest date on which a reassumption by the Secretary can be effective?
- 1000.1750 Does the Secretary have the authority to immediately reassume a program?
- 1000.1755 What must a Tribe/Consortium do when a program is reassumed?
- 1000.1760 When must the Tribe/Consortium return funds to the Department?
- 1000.1765 May the Tribe/Consortium be reimbursed for actual and reasonable "wind up costs" incurred after the effective date of retrocession?
- 1000.1770 Is a Tribe's/Consortium's general right to negotiate a funding agreement adversely affected by a reassumption action?
- 1000.1775 When will the Secretary return management of a reassumed program?

Subpart N—Retrocession

- Sec.
- 1000.1801 What is the purpose of this subpart?

- 1000.1805 Is a decision by a Tribe/Consortium not to include a program in a successor agreement considered a retrocession?
- 1000.1810 Who may retrocede a program in a funding agreement?
- 1000.1815 How does a Tribe/Consortium retrocede a program?
- 1000.1820 When will the retrocession become effective?
- 1000.1825 How will retrocession affect the Tribe's/Consortium's existing and future funding agreements?
- 1000.1830 Does the Tribe/Consortium have to return funds used in the operation of a retroceded program?
- 1000.1835 Does the Tribe/Consortium have to return property used in the operation of a retroceded program?
- 1000.1840 What happens to a Tribe's/Consortium's mature contract status if it has retroceded a program that is also available for self-determination contracting?
- 1000.1845 How does retrocession affect a bureau's operation of the retroceded program?

Subpart O—Trust Evaluation

- Sec.
- 1000.1901 What is the purpose of this subpart?
- 1000.1905 Does the Act alter the trust responsibility of the United States to Indian Tribes and individuals under self-governance?
- 1000.1910 What are "trust resources" for the purposes of the trust evaluation process?
- 1000.1915 What are "trust PSFAs" for the purposes of the trust evaluation process?
- 1000.1920 Can a Tribe/Consortium request the Secretary to conduct an assessment of the status of the trust assets, resource, and PSFAs?
- Annual Trust Evaluation
- 1000.1925 What is a trust evaluation?
- 1000.1930 How are trust evaluations conducted?
- 1000.1935 May the trust evaluation process be used for additional reviews?
- 1000.1936 May the parties negotiate review methods for purposes of the trust evaluation?
- 1000.1940 What are the responsibilities of the Secretary's designated representative(s) after the annual trust evaluation?
- 1000.1945 Is the trust evaluation standard or process different when the trust resource or asset is held in trust for an individual Indian or Indian allottee?
- 1000.1950 Does the annual trust review evaluation include a review of the Secretary's inherent Federal and retained operation trust PSFAs?
- 1000.1955 What are the consequences of a finding of imminent jeopardy in the Secretary's annual trust evaluation?
- 1000.1960 What if the Secretary's trust evaluation reveals problems that do not rise to the level of imminent jeopardy?
- 1000.1965 Who is responsible for taking corrective action?
- 1000.1970 What are the requirements of the Department's review team report?

1000.1975 May the Department conduct more than one trust evaluation per Tribe per year?

Subpart P—Reports

Sec.

- 1000.2001 What is the purpose of this subpart?
- 1000.2005 Is the Secretary required to report on Self Governance?
- 1000.2010 What will the Secretary's annual report to Congress contain?
- 1000.2011 Is the Secretary required to review programs of the Department other than BIA, BIE, the Office of the Assistant Secretary for Indian Affairs, and the BTFA?
- 1000.2012 Is the Secretary required to annually publish information under this subpart in the **Federal Register**?
- 1000.2015 Must the Secretary seek comment on the report from Tribes/Consortia before submitting it to Congress?
- 1000.2020 What may the Tribe's/Consortium's annual report on self-governance address?
- 1000.2025 Are there other data submissions or reports that Tribes/Consortia may be requested to submit?
- 1000.2030 Are Tribes/Consortia required to submit Single Audit Act reports?
- 1000.2035 Is there an exemption available for the requirement to submit Single Audit Act reports?
- 1000.2040 Are Tribes/Consortia required to maintain reports and records in accordance with 25 U.S.C. 5305?

Subpart Q—Operational Provisions

Sec.

- 1000.2101 How can a Tribe/Consortium hire a Federal employee to help implement a funding agreement?
- 1000.2105 Can a Tribe/Consortium employee be detailed to a Federal service position?
- 1000.2110 How does the Freedom of Information Act apply?
- 1000.2115 How does the Privacy Act apply?
- 1000.2120 What audit requirements must a Tribe/Consortium follow?
- 1000.2125 How do OMB circulars and the Act apply to funding agreements?
- 1000.2130 How much time does the Federal Government have to make a claim against a Tribe/Consortium relating to any disallowance of costs, based on an audit?
- 1000.2135 Does a Tribe/Consortium have additional ongoing requirements to maintain minimum standards for Tribe/Consortium management systems?
- 1000.2140 Are there any restrictions on how funds awarded to a Tribe/Consortium under a funding agreement may be spent?
- 1000.2145 What standard applies to a Tribe's/Consortium's management of funds awarded under a funding agreement?
- 1000.2150 How may interest or investment income that accrues on funds awarded under a funding agreement be used?
- 1000.2155 Can a Tribe/Consortium retain savings from programs?

1000.2160 Can a Tribe/Consortium carry over funds not spent during the term of the funding agreement?

- 1000.2165 After a non-BIA funding agreement has been executed and the funds transferred to a Tribe/Consortium, can a bureau request the return of unexpended funds?
- 1000.2170 How can a person or group appeal a decision or contest an action related to a program operated by a Tribe/Consortium under a funding agreement?
- 1000.2175 Must Tribes/Consortia comply with the Secretarial approval requirements of 25 U.S.C. 81; 82a; and 476 regarding professional and attorney contracts?
- 1000.2180 Are funds awarded under a funding agreement non-Federal funds for the purpose of meeting matching or cost participation requirements?
- 1000.2185 Does Indian preference apply to services, activities, programs, and functions performed under a funding agreement?
- 1000.2190 Do the wage and labor standards in the Davis-Bacon Act apply to Tribes and Tribal Consortia?
- 1000.2195 Can a Tribe/Consortium use Federal supply sources in the performance of a funding agreement?
- 1000.2200 Does the Prompt Payment Act (31 U.S.C. 3901) apply to a BIA funding Agreement?
- 1000.2205 Does the Prompt Payment Act (31 U.S.C. 3901) apply to a non-BIA program funding agreement?
- 1000.2210 Is a Tribe/Consortium obligated to continue performance under a compact or funding agreement if the Secretary does not transfer sufficient funds?

Subpart R—Appeals

Sec.

- 1000.2301 What is the purpose of this subpart?
- 1000.2305 How must disputes be handled?
- 1000.2310 Does a Tribe/Consortium have any options besides an appeal?
- 1000.2315 What is the Secretary's burden of proof for appeals in this subpart?

Informal Conference

- 1000.2320 How does a Tribe/Consortium request an informal conference?
- 1000.2325 How is an informal conference held?
- 1000.2330 What happens after the informal conference?

Post-Award Disputes

- 1000.2335 How may a Tribe/Consortium appeal a decision made after the funding agreement or compact or an amendment to a funding agreement or compact has been signed?
- 1000.2340 What statutes and regulations govern resolution of disputes concerning signed funding agreements or compacts (and any signed amendments) that are appealed to the CBCA?

Pre-Award Disputes

- 1000.2345 What decisions may a Tribe/Consortium appeal under §§ 1000.2345 through 1000.2395?

1000.2350 What decisions may not be appealed under §§ 1000.2345 through 1000.2395?

- 1000.2351 To Whom may a Tribe/Consortia appeal a decision under § 1000.2345?
- 1000.2355 How does a Tribe/Consortium know where and when to file an appeal?
- 1000.2357 Which official is the appropriate bureau head or Assistant Secretary for purposes of subpart R?

Appeals to Bureau Head/Assistant Secretary

- 1000.2360 When and how must a Tribe/Consortium appeal an adverse pre-award decision to the bureau head/Assistant Secretary?
- 1000.2365 When must the bureau head (or appropriate Assistant Secretary) issue a final decision in the pre-award appeal?
- 1000.2370 When and how will the Assistant Secretary respond to an appeal by a Tribe/Consortium?

Appeals to IBIA

- 1000.2375 When and how must a Tribe/Consortium appeal an adverse pre-award decision to the IBIA?
- 1000.2380 What happens after a Tribe/Consortium files an appeal?
- 1000.2385 What procedures apply to Interior Board of Indian Appeals (IBIA) proceedings?
- 1000.2386 What regulations govern resolution of disputes that are appealed to the IBIA?
- 1000.2390 Will an appeal adversely affect the Tribe's/Consortium's rights in other compact, funding negotiations, or construction project agreement?
- 1000.2395 Will the decision on appeal be available for the public to review?

Appeals of an Immediate Reassumption of a Self-Governance Program

- 1000.2405 What happens in the case of an immediate reassumption under 25 U.S.C. 5366(b)?
- 1000.2410 Will there be a hearing?
- 1000.2415 What happens after the hearing?
- 1000.2420 Is the recommended decision always final?
- 1000.2425 If a Tribe/Consortium objects to the recommended decision, what action will the IBIA take?
- 1000.2430 Will an immediate reassumption appeal adversely affect the Tribe's/Consortium's rights in other self-governance negotiations?

Equal Access to Justice Act

- 1000.2435 Does the Equal Access to Justice Act (EAJA) apply to appeals under this subpart?

Subparts S—Conflicts of Interest

Sec.

- 1000.2501 Is a Tribe/Consortium required to have policies in place to address conflicts of interest?
- 1000.2505 What is an organizational conflict of interest?
- 1000.2510 What must a Tribe/Consortium do if an organizational conflict of interest arises under a funding agreement?
- 1000.2515 When must a Tribe/Consortium regulate its employees or subcontractors to avoid a personal conflict of interest?

- 1000.2520 What types of personal conflicts of interest involving Tribal officers, employees, or subcontractors would have to be regulated by a Tribe/Consortium?
- 1000.2525 What personal conflicts of interest must the standards of conduct regulate?

Subpart T—Tribal Consultation Process

Sec.

- 1000.2601 What is the purpose of this subpart?
- 1000.2605 When does the Secretary consult with Tribes and Consortia on matters related to self-governance?
- 1000.2610 What principles should guide consultations with Tribes and Consortia?
- 1000.2615 What notice must the Secretary provide to Tribes and Consortia of an upcoming consultation?
- 1000.2620 Is the Secretary required to allow written comments by Tribes and Consortia following a consultation?
- 1000.2625 What record must the Secretary maintain following a consultation with Tribes and Consortia?
- 1000.2630 How must the Secretary handle confidential or sensitive information provided by Tribes and Consortia during a consultation?

Authority: 25 U.S.C. 5373

Subpart A—General Provisions

§ 1000.1 What is the authority of this part?

This part is prepared and issued by the Secretary of the Interior with the active participation and representation of Indian Tribes, Tribal organizations and inter-Tribal consortia under the negotiated rulemaking procedures required by section 413 of the Indian Self-Determination and Education Assistance Act, Public Law 93–638, as amended by the PROGRESS for Indian Tribes Act, Public Law 116–180 (25 U.S.C. 5373).

§ 1000.5 What key terms do I need to know?

403(c) Program or Nexus Program means a non-BIA program eligible under 25 U.S.C. 5363(c) and, specifically, a program, function, service, or activity that is of special geographic, historical, or cultural significance to a self-governance Tribe/Consortium. These programs may also be referred to as “nexus programs.”

Act means title IV of the Indian Self-Determination and Education Assistance Act of 1975, Public Law 93–638, as amended by Public Law 103–413, Public Law 104–109, and Public Law 116–180.

BIA means the Bureau of Indian Affairs of the Department or any successor bureau. For purposes of this part, BIA shall include the Office of the Assistant Secretary for Indian Affairs, BIE, and BTFA, or any successor bureau, unless specified otherwise.

BIA Program means any program, service, function, or activity, or portion thereof, that is performed or administered by the Department through the BIA. For purposes of this part, BIA Program shall also include any PSFA performed or administered by the Department through the Office of the Assistant Secretary for Indian Affairs, BIE, or BTFA which are eligible for inclusion in a compact or funding agreement under the Act unless specified otherwise.

BIE means the Bureau of Indian Education of the Department, or any successor bureau.

BIE Program means any program, service, function, or activity, or portion thereof, that is performed or administered by the Department through the BIE and is eligible for inclusion in a compact and funding agreement under the Act.

BTFA means the Bureau of Trust Funds Administration of the Department, or any successor bureau, to which the Department has transferred fiduciary programs, services, functions, and activities from the Office of Special Trustee for American Indians, as it is referenced in 25 U.S.C. 5361, *et seq.*, as amended.

Bureau means a bureau, service, office, agency, and other such subsidiary entity within the Department.

Compact means a self-governance compact entered under 25 U.S.C. 5364.

Consortium means an organization of Indian Tribes that is authorized by those Tribes to participate in self-governance under this part and is responsible for negotiating, executing, and implementing funding agreements and compacts.

Construction management services (CMS) means activities limited to administrative support services, coordination, oversight of engineers and construction activities. CMS services include services that precede project design: all project design and actual construction activities are subject to subpart K of these regulations whether performed by a Tribe subcontractor, or consultant.

Construction program or construction project means a Tribal undertaking relating to the administration, planning, environmental determination, design, construction, repair, improvement, or expansion of roads, bridges, buildings, structures, systems, or other facilities for purposes of housing, law enforcement, detention, sanitation, water supply, education, administration, community, health, irrigation, agriculture, conservation, flood control,

transportation, or port facilities, or for other Tribal purposes.

Days means calendar days, except where the last day of any time period specified in this part falls on a Saturday, Sunday, or a Federal holiday, the period must carry over to the next business day unless otherwise prohibited by law.

Director means the Director of the Office of Self-Governance (OSG).

DOI or Department means the Department of the Interior.

Funding agreement means a funding agreement entered into under 25 U.S.C. 5363.

Funding year means either fiscal or calendar year.

Gross mismanagement means a significant violation, shown by a preponderance of the evidence, of a compact, funding agreement, or statutory or regulatory requirement applicable to Federal funds for a PSFA administered by an Indian Tribe under a compact or funding agreement.

Indian means a person who is a member of an Indian Tribe.

Indian Tribe or Tribe means any Indian Tribe, band, nation or other organized group or community, including pueblos, rancherias, colonies and any Alaska Native village, or regional or village corporations as defined in or established pursuant to the Alaska Native Claims Settlement Act, that is recognized as eligible for special programs and services provided by the United States to Indians because of their status as Indians.

Indirect costs means costs incurred for a common or joint purpose benefitting more than one program and that are not readily assignable to individual programs.

Indirect cost rates means the rate(s) arrived at through negotiation between an Indian Tribe/Consortium and the appropriate Federal agency.

Inherent Federal function means a Federal function that may not legally be delegated to an Indian Tribe.

Non-BIA Bureau means any bureau within the Department other than the BIA, the BIE, the BTFA, or the Office of the Assistant Secretary for Indian Affairs.

Non-BIA bureaus director/ commissioner means the director of Non-BIA bureaus and the commissioner of the Bureau of Reclamation.

Non-BIA Programs means all or a portion of a program, function, service, or activity that is administered by any bureau other than the BIA, the BIE, the BTFA, or the Office of the Assistant Secretary for Indian Affairs within the Department.

Office of Self-Governance (OSG) means the office within the Office of the

Assistant Secretary-Indian Affairs responsible for the implementation and development of the Tribal Self-Governance Program.

Program or *PSFA* means any program, service, function, or activity (or portions thereof) within the Department that is included in a funding agreement.

Public Law 93–638 means sections 1 through 9 and title I of the Indian Self-Determination and Education Assistance Act of 1975, as amended.

Reassumption means the Secretary, without consent of the Tribe/Consortium, takes control or operation of the PSFAs and associated funding in a compact or funding agreement, in whole or in part, and assumes the responsibility to provide such PSFAs.

Residual Funds means funding that is necessary for the Department to carry out inherent Federal functions that cannot be delegated to a Tribe/Consortia by law.

Retained Tribal shares means those funds that were available as a Tribal share but under the funding agreement were left with BIA to administer.

Retrocession means the voluntary full or partial return by a Tribe/Consortium to a bureau of a PSFA operated under a funding agreement before the agreement expires.

Secretary means the Secretary of the Interior or his or her designee authorized to act on the behalf of the Secretary as to the matter at hand.

Self-determination contract means a self-determination contract entered into under 25 U.S.C. 5321.

Self-governance means the Tribal Self-Governance Program established under 25 U.S.C. 5362.

Self-governance Tribe/Consortium means a Tribe or Consortium that has been selected to participate in self-governance. May also be referred to as “participating Tribe/Consortium.”

Subsequent funding agreement means a funding agreement negotiated after a Tribe’s/Consortium’s initial agreement with a bureau.

Tribal share means the portion of all funds and resources determined for that Tribe/Consortium that supports any program within BIA, the BIE, the BTFA, or the Office of the Assistant Secretary for Indian Affairs and are not required by the Secretary for the performance of an inherent Federal function.

§ 1000.10 What is the purpose and scope of this part?

(a) *Purpose.* This part codifies uniform and consistent rules for the Department implementing title IV of the Indian Self-Determination and Education Assistance Act, Public Law 93–638, 25 U.S.C. 5361 *et seq.*, as

amended by title II of Public Law 103–413, the Tribal Self-Governance Act of 1994 (108 Stat. 4250, October 25, 1994) and title I of Public Law 116–180, the PROGRESS for Indian Tribes Act (134 Stat. 857, October 21, 2020).

(b) *Scope.* These regulations are binding on the Secretary and on Tribes/Consortia carrying out programs, services, functions, and activities (PSFAs) (or portions thereof) under title IV except as otherwise specifically authorized by a waiver under 25 U.S.C. 5369(b) and this part.

(c) *Information Collection.* The information collection requirements contained in this part have been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995, 44 U.S.C. 3507(d), and assigned control number 1076–0143. A Federal agency may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

§ 1000.15 What is the congressional policy statement of this part?

(a) *Congressional findings.* In the Act, the Congress found that:

(1) The Tribal right of self-governance flows from the inherent sovereignty of Indian Tribes and nations;

(2) The United States recognizes a special government-to-government relationship with Indian Tribes, including the right of the Tribes to self-governance, as reflected in the Constitution, treaties, Federal statutes, and the course of dealings of the United States with Indian Tribes;

(3) Although progress had been made, the Federal bureaucracy has discouraged, to some degree, the further compacting of Indian programs or hindered negotiations between the Department and Tribes for renewing self-governance compacts and funding agreements;

(4) Tribal Self-Governance was designed to improve and perpetuate the government-to-government relationship between Indian Tribes and the United States and to strengthen Tribal control over Federal funding and program management; and

(5) Congress further finds that:

(i) Transferring control over funding and decision making to Tribal governments, upon Tribal request, for Federal programs is an effective way to implement the Federal policy of government-to-government relations with Indian Tribes; and

(ii) Transferring control over funding and decision making to Tribal governments, upon request, for Federal

programs strengthens the Federal policy of Indian self-determination.

(b) *Congressional declaration of policy.* It is the policy of the Act to permanently establish and implement self-governance:

(1) To enable the United States to maintain and improve its unique and continuing relationship with, and responsibility to, Indian Tribes;

(2) To permit each Tribe to choose the extent of its participation in self-governance;

(3) To coexist with the provisions of the Indian Self-Determination and Education Assistance Act relating to the provision of Indian services by designated Federal agencies;

(4) To ensure the continuation of the trust responsibility of the United States to Indian Tribes and Indian individuals;

(5) To permit an orderly transition from Federal domination of programs and services to provide Indian Tribes with meaningful authority to plan, conduct, redesign, and administer PSFAs that meet the needs of the individual Tribal communities; and

(6) To provide for an orderly transition through a planned and measurable parallel reduction in the Federal bureaucracy.

(c) *PROGRESS Act policy.* As reflected in H. Rept. 116–422 and S. Rept. 116–34, it is the policy of the PROGRESS for Indian Tribes Act, Public Law 116–180:

(1) To clarify and streamline the Department’s process for approving self-governance compacts and funding agreements;

(2) To create similarities and administrative efficiencies between title IV and title V of Public Law 93–638, as amended; and

(3) To minimize delays to self-governance compacting or funding.

§ 1000.20 What is the Secretarial policy of this part?

In carrying out Tribal self-governance under title IV, it is the policy of the Secretary:

(a) To fully support and implement the foregoing policies to the full extent of the Secretary’s authority.

(b) To recognize and respect the unique government-to-government relationship between Tribes, as sovereign governments, and the United States.

(c) To have all bureaus of the Department work to further and protect the trust responsibility of the United States with respect to Tribes and individual Indians that exists under treaties, Executive orders, other laws, or court decisions.

(d) To have all bureaus of the Department work cooperatively and pro-

actively with Tribes/Consortia on a government-to-government basis within the framework of the Act and any other applicable provision of law, so as to make the ideals of self-determination and self-governance a reality.

(e) To have all bureaus of the Department work to streamline the process for Tribes/Consortia participating in or applying to participate in self-governance to establish administrative efficiencies and consistency with the processes under title IV and title V of Public Law 93–638, as amended.

(f) To have all bureaus of the Department actively share information with Tribes and Tribal Consortia to encourage Tribes and Tribal Consortia to become knowledgeable about the Department's programs and the opportunities to include them in a funding agreement.

(g) To interpret each Federal law and regulation, including this part, in a manner that facilitates the inclusion of programs in funding agreements and the implementation of funding agreements.

(h) That all bureaus of the Department will negotiate in good faith, to maximize implementation of the Self-Governance policy and carry out title IV and this part in a manner that maximizes the policy of Tribal self-governance.

(i) That, subject to Public Law 116–180, title I, § 101(a), Oct. 21, 2020, 134 Stat. 857, (25 U.S.C. 5361 Note), each provision of title IV and each provision of a compact or funding agreement shall be liberally construed for the benefit of the Tribe or Consortium participating in self-governance, and that any ambiguity be resolved in favor of the Tribe or Consortium to facilitate the inclusion of programs in each funding agreement authorized.

(j) To timely enter into funding agreements under title IV, whenever possible.

(k) To afford Tribes and Tribal Consortia the maximum flexibility and discretion necessary to meet the needs of their communities consistent with their diverse demographic, geographic, economic, cultural, health, social, religious, and institutional needs. This includes recognition of and support for Indigenous Knowledge, and the Tribes' and Tribal Consortia's authority to apply such knowledge when performing PSFAs under this part. These policies are designed to facilitate and encourage Tribes and Tribal Consortia to participate in the planning, conduct, and administration of those Federal programs, included, or eligible for inclusion in a funding agreement.

(l) To the extent of the Secretary's authority, to maintain active

communication with Tribal governments regarding budgetary matters applicable to programs subject to the Act, and that are included in an individual funding agreement.

(m) To implement policies, procedures, and practices at the Department to ensure that the letter, spirit, and goals of the Act are fully and successfully implemented to the maximum extent allowed by law.

(n) To ensure that Executive Order 13175 on Consultation and Coordination with Indian Tribal Governments and any subsequent Executive Orders regarding consultation will apply to the implementation of these regulations.

§ 1000.25 What is the effect on existing Tribal rights?

Nothing in this part shall be construed as:

(a) Affecting, modifying, diminishing, or otherwise impairing the sovereign immunity from suit enjoyed by Indian Tribes;

(b) Terminating, waiving, modifying, or reducing the trust responsibility of the United States to the Indian Tribe(s) or individual Indians. The Secretary must act in good faith in upholding this trust responsibility;

(c) Requiring an Indian Tribe to participate in self-governance; or

(d) Impeding awards by other Departments and agencies of the United States to Indian Tribes to administer Indian programs under any other applicable law.

§ 1000.30 What is the effect of these regulations on Federal program guidelines, manual, or policy directives?

Unless expressly agreed to by the Tribe/Consortium in a compact or funding agreement, the Tribe/Consortium shall not be subject to any agency circular, policy, manual, guidance, or rule adopted by the Department, except for the eligibility provisions of 25 U.S.C. 5324(g) and the regulations under this part to the extent a regulatory provision is not waived by the Secretary.

§ 1000.35 What happens if a court holds any provisions of these regulations in this part invalid?

If a court holds any provisions of these regulations in this part or their applicability to any person or circumstances invalid, the remainder of the regulations and their applicability to other people or circumstances are intended to operate to the fullest possible extent.

Subpart B—Selection of Additional Tribes for Participation in Tribal Self-Governance

Purpose and Definitions

§ 1000.101 What is the purpose of this subpart?

This subpart describes the selection process and eligibility criteria that the Secretary uses to decide that Indian Tribes may participate in Tribal self-governance as authorized by 25 U.S.C. 5362.

§ 1000.105 What is a “signatory”?

A signatory is a Tribe or Consortium that meets the eligibility criteria in §§ 1000.115 and 1000.125 and directly signs the agreements. A signatory may exercise all of the rights and responsibilities outlined in the compact and funding agreement and is legally responsible for all financial and administrative decisions made by the signatory.

§ 1000.110 What is a “nonsignatory Tribe”?

(a) A nonsignatory Tribe is a Tribe that either:

(1) Does not meet the eligibility criteria in §§ 1000.115 and 1000.125 and, by resolution of its governing body, authorizes a Consortium to participate in self-governance on its behalf; or

(2) Meets the eligibility criteria in §§ 1000.115 and 1000.125 but chooses to be a member of a Consortium and have a representative of the Consortium sign the compact and funding agreement on its behalf.

(b) A non-signatory Tribe under paragraph (a)(1) of this section:

(1) May not sign the compact and funding agreement. A representative of the Consortium must sign both documents on behalf of the Tribe.

(2) May only become a “signatory Tribe” if it independently meets the eligibility criteria in §§ 1000.115 and 1000.125.

Eligibility

§ 1000.115 Who may participate in Tribal self-governance?

There are two types of entities who may participate in Tribal self-governance:

- (a) Indian Tribes; and
- (b) Consortia of Indian Tribes.

§ 1000.120 How many additional Tribes/Consortia may participate in self-governance per year?

(a) The Secretary, acting through the Director of the OSG, may select not more than 50 new Indian Tribes per year from those Tribes eligible under 25 U.S.C. 5362(c) to participate in self-

governance. A Consortium of Indian Tribes counts as one Tribe for purposes of calculating the 50 additional Tribes per year.

(b) The limitation of not more than 50 new Tribes per year does not preclude a signatory Tribe from negotiating a new or amended compact or funding agreement. Such new or amended compacts or funding agreements do not count against the limitation of not more than 50 new Tribes per year.

§ 1000.125 What must a Tribe/Consortium submit to be selected to participate in Self-Governance?

The Tribe/Consortium must submit to OSG documentation that demonstrates the following:

(a) Successful completion of a planning phase as described in § 1000.140. A Consortium's planning activities satisfy this requirement for all its member Tribes for the purpose of the Consortium meeting this requirement.

(b) A request for participation in self-governance by a Tribal resolution and/or a final official action by the Tribal governing body. For a Consortium, the governing body of each Tribe must authorize its participation by a Tribal resolution and/or a final official action by the Tribal governing body that specifies the scope of the Consortium's authority to act on behalf of the Tribe.

(c) For a Tribe/Consortium required to perform an annual audit under the Single Audit Act and subpart F of 2 CFR part 200, financial stability and financial management capability as evidenced by the Tribe (or participating Tribes in a Consortium) having no uncorrected significant and material audit exceptions in the required annual audit of its self-determination or self-governance agreements with any Federal agency for the three fiscal years preceding the date on which the Tribe/Consortium requests participation, provided that documentation demonstrating the correction of any significant and material audit exceptions may include, but is not limited to, Agency Management Decision Letters issued in accordance with 2 CFR 200.521, Summary Schedule of Prior Audit Findings included in subsequent audit reports in accordance with 2 CFR 200.511, or any documentation provided by the Tribe/Consortium.

§ 1000.130 What additional information may be submitted to the Secretary to facilitate negotiations?

At the option of the Tribe/Consortium, a Tribe/Consortium may identify BIA and non-BIA programs that the Tribe/Consortium may wish to

subsequently negotiate for inclusion in a funding agreement. The inclusion of PSFAs in a funding agreement is not limited by the provision of this additional information.

§ 1000.135 May a Consortium member Tribe withdraw from the Consortium and be selected to participate in Self-Governance?

In accordance with the expressed terms of the compact or written agreement of the Consortium, a Consortium member Tribe (either a signatory or nonsignatory Tribe) may fully or partially withdraw from a participating Consortium its share of any program included in a compact or funding agreement to directly negotiate a compact and funding agreement. The withdrawing Tribe must do the following:

(a) Independently meet all of the eligibility criteria in §§ 1000.115 through 1000.140. If a Consortium's planning activities specifically consider self-governance activities for a member Tribe, that planning activity may be used to satisfy the planning requirements for the member Tribe if it applies for self-governance status on its own.

(b) Submit a notice of withdrawal to OSG and the Consortium as evidenced by a resolution of the Tribal governing body.

§ 1000.140 What is required during the "planning phase"?

The planning phase must be conducted to the satisfaction of the Tribe/Consortium and must include:

(a) Legal and budgetary research; and
(b) Internal Tribal government, planning, training, and organizational preparation related to the operation of PSFAs contemplated by the Tribe/Consortium.

§ 1000.145 When does a Tribe/Consortium have an uncorrected "significant and material audit exception"?

A Tribe/Consortium has an uncorrected significant and material audit exceptions if any of the audits that it submitted under § 1000.125(c) identifies:

(a) Significant deficiencies and material weaknesses in internal control over major programs and significant instances of abuse relating to major programs which the Tribe/Consortium has not corrected;

(b) Material noncompliance with the provisions of Federal statutes, regulations, or the terms and conditions of Federal awards related to a major program which the Tribe/Consortium has not corrected; or

(c) A single finding of known questioned costs subsequently

disallowed by a contracting officer or awarding official that exceeds \$25,000 (or such higher amount as may be established in 2 CFR 200.516).

§ 1000.150 What are the consequences of having an uncorrected significant and material audit exception?

If a Tribe/Consortium has an uncorrected significant and material audit exception, the Tribe/Consortium is ineligible to be selected to participate in self-governance until the Tribe/Consortium meets the documentation requirements in § 1000.125.

§ 1000.155 Is the Secretary required to provide technical assistance to improve a Tribe's/Consortium's internal controls?

Yes. In considering proposals by a Tribe/Consortium for participation in Self-Governance, if the Secretary determines that the Tribe/Consortium lacks adequate internal controls necessary to manage PSFAs proposed for inclusion in a compact or funding agreement under this part, the Secretary shall, as soon as practicable, provide the necessary technical assistance to assist the Tribe/Consortium in developing adequate internal controls in accordance with 25 U.S.C. 5324(q)(1).

Selection To Participate in Self-Governance

§ 1000.160 How is a Tribe/Consortium selected to participate in Self-Governance?

(a) For a Tribe not presently participating in Self Governance to be selected, the Tribe/Consortium may submit a request to the Director at any time, but no later than 180 days before the proposed effective date of the funding agreement (e.g., October 1, January 1, or such other date as the parties agree). The request must contain the documentation required in § 1000.125.

(b) OSG shall select a Tribe/Consortium to participate in self-governance upon a determination that the Tribe/Consortium has provided the required documentation in § 1000.125, consistent with 25 U.S.C. 5362(b)(1)(A).

(c) OSG shall notify the Tribe/Consortium no later than 45-days after receipt of the Tribe's/Consortium's request that the Tribe/Consortium has been selected to participate in self-governance or does not have a complete request under § 1000.185.

§ 1000.165 When does OSG accept requests to participate in Self-Governance?

OSG accepts requests at any time. A Tribe/Consortium may request a meeting or other informal discussion with the OSG before submitting its request to participate.

§ 1000.170 Are there any time frames to negotiate an initial compact or funding agreement for a Tribe not presently participating in self-governance?

Yes.

(a) Once selected to participate in self-governance, the parties should begin negotiations at least 180 days before the proposed effective date of the initial funding agreement and compact (e.g., October 1, January 1, or such other date as the parties agree in the initial funding agreement or compact).

(b) A Tribe/Consortium may be selected to participate during one year but negotiate a compact and funding agreement in a subsequent year. In this case, the Tribe/Consortium must, before the applicable period established in § 1000.160, submit to OSG documentation demonstrating continued eligibility under 25 U.S.C. 5362(c).

§ 1000.175 How does a Tribe/Consortium withdraw its request to participate in Self-Governance?

A Tribe/Consortium may withdraw its request to participate in Self-Governance by submitting a Tribal resolution or official action by the Tribal governing body to the Director of OSG.

§ 1000.180 What if more than 50 Tribes/Consortium apply to participate in Self-Governance?

The first 50 Tribes/Consortium who apply and are determined to be eligible under § 1000.160 shall have the option to begin to participate in self-governance. Any Tribe/Consortium denied participation due to the limitation in number of Tribes/Consortium is entitled to participate in the next fiscal year, provided the Tribe/Consortium remains eligible under 25 U.S.C. 5362(c).

§ 1000.185 What happens if a request is not complete?

If OSG determines that a Tribe's/Consortium's request is not complete, OSG will notify the Tribe/Consortium that the request is not complete under § 1000.125 by electronic mail and by letter, certified mail, return receipt requested no later than 45-days after receipt of the Tribe's/Consortium's request. The email and letter will explain what the Tribe/Consortium must do to complete the request.

§ 1000.190 What happens if a Tribe/Consortium is selected to participate but does not execute a compact and a funding agreement?

(a) The Tribe/Consortium remains eligible to negotiate a compact and funding agreement at any time unless:

(1) It does not satisfy the eligibility requirements under 25 U.S.C. 5362(c); or

(2) Submits a Tribal resolution or official action by the Tribal governing body to the Director, OSG requesting to withdraw its request to participate in Self-Governance.

(b) Whether or not a Tribe/Consortium executes an agreement has no effect on the selection of up to 50 new Tribes/Consortia in a subsequent year.

§ 1000.195 May a Tribe/Consortium be selected to negotiate a funding agreement under section 403(b)(2) of the Act without having or negotiating a funding agreement under 25 U.S.C. 5363(b)(1)?

Yes, a Tribe/Consortium may be selected to negotiate a funding agreement under 25 U.S.C. 5363(b)(2) without having or negotiating a funding agreement under 25 U.S.C. 5363(b)(1).

§ 1000.200 May a Tribe/Consortium be selected to negotiate a funding agreement under section 403(c) (25 U.S.C. 5363(c)) without negotiating a funding agreement under 25 U.S.C. 5363(b)(1) and/or section 403(b)(2) (25 U.S.C. 5363(b)(2))?

No, 25 U.S.C. 5363(c) of the Act states that any programs of special geographic, cultural, or historical significance to the Tribe/Consortium must be included in funding agreements negotiated under 25 U.S.C. 5363(a) and/or 25 U.S.C. 5363(b). A Tribe may be selected to negotiate a funding agreement under 25 U.S.C. 5363(c) at the same time that it negotiates a funding agreement under 25 U.S.C. 5363(b)(1) and/or 25 U.S.C. 5363(b)(2).

Withdrawal From a Consortium Funding Agreement**§ 1000.205 What happens when a Tribe wishes to withdraw from a Consortium funding agreement?**

(a) A Tribe wishing to withdraw from all or a part of a Consortium's funding agreement must notify the parties to the compact and funding agreement. The notice must:

(1) Be in the form of a Tribal resolution or other official action by the Tribal governing body; and

(2) Be received no later than 180 days before the effective date of the next Consortium funding agreement, unless the parties agree to another date.

(b) The resolution referred to in paragraph (a) of this section must indicate whether the Tribe wishes the withdrawn programs to be administered under a title IV funding agreement, title I contract, or directly by the bureau.

(c) The effective date of the withdrawal will be the date specified in the Tribal resolution and mutually

agreed upon by the parties that signed the compact and funding agreement. In the absence of a specific time set forth in the resolution, such withdrawal becomes effective on:

(1) The earlier of one year after the date of submission of the request, or the date on which the funding agreement expires; or

(2) Such date as may be mutually agreed upon by the withdrawing Tribe and the parties that signed the compact and funding agreement.

§ 1000.210 How are funds redistributed when a withdrawing Tribe fully or partially withdraws from a compact and funding agreement and enters a new contract or compact?

When a Tribe eligible to enter into a contract under title I or a compact or funding agreement under title IV fully or partially withdraws from a participating Consortium, and has proposed to enter into a contract or compact and funding agreement covering the withdrawn funds:

(a) The withdrawing Tribe is entitled to its Tribal share of funds supporting those programs that the Tribe will be carrying out under its own contract or compact and funding agreement (calculated on the same basis or methodology upon which the funds were included in the Consortium's funding agreement); and

(b) The funds referred to in paragraph (a) of this section must be transferred from the Consortium's funding agreement, on the condition that the provisions of 25 U.S.C. 5321 and 5324(i), as appropriate, apply to the withdrawing Tribe.

§ 1000.215 If the withdrawing Tribe elects to operate a program carried out under a compact and funding agreement under title IV through a contract under title I, is the resulting contract considered a mature contract under 25 U.S.C. 5304(h)?

If a Tribe withdrawing from a Consortium's funding agreement elects to operate a program carried out under a compact and funding agreement under title IV through a contract under title I, at the option of the Tribe, the resulting contract is considered a mature contract as long as the Tribe meets the requirements set forth in 25 U.S.C. 5304(h).

§ 1000.220 How are funds distributed when a withdrawing Tribe fully or partially withdraws from a Consortium's compact and funding agreement and the withdrawing Tribe does not enter a new contract or compact?

All funds not obligated by the Consortium associated with the withdrawing Tribe's returned Tribal share of funds, less close out costs, shall

be returned by the Consortium to DOI for operation of the programs included in the withdrawal.

§ 1000.225 What amount of funding is to be removed from the Consortium's funding agreement for the withdrawing Tribe?

When a Tribe withdraws from a Consortium, the Consortium's funding agreement must be reduced by the portion of funds attributable to the withdrawing Tribe. The Consortium must reduce the funding agreement on the same basis or methodology upon which the funds were included in the Consortium's funding agreement.

(a) If there is not a clear identifiable methodology upon which to base the reduction for a particular program, the parties to the compact and funding agreement must negotiate an appropriate amount on a case-by-case basis.

(b) If a Tribe withdraws in the middle of a funding year, the Consortium agreement must be amended to reflect:

(1) A reduction based on the amount of funds passed directly to the Tribe, or already spent or obligated by the Consortium on behalf of the Tribe; and

(2) That the Consortium is no longer providing those programs associated with the withdrawn funds.

(c) Unexpended funds from a previous fiscal year may be factored into the amount by which the Consortium agreement is reduced if:

(1) The parties to the compact and funding agreement and the withdrawing Tribe agree it is appropriate; and

(2) The funds are clearly identifiable.

§ 1000.230 What happens if there is a dispute between the Consortium and the withdrawing Tribe?

(a) The withdrawing Tribe and the parties to the compact and funding agreement must reach an agreement on the amount of funding and other issues associated with the program(s) involved.

(b) If agreement is not reached:

(1) For BIA Programs, the Director of OSG must make a decision on the funding or other issues involved within 45-days of the Tribe's or Consortium's written submittal of the dispute to the Director of OSG with a copy to the other party.

(2) For non-BIA Programs, the bureau head will make a decision on the funding or other issues involved.

(c) A copy of the decision made under paragraph (b) of this section must be distributed in accordance with the following table:

If the program is administered through . . .	then a copy of the decision must be sent to . . .
(1) The BIA	The BIA Regional Director, the BIA Director, the withdrawing Tribe, and the Consortium.
(2) The BIE	The BIE Associate Deputy Director, the BIE Director, the withdrawing Tribe, and the Consortium.
(3) The BTFA	The BTFA Director, the withdrawing Tribe, and the Consortium.
(4) The Office of the Assistant Secretary—Indian Affairs.	The Assistant Secretary for Indian Affairs, the withdrawing Tribe, and the Consortium.

(d) Any decision made under paragraph (b) of this section is appealable under subpart R of this part.

§ 1000.235 When a Tribe withdraws from a Consortium, is the Secretary required to award to the withdrawing Tribe a portion of funds associated with a construction project if the withdrawing Tribe so requests?

Under § 1000.205, a Tribe may withdraw from a Consortium and request that the Secretary award the Tribe its portion of a construction project's funds. The Secretary may decide not to award these funds if the Secretary determines that the award of the withdrawing Tribe's portion of funds would affect the ability of the remaining members of the Consortium to complete a severable or non-severable phase of the project within available funding.

(a) An example of a non-severable phase of a project would be the construction of a single building to serve all members of a Consortium.

(b) An example of a severable phase of a project would be the funding of a road in one village where the Consortium would be able to complete the roads in other villages that were part of the project approved initially in the funding agreement.

(c) The Secretary's decision under this section may be appealed under subpart R of this part.

Subpart C—Planning and Negotiation Grants for BIA Programs

§ 1000.301 What is the purpose of this subpart?

This subpart describes how a Tribe/Consortium seeking to begin or expand its participation in self-governance may request grants to assist with its required planning phase and to negotiate a compact and funding agreement.

§ 1000.305 Are there grants available to assist Tribes/Consortia to meet the requirements to participate in self-governance?

Yes, any Tribe/Consortium may apply, as provided in § 1000.315, for a grant to assist it to:

(a) Plan to participate in self-governance; and

(b) Negotiate the terms of the compact and funding agreement between the Tribe/Consortium and the Secretary.

§ 1000.310 What is required to request planning and negotiation grants?

A Tribe/Consortium seeking a planning or negotiation grant must submit the following:

(a) A resolution or other final action by the Tribe's/Consortium's governing body requesting to begin or expand its participation in self-governance and to receive a grant; and

(b) For a Tribe/Consortium required to perform an annual audit under the Single Audit Act and subpart F of 2 CFR part 200, evidence showing that the Tribe/Consortium has no uncorrected significant and material audit exceptions in the required annual audit of its self-determination or self-governance agreements with any Federal agency for the three fiscal years preceding its current request to participate in self-governance.

§ 1000.315 Are planning and negotiation grants available?

Subject to the availability of funds, the Department will annually publish a notice of the number of planning and negotiation grants available, an explanation of the application process for such grants, and the criteria for award. Questions may be directed to the OSG.

§ 1000.320 Must a Tribe/Consortium receive a planning or negotiation grant to be eligible to participate in self-governance?

No, a Tribe/Consortium may use other resources to meet the planning requirement and to negotiate. The award of a planning grant or a negotiation grant is not required in order to meet the planning phase requirement of the Act or to negotiate a compact or funding agreement.

§ 1000.325 What happens if there are insufficient funds to award all of the requests for planning and negotiation grants in any given year?

The Secretary must give funding priority to approved requests for negotiation grants if there are insufficient funds to award all the approved requests for planning and negotiation grants in any given year.

§ 1000.330 May a Tribe/Consortium that has received a planning grant also receive a negotiation grant?

Yes. A planning grant and a negotiation grant may be awarded to the same Tribe/Consortium in the same or separate years.

§ 1000.335 What are the Secretary's responsibilities upon a decision not to award a planning or negotiation grant?

The Secretary must communicate in writing the reasons for denying a planning or negotiation grant, and offer the Tribe/Consortium any technical assistance that might make an award possible.

§ 1000.340 May a Tribe/Consortium administratively appeal the Secretary's decision to not award a grant under this subpart?

No. The Secretary's decision to not award a grant under this subpart is final for the Department.

Subpart D—Financial Assistance for Planning and Negotiation Activities for Non-BIA Bureau Programs**§ 1000.401 What is the purpose of this subpart?**

This subpart describes additional requirements and criteria applicable to receiving financial assistance for planning and negotiating activities for a non-BIA program.

§ 1000.405 What funds are available to Tribes/Consortium for planning and negotiating activities with non-BIA bureaus?

(a) Tribes/Consortium may contact a non-BIA bureau to determine if funds may be available for the purpose of planning and negotiating activities with non-BIA bureaus under this subpart, including grants awarded pursuant to 25 U.S.C. 5362(e).

(b) Tribes/Consortium may also request information identified in § 1000.1025(b)(2).

§ 1000.410 What kinds of planning and negotiation activities for non-BIA programs does financial assistance from non-BIA bureaus support?

Financial assistance received by a Tribe/Consortium from non-BIA bureaus for planning and negotiation activities for non-BIA programs may support activities such as, but not limited to, the following:

(a) Information gathering and analysis;

(b) Planning activities, that may include notification and consultation with the appropriate non-BIA bureau and identification and/or analysis of activities, resources, and capabilities that may be needed for the Tribe/

Consortium to assume non-BIA programs; and

(c) Negotiation activities.

§ 1000.415 Who can apply to a non-BIA bureau for financial assistance to plan and negotiate non-BIA programs?

A Tribe/Consortium may apply for financial assistance to plan and negotiate non-BIA programs if the Tribe/Consortium meets the requirements of 25 U.S.C. 5362(e) and;

(a) Applied to participate in self-governance; or

(b) Has been selected to participate in self-governance; or

(c) Has negotiated and entered into an existing funding agreement.

§ 1000.420 Under what circumstances may financial assistance for planning and negotiation activities with non-BIA bureaus be awarded to Tribes/Consortia?

At the discretion of the non-BIA bureau's director/commissioner, financial assistance to plan and negotiate non-BIA programs may be awarded when requested by the Tribe/Consortium. A Tribe/Consortium may submit only one application per year for financial assistance under this section.

§ 1000.425 How does the Tribe/Consortium know when and how to apply for financial assistance for planning and negotiation activities for a non-BIA program?

Subject to the availability of funds, the Secretary will annually publish a notice in the *Federal Register* identifying the number of planning and negotiation grants available from non-BIA bureaus that includes an explanation for each non-BIA bureau describing the application process and criteria for award. The notice will identify a point-of-contact for each non-BIA bureau where questions about the grants can be directed. Notices for planning and negotiation grants for BIA programs are covered in § 1000.315.

§ 1000.430 What must be included in the application for financial assistance for planning and negotiation activities for a non-BIA program?

The application for financial assistance for planning and negotiation activities for a non-BIA program must include:

(a) Written notification by the governing body or its authorized representative of the Tribe's/Consortium's intent to engage in planning/negotiation activities like those described in § 1000.410;

(b) Written description of the planning and/or negotiation activities that the Tribe/Consortium intends to undertake, including, if appropriate, documentation of the relationship

between the proposed activities and the Tribe/Consortium;

(c) The proposed timeline for completion of the planning and/or negotiation activities to be undertaken; and

(d) The amount requested.

§ 1000.435 How will the non-BIA bureau director/commissioner award financial assistance for planning and negotiation activities for a non-BIA program?

The non-BIA bureau director/commissioner must review all applications received by the date specified in the announcement to determine whether or not the applications include the required elements outlined in the announcement. The non-BIA bureau must rank the complete applications submitted by the deadline using the criteria in the notice of funding availability.

§ 1000.440 May non-BIA bureaus provide technical assistance to a Tribe/Consortium in drafting its application?

Yes, upon request from the Tribe/Consortium and subject to the availability of resources, a non-BIA bureau may provide technical assistance to the Tribe/Consortium in the drafting of its application.

§ 1000.445 What are the non-BIA bureau director's/commissioner's responsibilities upon a decision to decline financial assistance?

The non-BIA bureau director/commissioner must communicate in writing the reasons for declining to award financial assistance and offer the Tribe/Consortium technical assistance that might make an award successful through a future application.

§ 1000.450 Can an applicant administratively appeal a decision not to award financial assistance?

No, all decisions made by the non-BIA bureau director/commissioner to award or not to award financial assistance under this subpart are final for the Department.

§ 1000.455 May a Tribe/Consortium reapply through a future planning and negotiation application if it has been previously denied?

Yes, a Tribe/Consortium may reapply through a future planning and negotiation application.

§ 1000.460 Will the non-BIA bureau notify Tribes/Consortium of the results of the selection process?

Yes, the non-BIA bureau will notify all applicant Tribes/Consortium in writing as soon as possible after completing the selection process.

Subpart E—Compacts**§ 1000.501 What is a self-governance compact?**

A self-governance compact is a legally binding and mutually enforceable written agreement that affirms the government-to-government relationship between a self-governance Tribe and the United States consistent with the trust responsibility of the Federal Government with respect to Indian Tribes that exists under treaties, Executive orders, court decisions, and other laws. The compact differs from a funding agreement in that parts of the compact apply to all bureaus within the Department rather than a single bureau.

§ 1000.505 Which DOI office negotiates self-governance compacts?

The DOI OSG negotiates self-governance compacts.

§ 1000.510 What is included in a self-governance compact?

A compact shall include general terms setting forth the government-to-government relationship consistent with the Federal Government's trust responsibility with respect to Indian Tribes that exists under treaties, Executive orders, court decisions, and other laws and such other terms as the parties intend to control during the term of the compact. Each self-governance compact must:

- (a) Specify and affirm the general terms of the government-to-government relationship between the Tribe and the Secretary;
- (b) State the general terms and conditions of the compact;
- (c) Identify the effective date of the compact;
- (d) Identify the duration of the compact; and
- (e) Include provisions that reflect the requirements of the Act in accordance with § 1000.515.

§ 1000.515 What provisions must be included in either a compact or funding agreement?

Subject to 25 U.S.C. 5365, the following must be included in either a compact or funding agreement. The Tribe/Consortium may include the following in either a compact or funding agreement:

- (a) Conflicts of interest;
- (b) Applicable cost principles and application of the Single Audit Act;
- (c) Limitations on remedies relating to cost disallowances;
- (d) For non-construction programs, authorization for the Tribe/Consortium to redesign or consolidate eligible programs and to reallocate funds for such programs;

- (e) Reassumption;
- (f) Retrocession; and
- (g) Recordkeeping.

§ 1000.520 Is a compact required to participate in self-governance?

Yes, a Tribe/Consortium must have a compact in order to participate in self-governance.

§ 1000.525 Can a Tribe/Consortium negotiate other terms and conditions?

Yes, the Secretary and a self-governance Tribe/Consortium may negotiate additional terms relating to the government-to-government relationship between the Tribe(s) and the United States consistent with the trust responsibility of the Federal Government with respect to Indian Tribes that exists under treaties, Executive orders, court decisions, and other laws. A Tribe/Consortium and the Secretary may agree to include any provision from title I of the Act, as amended, in a compact provided that the inclusion of any such provision shall be subject to, and shall not conflict with, section 101(a) of the PROGRESS for Indian Tribes Act, Pub. L. 116–180 (25 U.S.C. 5361 note).

§ 1000.530 What is the duration of a compact?

Upon approval and execution of a compact, the compact remains in effect for so long as authorized by Federal law or until terminated by mutual written agreement or retrocession or reassumption of all programs.

§ 1000.535 May a compact be amended?

A compact may be amended at any time subject to the applicable negotiation procedures contained in this part, or by written agreement of the parties.

§ 1000.540 Can a Tribe/Consortium have a funding agreement without having negotiated a compact?

No, a compact is a separate document from a funding agreement, and the compact may be negotiated prior to or at the same time as a funding agreement.

§ 1000.545 May a participating Tribe/Consortium retain its existing compact which was executed prior to the enactment of Public Law 116–180?

Yes, a participating Tribe/Consortium with a negotiated compact executed prior to October 21, 2020, the enactment of Public Law 116–180, shall have the option at any time after that date to:

- (a) Retain its existing compact, in whole or in part, to the extent that the provisions of the compact are not directly contrary to any express provision of the Act, as amended, or

(b) Negotiate a new compact in accordance with the Act.

§ 1000.550 What happens if the Tribe/Consortium and Secretary fail to reach an agreement on a compact?

If the Secretary and the Tribe/Consortium have negotiated and are unable to reach agreement, in whole or in part, on the terms of a compact then the Tribe/Consortium may submit a final offer in accordance with subpart I of this part.

Subpart F—Funding Agreements for BIA Programs**§ 1000.601 What is the purpose of this subpart?**

This subpart describes the components of funding agreements for BIA programs.

§ 1000.605 What is a funding agreement?

Funding agreements are legally binding and mutually enforceable written agreements negotiated and entered into between a self-governance Tribe/Consortium and the Secretary.

Contents and Scope of Funding Agreements**§ 1000.610 What must be included in a funding agreement?**

- (a) Each funding agreement must:
 - (1) Specify the PSFAs that the Tribe/Consortium is authorized to plan, conduct, consolidate, and administer and the responsibilities of the Secretary as outlined in § 1000.650;
 - (2) Provide for the Secretary to monitor the performance of trust functions administered by the Tribe/Consortium through the annual trust evaluation as specified in subpart O of this part;
 - (3) Provide for annual or semi-annual installments of advance payment(s), at the option of the Tribe/Consortium;
 - (4) Provide for the incorporation of required provisions of title I of Public Law 93–638, as amended, pursuant to section 201(d) of the PROGRESS for Indian Tribes Act, and for the incorporation of other provisions of title I of Public Law 93–638, as amended, at the option of the Tribe/Consortium;
 - (5) Provide for a stable base budget as outlined in §§ 1000.745 through 1000.760, at the option of the Tribe/Consortium;
 - (6) Prohibit the Secretary from waiving, modifying, or diminishing the trust responsibility of the United States;
 - (7) Specify the funding agreement's effective date;
 - (8) Prohibit the Tribe/Consortium from contracting with the Secretary for duplicative funds and/or PSFAs under title I;

(9) Provide that the Tribe/Consortium shall be eligible for new programs and new funding on the same basis as other Indian Tribes; and shall be responsible for the administration of programs in accordance with the compact or funding agreement;

(10) Provide the funding amount(s); and

(11) Include as attachments and incorporate by reference additional documents agreed upon by the parties.

(b) Subject to 25 U.S.C. 5365, the following must be included in either a compact or funding agreement. The Tribe/Consortium may include the following in either a compact or funding agreement:

(1) Conflicts of Interest;

(2) Applicable Cost Principles and application of the Single Audit Act;

(3) Limitations on remedies relating to cost disallowances;

(4) For non-construction programs, authorization for the Tribe/Consortium to redesign or consolidate programs and to reallocate funds for such programs;

(5) Reassumption;

(6) Retrocession; and

(7) Recordkeeping.

§ 1000.615 Can additional provisions be included in a funding agreement?

Yes, any provision that the parties mutually agreed upon may be included in a funding agreement.

§ 1000.620 Does a Tribe/Consortium have the right to include provisions of title I of Public Law 93–638 in a funding agreement?

Yes, a Tribe/Consortium has the right to include any provision of title I of Public Law 93–638, as amended, in a funding agreement.

§ 1000.625 What is the term of a funding agreement?

A funding agreement shall have the term mutually agreed to by the parties. Absent notification from a Tribe/Consortium that it is withdrawing or retroceding the operation of one or more programs identified in a funding agreement or by the nature of any noncontinuing PSFA contained in a funding agreement, the funding agreement shall remain in full force and effect until a subsequent funding agreement is executed.

§ 1000.630 Can a Tribe/Consortium negotiate a funding agreement with a term that exceeds one year?

Yes, at the option of the Tribe/Consortium, and subject to the availability of Congressional appropriations, a Tribe/Consortium may negotiate a funding agreement with a term that exceeds one year under 25 U.S.C. 5363(p)(4).

§ 1000.635 Does a funding agreement remain in effect after the end of its term?

Yes, the provisions of a funding agreement, including all recurring increases received and continuing eligibility for other increases, remain in full force and effect until a subsequent funding agreement is executed, including coverage of the Tribe/Consortium under the Federal Tort Claims Act (FTCA) 28 U.S.C. 2671 through 2680. Upon execution of a subsequent funding agreement, the provisions of such a funding agreement are retroactive to the term of the preceding funding agreement for purposes of calculating the amount of funding to which the Tribe/Consortium is entitled.

§ 1000.640 May a participating Tribe/Consortium retain its existing funding agreement which was executed prior to the enactment of Public Law 116–180?

Yes, a participating Tribe/Consortium with a funding agreement executed prior to October 21, 2020, the enactment of Public Law 116–180, shall have the option at any time after that date to:

(a) Retain its existing funding agreement, in whole or in part, to the extent that the funding agreement is not contrary to the Act, as amended by Public Law 116–180; or

(b) Negotiate a new funding agreement.

Determining What Programs May Be Included in a Funding Agreement

§ 1000.645 What PSFAs may be included in a funding agreement?

A Tribe/Consortium may include in its funding agreement PSFAs administered by the Secretary for the benefit of Indians because of their status as Indian, including, but not limited to those provided through the BIA, the BIE, the BTFA, the Office of the Assistant Secretary for Indian Affairs, and the Appraisal and Valuation Services Office, without regard to the agency or office of that Bureau or Office, including any PSFA identified in 25 U.S.C. 5363(b)(1).

§ 1000.650 How does the funding agreement specify the services provided, functions performed, and responsibilities assumed by the Tribe/Consortium and those retained by the Secretary?

(a) The funding agreement must specify in writing the services, functions, and responsibilities to be assumed by the Tribe/Consortium and the functions, services, and responsibilities to be retained by the Secretary.

(b) Any division of responsibilities between the Tribe/Consortium and BIA must be clearly stated in writing as part

of the funding agreement. Similarly, when there is a relationship between the program and BIA's inherent Federal functions, the relationship must be explained in the funding agreement.

§ 1000.655 May a Tribe/Consortium redesign or consolidate the programs that are included in a funding agreement and reallocate funds for such programs?

Except where a statute contains specific limitations on the use of funds, a Tribe/Consortium may redesign or consolidate programs included in a funding agreement and reallocate funds for such programs in any manner which it deems to be in the best interest of the Indian community being served, so long as the redesign or consolidation does not have the effect of denying eligibility for services to population groups otherwise eligible to be served under applicable Federal law; provided however, that a reduction in funds available for a program or service shall not be considered a denial of eligibility for services. However, redesign of construction project(s) included in a funding agreement must be done in accordance with subpart K of this part.

§ 1000.660 Do Tribes/Consortium need Secretarial approval to redesign BIA programs that the Tribe/Consortium administers under a funding agreement?

No, the Secretary does not have to approve a redesign of a program under the funding agreement, except when the redesign involves:

(a) Programs described in 25 U.S.C. 5363(b)(2) or (c); or

(b) A request to waive a regulation.

§ 1000.665 Can the terms and conditions in a funding agreement be amended during the year it is in effect?

Yes, terms and conditions in a funding agreement may be amended during the year it is in effect as agreed to by both the Tribe/Consortium and the Secretary.

Determining Funding Agreement Amounts

§ 1000.670 What funds must be transferred to a Tribe/Consortium under a funding agreement?

(a) Subject to the terms of a funding agreement, the Secretary must transfer to a Tribe/Consortium all funds provided for in the funding agreement, pursuant to 25 U.S.C. 5368. The Secretary shall provide funding for periods covered by joint resolution adopted by Congress making continuing appropriations, to the extent permitted by such resolution.

(b) At the option of the Tribe/Consortium, the Secretary must provide the following program funds to the

Tribe/Consortium through a funding agreement:

(1) An amount equal to the amount that the Tribe/Consortium would have been eligible to receive under contracts and grants for direct programs and contract support under title I of Public Law 93–638, as amended;

(2) Any funds that are specifically or functionally related to providing services and benefits to the Tribe/Consortium or its members by the Secretary without regard to the organizational level within BIA where such functions are carried out; and

(3) Any funds otherwise available to Indian Tribes or Indians for which appropriations are made to other Federal agencies and transferred to the Department as directed by law, an Interagency Agreement, or other means.

(c) Examples of the funds referred to in paragraphs (b)(1) and (2) of this section are:

(1) A Tribe's/Consortium's Public Law 93–638 contract amounts;

(2) Negotiated amounts of agency, regional and central office funds, including previously undistributed funds or new programs on the same basis as they are made available to other Tribes;

(3) Other recurring funding;

(4) Non-recurring funding;

(5) Special projects, if applicable;

(6) Construction;

(7) Wildland firefighting accounts;

(8) Competitive grants; and

(9) Congressional earmarked funding.

(d) Examples of the funds referred to in paragraph (b)(3) of this section are:

(1) Federal Highway Administration funds;

(2) Federal Transit Administration funds; and

(3) Funding pursuant to an approved plan under Public Law 102–477, as amended.

§ 1000.675 What funds may not be included in a funding agreement?

Funds associated with programs prohibited from inclusion under 25 U.S.C. 5363(m)(1) may not be included in a funding agreement.

§ 1000.680 May the Secretary place any requirements on programs and funds that are otherwise available to Tribes/Consortium or Indians for which appropriations are made to agencies other than DOI?

No, unless the Secretary is required to develop terms and conditions that are required by law or that are required by the agency to which the appropriation is made.

§ 1000.685 What funds are used to carry out inherent Federal functions?

The funds for BIA to carry out inherent Federal functions are the funds to support functions that may not legally be delegated to an Indian Tribe if all Tribes were to assume responsibilities for all BIA programs that the Act permits.

§ 1000.690 How does BIA determine the funding amount to carry out inherent Federal functions?

(a) Between October 1st and December 31st of each fiscal year, each regional and central office shall develop a document that contains its inherent Federal function information and cost calculation for that office based either on an enacted budget or Continuing Resolution budgetary guidance, and promptly distribute that document to each Tribe/Consortium served by that office.

(b) The Secretary shall amend the document throughout the year if programs are added or changed in ways that affect the inherent Federal functions directly associated with a PSFA transferred, or proposed to be transferred, into the funding agreement of the Tribe/Consortium, and distribute that revised document to any Tribe/Consortium served by that office and seeking to transfer a PSFA into a funding agreement under the Act.

(c) Once final budget amounts are known and suballocated, the Secretary will provide an updated document within 90 days to each Tribe/Consortium.

(d) Inherent Federal function information must clearly identify the legal authority that specifically precludes delegation to a Tribe/Consortium.

(e) Cost calculations must be limited to the minimum amount of funds necessary to carry out specific inherent Federal functions necessary for that office to administer PSFAs transferred to the funding agreement.

(f) The development of the document in paragraph (a) of this section must be based on the following principles:

(1) Uniformity and consistency in the identification of inherent Federal functions and in the calculation of their associated costs;

(2) The determination of inherent Federal functions in each office is based only on those inherent Federal functions actually being performed at that office; and

(3) The Secretary shall consult with Tribes/Consortium on inherent Federal function determinations and associated cost calculations at various forums,

including the Tribal Interior Budget Council (TIBC).

(g) In negotiating the amount of funds due a Tribe/Consortium in a funding agreement, the Secretary may withhold from transfer to the funding agreement only those funds to carry out inherent Federal functions associated with the PSFAs assumed in the funding agreement, unless otherwise expressly agreed to by the Tribe/Consortium in the funding agreement.

(h) Upon the request of a Tribe/Consortium, the Secretary must promptly provide a specific description of each inherent Federal function directly associated with a PSFA transferred, or proposed to be transferred, into the funding agreement of the Tribe/Consortium, along with the detailed basis for the Secretary's associated cost calculation.

§ 1000.695 Is the amount of funds withheld by the Secretary to cover the cost of inherent Federal functions subject to negotiation?

Yes, the Secretary's calculation of such costs is an appropriate subject during the negotiation of a funding agreement because it affects the amount of funds available for transfer to the funding agreement. If the Tribe/Consortium and the Secretary are unable to agree on the amount of funds to be withheld by the Secretary to cover the Secretary's expense of carrying out inherent Federal functions directly associated with the PSFAs assumed in the funding agreement, the Tribe/Consortium may exercise any of its options under 25 U.S.C. 5366(c), including the final offer process in subpart I of this part.

§ 1000.700 May a Tribe/Consortium continue to negotiate a funding agreement pending an appeal of funding amounts associated with inherent Federal functions?

Yes, pending appeal of funding amounts associated with inherent Federal functions, any Tribe/Consortium may continue to negotiate a funding agreement using the information under § 1000.690 that is being appealed. This information will be subject to later adjustment based on the final determination of a Tribe's/Consortium's appeal.

§ 1000.705 What is a Tribal share?

A Tribal share is the portion of all funds and resources determined for a particular Tribe (or Tribes within a Consortium) that support any program within BIA, BIE, BTFA, or the Office of the Assistant Secretary for Indian Affairs and are not required by the Secretary for the performance of an

inherent Federal function as described in §§ 1000.685 through 1000.695.

§ 1000.710 How does BIA determine a Tribe's/Consortium's share of funds to be included in a funding agreement?

There are typically two methods for determining the amount of funds to be included in the funding agreement:

(a) *Formula-driven.* For formula-driven programs, a Tribe's/Consortium's amount is determined by first identifying the funds for BIA to carry out inherent Federal functions and second, by applying the distribution formula to the remaining eligible funding for each program involved.

(1) Distribution formulas must be reasonably related to the function or service performed by an office, and must be consistently applied to all Tribes within each regional and agency office.

(2) The process in paragraph (a) of this section for calculating a Tribe's funding under self-governance must be consistent with the process used for calculating funds available to non-self-governance Tribes.

(b) *Tribal-specific.* For programs whose funds are not distributed on a formula basis as described in paragraph (a) of this section, a Tribe's funding amount will be determined on a Tribe-by-Tribe basis and may differ between Tribes. Examples of these funds may include special project funding, awarded competitive grants, earmarked funding, and construction or other one-time or non-recurring funding for which a Tribe is eligible.

§ 1000.715 Can a Tribe/Consortium negotiate a Tribal share for programs outside its region/agency?

Yes, where BIA services for a particular Tribe/Consortium are provided from a location outside its immediate agency or region, the Tribe may negotiate its share from the BIA location where the service is actually provided.

§ 1000.720 May a Tribe/Consortium obtain discretionary or competitive funding that is distributed on a discretionary or competitive basis?

Funds provided for Indian services/programs that have not been mandated by Congress to be distributed on a competitive/discretionary basis may be distributed to a Tribe/Consortium under a formula-driven method. In order to receive such funds, a Tribe/Consortium must be eligible and qualified to receive such funds. A Tribe/Consortium that receives such funds under a formula-driven methodology would no longer be eligible to compete for these funds.

§ 1000.725 Are all funds identified as Tribal shares always paid to the Tribe/Consortium under a funding agreement?

No, at the discretion of the Tribe/Consortium, Tribal shares may be left, in whole or in part, with BIA for certain programs. This is referred to as a "retained Tribal share."

§ 1000.730 How are savings that result from downsizing allocated?

Funds that are saved as a result of downsizing in BIA are allocated to Tribes/Consortium in the same manner as Tribal shares as provided for in § 1000.710.

§ 1000.735 Do Tribes/Consortium need Secretarial approval to reallocate funds between programs that the Tribe/Consortium administers under the funding agreement?

No, except with respect to programs described in 25 U.S.C. 5363(b)(2) or (c) or as otherwise required by law, the Secretary does not have to approve the reallocation of funds between programs that a Tribe/Consortium administers under a funding agreement. However, reallocation of funds for construction project(s) included in a funding agreement must be done in accordance with subpart K of this part.

§ 1000.740 Can funding amounts negotiated in a funding agreement be adjusted during the year it is in effect?

Yes, funding amounts negotiated in a funding agreement may be adjusted under the following circumstances:

(a) *Congressional action.* (1) Increases/decreases as a result of Congressional appropriations and/or a directive in the statement of managers accompanying a conference report on an appropriations bill or continuing resolution.

(2) General decreases due to Congressional action must be applied consistently to BIA, self-governance Tribes/Consortium, and Tribes/Consortium not participating in self-governance.

(3) General increases due to Congressional appropriations must be applied consistently, except where used to achieve equitable distribution among regions and Tribes.

(4) A Tribe/Consortium will be notified of any decrease and be provided an opportunity to reconcile.

(b) *Mistakes.* If the Tribe/Consortium or the Secretary can identify and document substantive errors in calculations, the parties will renegotiate the amounts and make every effort to correct such errors.

(c) *Mutual Agreement.* Both the Tribe/Consortium and the Secretary may agree to renegotiate amounts at any time.

Establishing Self-Governance Stable Base Budgets

§ 1000.745 What are self-governance stable base budgets?

(a) A Tribe/Consortium self-governance stable base budget is the amount of recurring funding to be transferred to the Tribe/Consortium, for a period specified in the funding agreement. This amount must be adjusted to reflect subsequent annual changes in Congressional appropriations. It includes amounts that are eligible to be base transferred or have been base transferred from BIA budget accounts to self-governance budget accounts. As allowed by Congress, self-governance stable base budgets are derived from:

(1) A Tribe's/Consortium's Public Law 93–638 contract amounts;

(2) Negotiated agency, regional, and central office amounts;

(3) Other recurring funding;

(4) Special Projects, if applicable;

(5) Programmatic shortfall;

(6) Tribal priority allocation increases and decreases;

(7) Pay costs and retirement cost adjustments; and

(8) Any other inflationary cost adjustments.

(b) Self-governance stable base budgets must not include any non-recurring program funds, construction and wildland firefighting accounts, Congressional earmarks, or other funds specifically excluded by Congress. These funds are negotiated annually and may be included in the funding agreement but must not be included in the self-governance stable base budget.

(c) Self-governance stable base budgets may not include other recurring type programs that are currently in Tribal priority allocations (TPA) such as general assistance, housing improvement program (HIP), road maintenance and contract support. Should these later four programs ever become base transferred to Tribes, then they may be included in a self-governance Tribe's stable base budget.

(d) A funding agreement shall not specify the funding associated with a program described in 25 U.S.C. 5363(b)(2) or (c) without the Secretary's agreement.

§ 1000.750 Once a Tribe/Consortium establishes a stable base budget, are funding amounts renegotiated each year?

No, unless otherwise requested by the Tribe/Consortium, these amounts are not renegotiated each year. If a Tribe/Consortium renegotiates funding levels:

(a) It must negotiate all funding levels in the funding agreement using the

process for determining funds for BIA to carry out inherent Federal functions on the same basis as other Tribes; and

(b) It is eligible for funding amounts of new programs or available programs not previously included in the funding agreement on the same basis as other Tribes.

§ 1000.755 How are self-governance stable base budgets established?

At the request of the Tribe/Consortium, a self-governance stable base budget identifying each Tribe's funding amount is included in BIA's budget justification for the following year, subject to Congressional appropriation.

§ 1000.760 How are self-governance stable base budgets adjusted?

Self-governance stable base budgets must be adjusted as follows:

(a) *Congressional action.* (1) Increases/decreases as a result of Congressional appropriations and/or a directive in the statement of managers accompanying a conference report on an appropriations bill or continuing resolution.

(2) General decreases due to Congressional action must be applied consistently to BIA, self-governance Tribes/Consortium, and Tribes/Consortium not participating in self-governance.

(3) General increases due to Congressional appropriations must be applied consistently, except where used to achieve equitable distribution among regions and Tribes.

(4) A Tribe/Consortium will be notified of any decrease and be provided an opportunity to reconcile.

(b) *Mistakes.* If the Tribe/Consortium or the Secretary can identify and document substantive errors in calculations, the parties will renegotiate such amounts and make every effort to correct the errors.

(c) *Mutual agreement.* Both the Tribe/Consortium and the Secretary may agree to renegotiate amounts at any time.

Subpart G—Funding Agreements for Non-BIA Programs

§ 1000.801 What is the purpose of this subpart?

This subpart describes program eligibility, funding, terms, and conditions of funding agreements for non-BIA programs.

§ 1000.805 What is a funding agreement for a non-BIA program?

Funding agreements for non-BIA programs are legally binding and mutually enforceable agreements between a bureau and a Tribe/

Consortium participating in the self-governance program that contain:

(a) A description of that portion or portions of a bureau program that are to be performed by the Tribe/Consortium; and

(b) Associated funding, terms and conditions under which the Tribe/Consortium will assume a program, or portion of a program.

§ 1000.810 What non-BIA programs are eligible for inclusion in a funding agreement?

Programs authorized by sections 403(b)(2) and 403(c) (25 U.S.C. 5363(b)(2) and 5363(c)), as amended, are eligible for inclusion in a funding agreement. The Secretary will publish annually a list of these programs in accordance with 25 U.S.C. 5372(c)(3) and (4).

§ 1000.815 Are there non-BIA programs for which the Secretary must negotiate for inclusion in a funding agreement subject to such terms as the parties may negotiate?

Yes, those programs, or portions thereof, that are eligible for inclusion in funding agreements under section 403(b)(2) (25 U.S.C. 5363(b)(2)).

§ 1000.820 What programs are included under section 403(b)(2) (25 U.S.C. 5363(b)(2))?

Those non-BIA programs, or portions thereof, that are eligible for inclusion in funding agreements under the Act, as amended.

§ 1000.825 What programs are included under section 403(c) (25 U.S.C. 5363(c))?

Non-BIA programs within the Department of special geographic, historical, or cultural significance to participating Tribes, individually or as members of a Consortium, are eligible for inclusion in funding agreements under section 403(c) (25 U.S.C. 5363(c)).

§ 1000.830 What does “special geographic, historical or cultural” mean?

(a) *Geographic* generally refers to all lands presently “on or near” an Indian reservation, and all other lands within “Indian country,” as defined by 18 U.S.C. 1151. In addition, “geographic” includes:

(1) Lands of former reservations;

(2) Lands on or near those conveyed or to be conveyed under the Alaska Native Claims Settlement Act (ANCSA);

(3) Judicially established aboriginal lands of a Tribe or a Consortium member or as verified by the Secretary; and

(4) Lands and waters pertaining to Indian rights in natural resources, hunting, fishing, gathering, and subsistence activities, provided or

protected by treaty or other applicable law.

(b) *Historical* generally refers to programs or lands having a particular history that is relevant to the Tribe. For example, particular trails, forts, significant sites, or educational activities that relate to the history of a particular Tribe.

(c) *Cultural* refers to programs, sites, or activities as defined by individual Tribal traditions and may include, for example:

(1) Sacred and medicinal sites;

(2) Gathering of medicines or materials such as grasses for basket weaving; or

(3) Other traditional activities, including, but not limited to, subsistence hunting, fishing, and gathering.

(d) In determining whether a Tribe/Consortium has demonstrated a non-BIA program's special geographic, historical or cultural significance to such Tribe/Consortium, the Secretary shall interpret each Federal law and regulation in a manner that will facilitate the inclusion of a program in, and the implementation of, a funding agreement.

§ 1000.835 Under section 403(b)(2) (25 U.S.C. 5363(b)(2)), when must programs be awarded non-competitively?

Non-BIA programs eligible for inclusion in funding agreements under the Act, as amended, must be awarded non-competitively.

§ 1000.840 May a non-BIA bureau include in a funding agreement, on a non-competitive basis, programs of special geographic, historical, or cultural significance?

Yes, if there is a special geographic, historical, or cultural significance to the program or activity administered by the bureau, the law affords the non-BIA bureau the discretion to include the programs or activities in a funding agreement on a non-competitive basis.

§ 1000.845 Are there any non-BIA programs that may not be included in a funding agreement?

(a) Inherently Federal functions in accordance with 25 U.S.C. 5361(6) and 5363(k).

(b) Programs where the statute establishing the existing program does not authorize the type of participation sought by the Tribe/Consortium. In determining whether a statute “does not authorize the type of participation sought by” the Tribe/Consortium within the meaning of 25 U.S.C. 5363(k), the Department shall take the following factors into consideration:

(1) Tribes need not be identified in an authorizing statute in order for a

program, or element of a program, to be included in a funding agreement;

(2) The lack of specificity in a statute by itself does not create a blanket exclusion from inclusion of a program, or element of a program, in a funding agreement; and

(3) It is not an adequate ground to refuse to compact specific functions that are not inherently Federal in character, simply because an organic statute vests an agency with generic management authority over a broad category of land.

(c) The Secretary shall interpret each Federal law and regulation in a manner that facilitates:

(1) The inclusion of programs in funding agreements; and

(2) The implementation of funding agreements.

§ 1000.850 Does a Tribe/Consortium need to be identified in an authorizing statute in order for a program or element of a program to be included in a non-BIA funding agreement?

No, the Act, as amended, favors the inclusion of a wide range of programs.

§ 1000.855 Will Tribes/Consortia participate in the Secretary's determination of what is to be included on the annual list of available programs?

Yes, the Secretary must consult each year with Tribes/Consortia participating in self-governance programs regarding which bureau programs are eligible for inclusion in funding agreements. If a Tribe/Consortium makes a written request for a program to be included on the annual list for non-BIA reporting found in subpart P of this part (§§ 1000.2010(c) and 1000.2012), the Secretary must provide a written rationale if the Secretary does not include such program.

§ 1000.860 How will the Secretary consult with Tribes/Consortia in developing the list of available programs?

(a) The Secretary shall consult with Tribes/Consortia in developing the list of available programs in accordance with subpart T of this part.

(b) In addition to the requirements in subpart T of this part:

(1) The Secretary must publish the previous year's list of available programs in accordance with 25 U.S.C. 5372(c)(3) in the **Federal Register** prior to October 1 of each year. The list must include:

(i) All of the Secretary's proposed additions and revisions for the coming year with an explanation; and

(ii) Programmatic targets detailed in § 1000.2010(e) and an initial point of contact for each bureau.

(2) If the Secretary does not plan to include a Tribal suggestion or revision

in the final published list, the Secretary must provide to such Tribe/Consortium a written explanation of reasons consistent with § 1000.855.

§ 1000.865 What else is on the list in addition to eligible programs?

The list will also include programmatic targets and an initial point of contact for each bureau. Programmatic targets will be established as part of the consultation process described in § 1000.860.

§ 1000.870 May a bureau negotiate with a Tribe/Consortium for programs not specifically included on the annual list pursuant to 25 U.S.C. 5372(c)?

Yes, the annual list will specify that bureaus will negotiate for other programs eligible under 25 U.S.C. 5363(b)(2) when requested by a Tribe/Consortium. Bureaus may negotiate for 25 U.S.C. 5363(c) programs whether or not they are on the list.

§ 1000.875 How will a bureau negotiate a funding agreement for a program of special geographic, historical, or cultural significance to more than one Tribe/Consortium?

(a) If a program is of special geographic, historical, or cultural significance to more than one Tribe/Consortium, the bureau may allocate the program among the several Tribes/Consortia through separate funding agreements or select one Tribe/Consortium with whom to negotiate a funding agreement.

(b) In making a determination under paragraph (a) of this section, the bureau will, in consultation with the affected Tribes/Consortia, consider:

(1) The special significance of each Tribe's or Consortium member's interest; and

(2) The statutory objectives being served by the bureau program.

(c) The bureau's decision will be final for the Department.

§ 1000.880 When will this determination be made?

It will occur during the pre-negotiation process, subject to the timeframes in subpart H of this part (*see e.g.*, §§ 1000.1035 and 1000.1050).

§ 1000.885 What funds are included in a non-BIA funding agreement?

Non-BIA bureaus determine the amount of funding to be included in the funding agreement using the following principles:

(a) 403(b)(2) *Programs* (25 U.S.C. 5363(b)(2)). In general, funds are provided in a funding agreement to the Tribe/Consortium in an amount equal to the amount that it is eligible to receive

under section 106 of the Act, as amended.

(b) 403(c) *Programs* (25 U.S.C. 5363(c)). (1) The funding agreement will include:

(i) Amounts equal to the direct program or project costs the bureau would have incurred were it to operate that program at the level of work mutually agreed to in the funding agreement; and:

(ii) Allowable indirect costs; and

(iii) Such amounts as the Tribe/Consortium and the Secretary may negotiate for pre-award, start-up and direct contract support costs.

(2) A bureau is not required to include management and support funds from the regional or central office level in a funding agreement, unless:

(i) The Tribe/Consortium will perform work previously performed at the regional or central office level;

(ii) The work is not compensated in the indirect cost rate; and

(iii) Including management and support costs in the funding agreement does not result in the Tribe/Consortium being paid twice for the same work when negotiated indirect cost rate is applied.

§ 1000.890 How are indirect cost rates determined?

The Department's Interior Business Center (IBC) or other cognizant Federal agency and the Tribe/Consortium negotiate indirect cost rates. These rates are based on the applicable provisions of subpart E of 2 CFR part 200, or other applicable OMB cost circular and the provisions of title I of the Act, as amended. These rates are used generally by all Federal agencies for contracts and grants with the Tribe/Consortium, including self-governance agreements.

§ 1000.895 How does the Secretary determine the amount of indirect costs for a non-BIA funding agreement?

The Secretary determines the amount of indirect costs for a non-BIA funding agreement by:

(a) Applying the negotiated indirect cost rate to the appropriate direct cost base; or

(b) At the Tribe's/Consortium's option, negotiating a lump sum amount for indirect costs.

§ 1000.900 May the bureaus negotiate terms to be included in a funding agreement for non-BIA programs?

Yes, as provided for by 25 U.S.C. 5363(b)(2) and 5363(c) and as necessary to meet program mandates while consistent with this subpart, provided, however, that a bureau may not require in a funding agreement that a Tribe/Consortium retain, hire or assign a

Federal employee in a contracted program, nor may a bureau condition its approval of a funding agreement upon a requirement that a Tribe/Consortium retain, hire or assign a Federal employee in a contracted program.

§ 1000.905 Can a Tribe/Consortium reallocate, consolidate, and redesign funds for a non-BIA program?

Yes, 25 U.S.C. 5365(d)(2) permits such reallocation, consolidation, and redesign upon joint agreement of the Secretary and the Tribe/Consortium.

§ 1000.910 Do Tribes/Consortia need Secretarial approval to reallocate funds between title I eligible programs that the Tribe/Consortium administers under a non-BIA funding agreement?

No, unless otherwise required by law, the Secretary does not have to approve the reallocation of funds with the exception of construction projects.

§ 1000.915 Can a Tribe/Consortium negotiate a funding agreement with a non-BIA bureau for which the performance period exceeds one year?

Yes, subject to the terms of the funding agreement, a Tribe/Consortium and a non-BIA bureau may agree to provide for the performance under the funding agreement to extend beyond the fiscal year. However, the Secretary may not obligate funds in excess and advance of available appropriations.

§ 1000.920 Can the terms and conditions in a non-BIA funding agreement be amended during the year it is in effect?

Yes, terms and conditions in a non-BIA funding agreement may be amended during the year it is in effect as agreed to by both the Tribe/Consortium and the Secretary.

§ 1000.925 What happens if a funding agreement expires before the effective date of the successor Funding Agreement?

If the effective date of a successor funding agreement is not on or before the expiration of the current funding agreement, subject to terms mutually agreed upon by the Tribe/Consortium and the Secretary at the time the current funding agreement was negotiated or in a subsequent amendment, the Tribe/Consortium may continue to carry out the program authorized under the funding agreement to the extent resources permit. During this extension period, the current funding agreement shall remain in effect, including coverage of the Tribe/Consortium under the Federal Tort Claims Act (FTCA) 28 U.S.C. 2671–2680 (1994); and the Tribe/Consortium may use any funds remaining under the funding agreement, savings from other programs or Tribal funds to carry out the program. Nothing

in this section authorizes a funding agreement to be continued beyond the completion of the program authorized under the funding agreement or the amended funding agreement. This section also does not entitle a Tribe/Consortium to receive, nor does it prevent a Tribe/Consortium from receiving, additional funding under any successor funding agreement. The successor funding agreement must provide funding to the Tribe/Consortium at a level necessary for the Tribe/Consortium to perform the PSFA, or portions thereof, for the full period they were or will be performed.

Subpart H—Negotiation Process

§ 1000.1001 What is the purpose of this subpart?

This subpart provides the process and timelines for negotiating a self-governance compact with the Secretary and a funding agreement with any bureau.

§ 1000.1005 What are the phases of the negotiation process?

There are two phases of the negotiation process:

- (a) The information phase; and
- (b) The negotiation phase.

§ 1000.1010 Who may initiate the information phase?

Any Tribe/Consortium that has been selected to participate in self-governance may initiate the information phase.

§ 1000.1015 Is it mandatory to go through the information phase before initiating the negotiation phase?

No, a Tribe/Consortium may go directly to the negotiation phase.

§ 1000.1020 How does a Tribe/Consortium initiate the information phase?

A Tribe/Consortium initiates the information phase by sending to the Secretary a written request clearly identified as a “Request to Initiate the Information Phase”. This request notifies the Secretary of the Tribe’s/Consortium’s interest in negotiating for a program(s) and request for information about the program(s). This request must be sent:

- (a) If in electronic form (PDF), which is the preferred method, to *SGINFORMATION-REQUEST@bia.gov*; or
- (b) If in paper form by United States Mail or express courier to Director, Office of Self-Governance, at the headquarters address indicated on the official Department, OSG website.

§ 1000.1025 What information is a Tribe/Consortium encouraged to include in a Request to Initiate the Information Phase?

(a) A Tribe/Consortium is encouraged to include the following in a Request to Initiate the Information Phase:

- (1) As specifically as possible, the program(s) for which the Tribe/Consortium is interested in negotiating under this subpart;
 - (2) The bureau, service, office, or agency (bureau) that administers the program(s) of interest;
 - (3) The scope(s) of program activity in which the Tribe/Consortium is interested;
 - (4) If applicable, a brief explanation of the cultural, historical, or geographic significance to the Tribe/Consortium of the program(s);
 - (5) A request for budget, staffing, and other locations of the offices providing administrative support;
 - (6) Other information that the Tribe/Consortium may choose to submit for the Secretary’s consideration; and
 - (7) The Tribe’s/Consortium’s designated contact.
- (b) The Tribe/Consortium may choose to request information and technical assistance in a Request to Initiate the Information Phase notice including, but not limited to:
- (1) Information that will assist the Tribe/Consortium in initiating and/or implementing the negotiation process;
 - (2) Information regarding grants or funds within the bureau, or other known possible sources of funding, that may be available to the Tribe/Consortium for planning and negotiating, or renegotiating a compact and/or funding agreement;
 - (3) Information on any funds available within the bureau, or from other sources of funding, that the Tribe/Consortium may include in the funding agreement for performing the program(s);
 - (4) Information contained in the previous year, present year, and, if available, next year’s budget proposed by the President at the national program level and the regional/local level;
 - (5) Information used to support budget allocations for the programs identified (e.g., full time equivalents and other relevant factors);
 - (6) Information used to operate and/or evaluate a program, such as statutory and regulatory requirements and program standards;
 - (7) If applicable, information regarding how a program is administered by more than one bureau, including a point of contact for information for the other bureau(s); and
 - (8) Technical assistance from the bureau in preparing documents or materials that may be required for the

Tribe/Consortium in the negotiation process.

§ 1000.1030 When should a Tribe/Consortium submit a Request to Initiate the Information Phase to the Secretary?

A Tribe/Consortium may submit a Request to Initiate the Information Phase to the Secretary at any time.

§ 1000.1035 What steps does the bureau take after a Request to Initiate the Information Phase is submitted by a Tribe/Consortium?

(a) Within 15 days of receipt of a Tribe's/Consortium's Request to Initiate the Information Phase, the bureau will respond in writing to the Tribe's/Consortium's identified point of contact and identify the person designated as the bureau's representative responsible for providing information under this subpart. The bureau representative shall in good faith fulfill the following responsibilities:

(1) In accordance with paragraph (b) of this section, provide the Tribe/Consortium with all program budget and program information from each organizational level of the bureau(s); and

(2) Notify any other bureau as required under this subpart.

(b) Within 30 calendar days of receipt of the Tribe's/Consortium's request, the bureau representative must provide to the Tribe/Consortium the information responsive to the Tribe's/Consortium's Request to Initiate the Information Phase, if otherwise consistent with the bureau's budgetary process and subject to other applicable law. Responsive information includes, at a minimum:

(1) Information regarding program, budget, staffing, and locations of the offices administering the program identified by the Tribe/Consortium and related administrative support programs; and

(2) Such other information requested by the Tribe/Consortium in its request.

(c) Upon request by a Tribe/Consortium, the bureau will provide technical assistance to the Tribe/Consortium and be available to meet with Tribal/Consortium representatives to explain the information provided and discuss other questions from the Tribe/Consortium;

(d) The bureau shall issue a written explanation if it determines it cannot provide information required under paragraph (b) of this section within the 30-day period. If a bureau makes such a determination, then the bureau must provide any other information that is reasonably related to the Tribe/Consortium's request and the date when other information, not provided within

30 days but available for disclosure to the Tribe/Consortium, can be provided;

(e) The Secretary shall provide information under this section in a manner that facilitates the inclusion of programs in funding agreements and the implementation of funding agreements (25 U.S.C. 5369);

(f) If a bureau fails to timely provide information under this subpart, the Tribe/Consortium may:

(1) File a Freedom of Information Act request. These requests shall be considered for a fee waiver under the Freedom of Information Act; and/or

(2) Appeal in accordance with subpart R of this part.

§ 1000.1040 How does a Tribe/Consortium initiate the negotiation phase?

A Tribe/Consortium initiates the negotiation phase by sending to the Secretary a written request clearly identified as a Request to Initiate the Negotiation Phase. This request notifies the Secretary of the Tribe's/Consortium's interest in negotiating for a program(s). This request must be sent:

(a) If in electronic form (PDF), which is the preferred method, to SGNEGOTIATION-REQUEST@bia.gov; or

(b) If in paper form by United States Mail or express courier to the Director, Office of Self-Governance, at the headquarters address indicated on the official Department, OSG website.

§ 1000.1045 How and when does the Secretary respond to a request to negotiate a compact or BIA funding agreement?

Within 15 days of receiving a Request to Initiate the Negotiation Phase for a compact or BIA funding agreement, OSG will respond in writing to the Tribe's/Consortium's identified point of contact and identify the person designated as the lead Federal negotiator. OSG and the Tribe/Consortium will negotiate a compact or funding agreement in accordance with applicable provisions of this part.

§ 1000.1050 How and when does the Secretary respond to a request to negotiate a non-BIA funding agreement?

Within 15 days of receiving a Tribe's/Consortium's Request to Initiate the Negotiation Phase for a non-BIA funding agreement, the Department will take the steps in this section:

(a) If the program involves multiple bureaus, the Secretary will identify the lead Federal negotiator(s);

(b) If the program is authorized for negotiations by 25 U.S.C. 5363(b)(2), the bureau will identify the lead Federal negotiator(s).

(c) If the program may be authorized for negotiations by 25 U.S.C. 5363(c),

the bureau will identify the lead Federal negotiator(s) and schedule a pre-negotiation discussion with the Tribe/Consortium as soon as possible. The purpose of the discussion is to assist the bureau in determining if the program is available for negotiation. If there is agreement that a program is eligible for inclusion in a funding agreement, the parties may jointly agree to waive this discussion.

(d) Within 10 days after convening a discussion under paragraph (c) of this section, or no later than 30 days of receipt by the Secretary of the Tribe's/Consortium's Request to Initiate the Negotiation Phase:

(1) If the program is available for inclusion in a funding agreement, the bureau will begin negotiating a non-BIA funding agreement in accordance with subpart G of this part; or

(2) If the program is unavailable for negotiation, the bureau will provide a written explanation of why the program is unavailable for inclusion in a funding agreement.

§ 1000.1055 What is the process for conducting the negotiation phase?

(a) Within 30 days of receiving a written Request to Initiate the Negotiation Phase, the bureau and the Tribe/Consortium will agree to a date to conduct an initial negotiation meeting. Subsequent meetings will be held with reasonable frequency at reasonable times.

(b) Tribe/Consortium and bureau lead negotiators must:

(1) Be authorized to negotiate on behalf of their government; and

(2) Involve all necessary persons in the negotiation process.

(c) Once negotiations have been completed, with the parties in agreement concerning all terms and conditions of a compact and/or funding agreement, the parties will acknowledge in writing the date on which agreement was reached and:

(1) The Secretary and Tribe/Consortium will finalize the compact and/or funding agreement for submission to the Tribe/Consortium within 15 days or by a mutually agreed upon date; and

(2) Upon the Secretary's receipt of a compact or funding agreement signed by the Tribe/Consortium, the Secretary will execute and return the funding agreement by a mutually agreed upon date not to exceed 45 days, and the compact by a mutually agreed upon date not to exceed 90 days.

§ 1000.1060 What issues must the bureau and the Tribe/Consortium address at negotiation meetings?

The negotiation meetings referred to in § 1000.1055 must address at a minimum the following:

- (a) The specific Tribe/Consortium proposal(s) and intentions;
- (b) Legal or program issues that the bureau or the Tribe/Consortium identify as concerns;
- (c) Options for negotiating programs and related budget amounts, including mutually agreeable options for developing alternative formats for presenting budget information to the Tribe/Consortium;
- (d) Dates for conducting and concluding negotiations;
- (e) Protocols for conducting negotiations;
- (f) Responsibility for preparation of a written summary of the discussions; and
- (g) Who will prepare an initial draft of the compact or funding agreement, as applicable.

§ 1000.1065 What happens when a compact or funding agreement is signed?

- (a) After all necessary parties have signed the compact or funding agreement, a copy is sent to the Tribe/Consortium.
- (b) No later than 90 days before the proposed effective date of an executed funding agreement, the Secretary shall forward a copy of the funding agreement to each Indian Tribe/Consortium served by the local BIA Agency office that serves any Tribe/Consortium that is a party to the funding agreement. The Secretary's obligation under 25 U.S.C. 5363(f) shall not impact the funding agreement's effective date as specified under § 1000.1075.

§ 1000.1070 What happens if the Tribe/Consortium and bureau negotiators fail to reach an agreement on a compact or funding agreement?

If the bureau and Tribe/Consortium are unable to agree, in whole or in part, on the terms of a compact or funding agreement (including funding levels) then the final offer process in subpart I of this part shall apply.

§ 1000.1075 When does the funding agreement become effective?

A funding agreement shall become effective on the date it is fully executed or as identified by its terms.

§ 1000.1080 What is a subsequent funding agreement?

A subsequent funding agreement is negotiated after a Tribe's/Consortium's existing funding agreement. The parties to the funding agreement should generally use the terms of the existing

funding agreement to expedite and simplify the exchange of information and the negotiation process.

§ 1000.1085 How is the negotiation of a subsequent funding agreement initiated?

Although a written request is desirable to document the precise request and date of the request, a written request is not mandatory. If either party anticipates a significant change in an existing program in the funding agreement, it should notify the other party of the change at the earliest possible date so that the other party may plan accordingly.

§ 1000.1090 What is the process for negotiating a subsequent funding agreement?

The Tribe/Consortium and the bureau shall use the procedures in §§ 1000.1005 through 1000.1070.

Subpart I—Final Offer**§ 1000.1101 What is the purpose of this subpart?**

This subpart explains the final offer process provided by the Act for resolving, within a specific timeframe, disputes that may develop in negotiation of compacts, funding agreements, or amendments thereof.

§ 1000.1105 When should a final offer be submitted?

The Tribe/Consortium may submit a final offer when it has determined that the Tribe/Consortium and the Secretary are unable to agree, in whole or in part, on the terms of a compact, funding agreement, or amendment (including funding levels).

§ 1000.1110 How does a Tribe/Consortium submit a final offer?

(a) A Tribe/Consortium must submit its written final offer for a compact or funding agreement, or amendment thereof:

- (1) If in electronic form (PDF), which is the preferred method, to *SGFINAL-OFFER@bia.gov* for any DOI program; or
- (2) If in paper form by United States Mail or express courier to the Director, Office of Self-Governance, at the headquarters address indicated in the official Department, OSG website.

(b) The document should be separate from the compact, funding agreement or amendment and clearly identified as a "Final Offer."

§ 1000.1115 What does a final offer contain?

A final offer must contain a description of the disagreement between the Secretary and the Tribe/Consortium, the Tribe's/Consortium's final proposal to resolve the disagreement, including

any draft proposed terms to be included in a compact, funding agreement, or amendment, and the name and contact information for the person authorized to act on behalf of the Tribe/Consortium.

§ 1000.1120 When does the 60-day review period begin?

The 60-day review period begins on the date the final offer is received at the office's mailing or email address identified in this subpart. Demonstration of receipt includes a postal return receipt, express delivery service receipt, or date stamp; all email submissions are presumed received by the Secretary no later than the next business day following transmission from the Tribe/Consortium.

§ 1000.1125 How does the Department acknowledge receipt of final offer?

- (a) Within 10 days of receipt by the officials designated by the Secretary in § 1000.1110, the Department will send the Tribe/Consortium a written acknowledgement of the final offer.
- (b) The acknowledgement reference in paragraph (a) of this section shall include:
 - (1) A statement acknowledging receipt of the final offer;
 - (2) The date the final offer was received and the last day of the applicable statutory review period;
 - (3) If applicable, the Secretary may request additional information. A request for more information has no effect on deadlines for a response under this subpart; and
 - (4) A statement notifying the Tribe/Consortium that technical assistance is available upon request to comply with paragraph (b)(3) of this section.

§ 1000.1130 May the Secretary request and obtain an extension of time of the 60-day review period?

(a) Yes, the Secretary may request an extension of time before the expiration of the 60-day review period. The Tribe/Consortium may either grant or deny the Secretary's request for an extension. To be effective, any grant of extension of time must be in writing and be signed by the person authorized by the Tribe/Consortium to grant the extension before the expiration of the 60-day review period.

(b) The deadline described in paragraph (a) of this section may be extended for any additional length of time as agreed upon in writing by the Tribe/Consortium and the Secretary, and

(c) The 60-day period may be extended up to 30 days for circumstances beyond the control of the Secretary, upon written request from the Secretary to the Tribe/Consortium.

(d) A Tribe/Consortium must respond within 10 days of receiving the Secretary's request for an extension under paragraph (c) of this section.

§ 1000.1135 What happens if the Secretary takes no action within the 60-day period (or any extensions thereof)?

The final offer is:

(a) Accepted automatically by operation of law for a compact or funding agreement provision except as to its application to a program described under 25 U.S.C. 5363(c); or

(b) Rejected automatically by operation of law with respect to any program described under 25 U.S.C. 5363(c).

§ 1000.1140 Once the Tribe/Consortium's final offer has been accepted or accepted by operation of law, what is the next step?

After the Tribe/Consortium's final offer is accepted or accepted by the operations of law, within 10 days the parties will amend the compact or funding agreement to incorporate the accepted terms of the final offer.

§ 1000.1145 On what basis may the Secretary reject a final offer?

The Secretary may reject a final offer for one of the following reasons:

(a) The amount of funds proposed in the final offer exceeds the applicable funding level to which the Tribe/Consortium is entitled under the Act;

(b) The program that is the subject of the final offer is an inherent Federal function that cannot legally be delegated to a Tribe/Consortium or is subject to discretion of the Secretary under the Act;

(c) The Tribe/Consortium cannot carry out the program in a manner that would not result in significant danger or risk to the public health or safety, to natural resources, or to trust resources;

(d) The Tribe/Consortium is not eligible to participate in self-governance under 25 U.S.C. 5362;

(e) The funding agreement would violate a Federal statute or regulation; or

(f) With respect to a program or portion of a program included in a final offer pursuant to 25 U.S.C. 5363(b)(2), the program or the portion of the program is not otherwise available under 25 U.S.C. 5321(a)(1)(E).

§ 1000.1150 How does the Secretary reject a final offer?

The Secretary rejects a final offer by providing written notice to the Tribe/Consortium based on the criteria in § 1000.1145 not more than 60 days after the receipt of a final offer, or a later date in accordance with § 1000.1130.

§ 1000.1155 What is the "significant danger" or "risk" to the public health or safety, to natural resources, or to trust resources?

A significant danger or risk is determined on a case-by-case basis in accordance with 25 U.S.C. 5366.

§ 1000.1160 Is technical assistance available to a Tribe/Consortium to overcome the objections stated in the Secretary's rejection of a final offer?

Yes, the Secretary must provide technical assistance to overcome the objection stated in the notification of the rejection of the final offer.

§ 1000.1165 If the Secretary rejects all or part of a final offer, is the Tribe/Consortium entitled to an appeal?

Yes, the Tribe/Consortium is entitled to appeal the decision of the Secretary, with an agency hearing on the record, and the right to engage in full discovery relevant to any issue raised in the matter. The procedures for appeals are found in subpart R of this part. Alternatively, at its option, the Tribe/Consortium has the right to initiate an action challenging the Secretary's decision in U.S. District Court under 25 U.S.C. 5331(a).

§ 1000.1170 Do those portions of the compact, funding agreement, or amendment not in dispute go into effect?

Yes, subject to 25 U.S.C. 5366(c)(6)(A)(iv).

§ 1000.1175 Does appealing the final offer decision prevent the Secretary and the Tribe/Consortium from entering into any accepted compact, funding agreement or amendment provisions that are not in dispute?

No, appealing the decision does not prevent the Secretary and Tribe/Consortium from entering into any accepted, severable provisions of a compact, funding agreement, or amendment that are not in dispute.

§ 1000.1180 What is the burden of proof in an appeal of a rejection of a final offer?

With respect to any appeal, hearing, or civil action, brought under this subpart, the Secretary shall have the burden of clearly demonstrating the validity of the grounds for rejecting the final offer.

Subpart J—Waiver of Regulations

§ 1000.1201 What regulations apply to Tribes/Consortia?

All regulations that govern the operation of programs included in a funding agreement apply unless waived under this subpart. To the maximum extent practical, the parties should identify these regulations in the funding agreement.

§ 1000.1205 Can the Secretary grant a waiver of regulations to a Tribe/Consortium?

Yes, a Tribe/Consortium may ask the Secretary to grant a waiver of some or all Department regulation(s) applicable to a program, in whole or in part, operated by a Tribe/Consortium under a compact or funding agreement.

§ 1000.1210 When can a Tribe/Consortium request a waiver of a regulation?

A Tribe/Consortium may request a waiver of a regulation:

(a) As part of the negotiation process;

(b) At any time after a funding agreement has been executed; or

(c) Following a denial decision, provided that the Tribe/Consortium acknowledges that the submission commences a new 120-day review period under § 1000.1240.

§ 1000.1215 How does a Tribe/Consortium obtain a waiver?

(a) A Tribe/Consortium must submit its written waiver request for any DOI compact, funding agreement, or amendment thereof:

(1) In electronic form (PDF), which is the preferred method, by email to SGWAIVER-REQUEST@bia.gov; or

(2) If in paper form by United States Mail or express courier to Director, Office of Self-Governance at the headquarters address indicated on the official Department OSG website.

(b) The waiver request, including one made under § 1000.1210(a), must be a separate document from the compact, funding agreement, or amendment and clearly identified as a "Waiver Request."

§ 1000.1220 How does a Tribe/Consortium operating a Public Law 102–477 Plan obtain a waiver?

(a) For a waiver request involving any program that has been integrated under an approved plan authorized by Public Law 102–477, as amended, or proposed to be integrated under a Public Law 102–477 plan, the Tribe must submit the request to the BIA—Division of Workforce Development.

(b) The provisions of 25 U.S.C. 3406 (b), *et seq.*, governing submission, review, decision, dispute resolution, and appeal apply to a waiver request submitted under paragraph (a) of this section.

(c) If a waiver of regulations had been previously obtained for a program administered by the Department that is later integrated into a plan authorized by Public Law 102–477, such waiver of regulations will continue to be in effect.

§ 1000.1225 May a Tribe/Consortium request an optional meeting or other informal discussion to discuss a waiver request?

(a) Yes, a Tribe/Consortium may request an optional meeting or other informal discussion with the appropriate bureau official(s).

(b) To provide reasonable time for consideration, the Tribe/Consortium may request a meeting or other informal discussion to be held with the appropriate bureau official(s) no less than 30 days before the end of the 120-day period, unless the parties agree on another date.

(c) For all purposes relating to these meeting or informal discussion procedures, the parties are the designated representatives of the Tribe/Consortium and the appropriate bureau official(s) from whom the waiver is requested.

§ 1000.1230 Is a bureau required to provide technical assistance to a Tribe/Consortium concerning waivers?

Yes.

(a) *Prior to submission of a waiver request.* A Tribe/Consortium considering a waiver request under this part may request, and a bureau shall provide, technical assistance to assist the Tribe/Consortium to prepare and submit the waiver request.

(b) *After submission of a waiver request.* Not later than 60 days after receipt of a Tribe's/Consortium's waiver request, unless the parties agree on another date, a bureau shall, if applicable:

(1) Provide technical assistance to overcome any objection which the bureau might have to the request while a waiver request is under consideration; and/or

(2) Identify additional information that may assist the bureau in making a decision.

§ 1000.1235 How does the Secretary respond to a waiver request?

Within 10 business days of receipt, the officials designated by the Secretary in § 1000.1215 will email to the Tribe/Consortium a letter:

(a) Acknowledging receipt of the waiver request; and

(b) Identifying the date the waiver request was received and the last day of the applicable statutory review period.

§ 1000.1240 When must the Secretary make a decision on a waiver request?

(a) Not later than 120 days after receipt of a waiver request by the Secretary and the Secretary's designated officials in accordance with § 1000.1215.

(b) This 120-day period may be extended for any length of time, as

agreed upon by both the Tribe/Consortium and the Secretary.

§ 1000.1245 How does the Secretary make a decision on the waiver request?

(a) The Secretary must issue a written decision explaining the rationale for denying or approving the requested waiver.

(b) If the Secretary issues a written decision denying the requested waiver, it must describe the basis for the specific finding that the identified text in the regulation may not be waived because such a waiver is prohibited by Federal law.

(c) The decision is final for the Department.

§ 1000.1250 What happens if the Secretary neither approves nor denies a waiver request within the time specified in § 1000.1240?

If the Secretary fails to make a determination with respect to a waiver request within the period specified in § 1000.1240 (including any extension agreed to under that section), the waiver request is automatically, by operation of law,

(a) Deemed approved except for programs eligible under section 403(b)(2) or section 403(c) (25 U.S.C. 5363(b)(2) or 5363(c)), as amended; or

(b) Deemed denied with respect to programs eligible under section 403(b)(2) or section 403(c) (25 U.S.C. 5363(b)(2) or 5363(c)), as amended. Such deemed denial is a final decision for the Department.

§ 1000.1255 May a Tribe/Consortium appeal the Secretary's decision to deny its request for a waiver of a regulation?

Yes, the Tribe/Consortium may appeal the Secretary's decision consistent with applicable law, including 25 U.S.C. 5331. The burden of proof shall be as set forth in § 1000.2315.

§ 1000.1260 What is the term of a waiver?

Upon approval, a waiver is deemed approved until such time as rescinded by the Tribe/Consortium.

§ 1000.1265 May a Tribe/Consortium withdraw a waiver request?

Yes. If a Tribe/Consortium chooses to withdraw a waiver request before the Secretary makes a decision, it must do so in writing prior to the end of the 120-day time frame.

§ 1000.1270 May a Tribe/Consortium have more than one waiver request pending before the Secretary at the same time?

Yes. A Tribe/Consortium may have more than one waiver request pending before the Secretary at the same time,

provided that each waiver request affects a different regulatory provision.

§ 1000.1275 May a Tribe/Consortium continue to negotiate a funding agreement pending final decision on a waiver request?

Yes, pending final decision on a waiver request, any Tribe/Consortium may continue to negotiate and implement a funding agreement. The regulation will apply until it is waived. The funding agreement will be subject to later adjustment based on an affirmative final decision on the Tribe's/Consortium's waiver request.

§ 1000.1280 How is a waiver decision documented for the record?

The waiver approval is made part of the funding agreement by attaching a copy of it to the funding agreement and by mutually executing any necessary conforming amendments to the funding agreement. The waiver requests and bureau's decision document(s), pursuant to § 1000.1245, will be posted and archived on the OSG website or successor technology within 30 days of the decision. Such posting/archiving shall include deemed approved and deemed denied decisions under § 1000.1250. All decisions shall be made available on request, and a summary of decisions will be included in the Self Governance Annual Report to Congress.

Subpart K—Construction*Construction Definitions***§ 1000.1301 What key construction terms do I need to know?**

Budget means a statement of the funds required to complete the scope of work in a construction project. For cost reimbursement agreements, budgets may be stated using broad categories such as planning, design, construction, project administration, and contingency. For fixed price agreements, budgets may be stated as lump sums, unit cost pricing, or a combination thereof.

Construction management services (CMS) means activities limited to administrative support services; coordination; and monitoring oversight of the planning, design, and construction process. CMS activities typically include:

(1) Coordination and information exchange between the Tribe/Consortium and the Federal Government;

(2) Preparation of a Tribe's/Consortium's project agreement; and

(3) A Tribe's/Consortium's subcontract scope of work identification and subcontract preparation, and competitive selection of construction contract subcontractors.

Construction phase is the phase of a construction project during which the

project is constructed, and includes labor, materials, equipment and services necessary to complete the work, in accordance with the construction project agreement.

Construction program or construction project means a Tribal undertaking relating to the administration, planning, environmental determination, design, construction, repair, improvement, or expansion of roads, bridges, buildings, structures, systems, or other facilities for purposes of housing, law enforcement, detention, sanitation, water supply, education, administration, community, health, irrigation, agriculture, conservation, flood control, transportation, or port facilities, or for other Tribal purposes.

Construction project agreement means a negotiated agreement between the Secretary and a Tribe/Consortium, that at a minimum:

(1) Establishes project phase start and completion dates, which may extend over a period of one or more years;

(2) Provides a general description of the project, including the scope of work, references to design criteria and standards by which it will be accomplished, and other terms and conditions;

(3) Identifies the responsibilities of the Tribe/Consortium and the Secretary;

(4) Addresses how project-related environmental considerations will be addressed;

(5) Identifies the owner and operations and maintenance entity of the proposed work;

(6) Provides a budget;

(7) Provides a payment process;

(8) Establishes the duration of the agreement based on the time necessary to complete the specified scope of work, which may be one or more years; and

(9) Identifies the agreement of the Secretary and Tribe/Consortium over which entity will bear any additional costs necessary to meet changes in scope, or errors or omissions in design and construction.

Design phase is the phase of a construction project during which project plans, specifications, and other documents are prepared that are used to construct the project. Site investigation, final site selection and environmental review and determination activities are completed in this phase if not conducted as part of the planning phase.

NEPA means the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*).

NHPA means the National Historic Preservation Act (16 U.S.C. 470 *et seq.*).

Planning phase is the phase of a construction project agreement during which planning services are provided.

Planning services may include performing a needs assessment, completing and/or verifying master plans, developing justification documents, conducting pre-design site investigations, developing budget cost estimates, conducting feasibility studies as needed, conducting environmental review activities and justifying the need for the project.

SHPO means State Historic Preservation Officer.

Scope of work or specific scope of work means a brief written description of the work to be accomplished under the construction project, sufficient to confirm that the project is consistent with the purpose for which the Secretary has allocated funds.

THPO means Tribal Historic Preservation Officer.

Purpose and Scope

§ 1000.1305 What construction projects and programs included in a funding agreement or construction project agreement are subject to this subpart?

(a) All construction programs and construction projects included in a funding agreement under title IV are subject to this subpart.

(b) The following programs and activities are not construction programs and activities for the purposes of this subpart:

(1) Activities limited to providing planning services, administrative support services, coordination, responsibility for the construction project, site-management and administration of the project, which may include cost management, project budgeting, project scheduling and procurement.

(2) The BIA Housing Improvement Program;

(3) The BIA Road Maintenance Program and other road maintenance activities as maintenance is defined by 23 U.S.C. 101;

(4) Operation and maintenance programs;

(5) Projects using funds transferred under an approved Public Law 102–477 plan; and

(6) Non-403(c) Programs that are less than \$100,000, subject to 25 U.S.C. 5363(e)(2), other applicable Federal law, and § 1000.1515.

§ 1000.1306 May a program or project-specific grant or contracting mechanism involving construction and related activities satisfy the requirements of this subpart?

Yes, program or project-specific contracting mechanisms or agreements involving construction and related activities will satisfy the requirements of this subpart and may be incorporated

into the Tribe/Consortium's funding agreement, provided that such program or project-specific contracting mechanism or agreement addresses all the requirements of 25 U.S.C. 5367 that are applicable to the construction program or project. Nothing herein shall require the Secretary to duplicate the Federal requirements of 25 U.S.C. 5367 that are applicable to the project in the program or project-specific contracting mechanism or agreement.

§ 1000.1307 May the Secretary accept funds from another Department for a program or project involving construction and related activities for transfer to the Tribe/Consortium under its funding agreement or construction project agreement?

Yes, the Secretary may accept funds from another Department for a program or project involving construction and related activities for transfer to the Tribe/Consortium under its funding agreement or construction project agreement, subject to an interagency agreement between the Secretary and the Federal agency, with the concurrence of the Tribe/Consortium before such interagency agreement is finalized, that addresses the purpose, intent, Federal oversight and other responsibilities for the construction program or project, and related activities.

§ 1000.1310 What alternatives are available for a Tribe/Consortium to perform a construction program or project?

(a) As authorized by 25 U.S.C. 5367(g), and at the option of the Tribe/Consortium, construction project funding proposals shall be negotiated with the Secretary pursuant to the statutory process in 25 U.S.C. 5324, and any resulting agreement shall be incorporated into the funding agreement as an “addendum”; or

(b) A Tribe/Consortium may negotiate a construction project with the Secretary pursuant to the statutory process in 25 U.S.C. 5324, and incorporate any resulting construction project agreement into a separate title I construction contract and funding agreement subject to title I and the part 900 regulations, including subpart J (Construction) of part 900. Such construction project shall not be subject to this subpart.

§ 1000.1315 Does this subpart create an agency relationship?

No, a BIA or non-BIA construction program or project does not automatically create an agency relationship. However, Federal law, provisions of a funding agreement, or Federal actions may create an agency relationship.

*Notification and Project Assumption***§ 1000.1320 Is the Secretary required to consult with affected Tribes/Consortia concerning construction projects and programs?**

Yes, before developing a new project resource allocation methodology and application process the Secretary must consult with all Indian Tribes/Consortia as set forth in subpart I of this part.

§ 1000.1325 When does the Secretary confer with a Tribe/Consortium concerning Tribal preferences as to size, location, type, and other characteristics of a project?

Before spending any funds for planning, design, construction, or renovation projects, whether or not subject to a competitive application and ranking process, the Secretary must confer with any Indian Tribe/Consortium that would be significantly affected by the expenditure to determine and honor Tribal preferences whenever practicable concerning the size, location, type, and other characteristics of the project.

§ 1000.1330 What does a Tribe/Consortium do if it wants to perform a construction project or program under 25 U.S.C. 5367?

(a) A Tribe/Consortium may start the process of developing a construction project proposal to include in a funding agreement or construction project agreement by:

(1) Notifying the Secretary in writing that the Tribe/Consortium wishes to perform one or more construction projects under 25 U.S.C. 5367; or

(2) Submitting a proposed construction project agreement for consideration and negotiation, or

(3) A combination of the actions described in paragraphs (a)(1) and (2) of this section.

(b) Within 30 days after receiving a request from a Tribe/Consortium, the Secretary and the Tribe/Consortium shall exchange all applicable information available to each party about the project including, but not limited to, planning, construction drawings, maps, engineering reports, design reports, plans of requirements, cost estimates, environmental assessments, or environmental impact reports and archaeological reports.

§ 1000.1335 What must a Tribal proposal for a construction program or project contain?

A construction project proposal must contain all of the required elements of a construction project contained in § 1000.1355. In addition to these minimum requirements, a Tribe/Consortium may include additional items for negotiation.

§ 1000.1340 May multiple projects be included in a single construction project agreement or funding agreement that includes a construction project?

Yes, a Tribe/Consortium may include multiple projects in a single funding agreement or construction project agreement if funded by the same bureau, or may add additional projects by amendment(s) to an existing funding agreement or construction project agreement with the same bureau.

§ 1000.1345 Must a construction project proposal incorporate provisions of Federal construction guidelines and manuals?

(a) No, the Tribe/Consortium and the Secretary must agree upon and specify appropriate building codes and architectural and engineering standards (including health and safety) which must be in conformity with nationally recognized standards for comparable projects as long as they meet or exceed the requirements of 25 U.S.C. 5367(d).

(b) The Secretary may provide, or the Tribe/Consortium may request, Federal construction guidelines and manuals for consideration by the Tribe/Consortium in the preparation of its construction project proposal. If Tribal construction codes and standards (including national, regional, State, or Tribal building codes or contrition industry standards) that meet or exceed otherwise applicable standards, the Secretary must accept the Tribally proposed standards.

§ 1000.1350 What provisions relating to a construction project or program may be included in a funding agreement or construction project agreement?

Unless otherwise agreed to in writing by a Tribe/Consortium, no provision of title 41, United States Code, the Federal Acquisition Regulations, or any other law or regulation pertaining to Federal procurement, shall apply to any construction program or project carried out under title IV of the Act. Absent a negotiated agreement, such provisions and regulatory requirements do not apply.

§ 1000.1355 What provisions must a Tribe/Consortium include in a construction project agreement or funding agreement that contains a construction project or program?

(a) For each construction project or program carried out by the Tribe/Consortium under 25 U.S.C. 5367, the Tribe/Consortium and the Secretary shall negotiate a provision in the construction project agreement or funding agreement that identifies:

(1) The approximate start and completion dates for the project, which may extend over a period of one or more years;

(2) A general description of the project, including the scope of work, references to design criteria, and other terms and conditions;

(3) The responsibilities of the Tribe/Consortium for the project;

(4) How project-related environmental considerations will be addressed;

(5) The amount of Federal funds provided for the project;

(6) The terms and conditions by which funding for the project, including contingency funds, will be paid to the Tribe/Consortium by the Secretary;

(7) The obligations of the Tribe/Consortium to comply with the applicable codes and standards referenced in 25 U.S.C. 5367(d) and applicable Federal laws and regulations;

(8) The agreement of the parties over who will bear any additional costs necessary to meet changes in scope, or errors or omissions in design and construction;

(9) The entity responsible to issue any Certificate of Occupancy, if applicable; and

(10) Other terms and conditions the parties mutually agree upon.

(b) The Tribe/Consortium shall include in the construction project agreement or funding agreement that includes a construction project or program a provision for the submission to the Secretary of progress reports and financial status reports not less than semi-annually commencing after funding for the project is received by the Tribe/Consortium and continuing until the construction of the project is complete.

*Requirements and Standards***§ 1000.1360 What codes, standards and architects and engineers must a Tribe/Consortium use when performing a construction project under this part?**

In carrying out a construction project under this subpart, a Tribe/Consortium must:

(a) Adhere to applicable Federal, State, local, and Tribal building codes, architectural and engineering standards, and applicable Federal guidelines regarding design, space, and operational standards, appropriate for the particular project; and

(b) Use only architects and engineers who:

(1) Are licensed to practice in the State in which the facility will be built; and

(2) Certify that:

(i) They are qualified to perform the work required by the specific construction involved; and

(ii) Upon completion of design, the plans, and specifications meet or exceed the applicable construction and safety codes.

NEPA Process

§ 1000.1365 Are Tribes/Consortia required to carry out activities involving NEPA in order to enter into a construction project agreement?

No, Tribes/Consortia are not required to carry out any activities involving NEPA in order to enter into a construction project agreement.

§ 1000.1370 How may a Tribe/Consortium elect to assume some Federal responsibilities under NEPA?

(a) A Tribe/Consortium may, subject to the agreement of the Secretary, elect to assume some Federal responsibilities under NEPA, NHPA, and related provisions of other laws and regulations that would apply if the Secretary were to undertake a construction project by adopting a resolution:

(1) Designating a certifying Tribal officer to represent the Indian Tribe and to assume the status of a responsible Federal official under those Acts, laws, or regulations; and

(2) Accepting the jurisdiction of the United States courts for the purpose of enforcing the responsibilities of the certifying Tribal officer assuming the status of a responsible Federal official under those Acts, laws, or regulations.

(b) Notwithstanding paragraph (a) of this section, nothing in this section authorizes the Secretary to include in any compact or funding agreement duties of the Secretary under NEPA, NHPA, and other related provisions of law that are inherent Federal functions.

§ 1000.1375 How may a Tribe/Consortium carry out activities involving NEPA without assuming some Federal responsibilities?

A Tribe/Consortium may elect to carry out some or all activities involving development and preparation of applicable documentation under NEPA, NHPA and related provisions of other laws and regulations for final review and approval by the Secretary.

§ 1000.1379 Are Tribes/Consortia required to adopt a separate resolution or take equivalent Tribal action to assume some environmental responsibilities of the Secretary under NEPA, NHPA, and related laws and regulations for each construction project?

No, the Tribe/Consortium may adopt a single resolution or take equivalent Tribal action to assume some environmental responsibilities of the Secretary for NEPA, NHPA, and related laws and regulations for a single project, multiple projects, a class of projects, or all projects performed under 25 U.S.C. 5367.

§ 1000.1380 What additional provisions of law are related to NEPA and NHPA?

(a) Depending upon the nature and the location of the construction project, environmental laws related to NEPA and NHPA may include:

(1) Archaeological and Historical Data Preservation Act (54 U.S.C. 3120501 through 3120508);

(2) Archeological Resources Protection Act (16 U.S.C. 470aa *et seq.*);

(3) Clean Air Act (42 U.S.C. 7401 *et seq.*);

(4) Clean Water Act (33 U.S.C. 1251 *et seq.*);

(5) Coastal Barrier Improvement Act (16 U.S.C. 3501 *et seq.*);

(6) Coastal Barrier Resources Act (16 U.S.C. 3501 *et seq.*);

(7) Coastal Zone Management Act (16 U.S.C. 1451 *et seq.*);

(8) Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. 9601 *et seq.*);

(9) Endangered Species Act (16 U.S.C. 1531 *et seq.*);

(10) Farmland Protection Policy Act (7 U.S.C. 4201 *et seq.*);

(11) Marine Protection, Research, and Sanctuaries Act (33 U.S.C. 1401 through 1445; 16 U.S.C. 1431 through 1447F; 33 U.S.C. 2801 through 2805);

(12) National Trails System Act (16 U.S.C. 1241 *et seq.*);

(13) Native American Graves Protection and Repatriation Act (25 U.S.C. 3001 *et seq.*);

(14) Noise Control Act (42 U.S.C. 4901 *et seq.*);

(15) Resource Conservation and Recovery Act (42 U.S.C. 6901 *et seq.*);

(16) Safe Drinking Water Act (42 U.S.C. 300f *et seq.*);

(17) Toxic Substance Control Act (15 U.S.C. 2601 *et seq.*);

(18) Wild and Scenic Rivers Act (16 U.S.C. 1271 *et seq.*); and

(19) Wilderness Act (16 U.S.C. 1131 *et seq.*)

(b) This section provides a list of environmental laws for informational purposes only and does not create any legal rights or remedies, or imply private rights of action.

§ 1000.1385 What is the typical environmental review process for construction projects?

(a) During the environmental review process, the following activities may occur:

(1) Consult with appropriate Tribal, Federal, state, local officials, and interested parties on potential environmental effects;

(2) Document assessment of reasonably foreseeable environmental effects;

(3) Perform necessary environmental surveys and inventories;

(4) Consult with the Advisory Council on Historic Preservation, acting through the SHPO or THPO, to ensure compliance with the NHPA;

(5) In applying a categorical exclusion under NEPA, evaluate whether extraordinary circumstances exist in which a normally excluded project may have a significant effect, and therefore require preparation of an environmental assessment or environmental impact statement;

(6) Identify methods to avoid or mitigate potential adverse effects; and

(7) Obtain environmental permits and approvals as required.

(b) This section is for informational purposes only and does not create any legal rights or remedies, or imply private rights of action.

§ 1000.1390 Is the Secretary required to take into account the Indigenous Knowledge of Tribes/Consortia when preparing environmental studies under NEPA, NHPA, and related provisions of other law and regulations?

Yes, Council on Environmental Quality (CEQ) regulations direct agencies to make use of high-quality information including reliable data and resources, models, and Indigenous Knowledge, in carrying out their responsibilities under NEPA. The Secretary recognizes that Tribes/Consortia hold relevant information and perspectives regarding the environment, and Indigenous Knowledge can inform the Secretary's environmental analysis. Similarly, section 106 of NHPA (54 U.S.C. 306108) establishes a process to ensure that the Secretary take into account the effects of a project the Department carries out, licenses, or assists on historic properties.

§ 1000.1395 May a Tribe/Consortium act as a cooperating agency or joint lead agency for environmental review purposes regardless of whether it exercises its option under § 1000.1370(a)(1)?

Yes, consistent with 40 CFR 1501.7(b) and 1501.8, a Tribe/Consortium may act as a cooperating agency or joint lead agency for environmental review purposes under this part. For informational purposes only, the term "cooperating agency" is defined at 40 CFR 1508.1(g) and the criteria for a Tribe/Consortium to act as a "cooperating agency" are set out in 40 CFR 1501.8 and Department regulations at 43 CFR 46.225, respectively.

§ 1000.1400 How does a Tribe/Consortium comply with NEPA and NHPA?

(a) A Tribe/Consortium complies with NEPA and NHPA by:

(1) Developing and adopting their own environmental review procedures

that meet or exceed applicable Federal requirements;

(2) Adopting the procedures of the Secretary; or

(3) Adopting the procedures of another Federal agency.

(b) The Tribe/Consortium shall reference such procedures in the funding agreement or construction project agreement and use such procedures in undertaking the project.

§ 1000.1405 If a Tribe/Consortium adopts the environmental review procedures of a Federal agency, is the Tribe/Consortium responsible for ensuring the agency's policies and procedures meet the requirements of NEPA, NHPA, and related environmental laws?

No, the Federal agency is responsible for ensuring its own policies and procedures meet the requirements of NEPA, NHPA, and related environmental laws, not the Tribe/Consortium.

§ 1000.1410 Are Federal funds available to cover the cost of Tribes/Consortia carrying out environmental responsibilities?

Yes, funds are available:

(a) For project-specific environmental costs through the construction project agreement or funding agreement that includes the construction project; and

(b) For environmental review program costs through a funding agreement and/or a construction project agreement.

§ 1000.1415 How are project and program environmental review costs identified?

(a) The Tribe/Consortium and the Secretary shall work together during the initial stages of project development to identify program and project related costs associated with carrying out environmental responsibilities for proposed projects. The goal in this process is to identify the costs associated with all foreseeable environmental review activities.

(b) If unforeseen environmental review and compliance costs are identified during the performance of the construction project, the Tribe/Consortium or, at the request of the Tribe/Consortium, the Tribe/Consortium and Secretary may do one or more of the following:

(1) Mitigate adverse environmental effects;

(2) Alter the project scope of work; and/or

(3) Add additional program and/or project funding, including seeking supplemental appropriations.

§ 1000.1420 What costs may be included in the budget for a construction project or program?

(a) A Tribe/Consortium may include costs allowed by applicable provisions

of subpart E of 2 CFR part 200, and costs allowed under 25 U.S.C. 5367, 25 U.S.C. 5325 and 25 U.S.C. 5324(m). The cost incurred will vary depending on which phase of the construction process the Tribe/Consortium is conducting and type of construction project agreement that will be used.

(b) Regardless of whether a construction project agreement or funding agreement that includes a construction project is fixed priced or cost-reimbursement, budgets may include costs or fees associated with the following:

(1) Construction project proposal preparation;

(2) Conducting community meetings to develop project documents;

(3) Architects, engineers, and other consultants to prepare project planning documents, to develop project plans and specifications, and to assist in oversight of the design during construction;

(4) Real property lease or acquisition;

(5) Development of project surveys including topographical surveys, site boundary descriptions, geotechnical surveys, archeological surveys, and NEPA compliance;

(6) Project management, superintendence, safety, and inspection;

(7) Travel, including local travel incurred as a direct result of conducting the construction project agreement and remote travel in conjunction with the project;

(8) Consultants, such as demographic consultants, planning consultants, attorneys, accountants, and personnel who provide services, to include construction management services;

(9) Project site development;

(10) Project construction cost;

(11) General, administrative overhead, and indirect costs;

(12) Securing and installing moveable equipment, telecommunications and data processing equipment, furnishings, including works of art, and special purpose equipment when part of a construction contract;

(12) Other costs directly related to performing the construction project;

(13) Project Contingency;

(i) A cost-reimbursement project agreement budgets contingency as a broad category. Project contingency remaining at the end of the project is considered savings.

(ii) Fixed-price agreements budget project contingency in the lump sum price or unit price.

(c) In the case of a fixed-price project agreement, a reasonable profit determined by taking into consideration the relevant risks and local market conditions.

§ 1000.1425 May the Secretary reject a Tribe's/Consortium's final offer of a construction project proposal submitted under subpart I of this part based on a determination of Tribal capacity or capability?

No, the Secretary may not reject a Tribe's/Consortium's final offer of a construction project based on a determination of Tribal capacity or capability.

§ 1000.1430 On what basis may the Secretary reject a final offer of a construction project proposal made by a Tribe/Consortium?

As described in subpart I of this part, rejection of a final offer by the Secretary for a construction project must be based on a specific finding by the Secretary that clearly demonstrates, or that is supported by a controlling legal authority, that one or more of the statutory criteria under 25 U.S.C. 5366(c)(6) exist to reject the final offer.

Role of the Secretary

§ 1000.1435 What is the Secretary's role in a construction project performed under this subpart?

The Secretary has the following role regarding a construction program or project contained in a funding agreement or construction project agreement:

(a) On a schedule negotiated by the Secretary and the Tribe/Consortium, to ensure health and safety standards and compliance with Federal law, the Secretary shall review and verify, to the satisfaction of the Secretary:

(1) That project planning and documents prepared by the Tribe/Consortium in advance of initial construction are in conformity with the obligations of the Tribe/Consortium under 25 U.S.C. 5367(d); and

(2) Before the project planning and design documents are implemented, that subsequent document amendments that result in a significant change in construction are in conformity with the obligations of the Tribe/Consortium under 25 U.S.C. 5367(d).

(b) Where no time is otherwise specified in a funding agreement or construction project agreement, the Secretary shall complete the review and verification of project documents required under 25 U.S.C. 5367(h) and provide a Tribe/Consortium a written response within 30 days of the Secretary's receipt from the Tribe/Consortium of project planning and design documents. Absent a written response by the Secretary within the 30-day period, the project planning and design documents, or amendments to such documents, shall be deemed to be

conformity with the Tribe's obligations under 25 U.S.C. 5367(d).

(c) The Secretary must approve any proposed changes in the construction project that require;

(1) An increase in the negotiated funding amount; or

(2) An increase in the negotiated performance period; or

(3) A significant departure from the scope or objective of the construction program as agreed to in the funding agreement or construction project agreement.

(d) A Tribe/Consortium may make immaterial changes to the performance period and make budget adjustments within available Federal funding without an amendment to the funding agreement or construction project agreement.

(e) The Secretary may conduct onsite project oversight visits semiannually or on an alternate schedule agreed to by the Secretary and the Tribe/Consortium. The Secretary must provide the Tribe/Consortium with reasonable advance written notice to assist the Tribe/Consortium in coordinating the visit. The purpose of the visit is to review the progress under the construction project agreement or funding agreement. At the request of the Tribe/Consortium, the Secretary must provide the Tribe/Consortium a written site visit report;

(f) Where the Secretary and the Tribe/Consortium share construction project or program activities, the Secretary and Tribe/Consortium shall provide for the exchange of information;

(g) The Secretary may reassume the construction portion of a funding agreement or construction project agreement if the Secretary, in accordance with subpart M of this part, makes a written finding of:

(1) A significant failure to substantially carry out the terms of the funding agreement or construction agreement without good cause; or

(2) Imminent jeopardy to a physical trust asset, to a natural resource, or that adversely affects public health and safety as provided in subpart M of this part.

§ 1000.1440 What constitutes a "significant change" in the original scope of work?

A significant change in the original scope of work is:

(a) A change that would result in a cost that exceeds the total of the Federal project funds available and the Tribe's/Consortium's contingency funds; or

(b) A material departure from the original scope of work, including substantial departure from timelines negotiated in the construction project agreement.

§ 1000.1445 May the Secretary suspend construction activities under the terms of a funding agreement or construction project agreement under title IV of the ISDEAA?

(a) The Secretary may, in lieu of reassumption under subpart M of this part, allow a Tribe/Consortium to suspend certain work under a construction project included in a funding agreement or construction project agreement under title IV of the ISDEAA for up to 30 days only if the Secretary notifies the Tribe/Consortium in writing that the Secretary has found that:

(1) Site conditions adversely affect health and safety; or

(2) Work in progress or completed for the construction project fails to substantially carry out the terms of the construction project agreement or funding agreement without good cause.

(b) The Secretary may suspend only work directly related to the criteria specified in paragraph (a) of this section unless other reasons for suspension are specifically negotiated in the funding agreement or construction project agreement under title IV of the ISDEAA.

(c) Unless the Secretary determines that a health and safety emergency requiring immediate reassumption under subpart M of this part exists, before requesting a suspension of work on the project by the Tribe/Consortium, the Secretary must provide:

(1) A 5-working days written notice to the Tribe/Consortium specifying the reasons the Secretary requests a suspension of certain project work; and

(2) A reasonable opportunity for the Tribe/Consortium to correct the problem.

(d) The Tribe/Consortium must be compensated for reasonable costs due to any suspension of work that occurred through no fault of the Tribe/Consortium. Project funds will not be used for this purpose. However, if suspension occurs due to the action or inaction of the Tribe/Consortium, then project funds will be used to cover suspension related activities.

§ 1000.1450 How are property and funding returned if there is a reassumption for substantial failure to carry out a construction project?

If there is a reassumption by the Secretary of a project for substantial failure to carry out the funding agreement or construction project agreement, property and funding will be returned as provided in subparts M and N of this part.

§ 1000.1455 What happens when a Tribe/Consortium, suspended under § 1000.1445 for substantial failure to carry out the terms of a funding agreement that includes a construction project or program or a construction project agreement under title IV of the ISDEAA without good cause, does not correct the failure during the suspension?

Except when the Secretary makes a finding of imminent jeopardy to a physical trust asset, a natural resource, or public health and safety, requiring immediate reassumption as provided in subpart M of this part, a finding by the Secretary of substantial failure to carry out the terms of the construction project agreement under title IV of the ISDEAA or funding agreement that includes a construction project or program without good cause is not corrected or resolved by the Tribe/Consortium during the suspension of work, the Secretary may initiate a reassumption at the end of the 30-day suspension of work if an extension has not been negotiated. Any unresolved dispute will be processed in accordance with the Contract Disputes Act of 1978, 41 U.S.C. 7101, *et seq.*

§ 1000.1460 How does the Secretary make advance payments to a Tribe/Consortium under a funding agreement or construction project agreement?

(a) For all construction projects performed under a funding agreement or construction project agreement, advance payments shall be made annually or semiannually, at the Tribe's/Consortium's option as provided in 25 U.S.C. 5367(f). The initial payment shall include all contingency funding for the project or phase of the project to the extent that there are funds appropriated for that purpose.

(b) The amount of subsequent advance payments is based on the mutually agreeable project schedule reflecting:

(1) Work to be accomplished within the advance payment period;

(2) Work already accomplished; and

(3) Total prior payments for each annual or semiannual advance payment period.

(c) For lump sum, fixed price agreements, at the request of the Tribe/Consortium, payments shall be based on an advance payment period measured as follows:

(1) One year; or

(2) Project Phase (e.g., planning, design, construction). If project phase is chosen by the Tribe/Consortium as the payment period, the full amount of funds necessary to perform the work for that phase of the construction project agreement is payable in the initial advance payment. For multi-phase projects, the planning and design phases

must be completed prior to the transfer of funds by the Secretary for the associated construction phase. The completion of the planning and design phases will include at least one opportunity for Secretarial approval in accordance with § 1000.1435.

(d) For construction project agreements, the amount of advance payments shall include the funds necessary to perform the work identified in the advance payment period of one year.

(e) Any agreement to advance funds under paragraph (b), (c) or (d) of this section is subject to the availability of appropriations.

(f) Initial advance payments are due within 10 days of the effective date of the funding agreement or construction project agreement, and subsequent advance payments are due:

(1) Within 10 days of apportionment for annual payments, or

(2) Within 10 days of the start date of the project phase for phase payments.

§ 1000.1465 Is a facility built under this subpart eligible for annual operation and maintenance funding?

Yes, upon completion of a facility constructed under the Act, the Secretary shall include the facility among those eligible for annual operation and maintenance funding support comparable to that provided for similar facilities funded by the Department as annual appropriations are available and to the extent that the facility size and complexity and other factors do not exceed the funding formula criteria for comparable buildings.

Role of the Tribe/Consortium

§ 1000.1470 What is the Tribe's/Consortium's role in a construction project included in a funding agreement or construction project agreement under this subpart?

(a) In carrying out a construction project under the Act, a Tribe/Consortium shall assume responsibility for the completion of the construction project and of a facility that is usable for the purpose for which the Tribe/Consortium received funding, including day-to-day on-site management and administration of the project, in accordance with the negotiated funding agreement or construction project agreement. However, Tribes/Consortia are not required to perform beyond the amount of funds provided. For example, a Tribe/Consortium may encounter unforeseen circumstances during the term of a funding agreement or construction project agreement. If this occurs, options available to the Tribe/

Consortium include, but are not limited to:

(1) Reallocating existing funding;
(2) Reducing/revising the scope of work that does not require an amendment because it does not result in a significant change;

(3) Utilizing savings;
(4) Requesting additional funds or appropriations;
(5) Utilizing interest earnings;
(6) Seeking funds from other sources; and/or

(7) Redesigning or re-scoping that does not result in a significant change by amendment as provided in the funding agreement the construction project agreement.

(b) The Tribe/Consortium must give the Secretary timely notice of any proposed changes to the project that require an increase to the negotiated funding amount or an increase in the negotiated performance period or any other significant departure from the scope or objective of the project. The Tribe/Consortium and Secretary may negotiate to include timely notice requirements in the funding agreement or construction project agreement.

§ 1000.1475 Is a Tribe/Consortium required to submit construction project progress and financial reports for construction projects?

Yes, as required under § 1000.1355(b), construction project progress reports and financial reports are only required for active construction projects. The construction progress and financial reports shall provide the following information:

(a) Construction project progress reports contain information about accomplishments during the reporting period and issues and concerns of the Tribe/Consortium relating to the project, if any. Construction progress information will include the following, as applicable:

(1) Phase(s) of the project completed or in progress including but not limited to design complete, environmental review complete, and construction underway;

(2) Milestone project event(s) reached (e.g., 50% of the project is completed);

(3) Other information mutually agreeable to the Tribe/Consortium and the Secretary.

(4) Upon project completion, the final construction progress report will provide notification to the Secretary that the project has been completed in accordance with the approved project scope, including any changes in the project scope of work.

(b) Construction project financial reports contain information regarding

the amount of funds expended during the reporting period and financial concerns of the Tribe/Consortium concerning the project, if any.

Other

§ 1000.1480 May a Tribe/Consortium continue work with construction funds remaining in a funding agreement or construction project agreement at the end of the funding year?

Yes, any funds remaining in a funding agreement or construction project agreement for a project at the end of the funding year may be spent for construction under the terms of the funding agreement or construction project agreement for which the funds were awarded.

§ 1000.1485 Must a construction project agreement or funding agreement that contains a construction project or activity incorporate provisions of Federal construction standards?

(a) No, the Secretary may, however, provide information about Federal standards as early as possible in the construction process.

(b) If Tribal construction codes and standards (including national, regional, State, or Tribal building codes or construction industry standards), including health and safety, meet or exceed applicable Federal codes and standards, then the Secretary must accept the Tribe's/Consortium's proposed codes and standards.

(c) The Secretary may also accept commonly accepted industry construction codes and standards; provided that such codes and standards meet or exceed otherwise applicable Federal standards for the construction project.

§ 1000.1490 May the Secretary require design provisions and other terms and conditions for construction projects or programs included in a funding agreement or construction project agreement under section 403(c) (25 U.S.C. 5363(c))?

Yes, the relevant bureau may provide to the Tribe/Consortium project design criteria and other terms and conditions that are required for such a construction project or program. The construction project or program must be completed in accordance with the terms and conditions set forth in the funding agreement or construction project agreement.

§ 1000.1495 Do all provisions of other subparts apply to construction portions of a funding agreement or construction project agreement?

Yes, all provisions of other subparts apply to construction portions of a funding agreement or construction project agreement unless those

provisions are inconsistent with this subpart.

§ 1000.1500 When a Tribe withdraws from a Consortium, is the Secretary required to award to the withdrawing Tribe a portion of funds associated with a construction project if the withdrawing Tribe so requests?

Under § 1000.235, a Tribe may withdraw from a Consortium and request its portion of a construction project's funds. The Secretary may decide not to award these funds if the award will affect the Consortium's ability to complete a non-severable phase of the project within available funding. A non-severable phase of a project would include but is not limited to the construction of a single building serving a Consortium. A severable phase of a project would include but is not limited to the funding for a road in one village where the Consortium would be able to complete the roads in the other villages that were part of the project approved initially in the funding agreement. The Secretary's decision under this section may be appealed under subpart R of this part.

§ 1000.1505 May a Tribe/Consortium reallocate funds from a construction program to a non-construction program?

No, a Tribe/Consortium may not reallocate funds from a construction program to a non-construction program unless otherwise provided under the relevant appropriation acts.

§ 1000.1510 May a Tribe/Consortium reallocate funds among construction programs?

Yes, a Tribe/Consortium may reallocate funds among construction programs if permitted by appropriations law or if approved in advance by the Secretary.

§ 1000.1515 Must the Secretary retain project funds to ensure proper health and safety standards in construction projects?

Yes, the Secretary must retain project funds to ensure proper health and safety standards in construction projects. Examples of purposes for which bureaus may retain funds include:

- (a) Determining or approving appropriate construction standards to be used in funding agreements;
- (b) Verifying that there is an adequate Tribal inspection system utilizing licensed professionals;
- (c) Providing for sufficient monitoring of design and construction by the Secretary; and
- (d) Requiring corrective action during performance when appropriate.

§ 1000.1520 What funding must the Secretary provide in a construction project agreement or funding agreement that includes a construction project or program?

The Secretary must provide funding for a construction project agreement or funding agreement that includes a construction project or program in accordance with 25 U.S.C. 5325 and 25 U.S.C. 5363(g)(3).

§ 1000.1525 Must Federal funds from other DOI sources be incorporated into a construction project agreement or funding agreement that includes a construction project or program?

Yes, at the request of the Tribe/Consortium, the Secretary must include Federal funds from other DOI sources as permitted by law, whether on an ongoing or a one-time basis.

§ 1000.1530 May a Tribe/Consortium contribute funding to a project?

Yes, at the discretion of a Tribe/Consortium, a Tribe/Consortium may contribute funds to a construction project.

Subpart L—Federal Tort Claims

§ 1000.1601 What is the purpose of this subpart?

This subpart explains the applicability of the Federal Tort Claims Act (FTCA). This section covers:

- (a) Coverage of claims arising out of the performance under compacts and funding agreements;
- (b) Procedures for filing claims under FTCA; and
- (c) Procedures for a Tribe/Consortium to cooperate with the Federal Government in connection with tort claims arising out of the Tribe's/Consortium's performance of a compact or funding agreement under this part.

§ 1000.1605 What other statutes and regulations apply to FTCA coverage?

A number of other statutes and regulations apply to FTCA coverage, including the Federal Tort Claims Act (28 U.S.C. 1346(b), 2401, 2671 through 2680), 25 U.S.C. 5376, and related U.S. Department of Justice regulations in 28 CFR part 14.

§ 1000.1610 Do Tribes/Consortia need to be aware of areas which FTCA does not cover?

Yes, there are claims against Tribes/Consortia which are not covered by FTCA, claims which may not be pursued under FTCA, and remedies that are excluded by FTCA. The following general guidance is not intended as a definitive description of coverage, which is subject to review by the U.S.

Department of Justice and the courts on a case-by-case basis.

(a) *What claims are expressly barred by FTCA and therefore may not be made against the United States, a Tribe, or Consortium?* Any claim under 28 U.S.C. 2680, including claims arising out of assault, battery, false imprisonment, false arrest, malicious prosecution, abuse of process, libel, slander, misrepresentation, deceit, or interference with contract rights, unless otherwise authorized by 28 U.S.C. 2680(h).

(b) *What claims may not be pursued under FTCA?* (1) Claims against subcontractors arising out of the performance of subcontracts with a Tribe/Consortium;

(2) Claims for on-the-job injuries which are covered by workmen's compensation;

(3) Claims for breach of contract rather than tort claims; or

(4) Claims resulting from activities performed by an employee which are outside the scope of employment.

(c) *What remedies are expressly excluded by FTCA and therefore are barred?* (1) Punitive damages, unless otherwise authorized by 28 U.S.C. 2674; and

(2) Other remedies not permitted under applicable state law.

§ 1000.1615 Is there a deadline for filing FTCA claims?

Yes, claims shall be filed within 2 years of the date of accrual. (28 U.S.C. 2401).

§ 1000.1620 How long does the Federal Government have to process a FTCA claim after the claim is received by the Federal agency, before a lawsuit may be filed?

The Federal Government has 6 months to process a FTCA claim after the claim is received by the Federal agency, before a lawsuit may be filed.

§ 1000.1625 Is it necessary for a compact or funding agreement to include any clauses about FTCA coverage?

No, clauses about FTCA coverage are optional. At the request of Tribes/Consortia, a compact or funding agreement shall include the following clause to clarify the scope of FTCA coverage:

For purposes of FTCA coverage, the Tribe/Consortium and its employees (including individuals performing personal services contracts with the Tribe/Consortium) are deemed to be employees of the Federal Government while performing work under the compact or funding agreement. This status is not changed by the source of the funds used by the Tribe/Consortium to pay the employee's salary and

benefits unless the employee receives additional compensation for performing covered services from anyone other than the Tribe/Consortium.

§ 1000.1630 Does FTCA apply to a compact and funding agreement if FTCA is not referenced in the compact or funding agreement?

Yes. In accordance with 25 U.S.C. 5376, FTCA applies to a compact or funding agreement even if the compact or funding agreement does not mention it.

§ 1000.1635 To what extent shall the Tribe/Consortium cooperate with the Federal Government in connection with tort claims arising out of the Tribe's/Consortium's performance of a compact, funding agreement, or subcontract?

(a) The Tribe/Consortium shall designate in writing to the Secretary an individual to serve as tort claims liaison with the Federal Government.

(b) As part of the notification required by 28 U.S.C. 2679(c), the Tribe/Consortium shall notify the Secretary immediately in writing of any tort claim (including any proceeding before an administrative agency or court) filed against the Tribe/Consortium or any of its employees that relates to performance of a compact, funding agreement, or subcontract.

(c) The Tribe/Consortium, through its designated tort claims liaison, shall assist the appropriate Federal agency in preparing a comprehensive, accurate, and unbiased report of the incident so that the claim may be properly evaluated. This report should be completed within 60 days of notification of the filing of the tort claim. The report should be complete in every significant detail and include as appropriate:

(1) The date, time and exact place of the accident or incident;

(2) A concise and complete statement of the circumstances of the accident or incident;

(3) The names and addresses of Tribal and/or Federal employees involved as participants or witnesses;

(4) The names and addresses of all other eyewitnesses;

(5) An accurate description of all government and other privately-owned property involved and the nature and amount of damage, if any;

(6) A statement as to whether any person involved was cited for violating a Federal, State, or Tribal law, ordinance, or regulation;

(7) The Tribe's/Consortium's determination as to whether any of its employees (including Federal employees assigned to the Tribe/Consortium) involved in the incident

giving rise to the tort claim were acting within the scope of their employment in the performance of the compact or funding agreement at the time the incident occurred;

(8) Copies of all relevant documentation, including available police reports, statements of witnesses, newspaper accounts, weather reports, plats and photographs of the site or damaged property, such as may be necessary or useful for purposes of claim determination by the Federal agency; and

(9) Insurance coverage information, copies of medical bills, and relevant employment records.

(d) The Tribe/Consortium shall cooperate with and provide assistance to the U.S. Department of Justice attorneys assigned to defend the tort claim, including, but not limited to, case preparation, discovery, and trial.

(e) If requested by the Secretary, the Tribe/Consortium shall make an assignment and subrogation of all the Tribe's/Consortium's rights and claims (except those against the Federal Government) arising out of a tort claim against the Tribe/Consortium.

(f) If requested by the Secretary, the Tribe/Consortium shall authorize representatives of the Secretary to settle or defend any claim and to represent the Tribe/Consortium in or take charge of any action.

(g) If the Federal Government undertakes the settlement or defense of any claim or action, the Tribe/Consortium shall provide all reasonable additional assistance in reaching a settlement or asserting a defense.

§ 1000.1640 Does this coverage extend to subcontractors of compacts and funding agreements?

No, subcontractors or subgrantees providing services to a Public Law 93–638 Tribe/Consortium are generally not covered.

§ 1000.1645 Is FTCA the exclusive remedy for a tort claim, including a claim concerning personal injury or death, resulting from the performance of a compact or funding agreement?

Yes, except as explained in § 1000.1610(b). No claim may be filed against a Tribe/Consortium or employee based upon performance of a compact or funding agreement. All claims shall be filed against the United States and are subject to the limitations and restrictions of FTCA.

§ 1000.1650 What employees are covered by FTCA for claims arising out of a Tribe's/Consortia's performance of a compact or funding agreement?

The following employees are covered by FTCA for claims:

(a) Permanent employees of the Tribe/Consortium;

(b) Temporary employees of the Tribe/Consortium;

(c) Persons providing services without compensation in the performance of a compact or funding agreement; and;

(d) Federal employees assigned to a Tribe/Consortium under the compact or funding agreement including those under the Intergovernmental Personnel Act.

§ 1000.1655 Does FTCA cover employees of the Tribe/Consortium who are paid by the Tribe/Consortium from funds other than those provided through the funding agreement?

Yes, FTCA covers employees of the Tribe/Consortium who are not paid from funds transferred under a funding agreement as long as the services out of which the claim arose were performed under the compact or funding agreement.

§ 1000.1660 May persons who are not Indians or Alaska Natives assert claims under FTCA arising out of the performance of a compact or funding agreement by a Tribe/Consortium?

Yes, any person(s) may assert tort claims under FTCA arising out of the performance of a compact or funding agreement by Tribes/Consortia under this subpart.

§ 1000.1665 If the Tribe/Consortium or Tribe's/Consortium's employee receives a summons and/or a complaint alleging a tort covered by FTCA and arising out of the performance of a compact or funding agreement, what should the Tribe/Consortium do?

As part of the notification required by 28 U.S.C. 2679(c), if the Tribe/Consortium or Tribe's/Consortium's employee receives a summons and/or complaint alleging a tort covered by FTCA and arising out the performance of a compact or funding agreement, the Tribe/Consortium should immediately:

(a) Inform the Assistant Solicitor, Procurement and Patents, Office of the Solicitor, Department of the Interior, Room 6511, 1849 C Street NW, Washington, DC 20240.

(b) Inform the Tribe's/Consortium's tort claims liaison, and

(c) Forward all of the materials identified in § 1000.1635(c) to the contacts given in paragraphs (a) and (b) of this section.

Subpart M—Reassumption

§ 1000.1701 What is the purpose of this subpart?

This subpart explains when the Secretary can reassume a program without the consent of a Tribe/Consortium.

§ 1000.1705 What does reassumption mean?

Reassumption means the Secretary, without consent of the Tribe/Consortium, takes control or operation of the PSFAs and associated funding in a compact or funding agreement, in whole or in part, and assumes the responsibility to provide such PSFAs.

§ 1000.1710 Under what circumstances may the Secretary reassume a program operated by a Tribe/Consortium under a funding agreement?

The Secretary may reassume a program and the associated funding if the Secretary makes a specific finding relating to that program of:

(a) Imminent jeopardy to a trust asset, a natural resource, or public health and safety that:

(1) Is caused by an act or omission of the Tribe/Consortium; and

(2) Arises out of a failure to carry out the compact or funding agreement; or

(b) Gross mismanagement with respect to funds transferred to a Tribe/Consortium under a compact or funding agreement, as determined by the Secretary in consultation with the Inspector General, as appropriate.

§ 1000.1715 What is “imminent jeopardy” to a trust asset?

Imminent jeopardy means an immediate threat and likelihood of significant devaluation, degradation, damage, or loss of a trust asset, or the intended benefit from the asset caused by the actions or inactions of a Tribe/Consortium in performing trust functions. This includes disregarding Federal trust standards and/or Federal law while performing trust functions if the disregard creates such an immediate threat.

§ 1000.1720 What is “imminent jeopardy” to natural resources?

The standard for natural resources is the same as for a physical trust asset, except that a review for compliance with the specific mandatory statutory provisions related to the program as reflected in the funding agreement must also be considered.

§ 1000.1725 What is “imminent jeopardy” to public health and safety?

Imminent jeopardy to public health and safety means an immediate and significant threat of serious harm to human well-being, including conditions that may result in serious injury, or death, caused by Tribal/Consortium action or inaction or as otherwise provided in a funding agreement.

§ 1000.1730 What steps must the Secretary take prior to reassumption becoming effective?

Except as provided in § 1000.1750 for immediate reassumption, prior to a reassumption becoming effective, the Secretary must:

(a) Notify the Tribe/Consortium in writing of the details of the findings required under § 1000.1710;

(b) Request specific corrective action to remedy the mismanagement of the funds or programs within a reasonable period of time which in no case may be less than 45 days;

(c) Offer and provide, if requested, the necessary technical assistance and advice to assist the Tribe/Consortium overcome the conditions that led to the findings described under (a); and

(d) Provide the Tribe/Consortium with a hearing on the record as provided under subpart R of this part.

§ 1000.1735 Does the Tribe/Consortium have a right to a hearing prior to a non-immediate reassumption becoming effective?

Yes, at the request of the Tribe/Consortium, the Secretary must provide a hearing on the record prior to or in lieu of the corrective action period identified in § 1000.1730(b).

§ 1000.1740 What happens if the Secretary determines that the Tribe/Consortium has not corrected the conditions that the Secretary identified in the written notice?

(a) The Secretary shall provide a second written notice to the Tribe/Consortium served by the compact or funding agreement that the compact or funding agreement will be rescinded, in whole or in part.

(b) The second notice shall include:

(1) The intended effective date of the Secretary's reassumption;

(2) The details and facts supporting the intended reassumption; and

(3) Instructions that explain the Tribe/Consortium's right to a formal hearing within 30 days of receipt of the notice.

§ 1000.1745 What is the earliest date on which a reassumption by the Secretary can be effective?

Except as provided in § 1000.1750, no program may be reassumed by the Secretary until 30 days after the final resolution of the hearing and any subsequent appeals to provide the Tribe/Consortium with an opportunity to take corrective action in response to any adverse final ruling.

§ 1000.1750 Does the Secretary have the authority to immediately reassume a program?

Yes, the Secretary may immediately reassume operation of a program and associated funding upon providing to

the Tribe/Consortium written notice in which the Secretary makes a finding of:

(a) Imminent and substantial jeopardy and irreparable harm to a trust asset, a natural resource, or public health and safety that:

(1) Is caused by an act or omission by the Tribe/Consortium; and

(2) Arises out of a failure to carry out the terms of an applicable compact or funding agreement.

(b) If the Secretary reassumes operation of a program under this provision, the Secretary must provide the Tribe/Consortium with a hearing on the record not later than 10 days after the date of reassumption.

§ 1000.1755 What must a Tribe/Consortium do when a program is reassumed?

On the effective date of reassumption, the Tribe/Consortium must, at the request of the Secretary, deliver all property and equipment, and title thereto:

(a) That the Tribe/Consortium received for the program under the funding agreement; and

(b) That has a per item value in excess of \$5,000, or as otherwise provided in the funding agreement.

§ 1000.1760 When must the Tribe/Consortium return funds to the Department?

The Tribe/Consortium must return unexpended funds, less “wind up costs,” that remain available to the Department as soon as practical after the effective date of the reassumption.

§ 1000.1765 May the Tribe/Consortium be reimbursed for actual and reasonable “wind up costs” incurred after the effective date of retrocession?

Yes, the Tribe/Consortium may be reimbursed for actual and reasonable “wind up costs” to the extent that funds are available.

§ 1000.1770 Is a Tribe's/Consortium's general right to negotiate a funding agreement adversely affected by a reassumption action?

A reassumption action taken by the Secretary does not affect the Tribe/Consortium's ability to negotiate a funding agreement for programs not affected by the reassumption.

§ 1000.1775 When will the Secretary return management of a reassumed program?

A reassumed program may be included in future funding agreements, but the Secretary may include conditions in the terms of the funding agreement to ensure that the circumstances that caused jeopardy to attach do not reoccur.

Subpart N—Retrocession**§ 1000.1801 What is the purpose of this subpart?**

This subpart explains what happens when a Tribe/Consortium fully or partially and voluntarily returns a program to a bureau before the expiration of the term of the compact or funding agreement.

§ 1000.1805 Is a decision by a Tribe/Consortium not to include a program in a successor agreement considered a retrocession?

No, a decision by a Tribe/Consortium not to include a program in a successor agreement is not considered a retrocession.

§ 1000.1810 Who may retrocede a program in a funding agreement?

A Tribe/Consortium may retrocede a program. However, the right of a Consortium member to retrocede may be subject to the terms of the agreement among the members of the Consortium and §§ 1000.205 through 1000.235.

§ 1000.1815 How does a Tribe/Consortium retrocede a program?

The Tribe/Consortium must submit:

- (a) A written notice to:
 - (1) The Office of Self-Governance for BIA programs; or
 - (2) The appropriate bureau for non-BIA programs; and
- (b) A Tribal resolution or other official action of its governing body.

§ 1000.1820 When will the retrocession become effective?

The retrocession becomes effective on the date that is mutually agreed to by the parties in writing. In the absence of a mutually agreed upon effective date, the retrocession becomes effective on the earlier of:

- (a) One year after the date the Tribe/Consortium submits its notice of retrocession; or
- (b) The date the funding agreement expires.

§ 1000.1825 How will retrocession affect the Tribe's/Consortium's existing and future funding agreements?

Retrocession does not affect other parts of the funding agreement or funding agreements with other bureaus. A Tribe/Consortium may request to negotiate for and include retroceded programs in future funding agreements or through a self-determination contract.

§ 1000.1830 Does the Tribe/Consortium have to return funds used in the operation of a retroceded program?

The Tribe/Consortium and the Secretary must negotiate the amount of funds that have not been obligated by

the Tribe/Consortium to be returned to the Secretary, less close out costs, for the Secretary's operation of the retroceded program. This amount must be based on such factors as the time remaining or functions remaining in the funding cycle or as provided in the funding agreement.

§ 1000.1835 Does the Tribe/Consortium have to return property used in the operation of a retroceded program?

On the effective date of any retrocession, the Tribe/Consortium must, at the option of the Secretary, return all property and equipment, and title thereto:

- (a) That was acquired with funds under the funding agreement for the program being retroceded; and
- (b) That has a per item current fair market value in excess of \$5,000 at the time of the retrocession, or as otherwise provided in the funding agreement.

§ 1000.1840 What happens to a Tribe's/Consortium's mature contract status if it has retroceded a program that is also available for self-determination contracting?

If a Tribe/Consortium retrocedes operation of a program carried out under a title IV funding agreement, at the option of the Tribe/Consortium, the resulting self-determination contract is considered mature if the Tribe/Consortium meets the requirements of 25 U.S.C. 5304(h).

§ 1000.1845 How does retrocession affect a bureau's operation of the retroceded program?

The level of operation of the program will depend upon the amount of funding that is returned with the retrocession.

Subpart O—Trust Evaluation**§ 1000.1901 What is the purpose of this subpart?**

This subpart describes how the trust responsibility of the United States is legally maintained through a system of trust evaluations when Tribes/Consortia perform trust PSFAs through funding agreements under the Act. It describes the principles and processes upon which trust evaluations by the Secretary will be based.

§ 1000.1905 Does the Act alter the trust responsibility of the United States to Indian Tribes and individuals under self-governance?

No, the Act does, however, permit a Tribe/Consortium to assume management responsibilities for trust assets and resources on its own behalf and on behalf of individual Indians. Under the Act, the Secretary has a trust

responsibility to conduct annual trust evaluations of a Tribe's/Consortium's performance of trust PSFAs under a funding agreement to ensure that Tribal and individual trust assets and resources are managed in accordance with the legal principles and standards governing the performance of trust PSFAs set out in the funding agreement or as provided for by law.

§ 1000.1910 What are "trust resources" for the purposes of the trust evaluation process?

(a) Trust resources include property and interests in property:

- (1) That are held in trust by the United States for the benefit of a Tribe or individual Indians; or

(2) That are subject to restrictions upon alienation.

(b) Trust assets include:

- (1) Other assets, trust revenue, royalties, or rental, including natural resources, land, water, minerals, funds, property, or claims, and any intangible right or interest in any of the foregoing;

(2) Any other property, asset, or interest therein, or treaty right for which the United States is charged with a trust responsibility. For example, water rights and off-reservation treaty rights.

(c) This definition defines trust resources and trust assets for purposes of the trust evaluation process only.

§ 1000.1915 What are "trust PSFAs" for the purposes of the trust evaluation process?

Trust PSFAs are those programs, services, functions and activities necessary to the management of assets and resources held in trust by the United States for an Indian Tribe or individual Indian.

§ 1000.1920 Can a Tribe/Consortium request the Secretary to conduct an assessment of the status of the trust assets, resource, and PSFAs?

If the parties agree in writing and it is practical, the Secretary may arrange for a written assessment by the Department of the status of the trust resource and asset at the time of the transfer of the PSFAs or at a later time. The parties shall agree upon an estimate of time required to complete a baseline assessment. Upon completion of the assessment report by the Department, the Secretary's designated representative shall provide a copy of the assessment to the Tribe/Consortium within 30 days.

*Annual Trust Evaluation***§ 1000.1925 What is a trust evaluation?**

A trust evaluation is an annual review and evaluation of trust functions performed by a Tribe/Consortium to ensure that the functions are performed

in accordance with trust standards as defined by Federal law. Trust evaluations address trust functions performed by the Tribe/Consortium on its own behalf as well as trust functions performed by the Tribe/Consortium for the benefit of individual Indians or Alaska Natives.

§ 1000.1930 How are trust evaluations conducted?

(a) Each year the Secretary's designated representative(s) will conduct an evaluation of trust PSFAs for each funding agreement. The Secretary's designated representative(s) will coordinate in writing with the leadership of the Tribe/Consortium, with a copy to the designated Tribe's/Consortium's representative(s), to arrange the evaluation of trust PSFAs and throughout the trust evaluation, including the written report required by § 1000.1940.

(b) This section describes the general framework for trust evaluations. However, each Tribe/Consortium may develop, with the appropriate bureau, an individualized trust evaluation method to allow for the Tribe's/Consortium's unique history, circumstances, trust resources and assets, and the terms and conditions of its funding agreement. An individualized trust evaluation must, at a minimum, contain the measures in paragraph (d) of this section.

(c) To facilitate the trust evaluation so as to mitigate costs and maximize efficiency, each Tribe/Consortium must provide access to all records, plans, and other pertinent documents relevant to the trust PSFAs under review not otherwise available to the Department.

(d) The Secretary's designated representative(s) will:

- (1) Review trust transactions;
- (2) Conduct on-site inspections of trust resources and assets, as appropriate, at a time to be coordinated between the parties;
- (3) Review compliance with applicable statutory and regulatory requirements;
- (4) Review compliance with the trust provisions and standards as may be negotiated and included in the funding agreement;
- (5) Ensure that the same level of trust services is provided to individual Indians as would have been provided by the Secretary;
- (6) Document deficiencies in the performance of trust PSFAs discovered during the trust evaluation in the final report which the Department will submit to the Tribe/Consortium pursuant to § 1000.1940; and

(7) Ensure the fulfillment of the Secretary's trust responsibility to Tribes and individual Indians by documenting the existence of:

- (i) Systems of internal controls;
- (ii) Trust standards; and
- (iii) Safeguards against conflicts of interest in the performance of trust PSFAs.

§ 1000.1935 May the trust evaluation process be used for additional reviews?

Yes, if the parties agree in writing to such additional reviews.

§ 1000.1936 May the parties negotiate review methods for purposes of the trust evaluation?

Yes, unless review methods are otherwise provided by Federal law, the Secretary's designated representative will negotiate review methods at the request of the Tribe/Consortium for inclusion in a funding agreement as provided in § 1000.1930(b).

§ 1000.1940 What are the responsibilities of the Secretary's designated representative(s) after the annual trust evaluation?

The Secretary's representative(s) must prepare a written report documenting the results of the trust evaluation within 60 days of the Department's completion of an on-site and/or desk review.

(a) The Secretary's representative(s) will provide the Tribe/Consortium representative(s) with a copy of the report for review and comment before finalization.

(b) The Secretary's representative(s) will attach to the report any Tribal/Consortium comments that the representative receives.

(c) The Secretary's representative(s) must respond to the Tribe's/Consortium's comments as part of the final trust evaluation report.

§ 1000.1945 Is the trust evaluation standard or process different when the trust resource or asset is held in trust for an individual Indian or Indian allottee?

No, Tribes/Consortia are under the same obligation as the Secretary to perform trust PSFAs and related activities in accordance with trust protection standards and principles whether managing Tribally or individually owned trust resources and assets. The Department's process for conducting the annual evaluation of Tribal/Consortium performance of trust PSFAs on behalf of individual Indians is the same as that used in evaluating performance of Tribal trust PSFAs.

§ 1000.1950 Does the annual trust review evaluation include a review of the Secretary's inherent Federal and retained operation trust PSFAs?

(a) When the annual trust evaluation by the Secretary reveals a deficient performance of trust PSFAs by a Tribe/Consortium due in part to the action or inaction of a bureau, it will trigger an evaluation by the Department of the Secretary's inherent Federal functions and any retained trust PSFAs pertaining to the bureau's action or inaction.

(b) The appropriate Department officials will be notified in writing by the Secretary's representative of the need for corrective action. A copy of such written notice shall be sent by the Secretary's representative to the Tribe/Consortium. The review of the Secretary's trust PSFAs shall be based on the standards in Federal law.

§ 1000.1955 What are the consequences of a finding of imminent jeopardy in the Secretary's annual trust evaluation?

(a) A finding of imminent jeopardy to a trust asset, natural resource, or public health and safety that is caused by an act or omission of the Tribe/Consortium and that arises out of a failure by the Tribe/Consortium to carry out the compact or funding agreement, triggers the Federal reassumption process (*see* subpart M of this part), unless the conditions in paragraph (b) of this section are met.

(b) The reassumption process will not be triggered if the Secretary's designated representative determines that the Tribe/Consortium:

- (1) Can cure the conditions causing jeopardy within 60 days; and
- (2) Will not cause significant loss, harm, or devaluation of a trust asset, natural resources, or the public health and safety.

§ 1000.1960 What if the Secretary's trust evaluation reveals problems that do not rise to the level of imminent jeopardy?

Where problems not rising to the level of imminent jeopardy are caused by Tribal/Consortium action or inaction, the conditions must be:

- (a) Documented in the Department's annual trust evaluation report;
- (b) Reported to the Secretary; and
- (c) Reported in writing to:
 - (1) The governing body of the Tribe; and
 - (2) In the case of a Consortium, to the governing body of each Tribe on whose behalf the Consortium is performing the trust PSFAs.

§ 1000.1965 Who is responsible for taking corrective action?

The Tribe/Consortium is primarily responsible for identifying and

implementing corrective actions for matters contained in the funding agreement, but the Department may also suggest possible corrective measures for Tribal/Consortium consideration.

§ 1000.1970 What are the requirements of the Department's review team report?

A report summarizing the results of the trust evaluation will be prepared by the Secretary's designated representative(s) and copies provided to the Tribe/Consortium within the time frame specified in § 1000.1940. The annual trust evaluation report must:

- (a) Be written objectively, concisely, and clearly;
- (b) Present information accurately and fairly, including only relevant and adequately supported information, findings, and conclusions; and
- (c) Include a written response from the Tribe/Consortium to the draft report provided to the Tribe/Consortium by the Secretary's representative(s).

§ 1000.1975 May the Department conduct more than one trust evaluation per Tribe per year?

(a) Yes, if the Department receives information that it concludes rises to the level of a threat of imminent jeopardy to a trust asset, natural resource, or the public health and safety, caused by an act or omission of a Tribe/Consortium and arises out of a failure to carry out a compact or funding agreement, the Department, as trustee, may conduct a preliminary investigation. The Department:

- (1) Shall promptly contract the Tribe/Consortium to discuss the nature of the threat;
- (2) Will follow up with notification to the Tribe/Consortium in writing, and
- (3) May conduct an on-site inspection upon 2 days' advance written notice to the Tribe/Consortium.

(b) If the preliminary investigation shows that appropriate, sufficient data are present to indicate there may be imminent jeopardy, the Secretary's designated representative shall follow the reassumption procedures in accordance with subpart M of this part.

Subpart P—Reports

§ 1000.2001 What is the purpose of this subpart?

This subpart describes what reports are developed under self-governance by the Secretary and the Tribes/Consortia.

§ 1000.2005 Is the Secretary required to report on Self Governance?

Yes, on January 1 of each year, the Secretary will submit a report on self-governance to the Congress. The report will be based on:

- (a) Information contained in funding agreements;
- (b) Annual audit reports, and
- (c) Data of the Secretary regarding the disposition of Federal funds.

§ 1000.2010 What will the Secretary's annual report to Congress contain?

The Secretary's report will:

- (a) Identify:
 - (1) The relative costs and benefits of self-governance;
 - (2) With particularity, all funds that are specifically or functionally related to the provision by the Secretary of services and benefits to self-governance Indian Tribes and members of Indian Tribes;
 - (3) The funds transferred to each Tribe/Consortium and the corresponding reduction in the Federal employees and workload; and
 - (4) The funding formula for individual Tribal shares of all Central Office funds, together with the comments of affected Indian Tribes, developed for the report to Congress as required by 25 U.S.C. 5372(d).

(b) Include the separate views and comments of each Indian Tribe or Tribal organization; and

(c) Include a list of:

(1) All such programs that the Secretary determines, in consultation with Indian Tribes participating in self-governance, are eligible for negotiation to be included in a funding agreement at the request of a participating Indian Tribe;

(2) All such programs which Indian Tribes have formally requested to include in a funding agreement under section 403(c) (25 U.S.C. 5363(c)) due to the special geographic, historical, or cultural significance of the program to the Indian Tribe, indicating whether each request was granted or denied, and stating the grounds for any denial; and

(d) Include in this report, in the aggregate, a description of the internal controls that were inadequate, the technical assistance provided, and a description of Secretarial actions taken to address any remaining inadequate internal controls after the provision of technical assistance and implementation of the plan required by 25 U.S.C. 5324(q)(1).

(e) Programmatic targets established by the Secretary, after consulting with participating Tribes/Consortia, to encourage bureaus of the Department, other than the BIA, the BIE, the BTFA, or the Office of Assistant Secretary for Indian Affairs to ensure that an appropriate portion of those programs are available to be included in funding agreements.

§ 1000.2011 Is the Secretary required to review programs of the Department other than BIA, BIE, the Office of the Assistant Secretary for Indian Affairs, and the BTFA?

Yes. In order to optimize opportunities for including non-BIA programs in agreements with Tribes/Consortia participating in self-governance under the Act, the Secretary shall review all non-BIA programs without regard to the agency or office concerned.

§ 1000.2012 Is the Secretary required to annually publish information under this subpart in the Federal Register?

Yes, the Secretary shall annually review and publish in the **Federal Register**, after consulting with Tribes/Consortia participating in self-governance, revised lists under § 1000.2010(c)(1) and (2) and programmatic targets under § 1000.2010(e), and make such information available to all participating Tribes/Consortia.

§ 1000.2015 Must the Secretary seek comment on the report from Tribes/Consortia before submitting it to Congress?

Yes, before the report of the Secretary is submitted to Congress, it must be distributed by the Secretary to Tribes/Consortia for comment. The comment period must not be less than 30 days.

§ 1000.2020 What may the Tribe's/Consortium's annual report on self-governance address?

(a) The Tribe's/Consortium's annual self-governance report may address:

- (1) A list of unmet Tribal needs in order of priority;
- (2) The approved, year-end Tribal/Consortium budget for the programs and services funded under self-governance, summarized, and annotated as the Tribe/Consortium may deem appropriate;
- (3) Identification of any reallocation of trust programs;
- (4) Program and service delivery highlights, which may include a narrative of specific program redesign or other accomplishments, or benefits attributed to self-governance; and
- (5) At the Tribe's/Consortium's option, a summary of the highlights of the report referred to in paragraph (a)(2) of this section and other pertinent information the Tribe/Consortium may wish to report.

(b) The report submitted under this section is intended to provide the Department with information necessary to meet its Congressional reporting responsibilities and to fulfill its responsibility as an advocate for self-governance. The report is not intended to be burdensome, and Tribes/Consortia

are encouraged to design and present the report in a brief and concise manner.

§ 1000.2025 Are there other data submissions or reports that Tribes/Consortia may be requested to submit?

Yes, Tribes/Consortia may be requested to submit data for the Secretary to determine allocation of funds to be awarded under a funding agreement.

§ 1000.2030 Are Tribes/Consortia required to submit Single Audit Act reports?

Yes. The Single Agency Audit Act, 31 U.S.C. 7501 *et seq.*, and subparts E and F of 2 CFR part 200 applies to a funding agreement under this part. The Tribe/Consortium must provide to the designated official an annual single audit report as prescribed by 31 U.S.C. 7501, *et seq.*

§ 1000.2035 Is there an exemption available for the requirement to submit Single Audit Act reports?

Yes. In accordance with 2 CFR 200.501(d), a non-Federal entity that expends less than the amount as published by OMB during the entity's fiscal year in Federal awards is exempt from submitting an annual single audit report for that year.

§ 1000.2040 Are Tribes/Consortia required to maintain reports and records in accordance with 25 U.S.C. 5305?

Yes, Tribes/Consortia are required to maintain reports and records in accordance with 25 U.S.C. 5305.

Subpart Q—Operational Provisions

§ 1000.2101 How can a Tribe/Consortium hire a Federal employee to help implement a funding agreement?

If a Tribe/Consortium chooses to hire a Federal employee, it can use, in addition to any other available options, one of the arrangements listed in this section:

(a) The Tribe/Consortium can use its own personnel hiring procedures. Federal employees hired by the Tribe/Consortium are separated from Federal service.

(b) The Tribe/Consortium can “direct hire” a Federal employee as a Tribal/Consortium employee. The employee will be separated from Federal service and work for the Tribe/Consortium, but maintain a negotiated Federal benefit package that is paid for by the Tribe/Consortium out of funding agreement program funds; or

(c) The Tribe/Consortium can negotiate an agreement under the Intergovernmental Personnel Act, 5 U.S.C. 3371 through 3375, 25 U.S.C. 323, 25 U.S.C. 48, or other applicable Federal law. The employee will remain

a Federal employee during the term of the agreement.

§ 1000.2105 Can a Tribe/Consortium employee be detailed to a Federal service position?

Yes, under the Intergovernmental Personnel Act, 5 U.S.C. 3371 through 3375, 25 U.S.C. 323, 25 U.S.C. 48, or other applicable law, when permitted by the Secretary.

§ 1000.2110 How does the Freedom of Information Act apply?

(a) Access to records maintained by the Secretary is governed by the Freedom of Information Act (5 U.S.C. 552) and other applicable Federal law.

(b) Unless the Tribe/Consortium specifies otherwise in a funding agreement, records of the Tribe/Consortium shall not be considered Federal records for the purpose of the Freedom of Information Act.

(c) The Freedom of Information Act does not apply to records maintained solely by Tribes/Consortia.

§ 1000.2115 How does the Privacy Act apply?

Unless the Tribe/Consortium specifies otherwise, records of the Tribe/Consortium shall not be considered Federal records for the purposes of the Privacy Act.

§ 1000.2120 What audit requirements must a Tribe/Consortium follow?

The Single Agency Audit Act, 31 U.S.C. 7501 *et seq.*, and subparts E and F of 2 CFR part 200 apply to a funding agreement under this part. The Tribe/Consortium must provide to the designated official an annual single audit as prescribed by 31 U.S.C. 7501, *et seq.*

§ 1000.2125 How do OMB circulars and the Act apply to funding agreements?

(a) A Tribe/Consortium shall apply cost principles under the applicable OMB circular, except as modified by:

(1) Any provision of law, including 25 U.S.C. 5325; or

(2) Any exemptions or exceptions granted by OMB.

(b) In any circumstances where the provisions of Federal statutes or this part differ from the provisions of 2 CFR part 200, the provisions of the Federal statutes or this part govern. This includes the provisions of Public Law 93–638, including 25 U.S.C. 5325 and 5365(c).

§ 1000.2130 How much time does the Federal Government have to make a claim against a Tribe/Consortium relating to any disallowance of costs, based on an audit?

Any claim by the Federal Government against a Tribe/Consortium relating to

the disallowance of costs for funds received under a funding agreement based on any audit under title IV (other than those relating to a criminal offense) shall be subject to the 365-day period set forth in 25 U.S.C. 5325(f), as prescribed by 25 U.S.C. 5365(c)(3).

§ 1000.2135 Does a Tribe/Consortium have additional ongoing requirements to maintain minimum standards for Tribe/Consortium management systems?

(a) Yes, for a Tribe/Consortium required to perform an annual audit under the Single Audit Act and subparts E and F of 2 CFR part 200, the Tribe/Consortium must maintain management systems that are determined to be adequate by an independent audit.

(b) For a Tribe/Consortium that is not required to perform an annual audit under the Single Audit Act, the financial management systems, including records documenting compliance with Federal statutes, regulations, and the terms and conditions of the funding agreement, must be sufficient to permit the preparation of reports required by general and program-specific terms and conditions; and the tracing of funds to a level of expenditures adequate to establish that such funds have been used according to the Federal statutes, regulations, and the requirements of the funding agreement.

(c) As prescribed by subparts E and F of 2 CFR part 200, every Tribe/Consortium must establish and maintain effective internal controls over funds included in a funding agreement that provide reasonable assurances that the Tribe/Consortium is managing the funds in compliance with Federal statutes, regulations, and the terms and conditions of the funding agreement.

§ 1000.2140 Are there any restrictions on how funds awarded to a Tribe/Consortium under a funding agreement may be spent?

Yes, funds awarded to a Tribe/Consortium under a funding agreement may be spent only for costs associated with PSFAs subject to the funding agreement.

§ 1000.2145 What standard applies to a Tribe's/Consortium's management of funds awarded under a funding agreement?

Funds awarded a Tribe/Consortium under a funding agreement, including advance payments, shall be managed by the Tribe/Consortium using the prudent investment standard, provided that the Secretary shall not be liable for any investment losses of funds managed by the Tribe/Consortium that are not otherwise guaranteed or insured by the Federal Government. The prudent investment standard requires the

exercise of reasonable care, skill, and caution, and is to be applied to investments not in isolation but in the context of the investment portfolio and as part of an overall investment strategy, which should incorporate risk and return objectives reasonably suitable to the Tribe/Consortium. In making and implementing investment decisions, the Tribe/Consortium has a duty to diversify the investment, unless, under the circumstances, it is prudent not to do so. In addition, the Tribe/Consortium must:

(a) Conform to fundamental fiduciary duties of loyalty and impartiality;

(b) Act with prudence in deciding whether and how to delegate authority and in the selection and supervision of agents; and

(c) Incur only costs that are reasonable in amount and appropriate to the investment responsibilities of the Tribe/Consortium.

§ 1000.2150 How may interest or investment income that accrues on funds awarded under a funding agreement be used?

(a) Interest or income earned on investments or deposits of awards made under a funding agreement may be:

(1) Used for any governmental purpose approved by the Tribe/Consortium; or

(2) Used to provide expanded services under the funding agreement and to support some or all of the costs of investment services.

(b) The retention of interest or investment income under paragraph (a) of this section shall not diminish the amount of funds a Tribe/Consortium is entitled to receive under a funding agreement in the year the interest or income is earned or in a subsequent fiscal year.

§ 1000.2155 Can a Tribe/Consortium retain savings from programs?

Yes, notwithstanding any provision of an appropriations Act, the Tribe/Consortium may retain savings for each fiscal year during which a funding agreement is in effect. A Tribe/Consortium must use any savings that it realizes under a funding agreement, including a construction contract:

(a) To provide additional services or benefits under the funding agreement; or

(b) As carryover; and

(c) For purposes of this subpart only, programs administered by BIA using appropriations made to other Federal agencies, such as the U.S. Department of Transportation, will be treated in accordance with paragraph (b) of this section.

§ 1000.2160 Can a Tribe/Consortium carry over funds not spent during the term of the funding agreement?

(a) Yes. Notwithstanding any provision of an appropriations Act, all funds paid to a Tribe/Consortium in accordance with a compact or funding agreement shall remain available until expended.

(b) If a Tribe/Consortium elects to carry over funding from one year to the next, the carryover shall not diminish the amount of funds the Tribe/Consortium is entitled to receive under a funding agreement in that fiscal year or any subsequent fiscal year.

(c) A Tribe/Consortium may elect to carry over funding from one year to the next without any additional justification or document necessary for expenditure.

§ 1000.2165 After a non-BIA funding agreement has been executed and the funds transferred to a Tribe/Consortium, can a bureau request the return of unexpended funds?

The non-BIA bureau may request the return of unexpended funds already transferred to a Tribe/Consortium only under the following circumstances:

(a) Retrocession;

(b) Reassumption;

(c) Construction, when there are special legal requirements; or

(d) As otherwise provided for in the funding agreement.

§ 1000.2170 How can a person or group appeal a decision or contest an action related to a program operated by a Tribe/Consortium under a funding agreement?

(a) *BIA Programs.* A person or group who is aggrieved by an action of a Tribe/Consortium with respect to programs that are provided by the Tribe/Consortium under a funding agreement must follow Tribal administrative procedures.

(b) *Non-BIA Programs.* Procedures will vary depending on the program. Aggrieved parties should initially contact the local program administrator (the Indian program contact). Thereafter, appeals will follow the relevant bureau's appeal procedures.

§ 1000.2175 Must Tribes/Consortia comply with the Secretarial approval requirements of 25 U.S.C. 81; 82a; and 476 regarding professional and attorney contracts?

No, for the period that an agreement entered into under this part is in effect, the provisions of 25 U.S.C. 81, 82a, and 476, do not apply to attorney and other professional contracts by participating Tribes/Consortia.

§ 1000.2180 Are funds awarded under a funding agreement non-Federal funds for the purpose of meeting matching or cost participation requirements?

(a) Yes, in accordance with 25 U.S.C. 5363(j), all funds provided under funding agreements shall be treated as non-Federal funds for purposes of meeting matching requirements under any other Federal law.

(b) Alternatively, a Tribe/Consortium may elect under 25 U.S.C. 5363(l) to incorporate 25 U.S.C. 5325(j) in their funding agreement for the purpose of meeting matching or cost participating requirements under other Federal and non-Federal programs.

§ 1000.2185 Does Indian preference apply to services, activities, programs, and functions performed under a funding agreement?

Yes, in accordance with section 25 U.S.C. 5307(b) and (c), as amended, Tribal law governs Indian preference in employment in contracting and subcontracting in performance of a funding agreement.

§ 1000.2190 Do the wage and labor standards in the Davis-Bacon Act apply to Tribes and Tribal Consortia?

No, wage and labor standards of the Davis-Bacon Act, 40 U.S.C. 3141 through 3144, 3146 and 3147, do not apply to employees of Tribes and Tribal Consortia. Davis-Bacon wage and labor standards do apply to all other laborers and mechanics employed by contractors and subcontractors of a Tribe/Consortium in the construction, alteration, and repair (including painting or redecorating) of buildings or other facilities in connection with a funding agreement.

§ 1000.2195 Can a Tribe/Consortium use Federal supply sources in the performance of a funding agreement?

Yes. A Tribe/Consortium and its employees may use Federal supply sources (including lodging, airline, interagency motor pool vehicles, and other means of transportation) or other Federal resources (including supplies, services and resources available to the Secretary under any procurement contracts in which the Department is eligible to participate), to the same extent as if the Tribe/Consortium were a Federal agency. While implementation of this provision is the responsibility of the General Services Administration, the Department shall assist the Tribes/Consortia to resolve any barriers to full implementation that may arise to the fullest extent possible.

§ 1000.2200 Does the Prompt Payment Act (31 U.S.C. 3901) apply to a BIA funding Agreement?

Yes. The Prompt Payment Act (31 U.S.C. 3901) applies to a BIA funding agreement.

§ 1000.2205 Does the Prompt Payment Act (31 U.S.C. 3901) apply to a non-BIA program funding agreement?

Yes, unless restricted by a funding agreement, the Prompt Payment Act shall apply to a non-BIA funding agreement.

§ 1000.2210 Is a Tribe/Consortium obligated to continue performance under a compact or funding agreement if the Secretary does not transfer sufficient funds?

A Tribe/Consortium shall not be obligated to continue performance that requires an expenditure of funds in excess of the amount of funds transferred under a compact or funding agreement. If at any time the Tribe/Consortium has reason to believe that the total amount provided for a specific activity under a compact or funding agreement is insufficient, the Tribe/Consortium shall provide reasonable notice of such insufficiency to the Secretary. If, after notice, the Secretary does not increase the amount of funds transferred under the funding agreement, the Tribe/Consortium may suspend performance of the activity until such time as additional funds are transferred. Nothing in 25 U.S.C. 5368(l) reduces any programs, services, or funds of, or provided to, another Tribe/Consortium.

Subpart R—Appeals**§ 1000.2301 What is the purpose of this subpart?**

This subpart prescribes the process Tribes/Consortia may use to resolve disputes with the Department arising before or after execution of a funding agreement or compact and certain other disputes related to self-governance.

§ 1000.2305 How must disputes be handled?

(a) The Department encourages its bureaus to seek all means of dispute resolution before the Tribe/Consortium files a formal appeal(s).

(b) Disputes shall be addressed through government-to-government discourse. This discourse must be respectful of government-to-government relationships and relevant Federal–Tribal agreements, treaties, judicial decisions, and policies pertaining to Indian Tribes, including, but not limited to, such applicable principles described in subpart I.

(c) All disputes arising under this rule, including, but not limited to, disputes related to decisions described in § 1000.2345, may use non-binding informal alternative dispute resolution, such as an informal conference or assistance of the Department's Office of Collaborative Action and Dispute Resolution (CADR), at the option of the Tribe/Consortium. The Tribe/Consortium may ask for this alternative dispute resolution any time before the issuance of an initial decision of a formal appeal. The appeals timetable will be suspended while alternative dispute resolution is pending.

§ 1000.2310 Does a Tribe/Consortium have any options besides an appeal?

Yes, the Tribe/Consortium may request a non-binding alternative dispute resolution process—without the need for a formal appeal. Or, the Tribe/Consortium may, in lieu of filing an administrative appeal under this subpart, file an action in an appropriate Federal court under 25 U.S.C. 5331, or any other applicable law.

§ 1000.2315 What is the Secretary's burden of proof for appeals in this subpart?

As required by sections 25 U.S.C. 5366(d) and 5375, in any administrative action, appeal, or civil action for judicial review of any decision made by the Secretary under this title, the Secretary shall have the burden of proof:

- (a) To demonstrate by a preponderance of the evidence the validity of the grounds for a reassumption under 25 U.S.C. 5366(b);
- (b) To clearly demonstrate the validity of the grounds for rejecting a final offer made under 25 U.S.C. 5366(c); and
- (c) Except as provided in 25 U.S.C. 5366(d), to demonstrate by a preponderance of the evidence the validity of the grounds for a decision made and the consistency of the decision with the requirements and policies of the Act.

Informal Conference**§ 1000.2320 How does a Tribe/Consortium request an informal conference?**

The Tribe/Consortium shall file its request for an informal conference with the office of the person whose decision it is appealing, within 30 days of the day it receives the decision.

(a) The Tribe/Consortium may either hand-deliver the request for an informal conference to that person's office, email the request, or mail it by certified mail, return receipt requested.

(b) If the Tribe/Consortium mails the request, it will be considered filed on the date the Tribe/Consortium mailed it by certified mail. If the Tribe/

Consortium emails the request, it will be presumed received on the next business day following transmission from the Tribe/Consortium.

(c) The document should be clearly identified as "Request for Informal Conference".

§ 1000.2325 How is an informal conference held?

For all purposes relating to these informal conference procedures, the parties are the designated representatives of the Tribe/Consortium and the bureau.

(a) The informal conference shall be held within 30 days of the date the request was received, unless the parties agree on another date.

(b) If possible, at the option of the Tribe/Consortium, the informal conference will be held at the Tribe's/Consortium's office. If the meeting cannot be held at the Tribe's/Consortium's office, the parties must agree on an alternative meeting place or forum, including but not limited to telephonic or virtual meeting forums. If the alternative meeting place is more than fifty miles from the Tribe's/Consortium's office, the Secretary must arrange to pay transportation costs and per diem for incidental expenses to allow for adequate representation of the Tribe/Consortium.

(c) The informal conference shall be conducted by a designated representative of the Secretary.

(d) Only the parties may make presentations at the informal conference.

(e) The informal conference is not a hearing on the record. Nothing said during an informal conference may be used by either party in litigation.

§ 1000.2330 What happens after the informal conference?

(a) Within 10 business days of the informal conference, the person who conducted the informal conference shall prepare and mail to the Tribe/Consortium a brief summary of the informal conference. The summary must include any agreements reached or changes from the initial position of the bureau or the Tribe/Consortium.

(b) Every summary of an informal conference must contain the following language:

Within 30 days of the receipt of the summary from the informal conference, you may file an appeal of the initial decision of the Department of the Interior agency in accordance with subpart R of 25 CFR part 1000. Alternatively, you may file an action in Federal court pursuant to 25 U.S.C. 5331.

(c) If in its judgment no agreement was reached, the Tribe/Consortium may choose to appeal the initial decision, as modified by any changes made as a result of the informal conference, under this subpart.

Post-Award Disputes

§ 1000.2335 How may a Tribe/Consortium appeal a decision made after the funding agreement or compact or an amendment to a funding agreement or compact has been signed?

With the exception of certain decisions concerning immediate reassumption (*see* §§ 1000.2405 through 1000.2430), the Tribe/Consortium may appeal post-award administrative decisions to the Civilian Board of Contract Appeals (CBCA).

§ 1000.2340 What statutes and regulations govern resolution of disputes concerning signed funding agreements or compacts (and any signed amendments) that are appealed to the CBCA?

25 U.S.C. 5331 and the regulations at 25 CFR 900.216 through 900.230 apply to disputes concerning signed funding agreements and compacts (and any signed amendments), that are appealed to the CBCA, except that any references to the U.S. Department of Health and Human Services are inapplicable. For purposes of such appeals:

(a) The terms “contract” and “self-determination contract” mean compacts and funding agreements entered into under the Act; and

(b) The term “Tribe” means “Tribe/Consortium”.

Pre-Award Disputes

§ 1000.2345 What decisions may a Tribe/Consortium appeal under §§ 1000.2345 through 1000.2395?

Decisions that a Tribe/Consortium may appeal include, but are not limited to:

(a) A decision to reject a final offer, or a portion thereof, under 25 U.S.C. 5366(c);

(b) A decision to reject a proposed amendment to a compact or funding agreement, or a portion thereof, under 25 U.S.C. 5366(c);

(c) A decision that provisions in a retained funding agreement and/or compact are directly contrary to any express provision of the Act;

(d) A decision to reassume a compact or funding agreement, in whole or in part, under 25 U.S.C. 5366(b), except for immediate reassumptions under 25 U.S.C. 5366(b)(3);

(e) A decision to reject a final construction project proposal, or a portion thereof, under 25 U.S.C. 5367(g) and subpart K of this part; and

(f) For construction project agreements carried out under 25 U.S.C. 5367, a decision to reject project planning documents, design documents, or proposed amendments submitted by a Tribe/Consortium under 25 U.S.C. 5367(h)(1) and subpart K of this part.

§ 1000.2350 What decisions may not be appealed under §§ 1000.2345 through 1000.2395?

Decisions that may not be appealed under §§ 1000.2345 through 1000.2395 shall be limited to:

(a) Disputes arising under the terms of a compact, funding agreement, or construction project agreement that has been awarded;

(b) Disputes arising from immediate reassumptions under 25 U.S.C. 5366(b)(3) and § 1000.1750 which are covered under §§ 1000.2405 through 1000.2430;

(c) Decisions relating to planning and negotiation grants (subparts C and D of this part) and certain discretionary grants not awarded under title IV (25 CFR part 2);

(d) Decisions regarding requests for waivers of regulations (subpart J of this part);

(e) Decisions regarding construction (subpart K of this part) addressed in § 1000.1455; and

(f) Decisions under any other statute, such as the Freedom of Information Act and the Privacy Act (*see* 43 CFR part 2).

§ 1000.2351 To Whom may a Tribe/Consortia appeal a decision under § 1000.2345?

(a) *Filing an appeal.* A Tribe/Consortium may elect to file a dispute under § 1000.2345 with either the bureau head/Assistant Secretary or IBIA in accordance with this subpart. However, the Tribe/Consortium may not avail itself to both paths for the same dispute.

(b) *Bureau head/Assistant Secretary appeal.* Unless the initial decision being appealed is one that was made by the bureau head (those appeals are forwarded to the appropriate Assistant Secretary—*see* § 1000.2360(c), of this subpart), the bureau head will decide initial appeals relating to these pre-award matters, that include but are not limited to disputes regarding:

(1) Eligibility to participate in self-governance;

(2) Decisions declining to provide requested information as addressed in subpart H;

(3) Allocations of program funds when a dispute arises between a Consortium and a withdrawing Tribe; and

(4) Inherently Federal functions and associated funding.

(c) *IBIA.* The Tribe/Consortium may choose to forego the administrative appeal through the bureau or the Assistant Secretary, as described in paragraph (b) of this section, and instead appeal directly to IBIA.

§ 1000.2355 How does a Tribe/Consortium know where and when to file an appeal?

Every decision in any of the areas listed in § 1000.2345 must contain information which shall tell the Tribe/Consortium where and when to file the Tribe's/Consortium's appeal. Each decision shall include the following statement:

Within 30 days of the receipt of this decision, you may request non-binding informal alternative dispute resolution, such as an informal conference under § 1000.2320, or file an appeal of the initial decision of the Department in accordance with subpart R of this part. Alternatively, you may file an action in Federal court pursuant to 25 U.S.C. 5331.

§ 1000.2357 Which officials is the appropriate bureau head or Assistant Secretary for purposes of subpart R?

(a) Table 1 to this paragraph (a) indicates the appropriate bureau head, for purposes of subpart R, to whom a Tribe/Consortium may file its initial request for appeal when exercising its appeal rights to the bureau head/Assistant Secretary under § 1000.2351 for any BIA program:

TABLE 1 TO PARAGRAPH (a)

Bureau whose initial decision is being appealed	Appropriate bureau head
BIA	Director, BIA.
BIE	Director, BIE.
BTFA	Director, BTFA.
The Office of the Assistant Secretary—Indian Affairs or OSG.	The Assistant Secretary for Indian Affairs.

(b) The appropriate Assistant Secretary for any BIA Program, for purposes of § 1000.2370, shall be the Assistant Secretary for Indian Affairs.

(c) If a Tribe/Consortium elects to exercise its appeal rights to the bureau head/Assistant Secretary under § 1000.2351 for any non-BIA Programs then:

(1) The appropriate bureau head, for purposes of this subpart R, shall be the director of the appropriate bureau which issued the initial adverse decision, including the commissioner of the Bureau of Reclamation.

(2) The appropriate Assistant Secretary, for purposes of this subpart R, shall be the Assistant Secretary who

oversees the appropriate non-BIA bureau which issued the initial adverse decision.

Appeals to Bureau Head/Assistant Secretary

§ 1000.2360 When and how must a Tribe/Consortium appeal an adverse pre-award decision to the bureau head/Assistant Secretary?

(a) If a Tribe/Consortium wishes to exercise its appeal rights to the bureau head/Assistant Secretary under § 1000.2351, it must make a written request for review to the appropriate bureau head within 30 days of receiving the initial adverse decision or the conclusion of any non-binding informal alternative dispute resolution process. In addition, the Tribe/Consortium may request the opportunity to have a meeting with appropriate bureau personnel in an effort to clarify the matter under dispute before a formal decision by the bureau head.

(b) The written request for review should include a statement describing its reasons for a review, with any supporting documentation, or indicate that such a statement or documentation will be submitted within 30 days. A copy of the request must also be sent to the Director of the OSG.

(c) If the initial decision was made by the bureau head, any appeal shall be directed to the appropriate Assistant Secretary. If a Tribe does not request a review within 30 days of receipt of the decision, the initial decision will be final for the Department.

§ 1000.2365 When must the bureau head (or appropriate Assistant Secretary) issue a final decision in the pre-award appeal?

Within 30 days of receiving the request for review and the statement of reasons described in § 1000.2360, the bureau head or, where applicable, the appropriate Assistant Secretary must:

- (a) Issue a written final decision stating the reasons for the decision; and
- (b) Send the decision to the Tribe/Consortium.

§ 1000.2370 When and how will the Assistant Secretary respond to an appeal by a Tribe/Consortium?

The appropriate Assistant Secretary will decide an appeal of any initial decision made by a bureau head (*see* § 1000.2360). If the Tribe/Consortium has appealed the bureau's initial adverse decision of the bureau to the bureau head and the bureau head's decision on initial appeal is contrary to the Tribe's/Consortium's request for relief, or the bureau head fails to make a decision within 30 days of receipt by the bureau of the Tribe's/Consortium's

initial request for review and any accompanying statement and documentation, the Tribe's/Consortium's appeal will be sent automatically to the appropriate Assistant Secretary for decision. The Assistant Secretary must either concur with the bureau head's decision or issue a separate decision within 60 days of receipt by the bureau of the Tribe's/Consortium's initial request for review and any accompanying statement and documentation. The decision of the Assistant Secretary is final for the Department.

Appeals to IBIA

§ 1000.2375 When and how must a Tribe/Consortium appeal an adverse pre-award decision to the IBIA?

(a) If a Tribe/Consortium wishes to exercise its appeal rights to the IBIA under § 1000.2351, it must file a notice of appeal to the IBIA within 30 days of receiving the initial decision or the conclusion of any non-binding informal alternative dispute resolution process.

(b) The Tribe/Consortium may either hand-deliver the notice of appeal to the IBIA, or mail it by certified mail, return receipt requested. If the Tribe/Consortium mails the Notice of Appeal it will be considered filed on the date the Tribe/Consortium mailed it by certified mail. The Tribe/Consortium should mail the notice of appeal to: Interior Board of Indian Appeals, Office of Hearings and Appeals, U.S. Department of the Interior, 801 N Quincy Street, Suite 300, Arlington, VA 22203.

(c) The Notice of Appeal must include:

- (1) A statement describing the Tribe's/Consortium's reasons for a review (including why the Tribe/Consortium thinks the initial decision is wrong and briefly identify the issues involved in the appeal);
- (2) Any supporting documentation;
- (3) If the Tribe/Consortium's Notice of Appeal does not include the items in paragraphs (c)(1) and (2) of this section, an indication that such a statement or documentation will be submitted within 30 days; and
- (4) A statement whether the Tribe/Consortium wants a hearing on the record, or whether the Tribe/Consortium wants to waive its right to a hearing.

(d) The Tribe/Consortium must serve a copy of the notice of appeal upon the official whose decision it is appealing. A copy of the notice of appeal must also be sent to the Director of the OSG. The Tribe/Consortium must certify to the IBIA that it has done so.

(e) The authorized representative of the Secretary will be considered a party to all appeals filed with the IBIA under the Act.

§ 1000.2380 What happens after a Tribe/Consortium files an appeal?

(a) Within 5 days of receiving the Tribe's/Consortium's notice of appeal, the IBIA will decide whether the appeal falls under § 1000.2345. If so, the Tribe/Consortium is entitled to a hearing.

(b) If the IBIA cannot make that decision based on the information included in the notice of appeal, the IBIA may ask for additional statements from the Tribe/Consortium, or from the appropriate Federal agency. If the IBIA asks for more statements, it will make its decision within 5 days of receiving those statements.

(c) If the IBIA decides that the Tribe/Consortium is not entitled to a hearing or if the Tribe/Consortium has waived its right to a hearing on the record, the IBIA will dismiss the appeal and inform the Tribe/Consortium that it is not entitled to a hearing or has waived its right to a hearing.

§ 1000.2385 What procedures apply to Interior Board of Indian Appeals (IBIA) proceedings?

The IBIA may use the procedures set forth in 43 CFR 4.22 through 4.27 as a guide.

§ 1000.2386 What regulations govern resolution of disputes that are appealed to the IBIA?

To the extent not inconsistent with this subpart, the regulations at §§ 900.159 through 900.169 of this title apply to disputes that are appealed to the IBIA, except that any references to the U.S. Department of Health and Human Services are inapplicable. For purposes of such appeals:

- (a) The terms "contract" and "self-determination contract" mean compacts and funding agreements entered into under the Act; and
- (b) The term "Tribe" means "Tribe/Consortium."

§ 1000.2390 Will an appeal adversely affect the Tribe's/Consortium's rights in other compact, funding negotiations, or construction project agreement?

No, a pending appeal will not adversely affect or prevent the negotiation or award of another compact, funding agreement, or construction project agreement.

§ 1000.2395 Will the decision on appeal be available for the public to review?

Yes, the Secretary shall publish all final decisions from the Administrative Law Judge (ALJs) and IBIA under this

subpart. Decisions can be found on the Department's website.

Appeals of an Immediate Reassumption of a Self-Governance Program

§ 1000.2405 What happens in the case of an immediate reassumption under 25 U.S.C. 5366(b)?

If the Secretary immediately reassumes a program under § 1000.1750, the Secretary must comply with §§ 1000.2410 through 1000.2430.

§ 1000.2410 Will there be a hearing?

Yes, unless the Tribe/Consortium waives its right to a hearing in writing. The Deputy Director of the Office of Hearings and Appeals must appoint an ALJ to hold a hearing.

(a) The hearing must be held within 10 days of the date of the notice referred to in § 1000.1750 unless the Tribe/Consortium agrees to a later date.

(b) If possible, the hearing will be held at the office of the Tribe/Consortium. The parties may agree to an alternative meeting place or forum, including but not limited to telephonic or virtual meeting forums. If the hearing is held more than 50 miles from the office of the Tribe/Consortium, the Secretary must arrange to pay transportation costs and per diem for incidental expenses. This will allow for adequate representation of the Tribe/Consortium.

§ 1000.2415 What happens after the hearing?

(a) Within 30 days after the end of the hearing or any post-hearing briefing schedule established by the ALJ, the ALJ must send all parties a recommended decision by certified mail, return receipt requested. The recommended decision shall contain the ALJ's findings of fact and conclusions of law on all the issues. The recommended decision must also state that the Tribe/Consortium has the right to object to the recommended decision.

(b) The recommended decision must contain the following statement:

Within 15 days of the receipt of this recommended decision, you may file an objection to the recommended decision with the IBIA under 25 CFR 1000.2420. An appeal to the IBIA under shall be filed at the following address: Interior Board of Indian Appeals, Office of Hearings and Appeals, U.S. Department of the Interior, 801 N Quincy Street, Suite 300, Arlington, VA 22203. You shall serve copies of your notice of appeal on the Secretary of the Interior, and on the official whose decision is being appealed. You shall certify to the IBIA that you have served these copies. If neither party files an objection to the

recommended decision within 15 days, the recommended decision will become final.

§ 1000.2420 Is the recommended decision always final?

No, any party to the appeal may file precise and specific written objections to the recommended decision, or any other comments, within 15 days of receiving the recommended decision. The objecting party must serve a copy of its objections on the other party. The recommended decision will become final 15 days after the Tribe/Consortium receives the ALJ's recommended decision, unless a written statement of objection is filed with the IBIA during the 15-day period. If no party files a written statement of objections within 15 days, the recommended decision will become final.

§ 1000.2425 If a Tribe/Consortium objects to the recommended decision, what action will the IBIA take?

(a) The IBIA has 15 days from the date the Secretary receives timely written objections to modify, adopt, or reverse the recommended decision. If the IBIA does not modify or reverse the recommended decision during that time, the recommended decision automatically becomes final.

(b) When reviewing the recommended decision, the IBIA may consider and decide all issues properly raised by any party to the appeal, based on the record.

(c) The decision of the IBIA must:

- (1) Be in writing;
- (2) Specify the findings of fact or conclusions of law that are modified or reversed;
- (3) Give reasons for the decision, based on the record; and
- (4) State that the decision is final for the Department.

§ 1000.2430 Will an immediate reassumption appeal adversely affect the Tribe's/Consortium's rights in other self-governance negotiations?

No, a pending appeal will not adversely affect or prevent the negotiation or award of another compact, funding agreement, or construction project agreement.

Equal Access to Justice Act

§ 1000.2435 Does the Equal Access to Justice Act (EAJA) apply to appeals under this subpart?

Yes. EAJA claims against the Department will be heard under 48 CFR 6101.30, 6101.31 (CBCA) and 43 CFR 4.602, 4.604 through 4.628 (Department) and under the Equal Access to Justice Act, 5 U.S.C. 504 and 28 U.S.C. 2412.

Subparts S—Conflicts of Interest

§ 1000.2501 Is a Tribe/Consortium required to have policies in place to address conflicts of interest?

Yes.

(a) A Tribe/Consortium participating in self-governance must ensure that internal measures are in place to address, pursuant to Tribal law and procedures, conflicts of interest in the administration of programs carried out under a compact and funding agreement.

(b) The Tribe/Consortium and the Secretary may agree that using the Tribe's/Consortium's own written code of ethics satisfies the objectives of the personal conflicts and organizational conflicts provisions of this subpart, in whole or in part.

(c) When the Secretary and the Tribe/Consortium agree to use the Tribe's/Consortium's written codes or measures, the funding agreement will reflect that and the agreed-upon provisions shall be followed, rather than the related provisions of this subpart.

§ 1000.2505 What is an organizational conflict of interest?

(a) An organizational conflict of interest arises when, in the administration of programs performed under a compact or funding agreement subject to this part, there is a direct conflict between the financial interests of the Tribe/Consortium and:

- (1) The financial interests of beneficial owners of Indian trust resources;
- (2) The financial interests of the United States relating to trust resources, trust acquisitions, or lands conveyed or to be conveyed under the Alaska Native Claims Settlement Act, 43 U.S.C. 1601 *et seq.*; or
- (3) An express statutory obligation of the United States to third parties. This section only applies if the conflict was not addressed when the funding agreement was first negotiated.

(b) This section only applies where the financial interests of the Tribe/Consortium are significant enough to impair the Tribe's/Consortium's objectivity in carrying out the funding agreement, or a portion of the funding agreement.

(c) This section only applies if the conflict was not addressed when the funding agreement was first negotiated. When a Tribe/Consortium becomes aware of an organizational conflict of interest, the Tribe/Consortium must

§ 1000.2510 What must a Tribe/Consortium do if an organizational conflict of interest arises under a funding agreement?

This section only applies if the conflict was not addressed when the funding agreement was first negotiated. When a Tribe/Consortium becomes aware of an organizational conflict of interest, the Tribe/Consortium must

immediately disclose the conflict to the Secretary.

§ 1000.2515 When must a Tribe/Consortium regulate its employees or subcontractors to avoid a personal conflict of interest?

A Tribe/Consortium must maintain written standards of conduct, pursuant to Tribal law and procedures, to govern officers, employees, and agents (including subcontractors) engaged in functions related to the management of trust assets performed under a compact and funding agreement subject to this part.

§ 1000.2520 What types of personal conflicts of interest involving Tribal officers, employees, or subcontractors would have to be regulated by a Tribe/Consortium?

The Tribe/Consortium must ensure that internal measures are in place that specify that no officer, employee, or agent (including a subcontractor) of the Tribe/Consortium reviews a trust transaction in which that person has a financial or employment interest that conflicts with that of the trust beneficiary, whether the beneficiary is the Tribe/Consortium or an allottee. Interests arising from membership in, or employment by, a Tribe/Consortium or rights to share in a Tribal claim need not be regulated.

§ 1000.2525 What personal conflicts of interest must the standards of conduct regulate?

The personal conflicts of interest standards, established pursuant to Tribal law and procedures, must:

- (a) Prohibit an officer, employee, or agent (including a subcontractor) from participating in the review, analysis, or inspection of trust transactions involving an entity in which such persons have a direct financial interest or an employment relationship;
- (b) Prohibit such officers, employees, or agents from accepting any gratuity, favor, or anything of more than nominal value, from a party (other than the Tribe/Consortium) with an interest the trust transactions under review; and
- (c) Provide for sanctions or remedies for violation of the standards.

Subpart T—Tribal Consultation Process

§ 1000.2601 What is the purpose of this subpart?

- (a) This subpart describes the process for engaging in consultations related to self-governance with Tribes/Consortia.
- (b) The Tribal Consultation Process for self-governance matters described in this subpart is intended to apply to consultations commencing after the

effective date of this rule and supersedes previous self-governance consultation processes used by the Secretary.

§ 1000.2605 When does the Secretary consult with Tribes and Consortia on matters related to self-governance?

On matters related to self-governance, the Secretary shall consult:

- (a) To determine which programs are eligible for negotiation to be included in a funding agreement at the request of a participating Tribe/Consortium;
- (b) To establish programmatic targets to encourage the Department's bureaus to ensure that an appropriate portion of non-BIA programs are available to be included in funding agreements;
- (c) On any Secretarial Action with Tribal Implications, provided that the Secretary incorporate input and requests from Tribes and Consortia on topics for consultation.

§ 1000.2610 What principles should guide consultations with Tribes and Consortia?

To the extent practical and not prohibited by law, consultations with self-governance Tribes/Consortia should satisfy the following principles:

- (a) Consultation recognizes Tribal sovereignty and the Nation-to-Nation relationship between the United States and Tribes and Consortia and acknowledges that the United States holds treaty and trust responsibilities to Tribes and Consortia.
- (b) Consultation is a two-way Nation-to-Nation exchange of information and dialogue between official representatives of the United States and Tribes and Consortia.
- (c) Consultation session methods may include, but are not limited to, in-person meetings, video conferences, teleconferences, and correspondence to discuss a specific issue, and must identify the session as consultation in advance of the scheduled meeting.
- (d) Consultation should include both the elected or appointed official of the Tribe, acting in the official capacity as the leader of the Tribe or Consortia, or designee of the elected or appointed representative, and the Departmental official with authority to decide on the proposed Departmental Action with Tribal Implications, or designee.
- (e) The Secretary shall make good faith efforts to invite Tribes and Consortia to consult early in the planning process and throughout the decision-making process and engage in robust, interactive, pre-decisional, informative, and transparent consultation when planning actions with Tribal implications.
- (f) The Secretary should give meaningful consideration to information

obtained during consultation with Tribes and Consortia.

(g) The Secretary should strive for consensus with Tribes and Consortia through consultation or a mutually desired outcome. It is the policy of the Department to seek consensus with Tribes and Consortia.

(h) Consultation will ensure that applicable information is readily available to Tribes and Consortia.

(i) Consultation will ensure that officials from Tribes and Consortia and Federal officials have adequate time to communicate.

(j) Consultation will ensure that Tribes and Consortia are advised as to how their input influenced the Department's decision-making.

§ 1000.2615 What notice must the Secretary provide to Tribes and Consortia of an upcoming consultation?

(a) The Secretary shall issue a notice of consultation which includes:

- (1) Sufficient information on the topic to be discussed, in an accessible language and format, and context for the consultation topic, to facilitate meaningful consultation;
- (2) Identification of a timeline of the process and possible outcomes for Departmental action under consideration;
- (3) The date, time, and location of the consultation;
- (4) If consulting virtually or by telephone, links to join or register in advance;
- (5) An explanation of any time constraints known to the Department at that time;
- (6) Deadlines for Tribes and Consortia to submit written comments on the topic; and
- (7) The names and contact information for Departmental staff who can provide additional information on the consultation.

(b) The Secretary shall provide notice of at least 30 days to Tribes and Consortia of any planned consultation sessions.

(c) The Secretary shall distribute such notice under this section to each Tribe/Consortium through:

- (1) Email to a point of contact for each Tribe and Consortium; and
- (2) Posting the notice on the website for the Department and/or OSG.

(d) The Secretary should, to the greatest extent practical, provide appropriate, available information on the subject of consultation including, where consistent with applicable law, a proposed agenda, framing paper, and other relevant documents to assist in the consultation process.

§ 1000.2620 Is the Secretary required to allow written comments by Tribes and Consortia following a consultation?

Yes. The Secretary shall allow for a written comment period following the consultation of at least 30 days, unless otherwise directed by law.

§ 1000.2625 What record must the Secretary maintain following a consultation with Tribes and Consortia?

(a) The Secretary shall maintain a record of a consultation with Tribes or Consortia that includes:

(1) A summary of Tribal or Consortia input received;

(2) A general explanation of how Tribes or Consortia input influenced or was incorporated into the agency action; and

(3) If relevant, the general reasoning for why suggestions from Tribes or

Consortia were not incorporated into the agency action or why consensus could not be attained.

(b) The Secretary shall timely disclose the outcome of a consultation and decisions made as a result of the consultation.

(c) The record of consultation does not waive any privilege or other exception to disclosure pursuant to the Freedom of Information Act or its implementing regulations.

§ 1000.2630 How must the Secretary handle confidential or sensitive information provided by Tribes and Consortia during a consultation?

Prior to a consultation, the Secretary shall inform Tribes and Consortia of those Federal laws, including the Freedom of Information Act, that may

require disclosure of information provided by the self-governance Tribe/Consortium during a consultation. To the extent permitted by applicable law, the Secretary shall ensure that such information designated as confidential or sensitive by a Tribe or Consortium is not publicly disclosed. The Department should obtain advance informed consent from Tribes/Consortia for the use of confidential or sensitive information provided, and should inform Tribal representatives that certain Federal laws, including the Freedom of Information Act, may require disclosure of such information.

Bryan Newland,

Assistant Secretary—Indian Affairs.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion

in today's **List of Public Laws**.
Last List December 4, 2024

Public Laws Electronic Notification Service (PENS)

PENS is a free email notification service of newly

enacted public laws. To subscribe, go to https://portalguard.gsa.gov/__layouts/PG/register.aspx.
Note: This service is strictly for email notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.
